Subject: **Phase I Environmental Site Assessment**
Hollywood-Cahuenga Property
Los Angeles, California 90028
AEC Project No 19-158SD

Dear Mr. Law:

Advantage Environmental Consultants, LLC (AEC) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of American Society for Testing and Materials Practice E 1527-13 and 40 Code of Federal Regulations Part 312, of the Hollywood-Cahuenga Property located at 6381 Hollywood Boulevard and 1716-1726 N Cahuenga Boulevard in Los Angeles, California (Site). This ESA included public environmental agency and historical record reviews, interviews, site observations, and report preparation. This report includes AEC's findings, conclusions, recommendations, and supporting documentation.

We appreciate the opportunity to be of service on this project. If you should have any questions regarding this report, or if we can be of further assistance, please contact us at (760) 744-3363.

Sincerely,

ADVANTAGE ENVIRONMENTAL CONSULTANTS, LLC

Samantha Hopper
Project Manager

Daniel Weis, R.E.H.S.
Branch Manager

1.0 Introduction

1.1 Purpose

The purpose of this Phase I Environmental Site Assessment (ESA) prepared by Advantage Environmental Consultants, LLC (AEC) is to provide a professional opinion on the presence of recognized environmental conditions and other suspect environmental conditions in connection with the Site, as they existed on the date of the site inspection, and to recommend whether further investigation is required. American Society for Testing and Materials (ASTM) Standard Practice E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, defines good commercial and customary practice for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants pertinent to the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), as well as petroleum products. As such, this ESA is intended to satisfy one of the threshold criteria for satisfying the landowner liability protections to CERCLA liability assuming compliance with other elements of the defense. In other words, this ESA represents one of the practices that constitute “all appropriate inquiry” into the previous ownership and uses of the property consistent with good commercial or customary practice, as defined in 42 USC Section 9601(35)(B) and 40 CFR Part 312.

The goal of the process is to identify RECs, which are defined by the Practice as “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. The term recognized environmental condition includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

The term "environment" is defined in CERCLA 42 USC 9601(8) as "(A) the navigable waters, the water of the contiguous zone, and the ocean waters of which the natural resources are under the exclusive management authority of the United States under the Magnuson-Stevens Fishery conservation and Management Act, and (B) any other surface water, ground water, drinking water supply, land surface or subsurface strata, or ambient air within the United States or under the jurisdiction of the United States.

The term “release” means any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment (including the abandonment or discarding of barrels, containers, and other closed receptacles containing any hazardous substance or pollutant or contaminant), but excludes (A) any release which results in exposure to persons solely within a workplace, with respect to a claim which such persons may assert against the employer of such persons, (B) emissions from the engine exhaust of a motor vehicle, rolling stock, aircraft, vessel, or pipeline pumping station engine, (C) release of source, byproduct, or special nuclear material from a nuclear incident, as those terms are defined in the Atomic Energy Act of 1954 [42 U.S.C. 2011 et seq.], if such release is subject to requirements with respect to financial protection established by the Nuclear Regulatory Commission under section 170 of such Act [42 U.S.C. 2210], or, for the purposes of 42 USC 9604 or any other response action, any release of source byproduct, or special nuclear material from any processing

site designated under section 7912(a)(1) or 7942(a) of this title, and (D) the normal application of fertilizer.

1.2 Detailed Scope of Services

The Phase I ESA was conducted in accordance with generally accepted Phase I industry standards using ASTM Standard Practice E 1527-13, 40 Code of Federal Regulations (CFR) Part 312, and the Scope of Work proposed by AEC (Proposal Number P19-205SD) dated August 14, 2019. The following services were provided for this assessment:

- A review of title information pertaining to the Site.
- Review and summary of prior environmental documents pertaining to the Site.
- An evaluation of standard environmental record sources contained within Federal, State and local environmental databases within specific search distances.
- An evaluation of additional environmental record sources obtained from local regulatory departments/agencies.
- A qualitative evaluation of the physical characteristics of the Site through a review of published topographic, geologic, and hydrogeologic maps; published groundwater data; and area observations to characterize surface water flow in the Site area.
- An evaluation of past Site and adjacent/nearby property uses through a review of historical resources.
- A physical inspection of the Site (interior and exterior) conducted to search for conditions indicative of potential environmental concerns including underground storage tanks (USTs), aboveground storage tanks (ASTs), associated tank piping; stained soil or pavement; equipment that may contain or have historically contained polychlorinated biphenyls (PCBs); and other potential environmental concerns as defined in the ASTM E 1527-13 standard.
- A physical assessment of indications of past uses and visual observations of adjacent and surrounding properties (from curbside or public spaces) to assess potential impacts to the Site.
- Interviews completed with the client, a representative of the Site owner and a local regulatory official.
- The preparation of this Phase I ESA report, which includes the findings of the study and our opinion regarding their level of significance. Conclusions have been drawn based on the significance levels of the findings with subsequent recommendations provided.

1.3 Significant Assumptions

This Phase I ESA was conducted in accordance with ASTM guidelines, CFR Part 312, and the Scope of Work proposed by AEC (Proposal Number P19-205SD) dated August 14, 2019 for the performance of such assessment. No other warranties either express or implied, are made by

AEC. AEC's evaluations, analyses, and opinions should not be taken as representations regarding subsurface conditions or the actual value of the Site. Subsurface conditions may differ from the conditions implied by the surficial observations, and can only be reliably evaluated through intrusive techniques.

Documentation and data provided by the client, designated representatives, other interested third parties, or from the public domain, and referred to in the preparation of this assessment, are assumed to be complete and correct and have been used and referenced with the understanding that AEC assumes no responsibility or liability for their accuracy. AEC's conclusions are based upon such information and documentation and on our observations of Site conditions, as they existed on the date of the site inspection. Because Site conditions may change significantly over a short period of time and additional data may become available, data reported and conclusions drawn in this report are limited to current conditions and may not be relied upon on a significantly later date.

1.4 Limitations and Exceptions

Reasonable efforts have been made during this assessment to uncover evidence of USTs, ASTs and ancillary equipment associated with such features. "Reasonable efforts" are limited to information gained from visual observation of unobstructed areas, recorded database information held in public record, and available information gathered from interviews. Such methods may not identify subsurface equipment that may have been hidden from view due to paving, construction or debris pile storage, or incorrect information from sources.

This investigation was not an environmental compliance audit. While some observations and discussion in this report may address conditions and/or operations that may be regulated, the regulatory compliance of those conditions and/or operations is outside the scope of this investigation. Nothing in this report constitutes a legal opinion or legal advice. For information regarding specific individual or organizational liability, AEC recommends consultation with independent legal counsel.

According to 40 CFR Part 312, Standards and Practices for All Appropriate Inquiry: Final Rule, CERCLA liability rests with the owner or operator of a property and not with an environmental professional hired by the prospective landowner and who is not involved with the ownership or operation of the property. This report meets the requirements set forth in 40 CFR Part 312 Standards and Practices for All Appropriate Inquiries; Final Rule. However, in order to qualify for certain landowner liability protections under CERCLA. Bona Fide Prospective Purchasers, Contiguous Property Owners, and/or Innocent Landowners must meet additional requirements of CERCLA (42 U.S.C. 9601 (35)(B)).

This ESA does not address non-scope ASTM considerations including asbestos, lead-based paint, radon gas, mold, lead in drinking water, wetlands, protected environments and habitat, industrial hygiene concerns, indoor air quality (unrelated to releases of hazardous substances and petroleum products) and high voltage power lines.

1.5 Special Terms and Conditions

No special terms and conditions between AEC and the client pertinent to the findings of this ESA or methodology used to complete this assessment are noted. In addition, AEC does not have a financial interest in the Site.

1.6 User Reliance

This report was prepared for use solely and exclusively by the client and its lender (Fifth Third Bank) and is not for the use or benefit of, nor may it be relied upon by, any other person or entity for any purpose without the advance written consent of AEC. AEC makes no representation to any third party except that it has used the degree of care and skill ordinarily exercised by a reasonable prudent environmental professional in the same community and in the same time frame given the same or similar facts and circumstances. No other use or disclosure is intended or authorized by AEC. In the preparation of this ESA, AEC has used the degree of care and skill ordinarily exercised by a reasonably prudent environmental professional in the same community and in the same time frame given the same or similar facts and circumstances. No other warranties are made to any third party, either express or implied.

2.0 Site Description

2.1 Location and Legal Description

The Site is located at 6381 Hollywood Boulevard and 1716-1726 N Cahuenga Boulevard in Los Angeles, California. The Site is a reported 1.12 acres in size and is further identified by County of Los Angeles Assessor's Parcel Numbers 5546-005-006, -007 and -029. A Vicinity Map depicting the general location of the Site is included in Section 11.1.

2.2 Site and Vicinity General Characteristics

The Site and its adjacent/nearby properties are situated in densely developed Hollywood community of the City of Los Angeles. The general area is comprised of commercial properties and parking lots.

2.3 Current Use of the Site

The Site is currently occupied by multiple commercial office tenants at 6381 Hollywood Boulevard. The first floor and basement of this building were formerly occupied by a bank. The 1716 N Cahuenga Boulevard building is occupied by Sharky's Woodfired Mexican Grill (front area). The rear area of this building (former night club) is used as general storage by tenants of the 6381 Hollywood Boulevard. The 1724 N Cahuenga Boulevard building is also used as general storage by tenants of the 6381 Hollywood Boulevard building. The Site is also occupied by two parking lots.

2.4 Description of Structures, Roads, Other Improvements on the Site

The Site is currently developed with three commercial buildings. The 6381 Hollywood Boulevard portion of the Site is developed with a seven-story commercial office building (including a basement) of concrete and steel construction. The building was reportedly constructed in 1922. The 1716 N Cahuenga Boulevard portion of the Site is developed with a single-story restaurant and storage building of brick construction on a concrete slab-on-grade foundation and was reportedly constructed in 1930. The 1724 N Cahuenga Boulevard portion of the Site is developed with a three-story commercial building of brick construction on a concrete slab-on-grade and was reportedly constructed in 1915. The Site also includes asphalt paved parking lots, landscaping and a perimeter fence along the northern and eastern Site boundaries. Access to the Site is provided by driveways from N Cahuenga Boulevard. Electricity, potable water and sanitary sewer service is provided to the area by the City of Los Angeles. Natural gas is supplied to the area by the Southern California Gas Company. A Site Plan is included in Section 11.2. Photographs taken of the Site are included in Section 11.3.

2.5 Current Uses of the Adjoining Properties

The area surrounding the Site consists generally of commercial properties. AEC performed a visual inspection of adjoining properties from adjacent sidewalks and other access points. The following table identifies the adjacent property uses:

Direction	Adjoining Property Use
North	Parking lot and commercial properties
South	Hollywood Boulevard, then commercial properties
East	Commercial properties
West	N Cahuenga Boulevard, then commercial properties and a parking lot

No significant environmental concerns to the Site relative to the adjacent properties were noted.

3.0 User Provided Information

3.1 Title Records

AEC reviewed a preliminary title report pertaining to the Site prepared by First American Title Company dated August 6, 2019. The report indicated that the Site is currently vested in SPBB, LLC, an Oklahoma limited liability company (6381 Hollywood and 1716 N Cahuenga) and 1724 Cahuenga, LLC, an Oklahoma limited liability company (1724-26 N Cahuenga). No environmentally related liens, deed restrictions or activity and use limitations pertaining to the Site were noted in the title report and during research completed with the County of Los Angeles Assessor's and Recorder's offices. In addition, the client is unaware of such encumbrances recorded against the Site.

3.2 Environmental Liens or Activity and Use Limitations

The client is unaware of environmental related liens or activity use limitations (i.e. engineering or institutional controls) that are related to potential environmental issues at the Site.

3.3 Specialized Knowledge

The client is unaware of specialized knowledge pertinent to potential recognized environmental conditions at the Site.

3.4 Commonly Known or Reasonably Ascertainable Information

The client is unaware of commonly known or reasonably ascertainable information pertinent to potential recognized environmental conditions at the Site.

3.5 Valuation Reduction for Environmental Issues

The client is unaware of information pertaining to the relationship of the purchase price to the estimated fair market value of the Site that might indicate that significant contamination exists.

3.6 Owner, Property Manager, and Occupant Information

The Site is owned by SPBB, LLC (6381 Hollywood and 1716 N Cahuenga) and 1724 Cahuenga, LLC (1724-26 N Cahuenga). As stated previously, the Site is currently occupied by multiple commercial office tenants at 6381 Hollywood Boulevard. The first floor and basement of this building were formerly occupied by a bank. The 1716 N Cahuenga Boulevard building is occupied by Sharky's Woodfired Mexican Grill (front area). The rear area of this building (former night club) is used as general storage by tenants of the 6381 Hollywood Boulevard. The 1724 N Cahuenga Boulevard building is also used as general storage by tenants of the 6381 Hollywood Boulevard building. The Site is also occupied by two parking lots.

3.7 Reason for Performing Phase I ESA

AEC has been retained to conduct this Phase I ESA to identify environmental issues which may be present at the Site and in connection with the planned acquisition and future redevelopment of the Site. It is our understanding that the historic building at 6381 Hollywood Boulevard would remain in place. All other Site improvements would be demolished and a four to five level underground parking structure excavated to facilitate construction of a new 10 to 12 story high-rise building.

3.8 Prior Environmental Documents

Phase I Environmental Site Assessment, 6381 Hollywood Boulevard and 1716-1720 North Cahuenga Boulevard, Los Angeles, California, dated June 8, 2007.

A review of historic research documents indicated the Site had been partially developed since at least 1907. The report indicated a historic use in the northwest portion of the 1720 N Cahuenga Boulevard portion of the Site as a dry cleaning facility in the 1930s to 1940s as recognized environmental concern. Other noteworthy conditions identified in the report included the presence multiple healthcare related offices which likely used or generated hazardous materials and waste, the possible presence of a former gasoline station in the southwest corner of the Site (6381 Hollywood), the presence of light ballasts that may contain polychlorinated biphenyls and the Site listings on the HAZNET database for the generation of photo processing chemicals. The report also noted that the current seven-story (6381 Hollywood) Site building in the southern portion of the Site (located in the area of the possible former gasoline station) includes a 15 foot basement. Due to the basement, the report concluded the presence of USTs at the Site was considered unlikely. The report concluded that no additional investigation was warranted for the light ballasts, former gasoline service station, HAZNET listings or healthcare related offices. The report recommended additional investigation should be conducted in the vicinity of the former dry cleaning facility.

Lead-based Paint Survey, 6381 Hollywood Boulevard and 1716-1720 North Cahuenga Boulevard, Los Angeles, California, dated June 21, 2007.

AEC reviewed a lead based paint (LBP) survey which indicated the presence of lead paint on both the 6381 Hollywood and 1716 N Cahuenga buildings. Six samples from the 6381 Hollywood building contained lead greater than 0.5% by weight. The samples were collected from the northern exterior wall and the basement. An estimated 4,500 square feet of exterior wall contained lead paint with approximately 450 square feet in poor condition. The report also indicated an estimated 18,000 square feet of lead paint is located in the basement with approximately 900 square feet in poor condition. One sample from the 1716-20 N Cahuenga building contained lead paint above 0.5% by weight. The report estimated 1,500 square feet of lead paint with approximately 20 square feet in poor condition. The report concluded that a comprehensive LBP survey should be conducted prior to any renovations, alterations or demolition to the Site buildings.

Results of Soil Vapor Intrusion Investigation Conducted at 1718 North Cahuenga Boulevard, Los Angeles, California, dated June 22, 2007.

Nine borings were advanced to an approximate depth of five feet below ground surface (bgs) at the Site on June 15, 2007, in the vicinity of the a former dry cleaning facility (reported historical address of 1718 N Cahuenga) using a truck-mounted direct push drill rig. The former cleaners was reportedly located in the northwestern area of the existing parking log located north of the

Sharky's Restaurant. Twelve soil gas samples were collected from the borings which included three purge volume samples and a field duplicate. The samples were analyzed using United States Environmental Protection Agency (EPA) Test Method 8260 for volatile organic compounds (VOCs). What were considered to be trace concentrations of tetrachloroethene (PCE) were detected in samples SV-1-5' (three and seven purge volumes), SV-2-5', SV-4-5' and SV-5-5'. The maximum concentration of PCE was 0.16 micrograms per liter ($\mu\text{g/L}$). Additionally, low levels of ethylbenzene and xylenes were detected in one or more samples with maximum concentrations of 0.28 $\mu\text{g/L}$ and 1.0 $\mu\text{g/L}$, respectively. None of the detected VOC concentrations were noted as being elevated above applicable screening levels at the time of the assessment. Since the time the soil vapor samples were obtained in 2007, human health risk based screening levels pertaining to VOCs in soil vapor have changed and become substantially more conservative. With this being said, some of the detected PCE and ethylbenzene concentrations reported in 2007 would now be considered to be elevated above current residential and/or commercial screening levels. Regardless, because the majority of the Site is to be excavated to facilitate construction of a four to five level underground parking garage (including in the area of the reported former cleaners), the historical reporting of what are still considered to be relatively low levels of VOCs in soil vapor at the Site is not considered to be of significant environmental concern relative to the current and anticipated future land use of the Site.

4.0 Records Review

4.1 Standard Environmental Record Sources

AEC reviewed Federal and State environmental databases provided by EDR of Shelton, Connecticut for information pertaining to documented and/or suspected releases of regulated hazardous substances and/or petroleum products within specified search distances. A copy of the EDR report is included in Section 11.4.

AEC also reviewed unmappable sites listed in the environmental database report by cross-referencing addresses and site names. Unmappable sites are sites that cannot be plotted with confidence, but can be located by zip code or city name. In general, a site cannot be mapped because of inaccurate or missing location information in the record provided by the regulatory agency. Any unmappable sites that AEC identifies within the specified search radii were evaluated as part of the preparation of this report.

The following Federal databases related to potential on-site and off-site sources of contamination were reviewed and interpreted by AEC:

Federal Databases	Search Distance From Site
National Priorities List (NPL)	One mile
Delisted NPL	One mile
Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)	One-half mile
CERCLIS No Further Remedial Action Planned (NFRAP)	One-half mile
Resource Conservation and Recovery Act (RCRA) CORRACTS Hazardous Waste Treatment, Storage and Disposal (TSD) Facilities	One mile
RCRA non-CORRACTS Hazardous Waste TSD Facilities	One-half mile
RCRA Hazardous Waste Generators (RCRA GEN)	One-eighth mile
Emergency Response Notification System (ERNS)	One-eighth mile
Federal Institutional/Engineering Control Registries (IC/EC)	One-half mile

The following State/local databases related to potential on-site and off-site sources of contamination were also searched and reviewed:

State/Local Databases	Search Distance From Site
State-equivalent NPL and CERCLIS (RESPONSE and ENVIROSTOR)	One mile
State Voluntary Cleanup Sites (VCP)	One-half mile
State Landfill and/or Solid Waste Disposal Sites (SWF/LF)	One-half mile
State Leaking Storage Tank (LUST, SLIC, SAM)	One-half mile
State Registered Storage Tank (UST, AST)	One-eighth mile

Descriptions/sources of each of the above referenced regulatory databases and the dates these databases were last updated by the applicable regulatory agencies are included in the EDR report.

Subject Site

The Site is not listed on any standard regulatory databases searched by EDR.

Adjoining and Nearby Properties

Several listings were mapped in the standard regulatory databases within one-eighth-mile of the Site. The table below presents a summary of the listed facility and an opinion regarding the potential impact to the Site.

Listed Property and Address	Database(s)	Mapped Distance and Direction From Site	Details	Significant Concern To Site?
Bob Smith BMW Volkswagen, Porsche, Audi 1750 N Cahuenga	RCRA-GEN SLIC UST	0.016-mile NNW	Referenced as a small quantity generator of hazardous waste with no reported violations. "Completed-Case Closed" case status as of 8/1/2003.	No
1713 N Cahuenga Blvd	UST	0.016-mile W	Referenced on the UST database with no reported releases.	No
Doubledied, LLC 1741 Ivar	UST	0.027-mile NE	Referenced on the UST database with no reported releases.	No
1717 Ivar	UST	0.029-mile E	Referenced on the UST database with no reported releases.	No
1754 N Cahuenga Blvd	UST	0.046-mile N	Referenced on the UST database with no reported releases.	No
1755 Ivar St	UST	0.047-mile NE	Referenced on the UST database with no reported releases.	No
CVS Pharmacy #9624 1747 N Cahuenga Blvd	RCRA-GEN	0.054-mile NNW	Referenced as a large quantity generator of hazardous waste with no reported violations.	No
Bob Smith Mitsubishi, Porsche, Audi 1751 N Cahuenga	UST	0.057-mile NNW	Referenced on the UST database with no reported releases.	No
1761 Ivar Ave	UST	0.059-mile NNE	Referenced on the UST database with no reported releases.	No
1759 N Cahuenga	UST	0.063-mile NNW	Referenced on the UST database with no reported releases.	No
1754 Ivar Ave	UST	0.066-mile NE	Referenced on the UST database with no reported releases.	No
6376 Yucca St	UST	0.070-mile N	Referenced on the UST database with no reported releases.	No
6420 W Hollywood Blvd	ERNS	0.071-mile WSW	Referenced with a release of raw sewage into a basement. The release was cleaned and the affected pipeline was repaired.	No
6334 Yucca St	UST	0.087-mile NE	Referenced on the UST database with no reported releases.	No
La Hollywood regional Library 1623 Ivar Ave	RCRA-GEN	0.098-mile SSE	Referenced as a large quantity generator of hazardous waste with no reported violations.	No

Listed Property and Address	Database(s)	Mapped Distance and Direction From Site	Details	Significant Concern To Site?
1760 N Wilcox Ave	UST	0.099-mile NW	Referenced on the UST database with no reported releases.	No
6434 Yucca St	UST	0.105-mile NW	Referenced on the UST database with no reported releases.	No
1800 N Cahuenga Blvd	UST	0.114-mile N	Referenced on the UST database with no reported releases.	No
Unocal #0823 1803 N Cahuenga Blvd	LUST UST	0.119-mile NNW	"Completed-Case Closed" case status as of 10/20/1997.	No
1622-24 N Wilcox Ave	UST	0.120-mile SW	Referenced on the UST database with no reported releases.	No
1815 N Cahuenga Blvd	UST	0.123-mile NNW	Referenced on the UST database with no reported releases.	No
1810 N Cahuenga Blvd	UST	0.123-mile NNW	Referenced on the UST database with no reported releases.	No

The properties listed in the table above are not considered to be significant environmental concerns to the Site. In addition, several properties mapped between one-eighth to one-mile from the Site also appear on various regulatory databases (18 ENVIROSTOR, 13 LUST and five SLIC). These properties are also not considered to be significant environmental concerns to the Site. These opinions are based on several factors including the nature of the regulatory database listings, distance of the off-Site listed properties from the Site, orientation of the listed properties relative to the Site, interpreted direction of groundwater flow, and/or regulatory case status information for the various properties as described in the database.

Non-ASTM Database Reviews

Below is a list of non-ASTM databases searched by EDR and reviewed by AEC during the preparation of this assessment. The descriptions of each database and their data release frequency are included in the EDR report, included in Section 11.4.

Local Brownfield Lists

US BROWNFIELDSDS - A Listing of Brownfields Sites

Local Lists of Landfill / Solid Waste Disposal Sites

- DEBRIS REGION 9 - Torres Martinez Reservation Illegal Dump Site Locations
- ODI - Open Dump Inventory
- WMUDS/SWAT - Waste Management Unit Database
- SWRCY - Recycler Database
- HAULERS - Registered Waste Tire Haulers Listing

Local Lists of Hazardous Waste / Contaminated Sites

- US CDL - Clandestine Drug Labs
- HIST Cal-Sites - Historical Calsites Database
- SCH - School Property Evaluation Program
- Toxic Pits - Toxic Pits Cleanup Act Sites
- CDL - Clandestine Drug Labs
- US HIST CDL - National Clandestine Laboratory Register

Local Lists of Registered Storage Tanks

SWEEPS UST – SWEEPS UST Listing
HIST UST – Hazardous Substance Storage Container Database
CA FID UST – Facility Inventory Database

Local Land Records

LIENS 2 - CERCLA Lien Information
LIENS - Environmental Liens Listing
DEED - Deed Restriction Listing

Records of Emergency Release Reports

HMIRS - Hazardous Materials Information Reporting System
CHMIRS - California Hazardous Material Incident Report System

Non-ASTM Database Listings

The Site was listed on the HAZNET non-ASTM database as Scarlet Letters at 6381 Hollywood Boulevard. The listings refer to the generation of hazardous wastes in the form of photo processing chemicals. None of the database listings for the Site are indicative of releases of hazardous substances or petroleum products.

There are multiple off-Site properties (eight CERS HAZ WASTE and seven RCRA NonGen/NLR) listed on the non-ASTM databases. Such properties are not considered to be significant environmental concerns to the Site. This opinion is based on several factors including distance of the off-Site listed properties from the Site, orientation of the listed properties relative to the Site, interpreted direction of groundwater flow and/or regulatory case status information (i.e. “closed case”) for the various properties as described in the database report.

4.2 Additional Environmental Record Sources

California State Water Resources Control Board (Geotracker)

AEC searched for information regarding a possible release at the Site on the Geotracker database maintained by the California Water Resources Control Board. No release cases were identified during the Geotracker search of the Site. Listings for nearby properties are consistent with information included in the EDR regulatory database report.

Los Angeles Fire Department (LAFD) – UST Request

AEC requested to review public records maintained by the LAFD pertaining to hazardous materials and USTs. No records were on file for the Site with the LAFD.

Los Angeles Department of Building and Safety

AEC reviewed records for the Site from the Los Angeles Department of Building and Safety. No permits pertaining to USTs, hazardous materials or other potential environmental concerns were noted during the records review.

4.4.3 Physical Setting Sources

The following physical setting sources were reviewed to provide information about the topographic, hydrologic, geologic and/or hydrogeologic characteristics of the Site.

4.3.1 Topography and Hydrology

USGS Topographic Quadrangle

The Site is depicted on the USGS topographic map for the Hollywood, California 7.5 minute quadrangle (2018). The Site is shown on the map as being relatively level and located at an elevation of approximately 390 feet above mean sea level. Regional topography is shown as sloping to the south and southwest. The Site is situated in an area of dense development. Streets/roadways bordering the Site are shown in their current configurations.

Hydrology/Storm Water Management

Surface drainage at the Site is facilitated by nearby municipal storm drains along public roadways and maintained by the City of Los Angeles. The Site does not appear to receive significant drainage from off-Site properties.

4.3.2 Geology

The Site lies within the Peninsular Ranges Geologic Province of California. This geomorphic province is traversed by a group of northwest trending sub-parallel fault zones and encompasses an area that extends 125 miles from the Transverse Ranges and the Los Angeles Basin south to the Mexican Border and beyond another 775 miles to the tip of Baja California. Rocks within the Peninsular Range Province were emplaced during Cretaceous age orogenic events and uplifted into the present mountain ranges during the late Tertiary and Quaternary. Igneous, metamorphic and sedimentary rocks are all found within the Peninsular Ranges. The area is seismically active, with several known active faults crossing the Province. The Site is located in the western coastal plain section of the Peninsular Ranges. According to geologic map sources, the Site is underlain by Holocene to late Pleistocene aged young alluvial fan deposits which are characterized as unconsolidated to slightly consolidated, undissected to slightly dissected boulder, cobble, gravel, sand and silt deposits issued from a confined valley or canyon. In addition, per a geotechnical study pertaining to the Site, there is known artificial/undocumented fill material present in upper soils at the Site. Such a condition is common in the Los Angeles region and depending on the contents of such material (i.e. presence of debris, etc.), could represent a development related

constraint relative to the off-haul and disposal of soil during construction of the planned underground parking garage.

4.3.3 Hydrogeology

According to the Water Quality Control Plan for the Los Angeles Basin, the Site is located within the Coastal Plain of Los Angeles-Central Hydrologic Sub-Area of the Los Angeles Hydrologic Area of the Los Angeles River Hydrologic Unit (RWQCB, 1994). Groundwater in the Coastal Plain of Los Angeles-Central Hydrologic Sub-Area has existing beneficial uses for municipal, industrial, process supply and agriculture purposes. Groundwater beneath the Site is expected to be present at a depth greater than 30 feet below the ground surface with an anticipated flow direction to the southwest.

4.3.4 Radon Zone

The Site is located within US EPA Radon Zone 2 which has a moderate potential for radon accumulation with an indoor average level between 2 and 4 picoCuries per liter (pCi/L). Therefore, radon is not considered to be a significant concern at the Site.

4.4 Historical Use Information

Historical sources (as described in the following sections) were reviewed to develop a history of the previous uses of the Site and adjacent/nearby properties to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the Site.

4.4.1 Fire Insurance Maps

AEC reviewed fire insurance maps provided by EDR for the years of 1907, 1913, 1919, 1950, 1955, 1960, 1961, 1962, 1966, 1969 and 1970. A copy of the fire insurance maps is provided in Section 11.5. The results of the map review are summarized in the following table:

Fire Insurance Map Review	
Year	Observations
1907	<p>SITE: Four offices are depicted along the southern Site boundary. The majority of the Site is depicted as vacant and undeveloped.</p> <p>SURROUNDING AREA: Dwellings are depicted to the west. A church and lodging are depicted to the south. A library and vacant land are depicted to the east. Vacant land is depicted to the north. Streets/roadways are depicted in their current configurations. Hollywood Boulevard is labeled as E Prospect Avenue to the south.</p>
1913	<p>SITE: The Site is depicted with an office in the southwest corner and a building labeled "garage" in the center of the Site.</p> <p>SURROUNDING AREA: The surrounding properties appear similar to the previous map. The southern adjacent property is depicted as stores. Hollywood Boulevard is depicted to the south.</p>

Fire Insurance Map Review	
Year	Observations
1919	<p>SITE: The Site is depicted with six buildings, four labeled as auto parking garages and an office and a building labeled “Station” in the southwestern portion of the Site.</p> <p>SURROUNDING AREA: The eastern adjacent properties are depicted as dwellings and shops. The northern adjacent property is depicted as an automotive garage. The eastern adjacent properties are depicted as dwellings and a post office. The southern adjacent properties are depicted as shops.</p>
1950 and 1955	<p>SITE: The Site is depicted with multiple buildings labeled “rest” in the middle of the Site, “Hollywood Security Bldg” in the southern portion of the Site, stores, offices and auto parking in the northern portion of the Site.</p> <p>SURROUNDING AREA: The southern adjacent properties are similar to the previous map. The western adjacent properties are depicted as stores, a restaurant and auto parking. The northern adjacent property is depicted as auto sales and repair. The eastern adjacent properties are depicted as stores, a clinic, auto washing/auto service, gas and oil and auto parking. The eastern adjacent property is not labeled as a clinic on the 1955 map.</p>
1960, 1961, 1962, 1966, 1969 and 1970	<p>SITE: The Site is depicted with three buildings and auto parking similar to the current configuration.</p> <p>SURROUNDING AREA: The surrounding properties appear to be similar to the previous map. The northern adjacent property is labeled “studio rentals” and “auto sales”.</p>

4.4.2 Aerial Photographs

AEC reviewed aerial photographs for the years 1948, 1952, 1954, 1964, 1972, 1980, 1989, 1994, 2003, 2004, 2005, 2009, 2010, 2012, 2014 and 2016 via online resources. The results of the aerial photograph review are summarized in the following table:

Aerial Review	
Year	Observations
1948-1954	<p>SITE: The Site appears to be developed with five commercial structures including the three current Site buildings at the Site.</p> <p>SURROUNDING AREA: The surrounding properties appear to be developed for commercial purposes and parking lots.</p>
1964	<p>SITE: The Site is developed with four commercial structures (center and southern portions) and a parking lot (northern portion).</p> <p>SURROUNDING AREA: The surrounding area appears similar to the previous photograph.</p>
1972-1994	<p>SITE: The Site is developed with three commercial structures and two parking lots, similar to the current configuration.</p> <p>SURROUNDING AREA: The surrounding area appears similar to the previous photograph. The eastern adjacent properties appear to be developed for commercial purposes similar to the current configuration.</p>
2003-2016	<p>SITE: The Site appears in its current configuration with three commercial buildings and two parking lots.</p> <p>SURROUNDING AREA: The surrounding area appears similar to their current configurations with commercial properties and parking lots surrounding the Site.</p>

4.4.3 City Directories

AEC reviewed historical city directory listings provided by EDR for the Site dating from 1924 through 2014. The current addresses of 6381 Hollywood Boulevard and 1716-1726 N Cahuenga Boulevard in Los Angeles, California are listed with various offices, restaurants and general commercial listings from 1924 to 2014. Historical Site addresses between 1716 and 1720 N Cahuenga Boulevard date back to 1937 through 2014 are associated with commercial/retail uses that are not considered to be significant environmental concerns to the Site. Adjacent listings are associated with general commercial uses and are not considered to be significant environmental concerns to the Site. A copy of the city directory report is provided in Section 11.7.

4.4.4 State of California Division of Oil and Gas Records

According to online resources provided by the California Department of Conservation, Division of Oil, Gas and Geothermal Resources, there are no oil, gas or geothermal wells located on the Site or its adjacent properties.

5.0 Site Reconnaissance

The objective of the Site reconnaissance was to obtain information indicating the likelihood of recognized environmental conditions in connection with the Site. The reconnaissance was conducted by Ms. Samantha Hopper of AEC's Western Regional office on September 11, 2019. Ms. Hopper was escorted by the building porter Mr. Hector Moran during the Site reconnaissance.

5.1 Methodology and Limiting Conditions

The Site reconnaissance consisted of walking the Site and along public sidewalks (for viewing of adjacent/nearby properties). Full access to the 1716 and 1724 N Cahuenga Boulevard buildings, exterior grounds and interior commons areas was provided. In addition, AEC was granted access to a representative number of tenant spaces within the 6381 Hollywood Boulevard building. As stated previously, a Site Plan is included in Section 11.2. Photographs of the Site were taken to document existing Site conditions and are included and described in Section 11.3.

5.2 General Site Setting

The Site and its adjacent/nearby properties are situated in densely developed Hollywood community of the City of Los Angeles. The general area is comprised of commercial properties and parking lots. The Site is currently occupied by multiple commercial office tenants at 6381 Hollywood Boulevard. The first floor and basement of this building were formerly occupied by a bank. The 1716 N Cahuenga Boulevard building is occupied by Sharky's Woodfired Mexican Grill (front area). The rear area of this building (former night club) is used as general storage by tenants of the 6381 Hollywood Boulevard. The 1724 N Cahuenga Boulevard building is also used as general storage by tenants of the 6381 Hollywood Boulevard building. The Site is also occupied by two parking lots.

5.3 Site Observations

AEC examined visible and accessible portions of the Site for evidence of the following potential environmental concerns:

Conditions	Not Observed or Noted	Observed or Noted	Significant Environmental Concern?
Hazardous Substances/Petroleum Products		X	No
Waste Generation/Storage/Disposal	X		
ASTs		X	No
USTs	X		
PCB Containing Equipment	X		
Chemical/Petroleum Odors	X		
Pools of Liquid	X		
Floor Drains/Sumps/Wells		X	No
Drums		X	No
Stains or Corrosion	X		
Unidentified Substance Containers	X		
Stained Soil or Pavement	X		
Stressed Vegetation	X		
Pits, Ponds or Lagoons	X		

Conditions	Not Observed or Noted	Observed or Noted	Significant Environmental Concern?
Wastewater Discharges/Disposal Systems	X		
Septic Systems/Cesspools	X		
Non-Hazardous Solid Waste Disposal Areas		X	No
Drinking Water Systems/Water Wells	X		
Other Wells		X	No

The noted items in the table above are discussed below:

Hazardous Substances/Petroleum Products – AST and Drums

Retail sized containers of cleaning products, paint, and general maintenance products were noted at the Site. A fire pump and associated 50 gallon diesel fuel containing AST was observed in the basement of the 6381 Hollywood Boulevard building. Water treatment chemicals were also noted near the rooftop cooling tower of the 6381 Hollywood Boulevard building. Additionally, a 50-gallon drum of a water treatment chemical was also noted near the cooling tower on the roof. All containers were properly labeled and no suspect conditions were noted (i.e. staining, odors, etc.) were noted in the vicinity of such containers.

Floor Drains/Sumps/Wells

Several exterior area drains and interior floor drains are present at the Site. No suspect conditions were noted in these areas.

Non-Hazardous Solid Waste Disposal Areas

Trash dumpsters are located in the alley ways and parking lots between the Site buildings. No suspect conditions or evidence unauthorized dumping were noted in the dumpster areas.

Other Wells

AEC noted a patched boring at the Site, likely from a prior geotechnical investigation.

6.0 Interview Information

6.1 Interview With Owner

The Site is owned by SPBB, LLC (6381 Hollywood Boulevard and 1716 N Cahuenga Boulevard) and 1724 Cahuenga, LLC (1724-26 N Cahuenga Boulevard). The Site owners are unaware of significant environmental concerns in connection with the Site.

6.2 Interview With Site Manager

The Site owners are also considered to be the Site Managers. Please refer to Section 6.1 above.

6.3 Interviews With Occupants

The building porter Mr. Hector Moran was interviewed during the Site reconnaissance. Mr. Moran was unaware of significant environmental concerns in connection with the Site. No other occupants were interviewed as part of this assessment, which is not considered to be a significant data gap.

6.4 Interview With Local Government Official

During the preparation of this assessment, AEC consulted with various regulatory agencies regarding availability of public records.

6.5 Interview With Others

No interviews with other persons knowledgeable of the historical use of the Site were conducted during the preparation of this ESA.

7.0 Findings, Opinions, Conclusions and Recommendations

Advantage Environmental Consultants, LLC has performed a Phase I Environmental Site Assessment, in conformance with the scope and limitations of ASTM Practice E 1527-13 and 40 CFR Part 312 of the Hollywood-Cahuenga property located at 6381 Hollywood Boulevard and 1716-1726 N Cahuenga Boulevard in Los Angeles, California. Any exceptions to, or deletions from, this practice are described in Section 8.0 of this report.

This assessment has revealed no evidence of current recognized environmental conditions in connection with the Site. The former presence of a reported gasoline station (southwestern area of the Site in the existing basement area of 6381 Hollywood Boulevard) and a reported drycleaning business (northwest portion of the 1720 N Cahuenga Boulevard portion of the Site) are considered to be historical recognized environmental conditions that do not require additional evaluation. Additional environmental assessment at the Site is not considered to be warranted at this time.

8.0 Deviations and Data Gaps

The oldest historical resource reviewed during the preparation of this assessment was a fire insurance map from 1907, which showed the Site as being developed with offices. The lack of review of historical sources dating back to a time when the Site was undeveloped is considered a data gap as defined by ASTM E 1527-13 but does not alter AEC's conclusions and recommendations regarding the Site.

No deviations data gaps of significance as defined in the ASTM E 1527-13 standard are noted.

10.0 Signatures and Qualifications of Environmental Professionals

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 CFR 312.10. I have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject Site. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Daniel Weis, R.E.H.S.
Branch Manager
Western Regional Office

Qualifications for the environmental professionals involved in the performance of the Phase I ESA are included in Section 11.7.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-LQG site within approximately 0.125 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
CVS PHARMACY # 9624 EPA ID:: CAR000237693	1747 N CAHUENGA BLVD	NNW 0 - 1/8 (0.054 mi.)	C13	15

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 2 RCRA-SQG sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/29/2019 has revealed that there are 18 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 14 LUST sites within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 6 CPS-SLIC sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 17 UST sites within approximately 0.125 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are

EXECUTIVE SUMMARY

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there are 7 RCRA NonGen / NLR sites within approximately 0.125 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the RGA LUST list, as provided by EDR, has revealed that there are 26 RGA LUST sites within approximately 0.5 miles of the target property.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

- Waste code: D001
- Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
- Amount (Lbs): 854

- Waste code: D002
- Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
- Amount (Lbs): 116

- Waste code: D007
- Waste name: CHROMIUM
- Amount (Lbs): 72

- Waste code: D009
- Waste name: MERCURY
- Amount (Lbs): 287

- Waste code: D010
- Waste name: SELENIUM
- Amount (Lbs): 72

- Waste code: D024

The Business Activities, Owner/Operator Identification, Hazardous
Materials Inventory, Site Map, Emergency Response/Contingency Plan and
Employee Training Plan sections were reviewed in CERS and field
verified. Review and correct any violations indicated previously in
this report, on or before the COMPLY BY date associated with each
violation. NOTE: The LAMC, Sections (L.A.M.C. SECTION 57.105.1.4;
57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store,
use or handle hazardous materials in the City of Los Angeles to obtain
a Consolidated Permit from the Los Angeles Fire Department CUPA ****
Annual submission of a Hazardous Materials Business Plan into CERS is
required between January 1 and March 1 of every year. Please remember
that any change in inventory of greater than 100 percent will require
new submission within 30 days of that change. As a reminder, you must
complete all the [Truncated]

occupied the site since 1943. The 3,400 square-foot building contains a dry cleaning machine in the rear of the building. Based on the information submitted, the subsurface soil and groundwater at the site have been mainly impacted with volatile organic compounds (VOCs). Depth to groundwater was encountered in December 2007 between 22 and 25 feet below ground surface. Perchloroethylene (PCE), trichloroethene (TCE) 1,2dichloroethene (1,2-DCE) and 1,3-dichloropropene (1,3-DCP) were detected in soil matrix and underlying groundwater. The peak concentration of the main contaminant, PCE, in groundwater was 9,400 micrograms per liter (µg/L) on December 26, 2007. The releases of chemicals from dry cleaning operations at the site have degraded the groundwater quality and beneficial uses of the State's waters

Lead Agency: LOS ANGELES RWQCB (REGION 4)
Lead Agency Case Number: Not reported
Latitude: 34.0946610731753
Longitude: -118.326382935047
Case Type: Cleanup Program Site
Case Worker: CL
Local Agency: Not reported
RB Case Number: 1186
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water), Soil, Soil Vapor, Under Investigation
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE), Benzene
Site History: Paragon cleaners is located on the northeast corner of the intersection of Vine Street and Fountain Avenue. Ground water has been impacted by the contaminant PCE due to operations at the dry cleaners. The dry cleaner has been in operation since 1961, and in 2006, switched to "green" chemicals. The site owner has been issued a Cleanup and Abatement Order (CAO) from the state for assessment and cleanup.

(PEA) for the proposed Central Los Angeles High School No. 1 site
(aka Metromedia)

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 07/02/2002
Comments: DTSC has determined that all appropriate response actions have been completed, that all acceptable engineering practices were implemented and that no further removal/remedial action is necessary, specific only to the removal around the underground storage tank. Additional sampling will be conducted post- demolition near on-site hydraulic elevators and residential structures. For Arsenic only. FA for hydraulic elevators and lead

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/11/2019	Source: EPA
Date Data Arrived at EDR: 04/18/2019	Telephone: N/A
Date Made Active in Reports: 05/14/2019	Last EDR Contact: 07/02/2019
Number of Days to Update: 26	Next Scheduled EDR Contact: 10/14/2019
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/11/2019

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/11/2019

Next Scheduled EDR Contact: 10/28/2019
Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 04/11/2019	Source: EPA
Date Data Arrived at EDR: 04/18/2019	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: (415) 495-8895
Date Made Active in Reports: 04/17/2019	Last EDR Contact: 06/26/2019
Number of Days to Update: 21	Next Scheduled EDR Contact: 10/07/2019

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: (415) 495-8895
Date Made Active in Reports: 04/17/2019	Last EDR Contact: 06/26/2019

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: (415) 495-8895
Date Made Active in Reports: 04/17/2019	Last EDR Contact: 06/26/2019
Number of Days to Update: 21	Next Scheduled EDR Contact: 10/07/2019
	Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2019	Telephone: (415) 495-8895

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 02/22/2019	Source: Department of the Navy
Date Data Arrived at EDR: 03/07/2019	Telephone: 843-820-7326
Date Made Active in Reports: 04/17/2019	Last EDR Contact: 05/10/2019
Number of Days to Update: 41	Next Scheduled EDR Contact: 08/26/2019
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/31/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/04/2019	Telephone: 703-603-0695
Date Made Active in Reports: 03/08/2019	Last EDR Contact: 05/29/2019
Number of Days to Update: 32	Next Scheduled EDR Contact: 09/09/2019
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/31/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/04/2019	Telephone: 703-603-0695

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Number of Days to Update: 34	Next Scheduled EDR Contact: 10/07/2019
	Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Number of Days to Update: 35	Next Scheduled EDR Contact: 10/14/2019
	Data Release Frequency: Semi-Annually

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 03/04/2019	Source: DTSC and SWRCB

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

11.7 Qualifications of the Environmental Professionals

Advantage Environmental Consultants, LLC

ENVIRONMENTAL DUE DILIGENCE AND REMEDIATION SPECIALISTS

SAMANTHA HOPPER Project Manager

EDUCATION

Hawaii Pacific University, Honolulu, HI (2010)
Bachelor of Science- Environmental Science

PROFESSIONAL REGISTRATIONS, LICENSES, AND CERTIFICATIONS

- 40-Hour OSHA HAZWOPER (29 CFR 1910.120)

PROFESSIONAL SUMMARY AND EXPERIENCE

During her educational experience, Ms. Hopper completed numerous environmental research projects pertaining to environmental cost-benefit analysis, sustainability and Hawaiian water quality. She has assisted with the completion of numerous Phase I Environmental Site Assessments on vacant, agricultural, multi-family, commercial, and industrial properties and has a strong working knowledge of ASTM standards for the completion of such assessments. Ms. Hopper is also experienced in the completion ground water monitoring/sampling. She is very proficient in researching and interpreting historical and regulatory information (i.e. aerial photographs; fire insurance, topographic, soil, and geologic maps; and regulatory database reports) pertaining to properties of varying land uses.

DANIEL A. WEIS, R.E.H.S.
Branch Manager – Western Regional Office

EDUCATION

- Bachelor of Arts - University of Delaware, Newark, DE (1995)
- Master of Science – Public Health, San Diego State University, San Diego, CA (1998)

PROFESSIONAL REGISTRATIONS, LICENSES, AND CERTIFICATIONS

- Registered Environmental Health Specialist #8172 in the State of California
- OSHA 40-hour Hazardous Waste Operations Worker and Supervisor Certifications and Annual Refreshers

PROFESSIONAL SUMMARY

Mr. Weis is the branch manager of AEC's western regional office based in the City of San Marcos, San Diego County, California. He has 20 years of experience in the environmental sciences and consulting fields and is supported by Professional Geologists, Engineers and other technical team members of AEC staff. His responsibilities at AEC include client development and management, project management, technical oversight and quality control for assessment, remediation and construction oversight services, project staffing, and office financial management. Mr. Weis also completes technical services (including field activities) required of select projects completed by AEC. He has a proven ability to manage multiple personnel and technical projects, negotiate with regulatory agencies and maintain strong and trusting client relationships. Such clientele include but are not limited to local government entities, developers (affordable housing and market rate), Federal government entities, law firms, architectural and engineering firms, commercial lending institutions, conservancies, commercial/industrial real estate owners/managers, insurance companies, wireless telecommunication carriers and other real estate developers. He is also very experienced in the completion of assessment, construction and remediation quality assurance during the completion of urban redevelopment/brownfields projects, many of which have been located in downtown areas of San Diego, Los Angeles, Oakland, San Francisco, and other urban communities throughout the State of California.

PROFESSIONAL EXPERIENCE SUMMARY

Mr. Weis has completed or managed over 2,000 due diligence related environmental assessments and has completed or managed over 500 subsurface environmental investigations of soil gas, soil, groundwater and other media. Such investigations have also included human health and ecological risk assessments, evaluations of indoor air conditions based on interpretations of subsurface conditions, underground storage tank (UST) evaluation/closure and hazardous waste characterization/management. Subsurface activities performed include the completion of soil borings using various drilling technologies, soil and groundwater sampling, installation and sampling of groundwater monitoring wells, free product evaluations, exploratory trenching and real-time delineation using mobile analytical laboratories and other soil screening technology. Assets evaluated include industrial, commercial, residential, agricultural and vacant land sites throughout the State of California and numerous additional states of the Nation, with many of the assessments completed under the regulatory oversight of local environmental regulatory agencies, the California

Regional Water Quality Control Boards (RWQCBs) and the California Environmental Protection Agency Department of Toxic Substances Control (DTSC). Mr. Weis has also conducted and/or managed hundreds of public/environmental health related assessments including electromagnetic field surveys, radionuclide surveys, indoor air quality investigations, radon surveys, drinking water assessments, asbestos containing materials (ACM) and lead-based paint (LBP) surveys and mold/microbial evaluations.

Mr. Weis has managed over 100 remediation or construction management related projects primarily related to source removal of subsurface contaminants including but not limited to petroleum hydrocarbons, chlorinated solvents, heavy metals, organochlorine pesticides and other agricultural related chemicals, dioxins and furans and polychlorinated biphenyls (PCBs). Cost effective solutions and various remedial action options are provided prior to remedial action implementation. He is very proficient in developing remediation cost estimates and evaluating multiple remedial strategies on specific projects and conducting budget tracking to ensure the accuracy of such estimates during remedial implementation. Mr. Weis also assists clients with the preparation of contractor bid specifications, contractor bid and change order reviews for such projects, contractor agreements and project status reports/updates and has conducted presentations to client personnel, regulatory agencies and/or the public pertaining to such remediation related projects. He has also assisted numerous clients in cost recovery efforts from private parties and State/Federal funding programs for environmental assessment and remediation work and has served as an expert witness during legal proceedings (including mediation and jury trial settings) pertaining to environmental related claims. Site specific project descriptions and information is available upon request. Client references are also available upon request.

SPECIFIC PROJECT EXPERIENCE

- 14th and Island, San Diego, California – Development of Site Mitigation Plan, contaminated soil management and disposal concurrent with site construction activities at the superblock construction site in downtown San Diego and achievement of regulatory closure with the County of San Diego Department of Environmental Health.
- 2198 Market Street, San Francisco, California – Phase I and II Environmental Site Assessments, supplemental subsurface investigation, Site Mitigation Plan development, contaminated soil management and disposal concurrent with site construction activities and negotiation/achievement of regulatory closure with the City of San Francisco Department of Public Health.
- Former EZ Serve, 9305 Mission Gorge Road, Santee, California – Closure report preparation and San Diego Regional Water Quality Control Board interface and negotiation/achievement of regulatory closure under State of California low-threat policy.
- French Field – Former Vista Burn Dump, Oceanside, California – Oversight of the capping of a former burn dump/landfill facility and restoration for public use as a sports facility. Negotiation and achievement of regulatory closure with the California Department of Toxic Substances Control with concurrence from the San Diego Regional Water Quality Control Board and the County of San Diego Local Enforcement Agency.
- Indoor Skydiving Facility, 1401 Imperial Avenue, San Diego, California – Development of Soil Management Plan and contaminated soil management and disposal concurrent with site construction activities in downtown San Diego.

- Lemon Grove Avenue Realignment Project, Lemon Grove, California – Development of Impacted Soil Management Plan, Community Health and Safety Plan and Worker Health and Safety Plan and oversight of the implementation of such plans during construction activities.
- North Side Interior Road and Utilities Project at San Diego International Airport, San Diego, California - Subsurface assessment, development of Soil Management Plan and Work Health and Safety Plan and implementation and monitoring of soil management strategies.
- Olympic and Hill, Los Angeles, California – Removal of multiple underground storage tanks and underlying contaminated soil and achievement of regulatory closure with the City of Los Angeles Fire Department.
- San Ysidro - U.S. Land Port of Entry, San Diego, California – Subsurface assessment and development and implementation of soil management strategies.
- Tabata Ranch Site, Carlsbad, California – Development of Soil Management Plan and Community Health and Safety Plan, completion of soil removal action of petroleum hydrocarbon impacted soil, oversight and management of selective reuse and replacement of pesticide impacted soil and subsequent export of inert soils and achievement of regulatory closure with the County of San Diego Department of Environmental Health. Consent to discharge inert soils at an off-site receiving location was granted by the San Diego Regional Water Quality Control Board.
- VA Medical Center Long Beach, 5901 East 7th Street, Long Beach, California - VA Long Beach: Seismic Corrections – Mental Health, Community Living Center and Chiller Replacements Project – Asbestos containing materials and lead-based paint surveys and preparation of abatement contractor bid specifications.
