**Subject:** Hollywood Center Project

---

I am writing this as a request to extend the CEIR comment period. I live three blocks from this project. I have lived here 41 years. The impact this project will have on the traffic in Hollywood, especially the 101 on and off ramps at Vine and Franklin will become an absolute nightmare.

Due to the lock-down, personal, social and business burdens have understandably kept this project off the radar. Considering the magnitude of this project and the monumental changes it will cause, it is only reasonable and fair to give people more time to register their comments.
