	Metro Green Line	**803**
	Metro Gold Line	**804**
	Metro Purple Line	**805**
Metro Transitway	Metro Orange Line	**901**
	Metro Silver Line	**910**

Reading a Timetable

Timetables show when a bus or train will arrive at major stops along the route.

1. Find the heading for the departure point nearest you (be sure you have the correct direction and time of travel).

2. Look down the column under your departure heading to find the time you will need to be at the bus stop or rail station.

3. Locate the heading for your destination.

4. Read across from your departure time to determine your arrival time.

5. If you need to transfer, follow the same steps for the second route. (Your destination point on the first route will be your departure point on the second route.)

6. If you want to reach a destination by a specific time, it may be easier to work backwards. In other words, find the arrival time you want for your destination first; then reverse the process to find the time you should be at the first stop to begin your trip.

Download all Timetables

Download all of the current timetable schedules to your computer or device to conveniently use them offline.

1. Download the **RAR** (78.1 MB) or **ZIP** (85.5 MB) file.
2. Unzip or extract the files. If you are unable to extract the files above, you will need to download a third-party application like **WinRAR**.
3. Move to a desired folder.
