Arborist Letter

July 27, 2016

Eyestone Environmental Pei-Ming Chou 6701 Center Drive West, Suite 900 Los Angeles, California 90045

PROJECT LOCATION: 6400 Sunset Blvd, Los Angeles, CA 90028

To Whom It May Concern,

I was retained by Ms. Pei-Ming Chou to evaluate whether protected trees: all California native oaks, Western sycamore (*Platanus racemosa*), Southern California black walnut (*Juglans californica*) and California bay (*Umbellularia californica*), or significant trees, existed on the proposed construction project, as street trees, or on surrounding properties with overhanging canopies located at the above address. In accordance with the City of Los Angeles Tree Preservation Ordinance No. 177,404 this letter presents my observations and opinions concerning the protected trees.

My examination of the trees is based on my visual inspection on July 10, 2016. My site examination and the information in this letter is limited to the date and time the inspection occurred. The information in this letter is limited to the condition of the trees at the time of my inspection. My examination is not considered as a tree risk assessment. This letter is not intended as and does not represent legal advice and should not be relied upon to take the place of such advice.

I inspected the subject property, street trees, and surrounding properties. I do not find any protected trees: all California native oaks, Western sycamore (*Platanus racemosa*), Southern California black walnut (*Juglans californica*) and California bay (*Umbellularia californica*), trees with overhanging canopies and found no protected trees on the subject property or as street trees. I also did not find any significant trees on the subject property.

Thank you for choosing Evergreen Arborist Consultants. Please do not hesitate to contact me if you have any questions.

Regards,

Michael F. Green Registered Consulting Arborist #602 Licensed Landscape Contractor

Definitions:

Significant trees - Any tree which measures 12 inches or more in diameter at four and one-half feet above the average natural grade at the base of the tree and/or is more than 35 feet in height.

Protected trees - all California native oaks, Western sycamore (*Platanus racemosa*), Southern California black walnut (*Juglans californica*) and California bay (*Umbellularia californica*) which measures 4 inches or more in diameter and four and one-half feet above the average natural grade at the base of the tree

Consulting Arborists Landscape Consultants www.greenarborists.com † 310.913.5203

ADDITIONAL LIMITATIONS:

My field methods are evaluated with a ground visual survey. No climbing, coring, boring, or drilling is performed. No testing or lab analysis was performed unless specifically mentioned. Only minor ground excavation is performed to expose tree roots. Trees that require inspection for risk and hazard evaluation beyond this inspection will be billed under a separate proposal. Evergreen Arborists Consultants, Inc., or its employees, or related companies, makes no guaranties, express or implied to the trees health, risk, hazard, condition, potential for failure or future condition. Site inspections are limited to the date and time inspections occur. All inspections are visual ground inspections and are not considered as a risk inspection. No root collar excavations are performed.

This proposed Contract for Services is submitted in good faith and it is understood that the contents of this Contract for Services herein shall not be distributed further or used as the basis for a competing bid by any other individuals or disclosed to any third parties.

The limiting assumptions of the Report shall survive any termination of this Contract for Services.

Evergreen Arborists Consultants, Inc. agree to provide the Services based upon the materials (such as site plans, sketches and notes) and explanations given to Evergreen Arborists Consultants, Inc. by the Client and Evergreen Arborists Consultants, Inc. understanding of what is required to complete the Services on the Property (the "Project"). Evergreen Arborists Consultants, Inc. accepts no responsibility for either incorrect or incomplete materials and/or incorrect or incomplete information. Any survey boundaries marked on plans, or on the ground are not the responsibility of Evergreen Arborists Consultants, Inc.

Any changes in plans, locations or certain features or other aspects that affect the Services to be provided by Evergreen Arborists Consultants, Inc. shall be communicated in writing to Evergreen Arborists Consultants, Inc. immediately. Under no circumstances shall Evergreen Arborists Consultants, Inc. be responsible for any such changes unless written notification has been sent to Evergreen Arborists Consultants, Inc. by the Client providing a detailed description as to the changes and Evergreen Arborists Consultants, Inc. shall not be responsible for any changes unless it has responded to the Client in writing acknowledging receipt of such written notification.

Additional inspection(s) require a separate agreement between both parties in writing. Evergreen Arborists Consultants, Inc., or its employees shall not be liable to client/owner or any other party(s) for loss of property, loss of life, loss of use, loss of profits or income(s), special damages, incidental damages, consequential damages, or damages arising from the failure of inspection(s) or weather conditions. The client shall hold this arborist harmless against any and all claims for injuries to persons or property on the premises.

Evergreen Arborists Consultants, Inc., or its employees, companies, shall not be liable to client/owner or any other party(s) for loss of property, loss of life, loss of use, loss of profits or income(s), special damages, incidental damages, consequential damages, or damages arising from the failure of inspection(s) or weather conditions.

A consulting arborist is a tree specialist who uses their education, knowledge, training, and experience to examine trees, recommend measures to enhance the beauty and health of trees and attempt to reduce the risk of living near trees. Clients may choose to accept or disregard the recommendations of the arborist or seek additional advice.

Consulting Arborists Landscape Consultants www.greenarborists.com t 310.913.5203

A consulting arborist cannot detect every condition that could possibly lead to the structural failure of a tree. Trees are living organisms that fail in ways we do not fully understand. Conditions are often hidden within trees and/or below ground under the tree. Arborists cannot guarantee that a tree will be healthy or safe under all circumstances or for a specified period of time. Likewise, remedial treatment does not guarantee outcome or results.

Any treatment(s), such as pruning and removal of trees, but not limited to, property boundaries, property ownership, site lines, disputes between neighbors, landlord-tenant matters, etc. are beyond the scope of this work. This arborist relies and accepts information from his client to be complete and accurate. The client hiring this arborist accepts full responsibility for authorizing the recommended treatment(s) or remedial measure(s) and holds this arborist harmless. Trees can be managed, but they cannot be controlled. To live near a tree is to accept some degree of risk. The only way to eliminate all risks is to eliminate all trees.

AEI Consultants (AEI) was retained by RAIT Investment Trust to conduct a Phase I Environmental Site Assessment (ESA), in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 6400 Sunset Boulevard in the Hollywood district of the City of Los Angeles, Los Angeles County, California. Any exceptions to, or deletions from, this practice are described in Section 1.3 of this report.

PROPERTY DESCRIPTION

The subject property, which consists of two non-continuous commercial parcels of land, is located in a commercial area of the Hollywood district of the City of Los Angeles, California. The first parcel, hence forth referred to as Plot A, is bordered to the north by Sunset Boulevard, bordered to the east by Ivar Avenue, bordered to the west by Cahuenga Boulevard. According to information obtained from a March 13, 2009, Appraisal Report, Plot A totals 0.728-acre. The entire footprint of Plot A is improved with a two-story commercial structure set above a singlelevel of subterranean parking. According to information also obtained from the 2009 Appraisal Report, this structure totals 50,980 square feet. Additional improvements for Plot A include; a passenger elevator, a freight elevator, a dumbwaiter, a wheelchair lift, a natural-gas powered emergency generator, and a sump pump. The second parcel, hence forth referred to as Plot B, is bordered to the east by Ivar Avenue, bordered to the west by Cahuenga Boulevard, and bordered to the south by an unnamed alleyway. According to information obtained from the Los Angeles County Assessor, Plot B totals 0.158-acre. Plot B is developed as an asphalt-paved parking lot. Both Plot A and Plot B are occupied by Amoeba Records. Onsite operations are commercial/retail and administrative in nature. The subject property's historical use is as follows:

Plot A:

Based on AEI's review of historical sources, Plot A was developed for mixed residential and commercial use since as early as 1907. This mixed use was noted in records between approximately 1907 and 1950. Between approximately 1955 and 1999, Plot A appears to have been solely utilized for commercial purposes. According to information obtained from the Los Angeles County Assessor, Plot A was developed with current improvements in 2000. Previous commercial uses for this portion of the subject property have included; auto repairs, offices, consultants, and stores. Environmental concerns associated with the historical uses of the subject property are discussed in the *Findings* Section as well as Section 5.1 of this report.

Plot B:

Based on AEI's review of historical sources, Plot B was vacant land as early as 1907 and through at least 1913. Between approximately 1919 and 1938, this portion of the subject property appears to have been developed for residential use. Plot B then appears as vacant land between 1950 and 1957. According information obtained from the Los Angeles County Assessor, Plot B was developed as the current parking lot in 1961.

Based on a review of Sanborn maps, the following historical addresses were associated with the subject property: 1419 and 1445-1457 Ivar Avenue, 6400-6414 Sunset Boulevard, and 1456-1460 Cahuenga Boulevard. These addresses were also researched as part of this assessment.

If available, copies of historical sources are provided in the report appendices.

The subject property address 6400 Sunset Boulevard, was identified in the regulatory database as a Haznet site, and is further discussed in Section 5.1.

Direction from Site	Address-Tenant/Use			
North	Sunset Boulevard beyond which is Jack in the Box Restaurant (6407 Sunset Boulevard)			
Northeast	The intersection of Sunset Boulevard and Ivar Avenue beyond which is the Los Angeles Film School (6363 Sunset Boulevard)			
East	Ivar Avenue beyond which is The Dome Commercial Center (6360-6380 Sunset Boulevard)			
Central	Lure Nightclub (1439 Ivar Avenue)			
(Between Plot				
A and Plot B)				
South	NT Picture and Sound (1400 North Cahuenga Boulevard)			
West	North Cahuenga Boulevard beyond which are:			
	A multi-tenant commercial building (1415 North Cahuenga Boulevard)			
	An automotive shop (1425 North Cahuenga Boulevard)			
	An office building with associated parking structure (6430 Sunset Boulevard)			
Northwest	The intersection of Sunset Boulevard and Cahuenga Boulevard beyond which is a multi-tenant commercial building (1501-1507 Cahuenga Boulevard)			

The immediately surrounding properties consist of the following:

The adjacent site to the north, at 6407 Sunset Boulevard, was identified in the regulatory database as a CA FID UST, Historical UST, and SWEEPS UST site. The adjacent site to the east, at 6380 Sunset Boulevard, was identified in the regulatory database as an EDR Historical Auto Station site. The adjacent site to the west, at 1425 Cahuenga Boulevard, was identified in the regulatory database as an EDR Historical Auto Station site. The following addresses fall within adjacent address ranges and were also identified in the regulatory database; 6409 Sunset Boulevard was identified as a LUST and Historical Cortese site, 6367 Sunset Boulevard was identified in the regulatory database as an EDR Historical Cleaners, 6376 Sunset Boulevard was identified in the regulatory database as an EDR Historical Auto Station, 6418 Sunset Boulevard was identified in the regulatory database as an EDR Historical Auto Station, and 6424 Sunset Boulevard was identified in the regulatory database as an EDR Historical Auto Station. These sites are discussed in further detail in Section 5.1.

Based upon topographic map interpretation as well as information obtained from a previously issued Phase I Environmental Site Assessment, groundwater is expected to be encountered at approximately 45 feet below ground surface (bgs) and flow to the south.

FINDINGS

<u>Recognized Environmental Conditions (RECs)</u> are defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future

release to the environment. AEI's assessment has revealed the following RECs associated with the subject property or nearby properties:

• No on-site RECs were identified during the course of this assessment.

<u>Controlled Recognized Environmental Conditions (CRECs)</u> are defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. AEI's assessment has revealed the following CRECs associated with the subject property or nearby properties:

• No on-site CRECs were identified during the course of this assessment.

<u>Historical Recognized Environmental Condition (HREC)</u> is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. AEI's assessment has revealed the following HRECs associated with the subject property or nearby properties:

• No on-site HRECs were identified during the course of this assessment.

<u>Environmental Issues</u> include environmental concerns identified by AEI that warrant discussion, but do not qualify as recognized environmental conditions, as defined by the ASTM Standard Practice E1527-13. These can include, but are not limited to risks which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of the subject property. AEI's investigation has revealed the following environmental issues associated with the subject property or nearby properties:

 According to historical research, Plot A was historically developed as an auto repair. Automotive repair facilities typically utilize and store oils, solvents, and petroleum based products. Regulatory information pertaining to this historical use was not found during the course of this investigation. However, the subject property's current improvements include a level of subterranean parking which encompasses the entire footprint of the subject property parcel. It is likely that if a release associated with former auto repair operations had occurred, the redevelopment and removal of soils from the subject property would have discovered and documented such release. On this notion, the historical use of Plot A as an auto repair is not expected to represent a significant environmental concern.

If available, copies of historical sources are provided in the report appendices.

<u>Non-ASTM Considerations</u> may include the presence of environmental conditions such as asbestos containing materials, lead-based paint, radon, mold, lead in drinking water, etc. which can affect the liabilities and financial obligations of the client, the health & safety of site occupants, and the value and marketability of the subject property. AEI's assessment has revealed the following Non-ASTM considerations associated with the subject property or nearby properties:

• Non-ASTM considerations were not identified during the course of this assessment.

CONCLUSIONS, OPINIONS AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment for the property located at 6400 Sunset Boulevard in the Hollywood District of the City of Los Angeles, Los Angeles County, California, in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312). Any exceptions to, or deletions from, this practice are described in Section 1.3 of this report. This assessment has revealed no evidence of RECs in connection with the property. AEI recommends no further investigations for the subject property at this time.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment (ESA) performed in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 6400 Sunset Boulevard in the Hollywood District of the City of Los Angeles, Los Angeles County, California (Figure 1: Site Location Map, Figure 2: Site Map, and Appendix A: Property Photographs).

1.1 SCOPE OF WORK

The purpose of the Phase I Environmental Site Assessment is to assist the client in identifying potential environmental liabilities associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property, as well as regulatory non-compliance that may have occurred at the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

The goal of AEI Consultants in conducting the Phase I Environmental Site Assessment was to identify the presence or likely presence of any hazardous substances or petroleum products on the property that may indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum product into the soil, groundwater, or surface water of the property.

1.2 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI Consultants in this report. AEI Consultants relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI Consultants has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow and depth to groundwater, unless otherwise specified by on-site well data, or well data from adjacent sites are assumed based on contours depicted on the United States Geological Survey topographic maps. AEI Consultants assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.3 LIMITATIONS

Property conditions, as well as local, state, tribal and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this study apply strictly to the environmental regulations and property conditions existing at the time the study was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI Consultants makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the study.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: asbestos-containing materials, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, vapor intrusion, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed in Section 7.2. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

- 1) 42 U.S.C § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
- 2) Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
- 3) 42 U.S.C. 9601(40) and 42 U.S.C. 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations that existed on the data and information provided, and observations and conditions that existed on the date and time of the property visit.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted

procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

1.4 LIMITING CONDITIONS/DEVIATIONS

The performance of this Phase I Environmental Site Assessment was limited by the following conditions:

- The User did not complete the ASTM User questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this investigation.
- On January 7 and 14, 2014, AEI contacted the City of Los Angeles Fire Department (LAFD) Hazardous Materials (HazMat) and Underground Storage Tank (UST) Divisions for information on the subject property to identify any evidence of previous or current hazardous material usage. As of this report date a response from the LAFD HazMat and UST Divisions with the results of a search for records associated with the subject property has not been received. However, based on information obtained from historical sources as well as the regulatory database and previous report, this lack of a response from the LAFD HazMat and UST Divisions is not expected to alter the findings of this investigation.

1.5 DATA GAPS AND DATA FAILURE

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required, despite good faith efforts to gather such information.

Data failure is one type of data gap. According to ASTM E1527-13 "data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met". Pursuant to ASTM Standards, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier.

The following data gaps were identified during the course of this assessment:

Data Gap:	The earliest historical resource obtained during this investigation was a Sanborn map from 1907 which indicated development of Plot A for mixed commercial and residential use. The lack of historical sources for Plot A dating back to first developed use represents historical data source failure.			
Does this data gap affect the EP's ability to identify RECs? Yes No			Х	
Rationale	It is assumed that prior to 1907 Plot A would have been developed for residential and or commercial use, if not undeveloped.			
Information/ sources consulted	Sanborn Maps			

Data Gap:	AEI was not able to track the history of Plot B between the years 1913 and 1919 as none of the historical sources utilized as part of this assessment covered this time period.			
Does this data g	Does this data gap affect the EP's ability to identify RECs? Yes No X			Х
Rationale In the 1913 Sanborn map, Plot B is depicted as vacant land and in the 1919 Sanborn map; Plot B appears to be developed for residential use. Thus, it is assumed that during the 1913 and 1919 time period, Plot B would have been vacant land if not developed for residential use. Based on this notion, this data gap is not expected to significantly alter the findings of this investigation.			s, it is e been this data	
Information/ sources consulted	Sanborn maps			

Data Gap:	AEI was not able to track the history of the subject property between the years 1938 and 1950 as none of the historical sources utilized as part of this assessment covered this time period.			
Does this data g	Does this data gap affect the EP's ability to identify RECs? Yes No X			Х
In the 1938 aerial photograph, the subject property appears to be developed f residential use and in the 1950 Sanborn map, the subject property appears as vacant land. Thus, it is assumed that during the 1938 and 1950 time period th subject property would have been vacant land if not used for residential purposes. Based on this notion, this data gap is not expected to significantly alter the findings of this investigation.			ears as eriod the I

1.6 RELIANCE

This report is addressed to RAIT Partnership, L.P. (RAIT), such other persons as may be designated by RAIT and their respective successors and assigns. Special Conditions include (i) the Report may be relied upon by RAIT in determining whether to make a loan evidenced by a note ("the Property Note") secured by the Subject Property, (ii) the Report may be relied upon by any purchaser in determining whether to purchase the Property Note from RAIT and any rating agency rating securities issued by or representing an interest in the Mortgage Note, (iii) the Report may be referred to in and included with materials offering for sale the Property Note or an interest in the Property Note, (iv) persons who acquire the Property Note or an interest in the absence of a specific written update of the Report.

This report is for the use and benefit of, and may be relied upon by, RAIT and any of their respective affiliates, agents and advisors, the initial and subsequent holders from time to time

of any debt (or any portion thereof) and/or debt securities secured, directly and indirectly, by the property which is the subject of this report, by any participation interest in any such debt (or any portion thereof), and indenture trustee, servicer or other agent acting on behalf of such holders of such debt (or any portion thereof) and/or debt securities; any rating agencies; and the institutional provider(s) from time to time of any liquidity facility or credit support for such financings, and their respective successors and assigns.

In addition, this report or a reference to this report, may be included or quoted in any offering circular, registration statement, private placement memorandum, prospectus or sales brochure (in either electronic or hard copy format) in connection with a securitization or transaction involving such debt (or any portion thereof) and or debt securities.

2.0 SITE AND VICINITY DESCRIPTION

2.1 SITE LOCATION AND DESCRIPTION

The subject property, which consists of two non-continuous commercial parcels of land, is located in a commercial area of the Hollywood district of the City of Los Angeles, California. The first parcel, hence forth referred to as Plot A, is bordered to the north by Sunset Boulevard, bordered to the east by Ivar Avenue, bordered to the west by Cahuenga Boulevard. According to information obtained from a March 13, 2009, Appraisal Report, Plot A totals 0.728-acre. The entire footprint of Plot A is improved with a two-story commercial structure set above a singlelevel of subterranean parking. According to information also obtained from the 2009 Appraisal Report, this structure totals 50,980 square feet. Additional improvements for Plot A include; a passenger elevator, a freight elevator, a dumbwaiter, a wheelchair lift, a natural-gas powered emergency generator, and a sump pump. The second parcel, hence forth referred to as Plot B, is bordered to the east by Ivar Avenue, bordered to the west by Cahuenga Boulevard, and bordered to the south by an unnamed alleyway. According to information obtained from the Los Angeles County Assessor, Plot B totals 0.158-acre. Plot B is developed as an asphalt-paved parking lot. Both Plot A and Plot B are occupied by Amoeba Records. Onsite operations are commercial/retail and administrative in nature. The subject property address 6400 Sunset Boulevard, was identified in the regulatory database as a Haznet site, and is further discussed in Section 5.1

The Assessor's Parcel Number (APN) for Plot A is 5546-014-058. The APN for Plot B is 5546-014-029. Heating and cooling systems on the subject property are fueled by natural gas and electricity provided by Southern California Gas Company and The Los Angeles Department of Water and Power (LADWP). Potable water is also provided by the LADWP and sewage disposal is provided by municipal services.

Refer to Figure 1: Site Location Map, Figure 2: Site Map, and Appendix A: Property Photographs for site location.

2.2 SITE AND VICINITY CHARACTERISTICS

The subject property is located in a commercial area of the Hollywood district of the City of Los Angeles, California. The immediately surrounding properties consist of the following:

Direction from Site	Address-Tenant/Use			
North	Sunset Boulevard beyond which is Jack in the Box Restaurant (6407 Sunset Boulevard)			
Northeast	The intersection of Sunset Boulevard and Ivar Avenue beyond which is the Los Angeles Film School (6363 Sunset Boulevard)			
East	Ivar Avenue beyond which is The Dome Commercial Center (6360-6380 Sunset Boulevard)			
Central (Between Plot A and Plot B)	Lure Nightclub (1439 Ivar Avenue)			
South	NT Picture and Sound (1400 North Cahuenga Boulevard)			

West	North Cahuenga Boulevard beyond which are:	
	A multi-tenant commercial building (1415 North Cahuenga Boulevard)	
	An automotive shop (1425 North Cahuenga Boulevard)	
	An office building with associated parking structure (6430 Sunset Boulevard)	
Northwest	The intersection of Sunset Boulevard and Cahuenga Boulevard beyond which is a	
	multi-tenant commercial building (1501-1507 Cahuenga Boulevard)	

The adjacent site to the north, at 6407 Sunset Boulevard, was identified in the regulatory database as a CA FID UST, Historical UST, and SWEEPS UST site. The adjacent site to the east, at 6380 Sunset Boulevard, was identified in the regulatory database as an EDR Historical Auto Station site. The adjacent site to the west, at 1425 Cahuenga Boulevard, was identified in the regulatory database as an EDR Historical Auto Station site. The following addresses fall within adjacent address ranges and were also identified in the regulatory database; 6409 Sunset Boulevard was identified as a LUST and Historical Cortese site, 6367 Sunset Boulevard was identified in the regulatory database as an EDR Historical Cleaners, 6376 Sunset Boulevard was identified in the regulatory database as an EDR Historical Auto Station, 6418 Sunset Boulevard was identified in the regulatory database as an EDR Historical Auto Station, and 6424 Sunset Boulevard was identified in the regulatory database as an EDR Historical Auto Station. These sites are discussed in further detail in Section 5.1.

2.3 PHYSICAL SETTING

Geology: According to the United States Department of Agriculture's Report and General Soil Map for Los Angeles County, the area surrounding the subject property is underlain by soils of the Chino Association. The soils of this association occur on nearly level valley floors between elevations from near sea level to 1,300 feet. The average annual rainfall is 14 to 18 inches, and the mean annual temperature is 63° F. This association comprises about 2.0 percent of the report area. The natural vegetation that occurs in this association consists mainly of saltgrass, sedges, and wiregrass.

Chino soils make up about 85 percent of the association. Somewhat poorly drained, Chino soils are usually over 60 inches deep, and have moderately slow subsoil permeability. They have gray and dark gray loam, silt loam or clay loam surface layers about 16 inches thick underlain by gray and light brownish-gray silty clay loam and clay loam substratum. These soils are calcareous throughout and mottled in the lower part. The available water-holding capacity for Chino soils is 10-12 inches for 60 inches of soil depth. These soils are used for residential areas in the Los Angeles basin.

USGS Topographic Map:	Hollywood, California Quadrangle (2012)
Nearest surface water to subject property :	Hollywood Reservoir/1.3 miles to the north
Gradient Direction/Source:	South/ Hollywood, California Quadrangle (2012)
Estimated Depth to Groundwater/Source:	Approximately 45 feet bgs/Phase I Environmental Site Assessment (2009)

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

3.1 HISTORICAL SUMMARY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historic city directories, Sanborn fire insurance maps and agency records is as follows:

Plot A:		
Date Range	Subject Property Description/Use	Source(s)
1907-1950	Mixed Residential and Commercial Use	Sanborn Maps, Aerial Photographs, Building Records, and City Directories
1955-1999	Commercial Use	Aerial Photographs, Building Records, and City Directories
2000-Present	Current Commercial Improvements and Use	Aerial Photographs, Building Records, City Directories, Assessor's Records, Previous Report, and Site Observations

Plot B:

Date Range	Subject Property Description/Use	Source(s)
1907-1913	Vacant Land	Sanborn Maps and Aerial Photographs
1919-1938	Residential Dwellings	Sanborn Maps and Aerial Photographs
1950-1957	Vacant Land	Sanborn Maps and Aerial Photographs
1961-Present	Current Parking Lot	Sanborn Maps, Assessor's Records, Aerial Photographs,
		Previous Report, and Site Observations

Based on AEI's review of historical sources, Plot A was developed for mixed residential and commercial use since as early as 1907. This mixed use was noted in records between approximately 1907 and 1950. Between approximately 1955 and 1999, Plot A appears to have been solely utilized for commercial purposes. According to information obtained from the Los Angeles County Assessor, Plot A was developed with current improvements in 2000. Previous commercial uses for this portion of the subject property have included; auto repairs, offices, consultants, and stores. Environmental concerns associated with the historical uses of the subject property are discussed in the *Findings* Section as well as Section 5.1 of this report.

Based on AEI's review of historical sources, Plot B was vacant land as early as 1907 and through at least 1913. Between approximately 1919 and 1938, this portion of the subject property appears to have been developed for residential use. Plot B then appears as vacant land between 1950 and 1957. According information obtained from the Los Angeles County Assessor, Plot B was developed as the current parking lot in 1961.

Based on a review of Sanborn maps, the following historical addresses were associated with the subject property: 1419 and 1445-1457 Ivar Avenue, 6400-6414 Sunset Boulevard, and 1456-1460 Cahuenga Boulevard. These addresses were also researched as part of this assessment.

According to historical research, Plot A was historically developed as an auto repair. Automotive repair facilities typically utilize and store oils, solvents, and petroleum based products. Regulatory information pertaining to this historical use was not found during the course of this investigation. However, the subject property's current improvements include a level of subterranean parking which encompasses the entire footprint of the subject property parcel. It is likely that if a release associated with former auto repair operations had occurred, the redevelopment and removal of soils from the subject property would have discovered and documented such release. On this notion, the historical use of Plot A as an auto repair is not expected to represent a significant environmental concern.

If available, copies of historical sources are provided in the report appendices.

3.2 AERIAL PHOTOGRAPH REVIEW

AEI Consultants reviewed aerial photographs of the subject property and surrounding area. Aerial photographs were reviewed for the following years:

3.3 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of Environmental Data Resources' (EDR's) collection of Sanborn Fire Insurance maps.

Sanborn maps were available and reviewed for the years 1907, 1913, 1919, 1950, 1955, 1957, 1960, 1961, 1962, 1966, 1968, 1969, and 1970.

Based on AEI's review of city directories, the subject property has been utilized for a variety of commercial uses since as early as 1924. The commercial uses have included various stores, offices, consultants, and auto repairs. Environmental concerns associated with the historical uses of the subject property are discussed in the *Findings* Section as well as Section 5.1 of this report.

3.5 HISTORICAL TOPOGRAPHIC MAPS

In accordance with our approved scope of services, historical topographic maps were not reviewed as a part of this assessment.

3.6 CHAIN OF TITLE

In accordance with our approved scope of services, a Chain of Title search was not performed as part of this assessment.

4.0 REGULATORY AGENCY RECORDS REVIEW

4.1 **REGULATORY AGENCIES**

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous materials use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to Activity and Use Limitations (AULs), defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1.1 HEALTH DEPARTMENT

On January 7 and 14, 2014, AEI contacted the Los Angeles County Public Health Investigation (LACPHI) for information on the subject property. Files at this agency may contain information regarding hazardous materials storage, as well as information regarding unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area.

No information indicating current or prior use or storage of hazardous materials, or the existence of AULs was on file for the subject property's Plot A with the LACPHI.

As of this report date a response from the LACPHI with the results of a search for records associated with Plot B has not been received. However, based on information obtained from historical sources as well as the regulatory database and previous report, this lack of a response from the LACPHI is not expected to alter the findings of this investigation.

4.1.2 FIRE DEPARTMENT

On January 7 and 14, 2014, AEI contacted the City of Los Angeles Fire Department (LAFD) Hazardous Materials (HazMat) and Underground Storage Tank (UST) Divisions for information on the subject property to identify any evidence of previous or current hazardous material usage. As of this report date a response from the LAFD HazMat and UST Divisions with the results of a search for records associated with the subject property has not been received. However, based on information obtained from historical sources as well as the regulatory database and previous report, this lack of a response from the LAFD HazMat and UST Divisions is not expected to alter the findings of this investigation.

4.1.3 BUILDING DEPARTMENT

On January 14, 2014, AEI visited the Los Angeles Department of Building and Safety (LADBS) for information on the subject property in order to identify historical tenants and property use. Please refer to the following table for a listing of permits reviewed:

Year(s)	Owner/Applicant	Description of Permit/Building Use	
1919	J. Muller	1440 Cahuenga Boulevard: Permit to change the use of a barn into a residence

2001	Martin Gang Et Al	6400 Sunset Boulevard: Commercial building tenant alteration
2002	BTW Associates LLC	6400 Sunset Boulevard: permit to convert a second floor of a building into retail and a new tower

No information indicating current or prior use or storage of hazardous materials, or the existence of AULs was on file for the subject property with the LADBS.

4.1.4 PLANNING DEPARTMENT

On January 14, 2014, AEI visited the City of Los Angeles Planning Department (LAPD) for information on the subject property in order to identify AULs associated with the subject property.

No information indicating the existence of AULs was on file for the subject property with the LAPD.

4.1.5 COUNTY ASSESSOR OFFICE

On January 7 and 14, 2014, AEI visited the Los Angeles County Assessor's office online property database for information on the subject property in order to determine the earliest recorded date of development and use.

According to the Los Angeles County Assessor's office, Plot A's was developed with current improvements in 2000.

According to the Los Angeles County Assessor's office, Plot B's parcel totals approximately 0.158-acre in size and was developed with current improvements in 1961.

4.1.6 DEPARTMENT OF OIL GAS AND GEOTHERMAL RESOURCES

Department of Oil Gas and Geothermal Resources (DOGGR) maps concerning the subject property and nearby properties were reviewed. DOGGR maps contain information regarding oil and gas development.

According to the DOGRG map, there are no oil or gas wells within 500 feet of the subject property. No environmental concerns were noted during the DOGGR map review.

4.1.7 OTHER AGENCIES SEARCHED

On January 7 and 14, 2014, AEI visited the **Regional Water Quality Control Board (RWQCB) GeoTracker** website for information on the subject property and/or nearby sites of concern to identify any evidence of unauthorized releases of hazardous materials to the groundwater. Cases typically handled by the RWQCB include releases from underground storage tanks (USTs).

No information indicating any release of hazardous materials on the subject property was on file with the RWQCB GeoTracker website.

One nearby case, located adjacent to the north at 6409 Sunset Boulevard, was identified. This is a closed case associated with a former Texaco Station No. 0374. According to the RWQCB, this case was opened on October 2, 1985, and was closed on October 28, 1996. The contaminant of concern was listed as gasoline and the media impacted was groundwater. The case summary for this site identified Texaco Refining & Marketing as the responsible party. Based on the regulatory status as well as the identification of a responsible party, this closed case is not expected to represent a significant environmental concern.

On January 7 and 14, 2014, AEI visited the website maintained by the **South Coast Air Quality Management District (SCAQMD)** for information regarding any Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) records for the subject property associated with air emission equipment primarily from stationary sources of air pollution, such as dry cleaning machines, boilers, and/or underground storage tanks.

No Information regarding PTO, NOV, or NTC was on record with the SCAQMD website.

On January 7 and 14, 2014, AEI visited the **Hazardous Waste Tracking System (HWTS)** online database maintained by the Department of Toxic Substances Control (DTSC) for information regarding documented hazardous wastes generated at the subject property.

6400 LLC & FCS LLC was identified with the DTSC HWTS with a waste stream of asbestos containing waste generated in 1999. Based on the year, this was waste stream was presumably associated with the subject property demolition of historical structures in preparation for current improvements. Based on this information, this listing is not expected to represent a significant environmental concern.

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted Environmental Data Resources (EDR) to conduct a search of federal, state, tribal, and local databases containing known and suspected sites of environmental contamination. The number of listed sites identified within the approximate minimum search distance (AMSD) from the Federal and State environmental records database listings specified in ASTM Standard E 1527-13 are summarized in the following table. A copy of the regulatory database report is included in Appendix B of this report.

The subject property was identified in the databases reviewed as a Haznet site and is discussed below.

In determining if a site is a potential environmental concern to the subject property in the records summary table below, AEI has applied the following criteria to classify the site(s) as low concern: 1) the site(s) only hold an operating permit (which does not imply a release), 2) the site(s) have been granted "No Further Action" by the appropriate regulatory agency, and/or 3) based upon AEI's review, the distance and/or topographic position relative to the subject property reduce the level of risk associated with the site(s).

Database	Search Distance (Miles)	Subject Property Listed	Total Number of Listings	Recognized Environmental Condition or Environmental Issue (Yes/No)
NPL	1	No	0	
DELISTED NPL	0.5	No	0	
CERCLIS	0.5	No	0	
CERCLIS NFRAP	0.5	No	0	
RCRA CORRACTS	1	No	0	
RCRA-TSD	0.5	No	0	
RCRA LG-GEN, SM-GEN, CESQGs, VGN, NLR	TP/ADJ	No	0	
US ENG CONTROLS	TP	No	0	
US INST CONTROLS	TP	No	0	
ERNS	TP	No	0	
STATE/TRIBAL HWS	1	No	21	No
STATE/TRIBAL SWLF	0.5	No	0	
STATE/TRIBAL REGISTERED STORAGE TANKS	TP/ADJ	No	0	

5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Subject Property Listed	Total Number of Listings	Recognized Environmental Condition or Environmental Issue (Yes/No)
STATE/TRIBAL LUST	0.5	No	5	One site is discussed below
STATE/TRIBAL ENG-INST CONTROLS	TP	No	0	
STATE/TRIBAL VCP	0.5	No	1	No
STATE/TRIBAL BROWNFIELD	0.5	No	0	
ORPHAN	N/A	No	40	None of the identified orphan sites are located in the immediate vicinity (500-feet) of the subject property, and therefore, these sites are not expected to represent a significant environmental concern.
NON-ASTM DATABASES	TP/ADJ	Yes	0	These listings are discussed below

Site Name: 6400 LLC & FCS LLC Database(s): Haznet Address: 6400 Sunset Boulevard Distance: Subject Property Direction: N/A

Comments: The subject property was identified in the regulatory database as a Haznet site with a waste stream of asbestos containing waste generated in 1999. No additional information was included for this listing however, based on the year, this was waste stream was presumably associated with the subject property demolition of historical structures in preparation for current improvements. Based on this information, this listing is not expected to represent a significant environmental concern.

Site Name: Texaco Database(s): Historical UST, CA FID UST, and SWEEPS UST Address: 6407 Sunset Boulevard Distance: Adjacent Direction: North and hydrologically up-gradient Comments: The adjacent site to the north was identified in the regulatory database as a Historical UST, CA FID UST, and SWEEPS UST site. These UST listings indicate the site was previously equipped with at least six (6) USTs which included; one (1) 550-gallon waste oil UST, four (4) 4,000-gallon gasoline USTs, and one (1) 10,000-gallon gasoline UST. No evidence of a release was on file for this address however, this station is presumably also associated with the address 6409 Sunset Boulevard

Site Name: Former Texaco #0374 Database(s): LUST, RGA LUST, and Historical Cortese Address: 6409 Sunset Boulevard (presumably 6407 Sunset Boulevard)

which was identified as a closed LUST case and is discussed below.

Distance: 0.006-mile

Direction: North and hydrologically up-gradient

Comments: The former Texaco #0374 was identified in the regulatory database as a LUST, RGA LUST, and Historical Cortese site. The LUST listings are associated with a closed case in which the contaminant of concern was gasoline and the media impacted was soil. According to information obtained from the regulatory database as well as the RWQCB GeoTracker database, this case was opened on October 2, 1985, and was closed on October 28, 1996. The case summary for this site identified Texaco Refining & Marketing as the responsible party. Based on the regulatory status as well as the identification of a responsible party, this closed case is not expected to represent a significant environmental concern.

Based on the nature of the listing, the Historical Cortese Listing is not expected to represent a significant environmental concern.

Site Name: Muller Bros Database(s): EDR Historical Auto Station Address: 6380 Sunset Boulevard Distance: Adjacent Direction: East and hydrologically cross-gradient

Comments: The site located at 6380 Sunset Boulevard was identified in the regulatory database as an EDR Historical Auto Station between 1929 and 1942. The type of station was a gas and oil service. However, based on the age of listing and lack of documented release, this listing is not expected to represent a significant environmental concern.

Site Name: Not Identified Database(s): EDR Historical Auto Station Address: 1425 Cahuenga Boulevard Distance: Adjacent Direction: West and hydrologically cross-gradient Comments: The site located at 1425 Cahuenga Boulevard was identified in the regulatory database as an EDR Historical Auto Station between 1999 and 2012. The type of station was not identified

an EDR Historical Auto Station between 1999 and 2012. The type of station was not identified. However, based on a review of aerial photographs from this listing's time period, this type of station appears to be an auto repair. Based on the nature of the listing and lack of documented release, this listing is not expected to represent a significant environmental concern.

Site Name: Matloff Saml Jr. Database(s): EDR US Historical Cleaners Address: 6367 Sunset Boulevard Distance: 0.046-mile Direction: East and hydrologically cross-gradient Comments: The site located at 6367 Sunset Boulevard was identified as an EDR US Historical Cleaners in 1933. Based on the age of the listing and lack of documented release, this listing is not expected to represent a significant environmental concern.

Site Name: Chesbro M V Database(s): EDR Historical Auto Station Address: 6376 Sunset Boulevard Distance: 0.053-mile

Direction: East

Comments: The site located at 6476 Sunset Boulevard was identified in the regulatory database as an EDR Historical Auto Station in 1929. The type of station was an auto repair and service. Based on the type of station, age of listing, and lack of documented release, this listing is not expected to represent a significant environmental concern.

Site Name: Hollywood Machine Auto Repair Database(s): EDR Historical Auto Station Address: 6418 Sunset Boulevard Distance: 0.024-mile Direction: West north-west and hydrologically cross-gradient Comments: The site located at 6418 Sunset Boulevard was identified in the regulatory database as an EDR Historical Auto Station in 1929. The type of station was an auto repair and service. Based on the type of station, age of listing, and lack of documented release, this listing is not expected to represent

Site Name: Jones J M

a significant environmental concern.

Database(s): EDR U S Historical Auto Station Address: 6424 Sunset Boulevard Distance: 0.032-mile Direction: West Comments: The site located at 6424 Sunset Bo

Comments: The site located at 6424 Sunset Boulevard was identified in the regulatory database as an EDR Historical Auto Station in 1942. The type of station was a gas and oil service. However, based on the age of listing and lack of documented release, this listing is not expected to represent a significant environmental concern.

5.2 VAPOR ENCROACHMENT

A Tier 1 Vapor Encroachment Screen (VES) pursuant to ASTM E2600-10 was performed as part of this assessment to determine whether a potential *vapor encroachment condition* (VEC) exists at the subject property. The VES included the review of reasonably ascertainable information for the subject and nearby properties. During the course of this assessment, a reasonable probability was not identified to indicate that a VEC exists at the subject property.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this investigation in order to obtain information indicating RECs in connection with the subject property.

6.1.1 INTERVIEW WITH OWNER

The subject property owner representative, Mr. Alex Kesicbasian, was interviewed by AEI and completed the AEI Phase I ESA Pre-Site Inspection Questionnaire on January 10, 2014. Mr. Kesicbasian has been associated with the subject property for approximately 3.5 years. Mr. Kesicbasian was asked if he was aware of any of the following:

Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property.		x	No
Any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property.		x	No
Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or			
petroleum products.		X	No
Any incidents of flooding, leaks, or other water intrusion, and/or complaints			
related to indoor air quality.	Yes	Х	No

6.1.2 INTERVIEW WITH KEY SITE MANAGER

The key site manager, Mr. Jon Liu, was interviewed by AEI at the time of the site reconnaissance on January 14, 2014. Mr. Liu has been associated with the subject property for approximately 12 years. Mr. Liu provided general information regarding historic and current operations at the subject property.

Mr. Liu was asked if he was aware of any of the following:

Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property.		x	No
Any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property.		x	No
Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or			
petroleum products.	Yes	Х	No
Any incidents of flooding, leaks, or other water intrusion, and/or complaints			
related to indoor air quality.	Yes	Х	No

6.1.3 PAST OWNERS, OPERATORS AND OCCUPANTS

In an attempt to interview past owners, operators and occupants regarding historical on-site operations, AEI requested the contact information for these entities from the subject property owner representative, Mr. Alex Kesicbasian. Mr. Alex Kesicbasian was unable to provide the contact information for the past owners, operators and occupants. Other methods of researching the contact information for past owners, operators and occupants performed by AEI included reviewing historical agency records and online research. None of these additional research methods provided AEI contact information for past owners, operators and occupants.

Consequently, interviews with these entities regarding historical on site operations were not reasonably ascertainable which constitutes a data gap.

6.1.4 INTERVIEW WITH OTHERS

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this section.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and EPA's AAI Rule, certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the environmental professional. The responsibility for qualifying for Landowner Liability Protections (LLPs) by conducting the inquiries ultimately rests with the User, and providing the information to the environmental professional would be prudent if such information is available.

The User did not complete the ASTM User questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

6.3 Previous Reports and Other Provided Documentation

Documentation was provided to AEI by Mr. Steve Tsoflias during this assessment. A summary of this information follows:

<u>Phase I Environmental Site Assessment Report, prepared by Partner Engineering and Science,</u> Inc. (October 21, 2009)

Partner Engineering and Science, Inc. (Partner) issued a Phase I Environmental Site Assessment Report (Phase I) for the subject property's Plot A on October 21, 2009. At the time of Partner's investigation, Plot A was developed with current improvements and occupied by Amoeba Music. Partner's findings included the following;

Plot A was developed for residential use between approximately 1919 and 1925. Plot A was then utilized for mixed residential and commercial use between approximately 1925 and 1946 and then solely for commercial use between approximately 1946 and 1999. All of Plot A's historic structures appear to have been demolished by 1999. Current commercial improvements appear to have been developed in 2000.

Groundwater is expected to be encountered at approximately 45 feet bgs and flow to the south.

The report was issued with the following *environmental issue*:

"According to historical city directory listings and Sanborn fire insurance maps, the subject property was historically developed for automotive sales and repair use from as early as 1950 through 1960, approximately 10 years. Automotive repair facilities typically utilize and store oils, solvents, and petroleum based products. This site operated at a time of little to no regulatory oversight. No information pertaining to the historic nature of operations of the former automotive tenant was on file with the Los Angeles Fire Department. The current subject property building contains a subterranean parking lot which encompasses the entire

footprint of the subject property parcels. It is likely that if a release occurred, the redevelopment and removal of soils from the subject property would have mitigated any concerns associated with the former operations onsite. Based on this, the presence of the former automotive repair operation onsite is not expected to represent a significant environmental concern."

AEI concurs with Partners environmental issue and consequential conclusion.

Partner did not identify any RECs or HRECs during the course of their investigation and did not recommend any further investigation for Plot A.

7.0 SITE INSPECTION AND RECONNAISSANCE

On January 14, 2014, a site reconnaissance of the subject property and adjacent properties was conducted by Mr. Danny Huerta of AEI in order to obtain information indicating the likelihood of RECs at the subject property and adjacent properties as specified in ASTM Standard Practice E1527-13 §8.4.2, 8.4.3 and 8.4.4. During the on-site reconnaissance, AEI was accompanied by the key site manager, Mr. Jon Liu, and was granted access to all areas of the subject property.

Yes	No	Observation

Х		Other	

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

The subject property is currently occupied Amoeba Records. Onsite operations are commercial/retail and administrative in nature. The above identified observed items are further discussed below.

ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

Toxic polychlorinated biphenyls (PCBs) were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR, Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing". Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Elevators

Plot A is equipped with two hydraulic elevators (passenger and freight) and one dumbwaiter. The hydraulic fluid contained within elevator systems can potentially contain toxic polychlorinated biphenyls (PCBs). Based on the age of the building (post-1978), it is unlikely that the hydraulic fluid within the equipment for these elevators contains PCBs. The equipment rooms for the passenger and freight elevators are both located in the subterranean parking level of Plot A. The equipment for the dumbwaiter is located on the first floor of Plot A's building. No evidence of stains or leaks was observed at the base any of the elevator equipment during the site inspection. Based on the good condition and regular maintenance of the elevator equipment, the elevator is not expected to represent a significant environmental concern.

DRAINS, SUMPS AND CLARIFIERS

A sump pump was noted in Plot A's subterranean parking garage. According to the key site manager, Mr. Jon Liu, this sump (and associated drains) are used when the parking area floods during heavy rainfall and or when the garage is power washed (water only). Based on the use of the sump pump and drains for runoff, the presence of the sump pump and drains is not expected to represent a significant environmental concern. No hazardous substances or petroleum products were noted in the vicinity of the drains or sump pump. Based on the use of the drains and sump pump solely for storm water runoff, the presence of these features is not expected to represent a significant environmental concern.

OTHER

The subject property is equipped with an emergency generator. According to the key site manager, Mr. Jon Liu, this generator is powered by natural gas. No evidence of leaks or spills was observed at the base of the generator. Based on the good condition of the equipment, the presence of the emergency generator and associated fuel is not expected to represent a significant environmental concern.

7.2 Non-ASTM Services

7.2.1 Asbestos-Containing Building Materials OSHA

For buildings constructed prior to 1981, the Code of Federal Regulations (29 CFR 1926.1101 and 29 CFR 1910.1001) define presumed asbestos-containing material (PACM) as 1. Thermal System Insulation (TSI), e.g., boiler insulation, pipe lagging, fireproofing; and 2. Surfacing Materials, e.g., acoustical ceilings. Building owners/employers are responsible for locating the presence and quantity of PACM. Building Owners/employers can rebut installed material as PACM by either having an inspection in accordance with Asbestos Hazard Emergency Response Act (AHERA) (40 CFR Part 763, Subpart E) or hiring an accredited inspector to take bulk samples of the suspect material.

Typical materials not covered by the presumptive rule include but are not limited to: floor tiles and adhesives, wallboard systems, siding and roofing. Building materials such as wallboard systems may contain asbestos but unless a building owner/employer has specific knowledge or should have known through the exercise of due diligence that these other materials contain asbestos, the standard does not compel the building owner to sample these materials.

<u>NESHAP</u>

The applicability of the EPA's National Emission Standards for Hazardous Air Pollutants (NESHAP, 40 CFR Chapter 61, Subpart M) apply to the owner or operator of a facility where an inspection for the presence of asbestos-containing materials (ACM), including Category I (asbestos containing packings, gaskets, resilient floor coverings and asphalt roofing products), and Category II (all remaining types of non-friable asbestos containing material not included in Category I that when dry, cannot be crumbled, pulverized or reduced to powder by hand pressure), non-friable ACM must occur prior to the commencement of demolition or renovation activities. NESHAP defines ACM as any material or product that contains *greater than* 1% asbestos. It should be noted that the NESHAP regulation applies to all facilities regardless of construction date, including: 1. Any institutional, commercial, public, industrial, or residential structure, installation, or building; 2. Any ship; and 3. Any active or inactive waste disposal site. This requirement is typically enforced by the EPA or by local air pollution control/air quality management districts.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Although the cutoff date of 1981 is generally accepted for estimating the likelihood that a building contains ACMs, building materials manufactured after 1981, while not expected to, may still contain asbestos. AEI presents the following observed materials that would be considered suspect ACMs in the event of a thorough survey.

Subject Abbestos Containing Materials (Activity)				
Material	Location	Friable	Condition	
Drywall Systems	Throughout Building Interior	Yes	Good	
Drop-Down Ceiling Tiles	Throughout Building Interior (second floor)	Yes	Good	
Linoleum Floor Tiles	Throughout Office Interior	No	Good	
Roofing Systems	Roof	Not Inspected	Not Inspected	

Suspect Asbestos Containing Materials (ACMs)

All observed suspect ACMs were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time.

7.2.2 LEAD-BASED PAINT

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has $\geq 1 \text{ mg/cm}^2$ (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X", defines a LBP hazard is "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact lead-based paint on most walls and ceilings would not

be considered a "hazard", although the paint should be maintained and its condition and monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on lead-based paint and lead-based paint hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, federally owned or subsidized housing are affected by this rule.

Lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state or local regulations in regards to lead-containing paints.

In buildings constructed after 1978, it is unlikely that LBP is present. Structures built prior to 1978 and especially prior to the 1960's should be expected to contain LBP.

Due to the age of the subject property building, it is unlikely that LBP is present.

7.2.3 RADON

Radon is a naturally-occurring, odorless, invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action limit of 4.0 picoCuries per Liter (pCi/L). It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this assessment. According to the US EPA, the radon zone level for the area is Zone 2, which has a predicted average indoor screening level between 2 pCi/L and 4 pCi/L, equal to or below the action level of 4.0 pCi/L set forth by the EPA.

7.2.4 DRINKING WATER SOURCES AND LEAD IN DRINKING WATER

The City of Los Angeles supplies potable water to the subject property. The most recent water quality report states that lead levels in the areas water supply were well within standards established by the USEPA.

7.2.5 MOLD/INDOOR AIR QUALITY ISSUES

Molds are simple, microscopic organisms, which can often be seen in the form of discoloration, frequently green, gray, white, brown or black. When excessive moisture or water accumulates indoors, mold growth will often occur, particularly if the moisture problem remains undiscovered or is not addressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting often play host to such growth. Mold spores primarily cause health problems through the inhalation of mold spores or the toxins they emit when they are present in large numbers. This can occur primarily when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

AEI observed interior areas of the subject property building in order to identify the significant presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. As such, no bulk sampling of suspect surfaces was conducted as part of this assessment and no additional action with respect to mold appears to be warranted at this time.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Additional areas of mold not observed as part of this limited assessment, possibly in pipe chases, heating, ventilation and air conditioning (HVAC) systems and behind enclosed walls and ceilings, may be present on the subject property.

7.3 ADJACENT PROPERTY RECONNAISSANCE FINDINGS

None of the above listed items were observed during the site inspection.

8.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

By signing this report, the senior author declares that, to the best of his or her professional knowledge and belief, he or she meets the definition of *Environmental Professional* as defined in §312.10 of 40 CFR Part 312.

The senior author has the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. The senior author has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40CFR Part 312.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/10/2013 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
SUNSET AND VINE TOWER	1480 VINE ST	E 1/8 - 1/4 (0.141 mi.)	Q63	49

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/10/2013 has revealed that there are 14 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 11/06/2013 has revealed that there are 16 ENVIROSTOR sites within approximately 1 mile of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/10/2013 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 4 HIST CORTESE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 50 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 27 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists.

A review of the RGA LUST list, as provided by EDR, has revealed that there are 5 RGA LUST sites within approximately 0.5 miles of the target property.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Type:	Cleanup Program Site
Case Worker:	HJ
Local Agency:	Not reported
RB Case Number:	1186
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Tetrachloroethylene (PCE)
Site History:	Paragon cleaners is located on the northeast corner of the
	intersection of Vine Street and Fountain Avenue. Ground water has
	been impacted by the contaminant PCE due to operations at the dry
	cleaners. The dry cleaner has been in operation since 1961, and in
	2006, switched to "green" chemicals.

LIENS: Envirostor Id: Latitude: Longitude: Project Mgr: Project Code: If Satisfied: Date Satisfied: Site Status: Site Type: Completed: Description:	60000422 34.090777 -118.33477 MANJUL BOSE 301295 Not reported Not reported Active VOLUNT Not reported The La Pietre Site is located at 6648, 6650 West Lexington Avenue, and 6649, 6665 W. Santa Monica Blvd, in West Hollywood, LA County. The Site is approximately 3.9 acres in size, and is located in a commercial/residential area. The Site was operated by the Union Ice Company from approximately 1919 until the mid-1980's. A portion of the Site was used as a lumber yard. Small quantities of waste oil, solvents, and pressurized gas cylinders were stored onsite. Vehicle maintenance/repair occurred onsite. Also, unpermitted USTs containing fuels were located onsite. The present condition of these USTs is unknown, but Union Ice personnel thought they had been removed prior to vacating the Site. The Site is currently occupied by a dance club, a warehouse, and commercial parking. A Phase I/II were completed in mid-2005 to assess soil, soil vapor, and groundwater. Low concentrations of VOC's, namely TCE and PCE, were detected in soil, soil vapor, and groundwater, with VOC concentrations increasing with depth in the soil column. Two groundwater samples reported 3.8 pb of TCE, 19 pb of PCE, and 2.2 pb of cis 1,2-DCE in an upgradient location, while a downgradient location reported 8.2 pb of TCE, 48 ppb of PCE, 6.3 ppb of cis 1,2-DCE, and 0.66 ppb of Freon 12. The Original VCA included 3.9 acres of parcels 553-202-2019, was not part of the original VCA however investigations were conducted at this parcel too and considered part of the original site. In November 2012, a VCA was signed to remove the "Kodak Parcel" from the La Pietra Site. DTSC reviewed the documents submitted and in December 2012, DTSC issued a No Further Action towards 553-202-2008 and 553-202-2010 known as 6677 Santa Monica Boulevard & 1120 North Las Palmas Avenue. The remaining parcels require further investigation.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/26/2013 Date Data Arrived at EDR: 05/09/2013 Date Made Active in Reports: 07/10/2013 Number of Days to Update: 62 Source: EPA Telephone: N/A Last EDR Contact: 11/11/2013 Next Scheduled EDR Contact: 01/20/2014 Data Release Frequency: Quarterly

NPL Site Boundaries

EPA Region 5 Telephone 312-886-6686

EPA Region 10 Telephone 206-553-8665

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/26/2013 Date Data Arrived at EDR: 05/09/2013 Date Made Active in Reports: 07/10/2013 Number of Days to Update: 62 Source: EPA Telephone: N/A Last EDR Contact: 11/11/2013 Next Scheduled EDR Contact: 01/20/2014 Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/26/2013 Date Data Arrived at EDR: 05/29/2013 Date Made Active in Reports: 08/09/2013 Number of Days to Update: 72 Source: EPA Telephone: 703-412-9810 Last EDR Contact: 11/11/2013 Next Scheduled EDR Contact: 03/10/2014 Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/31/2013 Date Data Arrived at EDR: 07/08/2013 Date Made Active in Reports: 12/06/2013 Number of Days to Update: 151 Source: Environmental Protection Agency Telephone: 703-603-8704 Last EDR Contact: 10/11/2013 Next Scheduled EDR Contact: 01/20/2014 Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 04/26/2013 Date Data Arrived at EDR: 05/29/2013 Date Made Active in Reports: 08/09/2013 Number of Days to Update: 72 Source: EPA Telephone: 703-412-9810 Last EDR Contact: 11/11/2013 Next Scheduled EDR Contact: 03/10/2014 Data Release Frequency: Quarterly

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 09/10/2013 Date Data Arrived at EDR: 10/02/2013 Date Made Active in Reports: 12/16/2013 Number of Days to Update: 75 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 01/02/2014 Next Scheduled EDR Contact: 04/14/2014 Data Release Frequency: Quarterly

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/10/2013 Date Data Arrived at EDR: 10/02/2013 Date Made Active in Reports: 12/16/2013 Number of Days to Update: 75 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 01/02/2014 Next Scheduled EDR Contact: 04/14/2014 Data Release Frequency: Quarterly

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/10/2013 Date Data Arrived at EDR: 10/02/2013 Date Made Active in Reports: 12/16/2013 Number of Days to Update: 75 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 01/02/2014 Next Scheduled EDR Contact: 04/14/2014 Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/10/2013 Date Data Arrived at EDR: 10/02/2013 Date Made Active in Reports: 12/16/2013 Number of Days to Update: 75 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 01/02/2014 Next Scheduled EDR Contact: 04/14/2014 Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 06/17/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/21/2013	Telephone: 703-603-0695
Date Made Active in Reports: 10/03/2013	Last EDR Contact: 12/09/2013
Number of Days to Update: 104	Next Scheduled EDR Contact: 03/24/2014
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 06/17/2013 Date Data Arrived at EDR: 06/21/2013 Date Made Active in Reports: 10/03/2013 Number of Days to Update: 104 Source: Environmental Protection Agency Telephone: 703-603-0695 Last EDR Contact: 12/09/2013 Next Scheduled EDR Contact: 03/24/2014 Data Release Frequency: Varies

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 08/20/2013 Date Data Arrived at EDR: 08/23/2013 Date Made Active in Reports: 11/01/2013 Number of Days to Update: 70 Source: Department of the Navy Telephone: 843-820-7326 Last EDR Contact: 11/18/2013 Next Scheduled EDR Contact: 03/03/2014 Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/30/2013 Date Data Arrived at EDR: 10/01/2013 Date Made Active in Reports: 12/06/2013 Number of Days to Update: 66 Source: National Response Center, United States Coast Guard Telephone: 202-267-2180 Last EDR Contact: 12/30/2013 Next Scheduled EDR Contact: 04/14/2014 Data Release Frequency: Annually

State- and tribal - equivalent NPL

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 11/06/2013	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/06/2013	Telephone: 916-323-3400

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 11/06/2013 Date Data Arrived at EDR: 11/06/2013 Date Made Active in Reports: 12/03/2013 Number of Days to Update: 27 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 11/06/2013 Next Scheduled EDR Contact: 02/17/2014 Data Release Frequency: Quarterly

State and tribal landfill and/or solid waste disposal site lists

SWF/LF (SWIS): Solid Waste Information System

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

State and tribal voluntary cleanup sites

INDIAN VCP R1: Voluntary Cleanup Priority Listing

A listing of voluntary cleanup priority sites located on Indian Land located in Region 1.

Date of Government Version: 09/17/2013	
Date Data Arrived at EDR: 10/01/2013	
Date Made Active in Reports: 12/06/2013	
Number of Days to Update: 66	

Source: EPA, Region 1 Telephone: 617-918-1102 Last EDR Contact: 01/03/2014 Next Scheduled EDR Contact: 04/14/2014 Data Release Frequency: Varies

INDIAN VCP R7: Voluntary Cleanup Priority Lisitng

A listing of voluntary cleanup priority sites located on Indian Land located in Region 7.

Date of Government Version: 03/20/2008 Date Data Arrived at EDR: 04/22/2008 Date Made Active in Reports: 05/19/2008 Number of Days to Update: 27 Source: EPA, Region 7 Telephone: 913-551-7365 Last EDR Contact: 04/20/2009 Next Scheduled EDR Contact: 07/20/2009 Data Release Frequency: Varies

VCP: Voluntary Cleanup Program Properties

Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

Date of Government Version: 11/06/2013 Date Data Arrived at EDR: 11/06/2013 Date Made Active in Reports: 12/03/2013 Number of Days to Update: 27 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 11/06/2013 Next Scheduled EDR Contact: 02/17/2014 Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 09/24/2013 Date Data Arrived at EDR: 09/24/2013 Date Made Active in Reports: 12/06/2013 Number of Days to Update: 73 Source: Environmental Protection Agency Telephone: 202-566-2777 Last EDR Contact: 12/24/2013 Next Scheduled EDR Contact: 04/07/2014 Data Release Frequency: Semi-Annually

Local Lists of Landfill / Solid Waste Disposal Sites

DEBRIS REGION 9: Torres Martinez Reservation Illegal Dump Site Locations

A listing of illegal dump sites location on the Torres Martinez Indian Reservation located in eastern Riverside County and northern Imperial County, California.

Date of Government Version: 01/12/2009
Date Data Arrived at EDR: 05/07/2009

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 08/06/2013	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 09/11/2013	Telephone: 202-307-1000

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Date Data Arrived at EDR: 03/01/2007 Date Made Active in Reports: 04/10/2007 Number of Days to Update: 40 Source: Environmental Protection Agency Telephone: 202-564-2501 Last EDR Contact: 12/17/2007 Next Scheduled EDR Contact: 03/17/2008 Data Release Frequency: No Update Planned

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2009 Date Data Arrived at EDR: 12/10/2010 Date Made Active in Reports: 02/25/2011 Number of Days to Update: 77 Source: EPA Telephone: 202-564-4203 Last EDR Contact: 10/28/2013 Next Scheduled EDR Contact: 02/11/2014 Data Release Frequency: Annually

ICIS: Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 07/20/2011 Date Data Arrived at EDR: 11/10/2011 Date Made Active in Reports: 01/10/2012 Number of Days to Update: 61 Source: Environmental Protection Agency Telephone: 202-564-5088 Last EDR Contact: 10/09/2014 Next Scheduled EDR Contact: 01/27/2014 Data Release Frequency: Quarterly

PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 06/01/2013	Source: EPA
Date Data Arrived at EDR: 07/17/2013	Telephone: 202-566-0500

	Data Release Frequency: Quarterly

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 03/08/2013 Date Data Arrived at EDR: 03/21/2013 Date Made Active in Reports: 07/10/2013 Number of Days to Update: 111 Source: EPA Telephone: (415) 947-8000 Last EDR Contact: 12/10/2013 Next Scheduled EDR Contact: 03/24/2014 Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 Date Data Arrived at EDR: 07/03/1995 Date Made Active in Reports: 08/07/1995 Number of Days to Update: 35 Source: EPA Telephone: 202-564-4104 Last EDR Contact: 06/02/2008 Next Scheduled EDR Contact: 09/01/2008 Data Release Frequency: No Update Planned

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 05/08/2012 Date Data Arrived at EDR: 05/25/2012 Date Made Active in Reports: 07/10/2012 Number of Days to Update: 46 Source: Environmental Protection Agency Telephone: 202-564-8600 Last EDR Contact: 10/28/2013 Next Scheduled EDR Contact: 02/11/2014 Data Release Frequency: Varies

BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2011 Date Data Arrived at EDR: 02/26/2013 Date Made Active in Reports: 04/19/2013 Number of Days to Update: 52 Source: EPA/NTIS Telephone: 800-424-9346 Last EDR Contact: 11/25/2013 Next Scheduled EDR Contact: 03/10/2014 Data Release Frequency: Biennially

CA BOND EXP. PLAN: Bond Expenditure Plan

Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

Date of Government Version: 01/01/1989 Date Data Arrived at EDR: 07/27/1994 Date Made Active in Reports: 08/02/1994 Number of Days to Update: 6 Source: Department of Health Services Telephone: 916-255-2118 Last EDR Contact: 05/31/1994 Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

UIC: UIC Listing

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

2020 COR ACTION: 2020 Corrective Action Program List The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data Source: Rextag Strategies Corp. Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals: Source: American Hospital Association, Inc. Telephone: 312-280-5991 The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals. Medical Centers: Provider of Services Listing Source: Centers for Medicare & Medicaid Services Telephone: 410-786-3000 A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services. Nursing Homes Source: National Institutes of Health Telephone: 301-594-6248 Information on Medicare and Medicaid certified nursing homes in the United States. **Public Schools** Source: National Center for Education Statistics Telephone: 202-502-7300 The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states. **Private Schools** Source: National Center for Education Statistics Telephone: 202-502-7300 The National Center for Education Statistics' primary database on private school locations in the United States. Daycare Centers: Licensed Facilities Source: Department of Social Services Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image

is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

# **PREVIOUS REPORTS**

## PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

**AMOEBA MUSIC** 6400 West Sunset Boulevard Hollywood, California 90028

October 21, 2009 Partner Project No. 09-64166

Prepared for

LM ADVISORS 401 B Street, Suite 950 San Diego, California 92101

October 21, 2009

Mr. Leonard Simpser LM Advisors 401 B Street, Suite 950 San Diego, California 92101

Subject: Phase I Environmental Site Assessment Amoeba Music 6400 West Sunset Boulevard Hollywood, California 92101 Partner Project No. 09-64166

Dear Mr. Simpser:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in general conformance with the scope and limitations as detailed in the ASTM Practice E1527-05 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to LM Advisors. If you have any questions concerning this report, or if we can assist you in any other matter, please contact Mr. Hector Talavera at (310) 619-4500.

Sincerely,

Michael Eng

Michael Eng, M.S. Environmental Professional

# **EXECUTIVE SUMMARY**

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in general accordance with the scope of work and limitations of ASTM Standard Practice E1527-05, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by LM Advisors for the property located at 6400 West Sunset Boulevard in the City of Hollywood, County of Los Angeles, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide LM Advisors with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

### **Property Description**

The subject property is located on the southwest corner of West Sunset Boulevard and North Ivar Avenue, the southeast corner of West Sunset Boulevard and North Cahuenga Boulevard; and the south side of West Sunset Boulevard in a commercial area of Hollywood. Please refer to the table below for further description of the subject property:

Address:	6400 West Sunset Boulevard
Historical/Additional Addresses:	1440-1460 North Cahuenga Boulevard;
	6402-6414 West Sunset Boulevard
	1441-1453 North Ivar Avenue
Assessor's Parcel Numbers (APNs):	5546-014-005; -009; -040; -057
Nature of Use :	Commercial
Number of Buildings:	One
Number of Floors:	Two with single level subterranean parking
Type of Construction:	Masonry/ Concrete Tilt-up
Building Square Footage (SF):	90,479 SF
Land Acreage (Ac):	0.75 Ac
Date of Construction:	2000
Current Tenants:	Amoeba Music

The subject property building encompasses the entire footprint of the subject property parcel. In addition to the current structure, the subject property is also improved with a single level of subterranean concrete-paved parking areas.

According to historical sources, the subject property was formerly developed with structures for residential use from as early as 1919 until circa 1925; developed with structures for residential and commercial use from 1925 until circa 1946; developed for retail, automotive, and office use from 1946 until circa 1960; and developed for office and retail use from 1960 through 1999. From 1999 to present the subject property has been developed for retail use.

The immediately surrounding properties consist of West Sunset Boulevard to the north, beyond which are Ground Works Coffee Shop to the northwest; Cahuenga Boulevard, Jack-in-the-Box; and Ivar Avenue to the north; and The Los Angeles Film School to the northeast. North Cahuenga Boulevard is to the west, beyond which are the CNN News Building, an unnamed alleyway, and a parking structure. The Cabana Club is to the south; and North Ivar Avenue is to the east, beyond which is a multi-tenant shopping center identified as The Dome with a multi-level parking structure.

According to the Regional Water Quality Control Board and topographic map interpretation, the depth and direction of groundwater in the vicinity of the subject property is inferred to be present at approximately 45 feet below ground surface (bgs) and flow to the south.

# Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substance or petroleum product on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term REC includes hazardous substances and petroleum products even under conditions that might be in compliance with laws. The term is not intended to include "de minimis" conditions that do not present a threat to human health and/or the environment and that would not be subject to an enforcement action if brought to the attention of appropriate governmental agencies. The following was identified during the course of this investigation:

• Partner did not identify any recognized environmental conditions during the course of this investigation.

A *historical recognized environmental condition (HREC)* refers to an environmental condition which would have been considered a REC in the past, but which may or may not be considered a REC currently. The following was identified during the course of this investigation:

• Partner did not identify any historical recognized environmental conditions during the course of this investigation.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, require discussion. The following was identified during the course of this investigation:

• According to historical city directory listings and Sanborn fire insurance maps, the subject property was historically developed for automotive sales and repair use from as early as 1950 through 1960, approximately 10 years. Automotive repair facilities typically utilize and store oils, solvents, and petroleum based products. This site operated at a time of little to no regulatory oversight. No information pertaining to the historic nature of operations of the former automotive tenant was on file with the Los Angeles Fire Department. The current subject property building contains a subterranean parking lot which encompasses the entire footprint of the subject property parcels. It is likely that if a release occurred, the redevelopment and removal of soils from the subject property would have mitigated any concerns associated with the former operations onsite. Based on this, the presence of the former automotive repair operation onsite is not expected to represent a significant environmental concern.

### Conclusions, Opinions, and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-05 of 6400 West Sunset Boulevard in the City of Hollywood, County of Los Angeles, California (the "subject property"). Any exceptions to or deletions from this practice are described in Section 1.4 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property. Based on the conclusions of this assessment, Partner recommends no further investigation of the subject property at this time.

# APPENDICES

- Appendix A- Site Photographs
- Appendix B– References
- Appendix C- Regulatory Database Report
- Appendix D- Qualifications

# 1.0 INTRODUCTION

Partner has performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Standard Practice E1527-05 and AAI for the property located at 6400 West Sunset Boulevard in the City of Hollywood, County of Los Angeles, California. Any exceptions to, or deletions from, this scope of work are described in the report.

# 1.1 Purpose

The purpose of this Phase I Environmental Site Assessment ("ESA") is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E-1527-05) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require cleanup, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property, and; 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing, 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property, and/or; 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E-1527-05 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

# 1.2 Scope of Work

The scope of work for this ESA is in general accordance with the requirements of ASTM Standard E 1527-05. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

### 1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the site is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: asbestos-containing materials, lead-based paint, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

### 1.4 User Reliance

All reports, both verbal and written, are for the sole use and benefit of LM Advisors. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of Partner.

### **1.5 Limiting Conditions**

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-05.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this investigation.
- Due to the time constraints associated with this report, Partner was not able to obtain records from the Los Angeles County Department of Health Services. Based on the detailed information gathered from other sources, the lack of this information is not expected to alter the overall conclusions of this investigation. However, if issues of environmental concern are identified upon review of these records, an addendum to this report will be issued.

Due to time constraints associated with this report, the Client has requested the report despite the above-listed limitations.

# 2.0 SITE DESCRIPTION

### 2.1 Site Location and Legal Description

The subject property is located on the southwest corner of West Sunset Boulevard and North Ivar Avenue, the southeast corner of West Sunset Boulevard and North Cahuenga Boulevard; and the south side of West Sunset Boulevard in a commercial area of Hollywood. Please refer to the table below for further description of the subject property:

Address:	6400 West Sunset Boulevard
Historical/Additional Addresses:	1440-1460 North Cahuenga Boulevard;
	6402-6414 West Sunset Boulevard
	1441-1453 North Ivar Avenue
Assessor's Parcel Numbers (APNs):	5546-014-005; -009; -040; -057
Nature of Use :	Commercial
Number of Buildings:	One
Number of Floors:	Two with single level subterranean parking
Type of Construction:	Masonry/ Concrete Tilt-up
Building Square Footage (SF):	90,479 SF
Land Acreage (Ac):	0.75 Ac
Date of Construction:	2000
Current Tenants:	Amoeba Music

The subject property building encompasses the entire footprint of the subject property parcel. In addition to the current structure, the subject property is also improved with a single level of subterranean asphalt-paved parking areas.

The subject property was not identified in the regulatory database report as further discussed in Section 4.2.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, and Appendix A: Site Photographs.

# 2.2 Current Property Use

The subject property is currently developed with a two-story building with a single level of subterranean parking which encompasses an entire city block for use as a music store identified as Amoeba Records.

# 2.3 Current Use of Adjoining Properties

The subject property is located in a commercial area of Hollywood. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Direction	Adjacent Property	
North	West Sunset Boulevard, beyond which are Ground Works Coffee Shop to the	
	northwest; Cahuenga Boulevard, Jack-in-the-Box; and Ivar Avenue to the	
	north; and The Los Angeles Film School to the northeast	
South	The Cabana Club	
East	North Ivar Avenue, beyond which is a multi-tenant shopping center identified	
	as The Dome with a multi-level parking structure	
West	North Cahurnga Boulevard, beyond which are the CNN News Building, an	
	unnamed alleyway, and a parking structure	

Immediately surrounding properties

The adjacent sites were not identified in the regulatory database as further discussed in Section 4.2.

# 2.4 Physical Setting Sources

# 2.4.1 Topography

The United States Geological Survey (USGS), Hollywood Quadrangle 7.5 minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 354 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently to the south.

Please refer to Figure 1: Site Location Map.

# 2.4.2 Hydrology

According to the Regional Water Quality Control Board and topographic map interpretation, the depth and direction of groundwater in the vicinity of the subject property is inferred to be present at approximately 45 feet below ground surface (bgs) and flow to the south. The nearest surface water in the vicinity of the subject property is the Hollywood Reservoir located approximately 1.38 miles north of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this investigation.

# 2.4.3 Soils/Geology

According to the United States Department of Agriculture Soil Conservation Service, Report and General Soil Map, Los Angeles County, the near surface soil association underlying the subject property belongs to the Chino association. These soils occur on nearly level valley floors at elevations which range from sea level to 1,300 feet, and are characterized as somewhat poorly drained, gray and dark gray loam, silt loam or clay loam surface layers. Lower layers are brownish-

gray silty clay loam and clay loam substratum. Chino soils make up about 85 percent of the association with the remaining portions compromised to include 10 percent of Foster soils and 5 percent Grangeville soils.

The subject property is located in the Los Angeles basin. The subject property appears to be underlain by alluvium, likely deposited by the Los Angeles River. Depth to bedrock is estimated at over 1,000 feet below grade. The Basin is an important reservoir with numerous aquifers supplying water to the area. The Basin is part of the Peninsular Ranges Geologic Province. The Peninsular range is traversed by several major active faults. The Whittier-Elsinore, San Jacinto, Newport-Inglewood, and San Andreas faults are major active fault systems located in the vicinity of the subject property. Major tectonic activity associated with these and other faults within this regional tectonic framework are typically right-lateral strike-slip movements.

# 3.0 HISTORICAL USE INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Period/Date	Source(s)	Description/Use
1919-1925	Aerial Photographs, Building	The subject property is developed with multiple
	Records, Sanborn Maps	structures for residential use
1925-1946	Aerial Photographs, Building	The subject property is developed with multiple
	Records, Sanborn Maps	structures for residential and commercial use
1946-1960	Aerial Photographs, Building	The subject property is developed with several
	Records, City Directories,	structures for retail sales, automotive repair, and
	Sanborn Maps	office use.
1960-1999	Aerial Photographs, Building	The subject property is developed with several
	Records, City Directories	structures for retail sales and office use.
1999-Present	Aerial Photographs, Building	The subject property is developed with the current
	Records, City Directories,	structure for retail use as a music store.
	Onsite Interviews, Site	
	Inspection	

Historical Use Information

According to historical city directory listings and Sanborn fire insurance maps, the subject property was historically developed for automotive sales and repair use from as early as 1950 through 1960, approximately 10 years. Automotive repair facilities typically utilize and store oils, solvents, and petroleum based products. This site operated at a time of little to no regulatory oversight. No information pertaining to the historic nature of operations of the former automotive tenant was on file with the Los Angeles Fire Department. The current subject property building contains a subterranean parking lot which encompasses the entire footprint of the subject property parcels. It is likely that if a release occurred, the redevelopment and removal of soils from the subject property would have mitigated any concerns associated with the former operations onsite. Based on this, the presence of the former automotive repair operation onsite is not expected to represent a significant environmental concern.

# 3.1 Aerial Photograph Review

On October 20, 2009, Partner reviewed available aerial photographs of the subject property and surrounding area for indications of previous uses. The aerial photographs are discussed below:

# **Date:** 1928 **Scale:** 1:700'

The subject property appears to be developed with several structures for commercial use. Sunset Boulevard is depicted to the north, beyond which appears to be developed with structures for commercial use. North Ivar Avenue is depicted to the east, beyond which are structures for presumed commercial use. Structures for presumed residential use are depicted to the south of the subject property. Structures for presumed commercial use are visible to the west of the subject property.

Date:	1938	Scale:	1:700'

No significant changes were observed on the subject property and surrounding properties.

**Date:** 1954 **Scale:** 1:700'

The subject property appears to be developed with several adjoining buildings for presumed commercial use as offices and store fronts. Sunset Boulevard is depicted to the north, beyond which are structures for presumed commercial use. North Ivar Avenue is depicted to the east, beyond which appears to be developed with structures for commercial use. Structures for presumed commercial use are visible to the south of the subject property. North Cahuenga Boulevard is depicted to the west, beyond which are structures for presumed commercial use.

**Date:** 1982 **Scale:** 1:700'

The subject property appears to be developed with a structure for commercial use. Surrounding properties to the north, south, east, and west are developed as they are today with structures for commercial use.

**Date:** 1994 **Scale:** 1:700'

No significant changes were observed on the subject property and surrounding properties.

**Date:** 2006* **Scale:** N/A

The subject property and surrounding properties to the north, south, east, and west are developed as they are today with structures in the current configuration for commercial use. The subject property is developed with a structure in the current configuration for commercial use.

*Copies of selected aerial photographs are included as Figure 3 of this report, with the exception of the 2006 aerial photograph which is included as Figure 2.

#### 3.2 Sanborn Fire Insurance Maps

Sanborn maps were originally created in the late 1800s and early 1900s for assessing fire insurance liability in urbanized areas of the United States. These maps include detailed town and building information.

A search was made of Seattle Public Library's online collection of Sanborn Fire Insurance maps on October 20, 2009. Sanborn maps were available and reviewed for the years 1919 to 1955.

#### **Date:** 1919

The subject property is depicted as a vacant lot along the northern portion of the subject property with four detached residential dwellings, addressed as 1440-1444 North Cahuenga Boulevard depicted on the southern portion of the subject property. Structures for residential and storage use are depicted to the south of the subject property; vacant lots with residential structures are depicted to the east; and North Cahuenga Boulevard is depicted to the west, beyond which is a vacant undeveloped lot. West Sunset Boulevard is shown to the north, beyond which is not depicted.

**Date:** 1950

Phase I Environmental Site Assessment Project No. 09-64166.1 October 21, 2009 Page 8

The subject property addressed as 1441 North Ivar Avenue is depicted as a two-story hotel; the portion addressed as 1445-1453 North Ivar Avenue is depicted as a single-story automotive repair structure with a two-story structure addressed as 1457 North Ivar and 6400-6404 West Sunset Blvd), depicted as auto sales. The portion addressed as 6406-6410 West Sunset Blvd is depicted as a two-story store front structure. The portion addressed as 6414 West Sunset Blvd and 1456-1460 North Cahuenga Blvd is depicted as a multi-tenant office building with a storage structure depicted to the south of the office building. North Cahuenga Boulevard is to the west, beyond which are a service station with auto repair and night club with restaurant. West Sunset Boulevard is to the north, beyond which are structures for restaurant and office use. North Ivar Avenue is to the east, beyond which are a store front, battery shop, electric shop, and auto repair structure.

### **Date:** 1955

The subject property addressed as 1441 North Ivar Avenue is depicted as a vacant lot; 1445 North Ivar Avenue is depicted as a parking lot; the portion addressed as 1451-1453 North Ivar Avenue is depicted as offices; and the portion addressed as 1457 North Ivar and 6400- 6404 West Sunset Blvd is depicted as a store front. The portion addressed as 6406-6410 West Sunset Blvd is depicted as a two-story store front structure. The portion addressed as 6414 West Sunset Blvd and 1456-1460 North Cahuenga Blvd is depicted as a multi-tenant office building with a storage structure depicted to the south of the office building. North Cahuenga Boulevard is to the west, beyond which are a used car lot and theater. North Ivar is to the east, beyond which are store fronts. West Sunset Boulevard is to the north, beyond which coverage was not available.

### 3.3 City Directories

City directories have been produced for most urban and some rural areas since the late 1800s. The directories are generally not comprehensive and may contain gaps in time periods.

Historical city directories were reviewed at Haines & Company and the Sherman Library on October 15, 2009 for past names and businesses that were listed for the subject property. The findings are presented in the following table:

Year(s)	Occupant Listed	
1956, 1960	6400: Gang, Kopp, Tyre; United Thrift & Loan; Green-Warner Autos; Hollywood	
	Autos; Olympic Finance; 6404: Comm Workers of America; 6410: Nicholson's	
	Appliance and Repair; 6414: Safeway Finance Co.	
1965	6400: GangTyre Rudin; 6404: Variety; 6410: Nicholson's Credit and Service Dept;	
	6414: Catalina Accommodations; 6414: Palm Springs C-C	
1971	6400: Brown Harmon 1 st United Thrift and Loan; Gene Tyre and brown; Gold Stanley	
	P; 6404: Variety Ltd; 6410: Nicholson's; 6414: Oct Rewards	
1975, 1985	6400: Brown Harmons; First Interstate Savings and Loan; 6404: Around World Music;	
	6410: Nicolson's; 6414: Oct Recorders	
1990	6400: Gene Tyre and Brown Inc.; 6404: Vacant; 6410: AMBI; Kate Brook; 6414: City	
	Thai	
2000, 2005	6400: Vacant; 6410: Tyre Norman	

City Directory Search for 6400-6414 West Sunset Boulevard

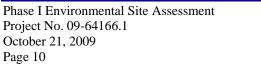

City Directory Search for 1441-1453 North Ivar Avenue

Year(s)	Occupant Listed
1956, 1960,	1441-1453: No Listings
1965, 1971,	
1975, 1980,	
1985, 1990,	
1995, 2000,	
2005	

City Directory Search for 1440-1460 North Cahuenga Boulevard

Year(s)	Occupant Listed	
1956	1440-1454: No Listings; 1456: Driving Schools; 1458-1460: No Listings	
1960, 1965	1440-1454: No Listings; 1456: John T, real estate; 1458-1460: No Listings	
1971, 1975	1440-1460: No Listings	
1980	1440-1454: No Listings; 1456: Candlewick Production; 1458-1460: No Listings	
1985, 1990,	1440-1454: No Listings; 1456: vacant; 1458-1460: No Listings	
1995		
2000, 2005	1440-1450: No Listings; 1452: World Book and Records: 1454-1460: No Listings	

According to the city directory review, the subject property has been developed for commercial use from as early as 1956 to present.

# 4.0 REGULATORY RECORDS REVIEW

# 4.1 Regulatory Agencies

Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or historic hazardous materials usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-05, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the soil or groundwater on the property.

# 4.1.1 Health Department

Partner requested records from the Los Angeles County Department of Health Services (LACDHS) on October 7, 2009 for the subject property. These records may contain evidence indicating current and/or historical hazardous materials usage, storage or releases as well as the presence of underground storage tanks.

Due to the time constraints associated with this report, Partner was not able to obtain records from the Los Angeles County Department of Health Services. Based on the detailed information gathered from other sources, the lack of this information is not expected to alter the overall conclusions of this investigation. However, if issues of environmental concern are identified upon review of these records, an addendum to this report will be issued.

# 4.1.2 Fire Department

Partner requested records from the Los Angeles Fire Department (LAFD) on October 7 and 9, 2009 for the subject property. These records may contain evidence indicating current and/or historical hazardous materials usage, storage or releases as well as the presence of underground storage tanks.

# <u>Hazardous Materials</u>

No records regarding hazardous materials use or the presence of AULs on the subject property were on file with the LAFD Hazardous Materials Division for 6406-6414 West Sunset Boulevard; 1441-1453 North Ivar Avenue; and 1440-1460 North Cahuenga Boulevard.

Due to the time constraints associated with this report, Partner was not able to obtain records from the Los Angeles Fire Department for 6400- 6404 West Sunset Boulevard. Based on the detailed information gathered from other sources, the lack of this information is not expected to alter the overall conclusions of this investigation.

# Underground Storage Tanks

No records regarding hazardous materials use or the presence of AULs on the subject property were on file with the LAFD for all addresses associated with the subject site.

# 4.1.3 Air Quality Management District

Partner researched the Air Quality Management District (AQMD) online database (FINDS) on October 6, 2009 for information regarding any Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) records for the subject property related to air emission equipment, which may include dry cleaning machines and underground storage tanks.

No PTOs, NOVs, NTCs or the presence of AULs were on file for the subject property with the AQMD.

# 4.1.4 Regional Water Quality Control Board

Partner researched the Regional Water Quality Control Board (RWQCB) online database (Geotracker) on October 6, 2009 for information regarding any releases to the subsurface which may have impacted or threatened a body of water.

No records regarding a release or the presence of AULs on the subject property were on file with the RWQCB.

# 4.1.5 Department of Toxic Substances Control

Partner researched the Department of Toxic Substances Control (DTSC) online database (EnviroStor) on October 6, 2009 for the subject property. These records may contain evidence indicating current and/or historical hazardous materials usage, storage or releases.

No records regarding a release or the presence of AULs on the subject property were on file with the DTSC.

### 4.1.6 Building Department

Partner visited the Los Angeles Department of Building and Safety (LADBS) on October 20, 2009 for information regarding historical tenants and property use of the subject property. The following table contains a listing of permits reviewed:

Year(s)	Owner/Applicant	Description
1920	Alfred Meyer	Permit for interior alterations to the subject property

Building Records Reviewed for 6400-6414 West Sunset Boulevard

		building (6406-6408)	
1921	A Meyer	Permit to install store front to building (6408)	
1922	Ed Hamilton	Permit to demolish structure at 6406	
1922	Ed Hamilton	Permit to construct a 2 story building for store and office use (6406-6410)	
1947	Nicholson's	Certificate of occupancy for a one story sales room	
1959	LL Thayne	Certificate of occupancy for a single story conversion from garage to offices (6400)	
1999	Martin Gang	Permit to demolish 2-story office building (6400)	
1999	Martin Gang	Permit to construct a new 2-story commercial	
		building for retail sales over a subterranean garage.	
		Demo permit also noted on the permit (6400)	
2000	Martin Gang	Permit to construct a 90"x60" attendant booth in	
		basement garage (6400)	
2000	Martin Gang	Permit for an addition of 90 sq ft on 2 nd floor under	
		existing roof (6400)	
2001	Martin Gang	Permit for exterior façade improvement to northeast	
		and northwest corners (6400)	
2001	BWP Associates LLC	Permit to add new tower to the existing building	
		(6400)	
2001	Martin Gang	Certificate of occupancy for a new 2-story building	
		with subterranean garage (6400)	
2002	BTW Associates LLC	Permit to convert portion of the existing 2 nd floor to retail and add a 372 sq ft new tower.	

Building Records Reviewed for 1441-1453 North Ivar Avenue

Year(s)	<b>Owner/Applicant</b>	Description	
1935	Illegible	Certificate of occupancy for public garage (repairs) as an existing condition (1451-1453).	
1974	Gang Tyre & Brown Inc.	Certificate of occupancy for 34 parking spaces, land use only (1441 and 6400).	

Building Records Reviewed for 1440-1460 North Cahuenga Boulevard

Year(s)	Owner/Applicant	Description
1919	J Muller	Permit to alter present building (barn) into a residence (1440)
1919	J. Muller	Permit to move and add a screened in porch (1446 A)
1920	Muller Bros	Permit to construct a 20'x119' repair shoppn the subject property (1440)
1922	Jacob Muller	Permit to add one 12'x15' room to existing building for residential use. (1440)
1953	Not provided	Permit to alter building on subject property (1444)

According to building records reviewed, the subject property was historically developed for residential and commercial use from as early as 1919. Various permits to construct and demolish structures on the property have been obtained from as early as 1919 to present day.

### 4.1.7 Planning Department

Partner contacted the Los Angeles Department of Planning Services (LADPS) on October 7, 2009 for information on the subject property in order to identify AULs associated with the subject property.

No AULs were found for the subject property at the LADPS.

### 4.1.8 Division of Oil, Gas and Geothermal Resources

Division of Oil, Gas and Geothermal Resources (DOGGR) maps contain information regarding oil and gas development. According to the DOGGR maps, no oil or gas wells are located on or adjacent to the subject property.

### 4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by Track Info Services Environmental FirstSearch. Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet. Please refer to the radius map for a complete listing (Appendix C).

The subject property was not identified in the regulatory database report.

The adjacent properties were not identified in the regulatory database report.

### Federal NPL

The National Priorities List (NPL) is the Environmental Protection Agency (EPA) database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the Superfund Program.

No NPL site is located within 1-mile of the subject property.

### Federal CERCLIS List

The Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) list is a compilation of sites that the EPA has investigated or is currently investigating for a release or threatened release of hazardous substances.

No CERCLIS sites are listed within ¹/₂-mile of the subject property.

### Federal CERCLIS-NFRAP Sites List

The CERCLIS No Further Remedial Action Planned (NFRAP) List is a compilation of sites that the EPA has investigated, and has determined that the facility does not pose a threat to human health or the environment, under the CERCLA framework.

No CERCLIS-NFRAP sites are listed within  $\frac{1}{2}$ -mile of the subject property.

# Federal RCRA CORRACTS Facilities List

The RCRA CORRACTS database is the EPA's list of TSD facilities subject to corrective action under RCRA.

No RCRA CORRACTS facilities are listed within 1-mile of the subject property.

# Federal Resource Conservation and Recovery Act (RCRA) TSD Facilities List

The RCRA Treatment, Storage and Disposal (TSD) database is a compilation by the EPA of reporting facilities that treat, store or dispose of hazardous waste.

No RCRA TSD sites are listed within ¹/₂- mile of the subject property.

### Federal RCRA Generator List

The EPA Resource Conservation and Recovery Act (RCRA) Program RCRA program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Generators database is a compilation by the EPA of reporting facilities that generate hazardous waste.

Four (4) RCRA Generator facilities are listed within 1/8-mile of the subject property. These sites are not located on or adjacent to the subject property. Based on the relative distance, current regulatory status, and/or inferred direction of groundwater flow, these sites are not expected to represent a significant environmental concern.

# Federal Institutional Controls/Engineering Controls (IC/EC)

The Federal IC/EC database is designed to assist the EPA in collecting, tracking, and updating information, as well as reporting on the major activities and accomplishments of the various Brownfield grant programs. The IC/EC sites are superfund sites that have either engineering or an institutional control in place. The data includes the control and the media contaminated.

No Federal IC/EC sites were found within ¹/₄ mile of the subject property.

# Federal Emergency Notification System (ERNS)

The Emergency Response Notification System (ERNS) is a national database used to collect information or reported release of oil or hazardous substances.

No ERNS sites were listed on or adjacent to the subject property.

### Tribal Lands

The Tribal Lands database consists of areas with boundaries established by treaty, statute, and/or executive or court order, recognized by the Federal Government as territory in which American Indian tribes have primary governmental authority. The Indian Lands of the United States map layer shows areas of 640 acres or more, administered by the Bureau of Indian Affairs. Included are Federally-administered lands within a reservation which may or may not be considered part of the reservation.

No Tribal Land sites were found within 1-mile of the subject property.

### State/Tribal Sites

The State of California Environmental Protection Agency, Department Toxics Substance Control maintains a State Priority List (SPL) of sites considered to be actually or potentially contaminated and a State CERCLIS-equivalent list (SCL) of sites under investigation that could be actually or potentially contaminated and presenting a possible threat to human health and the environment.

Ten (10) State/Tribal sites are listed within 1-mile of the subject property. These sites are located more than a ¹/₄ mile from the subject property. Based on the relative distance, current regulatory status, and/or inferred direction of groundwater flow, these sites are not expected to represent a significant environmental concern.

### State Spills Sites (SPILLS)

The California Regional Water Quality Control Board maintains reports of sites that have records of spills, leaks, investigations and cleanups.

No SPILLS sites are listed within  $\frac{1}{8}$  mile of the subject property.

### Solid Waste/Landfill Facilities (SWLF)

A database of SWLF is prepared by State of California Integrated Waste Management Board.

No SWLF facilities are listed within ¹/₂- mile of the subject property.

### State/Tribal Leaking Underground Storage Tank List (LUST)

The California Regional Water Quality Control Board compiles lists of all leaks of hazardous substances from underground storage tanks.

Six (6) LUST sites are listed within  $\frac{1}{2}$ - mile of the subject property. One site is located within a  $\frac{1}{8}$  mile of the subject property and is further discussed below:

• Texaco 0374 (Former) at 6409 Sunset Boulevard is located adjacent to the northwest (hydrologically up and cross gradient) of the subject property. According to the regulatory database a release of gasoline which reportedly affected other groundwater (uses other than

drinking water) was discovered. The responsible party is not identified; however, the lead agency is listed as the Los Angeles Regional Water Quality Control Board. This site received case closure on October 28, 1996. Based on the current case closed status and regulatory oversight, this site is not expected to represent a significant environmental concern.

The remaining sites are located more than a ¹/₈ mile from the subject property. Based on the relative distance, current regulatory status, and/or inferred direction of groundwater flow, these sites are not expected to represent a significant environmental concern.

# State/Tribal Underground Storage Tank/Aboveground Storage Tank List (UST/AST)

The California Regional Water Quality Control Board compiles a list of UST and AST locations.

No registered UST/AST facilities are listed on or adjacent to the subject property.

# State/Tribal VCP sites

The California Department of Toxic Substances Control has developed an electronic database system with information about sites that are known to be contaminated with hazardous substances as well as information on uncharacterized properties where further studies may reveal problems. The Site Mitigation and Brownfield Reuse Program Database (SMBRPD), also known as CalSites, is used primarily by DTSC's staff as an informational tool to evaluate and track activities at properties that may have been affected by the release of hazardous substances.

One (1) State/Tribal VCP site was found within ¹/₂-mile of the subject property. This site is located more than a ¹/₄ mile from the subject property. Based on the relative distance, current regulatory status, and inferred direction of groundwater flow this site is not expected to represent a significant environmental concern,

# State/Tribal Brownfield sites

The California Department of Toxic Substances Control has developed an electronic database system with information about sites that are known to be contaminated with hazardous substances as well as information on uncharacterized properties where further studies may reveal problems. The Site Mitigation and Brownfield Reuse Program Database (SMBRPD), also known as CalSites, is used primarily by DTSC's staff as an informational tool to evaluate and track activities at properties that may have been affected by the release of hazardous substances.

No State/Tribal Brownfield sites were found within ¹/₂-mile of the subject property.

# Permits Sites

A database which tracks permits issued and the status of the permits in relation to compliance with federal, state, and local regulations that the County oversees.

Two (2) Permit sites were found within ¹/₂-mile of the subject property. These sites are not located on or adjacent to the subject property. Based on the relative distance, current regulatory status, and/or inferred direction of groundwater flow, these sites are not expected to represent a significant environmental concern.

# 5.0 USER PROVIDED INFORMATION AND INTERVIEWS

Pursuant to ASTM E1527-05, Partner requested the following site information from Mr. Jon Liu, onsite manager and representative of the subject property owner, BPW Associates, LLC (User of this report).

# 5.1 Interviews

# 5.1.1 Interview with Owner

Mr. Jim Henderson of BPW Associated, LLC, subject property owner since circa 1999, was not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

# 5.1.2 Interview with Report User

Mr. Leonard Simpser, report user, was not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

# 5.1.3 Interview with Key Site Manager

Mr. John Liu, key site manager, was not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

# 5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this investigation.

# 5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-05, interview with others were not performed.

# .2 User Provided Information

# 5.2.1 Title Records

Partner was not provided with title records for review during the course of this investigation.

# 5.2.2 Environmental Liens or Activity and Use Limitation

Partner requested information from the User regarding knowledge of environmental liens and activity and use limitations (AULs) for the subject property. The User was not aware of any environmental liens associated with the Property. In addition, the User had no knowledge of any use or activity limitations.

# 5.2.3 Specialized Knowledge

Partner inquired with the User regarding any specialized knowledge of environmental conditions associated with the subject property. The User was not aware of any environmental conditions associated with the subject property.

# 5.2.4 Commonly Known or Reasonably Ascertainable Information

Partner inquired with the User regarding any commonly known or *reasonably ascertainable* information within the local community about the subject property that is material to *recognized environmental conditions* in connection with the subject property. The User was not aware of any commonly known or *reasonably ascertainable* information associated with the subject property.

# 5.2.5 Valuation Reduction for Environmental Issues

Partner inquired with the User regarding any knowledge of reductions in property value due to environmental issues. The User was not aware of any valuation reductions associated with the subject property.

# 5.2.6 Previous Reports and Other Provided Documentation

The following information was provided to Partner by the Client for review during the course of this investigation.

# Phase I Environmental Site Assessment, Krazan (December 12, 2009)

Krazan & Associates prepared this report on behalf of BPW Associates, LLC. According to the report, the subject property consists of two adjoining parcels of land developed with a two-story building with subterranean parking lot for retail use. At the time of inspection, an emergency generator with a 50-gallon day tank, was noted within the subterranean parking area of the subject property. No RECs were noted within the report for the subject property.

# 6.0 SITE RECONNAISSANCE

The subject property was inspected by Rachel Herrera of Partner on October 14, 2009. The weather at the time of the site visit was sunny and clear. Mr. Matthew May, property broker, provided site access.

All areas of the subject property were accessible at the time of the site inspection. There were no physical or visual obstructions of the subject property.

The subject property is currently occupied by Amoeba Music, a retail music and entertainment store. No potential environmental concerns were identified during the onsite reconnaissance.

### 6.1 General Site Characteristics

### 6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in commercial dumpsters.

### 6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. Presently none of the operations on the property require a clarifier or other wastewater treatment system.

### 6.1.3 Surface Water Drainage

Surface water drainage at the subject property is via sheet flow to the curb and gutter systems located to the north, east, and west of the subject property.

# 6.1.4 Source of Heating and Cooling

Heating and cooling systems are fueled by natural gas and electricity provided by The Gas Company and Los Angeles Department of Water and Power, respectively.

### 6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

# 6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed via the sanitary sewer. No industrial process is currently performed at the subject property.

# 6.1.7 Septic Systems

No septic systems were observed on the subject property.

### 6.1.8 Additional Site Observations

During the onsite reconnaissance, Partner observed the presence of an emergency generator within the subterranean parking garage onsite. According to Mr. Jim Henderson, property owner, the generator is only onsite for emergency use only. The generator was noted stored over concrete with a 50-gallon day tank stored within the generator. No leaks, spills, or stains were noted in the vicinity of the generator. Based on the nature of use, the presence of the generator is not expected to represent a significant environmental concern.

### 6.2 Potential Environmental Hazards

### 6.2.1 Hazardous Materials and Petroleum Products Used or Stored at the Site

No hazardous materials or petroleum products were observed on the subject property.

# 6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of ASTs or USTs was observed during the site reconnaissance.

### 6.2.3 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

### 6.2.4 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain polychlorinated biphenyls (PCBs) at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified:

- Less than 50 parts per million (ppm) of PCBs "Non-PCB"
- 50 ppm-500 ppm "*PCB-Contaminated*"
- Greater than 500 ppm "*PCB-Containing*"

The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

The on-site reconnaissance addressed indoor and outdoor transformers that may contain PCBs. No pole-mounted and/or pad-mounted transformers were observed on the subject property.

The subject property building is equipped with a passenger elevator, freight elevator, and dumb waiter. Based on the year of construction of the subject property building (2000), it is unlikely that the hydraulic fluid within the elevator equipment contains PCBs. The elevator equipment rooms were inspected by Partner, and the equipment appeared to be in good condition.

According to the onsite staff, the elevators are maintained on a monthly basis by ThyssenKrupp Elevator Corp. Based on the good condition of the elevator equipment, the elevators are not expected to represent a significant environmental concern.

Additionally, no other potential PCB-containing equipment (interior transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, etc) was observed on the subject property during Partner's reconnaissance.

# 6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

# 6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property.

# 6.2.7 Drains, Sumps and Clarifiers

During the onsite reconnaissance, Partner observed the presence of a drain and sump pump located within the subterranean parking level. According to the onsite staff, the sump and drainage system has been in place since the construction of the current building. To the best of their knowledge, the sump is used solely to divert storm water runoff that collects within the parking area. Additionally, the onsite staff was unaware of the operations and maintenance of the sump. No hazardous materials were noted stored in near and around the sump and drain. Based on the nature of use, the presence of the sump and drain are not expected to represent a significant environmental concern.

No drains or clarifiers were observed on the subject property.

# 6.2.8 Pits, Ponds and Lagoons

No pits, ponds and lagoons were observed on the subject property.

# 6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

# 6.2.10 Additional Potential Environmental Hazards

No additional potential environmental hazards were observed.

# 6.3 Non-ASTM Services

# 6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high

tensile strength. Asbestos is commonly used as an acoustic insulator, thermal insulation, fire proofing and in other building materials. Exposure to airborne friable asbestos may result in a potential health risk because persons breathing the air may breathe in asbestos fibers. Continued exposure can increase the amount of fibers that remain in the lung. Fibers embedded in lung tissue over time may cause serious lung diseases including: asbestosis, lung cancer, or mesothelioma.

The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101, requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1980 and have not been appropriately tested are "presumed asbestos containing material" (PACM).

The subject property building was constructed in 2000. As such, an asbestos evaluation was not required by the scope of services; however, please refer to the table below for observed materials that would be considered suspect ACMs in the event of a thorough survey.

Suspect ACM	Location	Physical Condition
Drywall Systems	Throughout Building Interior	Good
Vinyl Basecoat	Throughout Building Interior	Good
Vinyl Composite Tile	Throughout Building Interior-	Good
	Restroom and Break Room Areas	
Acoustic Ceiling Tiles	Throughout Building Interior-Office	Good
	Areas	

Suspect Asbestos Containing Materials (ACMs)

The visual survey consisted of noting observable materials (materials which were readily accessible and visible during the course of the site reconnaissance) that are commonly known to potentially contain asbestos. This activity was not designed to discover all sources of suspect ACM, PACM, or asbestos at the site; or to comply with any regulations and/or laws relative to planned disturbance of building materials such as renovation or demolition, or any other regulatory purpose. Rather, it is intended to give the lender an indication if significant (significant due to quantity, accessibility, or condition) potential sources of ACM or PACM are present at the subject property. Additional sampling, inspection, and evaluation will be warranted for any other use.

No building plans or specifications, which may be useful in determining areas likely to have used ACM, were made available for review.

According to the EPA, ACM and PACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) program until removal is dictated by renovation, demolition, or deteriorating material condition. Prior to any disturbance of the construction materials within this facility, a comprehensive ACM survey is recommended.

# 6.3.2 Lead-Based Paint

Due to the commercial nature of use of the subject property, lead-based paint was not considered within the scope of this assessment.

### 6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action limit of 4.0 picoCuries per Liter (pCi/L). It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this investigation. Review of the EPA Map of Radon Zones places the subject property in Zone 2, where average predicted radon levels are between 2.0 and 4.0 pCi/L.

# 6.3.4 Lead in Drinking Water

The subject property is connected to the city water supply provided by the Los Angeles Department of Water and Power. According to most recent water quality report (2008), the lead levels in the drinking water supplied to the subject property is within state and federal standards.

### 6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g.in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding). Mold growths often appear as discoloration, staining, or fuzzy growth on building materials or furnishings and are varied colors of white, gray, brow, black, yellow, and green. In large quantities, molds can cause allergic symptoms when inhaled or through the toxins the molds emit.

Partner observed accessible, interior areas for the subject property building for significant evidence of mold growth; however, this ESA should not be used as a mold survey or inspection. Additionally, this inspection was not designed to assess all areas of potential mold growth.

No obvious indications of water damage or mold growth were observed during Partner's visual inspection.

# 6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises. No items of environmental concern were identified on the adjacent properties during the site inspection.

# 7.0 FINDINGS AND CONCLUSIONS

# Findings

A recognized environmental condition (REC) refers to the presence or likely presence of any hazardous substance or petroleum product on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term REC includes hazardous substances and petroleum products even under conditions that might be in compliance with laws. The term is not intended to include "de minimis" conditions that do not present a threat to human health and/or the environment and that would not be subject to an enforcement action if brought to the attention of appropriate governmental agencies. The following was identified during the course of this investigation:

• Partner did not identify any recognized environmental conditions during the course of this investigation.

A *historical recognized environmental condition (HREC)* refers to an environmental condition which would have been considered a REC in the past, but which may or may not be considered a REC currently. The following was identified during the course of this investigation:

• Partner did not identify any historical recognized environmental conditions during the course of this investigation.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, require discussion. The following was identified during the course of this investigation:

• Partner did not identify any environmental issues during the course of this investigation.

# Conclusions, Opinions, and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-05 of 6400 West Sunset Boulevard in the City of Hollywood, County of Los Angeles, California (the "subject property"). Any exceptions to or deletions from this practice are described in Section 1.4 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property. Based on the conclusions of this assessment, Partner recommends no further investigation of the subject property at this time.

# 8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment on the property at 6400 West Sunset Boulevard in the City of Hollywood, County of Los Angeles, California in general conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, the undersigned meet the definition of an *Environmental Professional* as defined in §312.10 of 40 CFR 312 and have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*.

PHASE I ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE

The following questionnaire is required by the new ASTM Standard E 1527-05, which adheres to the new All Appropriate Inquiries (AAI) Rule (United States Environmental Protection Agency) (40 CFR 312).

As defined by ASTM, the User of the report is the "party seeking to use Practice E 1527 to complete an environmental site assessment of the property. A user may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager."

SUBJECT PROPERTY ADDRESS:6400 WEST SUNSET BLVD	···
SUBJECT PROPERTY CITY, STATE ZIP: HOLLYWOOD, CALIFORNIA 90028	

1. Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25)

Are you aware of any environmental cleanup liens again	inst the Subject	Property that are filed
or recorded under federal, tribal, state or local law?	YES	NO

2. Activity and land use limitations that are in place on the site or that have been filed or records in a registry (40 CFR 312.26)

Are you aware of any activity and land use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the Subject Property and/or have been filed or recorded in a registry under federal, tribal, state or local law?

YES	\sim

NO

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)

As the User of this report, do you have any specialized knowledge or experience related to the Subject Property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Subject Property or adjoining property?

PARTNER

YES NO

Phase I ESA Questionnaire Partner Project No. 09-64166 Page I of 3

4.	Relationship of the purchase price to the fair market value of the Subject Property if it were not contaminated (40 CFR 312.29) Does the purchase price being paid for the Subject Property reasonably reflect the fair market value of the Subject Property? If so, why?
	AN INDEPENDENT APPRAISOR SUPPLIED BUYER & SELLER W/ THIS INFO
5.	Commonly known or reasonably ascertainable information about the Subject Property (40 CFR 312.30) Are you aware of commonly known or reasonably ascertainable information about the Subject Property that would help the environmental professional to identify conditions indicative of release or threatened release?
	a. Do you know the past uses of the Subject Property? YES NO
	SOME; BRIMARILY RETAIL & OFFICE @ LOCATION; THIS IS A NEW BUILDING SINCE
	b. Do you know of specific chemicals that are present or once were present at the Subject Property? YES NO
	c. Are you aware of any spills or other chemical releases that have taken place at the Subject Property?
	 d. Do you have any prior knowledge that the Subject Property was developed as a gas station, dry cleaner, manufacturing/industrial facility in the past? YES NO
	e. Are you aware of historical use of hazardous materials or petroleum products used or present on the Subject Property?

PARTNER

Phase I ESA Questionnaire Partner Project No. 09-64166 Page 2 of 3

f.	Do you know if the property is currently	or	was former.	ly equipped	with	underground
	storage tanks (USTs) or septic tanks?		YES)	

g. Do you know of any past, threatened or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the Subject Property by any owner or occupant of the Subject Property?
 YES VES NO

6. The degree of obviousness of the presence or likely presence of contamination at the Subject Property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)
 As the User of this report, are there any obvious indicators that point to the presence or likely presence of contamination at the Subject Property based on your knowledge and experience related to the Subject Property?
 YES
 NO

RE: Phase I Environmental Site Assessment Hollywood Amoeba, Inc./BPW Associates LLC 6400 West Sunset Boulevard Los Angeles, California CNB # 9956-08185-434

To Whom It May Concern:

Krazan & Associates, Inc., (Krazan) completed a Phase I Environmental Site Assessment at the referenced site, summarized in a report dated December 15, 2008. We appreciate the opportunity to serve your environmental due diligence needs. During the course of this assessment, Krazan identified no evidence of recognized environmental conditions (RECs) in connection with the subject site as defined by ASTM E 1527-05.

If you have any questions regarding the information presented in this report, please call me at (866) 787-1130.

Respectfully Submitted: KRAZAN & ASSOCIATES, INC.

Robert Vaughn, REA National Client Manager

PHASE I ENVIRONMENTAL SITE ASSESSMENT HOLLYWOOD AMOEBA, INC./BPW ASSOCIATES LLC 6400 SUNSET BOULEVARD LOS ANGELES, CALIFORNIA CNB # 9956-08185-434

1.0 EXECUTIVE SUMMARY

Krazan & Associates, Inc. (Krazan) has conducted a Phase I Environmental Site Assessment (ESA) of the Hollywood Amoeba, Inc./BPW Associates LLC property located at 6400 West Sunset Boulevard, in the Community of Hollywood, City of Los Angeles, California (subject site). Krazan conducted the Phase I ESA of the subject site in conformance with the American Society for Testing and Materials (ASTM) E 1527-05 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This Phase I ESA constitutes all appropriate inquiry (AAI) designed to identify recognized environmental conditions (RECs) in connection with the previous ownership and uses of the subject site as defined by ASTM E 1527-05.

ASTM E 1527-05 Section 1.1.1 Recognized Environmental Conditions – The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water on the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions.

Krazan's findings of this Phase I ESA revealed no evidence of RECs in connection with the subject site.

2.0 PURPOSE AND SCOPE OF ASSESSMENT

2.1 Purpose

According to ASTM E 1527-05, the purpose of this practice is to define good commercial and customary practice in the United States of America for conducting an *environmental site assessment* of a parcel of *commercial real estate* with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and *petroleum products*. As such, this practice is intended to permit a *user* to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner,* or *bona fide prospective purchaser* limitation on CERCLA liability (hereinafter, the *landowner liability protections,* or *LLPs*): that is, the practice that constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

2.2 Scope of Work

The Phase I ESA includes the following scope of work: a) a site reconnaissance of existing on-site conditions and observations of adjacent property uses, b) a review of user-provided documents, c) a review of historical aerial photographs, a review of pertinent building permit records, city directories, Sanborn Fire Insurance Maps (SFIMs), and interview(s) with person(s) knowledgeable of the previous and current ownership and uses of the subject site, d) a review of local regulatory agency records, and e) a review of local, state, and federal regulatory agency lists compiled by EDR. The scope of work for this Phase I ESA conforms to ASTM E 1527-05. Krazan was provided written authorization to conduct the Phase I ESA by City National Bank, in Krazan's Proposal/Cost Estimate No. P08-114.

3.0 SITE DESCRIPTION AND LOCATION

The subject site comprises of two non-contiguous parcels of land totaling 0.39-acre of retail property with the associated Los Angeles County Assessor's Parcel Numbers (APNs) of 5546-014-029 (vehicle parking lot addressed 1419 North Ivar Avenue) and 5546-014-058 (retail store addressed 6400 West Sunset Boulevard). The subject site is currently occupied with a two-story, 90,479 square-foot (SF) retail building with a subterranean vehicle parking garage and an associated non-contiguous ground-level vehicle parking lot.

Site location information is summarized in the following table. Refer to the Vicinity and Topographic Maps (Figures No. 1 and 3, respectively) located after the Reference Section.

Topographic Map:	U.S. Geological Survey, 7.5 minute Hollywood, California
	topographic quadrangle map, dated 1994
Latitude/Longitude	34° 5' 52.7" North Latitude, 118° 19' 43.8" West Longitude
Topography:	Sloping gently to the south, approximately 353 feet above mean
	sea level
General Location:	South side of West Sunset Boulevard, east side of North
	Cahuenga Boulevard and west side of North Ivar Avenue
Assessor's Parcel Numbers:	5546-014-029 and 5546-014-058
Approximate Depth to Groundwater:	Approximately 50 to 75 feet below ground surface, EDR
Regional Groundwater Flow Direction:	South, EDR
Existing Use:	Retail store (Amoeba Music) and vehicular parking lot.

Summary of Property Information

3.1 Geology and Hydrogeology

The subject site is located within the Community of Hollywood, located within the City of Los Angeles, and is situated in the Los Angeles Basin, which is in the northwestern-most portion of the Peninsular Ranges Geomorphic Province. The Los Angeles Basin is a sedimentary basin containing thousands of meters of post-Cretaceous sediment overlying crystalline basement rocks. The basin is bound by the Puente Hills and Santa Ana Mountains to the east and the San Gabriel Mountains of the Transverse Ranges Geomorphic Province to the north. The subject site lies within the Coastal Plain of Los Angeles Groundwater Basin, Hollywood Subbasin. The Hollywood Subbasin underlies the northeastern part of the Coastal Plain of Los Angeles Groundwater Basin. The subbasin is bounded on the north by Santa Monica Mountains and the Hollywood fault, on the east by the Elysian Hills, on the west by the Inglewood fault zone, and on the south by the La Brea High, formed by an anticline that brings impermeable rocks close to the surface. Surface drainage flows southward to join Ballona Creek, then westward to the Pacific Ocean. The depth to groundwater is reported to be at approximately 50 to 75 feet below ground surface with a general direction of flow to the south.

4.0 <u>SITE RECONNAISSANCE</u>

A site reconnaissance, which included a visual observation of the subject site and surrounding properties, was conducted by Name, Krazan's Environmental Professional on December 9, 2008. Mr. Jon Liu, Manager, Amoeba Music, the owner representative of the subject site, accompanied Krazan's Environmental Professional during the site reconnaissance. The objective of the site reconnaissance is to obtain information indicating the likelihood of identifying recognized environmental conditions, including hazardous substances and petroleum products, in connection with the property (including soils, surface waters, and groundwater).

4.1 Observations

The following table summarizes conditions encountered during our site reconnaissance. A discussion of visual observations follows the table below. Refer to the Site Map (Figure No. 2) and color photographs following the text for the locations of items discussed in this section of the report.

Feature	Observed	Not Observed
Structures (existing)	X	
Evidence of past uses (foundations, debris)		X
Hazardous substances and/or petroleum products (including containers)	X	
Aboveground storage tanks (ASTs)	X	
Underground storage tanks (USTs) or evidence of USTs		Х
Evidence of Underground Pipelines	-	X
Strong, pungent, or noxious odors	•	X
Pools of liquid likely to be hazardous materials or petroleum products	•	X
Drums	•	X
Unidentified substance containers		X
Potential polychlorinated biphenyl (PCB) containing equipment	•	X
Subsurface hydraulic equipment	-	X
Heating/ventilation/air conditioning (HVAC)	X	
Stains or corrosion on floors, walls, or ceilings		X
Floor drains and sumps	X	
Storm Drains	-	X
Pits, ponds, or lagoons	•	X
Stained soil and/or pavement	•	X
Soil Piles	-	X
Stressed vegetation	•	X
Waste or wastewater discharges to surface or surface waters on subject	•	V
site (including stormwater)		X
Wells (irrigation, domestic, dry, injection, abandoned, monitoring wells)		X
Septic Systems		X
Elevators	X	

Summary of Site Reconnaissance

The subject site comprises of two non-contiguous parcels of land totaling 0.39-acre of retail property with the associated Los Angeles County Assessor's Parcel Numbers (APNs) of 5546-014-029 (vehicle parking lot addressed 1419 North Ivar Avenue) and 5546-014-058 (retail store addressed 6400 West Sunset Boulevard). The subject site is currently occupied with a two-story, 90,479 square-foot (SF) retail building with a subterranean vehicle parking garage and an associated non-contiguous ground-level vehicle parking lot. The following features were observed at the subject site:

• The subject site was observed to be occupied with a two-story, 90,479 SF retail building with a subterranean vehicle parking garage and an associated non-contiguous ground-level vehicle parking lot. The parcel of land developed with the retail store building totals approximately 0.23-acre and the parcel of land developed with the vehicular parking lot totals 0.16-acre. The subject site is currently occupied by Amoeba Music (www.amoeba.com), an independent retail music chain store that specializes in both new and used compact discs, vinyl records, audio cassettes as well DVD, VHS and Laserdisc movies and music-related posters and artwork. The retail store building is addressed 6400 West Sunset Boulevard and is located along the south side of West Sunset Boulevard, between North Cahuenga Boulevard to the west and North Ivar Avenue to the

east. Access to the subterranean vehicle parking garage is provided by an entrance on North Cahuenga Boulevard, located along the west side of the retail store building. The associated non-contiguous ground-level asphalt-paved vehicle parking lot located approximately 150 feet south of the retail store building. The vehicle parking lot is addressed 1418 North Cahuenga Boulevard, also between North Cahuenga Boulevard to the west and North Ivar Avenue to the east. No landscaping is developed on-site.

- The interior portion of the retail store building contains an entryway, a large sales floor, storage warehouse, storage rooms, offices and restrooms.
- The retail store building is equipped with two hydraulic elevators including a passenger elevator and a freight elevator. The elevators were observed to be in good working order and according to Mr. Liu are reportedly serviced by ThyssenKrupp Elevator, a certified elevator maintenance company, on a regular basis. Observation of the elevator equipment rooms did reveal evidence of leaks or staining. Based on the subject site construction date (1999), the hydraulic fluid used in the elevator equipment is not expected to contain PCBs.
- An emergency power generator serving the retail store building was observed within the subterranean vehicle parking garage portion of the retail store building. The emergency power generator is used for back-up power purposes. The emergency power generator is reportedly diesel-fueled and is equipped with an approximately 50-gallon capacity steel-walled diesel aboveground storage tank (AST) which is integrated in the base of the emergency power generator unit. No evidence of leaks or stains was observed surrounding the base of the emergency power generator.
- The subterranean vehicle parking garage is equipped with several floor drains connecting to a sump pump. The floor drains and sump pump reportedly drain to the city sewer system. According to Mr. Liu, the sump pump is inspected and cleaned out on a periodic basis.
- An electrical transformer room was observed within the subterranean vehicle parking garage of the subject site. The transformer room was locked and inaccessible during the site visit. Based on Krazan's observations, Los Angeles Department of Water & Power (LADWP) is the owner of the transformer within the electrical transformer room. According to LADWP, the transformer is non-PCB containing. Based on the above, there is no evidence to suggest that the transformer has posed an adverse impact to the subject site.
- During the visual observations of the subject site, no hazardous materials were observed. No obvious evidence (vent pipes, fill pipes, dispensers, etc.) of USTs was noted within the areas observed. No standing water or major depressions were observed on the subject site. No indications of former structures, such as foundations, were observed on the subject site.

4.2 Adjacent Streets and Property Usage

The following table summarizes the current adjacent roads and adjacent property uses observed during the site reconnaissance.

Adjacent Streets and Property Use								
Direction	Adjacent Street	Adjacent Property Use						
North (retail	West Sunset Boulevard	Jack In The Box fast food restaurant (6409 West						
building)		Sunset Boulevard)						
North (vehicle	None	Sterling Steakhouse (former) (1429 North Ivar						
parking lot)		Avenue)						
	KRAZAN & ASSOCIATES, INC.							

Conducting Assessments Nationwide

Direction	Adjacent Street	Adjacent Property Use
Northeast (retail building)	Intersection of West Sunset Boulevard and North Ivar Avenue	Commercial office building (6363 West Sunset Boulevard)
East (retail building)	North Ivar Avenue	Commercial/retail building (6372-6398 West Sunset Boulevard) and vehicle parking garage (1400 North Ivar Avenue)
East (vehicle parking lot)	North Ivar Avenue	Vehicle parking garage (1400 North Ivar Avenue)
South (retail building)	None	Sterling Steakhouse (former) (1429 North Ivar Avenue)
South (vehicle parking lot)	None	NT Video (1400 North Cahuenga Boulevard)
West (retail building)	North Cahuenga Boulevard	Commercial office building (6430 West Sunset Boulevard) and vehicle parking garage (1439 North Cahuenga Boulevard)
West (vehicle parking lot)	North Cahuenga Boulevard	Commercial office building (1415 North Cahuenga Boulevard) and Stephan's Automotive (1425 North Cahuenga Boulevard)
Northwest (retail building)	Intersection of West Sunset Boulevard and North Cahuenga Boulevard	Commercial office/retail building (1501 North Cahuenga Boulevard)

Adjacent Streets and Property Use (co	nt.)
---------------------------------------	------

Based on the observed uses of the properties located immediately adjacent to the subject site, it is unlikely that significant quantities of hazardous materials are stored at the adjacent properties.

4.3 Asbestos-Containing Building Materials

The structure located on the subject site was constructed in 1999. Based on the original date of construction, asbestos is not expected to be present at the property.

4.4 **Potable Water Source**

The water purveyor for the subject site is the Los Angeles Department of Water & Power (LADWP). The LADWP's water quality monitoring is an on-going program with water samples obtained on a regular basis. It is the responsibility of the LADWP to provide customers with potable water in compliance with the California State Maximum Contaminant Levels (MCLs) for primary drinking water constituents in water supplied to the public. On December 9, 2008, the LADWP was contacted regarding potable water service for the subject site. According to representatives of the LADWP, potable water service has been provided to the subject site by the LADWP since 1999.

4.5 Sewage Disposal System

On December 9, 2008, the City of Los Angeles Department of Public Works was contacted regarding sewer service for the subject site. According to a representative of the City of Los Angeles Department of Public Works, sewer service has been provided to the subject site by the City of Los Angeles Department of Public Works since 1999 and no sewer violations are on file for the subject site.

5.0 <u>USER-PROVIDED INFORMATION</u>

A review of User-provided information was conducted in order to help identify pertinent information regarding potential environmental impacts associated with the subject site.

5.1 Title Report and Environmental Lien Search

A Title Report or Environmental Lien Search was not prepared by, or provided to Krazan during the course of this assessment. The absence of a Title Report and Environmental Lien Search represents a data gap.

5.2 Phase I Environmental Site Assessment User Questionnaire

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *user* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiry* is not complete. The user is asked to provide information or knowledge of the following:

- 1. Environmental cleanup liens that are filed or recorded against the site.
- 2. Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry.
- 3. Specialized knowledge or experience of the person seeking to qualify for the LLPs.
- 4. Relationship of the purchase price to the fair market value of the *property* if it were not contaminated.
- 5. Commonly known or *reasonably ascertainable* information about the *property*.
- 6. The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation.
- 7. The reason for preparation of this Phase I ESA.

A completed questionnaire was not received from the User. However, an interview was conducted with Mr. Jon Liu, Manager, Amoeba Music, the owner representative of the subject site. Refer to Section 6.1 for a discussion of the interview responses.

6.0 <u>SITE USAGE SURVEY</u>

The property usage survey included assessing property history, and reviewing local, state, and federal regulatory agency records.

6.1 Site History

A review of a previous environmental assessment, historical aerial photographs, review of Los Angeles Department of Building and Safety (LADBS) records, reasonably ascertainable Haines Criss-Cross Directories (HCCDs), Sanborn Fire Insurance Maps (SFIMs), and a Phase I ESA interview were conducted with the present owner to assess the history of the subject site.

Aerial Photograph Interpretation

Historical aerial photographs dated 1928, 1938, 1947, 1956, 1965, 1976, 1989, 1994, 2002 and 2005 were reviewed to assess the history of the subject site. These photographs were obtained from Environmental Data Resources, Inc. (EDR). Aerial photograph coverage for the years prior to 1928 was not reasonably ascertainable or available. The aerial photograph summary is provided in the table below. Please refer to appendices listed in the Table of Contents for copies of selected aerial photographs.

Year/Scale	Site Use	Site and Adjacent Property Observation
1928 1" = 500'	Residential and commercial	The subject site appears to be developed with numerous residential and commercial structures. The adjacent properties to the north across West Sunset Boulevard, northeast, east, south, west across North Cahuenga Boulevard and northwest across the intersection of West Sunset Boulevard and North Cahuenga Boulevard appear to be developed with numerous commercial structures.
1938 1" = 555'	Residential and commercial	Conditions on the subject site and the adjacent properties appear relatively similar to those noted in the 1928 aerial photograph with the exception of what appears to be a gasoline station adjacent to the west side of the subject site (current retail building portion) across North Cahuenga Boulevard.
1947 1" = 666'	Residential and commercial	Conditions on the subject site and the adjacent properties appear relatively similar to those noted in the 1938 aerial photograph.
1956 1" = 400'	Residential and commercial	Conditions on the subject site and the adjacent properties appear relatively similar to those noted in the 1947 aerial photograph with the exception of the development of a gasoline station to the north of

Summary of Aerial Photograph Review

	Summary of Aerial Photograph Review (cont.)					
Year/Scale	Site Use	Site and Adjacent Property Observation				
		the subject site (current retail store portion) across West Sunset Boulevard and the removal of the gasoline station to the west (current retail store portion) of North Cahuenga Boulevard.				
1965 1" = 666'	Commercial and vehicle parking lot	Conditions on the subject site and the adjacent properties appear relatively similar to those noted in the 1956 aerial photograph with the exception of the development of the current on-site ground-level vehicle parking lot and a vehicle parking lot to the east of the subject site across North Ivar Avenue.				
1976 1" = 666'	Commercial and vehicle parking lot	Conditions on the subject site and the adjacent properties appear relatively similar to those noted in the 1965 aerial photograph with the exception of the development of the current commercial office building adjacent to the west side of the subject site (current retail building portion) across North Cahuenga Boulevard.				
1989 1" = 666'	Commercial and vehicle parking lot	Conditions on the subject site and the adjacent properties appear relatively similar to those noted in the 1976 aerial photograph with the exception of the development of the current Jack In The Box fast food restaurant adjacent to the north side of the subject site (current retail building portion) across West Sunset Boulevard.				
1994 1" = 666'	Commercial and vehicle parking lot	Conditions on the subject site and the adjacent properties appear relatively similar to those noted in the 1989 aerial photograph.				
2002 1" = 666'	Current retail building and vehicle parking lot	The subject site appears to be developed with the current retail building and vehicle parking lot. The adjacent properties appear to be developed with the current structures observed during the site visit.				
2005 1" = 484	Current retail building and vehicle parking lot	Conditions on the subject site and the adjacent properties appear relatively similar to those noted in the 2002 aerial photograph.				

Summary of Aerial Photograph Review (cont.)

Los Angeles Department of Building and Safety

On December 9, 2008, the Los Angeles Department of Building and Safety (LADBS) was visited to review building permit records for the subject site addresses. According to the LADBS Parcel Profile Report, the subject site includes the current and previous site addresses: 6400, 6404, 6406, 6408, 6410 and 6414 West Sunset Boulevard, 1418 North Cahuenga Boulevard and 1419, 1445 and 1453 North Ivar Avenue. Records dating back to 1914 were on-file and over 100 building, tenant improvement, grading, electrical, plumbing, certificate of occupancy, and other miscellaneous permits were on-file for subject site addresses however no building permits on-file for current or historical USTs were found. In addition, due to equipment failure at the LADBS, copies of microfiche records were not available for reproduction. However, copies of electronic records for 6400 West Sunset Boulevard, 1419 North Ivar Avenue and 1451-1453 North Ivar Avenue were reproduced and are listed below. Please refer to appendices listed in the Table of Contents for copies of records.

Date	Record Type	Description			
6400 West Sunset	Boulevard				
October 19, 1945 Certificate of Occupar		Show room – public garage. Owner listed as The Knox Co.			
September 14, 2001	Certificate of Occupancy	New 2-story commercial building (retail sales) over subterranean garage. Owner listed as Gang, Martin Et Al.			
May 8, 2002	Certificate of Occupancy	Convert portion of the 2 nd floor of an existing commercial building to retail and add 372 SF net tower. Owner listed as BTW Associates LLC.			
1419 North Ivar A	venue				
February 14, 2002	Certificate of Occupancy	Parking lot. Owner listed as Martin Gang Tr Et Al Gang Trust & Wolfe Helen.			
1451-1453 North Iv	var Avenue	-			
May 29, 1935	Certificate of Occupancy	Public garage (repairs). Owner not listed.			

Summary of Building Department Records

Haines Criss-Cross Directories

Reasonably ascertainable directories dated 1971 through 2006 (non-inclusive) were reviewed utilizing approximately five-year intervals at the Haines & Company, Inc. office located in Fullerton, California for the subject site addresses of 6400, 6404, 6406, 6408, 6410 and 6414 West Sunset Boulevard, 1418 North Cahuenga Boulevard and 1419, 1445 and 1453 North Ivar Avenue. According to the records reviewed, numerous commercial and retail occupants were on-site from 1971 until the subject site (current retail building portion) was redeveloped with the current retail building in 1999. The current retail building has been occupied by Amoeba Music since 2001 and the vehicle parking lot has been used as a vehicle parking lot since prior to 1971. No listings for former on-site drycleaners or gasoline service stations were identified for the former or current subject site addresses.

Sanborn Fire Insurance Maps

a

Krazan reviews SFIMs to evaluate prior land use of the subject site and the adjacent properties. SFIMs typically exist for cities with populations of 2,000 or more, the coverage dependent on the location of the subject site within the city limits. On December 4, 2008, Krazan contracted with EDR to provide copies of available SFIMs for the subject site and the adjacent properties as far back as 1867. EDR's search of SFIMs revealed coverage for the subject site and the adjacent properties. The SFIM interpretation is provided in the table below. Please refer to appendices listed in the Table of Contents for copies of the EDR SFIMs.

	Summary of Sanborn Fire Insurance Maps						
Year	Property Use		Property and Adjacent Property Observation				
1913	Residential dwellings a vacant lot	and	The subject site is denoted as developed with several single-family residential dwellings and a vacant lot. The surrounding properties are denoted as developed with residential dwellings and vacant lots.				

Year	Property Use	Property and Adjacent Property Observation
1950	Residential and commercial	The subject site is denoted as developed with an auto sales/auto repair facility, several stores, a dwelling, a hotel (location of current retail building) and a vacant lot (location of current vehicle parking lot). A gasoline station is denoted adjacent to the west side of the subject site (location of current retail building) across North Cahuenga Boulevard. Numerous commercial and retail structures are denoted surrounding the subject site.
1955, 1957, 1960, 1961, 1962, 1966	Commercial/retail	The subject site is denoted as developed with several stores, offices, a vehicle parking lot (location of current retail building) and a vacant lot (location of current vehicle parking lot). A used car sales lot, stores and a theatre are denoted adjacent to the west side of the subject site across North Cahuenga Boulevard. Numerous commercial and retail structures are denoted surrounding the subject site.
1968, 1969, 1970	Commercial/retail	Conditions on the subject site and the adjacent properties are similarly denoted as compared to the previous Sanborn maps with the exception of the development of a commercial office building to the west across North Cahuenga Boulevard with the addition of a vehicle parking structure in 1969.

Summary of Sanborn Fire Insurance Maps(cont.)

According to the historical Sanborn maps reviewed, the location of the current retail building was formerly developed with an auto sales/service facility in the 1950 Sanborn map. Historical usage and disposal of hazardous materials such as motor oil, antifreeze and grease most likely occurred on-site in the past. However, based on the redevelopment of the subject site in 1999 with the current retail building and subterranean vehicle parking garage, impact to the on-site subsurface soils from the former auto sales/service facility, if any, was most likely removed during the overexcavation of the subject site for development of the subterranean vehicle parking garage. Based on the above, the former on-site auto sales/service facility is not expected to have posed an environmental concern to the subject site.

Phase I Environmental Site Assessment Interview – Owner Representative

On December 9, 2008, a Phase I ESA interview was conducted with Mr. Jon Liu, Manager, Amoeba Music, the owner representative of the subject site. The interview is designed to provide pertinent information regarding potential environmental impacts associated with the subject site.

During the interview, Mr. Liu stated that he has been familiar with the subject site for the past several years and that the subject site has been occupied by Amoeba Music since November 17, 2001.

According to Mr. Liu, to the best of his knowledge, no on-site treatment and/or discharge of waste; no onsite leach fields, dry wells, sumps, or disposal ponds; no use, storage, or disposal of hazardous materials (other than the storage of diesel fuel within the emergency power generator); no former ASTs or existing

or former USTs; no hazardous materials spills; no buried materials; no monitoring, domestic, or irrigation wells; no environmental liens, AULs, engineering or institutional controls, or any items of environmental concern are associated with the subject site.

Phase I Environmental Site Assessment Interview - Previous Owner

A Phase I ESA interview with the previous owner of the subject site was not reasonably ascertainable. Consequently, information regarding the history and historical uses of the subject site obtained from an interview of a previous owner constitutes a data gap.

6.2 Agricultural Chemicals

Review of historical aerial photographs and SFIMs indicate the subject site was not utilized for agricultural purposes from at least 1913 to the present. Consequently, the use, storage, and application of agricultural chemicals at the subject site are not considered an environmental concern.

6.3 Regulatory Agency Interface

A review of regulatory agency records was conducted to help determine if hazardous materials have been handled, stored, or generated on the subject site and/or the adjacent properties and businesses.

Regulatory records are reviewed based on the following criteria: 1) properties with known groundwater contamination that are located within 500 feet of the subject site; 2) properties that are adjacent or in proximity to the subject site included within the EDR report or noted during the site reconnaissance to possibly handle, store, or generate hazardous materials. Applicable property records are discussed below.

Los Angeles County Department of Public Health Services, Public Health Investigations

On December 10, 2008, the Los Angeles County Department of Health Services, Public Health Investigations (LACDHS) was contacted regarding potential records associated with USTs, leaking underground storage tanks (LUSTs), hazardous materials business plans (HMBPs) for the subject site and the adjacent properties. As of this writing, a response was not received from the LACDHS. Upon receiving pertinent information in connection with the subject property, Krazan & Associates will immediately issue an addendum to this report if items of environmental concern are identified.

Los Angeles County Department of Public Works

On December 10, 2008, the Los Angeles County Department of Public Works (LACDPW) was contacted regarding potential records associated with USTs, leaking underground storage tanks (LUSTs), hazardous materials business plans (HMBPs) for the subject site and the adjacent properties. As of this writing, a

response was not received from the LACDPW. Upon receiving pertinent information in connection with the subject property, Krazan & Associates will immediately issue an addendum to this report if items of environmental concern are identified.

Los Angeles Fire Department

On December 10, 2008, the Los Angeles Fire Department (LAFD) was contacted via facsimile regarding records of hazardous materials handling, hazardous/flammable incidents, and/or underground storage tanks (USTs) for the subject site. As of this writing, a response was not received from the LAFD. Upon receiving pertinent information in connection with the subject property, Krazan & Associates will immediately issue an addendum to this report if items of environmental concern are identified.

California Regional Water Quality Control Board - Geotracker

Krazan's December 9, 2008 review of the California Regional Water Quality Control Board (RWQCB) Geotracker leaking underground fuel tank (LUFT) database available via the RWQCB Internet Website indicated that no record of LUFTs are on file with the RWQCB for the subject site.

One adjacent property to the north across West Sunset Boulevard, Texaco #0374 (Former), at 6407/6409 West Sunset Boulevard (currently developed with a Jack In The Box fast food restaurant) was also identified as a LUFT facility. According to Geotracker, a release of gasoline impacting soil and groundwater occurred at this facility in 1988. Site assessment and remediation activities occurred at this facility and a case closed status was issued by the California Regional Water Quality Control Board (CRWQCB) on October 28, 1996. Based on the current regulatory status and redevelopment of this former gasoline station into the current Jack In The Box fast food restaurant, this former LUFT facility is not expected to pose an environmental concern to the subject site.

California Environmental Protection Agency, Department of Toxic Substances Control

Krazan's December 9, 2008 review of the California Environmental Protection Agency, Department of Toxic Substances Control (DTSC) Envirostor California cleanup sites database available via the DTSC Internet Website indicated that no records of cleanup sites are on file with the DTSC for the subject site, the adjacent properties, or properties located within 500 feet of the subject site. Additionally, no Federal Superfund National Priorities List (NPL) sites were determined to be located within a one-mile radius of the subject site.

Local Area Tribal Records

No Indian reservations, USTs on Indian land, or leaking USTs (LUSTs) on Indian land were reported on the subject site, adjacent properties, or vicinity properties in the EDR-provided government database report.

Division of Oil and Gas

Based on Krazan's review of the California Department of Conservation, Division of Oil and Gas (DOG) Wildcat Map Number W1-5, no plugged and abandoned or producing oil wells were determined to be located on or adjacent to the subject site.

6.4 Regulatory Agency Lists Review

Several agencies have published documents that list businesses or properties which have handled hazardous materials or waste or may have experienced site contamination. The lists consulted in the course of our assessment were compiled by EDR and Krazan on December 3, 2008, and represent reasonably ascertainable current listings. Krazan did not verify the locations and distances of every property listed by EDR. Krazan verified the location and distances of the properties Krazan deemed as having the potential to adversely impact the subject site. The actual location of the listed properties may differ from the EDR listing. The following table summarizes the listed properties located within the ASTM Search Radii. The actual distances of the listed properties (which are summarized in the following table) are based on observations during Krazan's site reconnaissance. No EDR-listed unmapped (orphan) sites were determined to be located on or adjacent to the subject site. Please refer to appendices listed in the Table of Contents for a copy of the EDR Radius Map report.

NOTES: TP = Target Property NR = Not Requested at th Sites may be listed in mo								

The subject site address 6400 West Sunset Boulevard was listed in the EDR-provided government database report as a HAZNET site. The HAZNET listing is for asbestos-containing waste, most likely generated from subject site redevelopment activities prior to the development of the current subject site retail building. Based on the above, the HAZNET listing for the subject site is not indicative of an environmental concern to the subject site.

One adjacent property to the north across West Sunset Boulevard, Texaco #0374 (Former), at 6407/6409 West Sunset Boulevard (currently developed with a Jack In The Box fast food restaurant) was identified in the EDR report as a LUST, HIST UST, CA FID UST, SWEEPS UST, and Cortese facility. According to Geotracker, a release of gasoline impacting soil and groundwater occurred at this facility in 1988. Site assessment and remediation activities occurred at this facility and a case closed status was issued by the California Regional Water Quality Control Board (CRWQCB) on October 28, 1996. Based on the current regulatory status and redevelopment of this former gasoline station into the current Jack In The Box fast food restaurant, this former LUFT facility is not expected to pose an environmental concern to the subject site.

The remaining properties within the specified search radius of the subject site which appeared on local, state, or federally published lists of sites that use or have had releases of hazardous materials are of sufficient distance and/or situated hydraulically cross- or downgradient from the subject site such that impact to the subject site is not likely.

No engineering control sites, sites with institutional controls, or sites with deed restrictions were listed for the subject site, adjacent sites or vicinity properties in the EDR-provided government database report.

7.0 DISCUSSION OF FINDINGS

Apparent Evidence of RECs From:	Not Noted	Noted
Past Uses	X	
Current Uses	X	
Adjacent or Vicinity Properties	X	

SUMMARY OF CONCLUSIONS

Historical Uses:

Based on Krazan's review of historical aerial photographs, a site reconnaissance, and contacts with the local regulatory agencies and the owner of the subject site, there is no evidence that recognized environmental conditions exist in connection with the historical uses of the subject site.

Current Uses:

Based on Krazan's site reconnaissance, contacts with local regulatory agencies, and an interview with the owner of the subject site, there is no evidence that recognized environmental conditions exist in connection with the current uses of the subject site.

Adjacent Properties:

Based on Krazan's field observations, review of the EDR Radius Map report, and consultation with local regulatory agencies, there is no evidence that recognized environmental conditions exist in connection with the subject site from adjacent property uses.

7.1 Evaluation of Data Gaps/Data Failure

In accordance with ASTM E 1527-05 guidance, data gaps represent a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice. Data failure represents the failure to achieve the historical research objectives of this practice even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

The following is a summary of data gaps encountered in the process of preparing this report including an observation as to the presumed significance of that data gap to the conclusions of this assessment.

<u>Unknown Date of First Development</u>

Site history prior to 1914 was not reasonably ascertainable based upon review of standard historical sources. Consequently, data failure was encountered relative to date of first development of the subject site. Taken in consideration with the available information obtained in the course of preparing this report in conjunction with professional experience, there is no evidence to suggest that this data gap might alter the conclusions of this assessment. However, the date of first development of the subject site is unknown.

• Absence of Final Title Report or Environmental Lien Search

A Final Title Report or Environmental Lien Search was not provided by the Phase I ESA User, therefore a data gap exists. Taken in consideration with the available information obtained in the course of preparing this report in conjunction with professional experience, there is no evidence to suggest that this data gap might alter the conclusions of this assessment. However, the contents of a Final Title Report or Environmental Lien Search are unknown.

<u>Absence of Interview with Previous Property Owner</u>

A Phase I ESA interview with the previous owner of the subject site was not reasonably ascertainable. Consequently, information regarding the history and historical uses of the subject site obtained from an interview of a previous owner constitutes a data gap. Taken in

consideration with the available information obtained in the course of preparing this report in conjunction with professional experience, there is no evidence to suggest that this data gap might alter the conclusions of this assessment. However, the contents of an interview with a previous property owner are unknown.

<u>Absence of Completed User Questionnaire</u>

A completed User Questionnaire was not provided to Krazan by the submittal date of this report. Taken in consideration with the available information obtained in the course of preparing this report in conjunction with professional experience, there is no evidence to suggest that this data gap might alter the conclusions of this assessment. However, the contents of a completed user questionnaire are unknown.

Absence of FOIA Responses from Regulatory Agencies

On December 10, 2008, the LACDHS, LACDPW and LAFD were contacted in writing regarding potential records of historical hazardous/flammable permits, hazardous material handling, or hazardous/flammable incidents for the subject site. As of this writing, no response has been received from the LACDHS, LACDPW and LAFD. Upon receiving pertinent information in connection with the subject property, Krazan & Associates will immediately issue an addendum to this report if items of environmental concern are identified.

8.0 <u>CONCLUSIONS/OPINIONS</u>

We have conducted a Phase I ESA of the subject site in conformance with the scope and limitations of the ASTM E 1527-05 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.* Any deviations from this practice were previously described in this report. Krazan's findings of this Phase I ESA revealed no evidence of RECs in connection with the subject site.

9.0 <u>LIMITATIONS</u>

The site reconnaissance and research of the subject site has been limited in scope. This type of assessment is undertaken with the calculated risk that the presence, full nature, and extent of contamination would not be revealed by visual observation alone. Although a thorough site reconnaissance was conducted in accordance with ASTM Guidelines and employing a professional

standard of care, no warranty is given, either expressed or implied, that hazardous material contamination or buried structures, which would not have been disclosed through this investigation, do not exist at the subject site. Therefore, the data obtained are clear and accurate only to the degree implied by the sources and methods used.

The findings presented in this report were based upon field observations during a single property visit, review of available data, and discussions with local regulatory and advisory agencies. Observations describe only the conditions present at the time of this investigation. The data reviewed and observations made are limited to accessible areas and currently available records searched. Krazan cannot guarantee the completeness or accuracy of the regulatory agency records reviewed. Additionally, in evaluating the property, Krazan has relied in good faith upon representations and information provided by individuals noted in the report with respect to present operations and existing property conditions, and the historical uses of the property. It must also be understood that changing circumstances in the property usage, proposed property usage, subject site zoning, and changes in the environmental status of the other nearby properties can alter the validity of conclusions and information contained in this report. Therefore, the data obtained are clear and accurate only to the degree implied by the sources and methods used.

This report is provided for the exclusive use of the client noted on the cover page and shall be subject to the terms and conditions in the applicable contract between the client and Krazan. Any third party use of this report, including use by Client's lender, shall also be subject to the terms and conditions governing the work in the contract between the client and Krazan. The unauthorized use of, reliance on, or release of the information contained in this report without the express written consent of Krazan is strictly prohibited and will be without risk or liability to Krazan.

Conclusions and recommendations contained in this report are based on the evaluation of information made available during the course of this assessment. It is not warranted that such data cannot be superseded by future environmental, legal, geotechnical or technical developments. Consequently, given the possibility for unanticipated hazardous conditions to exist on a subject site which may not have been discovered, this Phase I ESA is not intended as the basis for a buyer or developer of real property to waive their rights of recovery based upon environmental unknowns. Parties that choose to waive rights of recovery prior to site development do so at their own risk.

Parties who seek to rely upon Phase I Environmental Site Assessment reports dated more than 180 days prior to the date of reliance do so at their own risk. This limitation in reliance is based on the potential for physical changes at the site, changes in circumstances, technological and professional advances, and

guidance related to the continued viability of Environmental Site Assessment reports, user's responsibilities, and requirements for updating of components of the inquiry as stated in the ASTM Standard E 1527-05.

10.0 QUALIFICATIONS

This Phase I ESA was conducted under the supervision or responsible charge of Krazan's undersigned environmental assessor with oversight from the undersigned environmental professional. The work was conducted in accordance with ASTM E 1527-05, generally accepted industry standards for environmental due diligence in place at the time of the preparation of this report, and Krazan's quality-control policies.

We declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Respectfully submitted, KRAZAN & ASSOCIATES, INC.

Mark E. Smith, REA Environmental Assessor

Rob Vaughn, REA National Client Manager Commercial Services

Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to TRACK Info Services, certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in TRACK Info Services's databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

Waiver of Liability

Although TRACK Info Services uses its best efforts to research the actual location of each site, TRACK Info Services does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of TRACK Info Services's services proceeding are signifying an understanding of TRACK Info Services's searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

UST HISTORICAL DATA

This site was listed in the FIDS Zip Code List as a UST site. The Office of Hazardous Data Management produced the FIDS list. The FIDS list is an index of names and locations of sites recorded in various California State environmental agency databases. It is sorted by zip code and as an index, details regarding the sites were never included.

The UST information included in FIDS as provided by the Office of Hazardous Data Management was originally collected from the SWEEPS database. The SWEEPS database recorded Underground Storage Tanks and was maintained by the State Water Resources Control Board (SWRCB). That agency no longer maintains the SWEEPS database and last updated it in 1994. The last release of that 1994 database was in 1997.

Oversight of Underground Storage Tanks within California is now conducted by Certified Unified Program Agencies referred to as CUPA s. There are approximately 102 CUPA s and Local Oversight Programs (LOP s) in the State of California. Most are city or county government agencies. As of 1998, all sites or facilities with underground storage tanks were required by Federal mandate to obtain certification by designated UST oversight agencies (in this case, CUPA s) that the UST/s at their location were upgraded or removed in adherence with the 1998 RCRA standards.

Information from the FIDS/SWEEPS lists were included in this report search to help identify where underground storage tanks may have existed that were not recorded in CUPA databases or lists collected by Track Info Services. This may occur if a tank was removed prior to development of recent CUPA UST lists or never registered with a CUPA.

UST HISTORICAL DATA

This site was listed in the FIDS Zip Code List as a UST site. The Office of Hazardous Data Management produced the FIDS list. The FIDS list is an index of names and locations of sites recorded in various California State environmental agency databases. It is sorted by zip code and as an index, details regarding the sites were never included.

The UST information included in FIDS as provided by the Office of Hazardous Data Management was originally collected from the SWEEPS database. The SWEEPS database recorded Underground Storage Tanks and was maintained by the State Water Resources Control Board (SWRCB). That agency no longer maintains the SWEEPS database and last updated it in 1994. The last release of that 1994 database was in 1997.

Oversight of Underground Storage Tanks within California is now conducted by Certified Unified Program Agencies referred to as CUPA s. There are approximately 102 CUPA s and Local Oversight Programs (LOP s) in the State of California. Most are city or county government agencies. As of 1998, all sites or facilities with underground storage tanks were required by Federal mandate to obtain certification by designated UST oversight agencies (in this case, CUPA s) that the UST/s at their location were upgraded or removed in adherence with the 1998 RCRA standards.

Information from the FIDS/SWEEPS lists were included in this report search to help identify where underground storage tanks may have existed that were not recorded in CUPA databases or lists collected by Track Info Services. This may occur if a tank was removed prior to development of recent CUPA UST lists or never registered with a CUPA.

The UST information included in FIDS as provided by the Office of Hazardous Data Management was originally collected from the SWEEPS database. The SWEEPS database recorded Underground Storage Tanks and was maintained by the State Water Resources Control Board (SWRCB). That agency no longer maintains the SWEEPS database and last updated it in 1994. The last release of that 1994 database was in 1997.

Oversight of Underground Storage Tanks within California is now conducted by Certified Unified Program Agencies referred to as CUPA s. There are approximately 102 CUPA s and Local Oversight Programs (LOP s) in the State of California. Most are city or county government agencies. As of 1998, all sites or facilities with underground storage tanks were required by Federal mandate to obtain certification by designated UST oversight agencies (in this case, CUPA s) that the UST/s at their location were upgraded or removed in adherence with the 1998 RCRA standards.

Information from the FIDS/SWEEPS lists were included in this report search to help identify where underground storage tanks may have existed that were not recorded in CUPA databases or lists collected by Track Info Services. This may occur if a tank was removed prior to development of recent CUPA UST lists or never registered with a CUPA.

UST HISTORICAL DATA

This site was listed in the FIDS Zip Code List as a UST site. The Office of Hazardous Data Management produced the FIDS list. The FIDS list is an index of names and locations of sites recorded in various California State environmental agency databases. It is sorted by zip code and as an index, details regarding the sites were never included.

The UST information included in FIDS as provided by the Office of Hazardous Data Management was originally collected from the SWEEPS database. The SWEEPS database recorded Underground Storage Tanks and was maintained by the State Water Resources Control Board (SWRCB). That agency no longer maintains the SWEEPS database and last updated it in 1994. The last release of that 1994 database was in 1997.

Oversight of Underground Storage Tanks within California is now conducted by Certified Unified Program Agencies referred to as CUPA s. There are approximately 102 CUPA s and Local Oversight Programs (LOP s) in the State of California. Most are city or county government agencies. As of 1998, all sites or facilities with underground storage tanks were required by Federal mandate to obtain certification by designated UST oversight agencies (in this case, CUPA s) that the UST/s at their location were upgraded or removed in adherence with the 1998 RCRA standards.

UST HISTORICAL DATA

This site was listed in the FIDS Zip Code List as a UST site. The Office of Hazardous Data Management produced the FIDS list. The FIDS list is an index of names and locations of sites recorded in various California State environmental agency databases. It is sorted by zip code and as an index, details regarding the sites were never included.

The UST information included in FIDS as provided by the Office of Hazardous Data Management was originally collected from the SWEEPS database. The SWEEPS database recorded Underground Storage Tanks and was maintained by the State Water Resources Control Board (SWRCB). That agency no longer maintains the SWEEPS database and last updated it in 1994. The last release of that 1994 database was in 1997.

Oversight of Underground Storage Tanks within California is now conducted by Certified Unified Program Agencies referred to as CUPA s. There are approximately 102 CUPA s and Local Oversight Programs (LOP s) in the State of California. Most are city or county government agencies. As of 1998, all sites or facilities with underground storage tanks were required by Federal mandate to obtain certification by designated UST oversight agencies (in this case, CUPA s) that the UST/s at their location were upgraded or removed in adherence with the 1998 RCRA standards.

Comments Date:

: Site reconnaissance with DTSC and consultant occurred. Currently awaiting submittal of site characterization workplan. Site Characterization workplan reportedly in progress. DTSC awaiting submittal of workplan. Site characterization workplan submitted to DTSC currently under review. Transferred to School. This is a school project. As of 6/15/03, schools unit is providing project oversight. Proponent submitted PEAE for review. DTSC reviewed and requested additional site characterization. Proponent conducted additional field activities and submitted RI report to DTSC. DTSC reviewed and issued comments. Proponent then transferred project to schools unit, thus coupleting Scope of work with Site Mitigation. A Voluntary Cleanup Agreement between the owner and the Department of Toxic Substances Control (DTSC) was entered. Two documents, Environmental Site Assessment Subsurface Soil Investigation dated June 2001 (previously submitted), and Environmental Site Assessment Subsurface Soil and Groundwater Investigation dated July 2001 (previously submitted) were reviewed by the DTSC. Comments pertaining to the submitted documents were sent to consultant representing site location. Scope meeting between DTSC and client is scheduled for first part of December 2001. A scoping meeting was held on 12/14/01 to discuss further site characterization of the site.

Environmental FirstSearch Descriptions

NPL: *EPA* NATIONAL PRIORITY LIST - The National Priorities List is a list of the worst hazardous waste sites that have been identified by Superfund. Sites are only put on the list after they have been scored using the Hazard Ranking System (HRS), and have been subjected to public comment. Any site on the NPL is eligible for cleanup using Superfund Trust money.

A Superfund site is any land in the United States that has been contaminated by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

FINAL - Currently on the Final NPL

PROPOSED - Proposed for NPL

NPL DELISTED: *EPA* NATIONAL PRIORITY LIST Subset - Database of delisted NPL sites. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

DELISTED - Deleted from the Final NPL

CERCLIS: *EPA* COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.

PART OF NPL- Site is part of NPL site

DELETED - Deleted from the Final NPL FINAL - Currently on the Final NPL NOT PROPOSED - Not on the NPL NOT VALID - Not Valid Site or Incident PROPOSED - Proposed for NPL REMOVED - Removed from Proposed NPL

SCAN PLAN - Pre-proposal Site

WITHDRAWN - Withdrawn

NFRAP: *EPA* COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM ARCHIVED SITES - database of Archive designated CERCLA sites that, to the best of EPA's knowledge, assessment has been completed and has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

NFRAP – No Further Remedial Action Plan

- P Site is part of NPL site
- D Deleted from the Final NPL
- F Currently on the Final NPL
- N Not on the NPL
- O Not Valid Site or Incident
- P Proposed for NPL
- R Removed from Proposed NPL
- S Pre-proposal Site
- W-Withdrawn

RCRA COR ACT: *EPA* RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984. RCRAInfo facilities that have reported violations and subject to corrective actions.

RCRA TSD: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM

TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities that treat, store, dispose, or incinerate hazardous waste.

RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM RCRA GEN: EPA GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984. Facilities that generate or transport hazardous waste or meet other RCRA requirements.

LGN - Large Quantity Generators

SGN - Small Quantity Generators

VGN - Conditionally Exempt Generator.

Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.

RCRA NLR: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES

- Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities not currently classified by the EPA but are still included in the RCRAInfo database. Reasons for non classification:

Failure to report in a timely matter.

No longer in business.

No longer in business at the listed address.

No longer generating hazardous waste materials in quantities which require reporting.

Federal IC / EC: EPA BROWNFIELD MANAGEMENT SYSTEM (BMS) - database designed to assist EPA in collecting, tracking, and updating information, as well as reporting on the major activities and accomplishments of the various Brownfield grant Programs.

FEDERAL ENGINEERING AND INSTITUTIONAL CONTROLS- Superfund sites that have either an engineering or an institutional control. The data includes the control and the media contaminated.

ERNS: EPA/NRC EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

Tribal Lands: DOI/BIA INDIAN LANDS OF THE UNITED STATES - Database of areas with boundaries established by treaty, statute, and (or) executive or court order, recognized by the Federal Government as territory in which American Indian tribes have primary governmental authority. The Indian Lands of the United States map layer shows areas of 640 acres or more, administered by the Bureau of Indian Affairs. Included are Federally-administered lands within a reservation which may or may not be considered part of the reservation.

State/Tribal Sites: CA EPA SMBRPD / CAL SITES- The California Department of Toxic Substances Control (DTSC) has developed an electronic database system with information about sites that are known to be contaminated with hazardous substances as well as information on uncharacterized properties where further studies may reveal problems. The Site Mitigation and Brownfields Reuse Program Database (SMBRPD), also known as CalSites, is used primarily by DTSC's staff as an informational tool to evaluate and track activities at

properties that may have been affected by the release of hazardous substances.

The SMBRPD displays information in six categories. The categories are:

1. CalSites Properties (CS)

2. School Property Evaluation Program Properties (SCH)

3. Voluntary Cleanup Program Properties (VCP)

4. Unconfirmed Properties Needing Further Evaluation (RFE)

Please Note: FirstSearch Reports list the above sites as DB Type (STATE).

5. Unconfirmed Properties Referred to Another Local or State Agency (REF)

6. Properties where a No Further Action Determination has been made (NFA)

Please Note: FirstSearch Reports list the above sites as DB Type (OTHER).

Each Category contains information on properties based upon the type of work taking place at the site. For example, the CalSites database is now one of the six categories within SMPBRD and contains only confirmed sites considered as posing the greatest threat to the public and/or the potential public school sites will be found within the School Property Evaluation Program, and those properties undergoing voluntary investigation and/or cleanup are in the Voluntary Cleanup Program.

CORTESE LIST-Pursuant to Government Code Section 65962.5, the Hazardous Waste and Substances Sites List has been compiled by Cal/EPA, Hazardous Materials Data Management Program. The CAL EPA Dept. of Toxic Substances Control compiles information from subsets of the following databases to make up the CORTESE list:

1. The Dept. of Toxic Substances Control; contaminated or potentially contaminated hazardous waste sites listed in the CAL Sites database. Formerly known as ASPIS are included (CALSITES formerly known as ASPIS).

2. The California State Water Resources Control Board; listing of Leaking Underground Storage Tanks are included (LTANK)

3. The California Integrated Waste Management Board; Sanitary Landfills which have evidence of groundwater contamination or known migration of hazardous materials (formerly WB-LF, now AB 3750).

Note: Track Info Services collects each of the above data sets individually and lists them separately in the following First Search categories in order to provide more current and comprehensive information: CALSITES: SPL, LTANK: LUST, WB-LF: SWL

State Spills 90: *CA EPA* SLIC REGIONS 1 - 9- The California Regional Water Quality Control Boards maintain report of sites that have records of spills, leaks, investigation, and cleanups.

State/Tribal SWL: *CA IWMB/SWRCB/COUNTY* SWIS SOLID WASTE INFORMATION SYSTEM-The California Integrated Waste Management Board maintains a database on solid waste facilities, operations, and disposal sites throughout the state of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites. For more information on individual sites call the number listed in the source field..

Please Note: This database contains poor site location information for many sites in the First Search reports; therefore, it may not be possible to locate or plot some sites in First Search reports.

WMUDS-The State Water Resources Control Board maintained the Waste Management Unit Database System (WMUDS). It is no longer updated. It tracked management units for several regulatory programs related to waste management and its potential impact on groundwater. Two of these programs (SWAT & TPCA) are no longer on-going regulatory programs as described below. Chapter 15 (SC15) is still an on-going regulatory program and information is updated periodically but not to the WMUDS database. The WMUDS System contains information from the following agency databases: Facility, Waste Management Unit (WMU), Waste Discharger System (WDS), SWAT, Chapter 15, TPCA, RCRA, Inspections, Violations, and Enforcement's.

Note: This database contains poor site location information for many sites in the First Search reports; therefore, it may not be possible to locate or plot some sites in First Search reports.

ORANGE COUNTY LANDFILLS LIST- A list maintained by the Orange County Health Department.

State/Tribal LUST: *CA SWRCB/COUNTY* LUSTIS- The State Water Resources Control Board maintains a database of sites with confirmed or unconfirmed leaking underground storage tanks. Information for this database is collected from the states regional boards quarterly and integrated with this database.

SAN DIEGO COUNTY LEAKING TANKS- The San Diego County Department of Environmental Health maintains a database of sites with confirmed or unconfirmed leaking underground storage tanks within its HE17/58 database. For more information on a specific file call the HazMat Duty Specialist at phone number listed in the source information field.

State/Tribal UST/AST: *CA EPA/COUNTY/CITY* ABOVEGROUND STORAGE TANKS LISTING-The Above Ground Petroleum Storage Act became State Law effective January 1, 1990. In general, the law requires owners or operators of AST's with petroleum products to file a storage statement and pay a fee by July 1, 1990 and every two years thereafter, take specific action to prevent spills, and in certain instances implement a

groundwater monitoring program. This law does not apply to that portion of a tank facility associated with the production oil and regulated by the State Division of Oil and Gas of the Dept. of Conservation.

SWEEPS / FIDS STATE REGISTERED UNDEGROUND STORAGE TANKS- Until 1994 the State Water Resources Control Board maintained a database of registered underground storage tanks statewide referred to as the SWEEPS System. The SWEEPS UST information was integrated with the CAL EPA's Facility Index System database (FIDS) which is a master index of information from numerous California agency environmental databases. That was last updated in 1994. Track Info Services included the UST information from the FIDS database in its First Search reports for historical purposes to help its clients identify where tanks may possibly have existed. For more information on specific sites from individual paper files archived at the State Water Resources Control Board call the number listed with the source information.

INDIAN LANDS UNDERGROUND STORAGE TANKS LIST- A listing of underground storage tanks currently on Indian Lands under federal jurisdiction. California Indian Land USTS are administered by US EPA Region 9.

CUPA DATABASES & SOURCES- Definition of a CUPA: A Certified Unified Program Agency (CUPA) is a local agency that has been certified by the CAL EPA to implement six state environmental programs within the local agency's jurisdiction. These can be a county, city, or JPA (Joint Powers Authority). This program was established under the amendments to the California Health and Safety Code made by SB 1082 in 1994.

A Participating Agency (PA) is a local agency that has been designated by the local CUPA to administer one or more Unified Programs within their jurisdiction on behalf of the CUPA. A Designated Agency (DA) is an agency that has not been certified by the CUPA but is the responsible local agency that would implement the six unified programs until they are certified.

Please Note: Track Info Services, LLC collects and maintains information regarding Underground Storage Tanks from majority of the CUPAS and Participating Agencies in the State of California. These agencies typically do not maintain nor release such information on a uniform or consistent schedule; therefor, currency of the data may vary. Please look at the details on a specific site with a UST record in the First Search Report to determine the actual currency date of the record as provided by the relevant agency. Numerous efforts are made on a regular basis to obtain updated records.

State/Tribal IC: *CA EPA* DEED-RESTRICTED SITES LISTING- The California EPA's Department of Toxic Substances Control Board maintains a list of deed-restricted sites, properties where the DTSC has placed limits or requirements on the future use of the property due to varying levels of cleanup possible, practical or necessary at the site.

State/Tribal VCP: *CA EPA* SMBRPD / CAL SITES- The California Department of Toxic Substances Control (DTSC) has developed an electronic database system with information about sites that are known to be contaminated with hazardous substances as well as information on uncharacterized properties where further studies may reveal problems. The Site Mitigation and Brownfields Reuse Program Database (SMBRPD), also known as CalSites, is used primarily by DTSC's staff as an informational tool to evaluate and track activities at properties that may have been affected by the release of hazardous substances.

The SMBRPD displays information in six categories. The categories are:

- 1. CalSites Properties (CS)
- 2. School Property Evaluation Program Properties (SCH)
- 3. Voluntary Cleanup Program Properties (VCP)
- 4. Unconfirmed Properties Needing Further Evaluation (RFE)
- 5. Unconfirmed Properties Referred to Another Local or State Agency (REF)
- 6. Properties where a No Further Action Determination has been made (NFA)

Please Note: FirstSearch Reports list the above sites as DB Type VC. Each Category contains information on properties based upon the type of work taking place at the site. The VC category contains only those properties undergoing voluntary investigation and/or cleanup and which are listed in the Voluntary Cleanup Program.

RADON: *NTIS* NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

State Permits: *CA COUNTY* SAN DIEGO COUNTY HE17 PERMITS- The HE17/58 database tracks establishments issued permits and the status of their permits in relation to compliance with federal, state, and local regulations that the County oversees. It tracks if a site is a hazardous waste generator, TSD, gas station, has underground tanks, violations, or unauthorized releases. For more information on a specific file call the HazMat Duty Specialist at the phone number listed in the source information field.

SAN BERNARDINO COUNTY HAZARDOUS MATERIALS PERMITS- Handlers and Generators Permit Information Maintained by the Hazardous Materials Division.

State Other: CA EPA/COUNTY SMBRPD / CAL SITES- The California Department of Toxic Substances

Control (DTSC) has developed an electronic database system with information about sites that are known to be contaminated with hazardous substances as well as information on uncharacterized properties where further studies may reveal problems. The Site Mitigation and Brownfields Reuse Program Database (SMBRPD), also known as CalSites, is used primarily by DTSC's staff as an informational tool to evaluate and track activities at properties that may have been affected by the release of hazardous substances.

The SMBRPD displays information in six categories. The categories are:

1. CalSites Properties (CS)

2. School Property Evaluation Program Properties (SCH)

3. Voluntary Cleanup Program Properties (VCP)

4. Unconfirmed Properties Needing Further Evaluation (RFE)

Please Note: FirstSearch Reports list the above sites as DB Type (STATE).

5. Unconfirmed Properties Referred to Another Local or State Agency (REF)

6. Properties where a No Further Action Determination has been made (NFA)

Please Note: FirstSearch Reports list the above sites as DB Type (OTHER).

Each Category contains information on properties based upon the type of work taking place at the site. For example, the CalSites database is now one of the six categories within SMPBRD and contains only confirmed sites considered as posing the greatest threat to the public and/or the potential public school sites will be found within the School Property Evaluation Program, and those properties undergoing voluntary investigation and/or cleanup are in the Voluntary Cleanup Program.

LA COUNTY SITE MITIGATION COMPLAINT CONTROL LOG- The County of Los Angeles Public Health Investigation Compliant Control Log.

ORANGE COUNTY INDUSTRIAL SITE CLEANUPS- List maintained by the Orange County Environmental Health Agency.

RIVERSIDE COUNTY WASTE GENERATORS-A list of facilities in Riverside County which generate hazardous waste.

SACRAMENTO COUNTY MASTER HAZMAT LIST-Master list of facilities within Sacramento County with potentially hazardous materials.

SACRAMENTO COUNTY TOXIC SITE CLEANUPS-A list of sites where unauthorized releases of potentially hazardous materials have occurred.

State Other: *US DOJ* NATIONAL CLANDESTINE LABORATORY REGISTER - Database of addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the U.S. Department of Justice ("the Department"), and the Department has not verified the entry and does not guarantee its accuracy. All sites that are included in this data set will have an id that starts with NCLR.

APPENDIX D: QUALIFICATIONS

Rachel Herrera Environmental Scientist

Education

Bachelor of Science in Health Science, California State University, San Bernardino Emphasis in Environmental Health

Registrations

EPA Accredited Asbestos Inspector

Ms. Herrera has three years work experience in the environmental science industry. She has project experience in Phase I Environmental Site Assessments (ESAs), Environmental Transaction Screens, radon screening, asbestos inspections, and lead-based paint inspections. She is familiar with all aspects of Due Diligence Property Assessments and the needs and requirements of a varied number of reporting standards, including the standard ASTM, EPA's All Appropriate Inquiry (AAI), Fannie Mae DUS, and customized client formats.

Project experience for Ms. Herrera includes:

- Completed hundreds of Phase I Environmental Site Assessments and Environmental Transaction Screens on multi-family properties, commercial office buildings, retail shopping centers, gasoline service stations, hotels, dry cleaning plants, auto repair and auto body shops, industrial warehouse buildings, aerospace manufacturers, plating facilities, and various manufacturing operations throughout the U.S.
- Conducted radon testing at several residential properties throughout Southern California
- Conducted asbestos and lead-based paint sampling at several residential and commercial properties throughout Southern California

Ms. Herrera has technical experience working for the following financial institutions:

- Washington Mutual Bank
- Citibank North America
- California Bank and Trust
- Union Bank of California
- East West Bank

- Comerica Bank
- United Commercial Bank
- Countrywide Commercial Real Estate
- Morgan Stanley Mortgage Capital, Inc.
- Lehman Brothers
- City National Bank

Michael Eng, M.S.

Principal Consultant

Education

Master's of Science in Environmental Science Loyola Marymount University Bachelor's of Science in Biological Sciences Loyola Marymount University *Certifications* Inspection Training Associates (ITA) Commercial Buildings Training Advanced Institute of Pest Technology (AIPT) Branch III Technical training (Pest Identification, Safety, and Construction Techniques) MBA - Fannie Mae and Freddie Mac Multifamily Property Inspection *Affiliations* Member Mortgage Bankers Association

Mr. Eng has more than 4 years of experience in the environmental consulting industry and in a broad range of environmental disciplines, including environmental assessments, natural resource management, wetlands delineation, and wastewater treatment. Mr. Eng has more than 3 years of project management experience in the environmental and civil/structural engineering field.

Mr. Eng has project experience in Phase I Environmental Site Assessments (ESAs), Environmental Transaction Screens, Radon Screening, Property Condition Assessments, Property Condition Evaluations, Property Needs Assessments, and Seismic Evaluations. Mr. Eng is familiar with all aspects of Due Diligence Property Assessments and the needs and requirements of a varied number of reporting standards, including the new standard ASTM E1527-05, ASTM E2018, EPA's All Appropriate Inquiry (AAI), Fannie Mae DUS, Freddie Mac, HUD, and customized client formats or scope.

Project experience for Mr. Eng includes:

- Conducted several hundred Due Diligence Environmental Site Assessments (ESAs) and Property Condition Assessments for multi-family residential dwellings, hotels/motels/resorts, commercial office buildings, shopping centers, multi-tenant commercial complexes, industrial warehouses, manufacturing facilities, dry cleaning plants, gasoline service stations, automotive repair and body shop, medical facilities, and food processing facilities
- Performed lead in water sampling for various multi-family residential dwellings
- Evaluation of the condition of all major building systems
- Formulated cost analysis for building owners and perspective purchasers
- Advised clients on existing environmental conditions associated to a site

Mr. Eng has experience as a Senior Project Manager in the Due Diligence Environmental and Building Sciences/ Construction field and is currently a principal consultant within the same field. His background in the environmental sciences and property assessments allows him to provide complete and thorough assessments and evalua-

Page 2 Michael Eng, M.S.

tions to serve a client's specific needs. In addition to providing consulting services, Mr. Eng has assisted in senior report reviewing and employee training in both the Due Diligence Environmental and Building Sciences Departments.

Mr. Eng has technical experience working for the following financial institutions:

- Business Loan Xpress
- Bank of the West
- California Bank and Trust
- Citibank North America
- Citigroup Global Markets
- Comerica Bank
- Commerce West Bank
- Countrywide Commercial Real Estate
- East West Bank
- George Smith Partners

- Washington Mutual Bank
- Wells Fargo Bank

APPENDIL:

QUALIFICATIONS

Danny Huerta – Project Manager, Due Diligence Services

BA-Environmental Studies, University of California Santa Barbara

Mr. Huerta has five years experience in the environmental service industry. His past experience includes working as a chemist for an environmental laboratory, as well as a hazardous materials specialist for the Santa Barbara County Fire Department. His project experience has exposed him to working with the interpretation and application of environmental regulation to various facilities including residential, commercial, and industrial sites.

Project experience for Mr. Huerta includes:

- Phase I Environmental Site Assessments and Real Estate Transaction Screens
- Implementation of California's environmental regulations and laws to commercial and industrial facilities
- Investigations of complaints regarding the use, disposal, and storage of hazardous materials
- Inspection and report write-ups for environmentally permitted facilities
- Review of business plan and contingency plan documents for permitted facilities

Mr. Huerta has worked in the environmental industry for the past five years. He has attended various conferences, meetings, and training seminars regarding environmental laws and regulations. Mr. Huerta has also worked with government agencies such as the State Water Board, Fire Departments, and the EPA.

Adam J. Bennett – Regional Director

B.A. - Geology, Whittier College

40 Hour HAZWOPER Certified

Mr. Bennett has fifteen years of experience in environmental consulting. Mr. Bennett is the regional director for the Southern California area including the Los Angeles and Irvine offices of AEI Consultants, and oversees all daily activities throughout the offices. He is responsible for development of new business with banking institutions, development companies, mortgage brokers, and real estate firms; and for maintaining existing client satisfaction and relationships. Also responsible for providing quality assessment/quality control for various Environmental Site Assessment reports prepared for clients located throughout the United States. Advised and consult clients and staff to make the proper environmental decisions and recommendations. His project experience includes but is not limited too: Phase I Environmental Site Assessments, Real Estate Transaction Screens, radon screening projects, asbestos inspections, lead-based paint inspections, and reviewing/evaluating Phase II and Phase III reports. His experience includes management of portfolio projects involving numerous properties throughout the US.

Project experience for Mr. Bennett includes:

- Phase I Environmental Site Assessments, Real Estate Transaction Screens and Property Condition Assessments
- The design and implementation of numerous Phase II soil and groundwater investigations for a variety of suspected contaminants for due diligence and liability purposes Methane testing (LADBS)
- Research, procure, catalog, interpret historical aerial photographs, and report through written declarations and depositions as an expert witness on major local, state, and federal cases throughout the United States
- LAUSD new school site safety assessments
- Installation of groundwater monitoring wells
- Hazardous waste disposal, clarifier, UST/AST removals
- Successfully negotiating with regulators for site closures across California.

Mr. Bennett also has extensive experience in the use of aerial photograph interpretation, and has been retained as an expert witness for the interpretation of historical aerial photographs on several class action lawsuits.

1 INTRODUCTION

1.1 PROJECT DESCRIPTION

This Project consists of the development of a new mixed-use development located in the Hollywood neighborhood of the City of Los Angeles. The site consists of two parcels located at 6400 Sunset Boulevard and 1429 Ivar Avenue, which are separated by two private properties. Both parcels are bound by Ivar Avenue on the west and North Cahuenga Boulevard on the east. The parcel at 6400 Sunset Boulevard is bound to the north by Sunset Boulevard and to the south by private properties. The parcel at 1429 Ivar Avenue is bound to the north by private properties and to the south by a public alley. The total site area, inclusive of the two parcels, is approximately 38,772 square feet or 0.89 acres.

The project consists of approximately 223,987 square feet of residential uses (including 232 residential units), 7,000 square feet of commercial space on levels 1-5, and two levels of subterranean parking for up to 373 parking stalls. These improvements would replace the Amoeba Music record store and an existing asphalt surface parking lot.

1.2 SCOPE OF WORK

In support of the Initial Study for the Project, the purpose of this report is to confirm the proposed project would not significantly impact the existing surface water hydrology, surface water quality, groundwater level, groundwater quality, wastewater and energy.

2 WATER RESOURCES

2.1 SURFACE WATER HYDROLOGY

Initial Study Checklist Questions and Answers

- VIII.c): Would the project substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?
- Answer: The existing project site is approximately 100-percent impervious. Existing storm water runoff from the northern parcel is conveyed by sheet flow from the sidewalk to the surrounding streets. Based on visual observation, there also appears to be curb drains along Ivar Avenue, Cahuenga Boulevard and Sunset Boulevard that allow storm water runoff from the roof to flow to the curb gutters. Storm water runoff on the southern parcel is conveyed by sheet flow, from northwest to southeast and into the existing alley. See Figure 1 for existing drainage pattern.

The proposed project will not add tributary area or increase impervious area, nor will it alter the existing drainage patterns of the site. In addition the project is regulated by the City of Los Angeles (City). City requirements include compliance with the State of California General Permit for storm water discharges

during construction for projects with over one acre of land disturbance, and postconstruction compliance with the Los Angeles County Department of Public Works (LACDPW) Hydrology Manual and the City of Los Angeles Low Impact Development (LID) Ordinance. However, since the project site is less than an acre, it will only implement erosion and sediment control BMP's during construction in order to prevent erosion and siltation. Therefore, the proposed project will not alter the existing drainage pattern resulting in substantial erosion or siltation. The impacts associated with the project on surface water hydrology are less than significant.

- VIII.d): Would the project substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?
- Answer: As mentioned above, the existing site is approximately 100-percent impervious, and the proposed project will not add tributary area or increase impervious area, nor will it alter the existing drainage patterns of the site. The project will be designed based on the LACDPW Hydrology Manual and City LID Ordinance. The LACDPW Hydrology Manual requires that a storm drain conveyance system be designed for a 25-year storm event and that the combined capacity of a storm drain and street flow system accommodate flow from a 50-year storm event. The existing site has a 50-year peak flow rate of 2.3 cubic feet per second (cfs) for the northern parcel and 0.51 cfs for the southern parcel. See Figure 2 for peak flow hydrologic calculation results and Figure 3 for the LA County hydrology map. Therefore, the proposed site will not alter the existing drainage pattern of the site in such a way that would result in flooding on or off-site. The impacts associated with the project on surface water hydrology are less than significant.
- VIII.e): Would the project create or contribute runoff water which would exceed the capacity of existing or planned storm water drainage systems, or provide substantial additional sources of polluted runoff?
- Answer: The existing project site is approximately 100-percent impervious without storm water mitigation or treatment systems and the proposed project will incorporate post-construction BMP's to treat storm water for pollutants and control runoff, in accordance with the LACDPW Hydrology Manual and the City LID Ordinance. Therefore, the project will not contribute runoff water that would exceed the capacity of existing or planned storm water drainage system, nor will it provide substantial additional sources of polluted runoff.
- VIII.g): Would the project place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?

- Answer: Based on the current Flood Insurance Rate Map (FIRM), the proposed project is in the areas determined to be outside the 0.2% annual chance floodplain, also known as Zone X, on the FIRM. Therefore, the project will not place housing within a 100-year flood hazard area. See Figure 4 for FEMA flood map.
- VIII.h): Would the project place within a 100-year flood hazard area structures, which would impede or redirect flood flows?
- Answer: Based on the current FIRM, the proposed project is in the areas determined to be outside the 0.2% annual chance floodplain on, also known as Zone 'X', on the FIRM. Therefore, the project would not place structures within a 100-year flood hazard area, thereby not impeding or redirecting flood flows. See Figure 4 for FEMA flood map.
- VIII.i): Would the project expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?
- Answer: Based on Inundation & Tsunami Hazard Area in Safety Element Exhibit G, the proposed project is located within a flood zone associated with the Mulholland Dam, see Figure 5. Although the site is mapped within an inundation zone, catastrophic failure of this dam is expected to be a very unlikely event in that dam safety regulations exist and are enforced by the Division of Safety of Dams (DSOD), Army Corps of Engineers (ACOE), and Department of Water Resources (DWR). Inspectors may require dam owners to perform work, maintenance or implement controls if issues are found with the safety of the dam. These dams are under continuous monitoring for safety against failure. Therefore, the risk of flooding due to failure of levee or dam is considered low and impacts are less than significant.
- XVI.b): Would the project result in the construction of new water or wastewater treatment facilities, the construction of which could cause significant environmental effects?
- Answer: The existing design capacity of the Hyperion Service Area is approximately 550 million gallons per day (MGD) (consisting of 450 MGD at the Hyperion Treatment Plant, 80 MGD at the Donald C. Tillman Water Reclamation Plant, Reclamation Plant, and 20 MGD at the Los Angeles–Glendale Water Reclamation Plant)¹ and the existing average daily flow for the system is approximately 300 MGD². The project's proposed wastewater generation is approximately 0.024 MGD, comprising less than 0.01% of the available capacity in the system.

¹ City of Los Angeles Department of Public Works, Bureau of Sanitation, Water Reclamation Plants, https://www.lacitysan.org/san/faces/home/portal/s-lsh-wwd/s-lsh-wwd-cw/s-lsh-wwd-cw-p?_adf.ctrlstate=oep8lwkld_4&_afrLoop=28344654751341747#!, accessed October 2016.

² City of Los Angeles Department of Public Works, Bureau of Sanitation, Sewer System Management Plan Hyperion Sanitary Sewer System, February 2015.

Consequently, the project would not require the construction of new water or wastewater treatment facilities and impacts on wastewater treatment capacity are not significant.

- XVI.c): Would the project require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?
- Answer: Based on City record data, there is an existing 54-inch reinforced concrete pipe (RCP) that runs along Sunset Boulevard and continues onto North Cahuenga Boulevard as a reinforced concrete arch (RCA). The existing site, with approximately 100-percent impervious area, has a 50-year peak flow rate of 2.3 cubic feet per second (cfs) for the northern parcel and 0.51 cfs for the southern parcel. See Figure 2 for peak flow hydrologic calculation results. The proposed project will not add tributary area or increase the impervious area of the site, thereby not increasing the 50-year peak flow rate. Therefore, the construction of new storm water drainage facilities or expansion of existing facilities will not be required and will not cause significant environmental impacts.

2.2 SURFACE WATER QUALITY

Initial Study Checklist Questions and Answers

- VIII.a): Would the project violate any water quality standards or waste discharge requirements?
- Answer: The proposed project will be designed to comply with post-construction compliance with the LACDPW Hydrology Manual and the City of Los Angeles LID Ordinance. The project will include post-construction BMP's to treat pollutants therefore, it would not violate any water quality standards or waste discharge requirements.
- VIII.b): Would the project substantially deplete groundwater supplies or interfere substantially with ground water recharge such that there would be a net deficit in aquifer volume of a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?
- Answer: Geotechnologies, Inc. prepared a non-invasive geotechnical report on August 21, 2015. This report also included information that was based on nearby site investigations in close proximity to the project site. The locations of the sited reports are 1609 Sunset Boulevard and 1338 Ivar Avenue. Based on their findings, it has been estimated that groundwater will be encountered at a depth ranging between 41 and 66 feet below site grade. The historical groundwater level was established by review of Seismic Hazard Zone Report of the Hollywood

7 ¹/₂-Minute Quadrangle. Review of this plate indicates that the historically highest groundwater level is on the order of 50 to 60 feet below the ground surface. The proposed project specifies subterranean parking, which extends approximately 39 feet below the site grade, 41 feet at the elevator pits. It is not expected that groundwater would be encountered during construction that would require either temporary or permanent dewatering operations. However, if groundwater is encountered during construction, temporary pumps and filtrations would be utilized in compliance with the NPDES permit. The temporary system would comply with all relevant NPDES requirements related to construction and discharges from dewatering operations. Furthermore, there are no existing wells or spreading grounds within one mile of the Project Site and the Project would not include new injection or supply wells. Therefore, the construction operations and permanent structure will not substantially deplete groundwater supplies or interfere with ground water recharge such that there would be a net deficit in aquifer volume of a lowering of the local groundwater table level.

- VIII.c): Would the project substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?
- Answer: The existing project site is approximately 100-percent impervious. Existing storm water runoff from the northern parcel is conveyed by sheet flow from the sidewalk to the surrounding streets. Based on visual observation, there also appears to be curb drains along Ivar Avenue, Cahuenga Boulevard and Sunset Boulevard that allow storm water runoff from the roof to flow to the curb gutters. Storm water runoff on the southern parcel is conveyed by sheet flow, from northwest to southeast and into the existing alley. See Figure 1 for existing drainage pattern.

The proposed project will not add tributary area or increase impervious area, nor will it alter the existing drainage patterns of the site. In addition the project is regulated by the City of Los Angeles (City). City requirements include compliance with the State of California General Permit for storm water discharges during construction for projects with over one acre of land disturbance, and post-construction compliance with the Los Angeles County Department of Public Works (LACDPW) Hydrology Manual and the City of Los Angeles Low Impact Development (LID) Ordinance. However, since the project site is less than an acre, it will only implement erosion and sediment control BMP's during construction in order to prevent erosion and siltation. Therefore, the proposed project will not alter the existing drainage pattern resulting in substantial erosion or siltation. The impacts associated with the project on surface water hydrology are less than significant.

VIII.g): Would the project place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map? Answer: Based on the current Flood Insurance Rate Map (FIRM), the proposed project is in the areas determined to be outside the 0.2% annual chance floodplain, also known as Zone X, on the FIRM. Therefore, the project will not place housing within a 100-year flood hazard area. See Figure 4 for FEMA flood map.

2.3 GROUNDWATER LEVEL

Initial Study Checklist Questions and Answers

- VIII.b). Would the project substantially deplete groundwater supplies or interfere substantially with ground water recharge such that there would be a net deficit in aquifer volume of a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?
- Geotechnologies, Inc. prepared a non-invasive geotechnical report on August 21, Answer: 2015. This report also included information that was based on nearby site investigations in close proximity to the project site. The locations of the sited reports are 1609 Sunset Boulevard and 1338 Ivar Avenue. Based on their findings, it has been estimated that groundwater will be encountered at a depth ranging between 41 and 66 feet below site grade. The historical groundwater level was established by review of Seismic Hazard Zone Report of the Hollywood 7 ¹/₂-Minute Quadrangle. Review of this plate indicates that the historically highest groundwater level is on the order of 50 to 60 feet below the ground surface. The proposed project specifies subterranean parking, which extends approximately 39 feet below the site grade, 41 feet below at the elevator pits. It is not expected that groundwater would be encountered during construction that would require either temporary or permanent dewatering operations. However, if groundwater is encountered during construction, temporary pumps and filtrations would be utilized in compliance with the NPDES permit. The temporary system would comply with all relevant NPDES requirements related to construction and discharges from dewatering operations. Furthermore, there are no existing wells or spreading grounds within one mile of the Project Site and the Project would not include new injection or supply wells. Therefore, the construction operations and permanent structure will not substantially deplete groundwater supplies or interfere with ground water recharge such that there would be a net deficit in aquifer volume of a lowering of the local groundwater table level.
- VIII.f): Would the project otherwise substantially degrade water quality?
- Answer: The project will be designed to treat the storm water runoff from the site in accordance with the City LID Ordinance. The LID Ordinance sets forth a priority

system for method of storm water treatment. If the site is capable of implementing infiltration, all storm water will be treated prior to infiltration. If the site is not capable of infiltration, then storm water will be treated prior to a capture and use tank before being used for drip irrigation. If capture and use is not feasible, biofiltration BMP's will be implemented to treat storm water runoff. In any case, storm water runoff will be treated and the project will not substantially degrade water quality.

- VIII.g): Would the project place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?
- Answer: Based on the current Flood Insurance Rate Map (FIRM), the proposed project is in the areas determined to be outside the 0.2% annual chance floodplain, also known as Zone X, on the FIRM. Therefore, the project will not place housing within a 100-year flood hazard area. See Figure 4 for FEMA flood map.
- VIII.i): Would the project expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?
- Answer: Based on Inundation & Tsunami Hazard Area in Safety Element Exhibit G, the proposed project is located within a flood zone associated with the Mulholland Dam, see Figure 5. Although the site is mapped within an inundation zone, catastrophic failure of this dam is expected to be a very unlikely event in that dam safety regulations exist and are enforced by the Division of Safety of Dams (DSOD), Army Corps of Engineers (ACOE), and Department of Water Resources (DWR). Inspectors may require dam owners to perform work, maintenance or implement controls if issues are found with the safety of the dam. These dams are under continuous monitoring for safety against failure. Therefore, the risk of flooding due to failure of levee or dam is considered low and impacts are less than significant.
- VIII.j): Would the project inundation by seiche, tsunami, or mudflow?
- Answer: Based on the project geotechnical report "Preliminary Geotechnical Assesment-Proposed Mixed-Use Structure-6400 Sunset Boulevard, Los Angeles, California" prepared by Geotechnologies, Inc. on August 21, 2015, the site does not lie within the mapped tsunami inundation boundaries. However, the project site does lie within the mapped inundation boundaries of the Mulholland Dam. A review of the City Inundation and Tsunami Hazard Areas map (Figure 5) confirms the geotechnical report findings, indicating that the site lies within potential inundation boundaries due to a seiche or a breached upgradient reservoir. Although the site is mapped within an inundation zone, catastrophic failure of this dam is expected to be a very unlikely event in that dam safety regulations exist and are enforced by the Division of Safety of Dams (DSOD), Army Corps of Engineers (ACOE), and Department of Water Resources (DWR). Inspectors may require dam owners to perform work, maintenance or implement controls if issues are found with the safety of the dam. These dams are under continuous

monitoring for safety against failure. Therefore, the risk of flooding due to failure of levee or dam is considered low and impacts are less than significant.

2.4 GROUNDWATER QUALITY

Initial Study Checklist Questions and Answers

- VIII.g): Would the project place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?
- Answer: Based on the current Flood Insurance Rate Map (FIRM), the proposed project is in the areas determined to be outside the 0.2% annual chance floodplain, also known as Zone X, on the FIRM. Therefore, the project will not place housing within a 100-year flood hazard area. See Figure 4 for FEMA flood map.
- VIII.h): Would the project place within a 100-year flood hazard area structures, which would impede or redirect flood flows?
- Answer: Based on the current FIRM, the proposed project is in the areas determined to be outside the 0.2% annual chance floodplain on, also known as Zone 'X', on the FIRM. Therefore, the project would not place structures within a 100-year flood hazard area, thereby not impeding or redirecting flood flows. See Figure 4 for FEMA flood map.

3 PUBLIC UTILITIES

3.1 WASTEWATER

Initial Study Checklist Questions and Answers

- XVI.a): Would the project exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?
- Answer: The existing design capacity of the Hyperion Service Area is approximately 550 million gallons per day (MGD) (consisting of 450 MGD at the Hyperion Treatment Plant, 80 MGD at the Donald C. Tillman Water Reclamation Plant, Reclamation Plant, and 20 MGD at the Los Angeles–Glendale Water Reclamation Plant) and the existing average daily flow for the system is approximately 300 MGD. The project's proposed wastewater generation is approximately 0.024 MGD, comprising less than 0.01% of the available capacity in the system. Consequently, the project would not require the construction of new water or wastewater treatment facilities and impacts on wastewater treatment capacity are not significant.
- XVI.b): Would the project require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?
- Answer: The existing design capacity of the Hyperion Service Area is approximately 550 million gallons per day (MGD) (consisting of 450 MGD at the Hyperion

Treatment Plant, 80 MGD at the Donald C. Tillman Water Reclamation Plant, Reclamation Plant, and 20 MGD at the Los Angeles–Glendale Water Reclamation Plant)³ and the existing average daily flow for the system is approximately 300 MGD⁴. The project's proposed wastewater generation is approximately 0.024 MGD, comprising less than 0.01% of the available capacity in the system. Consequently, the project would not require the construction of new water or wastewater treatment facilities and impacts on wastewater treatment capacity are not significant.

- XVI.c): Would the project require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?
- Answer: Based on City record data, there is an existing 54-inch reinforced concrete pipe (RCP) that runs along Sunset Boulevard and continues onto North Cahuenga Boulevard as a reinforced concrete arch (RCA). The existing site, with approximately 100-percent impervious area, has a 50-year peak flow rate of 2.3 cubic feet per second (cfs) for the northern parcel and 0.51 cfs for the southern parcel. See Figure 2 for peak flow hydrologic calculation results. The proposed project will not add tributary area or increase the impervious area of the site, thereby not increasing the 50-year peak flow rate. Therefore, the construction of new storm water drainage facilities or expansion of existing facilities will not be required and will not cause significant environmental impacts.
- XVI.d): Would the project result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?
- Answer: Based on sewage generation factors provided by the Bureau of Sanitation (BOS), the proposed project will generate up to 24,370 gallons per day (GPD) of wastewater, tributary to both the 12-inch diameter vitrified clay pipe (VCP) in North Cahuenga Boulevard and the 12-inch diameter VCP in Ivar Avenue. A sewer capacity availability review (SCAR) has been submitted to BOS and the results confirmed that the existing public infrastructure can accommodate the project flow. See Figure 6 for SCAR results.

3.2 ENERGY

Initial Study Checklist Questions and Answers

³ City of Los Angeles Department of Public Works, Bureau of Sanitation, Water Reclamation Plants, https://www.lacitysan.org/san/faces/home/portal/s-lsh-wwd/s-lsh-wwd-cw/s-lsh-wwd-cw-p?_adf.ctrlstate=oep8lwkld_4&_afrLoop=28344654751341747#!, accessed October 2016.

⁴ City of Los Angeles Department of Public Works, Bureau of Sanitation, Sewer System Management Plan Hyperion Sanitary Sewer System, February 2015.

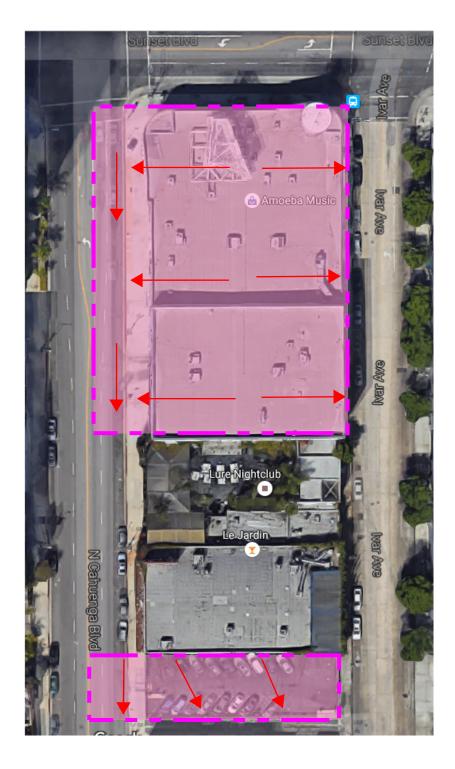

- VII.a): Would the project conflict with adopted energy conservation plans?
- Answer: With modern energy efficient construction materials and compliance with Title 24 standards, the proposed project would be consistent with the City's energy conservation standards and therefore would not conflict with adopted energy conservation plans.
- VII.b): Would the project use non-renewable resources in a wasteful and inefficient manner?
- Answer: Although future development would result in the irreversible use of renewable and non-renewable electricity resources during project construction and operation, which could limit future availability, the use of such resources would be consistent with growth expectations for LADWP's service area. It is expected that the Project will incorporate energy conservation features, comply with applicable regulations such as CALGreen and State energy standards under Title 24, and incorporate mitigation measures, as necessary. Therefore, the Project will not use resources wastefully.
- XII.a): Would the proposal result in a need for new systems, or substantial alterations to power or natural gas?
- Answer: According to substructure maps provided by the City of Los Angeles, there are existing gas lines within the project vicinity. There are 2-inch Southern California Gas (SCG) lines along Ivar Avenue, Cahuenga Boulevard and Sunset Boulevard. A will-serve letter, with proposed loads, has been sent to SCG to determine if there is sufficient capacity to serve the Project. The project will not require a new system or any substantial alterations to natural gas. The Project's impact on natural gas is less than significant. See Figure 7 for response from SCG.

There is an existing 4.5-inch diameter LADWP power service line within the Sunset Boulevard right-of-way. A will-serve letter, with proposed loads, has been sent to LADWP to determine if there is sufficient capacity to serve the project. The project will not require a new system or any substantial alterations to power. The Project's impact on power is less than significant. See Figure 7 for response from LADWP.

City of Los Angeles Bureau of Engineering

Sewer Capacity Availability Request (SCAR)

To: Bureau of Sanitation

The following request is submitted to you on behalf of the applicant requesting to connect to the public sewer system. Please verify that the capacity exists at the requested location for the proposed developments shown below. The results are good for 180 days from the date the sewer capacity approval from the Bureau of Sanitation.

Job Address:	6400 SUNSET BLVD	Sanitation Scar ID:	58-3327-1016
Date Submitted	10/21/2016	Request Will Serve Letter?	Yes
BOE District:	Central District		
Applicant:	MORGAN BELL		
Address:	6080 Center Drive Suite 700	City :	LOS ANGELES
State:	CA	Zip:	90045
Phone:	310 665-2800	Fax:

City of Los Angeles Bureau of Engineering

SEWER CAPACITY AVAILABILITY REVIEW FEE (SCARF) - Frequently Asked Questions

SCAR stands for Sewer Capacity Availability Review that is performed by the Department of Public Works, Bureau of Sanitation. This review evaluates the existing sewer system to determine if there is adequate capacity to safely convey sewage from proposed development projects, proposed construction projects, proposed groundwater dewatering projects and proposed increases of sewage from existing facilities. The SCAR Fee (SCARF) recovers the cost, incurred by the City, in performing the review for any SCAR request that is expected to generate 10,000 gallons per day (gpd) of sewage.

The SCARF is based on the effort required to perform data collection and engineering analysis in completing a SCAR. A brief summary of that effort includes, but is not limited to, the following:

- 1. Research and trace sewer flow levels upstream and downstream of the point of connection.
- 2. Conduct field surveys to observe and record flow levels. Coordinate with maintenance staff to inspect sewer maintenance holes and conduct smoke and dye testing if necessary.
- 3. Review recent gauging data and in some cases closed circuit TV inspection (CCTV) videos.
- 4. Perform gauging and CCTV inspection if recent data is not available.
- 5. Research the project location area for other recently approved SCARs to evaluate the cumulated impact of all known SCARs on the sewer system.
- 6. Calculate the impact of the proposed additional sewage discharge on the existing sewer system as it will be impacted from the approved SCARs from Item 6 above. This includes tracing the cumulative impacts of all known SCARs, along with the subject SCAR, downstream to insure sufficient capacity exist throughout the system.
- 7. Correspond with the applicant for additional information and project and clarification as necessary.
- 8. Work with the applicant to find alternative sewer connection points and solutions if sufficient capacity does not exist at the desired point of connection.

Questions and Answers:

1. When is the SCARF applied, or charged?

It applies to all applicants seeking a Sewer Capacity Availability Review (SCAR). SCARs are generally required for Sewer Facility Certificate applications exceeding 10,000 gpd, or request from a property owner seeking to increase their discharge thru their existing connection by 10,000 gpd or more, or any groundwater related project that discharges 10,000 gpd or more, or any proposed or future development for a project that could result in a discharge of 10,000 gpd.

2. Why is the SCARF being charged now when it has not been in the past? The City has seen a dramatic increase in the number of SCARs over 10,000 gpd in the last few years and has needed to increase its resources, i.e., staff and gauging efforts, to respond to them. The funds collected thru SCARF will help the City pay for these additional resources and will be paid by developers and property owners that receive the benefit from the SCAR effort.

3. Where does the SCARF get paid?

The Department of Public Works, Bureau of Engineering (BOE) collects the fee at its public counters. Once the fee is paid then BOE prepares a SCAR request and forwards it to the BOS where it is reviewed and then returned to BOE. BOE then informs the applicant of the result. In some cases, BOS works directly with the applicant during the review of the SCAR to seek additional information and work out alternative solutions

RE: Will Serve Letter Request for – Job I.D. #43-2016-10-00022 6400 W. Sunset Blvd

Dear Ms. Bell:

Thank you for inquiring about the availability of natural gas service for your project. We are pleased to inform you that Southern California Gas Company (SoCalGas) has facilities in the area where the above named project is being proposed. The service would be in accordance with SoCalGas' policies and extension rules on file with the California Public Utilities Commission (Commission) at the time contractual arrangements are made.

This letter should not be considered a contractual commitment to serve the proposed project, and is only provided for informational purposes only. The availability of natural gas service is based upon natural gas supply conditions and is subject to changes in law or regulation. As a public utility, SoCalGas is under the jurisdiction of the Commission and certain federal regulatory agencies, and gas service will be provided in accordance with the rules and regulations in effect at the time service is provided. Natural gas service is also subject to environmental regulations, which could affect the construction of a main or service line extension (for example, if hazardous wastes were encountered in the process of installing the line). Applicable regulations will be determined once a contract with SoCalGas is executed.

If you need assistance choosing the appropriate gas equipment for your project, or would like to discuss the most effective applications of energy efficiency techniques, please contact our area Service Center at 800-427-2200.

Thank you again for choosing clean, reliable, and safe natural gas, your best energy value.

Sincerely.

Morgan Bell kpff 6080 Center Drive, Suite 700 Los Angeles, CA 90045

Subject: 6400 Sunset Blvd KPFF Job #1500031

Dear Morgan Bell:

This is in response to your submittal regarding electric service for the proposed project located at the above address.

Electric Service is available and will be provided in accordance with the Los Angeles Department of Water and Power's (Department) Rules Governing Water and Electric Service. The availability of electricity is dependent upon adequate generating capacity and adequate fuel supplies. The estimated power requirement for this proposed project is part of the total load growth forecast for the City of Los Angeles and has been taken into account in the planned growth of the City's power system.

If you have any questions regarding this matter, please contact our design engineer Mr. Don Alecxih, at telephone number (213) 367-8019.

Sincerely,

Vineent ZABUGOURE/POL
