Subject: case no. ENV-2018-2116-EIR

Dear Ms. Nguyen,

I am writing to you regarding the colossal project now being considered in Hollywood, near the Capital Building. See Case # in my subject line.

I urge you and the city to not allow this project to go forth. I've been living in Beachwood Canyon for almost twenty years. I've seen our neighborhood sustain enormous impact from too many residents, too much traffic. The roads are already fully congested. Many of us who live in Hollywood, live in a fire brush area. We are dependent on fire engines to make it up our small streets quickly. This will not be possible with the additional traffic that this colossal project will create. It's not safe to add more people and more cars to an area that this highly vulnerable to fire.

I urge you to disapprove the development of the proposed project because it will put enormous, and unsustainable pressure on the resources in Hollywood.

There is a limit to what Hollywood can sustain safely. This project will jeopardize the safety of its current residents.

I imagine there is enormous pressure on you and the city – through lobbyists and cronies – to approve this project.

Please, please resist. We must keep Hollywood safe.

Thank you. And feel to contact me if I can add further.
