Please note that communications between the City and the Developer, and/or their respective counsel, are not privileged and must be produced. Citizens for Ceres v. Superior Court (2013) 217 Cal.App.4th 889, 922. Accordingly, you may not withhold from the Project's administrative record, delete or otherwise destroy or spoliage any documents exchanged between, among, to/from or including the City and the Developer or their respective counsel.<sup>1</sup> **If you disagree with this proposition, please promptly provide any legal grounds for your position that any documents exchanged between the City and Developer (both as broadly defined above) are or could be privileged and not required to be included in the administrative record. Please also describe with specificity the categories of such documents you claim would be subject to any privilege or exemption to production.**

I draw your attention to Government Code § 6253.1, which requires a public agency to assist the public in making a focused and effective request by: (1) identifying records and information responsive to the request; (2) describing the information technology and physical location of the records; and (3) providing suggestions for overcoming any practical basis for denying access to the records or information sought.

If you determine that any information is exempt from disclosure, I ask that you reconsider that determination in view of Proposition 59 which amended the State Constitution to require that all exemptions be "narrowly construed." Proposition 59 may modify or overturn authorities on which the City has relied in the past.

If you determine that any requested records are subject to a still-valid exemption, I request that you exercise its discretion to disclose some or all of the records notwithstanding the exemption and with respect to records containing both exempt and

---

<sup>1</sup> This principle and admonition applies to ALL documents and communications between the City, as broadly defined above, and the Developer, as broadly defined above. No pre-Project-approval documents to, from, between, among, or including them may be withheld. This applies to all of the requests contained in this letter. Please confirm that you are not withholding or redacting any such documents and/or communications, or parts of such documents and/or communications.

non-exempt content, you redact the exempt content and disclose the rest. Should you deny any part of this request, you are required to provide a written response describing the legal authority on which you rely.

Please be advised that Government Code § 6253(c) states in pertinent part that the agency “shall promptly notify the person making the request of the determination **and the reasons therefore.**” (Emphasis added.) Section 6253(d) further states that nothing in this chapter “shall be construed to permit an agency to delay or obstruct the inspection or copying of public records. The **notification of denial** of any request for records required by Section 6255 shall set forth the names and titles or positions of each person responsible for the denial.”

Additionally, Government Code § 6255(a) states that the “agency shall justify withholding any record by demonstrating that the record in question is exempt under expressed provisions of this chapter or that on the facts of the particular case the public interest served by not disclosing the record clearly outweighs the public interest served by disclosure of the record.” (Emphasis added.) This provision makes clear that the agency is required to justify withholding any record **with particularity as to “the record in question.”** (Emphasis added.)

Please clearly state in writing pursuant to Section 6255(b): (1) if you are withholding any documents; (2) if you are redacting any documents; (3) what documents you are so withholding and/or redacting; and (4) the alleged legal bases for withholding and/or redacting as to the particular documents. It should also be noted that to the extent documents are being withheld, should those documents also contain material that is not subject to any applicable exemption to disclosure, then the disclosable portions of the documents must be segregated and produced.

Govt. Code § 6253.9(a) requires that the agency provide documents in their native format, when requested. Pursuant to that code section, please also provide the requested documents, including all applications, in their native and electronic format.

We request that you preserve intact all documents and computer communications and attachments thereto, including but not limited to all emails and computer files, wherever originated, received or copied, regarding the subject matter of the above-referenced cases, including archives thereof preserved on tape, hard drive, disc, or any other archival medium, and including also any printouts, blowbacks, or other reproduction of any such computer communications. Pursuant to, *inter alia*, Pub. Res.

Code Section 21167.6(e), the documents requested herein must be retained – notwithstanding any contrary City document or email retention policies.

If the documents exist in electronic form, we ask that you provide copies on a disk or flashdrive at cost. For any non-electronic documents, if the copy costs for those documents do not exceed \$500, please make the copies and bill this office. If the copy costs exceed \$500, please contact me in advance to arrange a time and place where we can inspect the records. **Subject:** The California Geological Survey's Comments Regarding the Hollywood Center  
Fault Investigation

At the request of the Department of City Planning the Department of Building and Safety has reviewed a July 16, 2020 letter by the California Geological Survey (CGS) that concerns the proposed Hollywood Center development (Vesting Tentative Tract 82152). The CGS states they have new data they believe indicate there may be an active fault traversing the southerly portion of the site.

We acknowledge the CGS's concern and believe the best way to resolve this issue is for the developer to excavate another exploratory trench to demonstrate, or rule out, the presence of an active fault in the southerly part of the site. The trench needs to be approximately 30 feet deep or more to expose the necessary strata, and may require the use of shoring.

It is our understanding that the geologic consultants for the project are currently working on a scope of work for a trench. As part of the review, the Department of Building and Safety will ensure there will be transparency with the CGS, by requesting the CGS geologists to observe the trench and verify the exploration results.

Please contact me if you have further questions.

Thank you.

**Subject:** Councilmember Ryu's Position on the Hollywood Center Project

Dear All, I'm emailing to share the Councilmember's position on the Hollywood Center Project with those of you who have written in to ask us about the status of the EIR and shared your additional concerns.

///

When I consider development projects, such as the Hollywood Center Project, I closely consider the reports prepared by experts in the relevant fields and verified as true by City Departments with review authority. I am not an expert in seismic engineering, and must rely on the conclusions of experts to help me determine if a development project can be constructed safely.

Which is why I am so deeply concerned by the results of the recent California Geological Survey report indicating the possible presence of an active fault strand at the project site. Given that previous studies and this new study differ so widely, I don't believe there can be confidence in the project's safety until there is clarity on the conflicting reports and data. Until such time as there is clarity, I stand in opposition to the Hollywood Center Project. Safety must be the first priority at the site.

I and my constituents are left with uncertainty, not only about the safety of the proposed future project, but also the current safety of existing buildings in the area. As I understand it, if the site has an active fault strand on it, it may not be possible for any future building at the site to ever be safe to build, no matter how sophisticated the engineering.

Furthermore, I believe that the Departments of Building and Safety and City Planning need to fully explain the review process used to verify seismic studies, namely, what the City does to independently confirm the information provided by the project applicants and address conflicting reports. - Councilmember David E. Ryu

/// I have also attached interdepartmental correspondence sent from a Geologist at the Department of Building and Safety containing recommendations for further study and verifications. Please feel free to contact our office if you have further questions. To submit a public comment to the project record also email Mindy Nguyen ([Mindy.Nguyen@lacity.org](mailto:Mindy.Nguyen@lacity.org)), who is the lead planner at the Department of City Planning. And if you want to email Councilmember O'Farrell's office, my

counterpart there is Craig Bullock ([craig.bullock@lacity.org](mailto:craig.bullock@lacity.org)). This project is located in Councilmember O'Farrell's district, Council District 13.

Regards,  
Emma
