RE: Canyon Hills Project  
ENV-2002-2481-EIR  
SCH# 2002091018

**RECEIVED**  
CITY OF LOS ANGELES

JAN 02 2004

ENVIRONMENTAL  
UNIT

I have read the EIR for the Canyon Hills project and believe it to be highly inadequate. It does not go into detail regarding increase in traffic to Foothill Blvd? Have you tried to drive on Foothill Blvd at 5:00pm? It's impossible. The traffic is horrific already. Does the EIR go into any detail about the grading that would need to be done due to the slopes of the mountains? Does this EIR analyze any environmental impacts? No. Does it give any options or alternatives? No. Does it go into any detail about the significant loss of animal habitat or the mature oak trees that will need to be cut down?

186-1  
186-2  
186-3  
186-4  
186-5

I believe that the EIR needs to be re-done. It is inadequate.

Thank you for your consideration.
