Hello William,

I have reviewed the information presented in your email in conjunction with the previous analysis. I believe that the additional flow of approximately 340 GPD will not change the previously provided analysis.

All language and statements written in the July 5, 2017, response remain unchanged and are still valid.

Please let me know if you have any questions or concerns.

Regards,

Chris

Hi Chris,

As discussed over the phone, please see attached revised wastewater calculations for the Hollywood and Wilcox project. The changes to the project description, which would reduce overall retail area and add office uses, are anticipated to result in an increase of approximately 340 gallons per day, relative to LA Sanitation's 7/5/17 letter.

Thanks and we look forward to your comments.

-Will
