Good morning Pete – hope you are doing okay. Please find attached a signal timing chart document request for the study intersections of the recently approved MOU (also attached). Would you be able to put together an invoice for me? At your earliest convenience.

Thanks Pete.
Stay safe,

-Seth

Subject: Sunset & Wilcox Project MOU - Signed

Hi Tom,

Please find the attached signed MOU. Additionally, per Tomas Carranza's August 9, 2019 memorandum (attached) regarding development projects that may not receive their entitlements by July 1, 2020, you should perform and include a VMT analysis in the transportation assessment report.

Let me know if you have any questions or concerns.

Notes:

[a] Source: Institute of Transportation Engineers (ITE), *Trip Generation, 10th Edition, 2017*

[b] Dense, multi-use urban setting option in ITE 10th Edition, which factors in a transit credit into the trip generation rate

[c] Internal capture represents the percentage of trips between land uses that occur within the site. Transportation Research Board (TRB) National Cooperative Highway Research Program (NCHRP) Report 684: Enhancing Internal Trip Capture Estimation for Mixed-Use Developments, 2011.

[d] The transit credit is based on LADOT's *Transportation Assessment Guidelines (TAG)*, July 2019. The guidelines state that developments within a 1/4-mile walking distance of a transit station, or of a Rapid Bus stop, may qualify for up to a 15% trip generation adjustment.

[e] The pass-by credit is based on Attachment H of LADOT's *Transportation Assessment Guidelines (TAG)*, July, 2019.

[f] ITE 10th Edition does not provide an AM peak rate for Office Supply Superstore land use type. These land use types typically open for business after 9AM.
