3/4/2020

Planning,

The Grading Division of the Department of Building and Safety has reviewed Vesting Tentative Tract Map No. VTT-82152 located at [6236-6334 W. Yucca Street](#), 1745-1770 N. [Vine Street](#), [1733-1741 Argyle Avenue](#). The attached Geology Report Approval Letter dated 10/15/2019 (Log # 109547) still applies.

Thank you,

Casey

(213) 482-0490

Casey Lee Jensen, PG, CEG
Engineering Geologist Associate III
Los Angeles Department of Building and Safety
Grading Division, Mail Stop 115
[221 N. Figueroa Street, 12th Floor, Suite 1200](#)
Los Angeles, CA 90012

*Please note, I am out of the office every other Friday.

The Grading Division of the Department of Building and Safety has reviewed the referenced report that provides a geotechnical evaluation to assess the feasibility of the project and to provide soil engineering parameters for preliminary project design. According to the report, the proposed project consists of four mixed-use buildings from 9 to 46 stories with 5 subterranean parking levels.

1770 N. Ivar Ave. (6334 W St), 1760-1764 Ivar Ave. / 1720-1724 N Vine St. 1745-1749, 1751, 1753, 1770 N. Vine St., 1746-1748, 1754, 1760-1764 Ivar Ave., (1770 N. Ivar Ave. - 6334 Yucca Ave. / 1720-1724, 1730, 1760-1768 Vine St., (1770 N. Vine St. -6270 Yucca Ave.) / (1740-1750 N. Vine St. - 6236 W. Yucca Ave.), 1733-1741 N. Argyle Ave.

The project is located within the Official Alquist-Priolo Earthquake Fault Zone for the Hollywood fault. The previous reference reports provided geologic investigations to assess potential faulting at the site. No active faults were found and the potential for fault-related ground rupture is low. The current report addresses other potential geologic hazards (per CEQA guidelines) and concludes that the proposed development is feasible relative to hazards such as liquefaction and seismic settlement, subsidence, etc. General geotechnical recommendations are provided, including those for foundations, shoring and retaining walls. However, the report acknowledges that a design-level geotechnical investigation is required when final plans are available.

The referenced report is acceptable, provided the following conditions are complied with during site development:

1. Prior to issuance of grading/building permits, a design-level geotechnical/soils report shall be submitted to the Grading Division to provide recommendations specific to the proposed development.
