**PROPOSED PROJECT:**

Demolition of five, one-story, single-family residences, and the subsequent construction, use, and maintenance of a two-story, 34-foot 4-inch high residential building providing approximately 32,725 square feet of floor area and 21 dwelling units, on an approximately 29,982 square-foot site. The proposed building will provide a total of 66 automobile parking spaces within one subterranean level of parking, 33 bicycle parking spaces, and 4,572 square feet of open space. The project will involve the grading and export of approximately 8,500 cubic yards of soil. Twenty-four, non-protected trees are to be removed. In order to comply with Measure JJJ, and prior to the issuance of a building permit, the applicant will pay a fee to the City's Affordable Housing Trust Fund, in lieu of constructing affordable units within the Project.

Project Design Features (PDFs): (Noise) – Mechanical equipment (i.e., parking structure air vents and rooftop equipment) shall be screened and fully enclosed within a structure capable of reducing noise levels by a minimum of 10 dBA. Barbeques, pools, and spas shall not be permitted within the outdoor courtyard area. Amplified sound systems shall not be permitted within the outdoor courtyard area. Concrete, not metal, shall be used for construction of parking garage ramps, and interior ramps shall be textured to prevent tire squeal at turning points.

The requested entitlement is for a Vesting Zone Change from [Q]R1-1 to [Q]RD1.5-1 in conformance with the Low Medium II Residential land use designation of the adopted Van Nuys – North Sherman Oaks Community Plan. The existing [Q] qualified classification on the zone limits residential building height to a maximum of 35 feet, except for roof structures, and

the proposed [Q]RD1.5-1 zoning will retain the existing maximum height limit of 35 feet, and permit the development of 21 dwelling units.
