This proposed project is absurd. Nothing about it is needed. What seems to be needed is for the hideously wealthy LeFrak family to become even more wealthy. I'm sure, as usual, locals are being assured traffic will not be impacted because many or most people will be using the nearby subway - the subway less and less people are using - the subway that currently has 7 or 8 stops in a city that is over 500 square miles. I'm also sure the new building will give up parking for bicycle storage. Bicycle usage mitigating traffic is another myth the city keeps asking us to believe. Mayor Garcetti runs LA like a children's book called "Let's Pretend This is New York City." It is not. There is currently an orgy of development in Hollywood while the rest of Los Angeles is ignored. Something is terrible out of wack and it needs to be stopped.
