RE: Cultural/Archaeological Resources Records Search for the 5901 Sunset Boulevard Project, City of Los Angeles, California

Dear Ms. Eyestone-Jones,

As per your request received on October 1, 2013, a records search was conducted for the above referenced project. The search includes a review of all recorded archaeological sites within a 1/2-mile radius of the project site as well as a review of cultural resource reports on file. In addition, the California Points of Historical Interest (SPHI), the California Historical Landmarks (SHL), the California Register of Historical Resources (CAL REG), the National Register of Historic Places (NRHP), the California State Historic Resources Inventory (HRI), and the City of Los Angeles Historic-Cultural Monuments (LAHCM) listings were reviewed for the above referenced project site. The following is a discussion of the findings.

Due to the sensitive nature of cultural resources, archaeological site locations are not released.

Hollywood, CA USGS 7.5' Quadrangle

ARCHAEOLOGICAL RESOURCES:

One archaeological site (19-003545) has been identified on our maps within a 1/2-mile radius of the project site. No sites are located within the project site. No sites are listed on the Archaeological Determination of Eligibility (DOE) list. This does not preclude the potential for archaeological sites to be identified during project activities. No isolates have been identified within a 1/2-mile radius of the project site. No isolates are located within the project site.

HISTORIC BUILT-ENVIRONMENT RESOURCES:

Forty-seven above-ground historic resources (19-167087, 19-167272, 19-167589, 19-167787, 19-167814, 19-167817, 19-167818, 19-167819, 19-167820, 19-167821, 19-167825, 19-167950, 19-167953, 19-167972, 19-167979, 19-167980, 19-167982, 19-167983, 19-167984, 19-168084, 19-168117, 19-168145, 19-168633, 19-169290, 19-169295, 19-169296, 19-169298, 19-169316, 19-169359, 19-169360, 19-174109*, 19-174178, 19-175415, 19-176308, 19-176314, 19-176738, 19-186730, 19-187040, 19-187103, 19-187319, 19-187437, 19-187897, 19-189877, 19-18999, 19-190048) have been identified on our maps within a ½-mile radius of the project site. One above-ground historic resource is located within the project site.

(* = Located within the project site)

ADDITIONAL CULTURAL RESOURCE LISTINGS:

The **California Historic Resources Inventory (HRI)** lists one hundred and sixty-three properties that have been evaluated for historical significance within a ¼-mile radius of the project site (**see enclosed list**). These are additional resources that are listed in the Historic Properties Data file and are located either within the project site or within the search radius.

The **California Point of Historical Interest (SPHI)** of the Office of Historic Preservation, Department of Parks and Recreation, lists no properties within a ¼-mile radius of the project site.

The **California Historical Landmarks (SHL)** of the Office of Historic Preservation, Department of Parks and Recreation, lists no properties within a ¼-mile radius of the project site.

The **California Register of Historical Resources (CAL REG)** lists fifty-nine properties within a ¼-mile radius of the project site (**+see enclosed list**). These are properties determined to have a National Register of Historic Places Status of 1 or 2, a California Historical Landmark numbering 770 and higher, or a Point of Historical Interest listed after 1/1/1998.

The **National Register of Historic Places (NRHP)** lists one property within a ½-mile radius of the project site (***see enclosed list**).

The **City of Los Angeles Historic-Cultural Monuments (LAHCM)** lists no properties within the project site.

HISTORIC MAP REVIEW

Santa Monica, CA (1902 & 1921) 15' USGS - indicated that in 1902, there was little to no visible development within the project site; however, there were four roads and numerous buildings within the vicinity of the project area. The Hollywood and Cahuenga Valley Railroad ran through the project area. Historic place names nearby included Hollywood, Colegrove, and Prospect Park. In 1921, there was a significant amount of development within the vicinity of the project area with the project site now being located within a dense urban environment. There were numerous roads and buildings and what appeared to be one building within the project site. The railroad is

no longer visible running through the vicinity of the project area. Historic place names nearby included Hollywood, Colegrove, Prospect Park, and Hillhurst Park.

PREVIOUS CULTURAL RESOURCES INVESTIGATIONS:

Twenty-six studies (LA2451, LA4909 , LA5095, LA6157, LA6811, LA7377, LA7562, LA7565, LA7566, LA7992, LA8020, LA8077, LA8251, LA8305, LA9348, LA9404, LA9546, LA10149, LA10276, LA10278, LA10507, LA10915, LA11569, LA11797*, LA12017, LA12158) have been conducted within a ½-mile radius of the project site. Of these, one is located within the project site. There are sixteen additional investigations located on the Hollywood, CA 7.5' USGS Quadrangle that are potentially within a ½-mile radius of the project site. The reports are not mapped due to insufficient locational information.

(* = Located within the project site)

RECOMMENDATIONS

No archaeological studies have been conducted for the project site and no known archaeological sites have been recorded at the project site. Furthermore, it appears that most of the natural ground surface within the study area is obscured by urban development; consequently, archaeological surface finds would be highly unlikely. Due to the lack of cultural resource studies for the project site and in order to avoid damaging any unidentified cultural resources, a qualified archaeologist should be retained to monitor all ground disturbing activities. Additionally, an art-deco style building designed by Gilbert C. Underwood once occupied the site. The recorded structure (19-174109) was built in 1936, and appears to have been removed. It is recommended that any additional historic properties (45 years and older) in the area of potential effect be identified, recorded, and evaluated for local, state, or national significance prior to the approval of project plans. Finally, the Native American Heritage Commission should be consulted to identify if any additional traditional cultural properties or other sacred sites are known to be in the area.

The professional consultant you retain may request the records search map, archaeological site records, and bibliography from the Information Center referencing the SCCIC number listed above for a fee (per the fee schedule). For your convenience, you may find a professional consultant* at www.chrisinfo.org. Any resulting reports by the qualified consultant should be submitted to the South Central Coastal Information Center as soon as possible.

*The SCCIC does not endorse any particular consultant and makes no claims about the qualifications of any person listed. Each consultant on this list self-reports that they meet current professional standards.

If you have any questions regarding the results presented herein, please contact the office at 657.278.5395 Monday through Thursday 9:00 am to 3:30 pm.

Should you require any additional information for the above referenced project, reference the SCCIC number listed above when making inquiries. Requests made after initial invoicing will result in the preparation of a separate invoice.

Sincerely,
SCCIC

re: Paleontological resources for the proposed 5901 Sunset Boulevard Project, in the City of
Los Angeles, Los Angeles County, project area

Dear Stephanie:

I have conducted a thorough check of our paleontology collection records for the locality and specimen data for the proposed 5901 Sunset Boulevard Project, in the City of Los Angeles, Los Angeles County, project area as outlined on the portion of the Hollywood topographic quadrangle map that you sent to me on 26 September 2013. We do not have any fossil vertebrate localities that lie directly within the boundaries of the proposed project area, but we do have localities nearby that occur in the same sedimentary deposits that occur on the project property.

Surface deposits throughout the entire proposed project area consist of soil on top of terrestrial older Quaternary Alluvium, derived as alluvial fan deposits from the Hollywood Hills immediately to the north. The uppermost layers of these deposits in the area typically do not contain significant fossil vertebrate remains. Just east-northeast east of the proposed project area east of the Hollywood Freeway (Highway 101), however, we have four vertebrate fossil localities, LACM 6297-6300, collected from these Late Pleistocene deposits at depths between 47 and 80 feet below the surface along Hollywood Boulevard between the Hollywood Freeway (Highway 101) and Western Avenue during excavations for the Metrorail Red Line tunnels and stations. Fossil horse, *Equus*, bison, *Bison*, camel, *Camelops*, and mastodon, *Mammut americanum* specimens were recovered from these localities.

Further afield, especially to the south-southwest near the Rancho La Brea asphalt deposits in the Hancock Park region, fossil vertebrates have been recovered at shallower depths. Our closest vertebrate fossil locality in these older Quaternary sediments at shallow depth is LACM 5845, south-southeast of the proposed project area near the intersection of Western Avenue and Council Street, that produced a specimen of fossil mastodon, *Mammutidae*, at a depth of only 5-6 feet below the surface. To the southeast of the proposed project area, east-northeast of locality LACM 5845 at about the intersection of Madison Avenue and Middlebury Street, our vertebrate fossil locality LACM 3250 produced a fossil specimen of mammoth, *Mammuthus*, at a depth of about eight feet below street level. To the south-southwest of the proposed project area, near the intersection of Sierra Bonita Avenue and Oakwood Avenue, our vertebrate fossil locality LACM 3371 produced specimens of fossil bison, *Bison antiquus*, at a depth of 12 feet below the surface.

Surface grading or excavations at very shallow depth in the uppermost layers of soil and Quaternary deposits in the proposed project area are not likely to uncover significant vertebrate fossils. Deeper excavations, however, may well encounter significant remains of fossil vertebrates. Any substantial excavations in the proposed project area, therefore, should be monitored closely to quickly and professionally recover any vertebrate fossils without impeding development. Any fossils recovered during mitigation should be deposited in an accredited and permanent scientific institution for the benefit of current and future generations.

This records search covers only the vertebrate paleontology records of the Natural History Museum of Los Angeles County. It is not intended to be a thorough paleontological survey of the proposed project area covering other institutional records, a literature survey, or any potential on-site survey.

Sincerely,
