**Subject:** Hollywood Center Project

---

I'm an architectural designer living in Hollywood heights, and I have serious concerns over the proposed Hollywood Center Project. My understanding is that the footprint of these building span across the Hollywood Fault which is capable of producing at least a magnitude 6.0 seismic event. I believe the engineering team and client are grossly misrepresenting the potential risk to life that the project poses and I ask that you reject the development in the interest of public safety.

Thanks,

Cody WinchesterFrom 1666683162250189131@xxx Thu May 14 16:15:25 +0000 2020
