**Subject:** Fwd: Millenium Project Hollywood

---

Hello Council members!

Living a few blocks away from the site of the Millenium redevelopment project I am excited about enhancing the neighborhood with new life, beautiful architecture and public space that engages people. However, I do also have concern for the safety of the project and reading about past studies/procedures that do not follow safety rules or a not thorough for the sake of quick development (trenching or otherwise) is incredibly disheartening. Lets MAKE SURE there is 100% transparency in the entire process and the work follows ALL RULES for safety of the process and especially the finished product. If there's nothing to hide then there should be no problem. Work should not proceed until we are sure this is safe and built to withstand strong earthquakes! Money should not be the driving force behind moving the project forward.

Thanks.

Marc Silverman
