In accordance with the California Environmental Quality Act (CEQA), the City of Los Angeles (City), as Lead Agency, has prepared a Draft Environmental Impact Report (EIR) for the proposed Hollywood Center Project (Project). This notice provides the public, nearby residents and property owners, responsible agencies, and other interested parties with a summary of the Project, conclusions of the Draft EIR, information regarding the availability of the Draft EIR for public review, and the timeframe for submitting comments on the Draft EIR. Comments must be submitted in writing according to the directions below.

ENVIRONMENTAL LEADERSHIP DEVELOPMENT PROJECT

The Applicant has elected to proceed under Chapter 6.5 (commencing with Section 21178) of the Public Resources Code (PRC), which provides, among other things, that any judicial action challenging the certification of the EIR or the approval of the project described in the EIR is subject to the procedures set forth in PRC Sections 21185 to 21186, inclusive. The Project meets the requirements of PRC Section 21178, and was certified by the Governor on August 16, 2018. Accordingly, all information pursuant to this requirement is electronically available on the City’s website.

PROJECT DESCRIPTION

The Hollywood Center Project is a mixed-use development on an approximately 4.46-acre site, generally bounded by Yucca Street on the north, Ivar Avenue on the west, Argyle Avenue on the east, and adjacent development and Hollywood Boulevard on the south, and bifurcated by Vine Street. The portion of the Project Site located between Ivar Avenue and Vine Street is identified as the “West Site”, and the portion located between Vine Street and Argyle Avenue is identified as the “East Site”. The Project Site is currently developed with a single-story building and surface parking on the West Site; and the Capitol Records Building and Gogerty Building occupied by Capitol Records (the Capitol Records Complex), and surface parking on the East Site. Under the Project, the existing building on the West Site would be demolished and the Capitol Records Complex would be preserved, and the remainder of the Project Site would be redeveloped with 1,005 residential units, comprised of

872 market-rate and 133 senior affordable units, and up to 30,176 square feet of commercial uses, within four new mixed-use buildings (West Building, East Building, West Senior Building, East Senior Building) which range in height from 11 to 46 stories. Overall, the Project would contain up to 1,287,150 square feet of floor area, for a floor area ratio (FAR) of 6.973:1. Under a proposed East Site Hotel Option (Project with the East Site Hotel Option), 104 residential units within the East Building would be replaced with a hotel, with no change to the building height or massing. In total, the Project with the East Site Hotel Option would contain 884 residential units, comprised of 768 market-rate and 116 senior affordable units; a 220-room hotel with supporting amenities; and up to 30,176 square feet of commercial uses. Overall, the Project with the East Site Hotel Option would contain up to 1,272,741 square feet of floor area, for a FAR of 6.901:1.

ANTICIPATED SIGNIFICANT ENVIRONMENTAL EFFECTS

Based on the analysis included in the Draft EIR, the Project would result in significant and unavoidable impacts related to: Cultural Resources (Construction-Related Structural Vibration Impacts to Off-Site Historical Architectural Resources), Construction Noise (On-Site and Groundborne Noise, and Off-Site Truck and Vehicle Traffic Noise Impacts to Off-Site Sensitive Receptors), and Construction Vibration (Structural Vibration Impacts to Adjacent Off-Site Buildings and Human Annoyance Vibration Impacts to Adjacent Sensitive Receptors). All other potential impacts would be less than significant or mitigated to less-than-significant levels.
