Re: ENV-2002-2481-EIR
SCH#2002091018
Canyon Hills Project DEIR Comments

Dear Ms Zaitzevsky:

Photo #2 and Exhibit #2 further illustrate the movement of wildlife along the northern portion of missing link #27 north of the 210 freeway and coyote, fox and deer sightings in the immediate vicinity of the Invisible Link, crossing under the freeway on foothill boulevard. Also, a mule deer sighting north of the 210 freeway is noted at the intersection of Newhome & Wyngate. The DEIR asserts no deer are currently utilizing the project area north of the freeway. Therefore, the DEIR is deficient.
