Proposed Project:

Redevelopment of the site of the 16-story Hyatt Regency Century Plaza hotel. The project includes the construction of an integrated mixed-use development, providing hotel, residential, commercial and ground-level retail and restaurant uses surrounding an over 1.5-acre publicly accessible plaza (the "Project"). The Proposed Project includes as two different project development options ("Option A" and "Option B") with an alternative ("Alternative 5"). Option A would remove the Existing Hotel and construct two 49-story buildings containing 293 residential dwelling units ("DU") and a mix of office, hotel, and retail uses. Option A would result in a net increase of 684,409 square feet of floor area on the Project Site. Option B would construct a similar mixed-use development but would rehabilitate and integrate the Existing Hotel into the proposed design. Two 46-story buildings would be constructed behind (west of) the Existing Hotel. The south building would contain residential uses only. The north building would include either (1) a mix of office and residential uses (the "Option B With Office Scenario"), or (2) residential units only with no office space (the "Option B Without Office Scenario"). The Option B With Office Scenario would result in a net increase of 774,964 square feet of floor area on the Project Site (including 261 DU). The Option B Without Office Scenario would result in a net increase of 778,682 square feet of floor area on the Project Site (including 353 DU). Both Option A and Option B would include an approximately two-acre publicly accessible plaza that would be surrounded by ground-level retail and restaurant uses. An alternative ("Alternative 5") is also proposed that would reposition the north and south buildings of Option B toward the center of the plaza behind the renovated Existing Hotel ("Rehabilitated Building").
