Hi Brandy,

That is correct, however, note that this email chain is in regards to a different project (the Barry Building), which we have a call scheduled for Wednesday 10/7 at 11 am. I've attached a project summary document for your reference.

The region where Gabrieleño culture thrived for more than eight centuries encompassed most of Los Angeles County, more than half of Orange County and portions of Riverside and San Bernardino counties. It was the labor of the Gabrieleño who built the missions, ranchos and the pueblos of Los Angeles. They were trained in the trades, and they did the construction and maintenance, as well as the farming and managing of herds of livestock. “The Gabrieleño are the ones who did all this work, and they really are the foundation of the early economy of the Los Angeles area “. “That’s a contribution that Los Angeles has not recognized--the fact that in its early decades, without the Gabrieleño, the community simply would not have survived.”

Barry Building Project

Existing Conditions

- Currently developed with a two-story, approximately 13,956 square foot commercial building (Barry Building) and a surface parking lot.
- The Barry Building is City of Los Angeles Historic-Cultural Monument (HCM) No. 887 and has been vacant and fenced since 2017.

Existing Soil Conditions

- According to the Geologic Hazard Evaluation, the soils at the Project Site consist of artificial fill, consisting of silty sand that is characterized as slightly moist and medium dense with some construction debris, to a depth of 2 feet below ground surface. Beneath the artificial fill, the soils are characterized as medium dense to very dense or firm to hard and would be in the moderate expansion range.

Proposed Project

- The Project consists solely of the demolition of the Barry Building; the surface parking lot would not be demolished as part of the Project. No future development of the Site is proposed.
- Three on-site palms would be removed, though a fourth on-site palm and two street trees located along San Vicente Boulevard would remain.
- The Project would result in the removal of approximately 4,174 cubic yards of debris and excavation to a depth of approximately 5 feet to remove utilities.

SLF Search Results

- A SLF search was conducted with the NAHC yielding negative results.

Aerial view of Project Site
