**NOTICE OF PREPARATION OF A DRAFT ENVIRONMENTAL IMPACT REPORT  
AND NOTICE OF SCOPING MEETING FOR THE BOYLE HEIGHTS  
COMMUNITY PLAN UPDATE**

**TO:** Agencies, Organizations, and Interested Parties

**DATE:** September 2, 2016

The City of Los Angeles Department of City Planning (DCP), as the Lead Agency under the California Environmental Quality Act (CEQA) will prepare an Environmental Impact Report (EIR) for the proposed Boyle Heights Community Plan Update project (Community Plan Update or "CPU"), which is further described below. The City is requesting identification of environmental issues and information that you or your organization believes should be considered in the EIR.

**REVIEW AND RESPONSE PERIOD:** September 2, 2016 through October 7, 2016

**NOTICE OF SCOPING MEETING:** Pursuant to California Public Resources Code Section 21083.9 and California Code of Regulations, Title 14 ("CEQA Guidelines") section 15082(c) the Lead Agency will conduct a scoping meeting for the purpose of soliciting oral and written comments from interested parties requesting notice, responsible agencies, agencies with jurisdiction by law, trustee agencies, and involved federal agencies, as to the appropriate scope and content of the EIR.

**SCOPING MEETING:** The City will hold a scoping meeting for the Proposed Plan to receive comments on the scope and content of the proposed EIR. You are welcome to attend the meeting and present environmental information that you believe should be considered in the EIR. The scoping meeting is scheduled as follows:

**Date:** September 13, 2016

**Time:** 6PM-8:30PM

**Place:** Boyle Heights City Hall, 2130 E. 1<sup>st</sup> Street, Los Angeles, 90033

*As a covered entity under Title II of the Americans with Disabilities Act, the City of Los Angeles does not discriminate. The meeting facility and its parking are wheelchair accessible. Sign language interpreters, assistive listening devices, or other auxiliary aides and/or services may be provided upon request. Other services, such as translation between English and other languages, may also be provided upon request. To ensure availability of services, please make your request no later than three working days (72 hours) prior to the meeting by calling Kiran Rishi at 213-978-1169.*

**RESPONSIBLE AND TRUSTEE AGENCIES:** The City requests your agency's views on the scope and content of the environmental information relevant to your agency's statutory responsibilities in connection with the Proposed Plan, in accordance with the CEQA Guidelines, Section 15082(b). Your agency will need to use the EIR prepared by the City when considering any permits that your agency

must issue or other project approvals. As such, your responses to this Notice of Preparation (NOP), at a minimum shall identify: (1) The significant environmental issues and reasonable alternative and mitigation measures that your agency will need to have explored in the EIR; and (2) Whether your agency will be a responsible or trustee agency for this project.

**PROJECT LOCATION:** The Boyle Heights Community Plan Area (CPA) is located immediately east of Downtown and the Los Angeles River, and flanks the eastern boundary of the City of Los Angeles. Its boundaries are approximately defined by the San Bernardino Freeway/Interstate 10 (10 Freeway) and Marengo Street on the north, the Union Pacific and Santa Fe Railroad tracks on the south, Indiana Street on the east, and the Los Angeles River on the west. The southern and eastern borders of the CPA align with the city limits of Los Angeles; the City of Vernon is located to the south and the unincorporated community of East Los Angeles is located to the east of the CPA respectively, while the Los Angeles communities of Lincoln Heights and El Sereno are located to the north, and the industrial districts of Downtown are located to the west. The Plan area is approximately 6 square miles. The Boyle Heights CPA is shown within the regional context in **Figure 1**.

**PROJECT BACKGROUND:** The Boyle Heights Community Plan is one of 35 Community Plans, which comprise the Land Use Element of the General Plan. The Land Use Element is one of the seven State-mandated elements of the General Plan that also include noise, transportation, and conservation among others. The Boyle Heights Community Plan (the land use plan for Boyle Heights) is being updated consistent with California Government Code Section 65302 which identifies the seven required elements of a General Plan.

The Boyle Heights Community Plan was last updated in 1998 to meet needs through the year 2010. Since then significant changes have occurred, most notably, the completion of the Gold Line Extension to the Eastside in 2009 along 1<sup>st</sup> Street. In addition, other changes that have occurred along the 1<sup>st</sup> Street corridor is the construction of a new high school (Mendez Learning Center) adjacent to the Pico/Aliso Gold Line Station, and mixed-use/mixed-income projects along other community corridors.

**PROJECT DESCRIPTION:** The proposed project is the update of the Boyle Heights Community Plan ("Proposed Plan") and the adoption of necessary updates to land use, zoning, plan text, and other ordinances to implement those updates. The draft land use diagram (**Figure 2**) represents land use designations that accommodate forecasted housing, population, and employment growth in the CPA for the next 20 to 25 years. The Proposed Plan directs future growth to already urbanized areas of the CPA. The proposed changes largely follow the current pattern of land use development reflecting City policies to direct growth where it can be supported by existing transportation infrastructure. The Proposed Plan promotes a balance of housing units and jobs near transit where different types of land uses (e.g. commercial and residential) can be provided to reduce the length and number of vehicle trips.

The Proposed Plan includes limited changes to Land Use Designations, as well as zone changes to accomplish the following goals: 1) retain existing single- and multiple-family residential uses and add new zoning regulations to protect the existing form and add design standards for appropriate neighborhood massing; 2) retain neighborhood-serving commercial uses and add new zoning regulations for improved street frontage and pedestrian oriented design standards; 3) retain light industrial districts to prioritize jobs producing uses and add new zoning regulations for improved transitions between residential and industrial uses; 4) add new zoning regulations for improved river access and standards for building form and orientation; 5) encourage mixed-use and equitable transit-oriented development; 6) preserve the historic character and commercial building forms for

historically know Brooklyn Avenue Corridor, which is now Cesar E. Chavez Avenue and preserve the residential building forms in the Prospect Park and Hollenbeck Park neighborhoods; and 7) new zoning regulations to protect identified historic resources.

The Proposed Plan's policies complement the proposed zoning and land use designations; and they are geared towards the preservation of historic, low-density multi-family housing, the promotion of the Los Angeles River as a community amenity, the preservation of employment generating land uses, and the preservation and strengthening of commercial areas and neighborhood serving uses. Policies included in the Proposed Plan would also encourage the following goals: 1) protect historic structures; 2) preserve neighborhood character; 3) encourage well designed, quality development projects that complement and enhance the existing neighborhood character of the community; and 4) preserve the Boyle Heights mixed-density urban environment.

Notable features of the Proposed Plan are provided below.

- Preserve existing lower density neighborhoods by maintaining lower density land use designations and by limiting the building envelope for new infill developments in areas with an established, historic character. Potential growth will be directed away from established, low-density residential neighborhoods and towards commercial areas with access to public transit and existing medium residential density.
- New zoning regulations that include incentives for public amenities that benefit the local community that address the need for in-fill developments that fit within the Boyle Heights context along major corridors. Some of these corridors are First Street, Whittier Boulevard, Soto St, and other identified commercial nodes, in accordance with the General Plan Framework guiding policy to focus growth in higher-intensity, transit-adjacent (rail and bus) mixed-use commercial centers.
- High pedestrian volume corridors (e.g. Soto Street) are promoted as safe routes to school connectors and new zoning regulations include standards that require pedestrian oriented frontages and active ground floors at the street level to ensure safe walkable spaces.

**ISSUES TO BE ADDRESSED IN THE EIR:** Based on the project description and the Lead Agency's understanding of the environmental issues associated with the Proposed Plan, it is anticipated that implementation of the Proposed Plan has the potential to result in significant environmental effects associated with some or all of the following topics, which will be analyzed in detail in the EIR:

- |                                   |                                       |
|-----------------------------------|---------------------------------------|
| • Aesthetics                      | • Hydrology and Water Quality         |
| • Air Quality                     | • Land Use and Planning               |
| • Biological Resources            | • Noise                               |
| • Cultural Resources              | • Population, Housing, and Employment |
| • Geology and Soils               | • Public Services and Recreation      |
| • Greenhouse Gas Emissions        | • Transportation/Circulation          |
| • Hazards and Hazardous Materials | • Utilities/Service Systems           |

The City acknowledges that Exide contamination exists in the CPA, and this issue will be identified in the discussion of existing conditions; and to the extent development could exacerbate the impacts associated with contamination, the EIR will identify mitigation measures to address the exacerbation.

Currently, the City has determined the Proposed Plan will not result in significant impacts in the following impact categories: Agriculture and Forestry Resources, and Mineral Resources. As such, currently the City is not intending to analyze in the EIR impacts in these environmental topic areas. An initial study was not prepared for this project, as permitted by CEQA Guidelines, section 15060(d).

Alternatives to be analyzed in the EIR are to be defined and analyzed consistent with the requirements of CEQA Guidelines, Section 15126.6. The specific alternatives to be evaluated in the EIR may include, but are not limited to, the "No Project" alternative, as required by CEQA and alternative land use configurations.

**DOCUMENT AVAILABILITY:** The Notice of Preparation and draft Proposed Plan materials can be viewed on the City of Los Angeles Department of City Planning website at: [www.planning.lacity.org](http://www.planning.lacity.org). To locate a copy of the Notice of Preparation online, click on Environmental Review on the left side of the Department of City Planning website and then click on the Notice of Preparation & Public Scoping Meetings link. Also, to review draft proposed materials, please visit our bilingual google website, and click on the "Meetings and Outreach" tab, here are the links:

English: [www.sites.google.com/site/boyleheightsnpc/meetings-outreach](http://www.sites.google.com/site/boyleheightsnpc/meetings-outreach)

Español: [www.sites.google.com/site/boyleheightsnpc/meetings-outreach/meetings-outreach-spanish](http://www.sites.google.com/site/boyleheightsnpc/meetings-outreach/meetings-outreach-spanish)

**SUBMITTAL OF WRITTEN COMMENTS:** The Lead Agency solicits comments regarding the scope, content, and specificity of the EIR from all responsible agencies, agencies with jurisdiction by law, trustee agencies, and involved agencies and interested parties requesting notice. Please send your written/typed comments (including a name, telephone number, contact information, email if applicable, and case no.) to the following:

**AVISO DE PREPARACION DE UN REPORTE DE IMPACTOS AMBIENTALES Y  
AVISO DE JUNTA PARA AVERIGUAR EL AMBITO DE LOS IMPACTOS  
AMBIENTALES DEL LA ACTUALIZACION DE EL PLAN DE BOYLE HEIGHTS**

**ATENCION:** Agencias, Organizaciones y Partes Interesadas      **Fecha:** 2ndo de septiembre del 2016

Como la agencia primaria bajo la Ley de Calidad Ambiental de California ("CEQA"), el Departamento de Planificación Urbana (DCP) preparará un reporte de impactos ambientales ("EIR") para el proyecto propuesto del plan de la comunidad de Boyle Heights (actualización del Plan de comunidad o "CPU" por sus siglas en ingles), que se describe a continuación. La ciudad está solicitando la identificación de problemas y temas ambientales y la información que usted o su organización cree que se debe considerar en el reporte de impactos ambientales ("EIR").

**PERÍODO DE COMENTARIOS Y RESPUESTAS:** 2ndo de septiembre hasta el 7 de octubre del 2016

**AVISO DE ESTA JUNTA PARA AVERIGUAR EL AMBITO DE LOS IMPACTOS AMBIENTALES:** Acuerdo con la sección 21083.9 del código de Recursos Públicos del estado de California y el código de regulaciones de California, título 14 ("directrices de CEQA") sección 15082(c), la agencia primaria llevará a cabo una junta de evaluación con el fin de solicitar comentarios verbales y por escrito de las partes interesadas que solicitaron el aviso, agencias responsables, y agencias con jurisdicción en la ley, administradoras/es de agencias fiduciarias y agencias federales implicadas, en cuanto al alcance apropiado y el contenido del "EIR".

**ALCANCE DE ESTA JUNTA PARA AVERIGUAR EL AMBITO DE LOS IMPACTOS AMBIENTALES:** La ciudad llevará a cabo esta junta para el Plan propuesto, para recibir comentarios sobre el alcance y contenido del "EIR" propuesto. Usted es bienvenida/o a asistir a la reunión y presentar información ambiental que Usted cree que se debe considerar en el "EIR". La junta es:

**Fecha:** 13 de septiembre de 2016

**Hora:** 6:00p.m. – 8:30p.m.

**Lugar:** Boyle Heights City Hall, 2130 E. 1<sup>st</sup> Street, Los Angeles 90033

*Como una entidad cubierta bajo el título II de la ley de Americanas/os con incapacidades, la Ciudad de Los Angeles no discrimina. El lugar de reunión y aparcamiento son accesible en silla de ruedas. Intérpretes de lengua de signos, dispositivos de audición asistida, otros ayudantes auxiliares o servicios pueden suministrarse bajo pedido. Otros servicios, como traducción entre inglés y otros idiomas, también pueden suministrarse bajo pedido. Para asegurar la disponibilidad de servicios, por favor haga su solicitud no más tarde de tres días hábiles (72 horas) antes de la reunión comuníquese por teléfono con Kiran Rishi al (213) 978-1169.*

**AGENCIAS RESPONSABLES Y ADMINISTRADORAS/ES DE AGENCIAS:** La ciudad pide opiniones de la agencia sobre el alcance y contenido de la información ambiental relevante a responsabilidades legales de la agencia en relación con el Plan propuesto, de acuerdo con las directrices de "CEQA", sección 15082(b). Su agencia tendrá que utilizar el "EIR" preparado por la ciudad al considerar cualquier permiso que su agencia debe emitir u otras aprobaciones de proyectos. Como tal, sus respuestas a esta noticia de preparación ("NOP"), como mínimo deberán identificar lo siguiente: (1) las cuestiones ambientales significativas y alternativa razonable y medidas de mitigación que su Agencia tendrían que hubiese explorado en el "EIR"; y (2) si la agencia se encargará o un administrador/a de la Agencia para este proyecto.

**UBICACIÓN DEL PROYECTO:** El área geográfica del Plan de la comunidad de Boyle Heights ("CPA") se encuentra inmediatamente al este del centro de la ciudad y el río de Los Ángeles y bordea el límite de la ciudad de Los Angeles hacia el este. Sus límites se definen aproximadamente por la autopista/interestatal 10 de San Bernardino (10 "Freeway") y la calle Marengo al norte, las calles Santa Fe y la Union Pacific al sur, la calle de Indiana al este y el río de Los Angeles al oeste. Las fronteras meridionales y orientales de esta área se alinean con los límites de la ciudad de Los Angeles; la ciudad de Vernon se encuentra al sur y la comunidad "no-incorporada" del Este de Los Angeles está situada al este de esta área respectivamente, mientras que hace el norte se ubican comunidades de Lincoln Heights y El Sereno, y los distritos industriales del centro de los Angeles se encuentran al oeste. El área mide aproximadamente 6 millas cuadradas. El área geográfica del Plan de la comunidad de Boyle Heights se muestra en el contexto regional en la **Figura 1**.

**INFORMACION SOBRE ANTECEDENTES DEL PROYECTO:** El Plan Comunitario de Boyle Heights es uno de los 35 planes comunitarios, que comprenden el elemento de usos terrenales del Plan General de la Ciudad. El elemento de usos terrenales es uno de los 7 elementos del Plan General que también incluyen ruido, transporte y conservación entre otros. Se actualiza el Plan de la comunidad de Boyle Heights (el uso de la tierra plan de Boyle Heights) consistente con el código del Gobierno de California sección 65302 que identifica los siete elementos necesarios y requeridos de un Plan General.

El Plan de comunidad de Boyle Heights fue actualizado en 1998 para satisfacer las necesidades hasta el año 2010. Desde entonces han ocurrido cambios significativos, en particular, la construcción y apertura de la extensión de la Línea Dorada "Metro Gold Line" para la zona este en el 2009, a lo largo de la calle Primera "1<sup>st</sup> Street". Además, otros cambios que han ocurrido a lo largo del corredor comunitario de la calle Primera "1<sup>st</sup> Street", es la construcción de una nueva escuela secundaria (centro de aprendizaje de Méndez) junto a la estación del "Gold Line" Pico/Aliso y proyectos de usos mixtos/ingresos mixtos a lo largo de otros corredores de la comunidad.

**DESCRIPCIÓN DEL PROYECTO:** El proyecto es la actualización del Plan de la comunidad de Boyle Heights ("Plan propuesto") y la aprobación de actualizaciones necesarias para el uso de la tierra, zonificación, plan de texto y otras ordenanzas para implementar estas actualizaciones. El diagrama (**Figura 2**) ilustra los usos terrenales propuestos y representa las designaciones de uso de tierra que satisfacen los pronósticos de crecimiento para la vivienda, población y empleo en esta área para los próximos 20 a 25 años. El Plan propuesto dirige el crecimiento futuro de las áreas ya urbanizadas del área geográfica del plan. Los cambios propuestos en gran parte siguen el patrón actual de desarrollo de uso de tierra que refleja las pólizas de la ciudad al dirigir crecimiento hace donde el crecimiento pueda ser apoyado por infraestructura de transporte existente. El Plan propuesto promueve un equilibrio de viviendas y puestas de trabajo/empleos cerca de tránsito donde se pueden proporcionar diferentes tipos de usos de la tierra (por ejemplo, comerciales y residenciales) para reducir la longitud y el número de viajes en carro.

El Plan propuesto incluye cambios limitados a las designaciones de uso de tierra, así como cambios de zona para cumplir los siguientes objetivos: (1) conservar usos residenciales unifamiliares y usos residenciales de familias múltiples existentes y añadir nuevos reglamentos de zonificación para proteger la forma existente y proporcionar estándares de diseño que son apropiados para la formación del vecindario; (2) conservar usos comerciales útiles en servir a vecinos/as ("el vecindario local") y añadir nuevas normas de zonificación para mejorar la fachada de la calle y normas de diseño que sean más orientadas hacia el uso peatonal; (3) retener distritos industriales "light"/livianos para priorizar usos que fomenten o produzcan trabajos y añadir nuevas normas de zonificación para las transiciones mejoradas del uso residencial e industrial; (4) agregar nuevos reglamentos de zonificación para mejoramientos de acceso al área del "Rio" y las normas para la construcción de forma y la orientación de edificios; (5) fomentar el desarrollo orientado al tránsito mixto y equitativo; (6) preservar el carácter histórico y formas de edificio comercial para la calle "Brooklyn" hoy conocida como "Cesar Chavez Avenue" y conservar las formas y caracteres residenciales en los barrios y colonias de la área de "Prospect Park" y "Hollenbeck Park"; y (7) nueva zonificación que incluya normas de protección para recursos históricos identificados.

Las pólizas propuestas del Plan complementan la zonificación propuesta y designaciones de usos terrenales; estas pólizas también están orientadas a la preservación de las viviendas históricamente multi-familiares y bajas en densidad (unifamiliares), la promoción del río de Los Angeles como un servicio de la comunidad, la preservación de usos terrenales que generan empleos, y la preservación y fortalecimiento de áreas comerciales vecinales ("con usos que son útiles para el vecindario local"). Las pólizas incluidas en el Plan Propuesto también animarían los siguientes objetivos: (1) proteger estructuras históricas; (2) preservar el carácter de esta comunidad; (3) promover proyectos de desarrollo bien diseñados, y de buena calidad que complementan y elevan el carácter existente de la comunidad; y (4) preservar el ambiente urbano de densidad mixta de Boyle Heights.

A continuación se proporcionan características notables del Plan Propuesto.

- Preservar las áreas residenciales de densidad baja y mantener designaciones de uso terrenales también con densidad baja, y limitar la escala o forma de edificios para nuevos desarrollos en áreas con un carácter histórico establecido. Crecimiento potencial será dirigido lejos de áreas residenciales con baja densidad, y dirigidos hacia las zonas comerciales con acceso a transporte público y áreas residenciales que ya existen con densidad media.
- Nuevas reglas de zonificación que incluyen incentivos para los servicios públicos que benefician a la comunidad local, y que abordan la necesidad de desarrollos que encajan con el contexto de Boyle Heights a lo largo de los corredores principales. Algunos de estos corredores son la calle Primera "1st Street", el bulevar Whittier "Whittier Boulevard", la calle Soto y otros corredores y áreas comerciales identificadas, según el marco del Plan General que guía el crecimiento hacia puntos de enfoque con mayor intensidad, y promoción de tránsito adyacente (metro y autobús) con usos mixtos en centros comerciales.
- Corredores de alto volumen peatonal (por ejemplo la calle Soto) son promovidos como rutas seguras que se conectan con las escuelas, y nuevas normas de zonificación que requieren fachadas peatonales y que se active la planta baja ("nivel de la calle") para promover espacios seguros para peatones.

**TEMAS A TRATAR EN EL REPORTE DE IMPACTOS DEL AMBIENTE "EIR":** Basándose en la descripción del proyecto y el entendimiento de los problemas ambientales asociados con el Plan propuesto, se prevé que la aplicación del Plan propuesto tiene el potencial de resultar en efectos ambientales significativos asociados con algunos o todos de los siguientes temas, que serán analizados en detalle en el "EIR":

- Estética
- Calidad del Aire
- Recursos Biológicos
- Recursos Culturales
- Geología y Suelos
- Emisiones de Gases de efecto Invernadero
- Materiales Peligrosos y Riesgosos
- Hidrología y Calidad del Agua
- Uso de la tierra y la Planificación
- Ruido
- Población, Vivienda y Empleo
- Servicios Públicos y Recreación
- Transporte/Circulación
- Sistemas de Utilidades/Servicios

La ciudad reconoce que existe contaminación de Exide en el área geográfica del plan y esta cuestión se identificará en la discusión de las condiciones existentes; y en la medida en que el desarrollo podría exacerbar los impactos asociados con la contaminación, el "EIR" identificará las medidas de mitigación para hacer frente a la exacerbación.

En la actualidad, la ciudad ha determinado que el Plan propuesto no resultará en impactos significativos en las siguientes categorías de impacto: Agricultura y Recursos Forestales, y Recursos Minerales. Como tal, actualmente, la Ciudad no pretende analizar los impactos en el "EIR" en estos temas ambientales. Un estudio inicial no estaba preparado para este proyecto, lo permitido por las pautas de CEQA, sección 15060(d).

Alternativas a analizarse en el "EIR" deben ser definidas y analizadas consistente con los requisitos de las directrices de la ley Ambiental "CEQA", sección 15126.6. Las alternativas específicas a ser evaluadas en el "EIR" pueden incluir, pero no se limitan a, la alternativa "Sin proyecto", como exige el la ley Ambiental "CEQA" y configuraciones de uso alternativo de la tierra.

**LA DISPONIBILIDAD DEL DOCUMENTO:** El aviso de la preparación y los materiales para el proyecto del Plan propuesto pueden verse en el la página de internet de la ciudad de Los Ángeles Departamento de Planificación Urbana en esta dirección: [www.planning.lacity.org](http://www.planning.lacity.org) . Para localizar una copia de la notificación de preparación en la internet, haga "clic" en "Enviromental Review" (revisión ambiental) en el lado izquierdo de la Página Web del Departamento de Planificación Urbana, y luego haga "clic" en "Notice of Preparation & Scoping Meetings" (noticias de preparación y enlace de juntas para averiguación). También, para revisar los materiales del proyecto propuesto, por favor visite nuestro sitio de internet bilingüe de google, y haga clic en "Meetings and Outreach" (reuniones y enlace), aquí están las páginas de internet:

Inglés: [www.sites.Google.com/site/boyleheightsnpc/Meetings-Outreach](http://www.sites.Google.com/site/boyleheightsnpc/Meetings-Outreach)

Comments: I have a suggestion for the "Industrial Districts" portion of this EIR scoping meeting. There is a ~~pp~~ proposed "buffer zone along Olympic Blvd. My suggestion is that a report or study be conducted to determine the various metals in the area over ~~the~~ where the proposed buffer zone will be. Then within that study or report, illustrate how the buffer zone would reduce, if at all, the metals in the air over the buffer zone. The buffer zone may not be a large enough buffer. Don't sell the communities health short over the desire to please these hazardous businesses.

THANK YOU

Comments: ③ Overall proposed land use: Agree completely with the idea of enforcing a unifying design aesthetic on new construction. Might be too late for my block but would benefit area at large  
③ commercial zoning: The main thing we are missing is parking. Lots of good mom + pop shops but not enough parking for people from outside BH or even from other parts of BH to visit.  
③ residential zoning: Parking again. Permit parking creates as many problems as it solves. Must crack down on people parking multiple vehicles (for sale?) as personal vehicles.  
③ residential zoning - keep density down! More units are needed but there's smart ways of doing it.  
② Promote pathways to ownership. Help make renters Owners.

THANK YOU

Comments: I am concerned regarding height levels of new developments especially along the L.A. River & near Mariachi Plaza. I/We enjoy our view of the city from our home & do not wish to see monstrosities such as those that now exist along the west bank in the Art's District.

At mariachi plaza, the concern is in regards to current density issues, such as parking & amenities, specifically for the elderly. Buildings there should be maintained at the 2-3 story max limit on ~~favor~~ residential reflect current housing. Not overshadow them.

The Boyle Heights Community Plan should include a stance on "setbacks." Reflecting fire safety, child safety (specifically on blind spots), an enough distance from our neighbors for general comfort levels. As well as to maintain ~~the~~ the look & feel of current homes.

over  
THANK YOU

Comentarios:

(adult)

Parking currently is an issue. Residents have limited parking. Often having to park more than 10 blocks from their homes. High development housing ~~area~~ causes increase loss of public parking. Parking is also an issue for business around Maziachi Plaza & along Brooklyn. Community events also ~~that~~ strain residential parking. ~~As does~~ This parking issue also results in an increase in ticketing & during street sweeping day. As current residents are unable to find parking that has effectively been cut in half.

For public safety, blind spots exist for drivers along Chavez between Bridge St & Echandia (traveling East) where cars speed, unable to see the ~~res~~ crosswalk barely missing pedestrians. And safety ~~along~~ on first street along the goldline. **GRACIAS**  
~~next~~ next to residential & a school.

Comments: The plan that is presented is well put together. The one thing I would request is a close look at open/green space, especially since there is a call to increase <sup>living</sup> housing units along the Gold Line and Cesar Chavez. Boyle Heights already lacks green space, especially since the largest zoned open space is a cemetery (which isn't very green since the drought). I would ask for a mitigation of parks and open space.

I would also ask to make sure there is a requirement for public open space development along the LA river.

Thank you for your time and work.

THANK YOU

Comments: \_\_\_\_\_

- Restrictive truck routes should be created and enforced to limit exposure to toxic issues from trucks for residents, including idling. This is especially an issue for residential areas adjacent to industries in the southern & western portions of Boyle Heights.
- Soil sampling for lead should be conducted at least up to 405 miles from Exide to assess & mitigate impacts from future development projects in Boyle Heights.
- Toxic facilities & traffic issues should be part of the scoping process so resident knowledge (especially historic info of pre CEQA facilities) is incorporated into studies for the draft EIR.

THANK YOU

Comments: \_\_\_\_\_

- We need a Specific Plan for the industrial areas along the LA River
- No land uses should be allowed by right. Industrial uses should require mandatory Conditional Use Permit process. All housing developments, regardless of levels, should require affordable housing units proportional to the percentage of low-income families in the area. Each additional level, beyond 2, should require a 25% increase of affordable housing units, up to 4 levels, 5 level developments should require 100% affordable housing units.
- Heavy industry zoning adjacent to housing near olympic, and especially along union pacific approaching Indiana, should be rezoned to reduce toxic exposure to residents.

THANK YOU

volunteer

Comments: \_\_\_\_\_

I'm writing this in support and fierce advoation of projecto Jardin as a community building space that should be valorized as such. Ensuring that the garden is considered a green space will secure that the community-building through gardening continues on. Part of your plan talks about "conserving neighborhood character," and ensuring the permanency of the garden as a green space will do that. Additionally, I'm writing in support of removing the Manachi plaza from historic zone into the community corridor--to maximize transit oriented development, increasing the rider usage of public transit.

THANK YOU

Comments: Thanks for having this meeting.

Although I have to say, it was kind of  
confusing what the plans were, but I did get  
it. What I would really like to see though, is  
the community become greener. so please, more trees, around  
industrial and housing areas. AND also, if you are  
going to build more housing, make it affordable  
for the people already living here, that it is affordable  
to our income.

Also, if you could have better communication  
with us when having these kind of meetings, that  
would be great, because not a lot of people in the  
community know about these meetings. In fact only  
few of us know.

And also be clear at is actually going to happen  
here in Boyle Heights <sup>in the</sup> future.  
THANK YOU

Comments: parking → we need to build underground  
industrial → how does the plan address this? (concern)  
~~maintain~~ maintain industrial use  
only along LA river (✓)

community / nodes → (X) concern about the  
corridors  
ongoing projects will  
already be completed before  
2018, the expected finalization  
of this community plan update

(X) meaning more private investment  
and less affordable housing  
~~will~~ will be ~~the same~~ set up as  
the case anyways

Cesar Chavez → highly impacted, how can

THANK YOU we improve this  
transit area for everyone -

bicyclists? pedestrians? drivers

Comments: Boyle Heights ~~has~~ is a high density neighborhood, while the community plan touches on residential, commercial, & industrial, there is a lack of green space in the area. Green space to include a dog park & lounging opportunities for health & wellness activities. My suggestion: convert industrial zones into green spaces. For mixed residential/commercial zones, rooftops should be green spaces for residents. Boyle Heights needs and deserves MORE green space

THANK YOU

Comments: I believe the Mariachi Plaza Empty Lot  
on Bailey and Pennsylvania should not be  
considered as a historical site, but rather be  
moved to the "Community Corridors" section.  
Moving this lot would create an <sup>Environmental</sup> impact  
by allowing for an increase of Housing developments.

We are in a housing crisis, and limiting this  
particular site would impact our community,  
and those in need of Access to housing, and  
the environment impact created by lack of  
housing is having homeless folks out in the streets  
and more people driving cars.

THANK YOU

Comments: Transit Oriented developments should be accessible and affordable, ensuring the <sup>public</sup> transit is utilized, as opposed to driving vehicles, which pollute our environment.

I'd like to have the empty lot owned by Metro on Mariachi Plaza to be moved from the historical zoning, to be moved to the "Community Corridors" zoning section.

Maximizing the transit oriented development for ~~an~~ accessible and affordable housing.

Maximizing this Metro lot would allow for less pollution to be emitted into our environment.

THANK YOU

Comments: \_\_\_\_\_

One of my concerns is in the designations being placed in the industrial section of B.H.

→ How can we ensure jobs created are for BH residents?

→ How can we ensure that LA RIVER-related investments support existing BH residents

Can the community plan incorporate a general theme of affordability of housing and commercial spaces.

What is the maximum percentage of affordable housing we can require in incentives? How can we ensure they support BH residents primarily?

THANK YOU

## Comments on the community plan

2 messages

**Emmanuel Deleage**

Wed, Sep 21, 2016 at 5:12 PM

To: Haydee Urita-Lopez <haydee.urita-lopez@lacity.org>

Hi Haydee,

My comments on the Boyle Heights Community plan, is that I think there needs to be a thought out strategy for more parking, especially within walking distance of commercial corridors, like 1st Street. The one on Chicago St, south of Cesar Chavez is a very good example of what we need more. This will help support the local businesses, which will help support local jobs, and keep the mom and pop stores around.

Thanks

—

Emmanuel Deleage  
Executive Director

## ADJACENT CONSTRUCTION DESIGN MANUAL

## 1.0 INTRODUCTION

- 1.1 Parties planning construction over, under or adjacent to a Metropolitan Transportation Authority (MTA) facility or structure are advised to submit for review seven (7) copies of their drawings and four (4) copies of their calculations showing the relationship between their project and the MTA facilities, for MTA review. The purpose of the MTA review is to reduce the chance of conflict, damage, and unnecessary remedial measures for both MTA and the parties. Parties are defined as developers, agencies, municipalities, property owners or similar organizations proposing to perform or sponsor construction work near MTA facilities.
- 1.2 Sufficient drawings and details shall be submitted at each level of completion such as Preliminary, In-Progress, Pre-final and Final, etc. to facilitate the review of the effects that the proposed project may or may not have on the MTA facilities. An MTA review requires internal circulation of the construction drawings to concerned departments (usually includes Construction, Operations, Maintenance, and Real Estate). Parties shall be responsible for all costs related to drawing reviews by MTA. MTA costs shall be based upon the actual hours taken for review at the hourly rate of pay plus overhead charges. Drawings normally required for review are:
- A. Site Plan
  - B. Drainage Area Maps and Drainage Calculations
  - C. Architectural drawings
  - D. Structural drawings and calculations
  - E. Civil Drawings
  - F. Utility Drawings
  - G. Sections showing Foundations and MTA Structures
  - H. Column Load Tables
  - I. Pertinent Drawings and calculations detailing an impact on MTA facilities
  - J. A copy of the Geotechnical Report.
  - K. Construction zone traffic safety and detour plans: Provide and regulate positive traffic guidance and definition for vehicular and pedestrian traffic adjacent to the construction site to ensure traffic safety and reduce adverse traffic circulation impact.
  - L. Drawings and calculations should be sent to:

**MTA Third Party Administration (Permits Administration)**  
**Los Angeles County Metropolitan Transportation Authority**  
One Gateway Plaza  
Los Angeles, California 90012

- 1.3 If uncertainty exists on the possible impacts a project may have on the MTA facilities, and before submitting a formal letter requesting a review of a construction project adjacent to the Metro System, the party or his agent may contact the MTA Third Party Administrator (Permits ). The Party shall review the complexity of the project, and receive an informal evaluation of the amount of detail required for the MTA review. In those cases, whereby it appears the project will present no risk to MTA, the Third Party Administrator (Permits) shall immediately route the design documents to Construction, Operations, Maintenance, and Real Estate departments for a preliminary evaluation. If it is then confirmed that MTA risk is not present, the Administrator shall process an approval letter to the party.
- 1.4 A period of 30 working days should be allowed for review of the drawings and calculations. Thirty (30) work days should be allowed for each successive review as required. It is noted that preliminary evaluations are usually produced within 5 working days.
- 1.5 The party shall reimburse the MTA for any technical review or support services costs incurred that are associated with his/her request for access to the Metro Rail System
- 1.6 The following items must be completed before starting any construction:
  - A. Each part of the project's design may be reviewed and approved by the MTA. The prime concern of the MTA is to determine the effect of the project on the MTA structure and its transit operations. A few of the other parts of a project to be considered are overhead protection, dust protection, dewatering, and temporary use of public space for construction activities.
  - B. Once the Party has received written acceptance of the design of a given project then the Party must notify MTA prior to the start of construction, in accordance with the terms of acceptance.
- 1.7 Qualified Seismic, Structural and Geotechnical Oversight  

The design documents shall note the name of the responsible Structural Engineer and Geotechnical Engineer, licensed in the State of California.

## 2.0 REVIEW PROCEDURE

- 2.1 All portions of any proposed design that will have a direct impact on an MTA facility or structure will be reviewed to assure that the MTA facility or structure is not placed in risk at any time, and that the design meets all applicable codes and criteria. Any portion of the proposed design that is to form part of an MTA controlled area shall be designed to meet the MTA Design Criteria and Standards.
- 2.2 Permits, where required by the local jurisdiction, shall be the responsibility of the party. City of L.A. Dept. of Bldg. and Safety and the Bureau of Engineering permit review shall remain in effect. Party shall refer to MTA Third Party Administration policies and procedures, THD5 for additional information.
- 2.3 Monitoring of the temporary support of excavation structures for adjacent construction shall be required in all cases for excavations within the geotechnical zone of influence of MTA structures. The extent of the monitoring will vary from case to case.
- 2.4 Monitoring of the inside of MTA tunnels and structures shall be required when the adjacent

excavation will unload or load the MTA structure or tunnel. Monitoring of vertical and horizontal distortions will include use of extensometers, inclinometers, settlement reference points, tiltmeters, groundwater observation wells, tape extensometer anchor points and load cells, as appropriately required. Acceptable limits of movement will depend on groundwater conditions, soil types and also the length of service the stations and tunnels have gone through. Escorts will be required for the survey parties entering the Metro operating system in accordance with MTA Operating Rules and Procedures. An MTA account number will be established and the costs for the escort monitoring and surveying service will be billed directly to the party or his agent as in section 1.2.

- 2.5 The calculations submitted for review shall include the following:
- A. A concise statement of the problem and the purpose of the calculation.
  - B. Input data, applicable criteria, clearly stated assumptions and justifying rationale.
  - C. References to articles, manuals and source material shall be furnished with the calculations.
  - D. Reference to pertinent codes and standards.
  - E. Sufficient sketches or drawing references for the work to be easily understood by an independent reviewer. Diagrams indicating data (such as loads and dimensions) shall be included along with adequate sketches of all details not considered standard by MTA.
  - F. The source or derivation of all equations shall be shown where they are introduced into the calculations.
  - G. Numerical calculations shall clearly indicate type of measurement unit used.
  - H. Identify results and conclusions.
  - I. Calculations shall be neat, orderly, and legible.
- 2.6 When computer programs are used to perform calculations, the following information shall accompany the calculation, including the following:
- A. Program Name.
  - B. Program Abstract.
  - C. Program Purpose and Applications.
  - D. Complete descriptions of assumptions, capabilities and limitations.
  - E. Instructions for preparing problem data.
  - F. Instructions for problem execution.
  - G. List (and explanation) of program acronyms and error messages.
  - H. Description of deficiencies or uncorrected errors.
  - I. Description of output options and interpretations.

- J. Sample problem(s), illustrating all input and output options and hardware execution statements. Typically, these problems shall be verified problems.
  - K. Computer printout of all supporting calculations.
  - L. The "User's Manual" shall also include a certification section. The certification section shall describe the methods and how they cover the permitted options and uses of the program.
- 2.7 Drawings shall be drawn, to scale, showing the location and relationship of proposed adjacent construction to existing MTA structures at various stages of construction along the entire adjacent alignment. The stresses and deflections induced in the existing MTA structures should be provided.
- 2.8 The short-term and long-term effects of the new loading due to the adjacent construction on the MTA structures shall be provided. The soil parameters and other pertinent geotechnical criteria contained in existing contract documents for the affected structure, plus any additional conditions shall be used to analyze the existing MTA structures.
- 2.9 MTA structures shall be analyzed for differential pressure loadings transferred from the adjacent construction site.

### 3.0 MECHANICAL CRITERIA

- 3.1 Existing services to MTA facilities, including chilled water and condenser water piping, potable and fire water, storm and sanitary sewer, piping, are not to be used, interrupted nor disturbed without written approval of MTA.
- 3.2 Surface openings of ventilation shafts, emergency exits serving MTA underground facilities, and ventilation system openings of surface and elevated facilities are not to be blocked or restricted in any manner. Construction dust shall be prevented from entering MTA facilities.
- 3.3 Hot or foul air, fumes, smoke, steam, etc., from adjacent new or temporary facilities are not to be discharged within 40 feet of existing MTA ventilation system intake shafts, station entrances or portals. Tunnel ventilation shafts are both intake and discharge structures.
- 3.4 Clear access for the fire department to the MTA fire department connections shall be maintained at all times. Construction signs shall be provided to identify the location of MTA fire department connections. No interruption to fire protection water service will be permitted at any time.
- 3.5 Modifications to existing MTA mechanical systems and equipment, including ventilation shafts, required by new connections into the MTA System, shall only be permitted with prior review and approval by MTA. If changes are made to MTA property as built drawings shall be provided reflecting these changes.

At the option of MTA, the adjacent construction party shall be required to perform the field tests necessary to verify the adequacy of the modified system and the equipment performance. This verification shall be performed within an agreed time period jointly determined by MTA and the Party on a case by case basis. Where a modification is approved, the party shall be held responsible to maintain original operating capacity of the equipment and the system impacted by the modification.

## 4.0 OPERATIONAL REQUIREMENTS

### 4.1 GENERAL

- A. Normal construction practices must be augmented to insure adequate safety for the general public entering Metro Stations and riding on Metro Trains and Buses. Design of a building, structure, or facility shall take into account the special safety considerations required for the construction of the facility next to or around an operating transit system.
- B. Projects which require working over or adjacent to MTA station entrances shall develop their construction procedures and sequences of work to meet the following minimum requirements:
  - 1. Construction operations shall be planned, scheduled and carried out in a way that will afford the Metro patrons and the general public a clean, safe and orderly access and egress to the station entrance during revenue hours.
  - 2. Construction activities which involve swinging a crane and suspended loads over pedestrian areas, MTA station entrances and escalators, tracks or Metro bus passenger areas shall not be performed during revenue hours. Specific periods or hours shall be granted on a case-by-case basis.
  - 3. All cranes must be stored and secured facing away from energized tracks, when appropriate.
  - 4. All activity must be coordinated through the MTA Track Allocation process in advance of work activity.

### 4.2 OVERHEAD PROTECTION - Station Entrances

- A. Overhead protection from falling objects shall be provided over MTA facilities whenever there is possibility, due to the nature of a construction operation, that an object could fall in or around MTA station entrances, bus stops, elevators, or areas designed for public access to MTA facilities. Erection of the overhead protection for these areas shall be done during MTA non-revenue hours.
  - 1. The design live load for all overhead protection shall be 150 pounds per square foot minimum. The design wind load on the temporary structures shall be 20 pounds per square foot, on the windward and leeward sides of the structure.
  - 2. The overhead protection shall be constructed of fire rated materials. Materials and equipment shall not be stored on the completed shield. The roof of the shield shall be constructed and maintained watertight.
- B. Lighting in public areas and around affected MTA facilities shall be provided under the overhead protection to maintain a minimum level of twenty-five (25) footcandles at the escalator treads or at the walking surface. The temporary lighting shall be maintained by the Party.

- C. Wooden construction fencing shall be installed at the boundary of the areas with public access. The fencing shall be at least eight-feet high, and shall meet all applicable code requirements.
- D. An unrestricted public access path shall be provided at the upper landing of the entrance escalator-way in accordance with the following:
  - 1. A vertical clearance between the walking surface and the lowest projection of the shield shall be 8'-0".
  - 2. A clear pedestrian runoff area extending beyond the escalator newel shall be provided, the least dimension of which shall be twenty (20) feet.
  - 3. A fifteen (15) foot wide strip (other than the sidewalk) shall be maintained on the side of the escalator for circulation when the escalator is pointed away from a street corner.
  - 4. A clear path from any MTA emergency exit to the public street shall be maintained at all times.
- E. Temporary sidewalks or pedestrian ways, which will be in use more than 10 days, shall be constructed of four (4") inch thick Portland cement concrete or four(4") inches of asphaltic concrete placed and finished by a machine.

#### 4.3 OVERHEAD PROTECTION - Operating Right-of-Way Trackage

- A. MTA Rail Operations Control Center shall be informed of any intent to work above, on, or under the MTA right-of-way. Crews shall be trained and special flagging operations shall be directed by MTA Rail Operations Control Center. The party shall provide competent persons to serve as Flaggers. These Flaggers shall be trained and certified by MTA Rail Operations prior to any work commencing. All costs incurred by MTA shall be paid by the party.
- B. A construction project that will require work over, under or adjacent to the at grade and aerial MTA right-of-way should be aware that the operation of machinery, construction of scaffolding or any operation hazardous to the operation of the MTA facility shall require that the work be done during non-revenue hours and authorized through the MTA Track Allocation process.
- C. MTA flagmen or inspectors from MTA Operations shall observe all augering, pile driving or other work that is judged to be hazardous. Costs associated with the flagman or inspector shall be borne by the Party.
- D. The party shall request access rights or track rights to perform work during non-revenue hours. The request shall be made through the MTA Track Allocation process.-

#### 4.4 OTHER METRO FACILITIES

- A. Access and egress from the public streets to fan shafts, vent shafts and emergency exits must be maintained at all times. The shafts shall be protected from dust and debris. See

Exhibit A for details.

- B. Any excavation in the vicinity of MTA power lines feeding the Metro System shall be through hand excavation and only after authorization has been obtained through the MTA Track Allocation process. MTA Rail Operations Control Center shall be informed before any operations commences near the MTA power system.
- C. Flammable liquids shall not to be stored over or within 25 feet horizontally of MTA underground facilities. If installed within 25 to 100 feet horizontally of the structure, protective encasement of the tanks shall be required in accordance with NFPA STD 130. Existing underground tanks located within 100 feet horizontally of MTA facilities and scheduled to be abandoned are to be disposed of in accordance with Appendix C of NFPA STD 130. NFPA STD 130 shall also be applied to the construction of new fuel tanks.
- D. Isolation of MTA Facilities from Blast

Subsurface areas of new adjacent private buildings where the public has access or that cannot be guaranteed as a secure area, such as parking garages and commercial storage and warehousing, will be treated as areas of potential explosion. NFPA 130, Standard for Fixed Guideway Transit Systems, life safety separation criteria will be applied that assumes such spaces contain Class I flammable, or Class II or Class III Combustible liquids. For structural and other considerations, isolation for blast will be treated the same as seismic separation, and the more restrictive shall be applied.

- E. **Any proposed facility that is located within 20 feet radius of an existing Metro facility will require a blast and explosion study and recommendations to be conducted by a specialist who is specialized in the area of blast force attenuation. This study must assess the effect that an explosion in the proposed non-Metro facility will have on the adjacent Metro facility and provide recommendations to prevent any catastrophic damage to the existing Metro facility. Metro must approve the qualifications of the proposed specialist prior to commencement of any work on this specialized study.**

#### 4.5 SAFETY REGULATIONS

- A. Comply with Cal/OSHA Compressed Air Safety Orders Title 8, Division 1, Chapter 4, Subchapter 3. Comply with California Code of Regulations Title 8, Title 29 Code of Federal Regulations; and/or the Construction Safety and Health Manual ( Part F ) of the contract whichever is most stringent in regulating the safety conditions to be maintained in the work environment as determined by the Authority. The Party recognizes that government promulgated safety regulations are minimum standards and that additional safeguards may be required
- B. Comply with the requirements of Chemical Hazards Safety and Health Plan, (per 29 CFR 1910.120 entitled, ( Hazardous Waste Operations and Emergency Response) with respect to the handling of hazardous or contaminated wastes and mandated specialty raining and health screening.
- C. Party and contractor personnel while within the operating MTA right-of-way shall

coordinate all safety rules and procedures with MTA Rail Operations Control Center.-

- D. When support functions and electrical power outages are required, the approval MUST be obtained through the MTA Track Allocation procedure. Approval of the support functions and power outages must be obtained in writing prior to shutdown.

## 5.0 CORROSION

### 5.1 STRAY CURRENT PROTECTION

- A. Because stray currents may be present in the area of the project, the Party shall investigate the site for stray currents and provide the means for mitigation when warranted.
- B. Installers of facilities that will require a Cathodic Protection (CP) system must coordinate their CP proposals with MTA. Inquiries shall be routed to the Manager, Third Party Administration.
- C. The Party is responsible for damage caused by its contractors to MTA corrosion test facilities in public right-of-way.

Re: Scope and Content of the Proposed EIR for the Boyle Heights Community Plan Update

Dear Ms. Urita-Lopez:

Home to a majority of Latino immigrants, Boyle Heights is an economically and ethnically vital enclave, experiencing a recent surge of public and private investments. The community has benefited from millions of dollars in infrastructure improvements, mostly funded by the local transit authority's Metro Gold Line light rail and other proposed capital transit projects. Today, the smart growth strategies proposed in the Boyle Heights Community Plan Update aim to facilitate and encourage transit oriented development with the highest densities proposed in and around key transit nodes. While this plan and the corresponding investment have the potential to bring much needed resources and revitalization to Boyle Heights, it also has the potential to displace long-time residents from their homes. Preserving housing affordability, extensive community networks as well as creating new opportunities that support economic progress for all can ensure that existing residents remain in their neighborhood and reap the benefits of new services, development and amenities including access to affordable housing choices.

Boyle Heights has historically been a working class neighborhood where the median household income is \$27,847 or approximately 35% of the Area Median Income (AMI) for a family of four. Most recently, amid the soaring real estate market citywide, middle and high income households have moved into the neighborhood creating increasing rental and displacement pressures in Boyle Heights. As the enforcement agency of the City's Rent Stabilization Ordinance (RSO), HCIDLA is invested in protecting the RSO provisions and its corresponding stock of housing that tends to offer rents below market-rate levels. In addition, HCIDLA encourages the implementation of sound land use incentives and zoning to that address the acute need for affordable housing.

Our select comments strive to preserve housing affordability and create new affordability within reach of the existing community residents in the proposed Environmental Impact Report (EIR) for Boyle Heights.

## **Rent Stabilization Ordinance and Housing Development**

The City must ensure that the Boyle Heights Community Plan Update approval process does not supersede or undermine the provisions of the Rent Stabilization Ordinance (RSO). The majority (88%) of Boyle Heights' multi-family housing stock is subject to the RSO (15,466 RSO units out of a total of 17,652 multifamily units); many are in small 2 to 4 unit properties. The 2<sup>nd</sup> largest rent stabilized development in the city, Wyvernwood, is located in Boyle Heights and includes 1,187 RSO units built in 1938. Discussions about redeveloping and up-zoning this large RSO property continues to take place amid today's heated market. Further, RSO unit losses are accelerating with 1,073 units lost citywide in 2015 alone and continuing to rise in 2016. To guarantee adherence to all RSO laws and regulations, all administrative processes for removal of RSO units, tenant relocation assistance, re-rental of RSO units and future exemptions from the RSO must be approved by the HCIDLA rather than any another agency (i.e. Planning Department or Commission) or discretionary action. In addition, for all large-scale housing developments proposed, the EIR should craft a review and approval process that is inclusive of the HCIDLA at the earliest stages of large the developments.

## **New Affordable Housing Must Match the Community's Needs**

Smart growth strategies without the right housing affordability requirements may be counterproductive as new density surrounding transit development tends to only offer market-rate rents that exceed what existing residents or very lower-income transit dependent families can afford to rent, this is especially true in Boyle Heights. Approximately 70% of workers who commute by transit earn less than \$25,000 a year. The City must preserve the long-term tenants that have invested in this community and meaningfully retain high transit ridership, by insuring that the new affordable housing remain at rent levels attainable and affordable by existing and future residents. Incentives for serving households at 80% AMI (\$66,400 for a family of four) for example are not necessarily adequate for this community. To adequately meet the affordable housing needs of residents, new covenanted affordable housing units must be set-aside at rent levels affordable to extremely low-income and very low-income families and individuals.

## **Preserve Affordability**

The combined impact of increased zoning capacity through the Community Plan Update, the regional connector and the Sixth Street Viaduct Replacement Project will facilitate public access and transit access to Boyle Heights, making the area a more desirable place to live over time and contribute to a real estate market with increased profit potential. Preserving the existing stock of restricted affordable housing must be a key priority for the continuance of lower cost housing in this neighborhood. Including a no net loss provision of both restricted affordable housing and RSO housing will require preservation and production goals that proactively secure housing for those most in need.

## **Equitable Development**

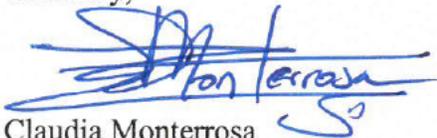

Boyle Heights presents a classic case of gentrification, where there is an opportunity to be gained through the investment and redevelopment of the existing community and thereafter generating significant tax flow to the City. The downside is that the economics of this neighborhood suggest that few current residents would be able to rent or purchase in the newly revitalized neighborhood given higher rental market rate rental housing product being developed in the community. As such, an

evaluation and recommendation of sound land use tools is necessary. Proper land use tools that require and retains affordable housing options as well as an overall sustainable neighborhood of opportunity can help promote the equitable development of this community. Following are the land use tools that should be evaluated for possible implementation in the Boyle Heights Community Plan Update.

- ✓ The Boyle Heights Community Plan Update should consider a financing mechanism such as a *Community Revitalization Investment Authority (CRIA)* that diverts tax increment to infrastructure projects and requires a 25 percent set-aside for affordable housing. This financing mechanism can contribute to community development practices that are equitable and inclusive of people and families of varying income levels, especially those that have long invested in Boyle Heights.
- ✓ Another alternative in the near future is the newly considered *Transit Oriented Neighborhood Initiative (TONI)* that proposes to allow cities to use sales tax increment to fund revitalization efforts and requires an affordable housing set-aside.
- ✓ A tool that is already available is Inclusionary Zoning on for-sale units and condo-conversions. The decision in the *California Building Industry Association v. City of San Jose (2015)* case makes clear that the goal of enhancing the community's welfare by making housing available for low and moderate income households through land use regulations is legally permissible. The California Supreme Court's decision presents an opportunity to increase the supply of affordable homeownership and promote economic diversity in the Boyle Heights neighborhood. This type of program would require the development of for-sale affordable units without a public subsidy.

If the city's policy is to create opportunities for the broader community to partake in a neighborhood with enhanced amenities and overall sustainable development, mechanisms- through density incentives, value capture and preservation provisions, to name a few- must be put in place and must be properly calibrated to the target population thereby ensuring that long-term community residents can benefit from such investment. HCIDLA urges you to shape the Updated Boyle Heights Community Plan in a manner that is most beneficial to the current and future residents and stakeholders with the foresight to achieve an overall sustainable and equitable development of Boyle Heights. If you have any questions, please do not hesitate to follow up with Marisol Romero in our office at

**RE: Comment on Boyle Heights Community Plan**

Dear Ms. Urita-Lopez,

I would like to thank you for your efforts in organizing and executing the EIR scoping meeting for the Boyle Heights Community Plan. After reviewing the relevant information, I was glad to learn that 18 of 19 LAUSD school sites in Boyle Heights are within two blocks of an established transit corridor.

My office has three comments on environmental topics that should be analyzed in the EIR.

First, the five southern-most elementary schools in Boyle Heights are proximate to areas zoned for heavy industry (Christopher Dena Elementary, Carmen Lomas Garza Primary Center, Soto Street Elementary, Sunrise Elementary, and Lorena Street Elementary). In particular, Dena and Garza are within five blocks of these heavy-industry zoned areas. The EIR should report on the impact these heavy-industry zoned areas can have on these elementary schools.

Second, with two major freeway junctions in Boyle Heights, many of our schools in the area are close or next to freeways. I would like the EIR to address how planned housing, population, and employment growth in Boyle Heights and the surrounding region may impact the air quality for students attending schools so close to freeways in Boyle Heights.

Third, I would like to see the City of Los Angeles and the Department of City Planning establish a plan for keeping LAUSD and our Boyle Heights school principals informed of future development and the effects such development can have on traffic, congestion, and detours in a given area. Parents and school buses picking up and dropping off kids to school occurs daily and increases traffic during certain times of the day in many areas. We would like to know how, through collaboration with the LAUSD, we can better mitigate traffic impacts in the area.

In each of these areas, it would be helpful to know about ways local governments, community-based organizations, and community members can be actively involved in mitigating the

*Board of Education*

potential hazards of heavy industry and traffic that affect many of our students' environments.

I appreciate your outreach to my office. Should you have any additional questions or concerns, please contact my Director of Special Projects, Francisco Sánchez, at \_\_\_\_\_ or via email at \_\_\_\_\_.

In the spirit of hope,

A handwritten signature in cursive script that reads "Mónica García".

**RE: Boyle Heights Community Plan Update – City of Los Angeles – Notice of Preparation of a Draft Environmental Impact Report – CPC-2016-2905-CPU and ENV-2016-2906-EIR**

Dear Ms. Urita-Lopez:

Thank you for the opportunity to comment on the Boyle Heights Community Plan Update relating to the approximately 6-square mile Boyle Heights Community Plan Area in the City of Los Angeles. This letter conveys recommendations from the Los Angeles County Metropolitan Transportation Authority (Metro) concerning issues that are germane to our agency's statutory responsibility in relation to our facilities and services that may be affected by the proposed project.

**Project Description:**

The proposed project is the update of the Boyle Heights Community Plan and the adoption of necessary updates to land use, zoning, plan text, and other ordinances to implement those updates. The Proposed Plan promotes a balance of housing units and jobs near transit where different types of land uses can be provided to reduce the length and number of vehicle trips. The Proposed Plan's policies complement the proposed zoning and land use designations; and they are geared towards the preservation of historic, low-density multi-family housing, the promotion of the Los Angeles River as a community amenity, the preservation of employment generating land uses, and the preservation and strengthening of commercial areas and neighborhood serving uses. Policies included in the Proposed Plan would also encourage the following goals: 1) protect historic structures; 2) preserve neighborhood character; 3) encourage well designed, quality development projects that complement and enhance the existing neighborhood character of the community; and 4) preserve the Boyle Heights mixed-density urban environment.

**Metro Comments:**

*Bus Operations:*

Several Metro bus lines operate within the Community Plan area. Metro has standard language that relates to construction activity adjacent to bus transit facilities. As a result, we want to be sure to maintain Metro bus stop zones in the corridor as well as Metro bus layover zones. Metro recommends that the Community Plan include language that informs future development activity within the Community Plan area of Metro's notification procedures and considerations for projects located in close proximity to a Metro facility that may impact Metro bus operations.

*Gold Line Light Rail Operations:*

The Metro Gold Line light rail currently operates weekday peak service as often as every five minutes in both directions and that trains may operate, in and out of revenue service, 24 hours a day, seven days a week, in the ROW proximate to the proposed project. Metro has an Adjacent Construction Design Manual that describes the Metro's development project review process and considerations for project siting as it relates to Metro facilities. Metro suggests that the project sponsor include policy language or guidance in the Community Plan that clearly denotes development occurring within 100 feet of a Metro facility will require Metro review and approval, including compliance with Metro's Development Guidelines, and that a recorded Noise Easement Deed in favor of Metro is required, and that any noise mitigation required for projects must be borne by the developers of those projects and not Metro. In particular, because of the proximity to the Metro Gold Line light rail, increased traffic at railroad grade crossings must be considered in the Community Plan. Provisions for transit priority treatments should be considered to make the development welcoming to transit access.

*Metrolink Commuter Rail Operations:*

Please note that the Southern California Regional Rail Authority (SCRRA) operates the Metrolink commuter rail network on its San Bernardino line at the northern boundary of the Boyle Heights Community Plan on Metro owned right of way. Metrolink, along with Union Pacific Freight trains, also operate along the east bank of the Los Angeles River which is noted as your western limits of the Community Plan. In particular, SCRRA has Right of Way Encroachment Procedures for any construction activities adjacent to these rail lines. These can be found on the Metrolink website at [www.metrolinktrains.com](http://www.metrolinktrains.com). Metro recommends that the Community Plan include language that informs future development activity within the Community Plan area of SCRRA's notification procedures and considerations for projects located in close proximity to the rail right of ways that may impact Metrolink rail operations. Metro recommends that all plans for developments adjacent to the active rail lines should be submitted to Metro Regional Rail and SCRRA for review to ensure compliance with SCRRA safety and design requirements.

*Transit Orientation and Active Transportation:*

Metro strongly recommends that the Community Plan include a minimum five (5) foot setback from the Metro ROW to assure that property owners can maintain their property without entering Metro property, as well as policies encouraging transit-supportive public realm improvements, such as wide sidewalks, bus shelters, comfortable seating, landscaping (i.e., street trees that provide continuous shade along transit access routes); way finding signage (directing pedestrians to transit stops and stations, and from transit facilities to points of interest in the surrounding neighborhood); and enhanced, ADA-compliant street crossing elements adjacent to transit stops and stations (i.e., enhanced crosswalks, crossing signals, and accessible ramps).

In addition, the Community Plan has various policies in place that support active transportation and multi-modalism. Metro recommends that the Community Plan update incorporates the following:

1. Coordination with Metro to implement Bike Share along Gold Line eastside corridor.
2. Provide bikeways that connect to the 1<sup>st</sup> Street bike lanes to develop a network of bicycle facilities.
3. Provide safe and convenient connections for pedestrians, people riding bicycles, and users of Metro systems and other transit services to and from the project.
4. Provide wayfinding signage to facilitate the usage of amenities for pedestrians, people riding bicycles, and transit services including Metro and others.

5. Promote the use of bicycles by:
  - a. Providing adequate short-term bicycle parking amenities such as bicycle racks and/or curbside bicycle corrals on-site and/or in the public right-off-way.
  - b. Considering providing adequate secure long-term bicycle parking for employees.

*Land Use Recommendations:*

In order to effectively realize the reductions in vehicle trips and lengths needed to promote a balance of housing units and jobs near transit envisioned by the Community Plan update, Metro recommends and supports the goals of encouraging quality development projects and strengthening of commercial areas and neighborhood serving uses throughout Boyle Heights. In particular, Metro has a number of surplus properties which are currently vacant for which we are currently preparing development guidelines that will serve to assist the City and the Boyle Heights community in achieving these goals. The first group of properties is located immediately adjacent to Mariachi Plaza at the intersection of Pennsylvania Avenue and Bailey Street (attachment). The second group consists of properties at the intersection of Cesar E. Chavez Avenue and Fickett and Cesar E. Chavez and Soto (attachment).

Since February, 2016, Metro has engaged in an extensive outreach process in the Boyle Heights community in order to obtain feedback on a vision for these sites. While very concerned about the nature of any development, the Boyle Heights community clearly desires to achieve these goals by locating affordable housing, locally serving commercial uses, a supermarket and additional open space to accommodate a street vendor hub, and by maintaining the Mariachi's presence and a park with both active and passive uses.

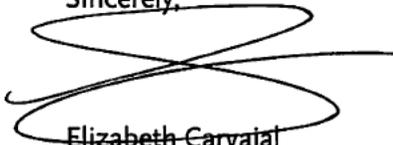

As the City guides Boyle Heights through its community planning and zoning process, Metro recommends the City prioritize achieving these goals by supporting the community's vision for these particular locations. With regard to the Mariachi Plaza site, retaining the current zoning of RD 1.5 would not help promote a balance of housing units and jobs near transit because it would negatively impact the financial feasibility of affordable housing projects. That negative impact must be avoided in Boyle Heights, which has one of the lowest median incomes of any community in the County of Los Angeles. Additionally, market forces and trends have already caused the displacement of affordable housing and one of the lowest vacancy rates in the City of Los Angeles. In order to promote a balance of housing units and jobs near transit envisioned by the update, the Boyle Heights community desires to provide more opportunities for affordable housing projects in Boyle Heights, and recognizes that the resulting higher density is appropriate. Therefore, Metro recommends the property be rezoned to R3-1 in order to accommodate the community's vision. Additionally, an R3-1 zoning would be compatible with a Transit Oriented Community given its location immediately adjacent to the Mariachi Plaza Gold Line Station.

The properties at Cesar E Chavez and Fickett and Cesar E Chavez and Soto are currently zoned C2-1 and R3-1. Through the community engagement process a vision for the site at Fickett includes: affordable housing, open space, and a locally serving supermarket. The site at Soto has completed the community engagement process and will soon enter the entitlement phase. The project will consist of 77 affordable housing units and ground floor retail. The current zoning and plan designation meets the needs of accomplishing the vision and objectives for both sites. Therefore, we recommend no changes to the existing zone/plan designation at these sites.

If you have any questions regarding this response, please contact Elizabeth Carvajal at \_\_\_\_\_ or by email at \_\_\_\_\_ **Metro looks forward to reviewing the Draft EIR. Please send it to the following address:**

Boyle Heights Community Plan Update NOP – LACMTA COMMENTS  
October 5, 2016

**RE: Boyle Heights Community Plan Update ADDENDUM – City of Los Angeles – Notice of Preparation of a Draft Environmental Impact Report – CPC-2016-2905-CPU and ENV-2016-2906-EIR**

Dear Ms. Urita-Lopez:

On October 5, 2016, the Los Angeles County Metropolitan Transportation Authority (Metro) sent the City of Los Angeles Department of Planning a response to the Notice of Preparation of a Draft Environmental Impact Report on the Boyle Heights Community Plan Update. This letter is an addendum to Metro's original letter response.

**Project Description:**

The proposed project is the update of the Boyle Heights Community Plan and the adoption of necessary updates to land use, zoning, plan text, and other ordinances to implement those updates. The Proposed Plan promotes a balance of housing units and jobs near transit where different types of land uses can be provided to reduce the length and number of vehicle trips. The Proposed Plan's policies complement the proposed zoning and land use designations; and they are geared towards the preservation of historic, low-density multi-family housing, the promotion of the Los Angeles River as a community amenity, the preservation of employment generating land uses, and the preservation and strengthening of commercial areas and neighborhood serving uses. Policies included in the Proposed Plan would also encourage the following goals: 1) protect historic structures; 2) preserve neighborhood character; 3) encourage well designed, quality development projects that complement and enhance the existing neighborhood character of the community; and 4) preserve the Boyle Heights mixed-density urban environment.

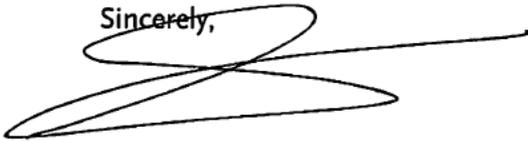

**Addendum:**

In an original letter response dated October 5, 2016, Metro included a *Land Use Recommendations* section regarding the Metro-owned properties immediately adjacent to Mariachi Plaza at the intersection of Pennsylvania Avenue and Bailey Street (attachment). Through an extensive community outreach process in 2016, the Boyle Heights community expressed a clear desire for affordable housing, locally-serving commercial uses, and additional open space to accommodate a street vendor hub at the Mariachi Plaza site.

In order to achieve these community goals for the Mariachi Plaza site and to promote a balance of housing and jobs near transit, Metro originally recommended rezoning the properties from the current zoning of RD 1.5 to R3-1. However, upon further evaluation of the existing land uses at Mariachi Plaza, Metro would like to amend this and instead recommend that the properties be rezoned as RAS-3 or a similar zone that supports mixed-use development. An RAS-3 zone accommodates the community's vision for both more affordable housing opportunities and locally-serving commercial uses, and supports Metro's goal of creating and enhancing Transit Oriented Communities.

If you have any questions regarding this response, please contact Elizabeth Carvajal at \_\_\_\_\_ or

RE: Boyle Heights Community Plan Update  
Notice of Preparation  
SCH# 2016091010  
GTS#07-LA-2016-00127

Dear Mr. Urita-Lopez:

Thank you for including the California Department of Transportation (Caltrans) in the environmental review process for the above referenced project. The project includes an update to the Boyle Heights Community Plan and adoption of necessary land use, zoning, plan text and other ordinance changes to implement the update. The proposed plan directs future growth to already urbanized areas and largely follows current pattern of land use development that focuses growth where it can be supported by existing transportation infrastructure.

Based on the information received, Caltrans has the following comments:

In the sub-heading "Walking" of the "Mobility" section of the draft Goals and Policies, it is stated the City will consider introducing angled parking along 1<sup>st</sup> Street to provide additional parking opportunities. However, the City's Mobility Plan 2035 identifies 1<sup>st</sup> Street as part of a Bicycle Enhanced Network (BEN) and is planned for protected bike lanes. With limited right-of-way, it may be difficult to fit both angled parking and protected bike lanes. If properly accommodated, though, bicycling can be a viable alternative to driving for local trips and reduce the need for additional car-parking. Also, implementing parking management technology and measures can encourage space turn over to more efficiently utilize existing spaces without adding more parking spaces.

In the sub-heading "Motorized Vehicles" in the "Mobility" section of the draft Goals and Policies, the Community Plan states it will support traffic calming measures that maintain pedestrian and bicycle circulation. If proposed traffic calming involves introducing new streetscape elements then there is an opportunity to enhance pedestrian and bicycle circulation instead of simply maintaining. The "Motorized Vehicles" section also states the Community Plan will require major developments to mitigate traffic impacts on residential neighborhoods. Possible traffic mitigations can include providing car-sharing vehicles and transit passes for residents of new developments, taking full advantage of the City's bicycle parking ordinance, and/or reducing car parking requirements. Measures that reduce the need for individual vehicle ownership and promote alternative modes of travel can reduce the number of car trips generated by a new development. For example, intersections

identified as “nodes” in the Plan where public transit is strong, there are opportunities to develop robust transit hubs with secure, safe, and convenient bicycle parking.

In general, consideration should be given to implementing multi-modal safety measures that improve conditions for all road users and reduce vehicle miles traveled. This includes measures such as road diets, bike lanes, and other traffic calming elements. Please note the Federal Highway Administration (FHWA) recognizes the road diet treatment as a proven safety countermeasure, and the cost of a road diet can be significantly reduced if implemented in tandem with routine street resurfacing.

When considering implementation of innovative bicycle infrastructure, the City should consult resources such as the National Association of Transportation Officials’ (NACTO) Urban Bikeway Design Guide, or FHWA Separated Bike Lane Planning and Design Guide, to assist in the design process. Caltrans formally endorsed the NACTO Guide in 2014 and the FHWA released its guide in 2015. Also, the State’s Highway Design Manual now contains provisions for protected bike lanes under “Design Information Bulletin Number 89: Class IV Bikeway Guidance (Separated Bikeways / Cycle Tracks).”

Current Caltrans policies related to sustainable transportation and traffic safety support the endeavors of the Community Plan to create active transportation links and focusing growth along quality transit corridors. Caltrans is aware of challenges that the region faces in identifying viable solutions to alleviating congestion on State and Local facilities. With limited room to expand vehicular capacity, the Community Plan should incorporate multi-modal transportation elements that will actively promote alternatives to car use and better manage existing parking assets. Prioritizing and allocating space to efficient modes of travel such as bicycling and public transit can allow streets to transport more people in a fixed amount of right-of-way.

Also, existing research on parking suggests that increasing the amount of automobile parking spaces in new and existing developments not only encourages and enables more driving, but also increases the cost of housing. The City should be mindful of the role parking plays in generating automobile use and explore alternatives that permit developments to reduce the amount of parking provided.

If you have any questions or concerns regarding these comments, please contact project coordinator, Severin Martinez at ( ) or ( ) and refer to GTS# 07-LA-2016-00127.

Sincerely,

DIANNA WATSON

## Fwd: Comment re: Boyle Heights Community Plan Update

---

———— Forwarded message ————

From: **Tabaian, Lindsay**

Date: Fri, Oct 7, 2016 at 4:59 PM

Subject: Comment re: Boyle Heights Community Plan Update

We submit the following comment to the Boyle Heights Community Plan Update on behalf of the Seventh Street Warehouse, LLC (“Seventh Street”):

Seventh Street is the owner of a 4.58-acre parcel of property located in Boyle Heights at the following street address: 2155-2185 E. 7th Street & 670 S. Mission Road, Los Angeles, CA 90023 (the “Property”). The Property is uniquely located along the Riverfront, directly adjacent to both the L.A. River and the 6<sup>th</sup> Street viaduct. It is currently designated “limited industrial” in the draft Boyle Heights Community Plan Update.

Seventh Street is considering various development alternatives that would capitalize on the highest and best uses of this Property in a manner consistent with the stated goals of the Los Angeles River Master Plan and beneficial to the Boyle Heights community. Although no decision has been made regarding which development option to pursue, the restrictions imposed by the Property’s “limited commercial” Community Plan designation would greatly restrict the owner’s ability to pursue those options.

We would hope that the Community Plan Update would allow for flexibility as to both uses and density in this area, in addition to the permitted industrial and job-creating uses.

More flexible uses and density will serve the Boyle Heights community and be consistent with the LA River Master Plan by allowing development that will activate the Riverfront, provide access to the River, make the Riverfront walkable for pedestrians, reduce greenhouse gas emissions, provide open space, create “community corridors”, foster job creation and encourage other related community benefits.

Thank you,

Lindsay Tabaian

**RE: Notice of Preparation (NOP) for the Boyle Heights Community  
Plan Update (ENV-2016-2906-EIR)**

Dear Ms. Urita-Lopez,

On behalf of the Los Angeles Conservancy, thank you for the opportunity to comment on the City's Notice of Preparation (NOP) of a Draft Environmental Impact Report (Draft EIR) for the Boyle Heights Community Plan Update (CPU). Along with our community partners, the Conservancy has long played an active role in preserving and protecting historic resources in Boyle Heights. Our comments are intended to help guide the discussions and planning for the rich cultural heritage and historic resources that define the community's character.

We appreciate that the Proposed Plan prioritizes the preservation of historic structures, retention of existing neighborhood character, and the construction of compatible infill development, and we look forward to greater detail in the forthcoming Draft EIR. Our goal is to ensure that the new Plan includes adequate long-term protections for identified historic; mitigates adverse impacts; and develops meaningful tools and incentives to shape future growth without sacrificing the community's irreplaceable heritage. We believe that the recently adopted West Adams-Baldwin Hills-Leimert Community Plan sets a strong precedent for the treatment of historic resources and encourage similar policies in the Proposed Plan for Boyle Heights.

**I. Proposed Plan should clearly identify and map known historic resources in relation to development goals and land use changes**

With development dating to the 1870s, Boyle Heights is one of the oldest communities in Los Angeles and contains a diverse collection of historic residential, commercial, and industrial properties. Few historic resources, however, have been formally protected at the national, state, or local levels. According to Historic Places LA, the City's online inventory of historic resources, the Plan Area currently contains nineteen Los Angeles Historic-Cultural Monuments and no Historic

Preservation Overlay Zones (HPOZs). Six properties have been individually listed in the National Register of Historic Places and California Register of Historical Resources. The CPU therefore offers a unique opportunity to incentivize and plan for more proactive, robust protections in the future.

Identifying and locating all known historic resources is the first step in demonstrating the ways in which the Plan may impact these resources. The Plan should clearly incorporate findings from SurveyLA – both graphically and in data form – in order to articulate the relationships between development goals and historic resources. The findings should include resources identified in the SurveyLA report for Boyle Heights, as well as resources identified in the City’s Ethnic/Cultural Context Statements that are located within the Plan boundaries.

We strongly encourage the inclusion of maps illustrating the locations of all identified historic resources, including existing and eligible HCMs, properties listed in or eligible for the National and California Registers, and potential historic districts. These should be overlaid with any proposed land use changes or any Floor Area Ratio (FAR) Incentive Area(s) put forth in the proposed Plan. Inclusion of such graphic representations would greatly increase the understanding of how the Plan will impact various types of historic resources and districts, and hopefully facilitate development of more nuanced and specific planning tools to protect them.

The NOP specifically highlights the Brooklyn Avenue Corridor and neighborhoods surrounding Prospect Park and Hollenbeck Park as having high concentrations of historic resources. While we concur with their significance and support the development of new zoning regulations to protect their historic character, we urge the City to analyze and plan for historic resources throughout the Community Plan Area.

## **II. The Draft EIR should evaluate Proposed Plan’s potential impacts on historic resources and assess a range of alternatives and mitigation measures**

A key policy under the California Environmental Quality Act (CEQA) is the lead agency’s duty to “take all action necessary to provide the people of this state with historic environmental qualities and preserve for future generations examples of major periods of California history.”<sup>1</sup> CEQA “requires public agencies to deny approval of a project with significant adverse effects when feasible alternatives or feasible mitigation measures can substantially lessen such effects.”<sup>2</sup>

Courts often refer to the EIR as “the heart” of CEQA because it provides decision makers with an in-depth review of projects with potentially significant environmental impacts and analyzes a range of alternatives that reduce those impacts.<sup>3</sup> If there are known impacts, the DEIR should evaluate a “range of reasonable

---

<sup>1</sup> Public Resource Code, Sec. 21001 (b),(c).

<sup>2</sup> *Sierra Club v. Gilroy City Council* (1990) 222 Cal.App.3d 30, 41, italics added; also see PRC Secs. 21002, 21002.1.

<sup>3</sup> *County of Inyo v. Yorty* (1973) 32 Cal.App.3d 795; *Laurel Heights Improvement Association v. Regents of the University of California* (1993) 6 Cal.4th 1112, 1123.

alternatives...which would feasibly attain most of the basic objectives of the project but would avoid or substantially lessen any of the significant effects of the project.”<sup>4</sup>

The NOP states that impacts to cultural resources are anticipated as a result of the Proposed Plan. As part of the forthcoming study in the Draft EIR, we strongly encourage the inclusion of a technical report or historic assessment to substantiate any conclusions. This analysis would help clarify how proposed development incentives may increase activities in areas with historic resources and would serve as the basis for preservation alternatives and/or mitigation measures that could substantially lessen or avoid adverse impacts.

At a minimum, direct and cumulative impacts of height district, zoning, and plan amendment changes proposed for and adjacent to areas with identified national, state, or local historic districts should be evaluated. The impacts of these types of changes on potential districts as a whole, as well as individually eligible resources, should be assessed and mitigated in the upcoming Draft EIR. We strongly recommend the inclusion of land use policies that direct development pressures away from historic resources. Furthermore, a map with the land use and zone changes overlaid with identified and potential historic resources could pinpoint areas for additional study.

The Proposed Plan should also incorporate policies from other Community Plans, such as the West Adams Plan, that will help mitigate potential impacts to historic resources. It should encourage compliance with the *Secretary of the Interior’s Standards for the Treatment of Historic Properties* for historically sensitive structures; promote and incentivize adaptive reuse; and require evaluation of potential significance by the Office of Historic Resources for projects involving buildings forty-five years of age or older. In order to prevent preemptive demolitions and discourage vacant lots, the Plan should also require applicants to submit plans for replacement projects prior to the issuance of a demolition permit for buildings older than forty-five years.

We understand that the Draft EIR will analyze a range of zoning tools to manage change in older and historic neighborhoods in Boyle Heights, and we strongly encourage further study of conservation districts to complement the City’s HPOZ program. Conservation districts, which help preserve and enhance older neighborhoods by regulating lot size, building height, setbacks, streetscapes, and other neighborhood features, could be appropriate for areas that retain distinctive character, but may not be eligible for historic designation. The tool should establish clear guidelines regarding the scale and overall design of new construction in order to conserve the existing neighborhood setting and ensure greater compatibility between old and new.

**About the Los Angeles Conservancy:**

The Los Angeles Conservancy is the largest local historic preservation organization in the United States, with nearly 6,500 members throughout the Los Angeles area. Established in 1978, the Conservancy works to preserve and revitalize the significant architectural and cultural heritage of Los Angeles County through advocacy and education.

**CITY OF LOS ANGELES**  
INTER-DEPARTMENTAL CORRESPONDENCE

RECEIVED SEP 20 2016

**DATE:** September 13, 2016  
**TO:** Vincent P. Bertoni, Director of Planning  
Department of City Planning  
**Attn:** Conni Pallini-Tipton, Senior City Planner  
Department of City Planning  
**FROM:** Ali Poosti, Division Manager  
Wastewater Engineering Services Division  
LA Sanitation

**SUBJECT: NOTICE OF PREPARATION OF A DRAFT ENVIROMENTAL IMPACT REPORT AND NOTICE OF SCOPING MEETING FOR THE BOYLE HEIGHTS COMMUNITY PLAN UPDATE**

This is in response to your September 2, 2016 letter requesting a review of your proposed project. The Boyle Heights Community Plan Update is bounded on the north by the San Bernardino Freeway/Interstate 10 and Marengo Street, on the west by the Los Angeles River and the east by Indiana Street, and on the south by the Union Pacific and Santa Fe Railroad tracks. LA Sanitation has conducted a preliminary evaluation of the potential impacts to the wastewater and stormwater systems for the proposed project.

**WASTEWATER REQUIREMENT**

This memo is in response to your letter requesting wastewater service information for the proposed project area. LA Sanitation, Wastewater Engineering Service Division (WESD), has conducted a preliminary evaluation of the existing sewer structural condition and capacity within the vicinity of your proposed project location.

The City of Los Angeles sewer system consists of primary sewers (16-inches and larger in diameter) and secondary sewers (less than 16-inches in diameter). The secondary sewers service the property laterals and feed into the primary sewer lines. The primary sewers in turn discharge to the trunk, interceptor, and outfall pipes. The wastewater is ultimately conveyed to the Hyperion Treatment plant which has sufficient capacity for current and future development.

At this stage your project description lacks sufficient detail for us to conduct a thorough capacity analysis as description for individual proposed developments are needed to asses sewage generation. However, we have enclosed as much information as possible in the form of our latest Sewer Basin Plans, sewer gauging and condition assessment that covers your project area.

**PRIMARY SEWERS**

The primary sewer master plan report discusses the projected hydraulic capacity condition and needs of the basin in detail. The hydraulic capacity assessment is based upon modeling which makes use of flow gauging together with projected estimates of future wastewater generation. The condition assessment is based on closed circuit television (CCTV) inspection data.

CCTV inspection ultimately results in a rank or grade that reflects the structural condition and determines the course of action to follow. The structural condition ranks are described in Table 1.

Ranking	Description	Action
A	Pipe is in very good condition.	No action required.
B	Pipe is in good condition.	No action required.
C	Pipe is in fair condition.	Lower priority for rehabilitation project. Conduct another CCTV inspection in five years.
D	Pipe is in poor condition.	Schedule for rehabilitation.
E	Pipe requires emergency repair or replacement.	Issue emergency contract for repair/replacement.

Based on the structural conditions, most of the primary sewer lines in the Boyle Heights Community Plan Update are in good condition. Although there are nine on-going rehabilitation projects currently being planned and designed shown in Table 2:

Project Name	Start Date	End Date	Phase
NOS Rehab Unit 7 - Wilson to LA River (NOS Unit 6)	12/1/2016	11/30/2019	Bid & Award
PP 606 - Dacotha Generator Replacement (7223, 7229, 7230, 7232)	6/3/2016	8/31/2017	Construction
SSRP N09 Lorena St. & Whittier Blvd.	1/18/2017	3/14/2018	Design
DAR 04 Northeast LA / Eagle Rock / Lincoln Heights	3/15/2017	9/14/2018	Design
SSRP N04 Washington Bl & Soto St (C944)	9/1/2018	2/29/2020	Design
SSRP P01B Daly St & North Main St	6/2/2018	7/31/2019	Pre-Design
NOS Rehab Unit 9 - Aliso to 6th	8/2/2023	7/31/2025	Pre-Design
CS- Dacotah Carbon Scrubber Facility Upgrade	9/1/2018	9/1/2019	Pre-Design
CS- Richmond Carbon Scrubber Facility Upgrade	9/1/2018	9/1/2019	Pre-Design

Capacity

Based on existing gauging information, the primary sewers within the proposed project location have no current conveyance capacity constraints. The current approximate flow level (d/D) in the primary sewer are shown in Figure 1 and Table 3.

MH #	Pipe Location	Gauged d/D (%)	Gauged Date
51514137	FICKETT ST	57	5/4/2014
53806063	PICO BL	45	5/22/2014

<b>MH #</b>	<b>Pipe Location</b>	<b>Gauged d/D (%)</b>	<b>Gauged Date</b>
53802156	CAMULOS ST	33	5/26/2014
53802151	8TH ST	31	5/28/2014
51505006	MISSION RD R/W	32	5/28/2014
51505015	MISSION RD	39	5/28/2014
51509135	EASE N/O WHITTIER BLVD	27	6/15/2014
51509088	MISSION RD	33	8/9/2013
51509177	MISSION RD	15	8/13/2013
51513001	MISSION RD	60	8/19/2013
51510108	BOYLE AVE R/W	60	6/8/2014
53806120	SOTO ST	67	7/2/2014
51502093	MISSION RD R/W	55	7/11/2014

The hydraulic capacity modeling analysis indicates no additional hydraulic relief projects are needed at this time.

## **SECONDARY SEWERS**

The secondary sewer renewal program discusses the projected hydraulic capacity condition and needs of the basin in detail. The hydraulic capacity assessment is based upon modeling which makes use of flow gauging together with projected estimates of future wastewater generation. The condition assessment is based on closed circuit television (CCTV) inspection data.

Based on the structural conditions, most of the secondary sewer lines in the Boyle Heights Community Plan Update are in good condition. Although there are four on-going rehabilitation projects currently being planned and designed are shown in Table 4:

<b>Project Name</b>	<b>Start Date</b>	<b>End Date</b>	<b>Phase</b>
SSRP N09 Lorena St. & Whittier Blvd.	1/18/2017	3/14/2018	Design
DAR 04 Northeast LA / Eagle Rock / Lincoln Heights	3/15/2017	9/14/2018	Design
SSRP N04 Washington Bl & Soto St (C944)	9/1/2018	2/29/2020	Design
SSRP P01B Daly St & North Main St	6/2/2018	7/31/2019	Pre-Design

Our latest CCTV inspection results indicate most of the secondary sewers in the project area are in fairly good condition. Figure 2 shows the current conditions of the sewers within the project study area. The remaining Secondary Sewer Plan Reports with in the area are currently pending and will be completed in the near future.

### Capacity

Based on existing gauging information, the secondary sewers within the proposed project location have no current conveyance capacity constraints. The current approximate flow level (d/D) in the secondary sewer basins are shown in Figure 1 and Table 5.

<b>MH #</b>	<b>Pipe Location</b>	<b>Gauged d/D (%)</b>	<b>Gauged Date</b>
53803144	CONCORD ST	58	5/4/2014
53802151	8TH ST	31	5/28/2014
51502114	CUMMINGS ST R/W	38	5/28/2014
51515081	4TH ST	17	2/25/2014
51510108	BOYLE AVE R/W	60	6/8/2014
53806023	PICO BL	16	7/2/2014
53802143	SOTO ST	10	7/3/2014
53801074	RIO VISTA AV	23	7/5/2014
51502039	LORD ST	25	7/11/2014
51502093	MISSION RD R/W	55	7/11/2014
51510016	VENICE BL	22	7/11/2014
51502057	STATE ST	48	7/14/2014
51512030	INDIANA ST	44	10/3/2014
51512031	INDIANA ST	28	10/3/2014
53807072	CALZONA ST	44	1/6/2015
53807166	16TH ST	60	1/6/2015
53807185	CALZONA ST	37	1/6/2015

The hydraulic capacity modeling analysis indicates no additional hydraulic relief projects are needed at this time.

**SUMMARY**

A more detailed review of your project, or individual elements of your project, will be required as your project progresses and sufficient details are developed. At that time you will need to submit a Sewer Capacity Availability Request (SCAR) and will need to provide detailed project information showing the exact building location, type, use, and occupancy along with the projected wastewater flow rates and the proposed sewer connection. If the public sewer has insufficient capacity for any proposed building project then the developer will be required to build public sewers to a point in the sewer system with sufficient capacity. A final approval for sewer capacity and connection permit will be made at that time.

If you have any questions, please call Eduardo Perez of my staff at (323) 342-6207.

**STORMWATER REQUIREMENTS**

LA Sanitation, Watershed Protection Division (WPD) is charged with the task of ensuring the implementation of the Municipal Stormwater Permit requirements within the City of Los Angeles. We anticipate the following requirements would apply for this project.

**POST-CONSTRUCTION MITIGATION REQUIREMENTS**

The project requires implementation of stormwater mitigation measures. These requirements are based on Stormwater Low Impact Development (LID) requirements. The projects that are subject to LID are required to incorporate measures to mitigate the impact of stormwater runoff. The requirements are

outlined in the guidance manual titled "*Development Best Management Practices Handbook – Part B: Planning Activities*". Current regulations prioritize infiltration, capture/use, and then biofiltration as the preferred stormwater control measures. The relevant documents can be found at: [www.lastormwater.org](http://www.lastormwater.org). It is advised that input regarding LID requirements be received in the early phases of the project from WPD's plan-checking staff.

#### GREEN STREETS

The City is developing a Green Street Initiative that will require projects to implement Green Street elements in the parkway areas between the roadway and sidewalk of the public right-of-way to capture and retain stormwater and urban runoff to mitigate the impact of stormwater runoff and other environmental concerns. The goals of the Green Street elements are to improve the water quality of stormwater runoff, recharge local ground water basins, improve air quality, reduce the heat island effect of street pavement, enhance pedestrian use of sidewalks, and encourage alternate means of transportation. The Green Street elements may include infiltration systems, biofiltration swales, and permeable pavements where stormwater can be easily directed from the streets into the parkways and can be implemented in conjunction with the LID requirements.

#### CONSTRUCTION REQUIREMENTS

The project is required to implement stormwater control measures during its construction phase. All projects are subject to a set of minimum control measures to lessen the impact of stormwater pollution. In addition for projects that involve construction during the rainy season that is between October 1 and April 15, a Wet Weather Erosion Control Plan is required to be prepared. Also projects that disturb more than one-acre of land are subject to the California General Construction Stormwater Permit. As part of this requirement a Notice of Intent (NOI) needs to be filed with the State of California and a Storm Water Pollution Prevention Plan (SWPPP) needs to be prepared. The SWPPP must be maintained on-site during the duration of construction.

If there are questions regarding the stormwater requirements, please call Kosta Kaporis at (213) 485-0586, or WPD's plan-checking counter at . . . . . WPD's plan-checking counter can also be visited at

#### GROUNDWATER DEWATERING REUSE OPTIONS

The Los Angeles Department of Water and Power (LADWP) is charged with the task of supplying water and power to the residents and businesses in the City of Los Angeles. One of the sources of water includes groundwater. The majority of groundwater in the City of Los Angeles is adjudicated, and the rights of which are owned and managed by various parties. Extraction of groundwater within the City from any depth by law requires metering and regular reporting to the appropriate Court-appointed Watermaster. LADWP facilitates this reporting process, and may assess and collect associated fees for the usage of the City's water rights. The party performing the dewatering should inform the property owners about the reporting requirement and associated usage fees.

On April 22, 2016 the City of Los Angeles Council passed Ordinance 184248 amending the City of Los Angeles Building Code, requiring developers to consider beneficial reuse of groundwater as a conservation measure and alternative to the common practice of discharging groundwater to the storm drain (SEC. 99.04.305.4). It reads as follows: "Where groundwater is being extracted and discharged, a system for

Vincent P. Bertoni, Director of Planning

July 13, 2016

Page 6 of 6

onsite reuse of the groundwater, shall be developed and constructed. Alternatively, the groundwater may be discharged to the sewer.”

Groundwater may be beneficially used as landscape irrigation, cooling tower make-up, and construction (dust control, concrete mixing, soil compaction, etc.). Different applications may require various levels of treatment ranging from chemical additives to filtration systems. When onsite reuse is not available the groundwater may be discharged to the sewer system. This allows the water to be potentially reused as recycled water once it has been treated at a water reclamation plant. If groundwater is discharged into the storm drain it offers no potential for reuse. The onsite beneficial reuse of groundwater can reduce or eliminate costs associated with sewer and storm drain permitting and monitoring. Opting for onsite reuse or discharge to the sewer system are the preferred methods for disposing of groundwater.

To help offset costs of water conservation and reuse systems, LADWP offers the Technical Assistance Program (TAP), which provides engineering and technical assistance for qualified projects. Financial incentives are also available. Currently, LADWP provides an incentive of \$1.75 for every 1,000 gallons of water saved during the first two years of a five-year conservation project. Conservation projects that last 10 years are eligible to receive the incentive during the first four years. Other water conservation assistance programs may be available from Metropolitan Water District of Southern California. To learn more about available water conservation assistance programs, please contact LADWP Rebate Programs 1-888-376-3314 and LADWP TAP 1-800-544-4498, selection “3”.

For more information related to beneficial reuse of groundwater, please contact Greg Reed, Manager of Water Rights and Groundwater Management, at

### **SOLID RESOURCE REQUIREMENTS**

The City has a standard requirement that applies to all proposed residential developments of four or more units or where the addition of floor areas is 25 percent or more, and all other development projects where the addition of floor area is 30 percent or more. Such developments must set aside a recycling area or room for onsite recycling activities. For more details of this requirement, please contact Daniel Hackney of the Special Project Division at

Ms. Haydee Urita-Lopez  
City of Los Angeles  
200 N. Spring Street, Room 667  
Los Angeles, CA 90012

RE: Boyle Heights Community Plan Update  
SCH # 2016091010  
Vic. LA-10, LA-05, LA-60, LA-101  
LA-2016-00127-AL-NOP

Dear Ms. Urita-Lopez:

Thank you for including the California Department of Transportation (Caltrans) in the environmental review process for the above referenced project. The project is the update of the Boyle Heights Community Plan and the adoption of necessary updates to land use, zoning, plan text, and other ordinances to implement these updates. The draft land use represents land use designations that accommodate forecasted housing, population, and employment growth in the CPA for the next 20 to 25 years.

As confirmed during your telephone conversation with Mr. Alan Lin on September 28, 2016, the City will prepare the transportation impact study based on Vehicle Miles Traveled (VMT). Please note that the Freeway Impact Analysis Screening Criteria Agreement, between the City of Los Angeles and Caltrans District 7, dated October 1, 2013 and Amendment dated December 15, 2015 is no longer valid to apply for this project.

Caltrans' mission is to provide a safe, sustainable, integrated and efficient transportation system to enhance California's economy and livability. The Local Development-Intergovernmental Review (LD-IGR) program reviews land use projects and plans through the lenses of our mission and state planning priorities of infill, conservation, and travel-efficient development. To ensure a safe and efficient transportation system, we encourage early consultation and coordination with local jurisdictions and project proponents on all development projects that utilize the multimodal transportation network. The following comments are based on information included in the NOP.

In developing this community plan, Caltrans encourages the City to integrate transportation and land use in a way that reduces Vehicle Miles Traveled (VMT) and Greenhouse Gas (GHG) emissions by facilitating the provision of more proximate goods and services to shorten trip lengths, and achieve a high level of non-motorized travel and transit use. As such, we encourage the City evaluate the potential of Transportation Demand Management (TDM) strategies and Intelligent Transportation System (ITS) applications in order to better manage the transportation network, as well as transit service and bicycle or pedestrian connectivity improvements.

*"Provide a safe, sustainable, integrated and efficient transportation system  
to enhance California's economy and livability"*

A queuing analysis of the off-ramps within the project boundaries should be conducted to ensure that safety issues are addressed, such that rear end accidents on the mainline can be avoided. The total queue length of the off-ramp should be calculated by the actual length of the off-ramp between the terminuses to the gore point with some safety factor or referenced to Highway Design Manual at 23' point (Figure 504.2A Single Lane Freeway Entrance) or any other sufficient methods. The queue length should be calculated from the traffic counts and the percent of truck assignments (data from Caltrans) to the ramp with a passenger car equivalent factor. The analyzed result may need to be calibrated with actual signal timing when necessary. It is also recommended that the City determine whether the existing, existing plus project, and project-related plus cumulative traffic are expected to cause long queues on the off-ramps.

Caltrans requests that an analysis of the community plan impacts and mitigation include information regarding the City's local impact fee program. The analysis should identify if those programs include improvements to State facilities relating to safety issues, pedestrian, bicycle and transit infrastructure or that could be considered representative of the project's likely TDM mitigation measures. If no such fee exists, we would appreciate exploring with you the establishment of local VMT-based transportation impact fee programs.

Senate Bill 743 (2013) mandated that CEQA review of transportation impacts of proposed developments be modified by eliminating consideration of delay- and capacity- based metrics such as level of service (LOS) and instead focusing analysis on another metric of impact. The Governor's Office of Planning and Research (OPR) is currently updating its CEQA Guidelines to implement SB 743 ([https://www.opr.ca.gov/s\\_sb743.php](https://www.opr.ca.gov/s_sb743.php)) and is proposing that vehicle miles traveled be the primary metric used in identifying transportation impacts.

The Office of Planning and Research (OPR) has released a separate "Technical Advisory" outlining recommended techniques for measuring impacts with this new metric, which applies statewide. General Plan Guidelines ([https://www.opr.ca.gov/s\\_generalplanguidelines.php](https://www.opr.ca.gov/s_generalplanguidelines.php)) are also concurrently being updated to align with state policy, including SB 743.

The City should refer the project's traffic consultant to OPR's website, guidelines on evaluating transportation impacts in CEQA:

[https://www.opr.ca.gov/docs/Revised\\_VMT\\_CEQA\\_Guidelines\\_Proposal\\_January\\_20\\_2016.pdf](https://www.opr.ca.gov/docs/Revised_VMT_CEQA_Guidelines_Proposal_January_20_2016.pdf)

We are looking forward to work with Lead Agencies to address transportation deficiencies and enhancements through policies at the planning level and through mitigation fee programs. We would like to encourage Lead Agencies to share plans and projects for review that directly abuts the State Highway System (SHS), are in vicinity of a State Highway, or projects for which Caltrans must approve and issue an encroachment permit.

Caltrans would like to request a Scoping Meeting for this project, please feel free to contact Mr. Alan Lin the project coordinator at \_\_\_\_\_ and refer to LA-2016-00127-AL-NOP.

Sincerely,

DIANNA WATSON  
IGR/CEQA Branch Chief  
Community Planning & LD IGR Review

RE: SCH# 2016091010; Boyle Heights Community Plan Update Project, Notice of Preparation for Draft Environmental Impact Report, Los Angeles County, California

Dear Ms. Urita-Lopez:

The Native American Heritage Commission has received the Notice of Preparation (NOP) for the project referenced above. The California Environmental Quality Act (CEQA) (Pub. Resources Code § 21000 et seq.), specifically Public Resources Code section 21084.1, states that a project that may cause a substantial adverse change in the significance of an historical resource is a project that may have a significant effect on the environment. (Pub. Resources Code § 21084.1; Cal. Code Regs., tit. 14, § 15064.5 (b) (CEQA Guidelines Section 15064.5 (b))). If there is substantial evidence, in light of the whole record before a lead agency, that a project may have a significant effect on the environment, an environmental impact report (EIR) shall be prepared. (Pub. Resources Code § 21080 (d); Cal. Code Regs., tit. 14, § 15064 subd.(a)(1) (CEQA Guidelines § 15064 (a)(1))). In order to determine whether a project will cause a substantial adverse change in the significance of a historical resource, a lead agency will need to determine whether there are historical resources with the area of project effect (APE).

**CEQA was amended significantly in 2014.** Assembly Bill 52 (Gatto, Chapter 532, Statutes of 2014) (AB 52) amended CEQA to create a **separate category of cultural resources**, "tribal cultural resources" (Pub. Resources Code § 21074) and provides that a project with an effect that may cause a substantial adverse change in the significance of a tribal cultural resource is a project that may have a significant effect on the environment. (Pub. Resources Code § 21084.2). Public agencies shall, when feasible, avoid damaging effects to any tribal cultural resource. (Pub. Resources Code § 21084.3 (a)). **AB 52 applies to any project for which a notice of preparation or a notice of negative declaration or mitigated negative declaration is filed on or after July 1, 2015.** If your project involves the adoption of or amendment to a general plan or a specific plan, or the designation or proposed designation of open space, on or after March 1, 2005, it may also be subject to Senate Bill 18 (Burton, Chapter 905, Statutes of 2004) (SB 18). **Both SB 18 and AB 52 have tribal consultation requirements.** If your project is also subject to the federal National Environmental Policy Act (42 U.S.C. § 4321 et seq.) (NEPA), the tribal consultation requirements of Section 106 of the National Historic Preservation Act of 1966 (154 U.S.C. 300101, 36 C.F.R. § 800 et seq.) may also apply.

The NAHC recommends **lead agencies consult with all California Native American tribes** that are traditionally and culturally affiliated with the geographic area of your proposed project as early as possible in order to avoid inadvertent discoveries of Native American human remains and best protect tribal cultural resources. Below is a brief summary of portions of AB 52 and SB 18 as well as the NAHC's recommendations for conducting cultural resources assessments. **Consult your legal counsel about compliance with AB 52 and SB 18 as well as compliance with any other applicable laws.**

#### AB 52

AB 52 has added to CEQA the additional requirements listed below, along with many other requirements:

1. **Fourteen Day Period to Provide Notice of Completion of an Application/Decision to Undertake a Project:** Within fourteen (14) days of determining that an application for a project is complete or of a decision by a public agency to undertake a project, a **lead agency** shall provide formal notification to a designated contact of, or tribal representative of, traditionally and culturally affiliated California Native American tribes that have requested notice, to be accomplished by at least one written notice that includes:
  - a. A brief description of the project.
  - b. The lead agency contact information.
  - c. Notification that the California Native American tribe has 30 days to request consultation. (Pub. Resources Code § 21080.3.1 (d)).
  - d. A "California Native American tribe" is defined as a Native American tribe located in California that is on the contact list maintained by the NAHC for the purposes of Chapter 905 of Statutes of 2004 (SB 18). (Pub. Resources Code § 21073).

2. Begin Consultation Within 30 Days of Receiving a Tribe's Request for Consultation and Before Releasing a Negative Declaration, Mitigated Negative Declaration, or Environmental Impact Report: A lead agency shall begin the consultation process within 30 days of receiving a request for consultation from a California Native American tribe that is traditionally and culturally affiliated with the geographic area of the proposed project. (Pub. Resources Code § 21080.3.1, subs. (d) and (e)) and prior to the release of a negative declaration, mitigated negative declaration or environmental impact report. (Pub. Resources Code § 21080.3.1(b)).
  - a. For purposes of AB 52, "consultation shall have the same meaning as provided in Gov. Code § 65352.4 (SB 18). (Pub. Resources Code § 21080.3.1 (b)).
3. Mandatory Topics of Consultation If Requested by a Tribe: The following topics of consultation, if a tribe requests to discuss them, are mandatory topics of consultation:
  - a. Alternatives to the project.
  - b. Recommended mitigation measures.
  - c. Significant effects. (Pub. Resources Code § 21080.3.2 (a)).
4. Discretionary Topics of Consultation: The following topics are discretionary topics of consultation:
  - a. Type of environmental review necessary.
  - b. Significance of the tribal cultural resources.
  - c. Significance of the project's impacts on tribal cultural resources.
  - d. If necessary, project alternatives or appropriate measures for preservation or mitigation that the tribe may recommend to the lead agency. (Pub. Resources Code § 21080.3.2 (a)).
5. Confidentiality of Information Submitted by a Tribe During the Environmental Review Process: With some exceptions, any information, including but not limited to, the location, description, and use of tribal cultural resources submitted by a California Native American tribe during the environmental review process shall not be included in the environmental document or otherwise disclosed by the lead agency or any other public agency to the public, consistent with Government Code sections 6254 (r) and 6254.10. Any information submitted by a California Native American tribe during the consultation or environmental review process shall be published in a confidential appendix to the environmental document unless the tribe that provided the information consents, in writing, to the disclosure of some or all of the information to the public. (Pub. Resources Code § 21082.3 (c)(1)).
6. Discussion of Impacts to Tribal Cultural Resources in the Environmental Document: If a project may have a significant impact on a tribal cultural resource, the lead agency's environmental document shall discuss both of the following:
  - a. Whether the proposed project has a significant impact on an identified tribal cultural resource.
  - b. Whether feasible alternatives or mitigation measures, including those measures that may be agreed to pursuant to Public Resources Code section 21082.3, subdivision (a), avoid or substantially lessen the impact on the identified tribal cultural resource. (Pub. Resources Code § 21082.3 (b)).
7. Conclusion of Consultation: Consultation with a tribe shall be considered concluded when either of the following occurs:
  - a. The parties agree to measures to mitigate or avoid a significant effect, if a significant effect exists, on a tribal cultural resource; or
  - b. A party, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached. (Pub. Resources Code § 21080.3.2 (b)).
8. Recommending Mitigation Measures Agreed Upon in Consultation in the Environmental Document: Any mitigation measures agreed upon in the consultation conducted pursuant to Public Resources Code section 21080.3.2 shall be recommended for inclusion in the environmental document and in an adopted mitigation monitoring and reporting program, if determined to avoid or lessen the impact pursuant to Public Resources Code section 21082.3, subdivision (b), paragraph 2, and shall be fully enforceable. (Pub. Resources Code § 21082.3 (a)).
9. Required Consideration of Feasible Mitigation: If mitigation measures recommended by the staff of the lead agency as a result of the consultation process are not included in the environmental document or if there are no agreed upon mitigation measures at the conclusion of consultation, or if consultation does not occur, and if substantial evidence demonstrates that a project will cause a significant effect to a tribal cultural resource, the lead agency shall consider feasible mitigation pursuant to Public Resources Code section 21084.3 (b). (Pub. Resources Code § 21082.3 (e)).
10. Examples of Mitigation Measures That, If Feasible, May Be Considered to Avoid or Minimize Significant Adverse Impacts to Tribal Cultural Resources:
  - a. Avoidance and preservation of the resources in place, including, but not limited to:
    - i. Planning and construction to avoid the resources and protect the cultural and natural context.

- ii. Planning greenspace, parks, or other open space, to incorporate the resources with culturally appropriate protection and management criteria.
  - b. Treating the resource with culturally appropriate dignity, taking into account the tribal cultural values and meaning of the resource, including, but not limited to, the following:
    - i. Protecting the cultural character and integrity of the resource.
    - ii. Protecting the traditional use of the resource.
    - iii. Protecting the confidentiality of the resource.
  - c. Permanent conservation easements or other interests in real property, with culturally appropriate management criteria for the purposes of preserving or utilizing the resources or places.
  - d. Protecting the resource. (Pub. Resource Code § 21084.3 (b)).
  - e. Please note that a federally recognized California Native American tribe or a nonfederally recognized California Native American tribe that is on the contact list maintained by the NAHC to protect a California prehistoric, archaeological, cultural, spiritual, or ceremonial place may acquire and hold conservation easements if the conservation easement is voluntarily conveyed. (Civ. Code § 815.3 (c)).
  - f. Please note that it is the policy of the state that Native American remains and associated grave artifacts shall be repatriated. (Pub. Resources Code § 5097.991).
11. Prerequisites for Certifying an Environmental Impact Report or Adopting a Mitigated Negative Declaration or Negative Declaration with a Significant Impact on an Identified Tribal Cultural Resource: An environmental impact report may not be certified, nor may a mitigated negative declaration or a negative declaration be adopted unless one of the following occurs:
- a. The consultation process between the tribes and the lead agency has occurred as provided in Public Resources Code sections 21080.3.1 and 21080.3.2 and concluded pursuant to Public Resources Code section 21080.3.2.
  - b. The tribe that requested consultation failed to provide comments to the lead agency or otherwise failed to engage in the consultation process.
  - c. The lead agency provided notice of the project to the tribe in compliance with Public Resources Code section 21080.3.1 (d) and the tribe failed to request consultation within 30 days. (Pub. Resources Code § 21082.3 (d)). *This process should be documented in the Cultural Resources section of your environmental document.*

The NAHC's PowerPoint presentation titled, "Tribal Consultation Under AB 52: Requirements and Best Practices" may be found online at: [http://nahc.ca.gov/wp-content/uploads/2015/10/AB52TribalConsultation\\_CalEPAPDF.pdf](http://nahc.ca.gov/wp-content/uploads/2015/10/AB52TribalConsultation_CalEPAPDF.pdf)

## SB 18

SB 18 applies to local governments and requires **local governments** to contact, provide notice to, refer plans to, and consult with tribes prior to the adoption or amendment of a general plan or a specific plan, or the designation of open space. (Gov. Code § 65352.3). Local governments should consult the Governor's Office of Planning and Research's "Tribal Consultation Guidelines," which can be found online at: [https://www.opr.ca.gov/docs/09\\_14\\_05\\_Updated\\_Guidelines\\_922.pdf](https://www.opr.ca.gov/docs/09_14_05_Updated_Guidelines_922.pdf)

Some of SB 18's provisions include:

1. Tribal Consultation: If a local government considers a proposal to adopt or amend a general plan or a specific plan, or to designate open space it is required to contact the appropriate tribes identified by the NAHC by requesting a "Tribal Consultation List." If a tribe, once contacted, requests consultation the local government must consult with the tribe on the plan proposal. **A tribe has 90 days from the date of receipt of notification to request consultation unless a shorter timeframe has been agreed to by the tribe.** (Gov. Code § 65352.3 (a)(2)).
2. No Statutory Time Limit on SB 18 Tribal Consultation. There is no statutory time limit on SB 18 tribal consultation.
3. Confidentiality: Consistent with the guidelines developed and adopted by the Office of Planning and Research pursuant to Gov. Code section 65040.2, the city or county shall protect the confidentiality of the information concerning the specific identity, location, character, and use of places, features and objects described in Public Resources Code sections 5097.9 and 5097.993 that are within the city's or county's jurisdiction. (Gov. Code § 65352.3 (b)).
4. Conclusion of SB 18 Tribal Consultation: Consultation should be concluded at the point in which:
  - a. The parties to the consultation come to a mutual agreement concerning the appropriate measures for preservation or mitigation; or
  - b. Either the local government or the tribe, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached concerning the appropriate measures of preservation or mitigation. (Tribal Consultation Guidelines, Governor's Office of Planning and Research (2005) at p. 18).

Agencies should be aware that neither AB 52 nor SB 18 precludes agencies from initiating tribal consultation with tribes that are traditionally and culturally affiliated with their jurisdictions before the timeframes provided in AB 52 and SB 18. For that reason, we urge you to continue to request Native American Tribal Contact Lists and "Sacred Lands File" searches from the NAHC. The request forms can be found online at: <http://nahc.ca.gov/resources/forms/>

## NAHC Recommendations for Cultural Resources Assessments

To adequately assess the existence and significance of tribal cultural resources and plan for avoidance, preservation in place, or barring both, mitigation of project-related impacts to tribal cultural resources, the NAHC recommends the following actions:

1. Contact the appropriate regional California Historical Research Information System (CHRIS) Center ([http://ohp.parks.ca.gov/?page\\_id=1068](http://ohp.parks.ca.gov/?page_id=1068)) for an archaeological records search. The records search will determine:
  - a. If part or all of the APE has been previously surveyed for cultural resources.
  - b. If any known cultural resources have been already recorded on or adjacent to the APE.
  - c. If the probability is low, moderate, or high that cultural resources are located in the APE.
  - d. If a survey is required to determine whether previously unrecorded cultural resources are present.
2. If an archaeological inventory survey is required, the final stage is the preparation of a professional report detailing the findings and recommendations of the records search and field survey.
  - a. The final report containing site forms, site significance, and mitigation measures should be submitted immediately to the planning department. All information regarding site locations, Native American human remains, and associated funerary objects should be in a separate confidential addendum and not be made available for public disclosure.
  - b. The final written report should be submitted within 3 months after work has been completed to the appropriate regional CHRIS center.
3. Contact the NAHC for:
  - a. A Sacred Lands File search. Remember that tribes do not always record their sacred sites in the Sacred Lands File, nor are they required to do so. A Sacred Lands File search is not a substitute for consultation with tribes that are traditionally and culturally affiliated with the geographic area of the project's APE.
  - b. A Native American Tribal Consultation List of appropriate tribes for consultation concerning the project site and to assist in planning for avoidance, preservation in place, or, failing both, mitigation measures.
4. Remember that the lack of surface evidence of archaeological resources (including tribal cultural resources) does not preclude their subsurface existence.
  - a. Lead agencies should include in their mitigation and monitoring reporting program plan provisions for the identification and evaluation of inadvertently discovered archaeological resources per Cal. Code Regs., tit. 14, section 15064.5(f) (CEQA Guidelines section 15064.5(f)). In areas of identified archaeological sensitivity, a certified archaeologist and a culturally affiliated Native American with knowledge of cultural resources should monitor all ground-disturbing activities.
  - b. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the disposition of recovered cultural items that are not burial associated in consultation with culturally affiliated Native Americans.
  - c. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the treatment and disposition of inadvertently discovered Native American human remains. Health and Safety Code section 7050.5, Public Resources Code section 5097.98, and Cal. Code Regs., tit. 14, section 15064.5, subdivisions (d) and (e) (CEQA Guidelines section 15064.5, subds. (d) and (e)) address the processes to be followed in the event of an inadvertent discovery of any Native American human remains and associated grave goods in a location other than a dedicated cemetery.

Notice of Preparation

September 2, 2016

To: Reviewing Agencies  
Re: Boyle Heights Community Plan Update  
SCH# 2016091010

Attached for your review and comment is the Notice of Preparation (NOP) for the Boyle Heights Community Plan Update draft Environmental Impact Report (EIR).

Responsible agencies must transmit their comments on the scope and content of the NOP, focusing on specific information related to their own statutory responsibility, within 30 days of receipt of the NOP from the Lead Agency. This is a courtesy notice provided by the State Clearinghouse with a reminder for you to comment in a timely manner. We encourage other agencies to also respond to this notice and express their concerns early in the environmental review process.

Please direct your comments to:

Haydee Urita-Lopez  
City of Los Angeles  
200 N. Spring Street, Room 667  
Los Angeles, CA 90012

with a copy to the State Clearinghouse in the Office of Planning and Research. Please refer to the SCH number noted above in all correspondence concerning this project.

If you have any questions about the environmental document review process, please call the State Clearinghouse at

Sincerely,

Scott Morgan  
Director, State Clearinghouse

Ms. Haydee Urita-Lopez  
Los Angeles Department of City Planning  
200 N. Spring Street, Room 721  
Los Angeles, CA 90012

Via Email: haydee.urita@lacity.org

Dear Ms. Urita-Lopez

Thank you for the opportunity to comment on the proposed scope of analysis for the Boyle Heights Community Plan Update, Environmental Impact Report.

It is my understanding that the City is planning a sizable public park underneath the Sixth Street Viaduct between the Los Angeles River and Clarence Street. The Sixth Street Viaduct includes bicycle and pedestrian access from Boyle Heights to the Arts District, with a planned bike ramp and pedestrian access located in the park. The significant expenditure of public funds for both the iconic viaduct and the new park warrant serious consideration as to the future designation of the lands at the gateway of the viaduct and the proposed park. As currently conceived in the community plan, the area around the proposed park remains industrial/warehouse in nature. Consistent with forward thinking land planning practices, a park such as the one proposed, including the associated bike and pedestrian enhancements, should serve a more intense and active mixed-use community.

Industrial/warehouse uses tend to be inconsistent and incompatible with public parks and their intended purpose, which is to serve the residential community in which they are located. Retaining industrial and warehouse land-use categories around this proposed park do not maximize the City's tremendous public investment in these facilities. Therefore, it would be very appropriate for the environmental document being prepared in association with the Boyle Heights Community Plan update to consider the inclusion of residential and mixed-use land-use designations and zoning within 1,500 feet of the proposed park.

By providing residential and mixed-use land-use designations and zoning within proximity to the proposed park the city would also be celebrating the function of the new and iconic Sixth Street Viaduct, and providing housing in a location with strong bicycle and pedestrian connections to the surrounding community. These two very important public investments should be used to encourage much need housing and job growth in this unique area of the Boyle Heights.

Ms. Urita-Lopez

October 7, 2016

For these reasons I respectfully request that the Boyle Heights Community Update, Environmental Impact Report consider residential and mixed-use land use designations and zoning within 1500 feet of the park proposed to be located in the area under the Sixth Street Viaduct between the Los Angeles River and Clarence Street.

Thank you very much for your consideration of this request.

Sincerely,

A handwritten signature in black ink, appearing to read "Brad M. Rosenheim". The signature is fluid and cursive, with a large initial "B" and a long horizontal stroke at the end.

**RE: SCAG Comments on the Notice of Preparation of a Draft Environmental Impact Report for the Boyle Heights Community Plan Update [SCAG NO. IGR8990]**

Dear Ms. Urita-Lopez,

Thank you for submitting the Notice of Preparation of a Draft Environmental Impact Report for the Boyle Heights Community Plan Update ("proposed project") to the Southern California Association of Governments (SCAG) for review and comment. SCAG is the authorized regional agency for Inter-Governmental Review (IGR) of programs proposed for Federal financial assistance and direct Federal development activities, pursuant to Presidential Executive Order 12372. Additionally, SCAG reviews the Environmental Impact Reports of projects of regional significance for consistency with regional plans pursuant to the California Environmental Quality Act (CEQA) and CEQA Guidelines.

SCAG is also the designated Regional Transportation Planning Agency under state law, and is responsible for preparation of the Regional Transportation Plan (RTP) including the Sustainable Communities Strategy (SCS) pursuant to Senate Bill (SB) 375. As the clearinghouse for regionally significant projects per Executive Order 12372, SCAG reviews the consistency of local plans, projects, and programs with regional plans.<sup>1</sup> Guidance provided by these reviews is intended to assist local agencies such as local jurisdictions and project proponents to take actions that help contribute to the attainment of the regional goals and policies in the RTP/SCS.

SCAG staff has reviewed the Notice of Preparation of a Draft Environmental Impact Report for the Boyle Heights Community Plan Update in Los Angeles County. The proposed project includes adoption of necessary updates to land use, zoning, plan text, and other ordinances necessary to implement the update which will accommodate forecasted housing, population and employment growth in the approximately 6-square mile Boyle Heights Community Plan Area for the next 20-25 years.

**When available, please send environmental documentation to SCAG's office in Los Angeles or by email to** providing, at a minimum, the full public comment period for review. If you have any questions regarding the attached comments, please contact the Inter-Governmental Review (IGR) Program, attn.: Lijin Sun, Senior Regional Planner, at Thank you.

Sincerely,

Ping Chang  
Acting Manager, Compliance and Performance Monitoring

<sup>1</sup> Lead agencies such as local jurisdictions have the sole discretion in determining a local project's consistency with the 2016 RTP/SCS for the purpose of determining consistency for CEQA. Any "consistency" finding by SCAG pursuant to the IGR process should not be construed as a determination of consistency with the 2016 RTP/SCS for CEQA.

**COMMENTS ON THE NOTICE OF PREPARATION OF A  
DRAFT ENVIRONMENTAL IMPACT REPORT FOR THE  
BOYLE HEIGHTS COMMUNITY PLAN UPDATE [SCAG NO. IGR8990]**

**CONSISTENCY WITH RTP/SCS**

SCAG reviews environmental documents for regionally significant projects for their consistency with the adopted RTP/SCS. For the purpose of determining consistency with CEQA, lead agencies such as local jurisdictions have the sole discretion in determining a local project's consistency with the RTP/SCS.

**2016 RTP/SCS GOALS**

The SCAG Regional Council adopted the 2016 RTP/SCS in April 2016. The 2016 RTP/SCS seeks to improve mobility, promote sustainability, facilitate economic development and preserve the quality of life for the residents in the region. The long-range visioning plan balances future mobility and housing needs with goals for the environment, the regional economy, social equity and environmental justice, and public health (see <http://scagrtpscs.net/Pages/FINAL2016RTPSCS.aspx>). The goals included in the 2016 RTP/SCS may be pertinent to the proposed project. These goals are meant to provide guidance for considering the proposed project within the context of regional goals and policies. Among the relevant goals of the 2016 RTP/SCS are the following:

SCAG 2016 RTP/SCS GOALS	
RTP/SCS G1:	<i>Align the plan investments and policies with improving regional economic development and competitiveness</i>
RTP/SCS G2:	<i>Maximize mobility and accessibility for all people and goods in the region</i>
RTP/SCS G3:	<i>Ensure travel safety and reliability for all people and goods in the region</i>
RTP/SCS G4:	<i>Preserve and ensure a sustainable regional transportation system</i>
RTP/SCS G5:	<i>Maximize the productivity of our transportation system</i>
RTP/SCS G6:	<i>Protect the environment and health for our residents by improving air quality and encouraging active transportation (e.g., bicycling and walking)</i>
RTP/SCS G7:	<i>Actively encourage and create incentives for energy efficiency, where possible</i>
RTP/SCS G8:	<i>Encourage land use and growth patterns that facilitate transit and active transportation</i>
RTP/SCS G9:	<i>Maximize the security of the regional transportation system through improved system monitoring, rapid recovery planning, and coordination with other security agencies*</i>

\*SCAG does not yet have an agreed-upon security performance measure.

For ease of review, we encourage the use of a side-by-side comparison of SCAG goals with discussions of the consistency, non-consistency or non-applicability of the goals and supportive analysis in a table format. Suggested format is as follows:

SCAG 2016 RTP/SCS GOALS	
Goal	Analysis
RTP/SCS G1: <i>Align the plan investments and policies with improving regional economic development and competitiveness</i>	<i>Consistent: Statement as to why; Not-Consistent: Statement as to why; Or Not Applicable: Statement as to why; DEIR page number reference</i>
RTP/SCS G2: <i>Maximize mobility and accessibility for all people and goods in the region</i>	<i>Consistent: Statement as to why; Not-Consistent: Statement as to why; Or Not Applicable: Statement as to why; DEIR page number reference</i>
etc.	etc.

**2016 RTP/SCS STRATEGIES**

To achieve the goals of the 2016 RTP/SCS, a wide range of land use and transportation strategies are included in the 2016 RTP/SCS. Technical appendances of the 2016 RTP/SCS provide additional supporting information in detail. To view the 2016 RTP/SCS, please visit: <http://scagrtpscs.net/Pages/FINAL2016RTPSCS.aspx>. The 2016 RTP/SCS builds upon the progress from the 2012 RTP/SCS and continues to focus on integrated, coordinated, and balanced planning for land use and transportation that the SCAG region strives toward a more sustainable region, while the region meets and exceeds in meeting all of applicable statutory requirements pertinent to the 2016 RTP/SCS. These strategies within the regional context are provided as guidance for lead agencies such as local jurisdictions when the proposed project is under consideration.

**DEMOGRAPHICS AND GROWTH FORECASTS**

Local input plays an important role in developing a reasonable growth forecast for the 2016 RTP/SCS. SCAG used a bottom-up local review and input process and engaged local jurisdictions in establishing the base geographic and socioeconomic projections including population, household and employment. At the time of this letter, the most recently adopted SCAG jurisdictional-level growth forecasts that were developed in accordance with the bottom-up local review and input process consist of the 2020, 2035, and 2040 population, households and employment forecasts. To view them, please visit <http://www.scag.ca.gov/Documents/2016GrowthForecastByJurisdiction.pdf>. The growth forecasts for the region and applicable jurisdictions are below.

	Adopted SCAG Region Wide Forecasts			Adopted City of Los Angeles Forecasts		
	Year 2020	Year 2035	Year 2040	Year 2020	Year 2035	Year 2040
Population	19,663,000	22,091,000	22,138,800	4,017,000	4,442,500	4,609,400
Households	6,458,000	7,325,000	7,412,300	1,441,400	1,618,900	1,690,300
Employment	8,414,000	9,441,000	9,871,500	1,899,500	2,104,100	2,169,100

**MITIGATION MEASURES**

SCAG staff recommends that you review the Final Program Environmental Impact Report (Final PEIR) for the 2016 RTP/SCS for guidance, as appropriate. SCAG's Regional Council certified the Final PEIR and adopted the associated Findings of Fact and a Statement of Overriding Considerations (FOF/SOC) and Mitigation Monitoring and Reporting Program (MMRP) on April 7, 2016 (please see: <http://scagrtpscs.net/Pages/FINAL2016PEIR.aspx>). The Final PEIR includes a list of project-level performance standards-based mitigation measures that may be considered for adoption and implementation by lead, responsible, or trustee agencies in the region, as applicable and feasible. Project-level mitigation measures are within responsibility, authority, and/or jurisdiction of project-implementing agency or other public agency serving as lead agency under CEQA in subsequent project- and site- specific design, CEQA review, and decision-making processes, to meet the performance standards for each of the CEQA resource categories.

200 N. Spring Street, Room 667  
Los Angeles, CA 90012

## **Notice of Preparation of a CEQA Document for the Boyle Heights Community Plan Update Project (Case Numbers: CPC-2016-2905-CPU and ENV-2016-2906-EIR)**

The South Coast Air Quality Management District (SCAQMD) staff appreciates the opportunity to comment on the above-mentioned document. The SCAQMD staff's comments are recommendations regarding the analysis of potential air quality impacts from the proposed project that should be included in the Draft EIR. Please send the SCAQMD a copy of the Draft EIR upon its completion. Note that copies of the Draft EIR that are submitted to the State Clearinghouse are not forwarded to the SCAQMD. Please forward a copy of the Draft EIR directly to SCAQMD at the address in our letterhead. **In addition, please send with the Draft EIR all appendices or technical documents related to the air quality and greenhouse gas analyses and electronic versions of all air quality modeling and health risk assessment files. These include original emission calculation spreadsheets and modeling files (not Adobe PDF files). Without all files and supporting air quality documentation, the SCAQMD will be unable to complete its review of the air quality analysis in a timely manner. Any delays in providing all supporting air quality documentation will require additional time for review beyond the end of the comment period.**

### **Air Quality Analysis**

The SCAQMD adopted its California Environmental Quality Act (CEQA) Air Quality Handbook in 1993 to assist other public agencies with the preparation of air quality analyses. The SCAQMD recommends that the Lead Agency use this Handbook as guidance when preparing its air quality analysis. Copies of the Handbook are available from the SCAQMD's Subscription Services Department by calling (909) 396-3720. More recent guidance developed since this Handbook was published is also available on SCAQMD's website here: [http://www.aqmd.gov/home/regulations/ceqa/air-quality-analysis-handbook/ceqa-air-quality-handbook-\(1993\)](http://www.aqmd.gov/home/regulations/ceqa/air-quality-analysis-handbook/ceqa-air-quality-handbook-(1993)). SCAQMD staff also recommends that the Lead Agency use the CalEEMod land use emissions software. This software has recently been updated to incorporate up-to-date state and locally approved emission factors and methodologies for estimating pollutant emissions from typical land use development. CalEEMod is the only software model maintained by the California Air Pollution Control Officers Association (CAPCOA) and replaces the now outdated URBEMIS. This model is available free of charge at: [www.caleemod.com](http://www.caleemod.com).

The Lead Agency should identify any potential adverse air quality impacts that could occur from all phases of the project and all air pollutant sources related to the project. Air quality impacts from both construction (including demolition, if any) and operations should be calculated. Construction-related air quality impacts typically include, but are not limited to, emissions from the use of heavy-duty equipment from grading, earth-loading/unloading, paving, architectural coatings, off-road mobile sources (e.g., heavy-duty construction equipment) and on-road mobile sources (e.g., construction worker vehicle trips, material transport trips). Operation-related air quality impacts may include, but are not limited to, emissions from stationary sources (e.g., boilers), area sources (e.g., solvents and coatings), and vehicular trips (e.g., on- and off-road tailpipe emissions and entrained dust). Air quality impacts from indirect sources, that is, sources that generate or attract vehicular trips should be included in the analysis.

The SCAQMD has also developed both regional and localized significance thresholds. The SCAQMD staff requests that the lead agency quantify criteria pollutant emissions and compare the results to the recommended regional significance thresholds found here: <http://www.aqmd.gov/docs/default-source/ceqa/handbook/scaqmd-air-quality-significance-thresholds.pdf>. In addition to analyzing regional air quality impacts, the SCAQMD staff recommends calculating localized air quality impacts and comparing the results to localized significance thresholds (LSTs). LSTs can be used in addition to the recommended regional significance thresholds as a second indication of air quality impacts when preparing a Draft EIR document. Therefore, when preparing the air quality analysis for the proposed project, it is recommended that the lead agency perform a localized analysis by either using the LSTs developed by the SCAQMD or performing dispersion modeling as necessary. Guidance for performing a localized air quality analysis can be found at: <http://www.aqmd.gov/home/regulations/ceqa/air-quality-analysis-handbook/localized-significance-thresholds>.

In the event that the proposed project generates or attracts vehicular trips, especially heavy-duty diesel-fueled vehicles, it is recommended that the lead agency perform a mobile source health risk assessment. Guidance for performing a mobile source health risk assessment (“*Health Risk Assessment Guidance for Analyzing Cancer Risk from Mobile Source Diesel Idling Emissions for CEQA Air Quality Analysis*”) can be found at: <http://www.aqmd.gov/home/regulations/ceqa/air-quality-analysis-handbook/mobile-source-toxics-analysis>. An analysis of all toxic air contaminant impacts due to the use of equipment potentially generating such air pollutants should also be included.

In addition, guidance on siting incompatible land uses (such as placing homes near freeways) can be found in the California Air Resources Board’s *Air Quality and Land Use Handbook: A Community Perspective*, which can be found at the following internet address: <http://www.arb.ca.gov/ch/handbook.pdf>. CARB’s Land Use Handbook is a general reference guide for evaluating and reducing air pollution impacts associated with new projects that go through the land use decision-making process.

Finally, should the proposed project include equipment that generates or controls air contaminants, a permit may be required and the SCAQMD should be listed as a responsible agency and consulted. The assumptions in the submitted Draft EIR would also be the basis for permit conditions and limits. Permit questions can be directed to the SCAQMD Permit Services staff at \_\_\_\_\_, who can provide further assistance.

### **Project Specific Comments – Sensitive Receptors Near Freeways**

While the health science behind recommendations against placing sensitive receptors close to high volume urban roads and freeways is clear, SCAQMD staff recognizes the many factors Lead Agencies must consider when siting uses such as new housing. The lead agency should consider the limitations of enhanced filtration (HVAC systems with enhanced Maximum Efficiency Reporting Value – MERV filters) for the project, especially from traffic on high volume urban roadways or a freeway. For example, these filters have no ability to filter out any toxic gasses from vehicle exhaust; have higher long-term costs related to the required regular maintenance of the filters; and it is assumed that the HVAC units and the filters operate 100 percent of the time while residents are indoors. It is critical that any proposed mitigation must be carefully evaluated prior to determining if the health risks would be brought below CEQA significance thresholds. The presumed effectiveness and feasibility of proposed mitigation should therefore be evaluated and the Draft EIR document should also quantitatively demonstrate with substantial evidence the effectiveness of any proposed mitigation on any potentially significant impact.

### **Mitigation Measures**

In the event that the project generates significant adverse air quality impacts, CEQA requires that all feasible mitigation measures that go beyond what is required by law be utilized during project construction and operation to minimize or eliminate these impacts. Pursuant to CEQA Guidelines §15126.4 (a)(1)(D), any impacts resulting from mitigation measures must also be discussed. Mitigation Measure resources are available on the SCAQMD CEQA Air Quality Handbook website: <http://www.aqmd.gov/home/regulations/ceqa/air-quality-analysis-handbook>

### **Data Sources**

SCAQMD rules and relevant air quality reports and data are available by calling the SCAQMD’s Public Information Center at \_\_\_\_\_. Much of the information available through the Public Information Center is also available via the SCAQMD’s webpage (<http://www.aqmd.gov>).

The SCAQMD staff is available to work with the lead agency to ensure that project emissions are accurately evaluated and mitigated where feasible. If you have any questions regarding this letter, please contact Gordon Mize, Air Quality Specialist by e-mail at \_\_\_\_\_

Sincerely,

*Jillian Wong*

Community Meeting  
Public Comments

Boyle Heights City Hall  
2130 E. 1<sup>st</sup>. Street  
Los Angeles, Ca 90033

September 13, 2016

6:00-8:30

## **PUBLIC COMMENTS**

### ***Speaker 1: Mary Lugo***

Okay, so...

### ***Moderator:***

Oh, I'm, sorry, I didn't catch your name.

### ***Mary Lugo:***

Oh, Mary Lugo. M-A-R-Y L-U-G-O. And so, two (2) of my major concerns, number one (1), being that, uhm.. between the street of- on 1<sup>st</sup>. Street between Soto and Mott Street, there are vehicles that are going at uhm.., high speed. And I believe that may be on 1<sup>st</sup>. and Pickett St. There should be a crosswalk for uhm.., you know one of the blinking lights. Ah, cause children like my son, you know when he goes to the school in the morning cars are going at a high speed of rate. Well, he gets scared crossing so he has to go all... I mean, it's not far for him to walk to Soto St. or Mott, but you know, it makes it easy and accessible for him to cross the street right there on Pickett so he can just go directly to the school. So, because of the vehicle's that's fast, the, the... how fast they are travelling down on 1<sup>st</sup>. Street either east or west bound, they, should maybe be a cross walk there. That you know that should be enforced. **[PAUSE]**

### ***Moderator:***

Uhm.., to try to have a cross walk at either the uhm.. 1<sup>st</sup>. Pickett. And then with regards to 1<sup>st</sup>. and Mott, you said, there are cars are travelling fast?

### ***Mary Lugo:***

No, no there is a light there.

### ***Moderator:***

Okay.

### ***Mary Lugo:***

There is a street light there, but the thing is that between Soto and Mott, there's no cross walk. So when people are even walking, there's a liquor store, right on the corner of 1<sup>st</sup>. and Pickett. So even if people, like myself when I wanna go the liquor store, I pretty much have to dodge cars. You know just to, even cross the street to the liquor store. So if there were to be a cross walk there, uhm.., or a ped- pedestrian cross walk, it will probably make it easier for people to avoid getting hit. Yeah. **[PAUSE]**

And ah, my second concern was ah... public prom- uhm..- public parking. So in the areas, like for instance, like my mom. She lives on the street of 2<sup>nd</sup> Street and St. Louis between St. Louis and Cummings. There's a lot of vehicle's there that... yeah, it's, public parking I understand that. But there are vehicle's that park there with excessive trash, in the... in the back of their trucks. And on my block which is, Pennsylvania Avenue between uhm..... Mott and Pickett Street. There's lot of vehicle's also that live and park in the area. Now, where I attend school, is in Monterrey Park, in the area, there's permanent parking and I feel that maybe, uhm..- the City of Boyle Heights or the community should have certain areas where there should be permanent parking for that street. So ah, maybe you know, the community could get involved in purchasing these, ah- raise money for one. For the City of Boyle Heights having ah- permanent parking and so like that, certain people could only park on those streets that purchase those... permits. Which should be at a reasonable price and it will cover for the whole year and for that vehicle, so they can't go and put it for different vehicles.

**Moderator:**

With regards to ah, permanent parking...

**Mary Lugo:**

Mhm...

**Moderator:**

That's with Department of Public Transportation...

**Mary Lugo:**

Mhm.

**Moderator:**

If you'd like, I can provide you with some contact information.

**Mary Lugo:**

Yeah, please. Yeah, yeah 'cause ah- Heidi told me that I should put my comment in regards to that here.

**Moderator:**

Yeah of course.

**Mary Lugo:**

Yeah. Okay.

**Moderator:**

But I also want to get you some...

**Mary Lugo:**

Perfect.

**Moderator:**

...a, a number free to contact.

**Mary Lugo:**

Okay.

**Moderator:**

But we also take your comments here.

**Mary Lugo:**

Okay, alright, perfect.

**Moderator:**

Do you have any other comments or is that...

**Mary Lugo:**

Uhm.. no that was pretty much it. I mean, ah- I'm trying to do myself what I can in my block of like, talking to the neighbors of them speaking out instead of being scared you know with the

gang members there. Like there's nothing to talk of about I mean, nothing to fear of. Like myself, I'm, very verbally spoken, so I'll say what's on my mind. And they really don't matter to me so, I tell them whatever you guys feel that should be addressed that you know. And that's one of the issues that everyone in that block has is, the parking. Because, people that park between Matthews and Pickett Street along Pennsylvania Avenue on the eastside they're getting their tires popped... ah- poked or, or deflated. Because there's residents there who say "if you don't live on this block, we're gonna stab your tires". Which I think is ridiculous. So maybe, if it that's enforced, with the permanent parking, it's like no one can say anything cause people are reserving parking spaces of others and it should be... you know, it's public parking. But, if that would get enforced, then maybe that will uhm..- actually give [unintelligible] to a lot of people. Yeah. That's it.

**Moderator:**

Okay, thank you.

***Speaker 2: Emmanuel De Elias:***

Hi my name is Emmanuel De Elias and ah- I have several comments. Uhm.., one of which is, ah, I would like to see ah, the encouragement- of development of green space. More green space uhm.., perhaps planting more trees. I'm happy that the, the LA River project calls for uhm..- restoring that, that [unintelligible] River that I think... more green trees and more ah- vegetation that can absorb all the carbon dioxide from the freeways and that... you know, being closer to Vernon and downtown. Ah, but I think Boyle Heights needs more trees and green space. Uhm.., I would also like to see an easing of parking restrictions for small business, restaurants, theatres, coffee shops, retail. Because there's lack of parking in Boyle Heights. Ah, so it would be good to ah, ease those restrictions. I also think, we should restore ah, more bus lines, like, the 30 and 31 along 1<sup>st</sup> street. And with the Gold line, ah- unfortunately a lot of the bus lines are taken away. Uhm..and I think, there, there needs to be ah- more parking in Boyle

Heights. Not necessarily a structure, but like on Chicago Street near Cesar Chavez, there's like a sort of a lot with various meters that could be more parking options in there. I think that would enhance the small business, the local business that are there uhm..... and those are my comments.

**[END OF PUBLIC COMMENTS]**

---

**APPENDIX B**  
**Methodology**

# **APPENDIX B. METHODOLOGY**

## **POPULATION, HOUSING AND EMPLOYMENT**

This section describes the data sources and methodologies employed in the identification of the Draft EIR Existing Conditions and Future Projections, both of which are used to assess potential impacts of the Proposed Plan. This section also explains how reasonably expected population, housing, and employment under the Proposed Plan are derived and how the Proposed Plan addresses anticipated growth.<sup>1</sup>

The Draft EIR evaluates the potential environmental impacts related to anticipated changes in population, housing and employment based upon information from a variety of sources including, the United States Census Bureau (U.S. Census), California Department of Finance (DOF), California Employment Development Department (EDD), the Southern California Association of Governments (SCAG), the City of Los Angeles Department of City Planning (DCP), the City of Los Angeles General Plan Framework Element (Framework) and associated documents. Since each of these sources may use different methods of data collection and analysis and/or different timeframes, the data do not always arrive at precisely the same results. Accordingly, the demographic data used in the analysis may vary somewhat, depending upon the source cited. Despite the variations, the data used in this Draft EIR represent the best available data sources during the Draft EIR preparation and provide a reasonable estimate of the population, housing, and employment characteristics of the Boyle Heights Community Plan Area (CPA).

## **EXISTING CONDITIONS**

Existing Conditions or Baseline Conditions for the purposes of environmental analysis of a community plan update, can be described in demographic terms (population, housing, and employment or in terms of development characteristics (square feet of development, height of structures or number of housing units). The City has the discretion to determine the best data source for Existing Conditions. For Existing Conditions, DCP, as the City's professional planning agency and the department responsible for reviewing and preparing the Draft EIR, uses demographic data that is published and public data referenced and used by multiple agencies in planning for the City and region. Obtaining accurate development characteristics at the parcel level for each Community Plan Area has in recent decades become possible through geographic information systems (GIS), however the technology still presents practical difficulties in verifying precise, detailed data at the lot and parcel level for CPAs for a city the size of Los Angeles. The size of the City at over 478 square miles (including 5 square miles of water area) results in duplicate, incomplete, and/ or unverified data that is time and cost prohibitive to verify at present. Reasonable efforts are made to collect and use the most complete and current data at the time of the Draft EIR analysis recognizing the constraints, limitations and margins of error associated with data sources.

---

<sup>1</sup> Nothing in this document is intended to contradict or control the particular data or methodology used in the EIR. This methodology was developed by DCP in its review and preparation of Draft EIRs for the Community Plan Update program and is provided in the appendices to supplement and support the Draft EIR

The leading source of demographic data is the U.S. Census. The Census data collected between April and October of 2020 was taken during an extraordinary once in a hundred-year pandemic and is not as likely to represent normal conditions. It is reasonable to assume that a population drop noted in the 2020 Census for Boyle Heights was partially due to undercounting and the COVID-19 pandemic. While Census data is typically the most reliable representation of socioeconomic data, such as housing and population, for discrete geographic areas, it is only available on a decennial basis, i.e., 2000, 2010, and 2020. While it is preferable to utilize decennial census data for analysis, it is not always possible to align planning processes with the release of decennial census data. Consequently, other sources are consulted to employ the most current information as well as to provide a benchmark for the Existing Condition year. In the interim years, the U.S. Census Bureau gathers more detailed socioeconomic data through other surveys, such as the American Community Survey (ACS) program, which provides data on an annual basis for certain geographies. For example, the ACS provides annual estimates for incorporated cities but does not provide annual estimates for Community Plan Areas. There is a lag time between when the data is collected and when it is released for both Census products. Both the decennial Census and ACS data are subject to sampling variability.

SCAG, as the Regional Transportation Planning Agency (RTPA) and the Metropolitan Planning Organization (MPO), publishes demographic estimates and projections through the long-range Regional Transportation Plan/ Sustainable Communities Strategy (RTP/SCS), which is updated by SCAG every four years. Census and ACS data are utilized by SCAG to prepare regional demographic estimates and forecasts. In addition to estimating existing demographics, the RTP/SCS provides a vision for future transportation investments throughout the region. Using demographic growth forecasts and economic trends that project out over a 20-year period or "horizon," typically, the RTP/SCS considers the role of transportation in regional planning in the broader context of economic, environmental, and quality-of-life goals for the region. Therefore, SCAG data are often utilized by planning agencies in the region for consistency with the goals and demographic data of the RTP/ SCS.

### ■ **Baseline Existing Conditions (SCAG)**

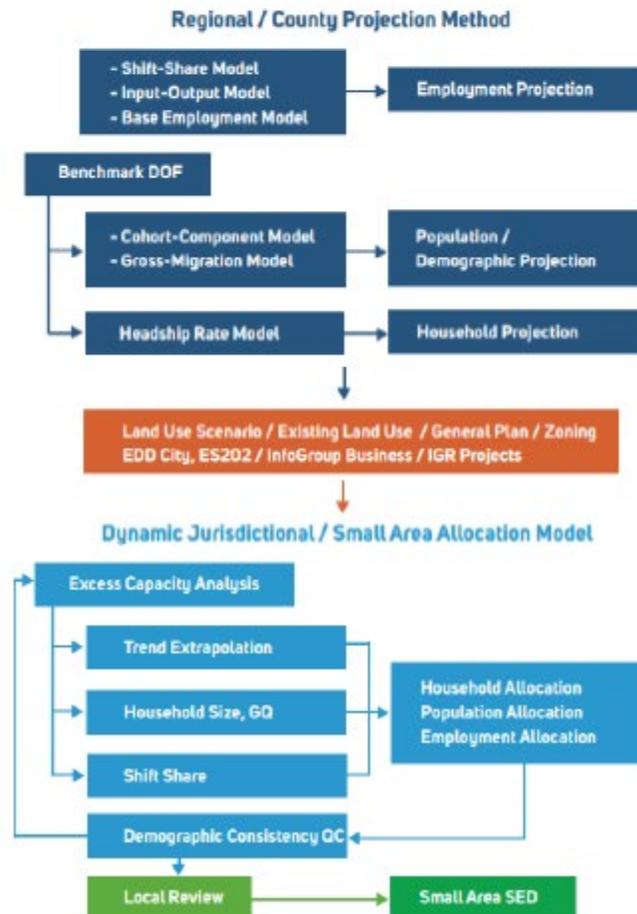

SCAG is the regional demographer for a six-county region that includes Los Angeles County. In that capacity it has an established methodology for estimating population, housing, and employment for the region and as well as projecting future population, housing, and employment at a jurisdictional or citywide level. SCAG utilizes various sources to determine existing or baseline population, housing, and employment. This method is used for deriving annual estimates of population, housing, and employment for years that are not a Census year.

SCAG's small area growth forecasting process is applied to develop baseline year estimates and future year socioeconomic data at the Transportation Analysis Zone (TAZ) level. The approach is utilized by SCAG to distribute jurisdictional level population, housing and employment estimates and projections into TAZs. Population figures are estimates derived from households and are generally viewed to be a more accurate representation at a jurisdictional level where multiple data sources are consulted. It is generally less precise to estimate population numbers for smaller areas, and or for areas where boundaries do not precisely match census reporting divisions, such as at the Community Plan Area level than at recognized jurisdictional boundary levels.

The following is the list of SCAG data sources and diagram of SCAG's process excerpted from the 2016 RTP/SCS Background Document Report.

**SCAG DATA SOURCES:**

- SCAG's existing land use data*
- SCAG's General Plan Database, processed based on jurisdictional General Plans*
- SCAG's 2012 RTP/SCS growth forecast*
- SCAG's 2016 RTP/SCS jurisdictional level population, household and employment*
- 2013 Longitudinal Employer-Household Dynamics (LEHD), Origin-Destination, Employment Statistics from the Census Bureau*
- Employment Development Department (EDD) 2012, 3rd quarter jurisdictional jobs by sector*
- 2011 InfoGroup firm-based employment data*
- SCAG Intergovernmental Review (IGR) data*
- Digital Mapping Product (DMP) parcel data (2010-2012) and new construction data (2010-2012)*
- 2010 Decennial Census Summary File 1 (SF1)*

See the following SCAG publication for the full methodology employed to determine estimates and forecasts of population, housing, and employment data:

[https://scag.ca.gov/sites/main/files/file-attachments/f2016rtpscs\\_scsbackgrounddocumentation.pdf?1606074233](https://scag.ca.gov/sites/main/files/file-attachments/f2016rtpscs_scsbackgrounddocumentation.pdf?1606074233)

## ■ How DCP Verifies Existing Conditions

DCP has regularly tracked growth and development activity in the City. As part of the regional planning process, local planning departments (including DCP) work together with SCAG to develop demographic estimates for the City of Los Angeles and the Southern California region approximately every four years. SCAG publishes regional transportation and sustainability plans (RTP/ SCSs) every four years. SCAG's Regional Council adopted the most recent RTP/SCS – the 2020 RTP/SCS in September 2020. However, the cycles of RTP preparation do not regularly coincide with the release of Census data. Because of the time involved in preparing the RTP/SCS, there is a lag between the time the Census data is released or demographic estimate is prepared and the time that SCAG makes demographic estimates available through the RTP/SCS. An additional lag occurs between the time the Planning Department receives SCAG 's demographics estimates for the baseline and forecasts for the horizon year, and the time a draft community plan and EIR are completed. Therefore, interpolations of data utilizing a previous point in time and future point may be necessary.

Furthermore, the DCP 's planning process for the community plan updates is comprehensive, the updates are long-term projects that take several years to complete. The planning process focuses on addressing land use changes at the parcel level to both resolve inconsistencies in land use regulations as well as to fulfill City objectives. For the Boyle Heights Community Plan Update, the Notice of Preparation (NOP) was released in 2016, and the 2016/2040 SCAG RTP/SCS data was used to inform the baseline existing conditions. At that time, the latest available Decennial Census data at the time of the NOP preparation was for the year 2010. The 2010 Census data provided a snapshot in time and was used as a reference to benchmark data along with other sources. Given the number of years that had lapsed between the release of the 2010 Census and the NOP, the Census data no longer reflected the best available data for 2016, the NOP publication year. Growth occurred in the years after the Great Recession and consequently, the 2016 SCAG RTP/SCS data<sup>2</sup> was utilized for Existing Conditions. [See discussion below under the heading Post 2016 Demographic Data, Project Baseline, and Projections for a discussion of demographic data released post issuance of the NOP.]

Although CEQA does not require a lead agency to change the baseline year for Draft EIR analysis every time a government agency at the state, federal, or local level issues a projection for a future condition or issues an estimate for those years subsequent to the Draft EIR baseline year, the DCP does review new data or projections released subsequent to the publication of the NOP to verify that it would not substantively affect the analysis or conclusions for significant impacts that are correlated or reliant upon population,

---

<sup>2</sup> As the 2016 RTP/SCS utilizes a baseline year of 2012, 2016 baseline year demographic estimates were interpolated (an annual average growth rate was applied) to estimate existing conditions. The interpolation method was corroborated by SCAG as a suitable methodology to estimate existing conditions.

housing or employment data. For instance, the City used Los Angeles County Assessor data to benchmark and analyze the general distribution patterns and totals for housing estimates in the Community Plan Area (CPA). This system of utilizing SCAG data and comparing or benchmarking it with other available data represents a best practice approach to obtaining and using complete and most current data. Multiple sources were also consulted (i.e. Employment Development Department, Origin-Destination, and American Community Survey, Business Installment data from InfoGroup) to verify demographic totals for the Community Plan Area. See Table 1. These sources are used as benchmarks or control totals whereas Assessor data is used for distribution because it is regularly updated and available at small geographic levels.

**Table 1: Comparison of Demographic Estimates for the Boyle Heights CPA**

Data Source	Households <sup>2</sup>	Population	Employment
2010 Census	22,000 households	85,000	n/a
2020 Census	23,000 households	82,000	n/ a
SCAG 2016 (interpolated) (from the 2016 RTP/SCS)	22,000 households	86,000	26,000
SCAG 2016 (from the 2020 RTP/SCS)	22,000 households	83,000	27,000
ACS (2012 - 2016 average) <sup>1</sup>	22,000 households,	87,000	n / a
ACS (2015-2019 average) <sup>1</sup>	23,000 households,	90,000	n/a
Assessor Parcel Data (2016)	22,000 housing units	n/ a	n/ a

Note: A lag time for the public release of most of the data sources, such as Census and ACS is typical. All numbers are rounded to the nearest one thousand.

1. US Census Bureau, 2012 -2019 American Community Survey
2. Households account for all occupied housing units, whereas housing units accounts for both occupied and vacant housing units

## FUTURE PROJECTIONS

The Boyle Heights Community Plan Update is intended to plan for anticipated growth by 2040 (the planning horizon year), and consequently uses the adopted 2016-2040 SCAG RTP/SCS (2016 RTP/SCS) as a resource for both the baseline (also called Existing Conditions) population, housing and employment estimates and future projections for the 2040 horizon year.

The 2016 RTP/SCS projection for 2040 factors in recent and past trends, key demographic and economic assumptions, and local, regional, state or national policies. The Great Recession had a significant impact on household, population, and employment trends. Growth is still anticipated in SCAG's six-county region but

at a slower pace. SCAG's projection assumes that regional growth will be approximately 0.7 percent per year on average for households and population. Employment is forecast to grow two percent each year until 2020, before stabilizing at 0.7 percent per year.<sup>3</sup>

## ■ Projections (SCAG)

SCAG prepares regional and jurisdictional forecasts or projections. Regional employment forecasts are based on a set of national employment forecasts using a shift-share model. The population forecast uses the cohort-component model, which adds to the existing population conditions the projected number of persons living in group quarters, births, and persons moving into the region and subtracts the number of projected deaths and persons moving out of the region. Households are forecast by multiplying the projected residential population by projected headship rates, or the share of householders in population cohorts based on age-sex-racial/ethnic specific household formation levels. Regional demographic-economic assumptions were also considered in the forecasts and cover issues such as fertility rate, domestic migration, international immigration, and labor force participation rates.

For the jurisdictional forecast, also known as small area forecast, SCAG derives household growth rates and household sizes based on historical trends and the amount of potential development from jurisdictions' general plans and land uses. Population projections are based on household growth and size. Future employment numbers for jurisdictions are based on the share of the county's employment by sector. The major data sources used to develop the jurisdictional forecast include: California Department of Finance (DOF) population and household estimates; California Employment Development Department (EDD) jobs reported by industry; 2010 Census and the latest American Community Survey (ACS) data; Regional Housing Needs Assessment (RHNA) growth projections for 2014 through 2021; and 2014 Business Installment data from Infogroup. Local jurisdictions also provided input and comments to SCAG and adjustments were made.

For the City of Los Angeles, SCAG distributes the total citywide number among all of the city's Community Plan Areas by Transportation Analysis Zones (TAZs), again derived from past trends and building upon/compared to TAZ projections of previous adopted Regional Transportation Plans. DCP reviews the proposed SCAG projections based on knowledge of the Community Plan Area and may give feedback based on local knowledge of development trends and development activity observed during the process of developing the RTP/SCS and its projections. An example of input could be advising SCAG to reflect growth in areas with existing or planned transit infrastructure, areas with flexible land use regulations that can allow higher levels of growth and away from hillsides or historic single-family neighborhoods. This local feedback can also include further input based on the effects of local policymaking, such as General Plan or Community Plan updates, and the mandates of federal and state plans, which are also taken into consideration during the local review process.

See the following SCAG publications for the methodology employed to determine estimates of population, housing, and employment data for the region:

## ■ How Community Plans Consider SCAG Projections

The City of Los Angeles uses SCAG's projections to plan for the future. The Department of City Planning considers SCAG projections for housing, population, and employment as targets in its long-range planning efforts for Community Plan Areas when updating community plans. SCAG provides the demographic expertise in developing regional and citywide projections and works with DCP planners and demographers to refine those projections and their distribution throughout the city, as described previously. At a minimum, community plan updates meet SCAG projections for the City and each CPA but in some cases may exceed those projections for certain CPAs depending on circumstances such as market demand, development trends, new legislation, the introduction of transit or other infrastructure, etc. This may occur because the available data or information SCAG used during the time it prepared projections changed or because new information became available later. In this respect, the most recently adopted SCAG projections are viewed as targets, and DCP ultimately determines the distribution of citywide growth through adherence to the General Plan Framework and Community Plans goals, objectives, and policies while the citywide projections are being accommodated.

Table 2 on the next page compares the allocations of population estimates by seven geographic planning areas within the City of Los Angeles for 2016, and the population projections at the horizon year 2040. Using SCAG's 2016 RTP/SCS as the source, the City of Los Angeles as a whole is projected to grow by 17% in population during this time (an increase of 678,000), which over the course of 23 years, is approximately 0.7% growth per year.

The table indicates that the East Los Angeles Geographic Planning Area, which includes the Boyle Heights, Northeast Los Angeles, and Silver Lake – Echo Park – Elysian Valley CPAs, is currently home to approximately 10% of the citywide population, and it is projected that in 2040 the region will continue to be home to approximately 10% of the citywide population.

It is generally assumed that CPAs would continue to grow consistent with SCAG assumptions of approximately 0.7% growth per year on average across the region and would still need to accommodate at least marginal levels of growth (i.e., it was not assumed that any CPAs would have less population than current existing conditions levels).

<b>Table 2: Projections by CPA Geography</b>						
<b>Geographic Planning Area</b>	<b>2016 Estimated Population<sup>1</sup></b>	<b>% of Citywide 2016 Population</b>	<b>2040 Projected Population<sup>2</sup></b>	<b>% of Citywide 2040 Projected Population</b>	<b>Projected Population Growth (2016 – 2040)</b>	<b>% Citywide Growth Distribution (2016-2040)</b>
City of Los Angeles	3,931,000	100	4,609,000	100	678,000	100
South Valley	751,000	19	876,000	19	125,000	18
South Los Angeles	751,000	19	874,000	19	123,000	19
North Valley	716,000	18	795,000	17	79,000	12
Central	684,000	17	904,000	20	220,000	32
West Los Angeles	428,000	11	497,000	11	69,000	10
East Los Angeles	402,000	10	449,000	10	47,000	7
Harbor	200,000	5	214,000	5	14,000	2

Note: Projection numbers are rounded to the nearest one thousand.  
1. The 2016 estimates were based on the SCAG 2016 RTP/SCS and were interpolated to 2016.  
2. The 2040 projected population is from SCAG's 2016 RTP/SCS.

## **HOW GROWTH IS ADDRESSED THROUGH PLANNING AND ZONING**

In preparing community plan updates, land use and zoning changes are proposed that will allow for projected growth to be accommodated while meeting the policies of the Framework Element and the Sustainable Community Strategies. During the planning process, technical land use analysis including the study of development trends, and consideration of General Plan policies is conducted to identify appropriate locations and levels of future development. DCP evaluates the geographic distribution of land use designations and zoning within a Community Plan Area to see where development potential is warranted. Some areas are expected to remain largely unchanged over time, such as open space areas. In other areas, development could occur as infill development and re-development, such as in multi-family residential areas. There are also some areas where development is directed, such as near transit stations and major corridors with bus lines, to increase access to transit, reduce vehicle miles of travel and thereby reduce greenhouse gas emissions and advance the climate change goals of the city and the region. Land use designation and/or zoning are applied to implement the updated land use policies of the Boyle Heights Community Plan.

Existing regulations as well as components of the Proposed Plan will ensure that growth is adequately addressed over the next 20 years. For example, under the Proposed Plan's zoning new developments would be subject to form and frontage regulations that are designed to achieve compatibility with the existing visual character of the neighborhoods within the Boyle Heights Community Plan Area. Specifically, building height limitations and step-back requirements, where appropriate, would help to provide cohesive height and bulk transitions across future structures within the CPA. A new project must meet the use and design regulations established in the New Zoning Code and comply with applicable Environmental Standards to receive approval. Some of the design requirements will result from the planning process and some will result from the environmental review process.

For example, regulations set through the zoning could include limitations on building height or step-back requirements in certain specific areas of the Plan Area. An environmental standard might require shielding of light source so as to direct light away from adjacent residential uses. These are examples that represent the types and range of regulations that can be applied to reduce potential impacts of new development.

## **PROPOSED PLAN'S REASONABLY ANTICIPATED DEVELOPMENT**

After preparing the Community Plan Update, separate from the demographic projections is the determination of the Reasonably Anticipated Development of the Community Plan Update, or what is reasonably expected to be built out under the Proposed Plan during the planning horizon. On a citywide basis, DCP's goal is to align citywide Reasonably Expected Development for all of the Community Plans with the total SCAG projection for the City to be consistent with other departments and agencies who plan for and provide public services and infrastructure to the city.

Planners use their educational and professional experience and expertise of land use and zoning standards to make assumptions about where development is likely to occur and at what scale, and create assumptions about the amount of residential, commercial, and industrial development that will occur during the life of the plan to determine the Reasonably Anticipated Development.

These assumptions are established through research and analysis of existing development trends, existing conditions on the ground, project entitlement and building permit data, geographic and historic constraints, age of existing buildings, and the development potential between the existing built conditions and what uses and development intensities the new regulations would allow. Factors such as existing and planned infrastructure improvements are also considered.

Although the Project Planners do significant research relying on a multitude of data sets and market trends are considered while establishing assumptions, determining the Reasonably Anticipated Development involves making a lot of assumptions. Although the Planning Team are experts on the Community Plan Area and on the City's land use and zoning plans and laws, the Proposed Plan, with its policies, zoning, and land use changes do not grant permits for or construct any developments. Future unforeseen market changes that either incentivize or inhibit development are unknown at this time, leaving uncertainty in the process of developing assumptions. The Planning Team, including City Planners, Senior City Planners, and a Principal City Planner, use their expertise and the data sets available at the time of EIR preparation to inform the assumptions used in this analysis. These data sets include, but are not limited to the following:

- Real world conditions through field surveys by the Project Planners of every block of the Plan Area to assess vacancy and existing uses
- Assessor data for the entire Plan Area to determine existing unit counts and existing uses
- Uses (residential, commercial, industrial) and development intensities (height, density, FAR) allowed by the existing General Plan land use designations, zoning, and any zoning overlays and Specific Plans.
- Planning entitlements and building permits to assess market trends

- Proposed General Plan land use designations and General Plan objectives and policies and Zoning regulations for the Proposed Plan and Draft EIR Alternatives
- Other applicable regulations or physical conditions that could constrain potential development (such as, historic preservation protections, topography, flood plains, sensitive habitats, institutional facilities, open space)
- Other State or local programs or regulatory schemes active in the Plan Area that are intended to incentivize or facilitate potential development (such as, Community Benefits Programs, reductions in parking near transit infrastructure, tax incentive areas)

Utilizing these data sets and its collective expertise, the Community Planning team make and apply assumptions to the acreage within the Community Plan area, to determine the amount of Reasonably Anticipated Development from the Proposed Plan of residential units and non-residential square footage (commercial and industrial) that could be built during the life of the plan. For example, residential land area is multiplied by dwelling units per acre to generate an assumed dwelling unit count, and non-residential land area is multiplied by development potential, applying industry standards of employment density to calculate the total number of employees.

Ultimately, market factors dictate the level of development that occurs. Experience shows that only a percentage of the properties within a CPA will be redeveloped within the horizon year, typically 20- 25 years, and that even the sites that do redevelop are not always developed to maximum levels allowed by the by-right zoning and various incentive systems available. For this reason, 100 percent build out is a theoretical scenario and is not analyzed, but rather a more reasonable expected level of development is used both to guide proposed land use changes and analyze the potential environmental impacts of those changes. Community planners conduct the analysis of Reasonably Anticipated Development to analyze what level of development would reasonably occur during the life of the plan. While some jurisdictions may conduct a “full build out” analysis, the Boyle Heights Community Plan Area is a highly urbanized area where the most common form of development is infill development. Conducting a full build out analysis would assume that each parcel is wholly redeveloped during the 20 year life of the plan, which is unrealistic due to development constraints including existing historic structures and recently completed developments that are unlikely to be redeveloped. A number of factors serve to constrain development, including:

- Physical site constraints (topography, geology, etc.)
- Zoning regulations (requirements for open space, yards, setbacks and height that sometimes limit the maximum development on a site to levels below what the zoning would otherwise permit)
- Public review process
- Environmental factors and constraints (adjacent uses, sensitive uses, local, state and federal laws)
- Historic preservation goals and regulations
- Historical development patterns
- Land values
- Market factors, (economy, financial lending practices, etc.)

DCP considers these factors in using its best judgement, based on the education, experience and knowledge of its Planning Team, to determine the Reasonably Anticipated Development for the Proposed Plan. Revisions to the Reasonably Anticipated Development from the onset of the Community Plan Update may occur considering the multi-year time frame that community plans take to update.

## SCAG 's METHODOLOGY DOCUMENTATION REPORTS

SCAG Methodology for RTP/ SCS 2016 is available online at:

- [scag.ca.gov/sites/main/files/file-attachments/f2016rtpscs\\_scsbackgrounddocumentation.pdf?1606074233](http://scag.ca.gov/sites/main/files/file-attachments/f2016rtpscs_scsbackgrounddocumentation.pdf?1606074233)
- [scag.ca.gov/sites/main/files/file-attachments/f2016rtpscs\\_demographicsgrowthforecast.pdf?1606073557](http://scag.ca.gov/sites/main/files/file-attachments/f2016rtpscs_demographicsgrowthforecast.pdf?1606073557)

## POST 2016 DEMOGRAPHIC DATA, PROJECT BASELINE, AND PROJECTIONS

Notwithstanding the differences in numbers shown in Table 1 for the 2016-2040 SCAG RTP/SCS and the 2020 U.S. Census and 2020-2045 SCAG RTP/SCS of 3,000-4,000 persons, the City finds it is not necessary or appropriate to update the baseline population figure in the Draft EIR with the Census numbers, for the following reasons.

CEQA Guidelines Section 15125(a) provides the general rule for baselines:

*An EIR must include a description of the physical environmental conditions in the vicinity of the project. This environmental setting will normally constitute the baseline physical conditions by which the Lead Agency determines whether an impact is significant. The description of the environmental setting will normally constitute the baseline conditions by which a Lead Agency determines whether an impact is significant. The description of the environmental setting shall be no longer than is necessary to provide an understanding of the significant effects of the proposed project and its alternatives. The purpose of this requirement is to give the public and decision makers the most accurate and understandable picture practically possible of the project's likely near-term and long-term impacts.*

...

- (1) *Generally, the lead agency should describe physical environmental conditions as they exist at the time the notice of preparation is published . . . . . Where existing conditions change or fluctuate over time, and where necessary to provide the most accurate picture practically possible of the project's impacts, a lead agency define existing conditions by referencing historic conditions, or conditions expected when the project becomes operational, or both, that are supported with substantial evidence.*

As an initial matter, population, housing, and employment is a portion of the physical environmental setting described for an EIR, including others such as, the built environment (e.g., building heights, valued aesthetic resources, and public infrastructure), and the natural environment (e.g., air quality, watershed, the natural scenic resources, wildlife), and other physical characteristics (e.g., average vehicle trips, ambient noise characteristics, public services provided). The City, like most lead agencies, uses the Appendix G questions in the CEQA Guidelines to determine if its projects result in significant impacts to the environment. Population, housing, and employment, as an environmental setting is relevant and

used in the following impact sections to analyze impacts: air quality, greenhouse gas (GHG), energy, transportation, noise from mobile sources, population, housing and employment, utilities, and public services (including recreation). The City published the Notice of Preparation (NOP) for the Proposed Plan in September 2016.

SCAG is designated as a Metropolitan Planning Organization (MPO) responsible for carrying out federal and statutory duties within its six-county region, which includes Los Angeles County. SCAG is responsible for producing socio-economic estimates and projections, and the data is used in SCAG's RTP/SCS. The 2016-2040 RTP/SCS envisioned growing more compact communities in existing urban areas with efficient public transit and safe mobility opportunities. Major policy themes include integrating transportation investments and future land use patterns, striving for sustainability, providing more transportation choices, and supporting economic growth with infrastructure. Many municipalities and government agencies utilize the most recently adopted SCAG RTP/SCS data for purposes of planning, which for the preparation and analysis of the Proposed Plan was the 2016-2040 RTP/SCS. It is Los Angeles City Planning's practice to use SCAG RTP/SCS demographic data as a benchmark or as a reference point for recent estimates and projections locally; many other agencies and jurisdiction also use SCAG demographics data to plan for local change and growth.

As stated above, the NOP for the Proposed Plan was released in September 2016, and therefore the adopted 2016-2040 RTP/SCS was used to reference housing and population data for 2016 (the baseline year) and 2040 (the horizon year). For this RTP/SCS, SCAG utilized demographic data (households, population, and employment) from a baseline year of 2012 and made projections for 2040. To address the time gap between 2012 and 2016, the demographic data from 2012 were interpolated to estimate 2016 existing conditions. The estimated 2016 population was approximately 86,000 persons and total households was approximately 22,000. As previously mentioned, annual demographics data are not immediately available and there is usually a lag time in the data release. Therefore, the interpolated population numbers using an annual average growth rate represented the most reasonable estimate available in 2016.

Published demographic data is widely available, including from private companies and university researchers, but they are usually for specific purposes, such as market research or academic publications. Each one has their own methodologies and assumptions but often, the data involves using Census Bureau products, including the decennial census count and ACS estimates of socioeconomic characteristics. There are limited, official demographics data available from government agencies, namely the Census Bureau and locally, SCAG for the region it serves. In addition to preparing the RTP/SCS, SCAG publishes local profile reports for each city in its jurisdiction, once every two years. Other MPOs have their own demographic data. There are also specific federal or state government agencies that publish more topical demographics data, such as employment, labor, agriculture, health/disease, and education/children. Demography is a specialized field of study, and technical expertise is required to calculate models and growth forecasts/projections. As shown in Table 1, the different sources often have provided different results. Demographics data produced by SCAG and the Census Bureau is used because they are the best available sources.

During the preparation of the EIR, SCAG adopted Connect SoCal (2020-2045 RTP/SCS) in summer 2020. This latest adopted RTP/SCS used a baseline year of 2016. For the Boyle Heights CPA, SCAG utilized a 2016 estimated population of approximately 83,000 persons and estimated households of 22,000, which is noted in Table 3 below. This difference is approximately 3 percent from the estimated 86,000 persons in the Proposed Plan’s EIR baseline. The estimated households for the latest adopted RTP/SCS and the Proposed Plan’s EIR baseline was consistent at approximately 22,000 households. Since 2016, there has not been a substantial increase in either dwelling units nor jobs within the Boyle Heights CPA that would necessitate a different baseline value. Building permit data shows that since 2016 approximately 700 housing units have been permitted, of which approximately 110 units were Accessory Dwelling Units (ADUs). Building demolition permits of approximately 120 housing units were also issued. This total indicates the total units for which building permits for new housing construction or demolition have been issued by the City. It does not necessarily mean that all the permitted units have been built or demolished. A total of approximately 700,000 square feet of new non-residential square footage has been permitted since 2016, and approximately 500,000 square feet of this total is attributed to the conversion of a cold storage business to office and warehouse uses.

	Adopted 2016-2020 RTP/SCS (2016)	Adopted 2020-2045 RTP/SCS (2016 Baseline)	% Difference 2016 to 2020
Population	86,000	83,000	-3%
Households	22,000	22,000	-4%
Employment	26,000	27,000	2%

As previously discussed, the SCAG 2016-2040 RTP/SCS and SCAG 2020-2045 RTP/SCS also provide projections for horizon years for 2040 and 2045, respectively. While the most recently adopted RTP/SCS includes a horizon year of 2045, the Proposed Plan continues to plan for 2040, for consistency with the 2016-2040 RTP/SCS utilized for the baseline conditions. As noted in Table 4 below, projections for the Proposed Plan do not vary substantially between the 2016 and 2020 RTPs. Further, when conducting the analysis, Transportation Analysis Zone (TAZ) boundaries are often utilized and the boundaries can be adjusted by SCAG across the CPA or City from one RTP cycle to the next. Therefore the same RTP is utilized for baseline conditions and projections, to ensure analysis is conducted using the same boundaries for baseline and future conditions.

<b>Table 4</b>			
<b>Comparison of projections in 2016 and 2020 RTPs within Boyle Heights CPA</b>			
	Adopted 2016-2020 RTP/SCS (2040 projection)	Adopted 2020-2045 RTP/SCS (2045 projection)	% Difference 2040 to 2045
Population	93,000	95,000	2%
Households	27,000	28,000	4%
Employment	35,000	33,000	-6%

As time has passed, additional demographics data have been released by the ACS, which is published by the U.S. Census Bureau. The ACS is a nationwide social, economic, housing, and demographics survey that focuses on the characteristics of the population, not to provide counts of the population<sup>4</sup>. Each month approximately 295,000 randomly selected addresses receive requests to complete questionnaires out of more than 140 million eligible addresses; this represents about two percent of all addresses. From these responses and in person surveys, as needed when households do not provide responses, data is collected and analyzed to inform the demographic estimates. There are uncertainties within the sample data, including sampling error.

The most recent 2019 ACS 5-year data released in 2020 for Boyle Heights showed an increase in households to approximately 23,000 as well as an increase in population number to approximately 90,000. It should be noted however that the ACS cautions against comparing ACS data when there is an overlapping time period<sup>5</sup>, such as in this case; the 2016 ACS covered the years 2012-2016 whereas the 2019 ACS covered the years 2015-2019. This is because using pooled data from overlapping time periods to look for trends may be challenging for multi-year estimates but comparing 5-year estimates that do not overlap is acceptable. In general, slowing growth over the past decade is a trend acknowledged by demographers but there has not been any projections or discussions of stagnant growth or loss in California or the SCAG region. Expert demographers have presented data in the last few years during SCAG’s Annual Demographic Workshops affirming that population will continue to grow in the state and in the SCAG region over the next few decades but at slower rates than in past decades<sup>6</sup>.

At the time of preparation of the EIR, the 2020 U.S. Census was released. The 2020 U.S. Census shows a population of approximately 82,000 people and 23,000 households for the Boyle Heights CPA, which shows an increase in households and a decrease in population compared to EIR’s 2016 baseline. There are several reasons to be concerned about the reliability of the 2020 U.S. Census. First, it was undertaken during a global pandemic, which resulted in many people losing their jobs, needing to telecommute, and being quarantined or following Safer at Home orders, and even some people, tragically getting very sick and dying. Second, there have been concerns with the impact on responses to the Census based on the Trump Administration’s widely publicized attempt to put a citizenship question on the Census.

<sup>5</sup> U.S. Census Bureau, *Understanding and Using American Community Survey Data: What All Data Users Need to Know* (2020); [https://www.census.gov/content/dam/Census/library/publications/2020/acs/acs\\_general\\_handbook\\_2020.pdf](https://www.census.gov/content/dam/Census/library/publications/2020/acs/acs_general_handbook_2020.pdf), accessed June 15, 2021.

<sup>6</sup> SCAG, *Annual Demographic Workshop: See presentations* available on <https://scag.ca.gov/demographics> and <https://scag.ca.gov/past-demographic-workshops>, including from the State Department of Finance.

The City finds that using the 2016 baseline of 86,000 people provides the most accurate picture practically possible because it was supported with substantial evidence when the City released the NOP based on the best available data source at the time, the 2016 RTP/SCS. The City finds it is reasonable to assume that a population drop noted in the 2020 Census was partially due to undercounting and the COVID-19 pandemic. According to the Census Bureau's 2020 Post-Enumeration Survey Estimation Report, which was released in March 2022, the 2020 Census undercounted Black, Latino, and Native American residents.<sup>7</sup> According to the report, these groups – mostly concentrated in cities – were undercounted in the 2020 Census figures. This could have contributed to the noted population decline as compared to the ACS Survey. Therefore, relying on existing conditions in 2016 using the 2016-2040 SCAG RTP/SCS provides the most accurate picture practically possible of the project's impacts.

# INTRODUCTION & COMMUNITY PROFILE

THIS PAGE IS INTENTIONALLY LEFT BLANK

# READERS' GUIDE

The Community Plan is a document that represents the land use vision and values for a distinct geography. A main function of the Community Plan is to guide decision-making with respect to land uses. This includes guidance for legislative decisions, such as adoption of overlay zones or supplemental development regulations, as well as amendments to the land use or zoning maps. The goals and policies, together with the General Plan Land Use Map are intended to guide decision-making. Community Plan goals and policies are intended to be supportive of one another. However, it is important to recognize that goals and policies are sometimes in competition and may entail trade-offs. The singular pursuit of one goal or policy may, in some cases, inhibit the achievement of other goals or policies. For example, the Community Plan includes policies that recognize the need to minimize water consumption in light of limited water resources. However, to eliminate the watering of sites being graded for permitted development or to eliminate landscape irrigation may conflict with objectives relating to maintenance of air quality or community design and beautification. Thus, when implementing the Community Plan, decision-makers must strike a balance between competing goals and policies, recognizing that all objectives cannot be fully implemented all the time. In relation to any decision, some goals and policies may be more compelling than others. It is up to the decision-makers to balance and weigh the applicability and merits of the goals and policies on any given project, program, or action.

## Goals

A goal is a statement that describes a desired future condition or “end” state. Goals are change and outcome oriented, achievable over time, though not driven by funding. Each goal in the Community Plan begins with an abbreviated chapter title followed by the number of the goal (e.g., LU.1).

## Policies

A policy is a clear statement that guides a specific course of action for decision makers to achieve a desired goal. Policies may refer to existing programs or call for the establishment of new ones. Each policy in the Plan is labeled with the abbreviated chapter title, the goal they refer to, and a unique number (e.g., LU.1.1).

## Programs

An implementation program is an action, procedure, program or technique that carries out goals and policies. Implementation programs are comprehensive in nature, encompassing amendments of existing and preparation of new plans, ordinances, and development and design standards; modification of City procedures and development review and approval processes; and interagency coordination. Completion of a recommended implementation program will depend on a number of factors such as citizen priorities, finances, and staff availability. These recommendations are suggestions to future City decision makers as ways to implement the goals and policies contained in this Community Plan. The listing of recommended implementation programs in the Community Plan does not obligate the City to accomplish them. Chapter 5 contains a list of all the Community Plan’s implementation programs. They are grouped by general topic and individually numbered (e.g., P1).

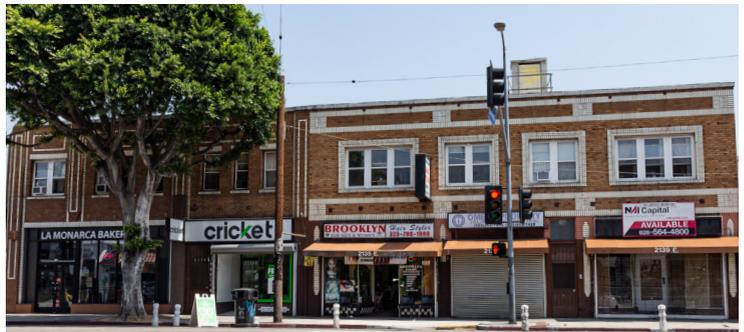

# PLAN VISION

---

The Boyle Heights community was built by generations of immigrants, fostering a sense of pride in the work ethic, rich cultural identity, and community activism of those who call it home.

Boyle Heights is a historic and cultural treasure with a diverse local economy that has the potential to bring prosperity and opportunity to current residents and to future generations.

Building upon its distinctive, pedestrian friendly, traditional neighborhood character, this community envisions a plan that is supportive of environmental quality, economic vitality, and urban design that promotes neighborhoods that are safe for all users.

# BACKGROUND AND RELATIONSHIP TO OTHER PLANS

The Boyle Heights Community Plan constitutes one of thirty-five plans that comprise the City’s General Plan Land Use Element. Including a number of elements, such as Framework, Mobility, Open Space, and Safety, the General Plan is the City’s fundamental policy document and defines how physical and economic resources are to be managed and utilized over time. Decisions by the City regarding the use of land, the design and character of buildings and open spaces, the conservation of existing housing and contextual infill of new housing, and the provision of supporting infrastructure are guided by the General Plan Land Use Element.

In addition to the Land Use Element, the City has adopted a Framework Element of the General Plan that establishes how Los Angeles will grow in the future, providing a citywide context for updates to Community Plans and the citywide elements. The Framework is focused around seven guiding principles: grow strategically; conserve existing residential neighborhoods; balance the distribution of land uses; enhance neighborhood character through better development standards; create more small parks, pedestrian districts, and public plazas; improve mobility and access; and identify a hierarchy of commercial districts and centers.

The development pattern described in the Framework Element provides direction and guidance for the city as a whole, as well as in neighborhoods such as Boyle Heights. Framework’s growth strategy for Boyle Heights is focused around transit and established mixed-use boulevards while maintaining the stability of residential neighborhoods. The Boyle Heights Community Plan includes large portions of the region’s industrial core along its western and southern borders, which will continue to be prioritized for jobs and industry, while

ensuring compatibility with adjacent neighborhoods. Appendix A of this document includes further discussion regarding the relationship between the Boyle Heights Community Plan and the City’s General Plan.

California state Legislation such as the Complete Streets Act of 2007 (Assembly Bill 1358) and Landmark Land Use and Greenhouse Gas State Law of 2008 (Senate Bill 375) established greenhouse gas reduction and better integration of multimodal transportation and land use planning as statewide priorities. Emission reduction is achieved through strategic infill development near transit and jobs, reducing the number of vehicle miles traveled. This Plan increases mobility options by planning for more jobs, housing, and amenities near transportation resources and each other, improving mobility options for residents to access jobs or visit family, while reducing reliance on single-occupant automobiles.

The Community Plan’s importance lies in its ability to shape positive community change and provide guidance that results in equitable and sustainable land use that balances the physical character and social urban fabric of the community with citywide policies and regional initiatives. Development of the Boyle Heights Community Plan was a multi-year collaborative effort with broad public participation from community stakeholders. The input received through workshops, focus groups, office hours, and collaboration with community-based organizations and the Neighborhood Council served as the policy foundation for the Plan.

Overall, the Plan guides future growth toward the most transit-served areas, directing development away from residential neighborhoods to achieve and balance regional sustainability goals and neighborhood stability.

Draft Summer 2022

# COMMUNITY PROFILE

As one of the City's earliest suburbs, Boyle Heights has a long and rich history of accommodating generations of immigrants who in-turn have built successful businesses and resilient neighborhoods. Boyle Heights today is a predominantly residential community, supported by vibrant commercial corridors and industrial districts. The majority of households include children, which makes schools, recreational facilities, and safe streets an important part of the lives of residents. While 23%

of residents are homeowners, the majority of residents are renters and are especially affected by the changing dynamics of the housing market that often result in gentrification and displacement. The local economy is primarily driven by small businesses in the form of retail and services for residents, as well as wholesale and distribution tied to the regional economy.

## BOYLE HEIGHTS TODAY IS:

### IS A MAJORITY RENTERS

74% of total occupied units are renter occupied

26% of total occupied units are owner occupied

### CONTAINS OLDER HOUSING STOCK

42% of buildings were built before 1940

71% of all multi-unit housing was built before 1978

### HAS A VARIETY OF EMPLOYMENT INDUSTRIES

34% Manufacturing, Transportation, Warehousing

28% Health Care and Social Assistance

16% Retail, Food Services

3% Professional, Scientific, Administrative, and Technical Services

8% Education Services

4% Management and Administration

8% Other Industries

*Please note: statistics are during time of plan update*

# HISTORIC DEVELOPMENT PATTERNS

## EARLY DEVELOPMENT

1870s–1900s

View looking west on 1st Street at Boyle Avenue (ca. 1895), California State Library Image Archive

- First bridges and cable railway lines built across the LA River
- Early land subdivisions establish Boyle Heights as a residential suburb
- Development of early commercial districts along First Street, Brooklyn Avenue (now Cesar E. Chavez), and Stephenson Avenue (now Whittier Boulevard)

## POPULATION CHANGES

1920s - 1940s

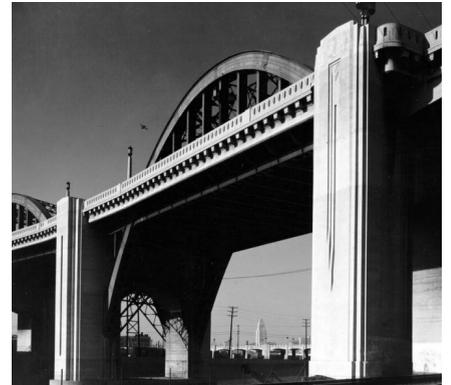

Boyle Heights "Temporary Home", Jewish Museum of the American West

- Due to the absence of racially restrictive covenants, Boyle Heights becomes an important community for African Americans and for immigrants arriving to the City
- In 1939 fed-sponsored Home Owner's Loan Corp (HOLC) redlined the neighborhood, creating an enduring legacy of disinvestment
- Los Angeles was the center of "Mexican Repatriation," where mass deportations of anywhere from 400,000 to 2,000,000 Mexicans and Mexican-Americans took place between 1929 and 1936
- During World War 2, the forced removal and incarceration of more than 100,000 ethnic Japanese, most of which were U.S. citizens, devastated communities in Los Angeles and throughout the West Coast

## INDUSTRIAL EXPANSION

1920s–1940s

6th Street Bridge, Los Angeles Public Library

- Streetcars are the primary form of urban transportation
- Major industrial expansion modernizes rail facilities, as well as factory and warehouse districts along the River and south of Olympic Blvd. Wyvernwood is constructed as workforce housing to support this expansion
- The Army Corp of Engineers channelizes the LA River

MID CENTURY/POSTWAR  
1940s–1960s

1970s–1980s

1990s–2010s

*Estrada Courts Housing Project, Housing Authority of the City of Los Angeles, California*

*Store in Boyle Heights (ca. 1986), Los Angeles Public Library*

*Gold Line at Pico/Aliso Station, Allen J. Schaben / Los Angeles Times*

- The Federal public housing program builds Pico Aliso, Pico Gardens, and Estrada Courts
- Thousands of residents are displaced and parts of neighborhoods demolished for the construction of the regional freeway system and East LA interchange
- Streetcar lines are converted to bus lines
- Students protest inequalities in the public education system and call for improved facilities and culturally relevant school curriculum during the East LA Chicano Student Walkouts or “Blowouts”

- Economic conditions and civil unrest in Mexico and Central America lead to increased immigration to Los Angeles. Boyle Heights remains an important location that allows for new immigrants to connect with established networks
- Regional suburbanization results in disinvestment in older neighborhoods

- Aliso Village and Pico Gardens housing projects are redeveloped through the Federal Hope VI program
- Felicitas & Gonzalo Mendez High School built
- Development shifts to infill development in older urbanized areas of the city
- Gold Line Eastside extension opens in Boyle Heights
- Exide battery recycling plant in neighboring City of Vernon closes
- Revitalization of Downtown LA leads to growing concerns over gentrification and displacement in Boyle Heights
- The Clean Up Green Up (CUGU) Ordinance, an environmental justice policy that established “green zones” in Boyle Heights, Pacoima, and Wilmington, is adopted

*\*For more information on key moments that have shaped the cultural landscape and built environment in Boyle Heights throughout the decades, please see the forthcoming Staff Report*

# GUIDING PRINCIPLES

The following core themes and principles represent ongoing guidance for the Boyle Heights Community Plan.

## PROMOTE HOUSING AFFORDABILITY

- Increase housing opportunities around transit
- Encourage residential infill that contributes to the affordable housing supply
- Safeguard existing households against displacement

## PROMOTE VIBRANT NEIGHBORHOOD AND COMMERCIAL DISTRICTS

- Create transit corridors that are accessible to all users
- Provide a mix of housing, jobs, and services that embrace and enhance community identity
- Encourage high quality design and contextual transitions to residential neighborhoods
- Strengthen and support existing businesses in commercial corridors

## PRESERVE AND CELEBRATE BOYLE HEIGHTS' CULTURAL HERITAGE

- Ensure that new development enhances the cultural identity of the neighborhood and respects the multi-faceted history of Boyle Heights
- Encourage and preserve existing business uses that serve residents' daily needs
- Preserve sites with identified historic significance

**FOSTER A THRIVING, HEALTHY,  
AND SUSTAINABLE COMMUNITY**

- Mitigate and limit the impacts of air pollution from car traffic and noxious uses that are detrimental to the health and welfare of the community
- Integrate neighborhood serving uses into the neighborhood fabric
- Treat the Los Angeles River as a community amenity

**PRESERVE INDUSTRIAL LAND  
FOR ECONOMIC STABILITY**

- Prioritize industrial land for uses that support the regional economy and local jobs
- Prevent health impacts to local communities through the location and design of industrial land uses
- Improve land use compatibility by creating buffers and better transitions between intense uses and sensitive uses, such as residential neighborhoods

**CREATE A NETWORK OF SAFE  
AND ACCESSIBLE STREETS**

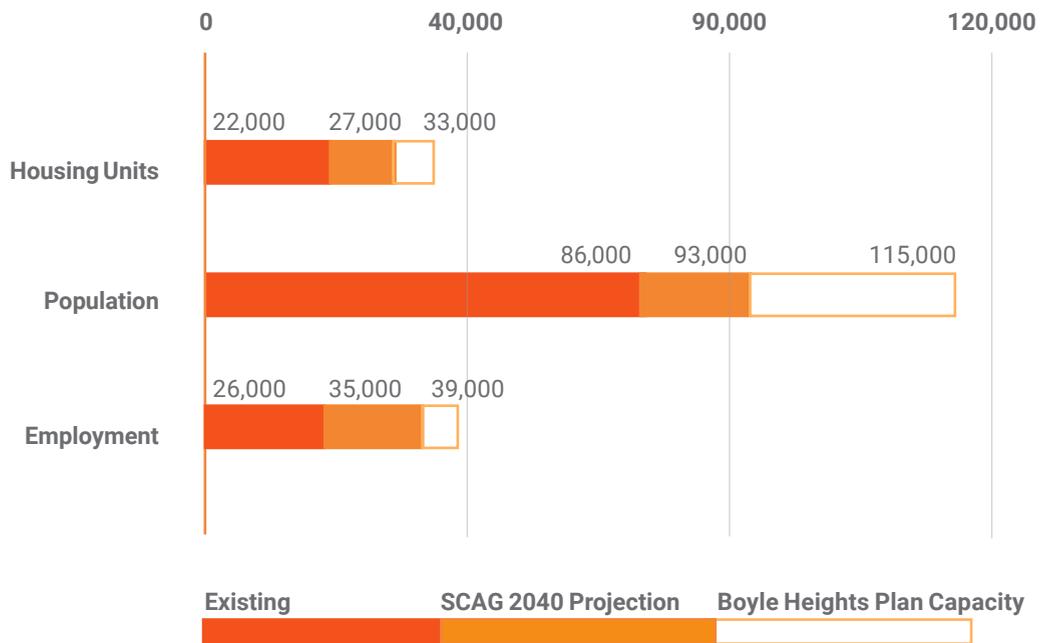

- Prioritize safety for all users of the street and public realm
- Expand transit service
- Improve bike infrastructure

# TRENDS AND PROJECTIONS

The State of California requires that regions plan for changes in population, housing, and employment. If growth is projected, each City must accommodate a share of the region’s anticipated growth. These projections are developed by the Southern California Association of Governments (SCAG), which forecasts population and job growth for the cities and counties in the six-county Southern California region.

The City must then accommodate, or create the “capacity” for these projected levels of population, housing, and employment through its Community Plans. SCAG’s 2040 population and housing forecasts for Los Angeles’ Community Plan Areas are based on several factors, including historic and recent growth trends. The Department of City Planning allocates the citywide population and housing forecasts, consistent with the Framework Element and other City policies.

TABLE 1.1: PROJECTIONS & PLAN CAPACITY\*

\*Plan capacity is the reasonable expected development anticipated to occur as a result of the proposed Plan by the Plan’s horizon year.

# GENERAL PLAN LAND USE DESIGNATIONS

General Plan Land Use Designations express a variety of goals, policies, and zoning tools to support each condition. The proposed General Plan Land Use Designations reflect the relationship between land use, physical built form, and functional aspects that differentiate one area from another. Each designation includes a description of the range of intensity, height, and typical uses that characterize an area, contributing to its identity and sense of place.

## Description

**232**

Net Acres

**8%**

of Plan Area

### Community Center

Community Centers are vibrant places of activity typically located along commercial corridors, in concentrated nodes, or adjacent to major transit hubs. The building form ranges from Very Low Rise to Low Rise. The use range is broad and may include commercial, residential, institutional facilities, cultural and entertainment facilities, and neighborhood-serving uses. The residential density generally ranges from 1 unit per 800 square feet of lot area to 1 unit per 400 square feet of lot area.

**140**

Net Acres

**5%**

of Plan Area

### Neighborhood Center

Neighborhood Center areas are focal points for surrounding residential neighborhoods and include uses that serve the needs of residents and employees. The building form is Low Rise and is characterized by pedestrian-scale commercial development. Uses generally include a mix of residential and commercial uses, such as local businesses and services. The residential density generally ranges from 1 unit per 800 square feet of lot area to 1 unit per 400 square feet of lot area.

**70**

Net Acres

**3%**

of Plan Area

### Medium Neighborhood Residential

Medium Neighborhood Residential areas are primarily residential and may integrate limited local-serving commercial uses; these neighborhoods are adjacent and connected to commercial and employment areas. The building form ranges from Very Low Rise to Low Rise, and buildings are typically oriented toward the street. The residential density ranges from 1 unit per 800 square feet of lot area to 1 unit per 600 square feet of lot area.

**12**

Net Acres

**<1%**

of Plan Area

### Medium Residential

Medium Residential areas provide a concentration of multi-unit housing and are typically located near commercial or employment centers. Supportive institutional uses may also be provided in certain Residential Use Districts. The building form is Very Low Rise. The residential density is 1 unit per 800 square feet of lot area.

## Description

---

**993**

Net Acres

**33%**

of Plan Area

### Low Neighborhood Residential

Low Neighborhood Residential areas are primarily residential and may integrate limited local-serving commercial uses; these neighborhoods are adjacent and connected to commercial and employment areas. The building form is Very Low Rise and buildings are typically oriented towards the street. The residential density generally ranges from 2 units per lot to 1 unit per 1,500 square feet of lot area.

---

**76**

Net Acres

**3%**

of Plan Area

### Low Medium Residential

Low Medium Residential areas provide multi-unit housing, ranging from duplexes to small scale apartments, generally near neighborhood-serving uses. The building form is Very Low Rise. The residential density generally ranges from 2 units per lot to 1 unit per 1,500 square feet of lot area.

---

**23**

Net Acres

**<1%**

of Plan Area

### Low Residential

Low Residential areas provide single unit housing, typically set away from centers of activity. The building form is Very Low Rise. The minimum size of each lot is 5,000 square feet and residential density is limited to one unit per lot.

---

**281**

Net Acres

**10%**

of Plan Area

### Light Industrial

Light Industrial areas preserve and sustain industrial activity while serving as a jobs base. The building form is Low Rise and the site layout typically varies to accommodate a range of industries. Uses include manufacturing, warehouse and distribution, research and development, office, and limited commercial. Housing is generally not permitted in Light Industrial areas but limited residential uses may be allowed, for example, through adaptive reuse of existing buildings.

---

**469**

Net Acres

**16%**

of Plan Area

### Industrial

Industrial areas are centers of industrial activity while serving as a regional jobs base. The building form is Low Rise. Site layout and development in these areas are flexible to accommodate a range of vehicles, equipment and industries. Uses include office, warehouse, distribution, heavy manufacturing, recycling and waste transfer, utilities, and mining. The Industrial designation does not allow residential uses.

---

## Description

---

**145**

Net Acres

**5%**

of Plan Area

### Open Space

Open Space areas primarily serve as public recreational sites or parks but can include reservoirs and nature reserves. These largely open areas are intended for passive and active outdoor recreation, public gathering, and education. The building form, if there are accessory structures or buildings on site, typically facilitates recreational and/or communal activities, such as playground equipment, restrooms, and community centers. The Open Space designation does not allow residential uses.

---

**190**

Net Acres

**7%**

of Plan Area

### Public Facility

Public Facilities areas serve as centers of life, promoting governmental, institutional, and cultural functions. These areas provide for the use and development of land typically owned by government agencies. The building form varies in size and structure, with a variety of site layouts and flexible building designs that support civic activity and an active public realm. Uses may include government offices, libraries, schools, service systems and housing.

---

**382**

Net Acres

**13%**

of Plan Area

### Public Facilities - Freeways

Public Facilities-Freeways comprises land dedicated to freeways that exist within the Plan Area, including storage and parking uses, that is owned by the California Department of Transportation (Caltrans).

---

## Chapter 2

# LAND USE & URBAN FORM

Boyle Heights has land uses ranging from densely populated residential neighborhoods served by vibrant commercial corridors, to developed industrial land along the Plan Area’s western and southern edges. Community life prospers amidst this complex and dynamic place that includes a combination of diverse land uses and buildings that are almost a century old.

This chapter defines goals and policies for land use planning that expands opportunities for housing in areas well served by transit, preserves land for industry and jobs while ensuring land use compatibility, and reinforces the neighborhood qualities that contribute to a strong sense of community in Boyle Heights.

Land use planning can address an expansive range of interrelated topics that shape the quality of life within a community, including housing, jobs, urban form, cultural resources, and environmental and economic sustainability.

The policies in the following chapter articulate a strategy for land use planning that will accommodate anticipated growth while ensuring that Boyle Heights remains a place of opportunity with access to affordable housing and gainful employment, and where community life prospers.

# GOALS AND POLICIES

## HOUSING AND COMPLETE NEIGHBORHOODS

This Plan envisions Boyle Heights as a community that can continue to be a source of affordable housing for existing residents and future generations, affirming its legacy as a community of rooted families, new immigrants, and a growing youth population.

The Plan also seeks to rectify past planning policies that perpetuated racially motivated exclusionary practices that have had lasting negative impacts on neighborhoods and communities of color.

In support of this goal, Plan policies encourage the preservation of existing housing units at affordable levels while accommodating infill housing to expand opportunities to new residents and growing families.

Plan policies seek to expand opportunities for affordable housing around major stations at densities that facilitate accessible streets for all users, lively public spaces, a diversity of small businesses, and increased transit ridership. The Plan encourages new housing to be designed to facilitate positive health outcomes, and reflect the diverse living arrangements and income levels of

the community while discouraging the displacement of existing residents. In addition, the Plan supports the evolution of homeownership models to promote increased access to generational wealth, an important step in addressing decades of exclusionary zoning practices in the community.

Finally, the Plan recognizes the important role that neighborhoods play in the quality of life of residents. Policies encourage uses such as corner stores, or tienditas, that provide the surrounding neighborhood with fresh groceries and basic household goods, while also providing a local destination for residents. This can increase opportunities for existing small business entrepreneurship and social interactions among neighbors to reinforce a sense of community. It can also help reduce the spread of disease during a public health crisis by providing essential household goods within a short distance.

## LU GOAL 1

NEW HOUSING DEVELOPMENTS INCREASE THE SUPPLY OF QUALITY HOUSING THAT IS AFFORDABLE AND ACCESSIBLE TO HOUSEHOLDS WITH INCOME LEVELS THAT REFLECT THOSE OF THE BOYLE HEIGHTS COMMUNITY.

### LU 1.1

Support residential infill developments that increase the supply of affordable housing on-site that is for rent or for sale.

### LU 1.2

Incentivize new development to contribute towards the community's extremely-low, very-low, and low-income housing needs.

### LU 1.3

Ensure that each recently occupied housing unit demolished as a result of new development is replaced on-site, and offered back to former residents at rent levels previously paid.

### LU 1.4

Discourage permits from being issued for the demolition of multi-unit buildings until a project providing an equivalent or greater number of units is approved.

### LU 1.5

Utilize public land and funding for the development of supportive housing projects and affordable housing for extremely-low, very-low, and low-income households.

## LU GOAL 2

NEIGHBORHOODS CONTINUE TO PROVIDE AFFORDABLE AND SECURE HOUSING TO EXISTING AND FUTURE RESIDENTS.

### LU 2.1

Discourage projects or renovations that decrease the number of existing residential units on site.

### LU 2.2

Limit the conversion of existing affordable and rent stabilized units into for-sale units in order to avoid reducing the supply of affordable rental units locally.

### LU 2.3

Discourage significant rent increases when not commensurate with substantial property improvements that result in improved living conditions for tenants.

### LU 2.4

Prioritize preservation and maintenance of the existing multi-unit housing stock as the foundation of the community's affordable housing supply.

### LU 2.5

Support property owners in their efforts to operate and maintain affordable housing units in good and safe condition.

### LU 2.6

Support well-designed projects that modify, reconfigure, or add-on to existing residential buildings to accommodate additional housing units to alleviate overcrowding and avoid displacement.

### LU 2.7

Foster effective collaboration and coordination between City departments and tenant organizations working in Boyle Heights to more quickly identify displacement and eviction threats and effectively respond with adequate resources and strategies.

## LU GOAL 3

RESIDENTIAL DEVELOPMENTS SUPPORT THE DIVERSE HOUSING NEEDS OF THE BOYLE HEIGHTS COMMUNITY.

### LU 3.1

Promote the development of residential units with three or more bedrooms to support larger households and multigenerational living.

### LU 3.2

Encourage multi-unit housing developments to provide a diverse range of unit types and unit sizes including those suitable for larger households, single room occupants, independent seniors, and affordable fee simple ownership.

LU 3.3

Encourage multi-unit housing developments to provide amenities for children, such as outdoor play areas and childcare facilities.

LU 3.4

Promote the development of new housing for seniors and persons with disabilities within short walking distance of public transportation, commercial uses, recreational amenities, and health care facilities.

LU 3.5

Expand opportunities for property ownership to lower and moderate income households by supporting the creation of smaller lots and homes for sale.

LU 3.6

Increase opportunities for affordable homeownership for low and moderate income households by expanding homebuyer assistance programs provided by the City.

LU 3.7

Develop strategies to assist community land trusts and affordable housing developers with property acquisitions.

LU 3.8

Support dwelling unit types that meet the needs of the community and create opportunities for resident interactions and connection to the public realm.

LU 3.9

Promote more affordable ownership opportunities and ownership retention strategies, with an emphasis on stability and wealth building for communities that have historically been prevented from wealth building through discriminatory practices such as redlining.

**LU GOAL 4**

**NEW HOUSING OPPORTUNITIES ARE MAXIMIZED NEAR TRANSIT AT DENSITIES THAT SUPPORT A DIVERSITY OF SMALL BUSINESSES, PUBLIC SPACES, AND INCREASED TRANSIT RIDERSHIP.**

LU 4.1

Permit greater development scale and density around transit if a project provides high quality housing that is affordable and accessible to the surrounding community.

LU 4.2

Ensure that a significant portion of new housing around transit is affordable to low-income households in order to accommodate the City’s core transit riders.

LU 4.3

Encourage higher concentrations of housing around transit where residents can benefit from greater access to commercial uses, jobs, and schools.

**LU GOAL 5**

**NEIGHBORHOODS PROVIDE RESIDENTS WITH ACCESS TO ESSENTIAL COMMERCIAL AND PUBLIC AMENITIES WITHIN A MULTI-MODAL ACCESSIBLE ENVIRONMENT.**

LU 5.1

Ensure that neighborhoods include the educational, recreational, and civic facilities necessary for social engagement and empowerment.

LU 5.2

Promote community use of existing facilities at school sites through joint use partnerships between the relevant City departments and the Los Angeles Unified School District.

LU 5.3

Support the establishment of corner stores that provide fresh groceries and basic household goods within comfortable walking and rolling distance for all users of the surrounding neighborhood.

LU 5.4

Ensure that small businesses located within residential neighborhoods are providing a positive service to the community by enhancing the health and well-being of residents and operating as good neighbors.

LU 5.5

Support the provision of appropriately scaled childcare, community care, eldercare, and healthcare facilities

that enable neighborhoods to serve all members of the community throughout every stage of life.

#### LU 5.6

Promote the clustering of public facilities, such as libraries, parks, schools, and auditoriums in order to establish more integrated community centers.

#### LU 5.7

Improve resident's access to basic needs and amenities, such as food, household goods, open space, and health and wellness facilities.

## COMMUNITY CENTERS AND CORRIDORS

Boyle Heights' mixed-use corridors play a central role in community life. The rows of small shopfronts that characterize Boyle Heights' most successful mixed-use corridors accommodate a dynamic mix of local businesses that cater to the local community and help support a vibrant and inclusive public realm.

The Plan seeks to reinforce the essential qualities of the community's most successful mixed-use corridors and apply them to future development. The Plan's strategy of encouraging additional housing around the community's transit stations and along major corridors reinforces the qualities that help sustain an active commercial street. The Plan encourages mixed-use development that combines multi-unit residential apartments with commercial ground floor spaces designed to accommodate small tenant spaces for small businesses and enhance the experience along the street for all users.

Policies in this section identify the priorities for mixed-use development and detail the features that have helped make the most successful commercial areas in Boyle Heights places where residents and businesses come together and community life prospers.

### LU GOAL 6

AREAS SERVED BY TRANSIT SUPPORT A DYNAMIC MIX OF COMMERCIAL ACTIVITY, COMMUNITY SERVICES, JOBS, AND AFFORDABLE HOUSING.

#### LU 6.1

Promote developments around transit stations that add value to the community by providing a mix of multi-unit housing, neighborhood-serving commercial uses, and community amenities

#### LU 6.2

Encourage developments around transit stations to provide commercial tenant spaces along the full length of a building's ground floor frontage.

#### LU 6.3

Maximize the benefits of transit by concentrating higher residential and employment densities within several blocks of each of the community's major transit stations.

#### LU 6.4

Encourage and support mobile sidewalk vending in plazas and along streets surrounding major transit stations to foster a vibrant pedestrian environment.

### LU GOAL 7

COMMUNITY MIXED-USE CORRIDORS PROVIDE OPPORTUNITIES FOR LOCAL BUSINESSES AND NEIGHBORHOOD SERVING USES ADJACENT TO WALKABLE AND ACCESSIBLE RESIDENTIAL NEIGHBORHOODS.

#### LU 7.1

Accommodate additional housing capacity along and adjacent to key mixed-use corridors while prioritizing ground floor areas for commercial uses and amenities that serve the immediate neighborhood.

#### LU 7.2

Ensure that established neighborhood corridors, such as Cesar E. Chavez Avenue, Wabash Avenue, First

Street, and Indiana Street, continue to provide small commercial spaces for neighborhood serving uses.

## **LU GOAL 8**

### **GROUND FLOOR SPACES ALONG CORRIDORS SUPPORT COMMUNITY LIFE BY PROVIDING A PLEASANT AND ENGAGING SETTING.**

#### **LU 8.1**

Encourage projects to dedicate ground floor space to uses that generate street level activity, such as neighborhood retail, grocery stores, restaurants, food stands, and local services.

#### **LU 8.2**

Design ground floor spaces that embrace the street and engage users by employing features such as large windows, recessed or shaded entryways, outdoor seating, and eye-level displays.

#### **LU 8.3**

Encourage smaller individual tenant spaces to accommodate a greater number and diversity of businesses or larger spaces that accommodate multiple tenants over spaces that serve a single tenant.

#### **LU 8.4**

When active commercial uses are not feasible within ground floor areas consider providing flexible spaces designed for community amenities, including but not limited to:

- shared workspace
- afterschool programming
- adult education center
- fitness center
- daycare center
- cooking facilities
- community office space
- indoor recreation and leisure
- community health facilities

#### **LU 8.5**

Discourage the introduction of new uses on corridors that detract from a healthy and active pedestrian street life, particularly vehicle repair and servicing, businesses featuring drive-throughs, fueling stations, and storage facilities.

## **LU GOAL 9**

### **PARKING FACILITIES THAT ARE DESIGNED TO SUPPORT VIBRANT, ACCESSIBLE STREETS FOR ALL USERS AND REDUCE EXPOSURE TO VEHICLE RELATED HAZARDS.**

#### **LU 9.1**

Encourage parking to be located away from the pedestrian right-of-way and behind an active frontage with access taken from the rear of buildings where possible.

#### **LU 9.2**

Discourage new driveways along pedestrian-oriented streets when access to a site can be reasonably accommodated from an alley or cross-access easement.

#### **LU 9.3**

Discourage new driveways along streets with existing bike lanes when access to a site can be reasonably accommodated from an alley.

#### **LU 9.4**

Consider further reductions in parking requirements for projects when located within walking distance of major transit stations and bus stops.

#### **LU 9.5**

Discourage projects from providing parking in excess of the minimum required in locations where reliable public transit options exist as a viable alternative to private vehicle use.

#### **LU 9.6**

Encourage electric vehicle charging stations to be provided in all new parking facilities.

## JOBS AND ECONOMIC DEVELOPMENT

The Plan recognizes the diversity of jobs and industries located in Boyle Heights as a major economic asset to the local community and the region. This includes the established commercial districts that support many local businesses, a major hospital facility, and the industrial corridor along the Plan Area's western and southern boundaries. The Plan highlights Boyle Heights' diverse industries an opportunity to build a just economy that improves the lives of local residents and workers.

The Plan identifies the small affordable tenant spaces that most local businesses occupy as an important feature that enables commercial districts to provide numerous opportunities for a diversity of small business. The Plan's policies encourage the retention of existing small tenant spaces for local business and for tenant spaces within new mixed-use and commercial projects to be made available to small local business. Policies in support of small local businesses extend to mobile sidewalk vendors who provide affordable fresh food and contribute to a vibrant street life.

The Plan includes policies to preserve industrial land in Boyle Heights for uses that rely on flexible industrial space and access to the region's freight network to provide the region with the specialized goods, services, and jobs. The Plan seeks to protect the viability of industrial land with policies to support a dynamic mix of productive uses that provide opportunities to the surrounding community.

### **LU GOAL 10** THE CHARACTER AND CULTURE OF BOYLE HEIGHTS IS REPRESENTED THROUGH ITS THRIVING COMMUNITY OF LOCAL ENTREPRENEURS AND SMALL BUSINESSES.

**LU 10.1**  
Maximize opportunities for small and local businesses along corridors by limiting the size of new commercial tenant spaces to help maintain affordability and promote diversity.

**LU 10.2**  
Encourage mixed-use and commercial developments to provide commercial tenant spaces that are appropriately scaled for neighborhood-serving small businesses.

**LU 10.3**  
Promote efforts to safeguard legacy businesses and cultural institutions that reflect the history and character of Boyle Heights.

**LU 10.4**  
Develop programs and strategies that provide support to established commercial tenants facing closure due to rent increases.

**LU 10.5**  
Encourage the retention of existing small businesses that strengthen the local economic base of the Community Plan Area to avoid displacement of small businesses.

**LU 10.6**  
Projects that involve the demolition or disruption of occupied commercial tenant spaces are encouraged to accommodate displaced businesses at their former locations at rent levels previously paid.

**LU 10.7**  
Develop programs that increase resident participation in the local economy through strategies to assist local entrepreneurs and minority owned businesses in need of capital funding to establish or expand small businesses in the community.

### **LU GOAL 11** STREET VENDING CONTRIBUTES TO THE VIBRANCY OF THE PUBLIC REALM AND EXPANDS ACCESS TO GOODS AND SERVICES THROUGHOUT THE COMMUNITY

**LU 11.1**  
Recognize the important role street vending plays as a viable enterprise for many residents who provide the community with affordable merchandise and fresh food in a manner that enhances street life.

LU 11.2

Assist sidewalk vendors with efforts to comply with the rules and regulations of the City’s Sidewalk Vending Program.

LU 11.3

Support street vending through the provision of cleaning, preparation, and disposal facilities at locations where street food vending is prioritized by the community.

**LU GOAL 12**

**INDUSTRIAL LAND SUPPORTING PRODUCTION AND DISTRIBUTION USES IS PRESERVED AND IMPROVED AS A LOCAL SOURCE OF EMPLOYMENT OPPORTUNITY AND ECONOMIC PROSPERITY.**

LU 12.1

Maintain existing industrial land for both traditional and emerging industries that provide sources of employment for the local workforce as well as opportunities for small business creation and expansion.

LU 12.2

Maintain industrial land, facilities, and infrastructure necessary for warehousing and distribution centers to serve the region expeditiously and reliably.

LU 12.3

Support the continued use and function of industrial districts for wholesale activities to ensure that businesses in Boyle Heights and throughout Los Angeles have direct access to goods from around the world.

LU 12.4

Attract and sustain uses involved in textile manufacturing in support of the region’s fashion industry and as a source of local jobs.

LU 12.5

Enhance the role food and beverage processors and distributors play locally by encouraging related businesses to cluster around a food hub that integrates growers, producers, wholesalers, retailers, and food markets within a publicly accessible setting.

LU 12.6

Ensure that industrial districts provide a balance of large facilities and small workplaces in order to accommodate a diverse set of industries and support businesses at all stages of growth.

LU 12.7

Discourage uses that detract from the productive function of industrial districts, such as single-use residential development and large, free-standing retail establishments.

LU 12.8

Discourage new distribution centers and other uses that generate high volumes of truck traffic from locating in areas without direct access to the Metro Countywide Significant Truck Arterial Network.

**LU GOAL 13**

**INDUSTRIAL LAND LOCATED ADJACENT TO THE LOS ANGELES RIVER RAIL AREAS PROVIDES A DYNAMIC CONCENTRATION OF “CAREER LADDER” AND LOCAL JOBS AND SMALL BUSINESSES.**

LU 13.1

Promote the area surrounding the Pico/Aliso Metro Station as a suitable location for new employment generating uses that can benefit from the proximity to transit, existing warehouse and production space, and future connections to recreational amenities along the Los Angeles River.

LU 13.2

Develop programs and strategies that provide support with establishing small businesses involved in clean and green technology and environmental sciences in Boyle Heights.

LU 13.3

Encourage uses that integrate indoor agricultural practices, such as hydroponic or aeroponic farming, to locate in existing warehouse and industrial space near the Los Angeles River.

#### LU 13.4

Ensure that continued investment in infrastructure and amenities along the Los Angeles River results in sustainable economic development with equitable outcomes for current residents of Boyle Heights.

#### LU 13.5

Explore strategies to bolster employment uses and small businesses, such as Adaptive Reuse of buildings and Live/Work uses with Community Benefits.

### LU GOAL 14

THE LOCAL WORKFORCE IS EQUIPPED WITH THE EDUCATION AND TRAINING TO CONTRIBUTE TO AND BENEFIT FROM ECONOMIC DEVELOPMENT IN BOYLE HEIGHTS.

#### LU 14.1

Encourage new industries locating in Boyle Heights to engage and partner with the local workforce when looking for skilled employees.

#### LU 14.2

Pursue and strengthen partnerships between industries and educational institutions in order to equip students with the skills necessary to find gainful employment following graduation.

#### LU 14.3

Encourage local employers to make apprenticeship and paid internship opportunities available to the local workforce.

#### LU 14.4

Maintain and increase the commercial employment base for community residents through local hiring requirements, living wage requirements, job resource centers, and job training.

#### LU 14.5

Encourage new development to incorporate public Wi-Fi infrastructure to increase digital inclusion efforts for residents, workers, and students.

## URBAN FORM

The placement, form, and orientation of buildings throughout the neighborhoods and streets of Boyle Heights help shape the daily experiences and social lives of all members of the community. Places like Cesar E. Chavez Avenue and Mariachi Plaza are examples of the essential role urban form plays in shaping how people experience and value the built environment. Similarly, the front yards and porches that greet many of Boyle Heights' neighborhood streets play a role in supporting connections between neighbors and fostering a larger sense of community.

Boyle Heights is rich with examples of places where social life thrives in the form of rows of narrow shopfronts with welcoming entrances, or homes with front yards designed and used as outdoor living rooms. The Plan includes policies to encourage building features that better connect activity within the building with street level activity.

### LU GOAL 15

BUILDINGS ARE DESIGNED AND ORIENTED IN A MANNER THAT CONTRIBUTES TO BOYLE HEIGHTS' VIBRANT STREETS AND PLAZAS.

#### LU 15.1

Focus building massing and orientation along major streets, sidewalks and public spaces in order to establish a well-defined setting for street level activity and public life.

#### LU 15.2

Encourage building design and orientation that establishes a strong, seamless, and active streetwall.

#### LU 15.3

Design buildings to include features that add visual interest, such as recessed entrances, open shop front bays, arcades, columns, niches, seating, canopies, and awnings.

#### LU 15.4

Encourage corner plazas for buildings on corner sites in order to foster pockets of gathering and activity.

#### LU 15.5

Configure buildings around interior courtyards, outdoor passages (paseos), and arcades that can be seamlessly integrated with the public realm.

#### LU 15.6

Integrate underutilized alleys into the pedestrian network by activating frontages along alleyways and providing passageways that establish safe connections to parallel streets.

### LU GOAL 16

**BUILDING LAYOUT AND DESIGN THAT CREATES A CONNECTION BETWEEN THE BUILDING INTERIOR LIFE AND THE PUBLIC REALM.**

#### LU 16.1

Encourage buildings to be designed with larger street facing outdoor rooms, situated partially within the mass of the building to provide a comfortable transition between the street and private interior while providing a sense of privacy.

#### LU 16.2

Activate ground floor spaces and direct interior activity toward the street by locating workspaces, service counters, and seating within partial or full view of the street.

#### LU 16.3

Limit vehicle entrances to buildings and parking facilities to the minimum number required and encourage the entrances to be sited along side streets or alleys to avoid disruptions to pedestrian movement along primary corridors.

#### LU 16.4

Structured parking should be sited away from the street and wrapped with active frontages and habitable spaces that maintain the visual rhythm, pedestrian scale, and vitality of the street.

#### LU 16.5

Place utilities, storage facilities, and refuse collection away from building facades that front public streets and ensure that all equipment and storage facilities are well integrated into the building design and fully screened from view.

### LU GOAL 17

**NEW DEVELOPMENT EMBRACES THE DISTINCT PHYSICAL CHARACTER AND LOCAL CONTEXT OF BOYLE HEIGHTS.**

#### LU 17.1

Design larger buildings to distinguish a base, middle, and top by employing changes in massing, fenestration, and building materials.

#### LU 17.2

Promote building facade design that reinforces the visual rhythm and historic development patterns by incorporating elements such as columns or pilasters, and frequent window and door placement.

#### LU 17.3

Encourage buildings to use design elements such as cornices, window bays, building materials, and fenestration, in a pattern, scale, and proportion that makes the building relatable from the street.

#### LU 17.4

Incorporate architectural details, building material, and ornamentation that reflect the local context and historic development patterns in Boyle Heights.

#### LU 17.5

Support residential projects that follow traditional bungalow court and courtyard apartment style architecture and site layout.

## CULTURAL AND HISTORIC RESOURCES

Boyle Heights is one of Los Angeles' earliest residential suburbs and is a community with deep roots and a rich history. With the majority of its existing buildings built between 1900 and 1930 it is a history that remains highly visible, and is reinforced by a community that has enriched the built environment of Boyle Heights with cultural expression and meaning.

The Plan seeks to protect and embrace the character of many of Boyle Heights' significant historic places by encouraging the preservation and restoration of identified

historic resources, while providing design guidance for new development while not creating financial hardship for homeowners or small businesses.

## LU GOAL 18

**BOYLE HEIGHTS' CULTURAL HERITAGE ENDURES THROUGH THE PRESERVATION AND RESTORATION OF CULTURAL INSTITUTIONS AND HISTORIC RESOURCES THAT PROVIDE CONTEXT FOR IMPORTANT SOCIAL AND CULTURAL THEMES THAT HAVE SHAPED THE COMMUNITY.**

### LU 18.1

Prioritize the preservation and restoration of historic resources identified through the Los Angeles Historic Resources Survey (SurveyLA).

### LU 18.2

Protect individually significant historic resources and districts in Boyle Heights from demolition or adverse alteration.

### LU 18.3

Provide design standards that guide infill development in areas with an identified historic character to ensure that new buildings reinforce the historic scale and key architectural features of the area.

### LU 18.4

Forge partnerships with relevant neighborhood organizations to advance preservation efforts in the community and document oral histories through educational and informational programs.

### LU 18.5

Promote the restoration and reuse of vacant and/or deteriorating historic buildings for new uses that benefit the community and reinforce the site's historic and cultural legacy.

### LU 18.6

Promote the preservation of remaining examples of bungalow courtyard and garden apartment architecture.

### LU 18.7

Protect legacy businesses and cultural institutions from displacement.

## LU GOAL 19

**VIBRANT COMMERCIAL DISTRICTS AND PUBLIC PLACES THAT EXHIBIT A STRONG CULTURAL IDENTITY ARE REINFORCED THROUGH IMPROVED URBAN DESIGN AND ACTIVATION.**

### LU 19.1

Uphold the historic and cultural integrity of Cesar E. Chavez Avenue, also known as the historic "Brooklyn Avenue Neighborhood Corridor," by promoting restoration and reuse of existing early 20th Century brick buildings.

### LU 19.2

Ensure that new development along Cesar E. Chavez Avenue, also known as the historic "Brooklyn Avenue Neighborhood Corridor," reinforces the visual rhythm and underlying historic development pattern of the overall street through narrow shopfront bays, recessed entrances, and storefront awnings.

### LU 19.3

Ensure that the area surrounding Mariachi Plaza continues to function as a vibrant cultural and community hub where local music and art are strongly expressed in the public realm and by local businesses.

### LU 19.4

Support contextual infill development around Mariachi Plaza that reinforces the site's status as an important social and cultural resource for the community of Boyle Heights.

### LU 19.5

Expand on the important role that El Mercado has played in fostering local commerce and culture by encouraging market related activity to extend along First Street and Lorena Street.

### LU 19.6

Encourage future projects to build upon the commercial and cultural activity centered at El Mercado by incorporating additional space for market activities to take place.

### LU 19.7

Promote greater integration and improved permeability between the indoor marketplace of El Mercado and surrounding streets.

LU 19.8

Pursue opportunities for the development of centralized parking structures to relieve individual uses from providing on-site parking, and prioritize excess surface parking lots for public space.

### LU GOAL 20

**DISTINCTIVE INDUSTRIAL ARCHITECTURE THAT IS REPRESENTATIVE OF EARLY INDUSTRIAL DEVELOPMENT IN BOYLE HEIGHTS IS PRESERVED AND RESTORED FOR CONTINUED PRODUCTIVE USE.**

LU 20.1

Maintain the visual rhythm and underlying historic lot pattern of historic industrial streets, such as Anderson Street, 11th Street, and 12th Street.

LU 20.2

Encourage the restoration and adaptive reuse of distinctive industrial architecture dating from the first half of the 20th century.

LU 20.3

Support the adaptive reuse of the historic Sears building in a manner that preserves the architectural integrity of the structure as a landmark while incorporating uses that provide employment and economic benefits to Boyle Heights.

LU 20.4

Ensure that the redevelopment of surface parking areas surrounding the Sears building occurs in a manner that provides active frontages along Olympic Boulevard and Soto Street.

LU 20.5

Encourage buildings along Olympic Boulevard and Soto Street to include pathways that break up large blocks and serve to integrate the Sears site into the surrounding urban fabric.

LU 20.6

Ensure that future infill development around the Sears building reinforces its physical status as a popular landmark.

### LU GOAL 21

**EVERGREEN CEMETERY IS VALUED AND EXPERIENCED AS AN EDUCATIONAL MEMORIAL THAT CONTEXTUALIZES LOS ANGELES' MULTICULTURAL HISTORY.**

LU 21.1

Improve the pedestrian accessibility of Evergreen Cemetery through additional public gateways, streetscape landscaping, designated pathways, seating alcoves, and wayfinding signage designed in a manner that is compatible with the cemetery's historic significance.

### LU GOAL 22

**ART ENRICHES THE PUBLIC REALM BY INVITING PEOPLE TO CONNECT WITH THE CULTURAL, HISTORICAL, SPIRITUAL, AND SOCIAL CONTEXT OF THE COMMUNITY.**

LU 22.1

Support efforts to preserve and restore the rich inventory of murals found throughout Boyle Heights.

LU 22.2

Encourage mural work by local artists along blank building surfaces along alleyways and side streets.

LU 22.3

Encourage new development to incorporate public art along building facades and in outdoor areas.

LU 22.4

Grant opportunities to local artists from Boyle Heights when commissioning artwork for both the public realm and private projects.

LU 22.5

Consider opportunities for multiple forms of public art, including but not limited to seating, lighting, landscaping, shade structures, sculptures, and imagery incorporated into outdoor installations.

## PUBLIC HEALTH, WELLNESS AND SUSTAINABILITY

Land use, urban form, and building design should be considered from the perspective of the health of residents and the environment. Issues of public health, wellness, and sustainability are especially salient because residents in Boyle Heights experience some of the worst air pollution in the state. The pollution resulting from land use planning and freeway construction during the second half of the 20th Century, has led to high rates of asthma, among other negative health outcomes. These public health inequities have been exacerbated in Boyle Heights during the COVID-19 pandemic, resulting in higher mortality rates. The Plan reinforces ongoing efforts to redress past practices and encourages development that is flexible and adaptable to the health and wellness needs of the community.

Despite the challenges presented by land use conflicts in Boyle Heights, the Plan establishes a direction for sustainable urban development to minimize impacts to the environment and improve health outcomes for Boyle Heights residents. The Plan reinforces ongoing efforts to rectify past land use planning that enabled polluting industrial uses to operate in close proximity to residential areas through sensitive zoning and more robust industrial development standards. The Plan also includes policies for building design and landscaping based on the local environment.

By directing new housing and commercial development around transit the Plan will enable more residents to access commercial uses, fresh food, jobs, and schools as pedestrians and transit riders. This will also help reduce vehicle miles traveled and the resulting emissions, positively affecting overall air quality in Boyle Heights and the greater region.

### LU GOAL 23

INDUSTRIAL LAND USES ARE SITED AND DESIGNED IN A MANNER THAT PRIORITIZES THE HEALTH AND SAFETY OF LOCAL RESIDENTS.

#### LU 23.1

Ensure that industrial land uses are safe for human health and the environment through proper containment of pollutants and mitigation of potential health risks.

#### LU 23.2

Promote the phasing out or relocation of facilities used for the handling of potentially hazardous chemicals or toxic substances near residential uses and schools, and discourage any further expansion of existing facilities.

#### LU 23.3

Encourage upgrades to street and alleys in industrial areas to include features that help infiltrate and treat contaminated runoff through the application of Best Management Practices for stormwater treatment.

#### LU 23.4

Promote efforts that ensure businesses in Boyle Heights have access to the City's Clean-Up Green-Up implementation programs, such as financial incentives and technical support programs.

#### LU 23.5

Discourage potentially disruptive or hazardous industrial uses along streets that serve as boundaries between industrial areas and residential neighborhoods.

#### LU 23.6

Ensure that all new or rehabilitated industrial facilities permitted near a residential use incorporate the appropriate screening, landscaping, and enclosure provisions necessary for preventing exposure to activities that generate odor, noise, dust, smoke, gas, fumes, cinder, or refuse matter.

## LU GOAL 24

IMPROVED SITE PLANNING, BUILDING DESIGN, AND LANDSCAPE BUFFERING ALONG FREEWAYS AND ARTERIAL ROADS WITH HIGH TRAFFIC HELP REDUCE NEGATIVE HEALTH IMPACTS OF VULNERABLE RESIDENTS.

### LU 24.1

Ensure that residential buildings constructed or rehabilitated in close proximity to a freeway incorporate features that help protect residents from pollutants, such as air filtration systems, double-paned windows, and landscaping with densely planted vegetation proven to filter particulate matter pollution.

### LU 24.2

Discourage the siting of outdoor recreational areas intended for children adjacent to freeways, such as yards and playgrounds in schools, daycares, and community facilities.

### LU 24.3

Increase landscape buffering and enhance noise barriers along freeways throughout Boyle Heights using soundwall design and densely planted vegetation proven to filter particulate matter pollution.

### LU 24.4

Discourage freeway widening or the expansion or enlargement of the freeway network through Boyle Heights.

### LU 24.5

Ensure that freeway on and off-ramp intersections are safe for all users through signalized and painted crossings, pedestrian lighting, and a well-maintained sidewalk clear of debris and visual obstructions.

## LU GOAL 25

A BUILT ENVIRONMENT THAT PRIORITIZES PEOPLE OVER CARS AND REDUCES THE NEGATIVE HEALTH AND ENVIRONMENTAL IMPACTS OF DRIVING WHILE INCREASING PHYSICAL ACTIVITY AND EQUITABLE ACCESS TO GOODS AND SERVICES.

### LU 25.1

Promote the siting and design of commercial development in a manner that encourages users to access and engage with each building as a pedestrian, while deprioritizing accommodations for single occupancy vehicles.

### LU 25.2

Concentrate new housing around transit where residents can benefit from greater access to commercial uses, jobs, and schools without the need for an automobile.

### LU 25.3

Expand opportunities for small, locally serving businesses to properly locate within neighborhoods in order to place the daily needs of residents within comfortable walking distance of their homes and schools.

### LU 25.4

Encourage front yard design that enables residents to socialize and engage with the surrounding neighborhood.

### LU 25.5

Enhance circulation around and within buildings through prominent entryways, open floor plans, visible stairwells, natural light, and interior communal areas that can be seamlessly integrated with the public realm.

## LU GOAL 26

NEW DEVELOPMENT IS DESIGNED TO MINIMIZE IMPACTS TO THE ENVIRONMENT AND ENHANCE THE HEALTH AND WELLBEING OF RESIDENTS.

### LU 26.1

Design and orient buildings around passive heating and cooling techniques that provide comfortable living environments year-round with minimal energy consumption.

### LU 26.2

Encourage residential projects to orient buildings around outdoor living spaces such as a courtyard, patio, terrace, or garden that provides a connection to nature for the health and wellbeing of residents.

#### LU 26.3

Encourage building designs that minimize exposure to air pollution by incorporating air filtration systems, double-paned windows, and landscaping with densely planted vegetation proven to filter particulate matter pollution, especially when located adjacent to a freeway and high traffic arterial roads.

#### LU 26.4

Encourage paved areas such as driveways, walkways, and outdoor spaces to be designed with permeable surfaces in order to increase water infiltration and reduce runoff.

#### LU 26.5

Strive for the use of native, drought-tolerant plants that support biodiversity in all landscaping.

#### LU 26.6

Incentivize and lower barriers for indoor recreation facilities like gyms, and community centers that are accessible to the general public.

### LU GOAL 27

RESIDENTS ARE EMPOWERED TO ACCESS, GROW, AND ENJOY FRESH AND LOCALLY SOURCED NUTRITIOUS FOOD.

#### LU 27.1

Encourage neighborhood corner shops and grocery stores to maintain a well-stocked selection of fresh produce and nutritious foods, and stock and display nutritious products in a visible location.

#### LU 27.2

Attract new full-service grocery stores to Boyle Heights that base sales primarily on perishable items, such as fresh produce.

#### LU 27.3

Establish procedures that streamline the development review and permitting process for grocery stores.

#### LU 27.4

Expand opportunities for farmers' markets in public plazas, surface parking lots, and through temporary

street closures in order to provide neighborhoods with access to fresh and nutritious foods on a regular basis.

#### LU 27.5

Pursue opportunities to provide permanent community gardens, in collaboration with community residents and community-based organizations, by considering sites on vacant or underutilized land, surface parking lots, parkways, and alleyways.

#### LU 27.6

Encourage new developments to provide community gardens.

#### LU 27.7

Promote the use of front yards, parkways and open space for urban agriculture.

#### LU 27.8

Support sidewalk vendors that provide fresh food in convenient locations for residents, employees, and students.

### LU GOAL 28

A HEALTHY AND GROWING URBAN FOREST PROVIDES THE COMMUNITY WITH CLEANER AIR, COOLER STREETS, AND A MORE PEDESTRIAN-FRIENDLY PUBLIC REALM.

#### LU 28.1

Encourage the planting of shade trees in the public right-of-way and on private property in order to mitigate urban heat island effects and contribute to the health of the community's urban forest.

#### LU 28.2

Preserve and nurture mature trees and when projects call for the removal of mature trees on private property pursue creative strategies to integrate them into the layout and design of new development. (Also see: PO Goal 4, Chapter 4)

## **LU GOAL 29**

ACCESSIBLE AND CULTURALLY RELEVANT SPACES AND HEALTHCARE FACILITIES THAT ENHANCE AND SUPPORT THE OVERALL WELLNESS OF LOCAL RESIDENTS.

### LU 29.1

Encourage the development of healthcare facilities and spaces throughout the plan area that are tailored to meet the needs of local residents.

### LU 29.2

Support the development of more open and public space opportunities that facilitate space for multiple activities, including those at a safe distance from other users, and an overall more active lifestyle.

Metro

Mariachi Plaza

Bailey St

## Chapter 3

# MOBILITY & CONNECTIVITY

Boyle Heights' layout of compact neighborhood blocks enables most residents to conveniently access commercial uses and transit services located along the community's major streets. Boyle Heights is well served by transit, with four Metro Rail stations and three Rapid Bus lines. This transit network provides the framework for the Plan's land use strategy of focusing development around transit.

This chapter provides policies aimed at leveraging Boyle Heights' compact neighborhood grid and existing transit services to enhance pedestrian, bicycle and transit connections throughout the community. The Plan intends to improve access for all residents to transit and local neighborhood amenities, enhance the social atmosphere along streets, and reduce noise and pollution from vehicular traffic with a focus on physical safety from vehicle related collisions.

While the Plan prioritizes pedestrian, transit, and bicycle mobility, the plan also includes policies that address goods movement and parking. It is the Plan's objective to ensure that goods movement and automobile parking safely and efficiently serves the needs of residents and businesses without compromising mobility for pedestrians, bicyclists, and transit users.

# GOALS AND POLICIES

## MC GOAL 1

AN INTEGRATED STREET AND TRANSIT NETWORK THAT PROVIDES SAFE AND EFFICIENT MOBILITY OPTIONS FOR ALL USERS.

### MC 1.1

Promote the establishment of Mobility Hubs at major transit stations and intersections in Boyle Heights to increase mobility options for residents and employees and to enhance first mile/last mile connections.

### MC 1.2

Improve the function of Soto Street as the community's primary multimodal north-south corridor and promote establishment of Mobility Hubs at intersections with major east-west corridors.

### MC 1.3

Ensure that major destinations within the community are sufficiently equipped with, bus shelters, safe pedestrian crossings, bicycle parking, and wayfinding signage.

### MC 1.4

Enhance connectivity around major transit stations and intersections by pursuing opportunities to provide efficient and intuitive pathways through large blocks that follow desired pedestrian routes.

### MC 1.5

Improve the travel experience for bus riders by ensuring bus stops provide sufficient shelter and seating, and are equipped with real-time passenger information display systems.

### MC 1.6

Encourage the development of dedicated bus lanes on Soto Street and Whittier Boulevard in order to improve transit reliability and efficiency.

### MC 1.7

Redesign and improve streets in Boyle Heights with the primary objective of improving pedestrian and bicycle safety and mobility.

### MC 1.8

Prioritize locations on the High Injury Network, as designated by LADOT, for safety improvements in order to achieve high-impact reductions in injuries and fatalities.

### MC 1.9

Maximize safety around schools for all users of the public realm.

### MC 1.10

Employ traffic calming measures along Collector Streets passing through neighborhoods to discourage vehicle traffic from traveling at unsafe speeds in predominantly residential areas.

### MC 1.11

Refer development projects within 100 feet of a Metro facility to Metro for their review and approval, including compliance with the Metro Adjacent Development Handbook.

## MC GOAL 2

A STREET NETWORK THAT OFFERS A SAFE AND PLEASANT ENVIRONMENT FOR ALL USERS OF SIDEWALKS AND THE PUBLIC RIGHT OF WAY.

### MC 2.1

Prioritize safe and comfortable pedestrian crossings at major intersections and along corridors by implementing improvements such as:

- leading pedestrian intervals
- scramble crosswalks
- right turn limitations for vehicles at red lights
- raised pedestrian crossings
- pedestrian crossing facilities at midblock locations

MC 2.2

Accommodate sidewalk widening through the reduction of vehicular lanes along street segments with high user volumes, as feasible.

MC 2.3

Improve landscaping along sidewalks with low maintenance shade trees and varied drought-tolerant planting in parkways to create a pleasant and interesting walking environment.

MC 2.4

Improve the pedestrian experience under freeway overpasses and bridges by incorporating pedestrian lighting, landscaping, and public art.

MC 2.5

Improve City response times to address illegal dumping, sidewalk and street cleaning, and pavement repair.

**MC GOAL 3**

ALLEYWAYS ARE RECONCEIVED AS ATTRACTIVE AND CONVENIENT ROUTES FOR PEDESTRIANS AND CYCLISTS TO MOVE SAFELY AND LEISURELY THROUGH BLOCKS.

MC 3.1

Prioritize improvements to alleyways that provide convenient linkages between neighborhoods, corridors, schools, and parks.

MC 3.2

Improve prioritized alleyways with permeable walking surfaces and streetscape amenities such as pedestrian lighting, landscaping, and public art while maintaining functionality for goods movement.

**MC GOAL 4**

A COMPREHENSIVE BICYCLE NETWORK THAT ALLOWS RIDERS TO TRAVEL SAFELY AND COMFORTABLY THROUGHOUT BOYLE HEIGHTS AND TO ADJACENT COMMUNITIES.

MC 4.1

Prioritize the completion of a comprehensive bicycle lane network that enables all riders to safely and comfortably reach the community's schools, job centers, and transit stations by bike from any neighborhood in Boyle Heights.

MC 4.2

Promote implementation of dedicated bicycle signals at key intersections as a component of a comprehensive bicycle lane network.

MC 4.3

Ensure that bicycle parking and storage facilities are provided at public facilities and transit centers.

MC 4.4

Encourage residential uses and employers to provide bicycle amenities such as storage, repair stations, and showers to encourage cycling as a convenient and desirable form of transportation.

**MC GOAL 5**

A PARKING STRATEGY THAT EFFICIENTLY MANAGES PARKING RESOURCES AND SERVES THE NEEDS OF BUSINESSES AND RESIDENTS WHILE ENCOURAGING NON-VEHICULAR TRAVEL.

MC 5.1

In consultation with local businesses, support the creation of parking management districts in areas of high demand to coordinate the use of shared parking facilities among multiple uses.

MC 5.2

Adjust parking meter pricing and time limits in response to demand to encourage efficient turnover of parking spaces.

MC 5.3

Prioritize people over cars and allow flexibility in parking requirements to allow for al fresco outdoor dining and parklets to better serve the local business community.

## MC GOAL 6

AN EFFICIENT GOODS MOVEMENT SYSTEM THAT ACCOMMODATES THE NEEDS OF RESIDENTS AND LOCAL BUSINESSES WITHOUT IMPACTING QUALITY OF LIFE.

### MC 6.1

Ensure that loading zones are provided in commercial districts to reduce conflicts between other users of the street.

### MC 6.2

Preserve truck access in industrial areas and along the Metro Countywide Significant Truck Arterial Network when not in direct conflict with the safety of pedestrians and cyclists.

### MC 6.3

Discourage the use of Lorena Street and Soto Street north of 8th Street by freight vehicles in compliance with the Metro Countywide Significant Truck Arterial Network.

### MC 6.4

Encourage the preservation and maintenance of alleys for loading and truck traffic.

THIS PAGE IS INTENTIONALLY LEFT BLANK

## Chapter 4

# PUBLIC REALM & OPEN SPACE

Boyle Heights is home to several of the City’s great public spaces. Hollenbeck Park provides residents with a scenic natural landscape that invites recreation and relaxation. Mariachi Plaza serves as the community’s outdoor living room, where informal gatherings, music, art, and civic events showcase the rich culture of Boyle Heights. Some of the most important public spaces in a neighborhood are the streets, sidewalks, and bicycle infrastructure. These not only facilitate the movement of vehicles, cyclists, and pedestrians, but also serve as paths of travel that have the potential to support residents in building a sense of community through social interaction. Beyond providing infrastructure, the public realm serves as a space for civic engagement, demonstrations, protest, and public participation, and serves as a gathering space that has proven essential during the course of the COVID-19 pandemic.

The Plan provides policies that seek to enhance the quality of the public realm throughout Boyle Heights through design and landscaping and identifies opportunities to expand access to high quality public spaces for people with and array of ability and mobility needs.

By broadening the application of public realm and open space strategies to include major streets, the Los Angeles River, and local cemeteries, the Plan envisions a diverse and integrated network of pedestrian pathways, paseos, plazas, green spaces, and landscaped streets that foster social life and support community identity.

# GOALS AND POLICIES

## PO GOAL 1

PARKS AND GREEN SPACES PROVIDE EACH NEIGHBORHOOD WITH SCENIC NATURAL SETTINGS FOR RECREATION, RELAXATION AND SOCIAL GATHERING.

### PO 1.1

Encourage parks to incorporate active and passive recreational features, including landscaped circuit paths for walking and exercise, play areas for children, open fields for sports, shaded tree groves for relaxation, and picnic areas for gathering.

### PO 1.2

Encourage new development to create public and semi-public open space.

### PO 1.3

Improve the safety, visibility and accessibility of parks and open spaces by ensuring that perimeters are free of obstructions like overgrown landscaping and fencing and that adequate lighting is provided at night.

### PO 1.4

Coordinate with local residents to provide culturally relevant and engaging recreational programming at public parks and open space facilities.

### PO 1.5

Ensure that parks and open spaces are adequately equipped with public amenities such as drinking fountains and well maintained restrooms.

### PO 1.6

Pursue opportunities to establish new public parks through partnerships with state and local agencies, and community-based organizations.

### PO 1.7

Advance opportunities to repurpose vacant or underutilized lots, including publicly owned sites, for parks and open space.

### PO 1.8

Explore ways to connect neighborhoods divided by freeways through the development of freeway cap parks and pedestrian improvements to freeway underpasses, as feasible.

## PO GOAL 2

STREETS AND PLAZAS PLAY A CENTRAL ROLE IN COMMUNITY LIFE BY PROVIDING SAFE, FLEXIBLE, AND DESIRABLE PUBLIC SPACES FOR SOCIALIZING AND GATHERING.

### PO 2.1

Enhance the pedestrian experience along corridors by expanding sidewalk space and incorporating seating, landscaping, and opportunities for street vending and outdoor dining into the streetscape.

### PO 2.2

Provide more opportunities for accessible public spaces along streets in the form of plazas and paseos that are designed to encourage social activity.

### PO 2.3

Prioritize space at major intersections for civic plazas that function as highly accessible focal points in the community.

### PO 2.4

Design plazas as communal gathering places that provide opportunities for markets, music, art and community events.

### PO 2.5

Encourage new development to provide publicly accessible outdoor amenity space that is designed to transition seamlessly into the public realm.

### PO GOAL 3

THE LOS ANGELES RIVER SERVES AS A NATURAL AND RECREATIONAL PUBLIC AMENITY THAT IS WELL-CONNECTED TO SURROUNDING NEIGHBORHOODS.

#### PO 3.1

Create a network of linked public spaces along the rail-River corridor that provide safe and attractive public access to the Los Angeles River through gateways, plazas, paseos, and pedestrian paths by repurposing underutilized alleys and decommissioned rail spurs.

#### PO 3.2

Design urban trails and paths that connect the eastside to the river adjacent areas using pervious paving and native, drought-tolerant, and watershed friendly landscaping to encourage biodiversity and maximize water recapture.

#### PO 3.3

Utilize bridges spanning the Los Angeles River as opportunities for placemaking that highlight the history of the community's relationship to the River.

#### PO 3.4

Provide convenient and visually interesting paths of travel for pedestrians from nearby neighborhoods and transit stations to destinations along the River.

### PO GOAL 4

A STREETScape THAT CONTRIBUTES TO BOYLE HEIGHTS' OVERALL URBAN FOREST THAT HELPS REDUCE THE HEAT ISLAND EFFECT, IMPROVES AIR QUALITY, AND ENHANCES AESTHETICS.

#### PO 4.1

Encourage and promote the retention of trees through education, outreach and incentives offered by the Bureau of Street Services.

#### PO 4.2

Support the Bureau of Street Services in reducing conflicts between trees and infrastructure through proper tree selection.

#### PO 4.3

Increase planting of thick canopy trees and dense vegetation near and along freeways using species proven to filter particulate matter pollution.

#### PO 4.4

Facilitate the planting and maintenance of street trees, which provide shade and give scale to residential and commercial streets in all neighborhoods.

#### PO 4.5

Enhance tree planting and landscaping in parkways, medians, and neighborhood gateways as a placemaking strategy.

### PO GOAL 5

CEMETERIES SERVE AS SAFE AND ACCESSIBLE PLACES WITHIN NEIGHBORHOODS.

#### PO 5.1

Improve the accessibility of cemeteries as part of the community's open spaces network where the public can visit and appreciate a peaceful park-like setting.

#### PO 5.2

Support the use of cemeteries for cultural events and holiday celebrations.

#### PO 5.3

Enhance the recreational path around Evergreen Cemetery with improved lighting and consider extending the path along the access roads within the cemetery grounds.

### PO GOAL 6

PARKS AND PUBLIC SPACES ARE ESSENTIAL IN FACILITATING SPACE FOR CHANGING PUBLIC HEALTH NEEDS

#### PO 6.1

Promote open and public spaces that are flexible and adaptable to serve the health and wellness needs of the community during disasters and other local emergencies.

# Chapter 5 IMPLEMENTATION

The Community Plan establishes a comprehensive and long-range vision for the future of Boyle Heights. The goals and policies presented by the Plan express this vision and guide its implementation, which occurs through both private developments and public investments. The Community Plan generally identifies policies that are limited to the authorities that can be implemented under the jurisdiction of the City of Los Angeles (all departments) and does not prescribe the actions of other agencies such as the City's school districts.

The Community Plan is implemented through a variety of tools and methods, which include: zoning and other City ordinances; and Community Plan programs. The zoning ordinances adopted along with the Community Plan represent implementation tools that go into effect upon adoption of the Plan and can be implemented directly by the City. Community Plan Programs are programs that identify strategic actions that the City and other public agencies can take to implement the Plan. The implementation of these programs tends to rely on coordination among City Departments and between the City and external agencies, often requires approval and allocation of funding by the City Council and other decision-makers, and are expected to occur over the life of the Plan. This chapter discusses how the Community Plan policies and programs are implemented in land use decision-making. In particular, this chapter details existing and aspirational future programs, shown in a series of tables, which implement the goals and policies found throughout the Community Plan.

# THE IMPLEMENTATION PROCESS

The goals and policies in the Boyle Heights Plan are implemented through a variety of actions, including regulation and development review; financing and budgeting; and interdepartmental and interagency coordination.

Many Community Plan policies are implemented through regulations, such as zoning, adopted by the City based on the City’s “police power” to protect the public health, safety, and welfare of its citizens. Some zoning ordinances may also create a development review process that provides for City review of individual project proposals and authorizes the City to approve, deny, or condition projects based on their consistency with the Community Plan. Other programs are implemented at the time of Community Plan adoption, such as zone changes to regulations, community plan implementation overlay districts, supplemental use districts, specific plans, and design overlays. Coordination among City departments is critical to the successful implementation of many Community Plan policies, such as park planning and streetscape improvements. While the Community Plan policies and implementation programs are limited to authorities that can be implemented under the jurisdiction of the City of Los Angeles, implementation of some Plan policies may also require coordination and joint actions with numerous local, regional, state, and federal agencies. These agencies provide services, facilities, or funding and administer regulations that directly or indirectly affect many issues addressed in the Community Plan. These external governmental agencies, such as the California Department of Transportation (CALTRANS), the Los Angeles Unified School District, water service providers, the Los Angeles County Metropolitan Transportation Authority (METRO), among others, also look to the Community Plans for their planning and guidance in decision-making.

Among others, the Plan is implemented in the following ways: goals and policies are used as guidance for discretionary decisions requiring land use consistency findings; zoning of land to apply the desired land use regulations to property throughout Boyle Heights; adoption of development incentives that are intended to generate affordable housing and other public benefits in exchange for greater development rights. The following section provides a description of each of the Community Plan’s implementation features, followed by a brief explanation of the process for amending the Community Plan.

## GOALS AND POLICIES

The Community Plan’s goals and policies play an important role in shaping decisions around land use and public infrastructure.

The Community Plan can be used by the public, staff and ultimately decision-makers to guide and inform the land use decision making process. City actions on discretionary projects involving land use may require a finding that the action is consistent or in conformance with the General Plan. Department of City Planning staff and City Planning Department decision makers, such as the Director of Planning, Area and City Planning Commissions, and zoning administrators, among others, refer to and cite policies from the Community Plan text and the Land Use Map of the Community Plan when making findings of consistency on land use decisions. The goals and policies of the Community Plan are particularly important when development projects are proposed that are beyond the scope of the underlying zoning regulations, requiring variances or zone changes.

## GENERAL PLAN LAND USE DESIGNATIONS

Regulating the use and development of land is an important means by which the City exercises its authority to protect the public health, safety, and welfare of its citizens, and implement the plan. The Plan Land Use Designations are designated on the General Plan Land Use Map and establish the permitted range of intensities, uses, and densities, where applicable in the Plan Area. Each General Plan Land Use Designation identifies corresponding form and use districts in the City's Zoning Ordinances. The Land Use Designations are implemented through these form and use districts applied at the parcel level.

## ZONING REGULATIONS

The Community Plan's primary implementation tool is the comprehensive package of zoning regulations that govern how land can be used and developed throughout Boyle Heights. The zone assigned to each property prescribes the physical parameters new structures must adhere to, the types of uses that can occur, and the intensity that each use can occur. The zones and supporting development standards adopted as part of the Community Plan are effectuated as ordinances in Los Angeles Municipal Code, or as specific plans, overlay districts adopted under LAMC procedures. The parameters of each zone assigned in Boyle Heights have been strategically devised to ensure that they shape development in a manner that is compatible with the vision established by the Plan. The Plan's zoning regulations are implemented incrementally as each proposed building project and land use change within Boyle Heights is evaluated by the City for approval. The City applies zoning regulations as one of the primary metrics for evaluating whether a project or proposal is appropriate for a particular location. Projects that do not require discretionary review under any zoning ordinance are ministerial if they comply with all zoning regulations. In most cases non-discretionary or "by-right" projects are reviewed solely by the Los Angeles Department of Building and Safety, where the majority

of the development regulations enacted by the Plan are enforced. Generally, projects that surpass a specified size or scope require discretionary review under Project Review and will require adoption of the discretionary findings by the designated decision maker to ensure that the project is in conformance with the General and Community Plans and compatible with adjacent properties.

## COMMUNITY BENEFITS SYSTEM

This Plan establishes allowable development ranges through base and maximum Floor Area Ratios (FAR) assigned to each zone, and base and maximum heights assigned to some zones. Maximum FAR and height may be achieved through participation in the Community Benefits Program described in Article 9 of the LAMC. Development exceeding base development rights may be permitted in accordance with the Community Benefits Program to meet the primary objectives of this Plan by providing affordable housing.

## COMMUNITY PLAN AMENDMENTS

Changes to the Community Plan may be proposed from time to time to address changing conditions, new opportunities, and unforeseen circumstances. As such, the Community Plan must be a living, flexible document, allowing for changes that ultimately assist in enhancing and implementing the community's vision. It is necessary, therefore, to establish a fair, orderly, and well-defined process to govern how amendments occur.

Community Plans are part of the City's General Plan and thus, any changes to the Community Plan are considered General Plan amendments. Amendments may propose a change in the land use designation for a particular property or changes to the Community Plan's policies and text. Amendments to the General Plan are subject to an established public review process.

## IMPLEMENTATION PROGRAMS

Coordination among City departments and external agencies is critical to the successful implementation of many Community Plan policies, such as park planning and streetscape improvements. While many Community Plan policies are implemented through land use regulations and incentives enforced by the City based on its mandate to protect the health, safety and welfare of its inhabitants, implementation of some Plan policies may also require coordination and joint actions with numerous local, regional, state, and federal agencies. These agencies provide services, facilities, or funding and administer regulations that directly or indirectly affect many issues addressed in the Community Plan. These external governmental agencies, such as the California Department of Transportation (CALTRANS), the Los Angeles Unified School District, water service providers, the Los Angeles County Metropolitan Transportation Authority (METRO), among others, also look to the Community Plans for their planning and guidance in decision making. This section provides a series of tables describing future programs.

## SOURCES OF FUNDING

It is important to note that program implementation is contingent, among other policy and resources considerations, on the availability of adequate funding, which is likely to change over time due to economic conditions, the priorities of federal, state and regional governments and funding agencies, and other conditions. The programs should be reviewed periodically and prioritized, where and when necessary, to reflect funding limitations.

## READER'S GUIDE TO THE FUTURE IMPLEMENTATION ACTIONS' TABLE

The tables provided in this section organize programs into two broad categories: existing programs and resources, and future programs. Existing programs and resources are currently in effect and may already be playing an important role in addressing one or more of the plan's objectives. The list identifies opportunities to expand or continue existing programs in the Plan Area. Future programs are included as an advisory resource directed at public agencies responsible for devising improvements or prioritizing projects within Boyle Heights. Future programs described in the tables are aspirational and are put forth for further consideration as part of the ongoing effort to implement the Plan. The tables identify each program with a distinct reference number (i.e. P1), followed by a description of the intent and scope of the program, and a reference to the Community Plan policies that the program is expected to implement. Lastly, the tables identify the agency primarily responsible for implementing the program, as well as any agencies necessary for supporting the program's implementation

## ACRONYMS FOR AGENCIES

BSL - Bureau of Street Lighting	LA-DLA - Los Angeles Designated Local Authority
BOE - Bureau of Engineering	LADBS - Los Angeles Department of Building and Safety
BOS - Bureau of Sanitation	LADOA - Los Angeles Department of Aging
BSS - Bureau of Street Services	LADOT - Los Angeles Department of Transportation
CAO - City Administrative Officer	LADWP - Los Angeles Department of Water and Power
CalHFA - California Housing Finance Agency	LAFD - Los Angeles Fire Department
CalTrans - California Department of Transportation	LAFPC - Los Angeles Food Policy Council
CD - Council District	LAHD - Los Angeles Housing Department
CDD - Community Development Department	LAPD - Los Angeles Police Department
CoDRP - County Department of Recreation and Parks	LAPL - Los Angeles Public Library Development Department
DCP - Department of City Planning	LAUSD - Los Angeles Unified School District
DOD - Department on Disability	METRO - Metropolitan Transit Authority
DPW - Department of Public Works	NC - Neighborhood Council
DPSS - Department of Public Social Services	OHR - Office of Historic Resources
DTSC - Department of Toxic Substance Control	RAP - Recreation and Parks
EMD - Emergency Management Department	SAN - Bureau of Sanitation
EWDD - Employment and Workforce Development Department	SCAG - Southern California Association of Governments

# FUTURE IMPLEMENTATION ACTIONS

## ESTABLISHED PROGRAMS

\*(see explanation on p. 51)

Program Number	Description	Policy Reference	Coordinating Agency
<b>Land Use: Housing and Complete Neighborhoods</b>			
P1.	State Housing Laws: Coordinate with the Los Angeles Housing Department (LAHD) to respond to new requirements from state laws for housing and affordable housing, as needed.	LU 1.3; LU 1.4; LU 2.1; LU 2.3; LU 2.4; LU 2.7; LU 3.6; LU 3.7	LAHD
<b>Land Use: Cultural and Historic Resources</b>			
P2.	Survey LA Findings - Eligible Historic Resources: Support local efforts to protect and restore historic resources, including efforts to establish Historic Preservation Overlay Zones (HPOZs) or other conservation district overlays for eligible areas of Boyle Heights identified in the findings of the Los Angeles Historic Resources Survey.	LU 18.1; LU 18.2; LU 18.3; LU 18.4; LU 18.5; LU 18.6	DCP (OHR)
<b>Land Use: Wellness and Sustainability</b>			
P3.	Healthy Neighborhood Markets: Coordinate with the Los Angeles Food Policy Council to expand the Healthy Neighborhood Market Network (HNMN) to existing neighborhood markets in Boyle Heights and promote investment in new grocery locations via the FreshWorks fund.	LU 5.3; LU 5.4; LU 27.1; LU 27.2; LU 27.3	LAFPC, California FreshWorks
<b>Mobility and Connectivity</b>			
P4.	Mobility Hubs: Prioritize the development of Soto Station as a Central Mobility Hub with multi-modal supportive infrastructure such as bicycle facilities, bus shelters, wayfinding signage, safe pedestrian connections, comfortable outdoor seating areas, and active commercial uses that together enhance the transit user experience. Consider Mobility Hub improvements to other major transit stations in Boyle Heights, such as Mariachi Plaza Station, Pico/Aliso Station, and Indiana Station.	MC 1.1; MC 1.2; MC 1.3; MC 1.4; MC 1.5; MC 2.1; PO 2.1; PO 2.3; PO 2.4	Metro, LADOT

Program Number	Description	Policy Reference	Coordinating Agency
P5.	<b>First/Last-mile:</b> Collaborate with Metro to develop First/Last Mile Strategic Plans for key transit station areas in Boyle Heights with the objective of improving the experience of using transit by establishing safe and recognizable routes to and from transit stations.	MC 1.1; MC 1.2; MC 1.3; MC 1.4; MC 1.5; MC 1.7; MC 2.1; MC 2.2; MC 2.4; MC 3.1; MC 3.2; MC 4.1; MC 4.2; MC 4.3; PO 2.1	Metro, LADOT
P6.	<b>DASH Service:</b> Encourage the ongoing assessment and revision of DASH services to reach areas of Boyle Heights with public transportation service gaps, and expansion of DASH service hours to nights and weekends throughout all of Boyle Heights.	MC 1.1; MC 1.5	LADOT
P7.	<b>Cycle Tracks:</b> Prioritize the installation of protected cycle tracks on the following street segments: <ul style="list-style-type: none"> <li>- Mission Road between Marengo Street and 1st Street</li> <li>- 1st Street from the 1st Street Bridge over the Los Angeles River to Indiana Street</li> <li>- 4th Street from the 4th Street Bridge over the Los Angeles River to Velasco Street</li> <li>- 3rd Place between Velasco Street and Indiana Street</li> <li>- Olympic Boulevard between Soto Street and Lorena Street</li> </ul>	MC 1.7; MC 4.1; MC 4.2	LADOT
P8.	<b>Bike Lanes:</b> Prioritize the installation of bicycle lanes or buffered bicycle lanes on the following street segments: <ul style="list-style-type: none"> <li>- Mission Road between Cesar E. Chavez Avenue and Jesse Street</li> <li>- Echandia Street between Cesar E. Chavez Avenue and Pleasant Avenue</li> <li>- Boyle Avenue between 1st Street and 8th Street</li> <li>- Lorena Street between Indiana Street and Grande Vista Avenue</li> <li>- Forest Avenue between Wabash Avenue and Cesar E. Chavez Avenue</li> <li>- 7th Street between the 7th Street Bridge over the Los Angeles River and Soto Street</li> <li>- Whittier Boulevard from the 6th Street Bridge over the Los Angeles River to Indiana Street</li> <li>- Soto Street between Marengo Street and the City boundary with the City of Vernon</li> </ul>	MC 1.7; MC 4.1; MC 4.2	LADOT
P9.	<b>Freight Truck Network:</b> Ensure that the Countywide Strategic Truck Arterial Network (CSTAN) is adhered to by truck drivers through traffic enforcement, road signage and signaling in order to minimize noise, vibration and air quality impacts on sensitive land uses.	LU 12.8; MC 6.2; MC 6.3	Metro, LADOT, Caltrans, LAPD

Program Number	Description	Policy Reference	Coordinating Agency
P10.	Safe Routes to School: Prioritize additional Safe Routes to School interventions around schools located near the High Injury Network in Boyle Heights.	LU 24.5; MC 1.7; MC 1.8; MC 1.9; MC 1.10; MC 2.1; MC 2.2; MC 2.4; MC 3.1	LADOT, LAUSD, Caltrans, Metro
P11.	Metro Review: Inform future development in close proximity to Metro facilities that may impact Metro bus operations of notification procedures and considerations of projects.	LU 4.3; LU 6.1; LU 6.2; LU9.4; LU 9.5; LU 25.2; MC 1.1; MC 1.4; MC 1.11; MC 4.1	Metro
<b>Public Realm and Open Space</b>			
P12.	People Street Pedestrian Plazas and Parklets: Encourage partnerships between LADOT and community groups in Boyle Heights to apply for Plaza or Parklet projects that enhance social life and strengthen community identity.	PO 1.6; PO 1.7; PO 2.1; PO 2.2; PO 2.3; PO 2.4	LADOT
P13.	LA River Revitalization: Consistent with the LA River Revitalization Master Plan and associated design and implementation plans, restore and revitalize an 11-mile stretch of the Los Angeles River, while prioritizing public access to this public resource in densely populated communities such as Boyle Heights.	LU 13.1; PO 1.2; PO 1.4; PO 1.6; PO 1.7; PO 3.1; PO 3.2; PO 3.3; PO 3.4;	LACDPW, BOE, RAP, Arts Parks, and River Committee, LA River Cooperation Committee US Army Corps of Engineers
P14.	Financing LA River Improvements: Explore opportunities to direct funds for capital projects along the Los Angeles River in Boyle Heights through revenue generated from existing or proposed Enhanced Infrastructure Financing Districts (EIFD) established to help implement the Los Angeles River Revitalization Masterplan.	PO 1.2; PO 1.4; PO 1.6; PO 1.7; PO 3.1; PO 3.2; PO 3.3; PO 3.4;	EWDD, CAO, BOE, Council Office, Arts, Parks, and River Committee

# FUTURE IMPLEMENTATION ACTIONS

## PROPOSED PROGRAMS

\*(see explanation on p. 51)

Program Number	Description	Policy Reference	Coordinating Agency
<b>Land Use: Housing and Complete Neighborhoods</b>			
P15.	<b>Right to Return:</b> Explore the creation of a right to return program to ensure tenants of any residential unit subject to the Rent Stabilization Ordinance (RSO) or an On-Site Restricted Affordable Unit that is demolished or vacated for purposes of a proposed development project shall be granted First Right to Return for the replacement units.	LU 1.3; LU 1.4; LU 2.1	LAHD
P16.	<b>No Net Loss Program:</b> Explore the creation of a no net loss program to minimize the displacement of residents and ensure that there is no loss of affordable rental housing, covenanted or not, including affordable rent-stabilized units. This can be achieved through the preservation of existing affordable housing, covenanted or not, or the production of new affordable housing.	LU 1.1; LU 1.3; LU 1.4; LU 2.1; LU 2.2; LU 2.6	LAHD City Attorney
P17.	<b>Community Land Trusts:</b> A Community Land Trust is a community-based non-profit organization designed to ensure community stewardship of land by purchasing or holding land and removing it from the speculative real estate market. Encourage partnerships that seek to implement community land trust projects in Boyle Heights. Work with the community to develop programs and provisions that advantage efforts by local organizations to acquire land for the development of affordable housing and open space, or the protection of small businesses and renters.	LU 1.5; LU 3.7; LU 10.3; LU 10.4; LU 10.5	Council Office, CAO, DCP
P18.	<b>Housing Market Study:</b> Conduct a housing market study to evaluate value capture strategies, local and state incentive programs, and/or inclusionary zoning strategies with the objective of increasing the stock of affordable housing for low-income households in Boyle Heights.	LU 1.1; LU 4.1; LU 4.2; LU 6.3	DCP, LAHD, City Attorney
<b>Land Use: Jobs and Economic Development</b>			
P19.	<b>Small Business Assistance and Retention:</b> Continue to develop and promote agency programs that assist small business owners and entrepreneurs in the form of low-interest loan programs, management assistance, business retention efforts, and the establishment of incubation centers. Develop a process to offer right of return for small businesses displaced due to new development at similar rents prior to displacement.	LU 5.3; LU 10.2; LU 10.3; LU 10.4; LU 10.5; LU 10.6; LU 10.7; LU 11.2; LU 11.3; LU 13.2	CAO, EWDD

Program Number	Description	Policy Reference	Coordinating Agency
P20.	<b>Business Outreach and Mentorship Programs:</b> Develop partnerships to create business outreach programs targeting local schools for student and adult participation in business apprenticeship and internship programs, as well as work with the LAUSD's Mentorship Programs.	LU 13.2; LU 14.1; LU 14.2; LU 14.3; LU 14.4	LAUSD, EWDD
P21.	<b>LA River Land Use Study:</b> Conduct a study of land use trends and land use alternatives along the Los Angeles River, including an assessment of the impacts that new residential development could have on local housing and employment markets, to inform future planning efforts.	LU 13.1; LU 13.4; LU 13.5	DCP
P22.	<b>Food Hub Study:</b> Conduct a study of the local food industry in Boyle Heights as the basis of a future economic development strategy designed to support and grow local businesses involved in the wholesale, processing, cultivation, preparation, and serving of food.	LU 11.1; LU 11.3; LU 12.1; LU 12.2; LU 12.3; LU 12.5; LU 13.3; LU 27.1; LU 27.8	DCP, LAFPC, EWDD, Mayor's Office

#### Land Use: Wellness and Sustainability

P23.	<b>Incentives for Healthy Food:</b> Develop a land use incentive strategy that increases the availability of fresh and nutritious produce in neighborhood markets and grocery stores throughout Boyle Heights.	LU 5.3; LU 5.4; LU 27.1; LU 27.2; LU 27.3; LU 27.4; LU 27.5	DCP, LAFPC
P24.	<b>Air-Quality Monitoring:</b> Create an air quality monitoring program that uses metrics such as PM10 and ozone to identify ambient level pollutants and their location on a neighborhood level.	LU 23.1; LU 23.6; LU 24.1; LU 24.2; LU 24.4	AQMD
P25.	<b>Street Tree Tracking:</b> Create a publicly accessible database that displays the tree types within the City's public rights-of-way. Ensure that this database is utilized to significantly increase the tree canopy in Boyle Heights to improve air quality and reduce the urban heat island effect locally.	LU 24.3; LU 28.1; PO 4.1; PO 4.2; PO 4.3; PO 4.4; PO 4.5; MC 2.3	BSS
P26.	<b>Tree Planting and Maintenance Partnerships:</b> Develop partnerships between public agencies, community groups, local businesses, and private developers to increase trees in the public right-of-way, resulting in tree planting and maintenance programs for specified parkways, landscaped medians, and community gateways.	LU 24.1; LU 24.3; LU 28.2; LU 28.1; PO 4.1; PO 4.2; PO 4.3; PO 4.4; PO 4.5; MC 2.3	BSS

#### Mobility and Connectivity

P27.	<b>Bus Rapid Transit Study:</b> Bus Rapid Transit (BRT) is a high-quality bus service that provides faster, more reliable and convenient service through the use of several key attributes, including, dedicated bus lanes, branded vehicles and stations, higher frequency, intelligent transportation systems, and possible off-board fare collection and/or all door boarding. Study the feasibility of upgrading bus routes on Soto Street and Whittier Boulevard to BRT.	MC 1.5; MC 1.6	Metro
------	---	----------------	-------

Program Number	Description	Policy Reference	Coordinating Agency
P28.	<b>Pedestrian Priority District:</b> Conduct a study for a potential pedestrian priority district in Boyle Heights where enhanced pedestrian safety improvements and innovative treatments are implemented. These treatments include scramble crosswalks, raised crosswalks, and right light turn on red light prohibitions in order to reinforce pedestrian safety and comfort.	LU 24.5; MC 1.3; MC 1.4; MC 1.7; MC 2.1; MC 2.2; MC 2.3; MC 2.4; MC 3.1; MC 3.2; PO 2.1; PO 2.3; PO 2.4	LADOT
P29.	<b>Traffic Calming Study:</b> Conduct a study of driver behavior and pedestrian safety on Collector Streets throughout Boyle Heights and prioritize traffic calming measures on streets where potential pedestrian/vehicle conflicts are found to be the greatest.	MC 1.10	LADOT, BOE
P30.	<b>Demand Responsive Parking:</b> Support the implementation of parking meter demand pricing and time limits in commercial areas of high parking demand in order to increase turnover, enabling more customers to visit local businesses.	MC 5.2	LADOT
<b>Public Realm and Open Space</b>			
P31.	<b>Streetscape Improvements:</b> Identify specific pedestrian friendly streetscape improvements to prioritize along and around Boyle Heights' major mixed-use corridors; consider improvements such as mid-block pedestrian crossings, curb extensions, seating, landscaping, shade trees, and pedestrian lighting.	MC 1.3; MC 1.4; MC 1.7; MC 2.1; MC 2.2; MC 2.3; MC 2.4; MC 3.1; MC 3.2; PO 2.1; PO 2.2; PO 2.3; PO 2.4; PO 4.4; PO 4.5	LADOT, BOE, BSS
P32.	<b>Alley Improvement Program Study:</b> Conduct a study of existing alleyways throughout Boyle Heights as the basis for preparing an Alley Improvement Plan to coordinate alley improvements with new development. Prioritize improvements based on proximity to public transit stations, opportunities to create flexible recreation spaces, and connections to parks, schools, the Los Angeles River and other public resources.	LU 15.6; LU 22.2; LU 27.5; MC 3.1; MC 3.2; PO 3.1	BSS, DWP
P33.	<b>Neighborhood Green Streets:</b> Develop a network of well-landscaped pedestrian routes along Boyle Heights' less trafficked neighborhood streets. Such a network would feature high quality landscaping, shade trees, streetscaping, and wayfinding that provides pedestrians with safe and attractive routes linking the community's open spaces, recreational centers, cemeteries, and the Los Angeles River.	LU28.1; MC 2.3; MC 2.4; PO 3.1; PO 3.2; PO 3.4; PO 4.4; PO 4.5; PO 5.1	LADOT, BOE, BSS, BOS

**RELATIONSHIP  
TO OTHER  
PLANS**

## RELATIONSHIP TO THE GENERAL PLAN

California state law requires that cities prepare and adopt a comprehensive, integrated, long-term General Plan to direct future growth and development. The General Plan is the fundamental document of a city. It defines how a city’s physical and economic resources are to be managed and utilized over time. Decisions by a city with regard to the use of its land, design and character of buildings and open spaces, conservation of existing and provision of new housing, provision of supporting infrastructure and public and human services, and protection of residents from natural and human-caused hazards are guided by the General Plan.

State law requires that the General Plan contain eight elements: land use, transportation, housing, conservation, open space, noise, safety and environmental justice. Cities may also choose to incorporate additional elements to more directly address other locally significant issues. There must be internal consistency among the elements. In Los Angeles, thirty-five Community Plans, comprise the City’s land use element. In addition, the City has adopted additional non mandated elements in “Framework Element,” discussed below.

## CITYWIDE GENERAL PLAN FRAMEWORK ELEMENT

The City’s General Plan Framework Element is the citywide plan that established the guide for how Los Angeles will grow in the future. Adopted in 1996, the Framework Element is a strategy for long-range growth and development, setting a citywide context for the update of Community Plans and citywide elements. The Framework Element responds to State and Federal mandates to plan for the future by providing goals, policies, and objectives on a variety of topics, such as land use, housing, urban form, open space, transportation, infrastructure, and public services. The Framework Element’s key guiding principles, summarized below, are advanced at the community-level through the Community Plans.

The City's commercial areas serve a variety of roles and functions, from small neighborhood gathering places with local cafes and shops to major job centers and entertainment hubs. Although these areas are typically designated for commercial use, they contain residential and mixed use buildings as well.

## FRAMEWORK ELEMENT GUIDING PRINCIPLES

*Grow strategically.* Should the City's population continue to grow, as is forecasted by the Southern California Association of Governments (SCAG), growth should be focused in a number of higher-intensity commercial and mixed-use districts, centers, and boulevards, particularly in proximity to transportation corridors and transit stations. This type of smart, focused growth links development with available infrastructure and encourages more walkable, transit-friendly neighborhoods, helping to ease our reliance on the automobile, and minimize the need for new, costly infrastructure.

*Conserve existing residential neighborhoods.* By focusing much of the City's growth in centers and along commercial corridors, the City can better protect the existing scale and character of nearby single- and multi-family neighborhoods. The elements that contribute to the unique character of different residential neighborhoods should be identified and preserved whenever possible.

*Balance the distribution of land uses.* Maintaining a variety of land uses is crucial to the long-term sustainability of the City. Commercial and industrial uses contribute to a diverse local economy, while residential uses provide necessary housing for the community. Integrating these uses within smaller geographical areas can better allow for a diversity of housing types, jobs, services, and amenities.

*Enhance neighborhood character through better development standards.* Better development standards are needed to both improve the maintenance and enhancement of existing neighborhood character, and ensure high quality design in new development. These standards are needed for all types of development; residential, commercial, and industrial uses.

*Create more small parks, pedestrian districts, and public plazas.* While regional parks and green networks are an important component of the City's open space strategy, more small-scale, urban open spaces must be developed as well, as they are crucial to the quality of life of the City's residents. There are many opportunities at the community level to create public "pocket" parks as part of new developments, to enhance pedestrian orientation in key commercial areas, and to build well-designed public plazas.

*Improve mobility and access.* The City's transportation network should provide adequate accessibility to jobs, services, amenities, open space, and entertainment, and maintain acceptable levels of mobility for all those who live, work, travel, or move goods in Los Angeles. Attainment of this goal necessitates a comprehensive program of physical infrastructure improvements, traffic systems management techniques, and land use and behavioral changes that reduce vehicle trips. An emphasis should be placed on providing for and supporting a variety of travel modes and users of all ages and abilities, including walking, bicycling, public transit, and driving.

*Identify a hierarchy of commercial districts and centers.* The Framework Element provides an overall structure and hierarchy for the City's commercial areas. This hierarchy, has helped shape the development and urban form of the City and will continue to do so in the future. Understanding this hierarchy helps us better understand the roles that these different types of "activity centers" play within our communities so that their unique characteristics can be enhanced.

## RELATIONSHIP TO MOBILITY PLAN 2035

In 2008, the California State Legislature adopted AB1358, The Complete Streets Act, which requires local jurisdictions to “a plan for a balanced multimodal transportation network that meets the needs of all users of streets, roads, and highways, defines to include motorists, pedestrians, bicyclists, children, persons with disabilities, seniors, movers of commercial goods, and users of public transportation, in a manner that is suitable to the rural, suburban, or urban context.”

Mobility Plan 2035 provides the citywide policy foundation for achieving a transportation system that balances the needs of all road users. As a 2015 update to the City’s General Plan Circulation Element, Mobility Plan 2035 incorporates “complete streets” principles and lays the policy foundation for how future generations of Angelenos interact with their streets.

The City’s transportation system will continue to evolve to fit the context of the time and situation. Today we are faced with environmental constraints, public health issues, regional inequity, and some of the longest, traffic delays in the nation. The way Mobility Plan 2035 addresses these issues through policy initiatives today will set the stage for the way we move in the future.

Mobility Plan 2035 includes goals that are equal in weight and define the City’s high-level mobility priorities. Each of the goals and objectives (targets used to help measure the progress of the Mobility Plan 2035) and policies (broad strategies that guide the City’s achievement of the Plan’s five goals):

- Safety First
- World Class Infrastructure
- Access for All Angelenos
- Collaboration, Communication, and Informed Choices
- Clean Environments & Healthy Communities

These goals represent a confluence of transportation and public health policy that can create opportunities to address the historic inequities in the City that have starkly limited quality of life in low income communities. By placing a citywide emphasis on safety, access, and health, the City can begin to equalize the playing field and first address socioeconomically disadvantaged areas with the highest need to connect people to more prospects of success through mobility.

While the Mobility Plan 2035 provides a citywide approach to enhancing safe, accessible transportation options, the Boyle Heights Community Plan provides the opportunity for more focused and nuanced transportation discussion at the community level. Localized recommendations that complement the citywide policies and address community-specific transportation conditions are described in Chapter 3 of the Boyle Heights Community Plan.

## RELATIONSHIP TO OTHER AGENCY PLANS

There are a variety of non-City agencies and organizations that function within the Boyle Heights Community Plan Area. In varying degrees, these agencies through research and advocacy, guide and influence planning

decisions across a wide spectrum of interests affecting land use within the Community Plan Area. In each case, the community plans and use of land by other agencies must be consistent with the Community Plan in which they are located.

This required consistency holds true for capital improvement programs, development entitlements, and other actions pertaining to the City's physical development. Relevant plans in the Boyle Heights Community Plan include Redevelopment Project Areas, established by the former CRA.

#### *Los Angeles County Metropolitan Transportation Authority (Metro)*

Metro is the state-chartered regional transportation planning and public transportation operating agency for the County of Los Angeles, and is the successor agency to the former Southern California Rapid Transit District. The agency develops and oversees transportation plans, policies, funding programs, and both short-term and long-range solutions that address the County's increasing mobility, accessibility and environmental needs. The Boyle Heights Community Plan Area is home to the Gold (L) Line light rail transit line. The Gold (L) Line currently links East LA to Downtown, Northeast LA and the San Gabriel Valley. Under the Regional Connector project, the Gold (L) Line from East LA and Boyle Heights will connect to the existing Expo (E) Line, creating a through transit line from East LA to Santa Monica. Metro's Connect US Plan, which aims to improve historical and cultural connections in downtown Los Angeles will enhance pedestrian and bicycle travel through and between communities, including Boyle Heights. The Eastside Access Improvement Project, which is part of the Connect US Plan, includes enhancements to improve pedestrian and bicycle access at the Gold Line stations in Boyle Heights. Metro operates the five Metro transit stations in the Boyle Heights Community Plan Area.

#### *Community Redevelopment Agency of Los Angeles, A Designated Local Authority*

The Community Redevelopment Agency (CRA/LA) was established in 1948 pursuant to California State Law (Code Section 33000) to attract private investment into economically depressed communities. Although Assembly Bill ABx1-26 dissolved the Agency in 2012, the land use authorities granted in the Redevelopment Project Area Plans (Redevelopment Plans) remain effective and will continue to be administered by Los Angeles City Planning, consistent with the City Council's September 2019 action to assume the land use authority related to all unexpired Redevelopment Plans. At the time of adoption, the Boyle Heights Community Plan Area includes one unexpired Redevelopment Plan, the Adelante Eastside Redevelopment Plan, which will remain in effect until its expiration in March, 2031.

The Redevelopment Plan for the Project Area was adopted by the Los Angeles City Council on March 24, 1999, in part to preserve the industrial and commercial uses within the community through rehabilitation efforts and new construction of buildings. The approximately 2,200 acre industrial and commercial redevelopment project contains the areas south of Olympic Boulevard to the city limits of Vernon from the Los Angeles River to Indiana Street; North Main Street east to Valley Boulevard and Alhambra Avenue to the city limits of Alhambra; and all east - west commercial streets in Boyle Heights such as Cesar Chavez Avenue, First Street, Fourth Street and Whittier Boulevard from the Los Angeles River to Indiana Street. The purpose of the project is the preservation of industrial and commercial uses within the community to promote a stable industrial base to provide jobs for the community, and enhance the existing shopping areas to provide commercial options for residents. The purpose of the Redevelopment Plan's regulations was generally to encourage economic development and a broad range of employment opportunities, promote the rehabilitation and preservation of historic structures, facilitate a built environment founded in strong urban design principles, provide for various housing needs, and promote the provision of public and social services.

Redevelopment Plans were historically implemented by the Community Redevelopment Agency of the City of Los Angeles (Agency). In 2012, the Dissolution Act (Assembly Bill x1 26) dissolved the Agency, along with all other redevelopment agencies in the State, and the CRA/LA, a Designated Local Authority (DLA), became the successor to the Agency. The DLA's role under the Dissolution Act is to wind down the enforceable financial obligations of the Agency. The DLA also assumed responsibility for administering the still active Redevelopment Plans, including those provisions related to the use and development of land in the Redevelopment Plans area. In November 2019, at the request of the City Council under a provision in State law, all "land use related plans and functions" of the Redevelopment Plans transferred to the City of Los Angeles.

Section 1100 of the Adelante-Eastside Redevelopment Plan states that in the event that an applicable Community Plan is amended so as to change the land uses permitted within the Project Area, the land uses specified for the Project Area in the applicable Community Plan as so amended, shall supersede the land use designations in this Redevelopment Plan.

The Boyle Heights Community Plan, comprehensively updated on \_\_\_\_\_, with its implementing zoning ordinances, includes contemporary land use and zoning strategies to address economic development and a broad range of employment opportunities, promote the rehabilitation and preservation of historic structures, facilitate a built environment founded in strong urban design principles, provide for various housing needs, and promote the provision of public and social services. The Boyle Heights Community Plan, with its implementing ordinances, provides a complete vision and regulatory scheme for the land uses in the Project Area. The provisions of the Redevelopment Plan intended to regulate, control, or shape the use and development of land in the Redevelopment Plan area, including without limitation, Sections 400 through 410, 500 through 522, and 700 as well as related implementing plans that are in conflict with the Boyle Heights Community Plan and its implementing ordinances because they, (1) prohibit what is allowed under the Boyle Heights Community Plan and its implementing ordinances; or (2) allow what is prohibited under the Boyle Heights Community Plan or its implementing zoning ordinances; or (3) add undesirable additional regulations, processes, costs, and burdens on the City, property owners, and developers that impede or prevent beneficial and urgently needed housing and other desirable uses in the Redevelopment Plan area. As such, any provision in the Redevelopment Plan that purports to regulate, control, or shape the development of land in the Project Area, is in conflict with, and does not conform to, the allowed land uses in the Boyle Heights Community Plan.

#### *Los Angeles Unified School District (LAUSD)*

Public schools in the City of Los Angeles are under the jurisdiction of the Los Angeles Unified School District (LAUSD). The LAUSD provides public education for over 900,000 students at 557 schools in eight local districts. The LAUSD is subject to the overview of the State of California Legislature and is entirely independent of the City of Los Angeles' governance. Decision-making and budgeting are done by elected governing boards, and site and construction standards are established by the State Department of Education (Section 39000 of the Government Code).

The LAUSD develops an annual Planning and Development Branch Strategic Execution Plan, which describes goals and progress for school site planning. However, pursuant to State laws, the LAUSD is not required to obtain review of their public school projects from the Department of City Planning prior to obtaining any necessary permits. The LAUSD's estimate of future enrollment levels and school needs is determined through the evaluation of the capacity of each LAUSD school to accommodate the projected future population, and the analysis of school-by-school enrollment trends. In 2000, the LAUSD began a \$20 billion building and modernization program. By 2008, the school district had completed 180 new schools.

The Los Angeles Unified School District currently operates 25 schools in the Boyle Heights Community Plan Area. Of these schools, 20 are elementary, three are middle, and three are high schools. Additionally, since the Charter School legislation was established in 1992, approximately 8 new charter schools have opened in Boyle Heights. While these are privately operated schools, they receive public funds and are considered to be under the jurisdiction of the LAUSD.

### *County of Los Angeles*

2016 LAEDC Bioscience Implementation Plan. Los Angeles County Economic Development Corporation (LAEDC) was founded in 1981 as a nonprofit, public-benefit organization to harness the power of the private sector in collaboration with L.A. County, to guide economic development and create more widely shared prosperity. LAEDC collaborates with all stakeholders in the region including education, business, and government. In 2016, LAEDC completed a biosciences industry growth implementation plan as a commissioned project by the County of Los Angeles. The research, recommendations, and action items contained in the implementation plan facilitate the infrastructure and relationships that are essential to growth of the industry cluster, with the goal of creating greater economic opportunity for residents of L.A. County and Southern California..

### *University of Southern California*

The 2016 USC Health Science Campus Master Plan. serves as the guiding vision for the future of the campus over the next 25 years. It also considers the potential needs for future academic, research and clinical space to properly grow and develop the academic medical center, which includes a medical school, hospitals, clinics, school of pharmacy, and other allied health divisions. The master plan boundaries include Valley Boulevard to the north, Soto Street to the east, Zonal Avenue to the south and Mission Road to the east. Though most of the master plan's geographical boundary overlaps with the Northeast Los Angeles Community Plan, the USC Health Science Campus is immediately adjacent to the Boyle Heights Community Plan and residents actively participate in the outreach process for this master plan as it moves forward.

### *Army Corps of Engineers*

The Los Angeles River Ecosystem Restoration Project, led by the Army Corps of Engineers, includes ecosystem restoration along 11 miles of the Los Angeles River from approximately Griffith Park to downtown Los Angeles while maintaining existing levels of flood risk management. Though the Boyle Heights Community Plan Area boundary stops at the railroad tracks adjacent to the Los Angeles River, the Army Corps of Engineers efforts include outreach and implementation on both sides of the Los Angeles River. One of those plans is the "Los Angeles River Ecosystem Restoration Project - Alternative 20", which is currently an active plan that includes overlap with the Boyle Heights Community Plan boundary. The project will include riparian planting in the channels as habitat corridors, diverting flow into channels, widening tributaries, and possibly removing concrete. The Project focuses on Union Pacific's LA Trailer and Container Intermodal Facility (Also known as "Piggyback Yard"), the last active rail yard spanning 120 acres on the east bank of the river. It seeks to construct a channel through the parcel as a means to divert the main channel flows, wetlands restoration, parkland restoration, and flood detention.

**Boyle Heights Community Plan Implementation Overlay (CPIO)**

**Boyle Heights**  
**Community Plan Implementation Overlay District**  
(Boyle Heights CPIO District)

Ordinance No. \_\_\_\_\_  
Effective Date XXXXX

TABLE OF CONTENTS

Chapter I	Function of the CPIO District
Chapter II	Community Benefits Program Subarea A
Chapter III	Historic Resources Subarea B
Chapter IV	Soil Sampling Subarea C
Chapter V	Public Lands Subarea D
Chapter VI	Inclusionary Zoning Subarea E (Reserved)
Appendix A	Environmental Standards (Reserved)

## **CHAPTER I – FUNCTION OF THE CPIO DISTRICT**

### **Section I-1. BOYLE HEIGHTS CPIO DISTRICT AUTHORITY AND BOUNDARIES**

Pursuant to Los Angeles Municipal Code (LAMC) Chapter 1A Section 8.2.2, the City Council establishes the Boyle Heights Community Plan Implementation Overlay District (Boyle Heights CPIO District). The boundaries of the Boyle Heights CPIO District are contained within the boundaries of the Boyle Heights Community Plan Area (Community Plan Area) as adopted on \_\_\_\_\_(Council File No. \_\_\_\_\_) and shown on Figures 1-4.

**Figure 1.** Subarea A - Community Benefits Program

**Figure 2.** Subarea B – Historic Resources Subarea

**Figure 3. Subarea C – Soil Sampling Subarea**

## **Section I-2. PURPOSE**

The purposes of the Boyle Heights CPIO District are as follows:

- I. To implement the goals and policies of the Boyle Heights Community Plan.
- II. To create development incentives that facilitate the production of affordable housing and are tailored to the neighborhood context.
- III. To encourage mixed-income and affordable housing development and minimize potential residential displacement.
- IV. To create approval processes, including a ministerial administrative clearance process, which enables mixed-income housing infill development that will positively impact communities in conformance with these regulations.
- V. To preserve and protect neighborhood identity, including protecting cultural and historic resources and distinctive character defining elements of existing urban form.
- VI. To ensure safe ground disturbance practices in areas where soil contaminants may exist.

## **Section I-3. SUBAREAS**

The Boyle Heights CPIO District contains four Subareas as shown on Figures 1-4 and as precisely delineated by solid boundary lines on the CPIO District Boundary Maps, attached to the ordinance establishing the Boyle Heights CPIO District. The Subareas consist of contiguous or non-contiguous parcels characterized by common overarching Community Plan themes, goals, and policies, and are grouped by a common boundary. The Subareas are described below.

### **Community Benefits Program Subarea A**

The Community Benefits Program (CBP) Subarea A applies to areas within Boyle Heights that allow multi-unit residential development. Subarea A strives to introduce more affordable housing development wherever multi-unit residential development is allowed. This Subarea includes an incentive structure that prioritizes mixed-income and 100 percent affordable housing. Within the Subarea, unique zones tailor the incentives to the surrounding context, offering greater intensities of height, FAR, and density around fixed rail transit stations and bus corridors.

## **Historic Resources Subarea B**

The purpose of this subarea, which includes neighborhoods that have an abundance of historically and architecturally significant buildings, is to guide the ongoing maintenance and rehabilitation of these structures through an additional level of review.

## **Soil Sampling Subarea C**

The purpose of this subarea, which includes the entirety of the Community Plan Area, is to ensure that soil contaminants are identified and mitigated prior to ground disturbance.

## **Public Lands Subarea D**

The purpose of Subarea D is to support development of community serving uses and affordable housing on publicly owned land.

## **Section I-4. DEFINITIONS**

**100 Percent Affordable Housing.** A project in which 100 percent of the residential dwelling units, excluding any manager unit(s), are Restricted Affordable Units as defined by the LAMC Chapter 1A.

**Demolition.** Throughout the CPIO, site activities that constitute Demolition are defined and determined by the Department of Building and Safety. For the purpose of implementing Chapter III, site activities that include the removal of building components, such that only exterior walls remain is considered Demolition.

**Eligible Historic Resources.** A building, structure, object, site, landscape, or natural feature identified as an individual resource or as a contributor to a historic district under a local, state or federal designation program; or identified as a contributor to an eligible historic district through SurveyLA (The Los Angeles Historic Resources Survey), or another historical resource survey, completed subsequent to the effective date of the CPIO, and completed by a person meeting the Secretary of the Interior's Professional Qualification Standards for Historic Preservation and accepted as complete by the Director, in consultation with the Office of Historic Resources (OHR). This term does not include a non-contributor to an eligible historic district.

**Mixed-income Housing.** A project comprising a mix of market-rate and Restricted Affordable Units.

**Project.** Within Subarea A, a “Project” shall mean any construction, erection, alteration of, or addition to a structure that would exceed the Base Floor Area and Base Height allowances authorized under the subject site’s Form District.

Within Subarea B, a “Project” shall mean any activity that requires the issuance of a building, grading, demolition, or change of use permit on any site that is an Eligible Historic Resource, unless the work consists solely of interior work such as tenant improvements or interior rehabilitation/repair.

Within Subarea C, a “Project” shall mean any activity that involves ground disturbance or requires a grading or excavation permit.

Within Subarea D, a “Project” shall mean any new construction located on a publicly owned lot that requests a transfer of floor area to transfer unused permitted floor area to another legally defined lot located within Subarea D.

Within all Subareas, a “Project” shall also mean the demolition of any habitable structure pursuant to Section I-6.C.4 of this CPIO.

**Rehabilitation.** The act or process of returning a property to a state of utility, through repair or Alteration, which makes possible an efficient contemporary use while preserving those portions or features of the property which are significant to its Historical, architectural and Cultural values.

**Restoration.** The act or process of accurately recovering the form, features and details of a property as it appeared at a particular period of time by means of the removal of later work or by the replacement of missing earlier work.

**Restricted Affordable Unit.** A Dwelling Unit for which rental amounts are restricted so as to be affordable to and occupied by Extremely-Low, Very-Low, or Lower income households, as determined by the Los Angeles Housing Department or its successor agency.

## **Section I-5. RELATIONSHIP TO OTHER ZONING REGULATIONS**

- A. For properties within the boundaries of the Boyle Heights Community Plan, the Citywide Transit Oriented Communities Guidelines (TOC) shall be superseded by the provisions and requirements contained within this ordinance. The incentives contained within this ordinance and LAMC Ch. 1A Sec. 9.3.1 shall act as the TOC Area for those properties located within a one-half mile radius of a Major Transit Stop, as defined in subsection (b) of Section 21195 of the California Public Resources Code. For properties beyond the one-half mile radius of a Major Transit Stop and outlined in the Subarea map below, the Community Benefits Program is available as an optional incentive program for Eligible Housing Developments.

- B. Nothing in the Boyle Heights CPIO District is intended to override or conflict with any regulations in the LAMC or other ordinance establishing a park or Quimby fee or park or open space dedication requirement, including any provisions related to credits or fee and dedication calculations.
- C. Projects providing Restricted Affordable Units to fully utilize the Affordable Housing Local Incentive Program shall be considered exempt from the Affordable Housing Linkage Fee.
- D. Nothing in this Boyle Heights CPIO District is intended to override or conflict with any regulations in the LAMC that would otherwise require a conditional use permit.
- E. Nothing in this Boyle Heights CPIO District is intended to override or conflict with any bicycle parking regulations.
- F. Nothing in this Boyle Heights CPIO District is intended to override or conflict with the regulations set forth in LAMC Chapter 1A 9.2.1 that provide bonuses, waivers, and incentives for certain affordable housing projects. Projects that utilize bonuses, waivers, and incentives under LAMC Chapter 1A 9.2.1 shall not be eligible for the provisions contained within this ordinance.

## **Section I-6. REVIEW PROCEDURES**

- A. **Prohibition of Issuance of DBS Permits Prior to CPIO Approval.** The Department of Building and Safety (DBS) shall not issue a permit for any Eligible Housing Development within a Boyle Heights CPIO subarea (in whole, or in part), that seeks to utilize the bonuses, waivers, and incentives contained herein, unless the Project has been reviewed and approved in accordance with this Section I-6.
- B. **CPIO Approval.** All Projects within a Boyle Heights CPIO District Subarea (in whole or in part) shall obtain an Administrative Clearance to demonstrate compliance with the Boyle Heights CPIO District. Projects within the Boyle Heights CPIO District Subarea A that request only Base Incentives pursuant to LAMC Ch. 1A Sec. 9.3.2.C. shall be considered ministerial and shall not be required to file an application with the Department of City Planning. All Projects within Boyle Heights CPIO District Subarea A that request Additional Incentives under LAMC Ch. 1A Sec. 9.3.2.D shall follow the Procedures in Sec. 9.2.1.1.G.2. An application for a CPIO Approval shall be reviewed and approved pursuant to LAMC Section 13B.3.1(Administrative Review), including as its requirements are modified and supplemented below:
  - 1. **Content of Application for a CPIO Approval.** An applicant shall provide, at a minimum, two sets of detailed permit drawings and any other exhibits deemed necessary to demonstrate compliance with all applicable provisions of the CPIO District.

2. **Administrative Clearance.**

- a. **Director Approval.** The Director shall grant an Administrative Clearance after reviewing the Project and finding that it is in compliance with all applicable provisions of the Boyle Heights CPIO District as indicated by a plan stamped by the Department of City Planning.
- b. **Non-Appealable Ministerial Approval.** The approval of an Administrative Clearance is not subject to appeal and is not discretionary for purposes of CEQA Guidelines Sections 15060(c)(1) and 15268.

3. **Director's Determination.** In addition to the requirements in Section I-6 C.2 above, and LAMC Chapter 1A Section 13.4.5, Projects subject to Subarea B shall file for a Director's Determination. The Director or the Director's designee shall have initial decision-making authority to grant a CPIO Director's Determination, with an appeal to the Area Planning Commission in accordance with the procedures set forth in LAMC Chapter 1A Section 13.4.5.

4. **CPIO Approval Compliance.** No demolition permit shall be issued for any Project unless building permits for a replacement development on the site have been issued, and any necessary land use entitlements have been granted.

- a. Notwithstanding the above this prohibition shall not apply to any structure deemed hazardous by the Department of Building and Safety.
- b. Furthermore, this prohibition shall not apply to structures that are considered uninhabitable.

## **Section I-7. ENVIRONMENTAL STANDARDS PROCEDURES**

The Environmental Standards in Appendix A are included in the Boyle Heights CPIO District to implement the Mitigation & Monitoring Program included as part of the Boyle Heights Community Plan update and reviewed in the City of Los Angeles Boyle Heights Community Plan Environmental Impact Report (Case No. ENV-2016-2906-EIR), certified on XX, XX, XXXX.

Any Project subject to discretionary review within the CPIO Boundaries shall comply with

all applicable Environmental Standards as set forth in Appendix A, subject to the following rules.

- A. **Applicability of Environmental Standards.** A Project does not need to comply with any Environmental Standard that is not relevant to the scope of activities involved with the Project. For example, a Project that proposes only minor façade alterations and no grading shall not be subject to Environmental Standards that apply to grading activities (such as noise and vibration standards). The decision maker, in his or her reasonable discretion, shall determine those Environmental Standards that apply to a particular Project.
- B. **Plans.** Compliance with all applicable Environmental Standards listed in Appendix A shall be demonstrated on the plans as project features (that is, features that are physically built into the Project such as an air filtration system) or as operational features on a sheet within the plans (that is, features that are carried out either during the construction of the Project, or over the life of the project, such as the use of paints, sealants, and other building materials that yield low air pollutants).
- C. **Modification of Environmental Standards.** Modifications of Environmental Standards do not require the processing of a CPIO Adjustment or CPIO Exception. The Director (or appeal body on appeal) may modify or not require an Environmental Standard listed in Appendix A for any Project when: (1) the Director finds in writing, based upon substantial evidence, the Environmental Standard is not necessary to mitigate an impact, including because of the existence of a similar or more effective regulation that applies to the Project; (2) the City complies with CEQA Guidelines, Section 15162, including by preparing an addendum or subsequent environmental clearance to the Boyle Heights Community Plan EIR to analyze the impacts from the modifications to the Environmental Standards; or (3) the City prepares a new CEQA clearance for the Project. No CPIO Approval shall be issued for a Project with a modified Environmental Standard until this subsection has been complied with. The modification of an Environmental Standard is not independently appealable unless an appeal of an entitlement or CEQA determination is otherwise available through this CPIO District, the LAMC, or CEQA.

## **Section I-8. CEQA CLEARANCE**

For purposes of CEQA compliance for subsequent projects approved with a CPIO Approval, including, but not limited to, consideration of a CEQA clearance pursuant to Government Code Section 65457, Public Resources Code Section 21155.4; or CEQA Guidelines, Sections 15183 or 15183.3, the Boyle Heights CPIO District shall operate and be treated as a specific plan, zoning ordinance, and a prior plan level decision for which and EIR was certified.

## **Section I-9. SEVERABILITY**

If any portion, subsection, sentence, clause or phrase of this ordinance is for any reason held by a court of competent jurisdiction to be invalid, such a decision shall not affect the validity of the remaining portions of this ordinance. The City Council hereby declares that it would have passed this ordinance and each portion or subsection, sentence, clause and phrase herein, irrespective of the fact that any one or more portions, subsections, sentences, clauses or phrases be declared invalid.

## CHAPTER II – COMMUNITY BENEFITS PROGRAM SUBAREA

### COMMUNITY BENEFITS PROGRAM SUBAREA

#### A – BOYLE HEIGHTS COMMUNITY BENEFITS PROGRAM SUBAREA A

##### OVERVIEW

The Community Benefits Program (CBP) Subarea, shown on Figure I, strives to introduce more affordable housing development throughout the Plan Area. This Subarea includes a tiered incentive structure that prioritizes mixed-income and 100 percent affordable housing and seeks to ensure replacement units on the project site. Within the Subarea, unique zones tailor the incentives to the surrounding context, offering greater height, FAR, and density incentives around fixed rail transit stations and bus corridors.

## **Section II. LOCAL AFFORDABLE HOUSING INCENTIVE PROGRAM**

**II – 1.** For properties within the boundaries of the Boyle Heights Community Plan, where this CPIO District applies, optional development incentives are available for Eligible Housing Developments that meet the requirements outlined in LAMC Ch. 1A Sec. 9.3.1. Within the boundaries of the Boyle Heights Community Plan, the Citywide Transit Oriented Communities (TOC) Guidelines shall be superseded by the provisions and requirements contained within this ordinance.

**II – 2. ELIGIBILITY.** A Housing Development shall be eligible for Local Affordable Housing Incentives Pursuant to Sec. 9.3.2. within Subarea A of the CPIO if it meets all of the following requirements:

1. **On-Site Restricted Affordable Units.** Within the boundaries of the Boyle Heights CPIO District Community Benefits Program Subarea A, a Housing Development shall provide On-Site Restricted Affordable Units at levels outlined in **Set B** of LAMC Ch. 1A 9.3.2. The minimum number of On-Site Restricted Affordable Units shall be calculated based upon the total number of units in the final project.
2. **Dwelling Unit Mix and Location.** For projects located in Subarea A, a minimum of 30% of the dwelling units for an Eligible Housing Development shall be two bedrooms or larger, and HCID shall determine the location of the restricted affordable units within the development.

**II – 3. Base Incentives.** An Eligible Housing Development that meets the requirements outlined in Section II. above shall be eligible for the Base Incentives for **Set B** established in LAMC Ch. 1A 9.3.2.C. Projects utilizing Base Incentives only shall follow the procedures in Section I-6.C. of this ordinance.

1. For properties located within Subarea A, a Housing Development shall be eligible for a 75% decrease in the required parking for residential uses, as outlined in Ch. 1A 9.3.2.C.4.a.

**II – 4. Additional Incentives.** In addition to the applicable Base Incentives, an Eligible Housing Development that meets the requirements outlined in Section II. above may be granted up to three (3) of the additional incentives listed in LAMC Ch. 1A 9.3.2.D by following the procedures in LAMC Ch. 1A 9.3.3.D

# CHAPTER III – HISTORIC PRESERVATION SUBAREA

## HISTORIC PRESERVATION SUBAREA

### **B – HISTORIC PRESERVATION SUBAREA B**

#### OVERVIEW

The purpose of this subarea, which includes neighborhoods that have an abundance of historically and architecturally significant buildings, is to maintain the eligibility of individual historic resources and historic districts, and guide the ongoing maintenance and rehabilitation of these structures.

**III – 1. Eligible Historic Resource Evaluation.** Prior to any other CPIO Approval being issued, a Project in this subarea that involves an Eligible Historic Resource shall comply with the following review procedures:

**A. Non-Demolitions.** For any Project that does not involve the demolition of an Eligible Historic Resource, no CPIO Approval shall be issued until one of the following occurs:

- i. The Director, in consultation with the Office of Historic Resources, determines, based upon substantial evidence, that the Eligible Historic Resource is not an historical resource, as defined by Public Resources Code Section 21084.1; or,
- ii. The Director, in consultation with the Office of Historic Resources, determines, based upon substantial evidence, that the Project is consistent with the Secretary of Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings; or,
- iii. A Director's Determination pursuant to Section I-6.C.3 of this CPIO, and Environmental review in compliance with CEQA was completed for the Project, including if necessary, the adoption of a statement of overriding considerations.

**B. Demolitions.** For any Project that involves the demolition of an Eligible Historic Resource, no CPIO Approval shall be issued until one of the following occurs:

- i. The Director, in consultation with the Office of Historic Resources, determines, based upon substantial evidence, that the Eligible

Historic Resource is not an historical resource, as defined by Public Resources Code Section 21084.1; or

- ii. A Director's Determination pursuant to Section I-6.C.3 of this CPIO, and, Environmental review in compliance with CEQA was completed on the Project, including if necessary, the adoption of a statement of overriding considerations.
  - a. No Director's Determination shall be issued for Demolition or removal of any building or structure, within a National Register Historic District, within Subarea B, that is designated as a Contributing Element, and the application shall be denied unless the Owner can demonstrate to the Director that the owner would be deprived of all economically viable use of the property. In making its determination, the Director shall consider any evidence presented concerning the following:
    - 1. An opinion regarding the structural soundness of the structure and its suitability for continued use, renovation, Restoration or Rehabilitation from a licensed engineer or architect who meets the Secretary of the Interior's Professional Qualification Standards as established by the Code of Federal Regulation, 36 CFR Part 61. This opinion shall be based on the Secretary of the Interior's Standards for Architectural and Engineering Documentation with Guidelines;
    - 2. An estimate of the cost of the proposed, demolition, and replacement project and an estimate of the cost that would be incurred to execute a Secretary of the Interior's Standards for Rehabilitation alternative to the project, as identified in a Project Environmental Impact Report (EIR), or in the absence of an EIR, when appropriate under CEQA, as identified by the Director of Planning in consultation with the Cultural Heritage Commission or its designee;
    - 3. An estimate of the market value of the property in its current condition; after completion of the proposed Demolition and replacement project; and after any expenditure necessary to execute a Secretary of the Interior's Standards for

Rehabilitation alternative to the project, as identified in a Project Environmental Impact Report (EIR), or in the absence of an EIR, when appropriate under CEQA, as identified by the Director of Planning in consultation with the Cultural Heritage Commission or its designee;

4. An estimate from architects, developers, real estate consultants, appraisers, or other real estate professionals experienced in Rehabilitation as to the economic feasibility of Restoration, renovation or Rehabilitation of any existing structure or objects. This shall include tax incentives and any special funding sources, or government incentives which may be available.

**C. CEQA Review for Eligible Historic Resources.** In complying with this Section III-I, if at any time the Director, in consultation with the Office of Historic Resources, determines the Eligible Historic Resource is not a historical resource as defined by Public Resources Code Section 21084.1, approval of the Project (involving no other discretionary approvals) shall be a ministerial approval for purposes of CEQA, including CEQA Guidelines, Section 15268.

# CHAPTER IV – SOIL SAMPLING SUBAREA

## SOIL SAMPLING SUBAREA

### **C – Soil Sampling Subarea C**

#### OVERVIEW

The purpose of Subarea C is to facilitate cleanup of contaminated soils and minimize public health risk by requiring soil sampling for projects that include ground disturbance. Any project within this Subarea is subject to soil sampling prior to ground disturbance to reduce health impacts to Boyle Heights residents.

**IV – 1. Eligibility.** Any project conducting excavation, grading, or other types of ground or soil disturbance must conduct a soil test to determine if elevated levels of lead or arsenic are present.

**IV – 2. Clearance.** Prior to building permit issuance, soil test results must be provided to Building & Safety demonstrating that elevated levels of lead or arsenic are not present.

**IV – 3.** If elevated levels of lead or arsenic are present, the project must comply with any requirements from LADBS and coordinate with other agencies as necessary.

# CHAPTER V – PUBLIC LANDS SUBAREA

## PUBLIC LANDS DEVELOPMENT STANDARDS SUBAREA

### **D – Public Lands Development Standards Subarea D**

#### OVERVIEW

The purpose of **Subarea D** is to regulate development on publicly owned lands and allow for floor area to be transferred between publicly-owned properties in the Community Plan Area, to support and facilitate public serving uses and affordable housing.

**V – 1. Transfer of Floor Area.** Any owner(s) of a legally defined lot located within Subarea D may transfer unused permitted floor area to another legally defined lot within Subarea D, pursuant to the procedures of this section.

- A. Floor Area.** Total floor area in the Public Lands Subarea D shall not exceed 3.0:1 FAR and no individual site shall exceed 4.0:1 FAR through a transfer of floor area.
- B. Limitation.** Any project constructed with transferred floor area must comply with all regulations set forth in this Subarea.
- C. Procedures.** Projects seeking the transfer of unused permitted floor area, within the floor area cap, shall apply for an Administrative Clearance pursuant to the provisions of Section I-6 C.2 of this CPIO.

## Chapter VI – Mandatory Inclusionary Zoning Subarea

### MANDATORY INCLUSIONARY ZONING SUBAREA

#### **E – Mandatory Inclusionary Zoning Subarea E**

[RESERVED]

# APPENDIX A – ENVIRONMENTAL STANDARDS

## OVERVIEW

As described in Section I-7 of the CPIO District, these Environmental Standards are included to implement the Mitigation & Monitoring Program included as part of the Boyle Heights Community Plan update and reviewed in the Boyle Heights Environmental Impact Report (Case No. ENV-2016-2906-EIR), certified by the City Council.

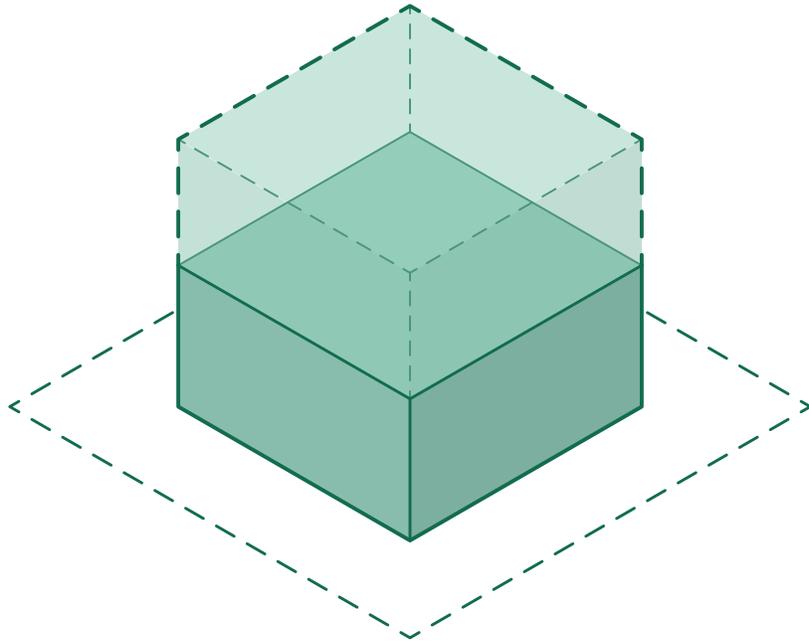

In addition to Projects in Subareas that are required to comply with these Environmental Standards, any other discretionary project in the boundaries of the Boyle Heights Community Plan Area that seeks to rely on the Boyle Heights EIR for its CEQA clearance (including through tiering, preparing an addendum, supplemental EIR or a statutory infill exemption), may incorporate or impose the following Environmental Standards on the project. Compliance may be achieved through covenant, conditions, plan notations, or other means determined reasonably effective by the Director of Planning or the decision-maker.

## DIV. 2A.1. **ORIENTATION**

### SEC. 2A.1.1. **RELATIONSHIP TO ZONE STRING**

A zone string is composed of the following districts:

The Form District is a separate and independent component of each zone.

### SEC. 2A.1.2. **HOW TO USE ARTICLE 2 (FORM)**

#### A. **Identify the Applied Form District**

The first component in a zone string identifies the Form District applied to a property.

#### B. **Form District Standards**

Form Districts standards are outlined in *Part 2B. (Form Districts)*. Each Form District page identifies the standards specific to that Form District.

#### C. **Interpreting Form District Standards**

Each standard on a Form District page in *Part 2B. (Form Districts)* provides a reference to *Part 2C. (Form Rules)* where the standard is explained in detail.

Form Rule Category Not Applicable (Div. 2C.5.) → [F] Building width (max)

Learn More About Your Rules

## Part 2C (Form Rules)

Form Rule Category

Form Standard → **DIV. 2C.6. BUILDING MASS**

SEC. 2C.6.1. **BUILDING WIDTH**

The maximum allowed width of any building or collection of buildings on a lot.

**A. Intent**

To promote fine-grained patterns of development and prevent long buildings that are significantly out of context with traditional patterns, by breaking wide buildings into multiple, clearly distinguished building widths and encourage larger projects to provide open space for pedestrians and recreation.

**B. Applicability**

- Building width requirements apply to all frontage lot line-facing buildings or structures on a lot.
- Building width requirements apply only to portions of buildings or structures located above the ground floor elevation.
- Building width requirements do not apply to exceptions listed in Sec. 2C.6.3.F (Exceptions).

**C. Measurement**

Building width is measured horizontally and parallel to each street lot line from one end of an applicable building or collection of buildings to the opposite end.

## SEC. 2A.1.3. **FORM DISTRICT GRAPHICS**

### A. **General**

Illustrations and graphics are included in Article 2 (Form) only to assist users in understanding the intent and requirements of the text. In the event a conflict occurs between the text of Article 2 (Form) and any illustration or graphic, the text prevails.

### B. **Lot Parameter Graphics**

#### 1. **Lot Boundary**

This line represents the perimeter of the subject lot, serving as a reference for both lot area and lot width.

#### 2. **Buildable Area**

This shape represents the area on a lot where buildings are allowed, reduced by required building setbacks, or the lot boundary when no setback is required.

#### 3. **Building Setbacks**

The area between a lot boundary and the minimum required setback, represented with a dotted white line and bounded by the buildable area.

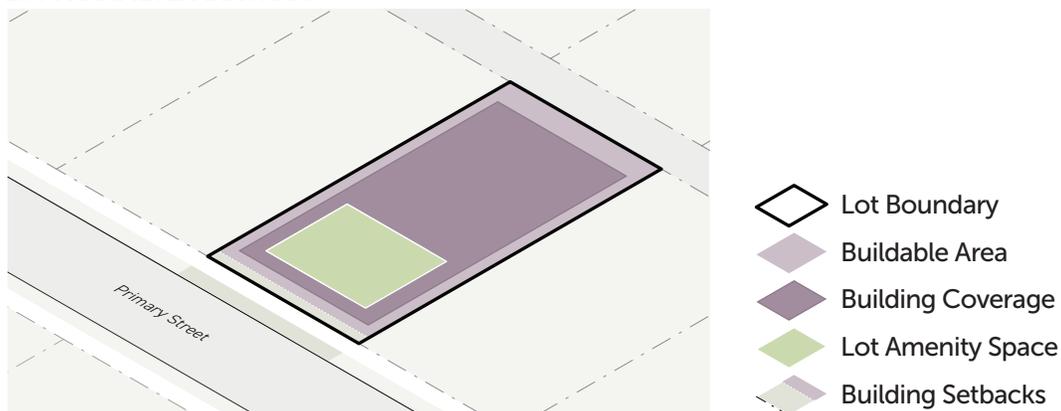

#### 4. **Building Coverage**

This shape represents the total building coverage allowed in proportion to the lot area, but does not reflect any requirement as to the location or configuration of any buildings or structures.

#### 5. **Lot Amenity Space**

This shape represents the total lot amenity space required in proportion to the lot area, but does not reflect any requirement as to the location or configuration of any amenity space.

**LOT PARAMETER DIAGRAM**

## C. Bulk and Mass Graphics

### 1. General

- a. Bulk and mass graphics represent the volume where a building is allowed to be located by showing the maximum height allowed for the entire buildable area. The volume does not represent the massing of an allowed building. Other standards, such as maximum building coverage and floor area ratio (FAR), may limit the ability for a building to fill the full volume.
- b. Form Districts that include a maximum height standard and those that do not include a height limit are represented differently in the bulk and mass diagram.

### 2. Districts with a Maximum Height Standard

#### a. Maximum Bonus Height

Maximum bonus height represents the maximum number of stories allowed beyond the number of stories allowed by the maximum base height in stories.

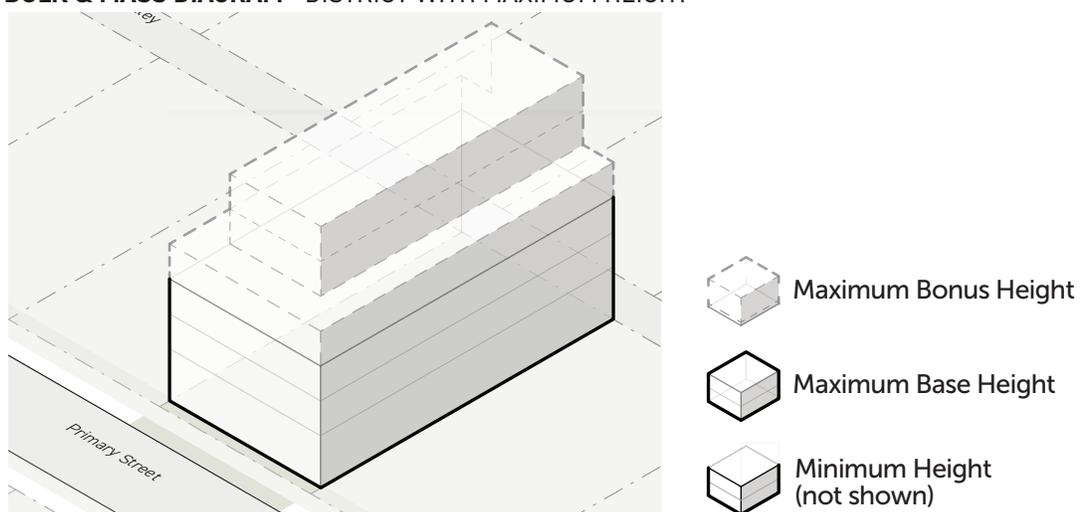

#### b. Maximum Base Height

Maximum base height represents the number of stories allowed without providing public benefits in trade for additional height according to *Article 9 (Public Benefit Systems)*.

#### c. Minimum Height

Minimum height represents the lowest number of stories required.

**BULK & MASS DIAGRAM - DISTRICT WITH MAXIMUM HEIGHT**

### 3. Districts with no Maximum Height Standard

#### a. Unlimited Height

This volume represents the building height allowed, in addition to the likely height of the building based on maximum Base FAR.

#### b. Likely Height Based on Bonus FAR

This volume represents the likely building height based on the maximum allowed Bonus FAR, in addition to the likely height of the building based on maximum Base FAR.

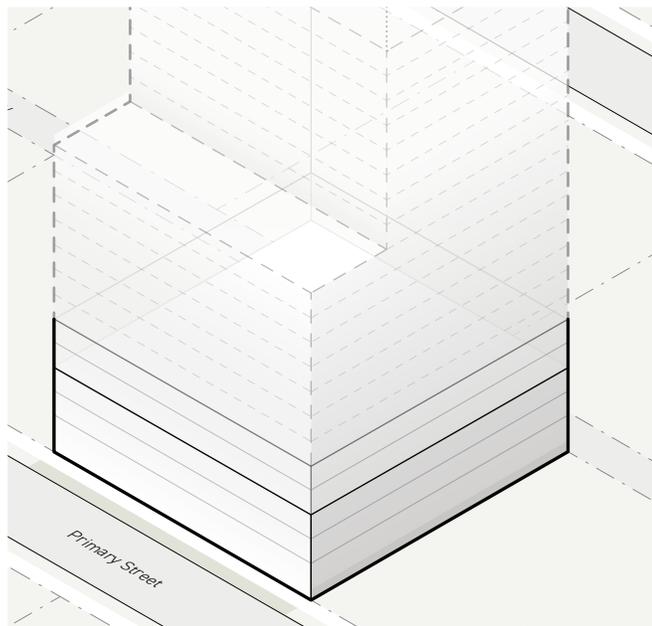

#### c. Likely Height Based on Base FAR

This volume represents the likely building height based on the maximum allowed Base FAR, in addition to the minimum required height of the building.

#### d. Minimum Height

This volume represents the minimum number of stories required.

**BULK & MASS DIAGRAM - DISTRICT WITHOUT HEIGHT LIMIT**

-  Unlimited Height
-  Likely Height based on Bonus FAR
-  Likely Height based on Base FAR
-  Minimum Height

## SEC. 2A.1.4. **FORM DISTRICT NAMING CONVENTION**

There are three different types of naming conventions for Form Districts. Each Form District name is composed of a variety of components that are specific to that district.

### A. **Rural and Estate Form Districts**

[Reserved]

### B. **House Form Districts**

[Reserved]

### C. **All Other Form Districts**

All other Form District names are composed of three components:

#### 1. **FAR Category**

The first component of each Form District name is a floor area ratio (FAR) category. FAR categories group all districts within a range of maximum allowed FAR. FAR categories are organized as follows:

- a. Very Low-Rise (>0.65-1.5 FAR)
- b. Low-Rise (>1.5-4.0 FAR)
- c. Mid-Rise (>4.0-6.0 FAR)
- d. Moderate-Rise (>6.0-8.5 FAR)
- e. High-Rise (>8.5-13.0 FAR)

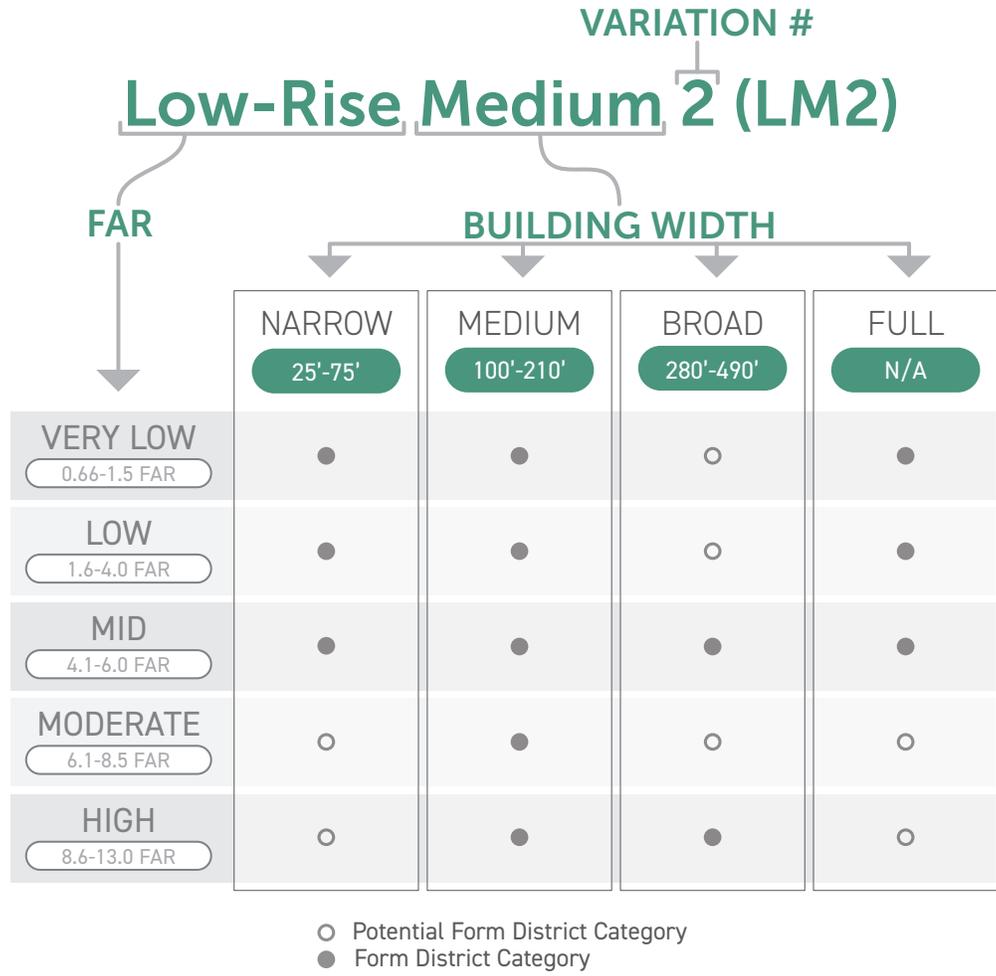

#### 2. **Building Width Category**

The second component of each Form District name is a building width category. Building Width categories group all districts within a range of maximum allowed building width. Each building width category are organized as follows:

- a. Narrow (25'-75')
- b. Medium (100'-210')
- c. Broad (280'-490')
- d. Full (no building width maximum)

#### 3. **Variation Number**

The last component of each Form District is a variation number. All Form Districts are numbered in the order they fall within Article 2 (Form).

## DIV. 2A.2. **OPENING PROVISIONS**

### SEC. 2A.2.1. **FORM INTENT**

The intent of Article 2 (Form) is to regulate the placement, scale, and intensity of buildings and structures on a lot in order to ensure building forms are compatible with their context and promote projects that support community goals.

### SEC. 2A.2.2. **FORM APPLICABILITY**

#### A. **General**

All projects filed after the effective date of this Zoning Code (Chapter 1A.) shall comply with the Form District standards in Article 2 (Form), as further specified below. For vested rights, see *Sec. 1.4.5. (Vested Rights)*, and for continuance of existing development, see *Sec. 1.4.6. (Continuance of Existing Development)*.

#### B. **Project Activities**

- Categories of Form rules apply to a projects based on what types of project activities are proposed, as shown in the table below. Typically, more than one project activity will apply to a proposed project (for example, an addition that expands an existing use includes both new construction and a use modification).

FORM RULE CATEGORIES		PROJECT ACTIVITIES								
		New Construction	Major Demolition	Lot Modification	Site Modification	Facade Modification	Use Modification	Temporary Use	Renovation	Maintenance & Repair
<i>Div. 2C.1.</i>	<b>Lot Size</b>	○	○	●	○	○	○	○	○	○
<i>Div. 2C.2.</i>	<b>Coverage</b>	●	○	●	○	○	○	○	○	○
<i>Div. 2C.3.</i>	<b>Amenity</b>	●	○	●	●	○	●	○	○	○
<i>Div. 2C.4.</i>	<b>Floor Area Ratio &amp; Height</b>	●	●	●	○	○	○	○	○	○
<i>Div. 2C.5.</i>	<b>Upper-Story Bulk</b>	●	●	○	○	○	○	○	○	○
<i>Div. 2C.6.</i>	<b>Building Mass</b>	●	○	○	○	○	○	○	○	○

● = Rules generally apply to this project activity  
 ○ = Rules are not applicable

- Project activities are defined in *Sec. 14.1.15. (Project Activities)*.
- Where a category of Form rules are listed as generally applicable in the table above, and the applied *Form District (Part 2B)* provides standards in that Form rule category, the project activity shall meet all applicable Form standards within that Division. This general applicability

may be further specified for each standard in the applicability provisions in *Part 2C. (Form Rules)*. Project applicability may also be modified by *Article 12. (Nonconformities)*. Where a category of Form rules is listed as not applicable in the table above, no standards from that Form rule category apply to the project activity.

### C. **Applicable Components of Lots, Buildings, and Structures**

1. Form Districts apply to all portions of a lot.
2. Form Districts apply to all portions of buildings and structures on a lot.
3. Specific Form standards and rules may further limit which components of buildings, structures and lots are required to comply with the rules in *Part 2C. (Form Rules)*.

### D. **Nonconformity**

*Article 12. (Nonconformity)* provides relief from the requirements of *Article 2 (Form)* for existing lots, site improvements, buildings, structures, and uses that conformed to the zoning regulations, if any, at the time they were established, but do not conform to current district standards or use permissions. No project activity may decrease conformance with any Form District standard unless otherwise specified by *Division 12.2. (Form)*. Consider the following examples:

1. An addition to the side of an existing building: Where a proposed addition increases the total building width beyond the maximum building width allowed by the applied Form District, the addition is not allowed.
2. An addition to the top of an existing building: Where the height of the existing structure does not meet the street step-back standard specified by the applied Form District, all additional floor area shall be located behind the minimum step-back, but no modifications to the existing upper stories are required.

## DIV. 2C.1. **LOT SIZE**

### SEC. 2C.1.1. **LOT AREA**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

### SEC. 2C.1.2. **LOT WIDTH**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

## SEC. 2C.1.3. **SUB-LOT AREA**

*The total area within the boundaries of a sub-lot.*

### **A. Intent**

To ensuring lots are large enough to accommodate automobile parking and provide a semi-public ground story pedestrian access to promote walkability, activate semi-public spaces, and support personalization and community.

### **B. Applicability**

Minimum sub-lot area requirements apply to all sub-lots that include a dwelling unit within a small lot subdivision.

### **C. Standards**

No sub-lot may have an area less than the minimum specified in the applied Alternate Typology (Part 7B).

### **D. Measurement**

1. Sub-lot area is measured as the total area within the boundary of a sub-lot, measured horizontally.
2. Sub-lot area includes all portions of a lot allocated for required easements.
3. Sub-lot area includes all shared access easements.
4. Sub-lot area does not include portions of a lot required for land dedication with the exception of required street corner dedications and dedications for street widening according to Sec. 10.1.8. (Lots Affected By Street Widening).

### **E. Exceptions**

Where no motor vehicle use areas are provided within the boundaries of a sub-lot, the minimum sub-lot area may be reduced to 450 square feet.

### **F. Relief**

A reduction in required sub-lot area may be requested as a variance in accordance with Sec. 13B.5.3. (Variance).

## SEC. 2C.1.4. **SUB-LOT WIDTH**

*The horizontal dimension of a sub-lot along a street lot line or a shared pedestrian accessway.*

### A. **Intent**

To ensuring lots are large enough to accommodate automobile parking and provide a semi-public ground story pedestrian access to promote walkability, activate semi-public spaces, and support personalization and community.

### B. **Applicability**

Minimum sub-lot width requirements apply to all sub-lots that include a dwelling unit within a small lot subdivision.

### C. **Standards**

No sub-lot may have a width less than the minimum specified in the applied Alternate Typology (Part 7B).

### D. **Measurement**

1. Where a sub-lot abuts a frontage lot line, sub lot width is measured following the geometry of the frontage lot line.
2. Where a sub-lot does not abut a frontage lot line, sub lot width is measured as the narrowest horizontal dimension of the sub-lot.
3. Sub-lot area includes all shared access easements.

### E. **Exceptions**

Where no motor vehicle use areas are provided within the boundaries of a sub-lot, the minimum sub-lot area may be reduced to 450 square feet.

### F. **Relief**

A reduction in required sub-lot area may be requested as a variance in accordance with Sec. 13B.5.3. (Variance)

## DIV. 2C.2. **COVERAGE**

### SEC. 2C.2.1. **BUILDING COVERAGE**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

### SEC. 2C.2.2. **BUILDING SETBACKS**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

## DIV. 2C.3. **AMENITY**

### SEC. 2C.3.1. **LOT AMENITY SPACE**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

## DIV. 2C.4. **FLOOR AREA RATIO & HEIGHT**

Portions of this Division displayed in grey text are being introduced Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU.

### SEC. 2C.4.1. **FLOOR AREA RATIO (FAR)**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

*The measurement of the total floor area of all buildings on a lot in relation to the size of the lot.*

#### A. **Intent**

To regulate the bulk and massing of buildings on a lot.

#### B. **Applicability**

Floor area ratio standards apply to all portions of a lot, and all buildings and structures located on a lot, provided the area counts as floor area according to *Sec. 14.1.7. (Floor Area)*.

#### C. **Standards**

##### 1. **Base**

A lot shall not exceed the maximum base floor area ratio without meeting the requirements of an incentive program outlined in *Article 9. (Public Benefit Systems)*.

##### 2. **Bonus**

A lot may exceed the base floor area ratio up to the maximum bonus floor area ratio for projects participating in a community benefits program, pursuant to *Div. 9.3. (Community Benefits Program)*. Projects participating in other incentive programs intended to implement State law, including Density Bonus (*Sec. 9.2.1.*), the Permanent Supportive Housing Incentive Program (*Sec. 9.4.1.*), or the Accessory Dwelling Unit Incentive Program (*Sec. 9.5.1.*), may only exceed the maximum bonus floor area of the applied Form District if they meet the eligibility and program requirements needed to qualify for additional benefits beyond the established maximum bonus floor area.

#### D. **Measurement**

1. Floor area ratio is calculated by dividing the total floor area on a lot by the lot area.
2. For the measurement of floor area, see *Sec. 14.1.7. (Floor Area)*.
3. For the purpose of calculating FAR, portions of a lot designated for private streets may be counted as lot area. For the measurement of lot area, see *Sec. 2C.1.1. (Lot Area)*.
4. For the purpose of calculating FAR, lot area is the same as buildable area referred to in *Section 104(e) (Floor Area Restriction) of the City of Los Angeles Charter*.

5. The Downtown Community Plan Implementation Overlay (CPIO) may define and measure buildable area differently than outlined in *Sec. 2C.4.1.* for the purpose of calculating the maximum floor area using bonus FAR.

## E. Relief

1. Additional FAR may be requested as a variance in accordance with *Sec. 13B.5.3. (Variance)*.
2. For projects that include multiple parcels having different applied *Form Districts (Part 2B)*, floor area averaging across the development site may be requested, in accordance with *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*.

### a. Supplemental Findings

In addition to the findings in *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also find that the project meets the following conditions:

- i. The project meets the definition of unified development,
- ii. All lots included in the project have a *Commercial-Mixed (Div. 5B.6.)*, *Commercial (Div. 5B.7.)*, *Industrial-Mixed (Div. 5B.8)*, or *Industrial Use Districts (Div. 5B.9.)* applied, or the project is located entirely in the Downtown Community Plan Area and all lots included in the project have a *Residential-Mixed (Div. 5B.5.)*, *Commercial-Mixed (Div. 5B.6.)*, *Commercial (Div. 5B.7.)*, *Industrial-Mixed (Div. 5B.8)*, or *Industrial Use Districts (Div. 5B.9.)* applied.
- iii. Where any individual lot exceeds the maximum floor area ratio specified by the applied *Form District (Part 2B)*, the total floor area across all lots included in the unified development shall not exceed the sum of the maximum floor areas allowed across all lots as calculated based on the maximum floor are ratio specified by each applied *Form District (Part 2B)*.

### b. Supplemental Procedures

If the Zoning Administrator approves floor area averaging, then the applicants shall file a covenant running with the land with the Department of Building and Safety, prior to the issuance of any building permits, that specified the following:

- i. The operation and maintenance of the development as a unified development is continued into perpetuity;
- ii. The floor area used and the remaining unbuilt floor area, if any, is allocated to each lot;
- iii. The unifying design elements are maintained and continued into perpetuity; and
- iv. An individual or entity is specified to be responsible and accountable for compliance and the fee for the annual inspection of compliance by the Department of Building and Safety, required pursuant to *LAMC Sec. 19.11. (Annual Inspection of Compliance with Floor Area Ratio Averaging and Residential Density Transfer Covenants)*.

## DIV. 2C.6. **BUILDING MASS**

Portions of this Division displayed in grey text are being introduced Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU.

## SEC. 2C.6.1. BUILDING WIDTH

*The horizontal dimension of any building or collection of abutting buildings on a lot.*

### A. Intent

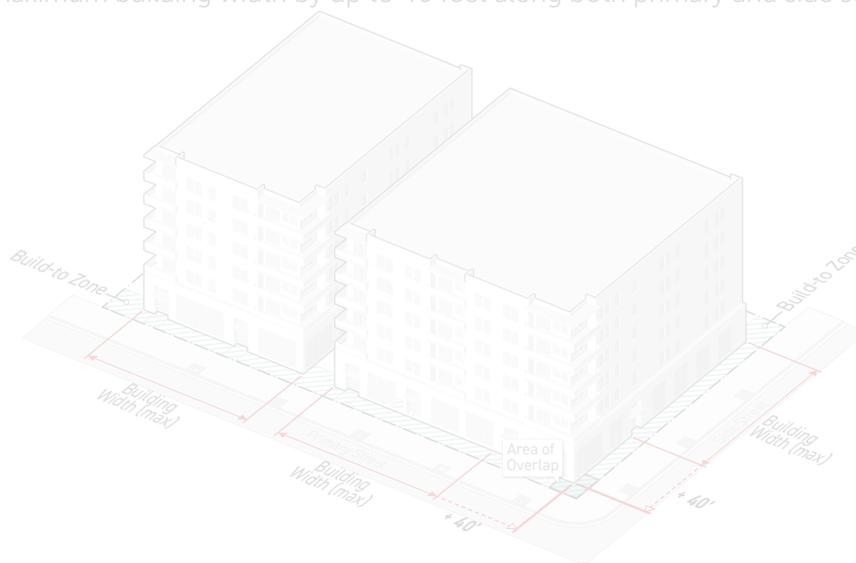

1. To promote fine-grained patterns of development and prevent long buildings that are significantly out of context with traditional patterns by breaking wide buildings into multiple, clearly distinguished building widths.
2. To encourage larger projects to provide open space for pedestrians and recreation.

### B. Applicability

1. Building width requirements apply to all frontage lot line-facing buildings or structures on a lot.
2. Building width requirements apply only to portions of buildings and structures located above the ground floor elevation.
3. Building width requirements do not apply to exceptions listed in *Sec. 2C.6.1.F. (Exceptions)*.

### C. Standards

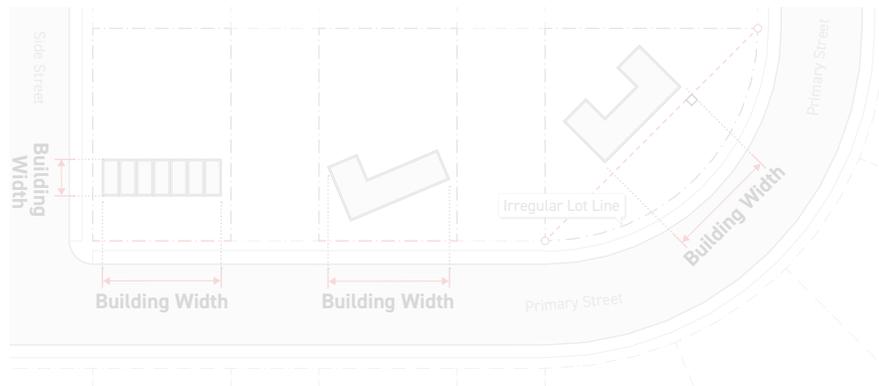

1. No applicable building or collection of abutting buildings located on the same lot shall be wider than the maximum building width specified by the applied *Form District (Part 2B)*.
2. Buildings that are located on separate lots, share no interior circulation, and are structurally independent, are considered separate buildings for the purpose of measuring building width.
3. Buildings located on different *sub-lots*, within the same *Small Lot Subdivision (Div. 7B.3.1.)*, that are separated by less than 6 feet are considered part of the same building for the purpose of measuring building width.
4. A building on a corner lot within the build-to zone area of overlap is allowed to exceed the maximum building width by up to 40 feet along both primary and side street lot lines.

4. In order to establish buildings on the same lot as separate buildings for the purpose of measuring maximum building width, a building break meeting the standards in Sec. 2C.2.6.1.E. (*Building Break*) shall be provided between the buildings.

## D. Measurement

1. Building width is measured horizontally and parallel to each primary street lot line and side street lot line from one end of an applicable building or collection of abutting buildings to the opposite end.

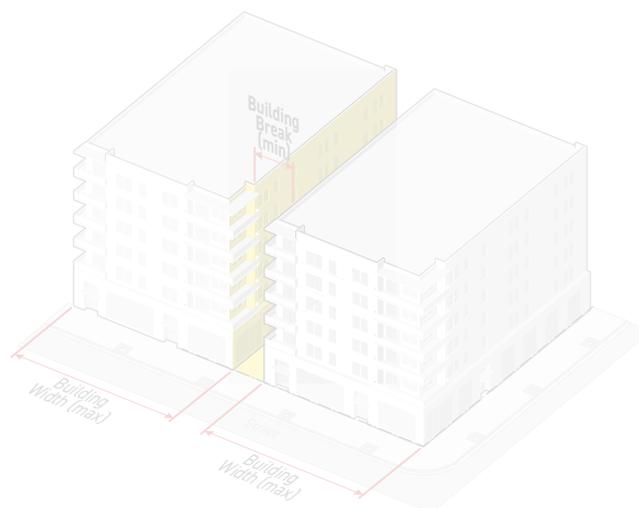

2. For frontage lot line-facing, see Sec. 14.1.6. (*Facing*).
3. For measuring building width on irregular lot lines, see Sec. 14.1.14. (*Parallel or Perpendicular to irregular Lot line*).

## E. Building Break

### 1. Standards

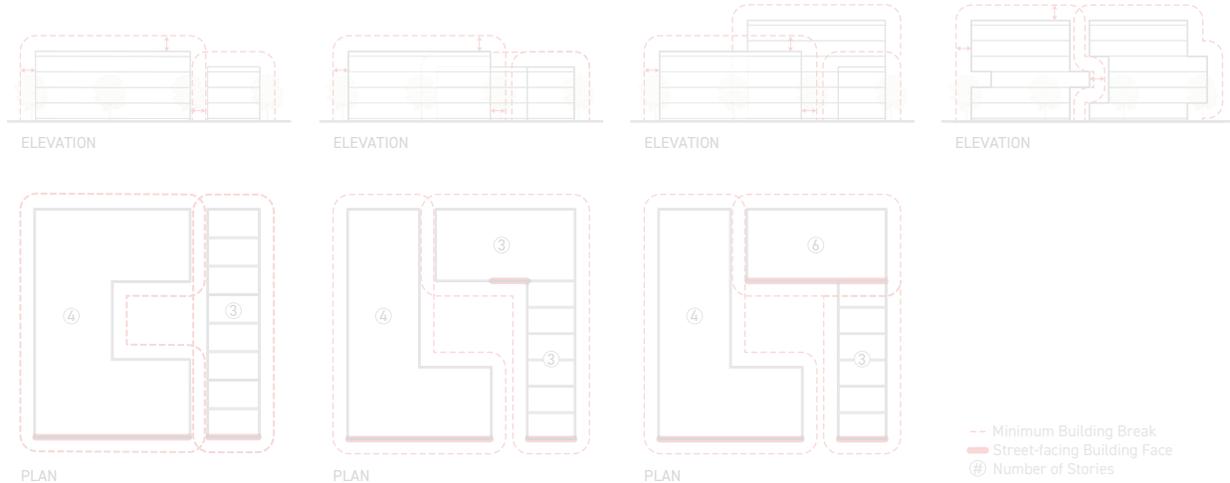

- a. All buildings and collections of abutting buildings located on the same lot shall be separated by at least the minimum building break dimension in order to establish them as separate buildings for the purpose of measuring building width.
- b. No building or structure shall encroach into the building break, except where allowed in Sec. 2C.6.1.F. (*Exceptions*).

- Building Mass -

## 2. Measurement

A building break is measured perpendicular to the outermost surface of each applicable portion of a building both vertically and horizontally.

## F. Exceptions

### 1. Encroachments

The following are allowed to encroach into the building break, as listed below:

ALLOWED HORIZONTAL ENCROACHMENTS	
<b>Architectural Details (Sec. 14.15.A.1.a.)</b>	
Encroachment (max)	2'
Clear width (min)	3'
<b>Roof Projections (Sec. 14.15.A.1.b.)</b>	
Encroachment (max)	2.5'
Clear width (min)	3'
<b>Unenclosed Structures (Sec. 14.15.A.1.d. - Sec. 14.15.A.1.d.)</b>	
Encroachment (max)	5'
Clear width (min)	3'
<b>Mechanical/Electrical Equipment (Sec. 14.15.A.1.f. - Sec. 14.15.A.1.g.)</b>	
Encroachment (max)	1.5'
Clear width (min)	3'

### 2. Building Break Outdoor Amenity Space Alternative

As an alternative to a building break, a street-facing outdoor amenity space that meets the following standards may be used to establish buildings or collections of abutting buildings as separate buildings for the purpose of measuring maximum building width:

- a. The outdoor amenity space shall meet the design standards for outdoor amenity space in Sec. 2C.3.3.A. (*Outdoor Amenity Space*).
- b. The outdoor amenity space width shall be at least 2 times the minimum building break dimension specified in the applied *Form District (Part 2B)*, measured parallel to the applicable street lot line.
- c. The outdoor amenity space width shall not be greater than the maximum building width, measured parallel to the applicable street lot line.
- d. The outdoor amenity space depth shall be at least 5 times the minimum building break dimension specified in the applied *Form District (Part 2B)*, measured perpendicular to the street lot line.
- e. A minimum of 75% of the outdoor amenity space area shall meet the design standards in Sec. 2C.3.3.C. (*Pedestrian Amenity Space*).
- f. The outdoor amenity space may count toward the required minimum build-to width required by the applied *Frontage District (Part 3B)*, provided it meets the requirements of Sec. 3C.1.3.E. (*Build-to Width Exceptions*).
- g. Any portion of the outdoor amenity space may count toward lot amenity space in Sec. 2C.3.1. (*Lot Amenity Space*) and residential amenity space in Sec. 2C.3.2. (*Residential Amenity Space*), provided it meets all applicable standards.

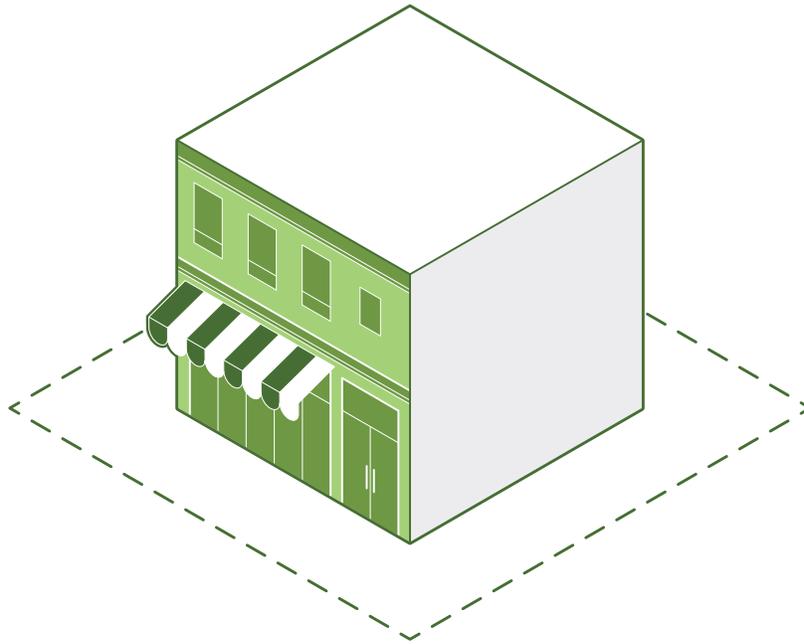

## G. Relief

1. Increased building width of 20% or less or reduced building break of 20% or less may be requested in accordance with Sec. 13B.5.2. (*Adjustments*).
2. Increased building width or reduced building break may be requested as a variance in accordance with Sec. 13B.5.3. (*Variance*).

## SEC. 2C.6.2. **FACADE WIDTH**

## DIV. 3A.1. **ORIENTATION**

### SEC. 3A.1.1. **RELATIONSHIP TO ZONE STRING**

A zone string is composed of the following districts:

The Frontage District is a separate and independent component of each zone.

### SEC. 3A.1.2. **HOW TO USE ARTICLE 3 (FRONTAGE)**

#### A. **Identify the Applied Frontage District**

The second component in a zone string identifies the Frontage District applied to a property.

#### B. **Frontage District Standards**

Frontage District standards are outlined in *Part 3B. (Frontage Districts)*. Each Frontage District page identifies the standards specific to that Frontage District.

#### C. **Interpreting Frontage District Standards**

Each Frontage rule category on a Frontage District page in *Part 3B. (Frontage Districts)* provides a reference to *Part 3C. (General Frontage Rules)* or *Part 3D. (Character Frontage Rules)*, where the standards within that rule category are explained in detail. *Part 3D. (Character Frontage Rules)* may reference *Part 3C. (General Frontage Rules)* for standards that are common to both Character Frontages and General Frontages.

Learn More About Your Rules

## Part 3C (General Frontage Rules)

**DIV. 3C.6. GROUND STORY**

**SEC. 3C.6.1. GROUND STORY HEIGHT**

The floor-to-floor height of the story of a building having its finished floor elevation nearest to the finished ground surface.

**A. Intent**

To promote active uses that are directly connected to the public realm, and ensure high-quality ground-story spaces that are adaptable and appropriate to their context.

**B. Applicability**

Ground story height standards apply to all portions of the ground story of a structure located within the first 15 feet of a frontage applicable facade, measured inward and perpendicular to the facade.

**C. Standards**

All occupiable space on the ground story shall have floor-to-floor height of no less than the ground story height minimum.

**D. Measurement**

- Ground story height is measured vertically from the top of the finished ground floor to the top of the finished floor above.
- Where no story exists above, ground story height is the shortest vertically distance from the top of the finished ground floor to the top of the ceiling or roof structure above.
- For determining the ground story, see Sec. 14.1.1.10. (*Ground Story Determination*).

**E. Relief**

- A reduction in required ground story height of 1 foot or less may be requested in accordance with Sec. 13.7.2 (*Adjustments*).
- Deviation from ground story height standards may be requested as a variance in accordance with Sec. 13.7.2 (*Adjustments*).

Find Your Frontage District

## Part 3B (Frontage Districts)

SEC. 3B.9.1. HISTORIC CORE (CHC1)

**A. Intent**  
The Historic Core Character Frontage provides standards intended to reinforce the prevailing architectural characteristics of Downtown's Historic Core. With an architectural character established in the late 19th and early 20th centuries, key architectural characteristics of the Historic Core include grand entrances adorned with pillars and archways, highly decorative facades that clearly articulate the base, middle, and top layers of a building, deeply recessed windows, and flat roofs with prominent cornices. Buildings in the Historic Core adhere to a well-defined street wall with high ground floor activation. The Historic Core Character Frontage ensures new development contributes to the established architectural character of Downtown's Historic Core.

**B. Lot**

Learn More About Your Rules

## Part 3D (Character Frontage Rules)

**References to Part 3C**

**SEC. 3C.1. PARKING SETBACK**

An area on a lot along a frontage lot line where motor vehicle use areas are prohibited, including primary street parking setbacks, side street parking setbacks and special lot line parking setbacks.

**A. Intent**  
To minimize the impact of motor vehicle dominated areas on the public realm and to promote a comfortable, safe, engaging and attractive streetscape with active uses and landscaping along the public realm.

**B. Applicability**  
Frontage setback requirements apply to the ground story portions of structures and portions of lots designed or designated for motor vehicle uses, including but not limited to parking structures, parking stalls, drive lanes, loading, vehicular circulation areas, and drive-thru facilities.

**C. Standards**  
All applicable areas designated for motor vehicle use shall be located at or behind the required parking setback unless specifically stated as an exception below.

**D. Measurement**

All frontage setbacks are measured perpendicular to the frontage lot line.

1. A primary street parking setback is measured from the primary street lot line.
2. A side street parking setback is measured from the side street lot line.
3. An alley parking setback is measured from the alley lot line associated with a dual frontage.

**DIV. 3D.1. BUILD-TO**  
See Sec. 3C.1

**DIV. 3D.2. PARKING**  
See Sec. 3C.2

**DIV. 3D.3. LANDSCAPING**

**DIV. 3D.4. GROUND FLOOR ELEVATION**  
See Sec. 3C.6.2

## SEC. 3A.1.3. FRONTAGE DISTRICT GRAPHICS

### A. General

Illustrations and graphics are included in Article 3 (Frontage) only to assist users in understanding the purpose and requirements of the text. In the event a conflict occurs between the text of Article 3 (Frontage) and any illustration or graphic, the text prevails.

### B. Lot Graphics

#### 1. Lot Boundary

This line represents the perimeter of the subject lot, serving as a reference for build-to width.

#### 2. Build-To Zone

This blue hatched shape represents the area on a lot, near the frontage lot line, that buildings are required to occupy according to the minimum build-to width specified by the applied *Frontage District (Part 3B)*.

#### 3. Occupied Build-To Zone

The portion of the build-to zone with a blue rather than white background represents the width of the build-to zone that counts toward build-to width based on the location of buildings or the location of pedestrian amenity spaces. The location of the occupied build-to zone is not a requirement, but rather an example of one conforming site configuration.

#### 4. Pedestrian Amenity Space

This green shape represents the largest pedestrian amenity space allowed to count toward build-to width according to the maximum pedestrian amenity allowance specified by the applied *Frontage District (Part 3B)*. The location of the pedestrian amenity space is not a requirement, but rather an example of one conforming site configuration.

#### 5. Building Footprint

This shape represents the building footprint for the front portion of a lot including the portion of a building occupying the build-to zone, serving as a reference for build-to width. The building footprint does not represent the required placement of a building, but rather an example that meets the build-to standards of the applied *Frontage District (Part 3B)*.

## C. Facade Graphics

### 1. Lot Boundary

This line represents the perimeter of the subject lot, serving as a reference for build-to width.

### 2. Pedestrian Amenity Space

This paver-patterned shape represents the pedestrian amenity space shown in the corresponding lot graphic, demonstrating the relationship between pedestrian amenity space activation requirements, and the standards of the applied *Frontage District (Part 3B)*.

### 3. Story

This volume represents a story of a building, serving as a reference for story height and ground floor elevation standards. The volume includes a line at the top and bottom of each story, and an additional line near the top of each story indicating the bottom of a floor plate. The bottom of the floor plate is only depicted on the side of the building.

### 4. Transparent Area

This shape represents door and window openings on frontage applicable facades, serving as a reference for transparency standards. The location of the transparent area is not a requirement, but rather an example of one conforming facade composition.

### 5. Active Wall Spacing

This red-hatched shape represents one example measurement of active wall spacing, including the regulated facade area between 1 set of door or window openings. This shape does not represent all applicable facade areas.

### 6. Street-Facing Entrance

This red outline represents a street-facing door openings, serving as a reference for street-facing entrance and entrance spacing standards. The locations of the street-facing entrances are not a requirement, but rather an example of one conforming facade composition.

## D. Character Frontage Graphics

*Character Frontage Districts (Div. 3B.9.)* include a wider variety of graphics, but use the same approach to representation established by the lot graphics and facade graphics. In addition to the elements depicted in lot and frontage graphics, Character Frontage Districts represent articulation techniques, focal entry features, and exterior materials.

### 1. Articulation Techniques

Articulation standards often include a variety of regulatory elements, including, but not limited to, vertical and horizontal banding, building layers, and articulating elements. While articulating elements are not annotated in Character Frontage District graphics, building layers are represented with a red outline and banding is represented using a black outline around a translucent white shape.

### 2. Focal Entry Features and Exterior Materials

- a. Focal entry features are represented by a dashed red outline surrounding the area on a facade used to meet the requirements of one of the allowed focal entry features specified by the applied *Frontage District (Part 3B)*. The location of the focal entry feature is not a requirement, but rather an example of one conforming facade composition.
- b. Primary and secondary exterior materials are represented using a variety of colors and textures intended to represent one or more of the allowed exterior materials specified by the applied *Frontage District (Part 3B)*.

## SEC. 3A.1.4. **FRONTAGE DISTRICT NAMING CONVENTION**

All Frontage District names are composed of two components: frontage category and variation number.

### A. **Frontage Category**

The first component of each Frontage District is a frontage category. Frontage categories group all districts with similar characteristics. Frontage categories are organized as follows:

1. Drive
2. Multi-Unit
3. General
4. Shopfront
5. Market
6. Large Format
7. Warehouse
8. Dual
9. Character

### B. **Variation Number**

The last component of each Frontage District is a variation number. All Frontage Districts are numbered in the order they fall within Article 3 (Frontage).

## DIV. 3A.2. **OPENING PROVISIONS**

### SEC. 3A.2.1. **FRONTAGE INTENT**

The intent of Article 3 (Frontage) is to regulate the portions of a lot and exterior building facades that impact the public realm. Frontage Districts help ensure that projects respond to the public realm in a contextually appropriate manner. Districts range from minimal standards for Warehouse Frontages to a robust set of standards for Shopfront Frontages which require projects to support a high-quality public realm that is active, comfortable, safe, and visually interesting, with strong connections between the public realm and uses inside buildings.

### SEC. 3A.2.2. **FRONTAGE APPLICABILITY**

#### A. **Project Applicability**

All projects filed after the effective date of this Zoning Code (Chapter 1A) must comply with the Frontage District standards and rules in Article 3 (Frontage), as further specified below. For vested rights, see *Sec. 1.4.5. (Vested Rights)*, and for continuance of existing development, see *Sec. 1.4.6. (Continuance of Existing Development)*.

#### B. **Project Activities**

- Categories of Frontage rules apply to a project based on what types of project activities are proposed, as shown in the table below. Typically, more than one project activity will apply to a proposed project (for example, a street-facing addition concealing a portion of an existing building facade includes both new construction and a facade modification).
- For all Frontage Districts, with the exception of Character Frontage Districts, Frontage rule categories apply to project activities as shown in the table below:

FRONTAGE RULE CATEGORIES		PROJECT ACTIVITIES								
		New Construction	Major Demolition	Lot Modification	Site Modification	Facade Modification	Use Modification	Temporary Use	Renovation	Maintenance & Repair
<i>Div. 3C.1.</i>	<b>Build-To</b>	●	●	○	○	○	○	○	○	○
<i>Div. 3C.2.</i>	<b>Parking</b>	●	●	○	●	○	○	○	○	○
<i>Div. 3C.3.</i>	<b>Landscaping</b>	●	●	●	●	○	○	○	○	○

● = Rules generally apply to this project activity  
 ○ = Rules are not applicable

- Project activities are defined in *Sec. 14.1.15. (Project Activities)*.
- Where a category of Frontage rules is listed as generally applicable in the tables above, and the applied *Frontage District (Part 3B)* provides specifications for a standard in that Frontage rule category, the project activity shall meet all applicable Frontage standards within that Division. This general applicability may be further specified for each standard in the applicability provisions in *Part 3C (General Frontage Rules)* and *Part 3D (Character Frontage Rules)*. Project applicability may also be modified by *Article 12. (Nonconformities)*. Where a category of Frontage rules is listed as not applicable in the table above, no standards from that Frontage rule category apply to the project activity.

### C. Applicable Components of Lots, Buildings, and Structures

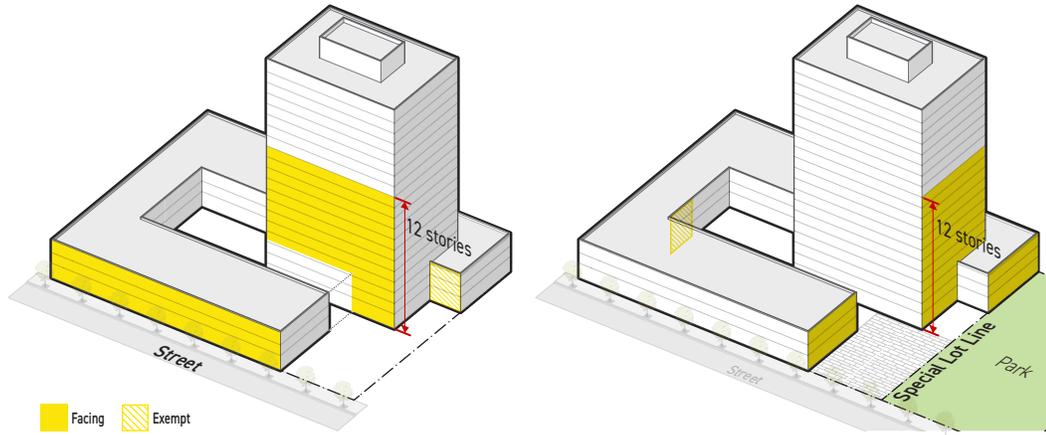

#### 1. General

Frontage standards apply only to the applicable facades, applicable portions of a lot, and applicable building depth, as specified in the following examples in *Sec. 3A.2.2.C.2 (Frontage Applicable Facades)*. Specific Frontage District standards or rules may further limit which components of buildings and lots are required to comply with the standard within *Part 3C. (Frontage Rules)* and *Part 3D. (Character Frontage Rules)*.

## 2. Frontage Applicable Facades

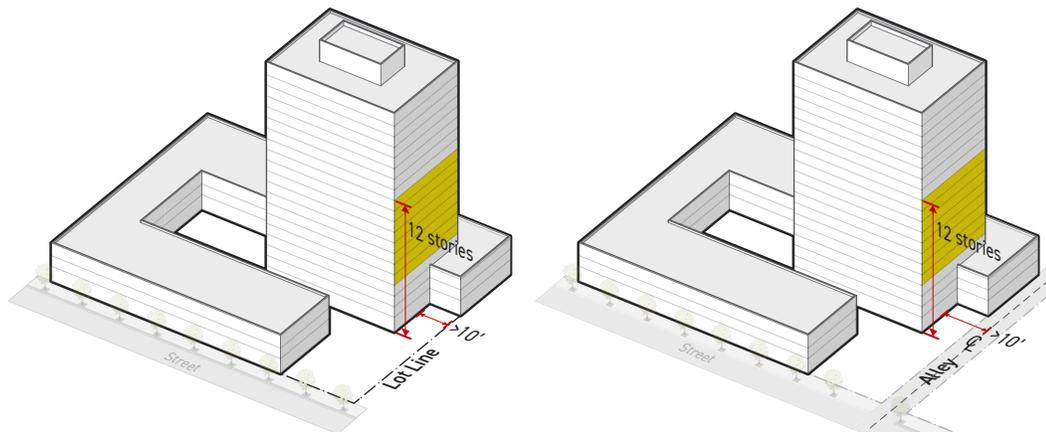

Frontage standards apply to the following facades up to the top of the 12th story:

### a. Frontage Lot Line-Facing Facades

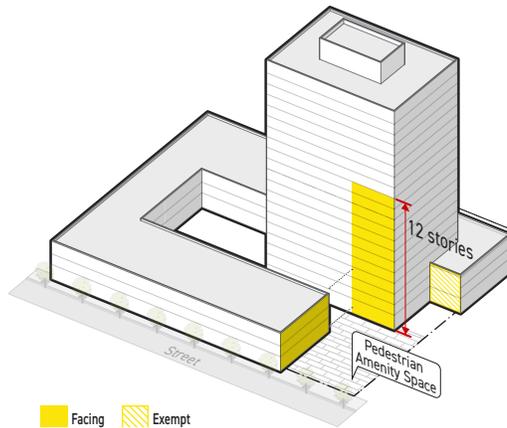

- i. Facades that face a frontage lot line, including *street-facing facades* (Sec. 14.1.6.D.), and when a *Dual Frontage District* (Div. 3B.8.) is applied, *special lot line-facing facades*.
- ii. These facades shall meet the standards specified by the applied *Frontage District* (Part 3B) for the frontage lot line that the facade faces (primary street lot line, side street lot line or special lot line).

### b. Lot Line-Facing Facades (Non-Frontage Lot Line)

- i. *Lot line-facing facades* (Sec. 14.1.6.B.) that do not face a frontage lot line and are:
  - a) Located vertically above the top of the 4th story; and
  - b) Located 10 feet or more from a common lot line or centerline of an alley, measured horizontally.
- ii. Lot Line-Facing Facades (Non-Frontage Lot Line) facades shall meet the standards specified by the applied *Frontage District* (Part 3B) for the side street lot line.

### c. Pedestrian Amenity Space-Facing Facades

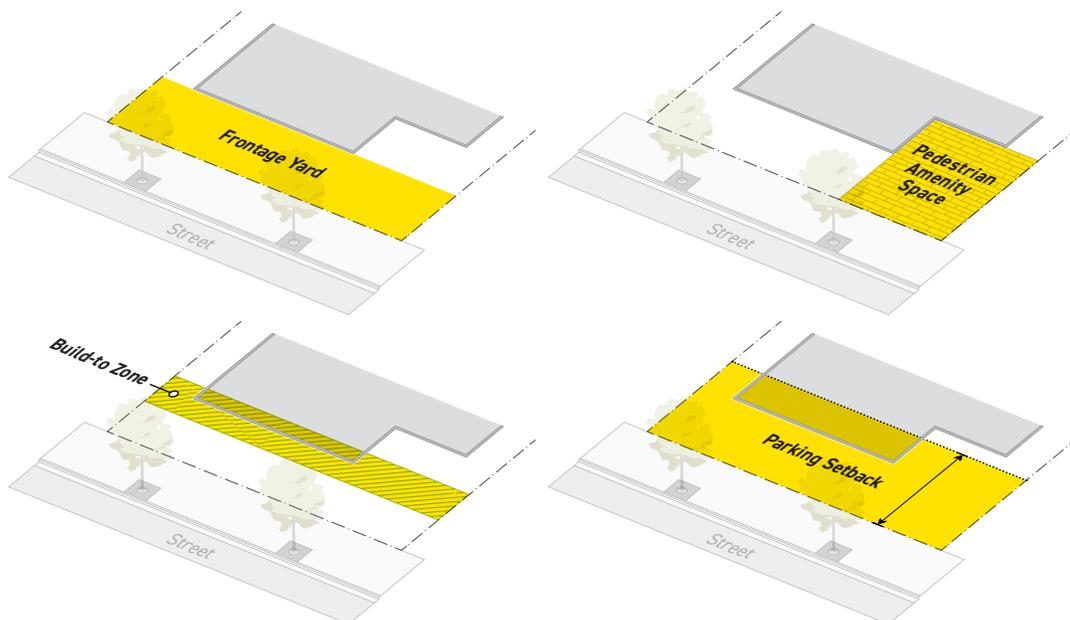

- i. Facades that face a pedestrian amenity space, see *Sec. 14.1.6.C. (Pedestrian Amenity Space-Facing Facades)*.
- ii. These facades shall meet the standards specified by the applied *Frontage District (Part 3B)* for the frontage lot line that the pedestrian amenity space abuts. Where the pedestrian amenity space abuts multiple frontage lot lines, the standards specified for the frontage lot line that abuts the pedestrian amenity space for the greatest length applies.

### 3. Frontage Applicable Portions of a Lot

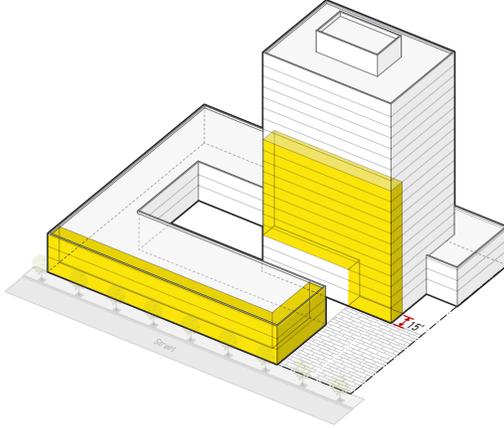

Frontage District standards apply to the following portions of a lot:

- a. Frontage yards, see *Sec. 14.1.16. (Yards)*;
- b. Pedestrian amenity spaces (*Sec. 2C.3.3.C*);
- c. Build-to zones; and
- d. *Parking setbacks (Sec. 3C.2.1)*.

#### 4. Frontage Applicable Building Depth

Frontage District standards apply to portions of a building interior within 15 feet of a *frontage lot line-facing* (Sec. 3A.2.2.C.2.a.) or *pedestrian amenity space-facing* (Sec. 3A.2.2.C.2.c.) frontage applicable facade.

#### D. Nonconformity

*Article 12. (Nonconformities)* provides relief from the requirements of *Article 3. (Frontage)* for existing lots, site improvements, buildings and structures, and uses that conformed to the zoning regulations, if any, at the time they were established, but do not conform to current district standards or use permissions. No project activity may decrease conformance with any Frontage standard unless otherwise specified by *Division 12.3. (Frontage Exceptions)*. Consider the following examples:

1. Closing an existing window opening: Where the proposed facade modification reduces ground story transparency below the minimum required by the applied *Frontage District (Part 3B)*, the facade alteration is not allowed.
2. An addition or new detached structure to the side of a building: Where the applicable facades on the existing structure do not meet the Frontage District transparency standards, all applicable facades of the addition or new detached structure are required to meet the transparency standards, but no alteration of existing facades is required.

## DIV. 3B.1. **DRIVE FRONTAGES**

Drive Frontages control the location of vehicular access, require planted front yards, and provide flexible provisions for privacy through a combination of setbacks, frontage yard fences, and wall standards.

[Reserved]

## DIV. 3B.2. **MULTI-UNIT FRONTAGES**

Multi-Unit Frontages require higher ground floor elevation, relatively low transparency, and frequent entrance spacing. This allows for greater privacy for tenants located on the ground story while retaining an interplay between the private and public realms. Frequent entrances activate the public realm with pedestrian activity and visual interest.

### SEC. 3B.2.1. **MULTI-UNIT 1 (MU1)**

## DIV. 3B.3. **GENERAL FRONTAGES**

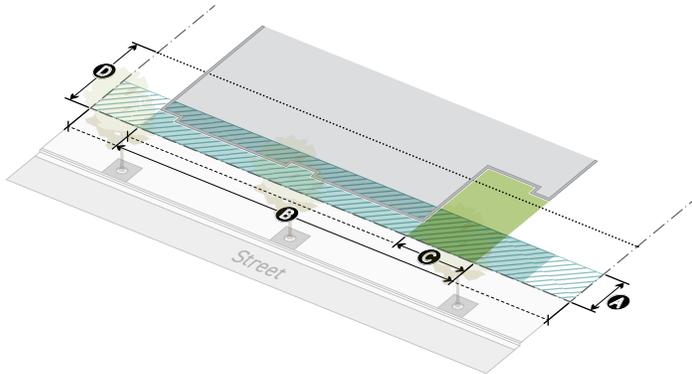

General Frontages require moderate to high build-to widths while allowing a wide range of modifications for pedestrian amenity spaces. These Frontage Districts have a moderate transparency requirement with flexible entrance spacing standards while ensuring a high-quality pedestrian environment and providing flexibility for a variety of ground story tenants.

### SEC. 3B.3.1. **GENERAL 1 (G1)**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

## DIV. 3B.4. **SHOPFRONT FRONTAGES**

Shopfront Frontages require high build-to widths, high levels of transparency, frequent entrance spacing, and ground floor elevation at or near sidewalk grade. This promotes a legible street wall and activates the public realm with pedestrian activity and visual interest. The at-grade ground floor elevation allows for an increased connection between the interior uses and the pedestrian space.

## DIV. 3B.5. **MARKET FRONTAGES**

Market Frontages require high build-to widths and frequent entrances integrated as market stalls and shopfront bays. These entry feature options, paired with frequent entry spacing, activates the public realm with pedestrian activity and visual interest in areas where market stalls are the dominant pattern.

### SEC. 3B.5.1. **MARKET 1 (MK1)**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

## DIV. 3B.6. **LARGE FORMAT FRONTAGES**

Large Format Frontages require moderate build-to widths and infrequent entrance spacing. These Frontage Districts are designed to accommodate large tenants and controlled access in a manner that promotes a walkable street edge.

[Reserved]

## DIV. 3B.7. **WAREHOUSE FRONTAGES**

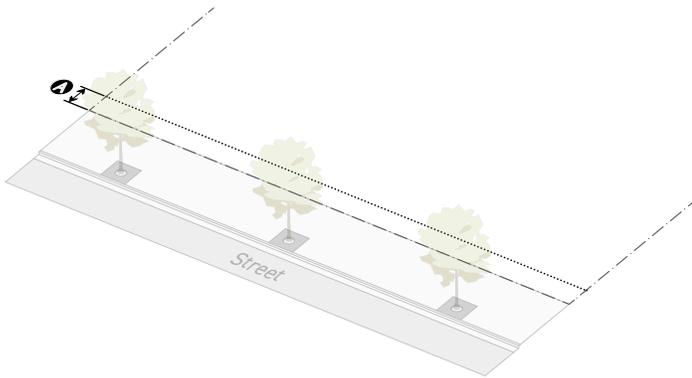

The Warehouse Frontages have few standards and allow for a high level of flexibility. These Frontage Districts are designed for freight service. Warehouse Frontages are intended for areas where pedestrian-friendly environments are not a priority.

## SEC. 3B.7.1. WAREHOUSE 1 (WH1)

[Introduced with the Downtown Community Plan

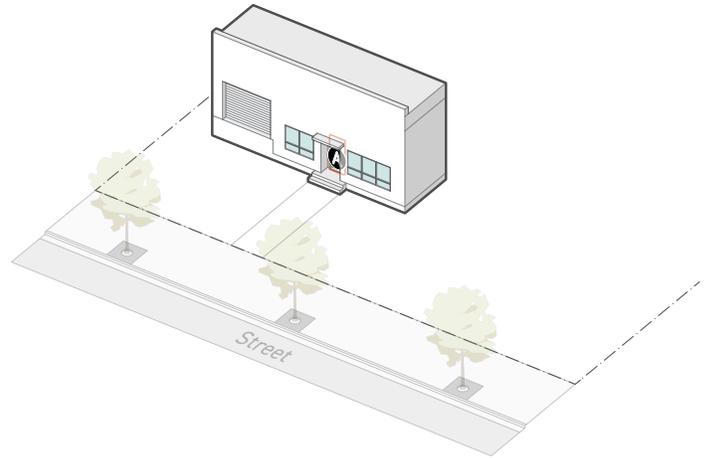

via CPC-2014-1582-CA and CPC-2017-432-CPU]

## DIV. 3B.9. **CHARACTER FRONTAGES**

Character Frontages provide standards for facade articulation, entry features, window design, siding materials, and roof form, in order to reinforce the prevailing architectural characteristics of the city's historically and culturally significant neighborhoods and districts.

### SEC. 3B.9.1. **HISTORIC CORE (CHC1)**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

### SEC. 3B.9.2. **DAYLIGHT FACTORY (CDF1)**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

### SEC. 3B.9.3. **DAYLIGHT FACTORY / RIVER (CDR1)**

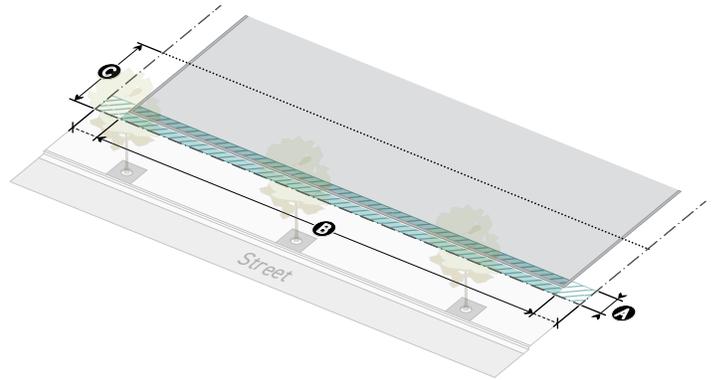

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

## SEC. 3B.9.4. CHARACTER COMMERCIAL (CC1)

### A. Intent

The Character Commercial 1 Frontage provides standards intended to reinforce the prevailing architectural characteristics of streetcar oriented commercial districts established during the late 19th and early 20th centuries. Such districts are characterized by one and two story brick buildings containing rows of small storefronts that were originally built to serve some of the city’s earliest neighborhoods. Key features include the decorative application of brick, shopfront and roofline cornices, recessed entrances, and large shopfront windows. Buildings that retain the qualities of early commercial districts adhere to a well-defined street wall with high ground floor activation. By providing a set of targeted design standards that regulate these key features the Character Commercial 1 Frontage ensures that new development contributes to the established architectural character of the city’s earliest commercial districts.

## SEC. 3B.9.5. **CHARACTER RESIDENTIAL 1 (CR1)**

### A. Intent

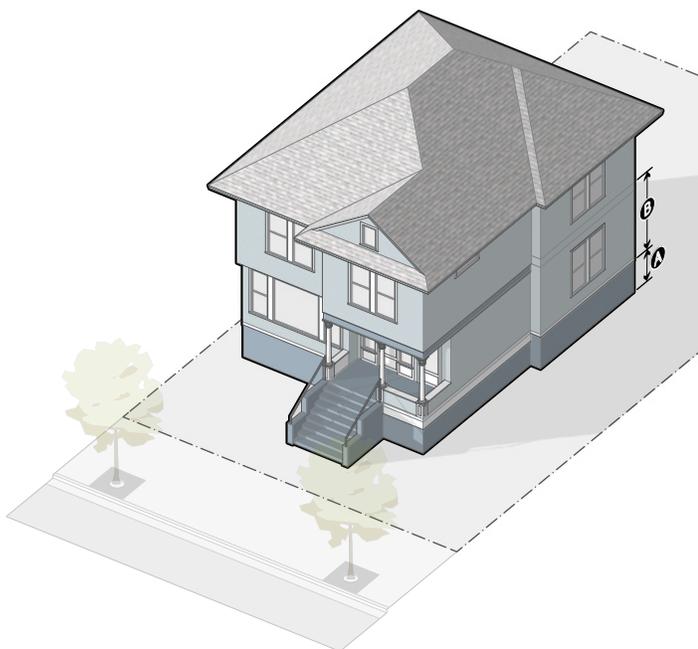

The Character Residential 1 Frontage provides standards intended to reinforce the prevailing architectural characteristics of the city’s residential neighborhoods established throughout the late 19th and early 20th centuries. Such neighborhoods are characterized by an eclectic mix of residential architecture, including Late-Victorian, Queen Anne, and Craftsman architectural styles. Together these styles share some unifying characteristics, such as building forms articulated by a prominent pitched roof or series of pitched roofs, entries featuring a covered front porch, and textured exterior wall surfaces of lap or shingle siding. Other common neighborhood characteristics include homes setback behind a front yard and parking areas hidden from view behind the main building. By providing a set of targeted design standards that regulate these key features the Character Residential 1 Frontage ensures that new development contributes to the established architectural character of the city’s earliest residential neighborhoods.

## DIV. 3C.1. **BUILD-TO**

Portions of this Division displayed in gray text are being introduced Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU.

### SEC. 3C.1.1. **APPLICABLE STORIES**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

### SEC. 3C.1.2. **BUILD-TO DEPTH**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

### SEC. 3C.1.3. **BUILD-TO WIDTH**

The cumulative building width that shall occupy the build-to zone, relative to the width of the lot at the frontage lot line.

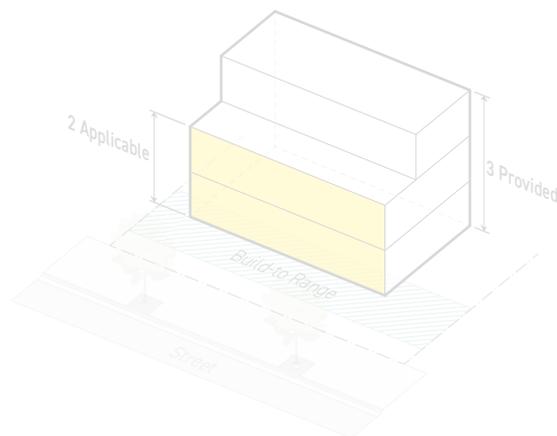

#### A. **Intent**

To ensure that buildings enclose the public realm with a legible and consistent street wall, spatially defining an outdoor room, and promoting a strong visual and physical connection between uses inside buildings and the public realm.

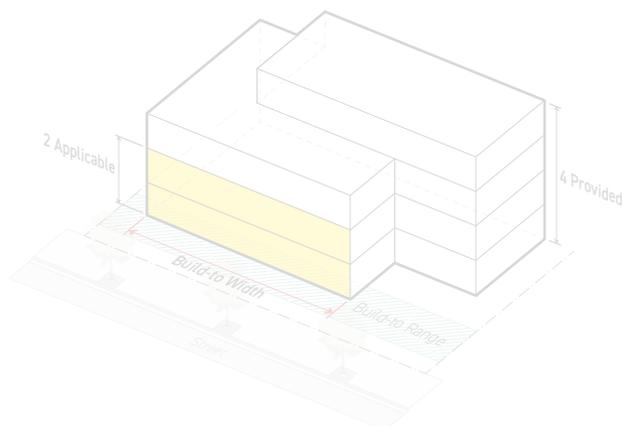

#### B. **Applicability**

Build-to width standards apply to the following:

1. Where a minimum height is specified in the applied *Form District (Part 2B)*, build-to width applies to all above-grade stories up to the minimum height in stories standard in accordance with Sec. 2C.4.3. (Height in Stories).

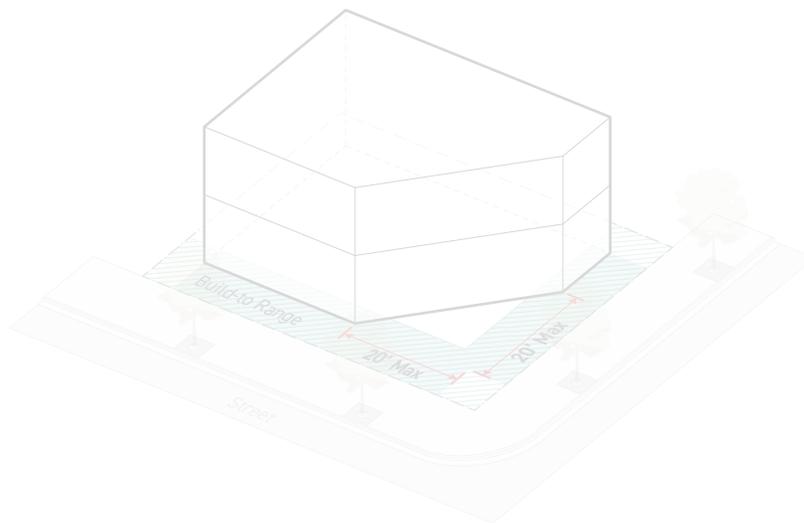

2. Where an applicable stories standard exists, build-to width applies to all stories located above-grade up to the applicable stories.

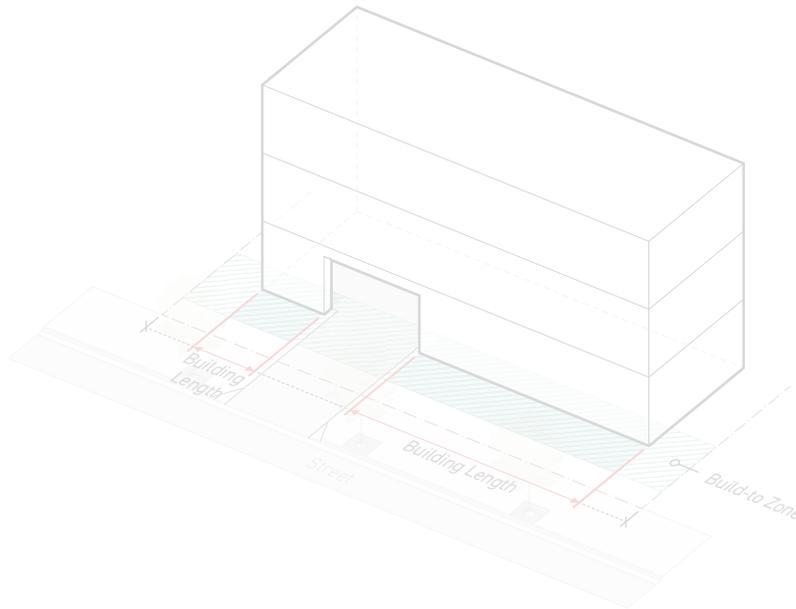

3. Where both an applicable stories standard and a minimum height are specified, build-to width applies to whichever standard requires the greatest number of stories located in the build-to zone.
4. Where no applicable stories standard is specified in the applied *Frontage District (Part 3B)* and no minimum height standard is specified in the applied *Form District (Part 2B)*, build-to width applies only to the ground story.

### C. Standards

1. Buildings shall occupy the build-to zone for a cumulative width no less than that specified by the applied *Frontage District (Part 3B)*.
2. When build-to width is specified as "building-based", the build-to zone shall be occupied by buildings for no less than 50% of the width of the building having the greatest total floor area on the lot.
3. On a corner lot, a chamfered corner no more than 20 feet in width along both street lot lines qualifies as building width in the build-to zone for all applicable stories even where it extends outside of the build-to zone. Chamfered corner width is measured parallel to the frontage lot line.

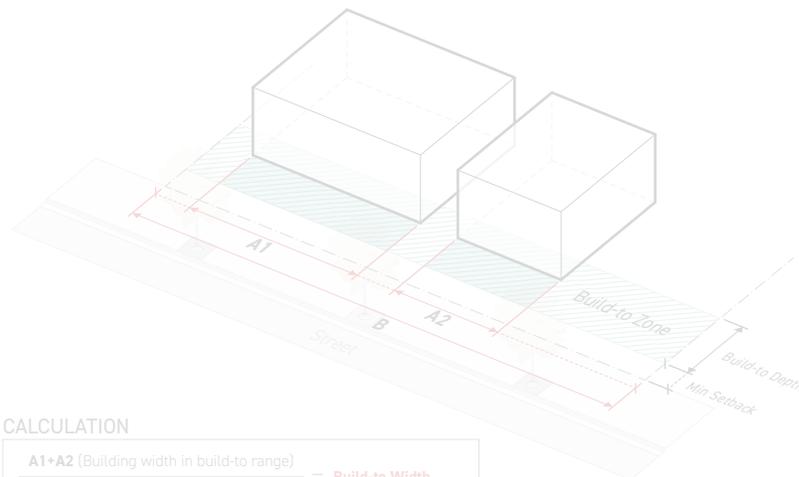

4. Portions of building width providing motor vehicle access to a motor vehicle use area through the ground story of a building do not qualify as building width in the build-to zone.

#### D. Measurement

The build-to width is a percentage measured as the sum of the widths of all portions of buildings occupying the build-to zone divided by the total lot width.

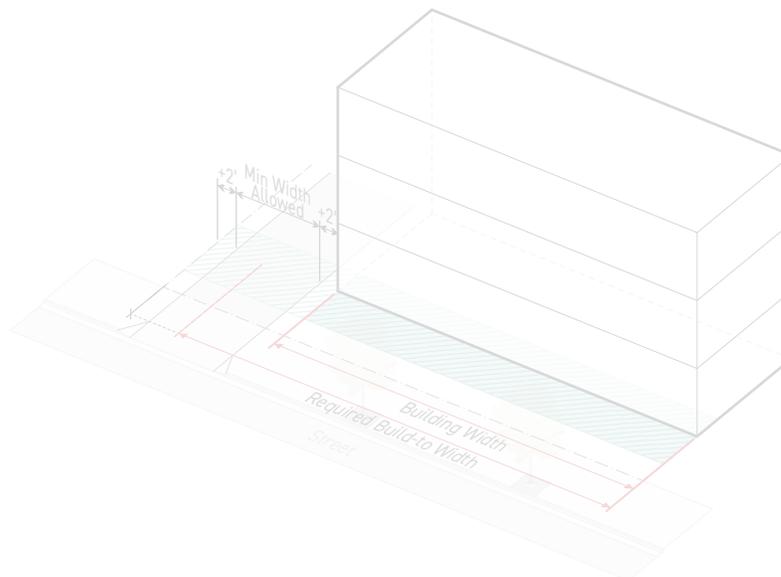

#### CALCULATION

$$\frac{A1 + A2 \text{ (Building width in build-to range)}}{B \text{ (Total Lot Width)}} = \text{Build-to Width}$$

1. Building width is measured parallel to the frontage lot line. For measuring building width on a complex lot, see Sec. 14.1.14. (Parallel or Perpendicular to Irregular Lot Line).
2. Lot width is measured along the frontage lot line. For measuring width of a complex lot, see Sec. 14.1.14. (Parallel or Perpendicular to Irregular Lot Line).

## E. Exceptions

1. Outdoor amenity spaces meeting the design standards for *pedestrian amenity space* (Sec. 2C.3.3.C.2) count toward required minimum build-to width in accordance with Sec. 3C.1.4. (*Pedestrian Amenity Allowance*).
2. A building break that includes an open space meeting the design standards for pedestrian amenity space in Sec. 2C.3.3.C.2 (*Pedestrian Amenity Space*) counts toward the minimum build-to width required by the applied *Frontage District (Part 3B)* according to Sec. 3C.1.4. (*Pedestrian Amenity Allowance*).
3. Where vehicle access is permitted to be taken through the frontage lot line based on the vehicle access package in Sec. 4C.2.1. (*Automobile Access Packages*) specified by the applied *Development Standards District (Part 4B)* and providing access prevents a building from achieving the required build-to width, a reduced build-to width may be allowed, provided the portion of the lot in the build-to zone used for vehicle access is no wider than the minimum required drive aisle width plus an additional 4 feet of width for clearance. See Div. 4C.2. (*Automobile Access*).

## F. Relief

1. Up to a 10% reduction to the total required width of building occupying the build-to zone may be requested in accordance with Sec. 13B.5.2. (*Adjustment*).
2. A reduced minimum build-to width may be requested as a variance in accordance with Sec. 13B.5.3. (*Variance*).

#### SEC. 3C.1.4. **BUILD-TO WIDTH**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

#### SEC. 3C.1.5. **PEDESTRIAN AMENITY ALLOWANCE**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

### DIV. 3C.2. **PARKING**

#### SEC. 3C.2.1. **PARKING SETBACK**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

## SEC. 3C.2.2. **PARKING BETWEEN BUILDING & STREET**

*The location of motor vehicle use areas between a building and the public realm.*

### A. **Intent**

To control the impact of motor vehicle-dominated areas on the pedestrian experience especially where buildings do not line the majority of the public realm, and to promote a comfortable, safe, engaging, and attractive streetscape, with pedestrian access to active uses and landscaping between the public realm and street-oriented buildings.

### B. **Applicability**

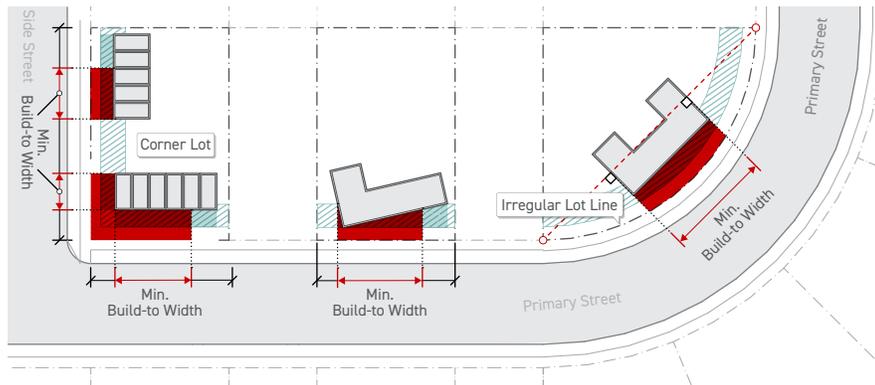

Where specified by the applied *frontage district (Part 3B)*, parking between the building and the street requirements apply to *frontage yards* and *frontage applicable building depth (Sec. 3A.2.2.C.4)* on the ground story.

### C. **Standards**

1. Where the applied *frontage district (Part 3B)* specifies "No":
  - a. No motor vehicle use area may be located between a building that occupies the build-to zone and the frontage lot line, for the portion of the building width provided to comply with a build-to width requirement.
  - b. No motor vehicle use area may be located on the ground story of a building or structure within the frontage applicable building depth for the portion of the building width provided to comply with a build-to width requirement.
2. Where the applied *frontage district (Part 3B)* specifies "Yes", no additional limitations to the location of motor vehicle use areas are required to comply with parking between the building and street standards.

## D. Measurement

1. The area between a building width and the street is determined as the entire area on a lot bordered by the applicable *street-facing facade* (Sec. 14.1.6.D.) and *frontage lot line*, for the applicable building width. For corner lots, the area between the building and the street also includes the portion of the lot beyond the width of the building nearest to the intersection, up to the intersecting street lot line.

2. For measuring building width see Sec. 2C.6.1.D.
3. For frontage lot line-facing, see Sec. 14.1.6. (Facing).
4. For *street-facing facade*, see Sec. 14.1.6.D.(Street-Facing Facade).

## E. Exceptions

A driveway located between a street-facing building facade and the frontage lot line may be allowed provided all of the following conditions are met:

1. The *automobile access package* (Sec. 4C.2.1) specified by the applied *Development Standards District (Part 4B)* allows automobile access to be taken through the frontage lot line associated with a parking setback; and
2. The *driveway* is no wider than the minimum allowed width. See Div. 4C.2. (Automobile Access).

## F. Relief

1. A reduction in the width of the area of the lot or building depth required to comply with parking between building and street standards of 15% or less may be requested in accordance with Sec. 13B.5.2. (Adjustment).
2. Modifications to parking between building and street standards may be requested as a variance in accordance with Sec. 13B.5.3. (Variance).

## DIV. 3C.3. **LANDSCAPING**

### SEC. 3C.3.1. **FRONTAGE PLANTING AREA**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

### SEC. 3C.3.2. **FRONTAGE YARD FENCE & WALL**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

## DIV. 3C.4. **TRANSPARENCY**

### SEC. 3C.4.1. **TRANSPARENT AREA**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

### SEC. 3C.4.2. **ACTIVE WALL SPACING**

DIV. 3D.6. **ARTICULATION**

Portions of this Division displayed in gray text are being introduced Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU.

SEC. 3D.6.1. **BASE, MIDDLE & TOP**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

## SEC. 3D.6.2. **BASE-TOP**

The base-top articulation requirement is composed of two separate and coordinated articulating elements designed to visually break a building facade up into two separately legible layers.

### A. **Intent**

To visually break a building facade up into two separately legible building layers.

### B. **Applicability**

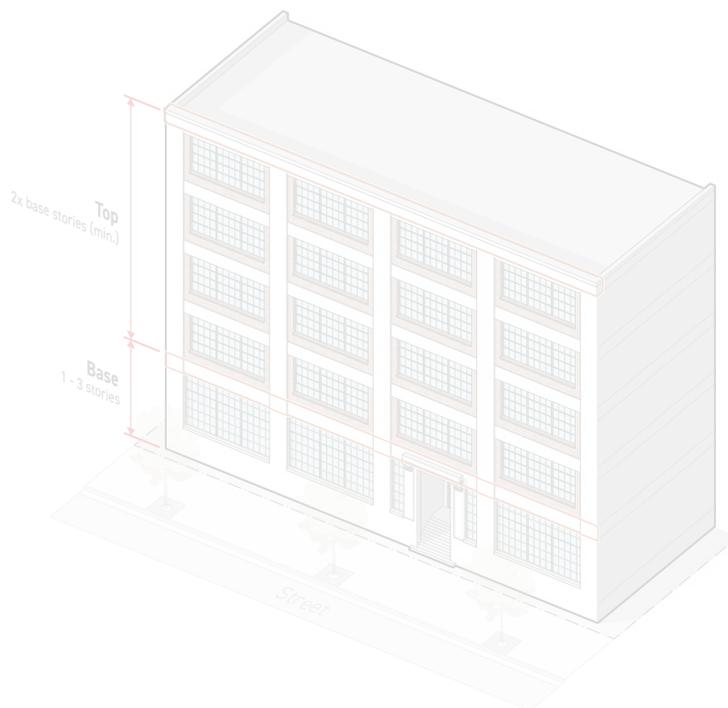

Base-top standards apply to all frontage applicable facades located on all build-to applicable stories specified by the applied *Frontage District (Part 3B)*. See *Sec. 3A.2.2.C.2. (Frontage Applicable Facades)*.

### C. **Standards**

#### 1. **General**

One articulating element option shall be provided for each building layer in accordance with the building layer standards below. See *Sec. 3D.6.5. (Articulating Elements)*.

#### 2. **Building Layers**

a. **Base**

- i. The base building layer shall include between 1 and 3 contiguous stories starting with the ground story and continuing upward.
- ii. At least one of the following articulating elements shall be applied along the top of the base layer, creating a transition between the base and top layers:
  - a) *Sec. 3D.6.5.C.1. (Material Change);*
  - b) *Sec. 3D.6.5.C.2. (Belt Course); or*
  - c) *Sec. 3D.6.5.C.3. (Shopfront Cornice).*
- iii. The articulating element shall extend for the full width of the facade and be located no higher than the top of the uppermost story included in the layer.

b. **Top**

- i. The top building layer shall include at least twice as many stories as the base building layer and include all remaining above-grade stories not included in the base building layer or include all remaining above-grade stories upto a street stepback of no less than 15 feet in depth. If the building is less than 3 stories, or less than 3 stories without a street stepback of at least 15 feet in depth, the top layer may be composed of 1 story regardless of the height of the base layer.
- ii. A roofline cornice articulating element shall be applied to the top building layer when the top building layer is the topmost story of the building or the topmost story before a street step-back. See *Sec. 3D.6.5.C.4 (Roofline Cornice)*.
- iii. The roofline cornice shall extend for the full width of the facade and be located along the top of the topmost story included in the building layer.
- iv. When the top building layer does not include the topmost story of the building or the topmost story before a street step-back, at least one of the following articulating elements shall be applied along the top of the top layer, creating a transition between the top building layer and any story above:
  - a) *Sec. 3D.6.5.C.1. (Material Change); or*
  - b) *Sec. 3D.6.5.C.2. (Belt Course).*
- v. The articulating element shall extend for the full width of the building and be located along the top of the topmost story included in the building layer.

D. **Measurement**

For measurement of stories see *Sec. 2C.4.3. (Height in Stories)*.

## E. Exceptions

Where the applied *Form District (Part 2B)* requires a street setback depth of 10 feet or greater, the top building layer may terminate at the topmost story below the street setback. No articulating element is required above the top building layer.

## F. Relief

1. Base-top standards may be met through alternative compliance in accordance with Sec. 13B.5.1. (*Alternative Compliance*).
2. A deviation from number of stories in building layers of 1 story may be requested in accordance with Sec. 13B.5.2. (*Adjustment*).
3. Deviation from any base-top standard may be requested as a variance in accordance with Sec. 13B.5.3. (*Variance*).

### SEC. 3D.8.2. **ENTRY FEATURE**

See Sec. 3C.5.2. (*Entry Feature*).

### SEC. 3D.8.3. **FOCAL ENTRY FEATURE**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

## DIV. 3D.9. **TRANSPARENCY**

### SEC. 3D.9.1. **GROUND STORY**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

### SEC. 3D.9.2. **UPPER STORIES**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

## DIV. 3D.10. **EXTERIOR MATERIALS**

### SEC. 3D.10.1. **PRINCIPAL MATERIAL COVERAGE**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

### SEC. 3D.10.2. **ACCESSORY MATERIAL COVERAGE**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

### SEC. 3D.10.3. **EXTERIOR MATERIAL OPTIONS**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

### DIV. 3D.11. **ROOF DESIGN**

Portions of this Division displayed in gray text are being introduced Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU.

## SEC. 3D.11.1. **ROOF FORM**

*The shape of the external upper covering of a building, including the frame for supporting the roofing.*

### A. **Intent**

To ensure that building forms contribute to the established architectural character of surrounding neighborhoods or districts.

### B. **Applicability**

- a. Where specified by the applied *Character Frontage District (Div. 3B.7)*, roof form standards apply to the roof of all frontage lot line facing buildings and structures on a lot.
- b. A minimum of 70% of the total roof area of each applicable building or structure shall meet roof form standards, measured horizontally.

### C. **Standards**

#### 1. **General**

All building and structures shall have a roof form listed as a roof form option in the applied *Frontage District (Part 3B)*.

#### 2. **Roof Form Options**

##### a. **Flat**

A roof with a maximum pitch of 2:12 (2 inch of vertical rise for every 12 inches of horizontal span). Flat roof forms include roofs with parapets up to 6 feet in height.

##### b. **Pitched**

A roof composed of 2 or more sloping planes where all roof planes slope up from the exterior perimeter of the building or structure and connect with another roof plane at a central ridge. All roof planes shall have a minimum pitch of 3:12 (3 inch of vertical rise for every 12 inches of horizontal span). Examples of pitched roof forms include hipped, gabled, and gambrel roofs.

### D. **Measurement**

1. Roof pitch is measured by calculating a roof's vertical rise in inches divided by a foot of its horizontal span and is represented as a ratio.
2. Roof form is measured as compliant or non-compliant based on whether it meets the standards and definition of one of the roof form options allowed by the applied *Frontage District (Part 3B)*.

### E. Relief

1. Up to a 10% reduction to the total required roof area having an allowed roof form may be requested in accordance with *Sec. 13B.5.2. (Adjustment)*.
2. A deviation from roof form dimensional standard of 10% or less may be requested in accordance with *Sec. 13B.5.2. (Adjustment)*.
3. Deviation from any roof form standard may be requested as a variance in accordance with *Sec. 13B.5.3. (Variance)*

### F. Measurement

1. Roof pitch is measured by calculating a roof's vertical rise in inches divided by a foot of its horizontal span and is represented as a ratio.
2. Roof form is measured as compliant or non-compliant based on whether it meets the standards and definition of one of the roof form options allowed by the applied *Frontage District (Part 3B)*.

### G. Relief

1. Up to a 10% reduction to the total required roof area having an allowed roof form may be requested in accordance with *Sec. 13B.5.2. (Adjustment)*.
2. A deviation from roof form dimensional standard of 10% or less may be requested in accordance with *Sec. 13B.5.2. (Adjustment)*.
3. Deviation from any roof form standard may be requested as a variance in accordance with *Sec. 13B.5.3. (Variance)*.

## SEC. 3D.11.2. **ROOF MATERIALS**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

### SEC. 3D.11.3. **OVERHANG**

#### A. **Intent**

To ensure that a building's roof design contribute to the established architectural character of surrounding neighborhoods or districts.

#### B. **Applicability**

Where specified by the applied *Character Frontage District (Div. 3B.7)*, overhang standards apply to all portions of a roof used to comply with *Sec. 3D.11.1. (Roof Form)*.

#### C. **Standards**

Applicable portions of the roof plane shall extend horizontally beyond the building footprint by no less than the minimum overhang dimension specified by the applied *Character Frontage District (Div. 3B.7)* for all portions of the perimeter of the building footprint.

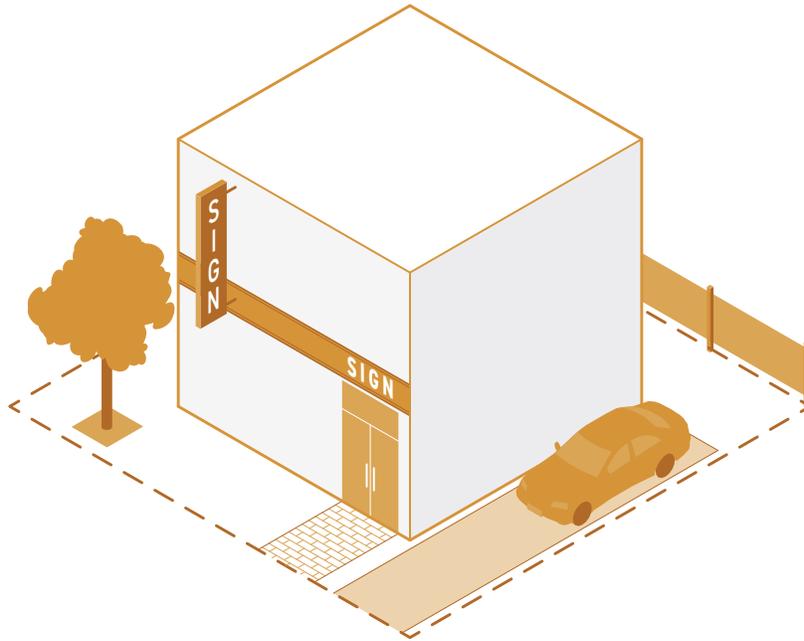

#### D. **Measurement**

Overhang is measured horizontally and perpendicular to the building facade from the face of the outermost building facade to the outer edge of the roof plane for the full perimeter of the building or structure .

#### E. **Relief**

1. Up to a 15% reduction to the minimum overhang dimension may be requested in accordance with *Sec. 13B.5.2. (Adjustment)*.
2. Deviation from overhang standards may be requested as a variance in accordance with *Sec. 13B.5.3. (Variance)*.

## DIV. 4A.1. **ORIENTATION**

### SEC. 4A.1.1. **RELATIONSHIP TO ZONE STRING**

A zone string is composed of the following districts:

The Development Standards District is a separate and independent component of each zone.

### SEC. 4A.1.2. **HOW TO USE ARTICLE 4 (DEVELOPMENT STANDARDS)**

#### A. **Identify the Applied Development Standards District**

The third component in a zone string identifies the Development Standards District applied to a property.

#### B. **Development Standards District Regulations**

Development Standards District regulations are located in *Part 4B. (Development Standards Districts)*. Each Development Standards District page identifies the requirements specific to that Development Standards District.

#### C. **Interpreting Development Standards District Regulations**

Each standard or standards package on a Development Standards District page in *Part 4B. (Development Standards Districts)* provides a reference to *Part 4C. (Development Standards Rules)* where the standard or standards package is explained in detail. Additionally, *Part 4C. (Development Standards Rules)* includes general standards that apply across all Development Standards Districts.

### SEC. 4A.1.3. **DEVELOPMENT STANDARDS DISTRICT NAMING CONVENTION**

All Development Standards District names are identified as a number. All Development Standards Districts are numbered in the order they fall within this Article.

## DIV. 4A.2. OPENING PROVISIONS

### SEC. 4A.2.1. DEVELOPMENT STANDARDS INTENT

The intent of Article 4 (Development Standards) is to regulate site design, including location and characteristics of access, parking, landscape and other site features. Development Standards Districts consist of a combination of regulations that are appropriate to a variety of contexts ranging from auto-oriented to pedestrian-oriented.

### SEC. 4A.2.2. DEVELOPMENT STANDARDS APPLICABILITY

#### A. General

All projects filed after the effective date of this Zoning Code (Chapter 1A) shall comply with the Development Standards Districts and Rules in this Article, as further specified below. For vested rights, see *Sec. 1.4.5. (Vested Rights)*, and for continuance of existing development, see *Sec. 1.4.6. (Continuance of Existing Development)*.

#### B. Project Activities

Categories of Development Standards rules apply to a project based on what types of project activities are proposed, as shown in the table below. Typically, more than one project activity will apply to a proposed project (for example, an addition that expands an existing use includes both new construction and a use modification).

DEVELOPMENT STANDARDS RULES CATEGORIES	PROJECT ACTIVITIES								
	New Construction	Major Demolition	Lot Modification	Site Modification	Facade Modification	Use Modification	Temporary Use	Renovation	Maintenance & Repair
<i>Div. 4C.1.</i> Pedestrian Access	●	●	●	●	●	○	○	○	○

<i>Div. 4C.14.</i> Development Review	●	○	○	●	○	●	○	○	○

● = Rules generally apply to this project activity

○ = Rules are not applicable

1. Project activities are defined in *Sec. 14.1.15. (Project Activities)*.
2. Where a category of Development Standards rules is listed as generally applicable in the table above, the project activity shall meet all applicable Development Standards standards within the Division. This general applicability may be further specified for each standard in the applicability provisions in *Part 4C. (Development Standards Rules)*. Project applicability may also be modified by *Article 12. (Nonconformities)*. Where a category of Development Standards rules is listed as not applicable in the table above, no standards from that Development Standards Rule category apply to the project activity.

### C. **Nonconformity**

*Article 12. (Nonconformity)* provides relief from the requirements of Article 4 (Development Standards) for existing lots, site improvements, buildings, structures, and uses that conformed to the zoning regulations, if any, at the time they were established, but do not conform to current district standards or use permissions. No project activity may decrease conformance with any Development Standard regulation unless otherwise specified by *Division 12.4. (Development Standards Exceptions)*. Consider the following examples:

1. Extending a fence in a side yard: Where the existing, legally established fence located in a side yard is taller than the maximum height allowed by the fences and walls type specified by the applicable Frontage District, all new portions of fence built in the front yard have to meet the maximum fence and wall height standard, but no existing fence alteration is required.
2. Converting parking stalls to outdoor dining: Where the proposed site alteration and change of use reduces the amount of parking below the number of parking stalls specified by the applicable Development Standards District, the conversion is not allowed.

### D. **Applicable Components of Lots and Structures**

1. Development Standards Districts apply to all portions of a lot.
2. Development Standards Districts apply to all portions of buildings and structures on a lot.
3. Specific Development Standards District standards and rules may further limit which components of structures and lots are required to comply with the rules in *Part 4C. (Development Standards Rules)*.

## DIV. 4B.3. DISTRICT 3

### SEC. 4B.3.1. INTENT

Development Standards District 3 prioritizes the pedestrian experience while enabling mobility for motor vehicles. Pedestrian access standards ensure easy access from the public-right-of-way to building entrances, facilitating pedestrian movement. Required automobile parking is moderate in order to ensure sites can accommodate some vehicular access within a walkable environment. Parking facilities must meet design standards to ensure pedestrian mobility, safety, and comfort are not hindered, and buildings provide active frontages along primary streets. On-site signs are sized and located to support a pedestrian-oriented public realm.

## DIV. 4B.4. **DISTRICT 4**

### SEC. 4B.4.1. **INTENT**

Development Standards District 4 prioritizes the pedestrian experience. Pedestrian access standards facilitate pedestrian circulation by improving pedestrian access from the public realm to the interior of buildings through frequent, direct and convenient access to building entrances. Required automobile parking is limited to allow uses to orient primarily toward pedestrian traffic in a walkable and transit rich environment. Parking facilities must meet high design standards to ensure pedestrian mobility, safety, and comfort are not hindered, and buildings provide active frontages along each segment of the public right-of-way. On-site signs are sized and located to support a pedestrian-oriented public realm.

## DIV. 5A.1. **ORIENTATION**

### SEC. 5A.1.1. **RELATIONSHIP TO ZONE STRING**

A zone string is composed of the following Districts:

The Use District is a separate and independent component of each zone.

### SEC. 5A.1.2. **HOW TO USE ARTICLE 5 (USE)**

#### A. **Identify the Applied Use District**

The fourth component in a zone string identifies the Use District applied to a property.

#### B. **Determine What Uses are Permitted**

##### 1. **Reference the Use District Table**

Each Use District outlines the permissions levels and use limitations for all uses in a table that is organized by a uniform list of use categories and uses.

##### 2. **Reference the Use Permissions**

Permission levels are outlined in *Div. 5C.2. (Use Permissions)*, and a key is also included in the footer of each page of the Use District table for each Use District.

##### 3. **Reference the Use Definitions**

Refer to *Div. 5C.1. (Use Definitions)* to confirm the definition of any use listed in each Use District.

#### C. **Identify Use Standards**

Use District standards are outlined in *Div. 5C.3. (Use Standards)*. Each Use District page identifies the applicable standards specific to each use within that Use District.

##### 1. **Identify Supplemental Standards**

When identified as a use standard on the Use District table, supplemental standards are required. The required supplemental standards for each use are outlined after the allowed uses and standards table for each Use District established in *Part 5B. (Use Districts)*.

## 2. Identify Supplemental Procedures

When identified as a use standard on the Use District table, supplemental procedures are required. The required supplemental procedures for each use are outlined after the supplemental standards for each Use District established in *Part 5B. (Use Districts)*.

## D. Interpret Use Standards

Each use standard on a Use District page in *Part 5B. (Use Districts)* corresponds with a Section in *Part 5C. (Use Rules)*, where the use standard is explained in detail.

Find Your Use District

Part 5B & 5C (Use Districts & Use Rules)

**DIV. 5C.2. USE PERMISSIONS**  
**SEC. 5C.2.1. GENERAL**  
 Use permission levels set out in each Use District table indicate how a use is permitted within the district. Permission levels range from permitted without requiring confirmation to any additional standards or conditions of approval, permitted only when specific standards are met, or permitted only through a process requiring approval by a decision-maker or decision-making body. Permission levels may be assigned to individual uses, sets, or entire use categories. Permission levels are represented within each Use District table using symbols that indicate which permission level is assigned to a particular use, set, or use category. The following sections summarize the meanings of each permission level.

**SEC. 5C.2.2. PERMITTED (P)**  
 A use that is permitted without requiring confirmation to specific standards is indicated in the use table by the letter "P". Permitted uses are considered generally appropriate within a district without the need for specific standards to achieve a certain performance outcome or moderate potential effects a use may have on its surroundings.

**SEC. 5C.2.3. USE STANDARD APPLIES (\*)**  
 A use that is permitted only when conforming to a specific set of standards is indicated in the use table by the asterisk (\*) symbol in combination with the underlying permission level. Any permission level may be combined with an "\*" in order to cross-reference a specific set of standards, supplemental standards, or supplemental procedures that shall be applied. Standards, supplemental standards, or supplemental procedures indicated by the presence of an "\*" are important for ensuring that a use exists and operates in a manner that is consistent with the intent of the Use District.

**SEC. 5C.2.4. CC**  
 A use that requires of the public meet certain conditions may require special within the use table.

**DIV. 5C.1. USE DEFINITIONS**  
**SEC. 5C.1.1. RESIDENTIAL USES**  
 Any use listed considers a Dwelling Unit or Guest Room.

**A. Class I Care**  
 1. **Class I Care**  
 A Class I Care approval grant described in 5C.1.1.1 the use may be account for its

**B. Group Living**  
 A group living facility of thirty (30) days or more within the use table.

**C. Homeless Shelter**

**D. Household Living**

**E. Live Work**  
 1. **General**  
 A live work unit combines both household living and live work uses. Live work units are designed for and regularly used by one or more residents of the property for dwelling unit and non-residential purposes for one or more of the following commercial, office, transient services, general manufacturing, artistic and cultural, work space having minimum dimensions of 10 feet by 10 feet (10' x 10'). Live work units are not to be used for any other purposes. Live work units include: Joint Living and Working Quarters.

**2. Home Occupation**  
 An occupation carried on by the occupant or occupants of a Dwelling Unit as an Accessory Use. For Dwelling Units where Home Occupation is conducted, the Home Occupation shall be considered a Residential Use for zoning purposes.

**F. Mobilehome Park**

Specified Use

Interpret Any Supplemental Procedures

Interpret Any Use Standards

**C. Supplemental Standards**

**1. Home Occupation**  
 On-site deliveries and shipments related to the commercial use in a home occupation shall not be performed by vehicles having a designation greater than Class 4 or having a gross vehicular weight rating greater than 16,000 pounds. Deliveries from larger trucks shall occur no more frequently than once every 2 months.

**2. Retail, Farmers' Market, Certified**

a. Operator shall be limited to certified producers, non-profit organizations, and local government agencies.

b. When located on a parking lot, a Certified Farmers' Market shall not use more than 80% of the parking stalls required for permanent uses on the site.

c. Safety barricades shall be provided to separate and protect vendors and their customers from moving vehicles wherever active motor vehicular use areas and farmer's market activities are not separated by a permanent curb.

**D. Supplemental Procedures**

**1. Medical, Major**

a. The Zoning Administrator shall promptly notify the council-member that represents the area including the project site of the conditional use application.

b. In addition to the findings otherwise required by Sec. 13.4.2 (Conditional Use Permit, Class 2), the Zoning Administrator shall also consider:

i. That the proposed use will not adversely affect the welfare of the pertinent community.

**DIV. 5C.2. USE STANDARDS**  
**SEC. 5C.2.1. ACCESSORY TO**

**A. Intent**  
 To support the overall intent of the district by ensuring that the subject use exists as secondary to the specified use to which it is accessory, to allow for the flexibility of multi-use facilities while limiting the impacts of the subject use that would otherwise be detrimental.

**B. Applicability**  
 Applies only when specified by the Use District as a required Use Standard.

**C. Standards**  
 Uses that are accessory to a specified use shall not have a floor area greater than 25% of the floor area designated to the primary use to which it is accessory.

**D. Measurement**

1. For measuring floor area, see Sec. 34.1.7. (Floor Area).

2. The maximum allowed floor area of the accessory use is calculated by multiplying the total floor area designated for the primary use by 25%.

**E. Relief**  
 See the Use District's allowed uses and use limitations.

**SEC. 5C.2.2. ADAPTIVE REUSE PROJECT**

**A. Intent**  
 To encourage and facilitate the conversion and retention of existing or historically significant buildings. The goal is to reduce vacant space, as well as preserve the City's architectural and cultural past, and encourage the sustainable practice of retaining the inherent energy that goes into the construction of existing buildings.

**B. Applicability**  
 Applies only when specified by the Use District as a required Use Standard.

**C. Standards**  
 The specified use shall be provided within an adaptive reuse project that meets the standards of either Sec. 94.5. (Downtown Adaptive Reuse Projects) or Sec. 94.6. (Citywide Adaptive Reuse Projects).

### SEC. 5A.1.3. **USE DISTRICT NAMING CONVENTION**

All Use District names are comprised of two components: a Use District Category and a variation number.

#### A. **Use District Category**

The first component of each Use District name is a Use District Category. Use District Category group all districts with similar characteristics. Use District Category are organized as follows:

1. Open Space
2. Agricultural
3. Residential
4. Residential-Mixed
5. Commercial-Mixed
6. Commercial
7. Industrial-Mixed
8. Industrial
9. Public

#### B. **Variation Number**

The last component of each Use District name is a variation number. All Use Districts are numbered in the order they fall within Article 5 (Use).

## DIV. 5A.2. OPENING PROVISIONS

### SEC. 5A.2.1. USE INTENT

The intent of Article 5 (Use) is to establish the Use Districts, Use Standards, and Use Definitions in order to regulate the activities on a lot, and to mitigate any potential impacts within a lot and on surrounding property as a result of those activities.

### SEC. 5A.2.2. USE APPLICABILITY

#### A. General

1. Most lots, operations, and facilities will contain more than one use. No use that is not permitted by the Use District shall be allowed with the exception of incidental uses as established in *Sec. 5A.1.2.A.4. (Incidental Uses)*.
2. All projects filed after the effective date of this Zoning Code (Chapter 1A) shall comply with the Use District standards and all other provisions in Article 5 (Use), as further specified below. For vested rights, see *Sec. 1.4.5. (Vested Rights)*, and for continuance of existing development, see *Sec. 1.4.6. (Continuance of Existing Development)*.

#### B. Project Activities

1. Categories of Use rules apply to a project based on what types of project activities are proposed, as shown in the table below. Typically, more than one project activity will apply to a proposed project (for example, an addition will also include a use modification).

USE RULE CATEGORY		PROJECT ACTIVITIES								
		New Construction	Major Demolition	Lot Modification	Site Modification	Facade Modification	Use Modification	Temporary Use	Renovation	Maintenance & Repair
<i>Div. 5C.1.</i>	<b>Use Definitions</b>	●	○	○	○	○	●	●	○	○
<i>Div. 5C.2.</i>	<b>Use Permissions</b>	●	○	○	○	○	●	●	○	○
<i>Div. 5C.3.</i>	<b>Use Standards</b>	●	●	●	●	○	●	●	○	○

● = Rules generally apply to this project activity  
 ○ = Rules are not applicable

2. Project activities are defined in *Sec. 14.1.15. (Project Activities)*.

3. Where a category of the Use rules are listed as generally applicable in the table above, the project activity shall meet all applicable Use standards within that Division. This general applicability may be further specified for each standard in the applicability provisions in *Part 5C. (Use Rules)*. Project applicability may also be modified by *Article 12. (Nonconformities)*. Where a category of Use rules is listed as not applicable in the table above, no standards from that Use rule category apply to the project activity.

### C. **Applicable Components of Lots, Buildings, and Structures**

1. Use regulations apply to all portions of a lot.
2. Use regulations apply to all portions of buildings and structures on a lot.
3. Specific use regulations may further limit which components of buildings and lots are required to comply with *Part 5C (Use Rules)*.

### D. **Nonconformity**

*Article 12. (Nonconformity)* provides relief from the requirements of Article 5 (Use) for existing lots, site improvements, buildings, structures, and uses that conformed to the zoning regulations, if any, at the time they were established, but do not conform to current Use District standards or use permissions. For lots with uses nonconforming as to the provisions of *Div. 5C.2. (Use Permissions)*, *Div. 5C.3. (Use Standards)*, or *Div. 5C.1. (Use Definitions)* specified by the applied Use District (*Part 5B*), no project activity may decrease the conformance with any regulations specified in Article 5 (Use), unless otherwise specified by *Div. 12.6. (Nonconforming Use)*. Consider the following examples:

1. An addition to an existing counter service business: Where the current total floor area of the use exceeds the maximum allowed commercial tenet size of the applied Use District, the addition is not allowed; however, the existing nonconforming tenet area is allowed to be continued.
2. Building a screening wall along the edge of a motor vehicle use area at a gas station: Where fueling station is not a permitted use in applied Use District, the screening wall site modification is allowed because it does not decrease the degree of non-conformity.
3. Demolition of a brewery facility where an accessory restaurant use remains: Where the restaurant is allowed only accessory to food and beverage manufacturing, this major demolition is not allowed unless the restaurant use is discontinued.

## E. Incidental Uses

1. A use may be allowed as an incidental use, provided the Zoning Administrator determines it is incidental to and directly associated with an allowed use.
2. The Zoning Administrator shall consider the following characteristics when determining whether a use is incidental to and directly associated with an allowed use:
  - a. The use is customarily associated with the permitted use;
  - b. The use is subordinate in both intent and size to the permitted use;
  - c. The use is located on the same lot as the permitted use;
  - d. The use is abutting, adjacent to, or integrated within the use area of the permitted use;
  - e. The impact of the use is not detrimental when compared to the impact of the permitted use.
3. Where a use standard specifies the use is allowed only when incidental to a specified use, the subject use may not be allowed incidental to any other use except the specified use. See Sec. 5C.3.14. (*Incidental To*) for more standards rules.

### SEC. 5A.2.3. **RELATIONSHIP TO FORM, FRONTAGE, & DEVELOPMENT STANDARDS**

Regardless of allowed uses, the form of a building, its architectural elements, and site improvements are regulated by Form, Frontage, and Development Standards Districts which shall be met. For example, an eating & drinking use might be allowed, but the Development Standard regulations may prohibit drive-through facilities.

### SEC. 5A.2.4. **RELATIONSHIP TO DENSITY DISTRICTS**

Use Districts that contain provisions for Residential Uses do not include regulations regarding the number of dwelling units that are permitted. The Density District component of the zone-string, as described in *Article 6 (Density)*, is the mechanism that regulates the number of dwelling units permitted on any lot.

# PART 5B. USE DISTRICTS

<b>Div. 5B.1. Open Space Districts . . . . .</b>	<b>5-12</b>
Sec. 5B.1.1. Open Space 1 (OS1) . . . . .	5-12

## DIV. 5B.1. OPEN SPACE DISTRICTS

Open Space Use Districts regulate open spaces to be preserved as natural resources or used for outdoor recreation opportunities.

### SEC. 5B.1.1. OPEN SPACE 1 (OS1)

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

#### A. Intent

The OS1 Use District is intended to protect and preserve natural resources, provide outdoor recreation opportunities, and facilitate the efficient management of municipal resources.

## C. Supplemental Standards

### 1. Wireless Facility, All

The wireless facility shall meet all applicable standards required by *Sec. 4C.12.4. (Wireless Telecommunication Facilities)*.

### 2. Resource Extraction, Exploratory Core Hole

The maximum duration of a permit for exploratory core holes shall not exceed 200 days. However, where the Zoning Administrator, pursuant to *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, finds that drilling, testing, and proper abandonment cannot reasonably be completed within 200 days due to depth, deviation, or quantity of temporary geological exploratory core holes, the maximum duration may be increased to a total of 365 days.

## D. Supplemental Procedures

### 1. Alcohol Service

- a. In addition to the notification otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall promptly notify the Council-member that represents the area including the project site of the conditional use application.
- b. In addition to the findings otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also consider:
  - i. That the granting of the application will not result in an undue concentration of uses that dispense alcoholic beverages within a 1,000-foot radius of the lot according to the California Department of Alcoholic Beverage Control's guidelines for undue concentration.
  - ii. Consider the existing crime rate nearby, especially those crimes involving public drunkenness, the illegal sale or use of narcotics, drugs or alcohol, disturbing the peace, and disorderly conduct, and whether revocation or nuisance proceedings have been initiated for any similar use in the area.
  - iii. That the proposed use will not detrimentally affect nearby Residential Use Districts or sensitive uses.
- c. Permission for multiple approvals to allow alcohol service for three or more tenant spaces may be applied for under a single conditional use permit entitlement, subject to the following:
  - i. Tenant spaces are maintained under a single ownership within a unified complex comprising a combined floor area of 10,000 square feet or greater on the same site.
  - ii. The entitlement application for multiple conditional use permits shall be subject to processes and procedures required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*.

- Open Space Districts -

- iii. Project Review shall be completed for each individual tenant space resulting in approval for each individual tenant space prior to the establishment of the proposed use within the subject tenant space.
- iv. Applications shall detail the square footage of each tenant space, suite or unit number, hours of operation, and specific nature of proposed use for each tenant-operator space.
- v. Each individual tenant space shall be separately addressed with applicable site-specific conditions. Any change in tenant-operator shall be required to apply for Project Review in order to evaluate the applicability of existing conditions and review any potential changes in site operations and conditions.

## DIV. 5B.2. **AGRICULTURAL DISTRICTS**

Agricultural Use Districts emphasize agriculture-related uses while also allowing for residential uses.

### SEC. 5B.2.1. **AGRICULTURAL 1 (A1)**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

## DIV. 5B.3. **RESIDENTIAL DISTRICTS**

Residential Use Districts emphasize residential uses and only allow a minimal amount of compatible services and amenities.

### SEC. 5B.3.1. **RESIDENTIAL 1 (RG1)**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

## SEC. 5B.3.2. RESIDENTIAL 2 (RG2)

### A. Intent

The RG2 Use District is intended to accommodate a wide variety of housing types for a variety of housing needs in a predominantly residential setting supported by local civic and recreational uses providing resources to a residential community.

### B. Allowed Uses & Use Limitations

## C. Supplemental Standards

### 1. Home Occupation

On-site deliveries and shipments related to the commercial use in a home occupation shall not be performed by vehicles having a gross vehicular weight rating designation greater than Class 4 or greater than 16,000 pounds. Deliveries from larger trucks shall occur no more frequently than once every 2 months.

### 2. Wireless Facility, All

The wireless facility shall meet all applicable standards required by Sec. 4C.12.4. (*Wireless Telecommunication Facilities*).

### 3. Recycling Facility, Collection

- a. All recycled goods, temporary installations, debris, trash, and any other material associated with the use, shall be placed or stored in a fully covered and enclosed recycling collection facility and not be left or stored outdoors beyond the hours of operation.
- b. The recycling collection facility enclosure shall be clearly identified with the operator's name, address, telephone number, hours of operation, and a notice that no material shall be left outside the enclosure, and each recycling receptacle shall clearly indicate the type of material to be deposited.

### 4. Resource Extraction, Exploratory Core Hole

The maximum duration of a permit for exploratory core holes shall not exceed 200 days. However, where the Zoning Administrator, pursuant to *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, finds that drilling, testing, and proper abandonment cannot reasonably be completed within 200 days due to depth, deviation, or quantity of temporary geological exploratory core holes, the maximum duration may be increased to a total of 365 days.

### 5. Animal Keeping, Bees

- a. Bee keeping operator shall be registered as a beekeeper with the Los Angeles County Agricultural Commission.
- b. A water source for bees shall be provided at all times on the lot where the bees are kept.

## D. Supplemental Procedures

### 1. Recycling Facilities, Collection

An annual site inspection shall be conducted by LADBS pursuant to *Sec. 13B.10.3. (Annual Inspection Monitoring - Auto Dismantling Yards, Junk Yards, Scrap Metal or Recycling Materials Processing Yards, Recycling Collection Centers, Buyback Centers, Recycling Materials Sorting Facilities, and Cargo Container Storage Yards)*.

## DIV. 5B.4. RESIDENTIAL-MIXED DISTRICTS

Residential-Mixed Use Districts emphasize residential uses and only allow a minimal amount of compatible services and amenities and limited commercial uses.

### SEC. 5B.4.1. RESIDENTIAL-MIXED 1 (RX1)

#### A. Intent

The RX1 Use District is intended to accommodate a wide variety of housing types for a variety of housing needs, in a primarily residential setting supported by neighborhood-serving commercial uses and facilitate the efficient management of municipal resources.

#### B. Allowed Uses & Use Limitations

## C. Supplemental Standards

### 1. Home Occupation

On-site deliveries and shipments related to the commercial use in a home occupation shall not be performed by vehicles having a gross vehicular weight rating designation greater than Class 4 or greater than 16,000 pounds. Deliveries from larger trucks shall occur no more frequently than once every 2 months.

## 2. **Wireless Facility, All**

The wireless facility shall meet all applicable standards required by *Sec. 4C.12.4. (Wireless Telecommunication Facilities)*.

## 3. **Recycling Facility, Collection**

- a. All recycled goods, temporary installations, debris, trash and any other material associated with the use shall be placed or stored in a fully covered and enclosed recycling collection facility and not be left or stored outdoors beyond the hours of operation.
- b. The recycling collection facility enclosure shall be clearly identified with the operator's name, address, telephone number, hours of operation, and a notice that no material shall be left outside the enclosure, and each recycling receptacle shall clearly indicate the type of material to be deposited.

## 4. **Resource Extraction, Exploratory Core Hole**

The maximum duration of a permit for exploratory core holes shall not exceed 200 days. However, where the Zoning Administrator, pursuant to *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, finds that drilling, testing, and proper abandonment cannot reasonably be completed within 200 days due to depth, deviation, or quantity of temporary geological exploratory core holes, the maximum duration may be increased to a total of 365 days.

## 5. **Animal Keeping, Bees**

- a. Bee keeping operator shall be registered as a beekeeper with the Los Angeles County Agricultural Commission.
- b. A water source for bees shall be provided at all times on the lot where the bees are kept.

## D. **Supplemental Procedures**

### 1. **Alcohol Service**

- a. In addition to the notification otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall promptly notify the Council-member that represents the area including the project site of the conditional use application.
- b. In addition to the findings otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also consider:
  - i. That the granting of the application will not result in an undue concentration of uses that dispense alcoholic beverages within a 1,000-foot radius of the lot according to the California Department of Alcoholic Beverage Control's guidelines for undue concentration.

- ii. That the granting of the application will not result in an undue concentration of premises for the sale or dispensing for consideration of alcoholic beverages, including beer and wine, in the area of the City involved, giving consideration to applicable State laws and to the California Department of Alcoholic Beverage Control's guidelines for undue concentration; and also giving consideration to the number and proximity of these establishments within a 1,000-foot radius of the lot, the crime rate in the area (especially those crimes involving public drunkenness, the illegal sale or use of narcotics, drugs or alcohol, disturbing the peace, and disorderly conduct), and whether revocation or nuisance proceedings have been initiated for any use in the area.
  - iii. That the proposed use will not detrimentally affect nearby residentially zoned communities in the area of the City involved, after giving consideration to the distance of the proposed use from sensitive uses, and other establishments dispensing alcoholic beverages, including beer and wine.
- c. Permission for multiple approvals to allow bars for three or more tenant spaces may be applied for under a single conditional use permit entitlement, subject to the following:
- i. Tenant spaces are maintained under a single ownership within a unified complex comprising a combined floor area of 10,000 square feet or greater on the same site.
  - ii. The entitlement application for multiple conditional use permits shall be subject to processes and procedures required by Sec. 13B.2.2. (Class 2 Conditional Use Permit).
  - iii. Project Review shall be completed for each individual tenant space resulting in approval for each individual tenant space prior to the establishment of the proposed use within the subject tenant space.
  - iv. Applications shall detail the square footage of each tenant space, suite or unit number, hours of operation, and specific nature of proposed use for each tenant-operator space.
  - v. Each individual tenant space shall be separately addressed with applicable site-specific conditions. Any change in tenant-operator shall be required to apply for Project Review in order to evaluate the applicability of existing conditions and review any potential changes in site operations and conditions.

### 3. **Recycling Facilities, Collection**

An annual site inspection shall be conducted by LADBS pursuant to *Sec. 13B.10.3. (Annual Inspection Monitoring - Auto Dismantling Yards, Junk Yards, Scrap Metal or Recycling Materials Processing Yards, Recycling Collection Centers, Buyback Centers, Recycling Materials Sorting Facilities, and Cargo Container Storage Yards)*.

## SEC. 5B.4.2. RESIDENTIAL-MIXED 2 (RX2)

### A. Intent

The RX2 Use District is intended to accommodate a wide variety of housing types for a variety of housing needs in a primarily residential setting supported by neighborhood-serving commercial uses, local civic and recreational uses providing resources to a residential community. The district generally limits commercial uses to corner sites and a 1,500 square foot establishment size.

## C. Supplemental Standards

### 1. Home Occupation

On-site deliveries and shipments related to the commercial use in a home occupation shall not be performed by vehicles having a gross vehicular weight rating designation greater than Class 4 or greater than 16,000 pounds. Deliveries from larger trucks shall occur no more frequently than once every 2 months.

## 2. **Wireless Facility, All**

The wireless facility shall meet all applicable standards required by *Sec. 4C.12.4. (Wireless Telecommunication Facilities)*.

## 3. **Recycling Facility, Collection**

- a. All recycled goods, temporary installations, debris, trash and any other material associated with the use shall be placed or stored in a fully covered and enclosed recycling collection facility and not be left or stored outdoors beyond the hours of operation.
- b. The recycling collection facility enclosure shall be clearly identified with the operator's name, address, telephone number, hours of operation, and a notice that no material shall be left outside the enclosure, and each recycling receptacle shall clearly indicate the type of material to be deposited.

## 4. **Resource Extraction, Exploratory Core Hole**

The maximum duration of a permit for exploratory core holes shall not exceed 200 days. However, where the Zoning Administrator, pursuant to *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, finds that drilling, testing, and proper abandonment cannot reasonably be completed within 200 days due to depth, deviation, or quantity of temporary geological exploratory core holes, the maximum duration may be increased to a total of 365 days.

## 5. **Animal Keeping, Bees**

- a. Bee keeping operator shall be registered as a beekeeper with the Los Angeles County Agricultural Commission.
- b. A water source for bees shall be provided at all times on the lot where the bees are kept.

## D. **Supplemental Procedures**

### 1. **Recycling Facilities, Collection**

An annual site inspection shall be conducted by LADBS pursuant to *Sec. 13B.10.3. (Annual Inspection Monitoring - Auto Dismantling Yards, Junk Yards, Scrap Metal or Recycling Materials Processing Yards, Recycling Collection Centers, Buyback Centers, Recycling Materials Sorting Facilities, and Cargo Container Storage Yards)*.

## DIV. 5B.5. **COMMERCIAL-MIXED DISTRICTS**

Commercial-Mixed Use Districts promote neighborhoods with a mixture of uses including commercial and residential.

### SEC. 5B.5.1. **COMMERCIAL-MIXED 1 (CX1)**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

## SEC. 5B.5.2. **COMMERCIAL-MIXED 2 (CX2)**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

### A. **Intent**

The CX2 Use District allows for commercial uses generally within a 50,000 square foot establishment size on the ground story, as well as a wide range of housing types. The Use District is intended to support a broad range of residential, commercial, and civic facility uses to serve surrounding neighborhoods as well as visitors to the area. Public and institutional services and amenities are also allowed.

### C. Supplemental Standards

#### 1. Home Occupation

On-site deliveries and shipments related to the commercial use in a home occupation shall not be performed by vehicles having a gross vehicular weight rating designation greater than Class 4 or greater than 16,000 pounds. Deliveries from larger trucks shall occur no more frequently than once every 2 months.

#### 2. Wireless Facility, All

The wireless facility shall meet all applicable standards required by Sec. 4C.12.4. (*Wireless Telecommunication Facilities*).

#### 3. Lodging

A Lodging use shall not be permitted where it requires a change of use from any residential use.

#### 4. **Recycling Facility, Collection**

- a. All deposited goods and materials, temporary installations, debris, trash, and any other material associated with the use shall be placed or stored in a fully covered and enclosed recycling facility, and not be left or stored outdoors beyond the hours of operation.
- b. Collection facilities shall be emptied in accordance with their posted pick-up schedule, and the area surrounding the collection bins shall be maintained free of overflow goods and materials, litter, debris, posted bills, and graffiti at all times.
- c. In order to prevent unauthorized access to the collection facility, a tamper-resistant locking mechanism shall secure the opening of the collection facility.
- d. The receptacle, container, or bin in which goods and materials are stored shall be fabricated of durable, noncombustible, and waterproof materials.
- e. The recycling collection facility enclosure shall be clearly identified with the operator's name, address, and telephone number, the lot owner's name, address of the lot, the types of items or materials that may be deposited, the pick-up schedule, a notice that no material shall be left outside the enclosure, and instructions to call 311 to register any complaint regarding the facility with the Department of Building and Safety.

#### 5. **Recycling Facility, Donation Bin**

- a. No more than one collection bin shall be located on any lot.
- b. Collection bins shall be emptied in accordance with their posted pick-up schedule, and the area surrounding the collection bins shall be maintained free of overflow goods and materials, litter, debris, posted bills, and graffiti at all times.
- c. In order to prevent unauthorized access to the collection bin, a tamper-resistant locking mechanism shall secure the opening of the collection bin.
- d. The collection bin shall be fabricated of durable, noncombustible, and waterproof materials.
- e. Collection bins shall be illuminated between sunset and sunrise by a light source providing at least 1 footcandle of light.
- f. The collection bin shall be clearly identified with the operator's name, address, and telephone number, the lot owner's name, address of the lot, the types of items or materials that may be deposited, the pick-up schedule, a notice that no material shall be left outside the enclosure, and instructions to call 311 to register any complaint regarding the collection bin with the Department of Building and Safety.

#### 6. **Resource Extraction, Exploratory Core Hole**

The maximum duration of a permit for exploratory core holes shall not exceed 200 days. However, where the Zoning Administrator, pursuant to *Sec. 13B.2.2. (Class 2 Conditional Use*

*Permit*), finds that drilling, testing, and proper abandonment cannot reasonably be completed within 200 days due to depth, deviation, or quantity of temporary geological exploratory core holes, the maximum duration may be increased to a total of 365 days.

## **D. Supplemental Procedures**

### **1. Alcohol Service**

- a.** In addition to the notification otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall promptly notify the Council-member that represents the area including the project site of the conditional use application.
- b.** In addition to the findings otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also consider:
  - i.** That the granting of the application will not result in an undue concentration of uses that dispense alcoholic beverages within a 1,000-foot radius of the lot according to the California Department of Alcoholic Beverage Control’s guidelines for undue concentration.
  - ii.** Consider the existing crime rate nearby, especially those crimes involving public drunkenness, the illegal sale or use of narcotics, drugs or alcohol, disturbing the peace, and disorderly conduct, and whether revocation or nuisance proceedings have been initiated for any similar use in the area.
  - iii.** That the proposed use will not detrimentally affect nearby Residential Use Districts or sensitive uses.
- c.** Permission for multiple approvals to allow alcohol service for three or more tenant spaces may be applied for under a single conditional use permit entitlement, subject to the following:
  - i.** Tenant spaces are maintained under a single ownership within a unified complex comprising a combined floor area of 10,000 square feet or greater on the same site.
  - ii.** The entitlement application for multiple conditional use permits shall be subject to processes and procedures required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*.
  - iii.** Project Review shall be completed for each individual tenant space resulting in approval for each individual tenant space prior to the establishment of the proposed use within the subject tenant space.
  - iv.** Applications shall detail the square footage of each tenant space, suite or unit number, hours of operation, and specific nature of proposed use for each tenant-operator space.

- v. Each individual tenant space shall be separately addressed with applicable site-specific conditions. Any change in tenant-operator shall be required to apply for Project Review in order to evaluate the applicability of existing conditions and review any potential changes in site operations and conditions.

## 2. Bar

- a. In addition to the notification otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall promptly notify the Council-member that represents the area including the project site of the conditional use application.
- b. In addition to the findings otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also consider:
  - i. That the granting of the application will not result in an undue concentration of uses that dispense alcoholic beverages within a 1,000-foot radius of the lot according to the California Department of Alcoholic Beverage Control's guidelines for undue concentration.
  - ii. Consider, the existing crime rate nearby, especially those crimes involving public drunkenness, the illegal sale or use of narcotics, drugs or alcohol, disturbing the peace, and disorderly conduct, and whether revocation or nuisance proceedings have been initiated for any similar use in the area.
  - iii. That the proposed use will not detrimentally affect nearby Residential Use Districts or sensitive uses.
- c. Permission for multiple approvals to allow bars for three or more tenant spaces may be applied for under a single conditional use permit entitlement, subject to the following:
  - i. Tenant spaces are maintained under a single ownership within a unified complex comprising a combined floor area of 10,000 square feet or greater on the same site.
  - ii. The entitlement application for multiple conditional use permits shall be subject to processes and procedures required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*.
  - iii. Project Review shall be completed for each individual tenant space resulting in approval for each individual tenant space prior to the establishment of the proposed use within the subject tenant space.
  - iv. Applications shall detail the square footage of each tenant space, suite or unit number, hours of operation, and specific nature of proposed use for each tenant-operator space.
  - v. Each individual tenant space shall be separately addressed with applicable site-specific conditions. Any change in tenant-operator shall be required to apply for Project Review in order to evaluate the applicability of existing conditions and review any potential changes in site operations and conditions.

### 3. Retail, Alcohol

- a. In addition to the notification otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall promptly notify the Council-member that represents the area including the project site of the conditional use application.
- b. In addition to the findings otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also consider:
  - i. That the granting of the application will not result in an undue concentration of uses that dispense alcoholic beverages within a 1,000-foot radius of the lot according to the California Department of Alcoholic Beverage Control’s guidelines for undue concentration.
  - ii. Consider the existing crime rate nearby, especially those crimes involving public drunkenness, the illegal sale or use of narcotics, drugs or alcohol, disturbing the peace, and disorderly conduct, and whether revocation or nuisance proceedings have been initiated for any similar use in the area.
  - iii. That the proposed use will not detrimentally affect nearby Residential Use Districts or sensitive uses

### 4. Recycling Facilities, Collection

An annual site inspection shall be conducted by LADBS pursuant to *Sec. 13B.10.3. (Annual Inspection Monitoring - Auto Dismantling Yards, Junk Yards, Scrap Metal or Recycling Materials Processing Yards, Recycling Collection Centers, Buyback Centers, Recycling Materials Sorting Facilities, and Cargo Container Storage Yards)*.

### SEC. 5B.5.3. **COMMERCIAL-MIXED 3 (CX3)**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

#### A. **Intent**

The CX3 Use District allows for primarily commercial uses. This District is intended to accommodate a variety of uses, mixing housing with small and large-scale commercial amenities and services.

#### B. **Allowed Uses & Use Limitations**

### C. Supplemental Standards

#### 1. Home Occupation

On-site deliveries and shipments related to the commercial use in a home occupation shall not be performed by vehicles having a gross vehicular weight rating designation greater than Class 4 or greater than 16,000 pounds. Deliveries from larger trucks shall occur no more frequently than once every 2 months.

#### 2. Wireless Facility, All

The wireless facility shall meet all applicable standards required by *Sec. 4C.12.4. (Wireless Telecommunication Facilities)*.

#### 3. Lodging

A lodging use shall not be permitted where it requires a change of use from any residential use.

#### 4. Motor Vehicle Services, Car Wash

Bay doors and other building entrances and exits designed and intended for motor vehicles shall not face any residential use or school unless the residential use or school is located more than 100 feet from the car wash facility.

#### 5. Motor Vehicle Services, Fueling Station

An off-street loading area, in compliance with development standard requirements for loading areas (*Sec. 4C.2.2.3.*), shall be provided to adequately accommodate all loading and unloading of fuel, vehicles, goods, and any other activities requiring the use of commercial vehicles for transportation.

#### 6. Recycling Facility, Collection

- a. All deposited goods and materials, temporary installations, debris, trash, and any other material associated with the use shall be placed or stored in a fully covered and enclosed recycling facility, and not be left or stored outdoors beyond the hours of operation.

- b. Collection facilities shall be emptied in accordance with their posted pick-up schedule, and the area surrounding the collection bins shall be maintained free of overflow goods and materials, litter, debris, posted bills, and graffiti at all times.
- c. In order to prevent unauthorized access to the collection facility, a tamper-resistant locking mechanism shall secure the opening of the collection facility.
- d. The receptacle, container, or bin in which goods and materials are stored shall be fabricated of durable, noncombustible, and waterproof materials.
- e. The recycling collection facility enclosure shall be clearly identified with the operator's name, address, and telephone number, the lot owner's name, address of the lot, the types of items or materials that may be deposited, the pick-up schedule, a notice that no material shall be left outside the enclosure, and instructions to call 311 to register any complaint regarding the facility with the Department of Building and Safety.

#### 7. Recycling Facility, Donation Bin

- a. No more than one collection bin shall be located on any lot.
- b. Collection bins shall be emptied in accordance with their posted pick-up schedule, and the area surrounding the collection bins shall be maintained free of overflow goods and materials, litter, debris, posted bills, and graffiti at all times.
- c. In order to prevent unauthorized access to the collection bin, a tamper-resistant locking mechanism shall secure the opening of the collection bin.
- d. The collection bin shall be fabricated of durable, noncombustible, and waterproof materials.
- e. Collection bins shall be illuminated between sunset and sunrise by a light source providing at least 1 footcandle of light.
- f. The collection bin shall be clearly identified with the operator's name, address, and telephone number, the lot owner's name, address of the lot, the types of items or materials that may be deposited, the pick-up schedule, a notice that no material shall be left outside the enclosure, and instructions to call 311 to register any complaint regarding the collection bin with the Department of Building and Safety.

#### 8. Resource Extraction, Exploratory Core Hole

The maximum duration of a permit for exploratory core holes shall not exceed 200 days. However, where the Zoning Administrator, pursuant to *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, finds that drilling, testing, and proper abandonment cannot reasonably be completed within 200 days due to depth, deviation, or quantity of temporary geological exploratory core holes, the maximum duration may be increased to a total of 365 days.

## D. Supplemental Procedures

### 1. Alcohol Service

- a. In addition to the notification otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall promptly notify the Council-member that represents the area including the project site of the conditional use application.
- b. In addition to the findings otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also consider:
  - i. That the granting of the application will not result in an undue concentration of uses that dispense alcoholic beverages within a 1,000-foot radius of the lot according to the California Department of Alcoholic Beverage Control's guidelines for undue concentration.
  - ii. Consider the existing crime rate nearby, especially those crimes involving public drunkenness, the illegal sale or use of narcotics, drugs or alcohol, disturbing the peace, and disorderly conduct, and whether revocation or nuisance proceedings have been initiated for any similar use in the area.
  - iii. That the proposed use will not detrimentally affect nearby Residential Use Districts or sensitive uses.
- c. Permission for multiple approvals to allow alcohol service for three or more tenant spaces may be applied for under a single conditional use permit entitlement, subject to the following:
  - i. Tenant spaces are maintained under a single ownership within a unified complex comprising a combined floor area of 10,000 square feet or greater on the same site.
  - ii. The entitlement application for multiple conditional use permits shall be subject to processes and procedures required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*.
  - iii. Project Review shall be completed for each individual tenant space resulting in approval for each individual tenant space prior to the establishment of the proposed use within the subject tenant space.
  - iv. Applications shall detail the square footage of each tenant space, suite or unit number, hours of operation, and specific nature of proposed use for each tenant-operator space.
  - v. Each individual tenant space shall be separately addressed with applicable site-specific conditions. Any change in tenant-operator shall be required to apply for Project Review in order to evaluate the applicability of existing conditions and review any potential changes in site operations and conditions.

## 2. Bar

- a. In addition to the notification otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall promptly notify the Council-member that represents the area including the project site of the conditional use application.
- b. In addition to the findings otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also consider:
  - i. That the granting of the application will not result in an undue concentration of uses that dispense alcoholic beverages within a 1,000-foot radius of the lot according to the California Department of Alcoholic Beverage Control's guidelines for undue concentration.
  - ii. Consider the existing crime rate nearby, especially those crimes involving public drunkenness, the illegal sale or use of narcotics, drugs or alcohol, disturbing the peace, and disorderly conduct, and whether revocation or nuisance proceedings have been initiated for any similar use in the area.
  - iii. That the proposed use will not detrimentally affect nearby Residential Use Districts or sensitive uses.
- c. Permission for multiple approvals to allow bars for three or more tenant spaces may be applied for under a single conditional use permit entitlement, subject to the following:
  - i. Tenant spaces are maintained under a single ownership within a unified complex comprising a combined floor area of 10,000 square feet or greater on the same site.
  - ii. The entitlement application for multiple conditional use permits shall be subject to processes and procedures required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*.
  - iii. Project Review shall be completed for each individual tenant space resulting in approval for each individual tenant space prior to the establishment of the proposed use within the subject tenant space.
  - iv. Applications shall detail the square footage of each tenant space, suite or unit number, hours of operation, and specific nature of proposed use for each tenant-operator space.
  - v. Each individual tenant space shall be separately addressed with applicable site-specific conditions. Any change in tenant-operator shall be required to apply for Project Review in order to evaluate the applicability of existing conditions and review any potential changes in site operations and conditions.

### 3. Retail, Alcohol

- a. In addition to the notification otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall promptly notify the Council-member that represents the area including the project site of the conditional use application.
- b. In addition to the findings otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also consider:
  - i. That the granting of the application will not result in an undue concentration of uses that dispense alcoholic beverages within a 1,000-foot radius of the lot according to the California Department of Alcoholic Beverage Control’s guidelines for undue concentration.
  - ii. Consider the existing crime rate nearby, especially those crimes involving public drunkenness, the illegal sale or use of narcotics, drugs or alcohol, disturbing the peace, and disorderly conduct, and whether revocation or nuisance proceedings have been initiated for any similar use in the area.
  - iii. That the proposed use will not detrimentally affect nearby Residential Use Districts or sensitive uses

### 4. Retail, Firearms

In addition to the findings otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also consider the number of firearms available for sale at the lot.

### 5. Retail, Large Format

- a. In addition to a Conditional Use Permit with approval by the City Planning Commission, pursuant to *Sec. 13B.2.3. (Class 3 Conditional Use Permit)*, new large format retail uses are required to prepare an economic impact analysis report for submission to the Department of City Planning and the Economic & Workforce Development Department for review in conjunction with its application to the Department of City Planning. The Economic & Workforce Development Department shall complete its review of the report within 60 days after receipt of the report from the applicant. The report shall identify the following:
  - i. The economic impact on retail businesses within a 3-mile radius, based on the potential to divert or expand the local or regional customer base. Data portraying the existing customer volume of the study area, as well as the anticipated customer volume of the study area, shall be included in the report.
  - ii. The destruction or demolition of any buildings, structures, facilities, or site area containing any of the following uses: any Residential Use, Civic Facility, School, Nature Reserve, Public Open Space, Nature Reserve, or Public Recreation.

- iii. Contribution to local retail market in terms of providing lower in cost or higher in quality goods and services than currently available to residents within a 3-mile radius. A survey of goods and services offered by retail uses within a 3-mile radius shall be included within the report.
  - iv. The number of permanent jobs displaced or created as a direct result of the project. Permanent jobs shall be categorized by employment sector within the report.
  - v. Fiscal impact on City tax revenue, either positive or negative.
  - vi. Viability of future reuse of the project site in the event the business vacates the premises based on factors such as building design, site layout, and lease terms requiring the lot to remain vacant for a significant amount of time.
  - vii. Reasonable expectation that employment solicitation by day laborers will occur at or around the lot.
  - viii. Measures to mitigate any materially adverse impacts identified within the report.
- b.** If determined by the City Planning Commission, or the City Council on appeal, that based on the findings of the report, or any other information received before or at a public hearing, that there is a reasonable expectation that employment solicitation by day laborers will occur at or around the lot, then the following measures may be required to the satisfaction of the City Planning Commission, or the City Council on appeal:
- i. The project shall accommodate employment solicitation by day laborers with dedicated congregation space that meets the following criteria:
    - a) Is sufficient in size based on reasonably expected users;
    - b) Located along, but clear of a pedestrian accessway leading to a primary entrance; and
    - c) Is covered to provide adequate shelter from the weather.
  - ii. Amenities including publicly accessible sources of drinking water, toilet and trash facilities, tables, and seating areas shall also be made available during business hours of operation.
  - iii. A signage plan, indicating the location of signs at appropriate locations throughout the lot, directing users to dedicated congregation areas and amenities.

## 6. Recycling Facilities, All

An annual site inspection shall be conducted by LADBS, pursuant to *Sec. 13B.10.3. (Annual Inspection Monitoring - Auto Dismantling Yards, Junk Yards, Scrap Metal or Recycling Materials Processing Yards, Recycling Collection Centers, Buyback Centers, Recycling Materials Sorting Facilities, and Cargo Container Storage Yards)*.

SEC. 5B.5.4. **COMMERCIAL-MIXED 4 (CX4)**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

## SEC. 5B.5.5. COMMERCIAL-MIXED 5 (CX5)

### A. Intent

The CX5 Use District is intended to support the clustering of small-scale retail, dining, personal service, office, entertainment, cultural and institutional uses catering to immediately surrounding neighborhoods, as well as a wide range of housing types. The district generally limits commercial uses to a 5,000 square foot establishment size on the ground story.

### C. Supplemental Standards

#### 1. Home Occupation

On-site deliveries and shipments related to the commercial use in a home occupation shall not be performed by vehicles having a gross vehicular weight rating designation greater than Class 4 or greater than 16,000 pounds. Deliveries from larger trucks shall occur no more frequently than once every 2 months.

#### 2. Wireless Facility, All

The wireless facility shall meet all applicable standards required by *Sec. 4C.12.4. (Wireless Telecommunication Facilities)*.

#### 3. Lodging

A Lodging use shall not be permitted where it requires a change of use from any residential use.

#### 4. Recycling Facility, Collection

- a. All deposited goods and materials, temporary installations, debris, trash, and any other material associated with the use shall be placed or stored in a fully covered and enclosed recycling facility, and not be left or stored outdoors beyond the hours of operation.
- b. Collection facilities shall be emptied in accordance with their posted pick-up schedule, and the area surrounding the collection bins shall be maintained free of overflow goods and materials, litter, debris, posted bills, and graffiti at all times.

- c. In order to prevent unauthorized access to the collection facility, a tamper-resistant locking mechanism shall secure the opening of the collection facility.
- d. The receptacle, container, or bin in which goods and materials are stored shall be fabricated of durable, noncombustible, and waterproof materials.
- e. The recycling collection facility enclosure shall be clearly identified with the operator's name, address, and telephone number, the lot owner's name, address of the lot, the types of items or materials that may be deposited, the pick-up schedule, a notice that no material shall be left outside the enclosure, and instructions to call 311 to register any complaint regarding the facility with the Department of Building and Safety.

#### **5. Recycling Facility, Donation Bin**

- a. No more than one collection bin shall be located on any lot.
- b. Collection bins shall be emptied in accordance with their posted pick-up schedule, and the area surrounding the collection bins shall be maintained free of overflow goods and materials, litter, debris, posted bills, and graffiti at all times.
- c. In order to prevent unauthorized access to the collection bin, a tamper-resistant locking mechanism shall secure the opening of the collection bin.
- d. The collection bin shall be fabricated of durable, noncombustible, and waterproof materials.
- e. Collection bins shall be illuminated between sunset and sunrise by a light source providing at least 1 footcandle of light.
- f. The collection bin shall be clearly identified with the operator's name, address, and telephone number, the lot owner's name, address of the lot, the types of items or materials that may be deposited, the pick-up schedule, a notice that no material shall be left outside the enclosure, and instructions to call 311 to register any complaint regarding the collection bin with the Department of Building and Safety.

#### **6. Resource Extraction, Exploratory Core Hole**

The maximum duration of a permit for exploratory core holes shall not exceed 200 days. However, where the Zoning Administrator, pursuant to *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, finds that drilling, testing, and proper abandonment cannot reasonably be completed within 200 days due to depth, deviation, or quantity of temporary geological exploratory core holes, the maximum duration may be increased to a total of 365 days.

## D. Supplemental Procedures

### 1. Alcohol Service

- a. In addition to the notification otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall promptly notify the Council-member that represents the area including the project site of the conditional use application.
- b. In addition to the findings otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also consider:
  - i. That the granting of the application will not result in an undue concentration of uses that dispense alcoholic beverages within a 1,000-foot radius of the lot according to the California Department of Alcoholic Beverage Control’s guidelines for undue concentration.
  - ii. Consider, the existing crime rate nearby, especially those crimes involving public drunkenness, the illegal sale or use of narcotics, drugs or alcohol, disturbing the peace and disorderly conduct, and whether revocation or nuisance proceedings have been initiated for any similar use in the area.
  - iii. That the proposed use will not detrimentally affect nearby Residential Use Districts or sensitive uses.
- c. Permission for multiple approvals to allow alcohol service for three or more tenant spaces may be applied for under a single conditional use permit entitlement, subject to the following:
  - i. Tenant spaces are maintained under a single ownership within a unified complex comprising a combined floor area of 10,000 square feet or greater on the same site.
  - ii. The entitlement application for multiple conditional use permits shall be subject to processes and procedures required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*.
  - iii. Project Review shall be completed for each individual tenant space resulting in approval for each individual tenant space prior to the establishment of the proposed use within the subject tenant space.
  - iv. Applications shall detail the square footage of each tenant space, suite or unit number, hours of operation, and specific nature of proposed use for each tenant-operator space.
  - v. Each individual tenant space shall be separately addressed with applicable site-specific conditions. Any change in tenant-operator shall be required to apply for Project Review in order to evaluate the applicability of existing conditions and review any potential changes in site operations and conditions.

## 2. Bar

- a. In addition to the notification otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall promptly notify the Council-member that represents the area including the project site of the conditional use application.
- b. In addition to the findings otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also consider:
  - i. That the granting of the application will not result in an undue concentration of uses that dispense alcoholic beverages within a 1,000-foot radius of the lot according to the California Department of Alcoholic Beverage Control’s guidelines for undue concentration.
  - ii. Consider, the existing crime rate nearby, especially those crimes involving public drunkenness, the illegal sale or use of narcotics, drugs or alcohol, disturbing the peace, and disorderly conduct, and whether revocation or nuisance proceedings have been initiated for any similar use in the area.
  - iii. That the proposed use will not detrimentally affect nearby Residential Use Districts or sensitive uses.
- c. Permission for multiple approvals to allow bars for three or more tenant spaces may be applied for under a single conditional use permit entitlement, subject to the following:
  - i. Tenant spaces are maintained under a single ownership within a unified complex comprising a combined floor area of 10,000 square feet or greater on the same site.
  - ii. The entitlement application for multiple conditional use permits shall be subject to processes and procedures required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*.
  - iii. Project Review shall be completed for each individual tenant space resulting in approval for each individual tenant space prior to the establishment of the proposed use within the subject tenant space.
  - iv. Applications shall detail the square footage of each tenant space, suite or unit number, hours of operation, and specific nature of proposed use for each tenant-operator space.
  - v. Each individual tenant space shall be separately addressed with applicable site-specific conditions. Any change in tenant-operator shall be required to apply for Project Review in order to evaluate the applicability of existing conditions and review any potential changes in site operations and conditions.

## 3. Retail, Alcohol

- a. The Zoning Administrator shall promptly notify the council-member that represents the area including the project site of the conditional use application.

- b. In addition to the findings otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also consider:
  - i. That the granting of the application will not result in an undue concentration of uses that dispense alcoholic beverages within a 1,000-foot radius of the lot according to the California Department of Alcoholic Beverage Control’s guidelines for undue concentration.
  - ii. Consider, the existing crime rate nearby, especially those crimes involving public drunkenness, the illegal sale or use of narcotics, drugs or alcohol, disturbing the peace, and disorderly conduct, and whether revocation or nuisance proceedings have been initiated for any similar use in the area.
  - iii. That the proposed use will not detrimentally affect nearby Residential Use Districts or sensitive uses.

#### 4. **Recycling Facilities, All**

An annual site inspection shall be conducted by LADBS pursuant to *Sec. 13B.10.3. (Annual Inspection Monitoring - Auto Dismantling Yards, Junk Yards, Scrap Metal or Recycling Materials Processing Yards, Recycling Collection Centers, Buyback Centers, Recycling Materials Sorting Facilities, and Cargo Container Storage Yards)*.

## DIV. 5B.6. **COMMERCIAL DISTRICTS**

Commercial Use Districts cater to light industrial and commercial uses including ones that may create more significant impacts, such as vehicle repair and fueling stations.

[Reserved]

## DIV. 5B.7. **INDUSTRIAL-MIXED DISTRICTS**

Industrial-Mixed Use Districts accommodate a mixture of light industrial, office, and research and development activity, with limited residential uses and other compatible uses.

### SEC. 5B.7.1. **INDUSTRIAL-MIXED 1 (IX1)**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

### SEC. 5B.7.2. **INDUSTRIAL-MIXED 2 (IX2)**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

### SEC. 5B.7.3. **INDUSTRIAL-MIXED 3 (IX3)**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

### SEC. 5B.7.4. **INDUSTRIAL-MIXED 4 (IX4)**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

## SEC. 5B.7.5. INDUSTRIAL-MIXED 5 (IX5)

### A. Intent

The IX5 District is intended to accommodate light industrial uses, office space, and research and development activity. The Use District also allows a wide range of commercial uses. Residential uses are limited to Joint Living and Work Quarters and Supportive Housing.

### C. Supplemental Standards

#### 1. Wireless Facility, All

The wireless facility shall meet all applicable standards required by Sec. 4C.12.4. (*Wireless Telecommunication Facilities*).

#### 2. Motor Vehicle Services, General

- a. Bay doors and other building entrances and exits designed and intended for motor vehicle access shall meet the following standards:
  - i. Shall remain closed except during the allowed hours of operation, and
  - ii. Shall not face any frontage lot line.

**- Industrial-Mixed Districts -**

- b. An off-street loading area, in compliance with development standard requirements for loading areas (Sec. 4C.2.2.3.), shall be provided to adequately accommodate all loading, unloading and any other activities requiring the use of commercial vehicles for transportation.
- c. All client vehicles being serviced by a general motor vehicle service use shall be stored on-site.

**3. Motor Vehicle Services, Car Wash**

Bay doors and other building entrances and exits designed and intended for motor vehicles shall not face any residential use or school unless the residential use or school is located more than 100 feet from the car wash facility.

**4. Motor Vehicle Services, Fueling Station**

An off-street loading area, in compliance with development standard requirements for loading areas (Sec. 4C.2.2.3.), shall be provided to adequately accommodate all loading and unloading of fuel, vehicles, goods and any other activities requiring the use of commercial vehicles for transportation.

**5. Outdoor Storage, Cargo Container**

- a. The entire lot shall be graded pursuant to *Chapter 9, Division 70 (Grading, Excavation and Fills) of the LAMC*.
- b. All driveways, accessways, and parking areas shall be covered with a decomposed granite, crushed gravel, or similar material and be treated with dust control methods.
- c. All containers shall be empty and cleaned of any residue which may pose any kind of physical or health risk.

**6. Recycling Facility, Collection**

- a. All deposited goods and materials, temporary installations, debris, trash, and any other material associated with the use shall be placed or stored in a fully covered and enclosed recycling facility, and not be left or stored outdoors beyond the hours of operation.
- b. Collection facilities shall be emptied in accordance with their posted pick-up schedule, and the area surrounding the collection bins shall be maintained free of overflow goods and materials, litter, debris, posted bills, and graffiti at all times.
- c. In order to prevent unauthorized access to the collection facility, a tamper-resistant locking mechanism shall secure the opening of the collection facility.
- d. The receptacle, container, or bin in which goods and materials are stored shall be fabricated of durable, noncombustible, and waterproof materials.

- e. The recycling collection facility enclosure shall be clearly identified with the operator's name, address, and telephone number, the lot owner's name, address of the lot, the types of items or materials that may be deposited, the pick-up schedule, a notice that no material shall be left outside the enclosure, and instructions to call 311 to register any complaint regarding the facility with the Department of Building and Safety.

## 7. **Recycling Facility, Donation Bin**

- a. No more than one collection bin shall be located on any lot.
- b. Collection bins shall be emptied in accordance with their posted pick-up schedule, and the area surrounding the collection bins shall be maintained free of overflow goods and materials, litter, debris, posted bills, and graffiti at all times.
- c. In order to prevent unauthorized access to the collection bin, a tamper-resistant locking mechanism shall secure the opening of the collection bin.
- d. The collection bin shall be fabricated of durable, noncombustible, and waterproof materials.
- e. Collection bins shall be illuminated between sunset and sunrise by a light source providing at least 1 footcandle of light.
- f. The collection bin shall be clearly identified with the operator's name, address, and telephone number, the lot owner's name, address of the lot, the types of items or materials that may be deposited, the pick-up schedule, a notice that no material shall be left outside the enclosure, and instructions to call 311 to register any complaint regarding the collection bin with the Department of Building and Safety.

## 8. **Resource Extraction, Exploratory Core Hole**

The maximum duration of a permit for exploratory core holes shall not exceed 200 days. However, where the Zoning Administrator, pursuant to *Sec. 13B.2.2. (Class 2 Conditional Use Permit)* finds that drilling, testing, and proper abandonment cannot reasonably be completed within 200 days due to depth, deviation, or quantity of temporary geological exploratory core holes, the maximum duration may be increased to a total of 365 days.

## 9. **Animal Keeping, Bees**

- a. Bee keeping operator shall be registered as a beekeeper with the Los Angeles County Agricultural Commission.
- b. A water source for bees shall be provided at all times on the lot where the bees are kept.

## D. Supplemental Procedures

### 1. Alcohol Service

- a. In addition to the notification otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall promptly notify the Council-member that represents the area including the project site of the conditional use application.
- b. In addition to the findings otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also consider:
  - i. That the granting of the application will not result in an undue concentration of uses that dispense alcoholic beverages within a 1,000-foot radius of the lot according to the California Department of Alcoholic Beverage Control’s guidelines for undue concentration.
  - ii. Consider the existing crime rate nearby, especially those crimes involving public drunkenness, the illegal sale or use of narcotics, drugs or alcohol, disturbing the peace, and disorderly conduct, and whether revocation or nuisance proceedings have been initiated for any similar use in the area.
  - iii. That the proposed use will not detrimentally affect nearby Residential Use Districts or sensitive uses.
- c. Permission for multiple approvals to allow alcohol service for three or more tenant spaces may be applied for under a single conditional use permit entitlement, subject to the following:
  - i. Tenant spaces are maintained under a single ownership within a unified complex comprising a combined floor area of 10,000 square feet or greater on the same site.
  - ii. The entitlement application for multiple conditional use permits shall be subject to processes and procedures required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*.
  - iii. Project Review shall be completed for each individual tenant space resulting in approval for each individual tenant space prior to the establishment of the proposed use within the subject tenant space.
  - iv. Applications shall detail the square footage of each tenant space, suite or unit number, hours of operation, and specific nature of proposed use for each tenant-operator space.
  - v. Each individual tenant space shall be separately addressed with applicable site-specific conditions. Any change in tenant-operator shall be required to apply for Project Review in order to evaluate the applicability of existing conditions and review any potential changes in site operations and conditions.

## 2. **Bar**

- a. In addition to the notification otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall promptly notify the Council-member that represents the area including the project site of the conditional use application.
- b. In addition to the findings otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also consider:
  - i. That the granting of the application will not result in an undue concentration of uses that dispense alcoholic beverages within a 1,000-foot radius of the lot according to the California Department of Alcoholic Beverage Control’s guidelines for undue concentration.
  - ii. Consider the existing crime rate nearby, especially those crimes involving public drunkenness, the illegal sale or use of narcotics, drugs or alcohol, disturbing the peace, and disorderly conduct, and whether revocation or nuisance proceedings have been initiated for any similar use in the area.
  - iii. That the proposed use will not detrimentally affect nearby Residential Use Districts or sensitive uses.
- c. Permission for multiple approvals to allow bars for three or more tenant spaces may be applied for under a single conditional use permit entitlement, subject to the following:
  - i. Tenant spaces are maintained under a single ownership within a unified complex comprising a combined floor area of 10,000 square feet or greater on the same site.
  - ii. The entitlement application for multiple conditional use permits shall be subject to processes and procedures required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*.
  - iii. Project Review shall be completed for each individual tenant space resulting in approval for each individual tenant space prior to the establishment of the proposed use within the subject tenant space.
  - iv. Applications shall detail the square footage of each tenant space, suite or unit number, hours of operation, and specific nature of proposed use for each tenant-operator space.
  - v. Each individual tenant space shall be separately addressed with applicable site-specific conditions. Any change in tenant-operator shall be required to apply for Project Review in order to evaluate the applicability of existing conditions and review any potential changes in site operations and conditions.

### 3. Retail, Alcohol

- a. In addition to the notification otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall promptly notify the Council-member that represents the area including the project site of the conditional use application.
- b. In addition to the findings otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also consider:
  - i. That the granting of the application will not result in an undue concentration of uses that dispense alcoholic beverages within a 1,000-foot radius of the lot according to the California Department of Alcoholic Beverage Control’s guidelines for undue concentration.
  - ii. Consider the existing crime rate nearby, especially those crimes involving public drunkenness, the illegal sale or use of narcotics, drugs or alcohol, disturbing the peace, and disorderly conduct, and whether revocation or nuisance proceedings have been initiated for any similar use in the area.
  - iii. That the proposed use will not detrimentally affect nearby Residential Use Districts or sensitive uses

### 4. Retail, Firearms

In addition to the findings otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also consider the number of firearms available for sale at the lot.

### 5. Retail, Large Format

- a. In addition to a Conditional Use Permit with approval by the City Planning Commission, pursuant to *Sec. 13B.2.3. (Class 3 Conditional Use Permit)*, new large format retail uses are required to prepare an economic impact analysis report for submission to the Department of City Planning and the Economic & Workforce Development Department for review in conjunction with its application to the Department of City Planning. The Economic & Workforce Development Department shall complete its review of the report within 60 days after receipt of the report from the applicant. The report shall identify the following:
  - i. The economic impact on retail businesses within a 3-mile radius based on the potential to divert or expand the local or regional customer base. Data portraying the existing customer volume of the study area as well as the anticipated customer volume of the study area shall be included in the report.
  - ii. The destruction or demolition of any buildings, structures facilities or site area containing any of the following uses: any Residential Use, Civic Facility, School, Nature Reserve, Public Open Space, or Public Recreation.

- iii. Contribution to local retail market in terms of providing lower in cost or higher in quality goods and services than currently available to residents within a 3-mile radius. A survey of goods and services offered by retail uses within a 3-mile radius shall be included within the report.
  - iv. The number of permanent jobs displaced or created as a direct result of the project. Permanent jobs shall be categorized by employment sector within the report.
  - v. Fiscal impact on City tax revenue, either positive or negative.
  - vi. Viability of future reuse of the project site in the event the business vacates the premises based on factors such as building design, site layout, and lease terms requiring the lot to remain vacant for a significant amount of time.
  - vii. Reasonable expectation that employment solicitation by day laborers will occur at or around the lot.
  - viii. Measures to mitigate any materially adverse impacts identified within the report.
- b. If determined by the City Planning Commission, or the City Council on appeal, that based on the findings of the report, or any other information received before or at a public hearing that there is a reasonable expectation that employment solicitation by day laborers will occur at or around the lot then the following measures may be required to the satisfaction of the City Planning Commission, or the City Council on appeal:
- i. The project shall accommodate employment solicitation by day laborers with dedicated congregation space that meets the following criteria:
    - a) Is sufficient in size based on reasonably expected users;
    - b) Located along but clear of a pedestrian accessway leading to a primary entrance;  
and
    - c) Is covered to provide adequate shelter from the weather.
  - ii. Amenities including publicly accessible sources of drinking water, toilet and trash facilities, tables, and seating areas shall also be made available during business hours of operation.
  - iii. A signage plan, indicating the location of signs at appropriate locations throughout the lot directing users to dedicated congregation areas and amenities.

## 6. **Outdoor Storage, Cargo Container**

- a. The stacking of cargo containers more than 20 feet high shall only be permitted if a structural analysis done by a licensed engineer or architect in the State of California is submitted to and approved by the Los Angeles Department of Building and Safety (LADBS).

DIV. 5B.8. **INDUSTRIAL DISTRICTS**

SEC. 5B.8.1. **INDUSTRIAL 1 (I1)**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

## SEC. 5B.8.2. INDUSTRIAL 2 (I2)

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

### A. Intent

The I2 District allows heavy commercial, light industrial, and heavy industrial uses as well as a limited amount of commercial activity. This District is intended to support employment and accommodate the most intense industrial activities while minimizing potential disruptions to surrounding uses.

### C. Supplemental Standards

#### 1. Wireless Facility, All

The wireless facility shall meet all applicable standards required by Sec. 4C.12.4. (*Wireless Telecommunication Facilities*).

#### 2. Motor Vehicle Services, General & Commercial Vehicle

- a. Bay doors and other building entrances and exits designed and intended for motor vehicle access shall meet the following standards:
  - i. Shall remain closed except during the allowed hours of operation, and
  - ii. Shall not face any frontage lot line.
- b. An off-street loading area, in compliance with development standard requirements for loading areas (Sec. 4C.2.2.3.), shall be provided to adequately accommodate all loading, unloading, and any other activities requiring the use of commercial vehicles for transportation.
- c. All client vehicles being serviced by a general motor vehicle service use shall be stored on-site.

### 3. **Motor Vehicle Services, Car Wash**

Bay doors and other building entrances and exits designed and intended for motor vehicles shall not face any residential use or school unless the residential use or school is located more than 100 feet from the car wash facility.

### 4. **Motor Vehicle Services, Fueling Station**

An off-street loading area, in compliance with development standard requirements for loading areas (Sec. 4C.2.2.3.), shall be provided to adequately accommodate all loading and unloading of fuel, vehicles, goods, and any other activities requiring the use of commercial vehicles for transportation.

### 5. **Outdoor Storage, Cargo Container**

- a. The entire lot shall be graded pursuant to *Chapter 9, Division 70 (Grading, Excavation and Fills) of the LAMC*.
- b. All driveways, accessways, and parking areas shall be covered with a decomposed granite, crushed gravel, or similar material and be treated with dust control methods.
- c. All containers shall be empty and cleaned of any residue which may pose any kind of physical or health risk.

### 6. **Recycling Facility, Collection**

- a. All deposited goods and materials, temporary installations, debris, trash, and any other material associated with the use shall be placed or stored in a fully covered and enclosed recycling facility, and not be left or stored outdoors beyond the hours of operation.
- b. Collection facilities shall be emptied in accordance with their posted pick-up schedule, and the area surrounding the collection bins shall be maintained free of overflow goods and materials, litter, debris, posted bills, and graffiti at all times.
- c. In order to prevent unauthorized access to the collection facility, a tamper-resistant locking mechanism shall secure the opening of the collection facility.
- d. The receptacle, container, or bin in which goods and materials are stored shall be fabricated of durable, noncombustible, and waterproof materials.
- e. The recycling collection facility enclosure shall be clearly identified with the operator's name, address, and telephone number, the lot owner's name, address of the lot, the types of items or materials that may be deposited, the pick-up schedule, a notice that no material shall be left outside the enclosure, and instructions to call 311 to register any complaint regarding the facility with the Department of Building and Safety.

### 7. **Recycling Facility, Donation Bin**

- a. No more than one collection bin shall be located on any lot.

- Industrial Districts -

- b. Collection bins shall be emptied in accordance with their posted pick-up schedule, and the area surrounding the collection bins shall be maintained free of overflow goods and materials, litter, debris, posted bills, and graffiti at all times.
- c. In order to prevent unauthorized access to the collection bin, a tamper-resistant locking mechanism shall secure the opening of the collection bin.
- d. The collection bin shall be fabricated of durable, noncombustible, and waterproof materials.
- e. Collection bins shall be illuminated between sunset and sunrise by a light source providing at least 1 footcandle of light.
- f. The collection bin shall be clearly identified with the operator's name, address, and telephone number, the lot owner's name, address of the lot, the types of items or materials that may be deposited, the pick-up schedule, a notice that no material shall be left outside the enclosure, and instructions to call 311 to register any complaint regarding the collection bin with the Department of Building and Safety.

**8. Recycling Facilities, Sorting & Processing**

All leachates shall be collected, controlled, disposed of, and shall not be allowed to remain at the lot at any time.

**9. Resource Extraction, Exploratory Core Hole**

The maximum duration of a permit for exploratory core holes shall not exceed 200 days. However, where the Zoning Administrator, pursuant to *Sec. 13B.2.2. (Class 2 Conditional Use Permit)* finds that drilling, testing, and proper abandonment cannot reasonably be completed within 200 days due to depth, deviation, or quantity of temporary geological exploratory core holes, the maximum duration may be increased to a total of 365 days.

**10. Waste Facility, Green Waste**

All leachates shall be collected, controlled, disposed of, and shall not be allowed to remain at the lot at any time.

**11. Waste Facility, Hazardous Waste**

All leachates shall be collected, controlled, disposed of, and shall not be allowed to remain at the lot at any time.

**12. Waste Facility, Solid Waste**

All leachates shall be collected, controlled, disposed of, and shall not be allowed to remain at the lot at any time.

### 13. Animal Keeping, Bees

- a. Bee keeping operator shall be registered as a beekeeper with the Los Angeles County Agricultural Commission.
- b. A water source for bees shall be provided at all times on the lot where the bees are kept.

## D. Supplemental Procedures

### 1. Alcohol Service

- a. In addition to the notification otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall promptly notify the Council-member that represents the area including the project site of the conditional use application.
- b. In addition to the findings otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also consider:
  - i. That the granting of the application will not result in an undue concentration of uses that dispense alcoholic beverages within a 1,000-foot radius of the lot according to the California Department of Alcoholic Beverage Control's guidelines for undue concentration.
  - ii. Consider the existing crime rate nearby, especially those crimes involving public drunkenness, the illegal sale or use of narcotics, drugs or alcohol, disturbing the peace, and disorderly conduct, and whether revocation or nuisance proceedings have been initiated for any similar use in the area.
  - iii. That the proposed use will not detrimentally affect nearby Residential Use Districts or sensitive uses.
- c. Permission for multiple approvals to allow alcohol service for three or more tenant spaces may be applied for under a single conditional use permit entitlement, subject to the following:
  - i. Tenant spaces are maintained under a single ownership within a unified complex comprising a combined floor area of 10,000 square feet or greater on the same site.
  - ii. The entitlement application for multiple conditional use permits shall be subject to processes and procedures required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*.
  - iii. Project Review shall be completed for each individual tenant space resulting in approval for each individual tenant space prior to the establishment of the proposed use within the subject tenant space.
  - iv. Applications shall detail the square footage of each tenant space, suite or unit number, hours of operation, and specific nature of proposed use for each tenant-operator space.

- Industrial Districts -

- v. Each individual tenant space shall be separately addressed with applicable site-specific conditions. Any change in tenant-operator shall be required to apply for Project Review in order to evaluate the applicability of existing conditions and review any potential changes in site operations and conditions.

vi.

**2. Bar**

- a. In addition to the notification otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall promptly notify the Council-member that represents the area including the project site of the conditional use application.
- b. In addition to the findings otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also consider:
  - i. That the granting of the application will not result in an undue concentration of uses that dispense alcoholic beverages within a 1,000-foot radius of the lot according to the California Department of Alcoholic Beverage Control's guidelines for undue concentration.
  - ii. Consider the existing crime rate nearby, especially those crimes involving public drunkenness, the illegal sale or use of narcotics, drugs or alcohol, disturbing the peace, and disorderly conduct, and whether revocation or nuisance proceedings have been initiated for any similar use in the area.
  - iii. That the proposed use will not detrimentally affect nearby Residential Use Districts or sensitive uses.
- c. Permission for multiple approvals to allow bars for three or more tenant spaces may be applied for under a single conditional use permit entitlement, subject to the following:
  - i. Tenant spaces are maintained under a single ownership within a unified complex comprising a combined floor area of 10,000 square feet or greater on the same site.
  - ii. The entitlement application for multiple conditional use permits shall be subject to processes and procedures required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*.
  - iii. Project Review shall be completed for each individual tenant space resulting in approval for each individual tenant space prior to the establishment of the proposed use within the subject tenant space.
  - iv. Applications shall detail the square footage of each tenant space, suite or unit number, hours of operation, and specific nature of proposed use for each tenant-operator space.

- v. Each individual tenant space shall be separately addressed with applicable site-specific conditions. Any change in tenant-operator shall be required to apply for Project Review in order to evaluate the applicability of existing conditions and review any potential changes in site operations and conditions.

### 3. Retail, Alcohol

- a. In addition to the notification otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall promptly notify the Council-member that represents the area including the project site of the conditional use application.
- b. In addition to the findings otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also consider:
  - i. That the granting of the application will not result in an undue concentration of uses that dispense alcoholic beverages within a 1,000-foot radius of the lot according to the California Department of Alcoholic Beverage Control's guidelines for undue concentration.
  - ii. Consider the existing crime rate nearby, especially those crimes involving public drunkenness, the illegal sale or use of narcotics, drugs or alcohol, disturbing the peace, and disorderly conduct, and whether revocation or nuisance proceedings have been initiated for any similar use in the area.
  - iii. That the proposed use will not detrimentally affect nearby Residential Use Districts or sensitive uses.

### 4. Retail, Firearms

In addition to the findings otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also consider the number of firearms available for sale at the lot.

### 5. Retail, Large Format

- a. In addition to a Conditional Use Permit with approval by the City Planning Commission, pursuant to *Sec. 13B.2.3. (Class 3 Conditional Use Permit)*, new large format retail uses are required to prepare an economic impact analysis report for submission to the Department of City Planning and the Economic & Workforce Development Department for review in conjunction with its application to the Department of City Planning. The Economic & Workforce Development Department shall complete its review of the report within 60 days after receipt of the report from the applicant. The report shall identify the following:
  - i. The economic impact on retail businesses within a 3-mile radius based on the potential to divert or expand the local or regional customer base. Data portraying the existing customer volume of the study area as well as the anticipated customer volume of the study area shall be included in the report.

## 6. Outdoor Storage, Cargo Container

- a. The stacking of cargo containers more than 20 feet high shall only be permitted if a structural analysis done by a licensed engineer or architect in the State of California is submitted to and approved by the Los Angeles Department of Building and Safety (LADBS).
- b. An annual site inspection shall be conducted by LADBS, pursuant to *Sec. 13B.10.3. (Annual Inspection Monitoring - Auto Dismantling Yards, Junk Yards, Scrap Metal or Recycling Materials Processing Yards, Recycling Collection Centers or Buyback Centers, Recycling Materials Sorting Facilities, and Cargo Container Storage Yards)*.

## 7. Manufacturing, Heavy, Petroleum and Coal Product Manufacturing

In addition to a Conditional Use Permit with approval by the City Planning Commission, pursuant to *Sec. 13B.2.3. (Class 3 Conditional Use Permit)*, new petroleum-based oil refineries and existing refineries expanding operations beyond the current property lines are required to:

- a. Comply with all of the required Unified Programs (Unified Hazardous Waste and Hazardous Materials Management Regulatory Program). California Environmental Reporting System (CERS) database submittals may serve as proof of compliance.
- b. Submit a health assessment of the project for the surrounding vicinity identifying pollution and population indicators, such as, but not limited to, those analyzed in the California Communities Environmental Health Screening Tool; the number of people affected by the project; short term or permanent impacts caused by the project; likelihood that impacts will occur; and recommended mitigation measures.
- c. Submit a health assessment of the project for the surrounding vicinity identifying pollution and population indicators, such as, but not limited to, those analyzed in the California Communities Environmental Health Screening Tool; the number of people affected by the project; short term or permanent impacts caused by the project; likelihood that impacts will occur; and recommended mitigation measures.
- d. Submit a truck routing plan that minimizes the incidence of a commercial truck traveling past residences, churches, schools, hospitals, public playgrounds, nursing homes, daycare centers, and other similar uses.

## 8. Salvage Yard

An annual site inspection shall be conducted by LADBS pursuant to *Sec. 13B.10.3. (Annual Inspection Monitoring - Auto Dismantling Yards, Junk Yards, Scrap Metal or Recycling Materials Processing Yards, Recycling Collection Centers, Buyback Centers, Recycling Materials Sorting Facilities, and Cargo Container Storage Yards)*.

## 9. Recycling Facilities, All

An annual site inspection shall be conducted by LADBS pursuant to *Sec. 13B.10.3. (Annual Inspection Monitoring - Auto Dismantling Yards, Junk Yards, Scrap Metal or Recycling Materials*

*Processing Yards, Recycling Collection Centers, Buyback Centers, Recycling Materials Sorting Facilities, and Cargo Container Storage Yards).*

## 10. Resource Extraction, General

In addition to a Conditional Use Permit with approval by the City Planning Commission, pursuant to *Sec. 13B.2.3. (Class 3 Conditional Use Permit)*, new resource extraction facilities and existing resource extraction facilities expanding operations beyond the current property lines are required to:

- a. Comply with all of the required Unified Programs (Unified Hazardous Waste and Hazardous Materials Management Regulatory Program). California Environmental Reporting System (CERS) database submittals may serve as proof of compliance.
- b. Submit a health assessment of the project for the surrounding vicinity identifying pollution and population indicators, such as, but not limited to, those analyzed in the California Communities Environmental Health Screening Tool; the number of people affected by the project; short term or permanent impacts caused by the project; likelihood that impacts will occur; and recommended mitigation measures.
- c. Submit a health assessment of the project for the surrounding vicinity identifying pollution and population indicators, such as, but not limited to, those analyzed in the California Communities Environmental Health Screening Tool; the number of people affected by the project; short term or permanent impacts caused by the project; likelihood that impacts will occur; and recommended mitigation measures.
- d. Submit a truck routing plan that minimizes the incidence of a commercial truck traveling past residences, churches, schools, hospitals, public playgrounds, nursing homes, child care centers, and other similar uses.

## 11. Waste Facility, Hazardous Waste

In addition to the other findings required by *Sec. 13B.2.3. (Class 3 Conditional Use Permit)*, the City Planning Commission shall make all of the following findings:

- a. That the proposed location of the facility will not result in an undue concentration of waste processing facilities in the immediate area, will not create a cumulative impact with special consideration given to the location of waste facilities already permitted, and will support the equitable distribution of these facilities citywide.
- b. That the facility will not detrimentally affect nearby residential uses and other sensitive land uses, taking into consideration the number and proximity of residential buildings, churches, schools, hospitals, public playgrounds, nursing homes, daycare centers, and other similar uses within a 1,500-foot radius of the proposed lot.
- c. That the facility operator will provide community benefits as determined appropriate to businesses and residents likely to be impacted by this facility, taking into consideration the location of the proposed lot and nearby uses.

## 12. Waste Facility, Solid Waste

In addition to the other findings required by *Sec. 13B.2.3. (Class 3 Conditional Use Permit)*, the City Planning Commission shall make all of the following findings:

- a. That the proposed location of the facility will not result in an undue concentration of waste processing facilities in the immediate area, will not create a cumulative impact with special consideration given to the location of waste facilities already permitted, and will support the equitable distribution of these facilities citywide.
- b. That the facility will not detrimentally affect nearby residential uses and other sensitive land uses, taking into consideration the number and proximity of residential buildings, churches, schools, hospitals, public playgrounds, nursing homes, daycare centers, and other similar uses within a 1,500-foot radius of the proposed lot.
- c. That the facility operator will provide community benefits as determined appropriate to businesses and residents likely to be impacted by this facility, taking into consideration the location of the proposed lot and nearby uses.

### SEC. 5B.8.3. **INDUSTRIAL 3 (I3)**

#### A. **Intent**

The I3 District is intended to support a wide range of commercial and industrial uses that support commerce, manufacturing, goods movement, and warehousing. Industrial uses are regulated to ensure disruptions to abutting uses and nearby communities are minimized.

#### B. **Allowed Uses & Use Limitations**

### C. Supplemental Standards

#### 1. Wireless Facility, All

The wireless facility shall meet all applicable standards required by *Sec. 4C.12.4. (Wireless Telecommunication Facilities)*.

#### 2. Motor Vehicle Services, General & Commercial Vehicle

- a. Bay doors and other building entrances and exits designed and intended for motor vehicle access shall meet the following standards:
  - i. Shall remain closed except during the allowed hours of operation, and
  - ii. Shall not face any frontage lot line.
- b. An off-street loading area, in compliance with development standard requirements for loading areas (*Sec. 4C.2.2.3.*), shall be provided to adequately accommodate all loading, unloading and any other activities requiring the use of commercial vehicles for transportation.
- c. All client vehicles being serviced by a general motor vehicle service use shall be stored on-site.

#### 3. Motor Vehicle Services, Car Wash

Bay doors and other building entrances and exits designed and intended for motor vehicles shall not face any residential use or school unless the residential use or school is located more than 100 feet from the car wash facility.

#### 4. Motor Vehicle Services, Fueling Station

An off-street loading area, in compliance with development standard requirements for loading areas (*Sec. 4C.2.2.3.*), shall be provided to adequately accommodate all loading and unloading of fuel, vehicles, goods and any other activities requiring the use of commercial vehicles for transportation.

## 5. **Outdoor Storage, Cargo Container**

- a. The entire lot shall be graded pursuant to *Chapter 9, Division 70 (Grading, Excavation and Fills) of the LAMC*.
- b. All driveways, accessways, and parking areas shall be covered with a decomposed granite, crushed gravel, or similar material and be treated with dust control methods.
- c. All containers shall be empty and cleaned of any residue which may pose any kind of physical or health risk.

## 6. **Recycling Facility, Collection**

- a. All deposited goods and materials, temporary installations, debris, trash, and any other material associated with the use shall be placed or stored in a fully covered and enclosed recycling facility, and not be left or stored outdoors beyond the hours of operation.
- b. Collection facilities shall be emptied in accordance with their posted pick-up schedule, and the area surrounding the collection bins shall be maintained free of overflow goods and materials, litter, debris, posted bills, and graffiti at all times.
- c. In order to prevent unauthorized access to the collection facility, a tamper-resistant locking mechanism shall secure the opening of the collection facility.
- d. The receptacle, container, or bin in which goods and materials are stored shall be fabricated of durable, noncombustible, and waterproof materials.
- e. The recycling collection facility enclosure shall be clearly identified with the operator's name, address, and telephone number, the lot owner's name, address of the lot, the types of items or materials that may be deposited, the pick-up schedule, a notice that no material shall be left outside the enclosure, and instructions to call 311 to register any complaint regarding the facility with the Department of Building and Safety.

## 7. **Recycling Facility, Donation Bin**

- a. No more than one collection bin shall be located on any lot.
- b. Collection bins shall be emptied in accordance with their posted pick-up schedule, and the area surrounding the collection bins shall be maintained free of overflow goods and materials, litter, debris, posted bills, and graffiti at all times.
- c. In order to prevent unauthorized access to the collection bin, a tamper-resistant locking mechanism shall secure the opening of the collection bin.
- d. The collection bin shall be fabricated of durable, noncombustible, and waterproof materials.
- e. Collection bins shall be illuminated between sunset and sunrise by a light source providing at least 1 footcandle of light.

- f. The collection bin shall be clearly identified with the operator's name, address, and telephone number, the lot owner's name, address of the lot, the types of items or materials that may be deposited, the pick-up schedule, a notice that no material shall be left outside the enclosure, and instructions to call 311 to register any complaint regarding the collection bin with the Department of Building and Safety.

## 8. Resource Extraction, Exploratory Core Hole

The maximum duration of a permit for exploratory core holes shall not exceed 200 days. However, where the Zoning Administrator, pursuant to *Sec. 13B.2.2. (Class 2 Conditional Use Permit)* finds that drilling, testing, and proper abandonment cannot reasonably be completed within 200 days due to depth, deviation, or quantity of temporary geological exploratory core holes, the maximum duration may be increased to a total of 365 days.

## 9. Animal Keeping, Bees

- a. Bee keeping operator shall be registered as a beekeeper with the Los Angeles County Agricultural Commission.
- b. A water source for bees shall be provided at all times on the lot where the bees are kept.

## D. Supplemental Procedures

### 1. Alcohol Service

- a. In addition to the notification otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall promptly notify the Council-member that represents the area including the project site of the conditional use application.
- b. In addition to the findings otherwise required by *Sec. 13B.2.2. (Class 2 Conditional Use Permit)*, the Zoning Administrator shall also consider:
  - i. That the granting of the application will not result in an undue concentration of uses that dispense alcoholic beverages within a 1,000-foot radius of the lot according to the California Department of Alcoholic Beverage Control's guidelines for undue concentration.
  - ii. Consider the existing crime rate nearby, especially those crimes involving public drunkenness, the illegal sale or use of narcotics, drugs or alcohol, disturbing the peace, and disorderly conduct, and whether revocation or nuisance proceedings have been initiated for any similar use in the area.
  - iii. That the proposed use will not detrimentally affect nearby Residential Use Districts or sensitive uses.
- c. Permission for multiple approvals to allow alcohol service for three or more tenant spaces may be applied for under a single conditional use permit entitlement, subject to the following:

**- Industrial Districts -**

- i. Tenant spaces are maintained under a single ownership within a unified complex comprising a combined floor area of 10,000 square feet or greater on the same site.
- ii. The entitlement application for multiple conditional use permits shall be subject to processes and procedures required by Sec. 13B.2.2. (Class 2 Conditional Use Permit).
- iii. Project Review shall be completed for each individual tenant space resulting in approval for each individual tenant space prior to the establishment of the proposed use within the subject tenant space.
- iv. Applications shall detail the square footage of each tenant space, suite or unit number, hours of operation, and specific nature of proposed use for each tenant-operator space.
- v. Each individual tenant space shall be separately addressed with applicable site-specific conditions. Any change in tenant-operator shall be required to apply for Project Review in order to evaluate the applicability of existing conditions and review any potential changes in site operations and conditions.

**2. Bar**

- a. In addition to the notification otherwise required by Sec. 13B.2.2. (*Class 2 Conditional Use Permit*), the Zoning Administrator shall promptly notify the Council-member that represents the area including the project site of the conditional use application.
- b. In addition to the findings otherwise required by Sec. 13B.2.2. (*Class 2 Conditional Use Permit*), the Zoning Administrator shall also consider:
  - i. That the granting of the application will not result in an undue concentration of uses that dispense alcoholic beverages within a 1,000-foot radius of the lot according to the California Department of Alcoholic Beverage Control's guidelines for undue concentration.
  - ii. Consider the existing crime rate nearby, especially those crimes involving public drunkenness, the illegal sale or use of narcotics, drugs or alcohol, disturbing the peace, and disorderly conduct, and whether revocation or nuisance proceedings have been initiated for any similar use in the area.
  - iii. That the proposed use will not detrimentally affect nearby Residential Use Districts or sensitive uses.
- c. Permission for multiple approvals to allow bars for three or more tenant spaces may be applied for under a single conditional use permit entitlement, subject to the following:
  - i. Tenant spaces are maintained under a single ownership within a unified complex comprising a combined floor area of 10,000 square feet or greater on the same site.

- ii. The entitlement application for multiple conditional use permits shall be subject to processes and procedures required by Sec. 13B.2.2. (Class 2 Conditional Use Permit).
- iii. Project Review shall be completed for each individual tenant space resulting in approval for each individual tenant space prior to the establishment of the proposed use within the subject tenant space.
- iv. Applications shall detail the square footage of each tenant space, suite or unit number, hours of operation, and specific nature of proposed use for each tenant-operator space.
- v. Each individual tenant space shall be separately addressed with applicable site-specific conditions. Any change in tenant-operator shall be required to apply for Project Review in order to evaluate the applicability of existing conditions and review any potential changes in site operations and conditions.

### 3. Retail, Alcohol

- a. In addition to the notification otherwise required by Sec. 13B.2.2. (Class 2 Conditional Use Permit), the Zoning Administrator shall promptly notify the Council-member that represents the area including the project site of the conditional use application.
- b. In addition to the findings otherwise required by Sec. 13B.2.2. (Class 2 Conditional Use Permit), the Zoning Administrator shall also consider:
  - i. That the granting of the application will not result in an undue concentration of uses that dispense alcoholic beverages within a 1,000-foot radius of the lot according to the California Department of Alcoholic Beverage Control's guidelines for undue concentration.
  - ii. Consider the existing crime rate nearby, especially those crimes involving public drunkenness, the illegal sale or use of narcotics, drugs or alcohol, disturbing the peace, and disorderly conduct, and whether revocation or nuisance proceedings have been initiated for any similar use in the area.
  - iii. That the proposed use will not detrimentally affect nearby Residential Use Districts or sensitive uses

### 4. Retail, Firearms

In addition to the findings otherwise required by Sec. 13B.2.2. (Class 2 Conditional Use Permit), the Zoning Administrator shall also consider the number of firearms available for sale at the lot.

### 5. Retail, Large Format

- a. In addition to a Conditional Use Permit with approval by the City Planning Commission, pursuant to Sec. 13B.2.3. (Class 3 Conditional Use Permit), new large format retail uses are required to prepare an economic impact analysis report for submission to the Department

of City Planning and the Economic & Workforce Development Department for review in conjunction with its application to the Department of City Planning. The Economic & Workforce Development Department shall complete its review of the report within 60 days after receipt of the report from the applicant. The report shall identify the following:

- i.** The economic impact on retail businesses within a 3-mile radius based on the potential to divert or expand the local or regional customer base. Data portraying the existing customer volume of the study area as well as the anticipated customer volume of the study area shall be included in the report.
  - ii.** The destruction or demolition of any buildings, structures facilities or site area containing any of the following uses: any Residential Use, Civic Facility, School, Nature Reserve, Public Open Space, or Public Recreation.
  - iii.** Contribution to local retail market in terms of providing lower in cost or higher in quality goods and services than currently available to residents within a 3-mile radius. A survey of goods and services offered by retail uses within a 3-mile radius shall be included within the report.
  - iv.** The number of permanent jobs displaced or created as a direct result of the project. Permanent jobs shall be categorized by employment sector within the report.
  - v.** Fiscal impact on City tax revenue, either positive or negative.
  - vi.** Viability of future reuse of the project site in the event the business vacates the premises based on factors such as building design, site layout, and lease terms requiring the lot to remain vacant for a significant amount of time.
  - vii.** Reasonable expectation that employment solicitation by day laborers will occur at or around the lot.
  - viii.** Measures to mitigate any materially adverse impacts identified within the report.
- b.** If determined by the City Planning Commission, or the City Council on appeal, that based on the findings of the report, or any other information received before or at a public hearing that there is a reasonable expectation that employment solicitation by day laborers will occur at or around the lot then the following measures may be required to the satisfaction of the City Planning Commission, or the City Council on appeal:
- i.** The project shall accommodate employment solicitation by day laborers with dedicated congregation space that meets the following criteria:
    - a)** Is sufficient in size based on reasonably expected users;
    - b)** Located along but clear of a pedestrian accessway leading to a primary entrance;  
and
    - c)** Is covered to provide adequate shelter from the weather.

- ii. Amenities including publicly accessible sources of drinking water, toilet and trash facilities, tables, and seating areas shall also be made available during business hours of operation.
- iii. A signage plan, indicating the location of signs at appropriate locations throughout the lot directing users to dedicated congregation areas and amenities.

#### **6. Outdoor Storage, Cargo Container**

- a. The stacking of cargo containers more than 20 feet high shall only be permitted if a structural analysis done by a licensed engineer or architect in the State of California is submitted to and approved by the Los Angeles Department of Building and Safety (LADBS).
- b. An annual site inspection shall be conducted by LADBS, pursuant to *Sec. 13B.10.3. (Annual Inspection Monitoring - Auto Dismantling Yards, Junk Yards, Scrap Metal or Recycling Materials Processing Yards, Recycling Collection Centers or Buyback Centers, Recycling Materials Sorting Facilities, and Cargo Container Storage Yards)*.

#### **7. Manufacturing Heavy, Salvage Yard**

An annual site inspection shall be conducted by LADBS, pursuant to *Sec. 13B.10.3. (Annual Inspection Monitoring - Auto Dismantling Yards, Junk Yards, Scrap Metal or Recycling Materials Processing Yards, Recycling Collection Centers, Buyback Centers, Recycling Materials Sorting Facilities, and Cargo Container Storage Yards)*.

#### **8. Recycling Facilities, All**

An annual site inspection shall be conducted by LADBS, pursuant to *Sec. 13B.10.3. (Annual Inspection Monitoring - Auto Dismantling Yards, Junk Yards, Scrap Metal or Recycling Materials Processing Yards, Recycling Collection Centers, Buyback Centers, Recycling Materials Sorting Facilities, and Cargo Container Storage Yards)*.

## DIV. 5B.9. PUBLIC DISTRICTS

Public Use Districts promote public and institutional uses and allow a limited amount of compatible uses.

### SEC. 5B.9.1. PUBLIC 1 (P1)

#### A. Intent

The P1 Use District allows for government buildings, structures, offices, and services facilities. This District is intended to provide regulations for the use and development of land owned by a government agency. For most uses, district permissions assume those of the most restrictive adjoining use district.

### C. Supplemental Standards

#### 1. Wireless Facility, All

The wireless facility shall meet all applicable standards required by *Sec. 4C.12.4. (Wireless Telecommunication Facilities)*.

SEC. 5B.9.2. **PUBLIC 2 (P2)**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

## SEC. 5B.9.2. PUBLIC 2 (P2)

### A. Intent

The P2 Use District allows for government buildings, structures, offices, and services facilities. This District is intended to provide regulations for the use and development of land owned by a government agency. For most uses, district permissions assume those of the most permissive adjoining use district.

### SEC. 5C.3.14. **INCIDENTAL TO**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

### SEC. 5C.3.15. **LOT ELIGIBILITY**

#### **A. Intent**

To limit subject uses only to lots having specific qualities required in order to ensure the use is appropriately sited within its surroundings and complies with the intent of the Use District.

#### **B. Applicability**

Applies only when specified by the Use District as a required use standard.

#### **C. Standards**

1. Alley Abutting: Where the applied Use District specifies 'Alley Abutting' for the lot eligibility standard, the subject use may be permitted when the subject use is located on a lot that abuts an alley having a width of 15 feet or greater.
2. Boulevard or Avenue Fronting: Where the applied Use District specifies 'Boulevard or Avenue Fronting' for the lot eligibility standard, the subject use may be permitted when the subject use is located on a lot sharing a lot line with a street designated as a Boulevard or Avenue.
3. Industrial Collector Fronting: Where the applied Use District specifies 'Industrial Collector Fronting' for the lot eligibility standard, the subject use may be permitted when the subject use is located on a lot sharing a lot line with a street designated as a Industrial Collector.
4. Corner Lot: Where the applied Use District specifies 'Corner Lot' for the lot eligibility standard, the subject use may be permitted when the subject use is located on a lot located at the intersection of two streets.
5. Minimum Lot Area: Where the applied Use District specifies 'Minimum Lot Area' for the lot eligibility standard, the subject use may be permitted when the subject use is located on a lot having an area that is equal to or greater than the minimum area specified by the applied Use District.

#### **D. Measurement**

1. Alley width is measured as the narrowest horizontal distance between opposite edges of a designated alley.
2. For lot line determination see *Sec. 14.1.12 (Lot Line Determination)*.
3. For lot area measurement see *Sec. 2C.1.1.D. (Lot Area, Measurement)*.

## **E. Relief**

See the allowed uses and use limitations of the applied *Use District (Part 5B)*.

## DIV. 6A.1. **ORIENTATION**

### SEC. 6A.1.1. **RELATIONSHIP TO ZONE STRING**

A zone string is composed of the following districts, as established in *Sec. 1.5.2. (Zoning Map)*:

The Density District is a separate and independent component of each zone.

### SEC. 6A.1.2. **HOW TO USE ARTICLE 6 (DENSITY)**

#### A. **Identify the Density District**

The fifth component in a zone string identifies the Density District for a property.

#### B. **Density District Standards**

Density Districts standards are located in *Part 6B. (Density Districts)*. Each Density District identifies the standards specific to that Density District.

#### C. **Interpreting Density District Standards**

Each standard in a Density District in *Part 6B. (Density Districts)* provides a reference to *Part 6C. (Density Rules)* where the standard is explained in detail.

# Form District Example:

## Zone String

[LM2-MU2-5] [RG1-**4**]

Find Your Applied Density District

## Part 6B (Density Districts)

**SEC. 6B.1.2 LOT AREA-BASED DISTRICTS**

In FA, 2, 3, 4, 6 Density Districts, the maximum density of household living units is determined using the table below. A lot may contain a maximum of one household living unit and one group living unit, except where limited by the applicable Use District.

Density District	Lot Area per Household Living Unit (min sq-ft) Sec. 6C.1.2	Lot Area per Group Living Unit (min sq-ft) Sec. 6C.1.3
FA	Limited by Floor Area	Limited by Floor Area
2	200	Limited by Floor Area
3	300	150
<b>4</b>	400	200
6	600	300
8	800	400
10	1000	500
12	1200	600
15	1500	750
20	2000	1000
30	3000	1500
40	4000	2000
50	5000	2500
60	6000	3000
N	Not Permitted	Not Permitted

Annotations: "Density District Category" points to the first column, "Density Standard" points to the second and third columns, "Link to Rules" points to the table, and "Specification for Standard" points to the highlighted row for density 4.

Learn More About Your Rules

## Part 6C (District Rules)

**SEC. 6C.1.3 LOT AREA PER GROUP LIVING UNIT**

The maximum number of group living units allowed on a lot based on lot area.

**A. Intent**  
 The intent of regulating the number of group living units based on lot area is to provide a method that ensures there is a specified maximum ratio of group living units in relation to the size of a lot.

**B. Applicability**  
 Lot area per guest room applies to any project that includes group living units in a lot area-based Density District.

**C. Standards**  
 The number of group living units on a lot shall not exceed the maximum established by the applicable Density District in Sec. 6B.1.2. (Lot Area-Based Districts).

**D. Measurement**

- The maximum number of group living units is calculated by dividing the lot area by the group living units per lot area value as outlined in Sec. 6B.1.2. (Lot Area-Based Districts), and can be provided in conjunction with any household living units if permitted on a lot as calculated in Sec. 6C.1.2. (Lot Area per Household Living Unit).
- Lot area is counted only once - for either a household living unit or a group living unit.
- Fractions of units do not count toward an additional household living unit or guest room, except as permitted in Article 9. (Public Benefit Programs).
- When density is designated as Limited by Floor Area, there is no maximum density. Group living units are limited only by the physical constraints of the applicable Form District and are subject to the dimensional requirements in Chapter 9. (Building Regulations).
- When density is designated as Not Permitted, household living units or group living units are not permitted.

**E. Exceptions**  
 Accessory dwelling units, compliant with Sec. 5C.9.1. (Accessory Dwelling Units) and Sec.

### SEC. 6A.1.3. **DENSITY DISTRICT NAMING CONVENTION**

There are two categories of Density Districts, lot-based and lot area-based.

#### A. **Lot-Based Districts**

Lot-Based Districts names include a number, representing the maximum quantity of household dwelling units that are allowed on a lot, followed by the letter "L".

#### B. **Lot Area-Based Districts**

With the exception of the "FA" and "N" Density Districts, lot-based Density District names are a number that represents how many hundreds of square feet of lot area are required per household dwelling unit or efficiency dwelling unit. The FA Density District is an abbreviation for "Floor Area", indicating that floor area is the only practical limit to density in this district and that the effective minimum lot area per household dwelling unit or efficiency dwelling unit is 0 square feet. The N Density District is an abbreviation for "Not Permitted", indicating that no household dwelling units or efficiency dwelling units are allowed in this Density District.

## DIV. 6A.2. **OPENING PROVISIONS**

### SEC. 6A.2.1. **DENSITY INTENT**

The intent of *Article 6 (Density)* is to establish Density Districts, a mechanism that regulates the number of household dwelling units or efficiency dwelling units permitted on any lot, otherwise known as density. Density Districts allow for a wide variety of zoning approaches to housing.

### SEC. 6A.2.2. **DENSITY APPLICABILITY**

#### A. **General**

All projects filed after the effective date of this Zoning Code shall comply with the Density Standards in Article 6 (Density), as further specified below. For vested rights, see *Sec. 1.4.5. (Vested Rights)*, and for continuance of existing development, see *Sec. 1.4.6. (Continuance of Existing Development)*.

#### B. **Project Activities**

- Categories of Density rules apply to a project based on what types of project activities are proposed, as shown in the table below. Typically, more than one project activity will apply to a proposed project (for example, an addition that expands an existing use includes both new construction and a use modification).

DENSITY RULE CATEGORY	PROJECT ACTIVITIES								
	New Construction	Demolition	Lot Modification	Site Modification	Facade Modification	Use Modification	Temporary Use	Renovation	Maintenance & Repair
<i>Div. 6C.1</i> <b>Maximum Density</b>	●	○	●	○	○	●	○	○	○

- = Rules generally apply to this project activity
- = Rules are not applicable

- Project Activities are defined in *Sec. 14.1.15. (Project Activities)*.
- Where a category of Density rules are listed as generally applicable in the table above, and the applied Density District (*Part 6B*) provides specifications for a standard in that Density rule category, the project activity shall meet all applicable Density standards within that Division. This general applicability may be further specified for each standard in the applicability provisions in *Part 6C. (Density Rules)*. Project applicability may also be modified by *Article 12. (Nonconformities)*. Where a Division of the Density District rules is listed as not applicable in the table above, no standards from that Density rule category apply to the project activity.

### C. **Nonconformity**

Nonconformity provides relief from the requirements of Article 6 (Density) for existing lots, site improvements, buildings and structures, and uses that conformed to the zoning regulations, if any, at the time they were established, but do not conform to current district standards or use permissions. No project activity may decrease conformance with any Density Standards in Article 6 (Density) for a nonconforming use, unless otherwise specified by *Div. 12.7. (Nonconforming Density)*.

#### SEC. 6A.2.3. **RELATIONSHIP TO USE DISTRICTS**

- A. When household dwelling units or efficiency dwelling units are permitted by a Use District in *Part 5B. (Use Districts)*, the Density Districts in *Article 6 (Density)* establish limits on the number of household dwelling units or efficiency dwelling units.
- B. Some Use Districts in *Part 5B. (Use Districts)* establish additional requirements for household dwelling units and efficiency dwelling units in addition to those in *Article 6 (Density)*.

#### SEC. 6A.2.4. **RELATIONSHIP TO PUBLIC BENEFIT SYSTEMS**

Affordable housing incentive programs, outlined in *Article 9. (Public Benefit Systems)*, offer a variety of methods to obtain additional density (in excess of the limits established in *Article 6 (Density)* and the applied Density District) in exchange for different affordability levels and types of affordable housing.

#### SEC. 6A.2.5. **RELATIONSHIP TO FORM DISTRICTS**

Form Districts do not directly limit density, but do establish requirements that may result in physical constraints that could impact the number of household dwelling units or efficiency dwelling units that can be accommodated on a lot.

# PART 6B. DENSITY DISTRICTS

<b>Div. 6B.1. Maximum Density . . . . .</b>	<b>6-10</b>
Sec. 6B.1.1. Lot-Based Districts . . . . .	6-10
Sec. 6B.1.2. Lot Area-Based Districts . . . . .	6-11

## DIV. 6B.1. **MAXIMUM DENSITY**

Every Density District has a corresponding maximum density. The maximum density either limits the number of dwelling units allowed based on lot area or indicates a flat limit on the number of dwelling units allowed per lot.

### SEC. 6B.1.1. **LOT-BASED DISTRICTS**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

In 1L, 2L, 3L and 4L Density Districts, the maximum number of dwelling units permitted on a lot is limited according to the table below.

<b>LOT-BASED DISTRICTS</b>	
Density District	Dwelling Units Per Lot (max) <i>Sec. 6C.1.1.</i>
<b>1L</b>	1
<b>2L</b>	2
<b>3L</b>	3
<b>4L</b>	4

**SEC. 6B.1.2. LOT AREA-BASED DISTRICTS**

[Introduced with the Downtown Community Plan via CPC-2014-1582-CA and CPC-2017-432-CPU]

In FA, 2, 3, 4, 6, 8, 10, 12, 15, 20, 25, 30, 40, 50, 60, and N Density Districts, the maximum density of household dwelling units and efficiency dwelling units permitted on a lot is limited according to the table below. A lot may contain any combination of household dwelling units and efficiency dwelling units.

<b>LOT AREA-BASED DISTRICTS</b>		
Density District	Lot Area per Household Dwelling Unit (min SF) <i>Sec. 6C.1.2.</i>	Lot Area per Efficiency Dwelling Unit (min SF) <i>Sec. 6C.1.3.</i>
<b>FA</b>	Limited by Floor Area	Limited by Floor Area
<b>2</b>	200	100
<b>3</b>	300	150
<b>4</b>	400	200
<b>6</b>	600	300
<b>8</b>	800	400
<b>10</b>	1000	500
<b>12</b>	1200	600
<b>15</b>	1500	750
<b>20</b>	2000	1000
<b>25</b>	2500	1250
<b>30</b>	3000	1500
<b>40</b>	4000	2000
<b>50</b>	5000	2500
<b>60</b>	6000	3000
<b>N</b>	Not Permitted	Not Permitted

## DIV. 7A.1. ORIENTATION

### SEC. 7A.1.1. RELATIONSHIP TO ZONE STRING

Alternative Typologies may be used on lots where all districts in the applied zone string are listed as eligible districts in the eligibility table of the proposed Alternate Typology. The proposed Alternate Typology either supersedes or defers to the standards of the underlying applied zone string districts as specified by the proposed Alternate Typology.

### SEC. 7A.1.2. HOW TO USE ARTICLE 7 (ALTERNATE TYPOLOGIES)

#### A. Determine Eligibility

Review each component in a zone string against the eligible districts for an Alternate Typology.

#### B. Form Standards

Form regulations are outlined in subsection D. of each Alternate Typology.

#### C. Frontage Standards

Frontage regulations are outlined in subsection E. of each Alternate Typology.

#### D. Development Standards

Development Standards regulations are outlined in subsection F. of each Alternate Typology.

#### E. Use Standards

Use regulations are outlined in subsection G. of each Alternate Typology.

#### F. Density Standards

Density regulations are outlined in subsection H. of each Alternate Typology.

#### G. Interpret Standards

Each standard in an Alternate Typology in *Part 7B. (Alternate Typologies)* provides a reference to *Part 7C. (Alternate Typology Rules)* where each standard is explained in detail.

# Zone String Example:

### SEC. 7A.1.3. ALTERNATE TYPOLOGY GRAPHICS

#### A. General

1. Illustrations and graphics are included in Article 7 (Alternate Typologies) only to assist users in understanding the intent and requirements of the text. In the event a conflict occurs between the text of Article 7 (Alternate Typologies) and any illustration or graphic, the text prevails.
2. To interpret the Form standard graphics in Article 7 (Alternate Typologies) see *Sec. 2A.1.4.C. (Interpreting Form District Standards)*.
3. To interpret the Frontage standard graphics in Article 7 (Alternate Typologies) see *Sec. 3A.1.4. (Interpreting Frontage District Standards)*.

### SEC. 7A.1.4. ALTERNATE TYPOLOGY NAMING CONVENTION

Alternate Typology names are composed of two components: a typology category and a variation number.

#### A. Typology Category

The first component of each Alternate Typology is a typology category. Typology categories group all typologies with similar allowed uses, characteristics, and intent. Typology categories are organized as follows:

1. Civic Institution
2. Corner Store
3. Small Lot Subdivision
4. Drive-Through
5. Fueling Station

#### B. Variation Number

The last component of each Alternate Typology name is a variation number. Alternate Typologies are numbered based on the Development Standard Districts in which they are eligible, starting with Development Standards District 5 and ending Development Standards District 1.

## DIV. 7A.2. OPENING PROVISIONS

### SEC. 7A.2.1. ALTERNATE TYPOLOGIES INTENT

There are certain cases where the desired physical form for a specific type of development is prohibited by the zoning applied to a lot. In those cases, Alternate Typologies provide an option to override specific standards in the underlying zoning that may otherwise prohibit the desired form. In exchange for providing greater flexibility on particular standards, Alternate Typologies require other higher standards that promote the desired form and ensure projects are contextually appropriate.

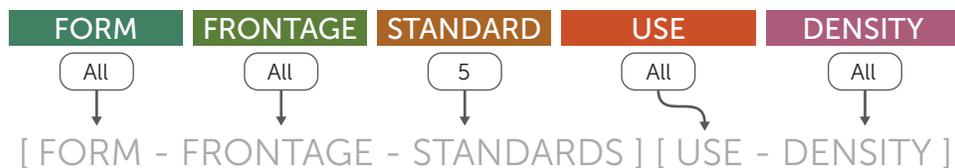

### SEC. 7A.2.2. ALTERNATE TYPOLOGIES APPLICABILITY

#### A. General

All projects approved using an Alternate Typology and filed after the effective date of this Zoning Code (Chapter 1A) shall comply with the applicable Alternate Typology Standards in Article 7 (Alternate Typologies), as further specified below. For vested rights, see *Sec. 1.4.5. (Vested Rights)*, and for continuance of existing development, see *Sec. 1.4.6. (Continuance of Existing Development)*.

#### B. Eligibility

Alternate Typologies are only allowed in eligible districts. Each Alternate Typology provides an eligibility table that lists all zoning districts where the Alternate Typology is allowed. Any lot within one of the eligible zone districts may use the Alternate Typology. When an eligible district is listed with "\_", all variations of the district are eligible (for example, RN\_ includes RN1, RN2 and any other RN variation).

### C. Project Activities

1. Alternate Typology standards apply to project activities as shown in the applicability tables in Part A of the Zone String Articles, 2-6. More than one project activity may apply to a project (for example, an addition may also include the expansion of a use).
2. Where a rule is listed as generally applicable in the applicability tables in Part A of the Zone String Articles, 2-6, the project activity shall meet the applicable Alternate Typology rules within the Division. This general applicability may be further specified for each standard in the applicability provisions in *Part 2C. (Form Rules)*, *Part 3C. (Frontage Rules)*, *Part 3D. (Character Frontage Rules)*, *Part 4C. (Development Standards Rules)*, *Part 5C. (Frontage Rules)*, and *Part 6C. (Frontage Rules)*. Project applicability may also be modified by *Article 12. (Nonconformities)*. Where a Division of the Alternate Typology rules is listed as not applicable in the applicability tables of the Zone String articles, 2-6, the standards within the Division do not apply to the project activity.
3. For more information about project activities, see *Sec. 14.1.15. (Project Activities)*.

### D. Applicable Components of Buildings and Lots

1. Alternate Typology regulations apply to all portions of a lot.
2. Alternate Typology regulations apply to all portions of buildings and structures on a lot.
3. Specific Alternate Typology regulations may further limit which components of buildings and lots are required to comply with the rules in *Part 7C. (Alternate Typology Rules)*.

### E. Nonconformity

1. Where an existing lot, site, building, or structure is nonconforming as to the standards specified by the underlying applied zone string districts, a project is eligible to use Alternate Typology for proposed project activities, provided that the uses on the lot will conform to the use standards of the proposed Alternate Typology once the proposed project is complete. Once any project activity is approved under the rules of an Alternate Typology, no future project activity on that lot may decrease the conformance with any Alternate Typology standard in *Article 7 (Alternate Typologies)*, except as specified by the following provision.
2. *Article 12. (Nonconformity)* provides relief from the requirements of *Article 7 (Alternate Typologies)*, for existing lots, site improvements, buildings, structures, and uses that conformed to the zoning regulations, if any, at the time they were established, but do not conform to current district standards or use permissions. No proposed project activity using an Alternate Typology may decrease the conformance with any Form, Frontage, Development Standards, Use, or Density standard in *Article 7 (Alternate Typologies)*, unless otherwise specified in *Div. 12.2. (Form Exceptions)*, *Div. 12.3. (Frontage Exceptions)*, *Div. 12.4. (Development Standards Exceptions)*, *Div. 12.5. (Use Exceptions)*, or *Div. 12.6. (Density Exceptions)*.

### SEC. 7A.2.3. **RELATIONSHIP TO ZONING DISTRICTS**

- A. Where a standard is listed in an Alternate Typology, the specification listed for the standard in the Alternate Typology supersedes the specification listed in the underlying zone string districts for the same standard.
- B. The underlying zone string district standard applies where an Alternate Typology:
  - 1. Defers to the underlying districts (for example, "Set by Form District");
  - 2. Provides no specification for a standard listed by the underlying zone string districts; or
  - 3. Does not list a standard that is listed by the underlying zone string districts.

### SEC. 7A.2.4. **RELATIONSHIP TO SPECIFIC PLANS & SUPPLEMENTAL DISTRICTS**

- A. Alternate Typologies do not supersede the requirements of Specific Plans or Supplemental Districts.
- B. Special Districts are not eligible to use Alternate Typologies.

### B. Intent

The Civic Institution 2 Alternate Typology is intended to promote placemaking through architectural monuments and publicly accessible spaces. This Alternate Typology allows greater design flexibility for civic institutions to differentiate civic assets from the surrounding urban fabric, while maintaining standards essential for ensuring all projects actively contribute to a highly walkable urban environment.

### C. Review

Administrative review is required, see *Sec. 14.5.1. (Administrative Review)*.

<b>B</b> Active wall spacing (max)	30'	40'
<b>ENTRANCES</b>	Sec. 7C.1.2.	
<b>C</b> Street-facing entrance	Required	n/a
<b>D</b> Entrance spacing (max)	100'	150'
Required entry feature	Yes	No
<b>E</b> Entry feature options	<ul style="list-style-type: none"> <li>• Recessed Entry</li> <li>• Covered Entry</li> </ul>	
<b>GROUND STORY</b>	Sec. 7C.1.2.	
Ground story height (min)	n/a	n/a
Ground floor elevation (min/max)	n/a	n/a

\*Ground story window and door glazing may be screened for up to 50% of the glazed area.

## F. Development Standards

Set by applied *Development Standard District (Part 4B)*.

## G. Use Standards

1. For a minimum of 20 years after the issuance of a Certificate of Occupancy, no less than 75% of the total floor area on the lot shall be designated for one or more of the following uses:
  - a. Civic Facility: All (examples include community centers, museums, and libraries);
  - b. Office, Government;
  - c. Public Safety Facility (examples include fire and police stations);
  - d. Religious Assembly (examples include churches, mosques, synagogues, and temples);
  - e. School: K-12;
  - f. School: Post-Secondary;
  - g. Social Services; and
  - h. Transit Station.
2. Once 20 years have elapsed, all floor area on the lot may be designated for any use allowed in the applied *Use District (Part 5B)*.
3. For additional Use District standards, see the applied Use District (Part 5B).

## H. Density Standards

Set by the applied Density District (Part 6B).

## DIV. 7B.2. CORNER STORE

## SEC. 7B.2.1. CORNER STORE 1

### A. Eligibility

1. Eligible Districts	<b>FORM</b>	<b>FRONTAGE</b>	<b>STANDARD</b>	<b>USE</b>	<b>DENSITY</b>
	All	All	3 & 4	RX_	All

### 2. Eligible Lots

The Corner Store 1 Alternate Typology is eligible only on lots meeting the following standards:

- a. Shall have an area no greater than 10,000 square feet, and
- b. Shall be a corner lot.

### B. Intent

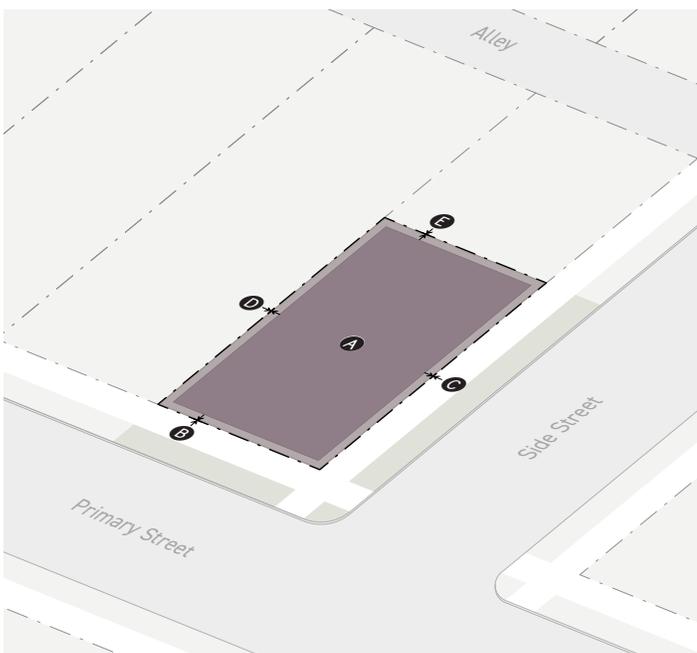

The Corner Store 1 Alternate Typology is intended to accommodate small-scale, community serving commercial uses in a scale appropriate for predominantly residential settings. This Alternate Typology intends to improve the walkability of residential neighborhoods, provide surrounding residents with amenities within a convenient distance of their homes, and support community-oriented small businesses development.

### C. Review

Administrative review is required, see *Sec. 14.5.1. (Administrative Review)*.

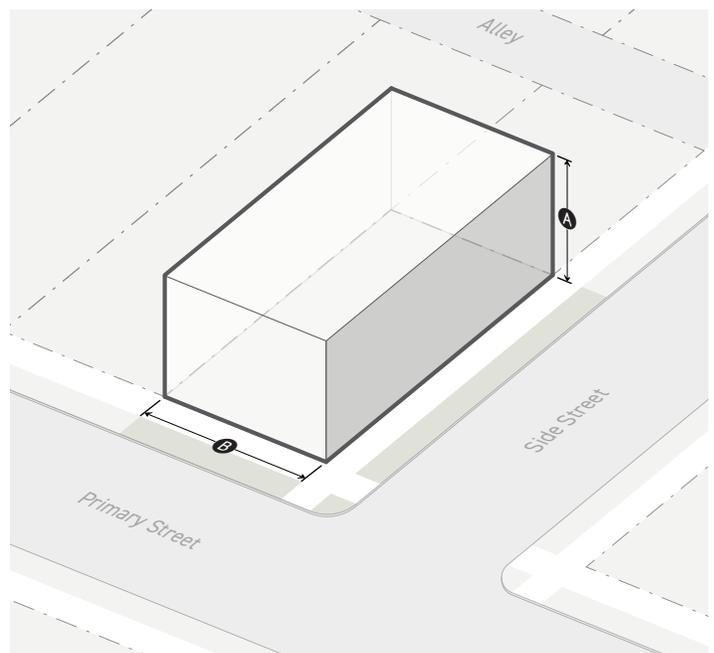

## D. Form Standards

Non-residential	-2'/2'	-2'/2'

## F. Development Standards

Set by applied *Development Standard District (Part 4B.)*.

## G. Use Standards

1. For a minimum of 10 years after the issuance of a Certificate of Occupancy, a minimum of 500 square feet of ground story floor area shall be designated for General Commercial Uses. Where the total building coverage on the lot is less than 1,500 square feet, the minimum ground story floor area designated for General Commercial Uses may be less than 500 square feet but shall be no less than 33% of the total building coverage.
2. Once 10 years have elapsed, the required ground story floor area designated for General Commercial Uses may be designated for any use allowed in the applied *Use District (Part 5B)*.
3. Any floor area provided beyond the minimum required for General Commercial Uses may be designated for any use allowed in the applicable Use District.
4. For additional Use rules, see the applied *Use District (Part 5B)*.

## H. Density Standards

Set by the applied *Density District (Part 6B.)*.

## I. Relief

A reduction of up to 5 years to the amount of time that commercial floor area is required to be occupied by a General Commercial Use may be reduced up to 5 years requested in accordance with Sec. 13.B.2.2. (Class 2 Conditional Use Permit).

## DIV. 7B.3. **SMALL LOT SUBDIVISION**

## SEC. 7B.3.1. SMALL LOT 1

### A. Eligibility

- | 1. Eligible Districts | FORM    | FRONTAGE            | STANDARD     | USE                      | DENSITY       |
|-----------------------|---------|---------------------|--------------|--------------------------|---------------|
|                       | V_ & L_ | MU_, G_, LF_, & WH_ | 1, 2, 3, & 4 | RG_, RX_, C_, CX_, & IX_ | FA through 25 |
2. Eligible Lots

Small Lot Subdivision 1 Alternate Typology is eligible on lots having a lot width no greater than 80 feet. For lots greater than 80 feet wide, see *Small Lot Subdivision 2 Alternate Typology (Sec. 7B.3.2.)*.

### B. Intent

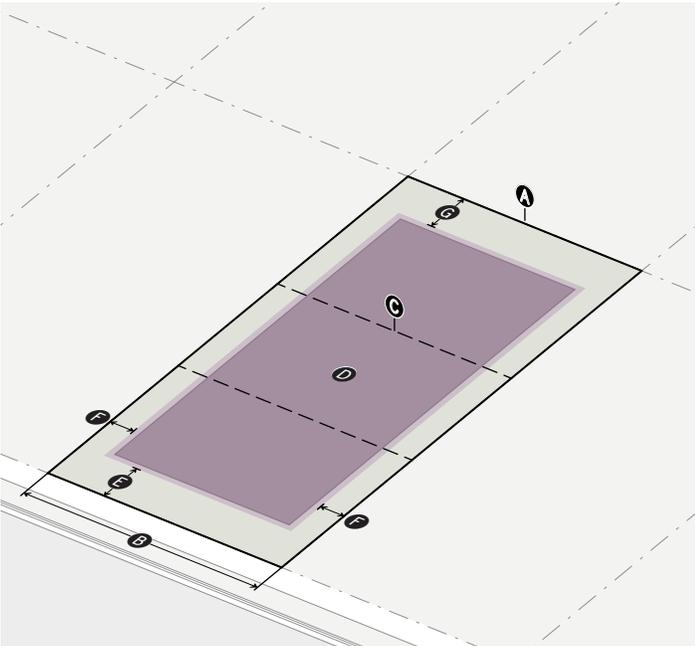

The Small Lot Subdivision 1 Alternate Typology is intended to encourage the development of fee-simple property ownership in a compact urban form. This Alternate Typology modifies standard subdivision rules to provide greater flexibility, while maintaining standards essential for ensuring all projects actively contribute to a highly walkable urban environment.

### C. Review

1. Administrative review is required, see *Sec. 14.5.1. (Administrative Review)*.
2. If the project involves a subdivision it shall be reviewed pursuant to the applicable provisions of *Article 11 (Division of Land)*.

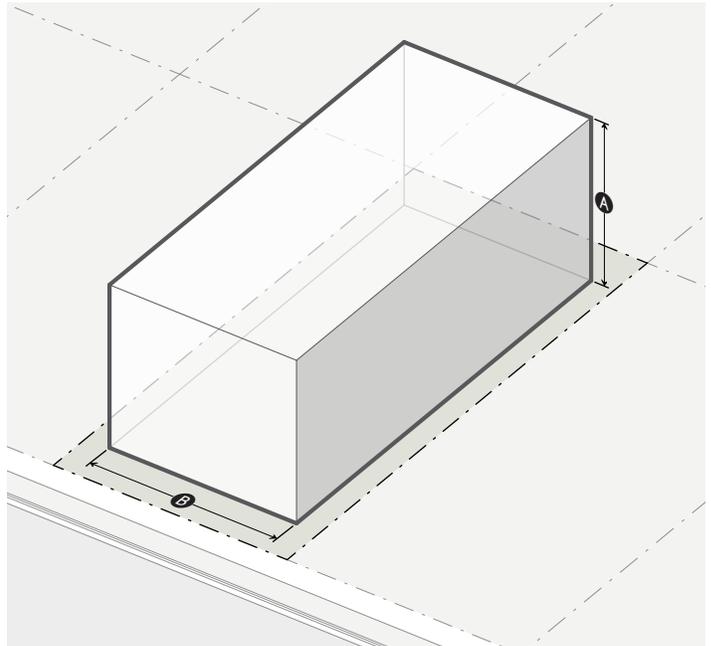

## D. Form Standards

Residential	-2'/5'	-2'/5'
Non-residential	-2'/2'	-2'/2'

## F. Development Standards

### 1. Pedestrian Access

In addition to any site access pedestrian standards specified by the applied *Development Standards District (Part 4B)*, small lot subdivisions shall meet the following pedestrian access standards:

- a. Small lot subdivisions shall provide a shared pedestrian accessway meeting the following standards:
  - i. Shall have a minimum width of 4 feet.
  - ii. Shall connect from the sidewalk, or other publicly accessible pedestrian facility along the frontage lot line, to all common open spaces, mailboxes, trash enclosures, and each required pedestrian entrance.
  - iii. Shall be accessible to users of all sub-lots included in the small lot subdivision.
  - iv. Shall be physically separated from and uninterrupted by motor vehicle use areas except where required to cross a drive aisle or driveway. Physical separation methods may include, curbs of no less than 4 inches in height, a planting area having no horizontal dimension less than 18 inches, or bollards, raised planters or similar containment methods, no less than 12 inches in height and separated by no more than 5 feet.
- b. Each unit that does not include a street-facing entrance accessible from a pedestrian accessway, shall provide a pedestrian entrance that meets the following standards:
  - i. Shall face the required shared pedestrian accessway.
  - ii. Shall provide an entry feature meeting the standards for one of the allowed entry features options specified by the the *Small Lot Subdivision 1 Frontage Standards table (Sec. 7B.3.1.E.)*. For the purposes of meeting entry feature standards, a pedestrian access that faces a linked pedestrian access way shall be considered a street-facing entrance

### 2. Additional Rules

For additional Development Standards rules, see the applied *Development Standard District (Part 4B.)* and *Development Standards Rules (Part 4C.)*.

## G. Use Standards

Set by the applied *Use District (Part 5B.)*.

## H. Density Standards

Set by the applied *Density District (Part 6B.)*.

**Inventory of CRA Mitigation Measures**

Adelante Eastside Redevelopment Project Final Program EIR Mitigation Measures

Impact Area	Mitigation Measure	Reason for Deleting Mitigation Measures	Impact of Removing Mitigation Measure
Land Use	<p>LU-1: Commercial Development. The development of sites within commercial corridors shall consider the effects of commercial or housing development on adjacent residential properties. Towards this end, screening, setbacks, landscaping, transitional building heights, the location of loading docks and delivery areas, and appropriate improvements to selected intersections and roadway segments shall be designed to minimize adverse effects and/or nuisances.</p>	<p>Not necessary and infeasible. The mitigation is inconsistent with current City policy, as well as the policies and programs in the proposed Boyle Heights Community Plan. The mitigation measure is derived from an older zoning system, and does not comport with the various new and more detailed Use Districts and Development Standards that are proposed as part of the Project. These new zoning regulations better manage the compatibility between residential and commercial uses, and that are proposed to be applied to by-right projects. Further, the mitigation measure is inconsistent with the City, and the Boyle Heights Community Plan's goal to reduce Vehicle Miles Traveled by facilitating a more robust mix of uses within proximity to transit resources located throughout the Community Plan Area.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.10 (Land Use) less than significant impacts related to inconsistency with land use plans and policies and Section 4.1 (Aesthetics) less than significant impact related to scenic quality.</p>
	<p>LU-2 Industrial Development. The development on vacant sites within industrial areas shall consider the effects of industrial developments on nearby residential and sensitive public uses (e.g., schools and hospitals) within or next to the proposed Project Area. Similar to commercial development, design considerations shall be incorporated to minimize adverse effects on adjacent sensitive uses.</p>	<p>Not necessary and infeasible. The mitigation is inconsistent with the policies and programs proposed under the Proposed Plan. The Proposed Plan restricts traditional industrial uses that have historically necessitated buffering to a smaller geography (in the northwestern and southern portion of the Plan Area) than applied under the Redevelopment Plan. The Proposed Plan also proposes more contemporary Development Standards for both more traditional industrial uses, as well as newer light industrial that address buffering between residential and industrial uses.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.10 (Land Use) less than significant impacts related to inconsistency with land use plans and policies and Section 4.1 (Aesthetics) less than significant impact related to scenic quality.</p>
	<p>LU-3 Mixed-Use Development. Development siting criteria and design criteria shall be established for the location of residential uses within a commercial zone (e.g., mixed use situations), to minimize potential land use conflicts and nuisances.</p>	<p>Not necessary and infeasible. The mitigation is inconsistent with current City policy, as well as the policies and programs proposed under the Proposed Plan. The mitigation measure is based on an older zoning system and policy direction, and is not consistent with the new and more detailed Use Districts and Development Standards that are proposed as part of the Project. These new regulations and updated policy direction better manage the compatibility between residential and commercial uses and the regulations are proposed to be applied to by-right projects. Further, the mitigation measure is inconsistent with the City and the Proposed Plan's goal to reduce Vehicle Miles Traveled through regulations that allow a mix of uses within proximity to transit resources located throughout the Community Plan Area. Lastly, the City can continue to identify and mitigate project-specific light, glare, and noise effects consistent with project review (same as the current Site Plan Review) and other similar discretionary approval processes.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.10 (Land Use) less than significant impacts related to inconsistency with land use plans and policies and Section 4.1 (Aesthetics) less than significant impacts related to scenic quality.</p>
	<p>LU-4 Zoning Consistency. All new development proposals shall be submitted to CRA for determination of conformance with the Redevelopment Plan and to the Building and Safety Department of the City of Los Angeles for a determination of consistency with the existing General Plan zoning designation for the site, unless the proposed development is otherwise exempted from the need for a consistency determination pursuant to the Planning and Zoning Code ordinances. Prior to the issuance of a building permit, new development that is found to be inconsistent with existing zoning shall obtain the necessary zone change for the project site, conditional use permits, use variance, or other action as required by the ordinances of the City's Planning and Zoning Code.</p>	<p>Not necessary and infeasible. Prior to the issuance of a building permit, all new development proposals are submitted to the Department of Building and Safety to determine if it is consistent with the applicable zoning regulations, and if the project is inconsistent with existing zoning and/or requires a conditional use permit, it is submitted to the LA City Planning for additional review and entitlement processing.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.10 (Land Use) less than significant impacts related to inconsistency with land use plans, policies and zoning.</p>
	<p>LU-5 Truck Routes. Truck routes shall be identified and visible signs installed. Truck and employee parking prohibition signs shall be posted in adjacent residential neighborhoods or other sensitive land uses such as school sites, as needed to prevent intrusions into such sensitive areas.</p>	<p>Not necessary and infeasible. Sec. 80.36.1 (Restricted Use of Certain Streets) of the Los Angeles Municipal Code notes that the Department of Transportation is authorized to erect signs prohibiting vehicles over 6,000 pounds that cause traffic congestion, create a hazard to life or property, or detrimentally affect public welfare, and when alternate routes are available. In addition, as part of AB 617 (California Safe Schools) two sites in the CPA (Clarencia between 4th &amp; 6th St., and the freeway underpass on Whittier between Fresno and Lorena) were approved for CARB "No Idling" signage with the intent to reduce air pollution.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.10 (Land Use) less than significant impacts related to inconsistency with land use plans and policies and sections 4.14 (Transportation and Traffic) for less than significant impacts related to traffic and congestion, and 4.2 (Air Quality) related to impacts of substantial pollutant concentration exposure on sensitive receptors.</p>
	<p>LU-6 Los Angeles River Master Plan. The Community Redevelopment Agency shall review the LARMP and coordinate with the County of Los Angeles to ensure consistency between the Adelante Eastside Redevelopment Plan and the LARMP.</p>	<p>Not necessary and infeasible. The Proposed Plan's zoning includes new Form Districts and Use Districts that provide a set of uses and design standards that implement the vision and intent of the LARMP. The zoning includes regulations to ensure that uses are oriented toward the river, and provide landscaping, pedestrian connections, and building frontages along the river.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.10 (Land Use) less than significant impacts related to inconsistency with land use plans and policies and Section 4.1 (Aesthetics) less than significant impact related to scenic quality.</p>

Adelante Eastside Redevelopment Project Final Program EIR Mitigation Measures

Impact Area	Mitigation Measure	Reason for Deleting Mitigation Measures	Impact of Removing Mitigation Measure
<p>Housing, Population, and Employment</p>	<p>HPE-1: Relocation Assistance. Displaced residential and business property owners and tenants shall receive assistance under the established state and local relocation assistance procedures as explained below: Residential Displacement. Housing displacement would occur in situations where a residential property on industrially zoned land located adjacent to an industrial area is needed for industrial expansion. Such displacement could occur through private initiative with or without assistance from the CRA.</p> <p>In instances where a private developer purchases the property without CRA assistance, the private developer would be required, in accordance with the City of Los Angeles Municipal Code and state law, to provide relocation assistance to tenants displaced by the purchase, in addition to compensating the property owner for the sale of the property. In general, the City of Los Angeles Planning and Zoning Code states that the party responsible for the displacement would pay a standard per-unit relocation assistance fee to each household, in order to assist such tenants in meeting costs of relocation, higher rents for replacement housing, and related expenses of moving.</p> <p>In cases where the CRA provides financial assistance to the developer, the displaced tenant would receive relocation assistance pursuant to city and state relocation policies and CRA relocation policies developed specifically for the proposed Redevelopment Project Area. In cases where a public entity is involved in the acquisition, the State of California Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1974, revised effective January 1, 1991, (California Government Code, Chapter 16, Sections 7260-7277) would apply. This state law establishes a uniform policy for the fair and equitable treatment of persons, as well as businesses, displaced as a direct result of programs or projects undertaken by a public entity. The Relocation Assistance Act shall be administered in a manner that is consistent with fair housing requirements and that assures all persons their rights under Title VUI (Public Law 90-284), commonly known as the Civil Rights Act of 1968 and Title VI of the Civil Rights Act of 1964. Efforts will be made to find suitable replacement housing within the proposed Redevelopment Project Area when the tenant desires to remain in the community.</p> <p>In all residential acquisitions, attempts would be made by the potential developer and CRA to purchase the residential property from the property owner through a negotiated agreement. If a</p>	<p>Not necessary and infeasible. The impact being addressed by this mitigation measure is a social economic impact and not a CEQA impact. There is no substantial evidence to support significant environmental impacts related to residential and business tenant displacement. These mitigation measures relate to relocation assistance that is only applicable to Redevelopment Agencies. As a matter of policy the City finds that using City funds to provide relocation assistance to residential tenants and business property owners and tenants is not the best use of City funds or a desirable public policy.</p> <p>However, as a matter of policy, the City has established multiple programs to support housing opportunities for a range of incomes, including the following: City's Just Cause Eviction Ordinance - Just cause eviction statutes are laws that stipulate specific reasons and conditions for which tenants can legally be evicted for. These are called "just causes" which can include failure to pay rent or violations of lease term.</p> <p>The City of Los Angeles' Rent Stabilization Ordinance (RSO) protects tenants from excessive rent increases, while allowing landlords a reasonable return on their investments. These ordinances limit rent increases to certain percentages, but California state law allows landlords to raise rents to the market rate once the unit becomes vacant.</p> <p>The City of Los Angeles' Condominium Conversion Regulation – The converting of rental units to condominiums impacts the City's vital rental housing supply and has removed vital housing stock from the rental market. Tenant relocation assistance regulations prohibit landlords from removing tenants from units until they are adequately relocated. Regulations also prohibit conversions unless the city or regional vacancy rate is five percent or less. This regulation is to preserve the supply of housing and protect tenants affected by conversions.</p> <p>SB 330 - Establishes the Housing Crisis Act of 2019, which accelerates housing production in California by streamlining the permitting and approval processes. It also provides protections for occupants by requiring that existing units be replaced by equivalent new units and occupants can live in the existing units up to six months prior to demolition. Occupants also must receive relocation assistance, have first right-of-return, and can move</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.10 (Land Use) less than significant impacts related to inconsistency with land use plans and policies and Section 4.12 (Population and Housing) less than significant impacts related to unplanned growth and net loss or displacement of housing.</p>
	<p>HPE-2: Replacement of Affordable Housing. Many of the dwelling units that would be displaced may provide affordable housing. These units shall be replaced on a 1.25:1 ratio basis (1.25 new replacement units for each unit displaced) so as to assure no net loss in affordable housing.</p>	<p>Infeasible and Unnecessary. As shown in the Draft EIR in Section 4.12, the Proposed Plan is not expected to result in significant environmental impacts from reasonably anticipated development as a result of a loss of housing. This measure addresses socio-economic impacts without evidence of it resulting indirectly in a significant impact to the physical environment. As such, it is not a CEQA impact. Per the City's Rent Stabilization Ordinance, removal of rent-controlled units under the state's Ellis Act must either have a one-for-one replacement with affordable units or ensure that 20% of new units are affordable - whichever number is higher. In addition, SB 330 requires that new housing development projects replace all existing or demolished affordable Protected Units. Protected Units are those residential dwelling units that are or were within the 5 years prior to the owner's application for a Replacement Unit Determination: (1) subject to a recorded covenant, ordinance, or law that restricts rents to levels affordable to persons and families of lower or very low income, (2) subject to any form of rent or price control through a public entity's valid exercise of its police power within the 5 past years, (3) occupied by lower or very low income households (an affordable Protected Unit), or (4) that were withdrawn from rent or lease per the Ellis Act, within the past 10 years.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.10 (Land Use) less than significant impacts related to inconsistency with land use plans and policies and Section 4.12 (Population and Housing) less than significant impacts related to unplanned growth and net loss or displacement of housing.</p>

Adelante Eastside Redevelopment Project Final Program EIR Mitigation Measures

Impact Area	Mitigation Measure	Reason for Deleting Mitigation Measures	Impact of Removing Mitigation Measure
Urban Design/Visual Quality	V-1 Urban Design Review and Guidelines. If the proposed Adelante Eastside Redevelopment Project is adopted, the CRA shall review all new developments to ensure that all applicable Planning and Zoning Code provisions and Landscape Ordinance provisions are adhered to and implemented. Individual projects shall be reviewed on a case-by-case basis to ensure that proposed project plans incorporate appropriate building heights, setbacks, lot coverage, landscaping, and design. On a case-by-case basis, where appropriate, the CRA should also develop flexible design guidelines for certain areas to ensure that design and aesthetic mitigation measures are incorporated to enhance the visual character of the proposed Project Area.	Not necessary and Infeasible. The City Planning Department and the Department of Building and Safety are responsible for reviewing all new development to ensure that it complies with all applicable Planning and Zoning Code provisions and Landscape Ordinance provisions, which include regulations such as building heights, setbacks, lot coverage, landscaping, and design standards. New development would be subject to neighborhood-specific Form, Frontage, and Development Standard provisions, under the proposed new zoning system. Therefore, the more subjective design guidelines envisioned by the mitigation measure are unnecessary (and furthermore the adoption of Design Guidelines is not permissible under SB330). The Form Districts regulate lot size, lot coverage, outdoor amenity space, floor area ratio and building height, and upper-story bulk and building mass. Frontage Standards regulate facade treatment requirements, design and spacing of building entrances, front yard landscaping, blank wall width, and ground story height. Development Standards which vary by neighborhood also enhance design. The mitigation measure regarding the development of design guidelines is inconsistent with a ministerial review process although it applies to ministerial projects because it allows CRA staff to review and determine appropriate design for numerous basis including environmental impacts. As a matter of policy, the City finds adopting and implementing additional processes and design standards for visual compatibility, other than those already existing, and those in the Proposed Plan are unnecessary and undesirable, and would not result in an efficient use of City resources or desirable land use outcomes.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.10 (Land Use) less than significant impacts related to inconsistency with land use plans and policies and Section 4.1 (Aesthetics) less than significant impact related to visual compatibility.
	V-2 Design Standards. Design Standards shall be developed and adopted to assure compatibility between new and pre-existing development in terms of scale and appearance.	Infeasible. The mitigation measure says that CRA shall develop design standards, however they were not adopted. As a matter of policy the City finds adopting and implementing additional processes and design standards, including for aesthetic and scale, than those proposed with the Proposed Plan (through Form and Frontage Districts, and Development Standards) and those already existing, including site plan review, are unnecessary and undesirable, and would not result in an efficient use of City resources or desirable land use outcomes. Additionally, per SB 743--a bill that is intended to reduce GHG through encouragement of development around transit--aesthetic impacts are not considered CEQA impacts for infill projects within a transit priority area (TPA). A large portion of the Adelante Eastside Redevelopment Plan that is within the Boyle Heights CPA is in a TPA.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.10 (Land Use) less than significant impacts related to inconsistency with land use plans and policies and Section 4.1 (Aesthetics) less than significant impact related to visual compatibility.
	V-3 Commercial Corridors. New developments along commercial corridors shall be coordinated with adjacent developments by use of similar design treatments, streetscape improvements, and rehabilitation of adjacent structures.	Not necessary and Infeasible. New development would be subject to neighborhood-specific Form, Frontage, and Development Standard provisions, under the proposed new zoning system. Therefore, the more subjective design guidelines envisioned by the mitigation measure are unnecessary (and furthermore the adoption of Design Guidelines is not permissible under SB330). The Form Districts regulate lot size, lot coverage, outdoor amenity space, floor area ratio and building height, and upper-story bulk and building mass. Frontage Standards regulate facade treatment requirements, design and spacing of building entrances, front yard landscaping, blank wall width, and ground story height. Development Standards which vary by neighborhood also enhance design. As a matter of policy, the City finds adopting and implementing additional processes and design standards for visual compatibility, other than those already existing, and those in the Proposed Plan are unnecessary and undesirable, and would not result in an efficient use of City resources or desirable land use outcomes.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.10 (Land Use) less than significant impacts related to inconsistency with land use plans and policies and Section 4.1 (Aesthetics) less than significant impact related to visual compatibility.
	V-4 Community Focal Points. New development shall incorporate community focal points and design that encourage pedestrian activity into building plans (e.g., building arcades, pedestrian-friendly building entrances, building facades oriented toward the street, fountains and courtyards, and outdoor eating areas). New development along commercial corridors in Boyle Heights should incorporate neighborhood identity and places for socializing.	Not necessary and Infeasible. New development would be subject to neighborhood-specific Form, Frontage, and Development Standard provisions, under the proposed new zoning system. Therefore, the more subjective design guidelines envisioned by the mitigation measure are unnecessary (and furthermore the adoption of Design Guidelines is not permissible under SB330). The Form Districts regulate lot size, lot coverage, outdoor amenity space, floor area ratio and building height, and upper-story bulk and building mass. Frontage Standards regulate facade treatment requirements, design and spacing of building entrances, front yard landscaping, blank wall width, and ground story height. Development Standards which vary by neighborhood also enhance design. As a matter of policy, the City finds adopting and implementing additional processes and design standards for visual compatibility, other than those already existing, and those in the Proposed Plan are unnecessary and undesirable, and would not result in an efficient use of City resources or desirable land use outcomes.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.10 (Land Use) less than significant impacts related to inconsistency with land use plans, policies and zoning, and Section 4.1 (Aesthetics) less than significant impact related to visual character and compatibility.

Adelante Eastside Redevelopment Project Final Program EIR Mitigation Measures

Impact Area	Mitigation Measure	Reason for Deleting Mitigation Measures	Impact of Removing Mitigation Measure
	V-5 Existing Visual Resources. To the extent feasible, existing urban design, architectural, historical, or landscape resources in the proposed Project Area shall be retained.	Not necessary and Infeasible. Historical resources will be subject to additional review and regulations. The City's Cultural Heritage Ordinance requires that all projects that include a designated Historic Cultural Monument are required to be reviewed by the Office of Historic Resources and the Cultural Heritage Commission. Any discretionary project, including those that require project review (same as the current Site Plan Review), are required to undergo CEQA review to determine if they will impact a historic resource and to mitigate significant impacts or the City will need to prepare an Environmental Impact Report and adopt a statement of overriding considerations before causing a significant impact. The City finds as a matter of policy, including any additional processes, including additional delay to additional properties, to the review and approval of projects for the purposes of historical resource protections, than those in the Proposed Plan or in existing City regulations, including those for Historical Cultural Monuments and the Building and Safety code requirements, and protections for existing urban design, architectural or landscape resources, is unnecessary and undesirable and would not result in an efficient use of City resources or desirable land use outcomes.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.10 (Land Use) no or less than significant impacts related to inconsistency with land use plans and policies, Section 4.1 (Aesthetics) less than significant impact related to visual character and compatibility; and Section 4.4 (Cultural Resources) for potentially significant and unavoidable impacts related to historical resources.
	V-6 Landscaping Treatment. Street trees or median street trees removed by new development shall be replaced on at least a one-for-one basis. New development shall also adhere to Landscape Ordinance (No. 170,978), effective January 1997 or ordinances adopted subsequent thereto.	Not necessary. Street trees and median trees are in the public right of way and will be provided and maintained by the City of Los Angeles (Streets LA). Requirements of the Landscape Ordinance are part of regulatory framework.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.10 (Land Use) less than significant impacts related to inconsistency with land use plans and policies, Section 4.1 (Aesthetics) less than significant impact related to visual character, compatibility, and scenic vistas.
	V-7 Curb-side Parking. Off-street parking shall be incorporated into development plans to minimize on street parking and to improve the visual appearance of the streetscape in commercial areas of high pedestrian activity.	Not necessary and Infeasible. The Proposed Plan follows contemporary City policy direction, such as the Mobility Plan 2035, which seeks to balance off-street parking supply with other transportation and land use objectives. As a matter of policy, the City finds that making the additional changes called for in this mitigation measure, including restricting parking, is unnecessary and undesirable, would not be a good use of limited City resources for street improvements or interventions, and would not result in desirable parking services, street configuration or street operations.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.10 (Land Use) less than significant impacts related to inconsistency with land use plans and policies, Section 4.1 (Aesthetics) less than significant impact related to visual character and compatibility, and 4.14 (Transportation and Traffic) for less than significant impacts related to traffic and congestion
	V-8 Industrial Development. New industrial developments shall be designed to harmonize with adjacent industrial uses and be enhanced with appropriate landscaping and design guidelines. Where new developments abut residential uses, landscape buffers and streetscape enhancements should be incorporated.	Not necessary. The Proposed Plan contains zoning requirements for landscaping, buffering, and other design requirements for new industrial uses. In addition, Clean Up Green Up (CUGU) regulations are incorporated into the new zoning to limit new industrial uses near residential or other sensitive uses.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.10 (Land Use) no or less than significant impacts related to inconsistency with land use plans and policies, Section 4.1 (Aesthetics) less than significant impact related to visual character and compatibility.
	V-9 Metro L Line Station. Future commercial and/or residential developments near Metro stations shall harmonize with adjacent land uses in terms of the uses proposed, scale, height, and massing of new developments. Pedestrian linkages should be provided through enhanced public rights-of-way, streetscape designs, and pedestrian amenities.	Not necessary. The proposed Plan's policies and zoning address future commercial and/or residential development near the Metro L stations. Development scale, height, and massing near Metro stations, corridors and transit services are regulated through Form Districts. Commercial and residential uses near transit is addressed through Use Districts, and Frontage Districts regulate how development addresses pedestrian linkages to the public right of way.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.10 (Land Use) less than significant impacts related to inconsistency with land use plans and policies, Section 4.1 (Aesthetics) less than significant impact related to visual character and compatibility, and 4.14 (Transportation and Traffic) for less than significant impacts related to traffic and congestion
	V-10 Future developments shall consider significant views, within the proposed Project Area, to ensure that they are protected and also enhanced in certain cases through proper site planning.	Not necessary and infeasible. New development would be subject to neighborhood-specific Form Districts, Frontage and Development Standard provisions under the proposed new zoning system, and thus the more subjective design guidelines to minimize adverse viewshed impacts envisioned by the mitigation measure are unnecessary. The City finds as a matter of policy, including any additional processes, to the review and approval of projects for the purposes of protecting significant views, than those in the Boyle Heights Plan or in existing City regulations, is unnecessary and undesirable and would not result in an efficient use of City resources or desirable land use outcomes.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.10 (Land Use) less than significant impacts related to inconsistency with land use plans and policies and Section 4.1 (Aesthetics) less than significant impact related to visual compatibility.
	V-11 All new developments shall adhere to the height district and building setbacks restrictions as noted in local community/district plans and harmonize with adjacent development patterns to avoid or minimize adverse shade and shadow-impacts. Building setbacks should be considered in the design of new multi-story developments that are to be built adjacent to residences.	Not necessary and infeasible. New development would be subject to neighborhood-specific Form Districts, Frontage and Development Standard provisions under the proposed new zoning system, and thus the more subjective design guidelines to minimize adverse shade and shadow-impacts envisioned by the mitigation measure are unnecessary.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.10 (Land Use) less than significant impacts related to inconsistency with land use plans and policies and Section 4.1 (Aesthetics) less than significant impact related visual compatibility.
	V-12: New development shall adhere to lighting standards and requirements of the City's Planning and Zoning Code and Landscape Ordinance to avoid adverse light or glare impacts. Ornamental and security lighting associated with future developments shall be oriented to avoid or minimize illumination of adjacent residential properties. Illuminated signs shall be prohibited on the portion of the commercial building facades facing residences. Individual projects should be reviewed on a case-by-case basis to ensure that building signs and lighting do not cause objectionable levels of light or glare in adjacent residential areas. Street lighting illumination, equipment, and spacing shall meet the standards adopted by the City of Los Angeles Bureau of Street Lighting of the Department of Public Works.	Not necessary and infeasible. New development would be subject to neighborhood-specific Form, Frontage and Development standards provisions, under the proposed new zoning system, and thus the more subjective design guidelines to minimize light or glare impacts from specific projects as envisioned by the mitigation measure are unnecessary.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.10 (Land Use) less than significant impacts related to inconsistency with land use plans and policies and Section 4.1 (Aesthetics) less than significant impact related to light and shade.

Adelante Eastside Redevelopment Project Final Program EIR Mitigation Measures

Impact Area		Mitigation Measure	Reason for Deleting Mitigation Measures	Impact of Removing Mitigation Measure
Cultural Resources	Archaeological Resources	CR-1 Although there are no known prehistoric archaeological sites identified within the Project Area, construction activity that involves any major ground disturbance has the potential to disturb, scatter, or relocate archaeological resources. Therefore, it is recommended that a Society of Professional Archaeologists-qualified archaeologist be contacted immediately should unanticipated cultural resource remains be encountered during development or construction-related activities within the limits of the proposed Project Area.	Not necessary. The DEIR Section 4.4 Cultural Resources addresses impacts for projects on cultural resources, through 4.4-2(a) through 4.4-2(d), which are equal or more effective than this mitigation measure. Protocol for the discovery of human remains is already part of the regulatory framework. See California Health and Safety Code Section 7050.5(b).	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.4 (Cultural Resources) of the DEIR for the potentially significant and unavoidable impacts related to historical resources, and Section 4.16 (Tribal Resources) for less than significant impacts with mitigation related to archeological resources and human remains discovery during construction.
	Historic/ Architectural Resources	CR-2 To the extent feasible, existing architectural and historic resources shall not be demolished and shall be incorporated into future development.	Infeasible. The City's Cultural Heritage Ordinance requires that all projects that include a designated Historic Cultural Monument be reviewed by the Office of Historic Resources and the Cultural Heritage Commission. Any discretionary project, including those that require project review (same as the current Site Plan Review), are required to undergo CEQA review to determine if they will impact a historic resource and to mitigate significant impacts or the City will need to prepare an Environmental Impact Report and adopt a statement of overriding considerations before causing a significant impact. The City finds as a matter of policy, including any additional processes, including additional delay to additional properties, to the review and approval of projects for the purposes of historical resource protections, than those in the Boyle Heights Plan or in existing City regulations, including those for Historical Cultural Monuments and the Building and Safety code requirements, is unnecessary and undesirable and would not result in an efficient use of City resources or desirable land use outcomes.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.4 (Cultural Resources) of the DEIR for the potentially significant and unavoidable impacts related to historical resources.
		CR-3 An historic resources move-on program should be established by the Agency or City, whereby a displaced historic residential building could be moved to more suitable vacant lots and rehabilitated. Such a program would mitigate demolition when incorporation of historic resources into new development is not feasible.	Infeasible. The City's Cultural Heritage Ordinance requires that all projects that include a designated Historic Cultural Monument be reviewed by the Office of Historic Resources and the Cultural Heritage Commission. Any discretionary project, including those that require project review (same as the current Site Plan Review), are required to undergo CEQA review to determine if they will impact a historic resource and to mitigate significant impacts or the City will need to prepare an Environmental Impact Report and adopt a statement of overriding considerations before causing a significant impact. The City finds as a matter of policy, including any additional processes, including additional delay to additional properties, to the review and approval of projects for the purposes of historical resource protections, than those in the Boyle Heights Plan or in existing City regulations, including those for Historical Cultural Monuments and the Building and Safety code requirements, is unnecessary and undesirable and would not result in an efficient use of City resources or desirable land use outcomes.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.4 (Cultural Resources) of the DEIR for the potentially significant and unavoidable impacts related to historical resources.
		CR-4 Rehabilitation of architecturally or historically significant buildings shall meet the U.S. Secretary of the Interior's Standards for Rehabilitation.	Not Necessary. The City's Cultural Heritage Ordinance requires all projects that include a designated Historic Cultural Monument or discretionary projects that include eligible historical resources be subject to Office of Historic Resources review. Historic Cultural Monuments require Cultural Heritage Commission review for proposed exterior and interior alterations in accordance with the Secretary of the Interior's Standards for Rehabilitation. As a matter of policy, the City finds including any additional processes, including additional delay to properties, or the review and approval of projects for the purposes of historical resource protections, other than those already existing, including processes for Historical Cultural Monuments, HPOZs, and the Building and Safety code requirements, and those proposed in the Boyle Heights Plan are unnecessary and undesirable, and would not result in an efficient use of City resources or desirable land use outcomes.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.4 (Cultural Resources) of the DEIR for the potentially significant and unavoidable impacts related to historical resources and Section 4.1 (Aesthetics) for the less than significant impacts to visual character.
		CR-5 New developments greater than one story shall be set back or stepped back from adjacent one-story significant architectural or historic resources to avoid or minimize adverse shade and shadow impacts.	Not necessary and infeasible. Under the Proposed Plan and zoning system, several neighborhood-specific Form Districts include bulk plane requirements and upper story stepbacks. Additional design standards to minimize adverse impacts to significant architectural or historic resources envisioned by the mitigation measure are unnecessary and undesirable and would not result in desirable land use outcomes.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.4 (Cultural Resources) of the DEIR for the potentially significant and unavoidable impacts related to historical resources and Section 4.1 (Aesthetics) for the less than significant impacts to visual character and light and shade.
		CR-6 New developments adjacent to significant historic or architectural resources shall be compatible in size, scale, materials, fenestration, and massing.	Infeasible. The Boyle Heights Plan proposes zoning standards that include height limitations and contextual infill facade standards in certain eligible historic districts within the Plan area. As a matter of policy, the City finds adopting further design standards, other than those already existing are unnecessary and undesirable (and furthermore the adoption of Design Guidelines is not permissible under SB330) and would not result in an efficient use of City resources or result in desirable land use outcomes.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.4 (Cultural Resources) of the DEIR for the potentially significant and unavoidable impacts related to historical resources and Section 4.1 (Aesthetics) for the less than significant impacts to visual character and scenic vistas.

Adelante Eastside Redevelopment Project Final Program EIR Mitigation Measures

Impact Area	Mitigation Measure	Reason for Deleting Mitigation Measures	Impact of Removing Mitigation Measure
	<p>CR-7 The City of Los Angeles Bureau of Street Lighting, with the assistance of future project developers, shall consider retaining, upgrading, and refurbishing historic streetlamps in order to preserve the historic character of the community and to provide adequate lighting to motorists and pedestrians.</p>	<p>Infeasible. This mitigation addresses an individual project-level concern. Any discretionary project, such as City street work improvements or larger private development projects that would be required to do street work improvements that could impact eligible historic resource, including street improvements, such as street lamps, would require CEQA review and mitigation measures to avoid impacts to historical resources as defined by CEQA. Any additional policy intervention to retain, upgrade, or refurbish "historic" street lamps in ministerial projects including the adoption of design standards is not desirable. Moreover, the measure is not needed to avoid impacts to aesthetics because the City does not find as a policy matter that the loss of such street lights will result in a significant aesthetic impact. Additionally, a significant portion of the Plan Area is within a Transit Priority Area which would not have an aesthetic impact for reasonably foreseeable development.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.4 (Cultural Resources) of the DEIR for the potentially significant and unavoidable impacts related to historical resources and Section 4.1 (Aesthetics) for the less than significant impacts to visual character and light and shade.</p>
	<p>CR-8 Vacant building reuse that could affect historic resources shall be undertaken with careful consideration given to finding compatible uses, protecting the integrity of properties' settings, ensuring long-term access to properties, and ensuring that there would not be substantial alteration without consideration of existing historic features.</p>	<p>Not Necessary. The City's Cultural Heritage Ordinance requires all projects that include a designated Historic Cultural Monument or discretionary projects that include eligible historical resources be subject to Office of Historic Resources review. Historic Cultural Monuments require Cultural Heritage Commission review for proposed exterior and interior alterations in accordance with the Secretary of the Interior's Standards for Rehabilitation. As a matter of policy, the City finds including any additional processes, including additional delay to properties, or the review and approval of projects for the purposes of historical resource protections, other than those already existing, including processes for Historical Cultural Monuments and the Building and Safety code requirements, and those proposed in the Boyle Heights Plan are unnecessary and undesirable, and would not result in an efficient use of City resources or desirable land use outcomes.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.4 (Cultural Resources) of the DEIR for the potentially significant and unavoidable impacts related to historical resources and Section 4.1 (Aesthetics) for the less than significant impacts to visual character and compatibility.</p>
	<p>CR-9 Partial mitigation for demolition could include but not be limited to documentation of the resource, monetary contributions to preservation related activities or programs, or incorporation of character defining historic features into the new development</p>	<p>Infeasible. The City finds as a matter of policy, including any additional processes that could add delays to additional properties, to the review and approval of projects for the purposes of historical resource protections, than those in the Proposed Plan or in existing City regulations, including those for Historical Cultural Monuments and the Building and Safety code requirements, is unnecessary and undesirable and would not result in an efficient use of City resources or desirable land use outcomes</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.4 (Cultural Resources) of the DEIR for the potentially significant and unavoidable impacts related to historical resources and Section 4.1 (Aesthetics) for the less than significant impacts to visual character.</p>
<p>Traffic and Circulation</p>	<p>TC-1 Measures to Reduce Travel Demand. The following mitigation measures are proposed to eliminate or minimize the traffic impacts of the proposed project at the affected intersections.</p> <p>A review of travel demand data and bus ridership patterns for this area indicates that a higher percentage of residents and workers use transit to travel to, from and within the study area than the region as a whole. Although a shuttle bus system similar to the DASH system that is operated in downtown Los Angeles and other high activity centers of the City would be an appropriate addition to the proposed Adelante Redevelopment Project Area, the size and geographic breadth of the area is such that such a system would require multiple routes. It is, therefore, recommended that this shuttle bus system operate around each of the three Metro Rail Red Line station areas, once the stations are in operation, and offer service to adjacent residential areas. This service should be in addition to the existing regional service provided by the MTA and should operate during the midday as well as the morning and evening peak hours. In addition, existing through bus services should be improved by increasing service frequencies and adding limited stop services on longer routes. Ride sharing to major destinations and centers and among through trip travelers should also be encouraged. These proposed improvements would be appropriate for all three proposed project alternatives.</p> <p>Under the requirements of the 1993 City of Los Angeles Ordinance No. 168,700, developers/owners of all new non-residential developments in excess of 25,000 square feet are required to incorporate physical transportation demand management (TDM) measures into the development. Depending upon the size of the project, these measures include information kiosks/bulletin boards, preferential carpool/vanpool parking, bicycle parking and access, and bus stop improvements. In addition to the ordinance requirements, the LADOT traffic study guidelines provide that a more comprehensive program of TDM measures may be required if trip reductions due to TDM are identified as a project mitigation measure.</p> <p>Thus, it is recommended that a TDM program be developed for the proposed Project Area in which developers/owners of commercial office projects in excess of 25,000 square feet, or commercial retail or industrial projects in excess of 50,000 square feet, in the proposed Project Area would be required to prepare, submit, and implement TDM plans. In addition to the TDM ordinance requirements, the proposed TDM program for the proposed Redevelopment Plan would need to include additional</p>	<p>Infeasible and Not Necessary. As a policy matter, the City finds that adopting any additional programs or requirements to address single vehicle occupancy, other than those included in the Proposed Plan and existing regulations is unnecessary and undesirable, would not be a good use of limited City resources and would not result in good public policy related to addressing transportation issues in the City. Adopting any additional programs or requirements for the preparation of TDM is an inefficient use of resources and would not result in the best transportation outcomes. Any update to the City's TDM program would be most efficiently handled as a separate work program and cover a larger area. In 1993, the City of Los Angeles adopted its first Transportation Demand Management (TDM) Ordinance, which requires non-residential developments of more than 25,000 square feet to implement a limited set of TDM strategies. Since then, transportation options have expanded, including the regional rail and bike networks, new options such as bike share, carshare, and rideshare services, and alternatives such as telecommuting. The City is currently in the process of updating the TDM Ordinance. The proposed update to the TDM Ordinance will apply to more projects than the current ordinance, including residential developments, and increases flexibility by offering a menu of more than 40 TDM strategies.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.14 (Transportation and Traffic) on less than significant impacts related to the circulation system.</p>

Adelante Eastside Redevelopment Project Final Program EIR Mitigation Measures

Impact Area	Mitigation Measure	Reason for Deleting Mitigation Measures	Impact of Removing Mitigation Measure
	TC-2 Measures to Increase Capacity. The improvement program for this project also includes measures to increase the capacity of the roadway system at specific locations. The objective of the mitigation measure analysis was to identify physical improvements that could be implemented within the existing roadway right-of-way. Improvements involving right-of-way acquisition were not considered since the study area is a built-up area with little or no easily available right-of-way for roadway improvements.	Infeasible. Since the adoption of this CRA plan, the City's policies related to mobility and circulation have substantially changed with the adoption of Mobility Plan 2035 in 2015, SB 743, and the Complete Streets Act and the movement away from vehicular travel towards a multi-modal travel. Since the adoption of the CRA plan, the Boyle Heights Plan area has seen significant transportation investments and has many rail improvements underway such as the Metro L(Gold) line expansion. As a policy matter, the City finds adopting any additional programs or requirements to encourage multimodal uses other than those improvements underway and proposed in the MIP, those proposed in the Mobility 2035 plan, the Boyle Heights Plan and the MIP, is unnecessary and undesirable, would not be a good use of limited City resources, and would not result in good public policy related to addressing transportation issues in the City.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.14 (Transportation and Traffic) on less than significant impacts related to the circulation system.
	Minimum/Infill Development Alternative. The following improvements are recommended for the Minimum/Infill Development Alternative:	N/A	N/A
	Mission Road and Marengo Street - No physical mitigation measures are considered to be feasible at this location.	N/A. No mitigation measure is proposed in the CRA EIR.	N/A
	Soto Street and Charlotte Street - Restripe the eastbound Charlotte Street approach to provide an exclusive right-turn lane. This would result in a shared left turn/ through lane and an exclusive right-turn lane in the eastbound direction.	Infeasible. The Proposed Plan envisions mobility improvements consistent with contemporary City policy, such as Mobility Plan 2035. Charlotte Street has been restriped to create an exclusive right turn lane. As a policy matter, the City finds that making the additional changes called for in this mitigation measure, including adding additional lanes at intersections, is inconsistent, and not a desirable street configuration and would not be a good use of limited City resources for street improvements or interventions.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.14 (Transportation and Traffic) on less than significant impacts related to the circulation system.
	Soto Street and Marengo Street - Restripe the northbound and southbound Soto Street approaches to provide the following: one left-turn lane, one shared left turn/ through lane, one through lane, and one exclusive right-turn lane in the northbound direction and one left-turn lane, one shared left-turn/through lane, and one shared through/right-turn lane in the southbound direction. The north and south approaches are currently operating as a split phase, therefore no changes to the signal phasing would be necessary.	Infeasible. The Boyle Heights Plan envisions mobility improvements consistent with contemporary City policy, such as Mobility Plan 2035. The Plan also includes policies to improve the function of Soto Street and discourage freight vehicles from using Soto Street in compliance with the Metro Countywide Significant Truck Arterial Network. As a policy matter, the City finds that making the additional changes called for in this mitigation measure, including adding additional lanes at intersections, is inconsistent, and not a desirable street configuration and would not be a good use of limited City resources for street improvements or interventions including pursuant to policies in the Mobility Plan to encourage multi-modal travel and use of right of way and making streets safer.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.14 (Transportation and Traffic) on less than significant impacts related to the circulation system.
	Soto Street and Olympic Boulevard - Provide westbound and eastbound exclusive right-turn lanes on Olympic Boulevard. Because the Sears site located on the northeast and southwest corners is within the proposed Redevelopment Project Area, it is assumed that right-of-way could be obtained. The resulting configurations in both the westbound and eastbound direction would be one left-turn lane, three through lanes, and one right-turn lane.	Infeasible. The Proposed Plan envisions mobility improvements consistent with contemporary City policy, such as Mobility Plan 2035. To accommodate for an additional lane as recommended by the mitigation measure, would require a street widening. Street widenings are not consistent with the City's Mobility Plan 2035 or contemporary policy direction to reduce VMT. As a policy matter, the City finds that making the additional changes called for in this mitigation measure, including adding additional lanes at intersections, is inconsistent, and not a desirable street configuration and would not be a good use of limited City resources for street improvements or interventions.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.14 (Transportation and Traffic) on less than significant impacts related to the circulation system.
	Soto Street and Washington Boulevard - No physical mitigation measures are considered to be feasible at this location.	N/A. No mitigation measure is proposed in the CRA EIR.	N/A
	Lorena Street and Whittier Boulevard - Restripe the northbound Lorena Street approach to provide an exclusive right-turn lane. This would result in the following configuration: one left-turn lane, two through lanes, and one right-turn lane in the northbound direction. The I-hour parking, 8 a.m. - 6 p.m., restriction on the east side of the south leg would need to be changed to 8 a.m. - 4 p.m. for the four spaces nearest the intersection.	Infeasible. The Proposed Plan envisions mobility improvements consistent with contemporary City policy, such as Mobility Plan 2035. The Plan also includes policies to improve the function of Lorena Street and discourage freight vehicles from using Lorena Street in compliance with the Metro Countywide Significant Truck Arterial Network. As a policy matter, the City finds that making the additional changes called for in this mitigation measure, including adding additional lanes at intersections, is inconsistent, and not a desirable street configuration and would not be a good use of limited City resources for street improvements or interventions.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.14 (Transportation and Traffic) on less than significant impacts related to the circulation system.
	Indiana Street and Cesar E. Chavez Avenue - Install a two-phase traffic signal. Also, restripe the northbound Indiana Street approach to provide one left-turn lane and one shared though/right-turn lane. Given the close proximity to the signal at Lorena Street, coordination between the two signals would be necessary. It should be noted that this location is projected to operate at unacceptable levels under cumulative base conditions and installation of the traffic signal would be needed even without the development of the project.	Infeasible. The Proposed Plan envisions mobility improvements consistent with contemporary City policy, such as Mobility Plan 2035. As a policy matter, the City finds that making the additional changes called for in this mitigation measure, including adding additional lanes at intersections, or traffic signals is inconsistent, and not a desirable street configuration and would not be a good use of limited City resources for street improvements or interventions including pursuant to policies in the Mobility Plan to encourage multi-modal travel and use of right of way and making streets safer.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.14 (Transportation and Traffic) on less than significant impacts related to the circulation system.
	Indiana Street and Whittier Boulevard - Provide an exclusive right-turn lane on the eastbound Whittier Boulevard approach. This improvement would require restriping both the east and west legs of the intersection in order to keep the east/west direction aligned. The improvement would also require removing approximately two on-street parking spaces on the south side of the west leg.	Infeasible. The Boyle Heights Plan envisions mobility improvements consistent with contemporary City policy, such as Mobility Plan 2035. As a policy matter, the City finds that making the additional changes called for in this mitigation measure, including adding additional lanes at intersections, is inconsistent, and not a desirable street configuration and would not be a good use of limited City resources for street improvements or interventions including pursuant to policies in the Mobility Plan to encourage multi-modal travel and use of right of way and making streets safer.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.14 (Traffic and Transportation) on less than significant impacts related to the circulation system.

Adelante Eastside Redevelopment Project Final Program EIR Mitigation Measures

Impact Area	Mitigation Measure	Reason for Deleting Mitigation Measures	Impact of Removing Mitigation Measure
	SR 60 Westbound Ramps and Third Street - Install a two-phase traffic signal. It should be noted that this location is projected to operate at unacceptable levels under cumulative base conditions and installation of the traffic signal would be needed even without the development of the project.	Infeasible. The Boyle Heights Plan envisions mobility improvements consistent with contemporary City policy, such as Mobility Plan 2035. As a policy matter, the City finds that making the additional changes called for in this mitigation measure including installing additional traffic signals, is inconsistent, and not a desirable street configuration and would not be a good use of limited City resources for street improvements. It is also not consistent with interventions including pursuant to policies in the Mobility Plan to encourage multi-modal travel and use of right of way and making streets safer or contemporary policy direction to reduce VMT.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.14 (Transportation and Traffic) on less than significant impacts related to the circulation system.
	TC-2 Measures to Increase Capacity. The improvement program for this project also includes measures to increase the capacity of the roadway system at specific locations. The objective of the mitigation measure analysis was to identify physical improvements that could be implemented within the existing roadway right-of-way. Improvements involving right-of-way acquisition were not considered since the study area is a built-up area with little or no easily available right-of-way for roadway improvements.	Infeasible. The Proposed Plan envisions mobility improvements consistent with contemporary City policy, such as Mobility Plan 2035. As a policy matter, the City finds that making the additional changes called for in this mitigation measure including increasing capacity of the roadway system at specific locations, is inconsistent with contemporary policy direction to reduce VMT, and not a desirable street configuration. It would not be a good use of limited City resources for street improvements, and not consistent with interventions including pursuant to policies in the Mobility Plan to encourage multi-modal travel and use of right of way and making streets safer.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.14 (Transportation and Traffic) on less than significant impacts related to the circulation system.
	Moderate Development Alternative. The improvements recommended for the Moderate Development Alternative include those discussed above for the Minimum/Infill Development Alternative, plus the following:	N/A	N/A
	Mission Road and Cesar E. Chavez Avenue - No physical mitigation measures are considered to be feasible at this location.	N/A. No mitigation measure is proposed in the CRA EIR.	N/A
	Mission Road and First Street - No physical mitigation measures are considered to be feasible at this location.	N/A. No mitigation measure is proposed in the CRA EIR.	N/A
	Soto Street and Wabash Avenue - Restripe the westbound Wabash Avenue approach to provide a shared left-turn/right-turn lane and an exclusive right-turn lane.	Infeasible. The Proposed Plan envisions mobility improvements consistent with contemporary City policy, such as Mobility Plan 2035. As a policy matter, the City finds that making the additional changes called for in this mitigation measure, is inconsistent with contemporary policy direction to reduce VMT, and not a desirable street configuration and would not be a good use of limited City resources for street improvements or interventions including pursuant to policies in the Mobility Plan to encourage multi-modal travel and use of right of way and making streets safer.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.14 (Transportation and Traffic) on less than significant impacts related to the circulation system.
	Soto Street and Fourth Street - Restripe the eastbound Fourth Street approach to provide the following: one left-turn lane, two through lanes, and one right-turn lane.	Infeasible. The Boyle Heights Plan envisions mobility improvements consistent with contemporary City policy, such as Mobility Plan 2035. As a policy matter, the City finds that making the additional changes called for in this mitigation measure, is inconsistent with contemporary policy direction to reduce VMT, and not a desirable street configuration and would not be a good use of limited City resources for street improvements or interventions including pursuant to policies in the Mobility Plan to encourage multi-modal travel and use of right of way and making streets safer.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.14 (Transportation and Traffic) on less than significant impacts related to the circulation system.
	Soto Street and Whittier Boulevard - Restripe the westbound Whittier Boulevard approach to provide an exclusive right-turn lane. This would result in one left-turn lane, two through lanes, and one right-turn lane in the westbound direction. This improvement would require removing on-street parking (approximately four spaces) on the north side of the westbound Whittier Boulevard approach.	Infeasible. The Boyle Heights Plan envisions mobility improvements consistent with contemporary City policy, such as Mobility Plan 2035. As a policy matter, the City finds that making the additional changes called for in this mitigation measure, is inconsistent with contemporary policy direction to reduce VMT, and not a desirable street configuration and would not be a good use of limited City resources for street improvements or interventions including pursuant to policies in the Mobility Plan to encourage multi-modal travel and use of right of way and making streets safer.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.14 (Transportation and Traffic) on less than significant impacts related to the circulation system.
	Soto Street and Eighth Street - No physical mitigation measures are considered to be feasible at this location.	N/A. No mitigation measure is proposed in the CRA EIR.	N/A
	Lorena Street and First Street - Provide an exclusive right-turn lane on the northbound Lorena Street approach. This improvement would require restriping both the north and south legs of the intersection in order to keep the north/south direction aligned. The improvement would also require removing approximately four on-street parking spaces on the west side of the south leg and two spaces on the west side of the north leg.	Infeasible. The Boyle Heights Plan envisions mobility improvements consistent with contemporary City policy, such as Mobility Plan 2035. The Plan also includes policies to improve the function of Lorena Street and discourage freight vehicles from using Lorena Street in compliance with the Metro Countywide Significant Truck Arterial Network. As a policy matter, the City finds that making the additional changes called for in this mitigation measure, is inconsistent with contemporary policy direction to reduce VMT, and not a desirable street configuration and would not be a good use of limited City resources for street improvements or interventions.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.14 (Transportation and Traffic) on less than significant impacts related to the circulation system.
	Indiana Street and Olympic Boulevard - Restripe the northbound and southbound Indiana Street approaches to provide the following: one left-turn lane and one shared through/right-turn lane in both directions. The improvement would also require removing approximately two on-street parking spaces on the west side of the north leg, four spaces on the west side of the south leg, and four spaces on the east side of the south leg.	Infeasible. The Proposed Plan envisions mobility improvements consistent with contemporary City policy, such as Mobility Plan 2035. As a policy matter, the City finds that making the additional changes called for in this mitigation measure, is inconsistent with contemporary policy direction to reduce VMT, and not a desirable street configuration and would not be a good use of limited City resources for street improvements or interventions including pursuant to policies in the Mobility Plan to encourage multi-modal travel and use of right of way and making streets safer.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.14 (Transportation and Traffic) on less than significant impacts related to the circulation system.
	Downey Road/Grande Vista and Washington Boulevard - No physical mitigation measures are considered to be feasible at this location.	N/A. No mitigation measure is proposed in the CRA EIR.	N/A
	Soto Street and 26th Street - No physical mitigation measures are considered to be feasible at this location.	N/A. No mitigation measure is proposed in the CRA EIR.	N/A

Adelante Eastside Redevelopment Project Final Program EIR Mitigation Measures

Impact Area		Mitigation Measure	Reason for Deleting Mitigation Measures	Impact of Removing Mitigation Measure
		<p>TC-2 Measures to Increase Capacity. The improvement program for this project also includes measures to increase the capacity of the roadway system at specific locations. The objective of the mitigation measure analysis was to identify physical improvements that could be implemented within the existing roadway right-of-way. Improvements involving right-of-way acquisition were not considered since the study area is a built-up area with little or no easily available right-of-way for roadway improvements.</p> <p>Maximum Probable Development Alternative. The improvements recommended for the Maximum Probable Development Alternative include those discussed above for the Minimum and Moderate Development Alternatives, plus the following:</p> <p>Soto Street and Cesar E. Chavez Avenue - Restripe the eastbound Cesar E. Chavez Avenue approach to provide an exclusive right-turn lane. This would result in two through lanes and a right-turn lane in the eastbound direction. It should be noted that the improvement would result in a substandard 10-foot right-turn lane, however on the westbound approach of this intersection there currently exists a 10-foot right turn lane.</p>	<p>Infeasible. The Proposed Plan envisions mobility improvements consistent with contemporary City policy, such as Mobility Plan 2035. As a policy matter, the City finds that making the additional changes called for in this mitigation measure, is inconsistent with contemporary policy direction to reduce VMT, and not a desirable street configuration and would not be a good use of limited City resources for street improvements or interventions including pursuant to policies in the Mobility Plan to encourage multi-modal travel and use of right of way and making streets safer.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and see specifically, Section 4.14 (Transportation and Traffic) on less than significant impacts related to the circulation system.</p>
Air Quality	Construction	<p>AQ-1 All construction contractors shall comply with SCAQMD regulations, including Rule 402 which specifies that no there be no dust impacts offsite sufficient to cause a nuisance. SCAQMD Rule 403, which restricts visible emissions from construction, Rule 1403, which specifies actions to control asbestos emissions from demolition and Rule 1113, which regulates architectural coatings. Measures (a) through (h) below are required by SCAQMD Rule 403 for projects that are subject to the rule. These measures shall apply to any individual development project proposed under the Redevelopment Plan, even those that may be exempt from Rule 403. Construction contractors shall also provide documentation that they will comply with all applicable SCAQMD regulations and the mitigation measures identified below.</p> <ul style="list-style-type: none"> <li>a. Moisten soil and debris piles prior to grading.</li> <li>b. Water exposed surfaces at least twice a day under calm conditions and as often as needed in order to maintain a surface crust and prevent the release of visible emissions from the construction site.</li> <li>c. Treat any area that will be exposed for extended periods with a soil conditioner to stabilize soil or temporarily plant with vegetation.</li> <li>d. Wash mud-covered tires and under-carriages of trucks leaving construction sites.</li> <li>e. Provide for street sweeping, as needed, on adjacent roadways to remove dirt dropped by construction vehicles or mud that would otherwise be carried off by trucks departing project sites.</li> <li>f. Securely cover loads of dirt with a tight fitting tarp on any truck leaving the construction sites to dispose of excavated soil.</li> <li>g. Cease grading during periods when winds exceed 25 miles per hour.</li> <li>h. Provide for permanent sealing of all graded areas, as applicable, at the earliest practicable time after soil disturbance.</li> <li>i. Keep debris piles wet after demolition to prevent lead particles from becoming airborne.</li> </ul>	<p>Not necessary. This is already part of the regulatory framework as a requirement under SCAQMD's Rule 403 (fugitive dust).</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably expected development under the Proposed Plan, and specifically, Section 4.2 for air quality impacts, including additional requirements of MM AQ1 to go beyond SCAGMC requirements to address air impacts from construction.</p>
		<p>AQ-2 All contractors shall:</p> <ul style="list-style-type: none"> <li>a. Maintain construction equipment in peak operating condition so as to reduce operation emissions.</li> <li>b. Use low-sulfur diesel fuel in all equipment.</li> <li>c. Use electric equipment whenever practicable.</li> <li>d. Shut off engines when not in use.</li> <li>e. Recommend that construction workers wear masks during demolition to avoid breathing lead particles.</li> </ul>	<p>Not necessary. This is already part of the regulatory framework (SCAQMD).</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably expected development under the Proposed Plan, and specifically, Section 4.2 for air quality impacts, including additional requirements of MM AQ1 to go beyond SCAGMC requirements to address air impacts from construction.</p>
	Operational	<p>TC-1 (TDM Mitigation Measure identified above) The TDM mitigation measures (measure TC-1) identified in Section 3.6, Traffic and Circulation, would reduce vehicular traffic and resulting mobile emissions.</p>	<p>See previous comment for Mitigation Measure TC-1.</p>	
Noise (MMs will reduce the impact to less than significant)		<p>NO-1 The projects constructed within the proposed Project Area shall comply with applicable City noise regulations.</p>	<p>Not necessary and infeasible. This is part of the regulatory framework. The Los Angeles Municipal Code (LAMC) limits construction between 7:00 a.m. and 9:00 p.m. on weekdays, and between 8:00 a.m. and 6:00 p.m. when activities would be located within 500 feet of residences on any Saturdays or anytime on Sundays or federal holidays. As a policy matter, the City finds imposing additional limitations on construction hours of operation other than those in the Noise Ordinance and Section 41.40 is unnecessary and undesirable and would not result in good public policy related to construction in the City.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably expected development under the Proposed Plan, and specifically, Section 4.11 (Noise) for less than significant impacts from permanent noise increases due to stationary and mobile operational activities; significant and unavoidable impacts generated by temporary construction noise.</p>

Adelante Eastside Redevelopment Project Final Program EIR Mitigation Measures

Impact Area	Mitigation Measure	Reason for Deleting Mitigation Measures	Impact of Removing Mitigation Measure	
	NO-2 For individual projects within the proposed Project Area, a procedure shall be established by the CRA requiring developers to notify adjacent property owners and tenants, particularly residences and schools, of time periods when there would be noisy construction activities. Appropriate mitigation, if required, would then be established.	Not necessary and infeasible. This is part of the regulatory framework. LAMC Ch. IV, Article 1 Sec. 41.40 Construction Noise; LAMC CH. XI Sec. 112.05 Power tools; LAMC Sec. 111.03 Ambient Noise; LAMC Sec. 112.02 HVAC system noise. As a policy matter, the City finds adopting additional noise requirements other than those in the Noise Ordinance and Section 41.40 and/or imposing additional review and standard requirements on approval of development projects and development of land is unnecessary and undesirable and would not result in good public policy related to construction in the City or be an efficient use of City resources.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably expected development under the Proposed Plan, and specifically, Section 4.11 (Noise) for less than significant impacts from permanent noise increases due to stationary and mobile operational activities; significant and unavoidable impacts generated by temporary construction noise.	
	NO-3 During construction, the contractors for projects within the proposed Project Area shall muffle and shield intakes and exhaust, shroud and shield impact tools, and use electric- powered rather than diesel-powered construction equipment, as feasible.	Not necessary. This is already required as part of the regulatory framework (SCAQMD). As a policy matter, the City finds adopting additional noise requirements other than those in the Noise Ordinance and Section 41.40 and/or imposing additional review and standard requirements on approval of development projects and development of land is unnecessary and undesirable and would not result in good public policy related to construction in the City or be an efficient use of City resources.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably expected development under the Proposed Plan, and specifically, Section 4.11 (Noise) for less than significant impacts from permanent noise increases due to stationary and mobile operational activities; significant and unavoidable impacts generated by temporary construction noise.	
	NO-4 During construction of individual development projects within the proposed Project Area, truck haul routes (demolition waste, dirt excavation, cement, materials delivery) shall be designated by the appropriate City and state bodies.	Not necessary. This is already required as part of the regulatory framework. The Citywide Construction and Demolition (C&D) Waste Recycling Ordinance requires all mixed construction and demolition waste generated within city limits be taken to City certified C&D waste processors. LA Sanitation (LASAN) is responsible for the C&D waste recycling policy. All haulers and contractors responsible for handling C&D waste must obtain a Private Waste Hauler Permit from LASAN prior to collecting, hauling and transporting C&D waste, and C&D waste can only be taken to City certified C&D processing facilities.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably expected development under the Proposed Plan, and specifically, Section 4.11 (Noise) for less than significant impacts from permanent noise increases due to stationary and mobile operational activities; significant and unavoidable impacts generated by temporary construction noise.	
	NO-5 As projects are designed and developed within the proposed Project Area, truck loading and trash pickup areas shall be located as far away as possible from adjacent residences. These facilities shall use screening walls or be enclosed.	Infeasible. The City's noise ordinance regulates excessive noise, including around residential areas. Additionally, discretionary projects can be reviewed for noise under environmental review or Site Plan Review, if applicable. As a policy matter, the City finds adopting any additional regulations, requirements or review of projects to address noise, including for ministerial and discretionary projects, is not desirable or necessary and would not be an efficient use of City resources or result in good land use outcomes.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably expected development under the Proposed Plan, and specifically, Section 4.11 (Noise) for less than significant impacts from permanent noise increases due to stationary and mobile operational activities; significant and unavoidable impacts generated by temporary construction noise.	
Public Services	Fire	PS-1 Fire-flows shall be closely monitored by the Department of Water and Power to ensure that they do not fall below the minimum requirements. Improvements to the water system that may be required to provide adequate fire-flow levels may be charged to developers of individual projects within the area.	Not necessary and infeasible. Fire safety issues, including requirements for fire-flow levels are governed by the Fire Code, which applies to all projects. Additionally, projects of a certain size that require Site Plan Review are already referred to Los Angeles Fire Department (LAFD) for review of plans; and would therefore be subject to review. As a policy matter, the City finds adopting additional review requirements and standards for ministerial projects to address fire-flow levels is unnecessary and undesirable and would not be an efficient use of City resources.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably expected development under the Proposed Plan, and specifically, Section 4.13 (Public Services) for less than significant impacts on fire-flow demands.
		PS-2 Intersection improvement measures should be implemented as discussed in Section 3.6, Traffic and Circulation, to improve intersection traffic operations and thereby improve initial emergency response capabilities.	See discussion under Traffic and Circulation.	See discussion under Traffic and Circulation.
		PS-3: The LAFD requires that several measures concerning emergency access be incorporated into new developments that may be approved within the proposed Project Area. For the following measures, access requirements for aboveground floors shall be interpreted as being the horizontal travel distance from the street, driveway, alley, or designated fire lane to the main entrance or exit of individual units.  <ul style="list-style-type: none"> <li>• Any person owning or having control of any facility, structure, group of structures, or premises shall provide and maintain LAFD access (Section 57.09.03, Subsection B of the L.A. Fire Code).</li> <li>• No building or portion of a building shall be constructed more than 150 feet from the edge of the roadway of any improved street, access road, or designated fire lane, (Section 57.09.03, Subsection B of the L.A. Fire Code). 1. ,</li> <li>• Every first-story dwelling unit, first-story guest room, and all first-story portions of any commercial or industrial building must be within 300 feet of an approved fire hydrant (Section 57.09.06, Subsection B-1 of the L.A. Fire Code).</li> <li>• The maximum distance between fire hydrants on roads and fire lanes in a regional commercial area is 300 feet.</li> <li>• Fire Lane width shall not be less than 30 feet clear to sky. When a fire Lane must accommodate the operation of LAFD aerial ladder apparatus or where fire hydrants are installed, those portions shall not be less than 28 feet in width.</li> <li>• Access for LAFD apparatus and personnel to enter into all structures shall be required.</li> <li>• Fire lanes, where required, and dead-ending streets, shall terminate in a cul-de-sac, or other approved turning area. No dead-ending street or fire lane shall be greater than 700 feet in length or secondary access shall be required.</li> </ul>	Not necessary. Fire safety issues would already be addressed by LAMC 16.05 Site Plan Review that applies to discretionary projects and by Fire Code requirements that apply to all projects. Projects of a certain size that require Site Plan Review (SPR) are already referred to LAFD for review of plans; and would be subject to design review conditions of approval by way of a Director's determination and an environmental clearance. As a policy matter, the City finds adopting additional review requirements and standards for ministerial projects to address fire hazards other than what is already required by the Fire Code is unnecessary and undesirable and would not be an efficient use of City resources.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably expected development under the Proposed Plan, and specifically, Section 4.13.1 (Fire Protection and Emergency Services) for less than significant impacts on performance objectives for fire protections.

Adelante Eastside Redevelopment Project Final Program EIR Mitigation Measures

Impact Area	Mitigation Measure	Reason for Deleting Mitigation Measures	Impact of Removing Mitigation Measure
	<p>PS-4 In addition to measures concerning access, the LAFD also states that the following measures be incorporated into the proposed project to reduce the impact on fire protection services:</p> <ul style="list-style-type: none"> <li>• The proposed project shall comply with all applicable state and local codes and ordinances and the guidelines found in the General Plan of the City of Los Angeles (C.P.C. 19708).</li> <li>• Definitive plans and specifications shall be submitted to the LAFD and requirements for necessary permits satisfied prior to commencement of future site development.</li> <li>• Installation of a sprinkler system, in any newly constructed structures, as required by the Los Angeles City Fire Code, Section 57 .118.11.</li> </ul>	<p>Not necessary. Fire safety issues would already be addressed by LAMC 16.05 Site Plan Review that applies to discretionary projects and by Fire Code requirements that apply to all projects. Projects of a certain size that require Site Plan Review (SPR) are already referred to LAFD for review of plans; and would be subject to design review conditions of approval by way of a Director's determination and an environmental clearance. As a policy matter, the City finds adopting additional review requirements and standards for ministerial projects to address fire hazards other than what is already required by the Fire Code is unnecessary and undesirable and would not be an efficient use of City resources.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably expected development under the Proposed Plan, and specifically, 4.13.1 (Fire Protection and Emergency Services) for less than significant impacts on performance objectives for fire protections.</p>
Police	<p>PS-5 Intersection improvement measures should be implemented as discussed in Section 3.6 of this EIR to improve intersection traffic operations and thereby improve initial emergency response capabilities.</p>	<p>See discussion under Traffic and Circulation.</p>	<p>See discussion under Traffic and Circulation.</p>
	<p>PS-6 The following mitigation measures to improve security in new developments are included in the City's current development review procedures. At the individual development project level, the project sponsor shall consult with the LAPD's Crime Prevention Unit on the design and implementation of a security plan for the development. A security plan shall consider:</p> <ul style="list-style-type: none"> <li>• Use of private security guards and video surveillance to monitor and patrol the project site during project construction and operation;</li> <li>• Design of entryways, elevators, lobbies, and parking areas with good illumination and minimum dead space to eliminate areas of concealment;</li> <li>• Provision of solid core doors with deadbolt locks to all offices, shops, and hotel units.</li> <li>• Maximum accessibility for emergency service personnel and vehicles into each structure's design.</li> </ul>	<p>Not necessary and infeasible. As a policy matter, the City finds adopting additional review requirements and standards for ministerial projects to address security features such as private security and video surveillance is unnecessary and undesirable and would not be an efficient use of City resources. Additionally, the City determines when new or expanded facilities are needed to provide police services.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably expected development under the Proposed Plan, and specifically, Section 4.13.2 (Police Protection Services) for less than significant impacts related to emergency response capabilities and police protection services.</p>
	<p>The following additional measures would be implemented on a project-by-project basis where appropriate:</p> <p>PS-7 Private security guards and video surveillance shall be employed as appropriate to provide additional security.</p>	<p>Not necessary and infeasible. As a policy matter, the City finds adopting additional review requirements and standards for ministerial projects to address security features such as private security and video surveillance is unnecessary and undesirable and would not be an efficient use of City resources. Additionally, the City determines when new or expanded facilities are needed to provide police services.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably expected development under the Proposed Plan, and specifically, Section 4.13.2 (Police Protection Services) for less than significant impacts related to emergency response capabilities and police protection services.</p>
	<p>PS-8 All commercial and industrial buildings shall be equipped with robbery/burglar alarms which shall be monitored by a central receiving station.</p>	<p>Not necessary and infeasible. As a policy matter, the City finds adopting additional review requirements and standards for ministerial projects to address security features such as robbery/burglar alarms is unnecessary and undesirable and would not be an efficient use of City resources. Additionally, the City determines when new or expanded facilities are needed to provide police services.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably expected development under the Proposed Plan, and specifically, Section 4.13.2 (Police Protection Services) for less than significant impacts related to emergency response capabilities and police protection services.</p>
	<p>PS-9 Parking areas shall be open to public view.</p>	<p>Not necessary and infeasible. As a policy matter, the City finds adopting additional review requirements and standards for ministerial projects to address security features is unnecessary and undesirable and would not be an efficient use of City resources. Additionally, the City determines when new or expanded facilities are needed to provide police services.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably expected development under the Proposed Plan, and specifically, Section 4.13.2 (Police Protection Services) for less than significant impacts related to emergency response capabilities and police protection services.</p>
	<p>PS-10 Security lighting shall be full cutoff fixtures that minimize glare from the light source and provide light downward and inward to structures to maximize visibility.</p>	<p>Not necessary and infeasible. As a policy matter, the City finds adopting additional review requirements and standards for ministerial projects to address security features such as security lighting is unnecessary and undesirable and would not be an efficient use of City resources. Additionally, the City determines when new or expanded facilities are needed to provide police services.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably expected development under the Proposed Plan, and specifically, Section 4.13.2 (Police Protection Services) for less than significant impacts related to emergency response capabilities and police protection services.</p>
	<p>PS-11 The following specific measures should be incorporated into proposed developments to strengthen crime prevention:</p> <ul style="list-style-type: none"> <li>• Video cameras and security guards should be used to patrol parking areas. A security guard to patrol office floors should also be considered.</li> <li>• Consultation with the Police Department's crime prevention unit concerning crime prevention features appropriate to the particular design of the project.</li> <li>• Control employee parking areas with an electronic card-key gate, in conjunction with a closed-circuit television system.</li> <li>• Provide sufficient off-street parking for all building employees and anticipated patrons and visitors.</li> </ul>	<p>Not necessary and infeasible. As a policy matter, the City finds adopting additional review requirements and standards for ministerial projects to address security features such as video cameras and additional security measures is unnecessary and undesirable and would not be an efficient use of City resources. Additionally, the City determines when new or expanded facilities are needed to provide police services.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably expected development under the Proposed Plan, and specifically, Section 4.13.2 (Police Protection Services) for less than significant impacts related to emergency response capabilities and police protection services.</p>
	<p>PS-12 All businesses desiring to sell or allow consumption of alcoholic beverages within the proposed Project Area shall be reviewed by the LAPD per established or applicable regulations or procedures.</p>	<p>Not necessary. Projects that apply for a new alcohol permit will be required to file a Conditional Use Permit with City Planning and obtain the required alcohol permits with the Alcoholic Beverage Control (ABC), and the application is sent to the LAPD for their input.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably expected development under the Proposed Plan, and specifically, Section 4.13.2 (Police Protection Services) for less than significant impacts related to emergency response capabilities and police protection services.</p>
	<p>PS-13 All new developments shall provide the appropriate police division commanding officer with a detailed diagram of the project, which should include access routes, unit numbers, and any information that would facilitate police response.</p>	<p>Not necessary and infeasible. As a policy matter, the City finds adopting additional review requirements and standards for ministerial projects to address security features is unnecessary and undesirable and would not be an efficient use of City resources. Additionally, the City determines when new or expanded facilities are needed to provide police services.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably expected development under the Proposed Plan, and specifically, Section 4.13.2 (Police Protection Services) for less than significant impacts related to emergency response capabilities and police protection services.</p>

Adelante Eastside Redevelopment Project Final Program EIR Mitigation Measures

Impact Area		Mitigation Measure	Reason for Deleting Mitigation Measures	Impact of Removing Mitigation Measure
	Schools	PS-14 To minimize student safety concerns due to construction traffic, construction vehicles shall not be parked or be staged next to school sites to the greatest extent feasible and haul trucks shall not be routed past District schools except when schools are not in session. Construction sites shall be properly fenced, secured, and illuminated.	Not necessary and infeasible. The City of Los Angeles has partnered with LAUSD on Vision Zero Los Angeles, which is an initiative to eliminate traffic deaths in the City. Safe Routes to School is a key component of Vision Zero Los Angeles. Since the launch of the Safe Routes to School Strategic Plan in 2011, the LAUSD and the City of Los Angeles have formed a close partnership that focuses on enabling and encouraging children to walk and bicycle safely to school. These efforts have culminated in the Safe Routes to School Action Plan, which identifies steps to increase safety and decrease deaths and serious injuries. A number of traffic safety improvements are currently being implemented at Breed Street Elementary and Sheridan Street Elementary schools. As a policy matter, the City finds adopting additional processes, review and requirements to address construction traffic is unnecessary and undesirable and would not result in good public policy or desirable land use outcomes.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably expected development under the Proposed Plan, and specifically, Section 4.13.3 (Public Schools) that are less than significant impacts related to schools.
	Libraries	None	None	N/A
	Park and Recreational Facilities	PS-16 Where feasible and appropriate, open space in existing public facilities, such as school grounds, should be available for after-hour recreational use.	Infeasible. The Proposed Plan includes policies for ongoing interagency coordination with other departments and agencies on joint use of recreation facilities, as well as park acquisition and maintenance, and park access. Quimby fees, which fund parks, are required for development projects that include new residential dwelling units and the City has park fees. In addition, this is a policy/future program and not a mitigation measure.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Boyle Heights Community Plan, and specifically Section 4.13.4 (Parks and Recreation) -potentially significant impacts related to the deterioration of existing parks.
		PS-17 For commercial development in the proposed Project Area, design guidelines should require some usable open space to be included in landscaped areas.	Not necessary. The Proposed Plan includes zoning standards with required amenity and open space provisions for residential and non-residential buildings within the Plan Area.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Boyle Heights Community Plan, and specifically Section 4.13.4 (Parks and Recreation) -potentially significant impacts related to the deterioration of existing parks.
Utilities	Water Infrastructure / Water Supply	UT-1 During the next 5 to 15 years when most of the development in the proposed project would occur, it may become necessary for individual developments to make a fair share contribution to replace and upgrade the water delivery infrastructure as determined by the DWP, although at present this is not expected to be necessary.	Not necessary. Development projects of a certain size are required to complete a Water Supply Assessment for the Department of Water and Power's review and approval. The assessment determines whether the projected water demand associated with a proposed project is included as part of the most recently adopted Urban Water Management Plan. Specifically, a water supply assessment shall identify existing water supply entitlements, water rights, or water service contracts held by the public water system, and prior years' water deliveries received by the public water system.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Project, and specifically, Section 4.15.1 (Water Supply) less than significant impacts related to water infrastructure and supply.
		UT-2 Any construction or development within Metropolitan right-of-way shall comply with Metropolitan Water District of Southern California restrictions (loading restrictions, tree planting restrictions, etc.).	Not necessary. Applicants of future development projects will continue to be required to coordinate and comply with the Metropolitan Water District's construction, project development, and project siting requirements, as applicable.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Project, and specifically, Section 4.15.1 (Water Supply) - less than significant impacts related to water infrastructure and supply.
		UT-3 Projects within the proposed Project Area shall satisfy and/or exceed water conservation measures mandated by Ordinance No. 166,080 and Ordinance No. 165,004.  <ul style="list-style-type: none"> <li>• Use of reclaimed water during grading and construction for dust control, soil compaction, and concrete mixing.</li> <li>• Mandatory reduction of water consumption by 15 percent.</li> <li>• Installation of toilet tank conservation devices.</li> <li>• Landscaping with drought-tolerant/indigenous species (xeriscape).</li> <li>• Installation of other water saving devices such as faucets and showers for new development, as well as the retrofit of fixtures for existing developments that may be included within the proposed reinvestment projects.</li> </ul>	Not necessary. The City has programs supporting water conservation, consistent with State law. Projects would be required to comply with the City's water conservation ordinances, such as the Model Water Efficient Landscape Ordinance, and Supply Ordinance No. 165004 to reduce water consumption, in order to obtain building permits in the City of Los Angeles. As a policy matter, the City finds adopting additional processes, review and requirements to address utilities for the approval of development projects or construction is unnecessary and undesirable and would not result in good public policy or desirable land use outcomes.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Project, and specifically, Section 4.15.1 (Water Supply) less than significant impacts related to water infrastructure and supply.
		UT-4 In addition, the City of Los Angeles DWP recommends the following water conservation measures: <ul style="list-style-type: none"> <li>• Automatic sprinkler systems should be set to irrigate landscaping during early morning hours or during the evening to reduce water losses from evaporation. However, care must be taken to reset sprinklers to water less often in cooler months and during the rainfall season so that water is not wasted by excessive landscape irrigation.</li> <li>• All landscaped areas in the proposed project shall be provided with an irrigation water system separate from the potable water system to allow future use of reclaimed water.</li> <li>• Drip irrigation systems should be used for any proposed irrigation systems.</li> <li>• Future site-specific developments in the proposed Project Area shall comply with improvements determined by the Fire Department as necessary to satisfy fire-flow requirements (see Section 3.9 Fire Protection).</li> </ul>	Not necessary. The City has programs supporting water conservation, consistent with State law. Projects would be required to comply with the City's water conservation ordinances, such as the Model Water Efficient Landscape Ordinance, and Supply Ordinance No. 165004 to reduce water consumption, in order to obtain building permits in the City of Los Angeles. As a policy matter, the City finds adopting additional processes, review and requirements to address utilities for the approval of development projects or construction is unnecessary and undesirable and would not result in good public policy or desirable land use outcomes.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Project, and specifically, Section 4.15.1 (Water Supply) - less than significant impacts related to water infrastructure and supply.
	Wastewater & Sewage Treatment	UT-5 All new development shall comply with the requirements of the City's Sewer Ordinance No. 166,060, Water Conservation Ordinances Nos. 165,004 165,615, 166,808, and any related subsequent ordinances.	Not necessary. This is part of the regulatory framework to enact water conservation regulations.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Project, and specifically, Section 4.15.2 (Wastewater and Stormwater Drainage)- less than significant impacts related to wastewater and sewage treatment.

Adelante Eastside Redevelopment Project Final Program EIR Mitigation Measures

Impact Area	Mitigation Measure	Reason for Deleting Mitigation Measures	Impact of Removing Mitigation Measure
	<p>UT-6 For all new development, the Bureau of Engineering Planning and Scheduling Department shall send written confirmation regarding the availability of sewage treatment capacity to the Regional Water Quality Control Boards. A copy of this letter must be sent to the Regional Board prior to the approval of individual development projects, as required by law.</p>	<p>Not necessary and Infeasible. This mitigation measure requires ministerial projects to complete a sewer capacity study which is inconsistent with a ministerial process. A Sewer Capacity Availability Review (SCAR) is generally required for projects expected to exceed 10,000 gpd, or a request from a property owner seeking to increase their discharge through their existing connection by 10,000 gpd or more, or any groundwater related project that discharges 10,000 gpd or more, or any proposed or future development for a project that could result in a discharge of 10,000 gpd or more. LAMC Section 64.11 and 64.12 require approval of a sewer permit prior to connection to the wastewater system; LAMC 64.15 requires that a Sewer Capacity Availability Request (SCAR) be performed by LADBS when a sewer permit is sought for a new connection to the City's wastewater system or in the event that a proposed increase in discharge to a public wastewater line or proposed future development is anticipated to generate 10,000 gallons or more of wastewater per day. Additionally, as discussed in the DEIR, DWP has a program from upgrading sewer lines, that would include Sunset Boulevard. As a policy matter, the City finds adopting additional programs, requirements or standards related to sewer capacity or changing its sewer upgrade program from the existing programs, requirements and standards is unnecessary and undesirable and would not result in good public policy or desirable land use outcomes or improved sewer system for the City and would not be an efficient use of City resources.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Project, and specifically, Section 4.15.2 (Wastewater and Stormwater Drainage)- less than significant impacts related to wastewater and sewage treatment.</p>
	<p>UT-7 At the time specific major development proposals for projects within the proposed Project Area are submitted, a detailed study of condition and capacity of local sewer lines and the sewage increase due to the project(s) shall be prepared with assistance from the Bureau of Engineering.</p>	<p>Not necessary. A Sewer Capacity Availability Review (SCAR) is generally required for projects expected to exceed 10,000 gpd, or a request from a property owner seeking to increase their discharge through their existing connection by 10,000 gpd or more, or any groundwater related project that discharges 10,000 gpd or more, or any proposed or future development for a project that could result in a discharge of 10,000 gpd or more. LAMC Section 64.11 and 64.12 require approval of a sewer permit prior to connection to the wastewater system; LAMC 64.15 requires that a Sewer Capacity Availability Request (SCAR) be performed by LADBS when a sewer permit is sought for a new connection to the City's wastewater system or in the event that a proposed increase in discharge to a public wastewater line or proposed future development is anticipated to generate 10,000 gallons or more of wastewater per day. Additionally, as discussed in the DEIR, DWP has a program from upgrading sewer lines, that would include Sunset Boulevard. As a policy matter, the City finds adopting additional programs, requirements or standards related to sewer capacity or changing its sewer upgrade program from the existing programs, requirements and standards is unnecessary and undesirable and would not result in good public policy or desirable land use outcomes or improved sewer system for the City and would not be an efficient use of City resources.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Project, and specifically, Section 4.15.2 (Wastewater and Stormwater Drainage)- less than significant impacts related to wastewater and sewage treatment.</p>
Storm Drainage	<p>UT-8 Stormwater discharges from each project site shall meet, at a minimum, all applicable requirements of the State Regional Water Quality Control board and National Pollutant Discharge Elimination System (NPDES) Permit requirements (Order number 96054 NPDES Permit CAS614001 was issued by the California Regional Water Quality Control Board to the County and local agencies), and shall comply with implementation of these requirements through responsible City and County of Los Angeles agencies.</p>	<p>Not necessary. All future developments in the Community Plan Area would be required to comply with the LID Ordinance and Stormwater and Urban Runoff Pollution Control Ordinance, which require the inclusion of BMPs in a project's design to prevent, control, and reduce stormwater pollutants. The City's Stormwater and Urban Runoff Pollution Control Ordinance requires future development to comply with the SUSMP requirements, if applicable and integrate LID practices and standards for stormwater pollution mitigation, and maximize open, green, and pervious space on all development consistent with the City's landscape ordinance and other related requirements. As a policy matter, the City finds adopting additional processes, review and requirements to address stormwater discharge or the approval of development projects or construction is unnecessary and undesirable and would not result in good public policy or desirable land use outcomes.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Project, and specifically, Section 4.15.2 (Wastewater and Stormwater Drainage)- less than significant impacts related to stormwater drainage.</p>
	<p>UT-9 A drainage plan shall be developed to the satisfaction of the City Engineer for review and approval, prior to development of any drainage improvements at individual large-scale project sites.</p>	<p>Not necessary. Future development would be required to comply with Division 18, Soils and Foundations, of the LABC, which adopted Chapter 18 of the CBC by reference. Therefore, future development would be required to comply with the CBC regarding the minimum standards for structural design and site development. An acceptable degree of soil stability can be achieved for soil materials by the CBC-required incorporation of soil treatment programs (replacement, grouting, compaction, drainage control, etc.) in the excavation and construction plans to address site-specific soil conditions and on-site drainage. Adherence to these requirements would achieve accepted safety standards relative to unstable geologic units or soils.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Project, and specifically, Section 4.15.2 (Wastewater and Stormwater Drainage)- less than significant impacts related to stormwater drainage.</p>
Solid Waste Disposal	<p>UT-10 In accordance with AB 939 and the City's Solid Waste Management Plan, major new development projects within the proposed Project Area shall prepare and submit a Source Reduction and Recycling Plan (SRRP) to the Planning Department, prior to the approval of building permits, documenting and outlining the incorporation of an on site recycling/conservation program(s).</p>	<p>Not necessary. As of July 1, 2012 AB 341 has required Mandatory Commercial Recycling in California. Businesses, public entities that subscribe to waste collection services, and multi-family residential properties with five or more units are required to have a recycling program.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Project, and specifically Section 4.15.3 (Solid Waste) for less than significant impacts related to solid waste.</p>

Adelante Eastside Redevelopment Project Final Program EIR Mitigation Measures

Impact Area		Mitigation Measure	Reason for Deleting Mitigation Measures	Impact of Removing Mitigation Measure
		<p>UT-11 The SRRP should include, but not necessarily be limited to, the following items:</p> <ul style="list-style-type: none"> <li>• Contracting with solid waste removal firms that will recycle all glass, aluminum, and paper products.</li> <li>• Providing space in the project for a solid waste storage area, to allow for source separation bins for newsprint, paper, bottles, and cans to be removed by appropriate trash recycling firms.</li> <li>• (for large employment generators) Instituting an employee participation recycling program whereby employees are given containers/bins to separate newsprint, white and/or colored paper for regular custodian collection and deposit into the larger separation containers to be removed by appropriate trash recycling firms.</li> <li>• (for large employment generators) Purchasing glass and aluminum recycling machines for prominent placement in lunchrooms (e.g., next to soda machines) or other easily accessible locations.</li> <li>• (for large employment generators) Instituting an employee educational program which would, through a series of brief educational sessions, outline various methods whereby employees can further contribute to methods of recycling/conservation in the office and home (e.g., contracting with firms for purchase of recycled paper, use of two-sided reports, replacement of styrofoam cups with ceramic coffee mugs, etc.).</li> </ul>	<p>Not necessary. As of July 1, 2012 AB 341 has required Mandatory Commercial Recycling in California. Businesses, public entities that subscribe to waste collection services, and multi-family residential properties with five or more units are required to have a recycling program.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Project, and specifically Section 4.15.3 (Solid Waste) for less than significant impacts related to solid waste.</p>
		<p>UT-12 To minimize construction waste, it is recommended that project developers submit a brief plan as part of the SRRP outlining how demolition and construction debris shall be recycled during the demolition and construction phase. This plan shall include a proposed layout for source separation of materials and recycling bins at the project site and shall identify one or more prospective contractors specializing in demolition and construction waste management to be responsible for maximizing the recycling of waste materials during the demolition and construction phase.</p>	<p>Not necessary. Impacts related to solid waste generation would be less than significant. In addition, the California Green Building Code (CALGreen) has requirements for residential and non-residential buildings, including newly constructed projects, additions and alterations. The requirements include diversion of at least 50 percent of the construction waste generated during new building construction (CALGreen Sections 4.408 and 5.408). Additionally, the Citywide Construction and Demolition (C&amp;D) Waste Recycling Ordinance requires all mixed construction and demolition waste generated within city limits be taken to City certified C&amp;D waste processors. LA Sanitation (LASAN) is responsible for the C&amp;D waste recycling policy. All haulers and contractors responsible for handling C&amp;D waste must obtain a Private Waste Hauler Permit from LASAN prior to collecting, hauling and transporting C&amp;D waste, and C&amp;D waste can only be taken to City certified C&amp;D processing facilities.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Project, and specifically Section 4.15.3 (Solid Waste) for less than significant impacts related to solid waste.</p>
Energy	Electricity & Natural Gas Consumption	<p>EN-1 During the design process, large-scale site developers shall consult with Department of Water and Power and Southern California Gas Company regarding possible energy conservation measures. Each large-scale site developer should incorporate measures which would exceed minimum Title XXIV standards.</p>	<p>Not necessary. All building permits are required to comply with Title 24 (California Building Standards Code), which includes energy efficiency requirements for residential and nonresidential buildings, including newly constructed projects, additions and alterations.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Project, and specifically Section 4.5 (Energy)- less than significant impacts related to energy consumption.</p>
	Gasoline and Diesel Fuel Consumption	<p>No mitigation required</p>	<p>N/A</p>	<p>N/A</p>
Geology & Seismicity	Oil Fields	<p>GS-1 Improperly abandoned oil wells shall be identified during the geotechnical investigations for project facilities and properly abandoned. If methane gas is present, its occurrence shall be monitored and protective design measures shall be identified.</p> <p>If any structure is to be located over or in the proximity of a previously plugged and abandoned well, that well may require plugging to current Division of Oil, Gas and Geothermal Resources specifications. Section 3208.1 of the Public Resources Code authorizes the State Oil and Gas Supervisor to order reabandonment of any previously plugged and abandoned well when construction of any structure over or in the proximity of the well could result in a hazard. In addition, if the well requiring plugging or reabandonment is on an adjacent property and near the common property line, the Division recommends that the structure be set back sufficiently to allow future access to the well. Additionally, designers shall consider potential gas migration into occupied levels and identify protective monitoring and design mitigation measures.</p> <p>If any plugged and abandoned or unrecorded wells are damaged or uncovered during excavation or grading, remedial plugging operations may be required. If such damage or discovery occurs, the Division's district office must be contacted to obtain information on the requirements for and approval to perform remedial operations.</p>	<p>Not necessary. LAMC Section 91.6105 prohibits the development of specific uses and buildings in proximity to an oil well casing. These include schools, sanitariums, an assembly occupancy (i.e., gather place for 50 or more people), fuel manufacturing plant, or public utility generating, receiving, or distributing electricity, and buildings more than 400 square feet in area and tall than 36 feet in height. In addition, in accordance with LAMC Section 91.7109.2, any abandoned oil well encountered during construction is required to be evaluated by the Fire Department and may be required to be re-abandoned in accordance with applicable rules and regulations of the California Division of Oil, Gas, and Geothermal Resources (CALGEM).</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Project, and specifically, Section 4.8 (Hazards and Hazardous Materials) - less than significant impacts related to oil wells</p>

Adelante Eastside Redevelopment Project Final Program EIR Mitigation Measures

Impact Area		Mitigation Measure	Reason for Deleting Mitigation Measures	Impact of Removing Mitigation Measure
	Soils	GS-2 The impacts of corrosive soils shall be mitigated by sampling and chemical testing of site soils by the geotechnical engineer. The geotechnical report shall include recommendations regarding the cement type necessary to protect concrete foundations and should identify measures to protect metal pipes and conduits placed in the ground.	Not necessary. The California Building Code has requirements (CBC Appendix J) for all grading, excavation, and earthwork construction, and prohibits grading from occurring without first having obtained a permit from the local jurisdiction, which would be the Department of Building and Safety. Section J104.3 of the California Building Code requires the preparation of a geotechnical report that notes the nature and distribution of existing soils, conclusions and recommendations for grading procedures, soil design criteria for any structures or embankments required to accomplish the proposed grading, and where necessary, slope stability studies, and recommendations and conclusions regarding site geology. This applies to projects that include grading, excavation, and earthwork and not just for construction of a new building. To extent this mitigation measure is to address impacts from existing conditions to future residents of the project, those are not CEQA impacts pursuant to CBIA v. BAAQMD.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Project, and specifically see Section 4.6 (Geology and Soils)- less than significant impacts related to geology and soils.
	Ground Shaking	GS-3 Construction of new development shall conform to all applicable provisions of the Los Angeles Municipal Code, including the revised (1992 as amended) Division 23, Section 2312 of the Building Code. The information regarding ground motion and spectra response determined from the dynamics analysis shall be implemented in the seismic design of future buildings. Future construction shall conform to the Uniform Building Code's earthquake design criteria for Seismic Zone 4, as well as the 1990 Recommended Lateral Force requirements and Commentary by the Structural Engineers Association of California.	Not necessary. This is currently part of the regulatory framework. The Los Angeles Municipal Code, including the revised (1992 as amended) Division 23, Section 2312 of the Building Code, establishes regulations for proper earthquake design and engineering and requires dynamic analysis for structures that are over 160 feet in height. The information regarding ground motion and spectra response determined from the dynamics analysis would be implemented in the seismic design of the buildings.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Project, and specifically Section 4.6 (Geology and Soils)- less than significant impacts related geology and seismic hazards.
	Liquefaction and Seismically Induced Settlement	GS-4 If moderate to high liquefaction potential within the proposed Project Area or earthquake induced subsidence potential is confirmed by geotechnical analyses, then mitigation should be implemented. Appropriate mitigation, which could include the use of soil improvement techniques such as stone columns or dynamic compaction, or use of deep foundations, is dependent on site-specific conditions, which will be identified by geotechnical investigation	Not necessary. The California Building Code has requirements (CBC Appendix J) for all grading, excavation, and earthwork construction, and prohibits grading from occurring without first having obtained a permit from the building official. Section J104.3 requires the preparation of a geotechnical report that notes the distribution of existing soils, conclusions and recommendations for grading procedures, soil design criteria for any structures or embankments required to accomplish the proposed grading, and where necessary, slope stability studies, and recommendations and conclusions regarding site geology. This applies to projects that include grading, excavation, and earthwork and not just for construction of a new building. To extent that this MM is to address impacts from existing conditions to future residents of the project, those are not CEQA impacts pursuant to CBIA v. BAAQMD.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Project, and specifically Section 4.6 (Geology and Soils)- less than significant impacts related geology and seismic hazards.
Hydrology	Groundwater	H-1 A hydrological assessment shall be prepared for all proposed projects in areas with a high groundwater table. This assessment shall assess effects on associated aquifers as well as pumping and dewatering requirements.	Not necessary and Infeasible. The State Water Resources Board already requires Phase I storm water regulations review for all projects that meet a certain threshold. In addition, future developments in the Plan Area would be required to comply with the LID Ordinance and Stormwater and Urban Runoff Pollution Control Ordinance, which require the inclusion of Best Management Practices in a project's design to prevent, control, and reduce stormwater pollutants. The City's Stormwater and Urban Runoff Pollution Control Ordinance requires future development to comply with the SUSMP requirements, if applicable and integrate LID practices and standards for stormwater pollution mitigation, and maximize open, green, and pervious space on all development consistent with the City's landscape ordinance and other related requirements. As a policy matter, the City finds adopting additional processes, review and requirements to address the high groundwater table in the approval of development projects or construction is unnecessary and undesirable and would not result in good public policy or desirable land use outcomes.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Project, specifically Section 4.9 (Hydrology)- less than significant impacts related to the degradation of ground water, Section 4.6 (Geology and Soils)- less than significant impacts related to geology and soils and Section 4.15 (Utilities & Service Systems)- less than significant impacts related to stormwater drainage.
		H-2 In the event that groundwater is encountered during construction, a dewatering system shall be installed and special shoring installation techniques implemented, as required by local building codes and regulations, to reduce the potential for the caving of sandy soils. If high groundwater levels affecting foundations, basement walls, or floor slabs are encountered, special remedial measures should be incorporated as part of the project design in compliance with the requirements of local codes. The hydrostatic design or sub drain system should be subject to review and approval by the Los Angeles Department of Building and Safety.	Not necessary. This is already part of the regulatory framework. The Los Angeles Municipal Code sets forth requirements for construction activities and facility operations of development and redevelopment projects to comply with the requirements of the NPDES permit and SUSMP requirements. New development, including their associated construction activities and facility operations, are required to comply with the Land Development requirements of the Los Angeles County MS4 permit through integrating LID practices and standards for stormwater pollution mitigation, and maximize open, green and pervious space on all developments and redevelopments consistent with the City's Landscape Ordinance and other related requirements in the Development Best Management Practices Handbook. The LID Ordinance applies first to a project in lieu of SUSMP. If a large project cannot meet the requirements of the LID Ordinance, then SUSMP measures are applied.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Project, specifically Section 4.9 (Hydrology and Water Quality)- less than significant impacts related to the degradation of ground and surface water, and Section 4.15 (Utilities & Service Systems)- less than significant impacts related to stormwater drainage.

Adelante Eastside Redevelopment Project Final Program EIR Mitigation Measures

Impact Area	Mitigation Measure	Reason for Deleting Mitigation Measures	Impact of Removing Mitigation Measure
	<p>Surface Waters</p> <p>H-3 State Water Resources Control Board Phase I storm water regulations require construction activities disturbing fewer than 5 acres that are part of a large common plan of development to obtain a General Permit. Individual projects may be required to obtain a Phase II NPDES General Permit (Phase II General Permit). As a component of the Phase II General Permit, a storm Water Pollution Prevention Plan shall specifically identify Best Management Practices to mitigate water quality impacts on receiving waters due to surface water runoff from the project site. The implementation of Best Management Practices or pollution and erosion control measures may include the placement of sandbags around basins, construction of a berm to keep runoff from flowing into the construction site, and keeping motor vehicles at a safe distance from the edge of excavation. Additional measures include the use of proper grading techniques; appropriate sloping, shoring, and bracing of the construction site; and covering or stabilizing topsoil stockpiles.</p>	<p>Not necessary and infeasible. This is already part of the regulatory framework. The State Water Resources Board already requires Phase I storm water regulations review for all projects that meet a certain threshold. In addition, future developments in the Plan Area would be required to comply with the LID Ordinance and Stormwater and Urban Runoff Pollution Control Ordinance, which require the inclusion of Best Management Practices in a project's design to prevent, control, and reduce stormwater pollutants. The City's Stormwater and Urban Runoff Pollution Control Ordinance requires future development to comply with the SUSMP requirements, if applicable and integrate LID practices and standards for stormwater pollution mitigation, and maximize open, green, and pervious space on all development consistent with the City's landscape ordinance and other related requirements. As a policy matter, the City finds adopting additional processes, review and requirements to address hazardous materials for the approval of development projects or construction is unnecessary and undesirable and would not result in good public policy or desirable land use outcomes.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Project, specifically Section 4.9 (Hydrology and Water Quality)- less than significant impacts related to the degradation of ground and surface water, Section 4.6 (Geology and Soils)- less than significant impacts related to geology and soils, Section 4.8 (Hazards and Hazardous Materials) related to less than significant impacts related to water pollution, and Section 4.15 (Utilities &amp; Service Systems)- less than significant impacts related to stormwater drainage.</p>
<p>Hazardous Materials</p>	<p>Hazardous Waste</p> <p>HM-1 If there is a low potential for encountering hazardous waste, the following shall be performed; Available environmental records shall be reviewed by a qualified professional, a thorough historical land use assessment shall be completed, and a site inspection shall be performed. Visual inspection should look for evidence of spills or discharge of hazardous substances (stains; corroded drains, floors, or pavement) and insure any hazardous materials, including asbestos and lead-based paint, are removed prior to site work or demolition. Sampling and testing of potentially contaminated soil or building materials may be required to complete the mitigation. Results of the site inspection or sampling may lead to further site investigation and assessment.</p> <p>HM-2 If there is a moderate potential for encountering hazardous waste, Site inspection shall be performed to verify current conditions and perform additional sampling judged necessary by the record review. Leaking underground storage tank sites where new basements, subterranean parking, or deep (greater than 5 feet) foundation excavations are planned should consider drilling test holes and collecting samples as confirmation of remediation. Discoveries of residual contamination may require additional remediation or a risk assessment that considers the future use. Sites with underground storage tanks where the status and/or number of tanks is not reported should undergo further record review to determine the status, condition, contents, and number of tanks. Inactive underground storage tank sites may have old tanks in poor condition and, therefore, should be thoroughly evaluated for condition and possible leaks. Development of sites with non-leaking underground storage tanks should include tank removal according to local regulations. Inspection during tank and piping removal and soil sampling should verify tank and piping integrity. Discovery of unknown contamination will require remedial plans.</p> <p>HM-3 If there is a high potential for encountering hazardous waste, the following shall occur: Available records shall be reviewed, a site inspection shall be performed, and responsible parties shall be contacted to determine whether remediation plans are in progress, and if so, is progress compatible with the proposed development plans and schedule. Where practical, remediation may continue during planning or be included or enhanced by the development plans. Abandoned sites or sites judged to be not fully characterized may require further investigation and preparation of remedial plans.</p> <p>HM-4 Qualified professionals and technicians shall perform the necessary research, field observations, exploratory work, construction, demolition and removal of hazardous materials.</p> <p>HM-5 At sites where underground storage tanks are suspected, the presence of such tanks must be proved. If tanks are present, they should be removed; and the necessary sampling, laboratory testing and technical analyses should be performed to evaluate the presence of contaminants in the soil and groundwater. The procedures shall be performed by a qualified environmental professional in conformance with applicable city, state, and federal standards and guidelines. Several generations of study through remediation may be required at such sites.</p>	<p>Not necessary. The Proposed Plan DEIR has a similar mitigation measure (MM HM1) that requires full database research for projects that involve construction-related soil disturbance located on land that is currently or was historically zoned as industrial or, previously had a gas station or dry-cleaning facility on-site. This initial database search could result in the need to complete a Phase I and Phase II Assessment. As a policy matter, the City finds adopting additional processes, review and requirements to address hazardous materials for the approval of development projects or construction is unnecessary and undesirable and would not result in good public policy or desirable land use outcomes.</p> <p>Not necessary. The Proposed Plan DEIR has a similar mitigation measure (MM HM1) that requires full database research for projects that involve construction-related soil disturbance located on land that is currently or was historically zoned as industrial or, previously had a gas station or dry-cleaning facility on-site. This initial database search could result in the need to complete a Phase I and Phase II Assessment. The DEIR also includes a As a policy matter, the City finds adopting additional processes, review and requirements to address hazardous materials for the approval of development projects or construction is unnecessary and undesirable and would not result in good public policy or desirable land use outcomes.</p> <p>Not necessary. The Proposed Plan DEIR has a similar mitigation measure (MM HM1) that requires full database research for projects that involve construction-related soil disturbance located on land that is currently or was historically zoned as industrial or, previously had a gas station or dry-cleaning facility on-site. This initial database search could result in the need to complete a Phase I and Phase II Assessment. As a policy matter, the City finds adopting additional processes, review and requirements to address hazardous materials for the approval of development projects or construction is unnecessary and undesirable and would not result in good public policy or desirable land use outcomes.</p> <p>Not necessary. This mitigation measure is already part of the regulatory framework and would therefore already be required in the event that hazardous materials are found on a project site.</p> <p>Not necessary. The Proposed Plan DEIR has a similar mitigation measure (MM HM1) that requires full database research for projects that involve construction-related soil disturbance located on land that is currently or was historically zoned as industrial or, previously had a gas station or dry-cleaning facility on-site. This initial database search could result in the need to complete a Phase I and Phase II Assessment. As noted in the regulatory framework, SCAQMD's Rule 1166 requires that SCAQMD review and approve a mitigation program prior to any excavation of a underground storage tank. As a policy matter, the City finds adopting additional processes, review and requirements to address hazardous materials for the approval of development projects or construction is unnecessary and undesirable and would not result in good public policy or desirable land use outcomes.</p>	<p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and specifically, see Section 4.8 (Hazards &amp; Hazardous Materials) - less than significant impacts with mitigation related to hazardous waste.</p> <p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and specifically, see Section 4.8 (Hazards &amp; Hazardous Materials) - less than significant impacts with mitigation related to soil contamination</p> <p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and specifically, see Section 4.8 (Hazards &amp; Hazardous Materials) - less than significant impacts with mitigation related to hazardous waste.</p> <p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and specifically, see Section 4.8 (Hazards &amp; Hazardous Materials) - less than significant impacts with mitigation related to hazardous waste.</p> <p>See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and specifically, see Section 4.8 (Hazards &amp; Hazardous Materials) - less than significant impacts with mitigation related to hazardous waste and Section 4.6 (Geology and Soils) for less than significant impacts related to geology and soils.</p>

Adelante Eastside Redevelopment Project Final Program EIR Mitigation Measures

Impact Area	Mitigation Measure	Reason for Deleting Mitigation Measures	Impact of Removing Mitigation Measure
	HM-6 The applicant shall provide the Fire Department with a summary of all local, county, state and federal required remediation activities relating to the removal of contaminated soil and/or underground tanks, if any, and submit evidence of compliance prior to the beginning of construction.	Not necessary. This is already part of the regulatory framework under the Los Angeles Fire Code.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and specifically, see Section 4.8 (Hazards & Hazardous Materials) - less than significant impacts with mitigation related to hazardous waste and Section 4.6 (Geology and Soils) for less than significant impacts related to geology and soils.
	HM-7 Periodic monitoring of development sites, as appropriate, shall be conducted during demolition and excavation. Proper steps shall be taken to assure against improper runoff or air releases.	Not necessary. This is already part of the regulatory framework under the Los Angeles Fire Code. The LAFD monitors the storage of hazardous materials for compliance with local requirements. Specifically, businesses and facilities that store more than threshold quantities of hazardous materials as defined by the California Health and Safety Code are required to file an Accidental Risk Prevention Program with the LAFD.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and specifically, see Section 4.8 (Hazards & Hazardous Materials) - less than significant impacts with mitigation related to hazardous waste and Section 4.2 (Air Quality) for less than significant impacts with mitigation related to air quality.
	HM-8 If excavation of contaminated soils is required at an individual site, the proper sponsor shall prepare an Excavation Management Plan or mitigation plan and submit it for approval to the SCAQMD Executive Officer, and obtain an SCAQMD Rule 150/166 permit, depending on the contamination, and implement any specified air quality monitoring requirements.	Not necessary. This is already part of the regulatory framework under SCAQMD's Rule 1166, which requires that an approved mitigation plan be obtained from SCAQMD prior to commencing excavation of a underground storage tank; excavation of piping which has stored VOCs; excavation or grading of soil containing VOC material including gasoline, diesel, crude oil, lubricant, waste oil, adhesive, paint, stain, solvent, resin, monomer, and/or any other material containing VOCs; the handling or storage of VOC-contaminated soil at or from an excavation or grading site; or the treatment of VOC-contaminated soil at a facility.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and specifically, see Section 4.8 (Hazards & Hazardous Materials) - less than significant impacts with mitigation related to hazardous waste and Section 4.6 (Geology and Soils) for less than significant impacts related to geology and soils and Section 4.2 (Air Quality) for less than significant impacts with mitigation related to air quality.
	HM-9 If abandoned or plugged oil or gas wells are located on any sites proposed for modification, the Division of Oil, Gas and Geothermal Resources must be contacted to provide a review of the site. If any such wells have not been abandoned or plugged to current standards of the Division, reabandonment may be required. Procedures for this process are available from the Division.	Not necessary. On January 1, 2020 the Division of Oil, Gas and Geothermal Resources (DOGGR) was renamed to the Geologic Energy Management Division (CalGEM). Existing law requires that a property owner of a site that contains abandoned or plugged oil or gas wells obtain approval from the State Oil and Gas Supervisor or district deputy of CalGEM before making any modifications.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and specifically, see Section 4.8 (Hazards & Hazardous Materials) - less than significant impacts with mitigation related to hazardous waste, and oil or gas wells.
	HM-10 Use of transportation rights-of-way or vacant properties suspected to have been parts of such rights-of-way may require pesticide and herbicide characterization studies. Similarly, agricultural lands (if any) may require such studies.	Not necessary and Infeasible. The CPA does not include agricultural lands. The DEIR includes a mitigation measure that requires full database research for discretionary projects that involve construction-related soil disturbance located on land that is currently or was historically zoned as industrial. This initial database search could result in the need to complete a Phase I and Phase II Assessment. As a policy matter, the City finds adopting additional processes, review and requirements to address hazardous materials, including a pesticide characterization study for previous transportation rights-of-way, for the approval of development projects or construction is unnecessary and undesirable and would not result in good public policy or desirable land use outcomes.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and specifically, see Section 4.8 (Hazards & Hazardous Materials) - less than significant impacts with mitigation related to hazardous waste.
	HM-11 Prior to property acquisition, owners should provide disclosure statements regarding site history; improvements; and storage, handling and disposal of hazardous materials.	Not necessary. California Civil Code (Section 1102) requires the sale of real property of 1 to 4 dwelling units disclose the history of hazardous material use on site. California Health and Safety Code 25359.7 requires that an owner of a nonresidential real property disclose the history of hazardous materials use on the site prior to the sale, lease, or rental of the property. Failure to do so will subject the owner to actual damages and any other redress provided by law, and the owner may be liable for a civil penalty.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and specifically, see Section 4.8 (Hazards & Hazardous Materials) - less than significant impacts with mitigation related to hazardous waste.
	HM-12 If unknown contamination is encountered at any site, regardless of its prior status, all work at the site should be stopped until the nature, associated hazards and possible extent of the contamination and its impacts are understood and work can proceed safely. Remedial plans will be required at such sites.	Not necessary. This is already part of the regulatory framework under the Fire Code. The LAFD is designated as the enforcement agency for the City that regulates hazardous material and can refer the case to the appropriate County, State or Federal agency, including SCAQMD and DTSC. When unanticipated contamination is detected on a property, required action may include the work stoppage, temporary site closure, and notification to appropriate agencies. Significant contaminated sites will likely require a Phase I and Phase II Site Assessment.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and specifically, see Section 4.8 (Hazards & Hazardous Materials) - less than significant impacts with mitigation related to hazardous waste.
	HM-13 For individual development projects, the project sponsor shall develop a source control program for facilities handling hazardous materials designed to prevent or minimize release of hazardous materials into the environment. This program shall include engineering modifications, inspection, operation and maintenance programs, as appropriate.	Not necessary. This is already part of the regulatory framework under the Fire Code. The LAFD monitors the storage of hazardous materials in the City for compliance with local requirements. Specifically, businesses and facilities that store more than threshold quantities of hazardous materials as defined in California Health and Safety Code Chapter 6.95 are required to file an Accidental Risk Prevention Program with LAFD. This program includes information such as emergency contacts, phone numbers, facility information, chemical inventory, and hazardous materials handling and storage locations.	See the DEIR, Chapter 4, generally, for all impacts caused by the reasonably anticipated development under the Proposed Plan, and specifically, see Section 4.8 (Hazards & Hazardous Materials) - less than significant impacts with mitigation related to hazardous waste.

### 3.0 Construction Detail

#### Construction Phase

Phase Number	Phase Name	Phase Type	Start Date	End Date	Num Days Week	Num Days	Phase Description
1	Demolition	Demolition	3/7/2016	3/7/2016	5	1	
2	Grading	Grading	3/8/2016	3/8/2016	5	1	
3	Building Construction	Building Construction	3/9/2016	3/9/2016	5	1	
4	Paving	Paving	3/10/2016	3/10/2016	5	1	
5	Architectural Coating	Architectural Coating	3/11/2016	3/11/2016	5	1	

Acres of Grading (Site Preparation Phase): 0

Acres of Grading (Grading Phase): 0.5

Acres of Paving: 1.05

Residential Indoor: 0; Residential Outdoor: 0; Non-Residential Indoor: 0; Non-Residential Outdoor: 0; Striped Parking Area: 2,700 (Architectural Coating – sqft)

#### OffRoad Equipment

Boyle Heights Construction Scenarios (2016) - Los Angeles-South Coast County, Summer

Phase Name	Offroad Equipment Type	Amount	Usage Hours	Horse Power	Load Factor
Demolition	Excavators	1	8.00	158	0.38
Demolition	Tractors/Loaders/Backhoes	1	8.00	97	0.37
Grading	Excavators	1	8.00	158	0.38
Grading	Rubber Tired Dozers	1	8.00	247	0.40
Building Construction	Cranes	1	8.00	231	0.29
Building Construction	Rough Terrain Forklifts	1	8.00	100	0.40
Paving	Pavers	1	8.00	130	0.42
Paving	Paving Equipment	1	8.00	132	0.36
Architectural Coating	Aerial Lifts	1	8.00	63	0.31
Architectural Coating	Air Compressors	1	8.00	78	0.48

**Trips and VMT**

Phase Name	Offroad Equipment Count	Worker Trip Number	Vendor Trip Number	Hauling Trip Number	Worker Trip Length	Vendor Trip Length	Hauling Trip Length	Worker Vehicle Class	Vendor Vehicle Class	Hauling Vehicle Class
Demolition	2	20.00	0.00	50.00	14.70	6.90	20.00	LD_Mix	HDT_Mix	HHDT

### 3.0 Construction Detail

#### Construction Phase

Phase Number	Phase Name	Phase Type	Start Date	End Date	Num Days Week	Num Days	Phase Description
1	Demolition	Demolition	3/5/2040	3/5/2040	5	1	
2	Grading	Grading	3/6/2040	3/6/2040	5	1	
3	Building Construction	Building Construction	3/7/2040	3/7/2040	5	1	
4	Paving	Paving	3/8/2040	3/8/2040	5	1	
5	Architectural Coating	Architectural Coating	3/9/2040	3/9/2040	5	1	

Acres of Grading (Site Preparation Phase): 0

Acres of Grading (Grading Phase): 0.5

Acres of Paving: 1.05

Residential Indoor: 0; Residential Outdoor: 0; Non-Residential Indoor: 0; Non-Residential Outdoor: 0; Striped Parking Area: 2,700 (Architectural Coating – sqft)

#### OffRoad Equipment

Boyle Heights Construction Scenarios (2040) - Los Angeles-South Coast County, Summer

Phase Name	Offroad Equipment Type	Amount	Usage Hours	Horse Power	Load Factor
Demolition	Excavators	1	8.00	158	0.38
Demolition	Tractors/Loaders/Backhoes	1	8.00	97	0.37
Grading	Excavators	1	8.00	158	0.38
Grading	Rubber Tired Dozers	1	8.00	247	0.40
Building Construction	Cranes	1	8.00	231	0.29
Building Construction	Rough Terrain Forklifts	1	8.00	100	0.40
Paving	Pavers	1	8.00	130	0.42
Paving	Paving Equipment	1	8.00	132	0.36
Architectural Coating	Aerial Lifts	1	8.00	63	0.31
Architectural Coating	Air Compressors	1	8.00	78	0.48

**Trips and VMT**

Phase Name	Offroad Equipment Count	Worker Trip Number	Vendor Trip Number	Hauling Trip Number	Worker Trip Length	Vendor Trip Length	Hauling Trip Length	Worker Vehicle Class	Vendor Vehicle Class	Hauling Vehicle Class
Demolition	2	10.00	0.00	50.00	14.70	6.90	20.00	LD_Mix	HDT_Mix	HHDT
Grading	2	10.00	0.00	50.00	14.70	6.90	20.00	LD_Mix	HDT_Mix	HHDT
Building Construction	2	10.00	10.00	0.00	14.70	6.90	20.00	LD_Mix	HDT_Mix	HHDT
Paving	2	10.00	0.00	0.00	14.70	6.90	20.00	LD_Mix	HDT_Mix	HHDT
Architectural Coating	2	10.00	0.00	0.00	14.70	6.90	20.00	LD_Mix	HDT_Mix	HHDT

## Road Dust Emission Factors Calculation

$$E = [k \cdot (sL)^{0.91} \cdot (W)^{1.02}] \cdot (1 - (P/4N))$$

CARB, 2018

$$PM_{2.5} = PM_{10} \times 0.15$$

	dust generation rate lb/VMT	lbs/VMT	
E			
P	32.4 days/year	PM10	PM2.5
N	365 days/year	0.000344	0.000052
k	0.0022 lbPM10/lbPM		
sL	0.05 g/m <sup>2</sup>	lb/MMVMT	
W	2.4 tons	344.00	51.60

**1.3 User Entered Comments & Non-Default Data**

Downtown Plan Operational - 2040 No Project - Los Angeles-South Coast County, Annual

Project Characteristics -

Land Use - sf

Construction Phase - No construction

Grading - no const

Woodstoves - None included

Consumer Products -

Water And Wastewater - Assumed outdoor water minimal for Downtown Plan Area; adjusted to be consistent with UWMP

Vehicle Trips - Mobile emissions not calculated in CalEEMod

Solid Waste - Solid waste for public facilities reflects the CalEEMod default for Government Office Buildings per Utility Calculations Memo 4.2019

Downtown Plan Operational - 2040 No Project - Los Angeles-South Coast County, Summer

Project Characteristics -

Land Use - sf

Construction Phase - No construction

Grading - no const

Woodstoves - None included

Consumer Products -

Water And Wastewater - Assumed outdoor water minimal for Downtown Plan Area; adjusted to be consistent with UWMP

Vehicle Trips - Mobile emissions not calculated in CalEEMod

Solid Waste - Solid waste for public facilities reflects the CalEEMod default for Government Office Buildings per Utility Calculations Memo 4.2019

**1.3 User Entered Comments & Non-Default Data**

Downtown Plan Operational - 2040 No Project - Los Angeles-South Coast County, Winter

Project Characteristics -

Land Use - sf

Construction Phase - No construction

Grading - no const

Woodstoves - None included

Consumer Products -

Water And Wastewater - Assumed outdoor water minimal for Downtown Plan Area; adjusted to be consistent with UWMP

Vehicle Trips - Mobile emissions not calculated in CalEEMod

Solid Waste - Solid waste for public facilities reflects the CalEEMod default for Government Office Buildings per Utility Calculations Memo 4.2019

## Downtown Plan Operational - 2040 with DP - Los Angeles-South Coast County, Annual

Project Characteristics -

Land Use - sf

Construction Phase - No construction

Grading - no const

Woodstoves - None included

Consumer Products -

Area Coating -

Water And Wastewater - Assumed outdoor water minimal for Downtown Plan Area; water use from UWMP

Solid Waste - Solid waste for public facilities reflects the CalEEMod default for Government Office Buildings per Utility Calculations Memo 4.2019

Vehicle Trips - Mobile emissions not calculated in CalEEMod

**1.3 User Entered Comments & Non-Default Data**

Downtown Plan Operational - 2040 with DP - Los Angeles-South Coast County, Summer

Project Characteristics -

Land Use - sf

Construction Phase - No construction

Grading - no const

Woodstoves - None included

Consumer Products -

Area Coating -

Water And Wastewater - Assumed outdoor water minimal for Downtown Plan Area; water use from UWMP

Solid Waste - Solid waste for public facilities reflects the CalEEMod default for Government Office Buildings per Utility Calculations Memo 4.2019

Vehicle Trips - Mobile emissions not calculated in CalEEMod

## Downtown Plan Operational - 2040 with DP - Los Angeles-South Coast County, Winter

Project Characteristics -

Land Use - sf

Construction Phase - No construction

Grading - no const

Woodstoves - None included

Consumer Products -

Area Coating -

Water And Wastewater - Assumed outdoor water minimal for Downtown Plan Area; water use from UWMP

Solid Waste - Solid waste for public facilities reflects the CalEEMod default for Government Office Buildings per Utility Calculations Memo 4.2019

Vehicle Trips - Mobile emissions not calculated in CalEEMod

<b>4</b>	SMAQMD Friant Ranch Interim Recommendation

# INTRODUCTION

In response to the California Supreme Court decision on December 24, 2018, *Sierra Club v. County of Fresno (Friant Ranch)*, this paper provides a supplemental discussion on the potential for identifiable health impacts to result from air pollutants analyzed in City of Los Angeles (City) environmental documents prepared pursuant to the California Environmental Quality Act (CEQA). The discussion focuses on significant impacts identified in City Environmental Impact Reports (EIRs) and the feasibility of directly relating any identified significant adverse air quality impact to likely health consequences. The Supreme Court opinion in *Friant Ranch* requires projects with significant air quality impacts to “relate the expected adverse air quality impacts to likely health consequences or explain why it is not feasible at the time of drafting to provide such an analysis, so that the public may make informed decisions regarding the costs and benefits of the project” (*Friant Ranch*, page 6). The *Friant Ranch* decision also states that providing “only a general description of symptoms that are associated with exposure”... “fail[s] to indicate the concentrations at which such pollutants would trigger the identified symptoms....” and “the public would have no idea of the health consequences that result when more pollutants are added to a nonattainment basin”. This paper provides information to the public regarding health consequences associated with exposure to air pollutants and explains why direct correlation of a project’s pollutant emissions and anticipated health effects is currently infeasible, as no expert agency has approved a quantitative method to reliably and meaningfully translate mass emission estimates of criteria air pollutants to specific health effects for the scale of projects typically analyzed in City EIRs.

# BACKGROUND AND METHODOLOGY

The purpose of CEQA is to inform the public as to the potential for a proposed project to result in one or more significant adverse effects on the environment (including health effects). This includes the potential for a project to result in a considerable contribution towards one or more significant cumulative impacts. CEQA does not require detailed analysis of impacts that are found to be less than significant or less than a considerable contribution to a significant cumulative impact.

In accordance with CEQA requirements and the CEQA review process, the City assesses air quality impacts of proposed local plans and development projects, requires mitigation of potentially significant air quality impacts by conditioning discretionary permits, and monitors and enforces implementation of such mitigation. The State CEQA Guidelines Section 15064.7 states that the significance criteria established by the applicable air quality management district or air pollution control district, when available, may be relied upon to make determinations of significance. The City is located within the South Coast Air Basin (Air Basin), under the jurisdiction of the South Coast Air Quality Management District (SCAQMD). The City defers to threshold guidance established by the SCAQMD and utilizes the SCAQMD's *CEQA Air Quality Handbook* (approved by the AQMD Governing Board in 1993) and subsequent guidance provided on the SCAQMD website<sup>1</sup>. The SCAQMD is currently in the process of developing an *Air Quality Analysis Guidance Handbook* to replace the 1993 Handbook.

In addition, when considering potential air quality impacts under CEQA, consideration is given to the location of sensitive receptors within close proximity to land uses that emit toxic air contaminants (TACs). The California Air Resources Board (CARB) has published and adopted the *Air Quality and Land Use Handbook: A Community Health Perspective* (2005), which considers impacts to sensitive receptors from facilities that emit TAC emissions. CARB has also published *Strategies to Reduce Air Pollution Exposure Near High-Volume Roadways: Technical Advisory*, a supplement to the handbook that is intended to provide scientifically based strategies to reduce exposure to traffic emissions near high-volume roadways in order to protect public health and promote equity and environmental justice. The SCAQMD has also adopted land use planning guidelines in

---

<sup>1</sup> SCAQMD, *Air Quality Analysis Guidance*, <http://www.aqmd.gov/home/rules-compliance/ceqa/air-quality-analysis-handbook#>. Accessed August 2019.

the *Guidance Document for Addressing Air Quality Issues in General Plans and Local Planning* (2005). Together, the documents introduce land use-related policies and strategies that rely on design and distance parameters to minimize emissions and lower potential health risks.

It should also be noted that a host of other regional and local plans also generally address issues of air quality and public health. These include the Southern California Association of Governments (SCAG's) Regional Transportation Plan/Sustainable Communities Strategy (2016 RTP/SCS), SCAQMD's Air Quality Management Plan (AQMP), City of Los Angeles' General Plan (including the Framework, Air Quality, Mobility 2035, and Health and Wellness Elements), and City of Los Angeles' Green New Deal (Sustainable pLAN 2019). These contain policies and programs for the protection of the environment and health through improved air quality and serve to provide additional critical guidance for the betterment of public health for the region and City.

## CEQA THRESHOLDS OF SIGNIFICANCE

Certain air pollutants have been recognized to cause notable health problems and consequential damage to the environment either directly or in reaction with other pollutants, due to their presence in elevated concentrations in the atmosphere. Such pollutants have been identified and regulated as part of an overall endeavor to prevent further deterioration and facilitate improvement in air quality. The National Ambient Air Quality Standards (NAAQS) and California Ambient Air Quality Standards (CAAQS) have been set at levels considered safe to protect public health, including the health of sensitive populations such as asthmatics, children, and the elderly with a margin of safety, and to protect public welfare, including protection against decreased visibility and damage to animals, crops, vegetation, and buildings<sup>2</sup>. As the scientific methods for the study of air pollution health effects have progressed over the past decades, adverse effects have been shown to occur at lower levels of exposure. For some pollutants, no clear thresholds for effects have been demonstrated. New findings over time have, in turn, led to the revision and lowering of NAAQS which, in the judgment of the U.S. Environmental Protection Agency (EPA), are necessary to protect public health. Ongoing assessments of the scientific evidence from health studies continue to be an important part of setting and informing revisions to federal and state air quality standards<sup>3</sup>.

The six principal pollutants for which national and state criteria and standards have been promulgated, known as "criteria pollutants", and which are most relevant to current air quality planning and regulation in the

---

<sup>2</sup> U.S. EPA, *NAAQS Table*, <https://www.epa.gov/criteria-air-pollutants/naaqs-table>. Accessed July 2019.

<sup>3</sup> SCAQMD, *Final 2016 AQMP*, 2017. Appendix I-69. <https://www.aqmd.gov/docs/default-source/clean-air-plans/air-quality-management-plans/2016-air-quality-management-plan/final-2016-aqmp/appendix-i.pdf?sfvrsn=14>. Included as Attachment 1 of this memorandum.

Air Basin include: ozone (O<sub>3</sub>), respirable and fine particulate matter (PM<sub>10</sub> and PM<sub>2.5</sub>), carbon monoxide (CO), nitrogen dioxide (NO<sub>2</sub>), sulfur dioxide (SO<sub>2</sub>), and lead (Pb). The State of California has also set standards for sulfates (SO<sub>4</sub>), which are a component of particulate matter, and a nuisance odor standard for hydrogen sulfide (H<sub>2</sub>S). The Air Basin is currently in non-attainment and exceeds air quality standards for two criteria pollutants: ozone and particulate matter. The Los Angeles County portion of the Air Basin is also designated non-attainment for lead.

Although the SCAQMD's primary mandate is attaining the State and National Ambient Air Quality Standards for criteria pollutants within the district, SCAQMD also has a general responsibility pursuant to the Health and Safety Code §41700 to control emissions of air contaminants and prevent endangerment to public health. Additionally, state law requires the SCAQMD to implement airborne toxic control measures (ATCM) adopted by the California Air Resources Board (CARB), and to implement the Air Toxics "Hot Spots" Act. As a result, the SCAQMD has regulated pollutants other than criteria pollutants such as volatile organic compounds (VOCs), TACs, greenhouse gases, and stratospheric ozone depleting compounds. The SCAQMD has developed a number of rules to control non-criteria pollutants from both new and existing sources. These rules originated through state directives, Clean Air Act (CAA) requirements, or the SCAQMD rulemaking process.

As such, in addition to criteria pollutants, VOCs and TACs are also of concern in the Air Basin. Some VOCs are also classified by the state as TACs. While there are no specific VOC ambient air quality standards, VOCs are a prime component (along with NO<sub>x</sub>) of the photochemical processes by which such criteria pollutants as ozone, nitrogen dioxide, and certain fine particles are formed. They are therefore regulated as "precursors" to formation of these criteria pollutants.

TACs is a term used to describe airborne pollutants that may be expected to result in an increase in mortality or serious illness or which may pose a present or potential hazard to human health, and include both carcinogens and non-carcinogens. CARB and the California Office of Environmental Health Hazard Assessment (OEHHA) determine if a substance should be formally identified, or "listed," as a TAC in California. CARB has listed approximately 200 toxic substances, including those identified by the EPA, which are identified on the California Air Toxics Program's TAC List. TACs are also not classified as "criteria" air pollutants. The effects of TACs can be diverse and their health impacts tend to be local rather than regional; consequently ambient air quality standards for these pollutants have not been established, and analysis of health effects is instead based on cancer risk and exposure levels.

To achieve and maintain air quality standards, the SCAQMD has established numerical emission indicators of significance for regional and localized air quality impacts for both construction and operational phases of a local plan or project. The SCAQMD has established the thresholds based on "scientific and factual data that is contained in the federal and state Clean Air Acts" and recommends "that these thresholds be used by

lead agencies in making a determination of significance.”<sup>4</sup> The numerical emission indicators are based on the recognition that the Air Basin is a distinct geographic area with a critical air pollution problem for which ambient air quality standards have been promulgated to protect public health<sup>5</sup>. SCAQMD’s thresholds identified below represent the maximum emissions from a plan or project that are not expected to cause or contribute to an exceedance of the most stringent applicable national or state ambient air quality standard. By analyzing a plan or project’s emissions against the thresholds, EIRs assess whether these emissions directly contribute to any regional or local exceedances of the applicable ambient air quality standards and exposure levels.

*Note: In the thresholds referenced below, “emissions” refer to the actual quantity of pollutant measured in pounds per day (ppd). “Concentrations” refer to the amount of pollutant material per volumetric unit of air and are measured in parts per million (ppm), parts per billion (ppb), or micrograms per cubic meter (µg/m<sup>3</sup>).*

## Construction (Regional and Localized)

Given that construction impacts are temporary and limited to the construction phase, the SCAQMD has established numeric indicators of significance specific to construction activity. Based on the indicators in the SCAQMD *CEQA Air Quality Handbook*, a project would potentially cause or contribute to an exceedance of an ambient air quality standard if the following would occur:

- Regional construction emissions from both direct and indirect sources would exceed any of the following SCAQMD prescribed daily emissions thresholds:<sup>6</sup>
  - 75 pounds per day for VOC
  - 100 pounds per day for NO<sub>x</sub>
  - 550 pounds per day for CO
  - 150 pounds per day for SO<sub>2</sub>
  - 150 pounds per day for PM<sub>10</sub>
  - 55 pounds per day for PM<sub>2.5</sub>

In addition, the SCAQMD has developed a methodology to assess the potential for localized emissions to cause an exceedance of applicable ambient air quality standards or ambient concentration limits. The localized significance thresholds are only applicable to NO<sub>x</sub>, CO, PM<sub>10</sub> and PM<sub>2.5</sub>. The SCAQMD has established conservative screening criteria that can be used to determine the maximum allowable daily emissions that would satisfy the localized significance thresholds and therefore not cause or contribute to an exceedance of the applicable

---

<sup>4</sup> SCAQMD, *CEQA Air Quality Handbook 1993*, Page 6-2.

<sup>5</sup> Ibid.

<sup>6</sup> SCAQMD, *Air Quality Significance Thresholds*, March 2015. <http://www.aqmd.gov/docs/default-source/ceqa/handbook/scaqmd-air-quality-significance-thresholds.pdf?sfvrsn=2>. Accessed August 2019.

ambient air quality standards without project-specific dispersion modeling. The screening criteria depend on: (1) the area in which the Project is located, (2) the size of the Project Site, and (3) the distance between the Project Site and the nearest sensitive receptor. Otherwise, impacts would be considered significant if the following would occur:

- Maximum daily localized emissions of NO<sub>x</sub> and/or CO during construction are greater than the applicable localized significance thresholds, resulting in predicted ambient concentrations in the vicinity of the Project Site greater than the most stringent ambient air quality standards for NO<sub>2</sub> and/or CO.<sup>7</sup>
- Maximum daily localized emissions of PM<sub>10</sub> and/or PM<sub>2.5</sub> during construction are greater than the applicable localized significance thresholds, resulting in predicted ambient concentrations in the vicinity of the Project Site to exceed 10.4 µg/m<sup>3</sup> over 24 hours (SCAQMD Rule 403 control requirement).

## Operation (Regional and Localized)

Based on the numeric indicators of significant in the SCAQMD *CEQA Air Quality Handbook*, a project would potentially cause or contribute to an exceedance of an ambient air quality standard if the following would occur:

- Operational emissions exceed any of the following SCAQMD daily regional numeric indicators:<sup>8</sup>
  - 55 pounds a day for VOC
  - 55 pounds per day for NO<sub>x</sub>
  - 550 pounds per day for CO
  - 150 pounds per day for SO<sub>2</sub>
  - 150 pounds per day for PM<sub>10</sub>
  - 55 pounds per day for PM<sub>2.5</sub>

In addition, the SCAQMD has developed a methodology to assess the potential for localized emissions to cause an exceedance of applicable ambient air quality standards. The localized significance thresholds are only applicable to NO<sub>x</sub>, CO, PM<sub>10</sub> and PM<sub>2.5</sub>. The SCAQMD has established conservative screening criteria that can be used to determine the maximum allowable daily emissions that would satisfy the localized significance thresholds and therefore not cause or contribute to an exceedance of the applicable ambient air quality

---

<sup>7</sup> SCAQMD, *Final Localized Significance Threshold Methodology*, 2008, <http://www.aqmd.gov/home/regulations/ceqa/air-quality-analysis-handbook/localized-significance-thresholds>. Accessed August 2019.

<sup>8</sup> SCAQMD, *Air Quality Significance Thresholds*, March 2015. <http://www.aqmd.gov/docs/default-source/ceqa/handbook/scaqmd-air-quality-significance-thresholds.pdf?sfvrsn=2>. Accessed August 2019.

standards without project-specific dispersion modeling. The screening criteria depend on: (1) the area in which the Project is located, (2) the size of the Project Site, and (3) the distance between the Project Site and the nearest sensitive receptor. Otherwise, impacts would be considered significant if the following would occur:

- Maximum daily localized emissions of NO<sub>x</sub> and/or CO during operation are greater than the applicable localized significance thresholds, resulting in predicted ambient concentrations in the vicinity of the Project Site greater than the most stringent ambient air quality standards for NO<sub>2</sub> and/or CO<sup>9</sup>.
- Maximum daily localized emissions of PM<sub>10</sub> and/or PM<sub>2.5</sub> during operation are greater than the applicable localized significance thresholds, resulting in predicted ambient concentrations in the vicinity of the Project Site to exceed 2.5 µg/m<sup>3</sup> over 24 hours (SCAQMD Rule 1303 allowable change in concentration).

## Toxic Air Contaminants

Based on the criteria set forth by the SCAQMD, the Project would expose sensitive receptors to substantial concentrations of TACs if any of the following would occur<sup>10</sup>:

- The Project emits carcinogenic materials or TACs that exceed the maximum incremental cancer risk of 10 in 1 million or a cancer burden greater than 0.5 excess cancer cases (in areas greater than or equal to 1 in 1 million) or an acute or chronic hazard index of 1.0.

## AVAILABLE MODELS

Current models used in CEQA in air quality analyses are designed to calculate and disclose the mass emissions expected from the construction and operation of a proposed project. The estimated emissions are then compared to significance thresholds, which are in turn, keyed to reducing emissions to levels that will not interfere with the region's ability to attain the health-based standards. While this serves to protect public health in the overall region, there is currently no methodology to determine the impact of emissions (e.g., pounds per

---

Accessed August 2019.

day) on concentration levels (e.g., parts per million or micrograms per cubic meter) in specific geographic areas.<sup>11</sup>

Based on SCAQMD guidance, the City utilizes the California Emissions Estimator Model (CalEEMod) to quantify construction and operational air quality impacts from land use projects. Potential TAC impacts are evaluated by conducting a qualitative analysis consistent with CARB and SCAQMD guidance, and may be followed by a more detailed analysis utilizing CARB's Hotspots Analysis and Reporting Program (HARP model) where the project results in a substantial source of TACs or if a project would site sensitive land uses in proximity to TAC sources. However, although CARB and SCAQMD provide guidance for TAC analysis, most land use projects analyzed in City EIRs do not contain substantial on-site sources of TACs, and siting new sensitive uses near existing TAC sources is generally not considered a CEQA impact.

The following table provides a summary of other common available air quality models and identifies their general purposes as well as limitations in quantifying emissions and health effects. Although there are a number of other models available (e.g. models to quantify emissions, dispersion models to determine pollutant concentrations, and regional-scale models which estimate health impacts), this suite of tools is currently not designed to meet the City's need to accurately analyze project-level health effects:

MODEL	SOURCE	PURPOSE	LIMITATIONS
<b>CalEEMod</b> California Emissions Estimator Model	SCAQMD	CalEEMod is a statewide land use <b>emissions computer model</b> designed to provide a uniform platform for government agencies, land use planners, and environmental professionals to quantify potential criteria pollutant and greenhouse gas (GHG) emissions associated with both construction and operational from a variety of land use projects.	The model can quantify emissions, but is not able to model concentrations or dispersion of pollutants or related health effects.
<b>AERMOD</b>	USEPA/American Meteorological Society	AERMOD models the <b>dispersion</b> of criteria air pollutant emissions over a period of time from discrete emission sources across a defined spatial boundary and can help inform exceedance of pollutant concentration standards. AERMOD provides more refined modeling than AERSCREEN, since it uses actual meteorological data (rather than simulated data) for the vicinity of the project site. <i>NOTE:</i> The U.S. EPA has adopted the	AERMOD can estimate pollutant concentrations of NO <sub>x</sub> , NO <sub>2</sub> , CO, SO <sub>2</sub> , PM <sub>10</sub> , PM <sub>2.5</sub> , total suspended particulates, lead, and other pollutants. However, AERMOD cannot estimate concentrations of VOCs, O <sub>3</sub> or secondary PM. While AERMOD can estimate concentrations for certain pollutants, no methods have been demonstrated to reliably and meaningfully connect pollutant concentrations to specific health effects.

<sup>11</sup> SMAQMD, *Friant Ranch Interim Recommendation*, 2019.

<http://www.airquality.org/LandUseTransportation/Documents/FriantInterimRecommendation.pdf>. Accessed August 2019. Included as Attachment 4 of this memorandum.

MODEL	SOURCE	PURPOSE	LIMITATIONS
		AERMOD air dispersion model into its list of regulatory approved models in place of the previously used ISCST3 (Industrial Source Complex Short Term) model and CARB recommends AERMOD, instead of ISCST3, for Hot Spots risk assessments.	
<b>AERSCREEN</b>	USEPA	AERSCREEN is a screening version of the AERMOD <b>dispersion model</b> , intended to produce concentration estimates that are equal to or greater than the estimates produced by AERMOD with a fully developed set of meteorological and terrain data, but the degree of conservatism will vary depending on the application. This program is useful as a screening Health Risk Assessment (HRA) for minor or temporary sources such as construction-only projects.	As with AERMOD, AERSCREEN can estimate concentrations for certain pollutants; however, AERSCREEN does not connect pollutant concentrations to specific health effects.
<b>BenMAP-CE</b> Environmental Benefits Mapping and Analysis Program - Community Edition	USEPA	BenMAP-CE is a <b>regional-scale model</b> that can be used to estimate the resulting <b>health impacts</b> from change in ambient PM <sub>2.5</sub> concentrations for related health endpoints such as premature mortality, hospital admissions, and emergency room visits. The USEPA CMAQ model can be used to predict changes in the ambient air concentration of ozone, the results of which can be used in BenMAP-CE to estimate the resulting health impacts.	The model is used for assessing impacts over large areas and populations and is not intended to be used for individual projects, as it would not provide meaningful or reliable results at the smaller scale.
<b>CalEnviroScreen</b> California Communities Environmental Health Screening Tool	OEHHA & CalEPA	CalEnviroScreen is a <b>mapping tool</b> that helps identify California communities that are most affected by many sources of pollution, identified by a data-driven scoring system.	While the tool is useful to identify communities disproportionately burdened by certain pollutants, the tool is not used to track or model dispersal of project emissions.
<b>CALINE-4</b>	Caltrans	CALINE-4 is a <b>line-source dispersion model</b> for predicting air pollutant concentrations at receptors near highways and arterial streets, specifically for CO, NO <sub>x</sub> , and PM. Caltrans guidance recommends only utilizing the tool for CO hot-spot analysis, and does not recommend using CALINE-4 to analyze any other pollutant.	CALINE-4 is limited to estimating concentrations of CO, NO <sub>x</sub> , and PM from line sources such as roadways. CALINE-4 does not have the capability to evaluate concentrations of O <sub>3</sub> or secondary PM, or concentrations from other types of emissions sources (e.g., point, volume, or area sources). CALINE-4 is also not able to connect pollutant concentrations to specific health effects.

MODEL	SOURCE	PURPOSE	LIMITATIONS
<b>CAMx</b> Compressive Air Quality Model	Ramboll & Environ	CAMx is a <b>grid-based dispersion model</b> that simulates the chemical interactions and three-dimensional dispersion patterns on a regional, statewide, and national scale.	Since CAMx is designed to model emissions on a regional, statewide, and national scale, it is unsuitable for project-level analysis.
<b>CMAQ</b> Community Multiscale Air Quality Modeling System	USEPA	CMAQ is an atmospheric <b>dispersion model</b> consisting of a suite of programs for conducting air quality model simulations. CMAQ combines current knowledge in atmospheric science and air quality modeling, multi-processor computing techniques, and an open-source framework to deliver estimates of ozone, particulates, toxics and acid deposition. The program can be used to predict the concentration and deposition of both criteria pollutants and TACs.	There are limitations on the minimum modeling domain at which the model is still reasonably accurate. (e.g. the EPA recommends nesting a local regional model within a larger regional domain. However, the EPA recognized that expanding to a larger regional domain needs more data, which currently may not be available to the public. In addition, the minimum resolution of the CMAQ model is 1 sq. km., meaning that it would have difficulty in modeling impact areas that are less than 247 acres with meaningful or reliable results.)
<b>EMFAC</b> EMissions FACtor	CARB	EMFAC2017 is used to estimate <b>emissions</b> from on-road vehicles in California.	The model can quantify emissions, but is not able to model concentrations or dispersion of pollutants or related health effects.
<b>HARP</b> Hotspots Analysis and Reporting Program	CARB	HARP is a software suite that addresses the programmatic requirements of the Air Toxics "Hot Spots" Program (Assembly Bill 2588) and can perform air <b>dispersion</b> runs and <b>health risk assessments</b> , as well as can create and manage facility and emissions data. HARP is useful for determining how increases in specific TAC concentrations could affect receptors in terms of the increased cancer risks, chronic hazards, and acute hazards.	The tool is not used for evaluation of criteria air pollutants and related health effects.
<b>OFFROAD</b>	CARB	OFFROAD calculates <b>emissions</b> from off-road sources. The OFFROAD model is now being replaced by category specific methods and inventory models that are being developed for specific regulatory support projects.	The model can quantify emissions, but is not able to model concentrations or dispersion of pollutants or related health effects. In addition, the model is not comprehensive and lacks emissions forecasts for certain types of equipment.
<b>Roadway Construction Emissions Model</b>	SMAQMD	The model can be used to assist roadway project proponents with determining the <b>emission</b> impacts of their projects.	The Roadway Construction Emissions Model can quantify emissions, but is not able to model concentrations or dispersion of pollutants or related health effects.

As demonstrated above, while a number of models and tools are available to quantify emissions and pollutant concentrations, these models are limited by a number of factors in determining health impacts of individual development and infrastructure projects as well as local plan-level projects. The USEPA currently performs health impact assessments (HIAs) using the CMAQ model for pollutant transport modeling and BENMAP for health impact calculations. However, as described in further detail below, these models are designed to estimate health impacts over a large scale (e.g. city-wide, state-wide). In addition, the CMAQ model requires inputs such as regional sources of pollutants and global meteorological data, which are generally not accessible. In addition to the unsuitability of regional models in providing reliable results for local-level plans or individual projects, other general limitations of the current suite of models include limitations on the ability of certain tools to model concentrations or the dispersion of pollutants for all types of sources, other models only addressing a partial and incomplete range of pollutants and secondary pollutants, and limitations on being able to correlate identified concentrations to related health effects.

As such, neither the SCAQMD, CARB, “nor any air district currently have methodologies that would provide Lead Agencies and CEQA practitioners with a consistent, reliable, and meaningful analysis to correlate specific health impacts that may result from a proposed project’s mass emissions”.<sup>12</sup>

# AIR QUALITY AND HEALTH EFFECTS

The following information and analysis of health effects is relevant where a City EIR concludes that regional or localized air pollutant emissions would exceed the SCAQMD's thresholds of significance identified above and such impacts are deemed significant and unavoidable.

Ambient air pollution is a general public health concern, and in particular, Southern California has a long and well-documented history in battling poor air quality. Since the mid-20th century, the greater Los Angeles region has been at the forefront of air pollution science, low-emissions technology development, and innovative air quality regulation. These efforts have led to substantial and noticeable improvements in air quality and public health within the South Coast Air Basin, all during a period of dramatic increases in economic activity, population, and vehicle miles traveled. Despite these successes, the health of the region's residents continues to be seriously affected by the poor air quality that confronts the region.<sup>13</sup> Ambient air pollution continues to be linked to increases in respiratory illness (morbidity) and increases in death rates (mortality).<sup>14</sup>

Air pollution has many effects on the health of both adults and children. Adverse health outcomes linked to air pollution include asthma, cardiovascular effects, premature mortality, respiratory effects, cancer, reproductive effects, neurological effects, and other health outcomes.

The evidence linking these effects to air pollutants is derived from population based (i.e., large-scale) observational and field studies (epidemiological) as well as controlled laboratory studies involving human subjects and animals. There have been an increasing number of studies focusing on the mechanisms (that is, on learning how specific organs, cell types, and biochemicals are involved in the human body's response to air pollution) and specific pollutants responsible for individual effects. Yet the underlying biological pathways for these effects are not always clearly understood.

---

<sup>13</sup> SCAQMD, *Final 2016 AQMP*, 2017, Page Preface. <http://www.aqmd.gov/home/air-quality/clean-air-plans/air-quality-mgt-plan/final-2016-aqmp>. Accessed August 2019.

<sup>14</sup> SCAQMD, *Final 2016 AQMP*, 2017, Page Appendix I-1. <http://www.aqmd.gov/home/air-quality/clean-air-plans/air-quality-mgt-plan/final-2016-aqmp>. Accessed August 2019. Included as Attachment 1 of this memorandum.

Although individuals inhale pollutants as a mixture under ambient conditions, the regulatory framework and the control measures developed are mostly pollutant-specific. Individual pollutants usually differ in their sources, their times and places of occurrence, the kinds of health effects they may cause, and their overall levels of health risk. To meet the air quality standards, comprehensive plans are developed, including the Air Quality Management Plan (AQMP) and Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS). These plans examine multiple pollutants, cumulative effects, and transport issues related to attaining healthful air quality in the region. In addition, a host of regulatory standards function to identify and limit exposure of air pollutants and toxic air contaminants.

## HEALTH EFFECTS ADDRESSED IN PLANS AND REGULATORY STANDARDS

As previously stated, the NAAQS and CAAQS have been set at levels considered safe to protect public health. These standards are informed by and revised based on evolving scientific evidence of air pollution health effects. The SCAQMD (together with SCAG) has the responsibility for ensuring that national and state ambient air quality standards are achieved and maintained throughout the Air Basin. Failure to comply with these standards puts state and local agencies at risk for penalties such as: lawsuits, fines, a federal takeover of state implementation plans, and a loss of funds from federal agencies such as the Federal Highway Administration and Federal Transit Administration.

### Criteria Pollutants

To meet the standards, the SCAQMD has adopted a series of AQMPs, which serve as a regional blueprint to develop and implement an emission reduction strategy that will bring the area into attainment with the standards in a timely manner. The 2016 AQMP includes strategies to ensure that rapidly approaching attainment deadlines for ozone and PM<sub>2.5</sub> are met and that public health is protected to the maximum extent feasible. The most significant air quality challenge in the Air Basin is to reduce NO<sub>x</sub> emissions<sup>15</sup> sufficiently to meet the upcoming ozone standard deadlines, as NO<sub>x</sub> plays a critical role in the creation of ozone. The AQMP's strategy to meet the 8-hour ozone standard in 2023 should lead to sufficient NO<sub>x</sub> emission reductions to attain the 1-hour

---

<sup>15</sup> NO<sub>x</sub> emissions are a precursor to the formation of both ozone and secondary PM<sub>2.5</sub>.

ozone standard by 2022. Since  $\text{NO}_x$  emissions also lead to the formation of  $\text{PM}_{2.5}$ , the  $\text{NO}_x$  reductions needed to meet the ozone standards will likewise lead to improvement of  $\text{PM}_{2.5}$  levels and attainment of  $\text{PM}_{2.5}$  standards.<sup>1617</sup>

The SCAQMD's strategy to meet national and state standards distributes the responsibility for emission reductions across federal, state and local levels and industries. The 2016 AQMP is composed of stationary and mobile source emission reductions from traditional regulatory control measures, incentive-based programs, co-benefits from climate programs, mobile source strategies, and reductions from federal sources, which include aircraft, locomotives and ocean-going vessels. These strategies are to be implemented in partnership with the CARB and U.S. EPA. In addition, SCAG recently approved their 2016-2040 Regional Transportation Plan/Sustainable Communities Strategies (2016-2040 RTP/SCS) Plan<sup>18</sup> which includes transportation programs, measures, and strategies generally designed to reduce vehicle miles traveled (VMT), which are contained in the AQMP.

Pursuant to California Health and Safety Code Section 40460, SCAG has the responsibility of preparing and approving the portions of the AQMP relating to the regional demographic projections and integrated regional land use, housing, employment, and transportation programs, measures, and strategies. The SCAQMD combines its portion of the Plan with those prepared by SCAG.<sup>19</sup> The RTP/SCS and Transportation Control Measures, included as Appendix IV-C of the 2016 AQMP for the Air Basin, are based on SCAG's 2016-2040 RTP/SCS.

The 2016 AQMP forecasts the 2031 emissions inventories "with growth" based on SCAG's 2016-2040 RTP/SCS. The region is projected to see a 12 percent growth in population, 16 percent growth in housing units, 23 percent growth in employment, and 8 percent growth in vehicle miles traveled between 2012 and 2031. Despite this regional growth, air quality has improved substantially over the years, primarily due to the effects of air quality control programs at the local, state and federal levels. Figure 1, provided below, shows the trends since 1990 of the 8-hour ozone levels, the 1-hour ozone levels, and annual average  $\text{PM}_{2.5}$  concentrations (since 1999), compared to the regional gross domestic product, total employment and population. Human activity in the region has an impact on achieving reductions in emissions. However, the ozone and particulate matter levels continue

---

<sup>16</sup> Estimates are based on the inventory and modeling results and are relative to the baseline emission levels for each attainment year (see Final 2016 AQMP for detailed discussion).

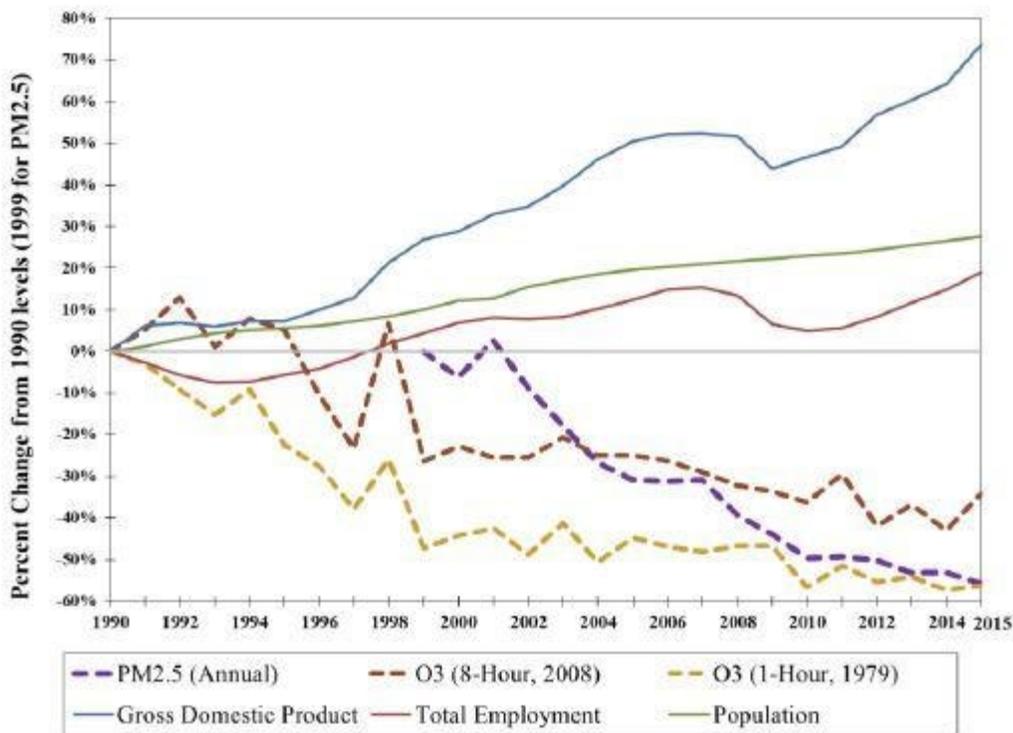

<sup>17</sup> SCAQMD, *Final 2016 AQMP*, 2017. Page ES-2. <http://www.aqmd.gov/home/air-quality/clean-air-plans/air-quality-mgt-plan/final-2016-aqmp>. Accessed August 2019.

<sup>18</sup> SCAG, *Final 2016 RTP/SCP*, 2016 <http://scagrtpscs.net/Pages/FINAL2016RTPSCS.aspx>. Accessed August 2019.

<sup>19</sup> SCAQMD, *Final 2016 AQMP*, 2017. Page ES-2. <http://www.aqmd.gov/home/air-quality/clean-air-plans/air-quality-mgt-plan/final-2016-aqmp>. Accessed August 2019.

to trend downward as the economy and population increase, demonstrating that it is possible to maintain a healthy economy while improving public health through air quality improvements.<sup>20</sup>

Figure 1:  
Percent Change in Air Quality Along with  
Demographic Data for the 4-County Region (1990-2015)

Source: SCAQMD, Figure 1-4 of the Final 2016 AQMP.

## Consistency with AQMP and 2016-2040 RTP/SCS Growth Assumptions

As discussed above, the 2016 AQMP incorporates the SCAG 2016-2040 RTP/SCS and updated emission inventory methodologies for various source categories to demonstrate attainment with applicable state and federal standards. With regard to land use, the 2016-2040 RTP/SCS land use control measures (i.e., goals and policies) focus on the reduction of vehicle trips and VMT.

The City's EIRs provide an analysis of a project's consistency with both the AQMP and the 2016-2040 RTP/SCS. The 2016-2040 RTP/SCS is expected to help SCAG reduce VMT, with reductions in per capita transportation emissions of 18 percent by 2035 and 21-percent by 2040. In addition, the 2016-2040 RTP/SCS provides a 2012 Base Year projected daily Total VMT per capita of 21.5 and 18.4 daily Total VMT per capita for the

<sup>20</sup> SCAQMD, *Final 2016 AQMP*, 2017. Page 1-6. <http://www.aqmd.gov/home/air-quality/clean-air-plans/air-quality-mgt-plan/final-2016-aqmp>. Accessed August 2019.

2040 Plan Year. As the AQMP control strategy is based on projections from local General Plans, projects which are consistent with local General Plans are considered consistent with the growth assumptions of the air quality related regional plans and their emissions are assumed to be accounted for in the AQMP emissions inventory. Projects which include amendments to General or Specific Plans, or are considered significant projects, undergo further scrutiny for AQMP consistency.

## Toxic Air Contaminants

In addition, the state's California Air Toxics Program is an established two-step process of risk identification and risk management to address potential health effects from exposure to toxic substances in the air. In the risk identification step, CARB and OEHHA determine if a substance should be formally identified, or "listed," as a TAC in California. In the risk management step, CARB reviews emission sources of an identified TAC to determine whether regulatory action is needed to reduce risk. Based on results of that review, CARB has promulgated a number of ATCMs, both for mobile and stationary sources. These ATCMs include measures such as limits on heavy-duty diesel motor vehicle idling and emission standards for off-road diesel construction equipment in order to reduce public exposure to diesel PM and other TACs. These actions are also supplemented by the AB 2588 Air Toxics "Hot Spots" program and SB 1731, which require facilities to report their air toxics emissions, assess health risks, notify nearby residents and workers of significant risks if present, and reduce their risk through implementation of a risk management plan. SCAQMD has further adopted two rules to limit cancer and non-cancer health risks from facilities located within its jurisdiction. Rule 1401 (New Source Review of Toxic Air Contaminants) regulates new or modified facilities, and Rule 1402 (Control of Toxic Air Contaminants from Existing Sources) regulates facilities that are already operating. Rule 1402 incorporates requirements of the AB 2588 program, including implementation of risk reduction plans for significant risk facilities.

City EIRs acknowledge that these plans and regulatory standards have been set at levels considered safe to protect public health and are part of the regulatory environment when considering local plan and project-level impacts.

# HEALTH EFFECTS OF CRITERIA POLLUTANTS AND TOXIC AIR CONTAMINANTS

A summary discussion of the health effects due to exposure of pollutants exceeding SCAQMD's significance thresholds is provided in City EIRs and an expanded discussion is provided below (substantially drawn from reviews presented in the SCAQMD's Final 2016 Air Quality Management Plan, Chapter 2 (Air Quality and Health Effects), March 2017). A more detailed discussion of the health effects of these pollutants is provided in Attachment 1 to this memorandum (SCAQMD Final 2016 Air Quality Management Plan, Appendix I: Health Effects)

## Ozone (O<sub>3</sub>)

Ozone is a gas that is formed when volatile organic compounds (VOCs) and NO<sub>x</sub>—both byproducts of internal combustion engine exhaust—undergo slow photochemical reactions in the presence of sunlight. Ozone concentrations are generally highest during the summer months when direct sunlight, light wind, and warm temperature conditions are favorable. Ozone is one of the most important air pollutants affecting human health in regions like Southern California. Ozone is a molecule built of three atoms of oxygen linked together in a very energetic combination. When ozone comes into contact with a surface it rapidly releases this extra force in the form of chemical energy. When this happens in biological systems, such as the respiratory tract, this energy can cause damage to sensitive tissues in the upper and lower airways.

The major subgroups of the population considered to be at increased risk from ozone exposure are outdoor exercising individuals including children and people with preexisting respiratory disease(s) such as asthma. The database identifying the former group as being at increased risk to ozone exposure is much stronger and more quantitative than that for the latter group, probably because of a larger number of studies conducted were with healthy individuals. The adverse effects reported with short-term ozone exposure are greater with increased activity because activity increases the breathing rate and the volume of air reaching the lungs, resulting in an increased amount of ozone reaching the lungs. Children may be a particularly vulnerable population to air pollution effects because they spend more time outdoors, are generally more active, and have a higher ventilation rate than adults. A number of adverse health effects associated with ambient ozone levels have been identified from laboratory and epidemiological studies. These include increased respiratory symptoms, damage to cells of the respiratory tract, decreases in lung function, increased susceptibility to respiratory infection, and increased risk of hospitalization.

The Children's Health Study, conducted by researchers at the University of Southern California, followed a cohort of children that live in 12 communities in southern California with differing levels of air pollution for several years. A publication from this study found that school absences in fourth graders for respiratory illnesses were associated with ambient ozone levels. An increase of 20 ppb ozone was associated with an 83 percent increase in illness related absence rates.<sup>21</sup> However, it is not recommended to base assumptions of health impacts off of a single example or study. It should also be noted that the study is based on one specific subgroup and may not apply to the general population. Furthermore, the study analyzed changes in regional air quality, and these region-wide changes could not be reasonably attributable to a single project or local plan based on existing science and models.

The number of hospital admissions and emergency room visits for all respiratory causes (infections, respiratory failure, chronic bronchitis, etc.) including asthma show a consistent increase as ambient ozone levels increase in a community. These excess hospital admissions and emergency room visits are observed when hourly ozone concentrations are as low as 0.08 to 0.10 ppm.

Numerous recent studies have found positive associations between increases in ozone levels and excess risk of mortality. These associations persist even when other variables including season and levels of particulate matter are accounted for. This indicates that ozone mortality effects are independent of other pollutants.<sup>22</sup>

Several population-based studies suggest that asthmatics are more adversely affected by ambient ozone levels, as evidenced by increased hospitalizations and emergency room visits. Laboratory studies have attempted to compare the degree of lung function change seen in age and gender-matched healthy individuals versus asthmatics and those with chronic obstructive pulmonary disease. While the degree of change evidenced did not differ significantly, that finding may not accurately reflect the true impact of exposure on these respiration-compromised individuals. Since the respiration-compromised group may have lower lung function to begin with, the same degree of change may represent a substantially greater adverse effect overall.

A publication from the Children's Health Study focused on children and outdoor exercise. In communities with high ozone concentrations, the relative risk of developing asthma in children playing three or more sports was found to be over three times higher than in children playing no sports.<sup>23</sup> These findings indicate that new cases of asthma in children are associated with heavy exercise in communities with high levels of ozone. While

<sup>23</sup> McConnell R, Berhane K, Gilliland F, London SJ, Islam T, Gauderman WJ, Avol E, Margolis HG, Peters JM. *Asthma in exercising children exposed to ozone: a cohort study*. 2002. *Lancet*, 359:386-91.

it has long been known that air pollution can exacerbate symptoms in individuals with respiratory disease, this is among the first studies that indicate ozone exposure may be causally linked to asthma.

Some lung function responses (volume and airway resistance changes) observed after a single exposure to ozone exhibit attenuation or a reduction in magnitude with repeated exposures. Although it has been argued that the observed shift in response is evidence of a probable adaptation phenomenon, it appears that while functional changes may exhibit adaptation, biochemical and cellular changes which may be associated with episodic and chronic exposure effects may not exhibit similar adaptation. That is, internal damage to the respiratory system may continue with repeated ozone exposures, even if externally observable effects (chest symptoms and reduced lung function) disappear.

In a laboratory, exposure of human subjects to low levels of ozone causes reversible decrease in lung function as assessed by various measures such as respiratory volumes, airway resistance and reactivity, irritative cough and chest discomfort. Lung function changes have been observed with ozone exposure as low as 0.08 to 0.12 ppm for 6-8 hours under moderate exercising conditions. Similar lung volume changes have also been observed in adults and children under ambient exposure conditions (0.10 - 0.15 ppm). The responses reported are indicative of decreased breathing capacity and are reversible.

In laboratory studies, cellular and biochemical changes associated with respiratory tract inflammation have also been consistently reported in the airway lining after low level exposure to ozone. These changes include an increase in specific cell types and in the concentration of biochemical mediators of inflammation and injury such as cytokines and fibronectin. These inflammatory changes can be observed in healthy adults exposed to ozone in the range of 0.08 to 0.10 ppm.

The susceptibility to ozone observed under ambient conditions could be due to the combination of pollutants that coexist in the atmosphere or ozone may actually sensitize these subgroups to the effects of other pollutants. Some animal studies show results that indicate possible chronic effects including functional and structural changes of the lung. These changes indicate that repeated inflammation associated with ozone exposure over a lifetime may result in sufficient damage to respiratory tissue such that individuals later in life may experience a reduced quality of life in terms of respiratory function and activity level achievable. An autopsy study involving Los Angeles County residents provided supportive evidence of lung tissue damage (structural changes) attributable to air pollution. A study of birth outcomes in southern California found an increased risk for birth defects in the aortic and pulmonary arteries associated with ozone exposure in the second month of pregnancy.<sup>24</sup> This is the first study linking ambient air pollutants to birth defects in humans. Confirmation by further studies is needed. In summary, acute adverse effects associated with ozone exposures have been well

documented, although the specific causal mechanism is still somewhat unclear. Additional research efforts are required to evaluate the long-term effects of air pollution and to determine the role of ozone in influencing chronic effects.

## Particulate Matter (PM<sub>10</sub> and PM<sub>2.5</sub>)

The human body naturally prevents the entry of larger particles into the body. However, small particles, with an aerodynamic diameter equal to or less than ten microns (PM<sub>10</sub>) and even smaller particles with an aerodynamic diameter equal to or less than 2.5 microns (PM<sub>2.5</sub>), can enter the body and are trapped in the nose, throat, and upper respiratory tract. These small particulates could potentially aggravate existing heart and lung diseases, change the body's defenses against inhaled materials, and damage lung tissue. The elderly, children, and those with chronic lung or heart disease are most sensitive to PM<sub>10</sub> and PM<sub>2.5</sub>. Lung impairment can persist for two to three weeks after exposure to high levels of particulate matter. Some types of particulates could become toxic after inhalation due to the presence of certain chemicals and their reaction with internal body fluids. The U.S. Environmental Protection Agency and the California Air Resources Board have recognized adverse health effects that may be associated with exposure to PM<sub>10</sub> and PM<sub>2.5</sub>, including:<sup>25</sup> (1) Increased respiratory symptoms, such as the irritation of the airways; (2) Coughing, or difficulty breathing; (3) Decreased lung function, particularly in children; (4) Aggravated asthma; (5) Development of chronic bronchitis; (6) Irregular heartbeat; (7) Increased respiratory and cardiovascular hospitalizations; and (8) Premature death in people with heart or lung disease.

Epidemiological studies have provided continued and consistent evidence for most of the effects listed above. An association between increased daily or several-day-average concentrations of PM<sub>10</sub> and excess mortality and morbidity is consistently reported from studies involving communities across the U.S. as well as in Europe, Asia, and South America.

A number of studies have evaluated the association between particulate matter exposure and indices of morbidity such as hospital admissions, emergency room visits or physician office visits for respiratory and cardiovascular diseases. The effects estimates are generally higher than the effects for mortality. The effects are associated with measures of PM<sub>10</sub> and PM<sub>2.5</sub>. Thus, it appears that when a relatively small number of people experience severe effects, larger numbers experience milder effects, which may relate either to the coarse or to the fine fraction of airborne particulate matter.

<sup>25</sup> See, e.g., U.S. Environmental Protection Agency, *Health and the Environment*, [www.epa.gov/air/particlepollution/health.html](http://www.epa.gov/air/particlepollution/health.html). Accessed July 30, 2008; U.S. Environmental Protection Agency, *Particle Pollution and Your Health*, [www.epa.gov/airnow/particles-bw.pdf](http://www.epa.gov/airnow/particles-bw.pdf). Accessed July 30, 2008.; California Air Resources Board, *Health Effects of Particulate Matter and Ozone Air Pollution*, January 2004.

In the National Morbidity, Mortality, and Air Pollution Study (NMMAPS), hospital admissions for those 65 years or older were assessed in 14 cities. Hospital admissions for these individuals showed an increase of 6 percent for cardiovascular diseases and a 10 percent increase for respiratory disease admissions, per 50  $\mu\text{g}/\text{m}^3$  increase in  $\text{PM}_{10}$ . The excess risk for cardiovascular disease ranges from 3-10 percent per 50  $\mu\text{g}/\text{m}^3$   $\text{PM}_{10}$ . However, as noted below, this study analyzed indirect indicators of health impacts rather than direct health impacts, and other studies have demonstrated greater variability of the effects of PM increases in terms of number of medical visits.

Similarly, school absences, lost workdays and restricted activity days have also been used in some studies as indirect indicators of acute respiratory conditions. The results are suggestive of both immediate and delayed impact on these parameters following elevated particulate matter exposures. These observations are consistent with the hypothesis that increased susceptibility to infection follows particulate matter exposures.

Some studies have reported that short-term particulate matter exposure is associated with changes in lung function (lung capacity and breathing volume); upper respiratory symptoms (hoarseness and sore throat); and lower respiratory symptoms (increased sputum, chest pain and wheeze). The severity of these effects is widely varied and is dependent on the population studied, such as adults or children with and without asthma. Sensitive individuals, such as those with asthma or pre-existing respiratory disease, may have increased or aggravated symptoms associated with short-term particulate matter exposures. Several studies have followed the number of medical visits associated with pollutant exposures. A range of increases from 3 to 42 percent for medical visits for respiratory illnesses was found corresponding to a 50  $\mu\text{g}/\text{m}^3$  change in  $\text{PM}_{10}$ . A limited number of studies also looked at levels of  $\text{PM}_{2.5}$ . The findings suggest that both the fine and coarse fractions may have associations with some respiratory symptoms.

While most studies have evaluated the acute effects, some studies specifically focused on evaluating the effects of chronic exposure to  $\text{PM}_{10}$  and  $\text{PM}_{2.5}$ . Studies have analyzed the mortality of adults living in different U.S. cities. After adjusting for important risk factors, these studies found a consistent positive association of deaths and exposure to particulate matter. A similar association was observable in both total number of deaths and deaths due to cardiorespiratory causes. A shortening of lifespan was also reported in these studies.

Significant associations for  $\text{PM}_{2.5}$  for both total mortality and cardiorespiratory mortality were reported in a study using data from the American Cancer Society. A re-analysis of the data from this study confirmed the finding.<sup>26</sup> The Harvard Six Cities Study evaluated several size ranges of particulate matter and reported significant associations with  $\text{PM}_{15}$ ,  $\text{PM}_{2.5}$ , sulfates, and non-sulfate particles, but not with coarse particles ( $\text{PM}_{15}$ -

<sup>26</sup> Krewski D, Burnett RT, Goldberg MS, Hoover K, Siemiatycki J, Abrahamowicz M, White WH, et al. *Reanalysis of the Harvard Six Cities Study and the American Cancer Society Study of Particulate Air Pollution and Mortality. A Special Report of the Institute's Particle Epidemiology Reanalysis Project*. 2000. Health Effects Institute.

PM<sub>2.5</sub>). An extension of the Harvard Six Cities Cohort confirmed the association of mortality with PM<sub>2.5</sub> levels.<sup>27</sup> These studies provide evidence that the fine particles, as measured by PM<sub>2.5</sub>, may be more strongly associated with mortality effects from long-term particulate matter exposures than are coarse compounds.

A follow-up study of the American Cancer Society cohort confirmed and extended the findings in the initial study. The researchers estimated that, on average, a 10 µg/m<sup>3</sup> increase in fine particulates was associated with an approximately 4 percent increase in total mortality, a 6 percent increase in cardiopulmonary mortality, and an 8 percent increase risk of lung cancer mortality.<sup>28</sup> The magnitude of effects is larger in the long-term studies than in the short-term investigations, and therefore demonstrates variability and unreliability of a specific numeric indicator (as indicated above) for the general population. Furthermore, an analysis of the American Cancer Society Cohort from the Los Angeles area used a more detailed estimate of long-term PM<sub>2.5</sub> exposures and found that the risk of mortality was up to three times higher than estimated with the national cohort.<sup>29</sup> These findings indicate that long-term exposures may be more important in terms of overall health effects.

Despite data gaps, the extensive body of epidemiological studies has both qualitative and quantitative consistency suggestive of causality. A considerable body of evidence from these studies suggests that ambient particulate matter, alone or in combination with other coexisting pollutants, is associated with significant increases in mortality and morbidity in a community.

In summary, the scientific literature indicates that an increased risk of mortality and morbidity is associated with particulate matter at ambient levels. The evidence for particulate matter effects is mostly derived from population studies with supportive evidence from clinical and animal studies. Although most of the effects are attributable to particulate matter, co-pollutant effects cannot be ruled out on the basis of existing studies. The difficulty of separating the effects may be due to the fact that particulate levels co-vary with other combustion source pollutants. That is, the particle measurements serve as an index of overall exposure to combustion-related pollution, and some component(s) of combustion pollution other than particles might be at least partly responsible for the observed health effects. In addition, limitations of applying the results of a singular study to determine a specific project's health effects are described above, as well as subsequent discussion (see "Relating Adverse Air Quality Impacts and Health Effects" on page 27). Therefore, at this time, there is no specific numeric indicator that can reliably indicate specific health effects from particulate matter.

## Carbon Monoxide (CO)

Carbon monoxide is primarily emitted from combustion processes and motor vehicles due to incomplete combustion of fuel. Elevated concentrations of CO weaken the heart's contractions and lower the amount of oxygen carried by the blood. It is especially dangerous for people with chronic heart disease. Inhalation of CO can cause nausea, dizziness, and headaches at moderate concentrations and can be fatal at high concentrations.

Individuals with a deficient blood supply to the heart are the most susceptible to the adverse effects of CO exposure. The effects observed include earlier onset of chest pain with exercise, and electrocardiograph changes indicative of worsening oxygen supply delivery to the heart. Inhaled CO has no known direct toxic effect on the lungs, but exerts its effect on tissues by interfering with oxygen transport, by competing with oxygen to combine with hemoglobin present in the blood to form carboxyhemoglobin (COHb). Hence, people with conditions requiring an increased oxygen supply can be adversely affected by exposure to CO. Individuals most at risk include patients with diseases involving heart and blood vessels, fetuses, and patients with chronic hypoxemia (oxygen deficiency), such as is seen at high altitudes. Reductions in birth weight and impaired neurobehavioral development have been observed in animals chronically exposed to CO resulting in COHb levels similar to those observed in smokers. Recent studies have found increased risks for adverse birth outcomes with exposure to elevated CO levels, including preterm births and heart abnormalities. The U.S. EPA concluded in their most recent review that the evidence linking long-term CO exposures with reproductive health outcomes was suggestive of a causal relationship<sup>30</sup>.

## Nitrogen Dioxide (NO<sub>2</sub>)

NO<sub>2</sub> is a byproduct of fuel combustion and major sources include power plants, large industrial facilities, and motor vehicles. NO<sub>2</sub> is a gaseous air pollutant that serves as an indicator of gaseous oxides of nitrogen, such as nitric oxide (NO) and other related compounds (NO<sub>x</sub>). NO<sub>2</sub> absorbs blue light and results in a brownish-red cast to the atmosphere and reduced visibility. NO<sub>2</sub> also contributes to the formation of PM<sub>10</sub>. Nitrogen oxides irritate the nose and throat, and increase one's susceptibility to respiratory infections, especially in people with asthma. NO<sub>x</sub> is also a precursor to the formation of ozone.

The adverse effects of ambient nitrogen dioxide air pollution exposure on health were reviewed in the 2008 U.S. EPA Integrated Science Assessment for Oxides of Nitrogen—Health Criteria<sup>31</sup>, and more recently in the

<sup>31</sup> U.S. EPA. *Integrated Science Assessment for Oxides of Nitrogen—Health Criteria (Final Report)*. 2008.

<http://cfpub.epa.gov/ncea/isa/recorddisplay.cfm?deid=194645>. Accessed August 2019.

2016 U.S. EPA Integrated Science Assessment for Oxides of Nitrogen—Health Criteria.<sup>32</sup> The 2016 U.S. EPA review noted the respiratory effects of NO<sub>2</sub>, and evidence suggestive of effects on cardiovascular health, mortality and cancer.

Experimental studies have found that NO<sub>2</sub> exposures increase responsiveness of airways, pulmonary inflammation, and oxidative stress, and can lead to the development of allergic responses. These biological responses provide evidence of a plausible mechanism for NO<sub>2</sub> to cause asthma. Additionally, results from controlled exposure studies of asthmatics demonstrate an increase in the tendency of airways to contract in response to a chemical stimulus (airway responsiveness) or after inhaled allergens. Animal studies also provide evidence that NO<sub>2</sub> exposures have negative effects on the immune system, and therefore increase the host's susceptibility to respiratory infections. Epidemiological studies showing associations between NO<sub>2</sub> levels and hospital admissions for respiratory infections support such a link, although the studies examining respiratory infections in children are less consistent.

The Children's Health Study in Southern California found associations of NO<sub>2</sub> with respiratory symptoms in asthmatics.<sup>33</sup> Particles and NO<sub>2</sub> were correlated, and it was determined that NO<sub>2</sub> plays a stronger role. Ambient levels of NO<sub>2</sub> were also associated with a decrease in lung function growth in a group of children followed for eight years. In addition to NO<sub>2</sub>, the decreased growth was also associated with particulate matter and airborne acids. The study authors postulated that these may be a measure of a package of pollutants from traffic sources.

Results from controlled exposure studies of asthmatics demonstrated an increase in the tendency of airways to contract in response to a chemical stimulus (bronchial reactivity). Effects were observed with an exposure to 0.3 parts per million (ppm) NO<sub>2</sub> for a period ranging from 30 minutes to 3 hours. A similar response is reported in some studies with healthy subjects at higher levels of exposure (1.5 - 2.0 ppm). Mixed results have been reported when people with chronic obstructive lung disease are exposed to low levels of NO<sub>2</sub>.

## Toxic Air Contaminants

In addition to criteria pollutants, a number of TACs have the potential to impact human health, including diesel particulate matter (DPM), a pollutant associated with heavy equipment and truck traffic. TACs refer to a diverse group of "non-criteria" air pollutants that can affect human health, but have not had ambient air quality standards established for them. This is not because they are fundamentally different from the pollutants

---

<sup>32</sup> U.S. EPA. *Integrated Science Assessment for Oxides of Nitrogen—Health Criteria (Final Report)*. 2016. <https://cfpub.epa.gov/ncea/isa/recordisplay.cfm?deid=310879>. Accessed August 2019.

<sup>33</sup> McConnell R, Berhane K, Gilliland F, London SJ, Islam T, Gauderman WJ, Avol E, Margolis HG, Peters JM. *Asthma in exercising children exposed to ozone: a cohort study*. 2002. *Lancet*, 359:386-91.

discussed above, but because their effects tend to be local rather than regional. TACs are classified as carcinogenic and non-carcinogenic, where carcinogenic TACs can cause cancer and non-carcinogenic TAC can cause acute and chronic impacts to different target organ systems (e.g., eyes, respiratory, reproductive, developmental, nervous, and cardiovascular).

DPM, which is emitted in the exhaust from diesel engines, was listed by the state as a TAC in 1998. DPM has historically been used as a surrogate measure of exposure for all diesel exhaust emissions. DPM consists of fine particles (fine particles have a diameter less than 2.5 micrometer ( $\mu\text{m}$ )), including a subgroup of ultrafine particles (ultrafine particles have a diameter less than 0.1  $\mu\text{m}$ ). Collectively, these particles have a large surface area which makes them an excellent medium for absorbing organics. The visible emissions in diesel exhaust include carbon particles or “soot.” Diesel exhaust also contains a variety of harmful gases and cancer-causing substances.

Exposure to DPM may be a health hazard, particularly to children whose lungs are still developing and the elderly who may have other serious health problems. DPM levels and resultant potential health effects may be higher in close proximity to heavily traveled roadways with substantial truck traffic or near industrial facilities. According to CARB, DPM exposure may lead to the following adverse health effects: (1) aggravated asthma; (2) chronic bronchitis; (3) increased respiratory and cardiovascular hospitalizations; (4) decreased lung function in children; (5) lung cancer; and (6) premature deaths for people with heart or lung disease.<sup>34 35</sup> OEHHA’s HARP model and Air Toxics Hot Spots Program Guidance Manual (Guidance Manual) for the Preparation of Health Risk Assessments includes an ability to link certain TACs with metrics for cancer-rates or non-cancer effects on certain organ groups.

## RELATING ADVERSE AIR QUALITY IMPACTS AND HEALTH EFFECTS

The feasibility of determining a connection between air pollutant emissions and human health is different for a site-specific project, such as for a development project or local area plan, than it is for a larger regional scale analysis of an area-wide project, such as an analysis for a regulation change for the entire Air Coast Basin. As discussed below, directly correlating a single project’s emissions in a typical City EIR to quantifiable human

---

<sup>34</sup> CARB, *Diesel Exhaust and Health*, [www.arb.ca.gov/research/diesel/diesel-health.htm](http://www.arb.ca.gov/research/diesel/diesel-health.htm), Accessed August 2019.

<sup>35</sup> CARB, *Fact Sheet: Diesel Particulate Matter Health Risk Assessment Study for the West Oakland Community: Preliminary Summary of Results*, March 2008.

health consequences is currently not scientifically feasible, as it is not possible to conduct such an analysis that would provide reliable or meaningful results. As further discussed below, it is also infeasible to correlate regional emissions from local area-wide projects or plans identified in City EIRs to quantified human health consequences in any reliable or meaningful way, for many of the same reasons, and with additional challenges associated with separating and anticipating reasonably foreseeable emissions from other sources.

It should also be noted that in April 2019, the Sacramento Metropolitan Air Quality Management District (SMAQMD) published an Interim Recommendation on implementing the Friant Ranch decision in the review and analysis of proposed projects under CEQA in Sacramento County (Attachment 4). The SMAQMD is to date the only California air district to formally release, as guidance, an Interim Recommendation (April 2019) for lead agencies and practitioners preparing CEQA documents for projects within Sacramento County to comply with the Friant Ranch decision. Consistent with the expert opinions submitted to the Court in Friant Ranch by the San Joaquin Valley Air Pollution Control District (SJVAPCD) (Attachment 3) and SCAQMD (Attachment 2), the SMAQMD guidance confirms the absence of an acceptable or reliable quantitative methodology that would correlate the expected criteria air pollutant emissions of projects to the likely health consequences to people of project-generated criteria air pollutant emissions. The SMAQMD guidance explains that while it is in the process of developing a methodology to assess these impacts, lead agencies should follow the Friant Court's advice to explain in meaningful detail why this analysis is not yet feasible.

The following information is therefore provided to explain that for most projects and local level plans analyzed in City EIRs, it is currently not scientifically feasible to provide a reliable quantitative analysis directly correlating a project's significant pollutant emissions and human health.

## Existing Models and Tools

As previously described, a number of existing models and tools exist for quantifying both project emissions and pollutant concentrations. Certain federal and state public health standards for air quality are set in terms of acceptable regional concentration levels of pollutants. The SCAQMD demonstrates attainment of these concentration standards, in part, by setting CEQA thresholds for amounts of construction and operational emissions produced by individual projects or plans. In compliance with CEQA and the identified thresholds, City EIRs for individual development projects and local-level plans disclose and analyze project *emissions* for criteria pollutants and pollutant concentrations for TACs. For CEQA purposes, *concentrations* of criteria pollutants are typically not calculated. While it may be possible to utilize a project's emission data to determine concentration amounts, this would hinge the analysis on an additive range of assumptions and uncertainties, thus contributing to a higher margin of error. In addition, an accurate model of the data would also require a complex set of input data which may not be readily available or would otherwise contribute further to the

unreliability of the results. Furthermore, additional limitations exist for utilizing both regional and local models for this purpose. As such, modeling these concentrations of criteria pollutants utilizing existing tools would result in unreliable data, as discussed in further detail below.

### *Modeling Concentrations v. Emissions*

In order to relate a project's emissions to human health effects, it would first be necessary to model the air pollutant concentrations resulting from a project. As discussed above, studies which link health effects with exposure to pollutants are primarily based on the ultimate ambient or regional concentrations of pollutants. This is especially true for secondary pollutants such as ozone and PM. The lack of correlation between the direct *quantity* of precursor pollutants and the *concentration* of ozone or secondary PM formed is important because it is not necessarily the *quantity* of precursor pollutants (such as NO<sub>x</sub>, SO<sub>2</sub>, VOCs, etc.) that causes human health effects; rather, it is the *concentration* of resulting ozone and secondary PM that causes these effects. Indeed, the ambient air quality standards for ozone, which are statutorily required to be set by USEPA (at levels that are requisite to protect the public health with a margin of safety) and by CARB (at levels that are requisite to protect the health of the most sensitive groups) are established as concentrations of ozone and not as quantity (i.e., tonnages) of ozone precursor pollutants.<sup>36 37</sup> Furthermore, since the ambient air quality standards are focused on achieving a particular concentration region-wide, the regional models and health impact analysis tools (i.e., BenMAP-CE, CAMx, CMAQ) and plans for attaining the ambient air quality standards are also regional in nature. However, as further described below (pages 31-32), these regional models are not useful for analysis of the health impacts of specific projects on any given geographic location.

### *Complexities of Modeling Concentrations*

In requiring a health risk type analysis for criteria air pollutants, it is important to understand how criteria pollutants are formed, dispersed, and regulated. As an example, ground level ozone (smog) is not directly emitted into the air, but is instead formed when precursor pollutants such as NO<sub>x</sub> and VOC are emitted into the atmosphere and undergo complex chemical reactions in the process of sunlight.<sup>38</sup> Once formed, ozone can be transported long distances by wind.<sup>39</sup> Due to the complexity of ozone formation, a specific tonnage amount of NO<sub>x</sub>

---

<sup>36</sup> U.S. EPA, *Table of Ozone National Ambient Air Quality Standards*, <https://www.epa.gov/ground-level-ozone-pollution/table-historical-ozone-national-ambient-air-quality-standards-naaqs>. Accessed August 2019.

<sup>39</sup> U.S. EPA, *Ground-level Ozone: Basic Information*, [www.epa.gov/airquality/ozonepollution/basic.html](http://www.epa.gov/airquality/ozonepollution/basic.html). Accessed August 2019.

or VOCs emitted in a particular area does not equate to a particular concentration of ozone in that area.<sup>40</sup> In fact, even rural areas that have relatively low emissions of NO<sub>x</sub> or VOCs can have high ozone concentrations simply due to wind transport and other meteorological conditions such as temperature inversion and high pressure systems. Conversely, areas that have substantially more NO<sub>x</sub> and VOC emissions could experience lower concentrations of ozone simply because sea breezes disperse the emissions.<sup>41</sup>

For those projects where regional construction and operational emissions exceed the SCAQMD's recommended daily significance thresholds, this does not mean that one can determine with accuracy the concentration of ozone that will be created at or near the Project Site on a particular day or month of the year, or the specific human health effects that may occur. Meteorology, the presence of sunlight, geographical distribution of emissions, and other complex photochemical factors all combine to determine the ultimate concentrations and locations of ozone. This is especially true for the typical development project where most of the criteria pollutant emissions derive not from a single "point source," but from area wide sources (consumer products, paint, etc.) or mobile sources (cars and trucks) driving to, from and around the Project Site.

As another example, particulate matter can be divided into two categories: directly emitted PM and secondary PM. While directly emitted PM can have a localized impact, the tonnage emitted does not always equate to a specific local PM concentration because it can be transported long distances by wind.<sup>42</sup> Secondary PM, like ozone, is formed via complex chemical reactions in the atmosphere between precursor chemicals such as sulfur dioxide and NO<sub>x</sub>. Due to the complexity of secondary PM formation, the tonnage of PM-forming precursor emissions in an area does not necessarily result in an equivalent concentration of secondary PM in that area.

Furthermore, for modeling to produce reliable results, it is necessary to have data regarding the sources and types of toxic air contaminants, location of emission points, velocity of emissions, the meteorology and topography of the area, and the location of receptors (worker and residence).<sup>43</sup> Not all of these specific details or factors may be known at the time that a project or plan is undergoing CEQA review. For example, it may not be

feasible to perform a health risk assessment for airborne toxics that will be emitted by a generic industrial building that was built on "speculation" (i.e., without knowing the future tenant(s)).<sup>44</sup>

### *Purposes and Limitations of Regional Models*

As described above, local, state, and federal standards are set with the purpose of attaining ambient air quality standards within the region for the protection of public health. In part to meet these ambient standards, the SCAQMD has set numeric thresholds for land-use projects to determine significant air quality impacts. These thresholds are based on regional project emissions, which refer to the actual *quantity* of pollutants generated by the project, and are measured in pounds per day. These pollutant sources (e.g., onsite natural gas usage and offsite vehicular exhaust across the regional roadway network) can be estimated, measured, and quantified. However, once a project's emissions enter the environment, these emissions are subject to a number of complex factors and variables, including chemical changes, dispersal, and weather variation, and ultimately combine with other existing conditions to result in the regional ambient air quality and concentrations of pollutants.

The SCAQMD (and other regional air quality management and air pollution control districts) conducts regional-scale modeling in order to evaluate regional-scale air pollution, including modeling for the AQMP, modeling attainment demonstrations, and the Multiple Air Toxics Exposure Study (MATES) studies. This involves a regional scale photochemical model such as CAMx and CMAQ, which have a modeling domain on the order of hundreds of kilometers. Mobile source emissions are estimated using EMFAC and SCAG RTP/SCS VMT data and traffic data obtained from Caltrans for the entire basin. The effort, resources, and availability of necessary input data required to perform this type of analysis is complex and extensive, and is infeasible for smaller projects.

### *Unreliability of Using Regional Models at Smaller Scale*

As noted in the Brief of Amicus Curiae by the South Coast Air Quality Management District in the Friant Ranch case (Attachment 2), SCAQMD has among the most sophisticated air quality modeling and health impact evaluation capability of any of the air districts in the State, and thus it is uniquely situated to express an opinion on how lead agencies should correlate air quality impacts with specific health outcomes.<sup>45</sup> The computer models (e.g., CMAQ modeling platform)<sup>46</sup> used to simulate and predict an attainment date for ozone are based on regional inventories of precursor pollutants and meteorology within an air basin. At a very basic level, based on

---

<sup>44</sup> SCAQMD, *Application of the SCAQMD for Leave to File Brief of Amicus Curiae in Support of Neither Party and Brief of Amicus Curiae*, April 6, 2015. Page 10. Included as Attachment 2 of this memorandum.

<sup>45</sup> SCAQMD, *Application of the SCAQMD for Leave to File Brief of Amicus Curiae in Support of Neither Party and Brief of Amicus Curiae*, April 6, 2015. Pages 9, 10. Included as Attachment 2 of this memorandum.

<sup>46</sup> The SCAQMD 2016 AQMP ozone attainment demonstration was developed using the U.S. EPA recommended CMAQ (version 5.0.2) modeling platform with SAPRC07 chemistry, and the Weather Research and Forecasting Model (WRF) (version 3.6) meteorological fields.

gross assumptions appropriate for regional-scale analyses, the models simulate future ozone levels based on predicted changes in precursor emissions basin wide. It should be noted that it takes a large amount of additional precursor emissions to cause a modeled increase in ambient ozone levels over an entire region.<sup>47</sup> The computer models are not designed to determine whether the emissions generated by an individual development project, or even emissions from most relatively small-scale areas such as specific plan areas or community plan areas, will affect the date that the air basin attains the ambient air quality standards. Instead, the models help inform regional planning strategies based on the extent all of the emission-generating sources within the air basin must be controlled in order to reach attainment.<sup>48</sup>

In addition, this modeling is inappropriate for project-level or local plan-level analysis, as small changes in modeling results could be well within the normal gross margin of error of the CMAQ model performance. For example, SCAQMD states the expected margin of error for comparing CMAQ modeled daily maximum air pollutant concentrations to monitored concentrations is 20 percent.<sup>49</sup> However, even the expected 20 percent margin of error is exceeded in regional scale analyses. SCAQMD found that when maximum values equal or exceed 60 ppb, the normalized gross maximum error ranges from 15.7 to 19.8 percent for the coastal region, 11.5 to 22.3 percent for the San Fernando region, 12.1 to 25.2 for the foothills region, 14.7 to 18.2 for the urban source region, 12.5 to 20.9 percent for the urban receptor region, and 9.6 to 16.8 for the Coachella Valley.<sup>50</sup> The quarterly error statistic for PM<sub>2.5</sub> ranges from 54 percent to 95.7 percent for the coastal region, 30.1 to 60.6 percent for the San Fernando region, 30.7 to 81.6 percent for the foothills region, 41.1 to 81.6 percent for the urban source region, 23.5 to 53 percent for the urban receptor region, and 38 to 59.6 percent for the Coachella Valley region.<sup>51</sup>

Therefore, using these regional models at the project-level or local plan-level scale would not yield reliable results, as the emissions from a localized project would be small in comparison, falling within margins of error of the regional models. Therefore, results regarding project or local plan-level emissions would not be meaningful or statistically significant.

<sup>51</sup> *Ibid.* Table V-6-3

### *Purposes and Limitations of Localized Models*

Certain models (such as AERMOD and HARP) may be able to direct certain pollutant concentrations locally with reliable accuracy. However, these are used to prepare project-level health risk assessments (HRAs) for pollutants like DPM and other TACs, and do not address secondary pollutants such as ozone. Regarding the use of other potential localized models such as CALINE-4, the City's CEQA documents currently provide CO hotspot analyses where appropriate. However, per guidance from the SCAQMD and Caltrans, further modeling of other pollutants would be inappropriate using CALINE-4.<sup>52</sup> In addition, while these models are able to estimate concentrations for certain pollutants, no methods have been demonstrated to reliably and meaningfully connect these pollutant concentrations to specific health effects.

If an attempt were made to potentially utilize a localized model to determine a project's resulting pollutant concentrations, most likely an analysis would follow a methodology similar to how localized air quality analyses are currently performed for CEQA (e.g., freeway HRAs). For example, a project's vehicle emissions could be determined using CalEEMod or EMFAC. The project-related traffic emissions within a ¼ mile of the project site could then be combined with project-related emissions from on-site sources and analyzed for receptors in the vicinity using AERMOD on a microscale basis. The analysis could load traffic emissions along the roadway network consistent with the traffic study. This approach could be used for CO, NO<sub>2</sub>, PM<sub>10</sub>, and PM<sub>2.5</sub>; however, this would not address other pollutants, these models include additional limitations, and a number of uncertainties would be included in the modeling assumptions. Some of the limitations and uncertainties of this approach would include:

*Pollutant Emissions.* CalEEMod generates total daily regional-wide emissions from a project. These emissions account for different trip lengths based on the trip generation (residential vs. commercial, commute vs. delivery, etc.) and trip type (primary, diverted, pass-by). It would be speculative to assume on a regional basis where these emissions were to occur. It would also be speculative to assume which types of vehicles would use specific roadways (e.g., diesel delivery trips associated with a Project would likely use different routes than commuter trips).

*Spatial and temporal data.* It would be speculative to assume when and where vehicles would be travelling. AERMOD assumes steady state conditions and may not be able to account for variations in meteorology as well as seasonal variations.

---

<sup>52</sup> Caltrans, *Project-Level Air Quality Analysis*. <https://dot.ca.gov/programs/environmental-analysis/air-quality/project-level-air-quality-analysis>. Accessed August 2019.

*Ambient data.* Health impacts are highly dependent on ambient air quality levels. While data at ambient monitoring stations may be available, nearby localized sources (e.g., stationary emissions and major roadways) are not known and are not accounted for.

*Chemistry.* AERMOD is unable to process chemical reactions related to secondary PM and ozone formation.

The combination and compounding of the uncertainties from each component and step of the modeling analysis, particularly in the context of the very small increment of change in regional ambient air pollutant concentrations that a single project would be predicted to cause, would likely result in large margins of error for the overall modeled outcomes. That is, even if a model reports a certain outcome, the actual outcome may be in a relatively broad range surrounding the reported outcome. When these uncertainties are factored into the modeling analysis, the results would not be able to provide a meaningful estimate of health impacts. Furthermore, as described in further detail below, even if reliable pollutant concentration data were available, the concentration information could not be reliably and directly related to a health impact at this time.

## Metrics for Determining Health Effects

### *CEQA Thresholds and Relationship to Specific Health Effects*

As one of the many paths that the SCAQMD has established to lead the district towards achieving acceptable levels of pollutant concentrations region-wide, the agency has set CEQA thresholds of significance for project emission quantities. These SCAQMD thresholds are related to basin-wide emissions, are cumulative in nature, and do not indicate thresholds for project-specific concentrations related to particular health effects. Therefore, it should be noted that the SCAQMD regional significance thresholds are not direct indicators of specific health effects.

For example, with respect to ozone precursor emissions, the SCAQMD has set its operational CEQA significance threshold for NO<sub>x</sub> and VOC at 10 tons per year (expressed as 55 pounds per day). This is based on the federal Clean Air Act, which defines a major stationary source for extreme ozone nonattainment areas such as the SCAQMD as one emitting 10 tons per year. Under the federal Clean Air Act, such sources are subject to enhanced control requirements, thus SCAQMD determined that 55 pounds (less than .03 tons) per day was an appropriate threshold for making a CEQA significance finding and requiring feasible mitigation. For context, according to the most recent EPA-approved SCAQMD basin-wide emissions inventory, the VOC inventory for emissions is 500 tons per day and for NO<sub>x</sub> emissions is 522 tons per day for the baseline year of 2012.<sup>53</sup> The

<sup>53</sup> SCAQMD, *Final 2016 AQMP*, 2017. Figure 3-3. <http://www.aqmd.gov/home/air-quality/clean-air-plans/air-quality-mgt-plan/final-2016-aqmp>. Accessed August 2019.

threshold quantity of 55 pounds per day therefore represents a very small percentage (approximately .005 percent) of total daily basin-wide emissions. It should also be noted that from a scientific standpoint, it takes a large amount of additional precursor emissions to cause a statistically significant increase in ambient ozone levels over an entire region. In the case of ozone, the SCAQMD's 2012 AQMP showed that reducing baseline year 2008 NO<sub>x</sub> by 432 tons per day and reducing VOC by 187 tons per day would only reduce ozone levels at the SCAQMD's monitor site with the highest levels by 9 parts per billion.<sup>54</sup> Therefore, the SCAQMD has stated that "...a project source that emits 10 tons/year of NO<sub>x</sub> or VOC is small enough that its regional impact on ambient ozone levels may not be detected in the regional air quality models that are currently used to determine ozone levels. Thus, in this case it would not be feasible to directly correlate project emissions of VOC or NO<sub>x</sub> with specific health impacts from ozone."<sup>55</sup> Therefore, the SCAQMD has stated that the agency does not currently know of a way to accurately quantify ozone-related health impacts caused by VOC or NO<sub>x</sub> emissions from relatively small projects<sup>56</sup>, although this type of analysis may potentially be feasible for regional-scaled projects with very high emissions of ozone precursors.

### *Lack of Established Metrics by Expert Agencies*

Furthermore, both the SCAQMD and SJVAPCD have indicated that it is not feasible to quantify project-level health effects from ozone and secondary-formed pollutants based on available modeling techniques.<sup>57 58</sup> The SCAQMD Brief also cites the author of the CARB methodology, which reported that a PM<sub>2.5</sub> methodology is not suited for small projects and may yield unreliable results.<sup>59</sup> In addition, it would be infeasible to determine, with any degree of reliability, the impact on attainment of the ambient air quality standards and the number of nonattainment days that may result when a Project exceeds regional thresholds, and any findings would be speculative. As discussed above, the currently available regional models and health impact analysis tools (i.e., BenMAP-CE, CAMx, CMAQ) are equipped to model the impact of all emission sources in an air basin to demonstrate attainment.

<sup>59</sup> SCAQMD, *Application of the SCAQMD for Leave to File Brief of Amicus Curiae in Support of Neither Party and Brief of Amicus Curiae*, April 6, 2015. Page 14. Included as Attachment 2 of this memorandum.

Even if a metric could be calculated, it would not be reliable because the models attempt to evaluate the impact of all emission sources in an air basin on attainment and would likely not yield information with sufficient statistical certainty or a measurable increase in ozone concentrations sufficient to quantify health effects for an individual project. The SCAQMD Brief concludes, with respect to the Friant Ranch EIR, that although it may have been technically possible to plug the data into a methodology, the results would not have been reliable or meaningful.<sup>60</sup> No expert agency, including the SCAQMD and CARB, have approved a quantitative method to reliably and meaningfully translate mass emission estimates of criteria pollutants to specific health effects.

### *Limitations of Extrapolating Metrics from Health Impact Assessments*

Current HRA tools are able to provide some insight into potential health effects from project TACs and these tools have been specifically designed to evaluate how toxic emissions are released, how they disperse throughout an area, and the potential for those toxic pollutants to impact human health. However, these tools for TAC analysis do not address criteria pollutants and their related specific health effects, and also present their own limitations. HRAs typically include three separate components: an emissions inventory, dispersion modeling, and health risk calculations. OEHHA's HARP model and Air Toxics Hot Spots Program Guidance Manual (Guidance Manual) for the Preparation of Health Risk Assessments includes an ability to link certain air quality compounds with metrics for cancer-rates or non-cancer effects on certain organ groups.

The Guidance Manual identifies Response Exposure Levels (RELs) for various pollutants, which are concentration levels at (or below) which no adverse non-cancer health effects are anticipated for a specific exposure duration, usually specific to certain target organs. Exceeding the REL does not automatically indicate an adverse health impact, as the REL is not the threshold where population health effects would first be seen. However, increasing concentrations above the REL value increases, with an undefined probability, the likelihood that the health effect will occur.<sup>61</sup> These RELs are developed by OEHHA based on a highly technical and robust research process, including data gathering, modeling, determining appropriate parameters, making extrapolation adjustments, addressing variables and factors of uncertainty, consulting with expert agencies and the public, and undergoing scientific review. As such, the HARP model has become an accepted industry standard in evaluating health impacts from TACs and providing reliable and meaningful analysis, although the limitations of this analysis is also disclosed in HRA documents.

It should also be noted that the process of assessing health risks and impacts itself includes a degree of uncertainty, dependent on the availability of data and the extent to which assumptions are relied upon in cases

---

<sup>60</sup> SCAQMD, *Application of the SCAQMD for Leave to File Brief of Amicus Curiae in Support of Neither Party and Brief of Amicus Curiae*, April 6, 2015. Page 15. Included as Attachment 2 of this memorandum.

<sup>61</sup> OEHHA. *Air Toxics Hot Spots Program Guidance Manual*. February 2015. page 6-2.  
<https://oehha.ca.gov/media/downloads/crnrr/2015guidancemanual.pdf>. Accessed August 2019.

where the data are incomplete or unknown. In general, sources of uncertainty that may lead to an overestimation or an underestimation of the risk include: extrapolation of toxicity data in animals to humans, uncertainty in the estimation of the emissions, uncertainty in the air dispersion models, and uncertainty in the exposure estimates.<sup>62</sup> In addition to uncertainty, there is a natural range or variability in measured parameters defining the exposure scenario, including variation among the human population. Risk estimates generated by an HRA should therefore not be interpreted as the *expected* rates of disease in the exposed population but rather as *estimates* of potential for disease, based on current knowledge and a number of assumptions.<sup>63</sup>

For criteria pollutants, OEHHA guidance for health risk has only been identified for short-term one-hour peak exposures (acute inhalation) for CO, H<sub>2</sub>S, NO<sub>2</sub>, Ozone, SO<sub>x</sub>, and SO<sub>2</sub>, and otherwise the guidance lacks cancer potency factors or RELs for any longer-term exposure of any criteria pollutant. Even so, the HARP model which utilizes these factors or RELs is utilized for stationary sources and does analyze health impacts from mobile source emissions. As emissions from projects analyzed in City local-plan or project EIRs are usually heavily comprised of mobile source emissions, utilization of the HARP model for this analysis would not be useful to provide meaningful information regarding health impacts. Therefore, existing models utilizing these RELs for acute inhalation are not able to provide sufficient information about direct health impacts or probability of specific adverse health effects from criteria pollutants for City EIR projects.

In general, health impact assessments also use Concentration-Response (C-R) functions. C-R functions determine the relationship between the change in pollutant concentration and change in health impacts (baseline vs. project). It should be noted that not all C-R functions are linear. Using AERMOD or Cal3QHC/CALINE4, there is no reliable method to estimate baseline conditions at a project's buildout. While ambient monitoring data is available throughout the air basin, this does not account for nearby related projects or other stationary sources.

There are also many C-R functions based on pollutants, specific health impacts, age, race, pollutant uptake rates, sensitivity to specific pollutants, and other criteria. When calculating health impacts, the appropriate C-R functions would need to be selected. Due to the level of speculation required to make these assumptions, this could expose a project to potential challenges, as experts may debate about the correct C-R function used for analyses. As discussed above, while a microscale model could be used for some aspects of projects to address localized roadway impacts, linking specific health effect to concentrations would be speculative under CEQA due to the uncertainties in such an analysis, as discussed above.

---

<sup>62</sup> Ibid. page I-5.

<sup>63</sup> Ibid. page I-6.

### *Limitations on Extrapolating Metrics from Existing Health Studies*

In the absence of an adopted metric by an expert agency identifying emission or concentration levels with a particular health effect, there is information on this topic available within a body of health research and series of independent studies, as generally described in previous sections and in Attachment 1 (SCAQMD Final 2016 AQMP, Appendix I: Health Effects). However, utilizing this body of work can also be problematic if attempting to make reliable or meaningful conclusions relating project emissions to specific health impacts. For example, many of the health studies rely on specific population subgroups or provide limited sample sizes, and therefore have conclusions which would not apply to health effects on the general public. In addition, within the universe of these studies, there exists a broad range of findings and at times, inconsistent conclusions between studies. Research in this field is also subject to other limitations, including the scientific infeasibility of parsing out specific pollutants from other variables with an acceptable degree of certainty, which results in weak causal relationships between particular pollutants and specific health effects. Therefore, it would be speculative to use a limited study to relate concentrations of any specific pollutant to specific health impacts for a number of reasons. While pollutant increments could be compared to relevant data identified from a specific study, it is not recommended to base findings of a specific health-related impact on any single limited study. Therefore, even if a project's pollutant concentrations could be determined with an acceptable degree of accuracy, existing available information could still only provide a range or general idea of health impacts to the population at large.

## Health Effects from Regional Emissions Generated by Local Plans or Projects are Likely Nominal

The SCAQMD also conducted pollutant modeling for proposed Rule 1315 in which the CEQA analysis accounted for essentially all of the increases in emissions due to new or modified sources in the District between 2010 and 2030, or an approximate increase of 6,620 pounds per day of NO<sub>x</sub> and 89,947 pounds per day of VOC. At this regional scale, the SCAQMD was able to correlate this very large emissions increase to expected health outcomes from ozone and particulate matter. The results of the analysis showed that this increase of regional pollutant emissions would contribute to only a small increase in the air basin wide ozone concentrations in 2030 of 2.6 ppb and less than 1 ppb of NO<sub>2</sub>.<sup>64</sup>

Comparatively, a typical City project emits much lower amounts of pollutant emissions. For City projects that generate emissions exceeding SCAQMD's operational significance thresholds, (e.g., peak daily regional

---

<sup>64</sup> SCAQMD, *Final Program Environmental Assessment for Re-Adoption of Proposed Rule 1315*, 2011. Page 1-11.  
<https://www.aqmd.gov/home/research/documents-reports/lead-agency-scaqmd-projects/aqmd-projects---year-2011/re-adoption-of-proposed-rule-1315>.

emissions of 150 pounds per day of PM<sub>10</sub> and 55 pounds per day of NO<sub>x</sub>, VOC or PM<sub>2.5</sub>), these projects also typically represent relatively small amounts of pollutant emissions, with regional impacts which may not even be detected by current regional air quality models. For example, when comparing the Rule 1315 analysis to a large City project, such as the Olympia Project (a mixed-use development with 1.8 million square feet of floor area on a 3.3-acre site), Olympia's regional operational emissions would result in approximately 2 pounds of VOC and 12 pounds of NO<sub>x</sub> over the SCAQMD's significance thresholds, or approximately 0.06 and 1.0 percent of the emissions analyzed by SCAQMD related to Rule 1315, respectively.

As a further comparison to a local plan or community plan-level City project, such as the Hollywood Community Plan Update (which anticipates an approximate 27 percent increase for both housing/population and employment within a 22 square mile regional center within the City), the plan's regional operational emissions would result in an increase of 472 lbs. per day in VOCs and a decrease of 2,763 lbs. per day of NO<sub>x</sub>, or approximately 0.5 percent of the VOC emissions analyzed by SCAQMD related to Rule 1315. NO<sub>x</sub> emissions would decrease under the Community Plan and would therefore not exceed any significant thresholds. This demonstrates that most City projects studied in project and plan-level EIRs would result in emissions at much lower rates than those necessary to be able to correlate project emissions with specific health effects. Furthermore, construction and operational emissions are typically more regional (e.g., emitted by mobile sources distributed across region's roadway network) and different than the identified stationary sources as modeled in SCAQMD's analysis of Rule 1315, which would add to the difficulties of modeling project-related emissions.

Running the regional-scale photochemical grid model used for predicting ozone attainment with the emissions from any individual project or even a relatively small-scale area project would not yield reliable information regarding a measurable increase in ozone concentrations sufficient to accurately quantify ozone-related health effects. Any modeled increase in ozone concentrations would not be useful for a meaningful analysis, as the increase would be so comparatively small that it would be well within the margin of error of such models. Similarly, it would also not be feasible to identify a Project's impact on the days of nonattainment per year. Based on this information, a general description of the adverse health effects resulting from the pollutants at issue is all that can be feasibly provided at this time.

## CONCLUSION

Federal and state ambient air quality standards are designed to prevent the harmful effects of air pollution. These standards are continually updated based on evolving research, including research which relates air quality impacts with health effects. At the regional level, plans such as the SCAQMD's AQMP and SCAG's RTP/SCS work to ensure that the South Coast Air Basin reaches and maintains attainment with these federal and state standards. Locally, the City's EIRs evaluate a plan or project's consistency with applicable policies identified in the SCAQMD's AQMP and SCAG's RTP/SCS. City EIRs also identify regulatory compliance measures which work to limit risk and exposure to TACs. In addition, in evaluating air quality impacts on a plan- or project-level, the City's EIRs utilize thresholds guidance and air quality models established by the SCAQMD, which have been developed to implement these regional plans for attainment and protection of public health. Improvements to air quality in the region attest to the efficacy of these plans and local implementation practices.

For local plans or projects that exceed any identified SCAQMD air quality threshold, City EIR documents typically identify and disclose generalized health effects of certain air pollutants but are currently unable to establish a reliable connection between any local plan or project and a particular health effect. In addition, no expert agency has yet to approve a quantitative method to reliably and meaningfully do so. A number of factors contribute to this uncertainty, including the regional scope of air quality monitoring and planning, technological limitations for modeling at a local plan- or project-level, and the intrinsically complex nature between air pollutants and health effects in conjunction with local environmental variables. Therefore, at the time, it is infeasible for City EIRs to directly link a plan's or project's significant air quality impacts with a specific health effect. However, as air quality modeling and research on health effects advances over time, the City will continue to seek the latest guidance from local air quality agencies and experts and refine its approach based on future information as it becomes available.

## INTRODUCTION

This document presents a summary of scientific findings on the health effects of ambient air pollutants. The California Health and Safety Code Section 40471(b) requires that the South Coast Air Quality Management District (SCAQMD) prepare a report on the health impacts of particulate matter in the South Coast Air Basin (SCAB) in conjunction with the preparation of the Air Quality Management Plan (AQMP) revisions. This document, which was prepared to satisfy that requirement, also includes sections discussing the health effects of the other major pollutants. The intention of this document is to provide a brief summary of the conclusions of scientific reviews conducted by U.S. EPA and other scientific agencies, with some additional information from more recently published studies.

In addition to the air pollutant health effects summaries, there is an Attachment to this Appendix, which is a list of publications that have resulted from health-related research projects sponsored by SCAQMD over the past several years. Some of these studies are discussed in this Appendix, as appropriate, although there are many other studies referenced here. The studies funded by SCAQMD also help inform the SCAQMD's work in characterizing the air pollution and its effects in our local region and the influences of sources of air pollution in the Basin.

While information on ambient air quality statistics, attainment status, spatial distribution of air pollutants, environmental justice, socioeconomic impacts, control strategies, and cost-effectiveness are important issues that may relate to health effects, these issues are not the focus of this Appendix, and are instead discussed in detail in other chapters and appendices of the AQMP, or in the AQMP Socioeconomic Report.

## HEALTH EFFECTS OF AIR POLLUTION

Ambient air pollution is a major public health concern. Excess deaths and increases in illnesses associated with high air pollution levels have been documented in several episodes as early as 1930 in Meuse Valley, Belgium; 1948 in Donora, Pennsylvania; and 1952 in London. Although levels of pollutants that occurred during these acute episodes are now unlikely in the United States, ambient air pollution continues to be linked to increases in illness and other health effects (morbidity) and increases in death rates (mortality).

Adverse health outcomes linked to air pollution include cardiovascular effects, premature mortality, respiratory effects, cancer, reproductive effects, neurological effects, and other health outcomes. The evidence linking these effects to air pollutants is derived from population-based observational and field studies (epidemiological), toxicological studies, as well as controlled laboratory studies involving human subjects and animals. There have been an increasing number of studies focusing on the mechanisms (that is, on learning how specific organs, cell types, and biomarkers are involved in

the human body's response to air pollution). Yet the underlying biological pathways for these effects are not always clearly understood.

Although individuals inhale pollutants as a mixture under ambient conditions, the regulatory framework and the control measures developed are pollutant-specific for six major outdoor pollutants covered under Sections 108 and 109 of the Clean Air Act. This is appropriate, in that different pollutants can differ in their sources, their times and places of occurrence, the kinds of health effects they may cause, and their overall levels of health risk. Different pollutants, from the same or different sources, oftentimes occur together. While the combined effects of multiple air pollutants that occur simultaneously may be important, the air quality standards address each criteria pollutant separately, and thus, this Appendix is divided into sections by pollutant. To meet the air quality standards, comprehensive plans are developed such as the Air Quality Management Plan (AQMP); and to minimize exposure to toxic air contaminants in the South Coast AQMD, a local air toxics control plan is also prepared. These plans examine multiple pollutants, cumulative impacts, and transport issues related to attaining healthful air quality. A brief overview of the effects observed and attributed to various air pollutants is presented in this Appendix. Because the SCAB exceeds the federal standards for ozone and PM<sub>2.5</sub>, this Appendix focuses more attention in the discussion of these two pollutants, since the health impacts within the SCAB are potentially greater for these two pollutants compared to the health impacts of the other criteria pollutants. For the other pollutants, a brief summary of the associated health effects is provided.

This summary is drawn substantially from reviews presented previously (South Coast Air Quality Management District 1996; South Coast Air Quality Management District 2003; South Coast Air Quality Management District 2007; South Coast Air Quality Management District 2013b), and from the most recent U.S. EPA Integrated Science Assessment (ISA) reviews for Ozone (U.S. EPA 2013b), Carbon Monoxide (U.S. EPA 2010), Particulate Matter (U.S. EPA 2009), Nitrogen Oxides (U.S. EPA 2016), Sulfur Dioxide (U.S. EPA 2008), and Lead (U.S. EPA 2013a). Additional reviews prepared by the California Air Resources Board and the California EPA Office of Environmental Health Hazard Assessment for Particulate Matter (California Air Resources Board and Office of Environmental Health Hazard Assessment 2002), for Ozone (California Air Resources Board and Office of Environmental Health Hazard Assessment 2005) and for Nitrogen Dioxide (California Air Resources Board and Office of Environmental Health Hazard Assessment 2007) were included in the summary. In addition, several large review articles on the health effects of air pollution also helped inform this Appendix (American Thoracic Society 1996a; Brunekreef et al. 2002). More detailed citations and discussions on air pollution health effects can be found in these references.<sup>1</sup> Additionally, a supplemental literature review of mortality and morbidity impacts of PM<sub>2.5</sub>, ozone, NO<sub>2</sub>, and SO<sub>2</sub> was conducted for the AQMP Socioeconomic Evaluation to identify more recent studies (Industrial Economics Inc. 2016b; Industrial Economics Inc. 2016a); this health effects summary also draws upon this literature review to discuss these more recent studies, particularly those published since the

---

<sup>1</sup> Most of the studies referred to in this Appendix are cited in the above sources. Only specific selected references to provide examples of the types of health effects are cited in this summary.

most recent ISA's. This summary highlights studies that were conducted in the South Coast Air Basin or in Southern California, or alternatively, in California, if few studies from our local region are available on the specific topic. Studies conducted in Southern California give an important "local perspective" in understanding and evaluating the health effects of air pollution. However, studies conducted in other locations also provide critical information that is pertinent to advancing the scientific understanding of the health effects of air pollution, including effects on our local population. As such, this summary also discusses key studies that were conducted in other locations.

Over the decades of national reviews of outdoor air pollution and their health impacts, the U.S. EPA has developed a list of five criteria by which the strength and credibility of data can be judged. This five-tier weight-of-evidence approach provides an objective basis for assessing the breadth, specificity, and consistency of evidence concerning a particular health outcome. Table I-1 shows the five descriptors used by the U.S. EPA for assessing causality, using a weight-of-evidence approach. Within each section discussing a specific pollutant are tables showing summaries of the U.S. EPA conclusions regarding the causality of air pollution health effects, which are the conclusions of their scientific evaluation of the research studies they have reviewed. For the criteria pollutants, the discussion in this Appendix will focus only on those categories of health effects for which the U.S. EPA has determined there is a causal or likely causal relationship with the pollutant, while other health effects may be discussed briefly. In particular, because of the relatively long time gap since the latest U.S. EPA ISA for PM (in 2009), and because the SCAB currently exceeds the federal standards for PM<sub>2.5</sub>, some additional health endpoints that are emerging as areas of interest with regard to PM exposure are discussed briefly in this Appendix.

It is important to note that the U.S. EPA is tasked with assessing new and emerging air quality science, including health studies, as part of the process of setting the federal air quality standards. In other words, the U.S. EPA's role is to assess the causal relationships between the pollutants and the different types of health endpoints. It is SCAQMD's role to describe the public health impacts of poor air quality in our region, as well as to develop and implement an emission reduction strategy to attain the federal and state ambient air quality standards. Therefore, it is not the intention of this Appendix to assess whether there is or is not an effect of a specific air pollutant on any particular health endpoint, but rather to summarize the health effects and causal determinations as assessed by U.S. EPA and other scientific agencies, to discuss some recent studies published since the latest U.S. EPA reviews, to give some quantitative estimates of the health impacts of particulate matter air pollution in the South Coast Air Basin, and to present a "local perspective" by highlighting studies conducted in the South Coast Air Basin, Southern California, or California.

**TABLE I-1**

## U.S. EPA's Weight of Evidence Descriptions for Causal Determination of Health Effects

DETERMINATION	WEIGHT OF EVIDENCE
Causal Relationship	Evidence is sufficient to conclude that there is a causal relationship with relevant pollutant exposures. That is, the pollutant has been shown to result in health effects in studies in which chance, bias, and confounding could be ruled out with reasonable confidence. For example: (a) controlled human exposure studies that demonstrate consistent effects; or (b) observational studies that cannot be explained by plausible alternatives or are supported by other lines of evidence (e.g., animal studies or mode of action information). Evidence includes replicated and consistent high-quality studies by multiple investigators.
Likely To Be A Causal Relationship	Evidence is sufficient to conclude that a causal relationship is likely to exist with relevant pollutant exposures, but important uncertainties remain. That is, the pollutant has been shown to result in health effects in studies in which chance and bias can be ruled out with reasonable confidence but potential issues remain. For example: (a) observational studies show an association, but co-pollutant exposures are difficult to address and/or other lines of evidence (controlled human exposure, animal, or mode of action information) are limited or inconsistent; or (b) animal toxicological evidence from multiple studies from different laboratories that demonstrate effects, but limited or no human data are available. Evidence generally includes replicated and high-quality studies by multiple investigators.
Suggestive Of A Causal Relationship	Evidence is suggestive of a causal relationship with relevant pollutant exposures, but is limited because chance, bias, and confounding cannot be ruled out. For example, at least one high-quality epidemiologic study shows an association with a given health outcome but the results of other studies are inconsistent.
Inadequate To Infer A Causal Relationship	Evidence is inadequate to determine that a causal relationship exists with relevant pollutant exposures. The available studies are of insufficient quantity, quality, consistency or statistical power to permit a conclusion regarding the presence or absence of an effect.
Not Likely To Be A Causal Relationship	Evidence is suggestive of no causal relationship with relevant pollutant exposures. Several adequate studies, covering the full range of levels of exposure that human beings are known to encounter and considering susceptible populations, are mutually consistent in not showing an effect at any level of exposure.

(Adapted from U.S. EPA, 2009)

## OZONE

Ozone is a gaseous air pollutant that is a highly reactive compound and a strong oxidizing agent. When ozone comes into contact with the respiratory tract, it can react with tissues and cause damage in the airways. Ozone, or its reaction products, can penetrate into the gas exchange region of the deep lung. Both short-term and long-term exposures to ozone have been linked to respiratory effects. Ozone from man-made sources is formed by photochemical reactions when pollutants such as volatile organic compounds, nitrogen oxides, and carbon monoxide react with sunlight. The main sources of such ozone precursors are discussed in detail in the draft 2016 AQMP Chapter 3. Additionally, a discussion of the spatial distribution of ozone is provided in the draft 2016 AQMP Chapter 2.

In 1997, the U.S. EPA established the first federal standard for ozone averaged over 8 hours, at 0.08 ppm. In 2005, the California Air Resources Board (CARB) established standards of 0.09 ppm averaged over one hour and at 0.070 ppm averaged over eight hours. In 2008, the U.S. EPA lowered the federal standard for ozone to 0.075 ppm averaged over eight hours. On the basis of recent evaluations of ozone health effects, U.S. EPA's Clean Air Scientific Advisory Committee recommended in 2015 that the National Ambient Air Quality Standard (NAAQS) for ozone be reduced and recommended a range in which 0.070 ppm would be the upper limit. In 2015, the U.S. EPA concluded that the current national standard was not adequate to protect public health and lowered the 8-hour ozone standard to 0.070 ppm (U.S. EPA 2015b). While the federal standards must be attained within a specified time frame, the California standards do not have specific defined deadlines, but must be attained by the earliest practicable date.

The table below provides the overall U.S. EPA staff conclusions on the causality of short-term (i.e. hours, days, weeks) and long-term (i.e. months, years) ozone health effects for the health outcomes evaluated (U.S. EPA 2013b).

**TABLE I-2**

Summary of U.S. EPA's Causal Determinations for Health Effects of Ozone

<b>SHORT-TERM EXPOSURES</b>	
<b>Health Outcome</b>	<b>Causality Determination</b>
Respiratory Effects	Causal relationship
Cardiovascular Effects	Likely to be a causal relationship
Central Nervous System Effects	Suggestive of a causal relationship
Effects on Liver and Xenobiotic Metabolism	Inadequate to infer a causal relationship
Effects on Cutaneous and Ocular Tissues	Inadequate to infer a causal relationship
Mortality	Likely to be a causal relationship
<b>LONG-TERM EXPOSURES</b>	
<b>Health Outcome</b>	<b>Causality Determination</b>
Respiratory Effects	Likely to be a causal relationship
Cardiovascular Effects	Suggestive of a causal relationship
Reproductive and Developmental Effects	Suggestive of a causal relationship
Central Nervous System Effects	Suggestive of a causal relationship
Cancer	Inadequate to infer a causal relationship
Mortality	Suggestive of a causal relationship

(From U.S. EPA, 2013a Table 1-1)

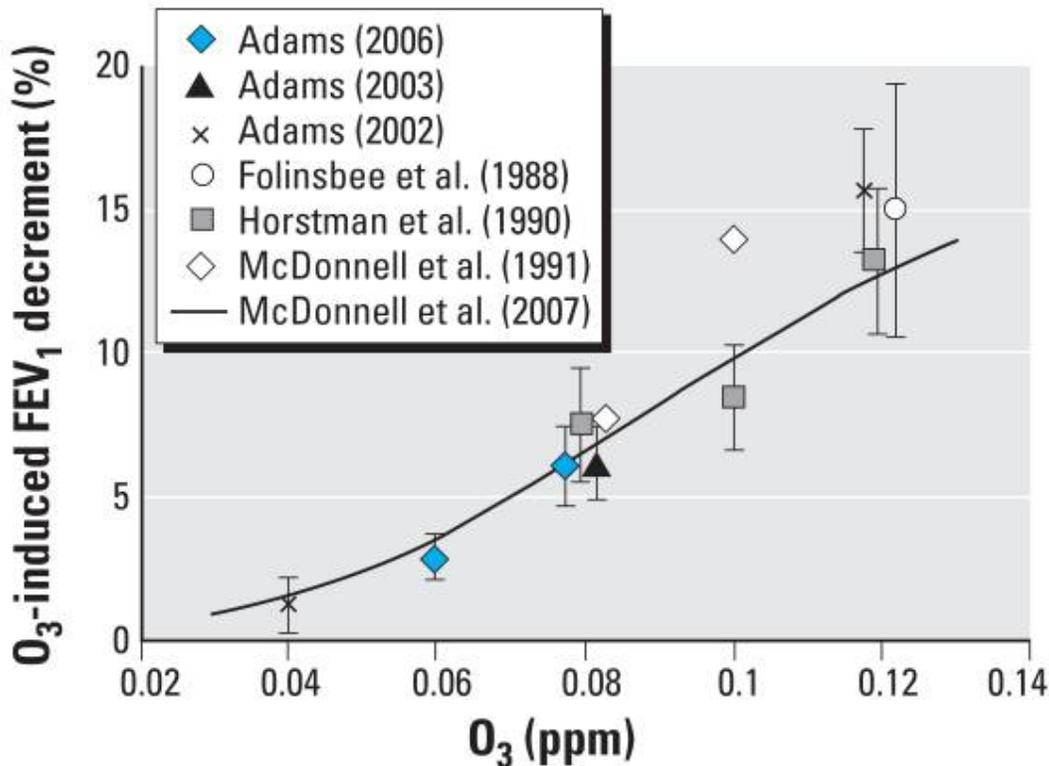

## Short-Term Exposure Effects of Ozone

The adverse effects reported with short-term ozone exposure are greater with increased activity because activity increases the breathing rate, the depth of the breaths, and the volume of air reaching the lungs, resulting in an increased amount of ozone reaching deeper into the lungs. Children are considered to be a particularly vulnerable population to air pollution effects because their lungs are still growing, they typically spend more time outdoors, are generally more physically active, and have a higher ventilation rate relative to their body weight, compared to adults (U.S. EPA 2013b).

A number of adverse health effects associated with ambient ozone levels have been identified from laboratory and epidemiological studies (American Thoracic Society 1996b; U.S. EPA 2006; U.S. EPA 2013b). These include increased respiratory symptoms, damage to cells of the respiratory tract,

decrease in lung function, increased susceptibility to respiratory infection, an increased risk of hospitalization, and increased risk of mortality. For short-term ozone exposures, the U.S. EPA determined in the most recent ISA that the evidence supports a causal relationship for respiratory effects, and a likely causal relationship for cardiovascular effects and mortality.

In the laboratory, exposure of human subjects to low levels of ozone causes reversible decreases in lung function as assessed by various measures such as respiratory volumes, airway resistance and reactivity, irritative cough and chest discomfort. The results of several studies where human volunteers were exposed to ozone for 6.6 hours at levels between 0.04 and 0.12 ppm were summarized by Brown (Brown et al. 2008). As shown in Figure I-1, there is an increasing response on lung function with increasing exposure levels in moderately exercising subjects. A study published after the analysis by Brown et al. exposed healthy young adults for 6.6 hours under intermittent moderate exercise to each of the following: filtered air, and ozone at 0.06, 0.07, 0.08, and 0.087 ppm (Schelegle et al. 2009). The study found decreases in lung function (forced expiratory volume in 1 second, or FEV1) with each of the different levels of ozone exposure, although the decrease in lung function at 0.06 ppm was not statistically different from exposure to filtered air. Lung function (FEV1) decreases were approximately 5 percent, 7 percent, and 11 percent at ozone exposure levels of 0.07, 0.08, and 0.087 ppm. A more recent study (Kim et al. 2011) exposed young healthy adults to ozone in the range of 0.06 to 0.10 ppm for 6.6 hours while engaging in intermittent moderate exercise, and found that the study participants exhibited an approximately 2 percent reduction in lung function (FEV1) and an increase in pulmonary inflammation after exposure to ozone at the 0.06 ppm concentration.

**FIGURE I-1**

Comparison of mean ozone-induced decrements in lung function following 6.6 hours of ozone exposure. Error bars represent the standard error. McDonnell et al. (2007) was a summary of results from several studies, and is represented by the line in the graph. (From: (Brown et al. 2008))

Some changes in lung function (volume and airway resistance changes) observed after study participants were exposed to ozone only once exhibit attenuated responses or a reduction in magnitude of responses when exposures are repeated, although there were a range of individual human responses observed, including some non-responders (Linn et al. 1988). Although it has been argued that the observed shift in response is evidence of a probable development of tolerance, it appears that while functional changes may exhibit attenuation, biochemical and cellular changes which may be associated with episodic and chronic exposure effects may not exhibit an attenuation. That is, internal damage to the respiratory system may continue with repeated ozone exposures, even if externally observable effects (chest symptoms and reduced lung function) disappear. An additional argument against toleration is that after several days or weeks without ozone exposures, the responsiveness (in terms of lung function as well as symptoms) returns, which is evidence that any tolerance developed is relatively short-lived (U.S. EPA 2013b).

Laboratory studies have also compared the degree of lung function change seen in healthy individuals versus asthmatics and those with chronic obstructive pulmonary disease (COPD). In several

laboratory studies of individuals with COPD, the percent decreases in lung function from short-term ozone exposures  $\leq 0.30$  ppm among patients with COPD generally did not differ from the lung function decrements experienced by healthy patients (Linn et al. 1982; Solic et al. 1982; Linn et al. 1983; Kehrl et al. 1985). That finding, however, may not accurately reflect the true impact of exposure on these respiration-compromised individuals. Since the respiration-compromised group may have lower lung function to begin with, the same total percent change in lung function may represent a substantially greater relative adverse effect overall. Other studies have found that subjects with asthma are more sensitive to the short-term effects of ozone in terms of lung function and inflammatory response, as evidenced by measuring changes in lung function, increased hospitalizations, and emergency room visits for respiratory conditions (U.S. EPA 2013b). This evidence supports the hypothesis that asthmatics are a particularly sensitive population to the health effects of ozone.

In laboratory studies of animals, cellular and biochemical changes associated with respiratory tract inflammation have also been consistently found in the airway lining after low-level exposure to ozone. These changes include an increase in specific cell types and in the concentration of biochemical mediators of inflammation and injury such as Interleukin-1, Interleukin-6, Interleukin-8, Tumor Necrosis Factor  $\alpha$  (TNF- $\alpha$ ), and fibronectin (Van Bree et al. 2002; Johnston et al. 2007; U.S. EPA 2013b).

In addition to controlled laboratory conditions, epidemiological studies of individuals exercising outdoors, including children attending summer camp, have shown associations of reduced lung function with ozone exposure. There were wide ranges in responses among individuals. U.S. EPA's 2013 ISA indicated that most studies found reductions in lung function (FEV<sub>1</sub>) in the range of approximately <1 to 2 percent when standardized to an increase of 0.04 ppm for a 1-hour maximum, an increase of 0.03 ppm for an 8-hour maximum, and an increase of 0.02 ppm for a 24-hour average (U.S. EPA 2013b). Somewhat greater decrements in lung function (4.9 to 7.3 percent) were found in children with asthma who had respiratory infections or were using corticosteroid medication.

Epidemiologic studies have found that increases in short-term ozone levels are associated with impacts on children's respiratory health, including increases in respiratory symptoms in children with asthma, and increased numbers of absences from school. Studies conducted in various cities in the U.S. and in other countries have reported increased respiratory symptoms among children with asthma, including wheeze, cough, difficulty breathing, and chest symptoms/tightness (U.S. EPA 2013b). The Children's Health Study, conducted by researchers at the University of Southern California, followed for several years a cohort of children that live in 12 communities in Southern California with differing levels of air pollution. A publication from this study reported that school absences in fourth graders for respiratory illnesses were positively associated with short-term increases in ambient ozone levels. An increase of 20 ppb (0.02 ppm) ozone was associated with a 63 percent increase in illness-related absence rates and an 83 percent increase in respiratory illnesses (Gilliland et al. 2001). A small panel study of Hispanic children with asthma living in the Huntington Park neighborhood of Los Angeles, California reported that a 10.8 ppb increase in ozone averaged

over 8 hours nearly doubled the odds of having asthma symptoms that interfered with daily activities (Delfino et al. 2003). Despite these studies, and some others linking ozone exposures with school absences, the U.S. EPA concluded that only limited evidence is currently available linking these ozone exposures to respiratory-related school absences (U.S. EPA 2013b).

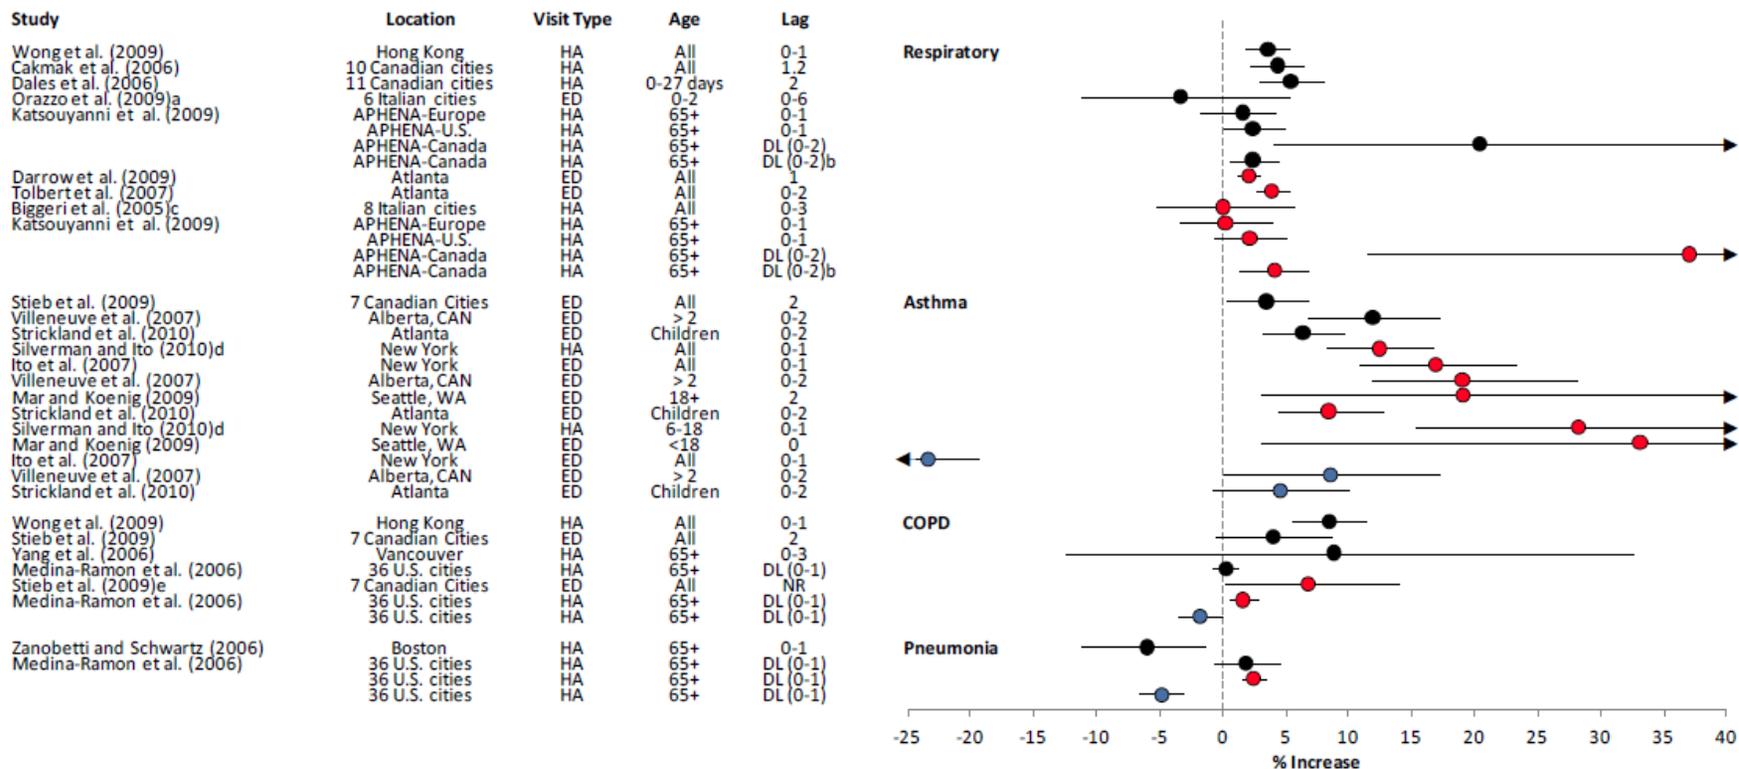

Numerous studies have found associations of short-term ozone levels and hospital admissions and emergency department admissions for respiratory conditions, and the U.S. EPA concluded in the latest ISA that the most recent epidemiological studies conducted in both single cities and multiple cities continue to provide evidence supporting a causal relationship between short-term ozone exposures and respiratory effects (U.S. EPA 2013b). The studies generally found stronger associations for asthma and COPD in the warm season or in the summer months, compared to the cold season, and also provided evidence that children are at greatest risk of ozone-related respiratory health effects. Several of these studies reviewed in the ISA had average ozone concentrations well below 60 ppb averaged over 8 hours and still reported associations with respiratory outcomes. One study of asthma emergency department visits reported ozone effects at concentrations as low as 30 ppb (Strickland et al. 2010). Figure I-2 presents examples of studies regarding all-year and seasonal analysis of ozone exposure and hospital admissions or emergency department visits. This figure illustrates the associations found between ambient ozone exposure and key respiratory outcomes (asthma, COPD and pneumonia), and shows the stronger effects with summertime ozone exposures. Recently, a study in California reported that short-term ozone exposures were associated with emergency department visits for asthma, acute respiratory infections, pneumonia, COPD, and upper respiratory tract infections, with more consistent associations during the warm season (Malig et al. 2016). This California study provides additional supporting evidence for ozone-related respiratory effects.

The potential cardiovascular effects of short-term ozone exposure have been studied in toxicological, human exposure, and epidemiological studies. Controlled human exposure studies have found that ozone exposures produce changes in heart function (as measured by heart rate variability) and increases in biomarkers in the blood for systemic inflammation and oxidative stress. The limited number of toxicological studies on this topic provide evidence of cardiovascular effects. The effects observed include increased heart rate variability, arrhythmias, vascular disease, and inflammation and oxidative stress leading to atherosclerosis, which can lead to tissue damage due to ischemia and reperfusion (i.e. having the blood supply cut off and then restored to the tissues) (U.S. EPA 2013b). The controlled human exposure and toxicological studies provide evidence of cardiovascular effects of ozone, and some plausible mechanisms for these effects. Epidemiological studies, including some recent multi-city studies show relatively consistent associations between short-term ozone exposures and cardiovascular mortality (these studies are discussed further below). However, epidemiological studies do not provide consistent evidence of cardiovascular morbidity with short-term ozone exposures. Studies conducted in the Los Angeles area or in California also do not provide consistent evidence of short-term ozone effects on cardiovascular morbidity. A study of elderly non-smokers in the Los Angeles area with a history of heart disease found no associations between ozone exposure and blood pressure nor ST-segment depression, a measure of cardiac ischemia (Delfino et

al. 2010; Delfino et al. 2011). A Los Angeles-based study of cardiovascular hospital admissions did not find increased risk with ozone exposures (Linn et al. 2000). However, a biomarker study of students at UC Berkeley who spent their summer vacation in either the Los Angeles or San Francisco Bay Area found that ozone exposures over a period of 2 weeks or 1 month were associated with increases in a biomarker of lipid peroxidation, but no association was found for a biomarker of antioxidant capacity (Chen et al. 2007). Lipid peroxidation is an indicator of oxidative stress, which may be triggered by pulmonary inflammation caused by ozone exposure. Given the strong evidence of cardiovascular morbidity from experimental studies and the consistent positive associations reported in epidemiological studies of cardiovascular mortality, but the lack of consistent evidence from epidemiological studies of cardiovascular morbidity, the U.S. EPA determined that there is a likely causal relationship between short-term ozone exposures and cardiovascular effects (U.S. EPA 2013b).

For mortality effects, the U.S. EPA 2013 ISA concluded that there was a likely causal relationship for short-term ozone exposures. This determination is supported by numerous studies have found positive associations between short-term increases in ozone levels and excess risk of mortality from all non-accidental causes, cardiovascular causes, and respiratory causes (Bell et al. 2004; Bell et al. 2005; Huang et al. 2005; Ito et al. 2005; Levy et al. 2005; Bell et al. 2008; Zanobetti et al. 2008). Studies conducted across multiple cities in the U.S. Canada, Europe and Asia reported increased cardiovascular and respiratory mortality risks with increased short-term ozone exposures, and several studies additionally reported increased mortality risk for summer season ozone exposures (Katsouyanni et al. 2009; Samoli et al. 2009; Stafoggia et al. 2010; Wong et al. 2010). Some studies have also demonstrated that these associations persist even when other variables including season and levels of particulate matter are accounted for, indicating that ozone mortality effects may be independent of other pollutants, although there is some variability across studies with regard to the sensitivity of the ozone associations to adjustment for PM (Bell et al. 2004; Huang et al. 2005; Katsouyanni et al. 2009; Stafoggia et al. 2010). With regard to respiratory effects, the substantial evidence supporting a causal relationship between short-term ozone exposures and respiratory morbidity provides strong support for the recent evidence from epidemiological studies linking such exposures to respiratory mortality. For cardiovascular effects, while there is strong evidence linking cardiovascular mortality with short-term ozone exposures, the epidemiological studies of non-fatal outcomes do not provide consistent evidence for a coherent mechanism linking ozone exposures to cardiovascular mortality (U.S. EPA 2013b).

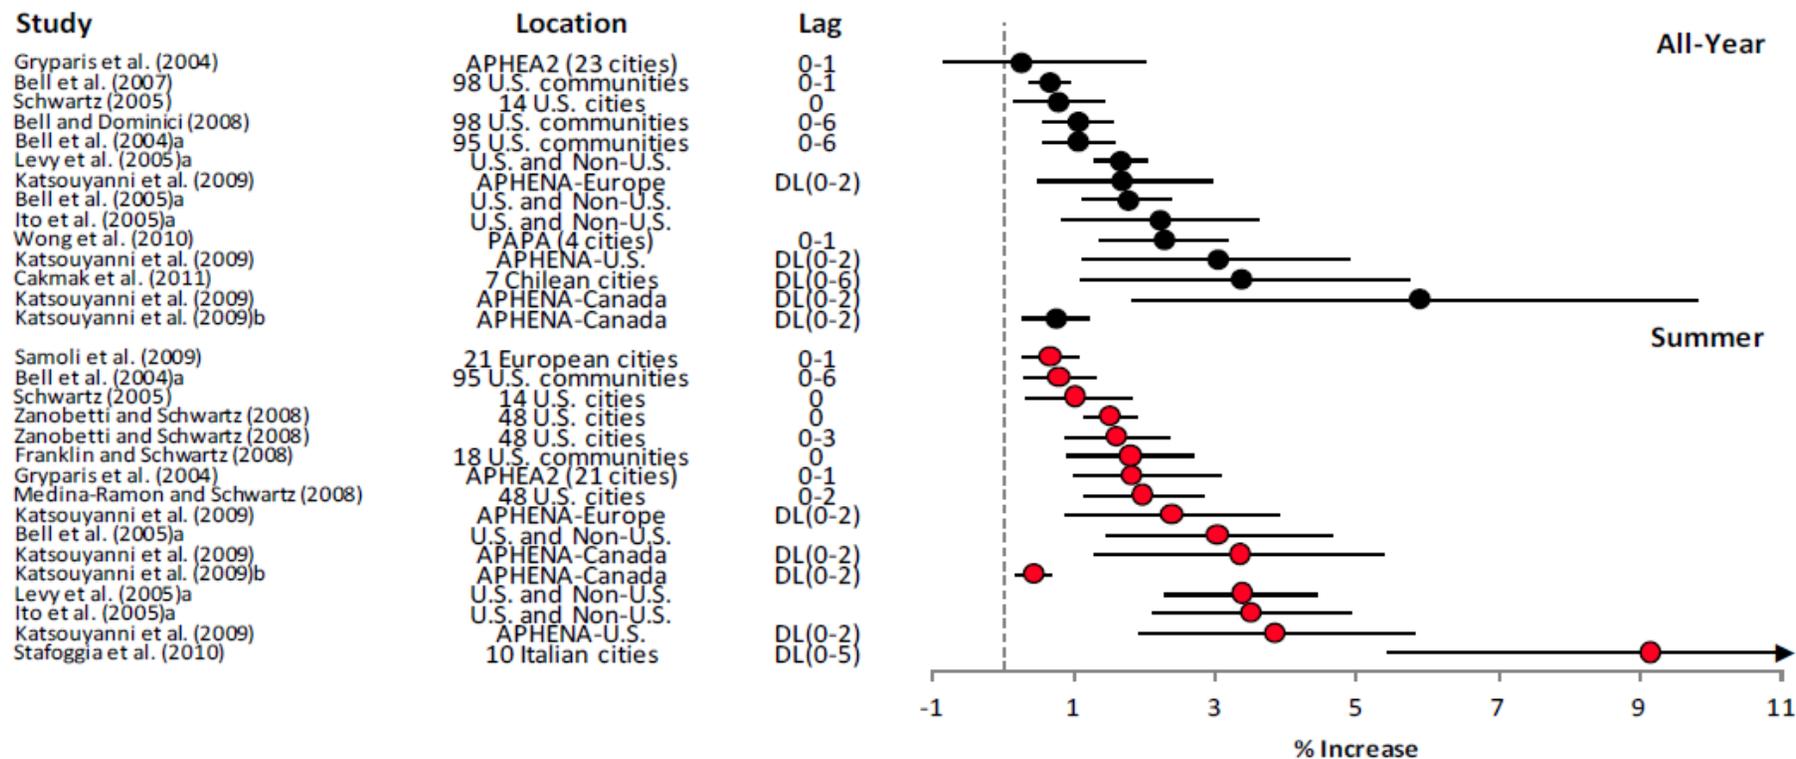

Examples of studies showing the relative change in mortality risks for all-year and summer-only analyses are shown in Figure I-3.

Note: Effect estimates are for a 20 ppb increase in 24-hour; 30 ppb increase in 8-hour max; and 40 ppb increase in 1-hour max O<sub>3</sub> concentrations. HA=hospital admission; ED=emergency department. Black=All-year analysis; Red=Summer only analysis; Blue=Winter only analysis. (From (U.S. EPA 2013b) Figure 6-19)

**FIGURE I-2**

Change in respiratory-related hospital admission and emergency department visits in studies that presented all-year and/or seasonal results.

Note: Effect estimates are for a 40 ppb increase in 1-hr max, 30 ppb increase in 8-hr max, and 20 ppb increase in 24-hr average O<sub>3</sub> concentrations. (From (U.S. EPA 2013b) Figure 6-27)

**FIGURE I-3**

Summary of mortality risk estimates for short-term O<sub>3</sub> exposure and all-cause (nonaccidental) mortality.

## Long-Term Exposure Effects of Ozone

The U.S. EPA 2013 ISA for Ozone concluded that there was a likely causal relationship between long-term ozone exposure and respiratory effects (U.S. EPA 2013b). Evidence supporting this determination comes from epidemiological and toxicological studies, particularly studies of asthma and related symptoms, asthma-related hospital admissions, lung function, lung inflammation and oxidative stress. Other health effects of long-term ozone exposure were determined to have “suggestive” or “inadequate” evidence of causality, although the few studies of respiratory mortality provide support to the respiratory health effects of ozone.

The Adventist Health and Smog Study (AHSMOG) and Children’s Health Study cohorts are two large long-term studies conducted in California that examined several aspects of long-term ozone effects in adults and children, respectively. Several of these studies focused on asthma development and exacerbation. The AHSMOG study included adult, non-smoking, non-Hispanic white Seventh Day Adventists living in California. The 10-year follow-up AHSMOG study reported that a 10 ppb increase in annual mean ozone exposures increased the risk of asthma development in males by three-fold (relative risk 3.12, 95 percent confidence interval: 1.16, 5.85), but no effect was seen among females (relative risk 0.94, 95 percent confidence interval: 0.65, 1.34) (Greer et al. 1993). The 15-year follow-up AHSMOG study used an ozone metric focusing on 8-hour average exposures, and reported that a 10 ppb increase was associated with a 30 percent increased risk of developing asthma in males (relative risk 1.31, 95 percent confidence interval: 1.01, 1.71), and these effects persisted even after accounting for other pollutants (McDonnell et al. 1999). The latter study also found no effect in females, although this may reflect a greater potential for misclassification of air pollution exposure in females compared to males, due to different time-activity patterns resulting in greater time spent outdoors among males (U.S. EPA 2013b). In the Children’s Health Study, among children living in 12 Southern California communities with high ozone concentrations, the relative risk of developing asthma in children playing three or more sports was found to be over three times higher than in children playing no sports (McConnell et al. 2002). The high ozone communities had a 4-year mean daytime ozone concentration of 59.6 ppb, compared to 40.0 ppb for the low-ozone communities. These findings indicate that new cases of asthma in children may be associated with performance of heavy exercise in communities with high levels of ozone. While it has long been known that air pollution can exacerbate symptoms in individuals with preexisting respiratory disease, this is among the first studies that indicate ozone exposure may contribute to asthma onset. However, three more recent Southern California studies did not find an association between ozone exposures and childhood asthma incidence, but did report increased risks of asthma onset with higher exposures to particulate matter or NO<sub>2</sub> (Islam et al. 2007; McConnell et al. 2010; Nishimura et al. 2013). These studies did not examine whether genetic factors may have played a role in making some people more susceptible than others to the respiratory effects of ozone exposure. Some analyses from the Children’s Health Study identified specific genetic variants that, when combined with ambient ozone exposure, either increase or decrease the risk of developing asthma (Islam et al. 2008; Islam et al. 2009; Salam et al. 2009). These genetic variants are involved with antioxidant and/or anti-

inflammatory pathways, and are likely involved in key elements of asthma development (U.S. EPA 2013b).

Other studies examined the impact of long-term ozone exposures and respiratory symptoms, particularly among asthmatics. Studies have linked long-term ozone exposures to increased risk of having poorly-controlled asthma, increased asthma symptoms, and respiratory-related school absences (Gilliland et al. 2001; Akinbami et al. 2010; Jacquemin et al. 2012). An analysis from the CHS found no association between long-term ozone exposures and chronic lower respiratory tract symptoms, and another found an increased risk of bronchitic symptoms within a community, although the association was reduced when accounting for other pollutants (McConnell et al. 1999; McConnell et al. 2003). However, two studies from the CHS demonstrated gene-environment interactions for genes that are involved in inflammation or antioxidant pathways. One study found that asthmatic children with a particular genetic variant that reduces expression of the cytokine TNF- $\alpha$  (as part of an inflammatory response) had reduced risk of bronchitic symptoms for children in low-ozone communities, but not for children in high-ozone communities (Lee et al. 2009). A second study found that a particular genetic variant reduced the risk of respiratory-related school absences among children living in communities with high levels of ozone (defined in this study as being above the median value of 46.9 ppb) (Wenten et al. 2009).

Results of epidemiologic studies of hospital admissions and emergency department visits support the relationship between ozone exposure and respiratory effects. In a 2007 study conducted in Southern California, an increased risk of having poorly-controlled asthma was associated with living in areas above the 90<sup>th</sup> percentile ozone level (28.7 ppb, annual average) among men and elderly individuals (Meng et al. 2007). A study in the South Coast Air Basin found that ozone was associated with increased hospital discharges for asthma among children (Moore et al. 2008). Another study in the South Coast Air Basin looked at infants hospitalized for bronchiolitis. This study found a reduced risk of infant bronchiolitis hospitalization with increased ozone exposure, although there was no association for ozone when accounting for the effect of PM<sub>2.5</sub>, which was positively associated with this respiratory outcome (Karr et al. 2007). A study of people with asthma was conducted in the San Joaquin Valley of California, and found that a 10 ppb increase in ozone exposures averaged over one year increased the odds of asthma-related hospital admissions and emergency department visits by approximately 50 percent, and the odds of asthma symptoms among adults by about 40 percent (Meng et al. 2010). Studies conducted in other locations have also reported increases in asthma hospitalizations (U.S. EPA 2013b).

Some animal studies show results that indicate possible chronic effects including functional and structural changes of the lung. However, morphological, developmental, and immunological differences make it difficult to apply these results to humans experiencing ambient exposures. These changes observed in airway responsiveness provide support for the long-term effects of ozone in asthma development or exacerbation (U.S. EPA 2013b). However, epidemiologic studies examining long-term ozone exposures and lung function deficits have reported mixed results. For example, an analysis of the first CHS cohort found that PM<sub>2.5</sub> and NO<sub>2</sub> exposures were associated with decreased

lung function, but did not find an association for ozone (Gauderman et al. 2004). An autopsy study involving Los Angeles County residents who died between ages 14 and 25 years due to violent death, although conducted many years ago when pollutant levels were higher than currently measured, provided supportive evidence of lung tissue damage (structural changes), which the authors suggested were attributable to air pollution (Sherwin 1991), although many uncertainties remain about the extent to which air pollution explains the findings.

Unlike short-term ozone exposures, there is limited evidence linking long-term ozone exposures with mortality. A large study based on the American Cancer Society Cancer Prevention Study II (CPS-II) cohort included 96 metropolitan statistical areas in the U.S., and reported that a 10 ppb increase in daily maximum 1-hour ozone concentrations averaged between April and September (warm season) was associated with a relative risk of 1.040 (95 percent confidence interval: 1.010, 1.067) for respiratory deaths, but no association with cardiovascular deaths (Jerrett et al. 2009). A U.S. study of Medicare enrollees reported increased risk of mortality with higher ozone exposures averaged over the warm season, among patients who had previously been hospitalized for congestive heart failure, myocardial infarction, COPD and diabetes (Zanobetti et al. 2011). A recent large-scale study found increased risk of all-cause, cardiovascular, and respiratory mortality with long-term ozone exposures, even after accounting for the effects of PM<sub>2.5</sub> and NO<sub>2</sub>, as well as other behavioral and demographic factors, including smoking (Turner et al. 2016). Other studies have found temperature to be an important potential risk factor for mortality, and may confound or modify the associations between air pollution exposure and mortality (Basu et al. 2002; Cheng et al. 2008). The Turner 2016 study examined the role of temperature, and found that the associations between ozone and mortality differed based on average daily maximum temperatures (Turner et al. 2016). While the U.S. EPA determination in the latest ISA was that the evidence was suggestive of long-term ozone exposure causing mortality, the studies of respiratory mortality support the evidence for the respiratory effects of ozone exposure, for which U.S. EPA has concluded there is a causal relationship.

For non-respiratory health endpoints, the U.S. EPA causal determinations were “suggestive of a causal relationship” (for cardiovascular, reproductive and developmental, central nervous system and mortality effects) or “inadequate to infer a causal relationship” (for cancer). Some studies conducted in California have examined reproductive or developmental effects, including birth defects, low birth weight or birth weight reductions, stillbirth and autism (Ritz et al. 2002; Ritz et al. 2007; Morello-Frosch et al. 2010; Becerra et al. 2013; Mobasher et al. 2013; Trasande et al. 2013; Laurent et al. 2014; Green et al. 2015; Symanski et al. 2016). Other recent studies have examined cardiovascular effects (Koken et al. 2003; Ensor et al. 2013; Rodopoulou et al. 2014). While many of these studies have reported associations with ambient ozone levels, the most recent U.S. EPA determination in 2013 was that the evidence was suggestive of a causal determination, but did not yet rise to a higher level.

## Sensitive Populations for Ozone-Related Health Effects

A number of population groups are potentially at increased risk for ozone exposure effects. In the most recent ISA for ozone in 2013, the U.S. EPA has identified several populations as having adequate evidence for increased risk from ozone exposures. These include children, older adults, outdoor workers, and individuals with asthma, certain variations in genes related to oxidative metabolism or inflammation, or reduced intake of certain nutrients such as Vitamins C and E (Kreit et al. 1989; Horstman et al. 1995; Sienna-Monge et al. 2004; Romieu et al. 2012; U.S. EPA 2013b; Bell et al. 2014). There is suggestive evidence for other potential factors, such as a person's sex, socioeconomic status, and obesity (U.S. EPA 2013b). Some other factors that could affect sensitivity to ozone have also been studied; however, there was inadequate evidence to conclude whether these were risk factors for ozone sensitivity. The table below summarizes the evidence for factors affecting sensitivity to ozone from the 2013 ISA for ozone.

**TABLE I-3**

Summary of Evidence for Potential Increased Susceptibility to Ozone-Related Health Effects

Evidence Classification	Potential At Risk Factor
Adequate evidence	Genetic factors Asthma Children Older adults Diet Outdoor worker
Suggestive evidence	Sex SES Obesity
Inadequate evidence	Influenza/infection COPD Cardiovascular disease Diabetes Hyperthyroidism Race/ethnicity Smoking Air conditioning use
Evidence of no effect	--

From (U.S. EPA 2013b) Table 8-6

As previously mentioned, one group that has been recognized as being particularly sensitive to the effects of ozone is young children with asthma, because their lungs are still developing, their potential for increased exposure due to time spent exercising outdoors, and their high ventilation rates relative to body weight (U.S. EPA 2013b). Some factors that may contribute to the increased sensitivity among people with asthma include having an altered innate immune function and factors that decrease their antioxidant defenses (Alexis et al. 2014). Ozone creates secondary oxidation products that are electrophilic, and certain genetic factors influence a person's ability to metabolize

these electrophiles, which can affect respiratory function (U.S. EPA 2013b). Asthma exacerbations are more prevalent and severe in young boys than in girls, but the evidence on whether boys are more susceptible than girls to the effects of air pollution on asthma symptoms is not consistent (Guarnieri et al. 2014).

## Summary – Ozone Health Effects

In summary, outdoor ozone exposures have been associated with a range of negative human health effects. The strongest evidence for negative health impacts are on the respiratory system, and are measured by decreased lung function performance and increased cell injury. In addition, the 2013 ISA also concluded that there was a likely causal relationship between short-term ozone exposures and cardiovascular effects (such as changes in heart function, and increased systemic inflammation and oxidative stress) as well as respiratory mortality. Although the specific mechanisms of action for ozone effects on the various health endpoints have not been fully identified, there is evidence of the important roles of oxidation of key enzymes and proteins, inflammatory responses, changes in immune response, and modification and activation of neural reflex pathways (U.S. EPA 2013b).

The previous U.S. EPA review of ozone in the 2006 Air Quality Criteria Document (AQCD) had already concluded that there was clear, consistent evidence that acute ozone exposure is causally associated with respiratory effects (U.S. EPA 2006). Additionally, the 2006 AQCD for ozone concluded that the evidence was highly suggestive of ozone causing mortality, but that there was limited evidence for ozone causing cardiovascular effects. In the 2013 ISA, the U.S. EPA cited that several lines of evidence provide support for the respiratory effects of ozone, including human exposure studies, epidemiology and toxicology, which led to the conclusion that there was a causal relationship with short-term ozone exposures, and a likely causal relationship with long-term ozone exposures. In humans, respiratory effects were detected in laboratory studies at 0.06 ppm ozone concentrations, and in epidemiological studies with average ozone concentrations as low as 0.03 ppm (Strickland et al. 2010; Kim et al. 2011). Some populations are more sensitive to the health effects of ozone than others, including elderly persons, children, outdoor workers and persons with asthma.

## PARTICULATE MATTER

Airborne particulates are a complex group of pollutants that vary in physical, chemical, and biological dimensions. Physically, particles can vary by size, surface area and roughness, shape, and mass. Chemically, they vary by chemical composition. Biologically, they can vary by toxicity. In addition, particles vary by source, and can come from anthropogenic (man-made, such as from combustion of fuels, or frictional abrasion) or “natural” (plants – for example, pollens and spores) origins. The composition of particulate matter can vary across sub-regions, and a description of the spatial differences in PM composition can be found in the draft 2016 AQMP Chapter 2 and Appendix II.

The National Ambient Air Quality Standard for particulate matter was established in 1971, and set limits on the ambient level of Total Suspended Particulates (TSP). In 1987, the national particulate matter standards were revised to focus on particles sized 10  $\mu\text{m}$  (micrometers) aerodynamic diameter and smaller. These can be inhaled and deposited throughout the upper and lower

respiratory system, depositing in both airways and gas-exchange areas of the lung. These particles are referred to as PM<sub>10</sub>. U.S. EPA initially promulgated ambient air quality standards for PM<sub>10</sub> of 150 µg/m<sup>3</sup> averaged over a 24-hour period, and 50 µg/m<sup>3</sup> for an annual average. U.S. EPA has since rescinded the annual PM<sub>10</sub> standard, but kept the 24-hour standard.

As more health research data has become available, concerns have centered on smaller and smaller particles. Additional focus has been placed on particles having an aerodynamic diameter of 2.5 µm or less (PM<sub>2.5</sub>). A greater fraction of particles in this size range can penetrate and deposit deep in the lungs. The U.S. EPA established standards for PM<sub>2.5</sub> in 1997 and in 2006 lowered the air quality standards for PM<sub>2.5</sub> to 35 µg/m<sup>3</sup> for a 24-hour average and reaffirmed 15 µg/m<sup>3</sup> for an annual average standard. There was considerable controversy and debate surrounding the review of particulate matter health effects and the consideration of ambient air quality standards (Kaiser 1997; Vedal 1997) when the U.S. EPA promulgated the initial PM<sub>2.5</sub> standards in 1997. In 2002, the California Air Resources Board adopted an air quality standard for PM<sub>2.5</sub> at a level of 12 µg/m<sup>3</sup>, in the form of an annual average.

Since that time, additional studies have been published and some of the key studies were closely scrutinized and the data reanalyzed by additional investigators. The reanalyses confirmed the original findings, and there are now additional data confirming and extending the range of the adverse health effects of PM<sub>2.5</sub> exposures. In 2012, the U.S. EPA revised the PM<sub>2.5</sub> annual average standard to 12.0 µg/m<sup>3</sup> (U.S. EPA 2013c). This federal standard is set at same level as the current California PM<sub>2.5</sub> annual standard, although the California standard does not have a specified attainment date. In 2014, the U.S. EPA announced it is preparing an ISA as part of the review of the federal PM standards (the process is described briefly in the draft AQMP Chapter 8). The draft AQMP Chapter 2 and Appendix II provide additional information about how PM levels in the South Coast Air Basin compare to the federal and state standards.

There have been several reviews of the health effects of ambient particulate matter (American Thoracic Society 1996a; Brunekreef et al. 2002; U.S. EPA 2004; U.S. EPA 2009; Brook et al. 2010). In addition, the California Air Resources Board (CARB) and the Office of Environmental Health and Hazard Assessment (OEHHA) have reviewed the adequacy of the California Air Quality Standards for Particulate Matter (California Air Resources Board and Office of Environmental Health Hazard Assessment 2002).

The major types of health effects associated with particulate matter include:

- Increased mortality
- Exacerbation of respiratory disease and of cardiovascular disease as evidenced by increases in:
  - Respiratory symptoms, exacerbation of asthma
  - Cardiovascular symptoms, non-fatal myocardial infarction
  - Hospital admissions and emergency room visits

- Physician office visits
- School absences
- Adverse birth outcomes
- Effects on lung function
- Changes in lung morphology

In the 2009 Integrated Science Assessment for Particulate Matter, the U.S. EPA presented conclusions on the particulate matter causal determination of several health effects based on an updated review of scientific studies (U.S. EPA 2009). The conclusions are presented separately for particulates in the size range of 2.5 to 10 micrometers ( $\mu\text{m}$ ) in aerodynamic diameter (PM<sub>10-2.5</sub>, often referred to as the coarse fraction) and those  $\leq 2.5 \mu\text{m}$  (PM<sub>2.5</sub>, or fine particles). Of note, there is currently no federal or California standard for PM<sub>10-2.5</sub>, although a PM<sub>10</sub> standard remains in effect. These conclusions are depicted in the following tables.

**TABLE I-4**Summary of U.S. EPA's Causal Determinations for Health Effects of PM<sub>10-2.5</sub>

<b>SHORT-TERM EXPOSURES</b>	
<b>Health Outcome</b>	<b>Causality Determination</b>
Cardiovascular effects	Suggestive of a causal relationship
Respiratory effects	Suggestive of a causal relationship
Mortality	Suggestive of a causal relationship
<b>LONG-TERM EXPOSURES</b>	
<b>Health Outcome</b>	<b>Causality Determination</b>
Cardiovascular effects	Inadequate to infer a causal relationship
Respiratory effects	Inadequate to infer a causal relationship
Mortality	Inadequate to infer a causal relationship
Reproductive and developmental	Inadequate to infer a causal relationship

(From (U.S. EPA 2009) Table 2-3 and Section 2.3.4)

There are also differences in the composition and sources of particles in the different size ranges that may have implications for health effects. The particles in the coarse fraction (PM<sub>10-2.5</sub>) are mostly produced by mechanical processes. These include automobile tire wear, industrial processes such as cutting and grinding, and resuspension of particles from the ground or road surfaces by wind and human activities, such as agricultural, mining, and construction operations, which may be particularly important in rural areas.

**TABLE I-5**Summary of U.S. EPA's Causal Determinations for Health Effects of PM<sub>2.5</sub>

<b>SHORT-TERM EXPOSURES</b>	
<b>Health Outcome</b>	<b>Causality Determination</b>
Cardiovascular effects	Causal relationship
Respiratory effects	Likely to be a causal relationship
Central nervous system	Inadequate to infer a causal relationship
Mortality	Causal relationship
<b>LONG-TERM EXPOSURES</b>	
<b>Health Outcome</b>	<b>Causality Determination</b>
Cardiovascular effects	Causal relationship
Respiratory effects	Likely to be a causal relationship
Mortality	Causal relationship
Reproductive and developmental	Suggestive of a causal relationship
Cancer, Mutagenicity, Genotoxicity	Suggestive of a causal relationship

(From (U.S. EPA 2009) Tables 2-1 and 2-2)

In contrast, particles smaller than 2.5  $\mu\text{m}$  are mostly derived from combustion sources, such as automobiles, trucks, and other vehicle exhaust, as well as from stationary combustion sources. The particles are either directly emitted or are formed in the atmosphere from gases that are emitted. Components from material in the earth's crust, such as dust, are also present, with the amount varying in different locations.

Attention to another range of very small particles has been increasing over the last several years. These are generally referred to as "ultrafine" particles, with diameters of 0.1  $\mu\text{m}$  or less. Ultrafine particles are mainly composed of particles from fresh emissions of combustion sources, but are also formed in the atmosphere by condensation of vapors that are emitted or by chemical or photochemical reactions with other contaminants in the air.

Ultrafine particles have relatively short half-lives (minutes to hours) and the particle size rapidly grows through condensation and coagulation processes into particles within the PM<sub>2.5</sub> size range. Ultrafine particles are garnering interest since a limited number of epidemiological and some laboratory studies, though not all, indicate that their toxicity may be higher on a mass basis than larger particles. There is also evidence that these small particles, or toxic components carried on their surface, can translocate from the lung to the blood and to other organs of the body, or through the olfactory bulb into the brain (U.S. EPA 2009). Currently, there are no federal or California

standards for ultrafine particles. As such, the health effects of ultrafine particles is discussed in a separate section following the discussion of PM10 and PM2.5.

The current federal and California standards for particulate matter are listed in Table I-6.

**TABLE I-6**

Ambient Air Quality Standards for Particulate Matter

STANDARD	FEDERAL	CALIFORNIA
PM10 24-Hour average	150 $\mu\text{g}/\text{m}^3$	50 $\mu\text{g}/\text{m}^3$
PM10 Annual Average	--	20 $\mu\text{g}/\text{m}^3$
PM2.5 24-Hour Average	35 $\mu\text{g}/\text{m}^3$	--
PM2.5 Annual Average	12 $\mu\text{g}/\text{m}^3$	12 $\mu\text{g}/\text{m}^3$

## Short-Term Exposure Effects of PM

Epidemiological studies have provided evidence for most of the effects listed above. In an extensive report focusing on the history of particulate matter research, the U.S. EPA reviewed several well-conducted studies that reported an association between mortality and increased daily or several-day-average concentrations of PM10 (U.S. EPA 2004). In addition, excess mortality and morbidity are reported in many studies involving communities across the U.S. as well as in Europe, Asia, and South America (U.S. EPA 2009; Lu et al. 2015; Shah et al. 2015; Cai et al. 2016), although there are some studies that show no effect for the specific exposures and outcomes evaluated (Milojevic et al. 2014; Wang et al. 2015; Zu et al. 2016). While there were some studies conducted in California, the importance of assessing results from studies from many different locations around the world should not be understated. The repeatability and consistency of results across many locations strengthens the weight of evidence in the determination of causality.

A review and analysis of epidemiological literature for acute adverse effects of particulate matter was published by the American Thoracic Society in 1996, where several adverse effects were listed as associated with daily PM10 exposures (Table I-7). The review also reported that individuals who are elderly or have preexisting lung or heart disease are more susceptible than others to the adverse effects of PM10 (American Thoracic Society 1996a).

**TABLE I-7**

## Combined Effect Estimates of Daily Mean Particulate Pollution (PM10)

	<b>% CHANGE IN HEALTH INDICATOR PER EACH 10 µg/m<sup>3</sup> INCREASE IN PM10</b>
Increase in Daily Mortality	
Total deaths	1.0
Respiratory deaths	3.4
Cardiovascular deaths	1.4
Increase in Hospital Usage (all respiratory diagnoses)	
Admissions	1.4
Emergency department visits	0.9
Exacerbation of Asthma	
Asthmatic attacks	3.0
Bronchodilator use	12.2
Emergency department visits*	3.4
Hospital admissions	1.9
Increase in Respiratory Symptom Reports	
Lower respiratory	3.0
Upper respiratory	0.7
Cough	2.5
Decrease in Lung Function	
Forced expiratory volume	0.15
Peak expiratory flow	0.08

\* One study only

(From: (American Thoracic Society 1996a))

Since then, many more recent studies have provided additional evidence that excess mortality and morbidity are associated with short-term exposure to PM10 and PM2.5 (Pope et al. 2006).

Estimates of mortality effects from studies of PM10 exposures range from 0.3 to 1.7 percent increase for a 10 µg/m<sup>3</sup> increase in PM10 levels. The National Morbidity, Mortality, and Air Pollution Study (NMMAPS), a study of 20 of the largest U.S. cities, determined a combined risk estimate of about a 0.5 percent increase in total mortality for a 10 µg/m<sup>3</sup> increase in PM10 (Samet et al. 2000a). This

study also analyzed the effects of gaseous co-pollutants. When the gaseous pollutants were included in the analyses, the estimated associations between PM<sub>10</sub> and mortality remained, though they were somewhat reduced. These results suggest that the effects reported in the study are likely due to the particulate exposures; they cannot readily be explained by coexisting weather stresses or other pollutants.

An expansion of the NMMAPS study to 90 U.S. cities also reported association with PM<sub>10</sub> levels and mortality (Samet et al. 2000b; Health Effects Institute 2003). After the study was published, it was discovered that some of the study analyses had been performed with incorrect default values. The strong positive association between acute PM<sub>10</sub> exposure and mortality remained, both upon reanalysis using revised software and using alternative modeling approaches (Dominici et al. 2002; Health Effects Institute 2003).

Studies of short-term exposures to PM<sub>2.5</sub> have also found associations with increases in mortality. The NMMAPS study conducted a national analysis of PM<sub>2.5</sub> mortality association for 1999-2000. The risk estimates were 0.29 percent for all-cause mortality and 0.38 percent for cardio-respiratory mortality (Dominici et al. 2007). In its 2009 review, U.S. EPA determined that estimates for PM<sub>2.5</sub> generally are in the range of 0.29 to 1.21 percent increase in total deaths per 10 µg/m<sup>3</sup> increase in 24-hour PM<sub>2.5</sub> levels. The estimates for cardiovascular related mortality range from 0.03 to 1.03 percent per 10 µg/m<sup>3</sup>, and for respiratory mortality estimates range from 1.01 to 2.2 percent per 10 µg/m<sup>3</sup> 24-hour PM<sub>2.5</sub> (U.S. EPA 2009). Figure I-4 shows a summary of U.S. and Canadian studies of mortality and short-term PM<sub>2.5</sub> exposures, which shows that the most consistent positive associations were seen with cardiovascular and all-cause deaths. Positive associations for respiratory deaths were also seen in several of these studies, although the precision of the estimates for respiratory deaths was lower relative to that of all-cause or cardiovascular deaths.

Several studies have attempted to assess the relative importance of particles smaller than 2.5 µm and those between 2.5 µm and 10 µm (PM<sub>10-2.5</sub>). While some studies report that PM<sub>2.5</sub> levels are better predictors of mortality effects, others suggest that PM<sub>10-2.5</sub> is also important. Most of the studies found higher mortality associated with PM<sub>2.5</sub> levels than with PM<sub>10-2.5</sub>. For example, a study of six cities in the U.S. found that particulate matter less than 2.5 µm was associated with increased mortality, but that the larger particles were not. In the U.S. EPA review (U.S. EPA 2009), several studies were presented that found associations of PM<sub>10-2.5</sub> and mortality. Some of the studies showed differences by region of the U.S. In one study of 47 U.S. cities that had both PM<sub>2.5</sub> and PM<sub>10</sub> data available to calculate PM<sub>10-2.5</sub> as a difference, overall, the study found a significant association between the computed PM<sub>10-2.5</sub> and all-cause, cardiovascular, and respiratory mortality. The study also reported differences by season and climate area (Zanobetti et al. 2009).

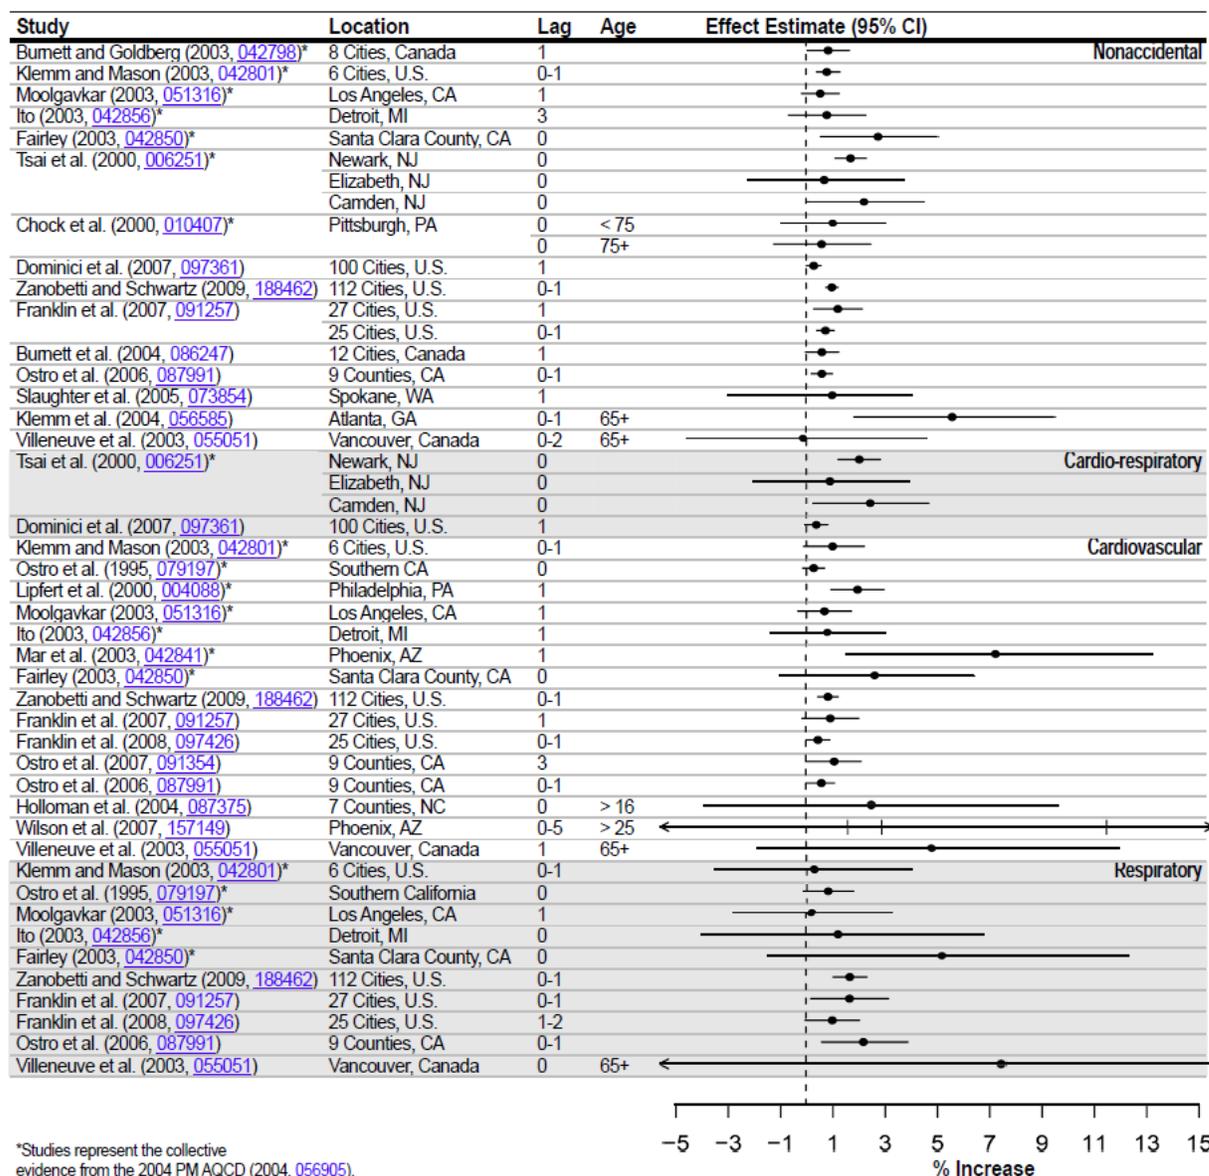

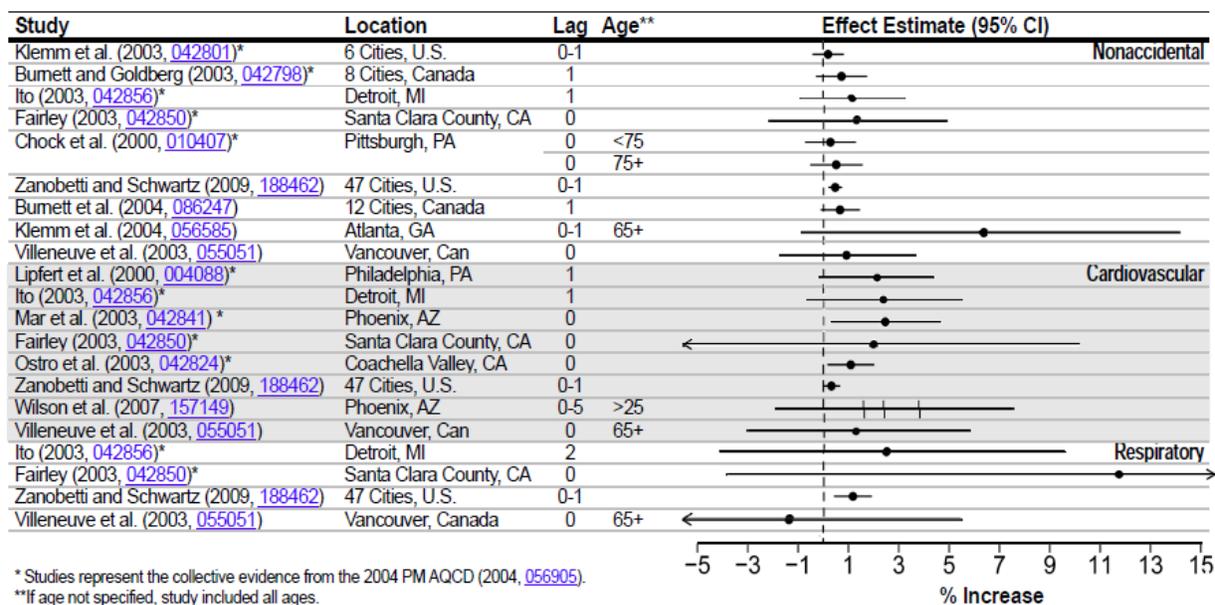

FIGURE I-4

Summary of Non-accidental All-Cause and Cause-Specific Mortality per 10 µg/m<sup>3</sup> Increase in PM<sub>2.5</sub> Short-term Exposures, for U.S.- and Canadian-based studies (from (U.S. EPA 2009), Figure 6-27). “Lag” indicates the number of days between the exposure and the outcome assessed.

A major knowledge gap in understanding the relative importance of “fine” PM (PM<sub>2.5</sub>) and “coarse” PM (PM<sub>10-2.5</sub>) is the relative lack of direct measurements of PM<sub>10-2.5</sub>. Most estimates are made by subtracting PM<sub>2.5</sub> from PM<sub>10</sub> measured at co-located samplers, a process that is subject to errors that are inherent in the subtracting of one relatively large number from another. More research is needed to better assess the relative effects of coarse (PM<sub>10-2.5</sub>) fractions of particulate matter on mortality. A graph from the U.S. EPA review is included in the figure below to demonstrate ranges

of mortality findings associated with coarse particulates. Consistent positive associations are seen, particularly for cardiovascular and nonaccidental all-cause mortality, with varying degrees of precision across the different studies.

**FIGURE I-5**

Summary of Percent Increase in Total (Nonaccidental) and Cause-Specific Mortality Per 10  $\mu\text{g}/\text{m}^3$  Increase in PM<sub>10-2.5</sub> Short-term Exposure (from (U.S. EPA 2009), Figure 6-30). “Lag” indicates the number of days between the exposure and the outcome assessed.

A number of studies have evaluated the association between particulate matter exposure and indices of morbidity such as hospital admissions, emergency room visits or physician office visits for respiratory and cardiovascular diseases. The effect estimates for these various morbidities are generally higher than the estimates for mortality. Observed effects have been associated with PM<sub>10</sub>, PM<sub>2.5</sub> and PM<sub>10-2.5</sub>.

In the NMMAPS study, hospital admissions for those 65 years or older were assessed in 14 U.S. cities. Several models were compared to estimate associations of hospital admissions for specific disease categories and short-term PM<sub>10</sub> levels. Hospital admissions showed an increase ranging from 0.68 – 1.47 percent for cardiovascular diseases, a range of 1.46 – 2.88 percent increase for COPD, and a range of 1.31 – 2.86 percent increase for pneumonia per 10  $\mu\text{g}/\text{m}^3$  increase in PM<sub>10</sub> (Samet et al. 2000b). In the reanalysis of the study (Health Effects Institute 2003), it was found that when using different models, the pollution coefficients were generally lower. However, the authors note that most of the conclusions of associations with PM<sub>10</sub> exposures and hospital admissions held. Two recent Southern California studies evaluated associations between short-term PM<sub>2.5</sub> levels and asthma-related hospital or emergency admissions. One study, based in Orange County, reported

increased risk of asthma-related hospital encounters with increased ozone and PM<sub>2.5</sub> in the warm seasons, and with CO, NO<sub>x</sub>, and PM<sub>2.5</sub> in the cool seasons (Delfino et al. 2014). The second study, conducted in Los Angeles County, reported monthly average PM<sub>2.5</sub>, CO, and NO<sub>2</sub> levels were positively associated with asthma hospitalization rates (Delamater et al. 2012).

Similarly, school absences, lost workdays, and restricted activity days have also been used in some studies as indirect indicators of acute respiratory conditions (Ostro 1987; Ostro 1990; Ransom et al. 1992; Gilliland et al. 2001; Park et al. 2002; Hales et al. 2016). These observations help support the hypotheses that particulate matter exposures increase inflammation in the respiratory tissues and may also increase susceptibility to infection (U.S. EPA 2009).

Some studies have reported that short-term particulate matter exposure is associated with changes in lung function (lung capacity and breathing volume); upper respiratory symptoms (hoarseness and sore throat); and lower respiratory symptoms (increased sputum, chest pain and wheeze). The severity of these effects is widely varied and is dependent on the population studied, such as adults or children with and without asthma. Sensitive individuals, such as those with asthma or pre-existing respiratory disease, may have increased or aggravated symptoms associated with short-term particulate matter exposures. Several studies have followed the number of medical visits associated with pollutant exposures. A range of increases from 1 to 4 percent for medical visits for respiratory illnesses was found corresponding to a 10 µg/m<sup>3</sup> change in PM<sub>10</sub>. A number of studies also looked at levels of PM<sub>2.5</sub> or PM<sub>10-2.5</sub>. The findings suggest that both the fine and coarse fractions may have associations with some respiratory symptoms (U.S. EPA 2009). Among the newer health endpoints evaluated in recent studies of short-term effects of PM<sub>2.5</sub> is stroke. One recent meta-analysis evaluated 16 studies of short-term PM<sub>2.5</sub> exposures and estimated a 5 percent increased risk of stroke for each 10 µg/m<sup>3</sup> increase in PM<sub>2.5</sub> (Shin et al. 2014).

The biological mechanisms by which particulate matter can produce health effects have been investigated in laboratory studies. Brook et al. (Brook et al. 2010) summarized three likely pathways by which PM exerts its effects on cardiovascular health outcomes: (1) PM can activate inflammatory pathways and cause systemic oxidative stress, leading to the production of pro-inflammatory cytokines; (2) PM can disrupt the autonomic nervous system leading to increased blood pressure, increased arrhythmic potential, and decreased heart rate variability; and (3) PM, particularly UFPs or particle constituents such as organic compounds and metals, can enter the bloodstream and cause increased constriction of the blood vessels and increased blood pressure. Each of these pathways may also lead to the formation of reactive oxygenated species (ROS, or free radicals) that can cause DNA oxidation and systemic inflammation. Inflammatory responses in the respiratory system in humans and animals can lead to inflammation in fat tissues and in the liver, which can lead to vascular dysfunction (e.g. atherosclerosis), changes in metabolic function (e.g. insulin resistance), and increased thrombotic potential (Brook et al. 2010). Several reviews discuss mechanistic studies in detail (Brunekreef et al. 2002; Brook et al. 2004; Brook et al. 2010). A study in cells using ambient air samples in communities near railyards in the South Coast Air Basin found that the PM<sub>2.5</sub> phase of ambient air pollution contains prooxidant components, primarily metals, which can trigger an

inflammatory response in the cells (Eiguren-Fernandez et al. 2015; Cho 2016). The same study noted that vapor phase pollutants, which contain most of the electrophiles, may trigger a different biological response in the cells, suppressing inflammatory responses and could result in a reduced ability to fight off infections.

Some studies have examined the health effects of short-term exposures to specific PM constituents and sources (Lippmann 2014; Basagana et al. 2015; Atkinson et al. 2016). While there is some evidence suggesting possible links with specific constituents or sources, such as diesel exhaust, sulfates (related to coal combustion), and certain metals, the U.S. EPA determined that there were not enough studies evaluating short-term constituent- or source-specific exposures at the time of the previous Integrated Science Assessment to be able to make a causal determination (U.S. EPA 2009).

## Long-Term Exposure Effects of PM

Numerous studies have evaluated the health effects of long-term (months to years) or chronic exposure to particulate matter, with the largest number of studies examining cardiovascular and respiratory health endpoints, as well as mortality. Other health outcomes that have been linked to long-term PM exposures include reproductive effects, cancer outcomes, and, more recently, metabolic syndromes and neurological effects. The U.S. EPA 2009 Integrated Science Assessment for Particulate Matter (ISA for PM) concluded that sufficient evidence is available to support a causal determination for long-term PM<sub>2.5</sub> exposures and cardiovascular and mortality effects, and a likely causal relationship for respiratory effects. A summary of the evidence is presented below, focusing on the long-term effects of PM<sub>2.5</sub> exposures.

Many research studies, including some recent studies, have evaluated the health effects of exposures to air pollutants from traffic emissions using a variety of exposure modeling techniques (Hart et al. 2014; Harris et al. 2015; Kingsley et al. 2015; Rice et al. 2015; Danysh et al. 2016). In general, these articles are not discussed in detail here, because of the difficulty in attributing the observed effects to a specific pollutant or combination of pollutants. However, these studies do provide supporting evidence that air pollutants from traffic exhaust are linked to health effects in humans.

### Long-Term Particulate Matter Exposures and Mortality

Since the initial promulgation by U.S. EPA of the National Ambient Air Quality Standards for PM<sub>2.5</sub>, controversy has remained over the association of mortality and exposures to PM<sub>2.5</sub>. Several large, prospective cohort studies conducted in the U.S. and Canada were used to evaluate long-term PM exposures and mortality, including total number of deaths and deaths due to specific causes. The strongest and most consistent evidence of long-term PM<sub>2.5</sub> effects are for cardiovascular mortality, particularly ischemic heart disease, and there is evidence that ambient PM<sub>2.5</sub> exposure is associated with and lung cancer mortality (Dominici et al. 2006; Krewski et al. 2009; Jerrett et al. 2013; International Agency for Research on Cancer 2015). Below is a brief discussion of the evidence linking

PM and mortality reviewed in the U.S. EPA 2009 ISA along with more recently published studies, with a focus on large prospective studies and studies conducted in California or Southern California.

In the assessment of evidence for mortality outcomes linked to long-term PM exposures, the 2009 U.S. EPA ISA for PM reviewed 15 studies evaluating PM<sub>2.5</sub> exposures, 2 studies evaluating PM<sub>10-2.5</sub> exposures, and 5 studies evaluating PM<sub>10</sub> exposure. The majority of these studies were conducted in the United States, and 3 of the studies of PM<sub>2.5</sub> exposures were conducted in California or Southern California. Previous reviews conducted in 1996 and 2004 by U.S. EPA assessed evidence primarily from large prospective cohort studies, such as the Harvard Six Cities Study (Dockery et al. 1993), the American Cancer Society (ACS) Study (Pope et al. 1995; Pope et al. 2002), and the Seventh-Day Adventist Health Air Pollution (AHSMOG) Study (Abbey et al. 1999; McDonnell et al. 2000). The U.S. EPA 2004 PM Air Quality Criteria Document concluded that there was strong evidence linking long-term PM<sub>2.5</sub> exposures to all-cause and cardiopulmonary mortality, but not enough evidence for a link with PM<sub>10-2.5</sub>. The 2009 U.S. EPA ISA for PM similarly concluded that the newer studies provide additional evidence to support a causal determination for long-term PM<sub>2.5</sub> exposures and increased mortality risk, but there continues to be insufficient evidence supporting such a link with particles in the coarse fraction. This most recent U.S. EPA review evaluated the additional updated analyses of the previously-established large cohort studies (Harvard Six Cities, ACS, AHSMOG, and Veterans studies), and noted two new major cohorts that provide further evidence linking PM<sub>2.5</sub> and mortality: the Women's Health Initiative (WHI) study (Miller et al. 2007) and the Medicare Cohort Studies (Eftim et al. 2008).

The American Cancer Society Cancer Prevention Study II (ACS) is a large, prospective national cohort study of over one million participants in the U.S. recruited from all 50 states, the District of Columbia and Puerto Rico, and followed over many years. Over the past two decades, studies using data from this cohort have reported associations for PM<sub>2.5</sub> for both total mortality and cardiorespiratory mortality (Pope et al. 1995; Krewski 2000; Pope et al. 2002; Jerrett et al. 2005; Krewski et al. 2009; Jerrett et al. 2013; Pope et al. 2015). The survey included several measures of smoking and exposure to second-hand smoke, which were included in the statistical models to account for the potential confounding effects of smoking. The original study reported that long-term exposures to fine particulate air pollution were associated with cardiopulmonary and lung cancer mortality (Pope et al. 1995). In a reanalysis of the data (Krewski 2000), mortality rates and PM<sub>2.5</sub> levels were analyzed for 50 metropolitan areas of the U.S. Average (median) levels from monitors in each metropolitan area were used to estimate PM<sub>2.5</sub> exposures. At these levels of aggregation, regional differences in the association of PM<sub>2.5</sub> and mortality were noted, with higher mortality risks in the Northeast and Midwest, and more moderate mortality risks in the West.

Another follow-up study of the American Cancer Society cohort confirmed and extended the findings in the initial study. The researchers estimated that, on average, a 10 µg/m<sup>3</sup> increase in fine particulates was associated with approximately a 4 percent increase in total mortality, a 6 percent increase in cardiopulmonary mortality, and an 8 percent increase in risk of lung cancer mortality (Pope et al. 2002). In an additional reanalysis and extension of the American Cancer Society cohort

from 1982 to 2000 (Krewski et al. 2009), and including additional metropolitan areas for the most recent years, effects estimates on mortality were similar, though somewhat higher than those reported previously. The extended analyses included an additional 11 years of cohort follow-up compared to the original study. The authors reported positive and significant association between a 10  $\mu\text{g}/\text{m}^3$  change in PM<sub>2.5</sub> level and all-cause, cardiopulmonary disease, and ischemic heart disease deaths. Mortality from ischemic heart disease was associated with the largest risk estimates.

Subsets of the ACS study data have also been evaluated to estimate effects in California and the metropolitan Los Angeles area (Jerrett et al. 2005; Jerrett et al. 2013). These results are discussed further below, along with results of other California or Southern California-based studies.

The Harvard Six Cities Study is a large prospective cohort study of adults in six U.S. cities, and began in the year 1974. The original analysis and a subsequent reanalysis found positive associations between particulate matter and sulfate in relation to mortality, after controlling for potential confounding factors such as smoking status, sex, age, and other factors (Dockery et al. 1993)(Krewski 2000). An extension of the Harvard Six Cities Cohort confirmed the association of mortality with PM<sub>2.5</sub> levels, and reported that improvements in PM<sub>2.5</sub> levels over the study time period were associated with decreased mortality risk (Laden et al. 2006). An update to this study covering the years 1974 to 2009 found a linear relationship of PM<sub>2.5</sub> levels and mortality from all causes, cardiovascular causes, and from lung cancer (Lepeule et al. 2012). According to the authors, the PM<sub>2.5</sub> levels decreased over time, but no evidence of a threshold for these effects was found.

AHSMOG is a cohort study of non-Hispanic white Seventh-day Adventists in California, with participants followed starting from the late 1970's. Confounding due to smoking in this study is unlikely due to very low smoking rates in this population; however, the study is limited in its ability to apply the findings to other population groups. The study has linked long-term PM<sub>10</sub> exposures and other air pollutants to deaths from all natural causes and deaths due to lung cancer among males (Abbey et al. 1999), although the authors concluded that these associations were likely due to exposures to fine particles rather than the coarse fraction of PM<sub>10</sub> (McDonnell et al. 2000). In a re-analysis of the data, the study found PM<sub>2.5</sub> was associated with an increased risk of coronary heart disease mortality among females but not among males (Chen et al. 2005). Similar associations among females only were found for coarse particles and PM<sub>10</sub>.

Other cohort studies include an analysis of mortality and PM<sub>2.5</sub> exposures in a Medicare enrollee population. Zeger et al. (Zeger et al. 2008) assembled a Medicare enrollee cohort by including all Medicare enrollees residing in over 4,500 zip codes with centroids within six miles of a PM<sub>2.5</sub> monitor. PM<sub>2.5</sub> data was obtained from the monitoring stations, and mean annual levels were calculated for the zip codes within six miles of each monitor. The authors found that long-term exposures to PM<sub>2.5</sub> was associated with all-cause mortality for the eastern and central portions of the U.S., and these mortality risk estimates were similar to those previously published in the Six Cities Study and the American Cancer Society cohorts. The authors reported that there were no statistically significant associations between zip code levels of PM<sub>2.5</sub> and all-cause mortality rates in the western

region of the U.S. This finding was attributed largely to the higher PM<sub>2.5</sub> levels in Los Angeles area counties compared to other western urban areas, but there were not higher mortality rates in the Los Angeles area counties. Several factors could explain this finding. The authors note that the toxicity of the PM mixture may differ by location, e.g. with higher PM<sub>2.5</sub> sulfate levels in the eastern region. In addition, the use of ecological data rather than individual-level data for exposure assessment and some confounding factors, and the assessment of all-cause mortality rather than cause-specific mortality may have impacted the results of this study. For example, the authors used county-level COPD risk as an estimate of smoking prevalence, because individual-level measures of smoking were not available. The authors further reported that they found no associations of PM<sub>2.5</sub> with all-cause mortality in persons aged 85 years or higher, which may reflect other competing causes of death in this age group not related to air pollution exposures.

The Women's Health Initiative (WHI) Study is a nationwide cohort of post-menopausal women in 36 metropolitan areas of the U.S. who had no history of cardiovascular disease (Miller et al. 2007). The study found that long-term exposure to PM<sub>2.5</sub> was associated with a 24 percent increased risk of cardiovascular disease and a 76 percent increased risk of death from cardiovascular causes for each additional 10 µg/m<sup>3</sup> of PM<sub>2.5</sub>; these relative risk estimates are larger than those reported in the ACS and Six Cities Studies, but differences in health status, PM composition, and overall mortality risk in these distinct populations may account for such differences in the effect estimates. The WHI study results accounted for the potential confounding effects of several factors, including medical risk factors for cardiovascular disease, measures of socioeconomic status, and cigarette smoking. Another large cohort study focusing on women is the Nurses' Health Study, which found that PM<sub>10</sub> exposures were associated with all-cause mortality and fatal coronary heart disease, with exposures 24 months prior to death having the strongest effects (Puett et al. 2008). These results accounted for several potential confounders, including smoking status and history, medical risk factors for cardiovascular disease, and area-level measures of socioeconomic status. This study did not evaluate PM<sub>2.5</sub> exposures.

A recent pooled analysis of 22 European cohorts and including over 350,000 participants evaluated long-term air pollution exposures and exposure to PM<sub>2.5</sub>, PM<sub>10</sub>, and nitrogen oxides, using land use regression models to estimate exposures (Beelen et al. 2014). The authors reported that a 5 µg/m<sup>3</sup> increase in PM<sub>2.5</sub> was associated with approximately a 7 percent increase in mortality from natural causes.

Estimates of mortality risks associated with long-term PM<sub>2.5</sub> levels from recent studies are shown in the figure below. The recent evidence is consistent with past studies, showing increased risk of premature death with increased PM<sub>2.5</sub> exposures. For cause-specific mortality, consistent positive associations are seen with cardiovascular mortality endpoints and with lung cancer deaths, but weak associations are seen with overall respiratory mortality.

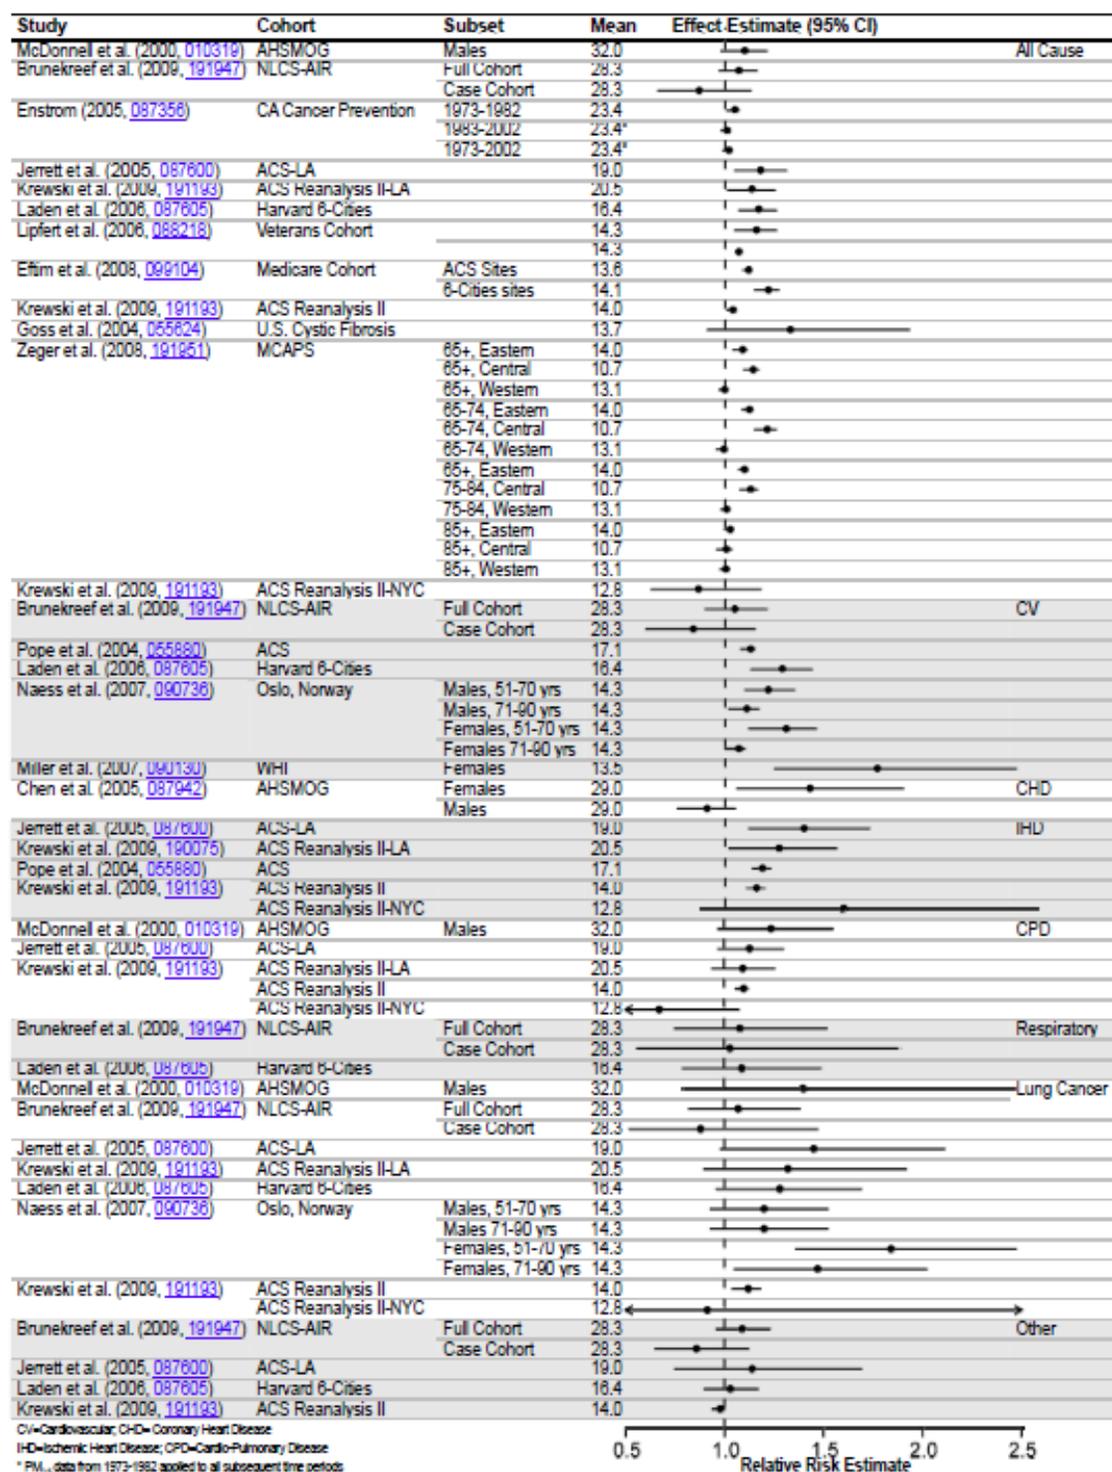

FIGURE I-6

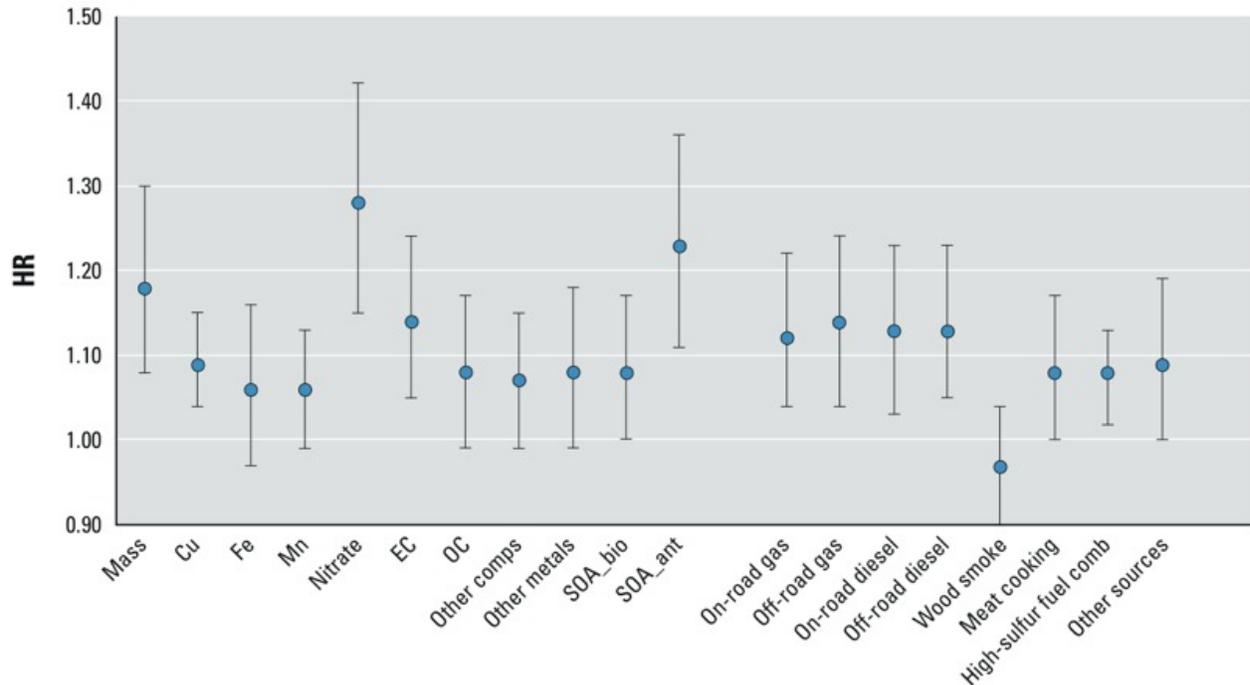

Mortality Risk Estimates, Long-Term Exposure to PM<sub>2.5</sub> in Cohort Studies (From (U.S. EPA 2009), Figure 7-7). “Mean”=mean PM<sub>2.5</sub> exposure estimates in the study. CV=cardiovascular, CHD=coronary heart disease, IHD=ischemic heart disease, CPD=cardiopulmonary disease.

In addition to the AHSMOG study, other analyses of mortality and PM<sub>2.5</sub> levels specific to California have also been reported, including an analysis of a subset of the ACS II data. An analysis of the ACS II study (Jerrett et al. 2013) followed individuals in California from that cohort recruited starting in 1982, with follow-up to 2000. PM<sub>2.5</sub> levels at subject residences were estimated using land use regression models. Over 40 potential confounders were included in the statistical models, and included individual-level variables (e.g. smoking, diet, demographic, and other factors) and neighborhood-level variables (e.g. unemployment, poverty, income inequality, racial composition). The authors noted that mortality rates differ in urban areas compared to non-urban areas, and adjusted for urban/rural status in the model to estimate pollution effects on mortality. All-cause mortality, mortality from cardiovascular disease, and mortality from ischemic heart disease were positively associated with PM<sub>2.5</sub> levels in single-pollutant models. These associations with PM<sub>2.5</sub> remained after additional adjustment for ozone levels. Because of moderate correlations across pollutants, it may not be possible to draw conclusions about which pollutant(s) in this mixture cause the observed effects. Positive associations of all-cause and certain cause-specific mortality rates with estimated NO<sub>2</sub> and ozone levels were also found. The authors concluded that these results indicate that several components of combustion-related pollutant mixture are associated with mortality.

A study analyzed data from the California Teachers Study cohort of over 100,000 active and retired school teachers recruited in 1995, and followed through 2005 (Lipsett et al. 2011). Pollutant exposures at the subject residences were estimated using data from ambient monitors, and extrapolated using a distance-weighted method. The authors reported that a 10 µg/m<sup>3</sup> increase in PM<sub>2.5</sub> was associated with a 20 percent risk increase in mortality from ischemic heart disease, but no associations were found with all-cause, cardiovascular, or lung cancer mortality. A 10 µg/m<sup>3</sup> increase in PM<sub>10</sub> was associated with increased risk of ischemic heart disease and incident stroke. These results accounted for several individual- and neighborhood-level factors, including smoking, second-hand smoke, medical risk factors for cardiovascular disease, and indicators of socioeconomic status.

A more recent analysis of the California Teachers Study cohort from 2001 through 2007 estimated the association between particulate pollutants and all-cause, cardiovascular, ischemic heart disease, and respiratory mortality (Ostro et al. 2015). Exposure data at the residential level were estimated by a chemical transport model that computed pollutant concentrations from over 900 sources in California. Besides particle mass, monthly concentrations of 11 species and 8 sources or primary particles were generated at 4-km grids. The results were reported as finding statistically significant associations of ischemic heart disease mortality with PM<sub>2.5</sub> mass and several of its components (Figure I-7). The study also found significant positive associations between ischemic heart disease mortality and ultrafine particle mass as well as several ultrafine particulate components including elemental carbon, organic carbon, copper, metals, meat cooking, and mobile source derived components. An earlier study using data from the same cohort had used monitoring data to estimate mortality risk, and similarly reported increased risk of all-cause, cardiopulmonary, and ischemic heart disease mortality with higher exposures to PM<sub>2.5</sub> mass. This study also reported increased ischemic heart disease risk with higher exposures to PM<sub>2.5</sub> constituents such as organic carbon, sulfates, and

nitrate (Ostro et al. 2010). Both studies adjusted for several individual- and neighborhood-level covariates, including smoking status and indicators of socioeconomic status.

**FIGURE I-7**

Association of PM<sub>2.5</sub> constituents and sources with Ischemic Heart Disease mortality (Hazard Ratios and 95 percent Confidence Intervals) using interquartile range. Abbreviations: comb = combustion; comps = components; SOA\_bio= secondary organic aerosols from biogenic sources (derived from long-chain alkanes, xylenes, toluenes, and benzene and their oligomers); SOA\_ant=secondary organic aerosols from biogenic sources (derived from isoprenes, monoterpenes, and sesquiterpenes and their oligomers). (From (Ostro et al. 2015))

A cohort of elderly individuals (average age of 65 years in 1973) recruited from 11 California counties was followed over several years (Enstrom 2005). A positive association for long-term PM<sub>2.5</sub> exposure with all-cause deaths was reported from 1973–1982. However, no significant association was found in the later time period of 1983–2002. PM<sub>2.5</sub> levels were obtained from measurements made during 1979–1983 by the EPA as part of the Inhalable Particle Monitoring Network and the cohort was confined to those participants in the American Cancer Society Cancer Prevention Study I who were living in the 11 counties that had one of the monitors. Pollutant levels were estimated using data from these monitors and averaged over each county, which may lead to exposure misclassification and bias toward finding no effect. The study adjusted for several potential confounding factors, including demographic factors, smoking, body mass index, and other factors.

The California Air Resources Board recently conducted a cross-sectional study of long-term PM<sub>2.5</sub> exposures in rural and urban areas within California, using ambient monitoring data from 116

stations in the monitoring network, and calculating zip code-level exposure estimates (Garcia et al. 2016). The study observed larger effect sizes for increased PM<sub>2.5</sub>-related mortality risk in rural compared to urban areas from all causes, cardiovascular disease and cardiopulmonary disease. In urban areas, the study found PM<sub>2.5</sub> exposures to be associated with increased risk of cardiovascular disease, ischemic heart disease, and cardiopulmonary disease; however, for all-cause non-accidental mortality risk, only an exposure model restricted to people living within 10 km of a monitoring station in urban areas showed an association with PM<sub>2.5</sub>. This study did not control for the potential confounding effects of smoking.

A recent study analyzed data from the National Institutes of Health AARP Diet and Health cohort, including about 160,000 participants in California (Thurston et al. 2016). Census tract-level PM<sub>2.5</sub> exposures were estimated based on land use regression models. For the California cohort, PM<sub>2.5</sub> levels were associated with an approximately 10 percent increase in cardiovascular disease mortality risk for each additional 10 µg/m<sup>3</sup> of PM<sub>2.5</sub>. A small but positive effect estimate was found for all-cause mortality in California, and no association was found for respiratory mortality in the California cohort, although the estimates indicated uncertainty in the magnitude and direction of these effects. This study adjusted for several potential confounders, including demographic factors, smoking, and indicators of socioeconomic status.

A few studies have focused on particulate matter exposure and health effects in residents of Southern California. Two analyses of the American Cancer Society II cohort, for example, focused specifically on the Los Angeles Metropolitan area using methods to estimate exposures on a finer geographical scale than previous studies that used geographic scales at the county or metropolitan area. Improved exposure estimation methods reduce potential bias from exposure misclassification. Using data from monitoring stations in the Los Angeles area, one study applied interpolation methods (Jerrett et al. 2005) and another applied land use regression techniques (Krewski et al. 2009) to estimate PM<sub>2.5</sub> exposures to the study participants. Significant associations of PM<sub>2.5</sub> with mortality from all causes and cardiopulmonary disease were reported, with the magnitude of risks being higher than those from the national studies of the American Cancer Society II cohort. Such improved exposure estimation techniques can reduce misclassification bias in epidemiological studies. It should be noted that various analyses were presented in these as well as other studies to estimate the influence of various individual-level and ecologic variables that might also be related to health effects risks. Including such variables helps control for potential confounding, but generally reduces the estimated association between PM<sub>2.5</sub> and all-cause mortality. It may be illustrative to describe some of the estimates from the various calculations as presented by the authors of the Los Angeles area cohort (Krewski et al. 2009). In the descriptions in Table I-9, HR refers to the “hazard ratio” expressed for a 10 µg/m<sup>3</sup> change in PM<sub>2.5</sub> exposure, followed by the 95 percent Confidence Interval. For example, if the hazard ratio is 2, the risk would be twice as high; and, conversely if the hazard ratio is 0.5, the risk would be one-half of that of the reference group. Several of the analyses results follow as excerpted from Krewski, 2009. Table I-8 includes PM<sub>2.5</sub>, plus various additional individual and ecological variables. Similar effects of covariate adjustment were seen for hazard ratios for

mortality from ischemic heart disease, although effect estimates were stronger for ischemic heart disease mortality compared to those for all-cause mortality.

**TABLE I-8**

## Influence of Adding Confounding Variables on All-Cause Mortality

VARIABLE INCLUDED	HAZARD RATIO per 10 µg/m <sup>3</sup> change in PM2.5 exposure
PM2.5 alone (stratified for age, sex, and race)	1.197 (95% CI, 1.082–1.325);
PM2.5 with 44 individual-level covariates*	1.143 (95% CI, 1.033–1.266)
PM2.5 with 44 individual-level covariates and the ecologic covariate of unemployment	1.127 (95% CI, 1.015–1.252)
PM2.5 with 44 individual-level covariates and social factors extracted from the principal component analysis (which account for 81% of the total variance in the social variables)	1.142 (95% CI, 1.026–1.272).
PM2.5 with 44 individual-level covariates and all ecologic covariates that were individually associated with mortality in bivariate models with PM2.5 exposure	1.115 (95% CI, 1.003–1.239)
PM2.5 parsimonious model that included 44 individual-level covariates and ecologic confounder variables that both reduced the pollution coefficient and had associations with mortality	1.126 (95% CI, 1.014–1.251)

\*These covariates included several measures of smoking.  
(From Krewski, 2009)

U.S. EPA also released a Regulatory Impact Analysis (U.S. EPA 2012) which looked at the costs and benefits of alternate PM2.5 standard levels. As part of the analysis, U.S. EPA looked at California-specific studies regarding PM2.5 and mortality published in the scientific literature. The U.S. EPA analysis concluded "most of the cohort studies conducted in California report central effect estimates similar to the (nation-wide) all-cause mortality risk estimate we applied from Krewski et al. (2009) and Laden et al. (2006) albeit with wider confidence intervals. A couple of cohort studies conducted in California indicate higher risks than the risk estimates we applied." Thus, in U.S. EPA's judgment, the California-related studies provided estimates of mortality consistent with or higher than those from the national studies.

At the time of the 2009 ISA, few studies had examined long-term exposures to chemical-specific PM constituents or compared source-specific PM effects on mortality (U.S. EPA 2009). The 2009 ISA discussed only two studies that used direct measurements of PM constituents other than sulfates: the Veteran's Cohort (Lipfert et al. 2006) and the Netherlands Cohort Study (Beelen et al. 2008). These studies found mortality associations with long-term exposures to traffic pollutants, nitrates and sulfates.

With measures adopted to control emissions of air pollutants, ambient levels of PM<sub>2.5</sub> have been decreasing. These reductions in particulate matter have been associated with reductions in mortality. For example, studies have found that increases in life expectancy are associated with reductions in air pollution levels, and that a portion of this increase can be attributed to reductions in PM<sub>2.5</sub> exposures (Correia et al. 2013; Pope et al. 2013).

### **Long-Term Particulate Matter Exposures and Cardiovascular Effects**

Studies of cardiovascular mortality provide the strongest evidence of an association between PM<sub>2.5</sub> exposures and cardiovascular effects. The U.S. EPA 2009 ISA review determined that the evidence is sufficient to infer a causal relationship between long-term PM<sub>2.5</sub> exposures and cardiovascular effects. In addition to the studies of mortality, other epidemiological studies provide additional evidence of sub-clinical and clinical cardiovascular effects, while toxicological studies suggest a plausible biological mechanism for such effects (Fanning et al. 2009; U.S. EPA 2009).

Epidemiological studies of subclinical effects typically have used subclinical measures of atherosclerosis, which is an underlying disease contributing to many clinical cardiovascular outcomes such as myocardial infarction, sudden cardiac death, stroke, and vascular aneurysms (U.S. EPA 2009). A study in Southern California residents used the carotid intima-media thickness (CIMT) as a measure of subclinical atherosclerosis (Kunzli et al. 2005). The subjects' residential areas were geocoded and a geospatial extrapolation of ambient monitoring data was used to assign annual mean concentrations of ambient PM<sub>2.5</sub>. The authors report results of an association between atherosclerosis and ambient air pollution as measured by PM<sub>2.5</sub>. The associations of PM<sub>2.5</sub> and CIMT were strongest in women  $\geq 60$  years of age. The Multi-Ethnic Study of Atherosclerosis (MESA) is a population-based study of people living in 6 U.S. cities or counties, including Los Angeles, CA (Diez Roux et al. 2008). The MESA study reported that 20-year average PM<sub>2.5</sub> exposures corresponded to a small increase in CIMT, although the magnitude of the increase was much smaller than the Kunzli 2005 study. The study accounted for the potential influence of sociodemographic factors, lipid status, smoking, diabetes, body mass index, and geographical location. Such differences may be attributable to differences in the study populations. Other sub-clinical outcome measures for atherosclerosis in the MESA study were weakly associated or not associated with PM exposures.

Clinical cardiovascular outcomes have also been examined in several epidemiological studies, including two that were based on prospective cohort studies: the Women's Health Initiative (WHI) Observational Study (Miller et al. 2007) and the Nurses' Health Study (Puett et al. 2008). Both these studies also examined cardiovascular mortality, and found links with long-term particulate matter

exposures. The WHI study included only women who were free of cardiovascular disease at enrollment, and estimated PM<sub>2.5</sub> exposures using a nearest monitor approach. The study found PM<sub>2.5</sub> exposures to be associated with cardiovascular disease outcomes, including myocardial infarction, revascularization, stroke, coronary heart disease death, and cerebrovascular disease, and accounted for the several potential confounding factors, such as sociodemographic factors, medical risk factors for cardiovascular disease, and cigarette smoking (Miller et al. 2007). An analysis of the Nurses' Health Study included women without a history of myocardial infarction and who lived in certain metropolitan areas in the northeastern U.S. (Puett et al. 2008). Long-term PM<sub>10</sub> exposures were estimated using land use regression models as well as air pollution monitoring data, and the results accounted for potential confounding by smoking status and history, medical risk factors for cardiovascular disease, and area-level measures of socioeconomic status. This study found positive associations with the risk of all-cause and coronary heart disease mortality, and the results were suggestive of a link to coronary heart disease events although there was a great deal of uncertainty in this result. Other studies conducted in the U.S. and Europe have examined clinical cardiovascular outcomes with varying results (U.S. EPA 2009).

The U.S. EPA 2009 ISA concluded that epidemiologic studies, along with toxicological evidence linking PM exposures to atherosclerosis and other cardiovascular outcomes, provides evidence linking PM to cardiovascular effects and mortality. While the associations between PM and subclinical and clinical measures have inconsistent results, the consistency of the studies linking PM exposures to cardiovascular mortality and the coherence of the toxicological studies provide support for U.S. EPA's causal determination.

### **Long-Term Particulate Matter Exposures and Respiratory Effects**

The U.S. EPA 2009 ISA review determined that the evidence for long-term particulate matter exposures on respiratory effects is likely to be causal. Several studies, including prospective cohort studies, have assessed the effects of long-term particulate matter exposure on respiratory symptoms and lung function changes. Consistent, positive associations have been found with respiratory symptoms, such as bronchitis, poorly controlled asthma, and decreased lung function in children (U.S. EPA 2009; Guarnieri et al. 2014). Since many of the studies of children included survey measures, these studies typically controlled for the potential confounding effect of tobacco smoking by the child and exposure to second-hand smoke at home, and some studies were also able to account for exposure to maternal smoking *in utero*.

The Southern California Children's Health Study established cohorts of school children from 12 Southern California communities, and followed these participants over time. One of the early studies from this cohort reported positive associations of particulate matter with prevalent bronchitis or phlegm among children with asthma. These effects were also associated with NO<sub>2</sub> and acid vapor levels (McConnell et al. 1999). Another study based on this cohort reported a lower rate of growth in lung function in children living in areas with higher levels of particulate pollution (Gauderman et al. 2000). Decreases in lung function growth were associated with PM<sub>10</sub>, PM<sub>2.5</sub>, PM<sub>10-2.5</sub>, acid

vapor, and NO<sub>2</sub>. There was no association with ozone levels. The investigators were not able to identify independent effects of the pollutants but noted that motor vehicle emissions are a major source of the pollutants.

A follow-up study on a second cohort of children confirmed the findings that decreased lung function growth was associated with particulates, nitric oxides, and elemental carbon levels (Gauderman et al. 2002). Elemental carbon is often used as a measure for diesel particulate. Additionally, children who moved to areas with less air pollution were found to show improvement in lung function growth rate, while those who moved to areas with higher PM<sub>10</sub> and NO<sub>2</sub> showed declines in lung function growth rates (Avol et al. 2001). By the time the fourth graders graduated from high school, a significant number showed lower lung function. The risk of lower lung function was about four times higher in children with the highest PM<sub>2.5</sub> exposure when compared to the lowest exposure communities (Gauderman et al. 2004).

A follow-up report from the Children's Health Study assessed whether improving air quality in Southern California over the past decade has led to beneficial changes in health (Gauderman et al. 2015). It was reported that as the levels of nitrogen oxide and fine particulates were reduced as the result of reductions in air pollution emissions, the deficits in lung function growth were also of a smaller magnitude. Recently, the Children's Health Study cohort data were also used to evaluate associations with bronchitic symptoms in children (Berhane et al. 2016). The study found that reductions in NO<sub>x</sub>, ozone, and PM<sub>10</sub> and PM<sub>2.5</sub> were associated with decreases in bronchitic symptoms, with stronger effects observed in children with asthma. These results indicate that improvements in air quality, as measured by fine particulate and nitrogen oxides, are associated with improvements in children's health in Southern California.

A limited number of studies have linked PM exposures to asthma incidence. In an analysis of the Children's Health Study in Southern California, Islam et al. found that while children with better lung function are generally at lower risk of developing asthma, living in an area with long-term average PM<sub>2.5</sub> levels  $\geq 13.7 \mu\text{g}/\text{m}^3$  offset this protective characteristic; in other words, this study related high PM<sub>2.5</sub> levels with new-onset asthma in children (Islam et al. 2007). The U.S. EPA 2009 ISA report also reviewed two European studies that linked PM<sub>2.5</sub> with asthma onset in children (Brauer et al. 2007) and adults (Kunzli et al. 2009). Two recent studies were identified in our literature search: the first study used the Sister Study national cohort and found that a  $3.6 \mu\text{g}/\text{m}^3$  increase in PM<sub>2.5</sub> was associated with a 20 percent increased risk of incident asthma and a 14 percent increase in incident wheeze among adult females (Young et al. 2014); the second study was a study of Medicaid-enrolled children in Harris County, Texas, and found PM<sub>2.5</sub> was associated with new-onset asthma in single-pollutant models (Wendt et al. 2014). However, accounting for the potential effects of other pollutants added substantial uncertainty in the overall effect estimates for PM<sub>2.5</sub>, meaning that it is difficult to distinguish in this study whether the effects are due to PM<sub>2.5</sub> or other pollutant exposures.

The U.S. EPA 2009 ISA also noted that studies from many different locations, including Mexico City, Sweden, and a national cohort in the U.S. provide additional coherent and consistent evidence of respiratory effects associated with PM exposures.

### **Long-Term Particulate Matter Exposures and Emerging Areas of Interest**

Beyond cardiovascular, respiratory and mortality effects, the U.S. EPA 2009 ISA review concluded that the evidence available at the time was suggestive of a causal relationship between long-term exposures to PM and reproductive/developmental effects, as well as cancer. Since the 2009 ISA, there have been several studies conducted that evaluated these health endpoints in relation to PM exposures, as well as studies of metabolic syndrome and neurological health outcomes. Because of the relatively long time gap since the latest ISA for PM, and because the SCAB exceeds the federal standards for PM<sub>2.5</sub>, these health endpoints are discussed briefly here, with a focus on studies conducted since the 2009 ISA, and studies conducted in California or in the SCAB.

#### Cancer

The U.S. EPA 2009 ISA review concluded that existing evidence is suggestive of a link between PM<sub>2.5</sub> and cancer, with studies of lung cancer providing the strongest evidence. More recently, the International Agency for Research on Cancer (IARC) recently designated outdoor air pollution and particulate matter as carcinogenic to humans (Group 1 carcinogens), and a meta-analysis provided quantitative evidence for the associations between particulate matter and lung cancer risk (Hamra et al. 2014; International Agency for Research on Cancer 2015). The IARC review included studies evaluating associations between outdoor air pollution and lung cancer, urinary bladder cancer, breast cancer, leukemia and lymphoma, childhood cancers, and total cancers. Among these cancers, the IARC Working Group concluded that outdoor air pollution and particulate matter cause lung cancer, and that positive associations were observed between outdoor air pollution and urinary bladder cancer. The IARC Working Group also noted that associations with childhood leukemia were suggestive of an association, and, while there were some inconsistencies across studies, an association could not be ruled out. To estimate overall lung cancer risk, the meta-analysis included 14 studies reporting on PM<sub>2.5</sub> and 9 studies reporting on PM<sub>10</sub>; the vast majority of these were cohort studies from North America and Europe. The meta-analysis found positive associations for both PM<sub>10</sub> and PM<sub>2.5</sub> and lung cancer risk, with the PM<sub>2.5</sub> results being more consistent. Additionally, the study analyzed whether the association between PM<sub>2.5</sub> and lung cancer differed by smoking status, and found positive associations for each smoking status group (current smokers, former smokers, and never-smokers).

A recent study from the Adventist Health and Smog Study-2 (AHSMOG-2) cohort in the U.S. and Canada reported that a 10 ug/m<sup>3</sup> increase in ambient PM<sub>2.5</sub> increased the risk of lung cancer incidence by about 40 percent, after accounting for ozone exposures (Gharibvand et al. 2016). Because all participants are non-smokers, with over 80 percent never having smoked, and with the former smokers having an average of 24 years between quitting smoking and being diagnosed with lung cancer, the likelihood of confounding by smoking in this cohort is much lower than in most other

populations. Another recent study conducted in California evaluated air pollution in relation to survival after being diagnosed with lung cancer, and found that patients living in areas with higher NO<sub>2</sub>, PM<sub>2.5</sub> and PM<sub>10</sub> had shorter survival times, particularly for those patients who were diagnosed at earlier stages of lung cancer (Eckel et al. 2016). Few other studies have evaluated air pollution effects on lung cancer survival, so this study represents a relatively newer area of research.

### Reproductive Health Outcomes

The U.S. EPA 2009 ISA review concluded that existing evidence is suggestive of a link between PM<sub>2.5</sub> and reproductive health effects. Numerous studies report evidence indicating that particulate matter exposure during pregnancy may be associated with adverse birth outcomes, with relatively consistent evidence linking PM<sub>2.5</sub> and PM<sub>10</sub> exposures to low birth weight or decreases in birth weight (Bobak et al. 1999; Sram et al. 2005; Stieb et al. 2012). Among the studies reviewed in the 2009 U.S. EPA ISA for particulate matter or in the literature search for more recent and/or local studies, several studies of low birth weight (defined as <2,500g or approximately 5.5 pounds at birth) or reductions in birth weight were conducted in California or in the Southern California region (Basu et al. 2004; Parker et al. 2005; Salam et al. 2005; Wilhelm et al. 2005; Morello-Frosch et al. 2010; Wilhelm et al. 2012; Basu et al. 2014; Laurent et al. 2014). Two of these studies were conducted in Los Angeles County and were published since the last AQMP in 2012, and both examined low birth weight among full-term babies (“term low birth weight”). Laurent et al. reported that a 5.82 µg/m<sup>3</sup> increase in PM<sub>2.5</sub> exposures during pregnancy was linked to a 2.5 percent increased risk of term low birth weight (Laurent et al. 2014). The second study evaluated PM<sub>2.5</sub> exposures by source, and found increased odds of term low birth weight with increased exposure to PM<sub>2.5</sub> from diesel sources, gasoline, geological sources, as well as elemental carbon (Wilhelm et al. 2012). Studies from the U.S., Brazil, Mexico, the Czech Republic, South Korea, Japan, and Taiwan have reported that neonatal and early postnatal exposure to particulate matter may lead to increased infant mortality (U.S. EPA 2009). Among these studies, one was conducted in Southern California, and found increased risks for deaths among infants between one and 12 months old associated with exposures to particulates and other pollutants; however, no effect was seen for neonatal mortality (defined as mortality in the first month after birth) (Ritz et al. 2006). Some newer research has also linked particulate matter exposures to risk of certain birth defects and stillbirth. A California-based study used monitoring station data and traffic density measures to evaluate potential associations with a variety of birth defects in the San Joaquin Valley (Padula et al. 2013a; Padula et al. 2013b; Padula et al. 2013c; Padula et al. 2015). One of these studies reported evidence suggesting that PM<sub>10</sub> and PM<sub>2.5</sub> may increase the risk of certain congenital heart defects (Padula et al. 2013b). For neural tube defects, increased risks were linked to higher exposures to carbon monoxide and nitrogen oxide (Padula et al. 2013a), but higher risks for spina bifida with PM<sub>10</sub> exposures were found only among mothers living in lower socioeconomic status neighborhoods (Padula et al. 2015). An earlier study conducted in Los Angeles County used ambient monitoring data to estimate exposures, and reported increased risk of certain congenital heart defects with higher exposures to carbon monoxide, but not for PM<sub>10</sub>; PM<sub>2.5</sub> was not evaluated in this study (Ritz et al. 2002). A couple of recent studies evaluated PM<sub>2.5</sub> exposures during gestation and risk of stillbirth. A recent study conducted in Ohio used monitoring station data

to evaluate stillbirth risk, and found that higher levels of PM<sub>2.5</sub> exposure in the third trimester was linked to a 42 percent increased risk of stillbirth (DeFranco et al. 2015). A California-based study similarly found an increased risk of stillbirth with higher PM<sub>2.5</sub> exposures averaged over the entire pregnancy, but the association may have been confounded by co-occurring nitrogen dioxide exposures (Green et al. 2015). A third study, conducted in Taiwan, found that higher PM<sub>10</sub> and sulfur dioxide exposures in the first trimester were associated with increased risk of stillbirth among babies who were born preterm; PM<sub>2.5</sub> was not assessed in this study (Hwang et al. 2011).

In the U.S. EPA review, it was noted that stronger associations with birth weight reductions are observed with PM<sub>2.5</sub> compared to PM<sub>10</sub>, and animal toxicological studies provide supportive evidence, although a specific mechanism is not known (U.S. EPA 2009). These results and many other studies provide evidence that fetuses and infants are subgroups affected by particulate matter exposures.

### Neurological Health Outcomes

A 2012 review conducted by a panel of research scientists convened by the National Institute of Environmental Health Sciences identified several studies that reported links between outdoor air pollution and central nervous system effects, such as decreased cognitive function, Alzheimer's disease, Parkinson's disease, and impacts on behavioral testing and development in childhood (Block et al. 2012). Toxicological studies suggest that the damage may be caused through an oxidative stress pathway, and demonstrate that PM can be inhaled into the lungs and translocated to the brain, and that ultrafine particles to reach the brain through the olfactory nerve (Peters et al. 2006). Some more recent studies have evaluated neurological impacts of PM, ranging from studies of older adults to prenatal exposures. The Normative Aging Study evaluated older men in Boston, MA, and reported an association between black carbon (a marker of traffic exhaust) and cognitive function, as measured through cognitive tests (Power et al. 2011). A study conducted in the Los Angeles Basin used monitoring data to evaluate long-term exposures in a middle-aged and older adult population, and reported PM<sub>2.5</sub> exposure was associated with decreased verbal learning (Gatto et al. 2014). A study of school children in Spain reported that children attending schools with higher levels of air pollution, as measured by elemental carbon (a marker of diesel exhaust), NO<sub>2</sub>, and ultrafine particles, experienced smaller growth in several cognitive measures (Sunyer et al. 2015). Three recent studies reported that PM<sub>2.5</sub> exposures during the prenatal period were associated with autism in childhood. One study was conducted in Los Angeles County, and reported that 7 percent increased odds of autism with a 4.68 µg/m<sup>3</sup> increase in PM<sub>2.5</sub>; the effect estimate increased to 15 percent when accounting for ozone in the statistical models (Becerra et al. 2013). A California-based study found that an 8.7 µg/m<sup>3</sup> increase in PM<sub>2.5</sub> during the prenatal period or in the first year of life doubled the odds of autism (Volk et al. 2013). The third study was based on the Nurses' Health Study II cohort, and reported an increased risk of autism with prenatal PM<sub>2.5</sub> exposures, but not with exposures before pregnancy or after delivery (Raz et al. 2015). These studies provide emerging evidence of health effects of air pollution on neurological health outcomes.

### Metabolic Syndrome

Metabolic syndrome, which is the clustering of several known risk factors for cardiovascular disease (Huang 2009), is a relatively new health outcome to be studied in relation to air pollution exposure. The U.S. EPA 2009 ISA reviewed only one epidemiological study and one toxicological study. These studies provided some evidence that particulate matter exposures may be linked to markers of metabolic syndrome, such as insulin resistance, hypertension, high cholesterol, or obesity, or that having a metabolic syndrome may increase susceptibility to the effects of PM<sub>10</sub> exposures on cardiovascular outcomes (U.S. EPA 2009). More recently, a Swiss epidemiological study reported that long-term PM<sub>10</sub> exposures were associated with increased risk of metabolic syndrome (Eze et al. 2015). Two other human studies found that people with metabolic syndrome exposed to particulate matter air pollution experienced cardiovascular effects and worsening insulin resistance (Devlin et al. 2014; Brook et al. 2016). Some recent animal studies have also reported impacts of PM on the development of obesity and metabolic syndrome, and that animals with pre-existing metabolic syndrome may be more sensitive to the cardiovascular effects of PM exposure (Brocato et al. 2014; Wagner et al. 2014; Wei et al. 2016).

### Ultrafine Particles

As noted above, numerous studies have found associations between particulate matter levels and adverse health effects, including mortality, hospital admissions, and respiratory disease symptoms. The vast majority of these studies used particle mass of PM<sub>10</sub>, PM<sub>2.5</sub>, or PM<sub>10-2.5</sub> as the measure of exposure. Some researchers have postulated, however, that ultrafine particles may be responsible for some of the observed associations of particulate matter and health outcomes (Oberdorster et al. 1995; Seaton et al. 1995). Ultrafine particles are typically defined as particles with aerodynamic diameters of less than 0.1 μm or 100 nm. Ultrafine particles are formed as a result of combustion processes as well as secondary atmospheric transformations. Vehicle emissions, especially diesel exhaust, are major sources of ultrafine particles; therefore, proximity to a major roadway is an important factor that affects an individual's exposure to ultrafine particles (Zhu et al. 2002; HEI Review Panel on Ultrafine Particles 2013). There is currently no federal or California standard for ultrafine particles.

U.S. EPA staff has presented conclusions on causal determination of several health effects of ultrafine PM based on a recent review of the available scientific studies (U.S. EPA 2009). These causal determinations are depicted in Table I-9.

**TABLE I-9**

Summary of U.S. EPA's Causal Determination of Ultrafine PM by Exposure Duration and Health Outcome

<b>SHORT-TERM EXPOSURES</b>	
<b>Health Outcome</b>	<b>Causality Determination</b>
Cardiovascular effects	Suggestive of a causal relationship
Respiratory effects	Suggestive of a causal relationship
Central nervous system	Inadequate to infer a causal relationship
Mortality	Inadequate to infer a causal relationship
<b>LONG-TERM EXPOSURES</b>	
<b>Health Outcome</b>	<b>Causality Determination</b>
Cardiovascular effects	Inadequate to infer a causal relationship
Respiratory effects	Inadequate to infer a causal relationship
Mortality	Inadequate to infer a causal relationship
Reproductive and developmental	Inadequate to infer a causal relationship
Cancer, Mutagenicity, Genotoxicity	Inadequate to infer a causal relationship

(From (U.S. EPA 2009) Table 2-4 and Chapters 6 and 7)

In 2013, a review of the health effects of ultrafine particles concluded that current available evidence does not support that exposures to ultrafine particles alone account for the adverse health effects that have been associated with other ambient pollutants such as PM<sub>2.5</sub>, although the report noted several limitations in the exposure data relating to ultrafine particles (HEI Review Panel on Ultrafine Particles 2013). However, a more recent assessment of the studies published since that time suggest that UFP's may be more harmful compared to health compared to PM<sub>10</sub> and PM<sub>2.5</sub> (Li et al. 2016). Several potential mechanisms have been brought forward to suggest that the ultrafine portion may be important in determining the toxicity of ambient particulates, some of which are discussed below.

Smaller particles can also be inhaled deeper into the lungs, although the relationship between deposition fraction and particle size is complex. The ultrafine particles between 20-30 nm generally have higher fractional deposition in the alveolar region of the lung, where air exchange takes place. Because ultrafine particles are cleared from the lung more slowly compared to larger particles, the ultrafine particles can accumulate in the lung tissue where they can also translocate into the blood and to other organs (HEI Review Panel on Ultrafine Particles 2013). Ultrafine particles can also enter the brain tissues through the olfactory nerve (Peters et al. 2006). For a given mass concentration, ultrafine particles have much higher numbers of particles and surface area compared to larger particles. Particles can act as carriers for other adsorbed agents, such as trace metals and organic

compounds; and the larger surface area may transport more of such toxic agents than larger particles. Combined with the slower clearance of UFP's from the alveolar region of the lung, these small particles can deliver a greater amount of toxics to this part of the lung, causing increased inflammation (Li et al. 2016).

Exposures of laboratory animals to ultrafine particles have found cardiovascular and respiratory effects. Using an animal model of atherosclerotic disease, mice exposed to concentrated ultrafine particles (defined as less than 0.18  $\mu\text{m}$ ) near a roadway in Southern California showed larger early atherosclerotic lesions than mice exposed to concentrated PM<sub>2.5</sub> or to filtered air (Araujo et al. 2008). In a mouse allergy model, exposures to concentrated ultrafine particles (less than 0.18  $\mu\text{m}$ ) resulted in a greater response to antigen challenge to ovalbumin (Li et al. 2010), indicating that vehicular traffic exposure could exacerbate allergic inflammation in already-sensitized animals. More specifically, ambient UFP's with a higher polycyclic aromatic hydrocarbon (PAH) content and higher oxidant potential triggered greater allergic inflammation in mice compared to a mixture of fine and ultrafine particles (Li et al. 2009). A related study identified specific proteins that are up-regulated among the exposed mice, which were proteins involved in allergic airway inflammation and immune system response (Kang et al. 2010). These results suggest that UFP's may play a role in the development or exacerbation of asthma, and point to an oxidative stress pathway. Additionally, some experiments using engineered nanoparticles found that the particle exposure led to a suppressed immune response to infections (Li et al. 2016).

Controlled exposures of human volunteers to ultrafine particles either laboratory-generated or as products of combustion, such as diesel exhaust containing particles, have found physiological changes related to vascular effects. Mills et al., for example found exposure to diesel exhaust particulate at 300  $\mu\text{g}/\text{m}^3$  attenuated both acetylcholine and sodium-nitroprusside-induced vasorelaxation (Mills et al. 2011). These exposures were higher than typical ambient concentrations, although the authors state that such concentrations can be found regularly in heavy traffic, occupational settings, and in some of the most polluted cities in the world. This study showed that diesel exhaust particulates had impacts on vascular function while carbon nanoparticles did not change vascular function, providing evidence that is complementary to the epidemiological studies linking particulate matter exposure to cardiovascular outcomes. Several other human exposures studies have reported effects of UFP's on inflammatory markers, lung function, heart rate and heart rate variability, including effects on people with asthma, diabetes, or metabolic syndrome (Li et al. 2016).

There is a lack of long-term studies of human population exposure to ultrafine particles, as there is currently no ultrafine monitoring network in the U.S. As noted above, however, a recent study from California estimated exposures to PM<sub>2.5</sub> and ultrafine particles among members of the California Teachers Study cohort. Positive, statistically significant associations of ischemic heart disease mortality were observed with modeled PM<sub>2.5</sub> and with ultrafine particle mass concentrations derived from chemical transport models using California emissions inventories (Ostro et al. 2015). Other epidemiological studies have reported links between UFP exposures both indoors and

outdoors with decreased microvascular function and increased systemic inflammation in adults (Karottki et al. 2014; Olsen et al. 2014), and with oxidative DNA damage in children (Song et al. 2013).

There have been several cross-sectional epidemiological studies of ultrafine particles, mainly from Europe. Some of these studies found effects on hospital admissions and emergency department visits for respiratory and cardiovascular effects, whereas other studies did not find such effects (U.S. EPA 2009). A recent study conducted in Rochester, NY reported that ambient UFP exposures in the prior week were associated with increased risk of asthma-related medical visits indicative of asthma exacerbation; the study did not find associations with accumulation mode PM, PM<sub>2.5</sub>, black carbon, or sulfur dioxide (Evans et al. 2014). Concentrations of ultrafine particles can vary geographically, and it is not clear how well the central-site monitors used in these studies reflect actual exposures.

Additional discussion on the sources and health effects of ultrafine particles can be found in Chapter 9 of the 2012 AQMP.

## Sensitive Populations for PM-Related Health Effects

Certain populations may be more sensitive to the health effects of particulate air pollution, and evidence to assess susceptibility comes from epidemiological, controlled human exposure, and toxicological studies of PM<sub>2.5</sub> and PM<sub>10</sub> exposures. The U.S. EPA 2009 ISA for PM concluded that there is evidence supporting increased susceptibility to the effects of PM among children (for respiratory effects) and older adults (for cardiovascular effects), individuals with pre-existing cardiovascular or respiratory conditions, individuals with lower socioeconomic status (sometimes assessed using proxy measures such as educational attainment or residential location), and individuals with certain genetic polymorphisms that control antioxidant response, regulate enzyme activity, or regulate procoagulants (U.S. EPA 2009). In addition, there is some limited evidence that additional factors may increase a person's susceptibility to PM health effects, including chronic inflammatory conditions (e.g. diabetes, obesity) and life stage, with pregnant women and fetuses *in utero* being potentially more susceptible. Table I-10 summarizes the U.S. EPA's 2009 ISA assessment of susceptibility factors for particulate matter.

**TABLE I-10**

Summary of Evidence for Potential Increased Susceptibility to PM-Related Health Effects

<b>Assessment of Evidence</b>	<b>Potential At Risk Factor</b>
Increased susceptibility to PM	Older Adults ( $\geq 65$ years) Children ( $< 18$ years) Genetic factors Cardiovascular diseases Respiratory illnesses Socioeconomic status (SES) Educational attainment (surrogate of SES) Residential location (surrogate of SES)
Increased susceptibility to PM, but limited studies available	Pregnancy and developmental effects Diabetes Obesity Health status, e.g. nutrition (surrogate of SES)
Did not increase susceptibility to PM	Gender Race/ethnicity
Did not increase susceptibility to PM, but limited studies available	Respiratory contributions to cardiovascular effects

Adapted From (U.S. EPA 2009) Table 8-2

## Summary - Particulate Matter Health Effects

A considerable body of scientific evidence from epidemiologic, controlled human exposure and toxicological studies support the causal determinations for particulate matter and several categories of health endpoints, with the strongest evidence supporting a causal relationship for PM<sub>2.5</sub> exposures with cardiovascular effects and mortality. Specific cardiovascular effects include cardiovascular deaths, hospital admissions for ischemic heart disease and congestive heart failure, changes in heart rate variability and markers of oxidative stress, and markers of atherosclerosis. The scientific evidence also supported a likely causal relationship for PM<sub>2.5</sub> exposure with respiratory effects, such as hospital admissions for COPD or respiratory infections, asthma development, asthma or allergy exacerbation, lung cancer, impacts on lung function, lung inflammation, oxidative stress, and airway hyperresponsiveness. Both short-term and long-term particulate matter exposures are linked to health effects in humans. Young children, older adults, and people with pre-existing respiratory or cardiovascular health conditions are among those who may be more susceptible to the adverse effects of PM.

## Estimates of the Health Burden of Particulate Matter in the South Coast Air Basin

In terms of estimating health burdens of air pollution exposure, CARB has conducted analyses in the past estimating exposures and quantitative health effects from exposures to particulate matter as well as other pollutants. A recent assessment focused on premature mortality and PM<sub>2.5</sub>, and

estimated the deaths associated with exposures above  $5.8 \mu\text{g}/\text{m}^3$ , which is an estimate of background PM<sub>2.5</sub> (California Air Resources Board 2010a). The analysis used the U.S. EPA's risk assessment methodology for calculating premature mortality and used ambient air quality measurements averaged over a three-year period of 2006-2008. An update to this analysis using ambient air quality data from 2009-2011 indicated that PM<sub>2.5</sub>-related premature deaths in California due to cardiopulmonary causes as 7,200 deaths per year with an uncertainty range of 5,600 – 8,700. Estimates were also made for the California Air Basins. For the South Coast Air Basin, the estimate was 4,000 cardiopulmonary deaths per year with an uncertainty range of 3,200–4,900. These estimates were calculated using the associations of cardiopulmonary mortality and PM<sub>2.5</sub> from the second exposure period from Krewski (Krewski et al. 2009).

Another analysis of health impacts in the South Coast was conducted as part of the Socioeconomic Report for the 2012 AQMP. The analysis estimated the anticipated costs and benefits of adopting the measures in the Final 2012 AQMP, which included the projected public health benefits associated with lower PM<sub>2.5</sub> concentrations as a result of the 2012 plan (South Coast Air Quality Management District 2012). Based on that analysis, the projected annual number of averted deaths due to PM<sub>2.5</sub> reductions from the 2012 AQMP was 668 deaths in year 2014, and 275 deaths in year 2023. In addition, estimated numbers of health conditions prevented per year due to the 2012 AQMP were shown for several other health endpoints, including respiratory and cardiovascular outcomes. The estimates of cases averted in year 2014 were 597 cases of acute bronchitis, 29 to 261 non-fatal heart attacks, 18,384 person-days for lower and upper respiratory symptoms, 153 respiratory emergency room visits, 151 hospital admissions, 287,447 person-days of minor restricted activity, 48,805 work loss days, and 26,910 person-days of asthma attacks. Importantly, these estimates of prevented mortality and morbidity should not be compared to the estimates of deaths attributable to PM<sub>2.5</sub> conducted by CARB, because these analyses are intended to answer different questions. The SCAQMD estimates address the question of “how many cases are averted due to the adoption of the 2012 AQMP?” while the CARB estimates address the question of “how many deaths are attributable to PM<sub>2.5</sub> exposures above  $5.8 \mu\text{g}/\text{m}^3$ ?”. Both analyses provide important information regarding the health impacts of PM<sub>2.5</sub>.

## NITROGEN DIOXIDE

Nitrogen dioxide (NO<sub>2</sub>) is a gaseous air pollutant that serves as an indicator of gaseous oxides of nitrogen, such as nitric oxide (NO) and other related compounds (NO<sub>x</sub>). These gases can undergo photochemical reactions to form ground-level ozone, and are important contributors to ozone pollution levels in the SCAB. Evidence of the health effects of NO<sub>2</sub> is derived from human and animal studies, which link NO<sub>2</sub> with respiratory effects such as decreased lung function and increases in airway responsiveness and pulmonary inflammation (U.S. EPA 2016). The U.S. EPA in 2010 retained the existing standards of 53 ppb for NO<sub>2</sub> averaged over one year, and adopted a new short-term standard of 100 ppb (0.1 ppm) averaged over one hour. The standard was designed to protect against increases in airway reactivity in individuals with asthma based on controlled exposure studies, as well as respiratory symptoms observed in epidemiological studies. The revised standard also requires additional monitoring for NO<sub>2</sub> near roadways.

In the current U.S. EPA Integrated Science Assessment for Nitrogen Oxides (U.S. EPA 2016), the staff conclusion for causal relationships between exposures and health effects are shown in the following table.

**TABLE I-11**

Summary of U.S. EPA's Causal Determination for Health Effects of Nitrogen Dioxide

<b>SHORT-TERM EXPOSURES</b>	
<b>Health Outcome</b>	<b>Causality Determination</b>
Respiratory effects	Causal relationship
Cardiovascular and related metabolic effects	Suggestive of a causal relationship
Total mortality	Suggestive of a causal relationship
<b>LONG-TERM EXPOSURES</b>	
<b>Health Outcome</b>	<b>Causality Determination</b>
Respiratory effects	Likely to be a causal relationship
Cardiovascular and related metabolic effects	Suggestive of a causal relationship
Reproductive and developmental effects	Fertility, Reproduction, and Pregnancy: Inadequate to infer a causal relationship Birth Outcomes: Suggestive of a causal relationship Postnatal Development: Inadequate to infer a causal relationship
Total Mortality	Suggestive of a causal relationship
Cancer	Suggestive of a causal relationship

(From (U.S. EPA 2016), Table ES-1)

Since the previous U.S. EPA Integrated Science Assessment (ISA) for Nitrogen Oxides from 2008, the causal determination for short-term and long-term respiratory effects have been updated in the 2016 ISA to reflect the stronger evidence now available pointing to a causal or likely causal relationship. For non-respiratory outcomes, the U.S. EPA also updated their assessment of the weight of evidence to show that the evidence for several short- and long-term outcomes is suggestive, but not sufficient to infer a causal relationship. Evidence for low-level nitrogen dioxide (NO<sub>2</sub>) exposure effects is derived from laboratory studies of asthmatics and from epidemiological studies. Additional evidence is derived from animal studies. In the 2016 ISA, the U.S. EPA cited the coherence of the results from a variety of studies, and a plausible biological mechanism (whereby NO<sub>2</sub> reacts with the respiratory lining and forms secondary oxidation products that increase airway responsiveness and allergic

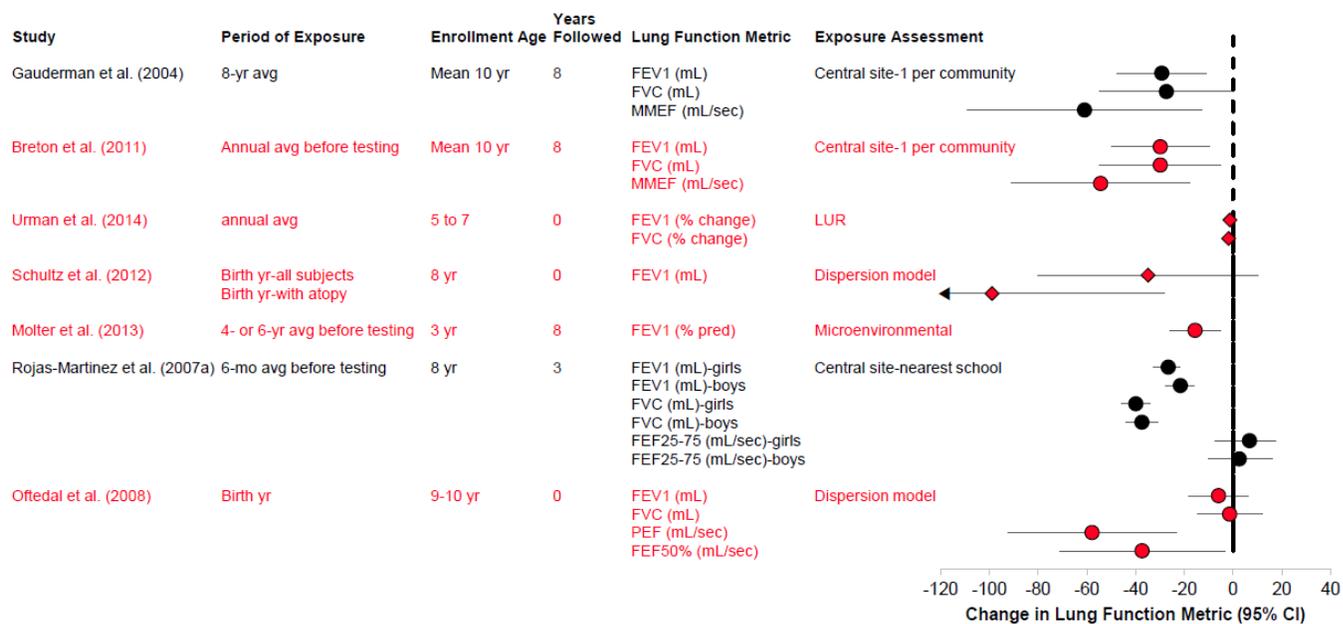

inflammation) to support the determination of a causal relationship between short-term NO<sub>2</sub> exposures and asthma exacerbations (“asthma attacks”). The long-term link with respiratory outcomes was strengthened by recent experimental and epidemiological studies, and the strongest evidence available is from studies of asthma development.

Several studies related to outdoor exposure have found health effects associated with ambient NO<sub>2</sub> levels, including respiratory symptoms, respiratory illness, decreased lung function, pulmonary inflammation, increased emergency room visits for asthma, and cardiopulmonary mortality. However, since traffic exhaust is an important source of NO<sub>2</sub> and several other pollutants, such as particulate matter, exposure generally occurs in the presence of other pollutants, making it more difficult for these studies to distinguish the specific role of NO<sub>2</sub> in causing effects independent of other pollutants. However, studies linking NO<sub>2</sub> to asthma exacerbations and human experimental studies provided support for the U.S. EPA determination that this causal relationship exists for short-term NO<sub>2</sub> exposures independent of other traffic-related pollutants (U.S. EPA 2016). The report also concludes that epidemiological studies do not rule out the possible influence of other traffic-related pollutants on the observed health effects.

The Children’s Health Study in Southern California has evaluated a variety of health endpoints in relation to air pollution exposures, including lung function, lung development, school absences, and asthma. The study found associations between long-term exposure to air pollution, including NO<sub>2</sub>, PM<sub>10</sub>, and PM<sub>2.5</sub>, and respiratory symptoms in asthmatic children (McConnell et al. 1999). Particles and NO<sub>2</sub> levels were correlated, and independent effects of individual pollutants could not be discerned. A subsequent analysis using more refined exposure estimation methods indicated consistent associations between long-term NO<sub>2</sub> exposures and respiratory symptoms in children with asthma (McConnell et al. 2003).

Ambient levels of NO<sub>2</sub> were also associated with a decrease in lung function growth in a group of children followed for eight years, including children with no history of asthma. In addition to NO<sub>2</sub>, the decreased growth was also associated with particulate matter and airborne acids. The study authors postulated this may be a result of a package of pollutants from traffic sources (Gauderman et al. 2004).

A number of studies have since reported deficits in lung function associated with nitrogen oxides exposures. Examples are shown in Figure I-8.

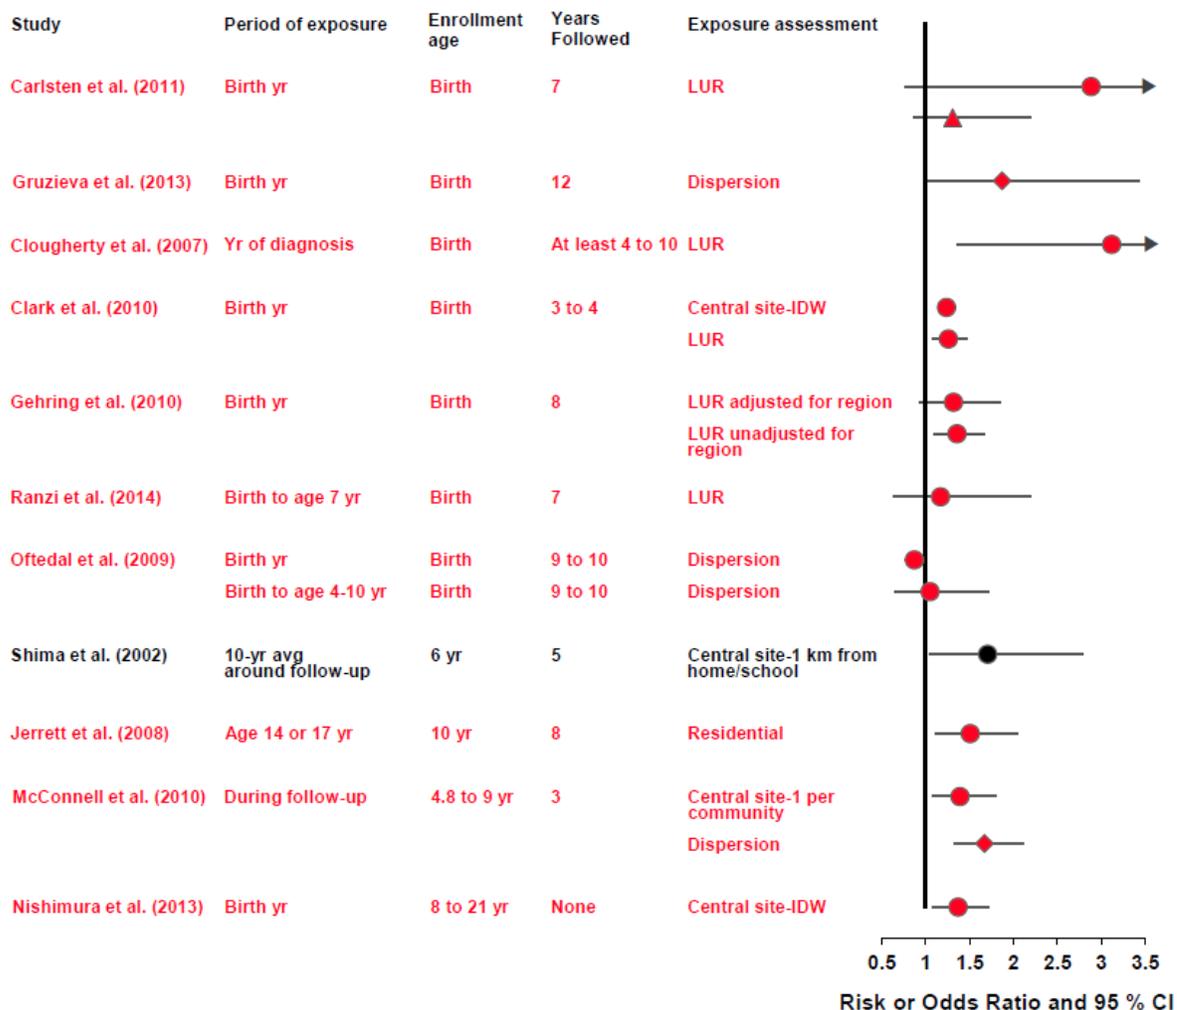

Note: Studies in red are recent studies. Studies in black were included in the 2008 ISA for Oxides of Nitrogen. Circles = NO<sub>2</sub>; Diamonds = NO<sub>x</sub>. All mean changes in this plot are standardized to a 10-ppb increase in NO<sub>2</sub> and a 20-ppb increase in NO<sub>x</sub> concentration. Effect estimates from studies measuring NO<sub>x</sub> in µg/m<sub>3</sub> (Schultz et al., 2012) have not been standardized.

**FIGURE I-8**

Associations of nitrogen dioxide (NO<sub>2</sub>) or the sum of nitric oxide and NO<sub>2</sub> (NO<sub>x</sub>) with lung function indices from prospective studies of children (From (U.S. EPA 2016), Figure 6-5).

A follow-up report from the Children’s Health Study has assessed whether improving air quality in Southern California over the past several decades has led to beneficial changes in health among children (Gauderman et al. 2015). It was reported that as the levels of nitrogen oxide and fine particulates came down as the result of air pollution emissions reductions, the deficits in lung function growth were also of a smaller magnitude. Such improvements were observed in children with asthma as well as in those without asthma. These results indicate that improvements in air quality are associated with improvements in children’s health.

In recent years, the most compelling evidence of long-term effects of NO<sub>2</sub> has been from prospective cohort studies that link NO<sub>2</sub> exposures to the development of asthma, primarily in children. The U.S. EPA included several recent studies in their review, as shown in the Figure I-9. The vast majority of these studies found that higher NO<sub>2</sub> exposures were linked to an increased risk or odds of developing asthma among children.

Effect estimates are standardized to a 10-ppb increase in NO<sub>2</sub>, with the exception of Gruzieva et al. (2013) who examined NO<sub>x</sub> in µg/m<sup>3</sup> and Ofstedal et al (2009) who did not report increments for the effect estimates for the birth to age 4 years or birth to age 10 years exposure periods. Note: Black symbols = studies evaluated in the 2008 Integrated Science Assessment for Oxides of Nitrogen; Red symbols = recent studies. Circles=NO<sub>2</sub>; triangles=NO; diamonds=NO<sub>x</sub>.

**FIGURE I-9**

Associations of ambient nitrogen dioxide (NO<sub>2</sub>) concentrations with asthma incidence in longitudinal cohort studies of children (From (U.S. EPA 2016), Figure 6-1).

Among the studies of childhood asthma incidence reviewed in the 2016 U.S. EPA ISA for Oxides of Nitrogen, two studies were conducted in Southern California. Both studies were based on the Children's Health Study cohort, but one study used a smaller subset of the cohort and estimated NO<sub>2</sub> exposures using monitors at the children's homes (Jerrett et al. 2008). The second study examined over 2000 children and used data from air monitoring stations as well as modeled NO<sub>2</sub> levels to estimate exposures (McConnell et al. 2010). Both studies found a positive association between NO<sub>2</sub> exposures and the onset of asthma in these children, however, because NO<sub>2</sub> is often strongly

correlated with PM<sub>2.5</sub> and other components of traffic-related air pollution, it is possible that the effects observed are due to some other component of traffic exhaust for which NO<sub>2</sub> serves as a proxy measure. The consistency of the effects found linking NO<sub>2</sub> exposure and asthma development in children, the use of prospective longitudinal study designs following children for several years, and the use of several different methods to estimate exposures are noted strengths of such studies. Experimental studies have found that NO<sub>2</sub> exposures increase responsiveness of airways, pulmonary inflammation, and oxidative stress, and can lead to the development of allergic responses. These biological responses provide evidence of a plausible mechanism for NO<sub>2</sub> to cause asthma.

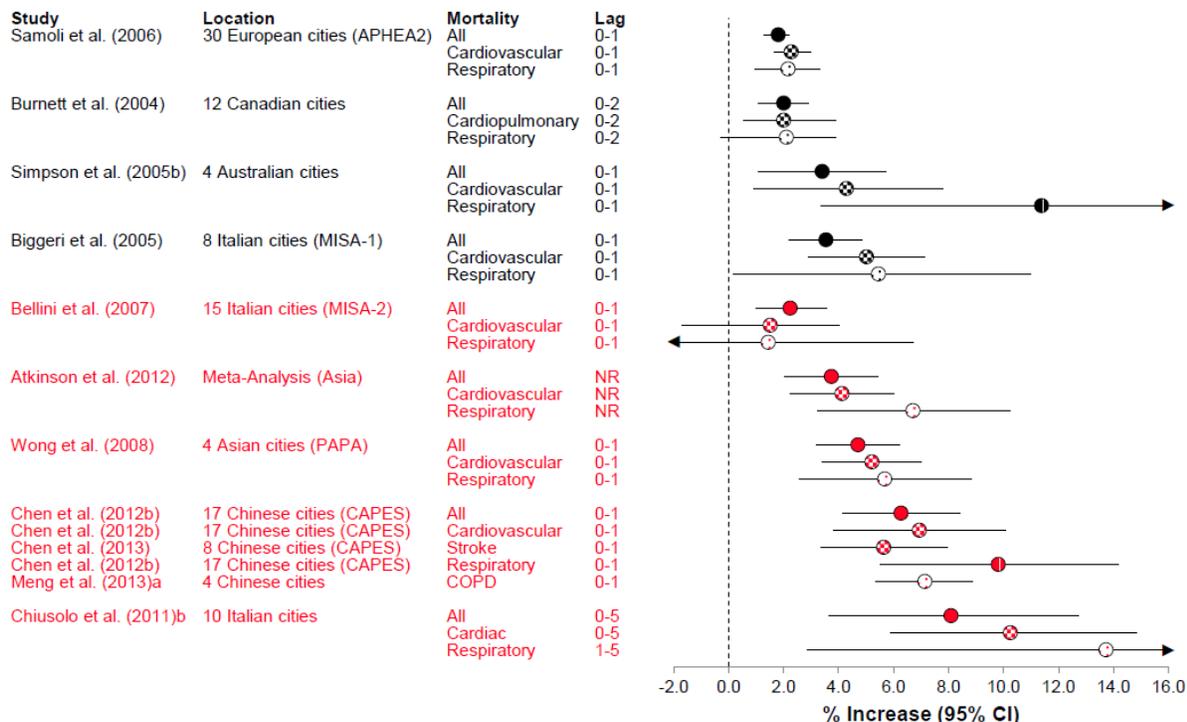

Results from controlled exposure studies of asthmatics demonstrate an increase in the tendency of airways to contract in response to a chemical stimulus (airway responsiveness) or after inhaled allergens (U.S. EPA 2016). Effects were observed among adult volunteers with asthma when exposed to 100 ppb NO<sub>2</sub> for 60 minutes and to 200-300 ppb for 30 minutes, with approximately 70 percent of study participants experiencing an increase in airway responsiveness. A similar response was reported in some studies with healthy subjects at higher levels of exposure (1.5 - 2.0 ppm), although these changes in healthy adults are likely of little or no clinical significance. Increased airway responsiveness among people with asthma can lead to worse symptoms and reduced lung function. Mixed results have been reported from controlled human exposure studies of people with chronic obstructive lung disease, with some studies reporting no change in symptom score while other studies reporting increased symptom scores when participants were exposed to NO<sub>2</sub> while exercising (U.S. EPA 2016).

Short-term controlled studies of rats exposed to NO<sub>2</sub> over a period of several hours indicate cellular changes associated with allergic and inflammatory responses that can lead to liver damage and reduced hepatic function. Rodent models exposed to NO<sub>2</sub> repeatedly for 4 to 14 days demonstrated increased airway responsiveness with high levels of exposure (4000 ppb). Animal studies also provide evidence that NO<sub>2</sub> exposures have negative effects on the immune system, and therefore increase the host's susceptibility to respiratory infections. Epidemiological studies showing associations between NO<sub>2</sub> levels and hospital admissions for respiratory infections also support such a link (U.S. EPA 2016).

Several epidemiological studies conducted in California have examined associations between NO<sub>2</sub> exposures and other health effects, including some recent studies evaluating cardiovascular effects (Coogan et al. 2012; Bartell et al. 2013; Wittkopp et al. 2013), mortality (Lipsett et al. 2011; Bartell et al. 2013; Jerrett et al. 2013), birth outcomes (Ghosh et al. 2012; Laurent et al. 2014; Padula et al. 2014; Ritz et al. 2014; Green et al. 2015), and cancer (Ghosh et al. 2013). Many studies conducted in other geographic areas have also found links with these health outcomes, and the latest assessment by U.S. EPA is that the existing studies are suggestive of a causal relationship for some of these endpoints or inadequate to infer a causal relationship for other endpoints (U.S. EPA 2016). In addition, some of the newer outcomes evaluated in relation to NO<sub>2</sub> exposures include neurological outcomes such as Parkinson's disease (Ritz et al. 2016), Alzheimer's disease (Oudin et al. 2016), and autism (Becerra et al. 2013; Volk et al. 2013), as well as metabolic diseases such as diabetes and obesity (Coogan et al. 2012; Robledo et al. 2015; White et al. 2016). However, many of these studies

use NO<sub>2</sub> exposures as a proxy measure for traffic-related air pollutants, and do not aim to identify a specific pollutant within the mix of pollutants from this source. Thus, there is uncertainty on whether NO<sub>2</sub> exposure has independent relationships with non-respiratory related health effects, or whether NO<sub>2</sub> is simply a marker of near-road air pollution exposure, which includes a mixture of air pollutants, including some air toxics.

Examples of studies reporting an association of mortality with short-term NO<sub>2</sub> exposures are shown in the figure below.

Note: Black symbols = multicity studies evaluated in the 2008 Integrated Science Assessment for Oxides of Nitrogen; Red symbols = recent studies. Filled circle = total mortality; Crosshatch = cardiovascular mortality; Vertical lines = respiratory mortality.

**FIGURE I-10**

Percentage increase in total, cardiovascular, and respiratory mortality from multi-city studies for a 20-ppb increase in 24-hour average or 30-ppb increase in one-hour maximum nitrogen dioxide concentrations (From (U.S. EPA 2016), Figure 5-23).

## SULFUR DIOXIDE

Sulfur dioxide (SO<sub>2</sub>) is a gaseous air pollutant that has been linked to a variety of respiratory effects, such as decreased lung function and increased airway resistance. Controlled laboratory studies involving human volunteers have clearly identified asthmatics as a very sensitive group to the effects of ambient sulfur dioxide (SO<sub>2</sub>) exposures. Healthy subjects have failed to demonstrate any short-term respiratory functional changes at exposure levels up to 1.0 ppm over 1-3 hours. In exercising asthmatics, brief exposure (5-10 minutes) to SO<sub>2</sub> at levels between 0.2-0.6 ppm can result in increases in airway resistance and decreases in breathing capacity. The response to SO<sub>2</sub> inhalation is

observable within two minutes of exposure, increases further with continuing exposure up to five minutes, then remains relatively steady as exposure continues. SO<sub>2</sub> exposure is generally not associated with any delayed reactions or repetitive asthmatic attacks (U.S. EPA 2008). In 2010, the U.S. EPA SO<sub>2</sub> air quality standard was set at 75 ppb (0.075 ppm) averaged over one hour to protect against acute asthma attacks in sensitive individuals.

The EPA assessment based on the 2008 Integrated Science Assessment for Sulfur Oxides is shown in the table below (U.S. EPA 2008). The U.S. EPA recently released a draft of the revised ISA for SO<sub>2</sub> (U.S. EPA 2015a) which evaluates recent evidence assessing links to mortality and cardiovascular, respiratory, carcinogenic, and reproductive effects (Brunekreef et al. 2009; Hart et al. 2011; Pascal et al. 2013; Chen et al. 2014; Gianicolo et al. 2014; Milojevic et al. 2014; Moridi et al. 2014; Stingone et al. 2014; Straney et al. 2014; Wang et al. 2014; Winqvist et al. 2014; Yang et al. 2014; Ancona et al. 2015; Green et al. 2015; Rich et al. 2015; Shah et al. 2015; Yorifuji et al. 2015).

**TABLE I-12**

Summary of U.S. EPA’s Causal Determinations for Health Effects of Sulfur Oxides

<b>SHORT-TERM EXPOSURES</b>	
<b>Health Outcome</b>	<b>Causality Determination</b>
Respiratory morbidity	Causal relationship
Cardiovascular morbidity	Inadequate to infer a causal relationship
Mortality	Suggestive of a causal relationship
<b>LONG-TERM EXPOSURES</b>	
<b>Health Outcome</b>	<b>Causality Determination</b>
Respiratory morbidity	Inadequate to infer a causal relationship
Carcinogenic effects	Inadequate to infer a causal relationship
Prenatal and neonatal outcomes	Inadequate to infer a causal relationship
Mortality	Inadequate to infer a causal relationship

(From (U.S. EPA 2008) Chapter 3)

In epidemiologic studies of children and adults, associations of short-term variations in SO<sub>2</sub> levels with increases in respiratory symptoms, emergency department visits, and hospital admissions for respiratory-related causes have been reported. There is uncertainty as to whether SO<sub>2</sub> is associated with the effects or whether other co-occurring pollutants may explain the observed effects, although some studies indicated that the SO<sub>2</sub> effects remained even after accounting for the effects of other pollutants, including PM<sub>2.5</sub>. Coupled with the human clinical studies, these data suggest that SO<sub>2</sub> can trigger asthmatic episodes in individuals with pre-existing asthma (U.S. EPA 2008).

Animal studies have shown SO<sub>2</sub> effects on pulmonary inflammation with acute exposure at concentrations consistent with ambient SO<sub>2</sub> levels. Toxicological studies using animals found that repeated exposures to concentrations of SO<sub>2</sub> as low as 0.1 ppm promoted allergic sensitization and airway inflammation. Such evidence, combined with human clinical studies and epidemiological studies in people with asthma support the U.S. EPA determination of a causal relationship between short-term SO<sub>2</sub> exposure and respiratory morbidity. One of these studies was conducted in the Los Angeles area, and found that higher ambient SO<sub>2</sub> levels were associated with increased odds of asthma symptoms among Hispanic children with asthma (Delfino et al. 2003).

Some epidemiological studies indicate that the cardiovascular mortality effects associated with short-term exposures to ambient SO<sub>2</sub> were generally reduced when accounting for other pollutants, although the evidence is still suggestive of a causal relationship. Few epidemiological studies are available to assess the potential confounding effects of other co-occurring pollutants in studies of long-term effects. For example, there is some evidence that sulfates, which are formed when SO<sub>2</sub> oxidizes rapidly in the atmosphere, may be associated with lung function changes, although the evidence is not consistent (Reiss et al. 2007). Sulfates are positively correlated with SO<sub>2</sub> levels, so it is difficult to distinguish the effect of one individual pollutant. Based on a level determined necessary to protect the most sensitive individuals, the California Air Resources Board (CARB) in 1976 adopted a standard of 25 µg/m<sup>3</sup> (24-hour average) for sulfates. There is no federal air quality standard for sulfates.

## CARBON MONOXIDE

Carbon monoxide (CO) is a gaseous air pollutant that has a high affinity to bond with oxygen-carrying proteins (hemoglobin and myoglobin). The resulting reduction in oxygen supply in the bloodstream is responsible for the toxic effects of CO, which are typically manifested in the oxygen-sensitive organ systems. The effects have been studied in controlled laboratory environments involving exposure of humans and animals to CO, as well as in population-based studies of ambient CO exposure effects. People with deficient blood supply to the heart (ischemic heart disease) are known to be susceptible to the effects of CO. Protection of this group is the basis of the existing National Ambient Air Quality Standards for CO at 35 ppm for one hour and 9 ppm averaged over eight hours. The health effects of ambient CO have been recently reviewed by U.S. EPA, with the strongest evidence supporting a likely causal link between short-term CO exposures and cardiovascular outcomes, although studies have linked both short-term and long-term CO exposures to several other health outcomes (Table I-13) (U.S. EPA 2010).

**TABLE I-13**

Summary of U.S. EPA's Causal Determinations for Health Effects of Carbon Monoxide

<b>SHORT-TERM EXPOSURES</b>	
<b>Health Outcome</b>	<b>Causality Determination</b>
Cardiovascular morbidity	Likely to be a causal relationship
Central nervous system	Suggestive of a causal relationship
Respiratory morbidity	Suggestive of a causal relationship
Mortality	Suggestive of a causal relationship
<b>LONG-TERM EXPOSURES</b>	
<b>Health Outcome</b>	<b>Causality Determination</b>
Cardiovascular morbidity	Inadequate to infer a causal relationship
Central nervous system	Suggestive of a causal relationship
Birth outcomes and developmental effects	Suggestive of a causal relationship
Respiratory morbidity	Inadequate to infer a causal relationship
Mortality	Not likely to be a causal relationship

(From (U.S. EPA 2010) Table 2-1)

Inhaled CO has no known direct toxic effect on lungs but rather exerts its effects by interfering with oxygen transport—through the formation of carboxyhemoglobin (COHb, a chemical complex of CO and hemoglobin) ), which reduces the amount of oxygen the blood can carry to the tissues. Exposure to CO is often evaluated in terms of COHb levels in blood, measured as percentage of total hemoglobin bound to CO. Endogenous COHb is estimated to be <1 percent in healthy individuals, but COHb levels are sensitive to health status and metabolic state, with higher levels among smokers and persons with inflammatory diseases. Estimates based on a large prospective study of adults conducted in the 1970s showed a dose-response relationship between the average number of cigarettes smoked per day and the COHb concentrations (never smokers: 1.59±1.72 percent, former smokers: 1.96±1.87 percent, 1-5 cigarettes/day: 2.31±1.94 percent, 6–14 cigarettes/day: 4.39±2.48 percent, 15–24 cigarettes/day: 5.68±2.64 percent, ≥25 cigarettes/day: 6.02±2.86 percent) (Hart et al. 2006).

Under controlled laboratory conditions, healthy subjects exposed to CO sufficient to result in 5 percent COHb levels exhibited reduced duration of maximal exercise performance due to the inability to deliver sufficient oxygen to the heart and other muscles. Studies involving subjects with coronary artery disease who engaged in exercise during CO exposures have shown that COHb levels as low as

2.4 percent can lead to earlier onset of electrocardiograph changes indicative of deficiency of oxygen supply to the heart. Other effects of inadequate oxygen delivery to the body tissues include earlier onset of chest pain, increase in the duration of chest pain, headache, confusion and drowsiness (U.S. EPA 2000).

A number of epidemiological studies have found associations between short-term ambient CO levels and increased hospital admissions and emergency department visits for ischemic heart disease, including myocardial infarction (U.S. EPA 2010). In studies reporting results stratified by age and sex, larger effects were generally observed among older adults and among males. Examples of such studies, including information on number of days of lag time between exposure and hospital admissions for key cardiovascular outcomes, are shown in the figure below.

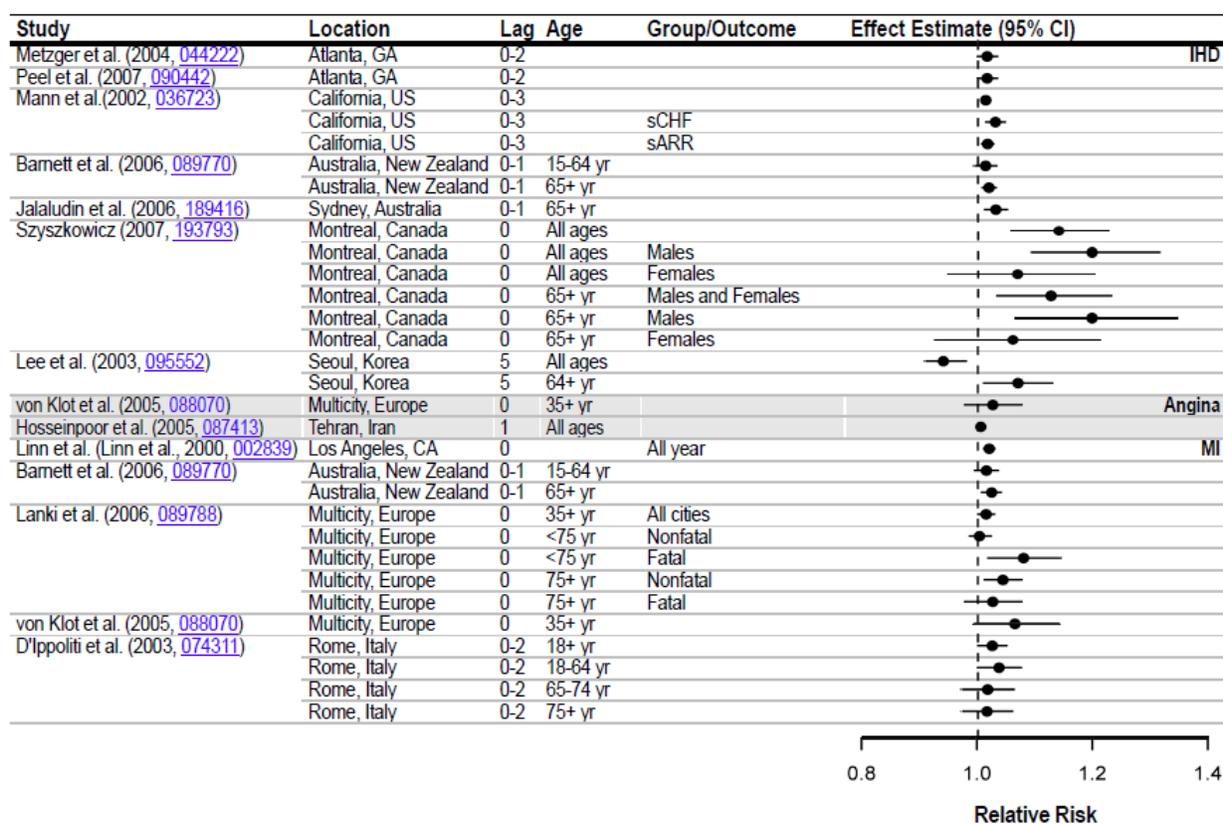

FIGURE I-11

Effect estimates (95 percent confidence intervals) associated with hospital admissions for various forms of heart disease. Effect estimates have been standardized to a 1 ppm increase in ambient CO for 1-h max CO concentrations, 0.75 ppm for 8-h max CO concentrations, and 0.5 ppm for 24-h average CO concentrations (From (U.S. EPA 2010), Figure 5-2). Lag time is the time between the exposure and the outcome measured. The closed circle on the diagram indicates the effect estimate, while the bar indicates the 95 percent confidence interval.

Research studies have also evaluated ambient CO exposures in relation to reproductive health outcomes. Epidemiological studies conducted in Southern California have reported an association

between with CO exposure during pregnancy and increases in pre-term births (Ritz et al. 2000; Wilhelm et al. 2005; Ritz et al. 2007). The increases in the pre-term births were also associated with PM10 or PM2.5 levels. There are very few studies examining CO exposure and birth defects, but one Southern California study found increased risks for cardiac-related birth defects with carbon monoxide exposure in the second month of pregnancy (Ritz et al. 2002). Toxicological studies in laboratory animals with higher than ambient levels of CO have also reported decrements in birth weight and prenatal growth, as well as impaired neurobehavior in the offspring of exposed animals (U.S. EPA 2010). The U.S. EPA concluded in their most recent review that the evidence linking long-term CO exposures with reproductive health outcomes was suggestive of a causal relationship.

## LEAD

Lead (Pb) is a toxic air contaminant that is recognized to exert an array of deleterious effects on multiple organ systems. There are a number of potential public health effects at low level exposures, and there is no recognized lower threshold for health effects (U.S. EPA 2013a). The health implications are generally indexed by blood lead levels which are related to lead exposures both from inhalation as well as from ingestion. Effects include impacts on population IQ as well as heart disease and kidney disease. The initial air quality standard for lead was established by U.S. EPA in 1978 at a level of 1.5  $\mu\text{g}/\text{m}^3$  averaged over a calendar quarter. U.S. EPA revised the NAAQS for lead in 2008 to a level of 0.15  $\mu\text{g}/\text{m}^3$  averaged over a rolling three-month period to protect against lead toxicity. The SCAB's attainment status for lead is described in the draft 2016 AQMP Chapter 2.

The U.S. EPA has recently reviewed the health effects of ambient lead exposures in conjunction with an Integrated Science Assessment and a review of the NAAQS for lead (U.S. EPA 2013a; U.S. EPA 2015c). Lead can accumulate and be stored in the bone, and this lead in bone can be released into the blood when the bone is metabolized, which happens naturally and continuously. Blood lead is the most common measure of lead exposure, and it represents recent exposure and may be an indicator of total body burden of lead (U.S. EPA 2013a). The following table gives the summary of causality conclusions from the U.S. EPA review, which illustrates the wide range of health effects associated with lead exposure.

TABLE I-14

Summary of U.S. EPA's Causal Determinations for Health Effects of Lead

HEALTH OUTCOME	CAUSALITY DETERMINATION
<b>Children - Nervous System Effects</b>	
Cognitive Function Decrements	Causal relationship
Externalizing Behaviors: Attention, Impulsivity and Hyperactivity	Causal relationship
Externalizing Behaviors: Conduct Disorders in Children and Young Adults	Likely to be a causal relationship
Internalizing Behaviors	Likely to be a causal relationship
Auditory Function Decrements	Likely to be a causal relationship
Visual Function Decrements	Inadequate to infer a causal relationship
Motor Function Deficits	Likely to be a causal relationship
<b>Adults – Nervous System Effects</b>	
Cognitive Function Decrements	Likely to be a causal relationship
Psychopathological Effects	Likely to be a causal relationship
<b>Cardiovascular effects</b>	
Hypertension	Causal relationship
Subclinical Atherosclerosis	Suggestive of a causal relationship
Coronary Heart Disease	Causal relationship
Cerebrovascular Disease	Inadequate to infer a causal relationship
<b>Renal Effects</b>	
Reduced Kidney Function	Suggestive of a causal relationship
<b>Immune System Effects</b>	
Atopic and Inflammatory Response	Likely to be a causal relationship
Decreased Host Resistance	Likely to be a causal relationship
Autoimmunity	Inadequate to infer a causal relationship
<b>Hematologic Effects</b>	
Decreased Red Blood Cell Survival and Function	Causal relationship
Altered Heme Synthesis	Causal relationship
<b>Reproductive and Developmental Effects</b>	
Development	Causal relationship
Birth Outcomes (low birth weight, spontaneous abortion)	Suggestive of a causal relationship
Male Reproductive Function	Causal relationship
Female Reproductive Function	Suggestive of a causal relationship
<b>Cancer</b>	
Cancer	Likely to be a causal relationship

(From (U.S. EPA 2013a) Table ES-1)

Children appear to be sensitive to the neurological toxicity of lead, with effects observed at blood lead concentration ranges of 2–8 µg/dL. No clear threshold has been established for such effects. According to the U.S. EPA review, the most important effects observed are neurotoxic effects in children and cardiovascular effects in adults. The effects in children include impacts on intellectual

attainment and school performance. Figure I-12 provides a summary of the lowest levels of blood lead that have been associated with certain neurological, hematological and immune effects in children.

Lowest Observed Effect Blood Lead Level	Neurological Effects	Hematological Effects	Immune Effects
30 µg/dL		Increased urinary δ-aminolevulinic acid	
15 µg/dL	Behavioral disturbances (e.g., inattention, delinquency)  Altered electrophysiological responses	Erythrocyte protoporphyrin (EP) elevation	
10 µg/dL	Effects on neuromotor function  CNS cognitive effects (e.g., IQ deficits)	Inhibition of δ-aminolevulinic acid dehydratase (ALAD)  ↓ Pyrimidine-5'-nucleotidase (Py5N) activity inhibition	Effects on humoral (↑ serum IgE) and cell-mediated (↓ T-cell abundance) immunity
5 µg/dL	↓ (???)	↓ (???)	
0 µg/dL			

Note: Arrows depict cases where weight of overall evidence strongly substantiates likely occurrence of type of effect in association with blood-Pb concentrations in range of 5-10 µg/dL, or possibly lower, as implied by (???). Although no evident threshold has yet been clearly established for those effects, the existence of such effects at still lower blood-Pb levels cannot be ruled out based on available data.

Source: Adapted/updated from Table 1-17 of U.S. Environmental Protection Agency (1986a).

**FIGURE I-12**

Summary of Lowest Observed Effect Levels for Key Lead-Induced Health Effects in Children (From (U.S. EPA 2007), Table 3-1)

Figures I-12 and I-13, taken from the U.S. EPA review (U.S. EPA 2007), depict the health effects of lead in relation to blood levels. In the figure, the question marks indicate that there are no demonstrated threshold blood lead levels for health effects. The Centers for Disease Control (CDC) has recently revised their lead hazard information and replaced their level of concern for adverse effects of 10 µg/dL blood lead level with a childhood blood lead level reference value of 5 µg/dL to identify children and environments associated with lead-exposure hazards (Centers for Disease Control and Prevention 2016).

Figure I-13 provides a summary of the lowest levels of blood lead that have been associated with key health effects in adults. For adults, evidence supports a causal relationship between lead and increased blood pressure and hypertension, as well as coronary heart disease (myocardial infarction, ischemic heart disease, and heart rate variability). Other health effects among adults are also relatively high on the causal scale, including neurological, hematological, and renal effects.

Lowest Observed Effect Blood Lead Level	Neurological Effects	Hematological Effects	Cardiovascular Effects	Renal Effects
30 µg/dL	Peripheral sensory nerve impairment	Erythrocyte protoporphyrin (EP) elevation in males		Impaired Renal Tubular Function
20 µg/dL	Cognitive impairment			
15 µg/dL	Postural sway	Erythrocyte protoporphyrin (EP) elevation in females		
		Increased urinary δ-aminolevulinic acid		
10 µg/dL		Inhibition of δ-aminolevulinic acid dehydratase (ALAD)	Elevated blood pressure	
			↓ (???)	
5 µg/dL				Elevated serum creatine (↓ creatine clearance)
0 µg/dL				

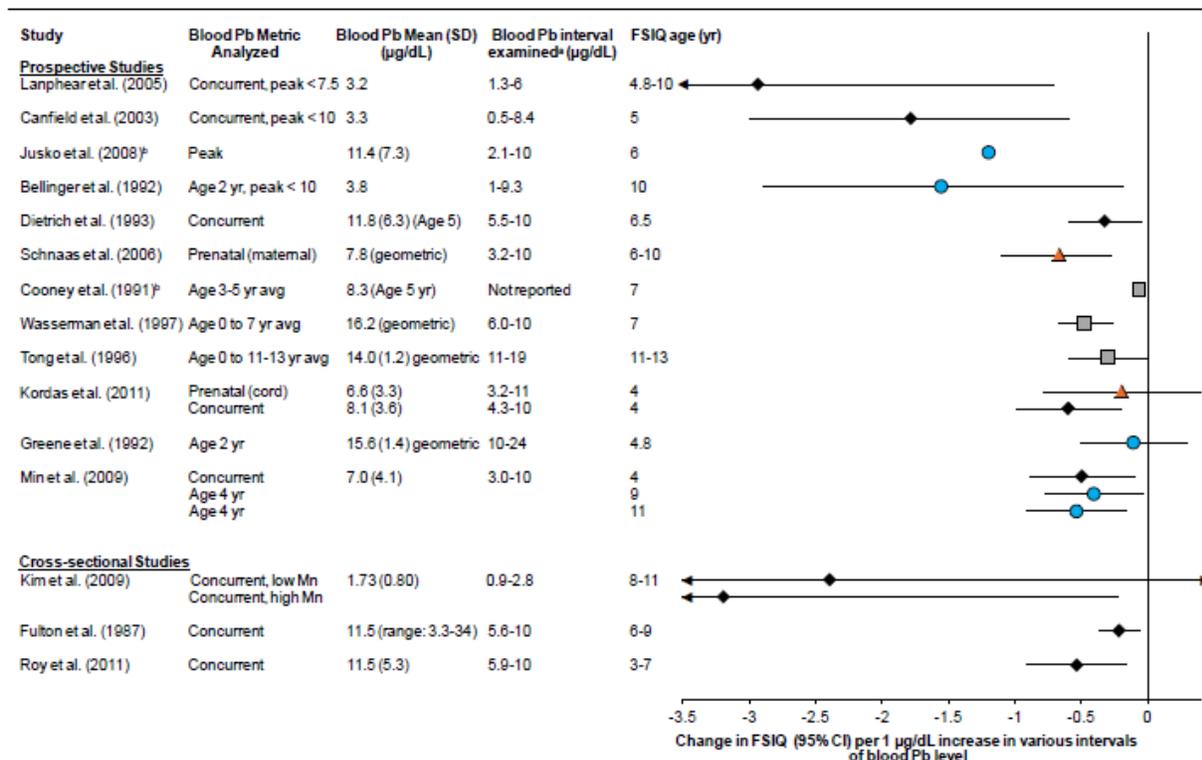

Note: Arrows depict cases where weight of overall evidence strongly substantiates likely occurrence of type of effect in association with blood-Pb concentrations in range of 5-10 µg/dL, or possibly lower, as implied by (???). Although no evident threshold has yet been clearly established for those effects, the existence of such effects at still lower blood-Pb levels cannot be ruled out based on available data.

Source: Adapted/updated from Table 1-16 of U.S. Environmental Protection Agency (1986a).

**FIGURE I-13**

Summary of Lowest Observed Effect Levels for Key Lead-Induced Health Effects in Adults (From U.S. EPA 2007), Table 3-2)

In its most recent review of lead health effects, the U.S. EPA confirmed its previous conclusion regarding the cognitive decline in children as the most sensitive adverse effect associated with lead exposures. The effects as measured by a reduction in IQ from a number of studies are shown in the following figure. According to the review, the currently available evidence supports a median estimate of -1.75 IQ points for a change of 1 µg/dL blood lead to describe the neurocognitive impacts on young children (U.S. EPA 2015c).

<sup>a</sup>See Table 4-3 for explanation of the blood Pb level interval examined. Effect estimates were calculated for the lowest range examined in the study or the 10th percentile of blood Pb level to a blood Pb level of 10 µg/dL.

<sup>b</sup>Sufficient data were not available to calculate 95% CI.

Note: Mn = manganese. Results are presented for most of the cohorts examined in the literature and generally are grouped according to strength of study design, representativeness of the study population characteristics and blood Pb levels examined, and extent of consideration for potential confounding. There is not necessarily a continuum of decreasing strength across studies. Results usually are presented for the oldest age examined in cohorts. Multiple results from a cohort are grouped together. To facilitate comparisons among effect estimates across studies with different distributions of blood Pb levels and model structures (e.g., linear, log-linear), effect estimates are standardized to a 1 µg/dL increase for the lowest range of blood Pb levels examined in the study or the interval from the 10th percentile of blood Pb level to 10 µg/dL. For populations with 10th percentiles near or above 10 µg/dL, the effect estimate was calculated for the 10th to 90th percentile of blood Pb level. The percentiles are estimated using various methods and are only approximate values. Effect estimates are assumed to be linear within the blood Pb level interval evaluated. The various tests used to measure FSIQ are scored on a similar scale (approximately 40-160 FSIQ points). Black diamonds, blue circles, orange triangles, and gray squares represent effect estimates for concurrent, earlier childhood, prenatal, and lifetime average blood Pb levels, respectively. The horizontal lines associated with point estimates represent 95% confidence intervals (CI).

**FIGURE I-14**

Associations of Blood Pb Levels with Full-Scale IQ (FSIQ) in Children (From (U.S. EPA 2013a), Figure 4-2)

## TOXIC AIR CONTAMINANTS

Toxic air contaminants are pollutants for which there generally are no ambient air quality standards. The Toxic Air Contaminant Identification and Control Act (AB 1807, Tanner, 1983) created California’s first program to reduce exposures to air toxics by requiring CARB to adopt Air Toxics Control measures. Air Districts must either enforce these measures or adopt their own equally or more stringent measures. The Air Toxics “Hot Spots” Information and Assessment Act (AB 2588, Connelly,

1987) supplements the earlier program by requiring air toxics inventories for certain facilities, notification of people's exposure to significant health risks, and facility plans to reduce these risks. Under California's Air Toxics Program, the Office of Environmental Health Hazard Assessment (OEHHA) assesses the health effects of substances that may pose a risk of adverse health effects, and CARB assesses the potential for humans to be exposed to these substances. These effects are usually an increased risk for cancer, adverse birth outcomes, or respiratory effects. After review by the state Scientific Review Panel, CARB holds a public hearing on whether to formally list substances that may pose a significant risk to public health as a Toxic Air Contaminant. Chapter 9 of the draft 2016 AQMP describes the Air Toxics Control Plan for the SCAQMD.

Air toxics include many different types of chemicals, and the discussion here will not address all air toxics in a comprehensive manner. However, this section will discuss very briefly diesel particulate matter and volatile organic compounds (VOC's), because diesel particulate matter is the most significant contributor to cancer risk in the South Coast Air Basin, and because some VOC's are air toxics, and are part of the control measures proposed in the current Air Quality Management Plan.

## Diesel Particulate Matter

The California Air Resources Board listed diesel particulate matter as a Toxic Air Contaminant in 1998, based on the determination that it was a human carcinogen (California Air Resources Board 2010b). The International Agency for Research on Cancer, an arm of the World Health Organization, classified diesel exhaust as probably carcinogenic to humans in 1989 (International Agency for Research on Cancer 1989). More recently, IARC convened an international panel of scientists to review the published literature since the initial classification regarding the carcinogenicity of diesel combustion emissions. The panel concluded that diesel exhaust is a substance that causes lung cancer in humans (International Agency for Research on Cancer 2012b).

OEHHA also establishes potency factors for air toxics that are carcinogenic. The potency factors can be used to estimate the additional cancer risk from ambient levels of toxics. This estimate represents the chance of contracting cancer in an individual over a lifetime exposure to a given level of an air toxic and is usually expressed in terms of additional cancer cases per million people exposed.

SCAQMD conducted studies on the ambient concentrations and estimated the potential health risks from air toxics (South Coast Air Quality Management District 2000; South Coast Air Quality Management District 2008; South Coast Air Quality Management District 2015). In the latest SCAQMD Multiple Air Toxics Exposure Study, MATES IV, a one-year monitoring program was undertaken at 10 sites throughout the SCAB over the time period July 2012 – June 2013 (South Coast Air Quality Management District 2015). Over 30 substances were measured, which included the toxics that contributed the most to health risks in the Basin. The results showed that the overall lifetime risk for excess cancer from a 70-year lifetime exposure to the levels of air toxics calculated from the regional model was 367 in a million. This reflects a greater than 50 percent reduction in exposures and risks compared to the MATES III Study that was conducted from 2004 -2006. The largest contributor to this risk was diesel particulate matter, accounting for 68 percent of the air

toxics risk. The average measured levels were also compared to the non-cancer chronic Reference Exposure Levels (RELs), and found to be below the established RELs for the over 30 substances measured.

In 2015, OEHHA updated the calculation procedure to estimate cancer risks from air toxics exposures (Dodge et al. 2015). The revisions to the calculation methodology included accounting for higher risks attributable to early life exposures (up to age 16 years), updates to the population distribution of breathing rates by age, and a reduction in the time of household residence. In combination, these changes resulted in risk estimates in the MATES IV study to be about 2.5 times higher than the previous methodology employed in the MATES studies. The average lifetime risk for excess cancer cases is estimated to be 897 per million using the updated procedure (South Coast Air Quality Management District 2015). However, it is important to note that results from the MATES IV study still represent approximately a 50 percent reduction in air toxics levels and cancer risk compared to MATES III. In addition to the maps in the MATES IV final report (South Coast Air Quality Management District 2015), an interactive map of the MATES IV cancer risks from air toxics calculated using the 2015 OEHHA guidelines is available through this website: <http://www.aqmd.gov/home/tools/public>.

In 2009, the Advanced Collaborative Emissions Study (ACES) reported that newer diesel engine technologies are very effective in reducing the amount of emissions from diesel trucks, as required by recent regulations (Khalek et al. 2009). In a long-term exposure study published in 2015, rats breathing the lower emissions did not develop cancer, while the rats breathing the higher emissions from older diesel engines (in previous studies) did develop cancer (McDonald et al. 2015). However, the 2015 study did not evaluate whether the PM from the newer engines was any more or less toxic compared to the older engines on a gram per gram basis; the study was not designed to determine such differences. Therefore, without any additional data on the toxicity of PM from the newer diesel engines, the analysis done in the MATES IV study used the same risk factor for both, applied to the mass of PM. For example, whether a person is exposed to 10  $\mu\text{g}/\text{m}^3$  of particulate matter from a single old diesel engine or several new diesel engines, the cancer risk would be the same because it is calculated based on 10  $\mu\text{g}/\text{m}^3$  of exposure.

In the Particulate Matter section of this Appendix, the vast majority of the studies described evaluated the health effects of total PM<sub>2.5</sub> exposures by mass, regardless of whether they were from newer diesel engines, older diesel engines, or other sources. While this new diesel technology is very effective in terms of reducing the amount of emissions from diesel trucks, what people are being exposed to is a total concentration of PM from many sources. Health studies generally use this total concentration to analyze whether or not there is an effect on the specific health outcomes evaluated. In addition, it is important to note that direct PM<sub>2.5</sub> emissions from diesel engines represent a small portion of overall PM<sub>2.5</sub> exposure. NO<sub>x</sub> emissions from diesel engines that eventually lead to PM<sub>2.5</sub> formation in the atmosphere, however, represent a larger component of PM<sub>2.5</sub> exposure (South Coast Air Quality Management District 2013a; Harley 2014).

## Volatile Organic Compounds

VOC's are a class of air pollutants that undergo photochemical reactions in the air to form ozone. It should be noted that there are no state or national ambient air quality standards for VOCs because they are not classified as criteria pollutants. VOCs are regulated, however, because limiting VOC emissions reduces the rate of photochemical reactions that contribute to the formation of ozone.

VOCs are also transformed into organic aerosols in the atmosphere, contributing to higher PM and lower visibility levels. In addition, VOC's that have toxic properties are also regulated as air toxics. Chapter 3 of the draft 2016 AQMP presents data on VOC sources and emissions in the South Coast Air Basin.

Some examples of VOC's that are known to cause health effects include benzene, toluene, ethylbenzene and xylenes (abbreviated BTEX), 1,3-butadiene, formaldehyde, and perchloroethylene. Several of these VOC's are carcinogenic. Based on the MATES IV analysis, benzene, 1,3-butadiene, and carbonyls (formaldehyde and acetaldehyde) together account for approximately 21 percent of the total cancer risk from air toxics in the SCAB. Not all carcinogenic VOC's are known to cause the same types of cancers, although several are associated with blood cancers. For example, the cancers most closely associated with long-term benzene exposure are leukemias. Formaldehyde is linked to nasopharyngeal cancer and leukemias, while 1,3-butadiene causes cancers in both the blood and lymphatic systems (International Agency for Research on Cancer 2012a).

Many VOC's can also cause non-cancer health effects. For these types of health outcomes, OEHHA has developed acute and chronic Reference Exposure Levels (RELs). RELs are concentrations in the air below which adverse health effects are not likely to occur. Acute RELs refer to short-term exposures, generally of one-hour duration. Chronic RELs refer to long-term exposures of several years. OEHHA has also established eight-hour RELs for several substances. The ratio of ambient concentration to the appropriate REL can be used to calculate a Hazard Index. A Hazard Index of less than one would not be expected to result in adverse effects (Dodge et al. 2015).

In the MATES IV assessment of chronic non-cancer health risks, the monitored air toxics levels were found to be below the chronic RELs. In other words, the general levels of air toxics in the SCAB are not expected to cause adverse non-cancer health effects. Importantly, the MATES IV monitoring network was designed to characterize the air toxics exposures in the basin overall. Given that ambient monitoring is necessarily conducted at a limited number of locations, and modeling is limited to a spatial resolution of 2km, there may be higher exposures not captured by the fixed-site monitoring. To address this limitation, particularly in some communities with environmental justice concerns, the MATES IV study also included local-scale studies in 3 communities very close to known industrial sources or large mobile source facilities, with a focus on ultrafine particles and diesel PM emissions. Details of these study results can be found in the MATES IV final report (South Coast Air Quality Management District 2015).

## ODORS

Environmental odors are recognized as having the potential to cause health effects and/or quality of life impacts. The theory of “miasma” dates back to Hippocrates in ancient Greek times, and related bad odors to disease. The health effects of environmental odors can vary widely, and depend on the compound causing the odor, the level of the compound, as well as the sensitivity and physiological responses of the person detecting the odor.

Different levels of odor exposure can cause a range of responses and health effects, and the science of odor as a potential health issue was summarized previously by Schiffman and Williams (Schiffman et al. 2005b). There are two key nerves in the nasal cavity involved in odor effects: the olfactory nerve provides the sense of smell, while the trigeminal nerve provides the sense of irritation. At very low levels, an odor can be detected (i.e. odor threshold), and at slightly higher levels, an odor can be recognized and identified. At levels higher than detection or recognition levels, an odor can cause annoyance or intolerance, and at even higher levels, an odor can cause irritation or possible toxicity, if the odor is caused by a compound that is also an air toxic (Schiffman et al. 2005b).

Schiffman and Williams proposed three mechanisms of action for odor symptoms (Schiffman et al. 2005b). In the first mechanism, an odor substance can be at the level that can produce irritation, which triggers the trigeminal nerve. This mechanism is considered a toxic effect because symptoms appear when the chemical concentration is at or above the irritation level; here, the odor serves only as the marker of the toxic effect. In the second mechanism, the odor compound is below the irritation level but above odor detection thresholds, which can result in odor annoyance. This mechanism is relatively common among environmental odors, and has been studied in communities exposed to odors from landfills, hazardous waste sites or concentrated animal feeding operations (CAFO’s) (Shusterman et al. 1991; Schiffman et al. 2005a; Heaney et al. 2011; Schinasi et al. 2011; Blanes-Vidal et al. 2012; Hooiveld et al. 2015). In this mechanism, the health effect is not a toxicological effect, and the dose does not necessarily correlate well with the effect in these instances. Genetic factors, previous exposure (“learning”), and beliefs about the safety of the odor may play important roles in these odors causing health symptoms (Shusterman 2001). The third proposed mechanism is when an odor substance is present along with a co-pollutant or endotoxin that is capable of producing health effects. In this mechanism, the effect is also a toxic effect, but the odor serves as a marker of the presence of a mixture that includes a toxic compound; if the co-pollutant were not present, no health effect would be expected in this scenario.

Individual characteristics can play important roles in altering an individual’s response to an odor. Factors that can influence odor perception include age, genetics, gender, medical history (including mental health, neurological conditions, and other health conditions), health-related behaviors (tobacco, alcohol), and occupational and environmental factors (Greenberg et al. 2013; Wilson et al. 2014; Agency for Toxic Substances and Disease Registry 2016). Additionally, an individual’s cognitive associations with the odor prior to an exposure can result in increased reporting of health-related symptoms after exposure (Shusterman et al. 1991; Shusterman 2001; Greenberg et al. 2013). Common symptoms associated with environmental odor exposures include headache, nasal

congestion, eye, nose and throat irritation, hoarseness or sore throat, cough, chest tightness, shortness of breath, wheezing heart palpitations, nausea, drowsiness, and mental depression (Agency for Toxic Substances and Disease Registry 2016). If the concentrations of the odor compound are below irritation levels, then the symptoms are not expected to persist once the person is no longer exposed; however, being exposed to odor levels at or above irritation levels for longer periods of time may cause symptoms that persist after moving out of the exposure area (Agency for Toxic Substances and Disease Registry 2016).

## CONCLUSIONS

A large body of scientific evidence shows that the adverse impacts of air pollution on human and animal health are clear. A considerable number of population-based and laboratory studies have established a link between air pollution and increased morbidity and, in some instances, premature mortality. Importantly, the health effects of air pollution extend beyond respiratory effects, and there is substantial evidence that air pollution (including particulate matter and ozone) exposures cause cardiovascular morbidity and mortality. Some air pollutants, such as diesel PM, lead, and several other air toxics, have been linked to increased cancer risk. Health studies have also identified populations who may be more susceptible to the adverse effects of air pollution, such as children, older adults, low SES communities, people with certain pre-existing health conditions, and people with certain genetic factors. Understanding the impacts of air pollution on these more susceptible populations can help inform policies that better protect public health, for example, in setting standards for criteria air pollutants, and in the development of methods to evaluate air toxics health risks. Continued research on the effects of specific PM constituents and ultrafine particles will be important in furthering the understanding of how these pollutants affect human health.

As the scientific methods for the study of air pollution health effects have progressed over the past decades, adverse effects have been shown to occur at lower levels of exposure. For some pollutants, no clear thresholds for effects have been demonstrated. The new findings have, in turn, led to the revision and lowering of National Ambient Air Quality Standards (NAAQS) which, in the judgment of the Administrator of the U.S. EPA, are necessary to protect public health. Chapter 8 of the draft 2016 AQMP provides an overview of the extensive, multi-year, public process involved in setting federal air quality standards. Assessments of the scientific evidence from health studies is an important part of the process, and has helped inform revisions to the federal air pollution standards. Figures I-15 and I-16 are meant to convey some of the historical context to recent revisions to the NAAQS for ozone and for particulate matter, with regard to key developments in the understanding of the health effects of these pollutants.

**TO THE HONORABLE CHIEF JUSTICE AND JUSTICES OF THE  
SUPREME COURT:**

**APPLICATION FOR LEAVE TO FILE *AMICUS CURIAE* BRIEF**

Pursuant to Rule 8.520(f) of the California Rules of Court, the South Coast Air Quality Management District (SCAQMD) respectfully requests leave to file the attached *amicus curiae* brief. Because SCAQMD's position differs from that of either party, we request leave to submit this *amicus* brief in support of neither party.

**HOW THIS BRIEF WILL ASSIST THE COURT**

SCAQMD's proposed *amicus* brief takes a position on two of the issues in this case. In both instances, its position differs from that of either party. The issues are:

- 1) Does the California Environmental Quality Act (CEQA) require an environmental impact report (EIR) to correlate a project's air pollution emissions with specific levels of health impacts?
- 2) What is the proper standard of review for determining whether an EIR provides sufficient information on the health impacts caused by a project's emission of air pollutants?

This brief will assist the Court by discussing the practical realities of correlating identified air quality impacts with specific health outcomes. In short, CEQA requires agencies to provide detailed information about a project's air quality impacts that is sufficient for the public and decisionmakers to adequately evaluate the project and meaningfully understand its impacts. However, the level of analysis is governed by a rule of reason; CEQA only requires agencies to conduct analysis if it is reasonably feasible to do so.

With regard to health-related air quality impacts, an analysis that correlates a project's air pollution emissions with specific levels of health impacts will be feasible in some cases but not others. Whether it is feasible depends on a variety of factors, including the nature of the project and the nature of the analysis under consideration. The feasibility of analysis may also change over time as air districts and others develop new tools for measuring projects' air quality related health impacts. Because SCAQMD has among the most sophisticated air quality modeling and health impact evaluation capability of any of the air districts in the State, it is uniquely situated to express an opinion on the extent to which the Court should hold that CEQA requires lead agencies to correlate air quality impacts with specific health outcomes.

SCAQMD can also offer a unique perspective on the question of the appropriate standard of review. SCAQMD submits that the proper standard of review for determining whether an EIR is sufficient as an informational document is more nuanced than argued by either party. In our view, this is a mixed question of fact and law. It includes determining whether additional analysis is feasible, which is primarily a factual question that should be reviewed under the substantial evidence standard. However, it also involves determining whether the omission of a particular analysis renders an EIR insufficient to serve CEQA's purpose as a meaningful, informational document. If a lead agency has not determined that a requested analysis is infeasible, it is the court's role to determine whether the EIR nevertheless meets CEQA's purposes, and courts should not defer to the lead agency's conclusions regarding the legal sufficiency of an EIR's analysis. The ultimate question of whether an EIR's analysis is "sufficient" to serve CEQA's informational purposes is predominately a question of law that courts should review *de novo*.

This brief will explain the rationale for these arguments and may assist the Court in reaching a conclusion that accords proper respect to a lead agency's factual conclusions while maintaining judicial authority over the ultimate question of what level of analysis CEQA requires.

### **STATEMENT OF INTEREST OF *AMICUS CURIAE***

The SCAQMD is the regional agency primarily responsible for air pollution control in the South Coast Air Basin, which consists of all of Orange County and the non-desert portions of the Los Angeles, Riverside, and San Bernardino Counties. (Health & Saf. Code § 40410; Cal. Code Regs., tit. 17, § 60104.) The SCAQMD participates in the CEQA process in several ways. Sometimes it acts as a lead agency that prepares CEQA documents for projects. Other times it acts as a responsible agency when it has permit authority over some part of a project that is undergoing CEQA review by a different lead agency. Finally, SCAQMD also acts as a commenting agency for CEQA documents that it receives because it is a public agency with jurisdiction by law over natural resources affected by the project.

In all of these capacities, SCAQMD will be affected by the decision in this case. SCAQMD sometimes submits comments requesting that a lead agency perform an additional type of air quality or health impacts analysis. On the other hand, SCAQMD sometimes determines that a particular type of health impact analysis is not feasible or would not produce reliable and informative results. Thus, SCAQMD will be affected by the Court's resolution of the extent to which CEQA requires EIRs to correlate emissions and health impacts, and its resolution of the proper standard of review.

**CERTIFICATION REGARDING AUTHORSHIP AND FUNDING**

No party or counsel in the pending case authored the proposed amicus curiae brief in whole or in part, or made any monetary contribution intended to fund the preparation or submission of the brief. No person or entity other than the proposed *Amicus Curiae* made any monetary contribution intended to fund the preparation or submission of the brief.

Respectfully submitted,

DATED: April 3, 2015

SOUTH COAST AIR QUALITY  
MANAGEMENT DISTRICT  
KURT R. WIESE, GENERAL COUNSEL  
BARBARA BAIRD, CHIEF DEPUTY COUNSEL

By:   
Barbara Baird

*SOUTH COAST AIR QUALITY*  
*MANAGEMENT DISTRICT*

## BRIEF OF AMICUS CURIAE

### SUMMARY OF ARGUMENT

The South Coast Air Quality Management District (SCAQMD) submits that this Court should not try to establish a hard-and-fast rule concerning whether lead agencies are required to correlate emissions of air pollutants with specific health consequences in their environmental impact reports (EIR). The level of detail required in EIRs is governed by a few, core CEQA (California Environmental Quality Act) principles. As this Court has stated, “[a]n EIR must include detail sufficient to enable those who did not participate in its preparation to understand and to consider meaningfully the issues raised by the proposed project.” (*Laurel Heights Improvement Assn. v. Regents of the Univ of Cal.* (1988) 47 Cal.3d 376, 405 [*“Laurel Heights I”*]) Accordingly, “an agency must use its best efforts to find out and disclose all that it reasonably can.” (*Vineyard Area Citizens for Responsible Growth, Inc. v. City of Rancho Cordova* (2007) 40 Cal.4th 412, 428 (quoting CEQA Guidelines § 15144)<sup>1</sup>). However, “[a]nalysis of environmental effects need not be exhaustive, but will be judged in light of what is reasonably feasible.” (*Association of Irrigated Residents v. County of Madera* (2003) 107 Cal.App.4th 1383, 1390; CEQA Guidelines §§ 15151, 15204(a).)

With regard to analysis of air quality related health impacts, EIRs must generally quantify a project’s pollutant emissions, but in some cases it is not feasible to correlate these emissions to specific, quantifiable health impacts (e.g., premature mortality; hospital admissions). In such cases, a general description of the adverse health impacts resulting from the pollutants at issue may be sufficient. In other cases, due to the magnitude

---

<sup>1</sup> The CEQA Guidelines are found at Cal. Code Regs., tit. 14 §§ 15000, *et seq.*

or nature of the pollution emissions, as well as the specificity of the project involved, it may be feasible to quantify health impacts. Or there may be a less exacting, but still meaningful analysis of health impacts that can feasibly be performed. In these instances, agencies should disclose those impacts.

SCAQMD also submits that whether or not an EIR complies with CEQA's informational mandates by providing sufficient, feasible analysis is a mixed question of fact and law. Pertinent here, the question of whether an EIR's discussion of health impacts from air pollution is sufficient to allow the public to understand and consider meaningfully the issues involves two inquiries: (1) Is it feasible to provide the information or analysis that a commenter is requesting or a petitioner is arguing should be required?; and (2) Even if it is feasible, is the agency relying on other policy or legal considerations to justify not preparing the requested analysis? The first question of whether an analysis is feasible is primarily a question of fact that should be judged by the substantial evidence standard. The second inquiry involves evaluating CEQA's information disclosure purposes against the asserted reasons to not perform the requested analysis. For example, an agency might believe that its EIR meets CEQA's informational disclosure standards even without a particular analysis, and therefore choose not to conduct that analysis. SCAQMD submits that this is more of a legal question, which should be reviewed de novo as a question of law.

## **ARGUMENT**

### **I. RELEVANT FACTUAL AND LEGAL FRAMEWORK.**

#### **A. Air Quality Regulatory Background**

The South Coast Air Quality Management District (SCAQMD) is one of the local and regional air pollution control districts and air quality

management districts in California. The SCAQMD is the regional air pollution agency for the South Coast Air Basin, which consists of all of Orange County and the non-desert portions of Los Angeles, Riverside, and San Bernardino Counties. (Health & Saf. Code § 40410, 17 Cal. Code Reg. § 60104.) The SCAQMD also includes the Coachella Valley in Riverside County (Palm Springs area to the Salton Sea). (SCAQMD, *Final 2012 AQMP (Feb. 2013)*, <http://www.aqmd.gov/home/library/clean-air-plans/air-quality-mgt-plan/final-2012-air-quality-management-plan>; then follow “chapter 7” hyperlink; pp 7-1, 7-3 (last visited Apr. 1, 2015).) The SCAQMD's jurisdiction includes over 16 million residents and has the worst or nearly the worst air pollution levels in the country for ozone and fine particulate matter. (SCAQMD, *Final 2012 AQMP (Feb. 2013)*, <http://www.aqmd.gov/home/library/clean-air-plans/air-quality-mgt-plan/final-2012-air-quality-management-plan>; then follow “Executive Summary” hyperlink p. ES-1 (last visited Apr. 1, 2015).)

Under California law, the local and regional districts are primarily responsible for controlling air pollution from all sources except motor vehicles. (Health & Saf. Code § 40000.) The California Air Resources Board (CARB), part of the California Environmental Protection Agency, is primarily responsible for controlling pollution from motor vehicles. (*Id.*) The air districts must adopt rules to achieve and maintain the state and federal ambient air quality standards within their jurisdictions. (Health & Saf. Code § 40001.)

The federal Clean Air Act (CAA) requires the United States Environmental Protection Agency (EPA) to identify pollutants that are widely distributed and pose a threat to human health, developing a so-called “criteria” document. (42 U.S.C. § 7408; CAA § 108.) These pollutants are frequently called “criteria pollutants.” EPA must then establish “national ambient air quality standards” at levels “requisite to protect public health”,

allowing “an adequate margin of safety.” (42 U.S.C. § 7409; CAA § 109.) EPA has set standards for six identified pollutants: ozone, nitrogen dioxide, sulfur dioxide, carbon monoxide, particulate matter (PM), and lead. (U.S. EPA, National Ambient Air Quality Standards (NAAQS), <http://www.epa.gov/air/criteria.html> (last updated Oct. 21, 2014).)<sup>2</sup>

Under the Clean Air Act, EPA sets emission standards for motor vehicles and “nonroad engines” (mobile farm and construction equipment, marine vessels, locomotives, aircraft, etc.). (42 U.S.C. §§ 7521, 7547; CAA §§ 202, 213.) California is the only state allowed to establish emission standards for motor vehicles and most nonroad sources; however, it may only do so with EPA's approval. (42 U.S.C. §§ 7543(b), 7543(e); CAA §§ 209(b), 209(c).) Sources such as manufacturing facilities, power plants and refineries that are not mobile are often referred to as “stationary sources.” The Clean Air Act charges state and local agencies with the primary responsibility to attain the national ambient air quality standards. (42 U.S.C. § 7401(a)(3); CAA § 101(a)(3).) Each state must adopt and implement a plan including enforceable measures to achieve and maintain the national ambient air quality standards. (42 U.S.C. § 7410; CAA § 110.) The SCAQMD and CARB jointly prepare portion of the plan for the South Coast Air Basin and submit it for approval by EPA. (Health & Saf. Code §§ 40460, et seq.)

The Clean Air Act also requires state and local agencies to adopt a permit program requiring, among other things, that new or modified “major” stationary sources use technology to achieve the “lowest achievable emission rate,” and to control minor stationary sources as

---

<sup>2</sup> Particulate matter (PM) is further divided into two categories: fine particulate or PM<sub>2.5</sub> (particles with a diameter of less than or equal to 2.5 microns) and coarse particulate (PM<sub>10</sub>) (particles with a diameter of 10 microns or less). (U.S. EPA, Particulate Matter (PM), <http://www.epa.gov/airquality/particulatepollution/> (last visited Apr. 1, 2015).)

needed to help attain the standards. (42 U.S.C. §§ 7502(c)(5), 7503(a)(2), 7410(a)(2)(C); CAA §§ 172(c)(5), 173(a)(2), 110(a)(2)(C).) The air districts implement these permit programs in California. (Health & Saf. Code §§ 42300, et seq.)

The Clean Air Act also sets out a regulatory structure for over 100 so-called “hazardous air pollutants” calling for EPA to establish “maximum achievable control technology” (MACT) for sources of these pollutants. (42 U.S.C. § 7412(d)(2); CAA § 112(d)(2).) California refers to these pollutants as “toxic air contaminants” (TACs) which are subject to two state-required programs. The first program requires “air toxics control measures” for specific categories of sources. (Health & Saf. Code § 39666.) The other program requires larger stationary sources and sources identified by air districts to prepare “health risk assessments” for impacts of toxic air contaminants. (Health & Saf. Code §§ 44320(b), 44322, 44360.) If the health risk exceeds levels identified by the district as “significant,” the facility must implement a “risk reduction plan” to bring its risk levels below “significant” levels. Air districts may adopt additional more stringent requirements than those required by state law, including requirements for toxic air contaminants. (Health & Saf. Code § 41508; *Western Oil & Gas Assn. v. Monterey Bay Unified APCD* (1989) 49 Cal.3d 408, 414.) For example, SCAQMD has adopted a rule requiring new or modified sources to keep their risks below specified levels and use best available control technology (BACT) for toxics. (SCAQMD, *Rule 1401-New Source Review of Toxic Air Contaminants*, <http://www.aqmd.gov/home/regulations/rules/scaqmd-rule-book/regulation-xiv>; then follow “Rule 1401” hyperlink (last visited Apr. 1, 2015).)

## **B. The SCAQMD's Role Under CEQA**

The California Environmental Quality Act (CEQA) requires public agencies to perform an environmental review and appropriate analysis for projects that they implement or approve. (Pub. Resources Code § 21080(a).) The agency with primary approval authority for a particular project is generally the “lead agency” that prepares the appropriate CEQA document. (CEQA Guidelines §§ 15050, 15051.) Other agencies having a subsequent approval authority over all or part of a project are called “responsible” agencies that must determine whether the CEQA document is adequate for their use. (CEQA Guidelines §§ 15096(c), 15381.) Lead agencies must also consult with and circulate their environmental impact reports to “trustee agencies” and agencies “with jurisdiction by law” including “authority over resources which may be affected by the project.” (Pub. Resources Code §§ 21104(a), 21153; CEQA Guidelines §§ 15086(a)(3), 15073(c).) The SCAQMD has a role in all these aspects of CEQA.

Fulfilling its responsibilities to implement its air quality plan and adopt rules to attain the national ambient air quality standards, SCAQMD adopts a dozen or more rules each year to require pollution reductions from a wide variety of sources. The SCAQMD staff evaluates each rule for any adverse environmental impact and prepares the appropriate CEQA document. Although most rules reduce air emissions, they may have secondary environmental impacts such as use of water or energy or disposal of waste—e.g., spent catalyst from control equipment.<sup>3</sup>

---

<sup>3</sup> The SCAQMD's CEQA program for its rules is a “Certified Regulatory Program” under which it prepares a “functionally equivalent” document in lieu of a negative declaration or EIR. (Pub. Resources Code § 21080.5, CEQA Guidelines § 15251(l).)

The SCAQMD also approves a large number of permits every year to construct new, modified, or replacement facilities that emit regulated air pollutants. The majority of these air pollutant sources have already been included in an earlier CEQA evaluation for a larger project, are currently being evaluated by a local government as lead agency, or qualify for an exemption. However, the SCAQMD sometimes acts as lead agency for major projects where the local government does not have a discretionary approval. In such cases, SCAQMD prepares and certifies a negative declaration or environmental impact report (EIR) as appropriate.<sup>4</sup> SCAQMD evaluates perhaps a dozen such permit projects under CEQA each year. SCAQMD is often also a “responsible agency” for many projects since it must issue a permit for part of the projects (e.g., a boiler used to provide heat in a commercial building). For permit projects evaluated by another lead agency under CEQA, SCAQMD has the right to determine that the CEQA document is inadequate for its purposes as a responsible agency, but it may not do so because its permit program already requires all permitted sources to use the best available air pollution control technology. (SCAQMD, *Rule 1303(a)(1) – Requirements*, <http://www.aqmd.gov/home/regulations/rules/scaqmd-rule-book/regulation-xiii>; then follow “Rule 1303” hyperlink (last visited Apr. 1, 2015).)

Finally, SCAQMD receives as many as 60 or more CEQA documents each month (around 500 per year) in its role as commenting agency or an agency with “jurisdiction by law” over air quality—a natural resource affected by the project. (Pub. Resources Code §§ 21104(a), 21153; CEQA Guidelines § 15366(a)(3).) The SCAQMD staff provides comments on as many as 25 or 30 such documents each month.

---

<sup>4</sup> The SCAQMD's permit projects are not included in its Certified Regulatory Program, and are evaluated under the traditional local government CEQA analysis. (Pub. Resources Code §§ 21150-21154.)

(SCAQMD Governing Board Agenda, Apr. 3, 2015, Agenda Item 16, Attachment A, <http://www.aqmd.gov/home/library/meeting-agendas-minutes/agenda?title=governing-board-meeting-agenda-april-3-2015>; then follow “16. Lead Agency Projects and Environmental Documents Received by SCAQMD” hyperlink (last visited Apr. 1, 2015).) Of course, SCAQMD focuses its commenting efforts on the more significant projects.

Typically, SCAQMD comments on the adequacy of air quality analysis, appropriateness of assumptions and methodology, and completeness of the recommended air quality mitigation measures. Staff may comment on the need to prepare a health risk assessment detailing the projected cancer and noncancer risks from toxic air contaminants resulting from the project, particularly the impacts of diesel particulate matter, which CARB has identified as a toxic air contaminant based on its carcinogenic effects. (California Air Resources Board, Resolution 98-35, Aug. 27, 1998, <http://www.arb.ca.gov/regact/diesltac/diesltac.htm>; then follow Resolution 98-35 hyperlink (last visited Apr. 1, 2015).) Because SCAQMD already requires new or modified stationary sources of toxic air contaminants to use the best available control technology for toxics and to keep their risks below specified levels, (SCAQMD Rule 1401, *supra*, note 15), the greatest opportunity to further mitigate toxic impacts through the CEQA process is by reducing emissions—particularly diesel emissions—from vehicles.

**II. THIS COURT SHOULD NOT SET A HARD-AND-FAST RULE CONCERNING THE EXTENT TO WHICH AN EIR MUST CORRELATE A PROJECT’S EMISSION OF POLLUTANTS WITH RESULTING HEALTH IMPACTS.**

Numerous cases hold that courts do not review the correctness of an EIR’s conclusions but rather its sufficiency as an informative document. (*Laurel Heights 1*, *supra*, 47 Cal.3d at p. 392; *Citizens of Goleta Valley v.*

*Bd. of Supervisors* (1990) 52 Cal.3d 553, 569; *Bakersfield Citizens for Local Control v. City of Bakersfield* (2004) 124 Cal.App.4th 1184, 1197.)

As stated by the Court of Appeal in this case, where an EIR has addressed a topic, but the petitioner claims that the information provided about that topic is insufficient, courts must “draw[] a line that divides *sufficient* discussions from those that are *insufficient*.” (*Sierra Club v. County of Fresno* (2014) 226 Cal.App.4th 704 (superseded by grant of review) 172 Cal.Rptr.3d 271, 290.) The Court of Appeal readily admitted that “[t]he terms themselves – sufficient and insufficient – provide little, if any, guidance as to where the line should be drawn. They are simply labels applied once the court has completed its analysis.” (*Id.*)

The CEQA Guidelines, however, provide guidance regarding what constitutes a sufficient discussion of impacts. Section 15151 states that “the sufficiency of an EIR is to be reviewed in light of what is reasonably feasible.” Case law reflects this: “Analysis of environmental effects need not be exhaustive, but will be judged in light of what was reasonably feasible.” (*Association of Irrigated Residents v. County of Madera, supra*, 107 Cal.App.4th at p. 1390; see also CEQA Guidelines § 15204(a).)

Applying this test, this Court cannot realistically establish a hard-and-fast rule that an analysis correlating air pollution impacts of a project to quantified resulting health impacts is always required, or indeed that it is never required. Simply put, in some cases such an analysis will be “feasible”; in some cases it will not.

For example, air pollution control districts often require a proposed new source of toxic air contaminants to prepare a “health risk assessment” before issuing a permit to construct. District rules often limit the allowable cancer risk the new source may cause to the “maximally exposed individual” (worker and residence exposures). (*See, e.g.*, SCAQMD Rule 1401(c)(8); 1401(d)(1), *supra* note 15.) In order to perform this analysis, it

is necessary to have data regarding the sources and types of air toxic contaminants, location of emission points, velocity of emissions, the meteorology and topography of the area, and the location of receptors (worker and residence). (SCAQMD, *Supplemental Guidelines for Preparing Risk Assessments for the Air Toxics "Hot Spots" Information and Assessment Act (AB2588)*, pp. 11-16; (last visited Apr. 1, 2015) <http://www.aqmd.gov/home/library/documents-support-material>; "Guidelines" hyperlink; AB2588; then follow AB2588 Risk Assessment Guidelines hyperlink.)

Thus, it is feasible to determine the health risk posed by a new gas station locating at an intersection in a mixed use area, where receptor locations are known. On the other hand, it may not be feasible to perform a health risk assessment for airborne toxics that will be emitted by a generic industrial building that was built on "speculation" (i.e., without knowing the future tenant(s)). Even where a health risk assessment can be prepared, however, the resulting maximum health risk value is only a calculation of risk—it does not necessarily mean anyone will contract cancer as a result of the project.

In order to find the "cancer burden" or expected additional cases of cancer resulting from the project, it is also necessary to know the numbers and location of individuals living within the "zone of impact" of the project: i.e., those living in areas where the projected cancer risk from the project exceeds one in a million. (SCAQMD, Health Risk Assessment Summary form, <http://www.aqmd.gov/home/forms>; filter by "AB2588" category; then "Health Risk Assessment" hyperlink (last visited Apr. 1, 2015).) The affected population is divided into bands of those exposed to at least 1 in a million risk, those exposed to at least 10 in a million risk, etc. up to those exposed at the highest levels. (*Id.*) This data allows agencies to calculate an approximate number of additional cancer cases expected from

the project. However, it is not possible to predict which particular individuals will be affected.

For the so-called criteria pollutants<sup>5</sup>, such as ozone, it may be more difficult to quantify health impacts. Ozone is formed in the atmosphere from the chemical reaction of the nitrogen oxides (NO<sub>x</sub>) and volatile organic compounds (VOC) in the presence of sunlight. (U.S. EPA, Ground Level Ozone, <http://www.epa.gov/airquality/ozonepollution/> (last updated Mar. 25, 2015).) It takes time and the influence of meteorological conditions for these reactions to occur, so ozone may be formed at a distance downwind from the sources. (U.S. EPA, *Guideline on Ozone Monitoring Site Selection* (Aug. 1998) EPA-454/R-98-002 § 5.1.2, <http://www.epa.gov/ttnamti1/archive/cpreldoc.html> (last visited Apr. 1, 2015).) NO<sub>x</sub> and VOC are known as “precursors” of ozone.

Scientifically, health effects from ozone are correlated with increases in the ambient level of ozone in the air a person breathes. (U.S. EPA, *Health Effects of Ozone in the General Population*, Figure 9, <http://www.epa.gov/apti/ozonehealth/population.html#levels> (last visited Apr. 1, 2015).) However, it takes a large amount of additional precursor emissions to cause a modeled increase in ambient ozone levels over an entire region. For example, the SCAQMD's 2012 AQMP showed that reducing NO<sub>x</sub> by 432 tons per day (157,680 tons/year) and reducing VOC by 187 tons per day (68,255 tons/year) would reduce ozone levels at the SCAQMD's monitor site with the highest levels by only 9 parts per billion. (South Coast Air Quality Management District, *Final 2012 AQMP (February 2013)*, <http://www.aqmd.gov/home/library/clean-air-plans/air-quality-mgt-plan/final-2012-air-quality-management-plan>; then follow “Appendix V: Modeling & Attainment Demonstrations” hyperlink,

---

<sup>5</sup> See discussion of types of pollutants, *supra*, Part I.A.

pp. v-4-2, v-7-4, v-7-24.) SCAQMD staff does not currently know of a way to accurately quantify ozone-related health impacts caused by NO<sub>x</sub> or VOC emissions from relatively small projects.

On the other hand, this type of analysis may be feasible for projects on a regional scale with very high emissions of NO<sub>x</sub> and VOCs, where impacts are regional. For example, in 2011 the SCAQMD performed a health impact analysis in its CEQA document for proposed Rule 1315, which authorized various newly-permitted sources to use offsets from the districts “internal bank” of emission reductions. This CEQA analysis accounted for essentially *all* the increases in emissions due to new or modified sources in the District between 2010 and 2030.<sup>6</sup> The SCAQMD was able to correlate this very large emissions increase (e.g., 6,620 pounds per day NO<sub>x</sub> (1,208 tons per year), 89,180 pounds per day VOC (16,275 tons per year)) to expected health outcomes from ozone and particulate matter (e.g., 20 premature deaths per year and 89,947 school absences in the year 2030 due to ozone).<sup>7</sup> (SCAQMD Governing Board Agenda, February 4, 2011, Agenda Item 26, *Assessment for: Re-adoption of Proposed Rule 1315 – Federal New Source Review Tracking System* (see hyperlink in fn 6) at p. 4.1-35, Table 4.1-29.)

---

<sup>6</sup> (SCAQMD Governing Board Agenda, February 4, 2011, Agenda Item 26, Attachment G, *Assessment for: Re-adoption of Proposed Rule 1315 – Federal New Source Review Tracking System, Vol. 1, p.4.0-6*, <http://www.aqmd.gov/home/library/meeting-agendas-minutes/agenda?title=governing-board-meeting-agenda-february-4-2011>; the follow “26. Adopt Proposed Rule 1315 – Federal New Source Review Tracking System” (last visited April 1, 2015).)

<sup>7</sup> The SCAQMD was able to establish the location of future NO<sub>x</sub> and VOC emissions by assuming that new projects would be built in the same locations and proportions as existing stationary sources. This CEQA document was upheld by the Los Angeles County Superior Court in *Natural Res. Def. Council v SCAQMD*, Los Angeles Superior Court No. BS110792).

However, a project emitting only 10 tons per year of NO<sub>x</sub> or VOC is small enough that its regional impact on ambient ozone levels may not be detected in the regional air quality models that are currently used to determine ozone levels. Thus, in this case it would not be feasible to directly correlate project emissions of VOC or NO<sub>x</sub> with specific health impacts from ozone. This is in part because ozone formation is not linearly related to emissions. Ozone impacts vary depending on the location of the emissions, the location of other precursor emissions, meteorology and seasonal impacts, and because ozone is formed some time later and downwind from the actual emission. (EPA Guideline on Ozone Monitoring Site Selection (Aug. 1998) EPA-454/R-98-002, § 5.1.2; <https://www.epa.gov/ttnamti1/archive/cpreldoc.html>; then search “Guideline on Ozone Monitoring Site Selection” click on pdf) (last viewed Apr. 1, 2015).)

SCAQMD has set its CEQA “significance” threshold for NO<sub>x</sub> and VOC at 10 tons per year (expressed as 55 lb/day). (SCAQMD, *Air Quality Analysis Handbook*, <http://www.aqmd.gov/home/regulations/ceqa/air-quality-analysis-handbook>; then follow “SCAQMD Air Quality Significance Thresholds” hyperlink (last visited Apr. 1, 2015).) This is because the federal Clean Air Act defines a “major” stationary source for “extreme” ozone nonattainment areas such as SCAQMD as one emitting 10 tons/year. (42 U.S.C. §§ 7511a(e), 7511a(f); CAA §§ 182(e), 182(f).) Under the Clean Air Act, such sources are subject to enhanced control requirements (42 U.S.C. §§ 7502(c)(5), 7503; CAA §§ 172(c)(5), 173), so SCAQMD decided this was an appropriate threshold for making a CEQA “significance” finding and requiring feasible mitigation. Essentially, SCAQMD takes the position that a source that emits 10 tons/year of NO<sub>x</sub> or VOC would contribute cumulatively to ozone formation. Therefore, lead agencies that use SCAQMD’s thresholds of significance may determine

that many projects have “significant” air quality impacts and must apply all feasible mitigation measures, yet will not be able to precisely correlate the project to quantifiable health impacts, unless the emissions are sufficiently high to use a regional modeling program.

In the case of particulate matter (PM<sub>2.5</sub>)<sup>8</sup>, another “criteria” pollutant, SCAQMD staff is aware of two possible methods of analysis. SCAQMD used regional modeling to predict expected health impacts from its proposed Rule 1315, as mentioned above. Also, the California Air Resources Board (CARB) has developed a methodology that can predict expected mortality (premature deaths) from large amounts of PM<sub>2.5</sub>. (California Air Resources Board, *Health Impacts Analysis: PM Premature Death Relationship*, [http://www.arb.ca.gov/research/health/pm-mort/pm-mort\\_arch.htm](http://www.arb.ca.gov/research/health/pm-mort/pm-mort_arch.htm) (last reviewed Jan. 19, 2012).) SCAQMD used the CARB methodology to predict impacts from three very large power plants (e.g., 731-1837 lbs/day). (Final Environmental Assessment for Rule 1315, *supra*, pp 4.0-12, 4.1-13, 4.1-37 (e.g., 125 premature deaths in the entire SCAQMD in 2030), 4.1-39 (0.05 to 1.77 annual premature deaths from power plants.) Again, this project involved large amounts of additional PM<sub>2.5</sub> in the District, up to 2.82 tons/day (5,650 lbs/day of PM<sub>2.5</sub>, or, or 1029 tons/year. (*Id.* at table 4.1-4, p. 4.1-10.)

However, the primary author of the CARB methodology has reported that this PM<sub>2.5</sub> health impact methodology is not suited for small projects and may yield unreliable results due to various uncertainties.<sup>9</sup> (SCAQMD, *Final Subsequent Mitigated Negative Declaration for: Warren*

---

<sup>8</sup> SCAQMD has not attained the latest annual or 24-hour national ambient air quality standards for “PM<sub>2.5</sub>” or particulate matter less than 2.5 microns in diameter.

<sup>9</sup> Among these uncertainties are the representativeness of the population used in the methodology, and the specific source of PM and the corresponding health impacts. (*Id.* at p. 2-24.)

*E&P, Inc. WTU Central Facility, New Equipment Project* (certified July 19, 2011), <http://www.aqmd.gov/home/library/documents-support-material/lead-agency-permit-projects/permit-project-documents---year-2011>; then follow “Final Subsequent Mitigated Negative Declaration for Warren E&P Inc. WTU Central Facility, New Equipment Project” hyperlink, pp. 2-22, 2-23 (last visited Apr. 1, 2015).) Therefore, when SCAQMD prepared a CEQA document for the expansion of an existing oil production facility, with very small PM<sub>2.5</sub> increases (3.8 lb/day) and a very small affected population, staff elected not to use the CARB methodology for using estimated PM<sub>2.5</sub> emissions to derive a projected premature mortality number and explained why it would be inappropriate to do so. (*Id.* at pp 2-22 to 2-24.) SCAQMD staff concluded that use of this methodology for such a small source could result in unreliable findings and would not provide meaningful information. (*Id.* at pp. 2-23, 2-25.) This CEQA document was not challenged in court.

In the above case, while it may have been technically possible to plug the data into the methodology, the results would not have been reliable or meaningful. SCAQMD believes that an agency should not be required to perform analyses that do not produce reliable or meaningful results. This Court has already held that an agency may decline to use even the “normal” “existing conditions” CEQA baseline where to do so would be misleading or without informational value. (*Neighbors for Smart Rail v. Exposition Metro Line* (2013) 57 Cal.4th 439, 448, 457.) The same should be true for a decision that a particular study or analysis would not provide reliable or meaningful results.<sup>10</sup>

---

<sup>10</sup> Whether a particular study would result in “informational value” is a part of deciding whether it is “feasible.” CEQA defines “feasible” as “capable of being accomplished in a successful manner within a reasonable period of time, taking into account economic, environmental, social, and

Therefore, it is not possible to set a hard-and-fast rule on whether a correlation of air quality impacts with specific quantifiable health impacts is required in all cases. Instead, the result turns on whether such an analysis is reasonably feasible in the particular case.<sup>11</sup> Moreover, what is reasonably feasible may change over time as scientists and regulatory agencies continually seek to improve their ability to predict health impacts. For example, CARB staff has been directed by its Governing Board to reassess and improve the methodology for estimating premature deaths. (California Air Resources Board, *Health Impacts Analysis: PM Mortality Relationship*, <http://www.arb.ca.gov/research/health/pm-mort/pm-mort.htm> (last reviewed Dec. 29, 2010).) This factor also counsels against setting any hard-and-fast rule in this case.

### **III. THE QUESTION OF WHETHER AN EIR CONTAINS SUFFICIENT ANALYSIS TO MEET CEQA'S REQUIREMENTS IS A MIXED QUESTION OF FACT AND LAW GOVERNED BY TWO DIFFERENT STANDARDS OF REVIEW.**

#### **A. Standard of Review for Feasibility Determination and Sufficiency as an Informative Document**

A second issue in this case is whether courts should review an EIR's informational sufficiency under the “substantial evidence” test as argued by Friant Ranch or the “independent judgment” test as argued by Sierra Club.

---

technological factors.” (Pub. Resources Code § 21061.1.) A study cannot be “accomplished in a *successful* manner” if it produces unreliable or misleading results.

<sup>11</sup> In this case, the lead agency did not have an opportunity to determine whether the requested analysis was feasible because the comment was non-specific. Therefore, SCAQMD suggests that this Court, after resolving the legal issues in the case, direct the Court of Appeal to remand the case to the lead agency for a determination of whether the requested analysis is feasible. Because Fresno County, the lead agency, did not seek review in this Court, it seems likely that the County has concluded that at least some level of correlation of air pollution with health impacts is feasible.

As this Court has explained, “a reviewing court must adjust its scrutiny to the nature of the alleged defect, depending on whether the claim is predominantly one of improper procedure or a dispute over the facts.” (*Vineyard Area Citizens v. City of Rancho Cordova, supra*, 40 Cal.4th at 435.) For questions regarding compliance with proper procedure or other legal questions, courts review an agency’s action de novo under the “independent judgment” test. (*Id.*) On the other hand, courts review factual disputes only for substantial evidence, thereby “accord[ing] greater deference to the agency’s substantive factual conclusions.” (*Id.*)

Here, Friant Ranch and Sierra Club agree that the case involves the question of whether an EIR includes sufficient information regarding a project’s impacts. However, they disagree on the proper standard of review for answering this question: Sierra Club contends that courts use the independent judgment standard to determine whether an EIR’s analysis is sufficient to meet CEQA’s informational purposes,<sup>12</sup> while Friant Ranch contends that the substantial evidence standard applies to this question.

///

---

<sup>12</sup> Sierra Club acknowledges that courts use the substantial evidence standard when reviewing predicate factual issues, but argues that courts ultimately decide as a matter of law what CEQA requires. (Answering Brief, pp. 14, 23.)

SCAQMD submits that the issue is more nuanced than either party contends. We submit that, whether a CEQA document includes sufficient analysis to satisfy CEQA's informational mandates is a mixed question of fact and law,<sup>13</sup> containing two levels of inquiry that should be judged by different standards.<sup>14</sup>

The state CEQA Guidelines set forth standards for the adequacy of environmental analysis. Guidelines Section 15151 states:

An EIR should be prepared with a sufficient degree of analysis to provide decision makers with information which enables them to make a decision which intelligently takes account of environmental consequences. An evaluation of the environmental effects of a proposed project need not be exhaustive, but the sufficiency of an EIR is to be reviewed in light of what is reasonably feasible. Disagreement among experts does not make an EIR inadequate, but the EIR should summarize the main points of disagreement among the experts. The courts have looked not for perfection, but for adequacy, completeness, and a good-faith effort at full disclosure.

In this case, the basic question is whether the underlying analysis of air quality impacts made the EIR "sufficient" as an informative document. However, whether the EIR's analysis was sufficient is judged in light of what was reasonably feasible. This represents a mixed question of fact and law that is governed by two different standards of review.

---

<sup>13</sup> Friant Ranch actually states that the claim that an EIR lacks sufficient relevant information is, "most properly thought of as raising mixed questions of fact and law." (Opening Brief, p. 27.) However, the remainder of its argument claims that the court should apply the substantial evidence standard of review to all aspects of the issue.

<sup>14</sup> Mixed questions of fact and law issues may implicate predominantly factual subordinate questions that are reviewed under the substantial evidence test even though the ultimate question may be reviewed by the independent judgment test. *Crocker National Bank v. City and County of San Francisco* (1989) 49 Cal.3d 881, 888-889.

SCAQMD submits that an EIR's sufficiency as an informational document is ultimately a legal question that courts should determine using their independent judgment. This Court's language in *Laurel Heights I* supports this position. As this Court explained: "The court does not pass upon the correctness of the EIR's environmental conclusions, but only upon its *sufficiency as an informative document*." (*Laurel Heights I, supra*, 47 Cal.3d at 392-393) (emphasis added.) As described above, the Court in *Vineyard Area Citizens v. City of Rancho Cordova, supra*, 40 Cal.4th at 431, also used its independent judgment to determine what level of analysis CEQA requires for water supply impacts. The Court did not defer to the lead agency's opinion regarding the law's requirements; rather, it determined for itself what level of analysis was necessary to meet "[t]he law's informational demands." (*Id.* at p. 432.) Further, existing case law also holds that where an agency fails to comply with CEQA's information disclosure requirements, the agency has "failed to proceed in the manner required by law." (*Save Our Peninsula Comm. v. Monterey County Bd. of Supervisors* (2001) 87 Cal.App.4th 99, 118.)

However, whether an EIR satisfies CEQA's requirements depends in part on whether it was reasonably feasible for an agency to conduct additional or more thorough analysis. EIRs must contain "a detailed statement" of a project's impacts (Pub. Res. Code § 21061), and an agency must "use its best efforts to find out and disclose all that it reasonably can." (CEQA Guidelines § 15144.) Nevertheless, "the sufficiency of an EIR is to be reviewed in light of what is reasonably feasible." (CEQA Guidelines § 15151.)

SCAQMD submits that the question of whether additional analysis or a particular study suggested by a commenter is "feasible" is generally a question of fact. Courts have already held that whether a particular alternative is "feasible" is reviewed by the substantial evidence test.

(*Uphold Our Heritage v. Town of Woodside* (2007) 147 Cal.App.4th 587, 598-99; *Center for Biological Diversity v. County of San Bernardino* (2010) 185 Cal.App.4th 866, 883.) Thus, if a lead agency determines that a particular study or analysis is infeasible, that decision should generally be judged by the substantial evidence standard. However, SCAQMD urges this Court to hold that lead agencies must explain the basis of any determination that a particular analysis is infeasible in the EIR itself. An EIR must discuss information, including issues related to the feasibility of particular analyses “in sufficient detail to enable meaningful participation and criticism by the public. ‘[W]hatever is required to be considered in an EIR must be in that formal report; what any official might have known from other writings or oral presentations cannot supply what is lacking in the report.’” (*Laurel Heights I, supra*, 47 Cal.3d at p. 405 (quoting *Santiago County Water District v. County of Orange* (1981) 118 Cal.App.3d 818, 831) (discussing analysis of alternatives).) The evidence on which the determination is based should also be summarized in the EIR itself, with appropriate citations to reference materials if necessary. Otherwise commenting agencies such as SCAQMD would be forced to guess where the lead agency's evidence might be located, thus thwarting effective public participation.

Moreover, if a lead agency determines that a particular study or analysis would not result in reliable or useful information and for that reason is not feasible, that determination should be judged by the substantial evidence test. (See *Neighbors for Smart Rail v. Exposition Metro Line Construction Authority, supra*, 57 Cal.4th 439, 448, 457:

whether “existing conditions” baseline would be misleading or uninformative judged by substantial evidence standard.<sup>15</sup>)

If the lead agency’s determination that a particular analysis or study is not feasible is supported by substantial evidence, then the agency has not violated CEQA’s information disclosure provisions, since it would be infeasible to provide additional information. This Court’s decisions provide precedent for such a result. For example, this Court determined that the issue of whether the EIR should have included a more detailed discussion of future herbicide use was resolved because substantial evidence supported the agency’s finding that “the precise parameters of future herbicide use could not be predicted.” *Ebbetts Pass Forest Watch v. California Dept. of Forestry & Fire Protection* (2008) 43 Cal.4th 936, 955.

Of course, SCAQMD expects that courts will continue to hold lead agencies to their obligations to consult with, and not to ignore or misrepresent, the views of sister agencies having special expertise in the area of air quality. (*Berkeley Keep Jets Over the Bay v. Board of Port Commissioners* (2007) 91 Cal.App.4<sup>th</sup> 1344, 1364 n.11.) In some cases, information provided by such expert agencies may establish that the purported evidence relied on by the lead agency is not in fact “substantial”. (*Id.* at pp. 1369-1371.)

In sum, courts retain ultimate responsibility to determine what CEQA requires. However, the law does not require exhaustive analysis, but only what is reasonably feasible. Agencies deserve deference for their factual determinations regarding what type of analysis is reasonably feasible. On the other hand, if a commenter requests more information, and the lead agency declines to provide it but does *not* determine that the

---

<sup>15</sup> The substantial evidence standard recognizes that the courts "have neither the resources nor the scientific expertise" to weigh conflicting evidence on technical issues. (*Laurel Heights I, supra*, 47 Cal.3d 376, 393.)

requested study or analysis would be infeasible, misleading or uninformative, the question becomes whether the omission of that analysis renders the EIR inadequate to satisfy CEQA's informational purposes. (*Id.* at pp. 1370-71.) Again, this is predominantly a question of law and should be judged by the de novo or independent judgment standard of review. Of course, this Court has recognized that a "project opponent or reviewing court can always imagine some additional study or analysis that might provide helpful information. It is not for them to design the EIR. That further study...might be helpful does not make it necessary." (*Laurel Heights I, supra*, 47 Cal.3d 376, 415 – see also CEQA Guidelines § 15204(a) [CEQA "does not require a lead agency to conduct every test. . . recommended or demanded by commenters."].) Courts, then, must adjudicate whether an omission of particular information renders an EIR inadequate to serve CEQA's informational purposes.<sup>16</sup>

---

<sup>16</sup> We recognize that there is case law stating that the substantial evidence standard applies to "challenges to the scope of an EIR's analysis of a topic" as well as the methodology used and the accuracy of the data relied on in the document "because these types of challenges involve factual questions." (*Bakersfield Citizens for Local Control v. City of Bakersfield, supra*, 124 Cal.App.4<sup>th</sup> 1184, 1198, and cases relied on therein.) However, we interpret this language to refer to situations where the question of the scope of the analysis really is factual—that is, where it involves whether further analysis is feasible, as discussed above. This interpretation is supported by the fact that the *Bakersfield* court expressly rejected an argument that a claimed "omission of information from the EIR should be treated as inquiries whether there is substantial evidence supporting the decision approving the project." *Bakersfield, supra*, 124 Cal.App.4<sup>th</sup> at p. 1208. And the *Bakersfield* court ultimately decided that the lead agency must analyze the connection between the identified air pollution impacts and resulting health impacts, even though the EIR already included some discussion of air-pollution-related respiratory illnesses. *Bakersfield, supra*, 124 Cal.App.4<sup>th</sup> at p. 1220. Therefore, the court must not have interpreted this question as one of the "scope of the analysis" to be judged by the substantial evidence standard.

**B. Friant Ranch's Rationale for Rejecting the Independent Judgment Standard of Review is Unsupported by Case Law.**

In its brief, Friant Ranch makes a distinction between cases where a required CEQA topic is not discussed at all (to be reviewed by independent judgment as a failure to proceed in the manner required by law) and cases where a topic is discussed, but the commenter claims the information provided is insufficient (to be judged by the substantial evidence test). (Opening Brief, pp. 13-17.) The Court of Appeal recognized these two types of cases, but concluded that both raised questions of law. (*Sierra Club v. County of Fresno* (2014) 226 Cal.App.4th 704 (superseded by grant of review) 172 Cal.Rptr.3d 271, 290.) We believe the distinction drawn by Friant Ranch is unduly narrow, and inconsistent with cases which have concluded that CEQA documents are insufficient. In many instances, CEQA's requirements are stated broadly, and the courts must interpret the law to determine what level of analysis satisfies CEQA's mandate for providing meaningful information, even though the EIR discusses the issue to some extent.

For example, the CEQA Guidelines require discussion of the existing environmental baseline. In *County of Amador v. El Dorado County Water Agency* (1999) 76 Cal.App.4th 931, 954-955, the lead agency had discussed the environmental baseline by describing historic month-end water levels in the affected lakes. However, the court held that this was not an adequate baseline discussion because it failed to discuss the timing and amounts of past actual water releases, to allow comparison with the proposed project. The court evidently applied the independent judgment test to its decision, even though the agency discussed the issue to some extent.

Likewise, in *Vineyard Area Citizens* (2007) 40 Cal.4th 412, this Court addressed the question of whether an EIR's analysis of water supply impacts complied with CEQA. The parties agreed that the EIR was required to analyze the effects of providing water to the development project, "and that in order to do so the EIR had, in some manner, to identify the planned sources of that water." (*Vineyard Area Citizens, supra*, at p. 428.) However, the parties disagreed as to the level of detail required for this analysis and "what level of uncertainty regarding the availability of water supplies can be tolerated in an EIR . . . ." (*Id.*) In other words, the EIR had analyzed water supply impacts for the project, but the petitioner claimed that the analysis was insufficient.

This Court noted that neither CEQA's statutory language or the CEQA Guidelines specifically addressed the question of how precisely an EIR must discuss water supply impacts. (*Id.*) However, it explained that CEQA "states that '[w]hile foreseeing the unforeseeable is not possible, an agency must use its best efforts to find out and disclose all that it reasonably can.'" (*Id.*, [Guidelines § 15144].) The Court used this general principle, along with prior precedent, to elucidate four "principles for analytical adequacy" that are necessary in order to satisfy "CEQA's informational purposes." (*Vineyard Area Citizens, supra*, at p. 430.) The Court did not defer to the agency's determination that the EIR's analysis of water supply impacts was sufficient. Rather, this Court used its independent judgment to determine for itself the level of analysis required to satisfy CEQA's fundamental purposes. (*Vineyard Area Citizens, supra*, at p. 441: an EIR does not serve its purposes where it neglects to explain likely sources of water and "... leaves long term water supply considerations to later stages of the project.")

Similarly, the CEQA Guidelines require an analysis of noise impacts of the project. (Appendix G, “Environmental Checklist Form.”<sup>17</sup>) In *Gray v. County of Madera* (2008) 167 Cal.App.4th 1099, 1123, the court held that the lead agency’s noise impact analysis was inadequate even though it had addressed the issue and concluded that the increase would not be noticeable. If the court had been using the substantial evidence standard, it likely would have upheld this discussion.

Therefore, we do not agree that the issue can be resolved on the basis suggested by Friant Ranch, which would apply the substantial evidence standard to *every* challenge to an analysis that addresses a required CEQA topic. This interpretation would subvert the courts’ proper role in interpreting CEQA and determining what the law requires.

Nor do we agree that the Court of Appeal in this case violated CEQA’s prohibition on courts interpreting its provisions “in a manner which imposes procedural or substantive requirements beyond those explicitly stated in this division or in the state guidelines.” (Pub. Resources Code § 21083.1.) CEQA requires an EIR to describe *all* significant impacts of the project on the environment. (Pub. Resources Code § 21100(b)(2); *Vineyard Area Citizens, supra*, at p. 428.) Human beings are part of the environment, so CEQA requires EIRs to discuss a project’s significant impacts on human health. However, except in certain particular circumstances,<sup>18</sup> neither the CEQA statute nor Guidelines specify the precise level of analysis that agencies must undertake to satisfy the law’s requirements. (see, e.g., CEQA Guidelines § 15126.2(a) [EIRs must describe “health and safety problems caused by {a project’s} physical changes”].) Accordingly, courts must interpret CEQA as a whole to

---

<sup>17</sup> Association of Environmental Professionals, 2015 CEQA Statute and Guidelines (2015) p.287.

<sup>18</sup> E.g., Pub. Resources Code § 21151.8(C)(3)(B)(iii) (requiring specific type of health risk analysis for siting schools).

determine whether a particular EIR is sufficient as an informational document. A court determining whether an EIR's discussion of human health impacts is legally sufficient does not constitute imposing a new substantive requirement.<sup>19</sup> Under Friant Ranch's theory, the above-referenced cases holding a CEQA analysis inadequate would have violated the law. This is not a reasonable interpretation.

#### **IV. COURTS MUST SCRUPULOUSLY ENFORCE THE REQUIREMENTS THAT LEAD AGENCIES CONSULT WITH AND OBTAIN COMMENTS FROM AIR DISTRICTS**

Courts must "scrupulously enforce" CEQA's legislatively mandated requirements. (*Vineyard Area Citizens, supra*, 40 Cal.4<sup>th</sup> 412, 435.) Case law has firmly established that lead agencies must consult with the relevant air pollution control district before conducting an initial study, and must provide the districts with notice of the intention to adopt a negative declaration (or EIR). (*Schenck v. County of Sonoma* (2011) 198 Cal.App.4th 949, 958.) As *Schenck* held, neither publishing the notice nor providing it to the State Clearinghouse was a sufficient substitute for sending notice directly to the air district. (*Id.*) Rather, courts "must be satisfied that [administrative] agencies have fully complied with the procedural requirements of CEQA, since only in this way can the important public purposes of CEQA be protected from subversion." *Schenck*, 198 Cal.App.4th at p. 959 (citations omitted).<sup>20</sup>

---

<sup>19</sup> We submit that Public Resources Code Section 21083.1 was intended to prevent courts from, for example, holding that an agency must analyze economic impacts of a project where there are no resulting environmental impacts (see CEQA Guidelines § 15131), or imposing new procedural requirements, such as imposing additional public notice requirements not set forth in CEQA or the Guidelines.

<sup>20</sup> Lead agencies must consult air districts, as public agencies with jurisdiction by law over resources affected by the project, *before* releasing an EIR. (Pub. Resources Code §§ 21104(a); 21153.) Moreover, air

Lead agencies should be aware, therefore, that failure to properly seek and consider input from the relevant air district constitutes legal error which may jeopardize their project approvals. For example, the court in *Fall River Wild Trout Foundation v. County of Shasta*, (1999) 70 Cal.App.4th 482, 492 held that the failure to give notice to a trustee agency (Department of Fish and Game) was prejudicial error requiring reversal. The court explained that the lack of notice prevented the Department from providing any response to the CEQA document. (*Id.* at p. 492.) It therefore prevented relevant information from being presented to the lead agency, which was prejudicial error because it precluded informed decision-making. (*Id.*)<sup>21</sup>

---

districts should be considered “state agencies” for purposes of the requirement to consult with “trustee agencies” as set forth in Public Resources Code § 20180.3(a). This Court has long ago held that the districts are not mere “local agencies” whose regulations are superseded by those of a state agency regarding matters of statewide concern, but rather have concurrent jurisdiction over such issues. (*Orange County Air Pollution Control District v. Public Util. Com.* (1971) 4 Cal.3d 945, 951, 954.) Since air pollution is a matter of statewide concern, *Id.* at 952, air districts should be entitled to trustee agency status in order to ensure that this vital concern is adequately protected during the CEQA process.

<sup>21</sup> In *Schenck*, the court concluded that failure to give notice to the air district was not prejudicial, but this was partly because the trial court had already corrected the error before the case arrived at the Court of Appeal. The trial court issued a writ of mandate requiring the lead agency to give notice to the air district. The air district responded by concurring with the lead agency that air impacts were not significant. (*Schenck*, 198 Cal.App.4th 949, 960.) We disagree with the *Schenck* court that the failure to give notice to the air district would not have been prejudicial (even in the absence of the trial court writ) merely because the lead agency purported to follow the air district’s published CEQA guidelines for significance. (*Id.*, 198 Cal.App.4th at p. 960.) In the first place, absent notice to the air district, it is uncertain whether the lead agency properly followed those guidelines. Moreover, it is not realistic to expect that an air district’s published guidelines would necessarily fully address all possible air-quality related issues that can arise with a CEQA project, or that those

Similarly, lead agencies must obtain additional information requested by expert agencies, including those with jurisdiction by law, if that information is necessary to determine a project's impacts. (*Sierra Club v. State Bd. Of Forestry* (1994) 7 Cal.4th 1215, 1236-37.) Approving a project without obtaining that information constitutes a failure to proceed in the manner prescribed by CEQA. (*Id.* at p. 1236.)

Moreover, a lead agency can save significant time and money by consulting with the air district early in the process. For example, the lead agency can learn what the air district recommends as an appropriate analysis on the facts of its case, including what kinds of health impacts analysis may be available, and what models are appropriate for use. This saves the lead agency from the need to do its analysis all over again and possibly needing to recirculate the document after errors are corrected, if new significant impacts are identified. (CEQA Guidelines § 15088.5(a).) At the same time, the air district's expert input can help the lead agency properly determine whether another commenter's request for additional analysis or studies is reasonable or feasible. Finally, the air district can provide input on what mitigation measures would be feasible and effective.

Therefore, we suggest that this Court provide guidance to lead agencies reminding them of the importance of consulting with the relevant air districts regarding these issues. Otherwise, their feasibility decisions may be vulnerable to air district evidence that establishes that there is no substantial evidence to support the lead agency decision not to provide specific analysis. (*See Berkeley Keep Jets Over the Bay, supra*, 91 Cal.App.4th 1344, 1369-1371.)

---

guidelines would necessarily be continually modified to reflect new developments. Therefore we believe that, had the trial court not already ordered the lead agency to obtain the air district's views, the failure to give notice would have been prejudicial, as in *Fall River, supra*, 70 Cal.App.4th 482, 492.

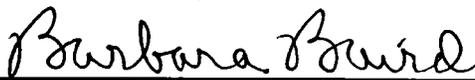

## CONCLUSION

The SCAQMD respectfully requests this Court *not* to establish a hard-and-fast rule concerning whether CEQA requires a lead agency to correlate identified air quality impacts of a project with resulting health outcomes. Moreover, the question of whether an EIR is “sufficient as an informational document” is a mixed question of fact and law containing two levels of inquiry. Whether a particular proposed analysis is feasible is predominantly a question of fact to be judged by the substantial evidence standard of review. Where the requested analysis is feasible, but the lead agency relies on legal or policy reasons not to provide it, the question of whether the EIR is nevertheless sufficient as an informational document is predominantly a question of law to be judged by the independent judgment standard of review.

Respectfully submitted,

Respectfully submitted,

  
Barbara Baird

**PROOF OF SERVICE**

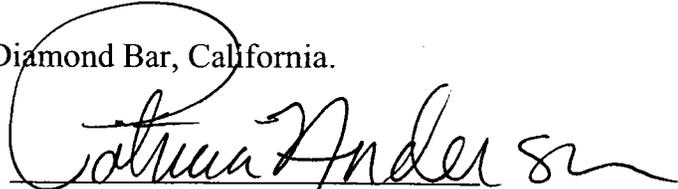

I am employed in the County of Los Angeles, California. I am over the age of 18 years and not a party to the within action. My business address is 21865 Copley Drive, Diamond Bar, California 91765.

On April 3, 2015 I served true copies of the following document(s) described as **APPLICATION OF THE SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT FOR LEAVE TO FILE BRIEF OF *AMICUS CURIAE* IN SUPPORT OF NEITHER PARTY AND [PROPOSED] BRIEF OF *AMICUS CURIAE*** by placing a true copy of the foregoing document(s) in a sealed envelope addressed as set forth on the attached service list as follows:

**BY MAIL:** I enclosed the document(s) in a sealed envelope or package addressed to the persons at the addresses listed in the Service List and placed the envelope for collection and mailing following our ordinary business practices. I am readily familiar with this District's practice for collection and processing of correspondence for mailing. Under that practice, the correspondence would be deposited with the United States Postal Service, with postage thereon fully prepaid at Diamond Bar, California, in the ordinary course of business. I am aware that on motion of the party served, service is presumed invalid if postal cancellation date or postage meter date is more than one day after date of deposit for mailing in affidavit.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed on April 3, 2015 at Diamond Bar, California.

  
Patricia Anderson

## APPLICATION

Pursuant to California Rules of Court 8.520(f)(1), proposed Amicus Curiae San Joaquin Valley Unified Air Pollution Control District hereby requests permission from the Chief Justice to file an amicus brief in support of Defendant and Respondent, County of Fresno, and Defendant and Real Parties in Interest Friant Ranch, L.P. Pursuant to Rule 8.520(f)(5) of the California Rules of Court, the proposed amicus curiae brief is combined with this Application. The brief addresses the following issue certified by this Court for review:

Is an EIR adequate when it identifies the health impacts of air pollution and quantifies a project's expected emissions, or does CEQA further require the EIR to *correlate* a project's air quality emissions to specific health impacts?

As of the date of this filing, the deadline for the final reply brief on the merits was March 5, 2015. Accordingly, under Rule 8.520(f)(2), this application and brief are timely.

### **1. Background and Interest of San Joaquin Valley Unified Air Pollution Control District**

The San Joaquin Valley Unified Air Pollution Control District ("Air District") regulates air quality in the eight counties comprising the San Joaquin Valley ("Central Valley"): Kern, Tulare, Madera, Fresno, Merced, San Joaquin, Stanislaus, and Kings, and is primarily responsible for attaining air quality standards within its jurisdiction. After billions of dollars of investment by Central Valley businesses, pioneering air quality regulations, and consistent efforts by residents, the Central Valley air basin has made historic improvements in air quality.

The Central Valley's geographical, topographical and meteorological features create exceptionally challenging air quality

conditions. For example, it receives air pollution transported from the San Francisco Bay Area and northern Central Valley communities, and the southern portion of the Central Valley includes three mountain ranges (Sierra, Tehachapi, and Coastal) that, under some meteorological conditions, effectively trap air pollution. Central Valley air pollution is only a fraction of what the Bay Area and Los Angeles produce, but these natural conditions result in air quality conditions that are only marginally better than Los Angeles, even though about ten times more pollution is emitted in the Los Angeles region. Bay Area air quality is much better than the Central Valley's, even though the Bay Area produces about six times more pollution. The Central Valley also receives air pollution transported from the Bay Area and northern counties in the Central Valley, including Sacramento, and transboundary anthropogenic ozone from as far away as China.

Notwithstanding these challenges, the Central Valley has reduced emissions at the same or better rate than other areas in California and has achieved unparalleled milestones in protecting public health and the environment:

- In the last decade, the Central Valley became the first air basin classified by the federal government under the Clean Air Act as a “serious nonattainment” area to come into attainment of health-based National Ambient Air Quality Standard (“NAAQS”) for coarse particulate matter (PM10), an achievement made even more notable given the Valley’s extensive agricultural sector. Unhealthy levels of particulate matter can cause and exacerbate a range of chronic and acute illnesses.
- In 2013, the Central Valley became the first air basin in the country to improve from a federal designation of “extreme” nonattainment to

actually attain (and quality for an attainment designation) of the 1-hour ozone NAAQS; ozone creates “smog” and, like PM10, causes adverse health impacts.

- The Central Valley also is in full attainment of federal standards for lead, nitrogen dioxide, sulfur dioxide, and carbon monoxide.
- The Central Valley continues to make progress toward compliance with its last two attainment standards, with the number of exceedences for the 8-hour ozone NAAQS reduced by 74% (for the 1997 standard) and 38% (for the 2008 standard) since 1991, and for the small particulate matter (PM2.5) NAAQS reduced by 85% (for the 1997 standard) and 61% (for the 2006 standard).

Sustained improvement in Central Valley air quality requires a rigorous and comprehensive regulatory framework that includes prohibitions (e.g., on wood-burning fireplaces in new residences), mandates (e.g., requiring the installation of best available pollution reduction technologies on new and modified equipment and industrial operations), innovations (e.g., fees assessed against residential development to fund pollution reduction actions to “offset” vehicular emissions associated with new residences), incentive programs (e.g., funding replacements of older, more polluting heavy duty trucks and school buses)<sup>1</sup>, ongoing planning for continued air quality improvements, and enforcement of Air District permits and regulations.

The Air District is also an expert air quality agency for the eight counties and cities in the San Joaquin Valley. In that capacity, the Air District has developed air quality emission guidelines for use by the Central

---

<sup>1</sup> San Joaquin’s incentive program has been so successful that through 2012, it has awarded over \$ 432 million in incentive funds and has achieved 93,349 tons of lifetime emissions reductions. See SAN JOAQUIN VALLEY AIR POLLUTION CONTROL DISTRICT, 2012 PM2.5 PLAN, 6-6 (2012) available at <http://www.valleyair.org/Workshops/postings/2012/12-20-12PM25/FinalVersion/06%20Chapter%206%20Incentives.pdf>.

Valley counties and cities that implement the California Environment Quality Act (CEQA).<sup>2</sup> In its guidance, the Air District has distinguished between toxic air contaminants and criteria air pollutants.<sup>3</sup> Recognizing this distinction, the Air District's CEQA Guidance has adopted distinct thresholds of significance for *criteria* pollutants (i.e., ozone, PM2.5 and their respective precursor pollutants) based upon scientific and factual data which demonstrates the level that can be accommodated on a cumulative basis in the San Joaquin Valley without affecting the attainment of the applicable NAAQS.<sup>4</sup> For *toxic air* pollutants, the District has adopted different thresholds of significance which scientific and factual data demonstrates has the potential to expose sensitive receptors (i.e., children, the elderly) to levels which may result in localized health impacts.<sup>5</sup>

The Air District's CEQA Guidance was followed by the County of Fresno in its environment review of the Friant Ranch project, for which the Air District also served as a commenting agency. The Court of Appeal's holding, however, requiring correlation between the project's criteria

---

<sup>2</sup> See, e.g., SAN JOAQUIN VALLEY AIR POLLUTION CONTROL DISTRICT, PLANNING DIVISION, GUIDE FOR ASSESSING AND MITIGATING AIR QUALITY IMPACTS (2015), available at [http://www.valleyair.org/transportation/GAMAQI\\_3-19-15.pdf](http://www.valleyair.org/transportation/GAMAQI_3-19-15.pdf) ("CEQA Guidance").

<sup>3</sup> Toxic air contaminants, also known as hazardous air pollutants, are those pollutants that are known or suspected to cause cancer or other serious health effects, such as birth defects. There are currently 189 toxic air contaminants regulated by the United States Environmental Protection Agency ("EPA") and the states pursuant to the Clean Air Act. 42 U.S.C. § 7412. Common TACs include benzene, perchloroethylene and asbestos. *Id.* at 7412(b).

In contrast, there are only six (6) criteria air pollutants: ozone, particulate matter, carbon monoxide, nitrogen oxides, sulfur dioxide and lead. Although criteria air pollutants can also be harmful to human health, they are distinguishable from toxic air contaminants and are regulated separately. For instance, while criteria pollutants are regulated by numerous sections throughout Title I of the Clean Air Act, the regulation of toxic air contaminants occurs solely under section 112 of the Act. Compare 42 U.S.C. §§ 7407 – 7411 & 7501 – 7515 with 42 U.S.C. § 7411.

<sup>4</sup> See, e.g., CEQA Guidance at [http://www.valleyair.org/transportation/GAMAQI\\_3-19-15.pdf](http://www.valleyair.org/transportation/GAMAQI_3-19-15.pdf), pp. 64-66, 80.

<sup>5</sup> See, e.g., CEQA Guidance at [http://www.valleyair.org/transportation/GAMAQI\\_3-19-15.pdf](http://www.valleyair.org/transportation/GAMAQI_3-19-15.pdf), pp. 66, 99-101.

pollutants and local health impacts, departs from the Air District's Guidance and approved methodology for assessing criteria pollutants. A close reading of the administrative record that gave rise to this issue demonstrates that the Court's holding is based on a misunderstanding of the distinction between toxic air contaminants (for which a local health risk assessment is feasible and routinely performed) and criteria air pollutants (for which a local health risk assessment is not feasible and would result in speculative results).<sup>6</sup> The Air District has a direct interest in ensuring the lawfulness and consistent application of its CEQA Guidance, and will explain how the Court of Appeal departed from the Air District's long-standing CEQA Guidance in addressing criteria pollutants and toxic air contaminants in this amicus brief.

## **2. How the Proposed Amicus Curiae Brief Will Assist the Court**

As counsel for the proposed amicus curiae, we have reviewed the briefs filed in this action. In addition to serving as a "commentary agency" for CEQA purposes over the Friant Ranch project, the Air District has a strong interest in assuring that CEQA is used for its intended purpose, and believes that this Court would benefit from additional briefing explaining the distinction between criteria pollutants and toxic air contaminants and the different methodologies employed by local air pollution control agencies such as the Air District to analyze these two categories of air pollutants under CEQA. The Air District will also explain how the Court of Appeal's opinion is based upon a fundamental misunderstanding of these two different approaches by requiring the County of Fresno to correlate the project's *criteria* pollution emissions with *local* health impacts. In doing

---

<sup>6</sup> CEQA does not require speculation. *See, e.g., Laurel Heights Improvement Ass'n v. Regents of Univ. of Cal.*, 6 Cal. 4th 1112, 1137 (1993) (upholding EIR that failed to evaluate cumulative toxic air emission increases given absence of any acceptable means for doing so).

so, the Air District will provide helpful analysis to support its position that at least insofar as criteria pollutants are concerned, CEQA does not require an EIR to correlate a project's air quality emissions to specific health impacts, because such an analysis is not reasonably feasible.

**Rule 8.520 Disclosure**

Pursuant to Cal. R. 8.520(f)(4), neither the Plaintiffs nor the Defendant or Real Party In Interest or their respective counsel authored this brief in whole or in part. Neither the Plaintiffs nor the Defendant or Real Party in Interest or their respective counsel made any monetary contribution towards or in support of the preparation of this brief.

**CONCLUSION**

On behalf of the San Joaquin Valley Unified Air Pollution Control District, we respectfully request that this Court accept the filing of the attached brief.

## I. INTRODUCTION.

The San Joaquin Valley Unified Air Pollution Control District (“Air District”) respectfully submits that the Court of Appeal erred when it held that the air quality analysis contained in the Environmental Impact Report (“EIR”) for the Friant Ranch development project was inadequate under the California Environmental Quality Act (“CEQA”) because it did not include an analysis of the correlation between the project’s criteria air pollutants and the potential adverse human health impacts. A close reading of the portion of the administrative record that gave rise to this issue demonstrates that the Court’s holding is based on a misunderstanding of the distinction between toxic air contaminants and criteria air pollutants.

Toxic air contaminants, also known as hazardous air pollutants, are those pollutants that are known or suspected to cause cancer or other serious health effects, such as birth defects. There are currently 189 toxic air contaminants (hereinafter referred to as “TACs”) regulated by the United States Environmental Protection Agency (“EPA”) and the states pursuant to the Clean Air Act. 42 U.S.C. § 7412. Common TACs include benzene, perchloroethylene and asbestos. *Id.* at 7412(b).

In contrast, there are only six (6) criteria air pollutants: ozone, particulate matter, carbon monoxide, nitrogen oxides, sulfur dioxide and lead. Although criteria air pollutants can also be harmful to human health,

they are distinguishable from TACs and are regulated separately. For instance, while criteria pollutants are regulated by numerous sections throughout Title I of the Clean Air Act, the regulation of TACs occurs solely under section 112 of the Act. *Compare* 42 U.S.C. §§ 7407 – 7411 & 7501 – 7515 *with* 42 U.S.C. § 7411.

The most relevant difference between criteria pollutants and TACs for purposes of this case is the manner in which human health impacts are accounted for. While it is common practice to analyze the correlation between an individual facility's TAC emissions and the expected localized human health impacts, such is not the case for criteria pollutants. Instead, the human health impacts associated with criteria air pollutants are analyzed and taken into consideration when EPA sets the national ambient air quality standard ("NAAQS") for each criteria pollutant. 42 U.S.C. § 7409(b)(1). The health impact of a particular criteria pollutant is analyzed on a regional and not a facility level based on how close the area is to complying with (attaining) the NAAQS. Accordingly, while the type of individual facility / health impact analysis that the Court of Appeal has required is a customary practice for TACs, it is not feasible to conduct a similar analysis for criteria air pollutants because currently available computer modeling tools are not equipped for this task.

It is clear from a reading of both the administrative record and the Court of Appeal's decision that the Court did not have the expertise to fully

appreciate the difference between TACs and criteria air pollutants. As a result, the Court has ordered the County of Fresno to conduct an analysis that is not practicable and not likely yield valid information. The Air District respectfully requests that this portion of the Court of Appeal's decision be reversed.

**II. THE COURT OF APPEAL ERRED IN FINDING THE FRIANT RANCH EIR INADEQUATE FOR FAILING TO ANALYZE THE SPECIFIC HUMAN HEALTH IMPACTS ASSOCIATED CRITERIA AIR POLLUTANTS.**

Although the Air District does not take lightly the amount of air emissions at issue in this case, it submits that the Court of Appeal got it wrong when it required Fresno County to revise the Friant Ranch EIR to include an analysis correlating the criteria air pollutant emissions associated with the project with specific, localized health-impacts. The type of analysis the Court of Appeal has required will not yield reliable information because currently available modeling tools are not well suited for this task. Further, in reviewing this issue de novo, the Court of Appeal failed to appreciate that it lacked the scientific expertise to appreciate the significant differences between a health risk assessment commonly performed for toxic air contaminants and a similar type of analysis it felt should have been conducted for criteria air pollutants.

///

///

**A. Currently Available Modeling Tools are not Equipped to Provide a Meaningful Analysis of the Correlation between an Individual Development Project's Air Emissions and Specific Human Health Impacts.**

In order to appreciate the problematic nature of the Court of Appeals' decision requiring a health risk type analysis for criteria air pollutants, it is important to understand how the relevant criteria pollutants (ozone and particulate matter) are formed, dispersed and regulated.

Ground level ozone (smog) is not directly emitted into the air, but is formed when precursor pollutants such as oxides of nitrogen (NO<sub>x</sub>) and volatile organic compounds (VOCs) are emitted into the atmosphere and undergo complex chemical reactions in the process of sunlight.<sup>1</sup> Once formed, ozone can be transported long distances by wind.<sup>2</sup> Because of the complexity of ozone formation, a specific tonnage amount of NO<sub>x</sub> or VOCs emitted in a particular area does not equate to a particular concentration of ozone in that area. In fact, even rural areas that have relatively low tonnages of emissions of NO<sub>x</sub> or VOCs can have high levels of ozone concentration simply due to wind transport.<sup>3</sup> Conversely, the San Francisco Bay Area has six times more NO<sub>x</sub> and VOC emissions per square mile than the San Joaquin Valley, but experiences lower

---

<sup>1</sup> See United States Environmental Protection Agency, *Ground-level Ozone: Basic Information*, available at: <http://www.epa.gov/airquality/ozonepollution/basic.html> (visited March 10, 2015).

<sup>2</sup> *Id.*

<sup>3</sup> *Id.*

concentrations of ozone (and better air quality) simply because sea breezes disperse the emissions.<sup>4</sup>

Particulate matter (“PM”) can be divided into two categories: directly emitted PM and secondary PM.<sup>5</sup> While directly emitted PM can have a localized impact, the tonnage emitted does not always equate to the local PM concentration because it can be transported long distances by wind.<sup>6</sup> Secondary PM, like ozone, is formed via complex chemical reactions in the atmosphere between precursor chemicals such as sulfur dioxides (SO<sub>x</sub>) and NO<sub>x</sub>.<sup>7</sup> Because of the complexity of secondary PM formation, the tonnage of PM-forming precursor emissions in an area does not necessarily result in an equivalent concentration of secondary PM in that area.

The disconnect between the *tonnage* of precursor pollutants (NO<sub>x</sub>, SO<sub>x</sub> and VOCs) and the *concentration* of ozone or PM formed is important because it is not necessarily the tonnage of precursor pollutants that causes human health effects, but the concentration of resulting ozone or PM. Indeed, the national ambient air quality standards (“NAAQS”), which are statutorily required to be set by the United States Environmental Protection

<sup>5</sup> United States Environmental Protection Agency, *Particulate Matter: Basic Information*, available at: <http://www.epa.gov/airquality/particlepollution/basic.html> (visited March 10, 2015).

<sup>6</sup> *Id.*

<sup>7</sup> *Id.*

Agency (“EPA”) at levels that are “requisite to protect the public health,” 42 U.S.C. § 7409(b)(1), are established as concentrations of ozone or particulate matter and not as tonnages of their precursor pollutants.<sup>8</sup>

Attainment of a particular NAAQS occurs when the concentration of the relevant pollutant remains below a set threshold on a consistent basis throughout a particular region. For example, the San Joaquin Valley attained the 1-hour ozone NAAQS when ozone concentrations remained at or below 0.124 parts per million Valley-wide on 3 or fewer days over a 3-year period.<sup>9</sup> Because the NAAQS are focused on achieving a particular concentration of pollution region-wide, the Air District’s tools and plans for attaining the NAAQS are regional in nature.

For instance, the computer models used to simulate and predict an attainment date for the ozone or particulate matter NAAQS in the San Joaquin Valley are based on regional inputs, such as regional inventories of precursor pollutants (NO<sub>x</sub>, SO<sub>x</sub> and VOCs) and the atmospheric chemistry and meteorology of the Valley.<sup>10</sup> At a very basic level, the models simulate future ozone or PM levels based on predicted changes in precursor

<sup>9</sup> *San Joaquin Valley Unified Air Pollution Control District 2013 Plan for the Revoked 1-Hour Ozone Standard*, Ch. 2 p. 2-16, available at: [http://www.valleyair.org/Air\\_Quality\\_Plans/OzoneOneHourPlan2013/02Chapter2ScienceTrendsModeling.pdf](http://www.valleyair.org/Air_Quality_Plans/OzoneOneHourPlan2013/02Chapter2ScienceTrendsModeling.pdf) (visited March 10, 2015).

<sup>10</sup> *Id.* at Ch. 2 p. 2-19 (visited March 12, 2015); *San Joaquin Valley Unified Air Pollution Control District 2008 PM<sub>2.5</sub> Plan*, Appendix F, pp. F-2 – F-5, available at: [http://www.valleyair.org/Air\\_Quality\\_Plans/docs/AQ\\_Final\\_Adopted\\_PM2.5/20%20Appendix%20F.pdf](http://www.valleyair.org/Air_Quality_Plans/docs/AQ_Final_Adopted_PM2.5/20%20Appendix%20F.pdf) (visited March 19, 2015).

emissions Valley wide.<sup>11</sup> Because the NAAQS are set levels necessary to protect human health, the closer a region is to attaining a particular NAAQS, the lower the human health impact is from that pollutant.

The goal of these modeling exercises is not to determine whether the emissions generated by a particular factory or development project will affect the date that the Valley attains the NAAQS. Rather, the Air District's modeling and planning strategy is regional in nature and based on the extent to which *all* of the emission-generating sources in the Valley (current and future) must be controlled in order to reach attainment.<sup>12</sup>

Accordingly, the Air District has based its thresholds of significance for CEQA purposes on the levels that scientific and factual data demonstrate that the Valley can accommodate without affecting the attainment date for the NAAQS.<sup>13</sup> The Air District has tied its CEQA significance thresholds to the level at which stationary pollution sources permitted by the Air District must "offset" their emissions.<sup>14</sup> This "offset"

---

<sup>11</sup> *Id.*

<sup>12</sup> Although the Air District does have a dispersion modeling tool used during its air permitting process that is used to predict whether a particular project's directly emitted PM will either cause an exceedance of the PM NAAQS or contribute to an existing exceedance, this model bases the prediction on a worst case scenario of emissions and meteorology and has no provision for predicting any associated human health impacts. Further, this analysis is only performed for stationary sources (factories, oil refineries, etc.) that are required to obtain a New Source Review permit from the Air District and not for development projects such as Friant Ranch over which the Air District has no preconstruction permitting authority. See San Joaquin Valley Unified Air Pollution Control District Rule 2201 §§ 2.0; 3.3.9; 4.14.1, available at: <http://www.valleyair.org/rules/currntrules/Rule22010411.pdf> (visited March 19, 2015).

<sup>13</sup> *San Joaquin Valley Unified Air Pollution Control District Guide to Assessing and Mitigating Air Quality Impacts*, (March 19, 2015) p. 22, available at: <http://www.valleyair.org/transportation/CEQA%20Rules/GAMAQI%20Jan%202002%20Rev.pdf> (visited March 30, 2015).

<sup>14</sup> *Id.* at pp. 22, 25.

level allows for growth while keeping the cumulative effects of all new sources at a level that will not impede attainment of the NAAQS.<sup>15</sup> In the Valley, these thresholds are 15 tons per year of PM, and 10 tons of NOx or VOC per year. *Sierra Club, supra*, 172 Cal.Rptr.3d at 303; AR 4554. Thus, the CEQA air quality analysis for criteria pollutants is not really a localized, project-level impact analysis but one of regional, “cumulative impacts.”

Accordingly, the significance thresholds applied in the Friant Ranch EIR (15 tons per year of PM and 10 tons of NOx or VOCs) are not intended to be indicative of any localized human health impact that the project may have. While the health effects of air pollution are of primary concern to the Air District (indeed, the NAAQS are established to protect human health), the Air District is simply not equipped to analyze whether and to what extent the criteria pollutant emissions of an individual CEQA project directly impact human health in a particular area. This is true even for projects with relatively high levels of emissions of criteria pollutant precursor emissions.

For instance, according to the EIR, the Friant Ranch project is estimated to emit 109.52 tons per year of ROG (VOC), 102.19 tons per year of NOx, and 117.38 tons per year of PM. Although these levels well

exceed the Air District's CEQA significance thresholds, this does not mean that one can easily determine the concentration of ozone or PM that will be created at or near the Friant Ranch site on a particular day or month of the year, or what specific health impacts will occur. Meteorology, the presence of sunlight, and other complex chemical factors all combine to determine the ultimate concentration and location of ozone or PM. This is especially true for a project like Friant Ranch where most of the criteria pollutant emissions derive not from a single "point source," but from area wide sources (consumer products, paint, etc.) or mobile sources (cars and trucks) driving to, from and around the site.

In addition, it would be extremely difficult to model the impact on NAAQS attainment that the emissions from the Friant Ranch project may have. As discussed above, the currently available modeling tools are equipped to model the impact of *all* emission sources in the Valley on attainment. According to the most recent EPA-approved emission inventory, the NO<sub>x</sub> inventory for the Valley is for the year 2014 is 458.2 tons per day, or 167,243 tons per year and the VOC (or ROG) inventory is 361.7 tons per day, or 132,020.5 tons per year.<sup>16</sup> Running the photochemical grid model used for predicting ozone attainment with the

<sup>16</sup> *San Joaquin Valley Unified Air Pollution Control District 2007 Ozone Plan*, Appendix B pp. B-6, B-9, available at: [http://www.valleyair.org/Air\\_Quality\\_Plans/docs/AO\\_Ozone\\_2007\\_Adopted/19%20Appendix%20B%20April%202007.pdf](http://www.valleyair.org/Air_Quality_Plans/docs/AO_Ozone_2007_Adopted/19%20Appendix%20B%20April%202007.pdf) (visited March 12, 2015).

emissions solely from the Friant Ranch project (which equate to less than one-tenth of one percent of the total NOx and VOC in the Valley) is not likely to yield valid information given the relative scale involved.

Finally, even once a model is developed to accurately ascertain local increases in concentrations of photochemical pollutants like ozone and some particulates, it remains impossible, using today's models, to correlate that increase in concentration to a specific health impact. The reason is the same: such models are designed to determine regional, population-wide health impacts, and simply are not accurate when applied at the local level.

For these reasons, it is not the norm for CEQA practitioners, including the Air District, to conduct an analysis of the localized health impacts associated with a project's criteria air pollutant emissions as part of the EIR process. When the accepted scientific method precludes a certain type of analysis, "the court cannot impose a legal standard to the contrary." *Kings County Farm Bureau v. City of Hanford* (1990) 221 Cal.App.3d 692, 717 n. 8. However, that is exactly what the Court of Appeal has done in this case. Its decision upends the way CEQA air quality analysis of criteria pollutants occurs and should be reversed.

///

///

**B. The Court of Appeal Improperly Extrapolated a Request for a Health Risk Assessment for Toxic Air Contaminants into a Requirement that the EIR contain an Analysis of Localized Health Impacts Associated with Criteria Air Pollutants.**

The Court of Appeal's error in requiring the new health impact analysis for criteria air pollutants clearly stems from a misunderstanding of terms of art commonly used in the air pollution field. More specifically, the Court of Appeal (and Appellants Sierra Club et al.) appear to have confused the health risk analysis ("HRA") performed to determine the health impacts associated with a project's toxic air contaminants ("TACs"), with an analysis correlating a project's criteria air pollutants (ozone, PM and the like) with specific localized health impacts.

The first type of analysis, the HRA, is commonly performed during the Air District's stationary source permitting process for projects that emit TACs and is, thus, incorporated into the CEQA review process. An HRA is a comprehensive analysis to evaluate and predict the dispersion of TACs emitted by a project and the potential for exposure of human populations. It also assesses and quantifies both the individual and population-wide health risks associated with those levels of exposure. There is no similar analysis conducted for criteria air pollutants. Thus, the second type of analysis (required by the Court of Appeal), is not currently part of the Air District's process because, as outlined above, the health risks associated

with exposure to criteria pollutants are evaluated on a regional level based on the region's attainment of the NAAQS.

The root of this confusion between the types of analyses conducted for TACs versus criteria air pollutants appears to stem from a comment that was presented to Fresno County by the City of Fresno during the administrative process.

In its comments on the draft EIR, the City of Fresno (the only party to raise this issue) stated:

[t]he EIR must disclose the human health related effects of the Project's air pollution impacts. (CEQA Guidelines section 15126.2(a).) The EIR fails completely in this area. The EIR should be revised to disclose and determine the significance of TAC impacts, and of human health risks due to exposure to Project-related air emissions.

(AR 4602.)

In determining that the issue regarding the correlation between the Friant Ranch project's criteria air pollutants and adverse health impacts was adequately exhausted at the administrative level, the Court of Appeal improperly read the first two sentences of the City of Fresno's comment in isolation rather than in the context of the entire comment. *See Sierra Club v. County of Fresno* (2014) 172 Cal.Rptr.3d 271, 306. Although the comment first speaks generally in terms of "human health related effects" and "air pollution," it requests only that the EIR be revised to disclose "the significance of TACs" and the "human health risks due to exposure."

The language of this request in the third sentence of the comment is significant because, to an air pollution practitioner, the language would only have indicated only that a HRA for TACs was requested, and not a separate analysis of the health impacts associated with the project's criteria air pollutants. Fresno County clearly read the comment as a request to perform an HRA for TACs and limited its response accordingly. (AR 4602.)<sup>17</sup> The Air District submits that it would have read the City's comment in the same manner as the County because the City's use of the terms "human health risks" and "TACs" signal that an HRA for TACs is being requested. Indeed, the Air District was also concerned that an HRA be conducted, but understood that it was not possible to conduct such an analysis until the project entered the phase where detailed site specific information, such as the types of emission sources and the proximity of the sources to sensitive receptors became available. (AR 4553.)<sup>18</sup> The City of Fresno was apparently satisfied with the County's discussion of human health risks, as it did not raise the issue again when it commented on the final EIR. (AR 8944 – 8960.)

---

<sup>17</sup> Appellants do not challenge the manner in which the County addressed TACs in the EIR. (Appellants' Answer Brief p. 28 fn. 7.)

<sup>18</sup> Appellants rely on the testimony of Air District employee, Dan Barber, as support for their position that the County should have conducted an analysis correlating the project's criteria air pollutant emissions with localized health impacts. (Appellants Answer Brief pp. 10-11; 28.) However, Mr. Barber's testimony simply reinforces the Air District's concern that a risk assessment (HRA) be conducted once the actual details of the project become available. (AR 8863.) As to criteria air pollutants, Mr. Barber's comments are aimed at the Air District's concern about the amount of emissions and the fact that the emissions will make it "more difficult for Fresno County and the Valley to reach attainment which means that the health of Valley residents maybe [sic] adversely impacted." Mr. Barber says nothing about conducting a separate analysis of the localized health impacts the project's emissions may have.

The Court of Appeal's holding, which incorrectly extrapolates a request for an HRA for TACs into a new analysis of the localized health impacts of the project's criteria air pollutants, highlights two additional errors in the Court's decision.

First, the Court of Appeal's holding illustrates why the Court should have applied the deferential substantial evidence standard of review to the issue of whether the EIR's air quality analysis was sufficient. The regulation of air pollution is a technical and complex field and the Court of Appeal lacked the expertise to fully appreciate the difference between TACs and criteria air pollutants and tools available for analyzing each type of pollutant.

Second, it illustrates that the Court likely got it wrong when it held that the issue regarding the criteria pollutant / localized health impact analysis was properly exhausted during the administrative process. In order to preserve an issue for the court, '[t]he "exact issue" must have been presented to the administrative agency....' [Citation.] *Citizens for Responsible Equitable Environmental Development v. City of San Diego*, (2011) 196 Cal.App.4th 515, 527 129 Cal.Rptr.3d 512, 521; *Sierra Club v. City of Orange* (2008) 163 Cal.App.4th 523, 535, 78 Cal.Rptr.3d 1, 13. "[T]he objections must be sufficiently specific so that the agency has the

opportunity to evaluate and respond to them.’ [Citation.]” *Sierra Club v. City of Orange*, 163 Cal.App.4<sup>th</sup> at 536.<sup>19</sup>

As discussed above, the City’s comment, while specific enough to request a commonly performed HRA for TACs, provided the County with no notice that it should perform a new type of analysis correlating criteria pollutant tonnages to specific human health effects. Although the parties have not directly addressed the issue of failure to exhaust administrative remedies in their briefs, the Air District submits that the Court should consider how it affects the issues briefed by the parties since “[e]xhaustion of administrative remedies is a jurisdictional prerequisite to maintenance of a CEQA action.” *Bakersfield Citizens for Local Control v. City of Bakersfield* (2004) 124 Cal.App.4<sup>th</sup> 1184, 1199, 22 Cal.Rptr.3d 203.

### III. CONCLUSION

For all of the foregoing reasons, the Air District respectfully requests that the portion of the Court of Appeal’s decision requiring an analysis correlating the localized human health impacts associated with an individual project’s criteria air pollutant emissions be reversed.

---

<sup>19</sup> *Sierra Club v. City of Orange*, is illustrative here. In that case, the plaintiffs challenged an EIR approved for a large planned community on the basis that the EIR improperly broke up the various environmental impacts by separate project components or “piecemealed” the analysis in violation of CEQA. In evaluating the defense that the plaintiffs had failed to adequately raise the issue at the administrative level, the Court held that comments such as “*the use of a single document for both a project-level and a program-level EIR [is] ‘confusing’*,” and “[t]he lead agency should identify any potential adverse air quality impacts that could occur from all phases of the project and all air pollutant sources related to the project,” were too vague to fairly raise the argument of piecemealing before the agency. *Sierra Club v. City of Orange*, 163 Cal.App.4<sup>th</sup> at 537.

correlating the localized human health impacts associated with an individual project's criteria air pollutant emissions be reversed.

Respectfully submitted,

Dated: April 2, 2015

SMAQMD

FRIANT RANCH

INTERIM RECOMMENDATION

## Background

The California Supreme Court in the case of *Sierra Club v. County of Fresno* (2018) 6 Cal. 5th 502 regarding the proposed Friant Ranch project determined the air quality analysis in the environmental impact report (EIR) was inadequate because it did not make “a reasonable effort to substantively connect the project’s air quality impacts to likely health consequences.” The Court determined that “the EIR should be revised to relate the expected adverse air quality impacts to likely health consequences or explain in meaningful detail why it is not feasible at the time of drafting to provide such an analysis.”

## Need

Lead agencies and practitioners preparing documents to comply with the California Environmental Quality Act (CEQA) have requested guidance from the Sacramento Metropolitan Air Quality Management District (Sac Metro Air District) on implementing the Friant Ranch decision in the review and analysis of proposed projects in Sacramento County.

## Interim Recommendation

The Sac Metro Air District does not currently have a methodology that would correlate the expected air quality emissions of projects to the likely health consequences of the increased emissions. The Sac Metro Air District is in the process of developing a methodology to assess these impacts, and anticipates releasing it in the fall of 2019. In the interim, agencies should follow the Friant Court’s advice to explain in meaningful detail why this analysis is not yet feasible.

This explanation should describe the background underlying air regulations, the regional nature of the regulatory approach, and why the approach is not amenable to project level assessments. This should include a discussion of the public health impact analyses that form the basis for the state and federal health-based pollutant concentration standards, and the application of the standards to regions that were established based upon a commonality of factors impacting air quality. Air districts, in turn, have focused on reducing regional emissions from all sectors to meet the health-based concentration standards, thereby reducing the pollutant specific health impacts for the entire population. For example, the Sac Metro Air District prepared plans to attain and maintain the ozone and particulate matter ambient air quality standards. These attainment plans include emissions inventories, air monitoring data, control measures, modeling, future pollutant-level estimates, and general health information. Attainment planning models rely on regional inputs to determine ozone and particulate matter formation and concentrations in a regional context, not a project specific context. Because of the complexity of ozone formation, the pounds or tons of emissions from a proposed project in a specific geographical location does not equate to a specific concentration of ozone formation in a given area, because in addition to emission levels, ozone formation is affected by atmospheric chemistry, geography, and weather. Secondary formation of particulate matter is very similar to the complexity of ozone formation, and localized impacts of directly emitted particulate matter do not always equate to local particulate matter concentrations due to transport of emissions. The analysis should explain that because air district attainment plans and supporting air model tools are regional in nature, they do not allow for analysis of the health impacts of specific projects on any given geographic location. More information is included in the threshold justification documents developed by the Sac Metro Air District, and available at our website at [www.airquality.org](http://www.airquality.org).

The analysis should also discuss the current models<sup>1</sup> used in CEQA in air quality analyses, which, in contrast to attainment models, are designed to calculate and disclose the mass emissions expected from the construction and operation of a proposed project (pounds/day and tons/year). The estimated emissions are then compared to significance thresholds, which are in turn keyed to reducing emissions to levels that will not interfere with the region’s ability to attain the health-based standards. The Sac Metro Air District adopted operational emission thresholds for ozone precursors, nitrogen oxides (NOx) and reactive organic gasses (ROG), with the goal of obtaining 0.45 tons/year of NOx and 0.49 tons/year of ROG reductions from new

development projects exceeding the thresholds by including emission reducing design features as mitigation.<sup>ii</sup> More recently, the Sac Metro Air District adopted particulate matter thresholds, PM10 and PM2.5, to align with the new source review permit offset levels, which are designed to prevent new emission sources from affecting attainment progress.<sup>iii</sup> Sac Metro Air District thresholds are set at 65 pounds/day NOx (11.8 tons/year), 65 pounds/day ROG (11.8 tons/year), 80 pounds/day PM10 (14.6 tons/year), and 82 pounds/day PM2.5 (15 tons/year).<sup>iv</sup> CEQA thresholds are a tool Sac Metro Air District uses to obtain emission reductions from development projects to support attainment of the Federal and State ambient air quality standards. This protects public health in the overall region, but there is currently no methodology to determine the impact of emissions on concentration levels in specific geographic areas.

The CEQA analysis should consider the degree to which various other tools, such as CalEEMod, EMFAC, OFFROAD, AERMOD, and HARP and CAMx, could assist in assessing specific health impacts of a project, and, where those tools would not be useful, explain why. For example, while CalEEMod may be useful in comparing emissions to significance thresholds, it is not able to assess transport of pollutants or the impacts of external factors (weather, terrain, etc.) on pollutant concentrations at particular locations.

In Sacramento, concentration modeling of ozone has not been an analytical tool used for project level emissions due to the complex nature of pollution concentration formation and numerous regional influences (multiple emission sources, meteorology, atmospheric chemistry and geography). Although some particulate matter concentration modeling has been conducted for project specific emissions for stationary source permitting purposes, concentration modeling has mainly been used to support ozone attainment demonstration.

Outside of these tools, neither the Sac Metro Air District nor any other air district currently have methodologies that would provide Lead Agencies and CEQA practitioners with a consistent, reliable, and meaningful analysis to correlate specific health impacts that may result from a proposed project's mass emissions.
