Subject: Regarding Case # ENV-2018-2116-EIR

To Whom it may Concern:

I write this email to object to the latest version of the grossly over-sized development currently named "The Hollywood Center," which would stab a couple of mega-structures, 46 and 35 stories, into the heart of Hollywood. They are better-suited for the Los Angeles downtown area than the Hollywood community.

I currently live in Beachwood Canyon and I've lived in Hollywood for more than 40 years. I'm mostly a fan of the vast revitalization we've seen in that time. But a 46-story building seems a vast over-reach and one that will do more damage than good for Hollywood residents. And if this kind of development is permitted at this point, what kinds of gross over-developments will follow?

More specifically, I'm concerned about this development's impact on the traffic on our already-crowded streets, our already heavily-burdened water and sewage systems, and the limited parking in the Hollywood/Vine area.

I would support the Hollywood Center development if it proposed buildings compatible with other multi-story developments in Hollywood. But this Hollywood Center development, as proposed, is like plopping an elephant into a rabbit habitat and it should be sent back to the drawing board.

Thanks,

Chip Clements
