---

Hi Manuella,

Thank you for your email. Your comments have been received and will be included in the administrative record for the Hollywood Center Project EIR.

Please let me know if you have any questions in the meantime.

Hello Mindy,

This is the first time I have done anything like this, I am writing to give you my support comments for the hollywood center project. I am a college student and have now lived in Los Angeles for nearly two years. I really love being here and want to live here a long time. In normal times, I travel from where I live just south of the project in Hollywood all the way to Santa Monica to go to college. I exclusively take public transit, so it can take a long time. I live very far away because I live with family. I would love to live closer to school but it completely impossible.

Rent is so high because we don't have enough building of housing. I come from France, where we walk everywhere, but sadly this is not possible here. I feel like parts of this City are stuck in the past, not in a good way. Many people my age do not own cars or even drive. More and more, there is no reason to.

I learned about this project hollywood center after doing research more about my neighborhood. I know the area because when my friends come from France they always want to go to Hollywood Blvd. So I go a lot. And I always think there is so much potential there but often times the experience is not great. This is why I support this project. I want to be able to bring my friends to the new park and hang out. There are no good places to do that in Hollywood right now. It also has more housing and housing for seniors. I am not an old person but I know how hard it is to find housing so I support more housing. And especially with being so easy to get to on the subway, this is the perfect location.

I hope you will approve this project and not delay it any further. After I read the history, people have been waiting for this project a lot longer than I have even lived here. Please get it done.

Thank you for taking my comments,

Manuella Zammit
