Hi Eddie,

Happy Holidays!

Please give me a call when you are available today.

Caltrans would like to be on the same page with the City before we meet with the developer and traffic consultant. I will find out Caltrans engineer's availability once we can move forward.

Thank you!

Alan / Miya,

We are understanding of your concerns regarding this project but we are also trying to be respectful of the project's request to have a meeting with our two agencies as soon as possible. That said, if there is an opportunity for us to have a small meeting between our two groups before the end of the month then we would be happy to do so, otherwise please let us know your earliest availability to meet with the project and we will reserve a conference room for the meeting.

Thank you for your consideration.

Regards.

Hi Alan,

We understand you would like to meet with us and we are still waiting for that meeting to be scheduled. That being said, our process is very transparent. I have worked on dozens of projects just like this with this consultant and all parties are very aware of what to expect from our review of a large project with impacts.

Wes

Hi Wes,

This project has a long history. Caltrans would like to meet with the City first before we schedule any meeting with the developer's team. Caltrans needs to know what's the City's plan on SB743 and threshold of significance, and methodology of preparing the traffic study on the State facilities, etc. If there is any issue, we would like to resolve it before we meet with developer's team. It is imperative that both agencies are on the same page to move this project forward to avoid any delay.

Thank you!

Subject: Hollywood Center Project Meeting

Hi Miya,

I'm sure it has been a struggle to coordinate with staff on a time when we can all meet to discuss the project, therefore I think it might be more productive to just have one meeting with our agencies and the project's team. It seems like it might be difficult to set up two different meetings with various different parties in a reasonable amount of time. I understand that the project team has met with Caltrans already and Caltrans has issued a letter in response to the project's NOP. Our understanding was that we were calling this meeting just to make sure we are all on the same page going forward and that the study properly addressed your concerns. I believe we should be able to do this with just one meeting with all parties.

Thanks,

Wes
