Household	40-500+	Household	85
Employee	50-500+	Employee	266

Description

Urban Mixed Use districts are exemplified by a variety of intense uses and building types. Typical buildings are between 10 and 40+ stories tall, with offices and/or residential uses and ground-floor retail space. Parking is usually structured below or above ground. Workers, residents, and visitors are well served by transit, and can walk or bicycle for many of their transportation needs.

Urban Residential

Total Net FAR	9.0		
Gross Density Range (per acre)		Average Density (per acre)	
Household	75-500+	Household	131
Employee	0-50+	Employee	44

Description

The most intense residential-focused type, Urban Residential areas are typically found within or adjacent to major downtowns. They include high- and mid-rise residential towers, with some ground-floor retail space. Parking usually structured below or above ground. Residents are well served by transit, and can walk or bicycle for many of their daily needs.

Urban Commercial

Total Net FAR	2.5		
Gross Density Range (per acre)		Average Density (per acre)	
Household	0.5-200+	Household	24
Employee	3-250+	Employee	69

Description

High Intensity Activity Centers include a mix of moderate to intense densities of retail, office, and residential uses. They are often anchored by major regional retail centers or office parks, and while they can contain a robust mix of uses, they are most often oriented within an auto-oriented and non-walkable street and land use pattern. Parking can be structured and/or provided on surface lots.

Mid Intensity Activity Center

Land Use Mix		Residential Mix	
Residential	23%	SF Large Lot	0%
Employment	64%	SF Small Lot	0%
Mixed Use	5%	Townhome	51%
Open Space/Civic	8%	MultiFamily	49%

Average Floors	1	Retail	0%
Floors Range	1 – 2	Industrial	100%
Total Net FAR	0.001		
Gross Density Range (per acre)		Average Density (per acre)	
Household	0-0.02	Household	0.01
Employee	0-0.05	Employee	0.01

Description

Rural Employment areas contain a variety of land uses, including working farms, ranches, agriculturally-supportive land uses, solar installations, oil fields, and gravel pits. While the rural context is automobile-oriented, and thus residents and employees are likely to drive for most trips, the low-intensity of land uses tends to keep traffic volumes low. Typical buildings are 1-2 stories tall.

Campus/University

Land Use Mix		Residential Mix	
Residential	32%	SF Large Lot	0%
Employment	2%	SF Small Lot	0%

Total Net FAR	1.7		
Gross Density Range (per acre)		Average Density (per acre)	
Household	1-50	Household	31
Employee	10-100	Employee	22

Description

College/University areas tend to be internally walkable, though they can be located in either a walkable or auto-oriented context. Buildings can range from 1 to 20+ stories, depending on the design of the campus. Parking may be plentiful or restricted; housing may be provided on-site in large amounts, or students may commute from homes in other locations.
