

Table 1
Trees Greater than 12 inches DBH Effected by the Project

Tree No.	Botanic Name	Common Name	Trunk Diameter (single trunk)		Equivalent Trunk Diameter (multi-trunk)	
1A	<i>Ficus sp.*</i>	Ornamental Fig	12.0	in		
1D	<i>Ficus sp.*</i>	Ornamental Fig	12.0	in		
1E	<i>Ficus sp.*</i>	Ornamental Fig	14.5	in		
1F	<i>Ficus sp.*</i>	Ornamental Fig	14.2	in		
1G	<i>Ficus sp.*</i>	Ornamental Fig	16.8	in		
3A	<i>Pinus canariensis</i>	Canary Island Pine	18.0	in		
5A	<i>Cocculus laurifolius</i>	Laurelleaf Snailseed			13.2	in
9A	<i>Schinus terebinthifolius</i>	Brazilian Pepper Tree			18.1	in
9C	<i>Schinus terebinthifolius</i>	Brazilian Pepper Tree			12.1	in
9D	<i>Schinus terebinthifolius</i>	Brazilian Pepper Tree			12.1	in
9E	<i>Schinus terebinthifolius</i>	Brazilian Pepper Tree			13.3	in
9G	<i>Schinus terebinthifolius</i>	Brazilian Pepper Tree			19.3	in
12Q	<i>Ficus sp.*</i>	Ornamental Fig	13.0	in		
12R	<i>Ficus sp.*</i>	Ornamental Fig	13.0	in		
12S	<i>Ficus sp.*</i>	Ornamental Fig	15.7	in		
13A	<i>Ficus sp.*</i>	Ornamental Fig			22.2	in
13B	<i>Ficus sp.*</i>	Ornamental Fig			21.8	in
13C	<i>Ficus sp.*</i>	Ornamental Fig			22.2	in
13D	<i>Ficus sp.*</i>	Ornamental Fig			22.3	in
13E	<i>Ficus sp.*</i>	Ornamental Fig			23.6	in
14B	<i>Pyrus kawakamii</i>	Evergreen Pear			14.2	in
15A	<i>Ficus sp.*</i>	Ornamental Fig			19.6	in
15B	<i>Ficus sp.*</i>	Ornamental Fig			16.4	in
15C	<i>Ficus sp.*</i>	Ornamental Fig			20.9	in
15D	<i>Ficus sp.*</i>	Ornamental Fig			25.9	in
15E	<i>Ficus sp.*</i>	Ornamental Fig			27.4	in
15F	<i>Ficus sp.*</i>	Ornamental Fig			28.4	in
15G	<i>Ficus sp.*</i>	Ornamental Fig			21.5	in
16A	<i>Pyrus kawakamii</i>	Evergreen Pear			14.2	in

Source: Envicom Corporation, June 13, 2001

The above trees were surveyed on June 13, 2001. All of the trees listed occur within the development zone and will be removed for the proposed project. Trunk diameters were measured at 4.5 feet above ground (Diameter at Breast Height, or DBH). For multi-trunk trees, an equivalent trunk diameter was calculated from the sum of the cross section areas of each stem (or the largest six stems).

* Identification of *Ficus* species can be determined when fruit ripens in late summer. *Ficus macrophylla* (Moreton Bay Fig) has reddish-brown to purple figs with paler spots, 1 inch in diameter. *Ficus rubigosa* (Rustyleaf Fig) has yellow figs, 1/2 inch in diameter.
