We demand trenching of the proposed Hollywood Center site

To: councilmember.ofarrell@lacity.org, craig.bullock@lacity.org, vince.bertoni@lacity.org, mindy.nguyen@lacity.org, osama.younan@lacity.org, mayor.garcetti@lacity.org, daniel.schneiderei@lacity.org

We demand trenching of the proposed Hollywood Center site that is:

1. **Designed and overseen by independent, unpaid, neutral experts**, including from the United States Geological Survey (USGS) and California Geological Survey (CGS). The protocol these neutral experts design should be made public for review and comment before trenches are dug.
2. **Deep enough and far enough** north and south. The [USGS in their May 8, 2020 groundbreaking new study](#) found evidence of up to 4 (!) active fault lines crossing the site. Therefore, the **entire site** must be trenched, north to south. The [CGS already noted in their July 16, 2020 letter](#) that Millennium's earlier trenching was worthless, as it fell short of the area mapped by the CGS as having one of the fault lines, and also did not go deep enough.
3. Dug on **both sites east and west** of Vine Street.
4. Performed in a **fully transparent** manner, with unfettered access to the trenches by governmental (USGS and CGS) and other experts. Soil samples should also be competently collected under established protocols and the neutral authorities' watchful eyes and sent for Carbon-14 dating at a world class lab like Lawrence Livermore Labs. We will not stand for any more false claims by Millennium of "contaminated" samples so that they can deny the truth.

We won't assent to city officials and the developer duping the public with a pseudo-scientific cover-up.

For the past seven years, our attorney Robert Silverstein has shined a spotlight on the city's illegal processing of this project. See and read about some of his tireless efforts here:

1. [KTLA Channel 5](#)
2. [July 22, 2020 LA Times article](#)

3. [May 20, 2020 LA Times article](#)

We do not want our taxpayer dollars to pay to repair the damage this project will incur as have the citizens of San Francisco. The developers will leave their mess for us to clean up and you will be just as guilty as they are if you do not see the danger to life and treasure here.
