PUBLIC HEARING

Proposed Project:

Continued operation and maintenance of an existing K - 9th grade private school (Curtis School), consisting of 67,970 square feet of building floor area, and a maximum permitted enrollment of 675 students, and the implementation of a new Curtis School Master Plan, which proposes to reconfigure, remodel and expand the existing educational facilities, with no increase in the maximum permitted enrollment. The Master Plan proposes the demolition of approximately 20,670 square feet of existing buildings and the construction of approximately 82,940 square feet of new school facilities. The project involves the construction of seven (7) new buildings and additions to four (4) existing buildings, resulting in a net increase of 62,270 square feet, for a total project build out of 130,240 square feet, with a total of 223 parking spaces.

Details of the project involve additions to existing educational facilities, including: 2,500 sq. ft. of classroom; 6,150 sq. ft. of library space; 2,300 sq. ft. of administrative office; and 8,200 sq. ft. of ancillary/maintenance facilities. New buildings for construction will include a classroom building of 6,140 sq. ft., a science building of 3,750 sq. ft., a performing arts building of 20,000 sq. ft., a “Pavilion - Back of House” building of 4,300 sq. ft., a gymnasium building of 14,800 sq. ft., an athletics building of 8,600 sq. ft., and a dining facility of 6,200 sq. ft. These additional campus buildings will provide up to 10 additional specialty classrooms, for a total of up to 48 classrooms at build out, but no additional homeroom classrooms. A redesigned athletic field and parking area, as well as a secondary limited access road from Mulholland Drive, utilizing an existing California Department of Transportation (Caltrans) service road, are proposed. Grading for the entire project would require a total of 149,084 cubic yards of earth to be moved, including 12,681 cubic yards of off-site grading within the Caltrans property. The majority of the grading is proposed to facilitate the reconfiguration of the existing, graded athletic field and surface parking lot, essentially flipping their locations in order to reposition the athletic fields to be adjacent to the main campus academic and athletic buildings. A total of 58,896 cubic yards of earth would be exported from both the project site and the adjacent Caltrans property. Proposed parking includes approximately 211 spaces within the redesigned surface parking lot, and 12 subterranean spaces under the planned basketball courts, to be accessed via the proposed secondary limited access road across Caltrans property. Additionally, approximately 15 retaining walls of varying heights from 0 to 10 feet would be installed on-and off-site adjacent to portions of the access road, the arts building, the athletic fields and the parking lot.

School staffing modifications include the employment of up to 50 faculty and staff members in addition to the existing 68, for a total of 118 faculty/staff. Classroom hours will be from 8:15 a.m. to 3:15 p.m., with daily afterschool activities and occasional weekend activities. Office hours are from 7:00 a.m. to 7:00 p.m., Monday through Friday. Special events would not commence before 7:00 a.m. and will end by 9:00 p.m., Monday through Friday, and would end by 5:00 p.m. on weekends or holidays. No operational programming changes or increase in maximum enrollment is proposed for the existing, private elementary school approved for 675 students, on an approximately 27-acre site.

Note: A haul route hearing to address construction phase impacts related to the export of soil from the project site would be conducted by the Department of Building and Safety at a future date prior to the issuance of any grading permits.
