

DEPARTMENT OF CITY PLANNING

RECOMMENDATION REPORT

City Planning Commission

Date: April 23, 2020
(Continued from March 12, 2020)

Time: after 8:30 a.m.

Place: In conformity with the Governor's Executive Order N-29-20 (March 17, 2020) and due to concerns over COVID-19, the CPC meeting will be conducted entirely telephonically by Zoom [<https://zoom.us/>].

The meeting's telephone number and access code access number will be provided no later than 72 hours before the meeting on the meeting agenda published at <https://planning.lacity.org/about/commissions-boards-hearings> and/or by contacting cpc@lacity.org

Case No.: CPC-2019-4908-DB-SPR

CEQA No.: ENV-2019-4909-CE

Incidental Cases: N/A

Related Cases: N/A

Council No.: 15 – Buscaino

Plan Area: San Pedro

Plan Overlay: San Pedro Community Plan Implementation Overlay (“CPIO”)

Certified NC: Central San Pedro

GPLU: Neighborhood Commercial

Zone: C2-1XL-CPIO

Applicant: RKD 13 PAC., LP

Representative: Burns & Bouchard, Inc.

Public Hearing: January 16, 2020

Appeal Status: Off-Menu Density Bonus not appealable per LAMC. Site Plan Review appealable to City Council

Expiration Date: June 30, 2020

Multiple Approval: Yes

PROJECT LOCATION: **1309-1331 South Pacific Avenue**
(legally described as Lots 11-14; Block: 13; Rudecinda Tract)

PROPOSED PROJECT: The project is the construction of a 4-story, 45-foot and 5-inch tall residential building comprised of 102 dwelling units (including 12 Very Low Income units). The project will be approximately 83,158 square feet in floor area with a Floor Area Ratio (“FAR”) of 2.65:1. The project will provide 127 parking spaces in 2 subterranean levels. The site is currently improved with 3 vacant commercial structures, with 26 trees on the subject site and 4 trees along the public right-of-way, all of which will be removed to clear the lot. The project will also involve the grading of approximately 2,500 cubic yards of soil.

REQUESTED ACTION:

1. Pursuant to California Environmental Quality Act (“CEQA”) Guidelines, an Exemption from CEQA pursuant to State CEQA Guidelines, Article 19, Section 15332 (Class 32), and that there is no substantial evidence demonstrating that an exception to a categorical exemption pursuant to CEQA Guidelines, Section 15300.2 applies.
2. Pursuant to Los Angeles Municipal Code (“LAMC”) Section 12.22 A.25(g)(3), a **Density Bonus Compliance Review** to permit the construction of a project totaling 102 dwelling units, including 12 dwelling units for Very Low Income Household occupancy for a period of 55 years, with the following requested three (3) On- and Off-Menu Incentives:

- a. A 2.65:1 FAR in lieu of the 1.5:1 otherwise permitted by the C2-1XL-CPIO Zone and San Pedro Community Plan Implementation Overlay ("CPIO") Section IV-2.B;
 - b. A 20 percent reduction in the required open space, to allow 8,831 square feet in lieu of the 10,950 square feet otherwise required by LAMC Section 12.21 G; and
 - c. A 5-foot rear yard setback in lieu of the 16 feet otherwise required by the C2-1XL-CPIO Zone.
3. Pursuant to LAMC Section 12.22 A.25(g)(3), the following one (1) Waiver of Development Standards:
 - a. A 45-foot and 5-inch building height in lieu of the 30 feet otherwise permitted by the C2-1XL-CPIO Zone and CPIO Section IV-2.A.2.
4. Pursuant to LAMC Section 16.05, a **Site Plan Review** for a development project which creates, or results in an increase of, 50 or more dwelling units.

RECOMMENDED ACTIONS:

1. **Determine**, that based on the whole of the administrative record, the project is exempt from CEQA pursuant to State CEQA Guidelines, Article 19, Section 15332 (Class 32), and that there is no substantial evidence demonstrating that an exception to a categorical exemption pursuant to CEQA Guidelines, Section 15300.2 applies.
2. **Approve a Density Bonus Compliance Review** for a project totaling 102 dwelling units and reserving 15 percent of the base dwelling units, or 12 dwelling units, for Very Low Income Household occupancy for a period of 55 years, with the following **three (3) On- and Off-Menu Incentives**:
 - a. A 2.65:1 FAR in lieu of the 1.5:1 otherwise permitted by the C2-1XL-CPIO Zone and San Pedro Community Plan Implementation Overlay ("CPIO") Section IV-2.B;
 - b. A 20 percent reduction in the required open space, to allow 8,831 square feet in lieu of the 10,950 square feet otherwise required by LAMC Section 12.21 G; and
 - c. A 5-foot rear yard setback in lieu of the 16 feet otherwise required by the C2-1XL-CPIO Zone.
3. **Approve** the following **one (1) Waiver of Development Standard**:
 - a. A 45-foot and 5-inch building height in lieu of the 30 feet otherwise permitted by the C2-1XL-CPIO Zone and CPIO Section IV-2.A.2.
4. **Approve a Site Plan Review** for a development project which creates, or results in an increase of, 50 or more dwelling units.
5. **Adopt** the attached Findings.

VINCENT P. BERTONI, AICP
Director of Planning

Faisal Roble, Principal City Planner

Michelle Singh, Senior City Planner

Connie Chauv, City Planner
Telephone: (213) 978-0016

ADVICE TO PUBLIC: *The exact time this report will be considered during the meeting is uncertain since there may be several other items on the agenda. Written communications may be mailed to the *Commission Secretariat, Room 273, City Hall, 200 North Spring Street, Los Angeles, CA 90012* (Phone No. 213-978-1300). While all written communications are given to the Commission for consideration, the initial packets are sent to the week prior to the Commission's meeting date. If you challenge these agenda items in court, you may be limited to raising only those issues you or someone else raised at the public hearing agendized herein, or in written correspondence on these matters delivered to this agency at or prior to the public hearing. As a covered entity under Title II of the Americans with Disabilities Act, the City of Los Angeles does not discriminate on the basis of disability, and upon request, will provide reasonable accommodation to ensure equal access to these programs, services and activities. Sign language interpreters, assistive listening devices, or other auxiliary aids and/or other services may be provided upon request. To ensure availability of services, please make your request not later than three working days (72 hours) prior to the meeting by calling the Commission Secretariat at (213) 978-1300.

PROJECT ANALYSIS

Note: The subject case was previously scheduled for a City Planning Commission meeting on March 12, 2020. However on March 11, 2020, in response to public health and safety concerns regarding the novel coronavirus pandemic known as COVID-19, Governor Newsom and state public health officials announced that gatherings should be postponed or canceled across the state until at least the end of March, and that non-essential gatherings must be limited to no more than 250 people, while smaller events can proceed only if the organizers can implement social distancing of 6 feet per person. Therefore, out of an abundance of caution the City Planning Commission continued the case to April 23, 2020 until such measures could be implemented.

PROJECT SUMMARY

The proposed project is the construction of a 4-story, 45-foot and 5-inch tall residential building comprised of 102 dwelling units (including 12 Very Low Income units). The project will be approximately 83,158 square feet in floor area with a Floor Area Ratio ("FAR") of 2.65:1. The project will provide 127 parking spaces in 2 subterranean levels, in addition to 81 long-term and 8 short-term bicycle parking spaces.

The residential units are located on all floors, and will comprise 53 studios, 19 one-bedroom units, and 30 two-bedroom units. The primary building entrance is located along Pacific Avenue, and ground-floor street-facing units will have individual entrances from the sidewalk. Residential amenities are provided in the form of a recreation room, gym, and dog care room at the ground floor; open-air landscaped courtyard at the second floor; and roof decks. Vehicular access is proposed from one driveway along 14th Street. No commercial space is proposed.

The site is currently improved with 3 vacant commercial structures built between 1924 and 1940. There are approximately 26 non-protected trees on the subject site and 4 non-protected trees along the public right-of-way. All existing structures and trees will be removed to clear the lot. The project will also involve the grading of approximately 2,500 cubic yards of soil and export of approximately 20,000 cubic yards of soil.

BACKGROUND

Subject Property

The project site is located at the northwestern corner of the intersection of Pacific Avenue and 14th Street in the San Pedro Community Plan area, approximately one-half mile west of the harbor. The project site consists of four (4) lots totaling approximately 31,521 square feet, with approximately 210 feet of frontage along the west side of Pacific Avenue and 150 feet of frontage along the north side of 14th Street. The site is currently improved with three (3) vacant commercial structures built between 1924 and 1940 and related surface parking.

Zoning and Land Use Designation

The project site is located in the San Pedro Community Plan, and is designated for Neighborhood Commercial land uses, with corresponding zones of C1, C1.5, C2, C4, R3, and RAS3. The site is zoned C2-1XL-CPIO, and is consistent with the land use designation. Height District No. 1XL limits Floor Area Ratio ("FAR") to 1.5:1 and building height to 30 feet. The property is located in the Harbor Gateway State Enterprise Zone, and Pacific Corridor Redevelopment Project Area. The site is also located within the San Pedro Community Plan Implementation Overlay ("CPIO") District Coastal Commercial A Subarea (Subarea No. 150). The CPIO contains additional

regulations for ground floor and building height, density, floor area, building disposition, building design, and parking.

Surrounding Uses

The surrounding area is developed with a combination of primarily multi-family residential and commercial uses, with some single-family residential uses, and are also within the San Pedro CPIO. Properties along Pacific Avenue are zoned C2-1XL-CPIO and serve as a commercial corridor, with uses to the north including auto repair, a ballet school, furniture store, and flower shop; to the south is a 3-story multi-family residential building, light industrial, auto upholstery and repair, and dollar tree store; and across Pacific Avenue to the east is check cashing, donut shop, mini market, laundry, printing, auto repair, restaurant, and car wash. The properties to the west of the subject site are zoned RD1.5-1XL-CPIO and improved with multi-family residential buildings up to three stories in height and single-family ranging from one to two stories in height. The site is within 500 feet of the 15th Street Elementary School.

Streets and Circulation

Pacific Avenue, abutting the property to the west, is a designated Modified Avenue II, with a designated right-of-way width of 80 feet and roadway width of 56 feet, and is currently dedicated to an 80-foot right-of-way width and 55 foot roadway width, with a curb, gutter, and sidewalk.

14th Street, abutting the property to the south, is a designated Local Street – Standard, which is required to have a designated right-of-way width of 60 feet and roadway width of 36 feet, and is currently dedicated to a 60-foot right-of-way width and 40-foot roadway width, with a curb, gutter, and sidewalk.

Public Transit

The project is within 400 feet of a bus stop located at the intersection of Pacific Avenue and 15th Street, which serves the Los Angeles County Metropolitan Transit Authority (“Metro”) Silver Line and 246 bus lines. The surrounding area is served by several other bus lines including the Metro 550 bus line, and Los Angeles Department of Transportation (“LADOT”) DASH San Pedro and Commuter Express 142 bus lines.

Relevant Cases and Building Permits

Subject Site:

Building Permit No. 19010-10000-05596. On December 23, 2019, a Building Permit was filed for the new 4-story, 120-unit, Type III-A apartment building over 2 levels of Type I-A subterranean parking. The permit is pending and not issued at the time of preparing this report.

Case No. ADM-2018-7267-TOC: On December 20, 2018, the Department of City Planning completed the administrative review for a Transit Oriented Communities Tier Verification Form. The form expired on June 17, 2019.

Surrounding Sites:

The following relevant cases were identified to be within one-half mile of the subject site:

Case No. CPC-2019-4884-CU-DB-SPR (2111-2139 South Pacific Avenue). On August 16, 2019, an application was filed for a Density Bonus Compliance Review, Conditional

Use, and Site Plan Review, for a new 4-story, 45-foot and 5-inch tall mixed-use building consisting of 100 dwelling units (including 11 Very Low Income units) and approximately 1,997 square feet of ground-floor retail, with incentives for: 1) increased building height to 45 feet and 5 inches and four stories, 2) increased FAR to 3.26:1, and 3) parking reduction to allow 61 residential parking spaces, in addition to a 47 percent increase in density.

REQUESTED ACTIONS

Density Bonus / Affordable Housing Incentives Program

In accordance with California State Law (including Senate Bill 1818, and Assembly Bills 2280, 2222, and 2556), the applicant is proposing to utilize LAMC Section 12.22 A.25 (Affordable Housing Incentives – Density Bonus) to set aside 12 dwelling units for Very Low Income household occupancy for a period of 55 years. Because the applicant is providing 15 percent of base dwelling units to be affordable for Very Low Income household occupancy, the project is eligible for three (3) Density Bonus Incentives.

On- and Off-Menu Incentives

As a result of setting aside 15 percent (12 dwelling units) of the base 79 dwelling units as Restricted Affordable Units for Very Low Income Households, the applicant requests three (3) On- and Off-Menu Density Bonus Incentives, as follows:

- a. A 2.65:1 FAR in lieu of the 1.5:1 otherwise permitted by the C2-1XL-CPIO Zone and San Pedro Community Plan Implementation Overlay (“CPIO”) Section IV-2.B; and
- b. A 20 percent reduction in the required open space, to allow 8,831 square feet in lieu of the 10,950 square feet otherwise required by LAMC Section 12.21 G.
- c. A 5-foot rear yard setback in lieu of the 16 feet otherwise required by the C2-1XL-CPIO Zone;

Waivers of Development Standards

As mentioned above, a project that provides 15 percent of its base units for Very Low Income Households qualifies for three (3) Incentives, but may request other “waiver[s] or reduction[s] of development standards that will have the effect of physically precluding the construction of a development meeting the [affordable set-aside percentage] criteria of subdivision (b) at the densities or with the concessions or incentives permitted under [State Density Bonus Law]” (Government Code Section 65915(e)(1)), in conjunction with a Density Bonus Project. Given that the project is utilizing all three (3) Density Bonus Incentives, the applicant requests one (1) Waiver of Development Standards, as follows:

- a. A 45-foot and 5-inch building height in lieu of the 30 feet otherwise permitted by the C2-1XL-CPIO Zone and CPIO Section IV-2.A.2.

Housing Replacement

Pursuant to Government Code Section 65915(c)(3) and Assembly Bills 2222 and 2556, applicants of Density Bonus projects filed as of January 1, 2015 must demonstrate compliance with the housing replacement provisions which require replacement of rental dwelling units that either exist at the time of application of a Density Bonus project, or have been vacated or demolished in the five-year period preceding the application of the project. This applies to all pre-existing units that have been subject to a recorded covenant, ordinance, or law that restricts rents to levels affordable to persons and families of lower or very low income; subject to any other form of rent or price control; or occupied by Low or Very Low Income Households. The project is subject to

any replacement affordable units required by the Los Angeles Housing and Community Investment Department (HCIDLA) pursuant to AB 2556. Refer to the Density Bonus Legislation Background section of this determination for additional information.

Site Plan Review

In accordance with LAMC Section 16.05, the applicant has requested Site Plan Review for a development project that creates or results in an increase of 50 or more dwelling units. Given the site contains no residential units, and the project proposes 79 new base dwelling units, the project results in a net increase of 79 base dwelling units on the subject site.

ISSUES

Parking / Traffic / Transit Proximity

Staff received one (1) phone call from a stakeholder expressing concern for the lack of parking in the existing neighborhood, causing nearby residents to park along the street. The stakeholder requested that the proposed project provide additional parking for a rate of 2 parking spaces per unit, to address the lack of parking in the neighborhood. At the public hearing, several other stakeholders expressed concern for the lack of parking proposed and potential increase in traffic congestion.

The Applicant has requested to utilize a parking reduction granted by-right under Density Bonus Parking Option 1 LAMC Section 12.22 A.25(d)(1). Density Bonus Parking Option 1 requires parking spaces at the following ratios: 1 space per unit containing 0 to 1 bedrooms, 2 spaces per unit containing 2 to 3 bedrooms, and 2.5 space per unit containing 4 or more bedrooms. The project provides 72 studios and one-bedroom units, and 30 two-bedroom units, and is therefore required to provide a total of 132 parking spaces. The Bicycle Parking Ordinance, LAMC Section 12.21.A.4, allows affordable residential projects to reduce required vehicle parking by 10 percent, in this case, a reduction of 13 vehicular parking spaces, to provide 119 vehicular parking spaces. The applicant is requesting only a 4 percent reduction of 5 vehicular parking spaces, to provide a total of 127 vehicular parking spaces for the project.

The project is within 400 feet of a bus stop located at the intersection of Pacific Avenue and 15th Street, which serves the Los Angeles County Metropolitan Transit Authority ("Metro") Silver Line and 246 bus lines. The surrounding area is served by several other bus lines including the Metro 550 bus line, and Los Angeles Department of Transportation ("LADOT") DASH San Pedro and Commuter Express 142 bus lines.

Lastly, as provided in Exhibit D to the staff report, the traffic study prepared by Linscott Law & Greenspan, dated September 26, 2019 analyzed the proposed project and determined that the project is forecast to generate a net increase of 372 daily trip ends during a typical weekday, 38 vehicle trips during the weekday a.m. peak hour, and 25 vehicle trips during the weekday p.m. peak hour. The traffic analysis accounts for ambient growth factors based on a 1.0 percent annual growth and in addition to trips resulting from other development projects that are located within the study area. The Department of Transportation (LADOT) reviewed the traffic study and confirmed its findings in a memo dated October 22, 2019, confirming that none of the study intersections would be significantly impacted by project-related traffic. Therefore, the project will not have any significant impacts relating to traffic.

Height/Massing

The applicant has requested a Waiver of Development Standard for increased building height, to allow the proposed 45-foot and 5-inch tall building. The site is zoned C2-1XL-CPIO and within

Height District No.1XL, which restricts building height to 30 feet. The project would be allowed an 11-foot height increase for a maximum 41-foot building height through an On-Menu Incentive under the Density Bonus program. However, as stated by the applicant's representative at the public hearing, the project required additional height requiring a Waiver of Development Standard due to the 14 foot Ground Floor height requirement of the CPIO.

Stakeholders at the public hearing expressed opposition to the proposed building height, requesting that the building be scaled back to be more compatible with the neighborhood and avoid blocking views from the mountains. However, properties across 14th Street to the south and further west are developed with multi-family residential buildings up to three stories in height. In addition, the project is compliant with the transitional height requirements of the San Pedro CPIO Section IV-2.A.3(a), which requires the structure be set back or stepped back one foot for every foot in height as measured 14 feet above grade at the shared property line of a contiguous residentially zoned lot. Therefore, the proposed height is comparable with the maximum building height allowable under the On-Menu Density Bonus program, and will provide a transition to be compatible with existing neighboring buildings.

Retail / Amenities

Stakeholders at the public hearing requested the project provide neighborhood-serving amenities including ground-floor retail or publicly-accessible open space such as a children's play area or rooftop deck available to the community. However, neither the zoning designation or CPIO require the project to provide such amenities. The subject site is located within the Coastal Commercial Subarea A of the CPIO, which allows 100 percent residential projects. In addition, this CPIO Subarea is not required to provide Publicly-Accessible Open Space.

Design (Urban Design Studio / Professional Volunteer Program)

The project was presented to the Urban Design Studio ("UDS") on September 11, 2019 and the Professional Volunteer Program ("PVP") on October 15, 2019. The following comments were made on the project design:

1. The proposed 4-foot wide walled setback areas along both street frontages result in unusable "dead" space along the street frontages. What is the purpose of this area? Minimize the dead space by activating this area by:
 - a. Designing the ground-floor units as townhouse or walk-up units, with enhanced patios and landscaping overlooking the sidewalk.
 - b. Creating more openings to allow access to the ground-floor units, either to individual units, or a second opening to eliminate dead-ends.
 - c. Increasing the width of the area to allow at least 42 inches free and clear for path of travel and access.
 - d. Removing the outer wall and instead create ground-floor units that are 1-3 feet above grade for privacy.
2. Locate and configure long-term bicycle parking so that it is accessible from the elevators, without having to cross drive aisles or parking spaces.
3. Provide mezzanine level floor plans. The height of these mezzanine units does not look sufficient for functional usable spaces. Should increase the height to create more usable space for mezzanine units.
4. Provide more information on building materials and landscaping. Elevations do not provide enough information on articulation, changes in plane, material, etc.

5. Activate the courtyard by allowing access to the courtyard from the second-floor unit balconies.
6. Remove any balcony projections that conflict with transitional height requirements.
7. Incorporate more attributes from the surrounding San Pedro community.

On October 18, 2019, the Applicant submitted revised project plans incorporating and in response to the design comments from the UDS and PVP. Specifically, the revisions to the project design include:

1. Removed outer wall along street frontages to maximize usable patio space, enhance resident access, and eliminate dead space.
2. Reconfigured and relocated long-term bicycle parking to be more accessible from elevators.
3. Provided building material sheet, and revised paint colors to better show coastal attributes.
4. Increased open space area and landscaping on courtyard.
5. Removed balcony projections that conflicted with transitional height requirements.

Overall, the applicant was able to incorporate and respond to the intent of the design comments to enhance pedestrian activation of ground floor, increase and enhance open space areas, and provide further information on building materials. The applicant also reduced the overall unit count from 109 dwelling units (as originally proposed) to 102 dwelling units (as currently proposed) by modifying the configuration and mix of dwelling units located along the courtyard.

Historic

Stakeholders at the public hearing requested the project preserve the existing historic facades on-site. The site is currently improved with 3 vacant commercial structures built between 1924 and 1940. Two of the structures were identified in a records search with the South Central Coastal Information Center ("SCCIC") revealing a potential prior evaluation of 1309-1311 South Pacific Avenue and 1331 South Pacific Avenue. A Historical Resource Evaluation Report prepared by Galvin Preservation Associates ("GPA") Consulting, dated November 2019 evaluated all buildings on the Project site as individual potential historical resources as defined by CEQA. The surrounding area was not examined as a potential historic district for the purposes of this report. It was not recorded as a potential historic district during SurveyLA. Although the area developed as San Pedro's commercial corridor in the 1920s, it does not retain the integrity of setting and feeling needed to convey a sense of a discrete time and place. After careful inspection, investigation, and evaluation, GPA concluded that none of the properties appear to be eligible for listing in the National Register of Historic Places or California Register of Historical Resources, or for designation as a Los Angeles Historic-Cultural Monument due to a lack of significance, architectural distinction, and physical integrity. Furthermore, the properties do not contribute to a potential historic district. Therefore, the properties are not historical resources as defined by CEQA. As such, the Project would have no impact on historical resources and no further study is recommended or required. The report was reviewed by the Office of Historic Resources and accepted per correspondence dated December 24, 2019. Therefore, as provided in Exhibit D, the site does not constitute a historic resource, and the project will not result in a substantial adverse change to the significance of a historic resource.

Cumulative Impacts

Stakeholders at the public hearing also expressed opposition to the project's use of the Class 32 Categorical Exemption determination for the purposes of CEQA, due to the site's proximity to a project proposed at 2111-2139 South Pacific Avenue (Case No. CPC-2019-4884-CUB-CB-SPR), and requested the environmental impacts be analyzed cumulatively.

As provided in Exhibit D to the staff report, the project will be subject to standard Regulatory Compliance Measures ("RCMs"), which regulate impacts related to air quality (RC-AC-1 through RC-AQ-6), noise (RC-NO-1), and geology (RC-GEO-1). Numerous LAMC sections provide standard requirements for construction activities and ensure impacts from construction-related noise, traffic, and parking are less than significant. The Noise Ordinance (Ordinance No. 144,331) provides regulatory compliance measures related to construction noise and maximum noise levels for all activities. The traffic study prepared by Linscott Law & Greenspan, dated September 26, 2019, accounts for ambient growth factors based on a 1.0 percent annual growth and in addition to trips resulting from other development projects that are located within the study area (including the project located at 2111-2139 South Pacific Avenue and 7 other projects either proposed or under construction), and concluded no traffic impacts. The Department of Transportation (LADOT) reviewed the traffic study and confirmed its findings in a memo dated October 22, 2019, which included standard conditions for a construction work site traffic control plan and limiting construction-related traffic to off-peak hours. Therefore, the projects will not result in cumulative impacts related to traffic. Additionally, there is no evidence to conclude that significant impacts will occur based on past project approvals or that the proposed Project's impacts are cumulatively considerable when evaluating any cumulative impacts associated with construction noise and transportation/traffic in the surrounding area. Thus, there is no substantial evidence demonstrating that an exception to the categorical exemption applies.

Furthermore, the project at 2111-2139 South Pacific Avenue is approximately one-half mile away from the subject site, and is therefore not adjacent to nor within 500 feet of the subject site. CEQA Guidelines Section 15300.2(b) states that a categorical exemption is inapplicable "when the cumulative impact of successive projects of the same type in the same place, over time is significant." Based on this definition of cumulative impacts, there are no known successive projects of the same type that have occurred or would occur in the same place as the subject site. Furthermore, CEQA Guidelines Sections 15065(a)(3) and 15064(h) state that "a cumulatively considerable impact" means that the incremental effects of an individual project are significant when viewed in connection with the effects of other projects. Both projects would be subject to the citywide Regulatory Compliance Measures noted above and as provided in Exhibit E, which will ensure the projects individual will not have significant impacts. Therefore, the project will result in less than significant cumulative impacts.

CONCLUSION

Based on the information submitted to the record, and the surrounding uses and zones, staff recommends that the City Planning Commission approve the project, as recommended, subject to the Conditions of Approval. The project will redevelop an underutilized site with multi-family residential units, resulting in a net increase of 102 dwelling units including 12 Very Low Income units to the San Pedro Community.

CONDITIONS OF APPROVAL

Density Bonus Conditions

1. **Site Development.** Except as modified herein, the project shall be in substantial conformance with the plans and materials submitted by the Applicant, stamped "Exhibit A," and attached to the subject case file. No change to the plans will be made without prior review by the Department of City Planning, West/South/Coastal Project Planning Division, and written approval by the Director of Planning. Each change shall be identified and justified in writing. Minor deviations may be allowed in order to comply with the provisions of the Los Angeles Municipal Code or the project conditions.
2. **Residential Density.** The project shall be limited to a maximum density of 102 residential units including Density Bonus Units.
3. **Affordable Units.** A minimum of 12 units, that is 15 percent of the base dwelling units, shall be reserved as affordable units for Very Low Income household occupancy, as defined by the State Density Bonus Law 65915 (c)(1) or (c)(2). The project shall comply with any replacement affordable units required by the Los Angeles Housing and Community Investment Department (HCIDLA) pursuant to AB 2556.
4. **Housing Requirements.** Prior to issuance of a building permit, the owner shall execute a covenant to the satisfaction of the Los Angeles Housing and Community Investment Department (HCIDLA) to make 12 units available to Very Low Income Households, for sale or rental as determined to be affordable to such households by HCIDLA for a period of 55 years. Enforcement of the terms of said covenant shall be the responsibility of HCIDLA. The applicant will present a copy of the recorded covenant to the Department of City Planning for inclusion in this file. The project shall comply with any monitoring requirements established by the HCIDLA. Refer to the Density Bonus Legislation Background section of this determination.
5. **Floor Area Ratio (FAR) (Incentive).** The project shall be limited to a maximum floor area ratio of 2.65:1 per Exhibit "A".
6. **Open Space (Incentive).** The project shall provide a minimum 8,831 square feet of open space per Exhibit "A".
7. **Rear Yard Setback (Incentive).** The project shall provide a minimum 5-foot rear yard setback per Exhibit "A".
8. **Height (Waiver).** The project shall be limited to 45 feet and 5 inches in building height per Exhibit "A".
9. **Automobile Parking for Residential Uses.** Based upon the number and/or type of dwelling units proposed 127 parking spaces shall be provided for the project. Vehicle parking shall be provided consistent with LAMC Section 12.22 A.25, Parking Option 1, which permits one on-site parking space for each residential unit with one or fewer bedrooms; two on-site parking spaces for each residential unit with two to three bedrooms; and two-and-one-half parking spaces for each residential unit with four or more bedrooms. The Bicycle Parking Ordinance, LAMC Section 12.21.A.4, allows affordable residential projects to reduce required vehicle parking by 10 percent. Based upon the number and type of dwelling units proposed and the requested 4 percent reduction per the Bicycle Ordinance, 127 parking spaces shall be provided.

10. **Bicycle Parking.** Bicycle parking shall be provided consistent with LAMC 12.21 A.16.

Site Plan Review Conditions

11. **Mechanical Equipment.** All exterior mechanical equipment, including heating, ventilation and air conditioning (HVAC) equipment, satellite dishes, and cellular antennas, shall be screened from public view through the use of architectural elements such as parapets. The transformer, located along 38th Street, shall be screened with landscaping per Exhibit "A".
12. **Lighting.** All outdoor and parking lighting shall be shielded and down-cast within the site in a manner that prevents the illumination of adjacent public rights-of-way, adjacent properties, and the night sky (unless otherwise required by the Federal Aviation Administration (FAA) or for other public safety purposes).
13. **Lighting Design.** Areas where nighttime uses are located shall be maintained to provide sufficient illumination of the immediate environment so as to render objects or persons clearly visible for the safety of the public and emergency response personnel. All pedestrian walkways, storefront entrances, and vehicular access ways shall be illuminated with lighting fixtures. Lighting fixtures shall be harmonious with the building design. Wall mounted lighting fixtures to accent and complement architectural details at night shall be installed on the building to provide illumination to pedestrians and motorists.
14. **Heat Island Effect.** To reduce the heat island effect, a minimum of 50% of the area of pathways, patios, driveways or other paved areas shall use materials with a minimum initial Solar Reflectance value of 0.35 in accordance with ASTM (American Society of Testing Materials) standards.
15. **Electric Vehicle Parking.** All electric vehicle charging spaces (EV Spaces) and electric vehicle charging stations (EVCS) shall comply with the regulations outlined in Sections 99.04.106 and 99.05.106 of Article 9, Chapter IX of the LAMC.
16. **Unbundled Parking.** Residential parking shall be unbundled from the cost of the rental units, with the exception of parking for Restricted Affordable Units.
17. **Parking Structure Design.** Parking structures or that portion of a building or structure that is used for parking at grade or above grade shall be designed to minimize vehicle headlight and parking structure interior lighting impacts ("spillover") on adjacent streets and properties.
18. **Landscape Plan.** Revised landscape plans shall be submitted to show the size and location of all plants. The landscape plan shall indicate landscape points for the Project as required by LAMC 12.40 and Landscape Ordinance Guidelines "O". All open areas not used for buildings, driveways, parking areas, recreational facilities or walks shall be landscaped, including an automatic irrigation system, and maintained in accordance with a final landscape plan prepared by a licensed landscape architect or licensed architect, and submitted for approval to the Department of City Planning. The final landscape plan shall be in substantial conformance with the submitted Landscape Plan, Exhibit "A," and shall incorporate any modifications required as a result of this grant.
19. **Tree Wells.** The minimum depth of tree wells and planters on the rooftop, any above grade open space, and above a subterranean structure shall be as follows:
 - a. Minimum depth for trees shall be 42 inches.
 - b. Minimum depth for shrubs shall be 30 inches.
 - c. Minimum depth for herbaceous plantings and ground cover shall be 18 inches
 - d. Minimum depth for an extensive green roof shall be 3 inches.

The minimum amount of soil volume for tree wells on the rooftop or any above grade open spaces shall be based on the size of the tree at maturity:

- e. 600 cubic feet for a small tree (less than 25 feet tall at maturity).
 - f. 900 cubic feet for a medium tree (25-40 feet tall at maturity).
 - g. 1,200 cubic feet for a large tree (more than 40 feet tall at maturity)
20. **Street Trees.** New trees planted within the public right-of-way shall be spaced not more than an average of 30 feet on center, unless otherwise permitted by the Urban Forestry Division, Bureau of Public Works.
21. **Greywater.** The project shall be constructed with an operable recycled water pipe system for onsite greywater use, to be served from onsite non-potable water sources such as showers, washbasins, or laundry and to be used as untreated subsurface irrigation for vegetation or for cooling equipment. The system specifics shall be required as determined feasible by the Department of Water and Power in consultation with the Department of City Planning.
22. **Stormwater/irrigation.** The project shall implement on-site stormwater infiltration as feasible based on the site soils conditions, the geotechnical recommendations, and the City of Los Angeles Department of Building and Safety Guidelines for Storm Water Infiltration. If on-site infiltration is deemed infeasible, the project shall analyze the potential for stormwater capture and reuse for irrigation purposes based on the City Low Impact Development (LID) guidelines.
23. **Solar and Electric Generator.** Generators used during the construction process shall be electric or solar powered. Solar generator and electric generator equipment shall be located as far away from sensitive uses as feasible.
24. **Solar-ready Buildings.** The Project shall comply with the Los Angeles Municipal Green Building Code, Section 99.05.211, to the satisfaction of the Department of Building and Safety.
25. **Solar Panels.** A minimum 2,948 square feet (15 percent) of solar panels shall be installed on the building rooftop as shown on the roof plan provided as a part of an operational photovoltaic system to be maintained for the life of the project. The Project shall comply with the Los Angeles Municipal Green Building Code, Section 99.05.211, to the satisfaction of the Department of Building and Safety.
26. **Signage.** There shall be no off-site commercial signage on construction fencing during construction.

Administrative Conditions

27. **Final Plans.** Prior to the issuance of any building permits for the project by the Department of Building and Safety, the applicant shall submit all final construction plans that are awaiting issuance of a building permit by the Department of Building and Safety for final review and approval by the Department of City Planning. All plans that are awaiting issuance of a building permit by the Department of Building and Safety shall be stamped by Department of City Planning staff "Plans Approved". A copy of the Plans Approved, supplied by the applicant, shall be retained in the subject case file.
28. **Notations on Plans.** Plans submitted to the Department of Building and Safety, for the purpose of processing a building permit application shall include all of the Conditions of Approval herein attached as a cover sheet, and shall include any modifications or notations required herein.

29. **Approval, Verification and Submittals.** Copies of any approvals, guarantees or verification of consultations, review of approval, plans, etc., as may be required by the subject conditions, shall be provided to the Department of City Planning prior to clearance of any building permits, for placement in the subject file.
30. **Code Compliance.** Use, area, height, and yard regulations of the zone classification of the subject property shall be complied with, except where granted conditions differ herein.
31. **Department of Building and Safety.** The granting of this determination by the Director of Planning does not in any way indicate full compliance with applicable provisions of the Los Angeles Municipal Code Chapter IX (Building Code). Any corrections and/or modifications to plans made subsequent to this determination by a Department of Building and Safety Plan Check Engineer that affect any part of the exterior design or appearance of the project as approved by the Director, and which are deemed necessary by the Department of Building and Safety for Building Code compliance, shall require a referral of the revised plans back to the Department of City Planning for additional review and sign-off prior to the issuance of any permit in connection with those plans.
32. **Enforcement.** Compliance with these conditions and the intent of these conditions shall be to the satisfaction of the Department of City Planning.
33. **Covenant.** Prior to the issuance of any permits relative to this matter, an agreement concerning all the information contained in these conditions shall be recorded in the County Recorder's Office. The agreement shall run with the land and shall be binding on any subsequent property owners, heirs or assign. The agreement must be submitted to the Department of City Planning for approval before being recorded. After recordation, a copy bearing the Recorder's number and date shall be provided to the Department of City Planning for attachment to the file.
34. **Indemnification and Reimbursement of Litigation Costs.**

Applicant shall do all of the following:

- (i) Defend, indemnify and hold harmless the City from any and all actions against the City relating to or arising out of, in whole or in part, the City's processing and approval of this entitlement, including but not limited to, an action to attack, challenge, set aside, void, or otherwise modify or annul the approval of the entitlement, the environmental review of the entitlement, or the approval of subsequent permit decisions, or to claim personal property damage, including from inverse condemnation or any other constitutional claim.
- (ii) Reimburse the City for any and all costs incurred in defense of an action related to or arising out of, in whole or in part, the City's processing and approval of the entitlement, including but not limited to payment of all court costs and attorney's fees, costs of any judgments or awards against the City (including an award of attorney's fees), damages, and/or settlement costs.
- (iii) Submit an initial deposit for the City's litigation costs to the City within 10 days' notice of the City tendering defense to the Applicant and requesting a deposit. The initial deposit shall be in an amount set by the City Attorney's Office, in its sole discretion, based on the nature and scope of action, but in no event shall the initial deposit be less than \$50,000. The City's failure to notice or collect the deposit does not relieve the Applicant from responsibility to reimburse the City pursuant to the requirement in paragraph (ii).
- (iv) Submit supplemental deposits upon notice by the City. Supplemental deposits may be required in an increased amount from the initial deposit if found necessary by the City to protect the City's interests. The City's failure to notice or collect the

deposit does not relieve the Applicant from responsibility to reimburse the City pursuant to the requirement in paragraph (ii).

- (v) If the City determines it necessary to protect the City's interest, execute an indemnity and reimbursement agreement with the City under terms consistent with the requirements of this condition.

The City shall notify the applicant within a reasonable period of time of its receipt of any action and the City shall cooperate in the defense. If the City fails to notify the applicant of any claim, action, or proceeding in a reasonable time, or if the City fails to reasonably cooperate in the defense, the applicant shall not thereafter be responsible to defend, indemnify or hold harmless the City.

The City shall have the sole right to choose its counsel, including the City Attorney's office or outside counsel. At its sole discretion, the City may participate at its own expense in the defense of any action, but such participation shall not relieve the applicant of any obligation imposed by this condition. In the event the Applicant fails to comply with this condition, in whole or in part, the City may withdraw its defense of the action, void its approval of the entitlement, or take any other action. The City retains the right to make all decisions with respect to its representations in any legal proceeding, including its inherent right to abandon or settle litigation.

For purposes of this condition, the following definitions apply:

"City" shall be defined to include the City, its agents, officers, boards, commissions, committees, employees, and volunteers.

"Action" shall be defined to include suits, proceedings (including those held under alternative dispute resolution procedures), claims, or lawsuits. Actions includes actions, as defined herein, alleging failure to comply with any federal, state or local law.

Nothing in the definitions included in this paragraph are intended to limit the rights of the City or the obligations of the Applicant otherwise created by this condition.

FINDINGS

DENSITY BONUS/AFFORDABLE HOUSING INCENTIVES COMPLIANCE FINDINGS

1. **Government Code Section 65915 and LAMC Section 12.22 A.25 state that the Commission shall approve a density bonus and requested incentive(s) unless the Commission finds that:**
 - a. ***The incentives do not result in identifiable and actual cost reductions to provide for affordable housing costs as defined in California Health and Safety Code Section 50052.5 or Section 50053 for rents for the affordable units.***

The record does not contain substantial evidence that would allow the City Planning Commission to make a finding that the requested on- and off-menu incentives are not necessary to provide for affordable housing costs per State Law. The California Health & Safety Code Sections 50052.5 and 50053 define formulas for calculating affordable housing costs for Very Low, Low, and Moderate Income Households. Section 50052.5 addresses owner-occupied housing and Section 50053 addresses rental households. Affordable housing costs are a calculation of residential rent or ownership pricing not to exceed 25 percent gross income based on area median income thresholds dependent on affordability levels.

Based on the set-aside of 15 percent of base units for Very Low Income households, the applicant is entitled to three (3) Incentives under both the Government Code and LAMC. Therefore, the first On- and Off-Menu requests qualify as the proposed development's Incentives. The remaining request must be processed as a Waiver of Development Standard.

FAR: The subject site is zoned C2-1XL-CPIO, with a Height District No. 1XL and CPIO designation that permit a maximum Floor Area Ratio ("FAR") of 1.5:1. LAMC Section 12.22 A.25 permits an FAR increase from 1.5:1 to 3:1 through an On-Menu Incentive for eligible projects within 1,500 feet of transit. The applicant has requested an FAR of 2.65:1 in lieu of the maximum 3:1 permitted through an On-Menu Density Bonus Incentive. The project includes many larger-sized dwelling units (including 53 studios, 19 one-bedroom units, and 30 two-bedroom units). The requested increase in FAR will allow 35,908 square feet of additional floor area, and will allow for the construction of affordable units in addition to larger-sized dwelling units.

FAR by-right	Buildable Lot Area (sf)	Total Floor Area (sf)
1.5:1	31,500	31,500 x 1.5 = 47,250

FAR Requested	Buildable Lot Area (sf)	Total Floor Area (sf)	Additional Floor Area (sf)
2.65:1	31,500	83,158	83,158- 47,250= 35,908

Open Space: LAMC Section 12.21 G requires 100 square feet of usable open space per dwelling unit with less than 3 habitable rooms, and 125 square feet of usable open space per dwelling unit with 3 habitable rooms. For the proposed project with 53 studio units, 19 one-bedroom units, and 30 two-bedroom units, a total of 10,950 square feet of open space would be required. Strict compliance with the open space requirements would have the effect of physically precluding construction of the development proposing 102 dwelling units, 12 of which will be set aside for Very Low Income Households. The applicant has requested a 20 percent reduction to allow 8,381 square feet of open space through an On-Menu Incentive. Without the incentive to reduce the minimum usable open space required to 8,381 square feet, the project would need to provide an additional 2,119 square feet of common or private open space on-site. The project currently proposes dwelling units that range in size from 370 square feet to 986 square feet. Compliance with the minimum usable open space provision would require the removal of floor area that could otherwise be dedicated to the number, configuration, and livability of affordable housing units. Specifically, the project would not only need to comply with the total amount of usable open space requirements, but also the design, dimension, and area requirements set forth in LAMC Section 12.21 G. Common open space would need to be at least 15 feet in width on all sides, have a minimum area of 400 square feet, and be open to sky. The project would lose floor area of the development in order to meet all of these additional requirements for common open space.

Rear Yard Setback: LAMC Section 12.14 C.2 requires rear and side yards to conform to the requirements of the R4 Zone for buildings erected and used for residential purposes. The R4 Zone requires a rear yard of a minimum of 15 feet, and requires one additional foot in the width of the rear yard for each additional story above the 3rd story. The Project is a 4-story residential building. Given all levels of the project would be utilized in whole or in part by residential uses, the Project would therefore be required to provide a 16-foot rear yard setback. The Applicant has requested an Off-Menu Incentive for a reduced yard, and proposes a 5-foot rear yard setback in lieu of the 16 feet otherwise required. Strict compliance with the rear yard requirement would reduce the buildable lot area by 11 feet for the rear yard, thereby limiting the buildable area for new development and reducing the number and range of units that could be developed. The requested incentive allows the developer to reduce setback requirements so the affordable housing units can be constructed and the overall space dedicated to residential uses is increased.

- b. The Incentive will have specific adverse impact upon public health and safety or the physical environment, or on any real property that is listed in the California Register of Historical Resources and for which there is no feasible method to satisfactorily mitigate or avoid the specific adverse Impact without rendering the development unaffordable to Very Low, Low and Moderate Income households. Inconsistency with the zoning ordinance or the general plan land use designation shall not constitute a specific, adverse impact upon the public health or safety.***

There is no evidence in the record that the proposed density bonus incentive(s) will have a specific adverse impact. A “specific adverse impact” is defined as, “a significant, quantifiable, direct and unavoidable impact, based on objective, identified written public health or safety standards, policies, or conditions as they existed on the date the application was deemed complete” (LAMC Section 12.22.A.25(b)). The finding that there is no evidence in the record that the proposed incentive(s) will have a specific adverse impact is further supported by the recommended CEQA finding. The findings to deny an incentive under Density Bonus Law are not equivalent to the findings for determining the existence of a significant unavoidable impact under CEQA. However, under a number

of CEQA impact thresholds, the City is required to analyze whether any environmental changes caused by the project have the possibility to result in health and safety impacts. For example, CEQA Guidelines Section 15065(a)(4), provides that the City is required to find a project will have a significant impact on the environment and require an EIR if the environmental effects of a project will cause a substantial adverse effect on human beings. The proposed project and potential impacts were analyzed in accordance with the State California Environmental Quality Act (CEQA) Guidelines. Analysis of the proposed Project determined that it is Categorically Exempt from environmental review pursuant to Article 19, Class 32 of the CEQA Guidelines. The Categorical Exemption (CE) could be adopted, including, on the basis that none of the potential environmental effects of the proposed Project would cause substantial adverse effects on human beings, the physical environment, on public health and safety, or on property listed in the California Register of Historic Resources. Based on all of the above, there is no basis to deny the requested incentive.

c. The incentive(s) are contrary to state or federal laws.

There is no evidence in the record that the proposed incentives are contrary to state or federal law.

Following is a delineation of the findings related to the request for one (1) Waiver of Development Standard, pursuant to Government Code Section 65915.

2. Government Code Section 65915 and LAMC Section 12.22 A.25 state that the Commission shall approve a density bonus and requested Waiver of Development Standard(s) unless the Commission finds that:

a. The waiver(s) or reduction(s) are contrary to state or federal laws.

There is no evidence in the record that the proposed incentives are contrary to state or federal law.

A project that provides 15 percent of total units for Very Low Income Households qualifies for three (3) Incentives, and may request other “waiver[s] or reduction[s] of development standards that will have the effect of physically precluding the construction of a development meeting the [affordable set-aside percentage] criteria of subdivision (b) at the densities or with the concessions or incentives permitted under [State Density Bonus Law]” (Government Code Section 65915(e)(1)).

Therefore, the request for the following is recommended as a Waiver of Development Standards. Without the below Waiver, the existing development standards would preclude development of the proposed density bonus units and project amenities:

Height: The subject site is zoned C2-1XL-CPIO, with a Height District No. 1XL and CPIO designation that permit a maximum 30-foot building height. The applicant has requested an increase for 15 feet and 5 inches to allow for 45 feet and 5 inches through a Waiver of Development Standard. The limitation on the height would remove one (1) story from the proposed building which contains 27 dwelling units, and will limit the ability to construct the residential dwelling units permitted by-right and the Restricted Affordable Units which are of a sufficient size. This development standard would have the effect of physically precluding construction of a development providing 102 dwelling units, of which 12 units will be set aside for Very Low Income households. As proposed, the additional height will allow for the construction of the affordable residential units. The

requested waiver will allow the developer to expand the building envelope so the additional units can be constructed and the overall space dedicated to residential uses is increased.

- b. The Incentive will have specific adverse impact upon public health and safety or the physical environment, or on any real property that is listed in the California Register of Historical Resources and for which there is no feasible method to satisfactorily mitigate or avoid the specific adverse Impact without rendering the development unaffordable to Very Low, Low and Moderate Income households. Inconsistency with the zoning ordinance or the general plan land use designation shall not constitute a specific, adverse impact upon the public health or safety.***

There is no evidence in the record that the proposed density bonus incentive(s) will have a specific adverse impact. A “specific adverse impact” is defined as, “a significant, quantifiable, direct and unavoidable impact, based on objective, identified written public health or safety standards, policies, or conditions as they existed on the date the application was deemed complete” (LAMC Section 12.22.A.25(b)). The finding that there is no evidence in the record that the proposed incentive(s) will have a specific adverse impact is further supported by the recommended CEQA finding. The findings to deny an incentive under Density Bonus Law are not equivalent to the findings for determining the existence of a significant unavoidable impact under CEQA. However, under a number of CEQA impact thresholds, the City is required to analyze whether any environmental changes caused by the project have the possibility to result in health and safety impacts. For example, CEQA Guidelines Section 15065(a)(4), provides that the City is required to find a project will have a significant impact on the environment and require an EIR if the environmental effects of a project will cause a substantial adverse effect on human beings. The proposed project and potential impacts were analyzed in accordance with the State California Environmental Quality Act (CEQA) Guidelines. Analysis of the proposed Project determined that it is Categorically Exempt from environmental review pursuant to Article 19, Class 32 of the CEQA Guidelines. The Categorical Exemption (CE) could be adopted, including, on the basis that none of the potential environmental effects of the proposed Project would cause substantial adverse effects on human beings, the physical environment, on public health and safety, or on property listed in the California Register of Historic Resources. Based on all of the above, there is no basis to deny the requested incentive.

DENSITY BONUS LEGISLATION BACKGROUND

The California State Legislature has declared that “[t]he availability of housing is of vital statewide importance,” and has determined that state and local governments have a responsibility to “make adequate provision for the housing needs of all economic segments of the community.” Section §65580, subds. (a), (d). Section 65915 further provides that an applicant must agree to, and the municipality must ensure, the “continued affordability of all Low and Very Low Income units that qualified the applicant” for the density bonus.

With Senate Bill 1818 (2004), state law created a requirement that local jurisdictions approve a density bonus and up to three “concessions or incentives” for projects that include defined levels of affordable housing in their projects. In response to this requirement, the City created an ordinance that includes a menu of incentives (referred to as “on-menu” incentives) comprised of eight zoning adjustments that meet the definition of concessions or incentives in state law (California Government Code Section 65915). The eight on-menu incentives allow for: 1) reducing setbacks; 2) reducing lot coverage; 3) reducing lot width, 4) increasing floor area ratio (FAR); 5) increasing height; 6) reducing required open space; 7) allowing for an alternative density

calculation that includes streets/alley dedications; and 8) allowing for “averaging” of FAR, density, parking or open space. In order to grant approval of an on-menu incentive, the City utilizes the same findings contained in state law for the approval of incentives or concessions.

California State Assembly Bill 2222 went into effect January 1, 2015, and was amended by Assembly Bill 2556 on September 28, 2016, and with that Density Bonus projects filed as of that date must demonstrate compliance with the housing replacement provisions which require replacement of rental dwelling units that either exist at the time of application of a Density Bonus project, or have been vacated or demolished in the five-year period preceding the application of the project. This applies to all pre-existing units that have been subject to a recorded covenant, ordinance, or law that restricts rents to levels affordable to persons and families of lower or very low income; subject to any other form of rent or price control (including Rent Stabilization Ordinance); or is occupied by Low or Very Low Income Households (i.e., income levels less than 80 percent of the area median income [AMI]). The replacement units must be equivalent in size, type, or both and be made available at affordable rent/cost to, and occupied by, households of the same or lower income category as those meeting the occupancy criteria. Prior to the issuance of any Director’s Determination for Density Bonus and Affordable Housing Incentives, the Housing and Community Investment Department (HCIDLA) is responsible for providing the Department of City Planning, along with the applicant, a determination letter addressing replacement unit requirements for individual projects. The City also requires a Land Use Covenant recognizing the conditions be filed with the County of Los Angeles prior to granting a building permit on the project.

Assembly Bill 2222 also increases covenant restrictions from 30 to 55 years for projects approved after January 1, 2015. This determination letter reflects these 55 year covenant restrictions.

Under Government Code Section § 65915(a), § 65915(d)(2)(C) and § 65915(d)(3) the City of Los Angeles complies with the State Density Bonus law by adopting density bonus regulations and procedures as codified in Section 12.22 A.25 of the Los Angeles Municipal Code. Section 12.22 A.25 creates a procedure to waive or modify Zoning Code standards which may prevent, preclude or interfere with the effect of the density bonus by which the incentive or concession is granted, including legislative body review. The Ordinance must apply equally to all new residential development.

In exchange for setting aside a defined number of affordable dwelling units within a development, applicants may request up to three incentives in addition to the density bonus and parking relief which are permitted by right. The incentives are deviations from the City’s development standards, thus providing greater relief from regulatory constraints. Utilization of the Density Bonus/Affordable Housing Incentives Program supersedes requirements of the Los Angeles Municipal Code and underlying ordinances relative to density, number of units, parking, and other requirements relative to incentives, if requested.

For the purpose of clarifying the Covenant Subordination Agreement between the City of Los Angeles and the United States Department of Housing and Urban Development (HUD) note that the covenant required in the Conditions of Approval herein shall prevail unless pre-empted by State or Federal law.

SITE PLAN REVIEW FINDINGS

3. **The project is in substantial conformance with the purposes, intent and provisions of the General Plan, applicable community plan, and any applicable specific plan.**

The proposed project is in substantial conformance with the purposes, intent, and provisions of the General Plan and the San Pedro Community Plan.

The project site is located in the San Pedro Community Plan, and is designated for Neighborhood Commercial land uses, with corresponding zones of C1, C1.5, C2, C4, R3, and RAS3. The site is zoned C2-1XL-CPIO, and is consistent with the land use designation. Height District No. 1XL limits Floor Area Ratio ("FAR") to 1.5:1 and building height to 30 feet. The site is not located within a Specific Plan, however it is located within the San Pedro Community Plan Implementation Overlay ("CPIO") District Coastal Commercial A Subarea (Subarea No. 150). The CPIO contains additional regulations for ground floor and building height, density, floor area, building disposition, building design, and parking.

Consistent with the Community Plan, the proposed 102-unit multi-family residential development, which includes 12 Very Low Income units, adds new multi-family housing and much needed affordable housing to Los Angeles's housing supply, in a neighborhood which is conveniently located to a variety of regional destinations, community services and amenities, and multi-modal transportation options.

Framework Element

The General Plan designates the subject site with Neighborhood Commercial land use designation with corresponding zones of C1, C1.5, C2, C4, R3, and RAS3. The Framework Element describes Neighborhood Commercial areas as pedestrian-oriented districts that provide local identity, commercial activity, and support Los Angeles' neighborhoods. The property is zoned C2-1XL-CPIO which is consistent with the Neighborhood Commercial land use. The C2-1XL-CPIO zone allows for R4 (High Medium Residential) land uses and estimates 56 to 109 dwelling units per acre.

Per the Framework Element's Long Range Land Use Diagram for the West/Coastal Los Angeles area, the site is also along a Mixed Use Boulevard. A Mixed Use Boulevard is described as "connect[ing] the city's neighborhood districts and community, regional and Downtown centers. Mixed Use development is encouraged along these boulevards, with the scale, density and height of development compatible with the surrounding areas. Generally, different types of Mixed Use Boulevards will fall within a range of floor area ratios from 1.5:1 up to 4.0:1 and be generally characterized by 1- to 2-story commercial structures, up to 3- to 6-story mixed use buildings between centers and higher buildings within centers. Mixed Use Boulevards are served by a variety of transportation facilities".

Therefore, as a 4-story multi-family residential development with a maximum 2.65:1 FAR as allowed by Density Bonus, the proposed project is consistent with the General Plan Framework.

Land Use Element – San Pedro Community Plan

The proposed project aligns with the intent of the 2017 San Pedro Community Plan including the following:

Goal LU3: Multi-family residential neighborhoods with a mix of ownership and rental units that are well-designed, safe, provide amenities for residents, and exhibit the architectural characteristics and qualities that distinguish San Pedro

Policy LU3.1: Neighborhood stability. Stabilize and improve existing multi-family residential neighborhoods, allowing for growth in areas where there are sufficient public infrastructure and services and where quality of life can be maintained or improved

Policy LU3.2: Key locations. Incorporate multi-family housing in areas targeted for mixed use and in the Regional Center

Policy LU3.3: Equitable housing distribution. Provide an equitable distribution of housing types for all income groups throughout San Pedro's multi-family neighborhoods and promote mixed-income developments rather than creating concentrations of below-market-rate housing

Policy LU3.4: Affordable housing and displacement. Encourage the replacement of demolished quality affordable housing stock with new affordable housing opportunities while minimizing the displacement of residents, through programs that support development while meeting the relocation needs of existing residents

Policy LU3.6: Amenities. Include amenities for residents such as on site recreational facilities, community meeting spaces, and useable private and/or public open space in new multi-family development

The project is for the construction of a new mixed-income multi-family residential development on an underutilized site that includes 3 vacant commercial structures. The project will result in the net increase of 102 dwelling units which will include 12 Very Low Income units. The site is located within walking distance of public transit and local and regional amenities. As shown in Exhibit "A" and Finding No. 4 below, the Project will provide design features and landscaping improvements to enhance the visual quality of the area.

Housing Element 2013-2021

The proposed project also conforms with the applicable policies of the Housing Element, including:

Goal 1: A City where housing production and preservation result in an adequate supply of ownership and rental housing that is safe, healthy and affordable to people of all income levels, races, ages, and suitable for their various needs.

Objective 1.1: Produce an adequate supply of rental and ownership housing in order to meet current and projected needs.

Policy 1.1.4: Expand opportunities for residential development, particularly in designated Centers, Transit Oriented Districts, and Mixed-Use Boulevards

Policy 1.3.5: Provide sufficient land use and density to accommodate an adequate supply of housing units within the City to meet the projections of housing needs

Goal 2: A City in which housing helps to create safe, livable and sustainable neighborhoods.

Objective 2.2: Promote sustainable neighborhoods that have mixed-income housing, jobs, amenities, services and transit.

Policy 2.2.2: Provide incentives and flexibility to generate new multi-family housing near transit and centers, in accordance with the General Plan Framework element, as reflected in Map ES.1.

Objective 2.5: Promote a more equitable distribution of affordable housing opportunities throughout the City.

Program 98: In accordance with State law, provide a density bonus up to 35% over the otherwise allowable density as well as reduced parking requirements for all residential developments that include units affordable to very low-, low- and/or moderate-income households. Provide additional incentives and concessions to required development standards in order to provide the buildable area needed for the affordable units and increased density.

The proposed project will result in a net increase of 102 new residential units to the City's housing stock and conforms with the applicable provisions of the Housing Element. The applicant has requested deviations from code requirements under the Density Bonus program for increased FAR and height and reduced yard and open space, thereby allowing the creation of affordable units around transit stops. Pursuant to Density Bonus requirements, 15 percent (12 units) of the base units, will be set aside for Very Low Income units. Additionally, this mixed-income development is in close proximity to public transit options and bus stops, and a variety of retail, commercial, entertainment, recreational, and employment opportunities. Locating new housing in this portion of Pacific Avenue will allow residents to have better access to employment centers and places of interest in area.

Mobility Plan 2035

The proposed project also conforms with the following additional policies of the Mobility Plan, including:

Policy 3.1 – Access for All: Recognize all modes of travel, including pedestrian, bicycle, transit, and vehicular modes - including goods movement – as integral components of the City's transportation system.

Policy 3.3 – Land Use Access and Mix: Promote equitable land use decisions that result in fewer vehicle trips by providing greater proximity and access to jobs, destinations, and other neighborhood services.

The project utilizes Density Bonus for the construction of a mixed-income development that provides both housing opportunities in close proximity to public transit along the Pacific Avenue corridor, and to permit reduced parking in accordance with Density Bonus Parking Option 1 and bicycle parking reduction, encouraging multi-modal transportation and decreasing vehicle miles traveled in the neighborhood. The site is located along a portion of Pacific Avenue that is designated by the Mobility Plan as a Tier 2 Bicycle Lane in the Bicycle Lane Network, and is also within the designated Pedestrian Enhanced District.

Therefore, the proposed project is consistent with the purposes, intent and provisions of the General Plan, San Pedro Community Plan, Housing Element, and Mobility Plan by meeting several of its goals, objectives, and policies. Specifically, the project would provide a diverse set of uses that (1) facilitate vehicle trip reduction, reduce vehicle miles traveled, and reduce air pollution; (2) accommodate necessary residential growth and provide a mix of apartment sizes and affordability levels, including restricted very low income units; and (3) reinforce an existing mixed-use corridor by providing an array of housing options, streetscape, and landscaping opportunities, that would be inviting to nearby residents and pedestrians along Pacific Avenue.

4. **The project consists of an arrangement of buildings and structures (including height, bulk and setbacks), off-street parking facilities, loading areas, lighting, landscaping, trash collection, and other such pertinent improvements that is or will be compatible with existing and future development on adjacent properties and neighboring properties.**

The subject site is located in the San Pedro Community Plan along the Pacific Avenue commercial corridor, at the northwestern corner of Pacific Avenue and 14th Street. The surrounding area is developed with a combination of primarily single-story commercial uses and multi-family residential uses up to three stories in height, with some one- and two-story single-family residential uses in the surrounding area.

The proposed project is the construction of a 4-story, 45-foot and 5-inch tall residential building comprised of 102 dwelling units (including 12 Very Low Income units). The project will be approximately 83,158 square feet in floor area with a Floor Area Ratio ("FAR") of 2.65:1. The project will provide 127 parking spaces in 2 subterranean levels, in addition to 81 long-term and 8 short-term bicycle parking spaces. The primary building entrance is located along Pacific Avenue, and ground-floor street-facing units will have individual entrances from the sidewalk. Residential amenities are provided in the form of a recreation room, gym, and dog care room at the ground floor; open-air landscaped courtyard at the second floor; and roof decks. Vehicular access is proposed from one driveway along 14th Street. The proposed project would include design features, landscaping improvements, off-street parking facilities, lighting, landscaping, and enclosed trash collection, to enhance the visual quality of the area, and to be compatible with existing and future development on adjacent properties and neighboring properties.

Height

The proposed project will be four (4) stories and approximately 45 feet and 5 inches in building height. The subject property is zoned C2-1XL-CPIO and is located within Height District 1XL. Both the Height District No. 1XL and San Pedro CPIO Section IV-2.A.2(a) and IV-2.B.1 restrict the site to a maximum building height of 30 feet and Floor Area Ratio ("FAR") of 1.5:1, respectively. Neither the Height District nor CPIO restrict the number of stories for a residential building. The project would be allowed an 11-foot height increase for a maximum 41-foot building height through an On-Menu Incentive under the Density Bonus program. The proposed 45-foot and 5-inch building height is requested through an Waiver of Development Standard. Properties across 14th Street to the south and further west are developed with multi-family residential buildings up to three stories in height. In addition, the project is compliant with the transitional height requirements of the San Pedro CPIO Section IV-2.A.3(a), which requires the structure be set back or stepped back one foot for every foot in height as measured 14 feet above grade at the shared property line of a contiguous residentially zoned lot. Therefore, the proposed height is comparable with the maximum building height allowable under the On-Menu Density Bonus program, and will provide a transition to be compatible with existing neighboring buildings.

Bulk/Massing

The proposed project abuts two streets, with the street-fronting facades measuring approximately 210 feet along the west side of Pacific Avenue and 150 feet along north side of 14th Street. While the proposed project massing exceeds the existing prevailing development pattern, the overall height is comparable to the maximum building height allowable under the On-Menu Density Bonus program. In addition, the project is compliant with the transitional height requirements of CPIO Section IV-2.A.3(a), which requires the structure be set back or stepped back one foot for every foot in height as measured 14 feet above grade at the shared property line of a contiguous residentially zoned lot. The project will provide a 15-foot wide westerly side yard adjacent to the neighboring residential uses,

which exceeds the code required side setback of 7 feet. Therefore, the project massing will be appropriately set back from the neighboring residential uses. Lastly, the project provides architectural detailing that enhances the street-facing building frontage along Pacific Avenue by applying recesses, balconies, and varied rooflines along the building facade, along with varying building materials and colors to incorporate variation in design.

Building Materials

The building design incorporates a variety of recesses, balconies, varied rooflines, and different materials to add architectural interest to the building and creates distinct breaks in the building plane. These breaks are further differentiated through the use of a variety of building materials that include stucco, double pane aluminum, and aluminum woven wire mesh. Together, these elements are applied to create sufficient breaks in plane and articulation. In accordance with CPIO Section IV-2.C.2 and IV-2.C.4, respectively, at least 60 percent of the Primary Frontage of the Ground Floor shall consist of doors and windows, and heavily textured stucco is prohibited.

Entrances

The primary building entrance is proposed along Pacific Avenue, and is differentiated from the remainder of the street frontage through a recess that is enhanced with Pedestrian Amenities along the sidewalk. In addition, all ground-floor street-facing units along Pacific Avenue and 14th Avenue will have individual unit entrances that will be directly accessible from the street and set back a minimum of 3 feet from the sidewalk in accordance with CPIO Section IV-2.D.3 and IV-2.D.4.

Setbacks

The project creates a strong street wall with minimal setbacks along both Pacific Avenue and 14th Street. CPIO Section IV-2.C.1 requires that the exterior wall of any building shall be located not more than 5 feet from the Primary Lot Line, except that exterior walls may be more than 5 feet from the Primary Lot Line when the setback is improved with Pedestrian Amenities and/or landscaping. The ground floor along Pacific Avenue is set back approximately 3 feet to provide more area for pedestrian access in compliance with the CPIO, which allows a setback along Pacific Avenue ranging from 0 to 5 feet. The northerly rear yard will be 5 feet, as granted and conditioned herein, and landscaped to provide a buffer from the adjacent commercial building. The westerly side yard will be 15 feet in width to create a buffer from the adjacent residential buildings, and enhanced as residential amenity space to include landscaping, trees, seating, and a firepit.

Parking/Loading

The Applicant has requested to utilize a parking reduction granted by-right under Density Bonus Parking Option 1 LAMC Section 12.22 A.25(d)(1). Density Bonus Parking Option 1 requires parking spaces at the following ratios: 1 space per unit containing 0 to 1 bedrooms, 2 spaces per unit containing 2 to 3 bedrooms, and 2.5 space per unit containing 4 or more bedrooms. The project provides 72 studios and one-bedroom units, and 30 two-bedroom units, and is therefore required to provide a total of 132 parking spaces. The Bicycle Parking Ordinance, LAMC Section 12.21.A.4, allows affordable residential projects to reduce required vehicle parking by 10 percent, in this case, a reduction of 13 vehicular parking spaces, to provide 119 vehicular parking spaces. The applicant is requesting only a 4 percent reduction of 5 vehicular parking spaces, to provide a total of 127 vehicular parking spaces for the project. The parking is proposed in the form of two (2) subterranean parking levels. No parking spaces are proposed at or above grade level in accordance with CPIO Section IV-2.E.2. The project will reduce the number of curb cuts and driveways currently on-site from two existing curb cuts to one proposed curb cut. The curb cut is proposed along 14th Street and will provide access to one driveway serving the subterranean parking. Therefore, the project will improve walkability of the site by removing an existing curb cut

and surface parking lot. As conditioned, all electric vehicle charging spaces (EV Spaces) and electric vehicle charging stations (EVCS) shall comply with the regulations outlined in Sections 99.04.106 and 99.05.106 of Article 9, Chapter IX of the LAMC.

Lighting

The project will comply with CPIO Section IV-2.H.1 to provide ancillary lighting along pedestrian and vehicular access ways, and is conditioned so that all pedestrian walkways and vehicle access points will be well-lit with lighting fixtures that are harmonious with the building design. As conditioned, all outdoor lighting provided on-site will be shielded to prevent excessive illumination and spillage onto adjacent public rights-of-way, adjacent properties, and the night sky.

Landscaping/Open Space

On-site landscaping and open space is provided in the form a 3,241 square-foot courtyard, 2,940 square foot roof deck, and private balconies. The common open space areas shall meet the minimum dimension, landscaping, and amenity requirements per LAMC Section 12.21 G.2(a). Additional landscaping is proposed along the northerly rear yard, and residential amenity space with landscaping, trees, seating, and firepit in the easterly side yard. The project is conditioned to submit landscape plans prepared by a licensed landscape architect or licensed architect to show the size and location of all plants, and ensure sufficient depth and soil volume for trees and green roofs.

Trash Collection

Trash and recycling areas are conditioned to be located within the subterranean parking level to ensure that they are not visible from public view from the street per CPIO Section IV-2.H.3. Service providers will access the trash area from the driveway along 14th Street and enter the parking garage for trash collection. Therefore, trash collection will not affect circulation for surrounding properties.

5. The residential project provides recreational and service amenities to improve habitability for its residents and minimize impacts on neighboring properties.

The proposed project provides recreational and service amenities that will improve habitability for the residents and minimize any impacts on neighboring properties. Common open space is provided in the form of a 3,241 square-foot courtyard on Level 2 and 2,940 square foot roof deck. Additional residential amenity space with landscaping, trees, seating, and firepit is proposed in the easterly side yard. The project also provides private balconies for use as private open space for individual units. Therefore, the proposed project provides sufficient recreational and service amenities for its residents, minimizing any impacts on neighboring properties.

CEQA Findings

The Department of City Planning determined based on the whole of the administrative record, that the Project is exempt from the California Environmental Quality Act ("CEQA") pursuant to State CEQA Guidelines, Article 19, Section 15332 (Class 32), and there is no substantial evidence demonstrating that an exception to a categorical exemption pursuant to CEQA Guidelines, Section 15300.2 applies. The Notice of Exemption and Justification for Project Exemption for Environmental Case No. ENV-2019-4909-CE is provided in the case file and attached as Exhibit D.

The project is the construction of a 4-story, 45-foot and 5-inch tall residential building comprised of 102 dwelling units (including 12 Very Low Income units). The project will be approximately 83,158 square feet in floor area with a Floor Area Ratio ("FAR") of 2.65:1. The project will provide 127 parking spaces in 2 subterranean levels. The site is currently improved with 3 vacant commercial structures, with 26 trees on the subject site and 4 trees along the public right-of-way, all of which will be removed to clear the lot. The project will also involve the grading of approximately 2,500 cubic yards of soil, and export of approximately 20,000 cubic yards of soil.

As a multi-family residential building, and a project which is characterized as in-fill development, the project qualifies for the Class 32 Categorical Exemption.

CEQA Determination – Class 32 Categorical Exemption Applies

A project qualifies for a Class 32 Categorical Exemption if it is developed on an infill site and meets the following criteria:

- (a) **The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with the applicable zoning designation and regulations.**

The subject site is located within the San Pedro Community Plan and is designated for Neighborhood Commercial Land Uses. The site is zoned C2-1XL-CPIO and is consistent with the land use designation. As shown in the case file and under Finding No. 2 above, the project is consistent with the General Plan, the applicable San Pedro Community Plan designation and policies, and all applicable zoning designations and regulations as permitted by Density Bonus law.

- (b) **The proposed development occurs within city limits on a project site of no more than five acres substantially surrounded by urban uses.**

The subject site is wholly within the City of Los Angeles, on a site that is approximately 0.72 acres (31,521 square feet). Lots adjacent to the subject site are developed with the following urban uses: multi-family and single-family residential and commercial uses. The subject site is within one-half mile of several bus stops served by the Los Angeles County Metropolitan Transit Authority ("Metro") Silver Line and 205, 246, and 550 bus lines, Los Angeles Department of Transportation ("LADOT") DASH San Pedro and Commuter Express 142 bus lines. There is a bus stop within 400 feet at the intersection of Pacific Avenue and 15th Street.

- (c) **The project site has no value as habitat for endangered, rare or threatened species.**

The site is previously disturbed and surrounded by development and therefore is not, and has no value as, a habitat for endangered, rare or threatened species. There are no native protected trees on the site per the Tree Report prepared by Courtland Studio, LLC dated March 26, 2019. There are 26 trees on the subject site and 4 trees along the public right-of-way, all of which will be removed to clear the lot.

- (d) **Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality.**

Regulatory Compliance Measures – The project will be subject to Regulatory Compliance Measures (RCMs), which require compliance with the City of Los Angeles Noise Ordinance, pollutant discharge, dewatering, stormwater mitigations; and Best Management Practices for stormwater runoff. More specifically, RCMs include but are not limited to the following, to ensure the project will not have significant impacts:

- **Regulatory Compliance Measure RC-AQ-1 (Demolition, Grading and Construction Activities): Compliance with provisions of the SCAQMD District Rule 403.** The project shall comply with all applicable standards of the Southern California Air Quality Management District, including the following provisions of District Rule 403:
 - All unpaved demolition and construction areas shall be wetted at least twice daily during excavation and construction, and temporary dust covers shall be used to reduce dust emissions and meet SCAQMD District Rule 403. Wetting could reduce fugitive dust by as much as 50 percent.
 - The construction area shall be kept sufficiently dampened to control dust caused by grading and hauling, and at all times provide reasonable control of dust caused by wind.
 - All clearing, earth moving, or excavation activities shall be discontinued during periods of high winds (i.e., greater than 15 mph), so as to prevent excessive amounts of dust.
 - All dirt/soil loads shall be secured by trimming, watering or other appropriate means to prevent spillage and dust.
 - All dirt/soil materials transported off-site shall be either sufficiently watered or securely covered to prevent excessive amount of dust.
 - General contractors shall maintain and operate construction equipment so as to minimize exhaust emissions.
 - Trucks having no current hauling activity shall not idle but be turned off.
- **Regulatory Compliance Measure RC-AQ-2:** In accordance with Sections 2485 in Title 13 of the California Code of Regulations, the idling of all diesel-fueled commercial vehicles (weighing over 10,000 pounds) during construction shall be limited to five minutes at any location.
- **Regulatory Compliance Measure RC-AQ-3:** In accordance with Section 93115 in Title 17 of the California Code of Regulations, operation of any stationary, diesel-fueled, compression-ignition engines shall meet specified fuel and fuel additive requirements and emission standards.
- **Regulatory Compliance Measure RC-AQ-4:** The Project shall comply with South Coast Air Quality Management District Rule 1113 limiting the volatile organic compound content of architectural coatings.
- **Regulatory Compliance Measure RC-AQ-5:** The Project shall install odor-reducing equipment in accordance with South Coast Air Quality Management District Rule 1138.
- **Regulatory Compliance Measure RC-AQ-6:** New on-site facility nitrogen oxide emissions shall be minimized through the use of emission control measures (e.g., use of best available control technology for new combustion sources such as boilers and water heaters) as required by South Coast Air Quality Management District Regulation XIII, New Source Review.
- **Regulatory Compliance Measure RC-GEO-1 (Seismic):** The design and construction of the project shall conform to the California Building Code seismic standards as approved by the Department of Building and Safety.
- **Regulatory Compliance Measure RC-NO-1 (Demolition, Grading, and Construction Activities):** The project shall comply with the City of Los Angeles Noise Ordinance and any subsequent ordinances, which prohibit the emission or creation of noise beyond certain levels at adjacent uses unless technically infeasible.

Traffic - A traffic study was prepared by Linscott Law & Greenspan, dated September 26, 2019 analyzed the proposed project and determined that the project is forecast to generate a net increase of 372 daily trip ends during a typical weekday, 38 vehicle trips during the weekday a.m. peak hour, and 25 vehicle trips during the weekday p.m. peak hour. The traffic analysis accounts for ambient growth factors based on a 1.0 percent annual growth and in addition to trips resulting from other development projects that are located within the study area. The Department of Transportation (LADOT) reviewed the traffic study and confirmed its findings in a memo dated October 22, 2019, confirming that none of the study intersections would be significantly impacted by project-related traffic. Therefore, the project will not have any significant impacts relating to traffic.

Noise – The Project must comply with the adopted City of Los Angeles Noise Ordinances No. 144,331 and 161,574 and LAMC Section 41.40 as indicated above in RC-NO-1, LAMC Section 112.05, as well as any subsequent Ordinances, which prohibit the emission or creation of noise beyond certain levels. These Ordinances cover both operational noise levels (i.e., post-construction), and any construction noise impacts. As a result of this mandatory compliance, the proposed Project will not result in any significant noise impacts. Furthermore, the Noise Impact Analysis prepared by DKA Planning dated November 2019 confirmed that the Project would not result in construction-related or operational noise impacts on the environment. The analysis took into account noise from construction activities, operational noise sources from mechanical equipment, parking and auto-related activities, human conservation and activities, recreation facilities, landscape maintenance, trash collection, vibration, impacts to sensitive receptors. The analysis concluded that the project would not result in any significant effects relating to noise.

Air Quality – The Project's potential air quality effects were evaluated by estimating the potential construction and operations emissions of criteria pollutants, and comparing those levels to significance thresholds provided by the Southern California Air Quality Management District (SCAQMD). The Project's emissions were estimated using the CalEEMod 2016.3.2 model (output October 29, 2019) for the purposes of evaluating air quality impacts of proposed projects and summarized in the Air Quality Technical Report prepared by DKA Planning dated November 2019. The analysis took into account construction activity emissions during demolition, grading building construction, and architectural coating, as well as effects to sensitive receptors. The analysis confirms that the Project would not exceed SCAQMD significance thresholds for air quality impacts. In addition, there are several Regulatory Compliance Measures which regulate air quality-related impacts for projects citywide as noted above.

(e) The site can be adequately served by all required utilities and public services.

The project site will be adequately served by all public utilities and services given that the construction of a multi-family residential building will be on a site which has been previously developed and is consistent with the General Plan.

Therefore, the project meets all of the Criteria for the Class 32 Categorical Exemption.

CEQA Section 15300.2: Exceptions to the Use of Categorical Exemptions

There are five (5) Exceptions which must be considered in order to find a project exempt under Class 32:

- (a) **Cumulative Impacts.** *All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant.*

There is not a succession of known projects of the same type and in the same place as the subject project.

There is a proposed project approximately one-half mile from the subject site, located at 2111-2139 South Pacific Avenue (Case No. CPC-2019-4884-CUB-CB-SPR), which is proposed for the construction of a 4-story mixed-use building containing 100 dwelling units and approximately 1,997 square feet of ground-floor retail. However, the project at 2111-2139 South Pacific Avenue is not adjacent to nor within 500 feet of the subject site, and does not constitute a project in the same type and same place as the subject project.

Both projects would be subject to the citywide Regulatory Compliance Measures as noted above, which regulate impacts related to air quality, noise, and geology to a less than significant level. The traffic study prepared by Linscott Law & Greenspan, dated September 26, 2019, accounts for ambient growth factors based on a 1.0 percent annual growth and in addition to trips resulting from other development projects that are located within the study area (including the project located at 2111-2139 South Pacific Avenue and 7 other projects either proposed or under construction), and concluded no traffic impacts. The Department of Transportation (LADOT) reviewed the traffic study and confirmed its findings in a memo dated October 22, 2019, which included standard conditions for a construction work site traffic control plan and limiting construction-related traffic to off-peak hours. There is no evidence to conclude that significant impacts will occur based on past project approvals or that the proposed Project's impacts are cumulatively considerable when evaluating any cumulative impacts associates with construction noise and transportation/traffic in the surrounding area.

- (b) **Significant Effect Due to Unusual Circumstances.** *A categorical exemption shall not be used for an activity where there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.*

The project proposes a multi-family building in an area zoned and designated for such development. All adjacent lots are developed with multi-family and single-family residential and commercial uses, and the subject site is of a similar size and slope to nearby properties. The project proposes a Floor Area Ratio (FAR) of 2.65:1 on a site that is permitted to have an FAR of 1.5:1 by the site's zoning and 3:1 through an On-Menu Density Bonus Incentive. The project size and height is not unusual for the vicinity of the subject site, and is similar in scope to other existing multi-family dwellings and proposed future projects in the area. Furthermore, there is no substantial evidence in the administrative record that this project will cause a significant impact. Thus, there are no unusual circumstances which may lead to a significant effect on the environment.

- (c) **Scenic Highways.** *A categorical exemption shall not be used for a project which may result in damage to scenic resources, including but not limited to, trees, historic buildings, rock outcroppings, or similar resources, within a highway officially designated as a state scenic highway.*

The only State Scenic Highway within the City of Los Angeles is the Topanga Canyon State Scenic Highway, State Route 27, which travels through a portion of Topanga State Park. The State Route 27 is approximately 27 miles northwest of the subject site. Therefore the subject site will not create any impacts within a designated as a state scenic highway.

- (d) **Hazardous Waste Sites.** *A categorical exemption shall not be used for a project located on a site which is included on any list compiled pursuant to Section 65962.5 of the Government Code*

According to Envirostor, the State of California's database of Hazardous Waste Sites, neither the subject site, nor any site in the vicinity, is identified as a hazardous waste site.

A Phase I Environmental Site Assessment ("ESA") Report prepared by Priority 1 Environmental dated December 28, 2018 for 1309-1323 South Pacific Avenue included reviewing available environmental related information concerning the property and other data; conducting a site visit to observe current site uses, observing adjacent land uses, and gathering data on possible spills or misuse of chemicals that could be considered a Recognized Environmental Concern ("REC"); and reviewing regulatory files regarding the property. The ESA revealed no evidence of RECs in connection with the property, with the exception of historical records indicating that a drycleaners operated at 1311 South Pacific Avenue from 1946 to 1957 (possibly earlier), therefore the use of drycleaning chemicals prior to LAFD regulatory oversight constitutes a potential release. The ESA recommended a limited subsurface soil and soil vapor investigation at 1311 South Pacific Avenue to determine if the historical use as a drycleaners has impacted the property. A Phase II Environmental Site Assessment Report prepared by Priority 1 Environmental dated January 23, 2019 evaluated the subsurface soil vapor and soils in the area of the former drycleaners that was previously on the subject site at 1309-1311 South Pacific Avenue. The gas sampling and soil sampling indicated that only low levels of tetrachloroethane ("PCE") were detected in one soil vapor sample, and is not a significant release to the environment. The Phase II ESA concluded that concerns for the proposed multi-family redevelopment would be resolved by the excavation of the proposed subterranean parking.

A Phase I ESA prepared by Priority 1 Environmental dated August 3, 2018 for 1331-1337 South Pacific Avenue included reviewing available environmental related information concerning the property and other data; conducting a site visit to observe current site uses, observing adjacent land uses, and gathering data on possible spills or misuse of chemicals that could be considered a Recognized Environmental Concern ("REC"); and reviewing regulatory files regarding the property. The ESA revealed no evidence of RECs in connection with the property, with the exception of the historical use of a gasoline service station on site from 1920 to 1959. A Phase II Environmental Site Assessment Report prepared by Priority 1 Environmental dated September 7, 2018 evaluated the subsurface soils in the area of the former gasoline service station that was previously on the subject site, and the suspected underground storage tank that was suspected to be in the center of the property. The soil sampling indicated that contaminants above the regional screening levels were not detected, and that the suspected UST should be confirmed and if confirmed, the City of Los Angeles Fire Department ("LAFD") should be contacted and the UST should be removed per LAFD requirements. The report was reviewed by the LAFD and forwarded to the Los Angeles Regional Water Quality Control Board ("LARWQCB"). In a memorandum dated August 22, 2019, the LARWQCB indicated that the residual concentrations of fuel constituents pose a low threat to human health, and soil and groundwater quality beneath the site, and that no further action is required.

- (e) **Historical Resources.** *A categorical exemption shall not be used for a project which may cause a substantial adverse change in the significance of a historical resource.*

The project site is not listed in the National Register of Historic Places, California Register of Historical Resources, the Los Angeles Historic-Cultural Monuments Register, and/or any local register, and was not found to be a potential historic resource based on the City's HistoricPlacesLA website or SurveyLA, the citywide survey of Los Angeles.

A Historical Resource Evaluation Report prepared by Galvin Preservation Associates ("GPA") Consulting, dated November 2019, indicated that a records search prepared by the South Central Coastal Information Center ("SCCIC") revealed a potential prior evaluation of 1309-1311 South Pacific Avenue and 1331 South Pacific Avenue. The properties have a Status Code of 5S2 (individual property that is eligible for local listing or designation), however, no other details or further documentation was available as part of the record search results. Since no date of evaluation was given, it was assumed that the evaluation was at least five years old, and the properties required re-evaluation. The report evaluated all buildings on the Project site as individual potential historical resources as defined by CEQA. The surrounding area was not examined as a potential historic district for the purposes of this report. It was not recorded as a potential historic district during SurveyLA. Although the area developed as San Pedro's commercial corridor in the 1920s, it does not retain the integrity of setting and feeling needed to convey a sense of a discrete time and place. After careful inspection, investigation, and evaluation, GPA concluded that none of the properties appear to be eligible for listing in the National Register of Historic Places or California Register of Historical Resources, or for designation as a Los Angeles Historic-Cultural Monument due to a lack of significance, architectural distinction, and physical integrity. Furthermore, the properties do not contribute to a potential historic district. Therefore, the properties are not historical resources as defined by CEQA. As such, the Project would have no impact on historical resources and no further study is recommended or required. The report was reviewed by the Office of Historic Resources and accepted per correspondence dated December 24, 2019. Based on this, the project will not result in a substantial adverse change to the significance of a historic resource and this exception does not apply.

PUBLIC HEARING AND COMMUNICATIONS

PUBLIC HEARING

The public hearing was held on January 16, 2020 at approximately 10:00 a.m. at San Pedro Municipal Building, 638 South Beacon Street, Room 452, San Pedro, CA 90731. The hearing was conducted by the Hearing Officer, Connie Chauv, on behalf of the City Planning Commission in taking testimony for Case No. CPC-2019-4908-DB-SPR and ENV-2019-4909-CE. All interested parties were invited to attend the public hearing at which they could listen, ask questions, or present testimony regarding the project. The purpose of the hearing was to obtain testimony from affected and/or interested parties regarding this application. Interested parties are also invited to submit written comments regarding the request prior to the hearing. The environmental impact was among the matters to be considered at the hearing. The hearing notice was mailed on December 20, 2019, published in the newspaper on December 23, 2019, and posted on-site on January 3, 2020, in accordance with LAMC noticing requirements.

The public hearing on January 16, 2020 was attended by the applicant's representative (Jonathan Lonner), approximately 45 constituents from the community including representatives from 3 of the local Neighborhood Councils (Central San Pedro Neighborhood Council, Coastal San Pedro Neighborhood Council, Northwest San Pedro Neighborhood Council), and a representative from the Council District 15 office. 14 speaker cards were submitted for the hearing, including 3 marked in support of the project, 6 in opposition of the project, and 2 with general comments.

Applicant Presentation. The applicant's representative described the site location, project description, requested entitlements, environmental technical studies, and community outreach.

- The project tries to blend the recently adopted CPIO and provide affordable housing through state density bonus program
- The applicant went door to door community outreach and neighborhood council.
- The concerns from community stem from the ongoing right-sizing of developments throughout the city. Height, density, parking are always charged issues, and always lead to fruitful conversations.
- Ongoing conversations have led to support by neighborhood council and constituencies
- Council Office understands some are from state enacted legislation that is aimed at providing larger breadth of housing opportunities for wider variety of affordable housing levels. They are also supportive as it is in keeping with state and local density bonus and local zoning requirements.
- Pacific Avenue is the primary frontage per the CPIO. Building is supposed to address Pacific as if it is the primary frontage. The LAMC differs and looks to the shortest side of property facing street (14th Street). This front yard identifies the rear yard as adjacent to commercial building. Building is designed per CPIO to have Pacific as primary frontage. 5-yard rear setback really functions as side yard with adjacent commercial property.
- The identification of the northerly yard as side yard does not allow open space to be counted towards open space requirements. Project is still providing the 10,900 square feet of open space, but the portion in the yard cannot count towards the code requirements.
- State density bonus allows developers to request incentives in exchange for providing affordable housing on-site.
- Building height request is in order to provide requisite amount of floor-to-ceiling heights for affordable units and density bonus units. Height request is also due to CPIO requirement for ground floor to have 14 feet clear from grade to ceiling. Original submittal to the City was for 3 feet to be sunken into the ground in order to have only an on-menu incentive and still comply with CPIO, however they decided to bring that up for pedestrian accessibility, and make units directly accessible for grade, better for anchor for activity

along the street, transparency, direct windows and glazing along both frontages to better create lively community along Pacific

- FAR increase allows for creation of units to be affordable and constructed by developer in exchange for units. FAR request fluctuates from type of units being provided. The project is providing more larger-sized units rather than efficiency/studio units, which requires more floor area.
- Minimum amount of affordability required for density bonus. They are providing full amount of Very Low Income to satisfy minimum requirements and housing policy of City. 12 Very Low Income units allow them to request the deviations
- Goal of CPC and city policy is to right-size transportation for the city, not to incentivize new parking spots, but encourage people through unbundling and minimum parking to seek alternative routes. We have Metro Silver and Local 205 bus that is within proximity which allows AB 744 state parking reduction to for 0.5 parking stalls per bedroom. Goal of CPC is to right-size parking stalls. There is transportation, growth in jobs at port and San Pedro, and multi-modal transportation including bikes, carpool, Uber, Lyft, vanpool.
- Units will bring working professionals that will use multi-modal transportation, so they will not be parking in the neighborhood or own cars. Parking is not amenity anymore.

Central San Pedro Neighborhood Council

- The project will be a good addition to the Pacific Avenue corridor redevelopment area.
- The project massing and articulation is appropriate.
- Appreciates the reduced side yard setback on the commercial side instead of the residential side.
- The project provided more than minimal parking required which is a good approach.
- The project will provide additional transportation options to tenants.
- The Neighborhood Council submitted a letter of support to project

Coastal San Pedro Neighborhood Council

- The Neighborhood Council supports the project but is concerned about precedent set for huge discretionary project in return for only 10% affordable units.
- The Joint San Pedro Land Use Committees met and discussed wanting developers to provide 20% affordable units instead of the 10% proposed.
- The project is requesting 77% higher FAR, 20% open space reduction, 50% height increase. They are asking for well over 35% and it is discretionary. They should find a middle ground so as to not set a dramatic precedent

Northwest San Pedro Neighborhood Council

- The Neighborhood Council generally supports the project.
- The project will enhance the neighborhood and help to extend the transformation of Downtown San Pedro to the Pacific Avenue corridor.
- The site is more challenging but is thankful the developer is interested.
- She did not review the Negative Declaration.
- She supports reduced setback request for commercial instead of homes.
- She supports larger units because most projects have very small units.
- The project approval should include conditions: children's plan area, installation of solar not just solar-ready, installation of flashing lights at 13th and Pacific, attractive signage, and planting to be consistent with San Pedro Greening Plan.
- This is a major route to school and is a dangerous intersection, so flashing lights will help with safety

Comments in Support of the Project:

- Understands concerns from other neighbors but there should be compromise.
- The developer is coming in to take a chance on San Pedro, which is good for the community.
- The project will make this area more safe, revitalize the Downtown corridor, and will make it livable and walkable.
- Young adults are looking for affordable apartments so they don't have to move out of San Pedro. They are in their 20s and use alternative means of transportation, share cars, Uber, Lyft, scooter, walk. Parking is not really an issue. They could add parking if needed but there is alternative transportation.
- They envision a San Pedro that is livable, walkable, with amenities of coffee shop, restaurant, or dry cleaner.

Comments in Opposition of the Project:

- **Environmental:**
 - CEQA is an important and legal obligation. The Categorical Exemption is only for benign infill projects that comply with zoning requirements, but this project is requesting Density Bonus incentives.
 - The city criteria requires an air quality study as a project over 80 units or 20,000 cubic yards, and a traffic study if adding 43 peak hour trips. The Categorical Exemption should not be allowed since it escapes oversight and studies.
 - The export of 20,000 cubic yards of soil would create traffic. There should be a full assessment and Phase I because of the excavation.
- **Cumulative Impacts:**
 - The developer proposes a second equal-sized project 7 blocks away. This will set a precedent for several other projects coming down the line.
 - There will be cumulative impacts for parking, traffic, air quality, and safety.
 - All projects have to be weighed/analyzed as group projects for one street. It is erroneous to analyze the one project by itself. One project may not have significant impact but could if combined with others.
- **Density:** The developer is trying to jam units in both sites to maximize profit, and doesn't care for the traffic or parking needs in the community.
- **Parking/Transit:**
 - There is not enough parking. Project will cause traffic.
 - The DASH Silver Line is not a metro it is only a bus. It takes a certain amount of people every 20 minutes, and it doesn't go Downtown.
 - There is no direct bus - you have to change buses and take local. The public transportation system is not adequate and doesn't serve many people.
 - People work in Irvine or Torrance or Los Angeles, and it is very difficult to get there on public transportation.
 - Alternative routes would need to be built. Pacific Avenue is a transit corridor, but no one rides buses, and the buses only have 2 bike racks.
 - Free public transportation is the only way to get people out of cars.
- **Infrastructure:** There are cumulative impacts on infrastructure. The sewage and electrical infrastructure is already overloaded. Who is paying for the infrastructure upgrade?
- **Affordable:** The project should provide more affordable housing because that is the type of housing needed in San Pedro. They don't need and cannot afford market-rate housing. The project is only providing 10% affordable. The Neighborhood Council passed a resolution for projects to have 15% low income housing on all new development.
- **Massing/Height:** The building is massive and will block the sunset from mountains.
- **Compatibility:** The development needs to be scaled back or it won't fit in San Pedro. The project is architecturally inconsistent with everything else on Pacific. It looks like public housing. The project is requesting too many waivers and discretionary entitlements, which

should not be granted. This goes above and beyond the CPIO, and does not fit with character or quality of the community.

- **Historic:** The project needs to preserve the pharmacy façade and Dancing Waters façade to honor historic character.
- **Amenities:**
 - The project should provide community-serving uses, similar to the San Pedro Waters music venue and ice cream shop that used to be on site.
 - The project should provide ground-floor retail or business like a music venue or restaurant with outdoor space. This would be better than having someone's window on Pacific Avenue.
 - The project should provide a children's play area, or allow public access to the rooftop.
- **Jobs:** San Pedro does not have an influx in jobs. Jobs at the port are extremely limited.

General Comments:

- Development and improvement of Pacific Avenue is welcome, appreciated, and needed, but there are issues with the proposed project. They need a developer to provide what the community needs.
- People who tend to develop in San Pedro don't live here and understand what it is.
- The bike lanes on Pacific Avenue already cause traffic problems, even without the new development.
- People will move in and out because of poor quality of life.
- During the 1980s building binge, they built residential on commercial properties with no ground floor retail. We need to preserve ground floor retail.
- The CRA board had guidelines for downtown area which are now archived at LADBS, for historic preservation of facades, creating low income housing, scale of development. There are CRA guidelines for ground floor retail.
- Housing crisis is community crisis and we need to work together to resolve unique issues. There is an exponential growth in homelessness. They are moving homeless out of the area with bulldozers, garbage trucks, police, every week.
- The project funding comes from crowdsource funding scheme in Washington DC to obtain largest return with zero stake in community.
- The rendering doesn't accurately depict Pacific Avenue. It shows 2 lanes of traffic which is not correct, there is only 1 lane in each direction.

Council District Office:

- The project will economically benefit Pacific Avenue corridor and will revitalize Downtown San Pedro.
- The Council Office understands concerns about parking and density, however the project benefits outweigh the concerns.
- The Council Office is in support of the project.

Applicant's Response to Public Comments:

- The project will provide 12% of base units to be affordable, not 10%.
- The project requests a 20% reduction in open space, but the amount of open space is still provided per code. The reduction is needed because of the configuration of the open space in the original rear yard, which is now identified as the side yard and cannot count as open space.
- The Class 32 Categorical Exemption for urban infill is not merely a form that is filled out that absolves them of environmental review. It still requires testing, review, and submittal to agencies, for conformance with Class 32 to be made. The applicant completed a Phase I and Phase II environmental site assessment, traffic study with LADOT which determined it was under the threshold, greenhouse gas and air quality study, noise modeling, historical

analysis of the buildings on-site which were submitted to the CRA and Office of Historic Resources. The data shows that the project complies with the Class 32 requirements, and that an MND or ND or EIR are not required, and was included in the request to be identified as urban infill.

- The applicant will look into the request for children's play area, photovoltaic, flashing lights, traffic signage, and planting consistent with the San Pedro Greening Plan.
- The plans were revised to show that the rooftop will be consistent with CPC guidelines for photovoltaic and solar installation. They will provide updated documentation to file.
- LADOT typically does not like flashing lights and crosswalks because they are not as noticeable during daylight hours. The applicant will check with LADOT.
- The site is allowed to have 100% retail, so no ground floor retail is proposed. This does not prohibit people renting ground floor unit for home-based unit or live/work unit. It is not designated as live/work since some tenants may not want or need it.
- The two projects are approximately one-half mile or 7 blocks from each other, from two separate entities with common developer lenders. The testing groups that did the greenhouse gas, air quality, noise, and traffic studies did not see cumulative impacts. Both projects were submitted at same time, so staff knew of the other project, and did not see cumulative impacts. The applicant is happy to review this again. Cumulatively, the project is under the 4-acre threshold for the Class 32 Categorical Exemption, so it is still the appropriate mechanism. Receptors in the neighborhood took noise readings. They did address projects in proximity to another.
- Out of the 127 parking spaces total, 5% or 7 stalls will be for EV charging, and 20% or 27 stalls will be EV-capable with conduit so that a charger can be added at later date if needed.
- The original project size and unit count had a distribution of units that did not address market reality – their glazing, access, ventilation, ease of living habitability was not ideal. The applicant decided to eliminate those units for better flexibility for redesigning more livable habitable units around it. This reduced the overall unit count, but did not result in substantial changes in floor area. Where they went from studios, they added livable area into one-bedroom or den, with no external changes.
- The applicant did community outreach and walked the neighborhood, and will provide dates. They typically prepare a flyer that identifies the project, includes a rendering, and lists contact information for the representative. They typically walk on weekends in the middle of the day to capture people at home, leave flyers, and return if there was no one there. They do this prior to the Neighborhood Council outreach.
- AB 744 allows mixed-income units within proximity to transportation to take a parking reduction to one-half space per bedroom. For the 132 bedrooms, 66 spaces are required, and they are providing 127 parking spaces.
- The project will require a maximum export of 20,000 cubic yards of soil. Projects in the Special Grading Area require a haul route hearing with the Board of Building and Safety Commissioners to identify the haul route, notice a 300 foot radius, send notifications to Bureau of Street Service and Department of Transportation.

WRITTEN CORRESPONDENCE

Planning Staff received one (1) letter in support from the Neighborhood Council and four (4) emails and letters in opposition of the project (see Exhibit E), as follows:

San Pedro Neighborhood Council

- The project will transform this portion of the Pacific Avenue corridor.
- We are encouraged that the project will provide more than the minimum number of required parking spaces.
- We support the project, including the request for a reduced setback at the north end of the property in exchange for greater setback where the property abuts homes, with the following recommendations:
 - Include a children's play area in the open space provided at the rear of the property with perhaps a sandbox, climbing equipment, and tricycle path;
 - Provide attractive project signage to reflect the commercial nature of the neighborhood and to enhance the visual streetscape;
 - Install solar, not just be solar ready; and
 - Install flashing lights on the crosswalks at 13th and Pacific.

Comments in Opposition

- The same developers are proposing another 100-unit building just seven blocks away at 2111-2139 South Pacific Avenue. The combined effects of these two projects in traffic, air quality, and other community impacts must be carefully studied. Piecemealing development in order to avoid environmental impact studies regarding cumulative effects is illegal.
- The developers' self-assessment is misleading and insufficient.
- There are already significant traffic issues here. During peak hours it's difficult to reach the freeway in a reasonable amount of time because of congestion. Drivers regularly circle surrounding blocks looking for street parking.
- A traffic study is necessary to analyze the viability and safety of the project, and the cumulative effect of traffic caused by both projects.
- The project does not appear to qualify for a CEQA exemption. The project exceeds the 80-unit limit for air quality analysis. The soil removal should be analyzed carefully, as the number of parking spaces increased from the original filing. Airborne particulates are already extremely high in San Pedro and neighborhoods surrounding the Port. Our community has some of the highest childhood asthma rates in the city.
- The density bonus increase is unwarranted. There is a high number of vacancy rates for market-rate housing in San Pedro.
- The project should double the number of affordable units due to the serious affordable housing shortage in the city.
- The FAR should be in keeping with the current standards in the C2-1XL-CPIO zone and Community Plan, to be in sync with the long-term vision and plan for the community.
- The community deserves more open space – the minimum required by LAMC Section 12.21 G should be the baseline.
- The height increase is not in keeping with the surrounding one and two story homes and maximum three-story apartments in the area. Three stories is suitable for the neighborhood and will help scale the project back to a more appropriate size.
- We want growth, improvement, positive, thoughtful, sustainable, self development. We do not want unrestrained development that does not serve the needs of the community and circumvent CEQA and city standards.
- The developers' funding comes from a crowdsourced investment scheme based in Washington, DC. They have zero stake in the community. Their low budget design crams 100 units into one block.

- Who will pay the infrastructure upgrade needed for this density increase? Sewage and electrical systems are already overloaded.
- The cumulative impacts of the multiple projects are not being addressed. There could be up to 400 additional cars along this seven-block area of Pacific Avenue, which is a tsunami evacuation route.
- Only a small proportion of units are for low income housing. The majority of the project is market-rate, yet new developments in San Pedro still remain vacant.
- The exemptions and concessions would enable them to avoid city and state regulations, and bypass environmental review, traffic planning, noise, air quality, and parking impact studies.
- If the exemptions are allowed, this would set a precedent for continued exemptions on all future projects.
- The applicant should clarify the number of cubic yards of soil to be removed from the project.

APPENDIX A – ENVIRONMENTAL STANDARDS

OVERVIEW

As described in Section I-8 of the San Pedro CPIO District, these Environmental Standards Procedures are included to implement the Mitigation & Monitoring Program included as part of the San Pedro Community Plan Update and reviewed in the San Pedro Community Plan Environmental Impact Report (No. ENV-2009-1558-EIR), certified on October 4, 2017 (San Pedro EIR). As described in this Appendix A, some mitigation measures were implemented through Supplemental Development Standards.

In addition to Projects in Subareas that are required to comply with these Environmental Standards, any other discretionary project in the boundaries of the San Pedro Community Plan Area that seeks to rely on the San Pedro EIR for its CEQA clearance (including through tiering, preparing an addendum, supplemental EIR, or a statutory infill exemption), may incorporate or impose the following Environmental Standards on the project (and any Supplemental Development Standard identified as a San Pedro EIR mitigation measure).

Compliance may be achieved through covenants, plan notations, or other means determined reasonably effective by the Director of Planning or the decision-maker. The City may require the applicant to hire or pay for a qualified environmental professional(s) to monitor, verify, and/or certify compliance with any or all of the Environmental Standards.

AESTHETICS

AE1 Projects shall be designed to ensure the following:

- a. All lighting be directed and/or shielded to minimize lighting spillover effects onto adjacent and nearby properties.

NOTE: MM4 1-1 required that the CPIO District include regulations that minimize site specific aesthetic impacts, including impacts to lighting and shading. In addition to the above environmental standard, this mitigation measure is implemented by the design standards in the CPIO District in Section 2 of Chapters II-VI related to building height, density, disposition, and design and signage.

AIR QUALITY / GREENHOUSE GAS EMISSIONS

AQ1 Projects shall require the following or comparable best management practices be included in contract specifications and/or printed on plans:

- a. Use properly tuned and maintained equipment.
- b. Construction contractors shall enforce the idling limit of five minutes as set forth in the California Code of Regulations.
- c. Use diesel-fueled construction equipment to be retrofitted with after treatment products (e.g. engine catalysts) to the extent they are readily available and feasible.
- d. Use heavy duty diesel-fueled equipment that uses low NO_x diesel fuel to the extent it is readily available and feasible.

San Pedro CPIO District

44

APPENDIX A – ENVIRONMENTAL STANDARDS

- e. Use construction equipment that uses low polluting fuels (i.e. compressed natural gas, liquid petroleum gas, and unleaded gasoline) to the extent available and feasible.
- f. Maintain construction equipment in good operating condition to minimize air pollutants.
- g. Construction contractors shall utilize materials that do not require painting, as feasible.
- h. Construction contractors shall use pre-painted construction materials, as feasible.
- i. Construction contractors shall provide temporary traffic controls such as a flag person, during all phases of construction to maintain smooth traffic flow.
- j. Construction contractors shall provide dedicated turn lanes for movement of construction trucks and equipment on- and off-site, as feasible.
- k. Construction contractors shall reroute construction trucks away from congested streets or sensitive receptor areas, as feasible.
- l. Construction contractors shall appoint a construction relations officer to act as a community liaison concerning on-site construction activity including resolution of issues related to PM₁₀ generation.

AQ2 Construction projects greater than 5 acres shall submit an air quality study that discuss the project's potential emissions for the following: CO, NO_x, PM₁₀, and PM_{2.5}.

AQ3/GHG1 Projects shall incorporate the following greenhouse gas reduction measures into the project design.

- a. For non-residential Projects: all outdoor lighting systems shall be directed away from the window of any residential uses and shall comply with the non-residential Light Pollution Reduction standards in the Green Building Code of the Municipal Code.
- b. For non-residential Projects: whenever new fixtures are installed, all water closets, urinals, shower heads, faucets and dishwashers shall be High Efficiency fixtures installed in accordance with the regulations of the City's Water Conservation Ordinance.
- c. For Multi-Family and Commercial Projects: parking facilities shall have five percent of the total parking spaces, but not less than one space, capable of supporting future Electric Vehicle Supply Equipment (EVSE) charging locations.

San Pedro CPIO District

45

APPENDIX A – ENVIRONMENTAL STANDARDS

NOISE

N1 Projects shall include the following or comparable construction best management practices in contract specifications and/or printed on plans:

- a. Construction haul truck and materials delivery traffic shall avoid residential areas whenever feasible. If no alternatives are available, truck traffic shall be routed on streets with the fewest residences.
- b. The construction contractor shall locate construction staging areas away from sensitive uses.
- c. When construction activities are located in close proximity to noise-sensitive land uses, noise barriers (such as, temporary walls or piles of excavated material) shall be constructed between activities and noise sensitive uses.
- d. Impact pile drivers shall be avoided where possible in noise-sensitive areas. Drilled piles or the use of a sonic vibratory pile driver are quieter alternatives that shall be utilized where geological conditions permit their use. Noise shrouds shall be used when necessary to reduce noise of pile drilling/driving.
- e. Construction equipment shall be equipped with mufflers that comply with manufacturers' requirements.
- f. The construction contractor shall consider potential vibration impacts to older (historic) buildings.

UTILITIES/SERVICE SYSTEMS

US1 Projects shall incorporate water conservation measures into the project design, which may include but are not limited to measures identified in the City's Water Conservation Ordinance.

US2 Projects shall incorporate the Solid Waste Integrated Resources Plan measures to maximize source reduction and materials recovery and minimize the amount of solid waste requiring disposal with the goal of leading the City to achieve zero waste by 2025.

US3 Projects shall incorporate energy conservation and efficiency measures into the design of new development, including but not limited to:

- a. Energy saving windows, doors, insulation and passive solar design;
- b. Energy efficient fixtures and appliances;
- c. Efficient lighting, heating, air and ventilation systems;
- d. Reused or recycled building materials.

GRAND AVENUE

SOUTH PACIFIC AVENUE

A.C. PAVEMENT

GENERAL NOTES

- THIS PLAN TO BE READ IN CONJUNCTION WITH THE OTHER SHEETS IN THIS SET.
- ALL WALL SURFACES PHYSICALLY EXPOSED TO THE PUBLIC AT GROUND LEVEL SHALL BE APPLIED WITH TWO (2) COATS OF "ANTI-GRAFFITI CLEAR COAT 1033" BY NATIONAL PAINT CO. INC. OR APPROVED EQUAL.
- FENCES, PLANTERS AND RETAINING WALLS IN THE REQUIRED FRONT YARD SHALL BE A MAXIMUM 3'-6" MEASURED FROM THE ADJACENT NATURAL GRADE.
- ALL STEPS, STAIRS SHALL BE PROVIDED WITH 2'-10" HIGH HANDRAIL.
- PROVIDE LOW COST CONSUMPTION WATER CLOSETS FOR ALL NEW CONSTRUCTION. EXISTING SHOWER HEADS AND TOILETS MUST BE ADAPTED FOR LOW WATER CONSUMPTION.
- PROVIDE APPROVED SPRINKLER SYSTEM. FIRE SPRINKLER MUST BE APPROVED BY THE PLUMBING DIVISION PRIOR TO INSTALLATION.
- ALL RETAINING WALLS LOCATED CLOSE TO THE PROPERTY LINE OF AN ADJACENT NEIGHBOR SHALL BE NO HIGHER THAN THE HEIGHT OF THE WALL. THE REQUIRED OF THE REQUIRED BACKFILL NO LATER THAN 10 DAYS AFTER CONSTRUCTION OF THE WALL AND THE NECESSARY STRUCTURAL SUPPORTING MEMBERS UNLESS RECOMMENDED OTHERWISE BY THE RESPONSIBLE ENGINEER.
- PLANTER ON GRADE MUST BE A MAXIMUM OF 3'-6" HIGH AT FRONT YARD. REFER TO STRUCTURAL DRAWINGS FOR DETAILS.
- CONCRETE SLAB ON GRADE REFER TO STRUCTURAL DETAILS.
- 42" GUARDRAIL IN 2" SO. STEEL FRAME WITH 1/4" SQ. AT 6" O.C.
- 6'-0" HIGH OF 6" THICK MASONRY BLOCK WALL FENCE AT SIDE YARD. UNDER SEPARATE PERMIT.
- ALL CONCENTRATED DRAINAGE INCLUDING ROOF WATER SHALL BE CONDUCTED TO THE STREET IN AN APPROVED DEVICE AT 2X MINIMUM.
- THE BUILDING SHALL HAVE WATER CLOSETS (TOILETS) WHICH USE NO MORE THAN 1.5 GALLONS PER FLUSH. (P.C. 91.3).
- MECHANICAL PERMIT FROM MECHANICAL BUREAU HEATING DIVISION IS REQUIRED PRIOR TO INSTALLATION OF FACTORY BUILT CHIMNEYS AND FIREPLACES.
- OWNER WILL EQUIP ALL SHOWERS WITH LOW-FLUSH SHOWER HEADS.
- TEMPORARY PEDESTRIAN SHALL BE PROVIDED AS REQUIRED BY SECTION 303.7.
- GRAFFITI REMOVAL AND DETERRENCE: THE OWNER, ALL SUCCESSORS SHALL ACKNOWLEDGE APPLICABILITY OF THE GRAFFITI REMOVAL AND DETERRENCE REQUIREMENTS OF THE MUNICIPAL CODE THIS PROJECT AS CONTAINED IN SECTION 91.810(F), 91.890.1 AND 91.1710(E), PARTICULARLY WITH REGARD TO THE FOLLOWING:
 - THE FIRST NINE FEET OF EXTERIOR WALLS AND DOORS, MEASURED FROM GRADE, AND ALL OF ANY WALLS ENCLOSING THE PROPERTY SHALL BE BUILT AND MAINTAINED WITH GRAFFITI RESISTANT FINISH (LARR #25080) CONSISTING OF EITHER A HARD SMOOTH, IMPERMEABLE SURFACE SUCH AS CERAMIC TILE, BAKED ENAMEL OR A RENEWABLE COATING OF AN APPROVED, ANTI-GRAFFITI MATERIAL OR A COMBINATION OF BOTH (91.170(C)); AND
 - THE PERIOD FOR COMPLIANCE WITH GRAFFITI REMOVAL ORDER ISSUED BY THE BUILDING AND SAFETY DEPARTMENT IS 15 DAYS FOLLOWING WHICH PERIOD WITH FAILURE TO PERFORM, THE CITY OR ITS CONTRACTOR IS EMPOWERED TO ENTER UPON THE PREMISES TO REMOVE SUCH GRAFFITI WITH COSTS ACCRUING TO THE OWNER (91.890.1); AND
 - THE PERIOD FOR COMPLIANCE WITH A SUBSEQUENT ORDER FOR A SUBSEQUENT OCCURRENCE IS THREE DAYS (91.890.0B); AND
- IN ADDITION TO A, B, AND C ABOVE, EXTERIOR WALLS OF NEW COMMERCIAL AND RESIDENTIAL BUILDINGS OF OTHER THAN CLASS MAY BE COVERED WITH CLIMBING VINES, SCREENED BY OLEANDER TREES OR SIMILAR VEGETATION CAPABLE OF COVERING OR SCREENING ENTIRE WALLS UP TO A HEIGHT OF ATLEAST 9 FEET, EXCLUDING WINDOWS AND SIGNS.
- ANY WET WEATHER EROSION CONTROL PLAN (WWECP), UTILIZING SEDIMENT AND EROSION CONTROL BMPs, FOR PROJECT THAT WILL LEAVE DISTURBED SOIL DURING THE RAINY SEASON (OCTOBER 1 TO APRIL 15) IS REQUIRED. THE WWECP MUST BE PREPARED, FOR PROJECTS THAT HAVE ALREADY BROKEN GROUND, NOT LESS THAN 30 DAYS PRIOR TO THE BEGINNING OF EACH RAINY SEASON DURING WHICH SOIL WILL BE DISTURBED, AND IMPLEMENTED THROUGHOUT THE ENTIRE RAINY SEASON THROUGH THE END OF THE RAINY SEASON. FOR PROJECT THAT WILL BEGIN CONSTRUCTION DURING THE RAINY SEASON THE WWECP MUST BE SUBMITTED TO THE BUREAU OF ENGINEERING PUBLIC WORKS FOR REVIEW AND APPROVAL. THE WWECP IS NOT A REQUIREMENT FOR ISSUANCE OF A BUILDING OR GRADING PERMIT.
- THE CONSTRUCTION SHALL NOT RESTRICT A FIVE-FOOT CLEAR AND UNOBSTRUCTED ACCESS TO ANY WATER OR POWER DISTRIBUTION FACILITIES (POWER POLES, PULL-BOXES, TRANSFORMERS, VAULTS, PUMPS, VALVES, METERS APPURTENANCES ETC.) OR TO THE LOCATION OF THE HOOR UP. THE CONSTRUCTION SHALL NOT REMOVE THE LINES THAT ARE LOCATED ON THE PROPERTY. FAILURE TO COMPLY MAY CAUSE CONSTRUCTION DELAYS AND/OR ADDITIONAL EXPENSES.
- AN APPROVED SEISMIC SHUTOFF VALVE WILL BE INSTALLED ON THE FUEL GAS LINE ON THE DOWN STREAM SIDE OF THE UTILITY METER AND BE RIDGIDLY CONNECTED TO THE EXTERIOR OF THE BUILDING OR STRUCTURE CONTAINING THE FUEL GAS PIPING. (PER ORDINANCE 170.15B) INCLUDES COMMERCIAL ADDITIONS ANT TO WORK OVER \$10,000. SEPARATE PLUMBING PERMIT IS REQUIRED.
- PROVIDE ULTRA LOW FLUSH WATER CLOSETS FOR ALL NEW CONSTRUCTION. EXISTING SHOWER HEADS AND TOILETS MUST BE ADAPTED FOR LOW WATER CONSUMPTION.
- SHOWER COMPARTMENTS AND WALLS ABOVE BATHTUBS WITH INSTALLED SHOWER HEADS SHALL BE FINISHED WITH A SMOOTH, NONABSORBENT SURFACE TO HEIGHT NOT LESS THAN 72 INCHES ABOVE THE DRAIN INLET. SECTION 1210.2.3. USE OF WATER-RESISTANT GYPSUM BOARD SHALL BE AS STATED IN SECTION 2509.3.
- WATER HEATERS MUST BE STRAPPED TO A WALL (SECTION 507.3, UPC).
- UNIT SPLITLIGHTS SHALL BE LABELED BY A L.A. CITY APPROVED LABELING AGENCY. SUCH LABEL SHALL STATE THE APPROVED LABELING AGENCY NAME, PRODUCT DESIGNATION AND PERFORMANCE GRADE RATING. (RESEARCH REPORT NOT REQUIRED.) 2405.5
- A COPY OF THE EVALUATION REPORT AND/OR CONDITIONS OF LISTING SHALL BE MADE AVAILABLE AT THE JOB SITE.
- THIS BUILDING AND GARAGE MUST BE EQUIPPED WITH AN AUTOMATIC FIRE EXTINGUISHING SYSTEM, COMPLYING WITH (NFPA-13R) THE SPRINKLER SYSTEM SHALL BE APPROVED BY PLUMBING DIVISION PRIOR TO INSTALLATION (903.2.7).
- THIS BUILDING SHALL BE PROVIDED WITH A MANUAL ALARM SYSTEM WITH THE CAPABILITY TO SUPPORT VISIBLE ALARM NOTIFICATION APPLIANCES IN ACCORDANCE WITH NFPA 72 (907.2.9, 907.5.2.3.3, 907.5.2.3.4).
- EMERGENCY RESPONDER RADIO COVERAGE SHALL BE PROVIDED PER LA CITY FIRE CODE SECTION 510.
- ALL EXIT DOORS SHALL COMPLY WITH SECTION 1008-1008.1.
- CLEAR WIDTH OF EACH DOOR OPENING SHALL BE MIN. OR PER TABLE 1005.1, WHICH EVER IS GREATER.
- MIN. DOOR HEIGHT OF 6'-8"
- SHALL BE CAPABLE OF OPENING 90 DEGREES
- THE MAXIMUM WIDTH OF SWINGING DOOR LEAF SHALL BE 48" NOMINAL
- EXIT DOOR SHALL BE SIDE-HINGED SWINGING TYPE
- PROVIDE AUTOMATIC SPRINKLER SYSTEM AT TOP OF RUBBISH AND LINEN CHUTES AND IN THEIR TERMINAL ROOM (903.3.10.2).
- PROVIDE TWO-WAY COMMUNICATION AT THE LANDING SERVING EACH ELEVATOR OR BANK OF ELEVATORS ABOVE OR BELOW THE LEVEL OF EXIT DISCHARGE. (CBC 1009.8)**
- INSTALLED AUTOMATIC IRRIGATION SYSTEM CONTROLLERS ARE WEATHER-OR SOIL-BASED CONTROLLERS. (4.304.1)
- ALL TRASH BINS SHALL BE COVERED
- SCREENING OF MECHANICAL EQUIPMENT SHOULD BE PROVIDED

This architectural site plan depicts a large rectangular area, possibly a park or a large building footprint, with a central 'X' shape formed by two intersecting diagonal lines. The area is surrounded by a grid of streets. The plan includes several labels: 'BBQ' is written in the bottom left and bottom right corners, and 'PARKING' is written in the bottom right corner. The plan also shows various smaller structures, including what appear to be buildings, parking lots, and green spaces. The overall layout suggests a large-scale development or a detailed site plan for a specific location.

I. PROPOSED PROJECT

1. PROJECT LOCATION/ ZONING

Project Address: 1309-1337 S. Pacific Avenue, San Pedro

Project Name: _____

Applicant Name and Phone/Email: Jonathan Lonner (Rep.) — 310-802-4261; jlonner@burnsbouchard.com

Assessor Parcel Number(s): 7454-026-011, -012, -013, -014

Community Plan: San Pedro Number of Lots: 4 Lot Size: 31,500 s.f.

Existing Zone: C2-1XL-CPIO Land Use Designation: Neighborhood Commercial

☐ Specific Plan ☐ HPOZ ☐ DRB ☐ Enterprise Zone ☐ CRA

☐ Q-condition/ D-limitation/ T-classification (please specify): _____

☒ Other pertinent zoning information (please specify): San Pedro CPIO

☒ Location of Major Transportation Stop or Intersection (please specify):¹ Pacific Avenue and 7th Street

2. DESCRIPTION OF PROPOSED PROJECT

Demolition of (E) commercial buildings and surface parking lot. Construction of (N) four-story, 102-unit apartment building (12 units reserved for VLI tenants).

¹ Per AB 744, A Major Transit Stop means a site containing an existing rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service interval of 15 minutes or less during the morning and afternoon peak commute periods. It also includes major transit stops that are included in the applicable regional transportation plan. Per Sec 12.22.A.25(b) of LAMC, the definition of Transit Stop/Major Employment Center includes: (1) a station stop for a fixed transit guideway or fixed rail system, (2) a Metro Rapid Bus stop or route, (3) the boundaries of three major economic activity areas, and (4) the boundaries of a college or university campus with an enrollment exceeding 10,000 students.

3. EXISTING USE

A. Describe Existing Development: 18,200 square-feet of single-story commercial buildings and associated surface parking.

Characteristic of existing use Dwelling Unit (DU), Commercial/ Industrial, or Other	Existing		To Be Demolished	Proposed ²	
	No. of DU or Guest Rooms	Approximate sq. ft./ea.		No. of DU or Guest Rooms	Approximate sq. ft./ea.
Guest Rooms					
Studio				53	500
One Bedroom				19	700
Two Bedrooms				30	900
Three Bedrooms					
_____ Bedroom					
Commercial / Industrial		18,200	18,200		
Other:					

B. Previous Cases Filed

	(1)	(2)	(3)
Case Number(s):	CPC-2019-4908-CU-DB-SPR		
Date Filed:	19 Aug 2019		
Date Approved:	In Progress		
End of Appeal Period:			
Environmental No.	ENV-2019-4909-EAF		

4. TYPE OF APPLICATION

- ☐ Density Bonus (per LAMC Sec. 12.22.A.25) with **no** incentives filed in conjunction with a discretionary approval. If no entitlement case is requested, please contact the Los Angeles Department of Building and Safety (LADBS) at ladbs.org or call 3-1-1 within the City of Los Angeles or (213) 473-3231 outside of the City of Los Angeles.
- ☐ Density Bonus per LAMC Sec. 12.22.A.25 with **incentives on the menu** (please specify): 20% reduction to open space
- ☒ Density Bonus per LAMC Sec. 12.22.A.25 with **incentives off menu** (please specify): Requests are for (1) off-menu FAR of 2.65, (2) off-menu yard reduction, and (3) off-menu height bonus of 15.5-feet.
- ☐ Density Bonus per LAMC Sec. 12.22.A.25 with **on and off menu incentives** (please specify): _____
- ☐ Greater Downtown Housing Incentive Area per LAMC Sec. 12.22.A.29, Ordinance 179,076 (Sections 7 and 9 through 11 of this form do not apply)
- ☐ Public Benefit Project per LAMC Sec. 14.00.A.2
- ☐ Unapproved Dwelling Unit per LAMC Sec. 14.00.A.10
- ☐ Agreement for Partnered Housing Between Commercial and Housing Developer:
- ☐ 30% or more of total units provided for low income housing
- ☐ 15% or more of total units provided for very low income housing
- ☐ General Plan Amendment per LAMC Sec. 11.5.6. Request: _____
- ☐ Zone/Height District Change per LAMC Sec. 12.32. Request: _____
- ☐ Conditional Use per LAMC Sec. 12.22.U.26
- ☒ Site Plan Review per LAMC Sec. 16.05
- ☐ Specific Plan Project Permit Compliance per LAMC Sec. 11.5.7.C
- ☐ Community Design Overlay per LAMC Sec. 13.08
- ☐ Coastal Development Permit per LAMC Sec. 12.20.2 or 12.20.2.1
- ☐ Tract or Parcel Map per LAMC Sec. 17.00 or 17.50
- ☐ Other discretionary incentives requested (please specify): _____

² Replacement units, per AB 2556, shall be equivalent to the number of units, size, and number of bedrooms of the existing development.

5. ENVIRONMENTAL REVIEW

- ☐ Environmental Review Not Required – Project is Ministerial.³ Please explain: _____
- ☐ Not filed (please contact the Department of City Planning Development Services Center for more information)
- ☒ Filed (indicate case number): ENV-2019-4909-EAF

Seniors- Very Low Income	<u> </u>	<u> </u>	<u> </u>
Seniors- Low Income	<u> </u>	<u> </u>	<u> </u>
Seniors – Moderate Income	<u> </u>	<u> </u>	<u> </u>
Transitional Foster Youth–Very Low Income*	<u> </u>	<u> </u>	<u> </u>
Disabled Veterans – Very Low Income*	<u> </u>	<u> </u>	<u> </u>
Homeless – Very Low Income*	<u> </u>	<u> </u>	<u> </u>
Total # of Units per Category	<u> </u>	<u>12</u> (e)	<u> </u> (f)
Percent of Affordable Units by Category	<u> </u>	<u>15%</u> (g)	<u> </u> (h)
		[g = e/c or e/i, whichever is less, c or i]	
		[h = f/c or f/i, whichever is less, c or i]	
TOTAL # of Units Proposed	<u>102</u> (i)		
Number of Density Bonus Units	<u>23</u> (j) [If i > c, then j = i - c; if i < c, then j = 0]		
Percent Density Bonus Requested	<u>30%</u> (k) [k = j/c]		
Percent of Affordable Set Aside	<u>15%</u> (c) x % of affordable housing units provided		

* Per AB 2442, a 10% setaside with Very Low Income units at 20% Density Bonus.

³ Ministerial Projects (aka, "By-Right") do not require any discretionary Planning approvals. Developers of such housing file building plans with the Department of Building & Safety. Plans are checked for compliance with the Building Code and, when in compliance, permits are issued to begin construction.

⁴ HCD (State) = Published affordability levels per California Department of Housing and Community Development. HUD (TCAC) = Published affordability levels per the United States Department of Housing and Urban Development.

- 8. SITE PLAN REVIEW CALCULATION** An application for Site Plan Review may be required for projects that meet any of the Site Plan Review thresholds as outlined in LAMC Section 16.05.C. unless otherwise exempted per Section 16.05.D. For Density Bonus projects involving bonus units, please use the formula provided below to determine if the project meets the Site Plan Review threshold for unit count. If project meets the threshold(s) but qualifies under the exemption criteria per Section 16.05.D please confirm exemption with Department of City Planning's DSC Housing Unit.

78 units allowed by right (permitted by LAMC) – 0 existing units = 78 units

- ☒ **YES, Site Plan Review is required**, if Proposed Base Density units minus existing units is equal to or greater than 50⁵
- ☐ NO, Site Plan Review is not required, if Base Density units minus existing units is less than 50
- ☐ NO, Site Plan Review is not required if Proposed Project is not utilizing a Density Bonus and total Project is less than 50
- ☐ Exempt (please specify): _____

II. DENSITY BONUS (LAMC Sec.12.22.A.25, Ordinance 179,681)

9. DENSITY BONUS OPTIONS (Please check all that apply)

- ☐ Land Donation
- ☐ Child Care
- ☐ Restricted Affordable Units Located Near Transit Stop/ Major Employment Center
- ☐ Common Interest Development with Low or Very Low Income Restricted Affordable Units for Rent
- ☐ Condominium Conversion

☒ **Parking (Please choose only one of the following options):**

- ☐ **Parking Option 1:** Based on # of bedrooms, inclusive of Handicapped and Guest parking. Fractional numbers are rounded down.

	# of Units	Spaces/Unit	Parking Required	Parking Provided
0-1 Bedroom		1		
2-3 Bedrooms		2		
4 or more Bedrooms		2.5		
TOTALS				

- ☐ **Parking Option 2:** Reduced only for Restricted Affordable Units: up to 40% of required parking for Restricted Affordable Units may be compact stalls. Fractional numbers are rounded down.

	# of Units	Spaces/Unit	Parking Required	Parking Provided
Market Rate (Including Senior Market Rate)		Per code		
Restricted Affordable		1		
Very Low/ Low Income Senior or Disabled		.5		
Restricted Affordable in Residential Hotel		.25		
TOTALS				

- ☒ **Parking Option 3:** AB 744 - Applies to two types of projects: (A) 100% affordable developments consisting solely of rental units, exclusive of a manager's unit or units, with an affordable housing cost to lower income families; or (B) mixed-income developments consisting of the maximum number of very low- or low income units, which is 11% and 20% set aside, respectively.

⁵ Site Plan Review may also be required if other characteristics of the project exceeds the thresholds listed in Sec. 16.05 of the LAMC.

☐ **A) 100% Affordable Rental Projects**

	# of Units	Spaces/Unit	Parking Required	Parking Provided
Located within ½ mile of major transit stop		0.5		
Senior having either paratransit service or unobstructed access within ½ mile to fixed bus route service that operates at least 8 times/day		0.5		
Special needs having either paratransit service or unobstructed access within ½ mile to fixed bus route service that operates at least 8 times/day		0.3		

☒ **B) Mixed Income Projects consisting of the maximum number of very low- or low income units, which is 11% and 20% set aside, respectively**

	# of Bedrooms	Spaces/Bedroom	Parking Required	Parking Provided
Located within ½ mile of major transit stop with unobstructed access to project	132	0.5	66	127

APPLICABLE TO PARKING OPTION 3 – AB744 ONLY: (1) **Major transit stop** means a site containing an existing rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service interval of 15 minutes or less during the morning and afternoon peak commute periods. It also includes major transit stops that are included in the applicable regional transportation plan. (2) The maximum ½ mile distance to a major transit stop is measured in a straight line ("as the crow flies"). (3) Tandem or uncovered parking is permitted. (4) Fractional numbers are rounded up.

10. INCENTIVES

☐ Please check if you are requesting an incentive from AB 2501 "Development Bonuses From a Mixed Use Development".

A. Project Zoning Compliance & Incentives (Please check all that apply)

3

*[LAMC rear yard is the northern lot line abutting adjacent commercially-zoned parcel]

⁶ If applicable, provide vicinity map showing 50% of commercially zoned parcel is within 1,500 feet from Transit Stop or Major Employment Center.

⁷ See Sec. 12.22.A.25(f) 5 for additional requirements.

B. Qualification for Incentives On the Menu: *(Please check only one)*

Incentives	% Very Low Income	% Low Income	% Moderate Income
One	<input type="checkbox"/> 5% to <10%	<input type="checkbox"/> 10% to <20%	<input type="checkbox"/> 10% to <20%
Two	<input type="checkbox"/> 10% to <15%	<input type="checkbox"/> 20% to <30%	<input type="checkbox"/> 20% to <30%
Three	<input checked="" type="checkbox"/> 15% or greater	<input type="checkbox"/> 30% or greater	<input type="checkbox"/> 30% or greater
3+	<input type="checkbox"/> (Specify):	<input type="checkbox"/> (Specify):	<input type="checkbox"/> (Specify):

11. COVENANT:

All Density Bonus projects are required to prepare and record an Affordability Covenant to the satisfaction of the Los Angeles Housing Department's Occupancy Monitoring Unit **before** a building permit can be issued. Please contact the Housing and Community Investment Department of Los Angeles (HCIDLA) at (213) 808-8843 or hcidla.lacity.org

12. REPLACEMENT UNITS:

AB 2222 requires that density bonus eligible projects replace any pre-existing affordable housing units on the project site. Replacement units include the following: *(Answer the following with yes or no.)*

- A. Units subject to a recorded covenant, ordinance, or law that restricts rents to levels affordable to persons and families of lower or very low income? No.
- B. Units occupied by lower or very low income households below 80% AMI per California Department of Housing and Community Development Department levels not already listed above? No.
- C. Units subject to the Rent Stabilization Ordinance not already listed above? No.
- D. Units that have been vacated or demolished in the last 5 years? No.
- E. Per AB 2556, are the number of replacement units, size and number of bedrooms equivalent to that being demolished (as shown on Existing Development Table on page 2 above)? N/A

III. GREATER DOWNTOWN HOUSING INCENTIVE AREA (GDHIA)

13. GREATER DOWNTOWN HOUSING INCENTIVE AREA (LAMC SEC. 12.22.A.29, Ordinance 179,076)

A. ELIGIBILITY FOR FLOOR AREA BONUS

NOTE: Published affordability levels per the United States Department of Housing and Urban Development (HUD/TCAC). Please consult with Los Angeles Housing Department's Occupancy Monitoring Unit for additional information.

- ☐ (1) 5% of the total number of dwelling units provided for Very Low Income households; and
- ☐ (2) One of the following shall be provided:
 - ☐ 10% of the total number of dwelling units for Low Income households; or
 - ☐ 15% of the total number of dwelling units for Moderate Income households; or
 - ☐ 20% of the total number of dwelling units for Workforce Income households; and
- ☐ (3) Any dwelling unit or guest room occupied by a household earning less than 50% of the Area Median Income that is demolished or otherwise eliminated shall be replaced on a one-for-one basis within the Community Plan Area in which it is located.

B. INCENTIVES *(Please check all that apply)*

NOTE: Must meet all 3 eligibility requirements from above and provide a Covenant & Agreement (#11).

- ☐ (1) A 35% increase in total floor area.
- ☐ (2) Open Space requirement pursuant to Section 12.21.G reduced by one-half, provided fee is paid.
- ☐ (3) No parking required for units for households earning less than 50% AMI.
- ☐ (4) No more than one parking space required for each dwelling unit.

C. ADDITIONAL INCENTIVES TO PRODUCE HOUSING IN THE GREATER DOWNTOWN HOUSING INCENTIVE AREA

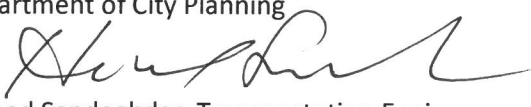

- ☐ (a) No yard requirements except as required by the Urban Design Standards and Guidelines
- ☐ (b) Buildable area shall be the same as the lot area (for the purpose of calculating buildable area for residential and mixed-use)
- ☐ (c) Maximum number of dwelling units or guest rooms permitted shall not be limited by the lot area provisions as long as the total floor area utilized by guest rooms does not exceed the total floor area utilized by dwelling units.
- ☐ (d) No prescribed percentage of the required open space that must be provided as either common open space or private open space.

CITY OF LOS ANGELES
INTER-DEPARTMENTAL MEMORANDUM

1331 South Pacific Avenue
DOT Case No. HRB19-108206

DATE: October 22, 2019

TO: Luciralia Ibarra, Senior City Planner,
Department of City Planning

FROM: 
Hamed Sandoghdar, Transportation Engineer
Department of Transportation

SUBJECT: **TRAFFIC IMPACT ASSESSMENT FOR THE PROPOSED RESIDENTIAL PROJECT LOCATED AT 1331 SOUTH PACIFIC**

The Department of Transportation (DOT) has completed the traffic assessment of the proposed residential project located at 1331 South Pacific Avenue. The project is generally bounded by existing commercial development to the north, 14th Street to the South, South Pacific Avenue to the east, and existing residential project to the west. This traffic assessment is based on the traffic impact analysis report prepared by Linscott, Law & Greenspan Engineers, dated September 26, 2019. Based on DOT's traffic impact criteria, the study included the detailed analysis of four (4) signalized intersections. After a review of the pertinent data, DOT has determined that the traffic study adequately describes the project-related impacts of the proposed development.

PROJECT DESCRIPTION

The proposed project is for the construction of a residential housing complex consisting of 109 units apartment complex, which include 12 very low income units. The existing site is currently occupied by 2,400 square feet of warehouse, 4,000 square feet of light industrial, and 1,600 square feet of restaurant/bar. Access for the project is proposed via a single driveway on 14st Street. The project proposes to provide a total of 65 parking spaces plus 89 bicycle parking. The project is anticipated to be completed by the year 2022.

DISCUSSION AND FINDINGS

Trip Generation

The proposed project is estimated to generate a net increase of 372 daily trips, a net increase of 38 A.M. peak hour trips, and a net increase of 26 P.M. peak hour trips. The trip generation rates are based upon formulas published by the Institute of Transportation Engineers (ITE) Trip Generation, 10th Edition, 2017. A copy of the project study trip generation table (Table 3) is provided as **Attachment "A"** to this report.

Traffic Impacts

Based on DOT's traffic impact criteria¹, the proposed project is not expected to impose a significant level of impact at any of the four (4) study intersections. A copy of the project study intersections capacity and level-of-service (LOS) analysis summary tables (Tables 5) is provided as **Attachment "B"** to this report.

Congestion Management Program (CMP)

In accordance with the state-mandated Congestion Management Program (CMP), an increase in the freeway volume by 150 vehicles per hour during the A.M. or P.M. peak hours in any direction requires further analysis. A substantial change in freeway segments is defined as an increase or decrease of 2% in the demand capacity ratio when at LOS F. For purposes of CMP intersections, an increase of 50 vehicles or more during the A.M. or P.M. peak hour requires further analysis. Since the project is generating less than 50 trips during both A.M. and P.M. peak, no further analysis is needed.

PROJECT REQUIREMENTS

In response to the findings of the traffic study, DOT recommends that the following project requirements be adopted as conditions of project approval.

A. Highway Dedication and Physical Street Improvements

All un-improved sidewalk area adjacent to the project site shall be improved by the project. The applicant should check with the Bureau of Engineering's (BOE) Land Development Group to determine the specific highway dedication, street widening and/or sidewalk requirements for this project. These requirements must be guaranteed before issuance of any building permit through the B-permit process of the Bureau of Engineering, Department of Public Works. They must be constructed prior to issuance of any certificate of occupancy to the satisfaction of DOT and the Bureau of Engineering.

B. Parking Requirements

The applicant should check with the Department of Building and Safety on the number of Code-required parking spaces needed for the project.

C. Construction Impacts

DOT recommends that a construction work site traffic control plan be submitted to DOT's Citywide Temporary Traffic Control Office for review and approval prior to the start of any construction work. The plan should show the location of any roadway or sidewalk closures, traffic detours, haul routes, hours of operation, protective devices, warning signs and access to abutting properties. DOT also recommends that construction related traffic be restricted to off-peak hours.

D. Site Access and Internal Circulation

This determination does not include approval of the driveways, internal circulation and parking scheme. Adverse traffic impacts could occur due to access and circulation issues. The applicant is advised to consult with DOT for driveway locations and specifications prior to the commencement of any architectural plans, as they may affect building design. Final DOT

¹ Per the DOT Traffic Study Policies and Procedures, a significant impact is identified as an increase in the Critical Movement Analysis (CMA) value, due to project related traffic, of 0.01 or more when the final ("with project") Level of Service (LOS) is LOS E or F; an increase of 0.020 or more when the final LOS is LOS D; or an increase of 0.040 or more when the final LOS is LOS C.

approval shall be obtained prior to issuance of any building permits. This should be accomplished by submitting detailed site/driveway plans, at a scale of at least 1" = 40', separately to DOT's WLA/Coastal Development Review Section at 7166 West Manchester Avenue, Los Angeles 90045 as soon as possible but prior to submittal of building plans for plan check to the Department of Building and Safety. In order to minimize and prevent last minute building design changes, the applicant should contact DOT, prior to the commencement of building or parking layout design efforts, for driveway width and internal circulation requirements so that such traffic flow considerations are designed and incorporated early into the building and parking layout plans. New driveways should be dimension per the Department of Public Works Case 2 design standard with respective 30-foot and 16-foot widths for two-way and one-way operations.

E. Development Review Fees

An ordinance adding Section 19.15 to the Los Angeles Municipal Code relative to application fees paid to DOT to permit issuance activities was adopted by the Los Angeles City Council in 2009. This ordinance identifies specific fees for traffic study review, condition clearance, and permit issuance. The applicant shall comply with any applicable fees per this ordinance.

If you have any questions, please contact me at the DOT West L.A. Planning Office at (213) 485-1062.

Engineering District	Harbor		

Project description (attach ZIMAS map with highlighted parcel(s))

Demolition of (E) single-story commercial buildings and surface parking lot. Construction of (N) four-story, 111-unit, 100% residential apartment building with 131 automobile parking spaces in a two-level subterranean garage.

Is there a tract or parcel map being filed in conjunction with this:

[] Yes [**X**] No

If yes, Tract Map No. _____

Parcel Map No. _____

Has the Tract/Parcel report been prepared and submitted to DCP by BOE

[] Yes [**X**] No

If yes, please refer to the Tract or Parcel map conditions, if not, then

Is any part of this project on a corner lot?

[**X**] Yes [] No

Part II. To be Completed by BOE Staff

What is/are the street classification(s) for the adjacent streets (list all)?

S Pacific Ave is a Modified Avenue II W 14th St is a Standard Local Street

Does the project front an intersection of two major or secondary highways?

[] Yes [**X**] No

If yes, additional dedication may be required for dual left-turn pockets. If no, how far is the project from the nearest major/secondary intersection? Additional dedication may be required if within the standard flare section. Dedication and improvements are to be consistent with Standard Street Dimensions. See [Standard Plan S-470-1](#).

Apparent width of existing half right of way (street centerline to property line):

S Pacific Ave apparent half R/W is 40 ft W 14th St apparent half R/W is 30 ft ft

Standard dimension for half right of way (from S-470-1), (street centerline to property line):

S Pacific Ave standard half R/W is 43 ft W 14th St standard half R/W is 30 ft ft

Apparent width of existing half roadway (street centerline to curb face):

S Pacific Ave apparent half roadway is 28 ft W 14th St apparent half roadway is 20 ft ft

Standard street dimension for half roadway (street centerline to curb face):

S Pacific Ave standard half roadway is 28 ft W 14th St standard half roadway is 18 ft ft

Is the lot connected to the sewer?

[**X**] Yes [] No

Distance from subject lot to nearest main line sewer

30 ft

Is the subject lot(s) within the hillside ordinance boundary?

[] Yes [**X**] No

Preliminary Required Improvements:

Planning Case Referral Form Recommendation:

Dedication Required:

[**X**] Yes [] No

Street Widening Required:

[] Yes [**X**] No

Other Improvements Required:

[**X**] Yes [] No

If yes, please list preliminary required improvements:

-- A 3ft sidewalk dedication along the property frontage on S Pacific Ave from the northerly boundary line of APN 7454026011 to the southerly boundary line of APN 745026014 is required to bring the 40ft half R/W to 43ft per City Standard plans for an Avenue II. -- A 15ft x 15ft corner cut or 20ft radius curve corner cut at the intersection of S Pacific Ave and 14th St (Quadrant II) is required per City Standard plan S-470-1 as a part of the

Highway Dedication
process. -- Repair broken
curb and gutter along the
sidewalk per City Standard
Plan S-410-2.

NOTE: The information on this PCRF is only a "preliminary recommendation" by BOE, which provides the applicant with a general understanding of what **may** be required by BOE. If the PCRF Recommendations for Dedication or Street Widening is marked "Yes", a formal investigation and engineering report will be required. The engineering report will be provided after submittal of all documentation and payment of fees. Measurements and statements contained herein may be adjusted in the engineering report.

Street Trees: If the PCRF Recommendation for Street Widening is marked "Yes", Street tree removals may be required. All street tree removals must be approved by the Board of Public Works. Applicant shall contact the Urban Forestry Division at (213) 847-3077 before proceeding with the Master Land Use Application.

In all cases, the Applicant will be required to close any unused driveways; remove and reconstruct broken, off-grade, or bad order concrete curb, gutter, driveways or sidewalk,; and install/replace public improvements, such as driveway aprons and access ramps, to meet ADA requirements.

Applicants with PCRF Recommendation of "Yes" for Dedication or Street Widening are advised to submit the following documents and pay the BOE investigation fee.

1. BOE investigation fee.
2. Two (2) copies of the Planning Master Land Use Application.
3. Two (2) copies of the project site plan.
4. Two (2) copies of the radius map.
5. Picture of the existing building, sidewalk, curb, and gutter.

Due to the possible implications that dedications and improvements may have on the development of a project, applicants that do not pay the BOE investigation fee for the preparation of a detailed engineering report may have their application placed on hold until such information is provided. Questions and concerns regarding the engineering report may be presented at the hearing.

SUBJECT: PROJECT LOCATION: 1309-1331 South Pacific Ave.,

Presented below are comments submitted on behalf of the Los Angeles Unified School District (LAUSD) regarding the project located at 1309-1331 South Pacific Ave.

Based on the extent/location of the proposed development, it is our opinion that environmental impacts on the surrounding community (pedestrian safety, traffic) may occur; due to the fact that construction and traffic from the new development will be dispersed onto Pacific Ave. which is close to 15th Street Elementary School (ES). Since the project may have an environmental impact on LAUSD schools, recommended conditions designed to help reduce or eliminate potential impacts are included in this response.

Pedestrian Safety

Construction activities that include street closures, the presence of heavy equipment and increased truck trips to haul materials on and off the project site can lead to safety hazards for people walking in the vicinity of the construction site. To ensure that effective conditions are employed to reduce construction and operation related pedestrian safety impacts on District sites, we ask that the following language be included in the recommended conditions for pedestrian safety impacts:

- Contractors must maintain ongoing communication with LAUSD school administrators, providing sufficient notice to forewarn children and parents when existing pedestrian routes to school may be impacted.
- Contractors must maintain safe and convenient pedestrian routes to all nearby schools. The District will provide School Pedestrian Route Maps upon your request.
- Contractors must install and maintain appropriate traffic controls (signs and signals) to ensure pedestrian and vehicular safety.
- Haul routes are not to pass by any school, except when school is not in session.
- No staging or parking of construction-related vehicles, including worker-transport vehicles, will occur on or adjacent to a school property.
- Funding for crossing guards at the contractor's expense is required when safety of children may be compromised by construction-related activities at impacted school crossings.

333 South Beaudry Avenue, 21th Floor, Los Angeles, CA 90017 • Telephone (213) 241-3199 • Fax (213) 241-6816

The Office of Environmental Health and Safety is dedicated to providing a safe and healthy environment for the students and employees of the Los Angeles Unified School District.

- Barriers and/or fencing must be installed to secure construction equipment and to minimize trespassing, vandalism, short-cut attractions, and attractive nuisances.
- Contractors are required to provide security patrols (at their expense) to minimize trespassing, vandalism, and short-cut attractions.

Traffic/Transportation

LAUSD's Transportation Branch **must be contacted** at (213) 580-2950 regarding the potential impact upon existing school bus routes. The Project Manager or designee will have to notify the LAUSD Transportation Branch of the expected start and ending dates for various portions of the project that may affect traffic within nearby school areas. To ensure that effective mitigations are employed to reduce construction and operation related transportation impacts on District sites, we ask that the following language be included in the mitigation measures for traffic impacts:

- During the construction phase, truck traffic and construction vehicles may not cause traffic delays for our transported students.
- During and after construction changed traffic patterns, lane adjustment, traffic light patterns, and altered bus stops may not affect school buses' on-time performance and passenger safety.
- Construction trucks and other vehicles are required to stop when encountering school buses using red-flashing-lights must-stop-indicators per the California Vehicle Code.
- Contractors must install and maintain appropriate traffic controls (signs and signals) to ensure vehicular safety.
- Contractors must maintain ongoing communication with LAUSD school administrators, providing sufficient notice to forewarn children and parents when existing vehicle routes to school may be impacted.

The District's charge is to protect the health and safety of students and staff, and the integrity of the learning environment. The comments presented above identify potential environmental impacts related to the proposed project that must be addressed to ensure the welfare of the students attending 15th St. ES their teachers and the staff, as well as to assuage the concerns of the parents of these students. Therefore, the recommended conditions set forth in these comments should be adopted as conditions of project approval to offset environmental impacts on the affected school students and staff.

Thank you for your attention to this matter. If you need additional information, please contact me at (213) 241-4210.

Information about the existing property for the five years prior to the date of the application is required in order to make a determination. HCIDLA received the Affordable Unit Determination Application on or about February 25, 2020, so HCIDLA must collect data from February 2015 to February 2020.

Michael Vittorio and Susan Day Vittorio, Husband and Wife as Joint Tenants (Owner) and Stephen L. Formiller and Mary L. Formiller, Trustees of the Stephen L. Formiller and Mary L. Formiller Family Trust (Owner) acquired the property commonly known as: 1309 S. Pacific Ave, under APN #7454-026-011, Lot 11 on April 28, 2005 per Grant Deed.

Evangelos Bitsakis and Toula Bitsakis, Husband and Wife as Joint Tenants (Owner) acquired the property commonly known as: 1319 S. Pacific Ave, under APN #7454-026-012, Lot 12 on May 2, 2003 per Grant Deed.

Linda Yi Choi, co-Trustees of the Luke and Linda Choi Family Trust (Owner) acquired the property commonly known as: 1331 S. Pacific Ave, under APN #7454-026-013, Lot 13 on August 5, 2005 per Grant Deed.
1337 S. Pacific Ave, under APN #7454-026-014, Lot 14 on August 5, 2005 per Grant Deed.

Google Earth images and Internet Search show that the property commonly known as 1309 S. Pacific Ave is a store.

Per Department of City Planning (ZIMAS), County Assessor Parcel Information (LUPAMS), First American Datatree database, Billing Information Management System (BIMS) database and the Code, Compliance and Rent Information System (CRIS) database, the property commonly known as 1309 S. Pacific Ave, has a use code of "1100 – Store".

Google Earth images and Internet Search show that the property commonly known as 1319 S. Pacific Ave is an office building.

Per Department of City Planning (ZIMAS), County Assessor Parcel Information (LUPAMS), First American Datatree database, Billing Information Management System (BIMS) database and the Code, Compliance and Rent Information System (CRIS) database, the property commonly known as 1319 S. Pacific Ave, has a use code of "1700 – Office Building".

Google Earth images and Internet Search show that the property commonly known as 1331 S. Pacific Ave is a lounge.

Per Department of City Planning (ZIMAS), County Assessor Parcel Information (LUPAMS), First American Datatree database, Billing Information Management System (BIMS) database and the Code, Compliance and Rent Information System (CRIS) database, the property commonly known as 1331 S. Pacific Ave, has a use code of "2100 – Restaurant/Lounge/Tavern".

Google Earth images and Internet Search show that the property commonly known as 1337 S. Pacific Ave is a parking lot.

Per Department of City Planning (ZIMAS), County Assessor Parcel Information (LUPAMS), First American Datatree database, Billing Information Management System (BIMS) database and the Code, Compliance and Rent Information System (CRIS) database, the property commonly known as 1337 S. Pacific Ave, has a use code of "2700 – Parking Lot-Patron or Employee".

The Los Angeles Department of Building and Safety database indicates that the Owner has applied for Building Permit # 19010-10000-05596, permit not issued as of February 5, 2020 for the project. The Los Angeles Department of Building and Safety database indicates the Owner has not applied for a Demolition Permit for the project.

Per the Affordable Unit Determination Application received by HCIDLA on or about February 25, 2020, the Owner plans to construct a one hundred two (102) unit apartment building pursuant to Density Bonus (DB) guidelines.

HCIDLA has determined that there were no residential units built and demolished on the properties, which currently has a store, office building, lounge, and parking lot within the last five years. Therefore, no AB 2556 replacement affordable units are required. **Please note that this AB 2556 determination will also apply if the proposed project is changed to a by-right Transit Oriented Communities (TOC).**

This determination is provisional and subject to verification by the RSO Section.

In the event that the proposed project is subject to SB 330, this AB 2556 determination would need to be amended and the amendment fee will apply.

****WARNING****

LOT TIES AND EXISTING PRE-1978 SINGLE FAMILY DWELLING ON ONE LOT

ISSUE:	Is a LOT TIE required for the NEW project?
IF NO:	Owner's existing Rent Stabilization (RSO) replacement obligation, if any, remains the SAME as above.
IF YES:	Owner's existing RSO replacement obligation, if any, will INCREASE by one and the new project will also be subject to the RSO, unless the existing single family dwelling is demolished before the lots are tied.

If you have any questions regarding this determination, please contact Edmund Wong at edmund.wong@lacity.org.

CALIFORNIA ENVIRONMENTAL QUALITY ACT

NOTICE OF EXEMPTION

(PRC Section 21152; CEQA Guidelines Section 15062)

Filing of this form is optional. If filed, the form shall be filed with the County Clerk, 12400 E. Imperial Highway, Norwalk, CA 90650, pursuant to Public Resources Code Section 21152(b) and CEQA Guidelines Section 15062. Pursuant to Public Resources Code Section 21167 (d), the posting of this notice starts a 35-day statute of limitations on court challenges to reliance on an exemption for the project. Failure to file this notice as provided above, results in the statute of limitations being extended to 180 days.

PROJECT LOCATION (Street Address and Cross Streets and/or Attached Map)

1309-1331 South Pacific Avenue

☐ Map attached.

PROJECT DESCRIPTION:

☐ Additional page(s) attached.

The project is the construction of a 4-story, 45-foot and 5-inch tall residential building comprised of 102 dwelling units (including 12 Very Low Income units). The project will be approximately 83,158 square feet in floor area with a Floor Area Ratio ("FAR") of 2.65:1. The project will provide 127 parking spaces in 2 subterranean levels. The site is currently improved with 3 vacant commercial structures, with 26 trees on the subject site and 4 trees along the public right-of-way, all of which will be removed to clear the lot. The project will also involve the grading of approximately 2,500 cubic yards of soil, and export of approximately 20,000 cubic yards of soil.

**JUSTIFICATION FOR PROJECT EXEMPTION
CASE NO. ENV-2019-4909-CE**

The Planning Department determined that the City of Los Angeles Guidelines for the implementation of the California Environmental Quality Act of 1970 and the CEQA Guidelines designate the subject project as Categorically Exempt under State CEQA Guidelines, Article 19, Section 15332 (Class 32), Case No. ENV-2019-4909-CE.

The project is the construction of a 4-story, 45-foot and 5-inch tall residential building comprised of 102 dwelling units (including 12 Very Low Income units). The project will be approximately 83,158 square feet in floor area with a Floor Area Ratio ("FAR") of 2.65:1. The project will provide 127 parking spaces in 2 subterranean levels. The site is currently improved with 3 vacant commercial structures, with 26 trees on the subject site and 4 trees along the public right-of-way, all of which will be removed to clear the lot. The project will also involve the grading of approximately 2,500 cubic yards of soil, and export of approximately 20,000 cubic yards of soil. As a multi-family residential building, and a project which is characterized as in-fill development, the project qualifies for the Class 32 Categorical Exemption.

CEQA Determination – Class 32 Categorical Exemption Applies

A project qualifies for a Class 32 Categorical Exemption if it is developed on an infill site and meets the following criteria:

- (a) **The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with the applicable zoning designation and regulations.**

The subject site is located within the San Pedro Community Plan and is designated for Neighborhood Commercial Land Uses. The site is zoned C2-1XL-CPIO and is consistent with the land use designation. As shown in the case file and under Finding No. 2 above, the project is consistent with the General Plan, the applicable San Pedro Community Plan designation and policies, and all applicable zoning designations and regulations as permitted by Density Bonus law.

- (b) **The proposed development occurs within city limits on a project site of no more than five acres substantially surrounded by urban uses.**

The subject site is wholly within the City of Los Angeles, on a site that is approximately 0.72 acres (31,521 square feet). Lots adjacent to the subject site are developed with the following urban uses: multi-family and single-family residential and commercial uses. The subject site is within one-half mile of several bus stops served by the Los Angeles County

Metropolitan Transit Authority (“Metro”) Silver Line and 205, 246, and 550 bus lines, Los Angeles Department of Transportation (“LADOT”) DASH San Pedro and Commuter Express 142 bus lines. There is a bus stop within 400 feet at the intersection of Pacific Avenue and 15th Street.

(c) **The project site has no value as habitat for endangered, rare or threatened species.**

The site is previously disturbed and surrounded by development and therefore is not, and has no value as, a habitat for endangered, rare or threatened species. There are no native protected trees on the site per the Tree Report prepared by Courtland Studio, LLC dated March 26, 2019. There are 26 trees on the subject site and 4 trees along the public right-of-way, all of which will be removed to clear the lot.

(d) **Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality.**

Regulatory Compliance Measures – The project will be subject to Regulatory Compliance Measures (RCMs), which require compliance with the City of Los Angeles Noise Ordinance, pollutant discharge, dewatering, stormwater mitigations; and Best Management Practices for stormwater runoff. More specifically, RCMs include but are not limited to the following, to ensure the project will not have significant impacts:

- **Regulatory Compliance Measure RC-AQ-1 (Demolition, Grading and Construction Activities): Compliance with provisions of the SCAQMD District Rule 403.** The project shall comply with all applicable standards of the Southern California Air Quality Management District, including the following provisions of District Rule 403:
 - All unpaved demolition and construction areas shall be wetted at least twice daily during excavation and construction, and temporary dust covers shall be used to reduce dust emissions and meet SCAQMD District Rule 403. Wetting could reduce fugitive dust by as much as 50 percent.
 - The construction area shall be kept sufficiently dampened to control dust caused by grading and hauling, and at all times provide reasonable control of dust caused by wind.
 - All clearing, earth moving, or excavation activities shall be discontinued during periods of high winds (i.e., greater than 15 mph), so as to prevent excessive amounts of dust.
 - All dirt/soil loads shall be secured by trimming, watering or other appropriate means to prevent spillage and dust.
 - All dirt/soil materials transported off-site shall be either sufficiently watered or securely covered to prevent excessive amount of dust.
 - General contractors shall maintain and operate construction equipment so as to minimize exhaust emissions.
 - Trucks having no current hauling activity shall not idle but be turned off.
- **Regulatory Compliance Measure RC-AQ-2:** In accordance with Sections 2485 in Title 13 of the California Code of Regulations, the idling of all diesel-fueled commercial vehicles (weighing over 10,000 pounds) during construction shall be limited to five minutes at any location.
- **Regulatory Compliance Measure RC-AQ-3:** In accordance with Section 93115 in Title 17 of the California Code of Regulations, operation of any stationary, diesel-fueled, compression-ignition engines shall meet specified fuel and fuel additive requirements and emission standards.

- **Regulatory Compliance Measure RC-AQ-4:** The Project shall comply with South Coast Air Quality Management District Rule 1113 limiting the volatile organic compound content of architectural coatings.
- **Regulatory Compliance Measure RC-AQ-5:** The Project shall install odor-reducing equipment in accordance with South Coast Air Quality Management District Rule 1138.
- **Regulatory Compliance Measure RC-AQ-6:** New on-site facility nitrogen oxide emissions shall be minimized through the use of emission control measures (e.g., use of best available control technology for new combustion sources such as boilers and water heaters) as required by South Coast Air Quality Management District Regulation XIII, New Source Review.
- **Regulatory Compliance Measure RC-GEO-1 (Seismic):** The design and construction of the project shall conform to the California Building Code seismic standards as approved by the Department of Building and Safety.
- **Regulatory Compliance Measure RC-NO-1 (Demolition, Grading, and Construction Activities):** The project shall comply with the City of Los Angeles Noise Ordinance and any subsequent ordinances, which prohibit the emission or creation of noise beyond certain levels at adjacent uses unless technically infeasible.

Traffic - A traffic study was prepared by Linscott Law & Greenspan, dated September 26, 2019 analyzed the proposed project and determined that the project is forecast to generate a net increase of 372 daily trip ends during a typical weekday, 38 vehicle trips during the weekday a.m. peak hour, and 25 vehicle trips during the weekday p.m. peak hour. The traffic analysis accounts for ambient growth factors based on a 1.0 percent annual growth and in addition to trips resulting from other development projects that are located within the study area. The Department of Transportation (LADOT) reviewed the traffic study and confirmed its findings in a memo dated October 22, 2019, confirming that none of the study intersections would be significantly impacted by project-related traffic. Therefore, the project will not have any significant impacts relating to traffic.

Noise – The Project must comply with the adopted City of Los Angeles Noise Ordinances No. 144,331 and 161,574 and LAMC Section 41.40 as indicated above in RC-NO-1, LAMC Section 112.05, as well as any subsequent Ordinances, which prohibit the emission or creation of noise beyond certain levels. These Ordinances cover both operational noise levels (i.e., post-construction), and any construction noise impacts. As a result of this mandatory compliance, the proposed Project will not result in any significant noise impacts. Furthermore, the Noise Impact Analysis prepared by DKA Planning dated November 2019 confirmed that the Project would not result in construction-related or operational noise impacts on the environment. The analysis took into account noise from construction activities, operational noise sources from mechanical equipment, parking and auto-related activities, human conservation and activities, recreation facilities, landscape maintenance, trash collection, vibration, impacts to sensitive receptors. The analysis concluded that the project would not result in any significant effects relating to noise.

Air Quality – The Project's potential air quality effects were evaluated by estimating the potential construction and operations emissions of criteria pollutants, and comparing those levels to significance thresholds provided by the Southern California Air Quality Management District (SCAQMD). The Project's emissions were estimated using the CalEEMod 2016.3.2 model (output October 29, 2019) for the purposes of evaluating air quality impacts of proposed projects and summarized in the Air Quality Technical Report prepared by DKA Planning dated November 2019. The analysis took into account construction activity emissions during demolition, grading building construction, and

architectural coating, as well as effects to sensitive receptors. The analysis confirms that the Project would not exceed SCAQMD significance thresholds for air quality impacts. In addition, there are several Regulatory Compliance Measures which regulate air quality-related impacts for projects citywide as noted above.

(e) **The site can be adequately served by all required utilities and public services.**

The project site will be adequately served by all public utilities and services given that the construction of a multi-family residential building will be on a site which has been previously developed and is consistent with the General Plan.

Therefore, the project meets all of the Criteria for the Class 32.

CEQA Section 15300.2: Exceptions to the Use of Categorical Exemptions

There are five (5) Exceptions which must be considered in order to find a project exempt under Class 32:

- (a) **Cumulative Impacts.** *All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant.*

There is not a succession of known projects of the same type and in the same place as the subject project.

There is a proposed project approximately one-half mile from the subject site, located at 2111-2139 South Pacific Avenue (Case No. CPC-2019-4884-CUB-CB-SPR), which is proposed for the construction of a 4-story mixed-use building containing 100 dwelling units and approximately 1,997 square feet of ground-floor retail. However, the project at 2111-2139 South Pacific Avenue is not adjacent to nor within 500 feet of the subject site, and does not constitute a project in the same type and same place as the subject project.

Both projects would be subject to the citywide Regulatory Compliance Measures as noted above, which regulate impacts related to air quality, noise, and geology to a less than significant level. The traffic study prepared by Linscott Law & Greenspan, dated September 26, 2019, accounts for ambient growth factors based on a 1.0 percent annual growth and in addition to trips resulting from other development projects that are located within the study area (including the project located at 2111-2139 South Pacific Avenue and 7 other projects either proposed or under construction), and concluded no traffic impacts. The Department of Transportation (LADOT) reviewed the traffic study and confirmed its findings in a memo dated October 22, 2019, which included standard conditions for a construction work site traffic control plan and limiting construction-related traffic to off-peak hours. There is no evidence to conclude that significant impacts will occur based on past project approvals or that the proposed Project's impacts are cumulatively considerable when evaluating any cumulative impacts associates with construction noise and transportation/traffic in the surrounding area.

- (b) **Significant Effect Due to Unusual Circumstances.** *A categorical exemption shall not be used for an activity where there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.*

The project proposes a multi-family building in an area zoned and designated for such development. All adjacent lots are developed with multi-family and single-family residential and commercial uses, and the subject site is of a similar size and slope to nearby properties. The project proposes a Floor Area Ratio (FAR) of 2.65:1 on a site that is permitted to have an FAR of 1.5:1 by the site's zoning and 3:1 through an On-Menu Density Bonus Incentive. The project size and height is not unusual for the vicinity of the subject site, and is similar in scope to other existing multi-family dwellings and proposed future projects in the area. Furthermore, there is no substantial evidence in the administrative record that this project will cause a significant impact. Thus, there are no unusual circumstances which may lead to a significant effect on the environment.

- (c) **Scenic Highways.** *A categorical exemption shall not be used for a project which may result in damage to scenic resources, including but not limited to, trees, historic buildings, rock outcroppings, or similar resources, within a highway officially designated as a state scenic highway.*

The only State Scenic Highway within the City of Los Angeles is the Topanga Canyon State Scenic Highway, State Route 27, which travels through a portion of Topanga State Park. The State Route 27 is approximately 27 miles northwest of the subject site. Therefore the subject site will not create any impacts within a designated as a state scenic highway.

- (d) **Hazardous Waste Sites.** *A categorical exemption shall not be used for a project located on a site which is included on any list compiled pursuant to Section 65962.5 of the Government Code*

According to Envirostor, the State of California's database of Hazardous Waste Sites, neither the subject site, nor any site in the vicinity, is identified as a hazardous waste site.

A Phase I Environmental Site Assessment ("ESA") Report prepared by Priority 1 Environmental dated December 28, 2018 for 1309-1323 South Pacific Avenue included reviewing available environmental related information concerning the property and other data; conducting a site visit to observe current site uses, observing adjacent land uses, and gathering data on possible spills or misuse of chemicals that could be considered a Recognized Environmental Concern ("REC"); and reviewing regulatory files regarding the property. The ESA revealed no evidence of RECs in connection with the property, with the exception of historical records indicating that a drycleaners operated at 1311 South Pacific Avenue from 1946 to 1957 (possibly earlier), therefore the use of drycleaning chemicals prior to LAFD regulatory oversight constitutes a potential release. The ESA recommended a limited subsurface soil and soil vapor investigation at 1311 South Pacific Avenue to determine if the historical use as a drycleaners has impacted the property. A Phase II Environmental Site Assessment Report prepared by Priority 1 Environmental dated January 23, 2019 evaluated the subsurface soil vapor and soils in the area of the former drycleaners that was previously on the subject site at 1309-1311 South Pacific Avenue. The gas sampling and soil sampling indicated that only low levels of tetrachloroethane ("PCE") were detected in one soil vapor sample, and is not a significant release to the environment. The Phase II ESA concluded that concerns for the proposed multi-family redevelopment would be resolved by the excavation of the proposed subterranean parking.

A Phase I ESA prepared by Priority 1 Environmental dated August 3, 2018 for 1331-1337 South Pacific Avenue included reviewing available environmental related information concerning the property and other data; conducting a site visit to observe current site uses, observing adjacent land uses, and gathering data on possible spills or misuse of chemicals that could be considered a Recognized Environmental Concern ("REC"); and reviewing regulatory files regarding the property. The ESA revealed no evidence of RECs in connection with the property, with the exception of the historical use of a gasoline service station on site from 1920 to 1959. A Phase II Environmental Site Assessment Report prepared by Priority 1 Environmental dated September 7, 2018 evaluated the subsurface soils in the area of the former gasoline service station that was previously on the subject site, and the suspected underground storage tank that was suspected to be in the center of the property. The soil sampling indicated that contaminants above the regional screening levels were not detected, and that the suspected UST should be confirmed and if confirmed, the City of Los Angeles Fire Department ("LAFD") should be contacted and the UST should be removed per LAFD requirements. The report was reviewed by the LAFD and forwarded to the Los Angeles Regional Water Quality Control Board ("LARWQCB"). In a memorandum dated August 22, 2019, the LARWQCB indicated that the residual concentrations of fuel constituents pose a low threat to human health, and soil and groundwater quality beneath the site, and that no further action is required.

- (e) **Historical Resources.** *A categorical exemption shall not be used for a project which may cause a substantial adverse change in the significance of a historical resource.*

The project site is not listed in the National Register of Historic Places, California Register of Historical Resources, the Los Angeles Historic-Cultural Monuments Register, and/or any local register, and was not found to be a potential historic resource based on the City's HistoricPlacesLA website or SurveyLA, the citywide survey of Los Angeles.

A Historical Resource Evaluation Report prepared by Galvin Preservation Associates ("GPA") Consulting, dated November 2019, indicated that a records search prepared by the South Central Coastal Information Center ("SCCIC") revealed a potential prior evaluation of 1309-1311 South Pacific Avenue and 1331 South Pacific Avenue. The properties have a Status Code of 5S2 (individual property that is eligible for local listing or designation), however, no other details or further documentation was available as part of the record search results. Since no date of evaluation was given, it was assumed that the evaluation was at least five years old, and the properties required re-evaluation. The report evaluated all buildings on the Project site as individual potential historical resources as defined by CEQA. The surrounding area was not examined as a potential historic district for the purposes of this report. It was not recorded as a potential historic district during SurveyLA. Although the area developed as San Pedro's commercial corridor in the 1920s, it does not retain the integrity of setting and feeling needed to convey a sense of a discrete time and place. After careful inspection, investigation, and evaluation, GPA concluded that none of the properties appear to be eligible for listing in the National Register of Historic Places or California Register of Historical Resources, or for designation as a Los Angeles Historic-Cultural Monument due to a lack of significance, architectural distinction, and physical integrity. Furthermore, the properties do not contribute to a potential historic district. Therefore, the properties are not historical resources as defined by CEQA. As such, the Project would have no impact on historical resources and no further study is recommended or required. The report was reviewed by the Office of Historic Resources and accepted per correspondence dated December 24, 2019. Based on this, the project will not result in a substantial adverse change to the significance of a historic resource and this exception does not apply.

RE: Trees at 1311-1337 S Pacific Avenue, San Pedro, CA 90731

Dear John:

This letter is regarding the property at 1311-1337 S Pacific Avenue, San Pedro, CA 90731 (Lots 11, 12, 13, 14). We visited the site to evaluate the trees on the property.

EXISTING SITE CONDITIONS

On the site, there are three commercial buildings and a parking lot.

There are no native trees that are protected by the LAMC Protected Tree Ordinance on the property.

ADJACENT PROPERTIES

There are no protected trees on adjacent properties that will be impacted by construction on this site.

Should you have any questions, please feel free to contact me at 818-788-9382.

Sincerely yours,

A handwritten signature in black ink, appearing to read 'Paul Lewis', with a stylized flourish at the end.

Paul Lewis

Sincerely yours,

MEMORANDUM

To: Pedro Ayala Date: September 26, 2019
City of Los Angeles Dept. of Transportation

From: Clare M. Look-Jaeger, P.E. *CL-Jaeger* LLG Ref: 1-19-4335-1
Francesca S. Bravo *FSB*
Linscott, Law & Greenspan, Engineers

Subject: 1331 South Pacific Avenue Residential Project – Technical Memorandum

Linscott, Law & Greenspan, Engineers (LLG Engineers) has prepared this memorandum to summarize the findings of the traffic assessment prepared for the proposed 1331 South Pacific Avenue Residential project (“proposed project”) located in San Pedro Community Plan area of the City of Los Angeles, California. The proposed project consists of the construction of a 109-unit apartment complex, of which 12 units are designated as very low-income units. This traffic assessment has been prepared based on consultation with City of Los Angeles Department of Transportation (LADOT) staff regarding the study parameters and assumptions to be utilized in this analysis. The technical memorandum for the proposed project has been prepared consistent with City of Los Angeles traffic study guidelines.¹

Briefly, it is concluded that no significant traffic impacts are expected to result due to the completion and full occupancy of the proposed project. This traffic assessment includes a description of the existing conditions, a summary of the proposed project description, a summary of the project trip generation and distribution, and an assessment of the potential traffic impacts associated with the proposed project.

Existing Conditions

The proposed project is located at 1331 Pacific Avenue in the San Pedro Community Plan area of the City of Los Angeles, California. The proposed project site is bordered by existing commercial development to the north, 14th Street to the south, South Pacific Avenue to the east, and existing residential development to the west. The existing project site is comprised of three separate buildings totaling 18,203 square feet and a parking lot within four parcels. Existing uses on-site include 2,400 square feet of warehouse space, 4,000 square feet of light industrial space and a 1,600 square-foot bar. The proposed project site and general vicinity are shown in **Figure 1**. An aerial photograph of the project site and vicinity is displayed in **Figure 2**.

The following four study intersections were selected in consultation with LADOT staff for analysis of potential impacts related to the proposed project:

1. Gaffey Street/13th Street
2. Gaffey Street/15th Street

3. South Pacific Avenue/13th Street
4. South Pacific Avenue/15th Street

All four study intersections selected for analysis are presently controlled by traffic signals. The existing lane configurations at the study intersections are displayed in **Figure 3**.

Gaffey Street is designated as Avenue II in the Citywide General Plan Circulation System² (Map A9 Harbor Subarea – Generalized Circulation). South Pacific Avenue is designated as Avenue II in the Citywide General Plan Circulation System (Map A9 Harbor Subarea – Generalized Circulation). South Pacific Avenue in the vicinity of the proposed project is identified by the City of Los Angeles' Vision Zero initiative as being part of the High Injury Network. 13th Street west of South Pacific Avenue is designated as Avenue II in the Citywide General Plan Circulation System (Map A9 Harbor Subarea – Generalized Circulation).

Project Description

The proposed project consists of the construction of a 4-story, 109-unit apartment complex, including 12 affordable housing dwelling units. Construction of the proposed project is planned to begin in year 2019 and be completed by year 2022 (i.e., project build-out year 2022). The street level site plan for the proposed project is displayed in **Figure 4**.

Based on information provided by the project applicant, a total of 65 vehicular parking spaces, including three accessible spaces, will be provided in the intermediate parking level. In addition, 81 long-term bicycle spaces and 8 short-term bicycle spaces are planned to be provided as part of the proposed project.

Vehicular access to the project site will be provided via a single driveway on 14th Street. The project site driveway will accommodate full access (i.e., left-turn and right-turn ingress and egress turning movements). The project site driveway will be constructed to City of Los Angeles design standards.

Traffic Counts

Manual counts of vehicular turning movements were conducted at the four study intersections during the weekday morning (AM) and afternoon (PM) peak periods to determine the peak hour traffic volumes. The manual counts were conducted by an independent traffic count subconsultant (City Traffic Counters) at the study intersections from 7:00 to 10:00 AM to determine the weekday AM peak hour, and from 3:00 to 6:00 PM to determine the weekday PM peak hour. A count of pedestrians and bicycles at the study locations was also conducted for the weekday

² *Mobility Plan 2035: An Element of the General Plan*, Los Angeles Department of City Planning, adopted January 20, 2016.

morning and afternoon peak periods. It is noted that all of the traffic counts were conducted when local schools were in session. Traffic volumes at the study intersections show the typical peak periods between 7:00 to 10:00 AM and 3:00 to 6:00 PM generally associated with metropolitan Los Angeles weekday peak hours.

The weekday AM and PM peak hour manual counts of vehicle movements at the study intersections are summarized in **Table 1**. The existing traffic volumes at the study intersections during the weekday AM and PM peak hours are shown in **Figures 5 and 6**, respectively. Summary data worksheets of the manual traffic counts at the study intersections are contained in **Appendix A**.

Future Conditions

The forecast of future pre-project conditions was prepared in accordance with procedures outlined in Section 15130 of the CEQA Guidelines. Specifically, the CEQA Guidelines provide two options for developing the future traffic volume forecast:

“(A) A list of past, present, and probable future projects producing related or cumulative impacts, including, if necessary, those projects outside the control of the [lead] agency, or

(B) A summary of projections contained in an adopted local, regional or statewide plan, or related planning document, that describes or evaluates conditions contributing to the cumulative effect. Such plans may include: a general plan, regional transportation plan, or plans for the reduction of greenhouse gas emissions. A summary of projections may also be contained in an adopted or certified prior environmental document for such a plan. Such projections may be supplemented with additional information such as a regional modeling program. Any such document shall be referenced and made available to the public at a location specified by the lead agency.”

Accordingly, the traffic analysis provides a highly conservative estimate of future pre-project traffic volumes as it incorporates both the “A” and “B” options outlined in the CEQA Guidelines for purposes of developing the forecast.

A forecast of on-street traffic conditions prior to occupancy of the proposed project was prepared by incorporating the potential trips associated with other known development projects (related projects) in the area. With this information, the potential impact of the proposed project can be evaluated within the context of the cumulative impact of all ongoing development. The related projects research was based on information on file at the City of Los Angeles Departments of Transportation and Planning. The list of related projects in the project site area is presented in **Table 2**. The location of the related projects is shown in **Figure 7**.

Traffic volumes expected to be generated by the related projects were calculated using rates provided in the Institute of Transportation Engineers' (ITE) *Trip Generation Manual*,³ or they were obtained from other transportation studies recently approved by the City. The related projects' respective traffic generation for the weekday AM and PM peak hours, as well as on a daily basis for a typical weekday, is summarized in *Table 2*. The related projects traffic volumes were distributed and assigned to the street system based on each project's location in relation to the study intersections, their proximity to major traffic corridors, proposed land uses, nearby population and employment centers, etc.

Horizon year, background traffic growth estimates also have been calculated by using an ambient traffic growth factor. The ambient traffic growth factor is intended to include unknown related projects in the study area, as well as account for typical growth in traffic volumes due to the development of projects outside the study area. The future growth in traffic volumes has been calculated at one percent (1.0%) per year. The ambient growth factor was based on review of the background traffic growth estimates for the San Pedro area (i.e., RSA 19, Palos Verdes) published in the *2010 Congestion Management Program for Los Angeles County*, which indicate that existing traffic volumes would be expected to increase at an annual rate of less than one percent (approximately 0.52% per year) between years 2015 and 2025. However, a one percent (1.0%) ambient traffic growth factor has been employed in this analysis in order to provide a conservative, worst case forecast of future traffic volumes in the area. Application of the ambient traffic growth factor to existing year 2019 traffic volumes results in a three percent (3.0%) increase in existing traffic volumes to horizon year 2022. Further, it is noted that the CMP manual's traffic growth rate is intended to anticipate future traffic generated by development projects in the project vicinity. Thus, the inclusion in this traffic analysis of both a forecast of traffic generated by known related projects plus the use of an ambient growth traffic factor based on CMP traffic model data results in a conservative estimate of future traffic volumes at the study intersections.

Project Trip Generation and Distribution

Project Trip Generation

Traffic generation is expressed in vehicle trip ends, defined as one-way vehicular movements, either entering or exiting the generating land use. Traffic volumes expected to be generated by the proposed project during the weekday AM and PM peak hours, as well as on a daily basis, were estimated using rates published in the Institute of Transportation Engineers' (ITE) *Trip Generation Manual*. Traffic volumes expected to be generated by the proposed project were based upon average rates per number of residential units. ITE Land Use Code 220 (Apartment) trip

³ Institute of Transportation Engineers *Trip Generation Manual*, 10th Edition, Washington, D.C., 2017.

generation average rates were used to forecast the traffic volumes expected to be generated by 97 apartment units proposed as part of the proposed project.

As the ITE publication does not provide trip rates for affordable family housing, it was deemed appropriate to forecast the trips expected to be generated by the affordable housing land use component using trip rates published by LADOT which are directly applicable to the proposed project. The LADOT trip generation rates for affordable housing projects were published in December, 2016, and developed based on vehicle trip count data collected at affordable housing sites in the City of Los Angeles during year 2016. The LADOT affordable housing trip rates include three different housing type categories: affordable family housing; affordable seniors housing, and affordable special needs and supportive housing. In this instance, the affordable family housing category is directly applicable to the proposed project which will provide housing for permanent long-term tenants with supportive services designed to enable homeless persons and individuals/families at risk of homelessness to ensure that they remain housed and live as independently as possible. LADOT's affordable special needs and supportive housing category trip rates are summarized below:

- Affordable Family Housing
 - Average Daily Trip Rate: 4.08 trips per dwelling unit
 - Average AM Peak Hour Trip Rate: 0.50 trips per dwelling unit; 40% inbound and 60% outbound
 - Average PM Peak Hour Trip Rate: 0.34 trips per dwelling unit; 55% inbound and 45% outbound

In addition to the proposed project trip generation forecasts, forecasts also were made for the existing project site land uses. ITE Land Use Codes 110 (Light Industrial), 150 (Warehouse) and 925 (Drinking Place) trip generation average rates were used to forecast expected traffic generation for the existing on-site land uses.

The trip generation forecast for the proposed project is summarized in **Table 3**. As presented in **Table 3**, the proposed project is expected to generate a net increase of 38 vehicle trips (8 inbound trips and 30 outbound trips) during the weekday AM peak hour. During the weekday PM peak hour, the proposed project is expected to generate a net increase of 26 vehicle trips (16 inbound trips and 10 outbound trips). Over a 24-hour period, the proposed project is forecast to generate a net increase of 372 daily trip ends during a typical weekday (186 inbound trips and 186 outbound trips).

Project Trip Distribution and Assignment

Project traffic volumes both entering and exiting the site have been distributed and assigned to the adjacent street system based on the following considerations:

- The site's proximity to key traffic corridors (i.e., Gaffey Street, South Pacific Avenue, etc.);
- Expected localized traffic flow patterns based on adjacent roadway channelization and presence of traffic signals;
- Existing intersection traffic volumes;
- Ingress/egress scheme planned for the proposed project;
- Nearby population and employment centers; and
- Input from LADOT staff.

The general, directional traffic distribution patterns for the proposed project is presented in **Figure 8**. The forecast weekday AM and PM peak hour project traffic volumes at the study intersections associated with the proposed project are presented in **Figures 9** and **10**, respectively. The traffic volume assignments presented in **Figures 9** and **10** reflect the traffic distribution characteristics shown in **Figure 8** and the project traffic generation forecasts presented in **Table 3**.

Traffic Impact Analysis Methodology

The study intersections were evaluated using the Critical Movement Analysis (CMA) method of analysis which determines Volume-to-Capacity (v/c) ratios on a critical lane basis. The overall intersection v/c ratio is subsequently assigned a Level of Service (LOS) value to describe intersection operations. Level of Service varies from LOS A (free flow condition) to LOS F (jammed condition). A description of the CMA method and corresponding Levels of Service is provided in **Appendix B**.

The relative impact of the added traffic volumes expected to be generated by the proposed project during the weekday AM and PM peak hours was evaluated based on an analysis of the existing and future operating conditions at the study intersections, without and with the proposed project. The previously discussed capacity analysis procedures were utilized to evaluate the existing and future v/c relationships and service level characteristics at each study intersection.

The significance of the potential impacts of project-generated traffic was identified using the traffic impact criteria set forth in LADOT's *Transportation Impact Study Guidelines*, December 2016. According to the City's published traffic study guidelines, the impact is considered significant if the project-related increase in the v/c ratio equals or exceeds the thresholds presented in **Table 4**.

Table 4 CITY OF LOS ANGELES INTERSECTION IMPACT THRESHOLD CRITERIA		
Final v/c	Level of Service	Project Related Increase in v/c
> 0.701 - 0.800	C	equal to or greater than 0.040
> 0.801 - 0.900	D	equal to or greater than 0.020
>0.901	E or F	equal to or greater than 0.010

The City's Sliding Scale Method requires mitigation of project traffic impacts whenever traffic generated by the proposed development causes an increase of the analyzed intersection v/c ratio by an amount equal to or greater than the values shown above.

Traffic impacts at the study intersections were analyzed for the following conditions:

- [a] Existing conditions.
- [b] Existing with project conditions.
- [c] Condition (a) plus one percent (1.0%) annual ambient traffic growth through year 2022 (i.e., future without project conditions).
- [d] Condition [c] with completion and occupancy of the proposed project.
- [e] Condition [d] with implementation of project mitigation measures, where necessary.

The traffic impact analysis prepared for the study intersections using the CMA methodology and application of the City of Los Angeles significant traffic impact criteria is summarized in **Table 5**. The CMA data worksheets for the analyzed intersections are contained in *Appendix B*.

Traffic Analysis

Existing Conditions

As indicated in column [1] of *Table 5*, all of the study intersections are presently operating at LOS A or better during the weekday AM and PM peak hours under existing conditions. As previously mentioned, the existing traffic volumes at the study intersections during the weekday AM and PM peak hours are displayed in *Figures 5* and *6*, respectively.

Existing With Project Conditions

As shown in column [2] of *Table 5*, application of the City's threshold criteria to the "Existing With Project" scenario indicates that the proposed project is not expected to create significant impacts at any of the study intersections. Less than significant impacts are noted at all four study intersections. Because there are no significant impacts, no traffic mitigation measures are required or recommended for the study intersections under the "Existing With Project" conditions.

Future Without Project Conditions

The future cumulative baseline conditions were forecast based on the addition of traffic generated by the completion and occupancy of the related projects, as well as the growth in traffic due to the combined effects of continuing development, intensification of existing developments and other factors (i.e., ambient growth). The *v/c* ratios at all of the study intersections are incrementally increased with the addition of ambient traffic and traffic generated by the related projects listed in *Table 2*. As presented in column [3] of *Table 5*, all the study intersections are expected to operate at LOS B or better during the weekday AM and PM peak hours under the future without project conditions.

Future With Project Conditions

As shown in column [4] of *Table 5*, application of the City's threshold criteria to the "Future With Project" scenario indicates that the proposed project is not expected to create significant impacts at any of the study intersections. Incremental, but not significant, impacts are noted at the study intersections. Because there are no significant impacts, no traffic mitigation measures are required or recommended for the study intersections under the "Future With Project" conditions. The future with project (existing, ambient growth, related projects and project) traffic volumes at the study intersections during the weekday AM and PM peak hours are illustrated in *Figures 11* and *12*, respectively.

City of Los Angeles High Injury Network Review

Vision Zero is a policy which prioritizes the safety of pedestrians and bicyclists on public streets, with the understanding that roads which are safe for vulnerable users will be safer for all users, in an effort to eliminate traffic fatalities. Key elements of the policy, such as reducing traffic speeds, are founded on the principles of engineering, education, enforcement, evaluation, and equity. Originating in Sweden, the policy has been adopted in numerous other North American cities, including California cities such as San Francisco and San Diego.

Mayor Eric Garcetti issued Executive Directive No. 10 in August 2015, formally launching the Vision Zero initiative in Los Angeles. Vision Zero is also a stated safety objective in the Mobility Plan 2035, which sets the goal of zero traffic deaths

by 2035. Jointly directed by the Department of Transportation and the Police Department, Vision Zero takes a multi-disciplinary approach to identifying safety risk factors and implementing solutions on a citywide scale. Using a methodology originally developed by the San Francisco Public Health Department, the Vision Zero Task Force has identified streets where investments in safety will have the most impact in reducing severe injuries and traffic fatalities in the City⁴. These roads are collectively known as the High Injury Network (HIN). The HIN will be reviewed for potential engineering re-design as well as educational and enforcement campaigns.

The proposed project is located at 1331 South Pacific Avenue between 13th Street and 14th Street within the San Pedro Community Plan area. As shown in **Figure 13**, South Pacific Avenue is identified as part of the HIN in the project vicinity. If a proposed project results in significant traffic impacts at intersections located along a designated HIN, LADOT's Vision Zero group will review those specific locations and immediate vicinity for potential safety enhancements that are consistent with the City's Vision Zero initiative.

Summary

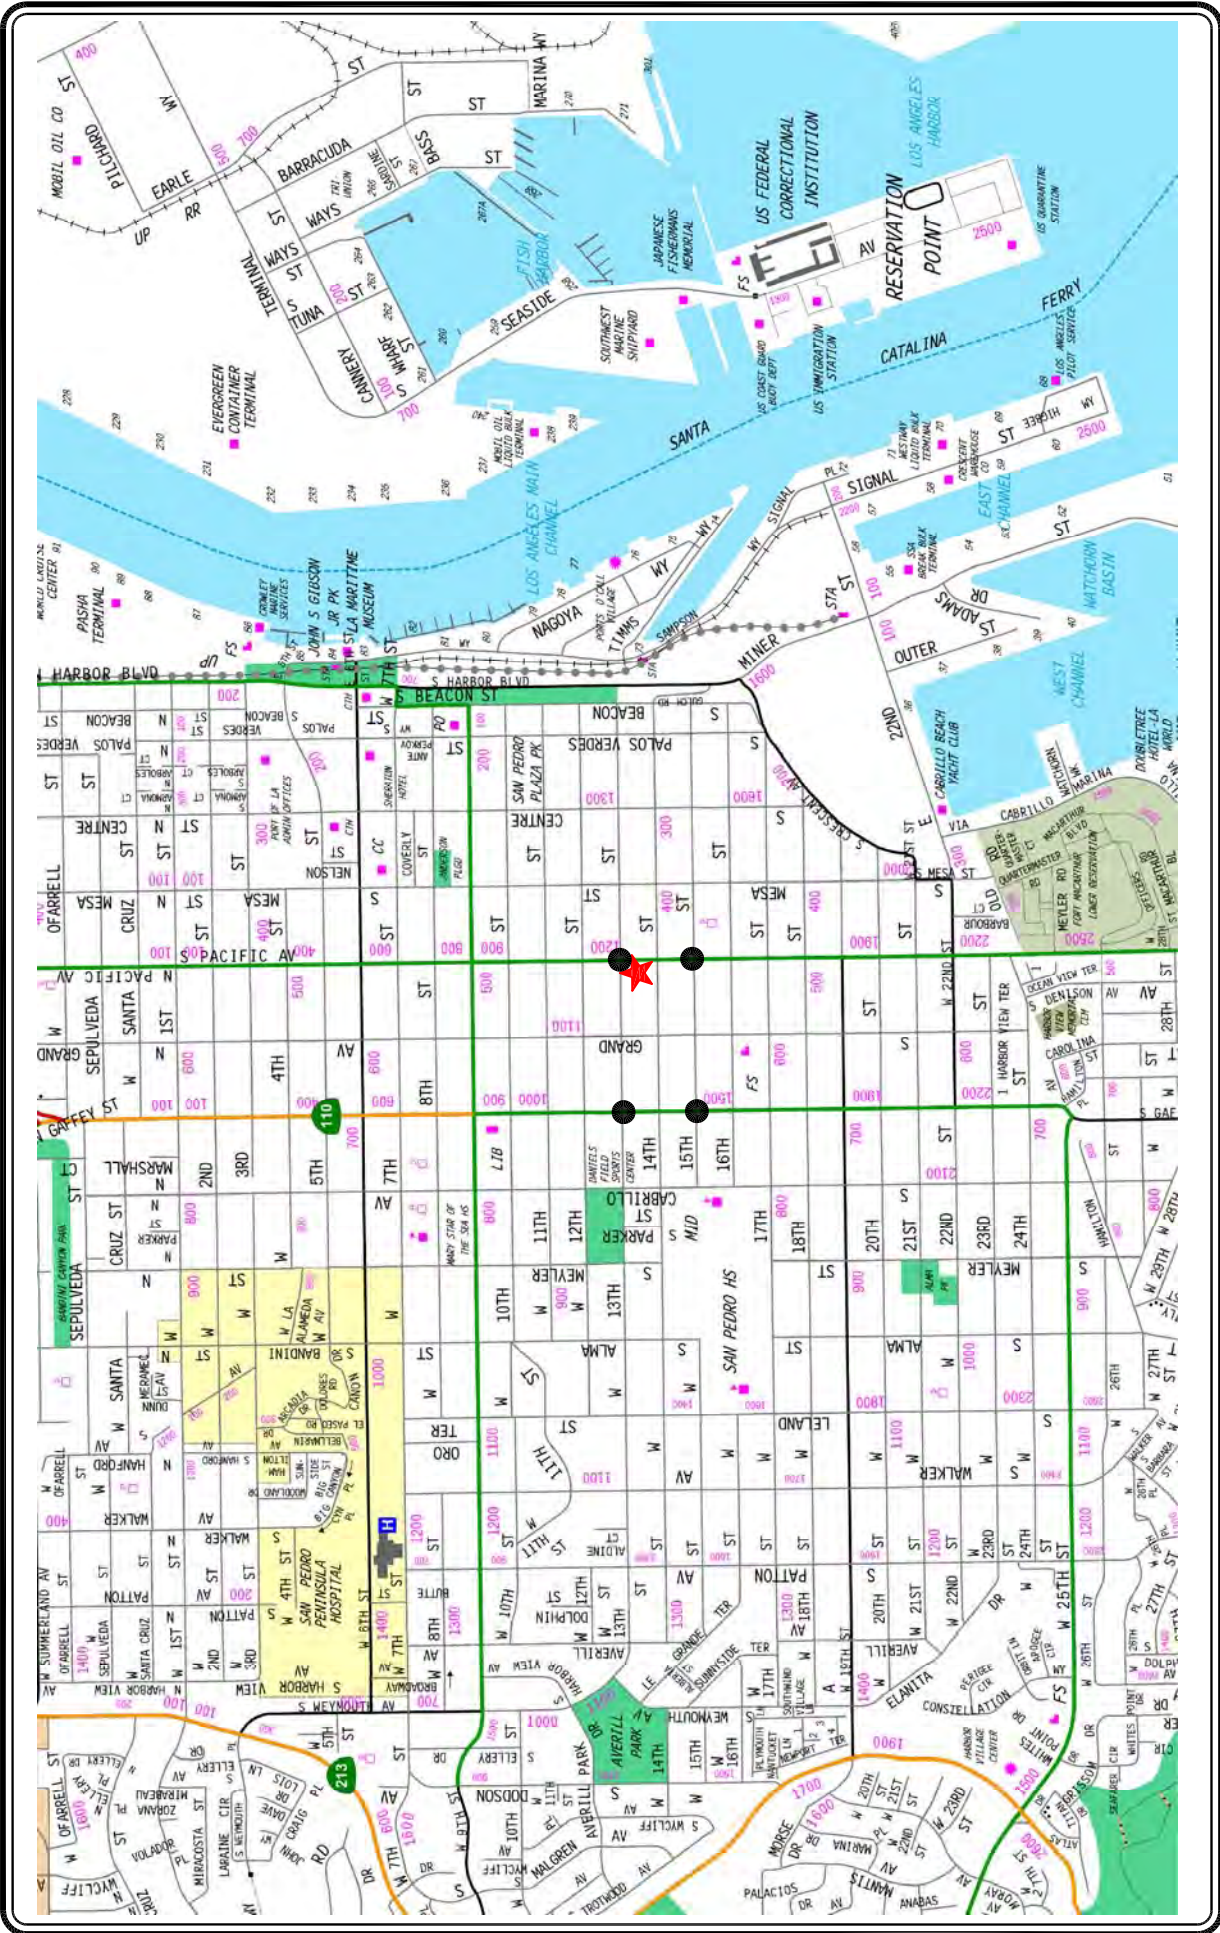

This traffic assessment has been conducted to identify and evaluate the potential impacts of traffic generated by the proposed 1331 South Pacific Avenue Residential project. The project site is located within the San Pedro Community Plan area of the City of Los Angeles. The proposed project consists of a 109-unit apartment complex, of which 12 units are designated as very low-income units. A total of 65 vehicular parking spaces, including three accessible spaces, will be provided on-site. In addition, 81 long-term bicycle spaces and 8 short-term bicycle spaces are planned to be provided as part of the proposed project.

In order to evaluate the potential impacts to the local street system, four study intersections were analyzed to determine changes in operations following occupancy and utilization of the proposed project. It is concluded that the proposed project is not expected to create significant impacts at any of the four study intersections under either the Existing With Project or Future With Project conditions based on the City of Los Angeles thresholds of significance used for evaluating traffic impacts. Because there are no significant impacts, no traffic mitigation measures are required or recommended for the study intersections.

Please feel free to call us at 626-796-2322 with any questions or comments regarding this traffic assessment.

Noise Technical Report

Prepared by DKA Planning
20445 Prospect Road, Suite C
San Jose, CA 95129
November 2019

Noise Analysis

1. Introduction

This section evaluates noise impacts that would be generated by construction and operation of the Proposed Project at 1331 South Pacific Avenue. The analysis compares these impacts to applicable regulations and thresholds of significance. Noise measurement technical reports, calculation worksheets, and a map of noise receptors and measurement locations are included in the Appendix to this report.

2. Environmental Setting

a) Fundamentals of Noise

(1) Introduction to Noise

(a) Characteristics of Sound

Sound can be described in terms of its loudness (amplitude) and frequency (pitch). The standard unit of measurement for sound is the decibel (i.e., dB). Because the human ear is not equally sensitive to sound at all frequencies, the A-weighted scale (dBA) is used to reflect the normal hearing sensitivity range. On this scale, the range of human hearing extends from 3 to 140 dBA. **Table 1** provides examples of A-weighted noise levels from common sources.

Table 1
A-Weighted Decibel Scale

Typical A-Weighted Sound Levels	Sound Level (dBA L _{eq})
Near Jet Engine	130
Rock and Roll Band	110
Jet flyover at 1,000 feet	100
Power Motor	90
Food Blender	80
Living Room Music	70
Human Voice at 3 feet	60
Residential Air Conditioner at 50 feet	50
Bird Calls	40
Quiet Living Room	30
Average Whisper	20
Rustling Leaves	10

Source: Cowan, James P., Handbook of Environmental Acoustics, 1993.

These noise levels are approximations intended for general reference and informational use.

(b) Noise Definitions

This noise analysis discusses sound levels in terms of equivalent noise level (L_{eq}), maximum noise level (L_{max}) and the Community Noise Equivalent Level (CNEL).

Equivalent Noise Level (L_{eq}): L_{eq} represents the average noise level on an energy basis for a specific time period. Average noise level is based on the energy content (acoustic energy) of sound. For example, the L_{eq} for one hour is the energy average noise level during that hour. L_{eq} can be thought of as a continuous noise level of a certain period equivalent in energy content to a fluctuating noise level of that same period. L_{eq} is expressed in units of dBA.

Maximum Noise Level (L_{max}): L_{max} represents the maximum instantaneous noise level measured during a given time period.

Community Noise Equivalent Level (CNEL): CNEL is an adjusted noise measurement scale of average sound level during a 24-hour period. Due to increased noise sensitivities during evening and night hours, human reaction to sound between 7:00 P.M. and 10:00 P.M. is as if it were actually 5 dBA higher than had it occurred between 7:00 A.M. and 7:00 P.M. From 10:00 P.M. to 7:00 A.M., humans perceive sound as if it were 10 dBA higher. To account for these sensitivities, CNEL figures are obtained by adding an additional 5 dBA to evening noise levels between 7:00 P.M. and 10:00 P.M. and 10 dBA to nighttime noise levels between 10:00 P.M. and 7:00 A.M. As such, 24-hour CNEL figures are always higher than their corresponding actual 24-hour averages.

(c) Effects of Noise

The degree to which noise can impact an environment ranges from levels that interfere with speech and sleep to levels that can cause adverse health effects. Most human response to noise is subjective. Factors that influence individual responses include the intensity, frequency, and pattern of noise; the amount of background noise present; and the nature of work or human activity exposed to intruding noise. According to the National Institute of Health (NIH), extended or repeated exposure to sounds at or above 85 dB can cause hearing loss. Sounds of 75 dBA or less, even after continuous exposure, are unlikely to cause hearing loss.¹ The World Health Organization (WHO) reports that adults should not be exposed to sudden “impulse” noise events of 140 dB or greater. For children, this limit is 120 dB.²

Exposure to elevated nighttime noise levels can disrupt sleep, leading to increased levels of fatigue and decreased work or school performance. For the preservation of healthy sleeping environments, the WHO recommends that continuous interior noise levels not exceed 30 dBA,

¹ National Institute of Health, National Institute on Deafness and Other Communication, www.nidcd.nih.gov/health/noise-induced-hearing-loss.

² World Health Organization, Guidelines for Community Noise, 1999.

L_{eq} and that individual noise events of 45 dBA or higher be limited.³ Assuming a conservative exterior to interior sound reduction of 15 dBA, continuous exterior noise levels should therefore not exceed 45 dBA L_{eq} . Individual exterior events of 60 dBA or higher should also be limited.

People with normal hearing sensitivity can recognize small changes in sound levels of about 3 dBA. Changes of at least 5 dBA can be readily noticeable and may cause community reactions. Sound level increases of 10 dBA or greater are perceived as a doubling in loudness.⁴ However, few people are highly annoyed by noise levels below 55 dBA L_{eq} .⁵

(d) *Noise Attenuation*

Noise levels decrease as the distance from noise sources to receivers increases. For each doubling of distance, noise from stationary sources (i.e., “point sources”) can decrease by about 6 dBA over hard surfaces (e.g., reflective surfaces such as parking lots) and 7.5 dBA over soft surfaces (e.g., absorptive surfaces such as soft dirt and grass). For example, if a point source produces a noise level of 89 dBA at a reference distance of 50 feet and over an asphalt surface, its noise level would be approximately 83 dBA at a distance of 100 feet, 77 dBA at 200 feet, etc. Noises generated by mobile “line” sources such as roadways decrease by approximately 3 dBA over hard surfaces and 4.5 dBA over soft surfaces for each doubling of distance.

Noise is most audible when traveling by direct line of sight, an unobstructed visual path between noise source and receptor. Barriers that break line of sight between sources and receivers, such as walls and buildings, can greatly reduce source noise levels by allowing noise to reach receivers by diffraction only. As a result, sound barriers can generally reduce noise levels by up to 15 dBA.⁶ The effectiveness of barriers can be greatly reduced when they are not high or long enough to completely break line of sight from sources to receivers. It should be noted that because decibels are logarithmic units, they cannot just be added or subtracted. For example, two cars each producing 60 dBA of noise would not produce a combined 120 dBA.

b) Regulatory Framework

(1) Noise

(a) *Federal*

Currently, no federal noise standards regulate environmental noise associated with short-term construction activities or long-term operations of development projects. As such, temporary and long-term noise impacts produced by the Project would be largely regulated or evaluated by State and City of Los Angeles standards designed to protect public well-being and health.

(b) State

2017 General Plan Guidelines

The State's 2017 General Plan Guidelines establish county and city standards for acceptable exterior noise levels based on land use. These standards are incorporated into land use planning processes to prevent or reduce noise and land use incompatibilities. **Table 2** illustrates State compatibility considerations between various land uses and exterior noise levels.

Table 2
State of California Noise/Land Use Compatibility Matrix

Land Use Compatibility	Community Noise Exposure (dBA, CNEL)

					NU			
								CU
Office Buildings, Business Commercial and Professional	NA							
				CA				
							NU	
Industrial, Manufacturing, Utilities, Agriculture	NA							
				CA				
							NU	

NA = Normally Acceptable - Specified land use is satisfactory, based upon the assumption that any buildings involved are of normal conventional construction without any special noise insulation requirements.
 CA = Conditionally Acceptable - New construction or development should be undertaken only after a detailed analysis of the noise reduction requirements is made and needed noise insulation features included in the design. Conventional construction, but with closed windows and fresh air supply system or air conditioning will normally suffice.
 NU = Normally Unacceptable - New construction or development should generally be discouraged. If new construction or development does proceed, a detailed analysis of the noise reduction requirements must be made and needed noise insulation features included in the design.
 CU = Clearly Unacceptable - New construction or development should generally not be undertaken.
 Source: California Office of Planning and Research, General Plan Guidelines - Noise Element Guidelines (Appendix D), Figure 2, 2017.

California Government Code Section 65302 also requires each county and city to prepare and adopt a comprehensive long-range general plan for its physical development. Section 65302(f) requires a noise element to be included in the general plan. This noise element must identify and appraise noise problems in the community, recognize Office of Noise Control guidelines, and analyze and quantify current and projected noise levels.

The State has also established noise insulation standards for new multi-family residential units, hotels, and motels that are subject to relatively high levels of noise from transportation. The noise insulation standards, collectively referred to as the California Noise Insulation Standards (Title 24, California Code of Regulations) set forth an interior standard of 45 dBA CNEL for habitable rooms. The standards require an acoustical analysis which indicates that dwelling units meet this interior standard where such units are proposed in areas subject to exterior noise levels greater than 60 dBA CNEL. Local jurisdictions typically enforce the California Noise Insulation Standards through the building permit application process.

(c) *City of Los Angeles*

General Plan Noise Element

The City of Los Angeles General Plan includes a Noise Element that includes policies and standards in order to guide the control of noise to protect residents, workers, and visitors. Its primary goal is to regulate long-term noise impacts to preserve acceptable noise environments for all types of land uses. There are also references to programs applicable to construction projects that call for protection of noise sensitive uses and use of best practices to minimize short-term noise impacts. However, the Noise Element contains no quantitative or other thresholds of significance for evaluating a project's noise or vibration impacts. Instead, it adopts the State's guidance on noise and land use compatibility, shown in **Table 2** above, "to help guide determination of appropriate land use and mitigation measures vis-à-vis existing or anticipated ambient noise levels."

Los Angeles Municipal Code

The City of Los Angeles Municipal Code (LAMC) contains regulations that would regulate noise from the Project's temporary construction activities.

Section 41.40(a) would prohibit specific Project construction activities from occurring between the hours of 9:00 P.M. and 7:00 A.M., Monday through Friday. Subdivision (c) would further prohibit such activities from occurring before 8:00 A.M. or after 6:00 P.M. on any Saturday or national holiday, or at any time on any Sunday. These restrictions serve to limit specific Project construction activities to Monday through Friday 7:00 A.M. to 9:00 P.M., and 8:00 A.M. to 6:00 P.M. on Saturdays or national holidays.

SEC.41.40. NOISE DUE TO CONSTRUCTION, EXCAVATION WORK—WHEN PROHIBITED.

(a) No person shall, between the hours of 9:00 P.M. and 7:00 A.M. of the following day, perform any construction or repair work of any kind upon, or any excavating for, any building or structure, where any of the foregoing entails the use of any power drive drill, riveting machine excavator or any other machine, tool, device or equipment which makes loud noises to the disturbance of persons occupying sleeping quarters in any dwelling hotel or apartment or other place of residence. In addition, the operation, repair or servicing of construction equipment and the job-site delivering of construction materials in such areas shall be prohibited during the hours herein specified. Any person who knowingly and willfully violates the foregoing provision shall be deemed guilty of a misdemeanor punishable as elsewhere provided in this Code.

(c) No person, other than an individual homeowner engaged in the repair or construction of his single-family dwelling shall perform any construction or repair work of any kind upon, or any earth grading for, any building or structure located on land developed with residential buildings under the provisions of Chapter I of this Code, or perform such work within 500 feet of land so occupied, before 8:00 A.M. or after 6:00 P.M. on any Saturday or national holiday nor at any time on any Sunday. In addition, the operation, repair, or servicing of construction equipment and the job-site delivering of construction materials in such areas shall be prohibited on Saturdays and on Sundays during the hours herein specific...

Section 112.05 of the LAMC establishes noise limits for powered equipment and hand tools operated in a residential zone or within 500 feet of any residential zone. Of particular importance to construction activities is subdivision (a), which institutes a maximum noise limit of 75 dBA as measured at a distance of 50 feet from the activity for the types of construction vehicles and equipment that would likely be used in the construction of the Project. However, the LAMC notes that these limitations would not necessarily apply if it can be proven that the Project's compliance would be technically infeasible despite the use of noise-reducing means or methods.

SEC. 112.05. MAXIMUM NOISE LEVEL OF POWERED EQUIPMENT OR POWERED HAND TOOLS

Between the hours of 7:00 A.M. and 10:00 P.M., in any residential zone of the City or within 500 feet thereof, no person shall operate or cause to be operated any powered equipment or powered hand tool that produces a maximum noise level exceeding the following noise limits at a distance of 50 feet therefrom:

(a) 75 dBA for construction, industrial, and agricultural machinery including crawler-tractors, dozers, rotary drills and augers, loaders, power shovels, cranes, derricks, motor graders, paving machines, off-highway trucks, ditchers, trenchers, compactors, scrapers, wagons, pavement breakers, compressors and pneumatic or other powered equipment;

(b) 75 dBA for powered equipment of 20 HP or less intended for infrequent use in residential areas, including chain saws, log chippers and powered hand tools;

(c) 65 dBA for powered equipment intended for repetitive use in residential areas, including lawn mowers, backpack blowers, small lawn and garden tools and riding tractors.

Said noise limitations shall not apply where compliance therewith is technically infeasible. The burden of proving that compliance is technically infeasible shall be upon the person or persons charged with a violation of this section. Technical infeasibility shall mean that said noise limitations cannot be complied with despite the use of mufflers, shields, sound barriers and/or other noise reduction device or techniques during the operation of the equipment.

In addition, the LAMC regulates long-term operations of land uses, including but not limited to the following regulations.

Section 111.02 discusses the measurement procedure and criteria regarding the sound level of “offending” noise sources. A noise source causing a 5 dBA increase over the existing average ambient noise levels of an adjacent property is considered to create a noise violation. However, Section 111.02(b) provides a 5 dBA allowance for noise sources lasting more than five but less than 15 minutes in any 1-hour period, and a 10 dBA allowance for noise sources causing noise lasting 5 minutes or less in any 1-hour period. In accordance with these regulations, a noise level increase from certain city-regulated noise sources of five dBA over the existing or presumed ambient noise level at an adjacent property is considered a violation.

Section 112.01 of the LAMC would prohibit any amplified noises, especially those from outdoor sources (e.g., outdoor speakers, stereo systems) from exceeding the ambient noise levels of adjacent properties by more than 5 dBA. Any amplified noises would also be prohibited from being audible at any distance greater than 150 feet from the Project’s property line, as the Project is located within 500 feet of residential zones.

SEC.112.01. RADIOS, TELEVISION SETS, AND SIMILAR DEVICES

(a) It shall be unlawful for any person within any zone of the City to use or operate any radio, musical instrument, phonograph, television receiver, or other machine or device for the producing, reproducing or amplification of the human voice, music, or any other sound, in such a manner, as to disturb the peace, quiet, and comfort of neighbor occupants or any reasonable person residing or working in the area.

(b) Any noise level caused by such use or operation which is audible to the human ear at a distance in excess of 150 feet from the property line of the noise source, within any residential zone of the City or within 500 feet thereof, shall be a violation of the provisions of this section.

(c) Any noise level caused by such use or operation which exceeds the ambient noise level on the premises of any other occupied property, or if a condominium, apartment house, duplex, or attached business, within any adjoining unit, by more than five (5) decibels shall be a violation of the provisions of this section.

Section 112.02 would prevent Project heating, ventilation, and air conditioning (HVAC) systems and other mechanical equipment from elevating ambient noise levels at neighboring residences by more than 5 dBA.

SEC.112.02. AIR CONDITIONING, REFRIGERATION, HEATING, PLUMBING, FILTERING EQUIPMENT

(a) It shall be unlawful for any person, within any zone of the city, to operate any air conditioning, refrigeration or heating equipment for any residence or other structure or to operate any pumping, filtering or heating equipment for any pool or reservoir in such manner as to create any noise which would cause the noise level on the premises of any other occupied property ... to exceed the ambient noise level by more than five decibels.

The LAMC also provides regulations regarding vehicle-related noise, including Sections 114.02, 114.03, and 114.06. Section 114.02 prohibits the operation of any motor driven vehicles upon any property within the City in a manner that would cause the noise level on the premises of any occupied residential property to exceed the ambient noise level by more than 5 dBA. Section 114.03 prohibits loading and unloading causing any impulsive sound, raucous or unnecessary noise within 200 feet of any residential building between the hours of 10 P.M. and 7 A.M. Section 114.06 requires vehicle theft alarm systems to be silenced within five minutes.

c) Existing Conditions

(1) Noise-Sensitive Receptors

Land uses sensitive to noise may include residences, transient lodgings, schools, libraries, churches, hospitals, nursing homes, auditoriums, concert halls, amphitheaters, playgrounds, and parks. Local receptors mainly include residences and some institutional land uses such as schools and churches.

The Project Site is located in the San Pedro neighborhood of Los Angeles, a diverse neighborhood with commercial and retail uses along major roads like Pacific Avenue. Examples of key noise-sensitive receptors within 1,000 feet of the Project Site include but are not limited to the following:

- Multi-family residences, 524 West 14th Street; 10 feet west of the Project site.
- 15th Street Elementary School, 1527 South Mesa Street; 660 feet southeast of the Project site.
- Multi-family residences, 529 West 13th Street; as close as 90 feet north of the Project site to the main residence.
- Multi-family residences, 498 West 13th Street; as close as 250 feet north of the Project site.

(2) Existing Ambient Noise Levels

The Project Site is vacant of any improvements. As such, this analysis assumes there is no noise generated at the existing Project Site.

In September 2019, DKA Planning took short-term noise measurements near the Project site to determine the ambient noise conditions of the neighborhood near sensitive receptors.⁷ As shown in **Table 3**, noise levels along Pacific Avenue and other roadways near the Project Site are consistent with those in residential neighborhoods and along arterials. Specifically, noise levels are consistent with General Plan Noise Element guidelines for residential neighborhoods but are influenced by vehicle traffic on local streets or nearby arterials. Other noise sources are typical of residential neighborhoods (e.g., gardeners) and commercial streets (e.g., HVAC noise, construction).

Table 3
Existing Noise Levels

3. Project Impacts

a) Methodology

(1) On-Site Construction Activities

The Project's construction noise impact associated with its on-site construction activities was determined by identifying the maximum L_{max} source noise levels of the Project's potential construction equipment at a reference distance of 50 feet and comparing them to the 75 dBA at 50 feet standard set by Section 112.05 of the LAMC, as the Project is located within 500 feet of residential zones. Noise levels were then conservatively adjusted to account for standard,

⁷ Noise measurements were taken using a Quest Technologies SoundPro DL Sound Level Meter. The SoundPro meter complies with the American National Standards Institute (ANSI) and International Electrotechnical Commission (IEC) for general environmental measurement instrumentation. The meter was equipped with an omni-directional microphone, calibrated before the day's measurements, and set at approximately five feet above the ground.

industry-wide best practice noise management techniques or features that would be employed during the Project's construction.

Construction noise levels at nearby sensitive receptors were modeled using the SoundPLAN Essential model (version 5.0). This software package considers reference equipment noise levels, noise management techniques, distance to receptors, and any attenuating features to predict noise levels from sources like construction equipment. The distance from construction equipment noise sources (e.g., engines and tailpipes) assume that vehicles would not be capable of operating directly where the Project's property line abuts adjacent structures. These vehicles would retain some setback to preserve maneuverability, in addition to operating at reduced power and intensity to maintain precision at these locations.

(2) Off-Site Construction Activities – Haul Trucks

The Project's off-site construction noise impact from haul trucks was analyzed by considering the Project's estimated haul truck usage with existing traffic and roadway noise levels along the Project's anticipated haul route. Because it takes a doubling of traffic volumes on a roadway to generate the increased sound energy it takes to elevate ambient noise levels by 3 dBA, the analysis focused on whether truck traffic would double traffic volumes on key roadways to be used for hauling soils to and/or from the Project Site during construction activities. Because haul trucks have a larger roadway capacity than traditional passenger vehicles, a 2.0 passenger car equivalency (PCE) was used to convert haul truck trips to an equivalent number of passenger vehicles.⁸ It should be noted that because an official haul route has not been approved as of the preparation of this analysis, assumptions were made about logical routes that would minimize haul truck traffic on local streets in favor of major arterials that can access regional-serving freeways.

(3) On-Site Operational Noise Sources

The Project's potential to result in significant noise impacts from on-site operational noise sources was evaluated by identifying sources of on-site noise sources and considering the impact that they could produce given the nature of the source (i.e., loudness and whether noise would be produced during daytime or more-sensitive nighttime hours), distances to nearby sensitive receptors, surrounding ambient noise levels, the presence of similar noise sources in the vicinity, and maximum allowable noise levels permitted by the LAMC.

(4) Off-Site Operational Project Traffic Noise Sources

The Project's off-site noise impact from Project-related traffic was evaluated based its potential to increase traffic volumes on local roadways that serve the Project site. Because it takes a doubling of traffic volumes on a roadway to generate the increased sound energy it takes to elevate ambient noise levels by 3 dBA, the analysis focused on whether auto trips generated by the

⁸ Transportation Research Board, Transportation Circular No. 212 and Exhibit 12-25 of Highway Capacity manual, 6th Edition.

Proposed Project would double traffic volumes on key roadways to be used to access the Project site.

b) Thresholds of Significance

The State's CEQA Guidelines provides an exemption from further environmental analysis (Class 32) for infill development of any type that meets certain criteria. The City of Los Angeles has provided further guidance on Class 32 Categorical Exemptions for infill projects.⁹ This analysis evaluates the Project's impacts against three noise-related criteria required to be met to qualify for a Class 32 categorical exemption from CEQA requirements:

1. The project is an environmentally benign infill project that is consistent with the General Plan and Zoning requirements.
2. The project and successive projects of the same type in the same place will not result in cumulative impacts;
3. There are no unusual circumstances creating the reasonable possibility of significant effects.

c) Analysis of Project Impacts

Criterion 1: The project is an environmentally benign infill project that is consistent with the General Plan and Zoning requirements.

The Project is environmentally benign, designed and built to support and promote environmental sustainability policies, incorporating stringent building requirements imposed by both the State and the City. It is also an infill project that would add needed housing in the San Pedro neighborhood and will help reduce traffic impacts associated with growth, as the Project's proximity to public transportation would reduce vehicle miles traveled for future residents. The Project's proximity to public transportation in the San Pedro neighborhood would reduce vehicle miles traveled for residents over locations in sprawl environments that lack public transit. Services include Metro local bus service (i.e., Route 246), Metro Silver Line, and DASH San Pedro shuttle service. The Project would also promote bicycle transportation by providing eight short- and 81 long-term bicycle parking spaces, pursuant to LAMC section 12.21 A.4.

The Proposed Project's consistency with General Plan and Zoning requirements is judged based on three key factors:

- A. Land use consistency with General Plan and Zoning Requirements
- B. Consistency of construction impacts with the Municipal Code

⁹ City of Los Angeles, Special Requirement Criteria: Infill Development Projects – Class 32 Categorical Exemption (CP-7828), July 23, 2018

C. Consistency of operations impacts with the Municipal Code

A. Land Use Consistency with General Plan and Zoning Requirements

The Project would be consistent with the City's General Plan and the Community Plan. Specifically, the Project's residential and job growth would fall well within the growth forecasts for the City. Based on a household size factor of 2.43 persons per household in the City in 2017, the Project is estimated to generate a residential population of 265 persons at full buildout, which would represent approximately 0.05 percent of the population growth forecasted by SCAG in the City of Los Angeles between 2017 and 2040. Because the Project's resulting residential growth would fall well within the growth forecasts for the City, it can be concluded that the Project would be consistent with the General Plan.

The Project Site is classified as "Neighborhood Commercial" in the General Plan Framework and the Community Plan, a classification that allows residential uses proposed by the Project. As such, the Project would be consistent with the City's General Plan's land use policies as well as the population growth associated with this Proposed Project.

B. Consistency of Construction Impacts with the Municipal Code

Construction of the Proposed Project would be consistent with the Municipal Code's requirements during on-site activities (construction) and off-site activities (soils hauling, truck deliveries, worker travel).

(1) Consistency with Municipal Code: On-Site Construction

The Project's on-site impacts from construction would be consistent with the City's municipal code requirements governing noise. Based on guidelines from the City of Los Angeles City Department of Planning, any on-site construction noise impact would be considered significant if:

- Construction noise would exceed the 75 dBA at 50 feet maximum noise level limit for powered equipment established by Section 112.05 of the LAMC. This regulation applies to the on-site operations of powered construction equipment and not to road-legal trucks operating on public rights-of-way;

Proposed construction would generate noise during the 16 months of building construction and application of architectural coatings. Noise-generating activities could occur between 7:00 A.M. and 9:00 P.M. Monday through Friday, in accordance with LAMC Section 41.40(a). On Saturdays, construction would be permitted to occur between 8:00 A.M. and 6:00 P.M. The Project would require heavy equipment such as excavators, loaders, and other earthmoving vehicles. Smaller equipment such as forklifts, generators, and powered hand tools would also be utilized.

Compliance with LAMC Section 112.05 would ultimately limit noise levels from powered construction equipment to 75 dBA or below at 50 feet, as the Project site is within 500 feet of residential zones. Standard, industry-wide best practices for construction in urban or otherwise

noise-sensitive areas would ensure that construction noise does not exceed this noise limit. These could include erecting temporary noise barriers around the Project's perimeter, using mufflers to dampen noise from internal combustion engines, and warming-up or staging equipment away from sensitive receptors. As discussed earlier, the City of Los Angeles Department of Planning recommends that LAMC Section 112.05 be used as a threshold of significance for construction noise. These generally include erecting temporary noise barriers around the Project's perimeter, using mufflers to dampen noise from internal combustion engines, and warming-up or staging equipment away from sensitive receptors (consistent with General Plan Noise Element Program P11).

As discussed earlier, LAMC Section 112.05 is used as a threshold of significance for construction noise for this type of in-fill development, as the purpose of the Noise Ordinance is to regulate sources of offensive or nuisance noises that would be injurious to the public welfare. Therefore, because the Project would comply fully with LAMC Section 112.05 by utilizing the types of equipment in **Table 4** that would employ best practices measures, its construction noise impact would be consistent with the Municipal Code. Impacts would be less than significant.

Table 4
Maximum Construction Noise Levels

Noise Source	Noise Level (dBA, L _{max}) ¹		Significant?
	Reference	With Best Practices	
Backhoe	77.6	57.6	No
Dozer	81.7	61.7	No
Excavator	80.7	60.7	No
Front End Loader	79.1	59.1	No
Gradall	83.4	63.4	No
Grader	85.0	65.0	No
¹ Noise levels derived from the Federal Highway Administration's Roadway Construction Noise Model, version 1.1 (FHWA RCNM 1.1). Assumes equivalent of 20 dBA of source reduction at 50-foot reference distance from use of advanced exhaust mufflers and/or temporary sound barriers.			

Project construction noise levels at receptor locations were also modeled assuming a maximum noise reference level of 75 dBA L_{eq} at 50 feet (**Figure 1**) during the grading phase. As shown in **Table 5**, construction noise levels at the nearest receptors could approach 69.7 dBA L_{eq}, while noise levels would be considerably lower at other key receptors. However, construction noise levels at these receptors are likely to be lower than these estimates for three reasons. First, construction equipment does not always operate at in a steady-state mode full load, but rather powers up and down depending on the duty cycle needed to conduct work. As such, equipment is occasionally idle during the when no noise is generated by that equipment. Second, equipment will often operate further away from off-site receptors, as mobile equipment generally does not operate continuously in one place. Third, as excavation progresses, equipment will increasingly

operate below grade, where the excavation pit will attenuate sound and block direct line-of-sight to off-site receptors. This would reduce the off-site construction noise levels accordingly.

Table 5
Construction Noise Levels at Sensitive Receptors

Receptor Location	Estimated Noise Level (dBA, L_{eq})

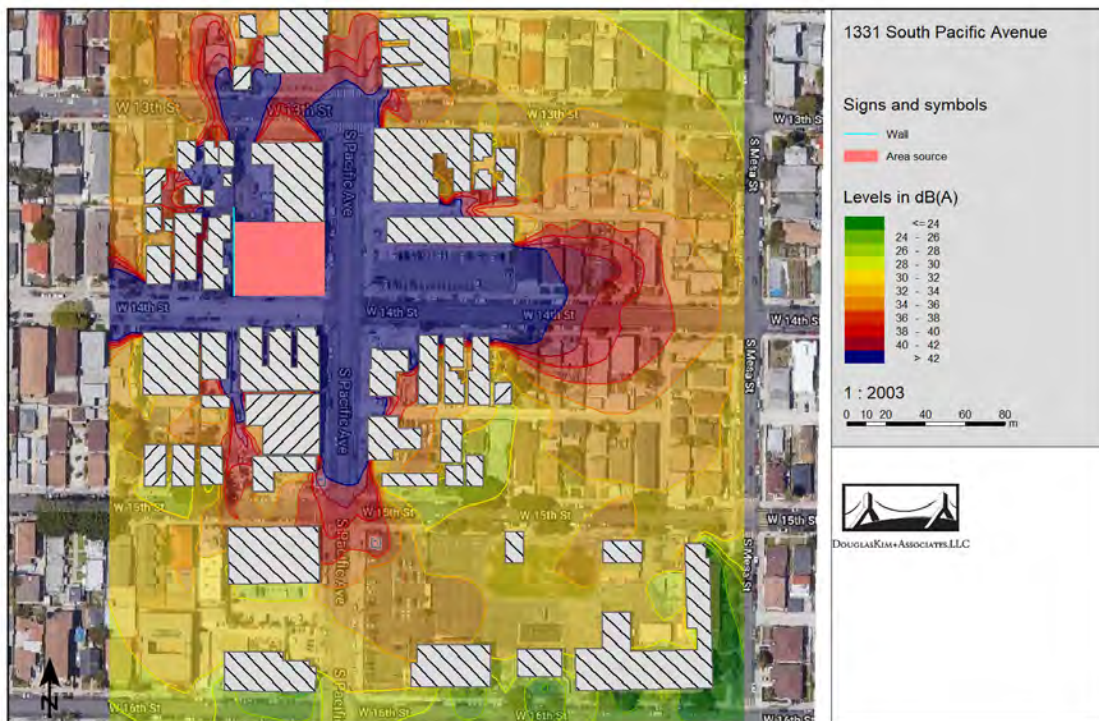

Figure 1
Construction Noise Contours

Figure 2
Construction Noise Levels at Sensitive Receptors

(2) Consistency with Municipal Code: Off-Site Construction Activities – Haul Trucks

With regard to off-site construction-related noise impacts, Section 112.05 of the LAMC does not regulate noise levels from road legal trucks, such as delivery vehicles, concrete mixing trucks, pumping trucks, and haul trucks. However, the operation of these vehicles would still comply with the construction restrictions set forth by Section 41.40 of the LAMC.

The Project is expected to require up 3,335 round-trip haul trips to export soil to off-site landfills, assuming that trucks would have a 14 cubic yard capacity. Use of larger trucks would reduce the amount of truck traffic and the associated noise from operation of diesel fuel trucks running internal combustion engines.

While a haul route has not been finalized, it would likely direct haul trucks from the construction site onto Gaffey Street to access the northbound lanes of the I-110 Harbor Freeway. Haul trucks would almost exclusively use arterials, bypassing local collector roads with quieter ambient noise levels that could be disturbed more than along major arterials.

Haul trucks would generate occasional noise events at receptors during passbys, but such intermittent noise events would have a limited effect on ambient noise levels in the area for two key reasons. First, a doubling of vehicle trip volumes would generally be necessary to elevate ambient noise levels by 3 or more dBA, the threshold at which humans could notice a change in noise levels. As the Project is expected to require an average of 84 one-way haul truck trips per day (assuming 31 days of grading), these truck trips would access local arterials over the course of a potential seven-hour workday. Assuming each haul truck is the Passenger Car Equivalent (PCE) of 2.0 vehicles, haul trucks would add the equivalent of 6,670 vehicle car trips to local arterials during the grading and excavation phase (i.e., 3,335 haul truck trips x 2.0 vehicles/truck PCE).¹⁰ These 6,670 PCE trips would average about 31 trips per hour over a seven-hour workday during the course of grading activities. If these trips were all taken using Gaffey Street, for example, they would represent a small increase in traffic on Gaffey Street during a peak traffic hour. This incremental percent increase in traffic volumes would result in negligible, inaudible increases in concomitant traffic noise, far from the 100 percent increase needed to result in a 3 dBA increase in ambient noise levels.

As a result, the Project's off-site construction noise impact from haul trucks would be consistent with the Municipal Code.

(3) Consistency with Municipal Code: Off-Site Construction Activities – Other Trucks

During construction of the Proposed Project, contractors and vendors would use trucks to deliver material to build and erect structures (e.g., concrete material, masonry, steel, metal, wood, plumbing supplies, electrical fixtures) would also travel to and from the Project site. These deliveries would involve various sized vehicles ranging from small delivery trucks to cement mixer trucks and 18-wheel trucks. Construction equipment would also have to be delivered to the site (e.g., dozers, excavators) using large trucks (e.g., 18-wheel trucks), though this would likely involve one-time delivery and removal of each piece of equipment over the course of the construction period.

As with the hauling of excavated soils, these trips would incrementally add a minimal number of truck trips to Pacific Avenue and/or Gaffey Street. An average of 16 truck trips per day are projected during the building construction phase, resulting in an average of 32 PCE trips per day, four of which could occur in the AM peak hour, for example.¹¹ This increment of traffic from these delivery trucks would have negligible impacts on traffic volumes on Pacific Avenue and/or Gaffey Street and not double traffic volumes on this major arterial, thereby resulting in inaudible increases to ambient noise at the limited number of sensitive receptors that flank these arterials.

¹⁰ Transportation Research Board, Transportation Circular No. 212 and Exhibit 12-25 of Highway Capacity manual, 6th Edition.

¹¹ Ibid

(4) Consistency with Municipal Code: Off-Site Construction Activities – Worker Commute Trips

During the course of the Project's construction phases, construction workers would travel to and from the Project site, particularly during the building construction phases, the most labor intensive phases of construction. While some workers could take advantage of shuttles that transport them from an off-site location to the job site, there could still be up to 89 workers commuting to and from the job site each day.¹²

If up to 89 trips were all added to Pacific Avenue or Gaffey Street, for example, they would represent a fraction of one percent of traffic volumes on this major arterial.¹³ This incremental increase in traffic volumes would be far less than the 100 percent increase in traffic volumes needed to elevate ambient noise levels by 3 dBA and would result in negligible, inaudible increases in concomitant traffic noise along Gaffey Street or Pacific Avenue and the limited number of sensitive receptors that flank the arterial.

(5) Off-Site Construction Activities – Cumulative Impacts

When factoring in all three types of off-site construction activities (i.e., haul truck trips, delivery and other truck trips, and worker commute trips), up to 124 PCE trips could be added to Pacific Avenue or Gaffey Street during the AM peak hour or PM peak hour. This contribution of traffic would represent a small increase in traffic on Pacific Avenue and Gaffey Street, for example. This incremental increase in traffic volumes would be far less than the 100 percent increase in traffic volumes needed to elevate ambient noise levels by 3 dBA and would result in negligible, inaudible increases in concomitant traffic noise along Pacific Avenue and Gaffey Street and the limited number of sensitive receptors that flank the arterial.

As a result, the Project's off-site noise impact from construction activities would be considered **less than significant**.

C. Consistency of Operations Impacts with the Municipal Code

During operations, the Project would produce noise from both on- and off-site sources. On-site sources would include but not be limited to vehicle movement and parking, mechanical equipment, and other operational noise from the land uses proposed. Off-site sources would include but not be limited to traffic traveling to and from the Project site. As discussed below, the Project would not result in an exposure of persons to or a generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies. The Project would also not increase surrounding noise levels by more than 5 dBA

¹² Ibid

¹³ Ibid.

CNEL, the minimum threshold of significance adopted by this analysis. As a result, the Project's on-site operational noise impacts would be considered **less than significant**.

The following criteria are used to assess the impact of the Project's operational noise sources that are located on the Project Site. A Project's operational noise impacts would be significant if:

- Project operations would cause a 5 dBA increase over the existing average ambient noise levels of an adjacent property (LAMC Section 111.02).¹⁴¹⁵

(6) Consistency with Municipal Code: On-Site Operations

Mechanical Equipment. HVAC equipment would be located on the building's rooftop, where rooftop units (RTUs) would be set back throughout the roof, to the west of proposed roof decks. This mechanical equipment would generate a sound pressure level of approximately 81.9 dBA L_{eq} at five feet.¹⁶ The roof edge on all elevations would create a natural noise barrier that reduces noise levels from rooftop HVAC units by 10 dBA or more and reduce any noise exposure for nearby receptors. This is helpful in managing noise, as equipment often operates continuously throughout the day, evening, and night. Noise levels at nearby receptors from HVAC equipment placed away from the edges of the roof of the Project Site would be nominal, as noise from HVAC equipment would have to match ambient noise levels to potentially increase 3 dBA or more, the threshold at which humans can notice changes.

Regulatory compliance with LAMC Section 112.02 would further ensure that noises from sources such as heating, air conditioning, and ventilation systems not increase ambient noise levels at neighboring occupied properties by more than 5 dBA. Given this regulation, the ambient noise levels along Pacific Avenue and 14th Street, the relatively quiet operation of modern rooftop-mounted HVAC systems, and distances to receptors, it is unlikely that noise from the Project's HVAC systems would be audible at off-site locations. Nearly all of the Project's surrounding commercial and residential land uses contain similar rooftop-mounted HVAC units. The Project's HVAC systems would be consistent with its surroundings and would not alter the environmental profile of the neighborhood or significantly impact any of the analyzed sensitive receptors.

¹⁴ LAMC Section 111.02(b) provides a 5 dBA allowance for noise sources lasting more than 5 but less than 15 minutes in any 1-hour period, and a 10 dBA allowance for noise sources causing noise lasting 5 minutes or less in any 1-hour period. In accordance with these regulations, a noise level increase from certain city-regulated noise sources of 5 dBA over the existing or presumed ambient noise level at an adjacent property is considered a violation.

¹⁵ As a 3 dBA increase represents a slightly noticeable change in noise level, this threshold considers any increase in ambient noise levels to or within a land use's "normally unacceptable" or "clearly unacceptable" noise/land use compatibility categories to be significant so long as the noise level increase can be considered barely perceptible. In instances where the noise level increase would not necessarily result in "normally unacceptable" or "clearly unacceptable" noise/land use compatibility, a readily noticeable 5 dBA increase is still considered to be significant. Increases less than 3 dBA are unlikely to result in noticeably louder ambient noise conditions and would therefore be considered less than significant.

¹⁶ City of Moreno Valley, Moreno Valley WalMart Noise Impact Analysis, Table 901; February 10, 2015 and City of Pomona, Pomona Ranch Plaza WalMart Expansion Project, Table 4.4-5; August 2014.

Parking and Auto-Related Activities. The Project would generate on-site noise from auto activities associated with the 65 parking spaces in two levels of subterranean parking. This noise would include driving to and from the entrances to underground garages, parking, door slamming, and occasional car alarms. Vehicles accessing the Project Site would enter off 14th Street. Residents would access and exit the parking garage from a mid-block entrance, the garage entrance for which faces south toward an apartment building across the street.

The Project is forecast to generate approximately 39 A.M. and 62 P.M. net peak hour residential vehicle trips that would enter and exit this garage. This level of traffic volume would average less than one vehicle per minute and would produce auto-related noise that would be far below ambient noise levels. This would add less than 1 dBA L_{eq} to existing noise levels and would be considered negligible. Any noise from within the garage (e.g., parking garage floor squeaks, car doors closing, alarms, incidental human conversation) would be de minimis, as the enclosed garage would attenuate virtually all sound beyond the Project site. As such, noise from the Project's parking garage would have no noticeable effect on the surrounding noise environment. On-site auto-related activity would have virtually no impact on nearby sensitive receptors. Receptors further away from these would have even lesser impacts from parking garage-related noise. As such, operational noise impacts that are considered less than significant.

Residential Operational Sources. Noise associated with residential uses would include a variety of operational sources, including human conversation and activities, use of recreation facilities, trash collection, and landscape maintenance. These are discussed below:

- Human conversation and activities. Noise associated with everyday human activities would largely be contained internally within the Project. Normal and reasonable use of the Project's open space areas would not be expected to generate a substantial amount of noise. Noise associated with outdoor residential activities could include passive activities such as human conversation and socializing on one of the four roof decks fronting on Pacific Avenue. These outdoor spaces represent gathering places for outdoor activities that are both private and group oriented. These would be intermittent activities that would produce negligible impacts from human speech, based in large part on the Lombard effect. This phenomenon recognizes that voice noise levels in face-to-face conversations generally increase proportionally to background ambient noise levels, but only up to approximately 67 dBA at a reference distance of one meter. Specifically, vocal intensity increases about 0.38 dB for every 1.0 dB increase in noise levels above 55 dB, meaning people talk slightly above ambient noise levels in order to communicate.¹⁷
- While the noise levels from rooftop activities would be marginal, the attenuation from the built environment would virtually eliminate any exposure to elevated noise levels at the nearest sensitive receptors. Noise from speech and conversation generally does not exceed

¹⁷ Acoustical Society of America, Volume 134; Evidence that the Lombard effect is frequency-specific in humans, Stowe and Golob, July 2013.

approximately 65 dBA at a reference distance of one meter. These noises attenuate rapidly and would not be capable of elevating surrounding ambient noise levels by more than a nominal degree. The combination of the roof edges and a safety barriers would block any light of-sight from residents and guests conversing on the rooftop. Moreover, any sound path would face toward Pacific Avenue, where auto traffic and the substantial distance to nearby receptors across the street would render this type of operational noise negligible. As a result, the increase in ambient noise levels at nearby receptors would be negligible for sensitive receptors that are no closer than 300 feet south of the property line of the Project site across Pacific Avenue.

- Recreation facilities. The Project would include an internal courtyard on the second floor that would house residential amenities that include, passive recreational and landscaping. However, these facilities would be fully enclosed within the closed design of the Project and would have no direct line-of-sight beyond the property lines. As such, virtually all noise from on-site recreation facilities would be attenuated and any impacts on off-site sensitive receptors beyond the Project Site would be negligible and inaudible. In addition, a proposed gym and recreation room are proposed for the first floor, but each would be completely enclosed within the building's structure.
- Landscape maintenance. Noise from gas-powered leaf blowers, lawnmowers, and other landscape equipment can generate substantial bursts of noise during regular maintenance. For example, gas powered leaf blowers and other equipment with two-stroke engines can generate 100 dBA L_{eq} and cause nuisance or potential noise impacts for nearby receptors.¹⁸ However, given the limited landscape plan for the Proposed Project, such equipment is not expected to be used substantially in exterior spaces. Any landscape equipment used within the proposed interior courtyard would be attenuated on all four sides by the Proposed Project. As such, any intermittent landscape equipment would operate during the day and represent a negligible impact and ultimately be subject to compliance with LAMC Section 112.05 and nuisance regulations.
- Trash collection. On-site trash and recyclable materials would be managed and picked-up on the first level of the parking garage, where trash and recycling trucks would access these facilities from 14th Street. Solid waste activities would include use of trash compactors and hydraulics associated with the refuse trucks themselves. While noise levels of approximately 71 dBA L_{eq} and 66 dBA L_{eq} could be generated by collection trucks and trash compactors, respectively, at 50 feet of distance, all noise would be buffered from off-site sensitive receptors.¹⁹

The impact of on-site operational noise sources would be considered **less than significant**.

¹⁸ Erica Walker et al, Harvard School of Public Health; Characteristics of Lawn and Garden Equipment Sound; 2017

¹⁹ RK Engineering Group, Inc. Wal-Mart/Sam's Club reference noise level, 2003

(7) Consistency with Municipal Code: Off-Site Operations

The majority of the Project's operational noise impacts would occur off-site from the estimated 205 vehicles that would travel to and from Project Site each day. During a peak hour, up to 39 and 62 net vehicle trips would be likely be distributed onto 14th Street and Pacific Avenue in the A.M. and P.M. peak hours, respectively. Because the Proposed Project would add up to 62 peak-hour vehicle trips across this local network of streets, this would average about one vehicle trip per minute. As such, the Project's incremental traffic on these local streets would not double existing traffic volumes. The Project's traffic impact on other streets would be less, as project-related traffic would dissipate onto the network of streets in the area.

Twenty-four-hour CNEL impacts would similarly be negligible, far below the minimum 3 dBA noise increase threshold. Therefore, the Project's operational impact on off-site ambient noise levels as a result of its net traffic generation would be considered **less than significant**.

Therefore, the Project's operational impact on off-site ambient noise levels as a result of its net traffic generation would be consistent with the Municipal Code.

Criterion 2: The project and successive projects of the same type in the same place will not result in cumulative impacts.

As discussed earlier, the Proposed Project would not produce temporary or long-term noise impacts that are considered significant.

Construction

During construction of the Proposed Project, if any other related projects were built simultaneously with the Proposed Project, they would have to meet the same municipal code requirements that minimize incremental impacts on ambient noise levels. This would each project's consistency with City restrictions on construction noise. Nevertheless, construction of any related project and other unforeseen projects would be subject to LAMC Section 41.40, which limits the hours of allowable construction activities. In addition, each of the related projects would be subject to Section 112.05 of the LAMC, which prohibits any powered equipment or powered hand tool from producing noise levels that exceed 75 dBA at a distance of 50 feet from the noise source within 500 feet of a residential zone. Noise levels are only allowed to exceed this noise limitation under conditions where compliance is technically infeasible.

As previously discussed, construction noise levels for the Project would not exceed 75 dBA L_{eq} at 50 feet of distance or the nearest sensitive receptors. While concurrent construction of other related projects in the vicinity would contribute to cumulative increases in ambient noise levels, the Project's contribution would not be considered significant based on the City's Municipal Code requirements restrict noise levels from equipment and incremental increases in ambient noise levels.

Operation

Cumulative mobile source noise impacts would be the result of increased traffic on local roadways due to the Project, ambient growth, and related projects. As described earlier, the Project's impact on future traffic conditions would be less than significant, as the Project's traffic volumes would not result in the doubling of volumes needed to increase ambient noise levels by 3 dBA or more on Pacific Avenue or any other local roadways. When factoring in the energy from a 24-hour cycle, the Project's contribution would be similarly negligible and would not result in a 5 dBA CNEL impact. As a result, the Project's cumulative operational noise impact would be negligible, ensuring consistency with the Municipal Code's threshold for project impacts. Because the increase in roadway noise would not exceed the 3.0 dBA CNEL or 5.0 dBA thresholds at any of the study roadway segments, the cumulative operational noise impact would be less than significant.

In addition to cumulative mobile source noise levels, operation of the Project in combination with any related projects could result in an increase in operational noise and vibration in this urbanized area of the City. Long-term noise impacts from Project operations would be negligible, as building operations and human activities inside and outside the Proposed Project would generate minimal noise impacts. Other long-term operations of residences and institutional issues like the nearby schools would similarly generate minimal operational noise to cumulative impact scenarios. As previously discussed, operational noise and vibration impacts would be less than significant for the Project, and on-site cumulative noise levels associated with the related projects would be regulated by the LAMC. As such, cumulative on-site operational noise impacts would be less than significant.

Criterion 3: There are no unusual circumstances creating the reasonable possibility of significant effects.

As discussed in this analysis, the Proposed Project is an infill residential project in the San Pedro neighborhood that would be environmentally benign, with noise impacts during construction and long-term operations. These noise impacts would neither be significant based on guidance from the State and the City of Los Angeles, nor inconsistent with the City's land use policies in the General Plan and zoning code. Further, neither the Project Site nor the local environmental creates unusual circumstances that could produce significant noise impacts despite the projected impacts from on- and off-site noise sources.

4. Mitigation Measures

The Project would not result in any significant noise impacts during the construction and operations phases. No mitigation measures are required.

1331 SOUTH PACIFIC AVENUE PROJECT

Air Quality Technical Report

Prepared by DKA Planning
20445 Prospect Road, Suite C
San Jose, CA 95129
November 2019

Air Quality Analysis

1. Introduction

This report analyzes the air emissions generated by construction and operation of the Proposed Project at 1331 South Pacific Avenue. The analysis also evaluates the consistency of the Project with the air quality policies set forth within the South Coast Air Quality Management District's (SCAQMD) Air Quality Management Plan (AQMP) and the City of Los Angeles (City) General Plan. The analysis of Project-generated air emissions focuses on whether the Project would cause an exceedance of an ambient air quality standard or SCAQMD significance threshold. Calculation worksheets, assumptions, and model outputs used in the analysis are included in the attached Appendix.

2. Environmental Setting

a) Regulatory Framework

(1) Federal

(a) Clean Air Act

The Federal Clean Air Act (CAA) was first enacted in 1955 and has been amended numerous times in subsequent years, with the most recent amendments in 1990. At the federal level, the United States Environmental Protection Agency (USEPA) is responsible for implementation of some portions of the CAA (e.g., certain mobile source and other requirements). Other portions of the CAA (e.g., stationary source requirements) are implemented by state and local agencies. In California, the CCAA is administered by the California Air Resources Board (CARB) at the state level and by the air quality management districts and air pollution control districts at the regional and local levels.

The 1990 amendments to the CAA identify specific emission reduction goals for areas not meeting the National Ambient Air Quality Standards (NAAQS). These amendments require both a demonstration of reasonable further progress toward attainment and incorporation of additional sanctions for failure to attain or to meet interim milestones. The sections of the CAA which are most applicable to the Project include Title I (Nonattainment Provisions) and Title II (Mobile Source Provisions).

NAAQS have been established for seven major air pollutants: CO (carbon monoxide), NO₂ (nitrogen dioxide), O₃ (ozone), PM_{2.5} (particulate matter, 2.5 microns), PM₁₀ (particulate matter, 10 microns), SO₂ (sulfur dioxide), and Pb (lead).

The CAA requires USEPA to designate areas as attainment, nonattainment, or maintenance (previously nonattainment and currently attainment) for each criteria pollutant based on whether the NAAQS have been achieved. Title I provisions are implemented for the purpose of attaining NAAQS. The federal standards are summarized in **Table 1**. USEPA has classified the Los Angeles County portion of the South Coast Air Basin (Basin) as a nonattainment area for O₃, PM_{2.5}, and Pb.

Table 1
State and National Ambient Air Quality Standards and Attainment Status for LA County

Pollutant	Averaging Period	California		Federal	
		Standards	Attainment Status	Standards	Attainment Status
Ozone (O ₃)	1-hour	0.09 ppm (180 µg/m ³)	Non-attainment	--	--
	8-hour	0.070 ppm (137 µg/m ³)	N/A ¹	0.070 ppm (137 µg/m ³)	Non-attainment
Respirable Particulate Matter (PM ₁₀)	24-hour	50 µg/m ³	Non-attainment	150 µg/m ³	Maintenance
	Annual Arithmetic Mean	20 µg/m ³	Non-attainment	--	--
Fine Particulate Matter (PM _{2.5})	24-hour	--	--	35 µg/m ³	Non-attainment
	Annual Arithmetic Mean	12 µg/m ³	Non-attainment	12 µg/m ³	Non-attainment
Carbon Monoxide (CO)	1-hour	20 ppm (23 mg/m ³)	Attainment	35 ppm (40 mg/m ³)	Maintenance
	8-hour	9.0 ppm (10 mg/m ³)	Attainment	9 ppm (10 mg/m ³)	Maintenance
Nitrogen Dioxide (NO ₂)	1-hour	0.18 ppm (338 µg/m ³)	Attainment	100 ppb (188 µg/m ³)	Maintenance
	Annual Arithmetic Mean	0.030 ppm (57 µg/m ³)	Attainment	53 ppb (100 µg/m ³)	Maintenance
Sulfur Dioxide (SO ₂)	1-hour	0.25 ppm (655 µg/m ³)	Attainment	75 ppb (196 µg/m ³)	Attainment
	24-hour	0.04 ppm (105 µg/m ³)	Attainment	--	--
Lead (Pb)	30-day average	1.5 µg/m ³	Attainment	--	--
	Calendar Quarter	--	--	0.15 µg/m ³	Non-attainment
Visibility Reducing Particles	8-hour	Extinction of 0.07 per kilometer	N/A	No Federal Standards	
Sulfates (SO ₄)	24-hour	25 µg/m ³	Attainment	No Federal Standards	
Hydrogen Sulfide (H ₂ S)	1-hour	0.03 ppm (42 µg/m ³)	Unclassified	No Federal Standards	
Vinyl Chloride	24-hour	0.01 ppm (26 µg/m ³)	N/A	No Federal Standards	

¹N/A = not available

CAA Title II pertains to mobile sources, such as cars, trucks, buses, and planes. Reformulated gasoline and automobile pollution control devices are examples of the mechanisms the USEPA uses to regulate mobile air emission sources. The provisions of Title II have resulted in tailpipe emission standards for vehicles, which have been strengthened in recent years to improve air quality. For example, the standards for NO_x emissions have been lowered substantially and the specification requirements for cleaner burning gasoline are more stringent.

The USEPA regulates emission sources that are under the exclusive authority of the federal government, such as aircraft, ships, and certain types of locomotives. USEPA has jurisdiction over emission sources outside state waters (e.g., beyond the outer continental shelf) and establishes various emission standards, including those for vehicles sold in states other than California. Automobiles sold in California must meet stricter emission standards established by CARB. USEPA adopted multiple tiers of emission standards to reduce emissions from non-road diesel engines (e.g., diesel-powered construction equipment) by integrating engine and fuel controls as a system to gain the greatest emission reductions.

The first federal standards (Tier 1) for new non-road (or off-road) diesel engines were adopted in 1994 for engines over 50 horsepower, to be phased-in from 1996 to 2000. On August 27, 1998, USEPA introduced Tier 1 standards for equipment under 37 kW (50 horsepower) and increasingly more stringent Tier 2 and Tier 3 standards for all equipment with phase-in schedules from 2000 to 2008. The Tier 1 through 3 standards were met through advanced engine design, with no or only limited use of exhaust gas after-treatment (oxidation catalysts). Tier 3 standards for NO_x and hydrocarbon are similar in stringency to the 2004 standards for highway engines. However, Tier 3 standards for particulate matter were never adopted. On May 11, 2004, USEPA signed the final rule introducing Tier 4 emission standards, which were phased-in between 2008 and 2015. The Tier 4 standards require that emissions of particulate matter and NO_x be further reduced by about 90 percent. Such emission reductions are achieved through the use of control technologies, including advanced exhaust gas after-treatment.

(2) State

(a) *California Clean Air Act*

In addition to being subject to the requirements of CAA, air quality in California is also governed by more stringent regulations under the California Clean Air Act (CCAA). In California, CCAA is administered by CARB at the state level and by the air quality management districts and air pollution control districts at the regional and local levels. CARB, which became part of the California Environmental Protection Agency in 1991, is responsible for meeting the state requirements of the CAA, administering the CCAA, and establishing the California Ambient Air Quality Standards (CAAQS). The CCAA, as amended in 1992, requires all air districts in the State to endeavor to achieve and maintain the CAAQS. CAAQS are generally more stringent than the corresponding federal standards and incorporate additional standards for sulfates, hydrogen sulfide, vinyl chloride, and visibility-reducing particles.

CARB regulates mobile air pollution sources, such as motor vehicles. CARB is responsible for setting emission standards for vehicles sold in California and for other emission sources, such as

consumer products and certain off-road equipment. CARB established passenger vehicle fuel specifications in March 1996. CARB oversees the functions of local air pollution control districts and air quality management districts, which, in turn, administer air quality activities at the regional and county levels. The State standards are summarized in **Table 1**.

The CCAA requires CARB to designate areas within California as either attainment or nonattainment for each criteria pollutant based on whether the CAAQS thresholds have been achieved. Under the CCAA, areas are designated as nonattainment for a pollutant if air quality data shows that a state standard for the pollutant was violated at least once during the previous three calendar years. Exceedances that are affected by highly irregular or infrequent events are not considered violations of a state standard and are not used as a basis for designating areas as nonattainment. Under the CCAA, the non-desert Los Angeles County portion of the Basin is designated as a nonattainment area for O₃, PM₁₀, and PM_{2.5}.

(b) Toxic Air Contaminant Identification and Control Act

The public's exposure to toxic air contaminants (TACs) is a significant public health issue in California. CARB's statewide comprehensive air toxics program was established in the early 1980s. The Toxic Air Contaminant Identification and Control Act created California's program to reduce exposure to air toxics. Under the Toxic Air Contaminant Identification and Control Act, CARB is required to use certain criteria in the prioritization for the identification and control of air toxics. In selecting substances for review, CARB must consider criteria relating to "the risk of harm to public health, amount or potential amount of emissions, manner of, and exposure to, usage of the substance in California, persistence in the atmosphere, and ambient concentrations in the community" [Health and Safety Code Section 39666(f)].

The Toxic Air Contaminant Identification and Control Act also requires CARB to use available information gathered from the Air Toxics "Hot Spots" Information and Assessment Act program to include in the prioritization of compounds. CARB identified particulate emissions from diesel-fueled engines (diesel PM) TACs in August 1998. Following the identification process, CARB was required by law to determine if there is a need for further control, which led to the risk management phase of the program.

For the risk management phase, CARB formed the Diesel Advisory Committee to assist in the development of a risk management guidance document and a risk reduction plan. With the assistance of the Diesel Advisory Committee and its subcommittees, CARB developed the Risk Reduction Plan to Reduce Particulate Matter Emissions from Diesel-Fueled Engines and Vehicles and the Risk Management Guidance for the Permitting of New Stationary Diesel-Fueled Engines. The Board approved these documents on September 28, 2000, paving the way for the next step in the regulatory process: the control measure phase. During the control measure phase, specific Statewide regulations designed to further reduce diesel particulate matter (PM) emissions from diesel-fueled engines and vehicles have and continue to be evaluated and developed. The goal of each regulation is to make diesel engines as clean as possible by establishing state-of-the-art technology requirements or emission standards to reduce diesel PM emissions. Breathing Hydrogen Sulfide (H₂S) at levels above the state standard could result in exposure to a disagreeable rotten eggs odor. The State does not regulate other odors.

(c) California Air Toxics Program

The California Air Toxics Program was established in 1983, when the California Legislature adopted Assembly Bill (AB) 1807 to establish a two-step process of risk identification and risk management to address potential health effects from exposure to toxic substances in the air.¹ In the risk identification step, CARB and the Office of Environmental Health Hazard Assessment (OEHHA) determine if a substance should be formally identified, or “listed,” as a TAC in California. Since inception of the program, a number of such substances have been listed, including benzene, chloroform, formaldehyde, and particulate emissions from diesel-fueled engines, among others.² In 1993, the California Legislature amended the program to identify the 189 federal hazardous air pollutants as TACs.

In the risk management step, CARB reviews emission sources of an identified TAC to determine whether regulatory action is needed to reduce risk. Based on results of that review, CARB has promulgated a number of airborne toxic control measures (ATCMs), both for mobile and stationary sources. In 2004, CARB adopted an ATCM to limit heavy-duty diesel motor vehicle idling in order to reduce public exposure to diesel PM and other TACs. The measure applies to diesel-fueled commercial vehicles with gross vehicle weight ratings greater than 10,000 pounds that are licensed to operate on highways, regardless of where they are registered. This measure does not allow diesel-fueled commercial vehicles to idle for more than five minutes at any given time.

In addition to limiting exhaust from idling trucks, CARB adopted regulations on July 26, 2007 for off-road diesel construction equipment such as bulldozers, loaders, backhoes, and forklifts, as well as many other self-propelled off-road diesel vehicles to reduce emissions by installation of diesel particulate filters and encouraging the replacement of older, dirtier engines with newer emission-controlled models. Implementation is staggered based on fleet size, with the largest operators having begun compliance in 2014.³

(d) Assembly Bill 2588 Air Toxics “Hot Spots” Program

The AB 1807 program is supplemented by the AB 2588 Air Toxics “Hot Spots” program, which was established by the California Legislature in 1987. Under this program, facilities are required to report their air toxics emissions, assess health risks, and notify nearby residents and workers of significant risks if present. In 1992, the AB 2588 program was amended by Senate Bill (SB) 1731 to require facilities that pose a significant health risk to the community to reduce their risk through implementation of a risk management plan.

(e) *Air Quality and Land Use Handbook: A Community Health Perspective*

CARB published the *Air Quality and Land Use Handbook* (CARB Handbook) on April 28, 2005 to serve as a general guide for considering health effects associated with siting sensitive receptors proximate to sources of TAC emissions. The recommendations provided therein are voluntary and do not constitute a requirement or mandate for either land use agencies or local air districts. The goal of the guidance document is to protect sensitive receptors, such as children, the elderly, acutely ill, and chronically ill persons, from exposure to TAC emissions. Some examples of CARB's siting recommendations include the following: (1) avoid siting sensitive receptors within 500 feet of a freeway, urban road with 100,000 vehicles per day, or rural roads with 50,000 vehicles per day; (2) avoid siting sensitive receptors within 1,000 feet of a distribution center (that accommodates more than 100 trucks per day, more than 40 trucks with operating transport refrigeration units per day, or where transport refrigeration unit operations exceed 300 hours per week); and (3) avoid siting sensitive receptors within 300 feet of any dry cleaning operation using perchloroethylene and within 500 feet of operations with two or more machines.

(f) *California Code of Regulations*

The California Code of Regulations (CCR) is the official compilation and publication of regulations adopted, amended or repealed by the state agencies pursuant to the Administrative Procedure Act. The CCR includes regulations that pertain to air quality emissions. Specifically, Section 2485 in CCR Title 13 states that the idling of all diesel-fueled commercial vehicles (weighing over 10,000 pounds) used during construction shall be limited to five minutes at any location. In addition, Section 93115 in CCR Title 17 states that operation of any stationary, diesel-fueled, compression-ignition engines shall meet specified fuel and fuel additive requirements and emission standards.

(3) Regional

(a) *South Coast Air Quality Management District*

The SCAQMD was created in 1977 to coordinate air quality planning efforts throughout Southern California. SCAQMD is the agency principally responsible for comprehensive air pollution control in the region. Specifically, SCAQMD is responsible for monitoring air quality, as well as planning, implementing, and enforcing programs designed to attain and maintain the CAAQS and NAAQS in the district. SCAQMD has jurisdiction over an area of 10,743 square miles consisting of Orange County; the non-desert portions of Los Angeles, Riverside, and San Bernardino counties; and the Riverside County portion of the Salton Sea Air Basin and Mojave Desert Air Basin. The Basin portion of SCAQMD's jurisdiction covers an area of 6,745 square miles. The Basin includes all of Orange County and the non-desert portions of Los Angeles (including the Project Area), Riverside, and San Bernardino counties. The Basin is bounded by the Pacific Ocean to the west; the San Gabriel, San Bernardino and San Jacinto Mountains to the north and east; and the San Diego County line to the south.

Programs that were developed by SCAQMD to attain and maintain the CAAQS and NAAQS include air quality rules and regulations that regulate stationary sources, area sources, point sources, and certain mobile source emissions. SCAQMD is also responsible for establishing stationary source permitting requirements and for ensuring that new, modified, or relocated stationary sources do not create net emission increases. All projects in the SCAQMD jurisdiction are subject to SCAQMD rules and regulations, including, but not limited to the following:

- Rule 401 Visible Emissions – This rule prohibits an air discharge that results in a plume that is as dark or darker than what is designated as No. 1 Ringelmann Chart by the United States Bureau of Mines for an aggregate of three minutes in any one hour.
- Rule 402 Nuisance – This rule prohibits the discharge of “such quantities of air contaminants or other material which cause injury, detriment, nuisance, or annoyance to any considerable number of people or the public, or which endanger the comfort, repose, health or safety of any such persons or the public, or which cause, or have a natural tendency to cause, injury or damage to business or property.”
- Rule 403 Fugitive Dust – This rule requires that future projects reduce the amount of particulate matter entrained in the ambient air as a result of fugitive dust sources by requiring actions to prevent, reduce, or mitigate fugitive dust emissions from any active operation, open storage pile, or disturbed surface area.

(b) Air Quality Management Plan

The 2016 Air Quality Management Plan (AQMP) was adopted in April 2017 and represents the most updated regional blueprint for achieving federal air quality standards. The 2016 AQMP adapts previously conducted regional air quality analyses to account for the recent unexpected drought conditions and presents a revised approach to demonstrated attainment of the 2006 24-hour PM_{2.5} NAAQS for the Basin. Additionally, the 2016 AQMP relied upon a comprehensive analysis of emissions, meteorology, atmospheric chemistry, regional growth projections, and the impact of existing control measures to evaluate strategies for reducing NO_x emissions sufficiently to meet the upcoming ozone deadline standards.

(c) Multiple Air Toxics Exposure Study IV

To date, the most comprehensive study on air toxics in the Basin is the Multiple Air Toxics Exposure Study IV (MATES-IV).⁴ The monitoring program measured more than 30 air pollutants, including both gases and particulates. The monitoring study was accompanied by a computer modeling study in which the SCAQMD estimated the risk of cancer from breathing toxic air pollution throughout the region based on emissions and weather data. MATES-IV found that the cancer risk in the region from carcinogenic air pollutants ranges from about 320 to 480 in a million, though OEHHA methodologies place average basinwide risk at approximately 897 in a million. About 90 percent of the risk is attributed to emissions associated with mobile sources, with the remainder attributed to toxics emitted from stationary sources, which include large industrial

⁴ The SCAQMD is updating the monitoring, modeling, and analysis. The final MATES-V study is due in Fall 2019.

operations, such as refineries and metal processing facilities, as well as smaller businesses such as gas stations and chrome plating. The results indicate that diesel PM is the major contributor to air toxics risk, accounting on average for about 68 percent of the total risk.

(d) *Southern California Association of Governments (SCAG)*

SCAG is the regional planning agency for Los Angeles, Orange, Ventura, Riverside, San Bernardino, and Imperial Counties, and addresses regional issues relating to transportation, the economy, community development and the environment. SCAG coordinates with various air quality and transportation stakeholders in Southern California to ensure compliance with the federal and state air quality requirements, including the Transportation Conformity Rule and other applicable federal, state, and air district laws and regulations. As the federally designated Metropolitan Planning Organization (MPO) for the six-county Southern California region, SCAG is required by law to ensure that transportation activities “conform” to, and are supportive of, the goals of regional and state air quality plans to attain the NAAQS. In addition, SCAG is a co-producer, with the SCAQMD, of the transportation strategy and transportation control measure sections of the AQMP for the Air Basin.

SCAG adopted the 2016–2040 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) on April 7, 2016.^{5,6} The 2016–2040 RTP/SCS reaffirms the land use policies that were incorporated into SCAG’s prior 2012–2035 RTP/SCS. These foundational policies, which guided the development of the plan’s land use strategies, include the following:

- Identify regional strategic areas for infill and investment;
- Structure the plan on a three-tiered system of centers development;
- Develop “Complete Communities”;
- Develop nodes on a corridor;
- Plan for additional housing and jobs near transit;
- Plan for changing demand in types of housing;
- Continue to protect stable, existing single-family areas;
- Ensure adequate access to open space and preservation of habitat; and
- Incorporate local input and feedback on future growth.

The 2016–2040 RTP/SCS recognizes that transportation investments and future land use patterns are inextricably linked, and continued recognition of this close relationship will help the region make choices that sustain existing resources and expand efficiency, mobility, and accessibility for people across the region. In particular, the 2016–2040 RTP/SCS draws a closer connection between where people live and work, and it offers a blueprint for how Southern California can grow more sustainably. The 2016–2040 RTP/SCS also includes strategies focused on compact infill development and economic growth by building the infrastructure the region

⁵ SCAG, Final 2016–2040 RTP/SCS.

⁶ CARB, Executive Order G-16-066, SCAG 2016 SCS ARB Acceptance of GHG Quantification Determination, June 2016.

needs to promote the smooth flow of goods and easier access to jobs, services, educational facilities, healthcare and more.

The 2016–2040 RTP/SCS states that the SCAG region was home to about 18.3 million people in 2012 and included approximately 5.9 million homes and 7.4 million jobs.⁷ By 2040, the integrated growth forecast projects these figures will increase by 3.8 million people, with nearly 1.5 million more homes and 2.4 million more jobs.

(4) Local

(a) *City of Los Angeles General Plan Air Quality Element*

The Air Quality Element of the City's General Plan was adopted on November 24, 1992, and sets forth the goals, objectives, and policies, which guide the City in the implementation of its air quality improvement programs and strategies. The Air Quality Element acknowledges the interrelationships among transportation and land use planning in meeting the City's mobility and air quality goals.

The Air Quality Element includes six key goals:

- Goal 1:** Good air quality in an environment of continued population growth and healthy economic structure.
- Goal 2:** Less reliance on single-occupant vehicles with fewer commute and non-work trips.
- Goal 3:** Efficient management of transportation facilities and system infrastructure using cost-effective system management and innovative demand management techniques.
- Goal 4:** Minimize impacts of existing land use patterns and future land use development on air quality by addressing the relationship between land use, transportation, and air quality.
- Goal 5:** Energy efficiency through land use and transportation planning, the use of renewable resources and less-polluting fuels and the implementation of conservation measures including passive measures such as site orientation and tree planting.
- Goal 6:** Citizen awareness of the linkages between personal behavior and air pollution and participation in efforts to reduce air pollution.

(b) *Clean Up Green Up Ordinance*

⁷ The SCAG 2016–2040 RTP/SCS is based on year 2012 demographic data with growth forecasts developed for 2020, 2035, and 2040.

The City of Los Angeles adopted a Clean Up Green Up Ordinance (Ordinance Number 184,245) on April 13, 2016, which among other provisions, includes provisions related to ventilation system filter efficiency in mechanically ventilated buildings. This ordinance added Sections 95.314.3 and 99.04.504.6 to the Los Angeles Municipal Code (LAMC) and amended Section 99.05.504.5.3 to implement building standards and requirements to address cumulative health impacts resulting from incompatible land use patterns.

(c) California Environmental Quality Act

In accordance with CEQA requirements, the City assesses the air quality impacts of new development projects, requires mitigation of potentially significant air quality impacts by conditioning discretionary permits, and monitors and enforces implementation of such mitigation. The City uses the SCAQMD's *CEQA Air Quality Handbook* and SCAQMD's supplemental online guidance/information for the environmental review of plans and development proposals within its jurisdiction.

(d) Land Use Compatibility

In November 2012, the Los Angeles City Planning Commission (CPC) issued an advisory notice (Zoning Information 2427) regarding the siting of sensitive land uses within 1,000 feet of freeways. The CPC deemed 1,000 feet to be a conservative distance to evaluate projects that house populations considered to be more at-risk from the negative effects of air pollution caused by freeway proximity. The CPC advised that applicants of projects requiring discretionary approval, located within 1,000 feet of a freeway and contemplating residential units and other sensitive uses (e.g., hospitals, schools, retirement homes) perform a Health Risk Assessment (HRA). The Project Site is more than 1,000 feet of any freeway, as it is 1.09 miles south of the terminus of the SR-110 freeway.

The City of Los Angeles adopted a Clean Up Green Up Ordinance (Ordinance Number 184,245) on April 13, 2016, which among other provisions, includes provisions related to ventilation system filter efficiency in mechanically ventilated buildings located within specified distances from a freeway. This ordinance added Sections 95.314.3 and 99.04.504.6 to the Los Angeles Municipal Code (LAMC) and amended Section 99.05.504.5.3 to implement building standards and requirements to address cumulative health impacts resulting from incompatible land use patterns.

On April 12, 2018, the City updated its guidance on siting land uses near freeways, resulting in an updated Advisory Notice effective September 17, 2018 requiring all proposed projects within 1,000 feet of a freeway adhere to the Citywide Design Guidelines, including those that address freeway proximity. It also recommended that projects consider avoiding location of sensitive uses like schools, day care facilities, and senior care centers in such projects, locate open space areas as far from the freeway as possible when the size of the site permits, locate non-habitable uses (e.g., parking structures) nearest the freeway, and screen project sites with substantial vegetation and/or a wall barrier. The Advisory Notice also informs project applicants of the regulatory

requirements of the Clean Up Green Up Ordinance. Requirements for preparing HRAs were removed.

b) Existing Conditions

(1) Pollutants and Effects

(a) State and Federal Criteria Pollutants

Air quality is defined by ambient air concentrations of seven specific pollutants identified by the USEPA to be of concern with respect to health and welfare of the general public. These specific pollutants, known as “criteria air pollutants,” are defined as pollutants for which the federal and State governments have established ambient air quality standards, or criteria, for outdoor concentrations to protect public health. Criteria air pollutants include carbon monoxide (CO), ground-level ozone (O₃), nitrogen oxides (NO_x), sulfur oxides (SO_x), particulate matter ten microns or less in diameter (PM₁₀), particulate matter 2.5 microns or less in diameter (PM_{2.5}), and lead (Pb). The following descriptions of each criteria air pollutant and their health effects are based on information provided by the SCAQMD.⁸

Carbon Monoxide (CO). CO is primarily emitted from combustion processes and motor vehicles due to incomplete combustion of fuel. Elevated concentrations of CO weaken the heart’s contractions and lower the amount of oxygen carried by the blood. It is especially dangerous for people with chronic heart disease. Inhalation of CO can cause nausea, dizziness, and headaches at moderate concentrations and can be fatal at high concentrations.

Ozone (O₃). O₃ is a gas that is formed when volatile organic compounds (VOCs) and nitrogen oxides (NO_x)—both byproducts of internal combustion engine exhaust—undergo slow photochemical reactions in the presence of sunlight. O₃ concentrations are generally highest during the summer months when direct sunlight, light wind, and warm temperature conditions are favorable. An elevated level of O₃ irritates the lungs and breathing passages, causing coughing and pain in the chest and throat, thereby increasing susceptibility to respiratory infections and reducing the ability to exercise. Effects are more severe in people with asthma and other respiratory ailments. Long-term exposure may lead to scarring of lung tissue and may lower lung efficiency.

Nitrogen Dioxide (NO₂). NO₂ is a byproduct of fuel combustion and major sources include power plants, large industrial facilities, and motor vehicles. The principal form of nitrogen oxide produced by combustion is nitric oxide (NO), which reacts quickly to form NO₂, creating the mixture of NO and NO₂ commonly called NO_x. NO₂ absorbs blue light and results in a brownish-red cast to the atmosphere and reduced visibility. NO₂ also contributes to the formation of PM₁₀. Nitrogen oxides irritate the nose and throat, and increase one’s susceptibility to respiratory infections, especially in people with asthma. The principal concern of NO_x is as a precursor to the formation of ozone.

⁸ SCAQMD, Final Program Environmental Impact Report for the 2012 AQMP, December 7, 2012.

Sulfur Dioxide (SO₂). Sulfur oxides (SO_x) are compounds of sulfur and oxygen molecules. SO₂ is the pre- dominant form found in the lower atmosphere and is a product of burning sulfur or burning materials that contain sulfur. Major sources of SO₂ include power plants, large industrial facilities, diesel vehicles, and oil-burning residential heaters. Emissions of sulfur dioxide aggravate lung diseases, especially bronchitis. It also constricts the breathing passages, especially in asthmatics and people involved in moderate to heavy exercise. SO₂ potentially causes wheezing, shortness of breath, and coughing. High levels of particulates appear to worsen the effect of sulfur dioxide, and long-term exposures to both pollutants leads to higher rates of respiratory illness.

Particulate Matter (PM₁₀ and PM_{2.5}). The human body naturally prevents the entry of larger particles into the body. However, small particles, with an aerodynamic diameter equal to or less than 10 microns (PM₁₀), and even smaller particles with an aerodynamic diameter equal to or less than 2.5 microns (PM_{2.5}), can enter the body and become trapped in the nose, throat, and upper respiratory tract. These small particulates can potentially aggravate existing heart and lung diseases, change the body's defenses against inhaled materials, and damage lung tissue. The elderly, children, and those with chronic lung or heart disease are most sensitive to PM₁₀ and PM_{2.5}. Lung impairment can persist for two to three weeks after exposure to high levels of particulate matter. Some types of particulates can become toxic after inhalation due to the presence of certain chemicals and their reaction with internal body fluids.

Lead (Pb). Lead is emitted from industrial facilities and from the sanding or removal of old lead-based paint. Smelting or processing the metal is the primary source of lead emissions, which is primarily a regional pollutant. Lead affects the brain and other parts of the body's nervous system. Exposure to lead in very young children impairs the development of the nervous system, kidneys, and blood forming processes in the body.

(b) State-only Criteria Pollutants

Visibility-Reducing Particles. Deterioration of visibility is one of the most obvious manifestations of air pollution and plays a major role in the public's perception of air quality. Visibility reduction from air pollution is often due to the presence of sulfur and NO_x, as well as PM.

Sulfates (SO₄²⁻). Sulfates are the fully oxidized ionic form of sulfur. Sulfates occur in combination with metal and/or hydrogen ions. In California, emissions of sulfur compounds occur primarily from the combustion of petroleum-derived fuels (e.g., gasoline and diesel fuel) that contain sulfur. This sulfur is oxidized during the combustion process and subsequently converted to sulfate compounds in the atmosphere. Effects of sulfate exposure at levels above the standard include a decrease in ventilatory function, aggravation of asthmatic symptoms, and an increased risk of cardio-pulmonary disease. Sulfates are particularly effective in degrading visibility, and, due to fact that they are usually acidic, can harm ecosystems and damage materials and property.

Hydrogen Sulfide (H₂S). H₂S is a colorless gas with the odor of rotten eggs, formed during bacterial decomposition of sulfur-containing organic substances. Also, it can be present in sewer

gas and natural gas and can be emitted as the result of geothermal energy exploitation. Breathing H₂S at levels above the state standard could result in exposure to a very disagreeable odor.

Vinyl Chloride. Vinyl chloride is a colorless, flammable gas at ambient temperature and pressure. It is also highly toxic and is classified as a known carcinogen by the American Conference of Governmental Industrial Hygienists and the International Agency for Research on Cancer. At room temperature, vinyl chloride is a gas with a sickly-sweet odor that is easily condensed. However, it is stored at cooler temperatures as a liquid. Due to the hazardous nature of vinyl chloride to human health, there are no end products that use vinyl chloride in its monomer form. Vinyl chloride is a chemical intermediate, not a final product. It is an important industrial chemical chiefly used to produce polyvinyl chloride (PVC). The process involves vinyl chloride liquid fed to polymerization reactors where it is converted from a monomer to a polymer PVC. The final product of the polymerization process is PVC in either a flake or pellet form. Billions of pounds of PVC are sold on the global market each year. From its flake or pellet form, PVC is sold to companies that heat and mold the PVC into end products such as PVC pipe and bottles. Vinyl chloride emissions are historically associated primarily with landfills.

(2) Toxic Air Contaminants

TACs refer to a diverse group of “non-criteria” air pollutants that can affect human health but have not had ambient air quality standards established for them. This is not because they are fundamentally different from the pollutants discussed above but because their effects tend to be local rather than regional. TACs are classified as carcinogenic (i.e., can cause cancer) and noncarcinogenic (i.e., can cause acute and chronic impacts to different target organ systems, such as eyes, respiratory, reproductive, developmental, nervous, and cardiovascular).

CARB and OEHHA determine if a substance should be formally identified, or “listed,” as a TAC in California. A complete list of these substances is maintained on CARB’s website.⁹

Diesel particulate matter (DPM), which is emitted in the exhaust from diesel engines, was listed by the state as a TAC in 1998. DPM has historically been used as a surrogate measure of exposure for all diesel exhaust emissions. DPM consists of fine particles (fine particles have a diameter less than 2.5 micrometer (µm)), including a subgroup of ultrafine particles (ultrafine particles have a diameter less than 0.1 µm). Collectively, these particles have a large surface area which makes them an excellent medium for absorbing organics. The visible emissions in diesel exhaust include carbon particles or “soot.” Diesel exhaust also contains a variety of harmful gases and cancer-causing substances.

Exposure to DPM may be a health hazard, particularly to children whose lungs are still developing and the elderly who may have other serious health problems. DPM levels and resultant potential health effects may be higher in close proximity to heavily traveled roadways with substantial truck traffic or near industrial facilities. According to CARB, DPM exposure may lead to the following

⁹ CARB, Toxic Air Contaminant Identification List, www.arb.ca.gov/toxics/id/taclist.htm, last reviewed by CARB July 18, 2011.

adverse health effects: (1) aggravated asthma; (2) chronic bronchitis; (3) increased respiratory and cardiovascular hospitalizations; (4) decreased lung function in children; (5) lung cancer; and (6) premature deaths for people with heart or lung disease.^{10,11}

(3) Volatile Organic Compounds

VOCs are typically formed from combustion of fuels and/or released through evaporation of organic liquids. Some VOCs are also classified by the state as toxic air contaminants. While there are no specific VOC ambient air quality standards, VOC is a prime component (along with NO_x) of the photochemical processes by which such criteria pollutants as ozone, nitrogen dioxide, and certain fine particles are formed. They are, thus, regulated as “precursors” to the formation of those criteria pollutants.

(4) Project Site

The Project Site is located within the South Coast Air Basin (the Basin); named so because of its geographical formation is that of a basin, with the surrounding mountains trapping the air and its pollutants in the valleys or basins below. The 6,745-square-mile Basin includes all of Orange County and the non-desert portions of Los Angeles, Riverside, and San Bernardino Counties. It is bounded by the Pacific Ocean to the west; the San Gabriel, San Bernardino and San Jacinto Mountains to the north and east; and the San Diego County line to the south. Ambient pollution concentrations recorded in Los Angeles County portion of the Basin are among the highest in the four counties comprising the Basin. USEPA has classified Los Angeles County as nonattainment areas for O₃, PM_{2.5}, and lead. This classification denotes that the Basin does not meet the NAAQS for these pollutants. In addition, under the CCAA, the Los Angeles County portion of the Basin is designated as a nonattainment area for O₃, PM₁₀, and PM_{2.5}. The air quality within the Basin is primarily influenced by a wide range of emissions sources, such as dense population centers, heavy vehicular traffic, industry, and meteorology.

Air pollutant emissions are generated in the local vicinity by stationary and area-wide sources, such as commercial activity, space and water heating, landscaping maintenance, consumer products, and mobile sources primarily consisting of automobile traffic.

(a) *Air Pollution Climatology*¹²

The topography and climate of Southern California combine to make the Basin an area of high air pollution potential. During the summer months, a warm air mass frequently descends over the cool, moist marine layer produced by the interaction between the ocean’s surface and the lowest layer of the atmosphere. The warm upper layer forms a cap over the cooler surface layer which inhibits the pollutants from dispersing upward. Light winds during the summer further limit

ventilation. Additionally, abundant sunlight triggers photochemical reactions which produce O₃ and the majority of particulate matter.

(b) *Air Monitoring Data*

The SCAQMD monitors air quality conditions at 38 source receptor areas (SRA) throughout the Basin. The Project Site is located in SCAQMD's South Coastal LA County receptor area. Historical data from the area was used to characterize existing conditions in the vicinity of the Project area. **Table 2** shows pollutant levels, State and Federal standards, and the number of exceedances recorded in the area from 2016 through 2018. The one-hour State standard for O₃ was not exceeded during this three-year period, the daily State standard for PM₁₀ was exceeded 21 times while the daily federal standard for PM_{2.5} was exceeded seven times. CO and NO₂ levels did not exceed the CAAQS from 2016 through 2018 for 1-hour (and 8-hour for CO).

Table 2
Ambient Air Quality Data

Pollutants and State and Federal Standards	Maximum Concentrations and Frequencies of Exceedance Standards		
	2016	2017	2018
Ozone (O₃)			
Maximum 1-hour Concentration (ppm)	0.079	0.082	0.074
Days > 0.09 ppm (State 1-hour standard)	0	0	0
Days > 0.070 ppm (Federal 8-hour standard)	0	0	0
Carbon Dioxide (CO₂)			
Maximum 1-hour Concentration (ppm)	3.3	3.9	4.7
Days > 20 ppm (State 1-hour standard)	0	0	0
Maximum 8-hour Concentration (ppm)	2.2	2.6	2.1
Days > 9.0 ppm (State 8-hour standard)	0	0	0
Nitrogen Dioxide (NO₂)			
Maximum 1-hour Concentration (ppm)	0.0756	0.0895	0.0853
Days > 0.18 ppm (State 1-hour standard)	0	0	0
PM₁₀			
Maximum 24-hour Concentration (µg/m ³)	75	79	55
Days > 50 µg/m ³ (State 24-hour standard)	8	9	4
PM_{2.5}			
Maximum 24-hour Concentration (µg/m ³)	29.4	56.3	47.1
Days > 35 µg/m ³ (Federal 24-hour standard)	0	5	2
Sulfur Dioxide (SO₂)			
Maximum 24-hour Concentration (ppb)	17.8	19.7	10.5
Days > 0.04 ppm (State 24-hour standard)	0	0	0
ppm = parts by volume per million of air. µg/m ³ = micrograms per cubic meter. N/A = not available at this monitoring station. Source: SCAQMD annual monitoring data (http://www.aqmd.gov/home/air-quality/air-quality-data-studies/historical-data-by-year) accessed October 22, 2019. Data derived from the higher of the South Coastal LA County 2 and 3 receptors.			

(c) Existing Health Risk in the Surrounding Area

Based on the MATES-IV model, the calculated cancer risk in the Project area is approximately 1,471 in a million.¹³ The cancer risk in this area is predominately related to nearby sources of diesel particulate matter (e.g., SR-110 freeway to the north, Ports of Long Beach and Los Angeles to the east). In general, the risk at the Project Site is higher than the average across the South Coast Air Basin.

The Office of Environmental Health Hazard Assessment, on behalf of CalEPA, provides a screening tool called CalEnviroScreen that can be used to help identify California communities disproportionately burdened by multiple sources of pollution. According to CalEnviroScreen, the Project site is located in the 80-85th percentile, which means the Project site is higher than average in comparison to other communities within California.¹⁴

(d) Sensitive Receptors

Some land uses are considered more sensitive to changes in air quality than others, depending on the population groups and the activities involved. CARB has identified the following groups who are most likely to be affected by air pollution: children less than 14 years of age, the elderly over 65 years of age, athletes, and people with cardiovascular and chronic respiratory diseases. According to the SCAQMD, sensitive receptors include residences, schools, playgrounds, child care centers, athletic facilities, long-term health care facilities, rehabilitation centers, convalescent centers, and retirement homes.

The Project Site is located in the San Pedro neighborhood of Los Angeles, a mixed neighborhood with commercial and retail uses on Pacific Avenue. As a result, sensitive receptors within 1,000 feet of the Project Site include but are not limited to the following that are representative of receptors in the area:

- Multi-family residences, 523 West 14th Street; 10 feet west of the Project site.
- 15th Street Elementary School, 1527 South Mesa Street; 660 feet southeast of the Project site.
- Multi-family residences, 529 West 13th Street; as close as 90 feet north of the Project site to the main residence.
- Multi-family residences, 498 West 13th Street; as close as 250 feet north of the Project site.

(e) Existing Project Site Emissions

The Project Site is currently occupied by 2,400 square feet of warehouse; 4,000 square feet of light industrial; and 1,600 square feet of restaurant and bar uses. As shown in **Table 3**, the majority of emissions are from the 205 vehicles that travel to and from the Project Site each day.

Table 3
Current Daily Operations Emissions

Emissions Source	Daily Emissions (Pounds Per Day)					
	VOC	NO _x	CO	SO _x	PM ₁₀	PM _{2.5}
Area Sources	<1	<1	<1	<1	<1	<1
Energy Sources	<1	<1	<1	<1	<1	<1
Mobile Sources	<1	1	4	<1	<1	<1
Net Regional Total	1	2	4	<1	1	<1

3. Project Impacts

a) Methodology

The air quality analysis conducted for the Project is consistent with the methods described in the SCAQMD CEQA Air Quality Handbook (1993 edition), as well as the updates to the CEQA Air Quality Handbook, as provided on the SCAQMD website. The SCAQMD recommends the use of the California Emissions Estimator Model (CalEEMod, version 2016.3.2) as a tool for quantifying emissions of air pollutants that will be generated by constructing and operating development projects. The analyses focus on the potential change in air quality conditions due to Project implementation. Air pollutant emissions would result from both construction and operation of the Project. Specific methodologies used to evaluate these emissions are discussed below.

(1) Construction

Sources of air pollutant emissions associated with construction activities include heavy-duty off-road diesel equipment and vehicular traffic to and from the Project construction site. Project-specific information was provided describing the schedule of construction activities and the equipment inventory required from the Applicant. Details pertaining to the schedule and equipment can be found in the attached Appendix. The CalEEMod model provides default values for daily equipment usage rates and worker trip lengths, as well as emission factors for heavy-duty equipment, passenger vehicles, and haul trucks that have been derived by the CARB. Maximum daily emissions were quantified for each construction activity based on the number of equipment and daily hours of use, in addition to vehicle trips to and from the Project Site.

The SCAQMD recommends that air pollutant emissions be assessed for both regional scale and localized impacts. The regional emissions analysis includes both on-site and off-site sources of

emissions, while the localized emissions analysis focuses only on sources of emissions that would be located on the Project Site.

Localized impacts were analyzed in accordance with the SCAQMD Localized Significance Threshold (LST) methodology.¹⁵ The localized effects from on-site portion of daily emissions were evaluated at sensitive receptor locations potentially impacted by the Project according to the SCAQMD's localized significance thresholds (LST) methodology, which uses on-site mass emission look-up tables and Project-specific modeling, where appropriate.¹⁶ SCAQMD provides LSTs applicable to the following criteria pollutants: NO_x, CO, PM₁₀, and PM_{2.5}. SCAQMD does not provide an LST for SO₂ since land use development projects typically result in negligible construction and long-term operation emissions of this pollutant. Since VOCs are not a criteria pollutant, there is no ambient standard or SCAQMD LST for VOCs. Due to the role VOCs play in O₃ formation, it is classified as a precursor pollutant, and only a regional emissions threshold has been established.

LSTs represent the maximum emissions from a project that are not expected to cause or contribute to an exceedance of the most stringent applicable federal or state ambient air quality standard and are developed based on the ambient concentrations of that pollutant for each source receptor area and distance to the nearest sensitive receptor. The mass rate look-up tables were developed for each source receptor area and can be used to determine whether or not a project may generate significant adverse localized air quality impacts. SCAQMD provides LST mass rate look-up tables for projects with active construction areas that are less than or equal to five acres. If the project exceeds the LST look-up values, then the SCAQMD recommends that project-specific air quality modeling must be performed. Please refer to **Threshold b** below, for the analysis of localized impacts from on-site construction activities. In accordance with SCAQMD guidance, maximum daily emissions of NO_x, CO, PM₁₀, and PM_{2.5} from on-site sources during each construction activity were compared to LST values for a one-acre site having sensitive receptors within 25 meters (82 feet).¹⁷

The Basin is divided into 38 SRAs, each with its own set of maximum allowable LST values for on-site emissions sources during construction and operations based on locally monitored air quality. The Project Site is located in the South Coastal LA County SRA. Maximum on-site emissions resulting from construction activities were quantified and assessed against the applicable LST values for this SRA.

The significance criteria and analysis methodologies in the SCAQMD's CEQA Air Quality Handbook were used in evaluating impacts in the context of the CEQA significance criteria listed below. The SCAQMD LSTs for NO₂, CO, and PM₁₀ were initially published in June 2003 and

¹⁵ SCAQMD, Final Localized Significance Methodology, revised July 2008.

¹⁶ SCAQMD, LST Methodology Appendix C-Mass Rate LST Look-Up Table, October 2009.

¹⁷ SCAQMD, Fact Sheet for Applying CalEEMod to Localized Significance Thresholds, 2008.

revised in July 2008.¹⁸ The LSTs for PM_{2.5} were established in October 2006.¹⁹ Updated LSTs were published on the SCAQMD website on October 21, 2009.²⁰ **Table 3** presents the significance criteria for both construction and operational emissions.

Table 3
SCAQMD Construction Emissions Thresholds

Criteria Pollutant	Construction Emissions		Operation Emissions
	Regional	Localized /a/	
Volatile Organic Compounds (VOC)	75	--	55
Nitrogen Oxides (NO _x)	100	57	55
Carbon Monoxide (CO)	550	585	550
Sulfur Oxides (SO _x)	150	--	150
Respirable Particulates (PM ₁₀)	150	4	150
Fine Particulates (PM _{2.5})	55	3	55
In pounds per day for the Central LA SRA /a/ Localized significance thresholds assumed a 1-acre and 25-meter (82-foot) receptor distance, which are the smallest Project Site and shortest distance used for analysis in the LST guidance document. The SCAQMD has not developed LST values for VOC or SO _x . Source: SCAQMD			

(2) Operations

CalEEMod also generates estimates of daily and annual emissions of air pollutants resulting from future operation of a project. Operational emissions of air pollutants are produced by mobile sources (vehicular travel) and stationary sources (utilities demand). The Project Site is serviced by the Los Angeles Department of Water and Power (LADWP), for which CalEEMod has derived default emissions factors for electricity and natural gas usage that are applied to the size and land use type of the Project in question. CalEEMod also generates estimated operational emissions associated water use, wastewater generation, and solid waste disposal.

Similar to construction, SCAQMD's CalEEMod software was used for the evaluation of Project emissions during operation. CalEEMod was used to calculate on-road fugitive dust, architectural coatings, landscape equipment, energy use, mobile source, and stationary source emissions. To determine if a significant air quality impact would occur, the net increase in regional and local operational emissions generated by the Project was compared against the SCAQMD's significance thresholds.²¹

¹⁸ SCAQMD, Fact Sheet for Applying CalEEMod to Localized Significance Thresholds, 2008.

¹⁹ SCAQMD, Final – Methodology to Calculate Particulate Matter (PM) 2.5 and PM 2.5 Significance Thresholds, October 2006.

²⁰ SCAQMD, Final Localized Significance Threshold Methodology Appendix C – Mass Rate LST Look-Up Tables, October 21, 2009.

²¹ SCAQMD, SCAQMD Air Quality Significance Thresholds, revised March 2015. SCAQMD based these thresholds, in part on the federal Clean Air Act and, to enable defining “significant” for CEQA purposes, defined the setting as the South Coast Air Basin. (See SCAQMD, CEQA Air Quality Handbook, April 1993, pp. 6-1-6-2).

(3) Toxic Air Contaminants Impacts (Construction and Operations)

Potential TAC impacts are evaluated by conducting a qualitative analysis consistent with the CARB Handbook followed by a more detailed analysis (dispersion modeling) as necessary. The qualitative analysis consists of reviewing the Project to identify any new or modified TAC emissions sources. If the qualitative evaluation does not rule out significant impacts from a new source or modification of an existing TAC source, a more detailed analysis is conducted.

b) Thresholds of Significance

(1) State CEQA Guidelines Appendix G

Appendix G of the State CEQA Guidelines provides a set of screening questions that are intended to assist lead agencies when assessing a project's potential impacts with regards to air quality. The City has adopted these standards as the applicable thresholds of significance for the Project. These questions ask whether the Project would:

- a) Conflict with or obstruct implementation of the applicable air quality plan;*
- b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or State ambient air quality standard;*
- c) Expose sensitive receptors to substantial pollutant concentrations; or*
- d) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people).*

(2) 2006 L.A. CEQA Thresholds Guide and SCAQMD Thresholds

For this analysis the Appendix G Thresholds are relied upon. The analysis utilizes factors and considerations identified in the 2006 L.A. CEQA Thresholds Guide (Thresholds Guide) and SCAQMD Thresholds, as appropriate, to assist in answering the Appendix G Threshold questions.

(a) Construction

The Thresholds Guide states that the determination of significance shall be made on a case-by-case basis, considering the following criteria to evaluate construction-related air emissions:

(i) Combustion Emissions from Construction Equipment

- Type, number of pieces and usage for each type of construction equipment;

- Estimated fuel usage and type of fuel (diesel, natural gas) for each type of equipment; and
- Emission factors for each type of equipment.

(ii) *Fugitive Dust—Grading, Excavation and Hauling*

- Amount of soil to be disturbed on-site or moved off-site;
- Emission factors for disturbed soil;
- Duration of grading, excavation and hauling activities;
- Type and number of pieces of equipment to be used; and
- Projected haul route.

(iii) *Fugitive Dust—Heavy-Duty Equipment Travel on Unpaved Road*

- Length and type of road;
- Type, number of pieces, weight and usage of equipment; and
- Type of soil.

(iv) *Other Mobile Source Emissions*

- Number and average length of construction worker trips to Project Site, per day; and
- Duration of construction activities.

In addition, the following criteria set forth in the SCAQMD's *CEQA Air Quality Handbook* serve as quantitative air quality standards to be used to evaluate project impacts under the Appendix G Thresholds. Under these thresholds, a significant threshold would occur when:²²

- Regional emissions from both direct and indirect sources would exceed any of the following SCAQMD prescribed threshold levels: (1) 100 pounds per day for NO_x; (2) 75 pounds a day for VOC; (3) 150 pounds per day for PM₁₀ or SO_x; (4) 55 pounds per day for PM_{2.5}; and (5) 550 pounds per day for CO.
- Maximum on-site daily localized emissions exceed the LST, resulting in predicted ambient concentrations in the vicinity of the Project Site greater than the most stringent ambient air quality standards for CO (20 ppm [23,000 µg/m³] over a 1-hour period or 9.0 ppm [10,350 µg/m³] averaged over an 8-hour period) and NO₂ (0.18 ppm [339 µg/m³] over a 1-hour period, 0.1 ppm [188 µg/m³] over a three-year average of the 98th percentile of the daily maximum 1-hour average, or 0.03 ppm [57 µg/m³] averaged over an annual period).

²² SCAQMD, SCAQMD Air Quality Significance Thresholds, revised March 2015.

- Maximum on-site localized PM₁₀ or PM_{2.5} emissions during construction exceed the applicable LSTs, resulting in predicted ambient concentrations in the vicinity of the Project Site to exceed the incremental 24-hour threshold of 10.4 µg/m³ or 1.0 µg/m³ PM₁₀ averaged over an annual period.

(b) Operation

The Thresholds Guide bases the determination of significance of operational air quality impacts on criteria set forth in the SCAQMD's *CEQA Air Quality Handbook*.²³ However, as discussed above, the City has chosen to use Appendix G as the thresholds of significance for this analysis. Accordingly, the following serve as quantitative air quality standards to be used to evaluate project impacts under the Appendix G thresholds. Under these thresholds, a significant threshold would occur when:

- Operational emissions exceed 10 tons per year of volatile organic gases or any of the following SCAQMD prescribed threshold levels: (1) 55 pounds a day for VOC;²⁴ (2) 55 pounds per day for NO_x; (3) 550 pounds per day for CO; (4) 150 pounds per day for SO_x; (5) 150 pounds per day for PM₁₀; and (6) 55 pounds per day for PM_{2.5}.^{25,26}
- Maximum on-site daily localized emissions exceed the LST, resulting in predicted ambient concentrations in the vicinity of the Project Site greater than the most stringent ambient air quality standards for CO (20 parts per million (ppm) over a 1-hour period or 9.0 ppm averaged over an 8-hour period) and NO₂ (0.18 ppm over a 1-hour period, 0.1 ppm over a 3-year average of the 98th percentile of the daily maximum 1-hour average, or 0.03 ppm averaged over an annual period).²⁷
- Maximum on-site localized operational PM₁₀ and PM_{2.5} emissions exceed the incremental 24-hour threshold of 2.5 µg/m³ or 1.0 µg/m³ PM₁₀ averaged over an annual period.²⁸
- The Project causes or contributes to an exceedance of the California 1-hour or 8-hour CO standards of 20 or 9.0 ppm, respectively; or
- The Project creates an odor nuisance pursuant to SCAQMD Rule 402.

(c) Toxic Air Contaminants

²³ SCAQMD, SCAQMD Air Quality Significance Thresholds, revised March 2015.

²⁴ For purposes of this analysis, emissions of VOC and reactive organic compounds (ROG) are used interchangeably since ROG represents approximately 99.9 percent of VOC emissions.

²⁵ City of Los Angeles, *L.A. CEQA Thresholds Guide*, 2006, p. B.2-5.

²⁶ SCAQMD Air Quality Significance Thresholds, www.aqmd.gov/docs/default-source/ceqa/handbook/scaqmd-air-quality-significance-thresholds.pdf, last updated March 2015.

²⁷ SCAQMD, Final Localized Significance Threshold Methodology, revised July 2008.

²⁸ SCAQMD, Final—Methodology to Calculate Particulate Matter (PM) 2.5 and PM_{2.5} Significance Thresholds, October 2006.

The Thresholds Guide states that the determination of significance shall be made on a case-by-case basis, considering the following criteria to evaluate TACs:

- Would the project use, store, or process carcinogenic or non-carcinogenic toxic air contaminants which could result in airborne emissions?

In assessing impacts related to TACs in this section, the City will use Appendix G as the thresholds of significance. The criteria identified above from the Thresholds Guide will be used where applicable and relevant to assist in analyzing the Appendix G thresholds. In addition, the following criteria set forth in the SCAQMD's *CEQA Air Quality Handbook* serve as quantitative air quality standards to be used to evaluate project impacts under Appendix G thresholds. Under these thresholds, a significant threshold would occur when:²⁹

- The Project results in the exposure of sensitive receptors to carcinogenic or toxic air contaminants that exceed the maximum incremental cancer risk of 10 in one million or an acute or chronic hazard index of 1.0.³⁰ For projects with a maximum incremental cancer risk between 1 in one million and 10 in one million, a project would result in a significant impact if the cancer burden exceeds 0.5 excess cancer cases.

(d) *Consistency with Applicable Air Quality Plans*

CEQA Guidelines Section 15125 requires an analysis of project consistency with applicable governmental plans and policies. This analysis is conducted to assess potential project impacts against Threshold (a) from the Appendix G thresholds. In accordance with the SCAQMD's *CEQA Air Quality Handbook*, the following criteria shall be used to evaluate a project's consistency with SCAQMD and SCAG regional plans and policies, including the AQMP, consistent with the Appendix G thresholds:³¹

- Will the Project result in any of the following:
 - An increase in the frequency or severity of existing air quality violations;
 - Cause or contribute to new air quality violations; or
 - Delay timely attainment of air quality standards or the interim emission reductions specified in the AQMP?
- Will the Project exceed the assumptions utilized in preparing the AQMP?

²⁹ SCAQMD, *CEQA Air Quality Handbook*, April 1993, Chapter 6 (Determining the Air Quality Significance of a Project) and Chapter 10 (Assessing Toxic Air Pollutants).

³⁰ Hazard index is the ratio of a toxic air contaminant's concentration divided by its Reference Concentration, or safe exposure level. If the hazard index exceeds one, people are exposed to levels of TACs that may pose noncancer health risks.

³¹ SCAQMD, *CEQA Air Quality Handbook*, April 1993, p. 12-3.

- Is the Project consistent with the population and employment growth projections upon which AQMP forecasted emission levels are based;
- Does the Project include air quality mitigation measures; or
- To what extent is Project development consistent with the AQMP land use policies?

The Project's impacts with respect to these criteria are discussed to assess the consistency with the SCAQMD's AQMP and SCAG regional plans and policies. In addition, the Project's consistency with the City of Los Angeles General Plan Air Quality Element is discussed.

c) Project Design Features

The Project would comply with the 2017 Los Angeles Green Building Code (LAGBC),³² which builds upon and sets higher standards than those in the 2016 California Green Building Standards Code (CalGreen, effective January 1, 2017).³³

Further energy efficiency and sustainability features would include native plants and drip/subsurface irrigation systems, individual metering or sub metering for water use, leak detection systems, and provisions for electric vehicle charging.

The Project's infill location would promote the concentration of development in an urban location with extensive infrastructure and access to public transit facilities. The Project's proximity to public transportation in the San Pedro neighborhood would reduce vehicle miles traveled for residents. Services include Metro local bus service (i.e., Route 246), Metro Silver Line, and DASH San Pedro shuttle service. The Project would also promote bicycle transportation by providing 8 short- and 81 long-term bicycle parking spaces, pursuant to LAMC section 12.21 A.4.

d) Analysis of Project Impacts

Threshold a) Would the project conflict with or obstruct implementation of the applicable air quality plan?

(1) SCAQMD CEQA Air Quality Handbook Policy Analysis and SCAG 2016-2040 RTP/SCS Consistency

The following analysis addresses the Project's consistency with applicable SCAQMD and SCAG policies, including the SCAQMD's 2016 AQMP and growth projections within the SCAG 2016–2040 RTP/SCS. In accordance with the procedures established in the SCAQMD's *CEQA Air Quality Handbook*, the following criteria are required to be addressed in order to determine the Project's consistency with applicable SCAQMD and SCAG policies:

³² LA Department of Building and Safety: <http://ladbs.org/forms-publications/forms/green-building>

³³ California Building Codes: <http://www.bsc.ca.gov/Codes.aspx>

- Would the project result in any of the following:
 - An increase in the frequency or severity of existing air quality violations; or
 - Cause or contribute to new air quality violations; or
 - Delay timely attainment of air quality standards or the interim emission reductions specified in the AQMP.
- Would the project exceed the assumptions utilized in preparing the AQMP?
 - Is the Project consistent with the population and employment growth projections upon which AQMP forecasted emission levels are based;
 - Does the Project include air quality mitigation measures; or
 - To what extent is Project development consistent with the AQMP land use policies?

With respect to the first criterion, as discussed below, localized concentrations of NO₂ as NO_x, CO, PM₁₀, and PM_{2.5} have been analyzed for the Project. SO₂ emissions would be negligible during construction and long-term operations, and, therefore, would not have the potential to cause or affect a violation of the SO₂ ambient air quality standard. Since VOCs are not a criteria pollutant, there is no ambient standard or localized threshold for VOCs. Due to the role VOCs play in O₃ formation, it is classified as a precursor pollutant, and only a regional emissions threshold has been established.

Particulate matter is the primary pollutant of concern during construction activities, and, therefore, the Project's PM₁₀ and PM_{2.5} emissions during construction were analyzed in order to: (1) ascertain potential effects on localized concentrations; and (2) determine if there is a potential for such emissions to cause or affect a violation of the ambient air quality standards for PM₁₀ and PM_{2.5}. As demonstrated in the analysis below (see **Table 6** later in this section), the increases in PM₁₀ and PM_{2.5} emissions during construction would not exceed the SCAQMD-recommended significance thresholds at sensitive receptors in proximity to the Project Site.

Additionally, the Project's maximum potential NO_x and CO daily emissions during construction were analyzed to ascertain potential effects on localized concentrations and to determine if there is a potential for such emissions to cause or affect a violation of an applicable ambient air quality standard. As shown in **Table 6**, NO_x and CO would not exceed the SCAQMD-recommended localized significance thresholds. Therefore, Project construction would not result in a significant impact with regard to localized air quality.

Because the Project would not introduce any substantial stationary sources of emissions, CO is the preferred benchmark pollutant for assessing local area air quality impacts from post-

construction motor vehicle operations.³⁴ As indicated under Threshold (d), no intersections would require a CO hotspot analysis, and impacts would be less than significant. Therefore, the Project would not increase the frequency or severity of an existing CO violation or cause or contribute to new CO violations.

As discussed below, an analysis of potential localized operational impacts from on-site activities was conducted. As demonstrated in the analysis below (see **Table 7** later in this section), localized NO₂ as NO_x, CO, PM₁₀, and PM_{2.5} operational impacts would be less than significant. Therefore, the Project would not increase the frequency or severity of an existing violation or cause or contribute to new violations for these pollutants. As the Project would not exceed any of the state and federal standards, the Project would also not delay timely attainment of air quality standards or interim emission reductions specified in the AQMP.

With respect to the determination of consistency with AQMP growth assumptions, the projections in the AQMP for achieving air quality goals are based on assumptions in SCAG's 2016–2040 RTP/SCS regarding population, housing, and growth trends. Determining whether or not a project exceeds the assumptions reflected in the AQMP involves the evaluation of three criteria: (1) consistency with applicable population, housing, and employment growth projections; (2) project mitigation measures; and (3) appropriate incorporation of AQMP land use planning strategies. The following discussion provides an analysis with respect to each of these three criteria.

- Is the project consistent with the population, housing, and employment growth projections upon which AQMP forecasted emission levels are based?

A project is consistent with the AQMP, in part, if it is consistent with the population, housing, and employment assumptions that were used in the development of the AQMP. In the case of the 2016 AQMP, two sources of data form the basis for the projections of air pollutant emissions: the City of Los Angeles General Plan and SCAG's RTP. The General Plan serves as a comprehensive, long-term plan for future development of the City.

The 2016–2040 RTP/SCS provides socioeconomic forecast projections of regional population growth. The population, housing, and employment forecasts, which are adopted by SCAG's Regional Council, are based on local plans and policies applicable to the specific area; these are used by SCAG in all phases of implementation and review. According to the California Department of Finance, the population for the City of Los Angeles in 2017 was approximately 4,041,707 persons. In 2040, the City of Los Angeles is anticipated to have a population of approximately 4,609,400 persons. Based on a household size factor of 2.43 persons per household in the City in 2017, the Project is estimated to generate a residential population of 265 persons at full buildout, which would represent approximately 0.05 percent of the population growth forecasted by SCAG in the City of Los Angeles between 2017 and 2040.

³⁴ SCAQMD, CEQA Air Quality Handbook, Chapter 12, Assessing Consistency with Applicable Regional Plans, 1993.

Because the Project's resulting residential growth would fall well within the growth forecasts for the City and similar projections form the basis of the 2016 AQMP, it can be concluded that the Project would be consistent with the projections in the AQMP.

- Does the project implement feasible air quality mitigation measures?

As discussed below under Thresholds (b), (c), and (d), the Project would not result in any significant air quality impacts and therefore would not require mitigation. In addition, the Project would comply with all applicable regulatory standards as required by SCAQMD. Furthermore, with compliance with the regulatory requirements identified above, no significant air quality impacts would occur. As such, the proposed Project meets this AQMP consistency criterion.

- To what extent is project development consistent with the land use policies set forth in the AQMP?

With regard to land use developments such as the Project, the AQMP's air quality policies focus on the reduction of vehicle trips and vehicle miles traveled (VMT). The Project would serve to implement a number of land use policies of the City of Los Angeles, SCAQMD, and SCAG. The Project would be designed and constructed to support and promote environmental sustainability. The Project is an infill development within an urbanized area that would concentrate more housing. "Green" principles are incorporated throughout the Project to comply with the City of Los Angeles Green Building Code and the California Green Building Standards Code (CALGreen) through energy conservation, water conservation, and waste reduction features.

The air quality plan applicable to the Project area is the 2016 AQMP. The 2016 AQMP is the SCAQMD plan for improving regional air quality in the Basin. The 2016 AQMP is the current management plan for continued progression toward clean air and compliance with State and federal requirements. It includes a comprehensive strategy aimed at controlling pollution from all sources, including stationary sources, on- and off-road mobile sources and area sources. The 2016 AQMP also incorporates current scientific information and meteorological air quality models. It also updates the federally approved 8-hour O₃ control plan with new commitments for short-term NO_x and VOC reductions. The 2016 AQMP includes short-term control measures related to facility modernization, energy efficiency, good management practices, market incentives, and emissions growth management.

As demonstrated in the following analyses, the Project would not result in significant regional emissions. The 2016 AQMP adapts previously conducted regional air quality analyses to account for the recent unexpected drought conditions and presents a revised approach to demonstrated attainment of the 2006 24-hour PM_{2.5} NAAQS for the Basin. Directly applicable to the Project, the 2016 AQMP proposes robust NO_x reductions from residential appliances. The Project would be required to comply with all new and existing regulatory measures set forth by the SCAQMD. Implementation of the Project would not interfere with air pollution control measures listed in the 2016 AQMP.

The Project Site is classified as “Neighborhood Commercial” in the General Plan Framework and the Community Plan, a classification that allows residential uses proposed by the Project. As such, the RTP/SCS’ assumptions about growth in the City accommodate housing growth on this site. As a result, the Project would be consistent with the growth assumptions in the City’s General Plan. Because the AQMP accommodates growth forecasts from local General Plans, the emissions associated with this Project are accounted for and mitigated in the region’s air quality attainment plans. The air quality impacts of development on the Project Site are accommodated in the region’s emissions inventory for the 2016 RTP/SCS and 2016 AQMP. **Therefore, the Project would result in less-than significant impacts related to consistency with the AQMP.**

(2) City of Los Angeles Policies

The Project would offer convenient access to public transit and opportunities for walking and biking, thereby facilitating a reduction in VMT, in addition to bicycle parking. In addition, the Project would be consistent with the existing land use pattern in the vicinity that concentrates urban density along major arterials and near transit options. The Project also includes primary entrances for pedestrians and bicyclists that would be safe, easily accessible, and a short distance from transit. These transit services include Services include Metro local bus service (i.e., Route 246), Metro Silver Line, and DASH San Pedro shuttle service. The Project would also promote bicycle transportation by providing bicycle parking spaces, pursuant to LAMC section 12.21 A.4.

The Project would be consistent with applicable policies of the Air Quality Element. The Project would implement sustainability features that would reduce vehicular trips, reduce VMT, and encourage use of alternative modes of transportation.

The City’s General Plan Air Quality Element identifies 30 policies with specific strategies for advancing the City’s clean air goals. As illustrated in **Table 4**, the Project is consistent with the applicable policies in the Air Quality Element. **Therefore, the Project would result in less-than significant impacts related to consistency with the Air Quality Element.**

Table 4
Project Consistency With City Of Los Angeles General Plan Air Quality Element

Strategy	Project Consistency
Policy 1.3.1. Minimize particulate emissions from construction sites.	Consistent. The Project would minimize particulate emissions during construction through best practices and/or SCAQMD rules.
Policy 1.3.2. Minimize particulate emissions from unpaved roads and parking lots associated with vehicular traffic.	Consistent. The Project would minimize particulate emissions from unpaved facilities through best practices and/or SCAQMD rules.
Policy 2.1.1. Utilize compressed work weeks and flextime, telecommuting, carpooling, vanpooling, public transit, and improve walking/bicycling related facilities in order to reduce vehicle trips and/or VMT as an employer and encourage the private sector to do the same to reduce work trips and traffic congestion.	Not Applicable. The Project is a residential project that would not implement work-based transportation demand management programs. Nevertheless, transit use will benefit from the substantial service in the vicinity of the project, including Metro local bus service (i.e., Route 246), Metro Silver Line, and DASH San Pedro shuttle service. The Project would also promote bicycle

Table 4
Project Consistency With City Of Los Angeles General Plan Air Quality Element

Strategy	Project Consistency
	transportation by providing 8-short and 81 long-term bicycle parking spaces, pursuant to LAMC section 12.21 A.4.
Policy 2.1.2. Facilitate and encourage the use of telecommunications (i.e., telecommuting) in both the public and private sectors, in order to reduce work trips.	Not Applicable. The Project is residential project that would not implement work-based telecommunications programs.
Policy 2.2.1. Discourage single-occupant vehicle use through a variety of measures such as market incentive strategies, mode-shift incentives, trip reduction plans and ridesharing subsidies.	Not Applicable. The Project is a residential project that would not implement work-based market incentive programs. Nevertheless, transit use will benefit from the substantial service in the vicinity of the project, including Metro local bus service (i.e., Route 246), Metro Silver Line, and DASH San Pedro shuttle service. The Project would also promote bicycle transportation by providing 8-short and 81 long-term bicycle parking spaces, pursuant to LAMC section 12.21 A.4.
Policy 2.2.2. Encourage multi-occupant vehicle travel and discourage single-occupant vehicle travel by instituting parking management practices.	Not Applicable. The Project is a residential project that would not implement work-based parking management programs. Nevertheless, transit use will benefit from the substantial service in the vicinity of the project, including Metro local bus service (i.e., Route 246), Metro Silver Line, and DASH San Pedro shuttle service. The Project would also promote bicycle transportation by providing 8-short and 81 long-term bicycle parking spaces, pursuant to LAMC section 12.21 A.4.
Policy 2.2.3. Minimize the use of single-occupant vehicles associated with special events or in areas and times of high levels of pedestrian activities.	Not Applicable. The Project would not include facilities for special events.
Policy 3.2.1. Manage traffic congestion during peak hours.	Consistent. The Project is a residential development that generally produces less than half the trip generation of comparably-sized retail, office, and commercial land uses.
Policy 4.1.1. Coordinate with all appropriate regional agencies on the implementation of strategies for the integration of land use, transportation, and air quality policies.	Consistent. The Project is being entitled through the City of Los Angeles, which coordinates with SCAG, Metro, and other regional agencies on the coordination of land use, air quality, and transportation policies.
Policy 4.1.2. Ensure that project level review and approval of land use development remains at the local level.	Consistent. The Project would be entitled and environmentally cleared at the local level.
Policy 4.2.1. Revise the City's General Plan/Community Plans to achieve a more compact, efficient urban form and to promote more transit-oriented development and mixed-use development.	Not Applicable. This policy calls for City updates to its General Plan.
Policy 4.2.2. Improve accessibility for the City's residents to places of employment, shopping centers and other establishments.	Consistent. The Project would be infill development that would provide residents with proximate access to jobs, shopping, and other uses.
Policy 4.2.3. Ensure that new development is compatible with pedestrians, bicycles, transit, and alternative fuel vehicles.	Consistent. The Project is a residential project that would support transportation programs by benefitting from substantial service in the vicinity of the project, including Metro local bus service (i.e., Route 246), Metro Silver Line, and DASH San Pedro shuttle service. The Project would also promote bicycle transportation

Table 4
Project Consistency With City Of Los Angeles General Plan Air Quality Element

Strategy	Project Consistency
	by providing 8-short and 81 long-term bicycle parking spaces, pursuant to LAMC section 12.21 A.4.
Policy 4.2.4. Require that air quality impacts be a consideration in the review and approval of all discretionary projects.	Consistent. The Project's air quality impacts are analyzed in this document.
Policy 4.2.5. Emphasize trip reduction, alternative transit and congestion management measures for discretionary projects.	Consistent. The Project is a residential project that would support transportation programs by benefitting from substantial service in the vicinity of the project, including Metro local bus service (i.e., Route 246), Metro Silver Line, and DASH San Pedro shuttle service. The Project would also promote bicycle transportation by providing 8-short and 81 long-term bicycle parking spaces, pursuant to LAMC section 12.21 A.4.
Policy 4.3.1. Revise the City's General Plan/Community Plans to ensure that new or relocated sensitive receptors are located to minimize significant health risks posed by air pollution sources.	Not Applicable. This policy calls for City updates to its General Plan.
Policy 4.3.2. Revise the City's General Plan/Community Plans to ensure that new or relocated major air pollution sources are located to minimize significant health risks to sensitive receptors.	Not Applicable. This policy calls for City updates to its General Plan.
Policy 5.1.1. Make improvements in Harbor and airport operations and facilities in order to reduce air emissions.	Not Applicable. This policy calls for cleaner operations of the City's water port and airport facilities.
Policy 5.1.2. Effect a reduction in energy consumption and shift to non-polluting sources of energy in its buildings and operations.	Not Applicable. This policy calls for cleaner operations of the City's buildings and operations.
Policy 5.1.3. Have the Department of Water and Power make improvements at its in-basin power plants in order to reduce air emissions.	Not Applicable. This policy calls for cleaner operations of the City's Water and Power energy plants.
Policy 5.1.4. Reduce energy consumption and associated air emissions by encouraging waste reduction and recycling.	Consistent. The Proposed Project would be consistent with this policy by complying with Title 24, CALGreen, and other requirements to reduce solid waste and energy consumption.
Policy 5.2.1. Reduce emissions from its own vehicles by continuing scheduled maintenance, inspection and vehicle replacement programs; by adhering to the State of California's emissions testing and monitoring programs; by using alternative fuel vehicles wherever feasible, in accordance with regulatory agencies and City Council policies.	Not Applicable. This policy calls for the City to gradually reduce the fleet emissions inventory from its vehicles through use of alternative fuels, improved maintenance practices, and related operational improvements.
Policy 5.3.1. Support the development and use of equipment powered by electric or low-emitting fuels.	Consistent. The Project would be designed to meet the applicable requirements of the States Green Building Standards Code and the City of Los Angeles' Green Building Code.
Policy 6.1.1. Raise awareness through public-information and education programs of the actions that individuals can take to reduce air emissions.	Not Applicable. This policy calls for the City to promote clean air awareness through its public awareness programs.
Source: DKA Planning, 2019.	

Threshold b) *Would the project result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or State ambient air quality standard?*

(1) Construction

A cumulatively considerable net increase would occur if the project's construction impacts substantially contribute to air quality violations when considering other projects that may undertake construction activities at the same time.

Individual projects that generate emissions that do not exceed SCAQMD's significance thresholds would not contribute considerably to any potential cumulative impact. SCAQMD neither recommends quantified analyses of the emissions generated by a set of cumulative development projects nor provides thresholds of significance to be used to assess the impacts associated with these emissions.

Construction-related emissions were estimated using the SCAQMD's CalEEMod 2016.3.2 model using assumptions from the Project's developer, including the Project's construction schedule of at least 16 months. **Table 5** summarizes the potential construction schedule that was modeled for air quality impacts.

Table 5
Potential Construction Schedule

Phase	Duration	Notes
Demolition	Months 1-1.5	3,511 tons of debris hauled up to 41 miles away
Grading	Month 2.5-3.5	23,348 cubic yards of soil export hauled up to 41 miles away
Building Construction	Months 3.5-8.5	
Architectural Coatings	Months 12-16	
Source: DKA Planning, 2019		

The Project would be required to comply with the following regulations, as applicable:

- SCAQMD Rule 403, would reduce the amount of particulate matter entrained in ambient air as a result of anthropogenic fugitive dust sources by requiring actions to prevent, reduce or mitigate fugitive dust emissions.
- SCAQMD Rule 1113, which limits the VOC content of architectural coatings.
- SCAQMD Rule 402, which states that a person shall not discharge from any source whatsoever such quantities of air contaminants or other materials which cause injury, detriment, nuisance, or annoyance to any considerable number of persons or to the public, or which endanger the comfort, repose, health, or safety of any such persons or the public, or which cause, or have a natural tendency to cause, injury or damage to business or property.

- In accordance with Section 2485 in Title 13 of the California Code of Regulations, the idling of all diesel-fueled commercial vehicles (with gross vehicle weight over 10,000 pounds) during construction would be limited to five minutes at any location.
- In accordance with Section 93115 in Title 17 of the California Code of Regulations, operation of any stationary, diesel-fueled, compression-ignition engines would meet specific fuel and fuel additive requirements and emissions standards.

(a) Regional Emissions

Construction activity has the potential to create air quality impacts through the use of heavy-duty construction equipment, haul trucks, and through vehicle trips generated by construction workers and vendors traveling to and from the Project Site. Fugitive dust emissions would primarily result from grading activities. NO_x emissions would primarily result from the use of construction equipment and truck trips. During the building finishing phase, paving and the application of architectural coatings (e.g., paints) would potentially release VOCs (regulated by SCAQMD Rule 1113). The assessment of construction air quality impacts considers each of these potential sources. Construction emissions can vary substantially from day to day, depending on the level of activity, the specific type of operation and, for dust, the prevailing weather conditions.

As stated above, it is mandatory for all construction projects in the Basin to comply with SCAQMD Rule 403 for Fugitive Dust. Rule 403 control requirements include measures to prevent the generation of visible dust plumes. Measures include, but are not limited to, applying water and/or soil binders to uncovered areas, reestablishing ground cover as quickly as possible, utilizing a wheel washing system or other control measures to remove bulk material from tires and vehicle undercarriages before vehicles exit the Project Site, and maintaining effective cover over exposed areas. Compliance with Rule 403 would reduce regional PM_{2.5} and PM₁₀ emissions associated with construction activities by approximately 61 percent.

This analysis also assumes a single-trip haul distance of up to 41 miles to an off-site landfill. However, closer locations may be determined feasible, which would result in lower emissions for the Project.

As shown in **Table 6**, the construction of the Project will produce VOC, NO_x, CO, SO_x, PM₁₀ and PM_{2.5} emissions that do not exceed the SCAQMD's regional thresholds. As a result, construction of the Project would not contribute substantially to an existing violation of air quality standards for regional pollutants (e.g., ozone). **This impact is considered less than significant.**

Table 6
Estimated Daily Construction Daily Emissions - Unmitigated

Construction Phase Year	Daily Emissions (Pounds Per Day)					
	VOC	NO _x	CO	SO _x	PM ₁₀	PM _{2.5}
2020	4	71	31	<1	4	2
2021	8	2	3	<1	<1	<1
Maximum Regional Total	8	71	31	<1	4	2
Regional Threshold	75	100	550	150	150	55
Exceed Threshold?	No	No	No	No	No	No
Maximum Localized Total	2	19	18	<1	2	1
Localized Threshold	--	57	585	--	4	3
Exceed Threshold?	N/A	No	No	N/A	No	No
The construction dates are used for the modeling of air quality emissions in the CalEEMod software. If construction activities commence later than what is assumed in the environmental analysis, the actual emissions would be lower than analyzed because of the increasing penetration of newer equipment with lower certified emission levels. Assumes implementation of SCAQMD Rule 403 (Fugitive Dust Emissions) Source: DKA Planning, 2019 based on CalEEMod 2016.3.2 model runs. LST analyses based on 1-acre site with 25-meter distances to receptors in South Coastal LA County source receptor area.						

(b) Localized Emissions

In addition to maximum daily regional emissions, maximum localized (onsite) emissions were quantified for each construction activity. The localized construction air quality analysis was conducted using the methodology promulgated by the SCAQMD. Look-up tables provided by the SCAQMD were used to determine localized construction emissions thresholds for the Project.³⁵ LSTs represent the maximum emissions from a project that are not expected to cause or contribute to an exceedance of the most stringent applicable federal or state ambient air quality standard and are based on the most recent background ambient air quality monitoring data (2016-2018) for the Project area.

Maximum on-site daily construction emissions for NO_x, CO, PM₁₀, and PM_{2.5} were calculated using CalEEMod and compared to the applicable SCAQMD LSTs for the Central LA SRA based on construction site acreage that is less than or equal to one acre. Potential impacts were evaluated at the closest off-site sensitive receptor, which are the residences on either side of the Project Site, immediately adjacent to the Project Site. The closest receptor distance on the SCAQMD mass rate LST look-up tables is 25 meters.

As shown in **Table 6**, above, the Project would produce emissions that do not exceed the SCAQMD's recommended localized standards of significance for NO₂ and CO during the construction phase. Similarly, construction activities would not produce PM₁₀ and PM_{2.5} emissions that exceed localized thresholds recommended by the SCAQMD.

These estimates assume the use of Best Available Control Measures (BACM) that address fugitive dust emissions of PM₁₀ and PM_{2.5} through SCAQMD Rule 403. This would include watering portions of the site that are disturbed during grading activities and minimizing tracking of

³⁵ SCAQMD, LST Methodology Appendix C-Mass Rate LST Look-up Table, revised October 2009.

dirt onto local streets. **Therefore, construction impacts on localized air quality are considered less than significant.**

A cumulatively considerable net increase would occur if the project's construction impacts substantially contribute to air quality violations when considering other projects that may undertake construction activities at the same time.

Construction of the Project would not contribute significantly to cumulative emissions of any non-attainment regional pollutants. For regional ozone precursors, the Project would not exceed SCAQMD mass emission thresholds for ozone precursors during construction. Similarly, regional emissions of PM₁₀ and PM_{2.5} would not exceed mass thresholds established by the SCAQMD. **Therefore, construction emissions impact on regional criteria pollutant emissions would be considered less than significant.**

When considering local impacts, cumulative construction emissions are considered when projects are within close proximity of each other that could result in larger impacts on local sensitive receptors. Construction of the Project itself would not produce cumulative considerable emissions of localized nonattainment pollutants PM₁₀ and PM_{2.5}, as the anticipated emissions would not exceed LST thresholds set by the SCAQMD. **Therefore, construction emissions impact on localized criteria pollutant emissions would be considered less than significant.**

If any related projects were to undertake construction concurrently with the Project, localized CO, PM_{2.5}, PM₁₀, and NO₂ concentrations would be further increased. However, the application of LST thresholds to this project would help ensure that it does not produce localized hotspots of CO, PM_{2.5}, PM₁₀, and NO₂. This and any related projects that would exceed LST thresholds (after mitigation) could perform dispersion modeling to confirm whether health-based air quality standards would be violated. The SCAQMD's LST thresholds recognize the influence of a receptor's proximity, setting mass emissions thresholds for PM₁₀ and PM_{2.5} that generally double with every doubling of distance.

There is an existing regional cumulative impact associated with O₃, NO₂, PM₁₀, and PM_{2.5} because the Basin is designated as a State and/or federal nonattainment air basin for these pollutants. However, an individual Project can emit these pollutants without significantly contributing to this cumulative impact depending on the magnitude of emissions. As discussed above, construction and operational emissions would not exceed any applicable SCAQMD thresholds of significance.

With respect to the Project's construction-related air quality emissions and cumulative Air Basin-wide conditions, the SCAQMD has developed strategies (e.g., SCAQMD Rule 403) to reduce criteria pollutant emissions outlined in the AQMP pursuant to Federal CAA mandates. As stated above, the Project would comply with applicable regulatory requirements, including the SCAQMD Rule 403 requirements. Per SCAQMD rules and mandates as well as the CEQA requirement that significant impacts be mitigated to the extent feasible, all construction projects Air Basin-wide would comply with these same regulatory requirements and would implement all feasible mitigation measures when significant impacts are identified.

According to the SCAQMD, individual projects that exceed the SCAQMD's recommended daily thresholds for project-specific impacts would cause a cumulatively considerable increase in emissions for those pollutants for which the Air Basin is in non-attainment. As shown in **Table 6**, Project construction daily emissions would not exceed any of the SCAQMD's regional or localized thresholds. **Therefore, the Project's contribution to cumulative construction-related regional or localized emissions would not be cumulatively considerable and, thus, would be less than significant.**

(2) Operation

Operational emissions of criteria pollutants would come from area sources and mobile sources. Area sources include natural gas for space heating and water heating, gasoline-powered landscaping and maintenance equipment, consumer products such as household cleaners, and architectural coatings for routine maintenance. CalEEMod program generates estimates of emissions from energy use based on the land use type and size. The Project will also produce long-term air quality impacts to the region primarily from motor vehicles that access the Project site. The Project could add up to 372 net vehicle trips on a peak weekday at the start of operations in 2021.³⁶

As shown in **Table 7**, the Project would not exceed the SCAQMD's regional or localized significance thresholds. The Project operational impacts on long-term air pollution would be considered less than significant. **Therefore, the operational impacts of the Project on regional and localized air quality are considered less than significant.**

Table 7
Estimated Daily Operations Emissions - Unmitigated

Emissions Source	Daily Emissions (Pounds Per Day)					
	VOC	NO _x	CO	SO _x	PM ₁₀	PM _{2.5}
Area Sources	3	<1	9	<1	<1	<1

Source: DKA Planning, 2019 based on CalEEMod 2016.3.2 model runs						

³⁶ City of Los Angeles, Traffic Impact Assessment for the Proposed Residential Project located at 1331 South Pacific; October 22, 2019.

As for cumulative operational impacts, the proposed land use will not produce cumulatively considerable emissions of nonattainment pollutants at the regional or local level. The Project would not include major sources of combustion or fugitive dust. As a result, its localized emissions of PM₁₀ and PM_{2.5} would be minimal. Likewise, existing land uses in the area include land uses that do not produce substantial emissions of localized nonattainment pollutants. As shown in **Table 7**, Project operation daily emissions would not exceed any of the SCAQMD's regional or localized thresholds. Because the Project's air quality impacts would not exceed the SCAQMD's operational thresholds of significance. **Therefore, the Project's contribution to cumulative operation-related regional or localized emissions would not be cumulatively considerable and, thus, would be less than significant.**

Threshold c) Would the project expose sensitive receptors to substantial pollutant concentrations?

There are several sensitive receptors within 1,000 feet of the Project Site that could be exposed to air pollution from construction and operation of the Proposed Project. These include but are not limited to the following:

- Multi-family residences, 523 West 14th Street; 10 feet west of the Project site.
- 15th Street Elementary School, 1527 South Mesa Street; 660 feet southeast of the Project site.
- Multi-family residences, 529 West 13th Street; as close as 90 feet north of the Project site to the main residence.
- Multi-family residences, 498 West 13th Street; as close as 250 feet north of the Project site.

(1) Construction

Construction of the Project could expose sensitive receptors to substantial pollutant concentrations if maximum daily emissions of regulated pollutants generated by sources located on and/or near the Project site exceeded the applicable LST values presented in **Table 3**, or if construction activities generated significant emissions of TACs that could result in carcinogenic risks or non-carcinogenic hazards exceeding the SCAQMD Air Quality Significance Thresholds of 10 excess cancers per million or non-carcinogenic Hazard Index greater than 1.0, respectively. As discussed above, the LST values were derived by the SCAQMD for the criteria pollutants NO_x, CO, PM₁₀, and PM_{2.5} to prevent the occurrence of concentrations exceeding the air quality standards at sensitive receptor locations based on proximity and construction site size.

As shown in **Table 6**, during construction of the Project, maximum daily localized unmitigated emissions of NO₂, CO, PM₁₀, and PM_{2.5} from sources on the Project site would remain below each of the respective LST values. Unmitigated maximum daily localized emissions would not exceed

any of the localized standards for receptors that are generally within 25 meters of the Proposed Project's construction activities. Therefore, based on SCAQMD guidance, localized emissions of criteria pollutants would not have the potential to expose sensitive receptors to substantial concentrations that would present a public health concern.

The primary TAC that would be generated by construction activities is diesel PM, which would be released from the exhaust stacks of construction equipment. The construction emissions modeling conservatively assumed that all equipment present on the Project Site would be operating simultaneously and continuously throughout most of the day, while in all likelihood this would rarely be the case. Average daily emissions of diesel PM would be less than one pound per day throughout the course of Project construction. Therefore, the magnitude of daily diesel PM emissions, would not be sufficient to result in substantial pollutant concentrations at off-site locations nearby.

Furthermore, according to SCAQMD methodology, health risks from carcinogenic air toxics are usually described in terms of individual cancer risk. "Individual Cancer Risk" is the likelihood that a person exposed to concentrations of TACs over a 30-year period will contract cancer based on the use of standard risk-assessment methodology. The entire duration of construction activities associated with implementation of the Project is anticipated to be at least 16 months, and the magnitude of daily diesel PM emissions will vary over this time period. No residual emissions and corresponding individual cancer risk are anticipated after construction. Because there is such a short-term exposure period, construction TAC emissions would result in a less-than significant impact. **Therefore, construction of the Project would not expose sensitive receptors to substantial diesel PM concentrations, and this impact would be less than significant.**

(2) Operation

The Project Site would be developed with land uses that are not typically associated with TAC emissions. Typical sources of acutely and chronically hazardous TACs include industrial manufacturing processes (e.g., chrome plating, electrical manufacturing, petroleum refinery). The Project would not include these types of potential industrial manufacturing process sources. It is expected that quantities of hazardous TACs generated on-site (e.g., cleaning solvents, paints, landscape pesticides) for the types of proposed land uses would be below thresholds warranting further study under California Accidental Release Program.

When considering potential air quality impacts under CEQA, consideration is given to the location of sensitive receptors within close proximity of land uses that emit TACs. CARB has published and adopted the Air Quality and Land Use Handbook: A Community Health Perspective, which provides recommendations regarding the siting of new sensitive land uses near potential sources of air toxic emissions (e.g., freeways, distribution centers, rail yards, ports, refineries, chrome plating facilities, dry cleaners, and gasoline dispensing facilities).³⁷

³⁷ CARB, Air Quality and Land Use Handbook, a Community Health Perspective, April 2005.

The SCAQMD adopted similar recommendations in its Guidance Document for Addressing Air Quality Issues in General Plans and Local Planning.³⁸ Together, the CARB and SCAQMD guidelines recommend siting distances for both the development of sensitive land uses in proximity to TAC sources and the addition of new TAC sources in proximity to existing sensitive land uses.

The primary sources of potential air toxics associated with Project operations include DPM from delivery trucks (e.g., truck traffic on local streets and idling on adjacent streets) and to a lesser extent, facility operations (e.g., natural gas fired boilers). However, these activities, and the land uses associated with the Project, are not considered land uses that generate substantial TAC emissions. It should be noted that the SCAQMD recommends that health risk assessments (HRAs) be conducted for substantial individual sources of DPM (e.g., truck stops and warehouse distribution facilities that generate more than 100 trucks per day or more than 40 trucks with operating transport refrigeration units) and has provided guidance for analyzing mobile source diesel emissions.³⁹ Based on this guidance, the Project would not include these types of land uses and is not considered to be a substantial source of DPM warranting a refined HRA since daily truck trips to the Project Site would not exceed 100 trucks per day or more than 40 trucks with operating transport refrigeration units. In addition, the CARB-mandated ATCM limits diesel-fueled commercial vehicles (delivery trucks) to idle for no more than five minutes at any given time, which would further limit diesel particulate emissions.

As the Project would not contain substantial TAC sources and is consistent with the CARB and SCAQMD guidelines, the Project would not result in the exposure of off-site sensitive receptors to carcinogenic or toxic air contaminants that exceed the maximum incremental cancer risk of 10 in one million or an acute or chronic hazard index of 1.0, and potential TAC impacts would be less than significant.

The Project would generate long-term emissions on-site from area and energy sources that would generate negligible pollutant concentrations of CO, NO₂, PM_{2.5}, or PM₁₀ at nearby sensitive receptors. While long-term operations of the Project would generate traffic that produces off-site emissions, these would not result in exceedances of CO air quality standards at roadways in the area due to three key factors. First, CO hotspots are extremely rare and only occur in the presence of unusual atmospheric conditions and extremely cold conditions, neither of which applies to this Project area. Second, auto-related emissions of CO continue to decline because of advances in fuel combustion technology in the vehicle fleet. Finally, the Project would not contribute to the levels of congestion that would be needed to produce the amount of emissions needed to trigger a potential CO hotspot.⁴⁰

³⁸ SCAQMD, Guidance Document for Addressing Air Quality Issues in General Plans and Local Planning, May 6, 2005.

³⁹ SCAQMD, Health Risk Assessment Guidance for Analyzing Cancer Risks from Mobile Source Diesel Idling Emissions for CEQA Air Quality Analysis, 2002.

⁴⁰ Caltrans, Transportation Project-Level Carbon Monoxide Protocol, updated October 13, 2010.

Finally, the Project would not result in any substantial emissions of TACs during the construction or operations phase. During the construction phase, the primary air quality impacts would be associated with the combustion of diesel fuels, which produce exhaust-related particulate matter that is considered a toxic air contaminant by CARB based on chronic exposure to these emissions.⁴¹ However, construction activities would not produce chronic, long-term exposure to diesel particulate matter. During long-term project operations, the Project does not include typical sources of acutely and chronically hazardous TACs such as industrial manufacturing processes and automotive repair facilities. As a result, the Project would not create substantial concentrations of TACs.

Because of the Project Site's distance from any freeways (1.09 miles south of the SR-110 freeway terminus), HVAC systems will not require filtration rated at MERV-13 or higher. This project design feature mandated by the City will reduce exposure of future residents to any TACs associated with freeway traffic to the north of the Project Site.

In addition, the SCAQMD recommends that health risk assessments be conducted for substantial sources of diesel particulate emissions (e.g., truck stops and warehouse distribution facilities) and has provided guidance for analyzing mobile source diesel emissions.⁴² The Project would not generate a substantial number of truck trips. Based on the limited activity of TAC sources, the Project would not warrant the need for a health risk assessment associated with on-site activities. **Therefore, the Proposed Project's operational impacts on local sensitive receptors would be less than significant.**

Threshold e) Would the project result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?

The Proposed Project would not result in activities that create objectionable odors. The Proposed Project is a residential project that would not include any land uses typically associated with unpleasant odors and local nuisances (e.g., rendering facilities, dry cleaners). SCAQMD regulations that govern nuisances (i.e., Rule 402, Nuisances) would regulate any occasional odors associated with residences. As a result, any odor impacts from the Project would be considered **less than significant**.

e) Cumulative Impacts

SCAQMD recommends that any construction-related emissions and operational emissions from individual development projects that exceed the project-specific mass daily emissions thresholds identified above also be considered cumulatively considerable.⁴³ Individual projects that generate emissions not in excess of SCAQMD's significance thresholds would not contribute considerably

⁴¹ California Office of Environmental Health Hazard Assessment. Health Effects of Diesel Exhaust. [www.
http://oehha.ca.gov/public_info/facts/dieselfacts.html](http://oehha.ca.gov/public_info/facts/dieselfacts.html)

⁴² SCAQMD, Health Risk Assessment Guidance for Analyzing Cancer Risks from Mobile Source Diesel Emissions, December 2002.

⁴³ White Paper on Regulatory Options for Addressing Cumulative Impacts from Air Pollution Emissions, SCAQMD Board Meeting, September 5, 2003, Agenda No. 29, Appendix D, p. D-3.

to any potential cumulative impact. SCAQMD neither recommends quantified analyses of the emissions generated by a set of cumulative development projects nor provides thresholds of significance to be used to assess the impacts associated with these emissions.

(1) AQMP Consistency

Cumulative development is not expected to result in a significant impact in terms of conflicting with, or obstructing implementation of the 2016 AQMP. As discussed previously, growth considered to be consistent with the AQMP would not interfere with attainment because this growth is included in the projections utilized in the formulation of the AQMP. Consequently, as long as growth in the Basin is within the projections for growth identified in the 2016 RTP/SCS, implementation of the AQMP will not be obstructed by such growth. In addition, as discussed previously, the population growth resulting from the Project would be consistent with the growth projections of the AQMP. Each related project would implement feasible air quality mitigation measures to reduce the criteria air pollutants, if required due to any significant emissions impacts. In addition, each related project would be evaluated for its consistency with the land use policies set forth in the AQMP. **Therefore, the Project's contribution to the cumulative impact would not be cumulatively considerable and, therefore, would be less than significant.**

(2) Construction

As discussed above, the Project's construction-related air quality emissions and cumulative impacts would be less than significant. Individual projects that generate emissions that do not exceed SCAQMD's significance thresholds would not contribute considerably to any potential cumulative impact. SCAQMD neither recommends quantified analyses of the emissions generated by a set of cumulative development projects nor provides thresholds of significance to be used to assess the impacts associated with these emissions.

The Project would comply with regulatory requirements, including the SCAQMD Rule 403 requirements listed above. Based on SCAQMD guidance, individual construction projects that exceed the SCAQMD's recommended daily thresholds for project-specific impacts would cause a cumulatively considerable increase in emissions for those pollutants for which the Air Basin is in non-attainment. As shown above, construction-related daily emissions at the Project Site would not exceed any of the SCAQMD's regional or localized significance thresholds. **Therefore, the Project's contribution to cumulative air quality impacts due to localized emissions would not be cumulatively considerable and, therefore, would be less than significant.**

Similar to the Project, the greatest potential for TAC emissions at each related project would generally involve diesel particulate emissions associated with heavy equipment operations during grading and excavation activities. According to SCAQMD methodology, health effects from carcinogenic air toxics are usually described in terms of individual cancer risk. "Individual Cancer Risk" is the likelihood that a person exposed to concentrations of TACs over a 30-year period will contract cancer, based on the use of standard risk-assessment methodology. Construction activities are temporary and short-term events, thus construction activities at each related project

would not result in a long-term substantial source of TAC emissions. Additionally, the SCAQMD CEQA guidance does not require a health risk assessment for short-term construction emissions. It is therefore not meaningful to evaluate long-term cancer impacts from construction activities, which occur over relatively short durations. **As such, given the short-term nature of these activities, cumulative toxic emission impacts during construction would be less than significant.**

(3) Operation

As discussed above, the Project's operational air quality emissions and cumulative impacts would be less than significant. According to the SCAQMD, if an individual project results in air emissions of criteria pollutants that exceed the SCAQMD's recommended daily thresholds for project-specific impacts, then the project would also result in a cumulatively considerable net increase of these criteria pollutants. As operational emissions would not exceed any of the SCAQMD's regional or localized significance thresholds, the emissions of non-attainment pollutants and precursors generated by Project operations would not be cumulatively considerable.

With respect to TAC emissions, neither the Project nor any of the related projects (which are largely residential, retail/commercial, and office in nature), would represent a substantial source of TAC emissions, which are typically associated with large-scale industrial, manufacturing, and transportation hub facilities. The Project and related projects would be consistent with the recommended screening level siting distances for TAC sources, as set forth in CARB's Land Use Guidelines, and the Project and related projects would not result in a cumulative impact requiring further evaluation. However, the related projects could generate minimal TAC emissions related to the use of consumer products and landscape maintenance activities, among other things. Pursuant to AB 1807, which directs the CARB to identify substances as TACs and adopt airborne toxic control measures to control such substances, the SCAQMD has adopted numerous rules (primarily in Regulation XIV) that specifically address TAC emissions. These SCAQMD rules have resulted in and will continue to result in substantial Basin-wide TAC emissions reductions. As such, cumulative TAC emissions during long-term operations would be less than significant. **Therefore, the Project would not result in any substantial sources of TACs that have been identified by the CARB's Land Use Guidelines, and thus, would not contribute to a cumulative impact.**

f) Mitigation Measures

None required.

TECHNICAL APPENDIX

1331 South Pacific Avenue Future - Los Angeles-South Coast County, Summer

1331 South Pacific Avenue Future **Los Angeles-South Coast County, Summer**

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Enclosed Parking with Elevator	65.00	Space	0.00	26,000.00	0
Apartments Mid Rise	109.00	Dwelling Unit	0.72	109,000.00	312

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	11			Operational Year	2021
Utility Company	Los Angeles Department of Water & Power				

CO2 Intensity (lb/MMWhr)	1227.89	CH4 Intensity (lb/MMWhr)	0.029	N2O Intensity (lb/MMWhr)	0.006
--------------------------	---------	--------------------------	-------	--------------------------	-------

1.3 User Entered Comments & Non-Default Data

Project Characteristics -

Land Use - Developer information

Vehicle Trips - City of Los Angeles Memo, Traffic Impact Assessment for the Proposed Residential Project Located at 1331 South Pacific; October 22, 2019

Construction Phase - Developer information

Off-road Equipment - Developer information

Off-road Equipment - Developer information

Off-road Equipment - Developer information

Off-road Equipment -

Grading - Developer information
Demolition - Developer information
Trips and VMT - Developer information. Assumes 14 CY haul truck capacity
Woodstoves - Developer information
Construction Off-road Equipment Mitigation - Assumes SCAQMD Rule 403 control efficiencies

Subject: Phase 1 Environmental Site Assessment for
1309, 1311 ½, 1319, 1321, and 1323 South Pacific Avenue,
Los Angeles, CA 90731
APNs: 7454026011 and 7454026012
Lat: 33.732061, Long: -118.288221

As requested by Mr. Adam O'Neill, we have prepared an Environmental Site Assessment (Phase 1) for the property located at 1309, 1311, 1311 ½, 1319, 1321, and 1323 South Pacific Avenue, Los Angeles, CA 90731. The property is identified by the Assessor's Parcel Numbers (APNs) 7454026011 and 7454026012. This report was produced in accordance with the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase 1 Environmental Site Assessments Process (ASTM 1527-13) and is in general compliance with the All Appropriate Inquiries (AAI) rule.

1.0 EXECUTIVE SUMMARY

A Phase 1 Environmental Site Assessment has been conducted for the subject property, the Opinion, Conclusions and Recommendations are provided below.

Findings

- 1) **Site Legal Description:** The subject property consists of two parcels, located at 1309, 1311, 1311 ½, 1319, 1321, and 1323 South Pacific Avenue, Los Angeles, CA 90731. The property is identified by the Assessor's Parcel Numbers (APNs) 7454026011 and 7454026012.
- 2) **1309-1311 South Pacific Avenue:** Prior to 1932, the subject property was vacant land. In 1932, the existing structure was constructed.
 - **1309 South Pacific Avenue:** In 1938, the unit was listed under the name Pacific Pharmacy. From 1950 to 2010 the unit was listed under the name La Rue Pharmacy. Currently the unit is used for storage by the property owner and The Woodsman, a woodworking company.
 - **1311 South Pacific Avenue:** From 1946 to 1957 the unit was listed under the name Los Angeles Harbor Cleaners and Paramount Laundry. In 1960, it was listed under the name Ernest R Collins and United Vending Service. In 1980 it was listed under the name Arthur C. Holloway and from 2010 to 2014 it was listed under the name Steve Formiller. The unit is currently used by The Woodsman, a woodworking company.
 - **1311 ½ South Pacific Avenue** was listed as Ernie Collins, Watch & Jewelry Repairing from 1950 to 1970.

- 3) **1319-1323 South Pacific Avenue:** Prior to 1924, the subject property was vacant land. In 1924 the existing building was constructed.
- **1319 South Pacific Avenue:** From 1924 to 1950 the building was used as a store. From 1950 to 1970, the unit was listed under the name San Pedro Pet Shop. In 1985, it was listed under the name G & M Recycling Jeans, and from 1990 to 1995 it was listed under the name Alamo Video. The unit is currently a vacant office space.
 - **1321 South Pacific Avenue:** The unit was listed as Madame Café from 1950 to 1985. In 1991 it was listed as Taqueria Azteca, and in 1995 it was listed as Golden House Chinese Restaurant. In 2003, Mr. Eangelos Bitsakis purchased the property. From 2010 to 2014, the site was listed under the name Bitsakis E Painting, Inc. Currently the unit is an office space for the current owner of the subject property, Mr. Eangelos Bitsakis.
 - **1323 South Pacific Avenue:** From 1950-1985, the unit was listed under the name The Barrel House. In 2001, it was listed under the name Rose Room. Currently the unit is used as a bar named “Enigma Bar”.
- 4) **Site Observations:** No significant staining was observed throughout the indoor and outdoor grounds of the subject property.
- 5) **Summary of Historical Maps and Aerial Photographs:** Based on the aerial photos and topographic maps of the site, as well as the assessor records, the subject property’s buildings were constructed circa 1924 and 1932.
- 6) **Local Records Review:** No records were found for the subject site with the City of Los Angeles Fire Department Underground Storage Tank Division and Hazardous Material Division.
- 7) **EDR Findings for Subject Site:** The subject property was not listed in Environmental Records Sources searched.
- 8) **EDR Radius Report Findings:**

EDR reports one (1) SEMS-ARCHIVE site within the searched parameters of the subject property.
EDR reports twelve (12) RCRA-SQG sites within the searched parameters of the subject property.
EDR reports three (3) RESPONSE sites within the searched parameters of the subject property.
EDR reports eleven (11) ENVIROSTOR sites within the searched parameters of the subject property.
EDR reports sixteen (16) LUST sites within the searched parameters of the subject property.
EDR reports two (2) CPS-SLIC sites within the searched parameters of the subject property.
EDR reports two (2) UST sites within the searched parameters of the subject property.
EDR reports one (1) HIST Cal-Sites site within the searched parameters of the subject property.
EDR reports one (1) SCH sites within the searched parameters of the subject property.
EDR reports twelve (12) SWEEPS UST sites within the searched parameters of the subject property.
EDR reports twelve (12) HIST UST sites within the searched parameters of the subject property.
EDR reports thirteen (13) CA FID UST sites within the searched parameters of the subject property.
EDR reports one (1) DOD site within the searched parameters of the subject property.
EDR reports one (1) UXO site within the searched parameters of the subject property.
EDR reports one (1) CA BOND EXP. PLAN site within the searched parameters of the subject property.
EDR reports seven (7) HIST CORTESE sites within the searched parameters of the subject property.
EDR reports one (1) EDR MGP site within the searched parameters of the subject property.
EDR reports eight (8) EDR Hist Auto sites within the searched parameters of the subject property.
EDR reports three (3) EDR Hist Cleaner sites within the searched parameters of the subject property.

The Orphan Site List was Review. Three (3) Orphan Sites were reviewed. Of the three sites listed, one site was within the searched radius of the subject property.

Opinions

- 9) **Recognized Environmental Conditions:** 1311 South Pacific Avenue was used as a Drycleaners and Laundromat from 1946 (possibly earlier) to 1957. Based on the use of the site is a Drycleaners prior to regulatory oversight by the City of Los Angeles Fire Department, this constitutes a potential release to the environmental.
- 10) **Environmental Business Risks:** Based on the age of the structures on the subject property, the potential presence for asbestos containing material (ACM) and lead based paint to be on the subject property is high.
- 11) **EDR Radius Report Review:** The cases listed in the EDR report are not anticipated to impact the subject property at this time, based on the type of listings, distance to the subject site, and additional information located in Geotracker and EnviroStor databases.

Conclusions

- 12) We have performed a Phase 1 Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 for the subject property, which consists two parcels, located at 1309, 1311, 1311 ½, 1319, 1321, and 1323 South Pacific Avenue, Los Angeles, CA 90731. The property is identified by the Assessor's Parcel Numbers (APNs) 7454026011 and 7454026012. The subject property was not listed in the Environmental Records Sources searched. Any exceptions to, or deletions from, this practice are described in the Limitations Section of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property, except for the following:
 - The historical records indicate that a Drycleaners operated in unit 1311 South Pacific Avenue from 1946 to 1957; possibly earlier; therefore, the use of Drycleaning chemicals prior to LAFD regulatory oversight, constitutes a potential release.

Recommendations

A limited subsurface soil and soil vapor investigation is recommended in the 1311 South Pacific Avenue unit to determine if the historical use of the site as a Drycleaners has impacted the subject property.

2.0 INTRODUCTION

2.1 Location and Legal Description

The subject property consists of two parcels, located at 1309, 1311, 1311 ½, 1319, 1321, and 1323 South Pacific Avenue, Los Angeles, CA 90731. The property is identified by the Assessor's Parcel Numbers (APNs) 7454026011 and 7454026012. A site vicinity map and a generalized location map are located on in Appendix 9.2.

2.2 Site and Vicinity General Characteristics

The subject property is located in is located within the City of Los Angeles in the community of San Pedro. The site is located on the west side of south trending South Pacific Avenue. Approximately three-quarters of a mile west of the Main Channel for the Port of Long Beach.

2.3 Description of Improvements on Property

The subject property consists of two parcels, each parcel consists of an approximately 7,505 square foot rectangle shaped parcel with an approximately 4,000 square foot single-story commercial retail building located on the east portion of the subject property with concrete parking on the west side of the subject buildings and a mixture of grass and soil areas along the west property line. The rear parking and storage area are elevated above the building level with concrete walkway and steps along the west side of the building. Access to the rear parking and storage area is through the property to the north, 1301 South Pacific Avenue.

Behind 1321 South Pacific Avenue is an approximately 200 square foot building used for storage.

2.4 Current Uses of Adjoining Properties

Direction	Type of Use
North	1301 South Pacific Avenue – Auto repair shop.
East	1318 South Pacific Avenue – Apartment building. 1330 South Pacific Avenue – Retail Stores.
South	1331-1337 South Pacific Avenue – Dance Hall/Bar and asphalt parking lot.
West	527 West 13 th Street – Residential triplex.

2.5 Purpose

The purpose of this Phase 1 Environmental Site Assessment is to identify to the extent feasible recognized environmental conditions (REC) in connection with the property. Following the processes prescribed by the AAI rule and in ASTM Standard E1527-13, Standard Practice for Environmental Site Assessments: Phase 1 Environmental Site Assessment process.

- ❖ As defined by ASTM E1527-13, §1.1.1, the term "recognized environmental conditions" is defined as follows: *"The presence or likely presence of any hazardous substance or petroleum products in, on or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions."*
- ❖ As defined by ASTM E1527-13, §3.2.18, the term "controlled recognized environmental condition" is defined as follows: *"A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."*
- ❖ As defined by ASTM E1527-13, §3.2.42, the term "historical recognized environmental condition" is defined as follows: *"A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to*

any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

2.6 Detailed Scope-of-Work

The scope of work performed for this Phase 1 Environmental report includes:

- Collecting and reviewing available environmental related information concerning the property and other data pertinent to the specific site per the ASTM standard 1527;
- Conducting a site visit to observe current site uses, observe adjacent land use, and gather data on possible spills, or misuse of chemicals that could be considered a REC;
- Contracting appropriate regulatory personnel and reviewing regulatory files regarding the property in question.

No additional non-scope considerations per Section 13 of ASTM 1527-13 were included in this Phase 1 Report including sections 13.1.5.1 to 13.1.5.14.

2.7 Significant Assumptions

No Significant assumptions were made in this assessment.

2.8 Limitations and Exceptions

Limitations

This report is applicable only for the project and site studied. Report findings and statements of professional opinion do not constitute a guarantee or warranty, expressed or implied. This report contains information and data provided by others and Priority One Environmental, Inc. in no way warrants the accuracy or completeness of the information provided by those sources. Our services are performed in a manner consistent with the level of care and skill ordinarily exercised by members of the profession currently practicing in the same locality under similar conditions. This report is prepared using the ASTM Standard E1527-13 and includes several inherent limitations, including but not limited to: Section 4.5.1 - Uncertainty Not Eliminated, Section 4.5.2 - Not Exhaustive, Section 7.4 - No Sampling, and Section 7.5.2.1 - Reliance.

Exceptions

No exceptions to or deviations from the ASTM standard 1527-13 were made during the course of our work except for the following:

- *No Interviews were conducted with local agencies as part of this assessment. Relevant local agencies for the area have policies of referring requests for interviews to their file review departments.*

These limitations are not anticipated to represent a significant data gap for the investigation.

2.9 Special Terms and Conditions

We have been authorized by Mr. Adam O'Neill to perform a Phase 1 environmental site assessment of the subject property. It is our understanding that Mr. Adam O'Neill will use the information contained in the report for due diligence and innocent landowner's protection under CERCLA. Without prior written consent of the client, Priority One Environmental, Inc. will keep confidential and not disclose to any person or entity, and data or information provided by the client or generated in conjunction with the performance of this study, except when required by law. Provisions of confidentiality shall not apply to data or information obtained from the public domain or acquired from third parties not under obligation to the client to maintain confidentiality.

2.10 User Reliance

This report was prepared for the exclusive use of Mr. Adam O'Neill and RKD 1331 Pacific, LP. No other person or entity is entitled to rely upon this report without the specific written authorization of Priority One Environmental, Inc. Such reliance is a subject to the same limitations, terms, and conditions as the original contract with the client. Priority One Environmental, Inc. specifically disclaims any responsibility for any unauthorized use of this report. Based on the ASTM standard this Phase 1 report is reliable for 180 days from the date the work was conducted.

3.0 USER PROVIDED INFORMATION

3.1 Title Records

No Preliminary Title Report was provided for review.

3.2 Environmental Liens or Activity and Use Limitations

No Additional information was provided identifying actual knowledge of environmental liens or activity and use limitations recorded against the subject property. The California State Department of Toxic Substances website EnviroStor was searched and no environmental liens placed by the State environmental agency for the subject site was found.

3.3 Specialized Knowledge

No information was provided identifying specialized knowledge or experience that is material to recognized environmental conditions in connection with the subject property.

3.4 Commonly Known or Reasonably Ascertainable Information

No information was provided identifying knowledge of commonly known or reasonably ascertainable information related to the subject property.

3.5 Valuation Reduction for Environmental Issues

No Information was provided identifying knowledge of valuation reduction of the subject property.

3.6 Owner, Property Manager, and Occupant Information

Information provided by the owner of the subject property is discussed in Section 6.0 of this report.

3.7 Reason for Performing Phase 1

The Phase 1 has been requested by the client for the use in the purchase of the property.

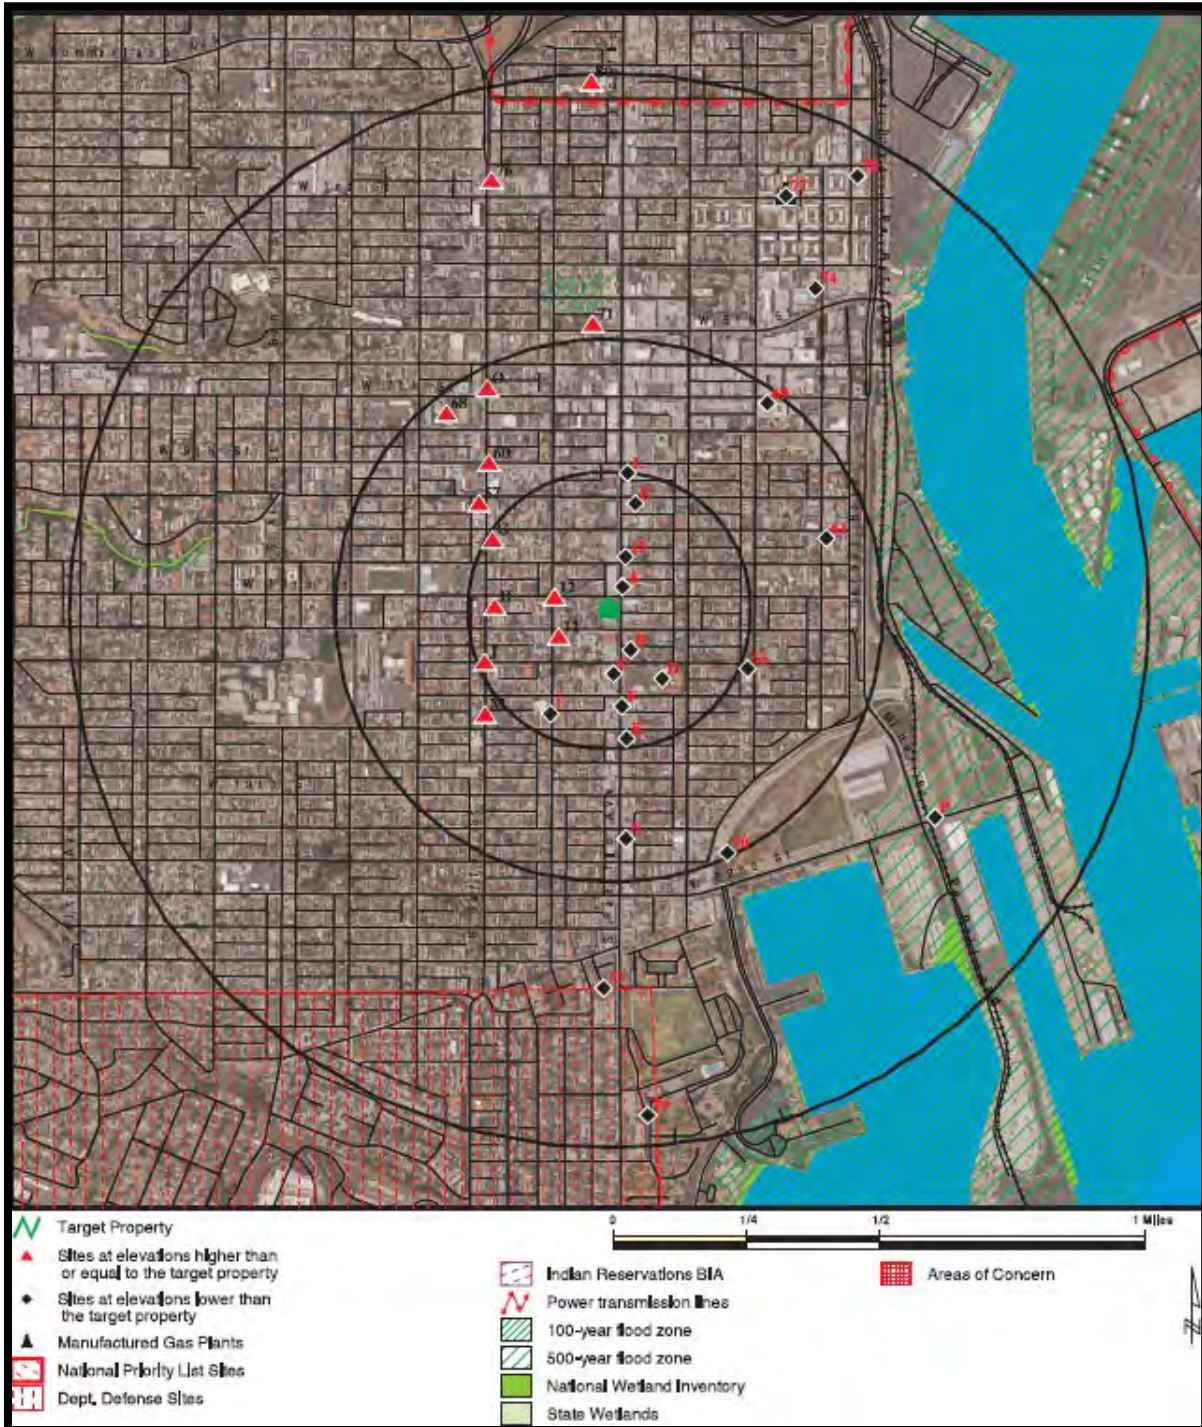

3.8 Other

No other information was provided for review related to the subject property.

4.0 RECORDS REVIEW

4.1 EDR Map Findings

The subject property is located at 1309, 1311, 1311 ½, 1319, 1321, and 1323 South Pacific Avenue, Los Angeles, CA 90731. The property is identified by the Assessor's Parcel Numbers (APNs) 7454026011 and 7454026012. The subject property was not listed in the Environmental Records searched.

NOTES:

TP = Target Property

NR = Not Requested at this Search Distance

Sites may be listed in more than one database

For the full name, description, and the date each of the databases were last updated, please refer to the Government Record section of the EDR® Report.

4.2 Subject Site

EDR reports the site was not listed in any database searched.

4.3 Surrounding Properties

Eighty (80) sites were listed in the EDR Radius Report, these sites were reviewed. Four (4) LUST cases and three (3) ENVIROSTOR cases were listed within the 0.25 miles of the subject site. The five LUST cases are listed as completed case closed. Of the three ENVIRSTOR cases, one is Certified as of 2003, and two are inactive. The two inactive ENVRISTOR cases and three nearby sites listed under the EDR Hist Auto database are discussed below:

Site Name(s)	Address	Distance	Databases
Sproule's Texaco Service	1301 S Pacific Ave	0.004 mi, NE	EDR Hist Auto
Comments: The site was listed as Sproule's Texaco Service for the year 1957. The 1950 Fire Insurance Sanborn Map shows a Gas & Oil station on the southeast corner of 14 th street and South Pacific Avenue. The site is currently an auto repair shop specializing in tires and wheels. No leaks or spills have been reported therefore this site is not anticipated to impact the subject property at this time.			

Site Name(s)	Address	Distance	Databases
Heron E C MRS	1338 S Pacific Ave	0.008 mi, ENE	EDR Hist Auto
Comments: The site was listed as an Automobile Service station and automobile repair in 1924. In the 1928 Aerial Photograph, the site is vacant land.			

Site Name(s)	Address	Distance	Databases
J-M Tire Service/ J M Cutrate Service	1236 & 1238 S Pacific Avenue	0.018-0.036 mi, NNE	EDR Hist Auto, SWEEPS UST, CA FID UST.
Comments: The site was listed as J-M Cutrate Service for the year 1957 and as J-M Tire Service for the year 1959. No information was located in the SWEEPS UST and CA FID UST databases. The site had been redeveloped into an apartment building in the 1980s. Based on the age of the redevelopment and no reported leaks or spills, this site is not anticipated to impact the subject property at this time.			

Site Name(s)	Address	Distance	Databases
Auto Body Shop	1505-1555 S Pacific Ave	0.109 mi, South	ENVIROSTOR and SEMS-ARCHIVE
<p>Comments: The status of the ENVIROSTOR is Inactive needs evaluation as of 1999. The site is listed as Historical. The Department received a non-emergency hazardous substance release report, dated March 24, 1995. The groundwater at the site is contaminated with trichloroethene. Due to evidence of contamination, the Department recommended that a PEA be conducted and notified the Responsible Part ("RP"), FDIC, in its capacity as receiver for the Bank of San Pedro involuntarily acquired the property as a result of the closure of the Bank on July 15, 1994. No confirmed chemicals of concern were listed; however, several potential COC were listed: Halogenated Organic Compounds, Halogenated Solvents, Hydrocarbon Solvents, Oxygenated Solvents, Unspecified oil containing waste, unspecified solvent mixtures, waste & mixed oil, and organic liquids (nonsolvent with halogens). The site is listed under the name Angel's Auto Service.</p> <p>Based on the topography and distance, and groundwater flow direction listed in the EDR GEOCHECK, this site is not anticipated to impact the subject property at this time.</p>			

Site Name(s)	Address	Distance	Databases
Pacific States Oil Co.	Along 12 th Street between South Gaffey Street and South Grand Avenue	0.191 mi, WNW	ENVIROSTOR
<p>Comments: The case is inactive, needs evaluation (military evaluation) as of 2005. No additional information was located in the database listing or on ENVIROSTOR. The area of the site is a residential neighborhood that includes single family and multi-family properties. Based on the distance to the subject property, no identified chemicals of concern and identified media impacted, this case is not anticipated to impact the subject property at this time.</p>			

The remaining cases listed in the EDR Report were for regulatory database listings, permitted facilities listings, duplicate site listings, closed/remediated cases, and historical database listings; including sites which, based on indicated groundwater directional flow and their distances, are not anticipated to impact the Subject Property.

4.4 Orphan Properties

Three (3) Orphan Sites were reviewed. Of the three sites listed, one site was within the searched radius of the subject property. The site is discussed below:

- Fort Macarthur is located at approximately 0.92 miles to the south of the subject property. The site is listed under the SEMS-ARCHIVE database. No other information was listed for this site.

4.5 Physical Setting Sources

According to the most recent USGS Topographic map covering to subject property and vicinity, the subject site is relatively level and lies at approximately 85 feet above sea-level. The regional topography slopes to the east.

According to EDR GEOCHECK the site is mapped as a Loam soils with a Hydrologic Group Classification of Class Urban Land. Urban Land is defined as soils with variable infiltration rates with an unreported soil drainage class. The corrosion potential versus uncoated steel for the soil is unreported.

Shallow groundwater depth is recorded at 29.76 feet below ground surface approximately 1 mile to the north-northwest. Groundwater flow is not reported.

According to State Database: CA Radon, the subject site is located within zipcode: 90731. Zipcode 90731 had fifty-one (51) tests taken with five (5) above >4 pCi/L. Federal EPA Radon Zone for Los Angeles County is 2. No interior or exterior radon measurements were performed as part of this report.

4.6 Sanborn Insurance Maps

An attempt was made by EDR to obtain Sanborn Insurance Company maps for the period covering the years 1860 through the present in order to determine what types of activities were conducted on the subject property and on adjoining properties. Five Sanborn Maps were found and are discussed below:

1902 SANBORN MAP	
<u>Subject Property</u>	Not Mapped.
<u>North</u>	Not Mapped.
<u>East</u>	Vacant Lot.
<u>West</u>	Not Mapped.
<u>South</u>	Not Mapped.

1908 SANBORN MAP	
<u>Subject Property</u>	Vacant Lot.
<u>North</u>	Vacant Lot.
<u>East</u>	Vacant Lot.
<u>West</u>	Two Dwellings.
<u>South</u>	Vacant Lot.

1921 SANBORN MAP	
<u>Subject Property</u>	Vacant lot.
<u>North</u>	Vacant Lot.
<u>East</u>	Apartment building.
<u>West</u>	Triplex with two detached shed/garages.
<u>South</u>	Vacant Lot and Gasoline & Oil Station.

1950 SANBORN MAP	
<u>Subject Property</u>	1309: Store. 1311: Store with shed on rear of building. 1319: Store. 1321: Restaurant. 1323: Restaurant.
<u>North</u>	Store and Grease (Auto Repair). A gas & oil station appears to be heavily faded on the northeast portion of the property.
<u>East</u>	Paints, Store, Apartment Building, and Market.
<u>West</u>	Triplex with two detached garages.
<u>South</u>	Bowling alley, Restaurant and Store.

1969 SANBORN MAP	
<u>Subject Property</u>	1309: Store. 1311: Store with shed on rear of building. 1319: Store. 1321: Store. 1323: Store.
<u>North</u>	Store with garage.
<u>East</u>	Upholstery, Apartment building and parking lot.
<u>West</u>	Triplex with one detached garage.
<u>South</u>	Bowling alley with restaurant.

4.7 Historical Aerial Photographs

Aerial photographs of the subject property provided by EDR were reviewed as part of this investigation.

Subject Property	Year(s)	Description
	1928	1309-1311: Vacant lot. 1319-1323: A rectangle shaped building extends from the subject street to over midway through the property.
	1947	1309-1311: A rectangle shaped building extends from the subject street to over midway through the property. 1319-1323: Similar as in 1928.

	1952	Similar to 1947.
	1963	1309-1311: Similar to 1947. 1319-1323: A small structure has been added near the west side of the existing structure.
	1972-2016	The subject property consists of two commercial structures along the subject street with rear parking and storage areas.

Property to North	Year	Description
	1928	A small structure is existing on the northeast corner of the property to the north. The rest of the lot is vacant.
	1947	By 1947, a rectangle structure is located along the south property line, adjacent to the subject property. The structure in the northeast corner is existing.
	1952	Similar to 1947.
	1963	The structure in the northeast corner has been removed.
	1972-1981	The property appears similar as it does in 1963.
	1989	The structure along the south property line, adjacent to the subject property has been expanded to the east and north.
	1994-2016	The property to the north appears similar from 1994 to 2016.

Property to South	Year	Description
	1928	1331: The property is vacant land. 1337: The gas station building on the east side of the property is existing. A shed/garage building is located on the west side of the property.
	1947	1331: The existing building has been developed. 1337: The gas station building is existing on the east side of the property and the shed/garage structure is existing on the west side of the property.
	1952	1331: The building appears similar as in 1947. 1337: The gas station building is existing on the east side of the property and the shed/garage structure is existing on the west side of the property
	1963	1331: The building appears similar as in 1947. 1337: The buildings have been removed and the property appears to be a parking lot.

	1972-2016	From 1972 to 2016, the properties building, and parking lot appear similar.
--	-----------	---

Property to East	Year	Description
	1928	The property to the east is a vacant lot.
	1947	By 1947, the property to the east has been developed into a structure that covers most of the property (market).
	1952-1963	The properties to the east of the market building have been demolished and appear to be used as a parking lot.
	1972	By 1972, the market structure has been demolished and autos are parked on the property.
	1977-1981	The property to the east is used a vacant lot used as a parking lot.
	1989	The property to the east has been redeveloped into the existing strip mall with building along the north property line and asphalt parking along the south side of the property.
	1994-2016	The property appears similar from 1994 to 2016.

Property to West	Year	Description
	1928-2016	The property to the west has been used as a residential triplex since at least 1928.

4.8 Historical Topographic Maps

Topographic maps of the subject property provided by EDR were reviewed as part of this investigation.

YEAR(S)	DESCRIPTION.
1896	The topography in 1896 trends to the east-southeast, the elevation in the area of the subject site approximately 85'. The site appears to be undeveloped land on the west side of the town of San Pedro. The subject street is existing.
1923, 1925	By 1920, a structure is mapped to the south of the subject property.
1944, 1946	The area of the subject property is mapped as urban developed.
1951	The topography trends to the east-southeast and the elevation of the subject property is approximately 81'.
1964, 1972, 1981	Appears similar to previous date.
2012	The Topography appears similar to previous years and trends to the east-southeast. The elevation of the subject property is approximately 85'.

These maps are included in the Appendix.

4.9 City Directories

A search of local historical city directories was conducted by EDR for the subject property. The review included directories in five-year intervals from 1920 to 2014 (as available). Additionally 1311 was located in a search of the City of Los Angeles Public Library Directory.

- 1309 South Pacific Avenue (Subject Property):

YEAR(S)	LISTED USES.
1935	R.
1950-2010	La Rue Pharmacy.

- 1311 South Pacific Avenue (Subject Property):

YEAR(S)	LISTED USES.
1946	Paramount Laundry (City of Los Angeles Public Library).
1950, 1954, 1957	Los Angeles Harbor Clnrs, Paramount Laundry.
1960	Collins Ernest R., United Vending Serv.
1980	Holloway Arthur C.
2001	XXXX.
2010, 2014	Formiller Steve.

- 1311 1/2 South Pacific Avenue (Subject Property):

YEAR(S)	LISTED USES.
1950-1970	Collins Ernie Watch & Jewelry Repairing.

No additional records were identified for the subject property based on the address provided. The surrounding properties are listed in detail in the attached Directory Search.

4.10 Building Records

1309-1311 SOUTH PACIFIC AVENUE	
DATE OF PERMIT	PERMIT
1932	New Construction Permit. Use: Store.
1938	Roof Sign – Pacific Pharmacy.
2000	Alterations – Tenant Improvement.

1319-1323 SOUTH PACIFIC AVENUE	
DATE OF PERMIT	PERMIT
1924	New Construction. Store with 3 rooms.
1932	Alteration. Change Stone Front, move door to south side of building.
1936	Skylight
1961	Addition – Building on west side of Store building - Food Storage Use.
1961	Certificate of Occupancy. One-Story – 12' by 14' for Storage.
1963	Addition – Café.
2004	Remodel.

2007	Certificate of Occupancy - Change of Use – Retail to Office/Storage.
2012	Certificate of Occupancy - Change of Use – Retail to Office/Storage.

Based on the aerial photos, topographic maps of the site and the assessor records, the subject properties' building was constructed circa 1924 and 1932.

5.0 SUBJECT PROPERTY RECONNAISSANCE

A visual reconnaissance of the subject property was conducted on Thursday, December 20, 2018 by Mr. Paul Robinson. Photographs of the subject property are attached to this report in Appendix.

5.1 Methodology and Limiting Conditions

The periphery of the subject property was inspected. A detailed inspection was conducted of all major site features visible from the public portions of the property.

5.2 Subject Property Reconnaissance

Observations made during the site visit are summarized in the following table:

SITE VISIT OBSERVATIONS			
Current Use of Property	1309 is currently used for storage by the owner and wood working company. 1311 is currently used by a woodworking company. 1319 is currently a vacant office space. A storage space in the west portion of the property is used for storage for the Enigma Bar. 1321 is currently used as office for the property owner and additional storage for the Enigma Bar. 1323 – Enigma Bar.		
Evidence of Past Uses of Property?	No past use is identifiable.		
Potable Water Source	City Water.		
Sewage Disposal Source	City Sewer.		
Topography of property and vicinity	Relatively level		
Current use of adjoining properties	NORTH: 1301 S Pacific Avenue – Rolling Tires & Wheels (Auto Repair). WEST: Residential Triplex. EAST: Apartment building and strip mall (various businesses). SOUTH: Vacant dance hall/bar.		
Past Uses of Surrounding Properties?	Property to the south was a dance hall.

5.3 Detailed Observations

Odors - Indoor and Visible Emissions

No unusual smells, obnoxious odors, or visual emissions were observed during the inspection of the subject property.

Asbestos-Containing Material (ACM)

Asbestos-containing building materials were banned in 1978 by the federal government. The buildings were constructed in 1924 and 1932; therefore, the potential of Asbestos being present at the subject site is very high. No sampling was performed as this was outside the limits of the current contract.

Lead-Based Paint (LBP)

In 1978, the federal government banned the use of lead-based paint in residential applications. The buildings were constructed in 1924 and 1932; therefore, the potential of lead-based paint being present at the subject site is very high. No sampling was performed as this was outside the limits of the current contract.

Polychlorinated Biphenyl (PCB's)

PCB manufacturing in the United States was discontinued in 1978. Pole-mounted transformers were found in the vicinity of the subject site building, appearing in good condition without any sign of leakage.

Pools of Liquid of Chemicals

No pools or excessive ponding of liquid or chemicals were observed during the visual site inspection.

Underground Storage Tank (UST)

The visual inspection of the subject site revealed no evidence of surface or above ground (e.g., fill pipe, vent pipes, fill connections, concrete pads, saw cuts, sumps, spill containment device, leak detection device, etc.) features normally associated with underground storage tanks (UST's).

Aboveground Storage Tank

The visual inspection of the subject site revealed no evidence of surface or above ground (e.g., fill pipe, vent pipes, fill connections, concrete pads, saw cuts, concrete pad, drains in vicinity, etc.) features normally associated with aboveground storage tanks (AST's). Visual observation also includes the inspection to identify any surface markings indicating the existence of aboveground product pipelines. No evidence for the presence of on-site aboveground storage tank was identified.

Fuel Islands

The visual inspection of the subject site revealed no evidence of fuel islands or dispensers either in operation or abandoned.

Hydraulic Hoist Unit

The visual inspection of the subject site revealed no presence of underground hydraulic hoist units within the subject site premise.

Hazardous Materials/Petroleum Products Storage & Handling

During the visual site inspection, no containers storing automotive or industrial batteries, pesticides, paints or chemicals, seemingly exhibiting toxic hazards were observed. No significant oil or chemical staining was observed to be present around any containers.

Other Containers

No other containers indicating any sign of environmental concern were observed during the site inspection.

Hazardous Waste Treatment, Storage, Disposal (TSD)

No storage, treatment, or disposal of hazardous waste was found during the visual site inspection.

Major Spills, Leaks or Staining

No major spills, leakage, or staining were observed throughout the overall building areas and outdoor grounds.

Distress Vegetation

Planters and vegetation in the vicinity of and within the subject site were found well maintained on bare soil or within separate planters in relatively good appearance with no sign of chemical stress or unnatural appearance.

Stockpiled Soils

The site inspection did not reveal any evidence of stockpiled soils on the ground of subject property.

Wastewater Treatment Unit/Clarifier

No underground industrial wastewater treatment facility, i.e., clarifier was observed on the subject property during the site visit.

Storm water drainage system in the close proximity of the subject area did not identify any abnormal accumulation of petroleum or chemical run-off or foreign materials. No unusual blockage of the storm-water control system was observed during visual site inspection on the outdoor parking lot or surface areas.

Solid Waste Disposal

There were no observations of improper activities of treatment or disposal of hazardous, medical, or toxic wastes being performed at the subject site.

Wells

The site walk-through did not discover any irrigation wells, injection wells, abandoned wells, groundwater monitoring wells, dry wells, septic wells, oil wells, gas wells, domestic water wells, or other monitoring wells on the subject site premise.

Underground Pipelines

The visual site inspection did not reveal any evidence of underground pipelines beneath the ground of the subject property, other than public utility lines such as sewer, power, and electric lines, for which public "dig-alert" service would easily identify upon 48-hour telephone notice in advance.

Pits, Ponds, Lagoons

No visible evidence of wetlands, such as pits, ponds, lagoons, or any other water bodies, was observed within the subject property's boundary lines.

Herbicides/Pesticides

No evidence of herbicide or pesticide use on the subject property was observed during the visual site inspection.

6.0 INTERVIEWS

An attempt has been made to obtain historical as well as current information relative to the subject property from several individuals and local agencies. The objective of the interview process is to obtain any information indicating recognized environmental conditions in connection with the subject site.

6.1 Interview with Owner or Site Manager

An Environmental Questionnaire and Disclosure Statement were sent to Mr. Adam O'Neill, on Friday, December 14, 2018. As of the date of this report, the questionnaire has not been returned.

During the visual site inspection, Mr. Eangelos Bitsakis (Current owner of 1319-1323 South Pacific Avenue, stated he bought the property in 2003. A fire occurred in 2005 at 1923 South Pacific Avenue (Enigma Bar), which damaged much of the 1319, 1321, and 1323 South Pacific Avenue. The damage was repaired after the fire.

6.2 Interview with Local Government Officials

County Environmental Health Department

The Los Angeles County Public Works, Online File Review for Industrial Water, Underground Storage Tanks and Stormwater Prevention, was reviewed for the subject property addresses. No records were found.

City of Los Angeles Fire Department

The City of Los Angeles now only accepts record requests if the site has a facility ID. The City of Los Angeles Fire Department provides Listing Sheets for inactive, active and historical sites for review.

Underground Storage Tank Division Active and Inactive Underground Storage Tank Listing Sheets were reviewed for the subject addresses. The addresses were not found.

The City of Los Angeles Fire Department Active and Inactive Hazardous Materials Site Listing Sheets were reviewed for the subject addresses. The addresses were not found.

The City of Los Angeles Fire Department Active and Inactive Aboveground Storage Tank Facility Listing Sheets were reviewed for the subject addresses. The addresses were not found.

The City of Los Angeles Fire Department Historical Underground Storage Tank Listing Sheets were reviewed for the subject addresses. The addresses were not found.

Additionally, the listing sheets were reviewed for address 1301 South Pacific Avenue (adjacent property to the north). The address was found under ID FA0017610. An Official Inspection Report for the Hazardous Materials Business Plan was provided by the City of Los Angeles Fire Department. The record is dated October 8, 2015 and lists the name as Sam's Auto Repair. CERS ID 10246612. No violations were noted.

GEOTRACKER/ENVIROSTOR Database Review

The GEOTRACKER database and the ENVIROSTOR database were reviewed for any additional information available in regards to the subject property. No additional information was located for the subject property. Additional information was located for the cases listed in the EDR Radius Report and are discussed in Section 4.3.

Interview with Others

No additional interviews were conducted in this assessment.

7.0 EVALUATIONS

7.1 Findings

- 1) **Site Legal Description:** The subject property consists of two parcels, located at 1309, 1311, 1311 ½, 1319, 1321, and 1323 South Pacific Avenue, Los Angeles, CA 90731. The property is identified by the Assessor's Parcel Numbers (APNs) 7454026011 and 7454026012.
- 2) **1309-1311 South Pacific Avenue:** Prior to 1932, the subject property was vacant land. In 1932, the existing structure was constructed.
 - **1309 South Pacific Avenue:** In 1938, the unit was listed under the name Pacific Pharmacy. From 1950 to 2010 the unit was listed under the name La Rue Pharmacy. Currently the unit is used for storage by the property owner and The Woodsman, a woodworking company.
 - **1311 South Pacific Avenue:** From 1946 to 1957 the unit was listed under the names Los Angeles Harbor Cleaners and Paramount Laundry. In 1960, it was listed under the name Ernest R Collins and United Vending Service. In 1980 it was listed under the name Arthur C. Holloway and from 2010 to 2014 it was listed under the name Steve Formiller. The unit is currently used by The Woodsman, a woodworking company.
 - **1311 ½ South Pacific Avenue** was listed as Ernie Collins, Watch & Jewelry Repairing from 1950 to 1970.
- 3) **1319-1323 South Pacific Avenue:** Prior to 1924, the subject property was vacant land. In 1924 the existing building was constructed.
 - **1319 South Pacific Avenue:** From 1924 to 1950 the building was used as a store. From 1950 to 1970, the unit was listed under the name San Pedro Pet Shop. In 1985, it was listed under the name G & M Recycling Jeans, and from 1990 to 1995 it was listed under the name Alamo Video. The unit is currently a vacant office space.
 - **1321 South Pacific Avenue:** The unit was listed as Madame Café from 1950 to 1985. In 1991 it was listed as Taqueria Azteca, and in 1995 it was listed as Golden House Chinese Restaurant. In 2003, Mr. Eangelos Bitsakis purchased the property. From 2010 to 2014, the site was listed under the name Bitsakis E Painting, Inc. Currently the unit is an office space for the current owner of the subject property Mr. Eangelos Bitsakis.
 - **1323 South Pacific Avenue:** From 1950-1985, the unit was listed under the name The Barrel House. In 2001, it was listed under the name Rose Room. Currently the unit is used as a bar "Enigma Bar".
- 4) **Site Observations:** No significant staining was observed throughout the indoor and outdoor grounds of the subject property.

- 5) **Summary of Historical Maps and Aerial Photographs:** Based on the aerial photos and topographic maps of the site, as well as the assessor records, the subject property's buildings were constructed circa 1924 and 1932.
- 6) **Local Records Review:** No records were found for the subject site with the City of Los Angeles Fire Department Underground Storage Tank Division and Hazardous Material Division.
- 7) **EDR Findings for Subject Site:** The subject property was not listed in Environmental Records Sources searched.
- 8) **EDR Radius Report Findings:**

EDR reports one (1) SEMS-ARCHIVE site within the searched parameters of the subject property.
EDR reports twelve (12) RCRA-SQG sites within the searched parameters of the subject property.
EDR reports three (3) RESPONSE sites within the searched parameters of the subject property.
EDR reports eleven (11) ENVIROSTOR sites within the searched parameters of the subject property.
EDR reports sixteen (16) LUST sites within the searched parameters of the subject property.
EDR reports two (2) CPS-SLIC sites within the searched parameters of the subject property.
EDR reports two (2) UST sites within the searched parameters of the subject property.
EDR reports one (1) HIST Cal-Sites site within the searched parameters of the subject property.
EDR reports one (1) SCH sites within the searched parameters of the subject property.
EDR reports twelve (12) SWEEPS UST sites within the searched parameters of the subject property.
EDR reports twelve (12) HIST UST sites within the searched parameters of the subject property.
EDR reports thirteen (13) CA FID UST sites within the searched parameters of the subject property.
EDR reports one (1) DOD site within the searched parameters of the subject property.
EDR reports one (1) UXO site within the searched parameters of the subject property.
EDR reports one (1) CA BOND EXP. PLAN site within the searched parameters of the subject property.
EDR reports seven (7) HIST CORTESE sites within the searched parameters of the subject property.
EDR reports one (1) EDR MGP site within the searched parameters of the subject property.
EDR reports eight (8) EDR Hist Auto sites within the searched parameters of the subject property.
EDR reports three (3) EDR Hist Cleaner sites within the searched parameters of the subject property.
The Orphan Site List was Review. Three (3) Orphan Sites were reviewed. Of the three sites listed, one site was within the searched radius of the subject property.

7.2 Opinions

- 9) **Recognized Environmental Conditions:** 1311 South Pacific Avenue was used as a Drycleaners and Laundromat from 1946 (possibly earlier) to 1957. Based on the use of the site is a Drycleaners prior to regulatory oversight by the City of Los Angeles Fire Department, this constitutes a potential release to the environmental.
- 10) **Environmental Business Risks:** Based on the age of the structures on the subject property, the potential presence for asbestos containing material (ACM) and lead based paint to be on the subject property is high.
- 11) **EDR Radius Report Review:** The cases listed in the EDR report are not anticipated to impact the subject property at this time, based on the type of listings, distance to the subject site, and additional information located in Geotracker and EnviroStor databases.

7.3 Conclusions

12) We have performed a Phase 1 Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 for the subject property, which consists two parcels, located at 1309, 1311, 1311 ½, 1319, 1321, and 1323 South Pacific Avenue, Los Angeles, CA 90731. The property is identified by the Assessor's Parcel Numbers (APNs) 7454026011 and 7454026012. The subject property was not listed in the Environmental Records Sources searched. Any exceptions to, or deletions from, this practice are described in the Limitations Section of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property, except for the following:

- The historical records indicate that a Drycleaners operated in unit 1311 South Pacific Avenue from 1946 to 1957; possibly earlier; therefore, the use of Drycleaning chemicals prior to LAFD regulatory oversight, constitutes a potential release.

7.4 Recommendations

A limited subsurface soil and soil vapor investigation is recommended in 1311 South Pacific Avenue unit to determine if the historical use of the site as a Drycleaners has impacted the subject property.

7.6 Professional Signature

According to Code of Federal Regulations CFR - Title 40 §312.10, Environmental Professional is defined as:

"(1) a person who possess sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases (see §312.1(c)) on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20(e) and (f).

(2) Such a person must:

(i) hold a current professional engineer's or Professional Geologist's license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of three (3) years of full-time relevant experience; or

(ii) Be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries as defined in §312.21 and have the equivalent of three (3) years of full-time relevant experience; or

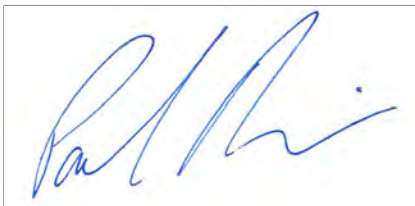

(iii) Have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of five (5) years of full-time relevant experience; or

(iv) Have the equivalent of ten (10) years of full-time relevant experience".

We declare to the best of our professional knowledge and belief, we have met the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

It has been a pleasure to be of service. If any questions arise, please contact our office.

Sincerely,

Paul J. Robinson
Environmental Professional
Priority One Environmental, Inc.

8.0 NON-SCOPE SERVICES

No additional services as listed in the ASTM Standard 1527-13 have been requested in writing and placed under contract in regards to this assessment. Including, but not limited to Asbestos testing of material at the site, and drug lab uses of the site.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Priority One Environmental, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:**Coordinates:**

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

EXECUTIVE SUMMARY

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 11/14/2018 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 12 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/29/2018 has revealed that there are

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there is 1 HIST Cal-Sites site within approximately 1 mile of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 12 SWEEPS UST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
EDISON/SAN PEDRO MGP	SANTA CRUZ, CENTRE A	NNE 1/2 - 1 (0.834 mi.)	77	202

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 8 EDR Hist Auto

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

AIR EMISSIONS CLASSIFICATION UNKNOWN

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 09/20/1996
Comments: A Preliminary Assessment was completed under U.S. EPA grant. The site does not qualify for further remedial assessment under CERCLA (Site Evaluation Accomplished), however, PEA is recommended.
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 05/17/1995
Comments: The Department received a non-emergency hazardous substance release report dated March 24, 1995. The groundwater at the site is contaminated with trichloroethene. Due to evidence of contamination, the Department recommended that a PEA be conducted and notified the RP. FDIC, in its capacity as a Receiver for the Bank of San Pedro, involuntarily acquired the property as a result of the closure of the Bank on July 15, 1994.

FINDS:

Registry ID: 110002681786

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Historical Generators:

Date form received by agency: 03/31/2004

Site name: LAUSD--FIFTEENTH ST. ELEM
Classification: Large Quantity Generator

. Waste code: D001

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D001

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002740071

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002721056

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

S101480929

effective in protecting human health and the environment, and DTSC acknowledged the recommendations made with comments. The remedy included thermal treatment of soils, soil cover above the remediated soils, land use restrictions, site security, and continued groundwater monitoring. In addition, DTSC provided comments on the report requesting Kinder Morgan ensure the comments be properly addressed in the next Five-Year Review activities and report, due by August 3, 2009.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 10/11/2000
Comments: The revised "Five-Year Review Report," dated July 21, 2000, was submitted by GATX. The Site remedy included thermal treatment of soils, soil cover above the remediated soils, land use restrictions, site security, and continued groundwater monitoring. In a letter, dated October 11, 2000, DTSC found the report acceptable with notes and conditions, including that deficiencies regarding the soil cover are currently being addressed by GATX, groundwater monitoring will continue annually beginning April 2001, and the next Five-Year Review Report is due by August 1, 2004.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 07/27/2006
Comments: In a response letter, dated July 27, 2006, DTSC expressed it did not have any comments on the "Annual Groundwater Monitoring Report, April 2006," dated June 23, 2006. However, in that same letter, DTSC expressed concern of potential impacts to the Site due to potential contamination from the Warehouse 12 property, located east and directly adjacent to the Site, and requested information regarding the investigation of that property be submitted to DTSC.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 02/23/1996
Comments: "Final Post Remedial Groundwater Report" is an acceptable document which summarized the groundwater monitoring work performed after the soil remediation. This document supports continued groundwater monitoring pursuant to the RAP and Modified RAP.

Completed Date: 03/05/1987
Comments: In a letter, dated March 5, 1987, DHS approved a draft Community Relations Plan, dated January 28, 1987. Subsequently, a Final Community Relations Plan, dated March 11, 1987, was submitted to DHS.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 08/03/2006
Comments: In a letter, dated July 13, 2006, DTSC provided POLA with comments on the "2005 - 2006 Annual Report," dated June 30, 2006, and requested a response. POLA responded to DTSC with a letter, dated July 27, 2006. In a letter, dated August 3, 2006, DTSC provided a response to POLA specifically addressing concern regarding potential impacts due to bunker fuel oil in a groundwater monitoring well on the Warehouse 12 property, located adjacent to the Site.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 09/09/2005
Comments: In a letter, dated September 9, 2005, DTSC recommended POLA ensure that an opening in the perimeter fence is / has been properly fixed.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 10/11/2005
Comments: In a letter, dated October 11, 2005, DTSC provided comments on the

report and requested Kinder Morgan ensure the comments be properly addressed in the next annual groundwater monitoring report.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 07/20/2004
Comments: DTSC did not have any significant comments on the report per its letter, dated July 20, 2004.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 08/06/2004
Comments: In a letter, dated August 6, 2004, DTSC provided comments on the report and requested Kinder Morgan ensure the comments be properly addressed in the next annual groundwater monitoring event and report.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 10/03/2003
Comments: DTSC did not have any significant comments on the report per its letter, dated October 3, 2003.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 12/19/2003
Comments: In a letter, dated 12/19/2003, DTSC retracted its previous determination based on the errata pages provided; thus, the April 2003 groundwater analytical results may be used quantitatively.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 01/10/2003
Comments: DTSC reviewed the response to comments, which were acceptable, but did not provide a response to POLA.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 01/18/2002
Comments: In a letter, dated January 18, 2002, DTSC provided comments on the report requesting POLA address the comments in future annual reports; DTSC also provided a status on the soil cover upgrade activities performed in December 2000 and October 2001 by Kinder Morgan as the soil cover did not meet the original design specifications.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 01/31/2003
Comments: DTSC reviewed the response to comments, which were acceptable, but did not provide a response letter to Kinder Morgan

GATX ANNEX TERMINAL-SAN PEDRO (Continued)

S101480929

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 01/29/2002
Comments: In a letter, dated January 2, 2002, DTSC determined that the April 2001 groundwater analytical results are unacceptable, due to incorrect procedures resulting in questionable results, and requested another sampling event be performed in January 2002. In a letter, dated January 29, 2002, DTSC granted an extension until February 28, 2002 to perform the sampling event.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan
Completed Date: 06/27/1996
Comments: DTSC approved the "Operation and Maintenance Plan," dated June 24, 1996, for continued groundwater monitoring for at least three years, with quarterly sampling the first year (beginning July 1996) and semi-annual sampling the following two years (ending April 1999).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 06/11/2001
Comments: In a letter, dated June 11, 2001, DTSC was notified that GATX Terminal Corporation was acquired by Kinder Morgan Operating L.P. on March 1, 2001. Kinder Morgan assumed GATX's environmental liability for this project.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 07/13/1987
Comments: DTSC approved a RAP, with modifications, to implement an insitu hot air/steam stripping cleanup alternative to treat soils contaminated with volatile organic compounds. The RP completed pilot tests using the innovative technology. During intial tests, semi-volatile organic compounds were discovered requiring a change in cleanup levels specified in the RAP. Additional site characterization activities and a Risk Assessment were performed.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Risk Assessment Report
Completed Date: 05/17/1995
Comments: An Addendum to the Human Health and Ecological Risk Assessment was acceptable to DTSC; this Risk Assessment pertained to groundwater only.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 09/28/1999
Comments: In a letter, dated September 28, 1999, DTSC determined that all analytical results from the April 1999 sampling event should be regarded only qualitatively, due to significant deviations from the sampling and analysis plan. DTSC also provided comments which should

Map ID

be addressed in future groundwater sampling events and respective reports.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 08/07/2002

Comments: In a letter, dated August 7, 2002, DTSC notified POLA of its violations regarding the soil cover (based on verbal notification from POLA on July 30, 2002) and late submittal of the annual report and specified the action to be taken. POLA responded in a letter, dated August 12, 2002.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 10/03/2003

Comments: DTSC acknowledged that POLA's violation of the Agreement regarding the soil cover in July 2002 appeared to be adequately corrected. This determination was based on the information presented in the "Trench Backfilling and Soil Cover Restoration Final Report," dated April 6, 2003, as amended by POLA's letter, dated May 30, 2003

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 04/28/2004

Comments: A public notice announcing commencement of the second Five-Year Review activities was printed in the Daily Breeze newspaper.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan
Completed Date: 07/25/2000

Comments: The First Amendment to the 1994 Agreement between DTSC and the Port of Los Angeles became effective. The amendment primarily added operation and maintenance responsibilities of the soil cover and included details of the associated O&M activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 02/21/2005

Comments: A public notice announcing the completion of the second Five-Year Review was published in The Daily Breeze on February 21, 2005.

Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 08/16/2010
Comments: Document accepted with comments. No revisions to the report are necessary at this time, but a response letter will be submitted to address two minor comments.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 04/20/2011
Comments: Response to Comments document addressed all comments and therefore the 2010 Annual Groundwater Monitoring Report is approved.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 01/03/2011
Comments: Document approved. Minor comments made and a revised table of boring logs indicated in DTSC letter is to be sent for the file.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 08/04/2011
Comments: Document accepted. DTSC concurs with results of the Report and continued GW monitoring is recommended.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 07/05/2011
Comments: Document accepted. There were no violations of the provisions in the Land Use Covenant for the Site. The site was adequately maintained. The next Annual Inspection Report is due by the end of June 2012.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 01/07/2011
Comments: Public Notice published in Daily Breeze newspaper on January 7, 2011. 5-year Review has been completed.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 11/28/1990
Comments: Document received

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 04/19/1990
Comments: document received

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 12/19/2012
Comments: Document accepted with minor revisions. Final report will be uploaded once revisions have been made.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 09/15/1994
Comments: An agreement between DTSC and the Port of Los Angeles became effective; this agreement pertains to land use restrictions. The document was not recorded with the County Recorder's Office.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operation & Maintenance Order/Agreement
Completed Date: 07/25/2000
Comments: The First Amendment to the 1994 Agreement between DTSC and the Port of Los Angeles became effective. The amendment includes operation and maintenance responsibilities of the soil cover.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operation & Maintenance Order/Agreement
Completed Date: 01/09/1997
Comments: An operation and maintenance agreement between DTSC and GATX became effective; this agreement pertains to groundwater monitoring.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 05/28/2002
Comments: DTSC certified that all appropriate removal/remedial action have been completed and that all acceptable engineering practices were implemented at the site; however, on-going operation and maintenance and monitoring efforts are required.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Order
Completed Date: 03/17/1987
Comments: Consent Order entered between GATX and DHS (predecessor to DTSC) to investigate nature and extent of contamination and take appropriate remedial action.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 07/14/2006
Comments: On July 14, 2006, a Site Visit Form for Deed Restriction, which documents the observations made on a site inspection on July 13, 2006, was signed by the unit chief. Overall, the site remained undeveloped with no appearance of any uses or building structures, and the soil cover appeared to be in good condition.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 07/25/2000
Comments: The First Amendment to the 1994 Agreement between DTSC and the Port of Los Angeles became effective. The amendment primarily added operation and maintenance responsibilities of the soil cover but also revised sections of the agreement pertaining to land use restrictions. The document was not recorded by the County but is to be on file with offices at POLA.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 01/26/2005
Comments: The "Second Five-Year Review Report," dated September 7, 2004, was submitted by Kinder Morgan. In a letter, dated January 26, 2005, DTSC concurred that the remedy implemented at the Site appears to remain effective in protecting human health and the environment, and DTSC acknowledged the recommendations made with comments. The remedy included thermal treatment of soils, soil cover above the remediated soils, land use restrictions, site security, and continued groundwater monitoring. In addition, DTSC provided comments on the report requesting Kinder Morgan ensure the comments be properly addressed in the next Five-Year Review activities and report, due by August 3, 2009.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 10/11/2000
Comments: The revised "Five-Year Review Report," dated July 21, 2000, was submitted by GATX. The Site remedy included thermal treatment of soils, soil cover above the remediated soils, land use restrictions, site security, and continued groundwater monitoring. In a letter, dated October 11, 2000, DTSC found the report acceptable with notes and conditions, including that deficiencies regarding the soil cover are currently being addressed by GATX, groundwater monitoring will continue annually beginning April 2001, and the next Five-Year Review Report is due by August 1, 2004.

Comments: In a response letter, dated July 27, 2006, DTSC expressed it did not have any comments on the "Annual Groundwater Monitoring Report, April 2006," dated June 23, 2006. However, in that same letter, DTSC expressed concern of potential impacts to the Site due to potential contamination from the Warehouse 12 property, located east and directly adjacent to the Site, and requested information regarding the investigation of that property be submitted to DTSC.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 02/23/1996
Comments: "Final Post Remedial Groundwater Report" is an acceptable document which summarized the groundwater monitoring work performed after the soil remediation. This document supports continued groundwater monitoring pursuant to the RAP and Modified RAP.

Completed Document Type: Public Participation Plan / Community Relations Plan
Completed Date: 03/05/1987
Comments: In a letter, dated March 5, 1987, DHS approved a draft Community Relations Plan, dated January 28, 1987. Subsequently, a Final Community Relations Plan, dated March 11, 1987, was submitted to DHS.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 08/03/2006
Comments: In a letter, dated July 13, 2006, DTSC provided POLA with comments on the "2005 - 2006 Annual Report," dated June 30, 2006, and requested a response. POLA responded to DTSC with a letter, dated July 27, 2006. In a letter, dated August 3, 2006, DTSC provided a response to POLA specifically addressing concern regarding potential impacts due to bunker fuel oil in a groundwater monitoring well on the Warehouse 12 property, located adjacent to the Site.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 09/09/2005
Comments: In a letter, dated September 9, 2005, DTSC recommended POLA ensure that an opening in the perimeter fence is / has been properly fixed.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 10/11/2005
Comments: In a letter, dated October 11, 2005, DTSC provided comments on the report and requested Kinder Morgan ensure the comments be properly addressed in the next annual groundwater monitoring report.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 07/20/2004
Comments: DTSC did not have any significant comments on the report per its letter, dated July 20, 2004.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 08/06/2004
Comments: In a letter, dated August 6, 2004, DTSC provided comments on the report and requested Kinder Morgan ensure the comments be properly addressed in the next annual groundwater monitoring event and report.

Completed Document Type: Operations and Maintenance Report
Completed Date: 12/19/2003
Comments: In a letter, dated 12/19/2003, DTSC retracted its previous determination based on the errata pages provided; thus, the April 2003 groundwater analytical results may be used quantitatively.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 01/10/2003
Comments: DTSC reviewed the response to comments, which were acceptable, but did not provide a response to POLA.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 01/18/2002
Comments: In a letter, dated January 18, 2002, DTSC provided comments on the report requesting POLA address the comments in future annual reports; DTSC also provided a status on the soil cover upgrade activities performed in December 2000 and October 2001 by Kinder Morgan as the soil cover did not meet the original design specifications.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 01/31/2003
Comments: DTSC reviewed the response to comments, which were acceptable, but did not provide a response letter to Kinder Morgan

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 01/29/2002
Comments: In a letter, dated January 2, 2002, DTSC determined that the April 2001 groundwater analytical results are unacceptable, due to incorrect procedures resulting in questionable results, and requested another sampling event be performed in January 2002. In a letter, dated January 29, 2002, DTSC granted an extension until February 28, 2002 to perform the sampling event.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan
Completed Date: 06/27/1996
Comments: DTSC approved the "Operation and Maintenance Plan," dated June 24, 1996, for continued groundwater monitoring for at least three years, with quarterly sampling the first year (beginning July 1996) and semi-annual sampling the following two years (ending April 1999).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 06/11/2001
Comments: In a letter, dated June 11, 2001, DTSC was notified that GATX Terminal Corporation was acquired by Kinder Morgan Operating L.P. on March 1, 2001. Kinder Morgan assumed GATX's environmental liability

for this project.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 07/13/1987
Comments: DTSC approved a RAP, with modifications, to implement an insitu hot air/steam stripping cleanup alternative to treat soils contaminated with volatile organic compounds. The RP completed pilot tests using the innovative technology. During intial tests, semi-volatile organic compounds were discovered requiring a change in cleanup levels specified in the RAP. Additional site characterization activities and a Risk Assessment were performed.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Risk Assessment Report
Completed Date: 05/17/1995
Comments: An Addendum to the Human Health and Ecological Risk Assessment was acceptable to DTSC; this Risk Assessment pertained to groundwater only.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 09/28/1999
Comments: In a letter, dated September 28, 1999, DTSC determined that all analytical results from the April 1999 sampling event should be regarded only qualitatively, due to significant deviations from the sampling and analysis plan. DTSC also provided comments which should be addressed in future groundwater sampling events and respective reports.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 08/07/2002
Comments: In a letter, dated August 7, 2002, DTSC notified POLA of its violations regarding the soil cover (based on verbal notification from POLA on July 30, 2002) and late submittal of the annual report and specified the action to be taken. POLA responded in a letter, dated August 12, 2002.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 10/03/2003
Comments: DTSC acknowledged that POLA's violation of the Agreement regarding the soil cover in July 2002 appeared to be adequately corrected. This determination was based on the information presented in the "Trench Backfilling and Soil Cover Restoration Final Report," dated April 6, 2003, as amended by POLA's letter, dated May 30, 2003

GATX ANNEX TERMINAL-SAN PEDRO (Continued)

S101480929

Comments: A public notice announcing commencement of the second Five-Year Review activities was printed in the Daily Breeze newspaper.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan
Completed Date: 07/25/2000
Comments: The First Amendment to the 1994 Agreement between DTSC and the Port of Los Angeles became effective. The amendment primarily added operation and maintenance responsibilities of the soil cover and included details of the associated O&M activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 02/21/2005
Comments: A public notice announcing the completion of the second Five-Year Review was published in The Daily Breeze on February 21, 2005.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 09/18/2007
Comments: Not reported

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 10/29/2007
Comments: Report approved.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 09/28/2006
Comments: DTSC provided a response letter to Kinder Morgan, dated September 28, 2006, with comments on the URS letter, dated August 25, 2006, regarding information on the groundwater monitoring well MW-3 issue, located on the Warehouse 12 property as it relates to the Site. In the letter, DTSC did not require a response to the comments and reiterated its request that appropriate information regarding the bunker fuel free product in well MW-3 be provided to DTSC in a timely fashion.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Workplan
Completed Date: 04/22/2004
Comments: In a letter, dated April 22, 2004, DTSC found that the "Five-Year Review Report Workplan," dated March 26, 2004, is conditionally acceptable provided specific comments be incorporated during Five-Year Review activities. The Five-Year Review Report is due by June 21, 2004. In a letter, dated June 23, 2004, DTSC granted the RP's request to submit the Five-Year Review Report by September 6, 2004.

Completed Date: 11/12/2008
Comments: Groundwater Monitoring Report for 2008 accepted.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 09/26/2008
Comments: Annual Inspection Report approved.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: *Correspondence - Received
Completed Date: 05/09/2008
Comments: Correspondence received from URS Corporation

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 10/15/1992
Comments: Remediation of soils contaminated with volatile and semi-volatile organic compounds using the innovative in-situ hot air/steam stripping technology. The remedy included a soil cover which was placed over remediated portions of the site in 1993.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Workplan
Completed Date: 09/16/2009
Comments: 5 year review workplan accepted. Requested sampling can be done following the 5 year review activities.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 09/02/2009
Comments: Document accepted

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

Comments: Workplan approved

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: *Correspondence - Received
Completed Date: 06/23/2010
Comments: Correspondence Received. Letter outlines discussion and decisions made regarding groundwater well installation location during at 6/22 conference call.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 08/16/2010
Comments: Document accepted with comments. No revisions to the report are necessary at this time, but a response letter will be submitted to address two minor comments.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 04/20/2011
Comments: Response to Comments document addressed all comments and therefore the 2010 Annual Groundwater Monitoring Report is approved.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 01/03/2011
Comments: Document approved. Minor comments made and a revised table of boring logs indicated in DTSC letter is to be sent for the file.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 08/04/2011
Comments: Document accepted. DTSC concurs with results of the Report and continued GW monitoring is recommended.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 07/05/2011
Comments: Document accepted. There were no violations of the provisions in the Land Use Covenant for the Site. The site was adequately maintained. The next Annual Inspection Report is due by the end of June 2012.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 01/07/2011
Comments: Public Notice published in Daily Breeze newspaper on January 7, 2011. 5-year Review has been completed.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 09/15/1994
Comments: An agreement between DTSC and the Port of Los Angeles became effective; this agreement pertains to land use restrictions. The document was not recorded with the County Recorder's Office.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operation & Maintenance Order/Agreement
Completed Date: 07/25/2000
Comments: The First Amendment to the 1994 Agreement between DTSC and the Port of Los Angeles became effective. The amendment includes operation and maintenance responsibilities of the soil cover.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operation & Maintenance Order/Agreement
Completed Date: 01/09/1997
Comments: An operation and maintenance agreement between DTSC and GATX became effective; this agreement pertains to groundwater monitoring.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 05/28/2002
Comments: DTSC certified that all appropriate removal/remedial action have been completed and that all acceptable engineering practices were implemented at the site; however, on-going operation and maintenance and monitoring efforts are required.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Order
Completed Date: 03/17/1987
Comments: Consent Order entered between GATX and DHS (predecessor to DTSC) to investigate nature and extent of contamination and take appropriate remedial action.

Background Info: The GATX Annex Terminal site is located adjacent to the Los Angeles Harbor in San Pedro. The site was used for storage and transport of at least 60 different chemicals in above ground tanks from 1968 to 1983. During the course of operation, spillages occurred. In 1972, GATX had a fire which destroyed 17 above ground tanks. The fire and operational spillages have resulted in significant soil and groundwater contamination. The site was decommissioned between 1983 and 1984. During this time, GATX removed several tanks and other structures. Chemicals which have been found onsite include chlorobenzene; 1,2-dichloroethane; tetrachloroethylene; trichloroethylene; tetrahydrofuran; bis(2 ethyl hexyl) phthalate; din-butylphthalate; phenol; isophorone; and phthalate ester matrix. Contaminants migrated into soil beneath the facility and into groundwater beneath and adjacent to the facility. Some of these contaminants may have migrated through groundwater and into the Los Angeles Harbor waters. Some of these contaminants may have also migrated through the soils into the atmosphere. In addition, at that time, surface disturbances may have released soil contaminants into the atmosphere. Although the site was fenced, there was a potential for direct contact with contaminated soils by persons onsite. In 1987, a Consent Order between GATX Terminals Corporation and DHS (predecessor to DTSC) was entered to investigate and remediate the site. In 1991, DTSC approved a modification to the 1987 Remedial Action Plan. Soil remediation activities were completed in 1993 which involved using an innovative in-situ hot air/stream stripping technology; approximately 30,000 cubic yards of contaminated soil were treated to a depth of 9 feet below ground surface. In addition, a soil cover was placed over the remediated soil. Residual levels of volatile organic compounds and semi-volatile organic compounds in the soil required restrictions for future land use and a groundwater monitoring program be established. In 2002, DTSC certified that all appropriate removal/remedial action were completed and on-going monitoring efforts are required. Agreements exist with DTSC to restrict land use, perform operation and maintenance activities for the soil cover

and continued groundwater monitoring, and perform Five-Year Review evaluations. Bi-annual inspections of the soil cover and other site security issues are performed by The Port of Los Angeles. Annual groundwater monitoring activities and Five-Year Reviews are performed by Kinder Morgan (entity which acquired GATX Terminals Corporation in 2001). Two Five-Year Reviews have been conducted and the remedy implemented at the Site appears to remain effective in protecting human health and the environment.

Comments Date: 07302002
Comments: that POLA performed activities which violated the Agreement
Comments Date: 07302002

CA BOND EXP. PLAN:

Reponsible Party: RESPONSIBLE PARTY LEAD SITE CLEANUP WORKPLAN

Project Revenue Source Company: Not reported

Project Revenue Source Addr: Not reported

Project Revenue Source City,St,Zip: Not reported

Project Revenue Source Desc: DHS has budgeted \$50,000 for oversight/monitoring for related direct cost. DHS will recover 100 percent of direct costs plus staff costs associated with site cleanup. The responsible party will pay all costs associated with site cleanup.

Site Description: The GATX Annex Terminal site is located adjacent to the Los Angeles Harbor in San Pedro. The site was used for storage and transport of at least 60 different chemicals in above ground tanks from 1968 to 1983. During the course of operation, spillages Occurred. In 1972, GATX had a fire which destroyed 17 above ground tanks. The fire caused a major chemical spill resulting in significant soil and ground water contamination.

Hazardous Waste Desc: Chemicals which have been found onsite include chlorobenzene, 1,2 dichloroethane, tetrachloroethane, trichloroethane and trans 1,2-dichloroethane. The soil at the facility is known to be contaminated at certain locations from the ground surface to the depth of the water table which is about seven feet below ground surface.

Threat To Public Health & Env: Contaminants have migrated into soil beneath the facility and into ground water beneath and adjacent to the facility. Some of these contaminants are migrating through ground water and into the Los Angeles Harbor waters. Some of these contaminants may also migrate through the soils into the atmosphere. In addition, surface disturbances may release soil contaminants into the atmosphere. Although the site is fenced, there is a potential for direct contact with contaminated soils by persons onsite.

Site Activity Status: The responsible party (RP) developed a RAP that entailed onsite treatment of soils contaminated by volatile organic hydrocarbons. The RAP was approved by the Department in August, 1987. The RP has submitted a remedial design plan for the soil treatment system and expects to complete pilot tests on the system in Fall, 1988. Initial tests have indicated that semivolatile organic hydrocarbons are also present in the soils, which may result in modification of the RAP. The RAP is expected to be implemented in July, 1989.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 11/14/2018	Source: EPA

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/12/2018
Date Data Arrived at EDR: 11/14/2018

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

GEOCHECK® - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

P1E-18-12-007
1309-1323 SOUTH PACIFIC AVENUE
SAN PEDRO, CA 90731

TARGET PROPERTY COORDINATES

Latitude (North):	33.732093 - 33° 43' 55.53"
Longitude (West):	118.288315 - 118° 17' 17.93"
Universal Transverse Mercator:	Zone 11
UTM X (Meters):	380648.2
UTM Y (Meters):	3733003.2
Elevation:	85 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5640434 SAN PEDRO, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06037C2031F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>

06037C2033F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
SAN PEDRO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/8 - 1/4 Mile South
Site Name:	Auto Body Shop
Site EPA ID Number:	CA0001159151
Groundwater Flow Direction:	SE TOWARD THE PACIFIC OCEAN.
Measured Depth to Water:	approximately 15 to 16 feet.
Hydraulic Connection:	The site is underlain by four aquifers: the semi-perched; Gage; Lynwood; and the Silverado. The unconfined semi-perched and underlying Gage aquifers are separated by the Bellflower aquiclude.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

1G	1/2 - 1 Mile NNW	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Tertiary
Series:	Eocene
Code:	Te (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types: sandy loam
gravelly - sandy loam
silt loam
clay
fine sand

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Application to Alter, Repair, Move or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles:
Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:
First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.
Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.
Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

CITY OF LOS ANGELES
DEPARTMENT OF BUILDING AND SAFETY
BUILDING DIVISION

Application to Alter, Repair, Move or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

- First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley or other public place or portion thereof.
Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.
Third: That the granting of the permit does not affect or prejudice any claim of title in, or right of possession in, the property described in such permit.

PERMIT EXPIRATION

This permit expires two years after the date of the permit issuance. This permit will also expire if no construction work is performed for a continuous period of 180 days (Sec. 98.0602 LAMC). Claims for refund of fees paid must be filed within one year from the date of expiration for permits granted by the Dept. of Building & Safety (Sec. 22.12 & 22.13 LAMC).

17. OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors' State License Law for the following reason (Section 7031.5, Business and Professions Code):

Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500.):

☐ I, as the owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business & Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year from completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

☒ I, as the owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business & Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.)

18. WORKERS' COMPENSATION DECLARATION

I hereby affirm, under penalty of perjury, one of the following declarations:

☐ I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☐ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: _____ Policy Number: _____

☒ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS (\$100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

19. ASBESTOS REMOVAL DECLARATION

I certify that notification of asbestos removal is either not applicable or was sent to the AQMD or EPA as per section 19827.5 of the Health and Safety Code.

20. FINAL DECLARATION

I certify that I have read this application INCLUDING THE ABOVE DECLARATIONS and state that the above information INCLUDING THE ABOVE DECLARATIONS is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein, and it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

By signing below, I certify that:

- (1) I accept all the declarations above namely the Owner-Builder Declaration, Workers' Compensation Declaration, Asbestos Removal Declaration and Final Declaration; and
- (2) This permit is being obtained with the consent of the legal owner of the property.

Professional Employment History

- **Priority One Environmental, Inc.,** Los Angeles, CA (**Owner**)
Corporate President / Office Director, 2015 - Present
Managing the operation of an environmental phase one site assessment firm.
- **Dynamic Earth Consultants, Inc.,** Reseda, CA (Co-Owner)
Corporate President / Office Director, 2010 to 2015
Managing the operation of a geotechnical and environmental consulting firm.
- **Enviro-Assess Inc.,** Bonners Ferry, ID
Field Technician (Part Time), 2011 to 2013
Performing environmental site assessment and inspection
- **Brian A. Robinson & Associates, Inc.,** Tarzana, CA
Staff Engineer / Office Manager, 2010 to 2013
Field Technician / Office Manager, 2008 to 2010
Laboratory Technician / Field Technician, 2004 to 2008
Assisting in the management and operation of a geotechnical and environmental consulting firm.

Education

- **California State University, Northridge, CA**
Bachelor of Arts, Geography, 2009

Professional Experience

- Analyze and evaluate geologic, environmental and engineering site characteristics.
- Perform geologic, environmental and engineering field investigations, laboratory testing, and in-field quality assurance testing.
- Write geologic, environmental and engineering reports; computer drafting; review reports and literature.
- Prepare complex reports for clients ensuring full compliance with city and county codes.
- Communicate professionally with clients, professionals, and officials to ensure effective project completion.
- Schedule appointments, estimate project costs, determine project deadlines and manage customer projects.
- Prepare proposals, invoices and receipts for clients, manage company bookkeeping.
- Office management and receptionist skills: time and employee management, supply management, filing, phone work, typing, maintain company website and manage company advertizing.

Additional Skills and Knowledge

Windows XP, Vista, 7 and 8; Max OS X; MS Word, Excel, PowerPoint; Word Perfect; Quattro Pro; CorelDraw X5; Adobe Creative Suite 6 (i.e. Illustrator & Photoshop); ESRI (i.e. ArcGIS, ArcMap, ArcCatalog).

Subject: Phase 1 Environmental Site Assessment for
1331-1337 South Pacific Avenue,
Los Angeles, CA 90731
APN: 7454026013 and 7454026014
Los Angeles County
Lat: 33.731820, Long: -118.288332

As requested by Mr. O'Neill, we have prepared an Environmental Site Assessment (Phase 1) for the property located at 1331-1337 South Pacific Avenue, Los Angeles, CA 90731. The property is identified by the Assessor's Parcel Numbers (APN) 7454026013 and 7454026014. This report was produced in accordance with the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase 1 Environmental Site Assessments Process (ASTM 1527-13) and is in general compliance with the All Appropriate Inquiries (AAI) rule.

1.0 EXECUTIVE SUMMARY

A Phase 1 Environmental Site Assessment has been conducted for the subject property, the Opinion, Conclusions and Recommendations are provided below.

Findings

- 1) **Site Legal Description:** The subject property consists of two parcels, located at 1331-1337 South Pacific Avenue, Los Angeles, CA 90731. The property is identified by the Assessor's Parcel Numbers (APN) 7454026013 and 7454026014.
- 2) **1331 South Pacific Avenue (Site History):** From 1908 to 1940 the property is vacant land. In 1940, the existing building was developed. The building was used a Pacoima Bowling Center from 1940 to 1964. As Dancing Water Club from 1970 to 2001 and was used as a Night Club by the current owner from 2005 to 2015. The property is currently vacant.
- 3) **1337 South Pacific Avenue (Site History):** From 1908 to 1920 the property is vacant land. In 1920, a permit for a gasoline service station was issued. In 1924 a permit was issued for an 800 square foot steel frame shed. The shed building is listed as an Auto Cleaner in the 1950 Fire Insurance Sanborn Map. The Gasoline Service station operated from 1920 to 1959, when the buildings were demolished, and the property was developed into an asphalt parking lot. The property has been used as an asphalt parking lot since 1960.

- 4) **Site Observation:** The subject site is currently used as a night club and parking lot. No significant staining was observed throughout the outdoor grounds of the subject property.
- 5) **Local Records Review:** No records were found for the subject site with the City of Los Angeles Fire Department Underground Storage Tank Division and Hazardous Material Division.
- 6) **EDR Findings for Subject Site:** The subject property was listed in Environmental Records Sources searched under the EDR Hist Auto database.
- 7) **EDR Radius Report Findings:**

EDR reports one (1) SEMS-ARCHIVE site within the searched parameters of the subject property.
EDR reports twelve (12) RCRA-SQG sites within the searched parameters of the subject property.
EDR reports three (3) RESPONSE sites within the searched parameters of the subject property.
EDR reports ten (10) ENVIROSTOR sites within the searched parameters of the subject property.
EDR reports seventeen (17) LUST sites within the searched parameters of the subject property.
EDR reports two (2) CPS-SLIC sites within the searched parameters of the subject property.
EDR reports two (2) UST sites within the searched parameters of the subject property.
EDR reports one (1) HIST Cal-Sites site within the searched parameters of the subject property.
EDR reports one (1) SCH sites within the searched parameters of the subject property.
EDR reports thirteen (13) SWEEPS UST sites within the searched parameters of the subject property.
EDR reports eleven (11) HIST UST sites within the searched parameters of the subject property.
EDR reports fourteen (14) CA FID UST sites within the searched parameters of the subject property.
EDR reports one (1) DOD site within the searched parameters of the subject property.
EDR reports one (1) UXO site within the searched parameters of the subject property.
EDR reports one (1) CA BOND EXP. PLAN site within the searched parameters of the subject property.
EDR reports seven (7) HIST CORTESE sites within the searched parameters of the subject property.
EDR reports one (1) EDR MGP site within the searched parameters of the subject property.
EDR reports nine (9) EDR Hist Auto sites within the searched parameters of the subject property.
EDR reports three (3) EDR Hist Cleaner sites within the searched parameters of the subject property.
The Orphan Site List was Review. Three (3) Orphan Sites were reviewed. Of the three sites listed, one site was within the searched radius of the subject property.

Opinions

- 8) **General Site Condition:** The subject property's building was formerly used as a night club and parking lot. The exterior grounds were free of significant staining during the visual site inspection.
- 9) **Recognized Environmental Conditions:** A gasoline service station operated on the southeast corner of the subject property from 1920 to 1960. No records for underground storage tanks were found with the City of Los Angeles Fire Department and based on the removal of the gas station (1959), no records are likely to exist with regulatory agencies. Therefore, based on the historical use of the subject property as a gasoline service station for approximately thirty-nine (39) years, this is considered a recognized environmental condition (REC).
- 10) **Environmental Business Risks:** Based on the age of the structure, the potential for asbestos containing material (ACM) and lead-based paint to be present is very high.

- 11) **EDR Radius Report Review:** The cases listed for the surrounding properties in the EDR report are not anticipated to impact the subject property at this time, based on the type of listings, distance to the subject site, and additional information located in Geotracker and EnviroStor databases.

Conclusions

- 12) We have performed a Phase 1 Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 for the subject property, which consists of two parcels, located at 1331-1337 South Pacific Avenue, Los Angeles, CA 90731. The property is identified by the Assessor's Parcel Numbers (APN) 7454026013 and 7454026014. The subject property was listed in the Environmental Records Sources searched under the EDR Hist Auto database. Any exceptions to, or deletions from, this practice are described in the Limitations Section of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property, except for the following:
- **The use of the site as a gasoline service station from 1920 to 1959.**

2.0 INTRODUCTION

2.1 Location and Legal Description

The subject property consists of two parcels, located at 1331-1337 South Pacific Avenue, Los Angeles, CA 90731. The property is identified by the Assessor's Parcel Numbers (APN) 7454026013 and 7454026014. A site vicinity map and a generalized location map are located on in Appendix 9.2.

2.2 Site and Vicinity General Characteristics

The subject property is located in is located within the City of Los Angeles in the community of San Pedro. The site is located on the northwest corner of South Pacific Avenue and West 14th Street. Approximately three-quarters of a mile west of the Main Channel for the Port of Long Beach.

2.3 Description of Improvements on Property

The subject property consists of a 16,552 square foot roughly rectangle parcel with a 9,633 square foot two-story brick masonry commercial building, formerly used as a dance hall and bar. The south portion of the property is an asphalt parking lot which connects to South Pacific Avenue via a concrete driveway.

2.4 Current Uses of Adjoining Properties

Direction	Type of Use
North	1319 South Pacific Avenue – Office Building.
East	1330 South Pacific Avenue – Retail Stores.
South	501 West 14 th Street – Apartment Building.
West	524 West 14 th Street – Residential Triplex.

2.5 Purpose

The purpose of this Phase 1 Environmental Site Assessment is to identify to the extent feasible recognized environmental conditions (REC) in connection with the property. Following the processes prescribed by the AAI rule

and in ASTM Standard E1527-13, Standard Practice for Environmental Site Assessments: Phase 1 Environmental Site Assessment process.

- ❖ As defined by ASTM E1527-13, §1.1.1, the term "recognized environmental conditions" is defined as follows: *"The presence or likely presence of any hazardous substance or petroleum products in, on or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions."*
- ❖ As defined by ASTM E1527-13, §3.2.18, the term "controlled recognized environmental condition" is defined as follows: *"A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."*
- ❖ As defined by ASTM E1527-13, §3.2.42, the term "historical recognized environmental condition" is defined as follows: *"A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."*

2.6 Detailed Scope-of-Work

The scope of work performed for this Phase 1 Environmental report includes:

- Collecting and reviewing available environmental related information concerning the property and other data pertinent to the specific site per the ASTM standard 1527;
- Conducting a site visit to observe current site uses, observe adjacent land use, and gather data on possible spills, or misuse of chemicals that could be considered a REC;
- Contracting appropriate regulatory personnel and reviewing regulatory files regarding the property in question.

No additional non-scope considerations per Section 13 of ASTM 1527-13 were included in this Phase 1 Report including sections 13.1.5.1 to 13.1.5.14.

2.7 Significant Assumptions

No Significant assumptions were made in this assessment.

2.8 Limitations and Exceptions

Limitations

This report is applicable only for the project and site studied. Report findings and statements of professional opinion do not constitute a guarantee or warranty, expressed or implied. This report contains information and data provided by others and Priority One Environmental, Inc. in no way warrants the accuracy or completeness of the information provided by those sources. Our services are performed in a manner consistent with the level of care and skill ordinarily exercised by members of the profession currently practicing in the same locality under similar conditions. This report is prepared using the ASTM Standard E1527-13 and includes several inherent limitations, including but not limited to: Section 4.5.1 - Uncertainty Not Eliminated, Section 4.5.2 - Not Exhaustive, Section 7.4 - No Sampling, and Section 7.5.2.1 - Reliance.

Exceptions

No exceptions to or deviations from the ASTM standard 1527-13 were made during the course of our work except for the following:

- *No Interviews were conducted with local agencies as part of this assessment. Relevant local agencies for the area have policies of referring requests for interviews to their file review departments.*

These limitations are not anticipated to represent a significant data gap for the investigation.

2.9 Special Terms and Conditions

We have been authorized by **Mr. O'Neill** to perform a Phase 1 environmental site assessment of the subject property. It is our understanding that **Mr. O'Neill** will use the information contained in the report for due diligence and innocent landowner's protection under CERCLA. Without prior written consent of the client, Priority One Environmental, Inc. will keep confidential and not disclose to any person or entity, and data or information provided by the client or generated in conjunction with the performance of this study, except when required by law. Provisions of confidentiality shall not apply to data or information obtained from the public domain or acquired from third parties not under obligation to the client to maintain confidentiality.

2.10 User Reliance

This report was prepared for the exclusive use of **Mr. O'Neill and Root Real Estate, LLC**. No other person or entity is entitled to rely upon this report without the specific written authorization of Priority One Environmental, Inc. Such reliance is a subject to the same limitations, terms, and conditions as the original contract with the client. Priority One Environmental, Inc. specifically disclaims any responsibility for any unauthorized use of this report. Based on the ASTM standard this Phase 1 report is reliable for 180 days from the date the work was conducted.

3.0 USER PROVIDED INFORMATION

3.1 Title Records

A Preliminary Title Reports was not reviewed for pertinent title records and/or judicial records. No such records were made available for review.

3.2 Environmental Liens or Activity and Use Limitations

No Additional information was provided identifying actual knowledge of environmental liens or activity and use limitations recorded against the subject property. No environmental liens placed by the federal environmental agency under CERCLA regulations for the subject site was found during a record search on available government records. The California State Department of Toxic Substances website EnviroStor was searched and no environmental liens placed by the State environmental agency for the subject site was found.

3.3 Specialized Knowledge

No information was provided identifying specialized knowledge or experience that is material to recognized environmental conditions in connection with the subject property.

3.4 Commonly Known or Reasonably Ascertainable Information

No information was provided identifying knowledge of commonly known or reasonably ascertainable information related to the subject property.

3.5 Valuation Reduction for Environmental Issues

No Information was provided identifying knowledge of valuation reduction of the subject property.

3.6 Owner, Property Manager, and Occupant Information

Information provided by the owner of the subject property is discussed in Section 6.0 of this report.

3.7 Reason for Performing Phase 1

The Phase 1 has been requested by the client for the use in the purchase of the property.

3.8 Other

No other information was provided for review related to the subject property.

4.0 RECORDS REVIEW

4.1 EDR Map Findings

The subject property is located at 1331-1337 South Pacific Avenue, Los Angeles, CA 90731. The property is identified by the Assessor's Parcel Numbers (APN) 7454026013 and 7454026014. The subject property was listed in the Environmental Records searched under the EDR Hist Auto database.

4.2 Subject Site

EDR reports the site was under the address 1337 South Pacific Avenue under the EDR Hist Auto database. The site is listed under the name Eisenhower E E, as an automobile service station in 1924 and as Seaside Service Station in 1957.

4.3 Surrounding Properties

Eighty (80) sites were listed in the EDR Radius Report, these sites were reviewed. Four (4) LUST cases and three (3) ENVIROSTOR cases were listed within the 0.25 miles of the subject site. The four LUST cases are listed as completed case closed. of the three ENVIRSTOR cases, one is Certified as of 2003, and two are inactive. The two inactive ENVRISTOR cases, three nearby sites listed under the EDR Hist Auto database.

Site Name(s)	Address	Distance	Databases
Heron E C MRS	1338 S Pacific Ave	0.008 mi, ENE	EDR Hist Auto
Comments: The site is listed as an Automobile Service station and automobile repair in 1924. In the 1928 Aerial Photograph, the site is vacant land.			

Site Name(s)	Address	Distance	Databases
Sproule's Texaco Service	1301 S Pacific Ave	0.023 mi, NNE	EDR Hist Auto
Comments: The site is listed as Sproule's Texaco Service for the year 1957. The 1950 Fire Insurance Sanborn Map shows a Gas & Oil station on the southeast corner of 14 th street and South Pacific Avenue. No leaks or spills have been reported therefore this site is not anticipated to impact the subject property at this time.			

Site Name(s)	Address	Distance	Databases
J-M Tire Service/ J M Cutrate Service	1236 & 1238 S Pacific Avenue	0.036 mi, NNE	EDR Hist Auto, SWEEPS UST, CA FID UST.
Comments: The site is listed as J-M Cutrate Service for the year 1957 and as J-M Tire Service for the year 1959. No information was located in the SWEEPS UST and CA FID UST databases. The site has been redeveloped into an Apartment building in the 1980s. Based on the age of the redevelopment and no reported leaks or spills, this site is not anticipated to impact the subject property at this time.			

Site Name(s)	Address	Distance	Databases
Auto Body Shop	1505-1555 S Pacific Ave	0.088 mi, South	ENVIROSTOR and SEMS-ARCHIVE
Comments: The status of the ENVIROSTOR is Inactive needs evaluation as of 1999. The site is listed as Historical. The Department received a non-emergency hazardous substance release report, dated March 24, 1995. The groundwater at the site is contaminated with trichloroethene. Due to evidence of contamination, the Department recommended that a PEA be conducted and notified the Responsible Part ("RP"), FDIC, in its capacity as receiver			

for the Bank of San Pedro involuntarily acquired the property as a result of the closure of the Bank on July 15, 1994. No confirmed chemicals of concern were listed; however, several potential COC were listed: Halogenated Organic Compounds, Halogenated Solvents, Hydrocarbon Solvents, Oxygenated Solvents, Unspecified oil containing waste, unspecified solvent mixtures, waste & mixed oil, and organic liquids (nonsolvent with halogens). The site is listed under the name Angel's Auto Service.

Based on the topography and distance, and groundwater flow direction listed in the EDR GEOCHECK, this site is not anticipated to impact the subject property at this time.

Site Name(s)	Address	Distance	Databases
Pacific States Oil Co.	Along 12 th Street between South Gaffey Street and South Grand Avenue	0.201 mi, WNW	ENVIROSTOR
Comments: The case is inactive, needs evaluation (military evaluation) as of 2005. No additional information was located in the database listing or on ENVIROSTOR. The area of the site is a residential neighborhood that includes single family and multi-family properties. Based on the distance to the subject property, no identified chemicals of concern and identified media impacted this case is not anticipated to impact the subject property at this time.			

4.4 Orphan Properties

Three (3) Orphan Sites were reviewed. Of the three sites listed, one site was within the searched radius of the subject property. The site is discussed below:

- Fort Macarthur is located at approximately 0.92 miles to the south of the subject property. The site is listed under the SEMS-ARCHIVE database. No other information was listed for this site.

4.5 Physical Setting Sources

According to the most recent USGS Topographic map covering to subject property and vicinity, the subject site is relatively level and lies at approximately 85 feet above sea-level. The regional topography slopes to the east.

According to EDR GEOCHECK the site is mapped as a Loam soils with a Hydrologic Group Classification of Class Urban Land. Urban Land is defined as soils with variable infiltration rates with an unreported soil drainage class. The corrosion potential versus uncoated steel for the soil is unreported.

Shallow groundwater depth is recorded at 29.76 feet below ground surface approximately 1 mile to the north-northwest. Groundwater flow is not reported.

According to State Database: CA Radon, the subject site is located within zipcode: 90731. Zipcode 90731 had fifty-one (51) tests taken with five (5) above >4 pCi/L. Federal EPA Radon Zone for Los Angeles County is 2. No interior or exterior radon measurements were performed as part of this report.

4.6 Sanborn Insurance Maps

An attempt was made by EDR to obtain Sanborn Insurance Company maps for the period covering the years 1860 through the present in order to determine what types of activities were conducted on the subject property and on adjoining properties. Five Sanborn Maps were found and are discussed below:

1902 SANBORN MAP	
<u>Subject Property</u>	Not Mapped.
<u>North</u>	Not Mapped.
<u>East</u>	Vacant Lot.
<u>West</u>	Not Mapped.
<u>South</u>	Not Mapped.

1908 SANBORN MAP	
<u>Subject Property</u>	Vacant Land.
<u>North</u>	Vacant Land.
<u>East</u>	Vacant Land.
<u>West</u>	Vacant Land.

<u>South</u>	Dwelling.

1950 SANBORN MAP	
<u>Subject Property</u>	1331 – Bowling. 1337 - Gasoline & Oil Station and Auto Cleaners.
<u>North</u>	Restaurants and Store.
<u>East</u>	Market.
<u>West</u>	Triplex with two detached garages.
<u>South</u>	Stores.

1969 SANBORN MAP	
<u>Subject Property</u>	1331 – Bowling. 1337 – Parking Lot.
<u>North</u>	Stores.
<u>East</u>	Parking Lot.
<u>West</u>	Triplex with two detached garages.
<u>South</u>	Stores.

4.7 Historical Aerial Photographs

Aerial photographs of the subject property provided by EDR were reviewed as part of this investigation.

Subject Property	Year(s)	Description
	1928	1331: The property is vacant land. 1337: The gas station building on the east side of the property is existing. A shed/garage building is located on the west side of the property.
	1947	1331: The existing building has been developed. 1337: The gas station building is existing on the east side of the property and the shed/garage structure is existing on the west side of the property.
	1952	1331: The building appears similar as in 1947. 1337: The gas station building is existing on the east side of the property and the shed/garage structure is existing on the west side of the property.
	1963	1331: The building appears similar as in 1947. 1337: The buildings have been removed and the property appears to be a parking lot.
	1972-2016	From 1972 to 2016, the properties building, and parking lot appear similar.

Property to North	Year	Description
	1928	The property to the north is an existing structure that covers the east half of the property.
	1947-2016	The property to the north appears similar with a structure on the east portion of the property and a storage area on the west side of the property.

Property to South	Year	Description
	1928	The property to the south of 13 th Street appears to be vacant land.
	1947	By 1947, a pair of structures are existing on the property.
	1952-1963	The property to the south appears similar in 1952 and 1963 as it does in 1947.
	1972	The east structure appears to have been removed and the east portion of the property appears to be an asphalt parking lot.
	1977	The west structure has been removed and the property is an asphalt parking lot.
	1981	The property appears similar as in 1977.
	1989-2016	The property to the south has been redeveloped in to the existing multi-family apartment building.

Property to East	Year	Description
	1928	The property to the east is a vacant lot.
	1947	By 1947, the property to the east has been developed into a structure that covers most of the property (market).
	1952-1963	The properties to the east of the market building have been demolished and appear to be used as a parking lot.
	1972	By 1972, the market structure has been demolished and autos are parked on the property.
	1977-1981	The property to the east is used a vacant lot used as a parking lot.
	1989	The property to the east has been redeveloped into the existing strip mall with building along the north property line and asphalt parking along the south side of the property.
	1994-2016	The property appears similar from 1994 to 2016.

Property to West	Year	Description
	1928-2016	The property to the west residential triplex 1928 to 2016.

These photos are included in the Appendix.

4.8 Historical Topographic Maps

Topographic maps of the subject property provided by EDR were reviewed as part of this investigation.

YEAR(S)	DESCRIPTION.
1896	The topography in 1896 trends to the east-southeast, the elevation in the area of the subject site approximately 85'. The site appears to be undeveloped land on the west side of the town of San Pedro. The subject street is existing.
1923, 1925	By 1920, a structure is mapped northwest corner of the intersections of 14 th street and South Pacific Avenue.
1944, 1946	The area of the subject property is mapped as urban developed.
1951	The topography trends to the east-southeast and the elevation of the subject property is approximately 81'.
1964, 1972, 1981	Appears similar to previous date.
2012	The Topography appears similar to previous years and trends to the east-southeast. The elevation of the subject property is approximately 85'.

These maps are included in the Appendix.

4.9 City Directories

A search of local historical city directories was conducted by EDR for the subject property. The review included directories in five-year intervals from 1920 to 2014 (as available).

- Subject site: 1331 South Pacific Avenue.

YEAR(S)	LISTED USES.
1950, 1954, 1957, 1960, 1964	Pacoima Bowling Center.
1970, 1975	Dancing Waters Club.
1980	Dancing Waters Club, C L Skate Rentals & Sales.
1990, 1995, 2001	Dancing Waters.
2010, 2014	Sana Rosa Dancing Night Club, Zona VIP San Pedro.

- Subject site: 1337 South Pacific Avenue.

YEAR(S)	LISTED USES.
1924	Mc Millen Bruce slsmn E E Isenhower r.
1935	Center Serv. Sta. Central Fish Co. Fish Wharf San Pedro 0834.
1950, 1954	Seaside Serv. Station.
1957	Seaside Serv. Stn., Bob's Auto Laundry.

No additional records were identified for the subject property based on the address provided. The surrounding properties are listed in detail in the attached Directory Search.

4.10 Building Records

1331 S PACIFIC AVENUE	
DATE OF PERMIT	PERMIT
1908	New 2-story building, 16 units.
1940	New 1-story building with mezzanine.
1959	Demolition of Garage building.
1970	New Sign for The Dancing Water Club.
2004	Reroof.

1337 S PACIFIC AVENUE	
DATE OF PERMIT	PERMIT
1920	New Construction – Oil Station.
1924	New Construction – Shed.
1960	Certificate of Occupancy – Public Parking.

Based on the aerial photos, topographic maps of the site and the assessor records, the subject properties' building was constructed circa 1940.

5.0 SUBJECT PROPERTY RECONNAISSANCE

A visual reconnaissance of the subject property was conducted on Tuesday, July 31, 2018 by Mr. Paul Robinson. Photographs of the subject property are attached to this report in Appendix.

5.1 Methodology and Limiting Conditions

The periphery of the subject property was inspected. A detailed inspection was conducted of all major site features visible from the public portions of the property. The Parking lot was fenced, and no access was provided at the time of the inspection. Additionally, the interior of the subject building was not inspected.

5.2 Subject Property Reconnaissance

Observations made during the site visit are summarized in the following table:

SITE VISIT OBSERVATIONS			
Current Use of Property	Vacant building and parking lot.		
Evidence of Past Uses of Property?	Formerly a Dance Club.		
Potable Water Source	City Water		
Sewage Disposal Source	City Sewer		
Topography of property and vicinity	Relatively level		
Current use of adjoining properties	NORTH: Enigma Bar. WEST: Triplex. (residential). EAST: Strip Mall (various businesses). SOUTH: Apartment Building.		
Past Uses of Surrounding Properties?	No past use is identifiable.		
Observation Check List			
Type	Observed	Not Observed	Notes
Odors		X	
Transformers (Pole/Pad Mounted)		X	
USTs		X	
ASTs		X	
Fuel Island		X	
In-ground Hydraulic Hoist		X	
Hazardous Waste Storage		X	
Hazardous Waste Treatment		X	
Hazardous Waste Disposal		X	
Major Spills		X	
Major Leaks		X	
Significant Staining		X	
Distressed Vegetation		X	

Stocked Piled Soils		X	
Waste treatment Unit/Clarifier		X	
Solid Waste Disposal		X	
Wells		X	
Underground Pipelines		X	
Pits, Ponds, and/or Lagoons		X	
Herbicide and/or Pesticide		X	
Asbestos-Containing Material (ACM)		X	
Lead-Based Paint (LBP)		X	

5.3 Detailed Observations

Interior

The interior of the subject building was not inspected.

Odors - Indoor and Visible Emissions

No unusual smells, obnoxious odors, or visual emissions were observed during the inspection of the subject property.

Asbestos-Containing Material (ACM)

Asbestos-containing building materials were banned in 1978 by the federal government. The building was constructed in 1940; therefore, the potential of Asbestos being present at the subject site is very high. No sampling was performed as this was outside the limits of the current contract.

Lead-Based Paint (LBP)

In 1978, the federal government banned the use of lead-based paint in residential applications. The building was constructed in 1940; therefore, the potential of lead-based paint being present at the subject site is very high. No sampling was performed as this was outside the limits of the current contract.

Polychlorinated Biphenyl (PCB's)

PCB manufacturing in the United States was discontinued in 1978. Pole-mounted transformers were found in the vicinity of the subject site building, appearing in good condition without any sign of leakage.

Pools of Liquid of Chemicals

No pools or excessive ponding of liquid or chemicals were observed during the visual site inspection.

Underground Storage Tank (UST)

The visual inspection of the subject site revealed no evidence of surface or above ground (e.g., fill pipe, vent pipes, fill connections, concrete pads, saw cuts, sumps, spill containment device, leak detection device, etc.) features normally associated with underground storage tanks (UST's).

Aboveground Storage Tank

The visual inspection of the subject site revealed no evidence of surface or above ground (e.g., fill pipe, vent pipes, fill connections, concrete pads, saw cuts, concrete pad, drains in vicinity, etc.) features normally associated with aboveground storage tanks (AST's). Visual observation also includes the inspection to identify any surface markings indicating the existence of aboveground product pipelines. No evidence for the presence of on-site aboveground storage tank was identified.

Fuel Islands

The visual inspection of the subject site revealed no evidence of fuel islands or dispensers either in operation or abandoned.

Hydraulic Hoist Unit

The visual inspection of the subject site revealed no presence of underground hydraulic hoist units within the subject site premise.

Hazardous Materials/Petroleum Products Storage & Handling

During the visual site inspection, no containers storing automotive or industrial batteries, pesticides, paints or chemicals, seemingly exhibiting toxic hazards were observed.

Other Containers

No other containers indicating any sign of environmental concern were observed during the site inspection.

Hazardous Waste Treatment, Storage, Disposal (TSD)

No storage, treatment, or disposal of hazardous waste was found during the visual site inspection.

Major Spills, Leaks or Staining

No major spills, leakage, or staining were observed throughout the overall outdoor grounds.

Distress Vegetation

Planters and vegetation in the vicinity of and within the subject site were found well maintained on bare soil or within separate planters in relatively good appearance with no sign of chemical stress or unnatural appearance.

Stockpiled Soils

The site inspection did not reveal any evidence of stockpiled soils on the ground of subject property.

Wastewater Treatment Unit/Clarifier

No underground industrial wastewater treatment facility, i.e., clarifier was observed on the subject property during the site visit.

Storm water drainage system in the close proximity of the subject area did not identify any abnormal accumulation of petroleum or chemical run-off or foreign materials. No unusual blockage of the storm-water control system was observed during visual site inspection on the outdoor parking lot or surface areas.

Solid Waste Disposal

There were no observations of improper activities of treatment or disposal of hazardous, medical, or toxic wastes being performed at the subject site.

Wells

The site walk-through did not discover any irrigation wells, injection wells, abandoned wells, groundwater monitoring wells, dry wells, septic wells, oil wells, gas wells, domestic water wells, or other monitoring wells on the subject site premise.

Underground Pipelines

The visual site inspection did not reveal any evidence of underground pipelines beneath the ground of the subject property, other than public utility lines such as sewer, power, and electric lines, for which public "dig-alert" service would easily identify upon 48-hour telephone notice in advance.

Pits, Ponds, Lagoons

No visible evidence of wetlands, such as pits, ponds, lagoons, or any other water bodies, was observed within the subject property's boundary lines.

Herbicides/Pesticides

No evidence of herbicide or pesticide use on the subject property was observed during the visual site inspection.

6.0 INTERVIEWS

An attempt has been made to obtain historical as well as current information relative to the subject property from several individuals and local agencies. The objective of the interview process is to obtain any information indicating recognized environmental conditions in connection with the subject site.

6.1 Interview with Owner or Site Manager

An Environmental Questionnaire and Disclosure Statement were sent to Mr. O' Neill, on Friday, July 27, 2018. The completed questionnaire was returned on August 3, 2018. The current owner, Mr. Luke Choi has owned the property since 2005 and the use of the property from 2005 to 2015 was a night club. No environmental concerns were identified.

6.2 Interview with Local Government Officials

County Environmental Health Department

The Los Angeles County Public Works, Online File Review for Industrial Water, Underground Storage Tanks and Stormwater Prevention, was reviewed for the subject property addresses. No records were found.

City of Los Angeles Fire Department

The City of Los Angeles now only accepts record requests if the site has a facility ID. The City of Los Angeles Fire Department provides Listing Sheets for inactive, active and historical sites for review.

Underground Storage Tank Division Active and Inactive Underground Storage Tank Listing Sheets were reviewed for the subject addresses. The addresses were not found.

The City of Los Angeles Fire Department Active and Inactive Hazardous Materials Site Listing Sheets were reviewed for the subject addresses. The addresses were not found.

The City of Los Angeles Fire Department Active and Inactive Aboveground Storage Tank Facility Listing Sheets were reviewed for the subject addresses. The addresses were not found.

The City of Los Angeles Fire Department Historical Underground Storage Tank Listing Sheets were reviewed for the subject addresses. The addresses were not found.

GEOTRACKER/ENVIROSTOR Database Review

The GEOTRACKER database and the ENVIROSTOR database were reviewed for any additional information available in regards to the subject property. No additional information was located for the subject property.

Interview with Others

No additional interviews were conducted in this assessment.

7.0 EVALUATIONS

7.1 Findings

- 1) **Site Legal Description:** The subject property consists of two parcels, located at 1331-1337 South Pacific Avenue, Los Angeles, CA 90731. The property is identified by the Assessor's Parcel Numbers (APN) 7454026013 and 7454026014.
- 2) **1331 South Pacific Avenue (Site History):** From 1908 to 1940 the property is vacant land. In 1940, the existing building was developed. The building was used a Pacoima Bowling Center from 1940 to 1964. As Dancing Water Club from 1970 to 2001 and was used as a Night Club by the current owner from 2005 to 2015. The property is currently vacant.
- 3) **1337 South Pacific Avenue (Site History):** From 1908 to 1920 the property is vacant land. In 1920, a permit for a gasoline service station was issued. In 1924 a permit was issued for an 800 square foot steel frame shed. The shed building is listed as an Auto Cleaner in the 1950 Fire Insurance Sanborn Map. The Gasoline Service station operated from 1920 to 1959, when the buildings were demolished, and the property was developed into an asphalt parking lot. The property has been used as an asphalt parking lot since 1960.
- 4) **Site Observation:** The subject site is currently used as a night club and parking lot. No significant staining was observed throughout the outdoor grounds of the subject property.
- 5) **Local Records Review:** No records were found for the subject site with the City of Los Angeles Fire Department Underground Storage Tank Division and Hazardous Material Division.
- 6) **EDR Findings for Subject Site:** The subject property was listed in Environmental Records Sources searched under the EDR Hist Auto database.
- 7) **EDR Radius Report Findings:**

EDR reports one (1) SEMS-ARCHIVE site within the searched parameters of the subject property.
EDR reports twelve (12) RCRA-SQG sites within the searched parameters of the subject property.
EDR reports three (3) RESPONSE sites within the searched parameters of the subject property.
EDR reports ten (10) ENVIROSTOR sites within the searched parameters of the subject property.
EDR reports seventeen (17) LUST sites within the searched parameters of the subject property.
EDR reports two (2) CPS-SLIC sites within the searched parameters of the subject property.
EDR reports two (2) UST sites within the searched parameters of the subject property.
EDR reports one (1) HIST Cal-Sites site within the searched parameters of the subject property.
EDR reports one (1) SCH sites within the searched parameters of the subject property.
EDR reports thirteen (13) SWEEPS UST sites within the searched parameters of the subject property.
EDR reports eleven (11) HIST UST sites within the searched parameters of the subject property.
EDR reports fourteen (14) CA FID UST sites within the searched parameters of the subject property.
EDR reports one (1) DOD site within the searched parameters of the subject property.

EDR reports one (1) UXO site within the searched parameters of the subject property.
EDR reports one (1) CA BOND EXP. PLAN site within the searched parameters of the subject property.
EDR reports seven (7) HIST CORTESE sites within the searched parameters of the subject property.
EDR reports one (1) EDR MGP site within the searched parameters of the subject property.
EDR reports nine (9) EDR Hist Auto sites within the searched parameters of the subject property.
EDR reports three (3) EDR Hist Cleaner sites within the searched parameters of the subject property.
The Orphan Site List was Review. Three (3) Orphan Sites were reviewed. Of the three sites listed, one site was within the searched radius of the subject property.

7.2 Opinions

- 8) **General Site Condition:** The subject property's building was formerly used as a night club and parking lot. The exterior grounds were free of significant staining during the visual site inspection.
- 9) **Recognized Environmental Conditions:** A gasoline service station operated on the southeast corner of the subject property from 1920 to 1960. No records for underground storage tanks were found with the City of Los Angeles Fire Department and based on the removal of the gas station (1959), no records are likely to exist with regulatory agencies. Therefore, based on the historical use of the subject property as a gasoline service station for approximately thirty-nine (39) years, this is considered a recognized environmental condition (REC).
- 10) **Environmental Business Risks:** Based on the age of the structure, the potential for asbestos containing material (ACM) and lead-based paint to be present is very high.
- 11) **EDR Radius Report Review:** The cases listed for the surrounding properties in the EDR report are not anticipated to impact the subject property at this time, based on the type of listings, distance to the subject site, and additional information located in Geotracker and EnviroStor databases.

7.3 Conclusions

- 12) We have performed a Phase 1 Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 for the subject property, which consists of two parcels, located at 1331-1337 South Pacific Avenue, Los Angeles, CA 90731. The property is identified by the Assessor's Parcel Numbers (APN) 7454026013 and 7454026014. The subject property was listed in the Environmental Records Sources searched under the EDR Hist Auto database. Any exceptions to, or deletions from, this practice are described in the Limitations Section of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property, except for the following:
 - **The use of the site as a gasoline service station from 1920 to 1959.**

7.5 Professional Signature

According to Code of Federal Regulations CFR - Title 40 §312.10, Environmental Professional is defined as:

"(1) a person who possess sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases (see §312.1(c)) on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20(e) and (f).

(2) Such a person must:

(i) hold a current professional engineer's or Professional Geologist's license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of three (3) years of full-time relevant experience; or

(ii) Be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries as defined in §312.21 and have the equivalent of three (3) years of full-time relevant experience; or

(iii) Have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of five (5) years of full-time relevant experience; or

(iv) Have the equivalent of ten (10) years of full-time relevant experience".

We declare to the best of our professional knowledge and belief, we have met the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

It has been a pleasure to be of service. If any questions arise, please contact our office.

Sincerely,

Paul J. Robinson
Environmental Professional
Priority One Environmental, Inc.

8.0 NON-SCOPE SERVICES

No additional services as listed in the ASTM Standard 1527-13 have been requested in writing and placed under contract in regards to this assessment. Including, but not limited to Asbestos testing of material at the site, and drug lab uses of the site.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Priority One Environmental, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 05/18/2018 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 12 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent NPL

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there are 3 RESPONSE sites within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/30/2018 has revealed that there are 10 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 2 CPS-SLIC sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

CA FID UST: The Facility Inventory Database contains active and inactive underground storage tank locations. The source is the State Water Resource Control Board.

A review of the CA FID UST list, as provided by EDR, and dated 10/31/1994 has revealed that there are 14 CA FID UST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
EDISON/SAN PEDRO MGP	SANTA CRUZ, CENTRE A	NNE 1/2 - 1 (0.852 mi.)	77	200

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 7 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 09/20/1996
Comments: A Preliminary Assessment was completed under U.S. EPA grant. The site does not qualify for further remedial assessment under CERCLA (Site Evaluation Accomplished), however, PEA is recommended.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 05/17/1995
Comments: The Department received a non-emergency hazardous substance release report dated March 24, 1995. The groundwater at the site is contaminated with trichloroethene. Due to evidence of contamination, the Department recommended that a PEA be conducted and notified the RP. FDIC, in its capacity as a Receiver for the Bank of San Pedro, involuntarily acquired the property as a result of the closure of the Bank on July 15, 1994.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

. Waste code: D001

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

SHELL SERVICE STATION 136043 (Continued)

1000288460

Classification: Small Small Quantity Generator
Description: Handler: generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Date form received by agency: 02/28/2002
Site name: SHELL SERVICE STATION 136043
Classification: Large Quantity Generator

Date form received by agency: 04/08/1998
Site name: SHELL OIL CO
Classification: Small Quantity Generator

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D018
. Waste name: BENZENE

Date form received by agency: 09/01/1996
Site name: SHELL OIL CO

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 01/26/2005
Comments: The "Second Five-Year Review Report," dated September 7, 2004, was submitted by Kinder Morgan. In a letter, dated January 26, 2005, DTSC concurred that the remedy implemented at the Site appears to remain effective in protecting human health and the environment, and DTSC acknowledged the recommendations made with comments. The remedy included thermal treatment of soils, soil cover above the remediated soils, land use restrictions, site security, and continued groundwater monitoring. In addition, DTSC provided comments on the report requesting Kinder Morgan ensure the comments be properly addressed in the next Five-Year Review activities and report, due by August 3, 2009.

Completed Date: 10/11/2000
Comments: The revised "Five-Year Review Report," dated July 21, 2000, was submitted by GATX. The Site remedy included thermal treatment of soils, soil cover above the remediated soils, land use restrictions, site security, and continued groundwater monitoring. In a letter, dated October 11, 2000, DTSC found the report acceptable with notes and conditions, including that deficiencies regarding the soil cover are currently being addressed by GATX, groundwater monitoring will continue annually beginning April 2001, and the next Five-Year Review Report is due by August 1, 2004.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 07/27/2006
Comments: In a response letter, dated July 27, 2006, DTSC expressed it did not have any comments on the "Annual Groundwater Monitoring Report, April 2006," dated June 23, 2006. However, in that same letter, DTSC expressed concern of potential impacts to the Site due to potential contamination from the Warehouse 12 property, located east and directly adjacent to the Site, and requested information regarding the investigation of that property be submitted to DTSC.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 02/23/1996
Comments: "Final Post Remedial Groundwater Report" is an acceptable document which summarized the groundwater monitoring work performed after the soil remediation. This document supports continued groundwater monitoring pursuant to the RAP and Modified RAP.

Completed Date: 03/05/1987
Comments: In a letter, dated March 5, 1987, DHS approved a draft Community Relations Plan, dated January 28, 1987. Subsequently, a Final Community Relations Plan, dated March 11, 1987, was submitted to DHS.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 08/03/2006
Comments: In a letter, dated July 13, 2006, DTSC provided POLA with comments on the "2005 - 2006 Annual Report," dated June 30, 2006, and requested a response. POLA responded to DTSC with a letter, dated July 27, 2006. In a letter, dated August 3, 2006, DTSC provided a response to POLA specifically addressing concern regarding potential impacts due to bunker fuel oil in a groundwater monitoring well on the Warehouse 12 property, located adjacent to the Site.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 09/09/2005
Comments: In a letter, dated September 9, 2005, DTSC recommended POLA ensure that an opening in the perimeter fence is / has been properly fixed.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 10/11/2005
Comments: In a letter, dated October 11, 2005, DTSC provided comments on the report and requested Kinder Morgan ensure the comments be properly addressed in the next annual groundwater monitoring report.

Completed Document Type: Operations and Maintenance Report
Completed Date: 08/06/2004
Comments: In a letter, dated August 6, 2004, DTSC provided comments on the report and requested Kinder Morgan ensure the comments be properly addressed in the next annual groundwater monitoring event and report.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 10/03/2003
Comments: DTSC did not have any significant comments on the report per its letter, dated October 3, 2003.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 12/19/2003
Comments: In a letter, dated 12/19/2003, DTSC retracted its previous determination based on the errata pages provided; thus, the April 2003 groundwater analytical results may be used quantitatively.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 01/10/2003
Comments: DTSC reviewed the response to comments, which were acceptable, but did not provide a response to POLA.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 01/18/2002
Comments: In a letter, dated January 18, 2002, DTSC provided comments on the report requesting POLA address the comments in future annual reports; DTSC also provided a status on the soil cover upgrade activities performed in December 2000 and October 2001 by Kinder Morgan as the soil cover did not meet the original design specifications.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 01/31/2003
Comments: DTSC reviewed the response to comments, which were acceptable, but did not provide a response letter to Kinder Morgan

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 01/29/2002
Comments: In a letter, dated January 2, 2002, DTSC determined that the April 2001 groundwater analytical results are unacceptable, due to incorrect procedures resulting in questionable results, and requested another sampling event be performed in January 2002. In a letter, dated January 29, 2002, DTSC granted an extension until February 28, 2002 to perform the sampling event.

S101480929

Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan
Completed Date: 06/27/1996
Comments: DTSC approved the "Operation and Maintenance Plan," dated June 24, 1996, for continued groundwater monitoring for at least three years, with quarterly sampling the first year (beginning July 1996) and semi-annual sampling the following two years (ending April 1999).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 06/11/2001
Comments: In a letter, dated June 11, 2001, DTSC was notified that GATX Terminal Corporation was acquired by Kinder Morgan Operating L.P. on March 1, 2001. Kinder Morgan assumed GATX's environmental liability for this project.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 07/13/1987
Comments: DTSC approved a RAP, with modifications, to implement an insitu hot air/steam stripping cleanup alternative to treat soils contaminated with volatile organic compounds. The RP completed pilot tests using the innovative technology. During initial tests, semi-volatile organic compounds were discovered requiring a change in cleanup levels specified in the RAP. Additional site characterization activities and a Risk Assessment were performed.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Risk Assessment Report
Completed Date: 05/17/1995
Comments: An Addendum to the Human Health and Ecological Risk Assessment was acceptable to DTSC; this Risk Assessment pertained to groundwater only.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 09/28/1999
Comments: In a letter, dated September 28, 1999, DTSC determined that all analytical results from the April 1999 sampling event should be regarded only qualitatively, due to significant deviations from the sampling and analysis plan. DTSC also provided comments which should be addressed in future groundwater sampling events and respective reports.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 08/07/2002
Comments: In a letter, dated August 7, 2002, DTSC notified POLA of its violations regarding the soil cover (based on verbal notification from POLA on July 30, 2002) and late submittal of the annual report and specified the action to be taken. POLA responded in a letter, dated August 12, 2002.

Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 10/03/2003
Comments: DTSC acknowledged that POLA's violation of the Agreement regarding the soil cover in July 2002 appeared to be adequately corrected. This determination was based on the information presented in the "Trench Backfilling and Soil Cover Restoration Final Report," dated April 6, 2003, as amended by POLA's letter, dated May 30, 2003

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 04/28/2004
Comments: A public notice announcing commencement of the second Five-Year Review activities was printed in the Daily Breeze newspaper.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan
Completed Date: 07/25/2000
Comments: The First Amendment to the 1994 Agreement between DTSC and the Port of Los Angeles became effective. The amendment primarily added operation and maintenance responsibilities of the soil cover and included details of the associated O&M activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 02/21/2005
Comments: A public notice announcing the completion of the second Five-Year Review was published in The Daily Breeze on February 21, 2005.

Comments: Change of Project Manager letter sent to all proponents for project.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 07/25/2000
Comments: The First Amendment to the 1994 Agreement between DTSC and the Port of Los Angeles became effective. The amendment primarily added operation and maintenance responsibilities of the soil cover but also revised sections of the agreement pertaining to land use restrictions. The document was not recorded by the County but is to be on file with offices at POLA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 07/14/2006
Comments: On July 14,2006, a Site Visit Form for Deed Restriction, which documents the observations made on a site inspection on July 13, 2006, was signed by the unit chief. Overall, the site remained undeveloped with no appearance of any uses or building structures, and the soil cover appeared to be in good condition.

Completed Document Type: 5 Year Review Reports
Completed Date: 01/26/2005
Comments: The "Second Five-Year Review Report," dated September 7, 2004, was submitted by Kinder Morgan. In a letter, dated January 26, 2005, DTSC concurred that the remedy implemented at the Site appears to remain effective in protecting human health and the environment, and DTSC acknowledged the recommendations made with comments. The remedy included thermal treatment of soils, soil cover above the remediated soils, land use restrictions, site security, and continued groundwater monitoring. In addition, DTSC provided comments on the report requesting Kinder Morgan ensure the comments be properly addressed in the next Five-Year Review activities and report, due by August 3, 2009.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 10/11/2000
Comments: The revised "Five-Year Review Report," dated July 21, 2000, was submitted by GATX. The Site remedy included thermal treatment of soils, soil cover above the remediated soils, land use restrictions, site security, and continued groundwater monitoring. In a letter, dated October 11, 2000, DTSC found the report acceptable with notes and conditions, including that deficiencies regarding the soil cover are currently being addressed by GATX, groundwater monitoring will continue annually beginning April 2001, and the next Five-Year Review Report is due by August 1, 2004.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 07/27/2006
Comments: In a response letter, dated July 27, 2006, DTSC expressed it did not have any comments on the "Annual Groundwater Monitoring Report, April 2006," dated June 23, 2006. However, in that same letter, DTSC expressed concern of potential impacts to the Site due to potential contamination from the Warehouse 12 property, located east and directly adjacent to the Site, and requested information regarding the investigation of that property be submitted to DTSC.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 02/23/1996
Comments: "Final Post Remedial Groundwater Report" is an acceptable document which summarized the groundwater monitoring work performed after the soil remediation. This document supports continued groundwater monitoring pursuant to the RAP and Modified RAP.

Completed Date: 03/05/1987
Comments: In a letter, dated March 5, 1987, DHS approved a draft Community Relations Plan, dated January 28, 1987. Subsequently, a Final Community Relations Plan, dated March 11, 1987, was submitted to DHS.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 08/03/2006
Comments: In a letter, dated July 13, 2006, DTSC provided POLA with comments on the "2005 - 2006 Annual Report," dated June 30, 2006, and requested a response. POLA responded to DTSC with a letter, dated July 27, 2006. In a letter, dated August 3, 2006, DTSC provided a response to POLA specifically addressing concern regarding potential impacts due to bunker fuel oil in a groundwater monitoring well on the Warehouse 12 property, located adjacent to the Site.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 09/09/2005
Comments: In a letter, dated September 9, 2005, DTSC recommended POLA ensure that an opening in the perimeter fence is / has been properly fixed.

Completed Date: 10/11/2005
Comments: In a letter, dated October 11, 2005, DTSC provided comments on the report and requested Kinder Morgan ensure the comments be properly addressed in the next annual groundwater monitoring report.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 07/20/2004
Comments: DTSC did not have any significant comments on the report per its letter, dated July 20, 2004.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 08/06/2004
Comments: In a letter, dated August 6, 2004, DTSC provided comments on the report and requested Kinder Morgan ensure the comments be properly addressed in the next annual groundwater monitoring event and report.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 10/03/2003
Comments: DTSC did not have any significant comments on the report per its letter, dated October 3, 2003.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 12/19/2003
Comments: In a letter, dated 12/19/2003, DTSC retracted its previous determination based on the errata pages provided; thus, the April 2003 groundwater analytical results may be used quantitatively.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 01/10/2003
Comments: DTSC reviewed the response to comments, which were acceptable, but did not provide a response to POLA.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 01/18/2002
Comments: In a letter, dated January 18, 2002, DTSC provided comments on the report requesting POLA address the comments in future annual reports; DTSC also provided a status on the soil cover upgrade activities performed in December 2000 and October 2001 by Kinder Morgan as the soil cover did not meet the original design specifications.

Completed Document Type: Operations and Maintenance Report
Completed Date: 01/31/2003
Comments: DTSC reviewed the response to comments, which were acceptable, but did not provide a response letter to Kinder Morgan

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 01/29/2002
Comments: In a letter, dated January 2, 2002, DTSC determined that the April 2001 groundwater analytical results are unacceptable, due to incorrect procedures resulting in questionable results, and requested another sampling event be performed in January 2002. In a letter, dated January 29, 2002, DTSC granted an extension until February 28, 2002 to perform the sampling event.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan
Completed Date: 06/27/1996
Comments: DTSC approved the "Operation and Maintenance Plan," dated June 24, 1996, for continued groundwater monitoring for at least three years, with quarterly sampling the first year (beginning July 1996) and semi-annual sampling the following two years (ending April 1999).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 06/11/2001
Comments: In a letter, dated June 11, 2001, DTSC was notified that GATX Terminal Corporation was acquired by Kinder Morgan Operating L.P. on March 1, 2001. Kinder Morgan assumed GATX's environmental liability for this project.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 07/13/1987
Comments: DTSC approved a RAP, with modifications, to implement an insitu hot air/steam stripping cleanup alternative to treat soils contaminated with volatile organic compounds. The RP completed pilot tests using the innovative technology. During initial tests, semi-volatile organic compounds were discovered requiring a change in cleanup levels specified in the RAP. Additional site characterization activities and a Risk Assessment were performed.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Risk Assessment Report
Completed Date: 05/17/1995
Comments: An Addendum to the Human Health and Ecological Risk Assessment was acceptable to DTSC; this Risk Assessment pertained to groundwater only.

Completed Date: 09/28/1999
Comments: In a letter, dated September 28, 1999, DTSC determined that all analytical results from the April 1999 sampling event should be regarded only qualitatively, due to significant deviations from the sampling and analysis plan. DTSC also provided comments which should be addressed in future groundwater sampling events and respective reports.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 08/07/2002
Comments: In a letter, dated August 7, 2002, DTSC notified POLA of its violations regarding the soil cover (based on verbal notification from POLA on July 30, 2002) and late submittal of the annual report and specified the action to be taken. POLA responded in a letter, dated August 12, 2002.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 10/03/2003
Comments: DTSC acknowledged that POLA's violation of the Agreement regarding the soil cover in July 2002 appeared to be adequately corrected. This determination was based on the information presented in the "Trench Backfilling and Soil Cover Restoration Final Report," dated April 6, 2003, as amended by POLA's letter, dated May 30, 2003

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 04/28/2004
Comments: A public notice announcing commencement of the second Five-Year Review activities was printed in the Daily Breeze newspaper.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan
Completed Date: 07/25/2000
Comments: The First Amendment to the 1994 Agreement between DTSC and the Port of Los Angeles became effective. The amendment primarily added operation and maintenance responsibilities of the soil cover and included details of the associated O&M activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice

Completed Document Type: Operations and Maintenance Report
Completed Date: 08/16/2010
Comments: Document accepted with comments. No revisions to the report are necessary at this time, but a response letter will be submitted to address two minor comments.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 04/20/2011
Comments: Response to Comments document addressed all comments and therefore the 2010 Annual Groundwater Monitoring Report is approved.

Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 01/03/2011
Comments: Document approved. Minor comments made and a revised table of boring logs indicated in DTSC letter is to be sent for the file.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 08/04/2011
Comments: Document accepted. DTSC concurs with results of the Report and continued GW monitoring is recommended.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 07/05/2011
Comments: Document accepted. There were no violations of the provisions in the Land Use Covenant for the Site. The site was adequately maintained. The next Annual Inspection Report is due by the end of June 2012.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 01/07/2011
Comments: Public Notice published in Daily Breeze newspaper on January 7, 2011. 5-year Review has been completed.

Completed Area Name: Soil
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 07/25/2000
Comments: The First Amendment to the 1994 Agreement between DTSC and the Port of Los Angeles became effective. The amendment primarily added operation and maintenance responsibilities of the soil cover but also revised sections of the agreement pertaining to land use restrictions. The document was not recorded by the County but is to be on file with offices at POLA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 07/14/2006
Comments: On July 14, 2006, a Site Visit Form for Deed Restriction, which documents the observations made on a site inspection on July 13, 2006, was signed by the unit chief. Overall, the site remained undeveloped with no appearance of any uses or building structures, and the soil cover appeared to be in good condition.

Background Info:	<p>The GATX Annex Terminal site is located adjacent to the Los Angeles Harbor in San Pedro. The site was used for storage and transport of at least 60 different chemicals in above ground tanks from 1968 to 1983. During the course of operation, spillages occurred. In 1972, GATX had a fire which destroyed 17 above ground tanks. The fire and operational spillages have resulted in significant soil and groundwater contamination. The site was decommissioned between 1983 and 1984. During this time, GATX removed several tanks and other structures. Chemicals which have been found onsite include chlorobenzene; 1,2-dichloroethane; tetrachloroethylene; trichloroethylene; tetrahydrofuran; bis(2 ethyl hexyl) phthalate; din-butylphthalate; phenol; isophorone; and phthalate ester matrix. Contaminants migrated into soil beneath the facility and into groundwater beneath and adjacent to the facility. Some of these contaminants may have migrated through groundwater and into the Los Angeles Harbor waters. Some of these contaminants may have also migrated through the soils into the atmosphere. In addition, at that time, surface disturbances may have released soil contaminants into the atmosphere. Although the site was fenced, there was a potential for direct contact with contaminated soils by persons onsite. In 1987, a Consent Order between GATX Terminals Corporation and DHS (predecessor to DTSC) was entered to investigate and remediate the site. In 1991,</p>

DTSC approved a modification to the 1987 Remedial Action Plan. Soil remediation activities were completed in 1993 which involved using an innovative in-situ hot air/stream stripping technology; approximately 30,000 cubic yards of contaminated soil were treated to a depth of 9 feet below ground surface. In addition, a soil cover was placed over the remediated soil. Residual levels of volatile organic compounds and semi-volatile organic compounds in the soil required restrictions for future land use and a groundwater monitoring program be established. In 2002, DTSC certified that all appropriate removal/remedial action were completed and on-going monitoring efforts are required. Agreements exist with DTSC to restrict land use, perform operation and maintenance activities for the soil cover and continued groundwater monitoring, and perform Five-Year Review evaluations. Bi-annual inspections of the soil cover and other site security issues are performed by The Port of Los Angeles. Annual groundwater monitoring activities and Five-Year Reviews are performed by Kinder Morgan (entity which acquired GATX Terminals Corporation in 2001). Two Five-Year Reviews have been conducted and the remedy implemented at the Site appears to remain effective in protecting human health and the environment.

Comments Date: 07302002
Comments: that POLA performed activities which violated the Agreement
Comments Date: 07302002
Comments: between POLA and DTSC. POLA failed to obtain DTSC's prior
Comments Date: 07302002
Comments: approval for activities it conducted which resulted in a breach
Comments Date: 07302002
Comments: of the soil cover at the Site. DTSC notified POLA of its
Comments Date: 07302002
Comments: violations regarding the soil cover and late submittal of the
Comments Date: 07302002

Reponsible Party: RESPONSIBLE PARTY LEAD SITE CLEANUP WORKPLAN
Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc: DHS has budgeted \$50,000 for oversight/monitoring for related direct cost. DHS will recover 100 percent of direct costs plus staff costs associated with site cleanup. The responsible party will pay all costs associated with site cleanup.
Site Description: The GATX Annex Terminal site is located adjacent to the Los Angeles Harbor in San Pedro. The site was used for storage and transport of at least 60 different chemicals in above ground tanks from 1968 to 1983. During the course of operation, spillages Occurred. In 1972, GATX had a fire which destroyed 17 above ground tanks. The fire caused a major chemical spill resulting in significant soil and ground water contamination.
Hazardous Waste Desc: Chemicals which have been found onsite include chlorobenzene, 1,2 dichloroethane, tetrachloroethane, trichloroethane and trans 1,2-dichloroethane. The soil at the facility is known to be contaminated at certain locations from the ground surface to the depth of the water table which is about seven feet below ground surface.
Threat To Public Health & Env: Contaminants have migrated into soil beneath the facility and into ground water beneath and adjacent to the facility. Some of these contaminants are migrating through ground water and into the Los Angeles Harbor waters. Some of these contaminants may also migrate through the soils into the atmosphere. In addition, surface disturbances may release soil contaminants into the atmosphere. Although the site is fenced, there is a potential for direct contact with contaminated soils by persons onsite.
Site Activity Status: The responsible party (RP) developed a RAP that entailed onsite treatment of soils contaminated by volatile organic hydrocarbons. The RAP was approved by the Department in August, 1987. The RP has submitted a remedial design plan for the soil treatment system and expects to complete pilot tests on the system in Fall, 1988. Initial tests have indicated that semivolatile organic hydrocarbons are also present in the soils, which may result in modification of the RAP. The RAP is expected to be implemented in July, 1989.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 05/13/2018	Source: EPA
Date Data Arrived at EDR: 05/30/2018	Telephone: N/A
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 07/06/2018
Number of Days to Update: 23	Next Scheduled EDR Contact: 10/15/2018
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 05/13/2018	Source: EPA
Date Data Arrived at EDR: 05/30/2018	Telephone: N/A
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 07/06/2018

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 07/06/2018
Number of Days to Update: 92	Next Scheduled EDR Contact: 10/15/2018
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 05/18/2018	Source: EPA
Date Data Arrived at EDR: 05/30/2018	Telephone: 800-424-9346
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 07/06/2018

	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 05/18/2018	Source: EPA
Date Data Arrived at EDR: 05/30/2018	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (415) 495-8895
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 06/28/2018
Number of Days to Update: 86	Next Scheduled EDR Contact: 10/08/2018

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (415) 495-8895
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 06/28/2018

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (415) 495-8895
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 06/28/2018
Number of Days to Update: 86	Next Scheduled EDR Contact: 10/08/2018
	Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (415) 495-8895

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/14/2018	Source: Department of the Navy
Date Data Arrived at EDR: 05/18/2018	Telephone: 843-820-7326
Date Made Active in Reports: 07/20/2018	Last EDR Contact: 05/09/2018
Number of Days to Update: 63	Next Scheduled EDR Contact: 08/27/2018
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 02/13/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/27/2018	Telephone: 703-603-0695
Date Made Active in Reports: 05/11/2018	Last EDR Contact: 05/29/2018
Number of Days to Update: 73	Next Scheduled EDR Contact: 09/10/2018
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 02/13/2018	Source: Environmental Protection Agency

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

P1E-18-07-004
1331 SOUTH PACIFIC AVENUE
SAN PEDRO, CA 90731

TARGET PROPERTY COORDINATES

Latitude (North):	33.731818 - 33° 43' 54.54"
Longitude (West):	118.288316 - 118° 17' 17.94"
Universal Transverse Mercator:	Zone 11
UTM X (Meters):	380647.7
UTM Y (Meters):	3732972.8
Elevation:	85 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5640434 SAN PEDRO, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06037C2031F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>

06037C2034F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
SAN PEDRO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/8 - 1/4 Mile South
Site Name:	Auto Body Shop
Site EPA ID Number:	CA0001159151
Groundwater Flow Direction:	SE TOWARD THE PACIFIC OCEAN.
Measured Depth to Water:	approximately 15 to 16 feet.
Hydraulic Connection:	The site is underlain by four aquifers: the semi-perched; Gage; Lynwood; and the Silverado. The unconfined semi-perched and underlying Gage aquifers are separated by the Bellflower aquiclude.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Tertiary
Series: Eocene
Code: Te *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types: sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Shallow Soil Types: fine sandy loam
gravelly - loam
sandy clay
sandy clay loam
clay
silty clay
sand

Deeper Soil Types: gravelly - sandy loam
sandy loam
very gravelly - sandy loam
stratified
very fine sandy loam
weathered bedrock
sand
gravelly - fine sandy loam
silty clay loam
clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

DEPARTMENT OF BUILDING AND SAFETY

Application for the Erection of Buildings

CLASS "A" — "B" — "C"

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

14. APPLICATION COMMENTS

In the event that any box (i.e. 1-16) is filled to capacity, it is possible that additional information has been captured electronically and could not be printed due to space restrictions. Nevertheless, the information printed exceeds that required by Section 19825 of the Health and Safety Code of the State of California.

15. Building Relocated From:

16. CONTRACTOR, ARCHITECT, & ENGINEER NAME	ADDRESS	CLASS	LICENSE#	PHONE #
(C) Thompson Gary Roofing	3941 Shasta Ave, Los Alamitos, CA 90720	C39	536758	

PERMIT EXPIRATION

This permit expires two years after the date of the permit issuance. This permit will also expire if no construction work is performed for a continuous period of 180 days (Sec. 98.0602 LAMC). Claims for refund of fees paid must be filed within one year from the date of expiration for permits granted by the Dept. of Building & Safety (Sec. 22.12 & 22.13 LAMC).

17. LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. The following applies to B contractors only: I understand the limitations of Section 7057 of the Business and Professional Code related to my ability to take prime contracts or subcontracts involving specialty trades.

License Class: C-39 Lic. No.: 536758 Contractor: MARY THOMPSON

18. WORKERS' COMPENSATION DECLARATION

I hereby affirm, under penalty of perjury, one of the following declarations:

☐ I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☒ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: STATE FUND Policy Number: 1001404-2004

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS (\$100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

19. ASBESTOS REMOVAL DECLARATION / LEAD HAZARD WARNING

I certify that notification of asbestos removal is either not applicable or was sent to the AQMD or EPA as per section 19827.5 of the Health and Safety Code. Due to the possible presence of lead-based paint, lead safe work practices are required on all repairs in pre-1979 buildings that disturb paint. Failure to do so could create lead hazards that violate California Health and Safety Code Section 17920.10 and Section 105256 and may be subject to a \$1000 fine or criminal prosecution. For more information call LA County's Department of Health Services at (800)524-5323. In order to locate a Lead Certified Professional and obtain additional information, call California DHS at (800)597-5323 or go to the DHS Website at <http://www.dhs.ca.gov/childlead/html/GENclist.html>.

20. CONSTRUCTION LENDING AGENCY DECLARATION

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).
Lender's name (if any): _____ Lender's address: _____

21. FINAL DECLARATION

I certify that I have read this application INCLUDING THE ABOVE DECLARATIONS and state that the above information INCLUDING THE ABOVE DECLARATIONS is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein, and it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

By signing below, I certify that:

- (1) I accept all the declarations above namely the Licensed Contractor's Declaration, Workers' Compensation Declaration, Asbestos Removal Declaration, Lead Hazard Warning, Construction Lending Agency Declaration and Final Declaration; and
- (2) This permit is being obtained with the consent of the legal owner of the property.

Application for the Erection of Building

CLASS "A" "B" "C"

To the Board of Public Works of the City of Los Angeles:

Application is hereby made to the Board of Public Works of the City of Los Angeles, through the office of the Chief Inspector of Buildings, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

Relationship to Property:

Site Information

1. Please describe current use(s) of property

Vacant

2. Please describe any other known past use(s) of property, and approximate dates of each use.

Night club - 2005-2015

3. Are there any business using any portion of the property which are operated by an entity other than the property owner (including a tenant farming operation), If yes, please provide contact name and phone number for each.

Not that I know

4. To the best of your knowledge has the property ever been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?

None

5. To the best of your knowledge has any adjoining property ever been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?

not that I know.

6. Do you have any knowledge of environmental liens or governmental notification(s) relating to the past or recurrent violations of environmental laws with respect to the property or any facility located on the property?

None

7. Do you have any knowledge of the past or current existence of hazardous substances or petroleum products or environmental violations with respect to the property or any facility located on the property?

None

8. Please describe any other relevant historical information in your possession concerning the subject property.

None

9. Are there any electrical transformers or capacitors on the property which are known to contain PCBs (polychlorinated biphenyls), or which may have been manufactured before 1980 and whose PCB content is unknown?

not that I know

10. Water is provided to the property by:

LA - water & power

11. Waste Water Disposal is provided to the property by:

None

12. Are there any wastewaters generated and/or disposed of on the property other than storm water runoff and domestic sewage? please describe (Please attached copies of any wastewater discharge permits or licenses pertaining to operations of the property.)

None

13. Are there any other types of liquid wastes or solid wastes generated at the property? Please describe how they are handled and disposed of. (Please attach copies of any waste disposal permits or licenses pertaining to operations on the property).

None

14. Are there any activities on the property which generate air pollutants, including fuel burning equipment? Please describe. (Please attached copies of any air permits or licenses pertaining to operations on the property.)

None

STRUCTURES

Are there currently any structures on the property?

Not that I know.

To the best of your knowledge, have there been any structures on the property in the past, which have since been removed?

Not that I know.

If the answer to either question is "Yes" please answer the following:

1. For each existing building, please provide type of building and date of original construction and any substantial renovations:

--

2. For each building known to have been removed, please provide type of building and approximate dates the buildings existed:

--

3. How are the structures heated and cooled (e.g., central, wall-mounted unit, space heaters, etc.), and what powers the heating and cooling devices (e.g., electric, propane, fuel oil tank, fireplace, etc.)?

--

4. Provide a brief description of existing development with property dimensions, area, and acreage.

--

5. Are there any currently, or the best of your knowledge have there been previously, any flooring, drains, or walls located within the facility that are stained by substances other than water or are emitting foul odors?

--

6. If any buildings were constructed prior to 1980, is there any currently or was there previously asbestos in any of the construction materials contained in the building(s)? If so, has a survey been conducted to assess the type, amount, location and condition of asbestos? (please attached a copy of any survey report.)

If any buildings were constructed prior to 1980, is there any currently or was there previously lead-based paint applied to the building(s)? If so, has a survey been conducted to assess the type, amount, location and condition of lead-based paint? (please attached a copy of any survey report.)

STORAGE TANKS AND OTHER CHEMICAL STORAGE

Are there currently, or to the best of your knowledge have there been previously, any registered or unregistered gasoline, diesel, fuel oil or other chemical storage tanks (above or underground) located on the property?

not that I know

Are there any pesticides, paints, or other chemicals stored or used on the property in drums, sacks, or other containers greater than 5 gallons each or 50 gallons in the aggregate?

not that I know.

If the answer to either question is "yes" please answer the questions below:

1. For each tank, please list substance stored and tank capacity:

2. Have the tanks been inspected or tested for leakage? When was the most recent test? What were the results? (Please attached copies of results if available.)

3. For other storage containers, please describe the substances, quantities stored, and types of containers.

4. Have there been any spills, leaks, or other releases of chemicals on the property? If so please describe the chemicals and quantities released, and cleanup measures taken, and the results of any soil or groundwater samples performed to detect the presence of chemicals spilled, leaked, or released on the property.

5. Please attach copies of any permits or licenses pertaining to the use, storage, handling, or disposal of chemicals on the property.

Industrial Properties

Is the property currently used for any industrial purpose?

None

Has the property ever been previously used for an industrial purpose (other than the current use)?

None

If the answer to either question is "yes" please answer the following:

1. Has the property been used for disposal of any liquid or solid waste?

2. Have evaporation or storage ponds been located on the property?

3. Have wastewater treatment facilities, such as acid neutralization vaults, been located on the property?

4. Are there raw chemical or waste chemical storage areas on the property?

If any of the questions 1-4 are answered "yes", please provide a description, including the location of all disposal sites, treatment facilities and storage areas, the type of chemicals or wastes handled at each site, the results of any soil or groundwater samples taken in the vicinity of each site, and the manner in which each site not presently in use was closed.

Agricultural Properties

Is the property currently used for agricultural purposes, other than grazing or pastured land?

not that I know

To the best of your knowledge, has the property been used in the past for agricultural purposes, other than grazing or pastured land?

not that I know

If the answer to either question is "yes", please answer the following:

1. Have pesticides, herbicides or other agricultural chemicals been applied to the property? if so, please describe the locations where such pesticides, herbicides or chemicals were applied, and the type of pesticides, herbicides or chemicals applied in each area. (Please attached copies of pesticide use reports if available).

2. Have pesticides, herbicides or other agricultural chemicals been mixed, formulated, rinsed, or disposed of on the property? If so, please describe the locations where such pesticides, herbicides or chemicals were mixed, formulated, rinsed, or disposed, and the type of pesticides, herbicides or chemicals mixed, formulated, rinsed or disposed of at each location.

3. Has any soil or groundwater analysis been performed to detect pesticides, herbicides or chemicals used at the site? If so, please provide a summary of the finding or attach the report(s).

Corporate President / Office Director, 2010 to 2015
Managing the operation of a geotechnical and environmental consulting firm.
- **Enviro-Assess Inc.,** Bonners Ferry, ID
Field Technician (Part Time), 2011 to 2013
Performing environmental site assessment and inspection
- **Brian A. Robinson & Associates, Inc.,** Tarzana, CA
Staff Engineer / Office Manager, 2010 to 2013
Field Technician / Office Manager, 2008 to 2010
Laboratory Technician / Field Technician, 2004 to 2008
Assisting in the management and operation of a geotechnical and environmental consulting firm.

Education

- **California State University, Northridge, CA**
Bachelor of Arts, Geography, 2009

Professional Experience

- Analyze and evaluate geologic, environmental and engineering site characteristics.
- Perform geologic, environmental and engineering field investigations, laboratory testing, and in-field quality assurance testing.
- Write geologic, environmental and engineering reports; computer drafting; review reports and literature.
- Prepare complex reports for clients ensuring full compliance with city and county codes.
- Communicate professionally with clients, professionals, and officials to ensure effective project completion.
- Schedule appointments, estimate project costs, determine project deadlines and manage customer projects.
- Prepare proposals, invoices and receipts for clients, manage company bookkeeping.
- Office management and receptionist skills: time and employee management, supply management, filing, phone work, typing, maintain company website and manage company advertizing.

Additional Skills and Knowledge

Windows XP, Vista, 7 and 8; Max OS X; MS Word, Excel, PowerPoint; Word Perfect; Quattro Pro; CorelDraw X5; Adobe Creative Suite 6 (i.e. Illustrator & Photoshop); ESRI (i.e. ArcGIS, ArcMap, ArcCatalog).

1. Introduction

As requested, Priority One Environmental, Inc. has prepared a Phase II Environmental Site Assessment (ESA) for 1309-1311 South Pacific Avenue, Los Angeles, CA 90731. The property is identified by the Assessor's Parcel Numbers (APN) 7454026011. For the purpose of this report, the term "Property" shall refer to either one property or multiple properties. A Phase I Environmental Site Assessment, dated December 28, 2018 and prepared by Priority One Environmental, Inc. Identified the following Recognized Environmental Condition:

The historical records indicate that a Drycleaners operated in unit 1311 South Pacific Avenue from 1946 to 1957; possibly earlier; therefore, the use of Dry-cleaning chemicals prior to regulatory oversight, constitutes a potential release.

The purpose of this Phase II ESA is to evaluate the subsurface soil vapor and soils in the area of the former drycleaners.

Site History

1309-1311 South Pacific Avenue: Prior to 1932, the subject property was vacant land. In 1932, the existing structure was constructed.

1309 South Pacific Avenue: In 1938, the unit was listed under the name Pacific Pharmacy. From 1950 to 2010 the unit was listed under the name La Rue Pharmacy. Currently the unit is used for storage by the property owner and The Woodsman, a woodworking company.

1311 South Pacific Avenue: From 1946 to 1957 the unit was listed under the name ***Los Angeles Harbor Cleaners and Paramount Laundry***. In 1960, it was listed under the name Ernest R Collins and United Vending Service. In 1980 it was listed under the name Arthur C. Holloway and from 2010 to 2014 it was listed under the name Steve Formiller. The unit is currently used by The Woodsman, a woodworking company.

1311 ½ South Pacific Avenue was listed as Ernie Collins, Watch & Jewelry Repairing from 1950 to 1970.

Site Description

Location and Legal Description

The property is located at 1309-1311 South Pacific Avenue, Los Angeles, CA 90731. The property is identified by the Assessor's Parcel Numbers (APN) 7454026011.

Site and Vicinity General Characteristics

The property is located in is located within the City of Los Angeles in the community of San Pedro. The site is located on the west side of South Pacific Avenue. Approximately three-quarters of a mile west of the Main Channel for the Port of Long Beach.

Description of Improvements on Property

The subject property consists of a 7,505 square foot roughly rectangle parcel with an approximately 4,000 square foot commercial structure on the east side of the property. The building consists of two units. On the west side of the property is concrete and asphalt storage and parking area and a grass area with trees along the west property line.

Current Uses of Adjoining Properties

Direction	Type of Use
North	1301 South Pacific Avenue – Auto Repair Shop.
East	1318 South Pacific Avenue – Apartment Building. 1330 South Pacific Avenue – Retail Stores.
South	1319, 1321, and 1323 South Pacific Avenue – Offices and Bar
West	527 West 13 th Street – Residential Triplex.

2. Regional Geology

Introduction

Underlying the property is the Holocene to late Pleistocene age Alluvial deposits of the Palos Verdes Hills. Mantling the alluvium at the site is a veneer of soil and hardscape. These units are described below:

Surficial Material

Soil

Mantling the property is a varying thickness of residual soil. The soil consists of light to medium brown, silty clay and were slightly moist at the time of our investigation.

Alluvium (Qoa)

According to the Geologic Map of Palos Verdes Peninsula and Vicinity, By Thomas W. Dibblee, Jr. (1999), the Property is located in an area of older alluvial deposits that have been accumulating since Pleistocene time. The alluvium consists of sandy loam and loamy clay, with pebbles derived mostly from the Miocene hard siliceous shale and limestone. These materials consist of coarse to medium-grained sands, intercalated with abundant lenses of silts and clays. These deposits are moderately dense, and the moisture content varies seasonally.

Groundwater

No springs or seeps were observed at the site. Groundwater was not encountered during drilling activities.

A Soils Engineering Investigation report dated September 7, 2018 and prepared by AGI Geotechnical, Inc. for 1331-1337 South Pacific Avenue, San Pedro, California (Property to the south) encountered groundwater at a depth of 20-22 feet below ground surface.

Based on a computerized review of historic groundwater well data as maintained by the California State Water Resource Control Board, the depth to the highest recorded regional groundwater surface within the vicinity of the subject site is 15 feet below ground surface, approximately 870 feet to the south of the Property (Los Angeles RWQCB ((Region 4) Case # 907310370A). RWQCB (Region 4) Case # 907310617 is located approximately 1,612' to the northwest and lists groundwater at a depth of 20 feet below ground surface.

It should be recognized that the water table elevation might fluctuate with time. The depth to groundwater can be expected to fluctuate both seasonally and from year to year. Fluctuations in the groundwater level may occur due to variations in precipitation, irrigation practices at the property and in the surrounding areas, climactic conditions, flow in adjacent or nearby canals, pumping from wells and possibly as the result of other factors that were not evident at the time of our investigation.

3. Phase II Environmental Site Assessment

Sampling Strategy and Locations

This investigation is intended as a screening-level tool to determine whether Volatile Organic Compounds (VOCs) related impacts to the Property exist at the specific portions of the property as discussed below:

Boring B-1 was located in the “back-room” of the subject property, based on the previous use of the property at a drycleaner, this was the most likely location of the Dry-cleaning machine.

Boring B-2 was located to the east of B-2, in the mid portion of the subject building to provide a coverage of the center portion of the building. The exact location was decided onsite based on the access around the active woodworking shop equipment and product storage.

Boring B-3 was located along the front of the building near the location of the office. The purpose of this boring was to provide coverage of the east portion of the building. The exact location was decided onsite based on the access around the active woodworking shop equipment and product storage.

Boring B-4 was located outside of the rear door the building, along concrete walkway where possible waste containers were potentially stored.

From the four borings, four soil vapor samples and four soil samples were collected at locations determined by on-site personnel.

Health and Safety

Underground Service Alert was contacted a minimum of 2 days prior to the start of work. The underground utility markings were reviewed prior to the start of any invasive work.

Prior to start of work, a brief “tailgate safety meeting” was conducted to inform the field crew of anticipated hazards and the emergency action plan for the site. On-site workers used Level D personal protective equipment.

Sample Locations and Collection Methods

The four boreholes are described below:

- Borehole B-1, the location of this borehole is located approximately two feet west of the partition wall in the rear room of 1311 South Pacific Avenue.
- Borehole B-2, the location of this borehole is located in the mid portion of 1311 South Pacific Avenue, approximately five feet off the north wall and doorway to 1309 South Pacific Avenue. This boring was located on the east side of the partition wall and
- Borehole B-3, the location of this borehole is located approximately three feet south of the north wall and five feet west of the office area along the east side of 1311 South Pacific Avenue.
- Borehole B-4, the location of this borehole was located along the west exterior of the structure approximately fifteen from the south property line.

Gas Sampling Method

Gas Sampling was subcontracted to and performed by Optimal Technology. As reported by Optimal Technology, gas sampling followed the Active Soil Gas Investigation, July 2015 advisory.

Gas sampling was performed by hydraulically pushing soil gas probes to a depth of 2.5 feet below ground surface (bgs). An electric rotary hammer drill was used to drill a 1.0-inch diameter hole through the overlying surface to allow probe placement when required. The same electric hammer drill was used to push probes in areas of resistance during placement.

At each sampling location, an electric vacuum pump set to draw 0.2 liters per minute (L/min) of soil vapor was attached to the probe and purged prior to sample collection. Vapor samples were obtained in SGE gas-tight syringes by drawing sample through a luer-lock connection which connects the sampling probe and the vacuum pump. Samples were immediately injected into the gas chromatograph/purge and trap after collection. New tubing was used at each sampling point to prevent cross contamination.

All analyses were performed on a laboratory grade Agilent model 6890N gas chromatograph equipped with an equipped with an Agilent model 5973N Mass Spectra Detector and Tekmar LSC 3100 Purge and Trap. A Restec columns using helium as the carrier gases were used to perform all analysis. All results were collected on a personal computer utilizing Agilent's MS and chromatographic data collection and handling system.

Soil Sampling Method

A bosch hammer was used hydraulically push down to the desired depth. Samples were collected in a subcore sampler. The selected samples were immediately placed on ice and transported under chain of custody to DHS-certified Enviro-Chem, Inc. in Pomona, California. The samples locations are depicted in Plate 1.

Borehole Description

The boreholes encountered a medium to dark brown silty clay. No groundwater was encountered during the drilling effort.

Laboratory Results for Soil Vapor

The table below presents the laboratory results as reported by Optimal Technologies, Inc. Complete laboratory results are attached. Soil Vapor sample SV-1 detected 0.30 Tetrachloroethene (PCE). Soil Vapor samples SV-1 and SV-2 detected Ethylbenzene and Xylene. SV-3 detected only low levels of Xylene. If there is a number in the column in the table, it means a chemical was detected and the number represents the concentration. If there is a ND in the column it means "Non-Detect". Results in **bold** indicate levels detected above regional screening levels.

Sample ID		SV-1	SV-2	SV-3	SV-4	Regional Screening Level	
Method 8260B Modified							
Compound	Rep. Limit	CONC (ug/l)	CONC (ug/l)	CONC (ug/l)	CONC (ug/l)	Residential	Commercial

Notes: EPA Regional 9 Regional Screening Levels (RSLs) are human health risk screening levels used by the EPA specific to Region 9 to determine Health Risk in residential and commercial settings. *Value modified for California by the DTSC HHRA Note 3. Screening Levels for soil gas calculated using indoor air values and attenuation factors provided by DTSC.

Laboratory Result for Sub-slab Soils

The table below presents the laboratory results as reported by Enviro Chem, Inc. Complete laboratory results are attached. Note that the lab reports concentrations are in milligram per kilogram (mg/Kg). If there is a number in the column in the table, it means a chemical was detected and the number represents the concentration. If there is a ND in the column it means “Non-Detect”. Results in **bold** indicate levels detected above regional screening levels.

Analysis: Volatile Organic Compounds, EPA Method 503B/8260B							
Sample ID		SB-1	SB-2	SB-3	SB-4	Regional Screening Level	
Compound	Rep. Limit	CONC (mg/Kg)	CONC (mg/Kg)	CONC (mg/Kg)	CONC (mg/Kg)	Residential	Commercial
Tetrachloroethene (PCE)	0.005	ND	ND	ND	ND	--	--
Ethylbenzene	0.005	ND	ND	ND	ND	--	--
Xylene	0.005	ND	ND	ND	ND	--	--
All other VOCs*	0.005-0.020	ND	ND	ND	ND	--	--

*For a complete list of VOCs tested, see Appendix.

Proposed/Future Use

The proposed use of the site is redevelopment into a 130-unit 4-story residential apartment building with 2-levels of subterranean parking.

Summary and Opinion

The property is 1309-1311 South Pacific Avenue, Los Angeles, CA 90731. The property is identified by the Assessor's Parcel Numbers (APN) 7454026011. The purpose of the Phase II is to evaluate the subsurface soil vapor and soils in the area of the historical drycleaner business listed at 1311 South Pacific Avenue.

Soils samples collected two and a half feet below the building's slab were Non-Detect for VOCs.

Soil Vapor sample SV-1 detected 0.30 Tetrachloroethene (PCE). The historical use of the Property as a Drycleaners with the use of Tetrachloroethene (PCE) from 1946 to 1957 is the suspected source of the detected level of PCE in soil vapor sample SV-1.

Soil Vapor samples SV-1 and SV-2 detected levels Ethylbenzene and Xylene. SV-3 detected only low levels of Xylene. The historical use of the adjacent property to the north as a gasoline station and automotive repair shop is the suspected source of Ethylbenzene and Xylene detected in SV-1, SV-2, and SV-3 (Xylene only).

Conclusion

Currently the Property is used as commercial wood working shop. Based on the results, the low levels of PCE in soil vapor detected in SV-1 only; is not a significant release to the environment. The detected levels of Ethylbenzene and Xylene are not significant, and any vapor concerns would be resolved by the construction of the subterranean parking for the proposed multi-family development.

Special Terms and Conditions

We have been authorized by **Mr. O'Neill and RKD 1331 Pacific, LP.** to perform a Phase II environmental site assessment of the subject property. It is our understanding that **Mr. O'Neill and RKD 1331 Pacific, LP.** will use the information contained in this report for due diligence and as part of the financing of the property. Without prior written consent of the client, Priority One Environmental, Inc. will keep confidential and not disclose to any person or entity, and data or information provided by the client or generated in conjunction with the performance of this study, except when required by law. Provisions of confidentiality shall not apply to data or information obtained from the public domain or acquired from third parties not under obligation to the client to maintain confidentiality.

User Reliance

This report was prepared for the exclusive use of **Mr. O'Neill and RKD 1331 Pacific, LP.** No other person or entity is entitled to rely upon this report without the specific written authorization of Priority One Environmental, Inc.. Such reliance is subject to the same limitations, terms, and conditions as the original contract with the client. Priority One Environmental, Inc. specifically disclaims any responsibility for any unauthorized use of this report.

Limitations

Our professional services were performed, our findings obtained, and our conclusions proposed in accordance with generally accepted principles and practices. This warranty is in lieu of all other warranties either expressed or implied. Test findings and statements of professional opinion do not constitute a guarantee or warranty, expressed or implied.

Opinions provided herein apply to the currently available data, and existing and reasonably foreseeable conditions at the time of this investigation. They cannot apply to changes in site conditions of which this office is unaware or has not had the opportunity to evaluate. Soil samples are collected from a small "representative area of soil", these samples are assumed to represent the chemical makeup of the general area, as such there may be variations in adjacent soils. To further reduce the client's liabilities, additional samples may be collected and analyzed to lower the possibility of generalizing the conditions and/or not locating an area of impacted soils at the site. Changes in conditions at the property may occur with time due to natural processes or works of man on the property or adjacent properties. Depending on the nature of the abandonment of the well and its current connection to the oil aquifer additional release can/may occur over time if this should happen the well should be properly abandon. Changes in conditions at the properties may occur with time due to natural processes or works of man on the properties or adjacent properties. Specifically, the properties are still under active use and chemicals may be applied to the properties between the date of this report and property redevelopment.

Changes in applicable standards may also occur as a result of legislation or broadening of knowledge. Accordingly, findings of this report may be invalidated, wholly or in part, by changes beyond our control.

4. Professional Signature

We declare that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property.

It has been a pleasure to be of service. If any questions arise, please contact our office.

Sincerely,

Priority One Environmental, Inc.

January 15, 2019

Mr. Paul Robinson
Priority One Environmental, Inc.
19528 Ventura Boulevard, #268
Tarzana, CA 91356

Dear Mr. Robinson:

This letter presents the results of the soil vapor investigation conducted by Optimal Technology (Optimal), for Priority One Environmental, Inc. on January 14, 2019. The study was performed at 1309-1311 S. Pacific Ave., Los Angeles, California.

Optimal was contracted to perform a soil vapor survey at this site to screen for possible chlorinated solvents and aromatic hydrocarbons. The primary objective of this soil vapor investigation was to determine if soil vapor contamination is present in the subsurface soil.

Gas Sampling Method

Gas sampling was performed by hydraulically pushing soil gas probes to a depth of 2.5 feet below ground surface (bgs). An electric rotary hammer drill was used to drill a 1.0-inch diameter hole through the overlying surface to allow probe placement when required. The same electric hammer drill was used to push probes in areas of resistance during placement.

At each sampling location, an electric vacuum pump set to draw 0.2 liters per minute (L/min) of soil vapor was attached to the probe and purged prior to sample collection. Vapor samples were obtained in SGE gas-tight syringes by drawing the sample through a luer-lock connection which connects the sampling probe and the vacuum pump. Samples were immediately injected into the gas chromatograph/purge and trap after collection. New tubing was used at each sampling point to prevent cross contamination.

All analyses were performed on a laboratory grade Agilent model 6890N gas chromatograph equipped with an Agilent model 5973N Mass Spectra Detector and Tekmar LSC 3100 Purge and Trap. A Restek column using helium as the carrier gas was used to perform all analysis. All results were collected on a personal computer utilizing Agilent's MS and chromatographic data collection and handling system.

Quality Assurance

5-Point Calibration

The initial five-point calibration consisted of 20, 50, 100, 200 and 500 ul injections of the calibration standard. A calibration factor on each analyte was generated using a best fit line method using the Agilent data system. If the r^2 factor generated from this line was not greater than 0.990, an additional five-point calibration would have been performed. Method reporting limits were calculated to be 0.004-1.0 micrograms per Liter (ug/L) for the individual compounds.

A daily calibration check was performed using a pre-mixed standard supplied by Scotty Analyzed Gases. The standard contained common halogenated solvents and aromatic hydrocarbons (see Table 1). The individual compound concentrations in the standards ranged between 0.025 nanograms per microliter (ng/ul) and 0.25 ng/ul.

TABLE 1

Dichlorodifluoromethane	Carbon Tetrachloride	Chloroethane
Trichlorofluoromethane	1,2-Dichloroethane	Benzene
1,1-Dichloroethene	Trichloroethene	Toluene
Methylene Chloride	1,1,2-Trichloroethane	Ethylbenzene
trans-1,2-Dichloroethene	Tetrachloroethene	m-/p-Xylene
1,1-Dichloroethane	Chloroform	o-Xylene
cis-1,2-Dichloroethene	1,1,1,2-Tetrachloroethane	Vinyl Chloride
1,1,1-Trichloroethane	1,1,2,2-Tetrachloroethane	Freon 113
4-Methyl-2-Pentanone	Cyclohexane	Acetone
Chlorobenzene	2-Butanone	Isobutane

Sample Replicates

A replicate analysis (duplicate) was run to evaluate the reproducibility of the sampling system and instrument. The difference between samples did not vary more than 20%.

Equipment Blanks

Blanks were run at the beginning of each workday and after calibrations. The blanks were collected using an ambient air sample. These blanks checked the septum, syringe, GC column, GC detector and the ambient air. Contamination was not found in any of the blanks analyzed during this investigation. Blank results are given along with the sample results.

Tracer Gas Leak Test

A tracer gas was applied to the soil gas probes at each point of connection in which ambient air could enter the sampling system. These points include the top of the sampling probe where the tubing meets the probe connection and the surface bentonite seals. Isobutane was used as the tracer gas. No Isobutane was found in any of the samples collected.

Purge Volume

The standard purge volume of three volumes was purged in accordance with the July 2015 DTSC/RWQCB Advisory for Active Soil Gas Investigations.

Shut-in Test

A shut-in test was conducted prior to purging or sampling each location to check for leaks in the above-ground sampling system. The system was evaluated to a minimum measured vacuum of 100 inches of water. The vacuum gauge was calibrated and sensitive enough to indicate a water pressure change of at least 0.5 inches.

Scope of Work

To achieve the objective of this investigation a total of 5 vapor samples were collected from 4 locations at the site. Sampling depths, vacuum readings, purge volume and sampling volumes are given on the analytical results page. All the collected vapor samples were analyzed on-site using Optimal's mobile laboratory.

Subsurface Conditions

Subsurface soil conditions at this site offered sampling flows at 0-10" water vacuum. Depth to groundwater was unknown at the time of the investigation.

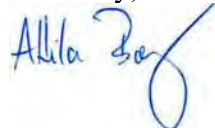

Results

During this vapor investigation, numerous analytes were detected in several samples collected above the listed reporting limit. Please see the complete table of analytical results included with this report.

Disclaimer

All conclusions presented in this letter are based solely on the information collected by the soil vapor survey conducted by Optimal Technology. Soil vapor testing is only a subsurface screening tool and does not represent actual contaminant concentrations in either the soil and/or groundwater. We enjoyed working with you on this project and look forward to future projects. If you have any questions, please contact me at (877) 764-5427.

Sincerely,

Attila Baly
Project Manager

Project: **PIE-19-01-03**
Lab I.D.: **190114-20 through -23**

Dear Mr. Robinson:

The **analytical results** for the soil samples, received by our lab on January 14, 2019, are attached. The samples were received intact, and accompanying chain of custody.

Enviro-Chem, Inc. **appreciates the opportunity to provide you and your company this and other services.** Please do not hesitate to call us if you have any questions.

Sincerely,

Curtis Desilets
Vice President/Program Manager

Andy Wang
Laboratory Manager

Subject: Phase II Environmental Site Assessment for
1337 South Pacific Avenue,
Los Angeles, CA 90731
APN: 7454026014
Los Angeles County
Lat: 33.731820, Long: -118.288332

1. Introduction

As requested, Priority One Environmental, Inc. has prepared a Phase II Environmental Site Assessment (ESA) for 1337 South Pacific Avenue, Los Angeles, CA 90731. The property is identified by the Assessor's Parcel Numbers (APN) 7454026014. For the purpose of this report, the term "Property" shall refer to either one property or multiple properties. The purpose of the Phase II is to evaluate the subsurface soils in the area of the former gasoline service station and the suspected underground storage tank in the center of the property.

Site History

From 1908 to 1920 the property is vacant land. In 1920, a permit for a gasoline service station was issued. In 1924 a permit was issued for an 800 square foot steel frame shed. The shed building is listed as an Auto Cleaner in the 1950 Fire Insurance Sanborn Map. The Gasoline Service station operated from 1920 to 1959, when the buildings were demolished, and the property was redeveloped into the existing asphalt parking lot.

Site Description

Location and Legal Description

The property is located at 1337 South Pacific Avenue, Los Angeles, CA 90731. The property is identified by the Assessor's Parcel Number (APN) 7454026014.

Site and Vicinity General Characteristics

The property is located in is located within the City of Los Angeles in the community of San Pedro. The site is located on the northwest corner of South Pacific Avenue and West 14th Street. Approximately three-quarters of a mile west of the Main Channel for the Port of Long Beach.

Description of Improvements on Property

The subject property consists of a 9,147 square foot roughly rectangle parcel. The property is currently an asphalt parking lot which connects to South Pacific Avenue via a concrete driveway.

Current Uses of Adjoining Properties

Direction	Type of Use
North	1331 South Pacific Avenue – Dance Hall Building.
East	1330 South Pacific Avenue – Retail Stores.
South	501 West 14th Street – Apartment Building.
West	524 West 14th Street – Residential Triplex.

2. Regional Geology

Introduction

Underlying the property is the Holocene to late Pleistocene age Alluvial deposits of the Palos Verdes Hills. Mantling the alluvium at the site is a veneer of soil and hardscape. These units are described below:

Surficial Material

Soil

Mantling the property is a varying thickness of residual soil. The soil consists of light to medium brown, sandy clay, containing some roots, organic debris and gravel. These materials were slightly moist at the time of our investigation.

Alluvium (Qoa)

According to the Geologic Map of Palos Verdes Peninsula and Vicinity, By Thomas W. Dibblee, Jr. (1999), the Property is located in an area of older alluvial deposits that have been accumulating since Pleistocene time. The alluvium consists of sandy loam and loamy clay, with pebbles derived mostly from the Miocene hard siliceous shale and limestone. These materials consist of coarse to medium-grained sands, intercalated with abundant lenses of silts and clays. These deposits are moderately dense, and the moisture content varies seasonally.

Groundwater

No springs or seeps were observed at the site. Groundwater was not encountered during drilling activities.

Based on a computerized review of historic groundwater well data as maintained by the California State Water Resource Control Board, the depth to the highest recorded regional groundwater surface within the vicinity of the subject site is 15 feet below ground surface, approximately 870 feet to the south of the Property (Los Angeles RWQCB (Region 4) Case # 907310370A). RWQCB (Region 4) Case # 907310617 is located approximately 1,733' to the northwest and lists groundwater at a depth of 20 feet below ground surface.

It should be recognized that the water table elevation might fluctuate with time. The depth to groundwater can be expected to fluctuate both seasonally and from year to year. Fluctuations in the groundwater level may occur due to variations in precipitation, irrigation practices at the property and in the surrounding areas, climactic conditions, flow in adjacent or nearby canals, pumping from wells and possibly as the result of other factors that were not evident at the time of our investigation.

3. Phase II Environmental Site Assessment

Sampling Strategy and Locations

This investigation is intended as a screening-level tool to determine whether Total Petroleum Hydrocarbons related impacts to the Property exist at the specific portions of the property as discussed below:

The location of the investigation included three borings in the location of the around the suspected underground storage tank “UST”, one boring along the east property line and in one boring in the western portion of the property. From the five borings, a total of twenty soil samples were collected at locations determined by on-site personnel.

Health and Safety

Underground Service Alert was contract a minimum of 2 days prior to the start of work. The underground utility markings were reviewed prior to the start of any invasive work.

On Thursday, August 23, 2018 a ground penetrating survey was conducted to determine if any underground storage tanks and associated piping still existed on the property prior to drilling. A suspected UST was located near the center of the property. No other USTs or piping was located below the asphalt parking lot.

Prior to start of work, a brief “tailgate safety meeting” was conducted to inform the field crew of anticipated hazards and the emergency action plan for the site. On-site workers used Level D personal protective equipment.

Sample Locations and Collection Methods

The five boreholes are described below:

- Borehole B-1, the location of this borehole located approximately 42’ to the west of the east property line and approximately 8’ north of the south property line. Approximately 3’ to the southeast of the suspected UST.
- Borehole B-2, the location of this borehole is located approximately 60’ to the west of the entrance gate. Approximately 5’ to the west of the suspected UST.
- Borehole B-3, the location of this borehole is located approximately 40’ to the west of the entrance gate. Approximately 5’ to the east of the suspected UST and 3’ south of the depression in the asphalt.
- Borehole B-4, the location of this borehole was located in the southeast portion of the subject property, on the south side of the entrance roughly 10’ off the property line fence.
- Borehole B-5, the location of this borehole is located approximately 120’ to the west of the entrance gate.

A direct push truck mounted rig was used to drill down to the sampling depth. The soil was collected in a clear plastic liner. The retrieved soil was described, select samples were collected in sterile, clean glass jars, capped, and labeled. The selected samples were immediately placed on ice and transported under chain of custody to DHS-certified Enviro-Chem, Inc. in Pomona, California. The samples locations are depicted in Plate 1. Quality assurance and quality control (QA/QC) samples (i.e., field blanks, trip blanks, laboratory blanks) were not used during this project.

The boreholes encountered a medium to dark brown, fine to medium grained silty sand which progress to a bark brown sandy clay to a light brown sand in B-3 & B-4. No groundwater was encountered during the drilling effort. Borehole Logs are Attached as B-1 through B-5.

All soil samples were analyzed for Total Petroleum Hydrocarbons (TPH), BTEX, and Lead.

Laboratory Results

The table below presents the laboratory results as reported by Enviro Chem, Inc. Complete laboratory results are attached. The Regional Screening Levels were reviewed for each chemical in a residential setting. Screening Levels provide a risk-based determination of environmental concerns on a potentially contaminated property. Note that the lab reports concentrations are in parts per million (mg/kg). If there is a number in the column in the table, it means a chemical was detected and the number represents the concentration. If there is a ND in the column it means “Non-Detect”. Results in **bold** indicate levels detected above action levels for the Los Angeles Regional Water Quality Control Board.

Note: Samples collected from B-5, were placed on hold, as the boring location in on the western portion of the property and not in the area of the former gasoline service station.

	B-4@16'	ND	ND	ND	ND
	Regional Screening Levels	0.23	970	5.1	560

Samples B-1@2', B-3@2', B-4@2', B-5@2' detected low levels of Total Petroleum Hydrocarbons (TPH) in the Diesel and Motor Oil ranges. Sample B-4@5' detected low levels of TPH in the diesel range. Low levels of lead were detected in fourteen of the sixteen samples analyzed. All samples were non-detect for BTEX.

Summary and Opinion

The property is located at 1337 South Pacific Avenue, Los Angeles, CA 90731. The property is identified by the Assessor's Parcel Number (APN) 7454026014. The purpose of the Phase II is to evaluate the subsurface soils in the area of the former gasoline service station and the suspected underground storage tank in the center of the property. Prior to drilling, a GPR survey of the property was conducted. A suspected UST was located near the center of the property. The edges of the UST were marked by the GPR operator. The approximate dimension of the UST is 30' by 10'. Three borings (B-1, B-2, & B-3) were located around the UST, one sample (B-4) was located in the area of the former gasoline service station building, and one boring (B-5) was located on the west portion of the property.

Samples B-1@2', B-3@2', B-4@2', B-5@2' detected low levels of Total Petroleum Hydrocarbons (TPH) in the Diesel and Motor Oil ranges. Sample B-4@5' detected low levels of TPH in the diesel range.

All samples were analyzed for lead, fourteen samples detected low levels of lead in soils.

All samples were non-detect for BTEX.

Samples from Boring B-5 were not analyzed based the historical use of the west portion of the subject property (ESA Phase I Report, dated August 3, 2018 and prepared by Priority One Environmental, Inc.) and low levels of contaminants found in the area the suspected UST and former gasoline service station.

The historical use of the Property as a gasoline service station and present use of the Property as an asphalt parking lot since 1960 (58 years) is the suspected sources of the low levels of diesel and motor oil in surface samples collected at 2' and 5'. The levels were below action levels for residential soil.

4. Conclusion and Recommendations

Priority One Environmental analyzed sixteen samples from subsurface soils to a maximum depth of 16' below ground surface. Contaminates above the Regional Screening levels were not detected. The suspected UST should be confirmed and if confirmed, the City of Los Angeles Fire Department ("LAFD") should be contacted and the UST should be removed per LAFD requirements.

Special Terms and Conditions

We have been authorized by **Mr. O'Neill and Root Real Estate, LLC.** to perform a Phase II environmental site assessment of the subject property. It is our understanding that **Mr. O'Neill and Root Real Estate, LLC.** will use the information contained in this report for due diligence and as part of the financing of the property. Without prior written consent of the client, Priority One Environmental, Inc. will keep confidential and not disclose to any person or entity, and data or information provided by the client or generated in conjunction with the performance of this study, except when required by law. Provisions of confidentiality shall not apply to data or information obtained from the public domain or acquired from third parties not under obligation to the client to maintain confidentiality.

User Reliance

This report was prepared for the exclusive use of **Mr. O'Neill and Root Real Estate, LLC.** No other person or entity is entitled to rely upon this report without the specific written authorization of Priority One Environmental, Inc.. Such reliance is subject to the same limitations, terms, and conditions as the original contract with the client. Priority One Environmental, Inc. specifically disclaims any responsibility for any unauthorized use of this report.

Limitations

Our professional services were performed, our findings obtained, and our conclusions proposed in accordance with generally accepted principles and practices. This warranty is in lieu of all other warranties either expressed or implied. Test findings and statements of professional opinion do not constitute a guarantee or warranty, expressed or implied.

Opinions provided herein apply to the currently available data, and existing and reasonably foreseeable conditions at the time of this investigation. They cannot apply to changes in site conditions of which this office is unaware or has not had the opportunity to evaluate. Soil samples are collected from a small "representative area of soil", these samples are assumed to represent the chemical makeup of the general area, as such there may be variations in adjacent soils. To further reduce the client's liabilities, additional samples may be collected and analyzed to lower the possibility of generalizing the conditions and/or not locating an area of impacted soils at the site. Changes in conditions at the property may occur with time due to natural processes or works of man on the property or adjacent properties. Depending on the nature of the abandonment of the well and its current connection to the oil aquifer additional release can/may occur over time if this should happen the well should be reopened a properly abandon. Changes in conditions at the properties may occur with time due to natural processes or works of man on the properties or adjacent properties. Specifically, the properties are still under active use and chemicals may be applied to the properties between the date of this report and property redevelopment.

Changes in applicable standards may also occur as a result of legislation or broadening of knowledge. Accordingly, findings of this report may be invalidated, wholly or in part, by changes beyond our control.

5. Professional Signature

We declare that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property.

It has been a pleasure to be of service. If any questions arise, please contact our office.

Sincerely,

Priority One Environmental, Inc.

Project: **P1E-18-08-009**
Lab I.D.: **180824-10 through -29**

Dear Mr. Robinson:

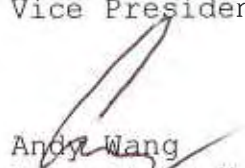

The **analytical results** for the soil samples, received by our lab on August 24, 2018, are attached. The samples were received intact, and accompanying chain of custody.

Enviro-Chem, Inc. appreciates the opportunity to provide you and your company this and other services. Please do not hesitate to call us if you have any questions.

Sincerely,

Curtis Desilets
Vice President/Program Manager

Andy Wang
Laboratory Manager

COMMENTS

C4-C10 = GASOLINE RANGE

C10-C28 = DIESEL RANGE

C28-C35 = MOTOR OIL RANGE

DF = DILUTION FACTOR

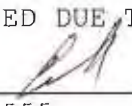

PQL = PRACTICAL QUANTITATION LIMIT

ACTUAL DETECTION LIMIT = DF X PQL

ND = NON-DETECTED OR BELOW THE ACTUAL DETECTION LIMIT

* = PEAKS IN DIESEL RANGE BUT CHROMATOGRAM DOES NOT MATCH THAT OF DIESEL STANDARD

^ = ACTUAL DETECTION LIMIT RAISED DUE TO MATRIX INTERFERENCE

Method Blank	---	ND	1
PQL		0.50	

COMMENTS:

DF = Dilution Factor

PQL = Practical Quantitation Limit

Actual Detection Limit = DF X PQL

ND = Non-Detected or below the Actual Detection Limit

TTLC = Total Threshold Limit Concentration

STLC = Soluble Threshold Limit Concentration

STLC Limit for lead = 5 PPM

* = STLC analysis is recommended (if marked)

** = Additional Analysis required, please call to discuss (if marked)

*** = The concentration exceeds the TTLC Limit @ 1000 PPM, therefore the sample is defined as hazardous waste, as per CCR-TITLE 22 (if marked)

DESCRIPTION OF SERVICES:	<input type="checkbox"/> CONCRETE SCANNING	<input type="checkbox"/> CONCRETE CUTTING	<input checked="" type="checkbox"/> UTILITY LOCATING	<input type="checkbox"/> CCTV
Instructions & Special Equipment: Utility Locating/GPR per PDF image				
Completion Notes: Had DC adapter go out for GPR unit. Down time from 7am to 11am. Performed A GPR survey across the entire parking lot and found 1 possible UST at approximately 5' deep. North to South dimension are unclear as I was not able to see a drop off that will indicate end of UST Easy to west dimension marked on surface. Soild conditions may affect GPR Readings. Best effort.

Disclaimer: Ground Penetrating Radar (GPR) is a non-destructive method used to locate embedded materials in concrete and soil such as plastic, metal, steel, voids etc. Safe2core, Inc. will not be liable for any damages to rebar, post-tension cables, conduits, or any other embedded targets that arise as a result of Ground Penetrating Radar inspections performed by our technicians. GPR has accuracy limitations that could result in human error. Safe2core, Inc. will not be liable for any damages to nonconductive lines (Non metallic, PVC, Water, Etc.) and for any conductive lines (Electrical, Gas, Etc.) with no accessible connection point or those that do not appear on blueprints, maps, or as-builts provided by customer prior to locating. Safe2core will not accept back charges under any circumstances for the repair of any damaged embedded target. Safe2core reserves the right to choose the repairing company if we believe Safe2core is responsible for it. Safe2core, Inc. will not be responsible for any loss or damage arising out of the use of, or reliance on the data collected, or the report presented. Customer further agrees that he/she has carefully read the forgoing release agreement, knows and understands the contents of the same, and signs this release agreement as his/her own free act. Customer shall indemnify and hold Safe2core, Inc. and its directors, officers, employees, and agents harmless from and against any liability and all claims, actions, proceedings, damages, losses and expenses (including attorneys' fees) arising from any personal injury or death, and for injury or destruction of property of a person or organization, including any loss that arise from the performance of the work under this agreement.

THE LOS ANGELES FIRE DEPARTMENT

UST TANK ABANDONMENT GUIDELINES

F.P.B. REQUIREMENT NO. 41 Rev. 2-01-2011

LOS ANGELES FIRE DEPARTMENT
UNDERGROUND STORAGE TANK PROGRAM
ABANDONMENT OF UNDERGROUND STORAGE TANKS

FPB REQUIREMENT NO. 41

1. Reference
2. Applying for a Div. 5 Permit (Service Request) to Abandon an Underground Storage Tank
3. Methods of Underground Storage Tank Abandonment
4. Removal of Underground Storage Tank as Hazardous Waste
5. Removal of Underground Storage Tanks as Certified Clean "On Site"
6. Post Removal Procedures
7. Abandonment of Underground Storage Tank by Filling
8. Method of Mixing and Pumping
9. Confined Space Requirements
10. Conclusion

1. Reference

- A. Los Angeles Fire Code, Division 5 and 31
- B. California Health and Safety Code, Chapter 6.7
- C. California Code of Regulations, Title 23, Division 3, Chapter 16
- D. California Code of Regulations, Title 8, Section 5156, 5157, 5158

2. Applying for a Div. 5 Permit (Service Request) to Abandon an Underground Storage Tank

A. Division 5 Permit issued by the Los Angeles Fire Department (LAFD) is required when abandoning a tank in the City of Los Angeles.

i. Apply at the Bureau of Fire Prevention, Environmental/Plan Check Unit located at: 221 North Figueroa Street, 15th floor, Room #1500.

B. Submit the following items in order to obtain; (1) approval to take the soil samples, (2) final approval to remove or abandonment in place any underground storage tank.

i. A completed application with check for permit fees.

ii. Proof of tank registration from the Data Management Unit, at (213) 978-3680.

iii. Three sets of scaled plot plans, 11x17.

a. Show location of underground storage tank(s), dispensers and piping on property.

b. Indicate property lines, streets, and structures (include dimensions)

c. Provide specific distances to tanks (i.e.: Tank #1 15' W. of Elm, 20' N. of Main) from two opposing directions.

d. Specify Tank(s) size, contents, and monitoring status.

e. Indicate boring location(s) for samples.

a. An LAFD Fire Inspector shall witness sampling for the removal of, or abandoning in place of, underground storage tanks.

C. To abandon the tank(s) and piping in place, justification shall be provided to the LAFD:

i. The Structural Engineer's Stability Report and

ii. The Site Assessment report.

iii. **ALL REQUESTS FOR ABANDONMENT IN PLACE SHALL BE SUBJECT TO A FIELD INSPECTION FOR APPROVAL**

D. Soil sample analysis reports shall be submitted prior to the issuing of the final permit to abandon in place.

E. Los Angeles City Business Tax Registration Certificate - The contractor who is removing the tank(s) shall have a proper and current Los Angeles City Business Tax Registration Certificate.

i. For City Business Tax Certificate, apply at the Office of Finance, located at 201 North Figueroa Street, Room 300, LA, and CA. 90012.

F. Appropriate State of California Contractor's License (copy required to be submitted).

i. Refer to State of California State Water Resources Control Board LG-48-5 "Licensing for Installation and Removal of Underground Storage Tanks."

a. *General Engineering Contractor A

b. *General Building Contractor B

c. *Plumbing Contractor C-36

d. *Limited Specialty Contractor C-61-D-40

e. *Hazardous Waste Contractor

f. Call the Contractors State License Board at (916) 366-5206 for further information.

G. Environmental Protection Agency (EPA) Identification Number:

i. The site owner shall provide a Hazardous Waste Site Generator's Identification Number.

ii. Call the State Department of Health Services at (916) 324-1826 to obtain the identification number.

H. The owner and contractor are responsible for obtaining any additional permits or licenses that are applicable to the abandonment of an underground tank. **EXAMPLE:** A grading permit is typically required from the Grading Section of the Los Angeles Department of Building and Safety (LADBS) 1-800-LABUILD.

- I. If the contents of the tank(s) are unknown, a sample shall be drawn and analyzed. A copy of the report shall be provided to the LAFD, delineating the contents of the tank.
- J. LAFD Plan Check personnel shall make a notation on the Division 5 Permit application that the contractor does possess the above described licenses and identification number. A copy of the analysis of the product shall be included in the Division 5 permit folder, if applicable.

3. Methods for Underground Storage Tank Abandonment

A. An underground storage tank may be abandoned either by removing it from the ground, or in unusual cases by filling it in place with an approved cement or slurry mixture. Abandoning the tank in place will only be permitted if there is no physically practical means of abandoning the tank(s) by removal (a Structural Engineers certification is required for this).

B. Abandonment by Removal

i. Preparing Underground Tanks for Removal

- a. No one-site work shall begin until all the requirements on Page 1 and 2 for a Division 5 Permit have been met, and the approved permit issued.
- b. If the tank is not empty, remove the product. If the product is:
 - a. **Flammable or combustible** - a Division 5 Permit must be obtained to transfer the product from the underground tank to a tank truck. Applications are available at the **Bureau of Fire Prevention, CUPA office at 200 North Main Street, Los Angeles, City Hall East, Suite 1740.**
 - b. **Hazardous Waste** - Any hazardous waste removed from the site shall be manifested and transported to a licensed hazardous waste disposal site or a licensed treatment, storage, and disposal facility (TSDF) by a licensed hazardous waste transporter, subject to all applicable government regulations.
- c. If only residue remains in the tank - remove it by utilizing an approved vacuum truck and hose. The residue is hazardous waste, and must be manifested and transported to a licensed hazardous waste disposal site or a licensed TSDF, by a licensed hazardous waste transporter, subject to all applicable government regulations.
- d. Electric lines, piping, and other tank appurtenances shall be isolated or disconnected. **All piping shall be left intact until the tank is exposed and ready to be removed.** Barriers and signs shall be installed where necessary, and any source of ignition shall be at least 25 feet away from the excavation. Signs shall state "NO SMOKING OR OPEN FLAMES."
- e. Prior to excavation, place a minimum of 20 pounds of dry ice per 1,000 gallons capacity into the tank at least **TWO HOURS PRIOR** to any further work being performed. If dry ice is to be inserted into the fill opening, remove the fill line drop tube and/or sleeve from the interior of tank prior to inserting ice.
- f. Begin the excavation work in cooperation with the owner and all concerned government agencies. Expose the tank and associated piping.
- g. Disconnect and **REMOVE** all electrical lines and in-tank pumps, but leave on site.
- h. No cutting torch, open flame, or spark producing equipment shall be used on the tanks or piping.
- i. Call the Underground Tank Enforcement Unit Inspector, (213) 978-3710 **at least two weeks** prior to start of work. Arrange a mutually agreed upon appointment date and time with the district Fire Inspector to be on-site to witness the abandonment.

4. Removal of Underground Storage Tank(s) as Hazardous Waste

A. A Fire Inspector **shall witness** steps 1 through 7 and complete step 8.

- i. Check the tank for an explosive atmosphere utilizing a combustible gas indicator. If the atmosphere inside the tank is found to be above 20 percent of the lower explosive limits (LEL), the tank **shall** be re-inerted. The atmosphere shall be brought below 20% of the LEL. Re-inert the tank with a minimum of **20 pounds of dry ice per 1,000 gallons of capacity**.
- ii. Lift the tank from the excavation and inspect for signs of leakage then secure it on an appropriate transport vehicle with its openings at the top. Underground storage tanks shall be removed intact. Tanks shall not be punctured or crushed on-site.
- iii. All tank identifications shall remain on the tank. Do not remove the Underwriter's Laboratory tag or any other identification from the tank.
- iv. Plug all tank openings with pliable material (i.e., paper, cloth, or rags).
- v. The licensed hazardous waste transporter shall prepare a Uniform Hazardous Waste Manifest and transport the tank to a licensed hazardous waste disposal site, subject to all applicable government regulations.
- vi. The Fire Inspector witnessing the abandonment shall be given a copy of the manifest, and shall be given the address as to where the tank will be transported.
- vii. Soil samples shall be obtained from beneath the tank, piping, spoils pile, and dispensers at the direction of the Fire Inspector.
- viii. When this operation is completed, the Fire Inspector shall have the following items in the completed Division 5 folder:
 - a. Division 5 Permit application package.
 - b. Division 5 Permit - stamped approved, signed and dated.
 - c. One set of plans.
 - d. A completed Hazardous Waste Manifest for the tank(s).
 - e. A copy of the analysis report shall be included, if the contents of the tank were unknown.
 - f. Clean Certificate from the Marine Chemist or Industrial Hygienist.
- ix. Soil analysis results from a state certified laboratory with chain of custody is required to be submitted to the Fire Department within 30 days of taking samples.

5. Removal of Underground Storage Tanks Certified Clean "On Site"

A. A combustible gas indicator (properly calibrated) is mandatory on the job site during the entire operation.

B. The tank shall be checked for an explosive atmosphere with a combustible gas indicator.

C. Air purging of the tank shall be initiated whenever the atmosphere inside the tank is above 20 percent of the lower explosive limits (LEL) and shall continue until the readings are at or below 5 percent LEL or 700 ppm (AQMD).

- i. Air purging, vacuuming, and high-pressure water rinsing equipment **shall** be bonded and grounded to prevent the accumulation of static electricity. Metal underground tanks shall be bonded to the above-described equipment. When working on fiberglass tanks the equipment shall be properly grounded.

D. The following requirements shall apply to bonding and grounding devices:

- i. Bonding and grounding devices shall be stranded wire not small than 8 AWG (American Wire Gauge) with appropriate connections at each end.
- ii. Secure metal-to-metal contact shall be made between the tank and equipment or the equipment and ground.
- iii. When grounding equipment, secure the end of the grounding device that is not attached to the equipment to an adequate ground, i.e., metal water pipe, metal drainage or sewer pipe that originates or terminates in the soil. If a ground (as described above) is not

available, a metal rod driven into the soil to a depth no less than 3 feet shall serve as a ground.

iv. The bonding and grounding device shall be connected to the following equipment as described below:

- a. Air purging equipment - The device shall be connected to the appliance where the air is discharged, i.e., at the venturi cone.
- b. Vacuuming equipment - The device shall be connected to the equipment where the liquid is being discharged, i.e., the vacuum truck.
- c. High-pressure water rinsing equipment - The device shall be connected to the appliance where the water is discharged, i.e., the wand or nozzle.

E. If there is no installed man-way on the tank, a cold cutting tool shall be used to cut a man-way. Only non-sparking tools shall be used. The dimensions of the man-way shall not be less than 24"x24" at the appropriate location to facilitate cleaning and visual inspection of the tank interior. Large tanks may require multiple man-ways to insure that all interior areas of the tank are visible for inspection.

F. If a high-pressure water rinse is used for the tank interior, a minimum of 2,000 psi and detergent (if necessary) is required. Other cleaning methods as per NFPA Standard 326 may be allowed. Vacuuming shall remove loose scale, sludge, and rinse water. When the sludge and other debris have been removed and the LEL is zero percent throughout the tank, the washing may cease.

G. All interior rinse water and sludge shall be manifested and transported to a licensed hazardous waste disposal site or licensed TSDF by a licensed hazardous waste transporter, subject to all applicable governmental regulations.

i. A copy of this manifest shall be provided to the Fire Inspector witnessing the abandonment.

H. Certification that the underground tank is clean* shall be made by one of the following:

- i. Certified Industrial Hygienist
- ii. Certified Safety Professional
- iii. Certified Marine Chemist**

iv. A technician working under the direct supervision of one of the above-referenced individuals.

- a. *The term "clean" shall mean that the inside of tank shall be void of all visible deposits, sludge, foreign materials, and flammable hazards.
- b. **A Certified Marine Chemist certifies tanks for "Hot Work." If the "Hot Work" is going to be performed at another location, a Certified Marine Chemist shall certify that the tank is clean and vapor free prior to transport.
- c. **NOTE:** A copy of the "Clean Certificate" shall be provided to the Fire Inspector.

I. The Division 5 Permit number and letters LAFD shall be painted on the tank.

i. If the tank was certified clean and vapor free by the Certified Marine Chemist and "Hot Work" is performed after being transported, the Marine Chemist shall paint his certification number on the tank under the Division 5 Permit number and LAFD letters. No other numbers shall be affixed to the tank.

J. All tank identifications shall remain on the tank. The removal of the Underwriters Laboratory tag or any other identification from the tank is prohibited.

K. The Fire Inspector shall witness the following:

- i. Removal of the clean tank and or piping from the excavation.
- ii. The collection of soil samples.

6. Post Removal and Soil Sampling Procedures

A. Soil samples shall be obtained from beneath the tank, piping, spoils pile, and dispensers at the direction of the Fire Inspector.

- B. Soil sampling shall be performed by a Professional Geologist, Civil Engineer, or Engineering Geologist who is registered or certified by the State of California. A trained technician shall be deemed qualified to take soil samples if they have a letter in their possession certifying their training and experience in taking soil samples and are under the supervision of one of the aforementioned professionals (a copy of the letter shall be provided to the LAFD Fire Inspector).
- C. A California State Certified Chemical Laboratory shall analyze all products that have been stored in the underground storage tank.
- D. If the product(s) are suspected of altering their chemical structure while in the soil, the analysis shall include the new substances.
- E. Soil samples **shall** be collected from natural soil, two feet in depth, where the bottom of the tank rested in the excavation, **not** backfill material. If tank is less than 1,000 gallons capacity, a minimum of one soil sample shall be taken from under the center of the tank.
- F. Tanks of greater capacity than 1,000 gallons shall have samples taken from the ends of the tanks. In no case shall samples be taken more than 20 feet apart.
- G. Soil sample locations from beneath piping shall start at the dispenser, taken at a maximum of 20' distance intervals of straight piping, each 45-degree turn, 90-degree turn, and coupling.
- H. All excavated soil (from the unearthing of an underground storage tank) must be retained on site and covered until determination of contamination and disposal has been made. Soil may be removed only with approval from the Chief.
- I. When the soil samples are analyzed, a report of the results shall be sent to the Fire Inspector who witnessed the removal. The report shall comply with the "UST Site Assessment - Report General Guidelines." The report shall include a statement verifying that the licensed professional in charge and responsible for the project, supervised or personally conducted all work associated with the project within the purview of the professional, as defined in the Professional Engineers Act or the Registered Geologists Act of the California Code of Regulations. A wet ink signature (in blue ink) and seal of the professional, including the expiration date of the license, shall be on the report at the end of the statement required above.
- J. The Fire Inspector present during the removal shall provide a business card to the soil sample collector and inform that person to send the complete soil report to their attention at the address on the business card within 30 days.
- K. Soil samples shall be collected from underneath the dispenser pit.
 - i. Compliance with LAFD requirements does not preclude the necessity for complying with the regulations and requirements of other authorities and licensing agencies. For additional information, contact the Underground Tank Unit, FPB, Monday through Friday, 7am to 4pm at 213-978-3700.

7. Abandonment of Underground Storage Tanks by Filling

- A. Filling a tank in place will only be considered if there is no practical means of abandoning the tank by removal, such as a tank located beneath a building. The following procedure shall be used.
 - i. A wet ink signed (in blue ink) letter from a Structural Engineer stating the reasons that the tank should be abandoned in place shall be provided. The Structural Engineer's official stamp and expiration date shall also be on the letter (the letter does not guarantee approval). The letter shall include but not be limited to:
 - a. Justification for abandoning in place
 - b. The slurry mixture to be used based on needs for stability:
 - a. Minimum of 100 E 100
 - b. 95% or greater in strength
 - c. The statement "NO COMPACTION PERMITTED"

- ii. All abandonment in place shall be subject to approval by field inspection prior to issuing final permit.
- iii. No on-site tank work shall be initiated until:
 - a. All the requirements set forth above for a Division 5 Permit have been met.
 - b. Items B1-3 have been submitted in a report format to the Fire Inspector. The report shall comply with the "SITE ASSESSMENT WORK-PLAN REQUIREMENTS"
 - c. The approved permit is issued.
 - d. Items B1-10 below shall be witnessed by a Fire Inspector.
- B. Prior to the issuance of the final permit:
 - i. Soil samples shall be obtained from beneath the tank and piping.
 - ii. Soil sampling shall be performed by a Professional Geologist, Civil Engineer, or Engineering Geologist who is registered or certified by the State of California. A trained technician shall be deemed qualified to take soil samples if they have a letter in their possession certifying their training and experience in taking soil samples and are under the supervision of one of the aforementioned professionals.
 - a. Soil sampling shall be done in the presence of the LAFD Inspector.
 - b. The onsite Fire Inspector shall determine the quality and locations of the soil sampling.
 - iii. Collect and analyze soil samples in accordance with Section 2645, Article 4, Subchapter 16, Title 23, Waters, California Code of Regulations. A State Certified Laboratory shall perform the analysis. A copy of the report must be provided to the LAFD Inspector who witnessed the sampling when applying for a Division 5 Permit to abandon an underground tank by filling.
 - a. **EXCEPTION:** Where it is not possible or practical to obtain soil samples, the contents of the tank shall be sampled, verified, and analyzed in accordance with this time #3. In addition, a tank integrity test shall be performed to verify any possible leakage.
 - iv. Remove the tank's product if it has not already been previously removed and if the product is:
 - a. **Flammable or combustible** - A Division 5 Permit must be obtained to transfer flammable or combustible product from the underground tank to a tank truck. Apply for this permit at the **Bureau of Fire Prevention, CUPA office at 200 North Main Street, Los Angeles, City Hall East, Suite 1740.**
 - b. **Hazardous Waste** - Any hazardous waste removed from the site shall be manifested and transported to a licensed hazardous waste disposable site or a licensed treatment, storage, and disposal facility (TSDF) by a licensed hazardous waste transporter, subject to all applicable government regulation.
 - v. **If only residue remains** in the tank, remove it utilizing an appropriate vacuum truck and hose. The residue shall be considered a hazardous waste. It must be manifested and transported to a licensed hazardous waste disposal site or a licensed TSDF by a licensed hazardous waste transporter, subject to all applicable government regulations.
 - vi. All electric lines, piping, and appurtenances associated with the tank shall be isolated or disconnected. Where possible, remove the tank vent lines at ground level (leave all product and vent lines in place until verified by Fire Inspector). All segments of pipe, which remain attached to the tank, shall have any open ends plugged with a pliable material. Barriers and signs shall be installed where necessary. Any source of ignition shall be at least 25 feet away from the tank. Signs shall state, "**NO SMOKING OR OPEN FLAMES.**"
 - a. **NOTE:** No cutting torch, open flame or spark producing equipment shall be used on the tanks or piping.
 - vii. On tanks equipped with fill pipes extending below the tank top, remove the piping, which extends into the tank.
 - viii. Call the Underground Tank Enforcement Unit at least **TWO WEEKS** prior to start of work. Arrange a mutually agreed upon appointment date and time for the Fire Inspector to be on-site to witness the abandonment.

- ix. The tank interior shall be washed and made as liquid and deposit free is possible. The tank shall be washed in accordance with the instructions provided by the LAFD when the Division 5 Permit was issued.
- x. The concrete slurry mix to be used to fill the tank shall be in accordance with:
 - a. Structural Engineer's report for stability
 - b. Minimum of 100 E 100
 - c. 95% or greater in strength
 - d. The following may be used as a reference:
 - a. Greenbook: "Standard Specifications for Public Works Construction" Section 201, Table 201-1.1.2a, Tranch Backfill 100 E 100

8. Method of Mixing and Pumping

- A. The equipment used to move the fill mixture into the tank shall be positive displacement pump of the type and design used for hydraulically moving concrete.
- B. Attach the pump hose connection to the tank fill pipe by means of the pipe threads or a suitable adaptor.
- C. Attach drain hoses to the tank vents by tight fitting or threaded connections. The drain hoses shall terminate in containers provided for the specific purpose of collecting any residual liquids, which are forced out of the tank during the filling operation. Any liquids collected shall be manifested and transported to a licensed hazardous waste transporter, subject to all applicable government regulations. A copy of the manifest shall be provided to the Fire Inspector witnessing the tank abandonment.
- D. Pump the fill mixture into the tank until it flows out of the vent lines. The Fire Inspector shall determine that the tank is full and shall direct any other operations required to properly complete the abandonment procedure. If the piping is physically impractical to remove, as determined by the Fire Inspector, fill the piping with the approved fill mixture in a like manner.
- E. Any underground tank-monitoring well that is no longer required shall be destroyed or filled so it will not produce water or act as a means for groundwater contamination.

9. Confined Space Requirements

- A. Prior to any employee entering a tank they shall comply with the following:
 - i. California Code of Regulations, Title 8, Section 5156, 5157, 5158

10. Conclusion

- A. When the abandonment operation is completed, the owner is required to provide the following items in the completed Division 5 Permit folder:
 - i. Properly completed Division 4 Permit application.
 - ii. Division 5 Permit with approval stamp, signature and date.
 - iii. One set of plans.
 - iv. Copy of the Hazardous Waste Manifest for the cleaning solution and residue.
 - v. Copy of the "Clean Certificate."
 - vi. Copy of the soils analysis report with chain of custody.
 - vii. Tank Time Survey.
 - viii. If the contents of the tank were unknown, a copy of the analysis report shall be included.

ix. Copy(s) of slurry receipts.

x. Structural Engineer letter (when abandoning in place).

a. **NOTE:** The LAFD **does not** have a temporary abandonment policy, any tank(s) that **have not** been in service for a period of 90 days or more, shall be permanently abandoned by one of the above approved methods.

If you require additional information from the LAFD, contact the Environmental Unit Plan Check at 213-482-7115.

Los Angeles Regional Water Quality Control Board

August 22, 2019

Mr. O'Neill
RKD 13 Pac L.P.
2615 Pacific Coast Hwy Facility ID#:41292
Hermosa Beach, CA 90254

UNDERGROUND STORAGE TANK PROGRAM – NON-CASE DETERMINATION

ROOT REAL ESTATE, LLC FACILITY LOCATED AT 1331-1337 SOUTH PACIFIC AVENUE, SAN PEDRO, CALIFORNIA

Dear Mr. O'Neill:

On August 8, 2019, the City of Los Angeles Fire Department transmitted this case to our agency due to concerns regarding soil and groundwater impacts from the subject site (Site). The California Regional Water Quality Control Board, Los Angeles Region (Los Angeles Regional Board), is the public agency with primary responsibility for the protection of ground and surface water quality for all beneficial uses within the Los Angeles and Ventura counties. As such, the Los Angeles Regional Board is the lead regulatory agency for overseeing corrective actions (assessment and/or monitoring activities) and cleanup of releases from leaking underground storage tank (UST) systems at the Site.

We have received the following document for the Site:

- "Priority 1 Environmental Phase II Site Investigation Report" (Report) dated September 7, 2018, by Priority 1 Environmental.

Based on our review of the submitted document, we have the following comments:

- According to the Report, the site was operated as a gasoline service station from 1920 to 1959. No records for underground storage tank removal were found for this site.
- In September 2018, a ground penetrating radar (GPR) was conducted and identified an anomaly that appeared to be a UST at the Site. Five soil borings (B-1 through B-5) were drilled to a maximum depth of 16 feet below ground surface (bgs) and soil samples were collected from the site.

- Soil samples collected were analyzed for:
 - Total petroleum hydrocarbons (TPH) by modified EPA Method 8015M; and
 - Benzene, toluene, ethylbenzene, and xylenes (BTEX), and fuel oxygenates by EPA Method 8060B.
- Laboratory results for all soil samples collected and detected TPHg at 206 mg/kg, TPHd at 1,117 mg/kg, lead at 5.34 mg/kg and non-detect for benzene, toluene, ethylbenzene, xylenes and fuel oxygenates.
- Additionally, soil excavation was conducted to a maximum depth of 6 feet bgs at the suspected UST farm identified by the GPR survey at the site and did not encounter USTs or associated pipelines.

Based on the information available to us, Los Angeles Regional Board staff has determined that residual concentrations of fuel constituents pose a low threat to human health, and soil and groundwater quality beneath the Site. Therefore, no further action is required at this time. The Los Angeles Regional Board Underground Storage Tank Program is not opening a case for the Site. Please note this determination is only pertinent to the UST related area.

If you have any questions, please contact Dr. Yi Lu at (213) 576-6695 or Ylu@waterboards.ca.gov.

Sincerely,

Yue Rong, Ph. D.
Program Manager
Underground Storage Tank Program

EXECUTIVE SUMMARY

The purpose of this report is to determine if a proposed project (the Project) in the San Pedro Community Plan Area of the City of Los Angeles would impact any historical resources subject to the California Environmental Quality Act (CEQA). The Project site is located at 1309-1331 S. Pacific Avenue and includes three separate parcels containing commercial buildings constructed between 1924 and 1940 (the properties).

The Project would involve the removal of all buildings on the properties and the construction of a multi-family residential development in their place. None of the properties on the Project site are currently listed under national, state, or local landmark or historic district programs. They have not been identified in any historic resources surveys of the area, including SurveyLA, the citywide historic resources survey of Los Angeles. A records search prepared by the SCCIC revealed a potential prior evaluation of 1309-1311 S. Pacific Avenue and 1331 S. Pacific Avenue; the properties have a Status Code of 5S2 (individual property that is eligible for local listing or designation). However, no other details or further documentation was available as part of the record search results. Since no date of evaluation was given, it was assumed that the evaluation was at least five years old, and the properties required re-evaluation.

GPA Consulting (GPA) evaluated all buildings on the Project site as individual potential historical resources as defined by CEQA. The surrounding area was not examined as a potential historic district for the purposes of this report. It was not recorded as a potential historic district during SurveyLA. Although the area developed as San Pedro's commercial corridor in the 1920s, it does not retain the integrity of setting and feeling needed to convey a sense of a discrete time and place.

After careful inspection, investigation, and evaluation, GPA concluded that none of the properties appear to be eligible for listing in the National Register of Historic Places or California Register of Historical Resources, or for designation as a Los Angeles Historic-Cultural Monument due to a lack of significance, architectural distinction, and physical integrity. Furthermore, the properties do not contribute to a potential historic district. Therefore, the properties are not historical resources as defined by CEQA. As such, the Project would have no impact on historical resources and no further study is recommended or required.

1. INTRODUCTION

1.1 Purpose and Qualifications

The purpose of this report is to analyze whether or not a proposed project (Project) would impact historical resources as defined by the California Environmental Quality Act (CEQA). The Project site is located at 1309-1331 S. Pacific Avenue in the San Pedro Community Plan Area in the City of Los Angeles. It comprises three parcels (Assessor's Parcel Numbers 7454-026-011, 7454-026-012, and 7454-026-013) (see **Table 1** and **Figure 1**). The proposed Project would involve the removal of all buildings on the Project site and the construction of a multi-family residential development in their place.

Table 1: 1309-1331 S. Pacific Avenue Project Site

APN	Address	Description	Built Date
7454-026-011	1309-1311 S. Pacific Avenue	One-story commercial	1932
7454-026-012	1319-1323 S. Pacific Avenue	One-story commercial office	1924
7454-026-013	1331 S. Pacific Avenue	One-story commercial	1940

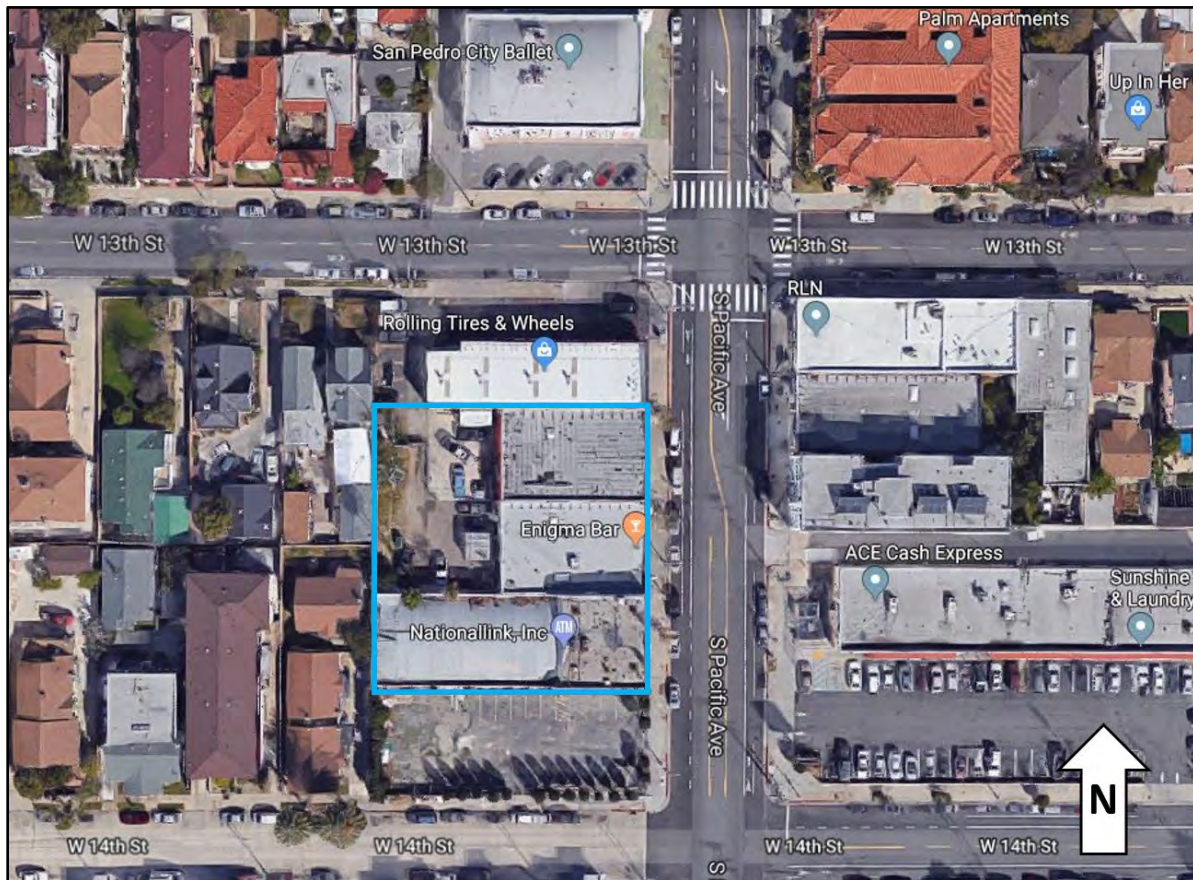

Figure 1: Location of the Project site, which is outlined in blue (Base map: Google Maps).

GPA Consulting (GPA) was retained to evaluate the properties comprising the Project site as potential historical resources in compliance with CEQA. Elysha Paluszek was responsible for the preparation of this report. She fulfills the qualifications for a historic preservation professional outlined in Title 36 of the Code of Federal Regulations, Part 61. Her résumé is included in **Appendix A**.

1.2 Methodology

In preparing this report, GPA performed the following tasks:

1. Requested a records search from the South Central Coastal Information Center (SCCIC) to determine whether or not the subject properties are currently listed under national, state, or local landmark or historic district programs and whether or not any have been previously identified or evaluated as a potential historical resource. This involved a review of the California Historic Resources Inventory System (CHRIS), which includes data on properties listed and determined eligible for listing in the National Register of Historic Places, listed and determined eligible for listing in the California Register of Historical Resources, California Registered Historical Landmarks, Points of Historical Interest, as well as properties that have been evaluated in historic resources surveys and other planning activities. Per the records search results prepared by SCCIC on April 4, 2019, the buildings located at 1309-1311 S. Pacific Avenue and 1331 S. Pacific Avenue may have been previously evaluated and given a Status Code of 5S2 (individual property that is eligible for local listing or designation). However, no further documentation of these previous evaluations was provided, including the date of the survey or an inventory form. The properties have an address in the CHRIS of 1311 and 1329 Pacific Avenue. Due to the way the CHRIS listings are organized, properties on South Pacific Avenue are categorized separately from those on Pacific Avenue; however, the properties do not appear listed under South Pacific Avenue. The date of construction for the building at 1309-11 S. Pacific Avenue and the property listed as 1311 Pacific Avenue in the HRI are the same, so they are likely the same building. The date of construction of the building at 1331 S. Pacific Avenue and the listing for 1329 Pacific Avenue in the HRI do not match, however, so they may not be the same building. Since no date of evaluation was given, it is assumed that the evaluations are at least five years old, and the properties require re-evaluation. See **Appendix B** for the records search results.
2. Researched the properties to determine whether or not they were identified as significant through SurveyLA, the citywide historic resources survey. This research revealed that none of the properties were identified as a potential historical resource as part of these efforts.
3. Conducted a field inspection of the Project site to ascertain the general condition and physical integrity of the buildings thereon. Digital photographs of the exterior of all buildings on the Project site were taken during this field inspection; interior photographs were taken when access was possible.

The surrounding area was considered as a potential historic district but upon examination, was not evaluated as one for the purposes of this report. It was not recorded as a historic district during SurveyLA. Although the area developed as San Pedro's commercial corridor in the 1920s, it does not retain the integrity of setting and feeling needed to convey a sense of time and place. Therefore, the subject properties were each evaluated as individual potential historical resources under national, state, and local criteria according to National

Park Service, State Office of Historic Preservation, and Los Angeles Office of Historic Resources standards.

4. Conducted research into the history of the properties. Much of the archival information utilized in this report was obtained from two Phase I Environmental Site Assessment (Phase I ESA) Reports compiled by Priority 1 Environmental in August and December 2018. Sources referenced included building permit records, city directories, historic aerial photographs, and Sanborn Fire Insurance maps. Additional sources consulted included the *Los Angeles Times* newspaper archives, available through the Los Angeles Public Library.
5. Consulted the Context/Theme/Property Type (CTP) eligibility standards formulated for the *Los Angeles Citywide Historic Context Statement* to identify the appropriate CTPs under which to evaluate the properties.
6. Reviewed and analyzed ordinances, statutes, regulations, bulletins, and technical materials relating to federal, state, and local historic preservation designations, and assessment processes and programs to evaluate the significance and integrity of the properties as potential historical resources.

2. REGULATORY FRAMEWORK

Generally, a lead agency must consider a property a historical resource under CEQA if it is eligible for listing in the California Register of Historical Resources (California Register). The California Register is modeled after the National Register of Historic Places (National Register). Furthermore, a property is presumed to be historically significant if it is listed in a local register of historical resources or has been identified as historically significant in a historic resources survey (provided certain criteria and requirements are satisfied) unless a preponderance of evidence demonstrates that the property is not historically or culturally significant.¹ The National Register, California Register, and local designation programs are discussed below.

2.1 National Register of Historic Places

The National Register is "an authoritative guide to be used by federal, state, and local governments, private groups, and citizens to identify the nation's cultural resources and to indicate what properties should be considered for protection from destruction or impairment."²

Criteria

To be eligible for listing in the National Register, a property must be at least 50 years of age (unless the property is of "exceptional importance") and possess significance in American history and culture, architecture, or archaeology. A property of potential significance must meet one or more of the following four established criteria: ³

- A. Associated with events that have made a significant contribution to the broad patterns of our history; or

¹ Public Resources Code §5024.1 and 14 California Code of Regulations §4850 & §15064.5(a)(2).

² Title 36 Code of Federal Regulations Part 60.2.

³ Title 36 Code of Federal Regulations Part 60.4.

- B. Associated with the lives of persons significant in our past; or
- C. Embody the distinctive characteristics of a type, period, or method of construction or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
- D. Yield, or may be likely to yield, information important in prehistory or history.

Context

To be eligible for listing in the National Register, a property must be significant within a historic context. *National Register Bulletin #15* states that the significance of a historic property can be judged only when it is evaluated within its historic context. Historic contexts are "those patterns, themes, or trends in history by which a specific...property or site is understood and its meaning...is made clear."⁴ A property must represent an important aspect of the area's history or prehistory and possess the requisite integrity to qualify for the National Register.

Integrity

In addition to possessing significance within a historic context, to be eligible for listing in the National Register a property must have integrity. Integrity is defined in *National Register Bulletin #15* as "the ability of a property to convey its significance."⁵ Within the concept of integrity, the National Register recognizes the following seven aspects or qualities that in various combinations define integrity: feeling, association, workmanship, location, design, setting, and materials. Integrity is based on significance: why, where, and when a property is important. Thus, the significance of the property must be fully established before the integrity is analyzed.

Criteria Consideration G

Certain types of properties are not usually eligible for listing in the National Register. These properties include buildings and sites that have achieved significance within the past 50 years. Fifty years is a general estimate of the time needed to develop historical perspective and to evaluate significance. In addition to being significant under one of the four criteria listed above, these properties must meet a special requirement called a criteria consideration in order to be eligible for listing in the National Register. There are seven criteria considerations. Criteria Consideration G states "a property achieving significance within the last 50 years is eligible if it is of exceptional importance."⁶ This criteria consideration guards against the listing of properties of fleeting contemporary interest.

2.2 California Register of Historical Resources

In 1992, Governor Wilson signed Assembly Bill 2881 into law establishing the California Register. The California Register is an authoritative guide used by state and local agencies, private groups, and

⁴ *National Register Bulletin #15: How to Apply the National Register Criteria for Evaluation* (Washington D.C.: National Park Service, Department of the Interior, 1997), 7-8.

⁵ *National Register Bulletin #15*, 44-45.

⁶ *Ibid*, 41.

citizens to identify historical resources and to indicate what properties are to be protected, to the extent prudent and feasible, from substantial adverse impacts.⁷

The California Register consists of properties that are listed automatically as well as those that must be nominated through an application and public hearing process. The California Register automatically includes the following:

- California properties listed in the National Register and those formally Determined Eligible for the National Register;
- State Historical Landmarks from No. 0770 onward; and
- Those California Points of Historical Interest that have been evaluated by the State Office of Historic Preservation (SOHP) and have been recommended to the State Historical Resources Commission for inclusion on the California Register.⁸

Criteria and Integrity

For those properties not automatically listed, the criteria for eligibility of listing in the California Register are based upon National Register criteria, but are identified as 1-4 instead of A-D. To be eligible for listing in the California Register, a property generally must be at least 50 years of age and must possess significance at the local, state, or national level, under one or more of the following four criteria:

1. It is associated with events that have made a significant contribution to the broad patterns of local or regional history, or the cultural heritage of California or the United States; or
2. It is associated with the lives of persons important to local, California, or national history; or
3. It embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values; or
4. It has yielded, or has the potential to yield, information important in the prehistory or history of the local area, California, or the nation.

Properties eligible for listing in the California Register may include buildings, sites, structures, objects, and historic districts. A property less than 50 years of age may be eligible if it can be demonstrated that sufficient time has passed to understand its historical importance. While the enabling legislation for the California Register is less rigorous with regard to the issue of integrity, there is the expectation that properties reflect their appearance during their period of significance.⁹

The California Register may also include properties identified during historic resource surveys. However, the survey must meet all of the following criteria:¹⁰

1. The survey has been or will be included in the State Historic Resources Inventory;

⁷ Public Resources Code §5024.1 (a).

⁸ Public Resources Code §5024.1 (d).

⁹ Public Resources Code §4852.

¹⁰ Public Resources Code §5024.1.

2. The survey and the survey documentation were prepared in accordance with office [SOHP] procedures and requirements;
3. The resource is evaluated and determined by the office [SOHP] to have a significance rating of Category 1 to 5 on a DPR Form 523; and
4. If the survey is five or more years old at the time of its nomination for inclusion in the California Register, the survey is updated to identify historical resources that have become eligible or ineligible due to changed circumstances or further documentation and those that have been demolished or altered in a manner that substantially diminishes the significance of the resource.

SOHP Survey Methodology

The evaluation instructions and classification system prescribed by the SOHP in its *Instructions for Recording Historical Resources* provide a Status Code for use in classifying potential historical resources. In 2003, the Status Codes were revised to address the California Register. These Status Codes are used statewide in the preparation of historical resource surveys and evaluation reports. The first code is a number that indicates the general category of evaluation. The second code is a letter that indicates whether the property is separately eligible (S), eligible as part of a district (D), or both (B). There is sometimes a third code that describes some of the circumstances or conditions of the evaluation. The general evaluation categories are as follows:

1. Listed in the National Register or the California Register.
2. Determined eligible for listing in the National Register or the California Register.
3. Appears eligible for listing in the National Register or the California Register through survey evaluation.
4. Appears eligible for listing in the National Register or the California Register through other evaluation.
5. Recognized as historically significant by local government.
6. Not eligible for listing or designation as specified.
7. Not evaluated or needs re-evaluation.

The specific Status Codes referred to in this report are as follows:

- 6Z** Found ineligible for National Register, California Register, or local designation through survey evaluation.

2.3 Los Angeles Cultural Heritage Ordinance

The Los Angeles City Council adopted the Cultural Heritage Ordinance¹¹ in 1962 and amended it in 2018 (Ordinance No. 185472). The Ordinance created a Cultural Heritage Commission and criteria for designating Historic-Cultural Monuments (HCM). The Commission comprises five citizens,

¹¹ Los Angeles Administrative Code §22.171 of Article 1, Chapter 9, Division 22.

appointed by the Mayor, who have exhibited knowledge of Los Angeles history, culture, and architecture. The three criteria for HCM designation are stated below:

1. The proposed HCM is identified with important events of national, state, or local history, or exemplifies significant contributions to the broad cultural, economic, or social history of the nation, state or community; or
2. The proposed HCM is associated with the lives of historic personages important to national, state or local history; or
3. The proposed HCM embodies the distinctive characteristics of a style, type, period, or method of construction; or represents a notable work of a master designer, builder, or architect whose individual genius influenced his or her age.

Unlike the National and California Registers, the Ordinance makes no mention of concepts such as physical integrity or period of significance. Moreover, properties do not have to reach a minimum age requirement, such as 50 years, to be designated as HCMs.

3. ENVIRONMENTAL SETTING

3.1 Brief History of San Pedro¹²

The area that became San Pedro was originally within the boundaries of three ranchos: Rancho San Pedro, Rancho Los Palos Verdes, and Rancho Los Cerritos. Platted in 1882, one year after the Southern Pacific Railway line arrived, San Pedro benefited from the region-wide real estate boom of the 1880s. By the time of its 1888 incorporation as a city, San Pedro was roughly bounded by Front Street on the north, Harbor Street and the harbor itself on the east, Point Fermin Park on the south, and Gaffey, Leland, and Meyler Streets on the west. Centered on the rail depot, an early business district developed just west of the harbor, in the area roughly bounded by Fourth Street on the north, Harbor Street on the east, Sixth Street on the south, and Palos Verdes Street on the west (though a substantial portion of this area was demolished in 1970 as part of urban redevelopment).

Two events in the late nineteenth century were especially influential in shaping the development history of the San Pedro CPA: the 1888 establishment of a federal military reservation near the harbor, a presence that expanded throughout the twentieth century, and the selection of San Pedro over Santa Monica in the late 1890s as the site of the official port for the City of Los Angeles, along with the allocation of \$2.9 million for port improvements. The 1888 military reservation, which included the Mexican-era reservation, 500 Varas Square, was renamed Fort MacArthur in 1914; this area represents the “Middle Reservation” of Fort MacArthur, a collection of buildings and structures listed in the National Register of Historic Places. San Pedro’s strategic importance was affirmed as the military presence continued to expand throughout the twentieth century. Starting in World War I, when Fort MacArthur secured the harbor, the military presence in the area increased to encompass a satellite of Fort MacArthur near Paseo Del Mar (called the “Upper Reservation”) and White Point’s NIKE Missile Launcher Site, located in the southwestern corner of the CPA.

¹² Excerpted from “SurveyLA Historic Resources Survey Report: San Pedro Community Plan Area,” prepared by Historic Resources Group for the City of Los Angeles Office of Historic Resources, July 2012, 6-8.

Early residential and commercial development in the San Pedro CPA was roughly divided into three areas, all of which were in proximity to the original business district: Nob Hill and Barton Hill to the north of the business district; “Stingaree Gulch,” a concentration of saloons to the west also known as “Happy Valley” or “Paradise Valley;” and, to the south and southwest, a plateau improved primarily with middle-class housing known as “Vinegar Hill.” ... A network of Pacific Electric streetcar lines helped extend early development beyond Vinegar Hill, with lines along Pacific Avenue and Sixth and Fourteenth Streets facilitating settlement in the residential areas stretching westward into the hillside areas and southward toward the ocean. By the 1920s, the advent of the automobile continued to facilitate this expansion, with many new residential neighborhoods, with accompanying amenities such as schools, civic buildings, commercial areas, and parks, emerging in the CPA’s western hillsides.

In 1909, following the official completion of the Port of Los Angeles, San Pedro was consolidated with the City of Los Angeles. At the same time, extensive harbor improvements were initiated. These included the completion of a two-mile-long breakwater; the installation of a Southern Pacific Railroad line on the wharf; and the construction of the Angel’s Gate lighthouse and the city’s first municipal pier and wholesale fish market. Improvements to port facilities continued into the early twentieth century, culminating in the construction of the first warehouse in 1915, one year after the opening of the Panama Canal, which substantially increased the port’s profile.

As the construction boom of the 1920s converted towns throughout Southern California into “cities of homes,” the San Pedro Survey Area remained best known as an industrial port city. While streets throughout the central corridors of the CPA became lined with single-family homes in a variety of period-revival styles throughout the 1920s, areas closer to the harbor displayed larger concentrations of apartment buildings, duplexes, and courtyard apartments, with earliest examples dating to the late 1910s. These buildings were interspersed with surviving pre-consolidation cottages and larger-scale residences, including Craftsman homes, as well as more recent in-fill. The concentration of multi-family dwellings in the CPA’s eastern area, near both the harbor and two street car lines, would have provided an ample housing base for San Pedro’s population of seasonal, blue-collar workers.

In spite of its reputation as a “city of industry,” San Pedro had already become home to an impressive number of municipal parks by 1935. Much of this parkland had been donated by city pioneer and real estate developer George Huntington Peck., Jr. A native of San Francisco, Peck became a leading city philanthropist and developer, organizing the Bank of San Pedro and financing the installation of Pacific Electric Streetcar lines throughout the CPA. Peck reportedly sold the lands for Point Fermin Park to the City of Los Angeles in 1923. Between 1921 and 1937, Peck donated land for four additional parks: Peck, Leland, Alma, and Rena Parks. This coincided with a 1929 campaign to rehabilitate San Pedro’s image and promote it as a “city of homes.”

By the 1920s, commercial fishing had become one of the principal activities at the harbor, and the San Pedro Survey Area reportedly became the largest supplier of canned fish in the United States. With the broad employment base provided through the fishing and canning industries, as well as port and military activities, a diverse group of settlers, including many immigrants, arrived in San Pedro in the first half of the twentieth century. The new immigrant communities included, in particular, many Italian, Yugoslavian, Serb-Croatian, Scandinavian, Greek, and Japanese residents and seasonal workers. There are a small number of resources related to these immigrant communities remaining in the CPA, including social clubs and other gathering places. In 1942, a significant Japanese settlement on Terminal Island was dissolved when the residents were sent to

internment camps. Demographic shifts continued in the post-World War II period, with an influx of new residents from Latin American.

Throughout the twentieth century, the CPA's primary economic engine remained the industrial and shipping concerns of the port. During World War II, the port represented one of the chief sources of employment for the Los Angeles area. Shipbuilding enterprises, including the Southwestern Shipbuilding Company, began producing large quantities of vessels for the war effort. As a result, the population of San Pedro increased during the war and in the immediate postwar period. With large portions of the CPA already developed in the first half of the twentieth century, most post-World War II expansion took place in the relatively undeveloped areas in the northernmost portion of the CPA and in the hillside areas west of Weymouth Street and Western Avenue, extending south to the Paseo Del Mar. Residential expansion in this area was accompanied by new infrastructure and commercial, institutional, and religious buildings to serve the new residents.

The population continued to increase through the 1950s, due in part to the expansion and increased importance of Fort MacArthur during the Cold War. In 1954, the White Point Military Reservation, which was originally established in 1942, was converted to a NIKE Missile launching site. This brought a new generation of military personnel to the area, necessitating additional residential development.

3.2 Description and History of the Project Site

Project Site and Vicinity

The Project site occupies three parcels on the west side of S. Pacific Avenue between an adjacent commercial parcel and W. 13th Street on the north, W. 14th Street on the south, and adjacent residential parcels to the west. Development in the surrounding area is a mix of commercial and residential properties, with parcels along S. Pacific Avenue devoted to commercial uses and the areas beyond devoted to residential uses.

Pacific Avenue has served as one of the area's primary commercial corridors since the 1910s and 1920s. Historic aerial photographs and Sanborn maps reveal that the immediately surrounding area along S. Pacific Avenue began to develop just after the turn of the twentieth century, though construction did not begin in earnest until the late 1910s and early 1920s (see Figure 2 below). By the end of the decade, the street was well-developed as a commercial corridor. The parcels to the north of the Project site, across W. 13th Street, included automobile-related commercial development. A gas station was located to the south of the Project site at the corner of S. Pacific Avenue and W. 14th Street. It operated until 1960 and had been demolished by 1963. To the south of the Project site across W. 14th Street were small-scale commercial buildings constructed beginning in the mid-1920s. Parcels to the east and west of S. Pacific Avenue were devoted to residential uses. The residential neighborhood to the west of the Project site had begun to develop during the first decade of the twentieth century with a mixture of single- and small-scale multi-family residences and was well-established by the late 1920s. By the 1940s, the area was almost entirely built-out.

Figure 2: Sanborn Fire Insurance map, 1921, showing development along and around Pacific Avenue between 12th and 15th Streets. The Project site is outlined in red (Source: Phase I ESA).

Building Descriptions and Ownership Histories

The properties at 1309-11, 1319-23, and 1331 S. Pacific Avenue were constructed in 1932, 1924, and 1940, respectively, as one-story commercial buildings. Detailed descriptions of each building and ownership and tenant histories follow.

1309-11 S. Pacific Avenue

Description

The commercial building at 1309-11 S. Pacific Avenue was constructed in 1932. The one-story building is rectangular in plan, constructed of unreinforced masonry, and has a flat roof with flat parapet and concrete molding. It is designed with Art Deco stylistic elements. Below the roof, the brick is set into a decorative basket weave pattern. A decorative cast concrete stringcourse has a pattern of alternating triangles and half-moon shapes interspersed with vertically fluted projections.

The building has two storefronts on the east elevation. The north storefront is comprised of a recessed single door with sidelight on one side. The door is flanked by display windows. Both the door and windows have been boarded over. Below both display windows are tile bulkheads. The south storefront has been infilled and covered with textured stucco. It has three fixed vinyl windows with vinyl fanlights and a single wood paneled door with a security screen, also with a vinyl fanlight above. Above both storefronts are divided steel and aluminum transom windows with pebbled glass.

The walls on the north and south are shared with commercial buildings on either side. The west elevation features two single doors covered with security screens and multi-light steel industrial sash windows covered with security bars. Several window openings on the west elevation have been infilled with concrete block. A large exterior brick chimney is located at the northeast corner of the building. To the east of the building is a raised concrete deck that serves as a surface parking lot.

Alterations to the building include the installation of seismic anchor plates, reconfiguration and infill of the storefronts on the east elevation, replacement of the transom windows, and infill of window openings on the west elevation. The interior of the building has also been altered, and no original fabric remains. The building permit record indicates that the storefronts were altered in 1949 and 2000.

Figure 9: 1309-11 S. Pacific Avenue, west elevation, north side, looking north (GPA Consulting, 2019).

Ownership and Tenant History

For much of the building's history, each storefront (1309 and 1311 S. Pacific Avenue) has been occupied by a separate business. The building was constructed in 1932 by Oscar Zuercher, a druggist who opened Zuercher Pharmacy in the building at 1309 S. Pacific Avenue. Zuercher Pharmacy remained in the building until 1937, though listings for the business in city directories for some years call the business Zuercher Pacific Pharmacy. It is also later called Zuercher Rexell Pharmacy. Therefore, Pacific Pharmacy, which occupied the building beginning in 1938, may have been a successor. La Rue Pharmacy had moved into the space by 1946. The business remained in the building until at least 1995 and was owned by McDonald La Rue.

1311 S. Pacific Avenue was occupied by Paramount Laundry by 1946. It was joined by Los Angeles Harbor Cleaners by 1950. These businesses utilized the building until at least 1957. By 1960, United Vending Services and Ernest R. Collins are listed as occupying this portion of the building. By 1980, Arthur C. Holloway is listed as the tenant.

1311 ½ S. Pacific Avenue is not listed separately until 1950. By this time, Ernie Collins Watch and Jewelry Repair was the tenant. This business is listed at the address until at least 1970.

1319-23 S. Pacific Avenue

Description

The building located at 1319-23 S. Pacific Avenue is a one-story unreinforced masonry commercial building constructed in 1924. The original building permit indicates that the architect was J[illegible] Peterson and the contractor was J.C. Anderson of San Francisco. It is rectangular in plan and has a flat roof with low flat parapet. The building's east elevation is clad in textured

stucco. It features three storefronts. The north and center storefronts are each comprised of a single glass and metal storefront door with angled aluminum display windows on either side and transoms above. The center storefront's door has a sidelight on one side as well. The south storefront consists of a single wood slab door on the south side and partial-height display windows on the north side. A blade sign reading "Enigma Bar" is affixed above the south storefront. The bulkheads below all three storefronts have been covered with textured stucco.

The building shares north and south walls with the neighboring buildings. The west elevation is painted brick with window openings infilled with concrete block. Like the building at 1309-11 S. Pacific Avenue, there is a raised paved surface parking lot to the west of the building. It is accessed by concrete steps with a metal railing. Immediately to the west of the building is a small single-story storage building with a flat roof; it is clad in stucco and has a single slab door covered with a metal security screen. It was constructed in 1961.

Alterations to the building consist of reconfiguration of the storefronts on the east elevation, application of textured stucco, and installation of seismic anchor bolts (visible on the west elevation). The primary (east) elevation of the building has been extensively altered. The building permit record indicates that alterations to the storefronts began as early as 1933, when a door was moved to the south side of the elevation, the storefronts were changed (further details were not provided), and an 8-foot partition was installed in the building from north to south. In 1938, a skylight was installed. In 1941, the storefront for 1323 S. Pacific was altered again; the transoms were removed and replaced with plaster and glass. In 1942, the doors for 1321 S. Pacific Avenue were changed. In 1960, a permit was filed for a parapet correction. A sign for the Barrel House Café, located at 1323 S. Pacific Avenue, was added in 1963. It is no longer extant. In 1985, a projecting sign was added. Between 1988 and 1989, the building was retrofitted for earthquake safety. The building was reroofed in 2003, and the building's roof was altered over the main elevation in 2005 as part of fire damage repairs. The interior of the building was remodeled in 2004 and the portion of the building at 1321 S. Pacific Avenue was changed from retail to office and storage.

Table 3: Building Permit Record, 1319-23 S. Pacific Avenue

Ownership and Tenant History

The building located at 1319-23 S. Pacific Avenue was constructed in 1924 by J.F. Gafferey (or Gaffney) Sr. of Asheville, North Carolina (later Gaffney is recorded as living in Long Beach). By 1933, A.C. Duchaine owned the building. By 1936, C.E. Duchaine owned the building, although A.C. Duchaine is again listed as the owner in 1961. By 1963, the owner is listed as J. and W. Moore, who at the very least owned the business at 1323 S. Pacific Avenue. Lawrence Victorino owned the building by 1988. By 2004, Evangelos and Toulia Bitsakis owned the building. For much of the building's history, it was occupied by separate businesses in each storefront (1319, 1321, and 1323 S. Pacific Avenue).

In 1926, the earliest listing for 1319 S. Pacific Avenue, the Electrical Contractor Manufacturing and Supply Company occupied the building. The San Pedro Glass and Mirror Company occupied 1319 S. Pacific Avenue in 1928 and 1930. Frank Shields was the manager. The company was in the manufacturing and wholesale business. The business was owned by Doral C. Smith, George A. Bergeman, and Daniel K. Allen, according to the 1930 San Pedro city directory. By 1946, 1319 S. Pacific Avenue was occupied by a pet shop owned by Mrs. M.A. Ostendorf. By 1950, it was occupied by the San Pedro Pet Shop. The business remained in the building until at least 1970. By 1985, it was utilized by G&M Recycling Jeans. By 1990, the space at 1319 S. Pacific Avenue was occupied by Alamo Video.

The space at 1321 S. Pacific Avenue was occupied by Sunset Dye Works in 1926 and 1928. Frank Harris and Muriel Rickard are listed as the managers for those dates, respectively. By 1942, Osen Café occupied the storefront. By 1946, the space was occupied by Madame's Chop Suey, presumably the same business as Madame Café, which occupied the space from at least 1950 until at least 1985. It was listed as the New Madame Café beginning in 1970. By 1990, the space was utilized by Golden House Chinese Restaurant and by Taqueria Azteca by 1995. The space was converted to office use and storage in 2004.

1323 S. Pacific Avenue housed a fruit and vegetable dealer business owned by Joseph Cenatiempo in 1926. By 1928, it housed the Pacific Home Brew Company, owned by Joseph Cenatiempo and John Vix. The business provided beverage-related supplies, including malt, hops, caps, and bottles. By 1930, the address was associated with F. K. Applebaum's drug store. By 1946, the address was associated with Anthony Lauro's bowling alley and the Turf Club Café (the listing includes 1323-33 S. Pacific Avenue, this building and the one next door). From at least 1950 until at least 1985, it was occupied by the Barrel House Café, owned by J. and W. Moore.

1331 S. Pacific Avenue

Description

The property located at 1331 S. Pacific Avenue is occupied by a one-story commercial building constructed in 1940. The original building permit indicates that it was designed by architect William F. Durr; the contractor was George M. Bronaugh. It possesses elements of the Streamline Moderne style. The building is rectangular in plan, clad in textured stucco, and has a flat roof with parapet over the east portion and a barrel vaulted roof over the west portion. The east portion of the building has a mezzanine. To the west, the building steps down to a single story.

The east elevation is decorated with vertical rounded towers trimmed with neon, and it features three storefronts. The north storefront has been infilled with glass block and marble. The center

storefront features curving windows of glass block with marble below and three paneled wood doors with ovular lights. It has a roll-up metal storefront screen. The south storefront has a recessed wood paneled door with ovular light. To the south of the door is an aluminum and glass restaurant window. The bottom portion of the storefront is clad in green marble. It has a metal roll-up storefront screen. The transom windows above all three storefronts have been boarded over. Letterboard signs are located above the north and south storefronts. A neon blade sign is located above the center storefront.

The north and south elevations are painted brick. The south elevation has a single slab door that provides access to the mezzanine. It has metal and concrete steps with a metal railing. The building occupies the entirety of its parcel, and the west elevation was not accessible.

The storefronts on the building's east elevation have been extensively altered. Their configuration has been completely changed, and new doors and windows have been installed. Building permits indicate that a garage once located on the property was demolished in 1959. In 1969, the interior was altered for conversion to a night club and a second means of egress was added. In 1970, the Dancing Waters Club erected a sign on the building's east elevation; the similarity of the sketch accompanying the permit and the sign located on the east elevation today suggests that they are one in the same. In 1986, 1991, and 2004, the building was re-roofed.

Ownership and Tenant History

The building at 1331 S. Pacific Avenue was constructed in 1940 by Nick Pericich. The building was used as a bowling alley and restaurant. It is listed as the Civic Bowling Center in the 1946 San Pedro

city directory. It was co-owned by Joseph Ivelia Jr., who also owned the Twentieth Century Bowling Alley, located at 476 W. 5th Street.

By 1945, the building was owned by Louis Pesse (seen elsewhere as Pesce). The 1946 city directory indicates that it was co-owned by Joseph Ivelia Jr. In 1946, the addresses of 1323-33 S. Pacific Avenue are indicated in the San Pedro city directory as being a bowling alley and as housing the Turf Club Café, owned by Anthony Lauro. From at least 1950 until at least 1964, the building was occupied by the Pacific (or Pacoima) Bowling Center.¹³ It also housed a restaurant. In 1969, it was converted into a night club called Dancing Waters Club, owned by Al Cordiero (or Cordeiro). By 1970, Dancing Waters Club occupied the building. In 1980, C.L. Skate Rentals and Sales moved into the building; that is the only year in which they were found listed in telephone books. Dancing Waters Club remained in the building until at least 2001. By 2004, the Helio and Olga Cordeiro Trust owned the building.

4. EVALUATION OF ELIGIBILITY

4.1 Historic Contexts

The significance of a property must be evaluated within its historic context(s). Historic contexts are those patterns or trends in history by which a specific property is understood. The contexts, themes, and sub-themes discussed below were drawn from the *Los Angeles Citywide Historic Context Statement (LACHCS)* and are relevant in evaluating the significance of the properties on the Project site. The most relevant context/themes for the properties evaluated below were:

- Context: Commercial Development, 1859-1980
 - Theme: Neighborhood Commercial Development, 1880-1980
 - Sub-Theme: Streetcar Commercial Development, 1880-1934
- Context: Commercial Development, 1859-1980
 - Theme: Neighborhood Commercial Development, 1880-1980
 - Sub-Theme: Restaurants, 1880-1980
- Context: Commercial Development, 1880-1980
 - Theme: Post WWII Recreation, 1940-1975
 - Sub-theme: Bowling Centers, 1949-1970
- Context: LGBT History, 1912-1980
 - Theme: Gay Bars as Social Institutions, 1920-1980
- Context: Architecture and Engineering, 1850-1980
 - Sub-Context: L.A. Modernism, 1919-1980
 - Theme: Related Responses to Modernism, 1926-1970
 - Sub-Theme: Art Deco, 1926-1939
- Context: Architecture and Engineering, 1850-1980
 - Sub-Context: L.A. Modernism, 1919-1980
 - Theme: Related Responses to Modernism, 1926-1970
 - Sub-Theme: Streamline Moderne, 1934-1945

¹³ The Phase I ESA lists the name as Pacoima Bowling Center in 1950 and 1954, but the name is listed as “Pac Bowling Center” in 1957, 1960, and 1964. It is more likely that the name was Pacific Bowling Center, as indicated on a building permit from 1959.

An overview of commercial development through the 1940s from the *LAHCS* is included below for background. The historic context statement related to the L.A. Modernism theme is currently under development, so no context for Art Deco and Streamline Moderne architecture is included below. Rather, a brief overview of each style is included under their relevant National Register evaluations.

The Commercial Identity theme was considered for relevance since there are several long-term businesses associated with the properties on the Project site. However, this theme generally applies to buildings that retain a continuous and present association with the businesses historically located there. This is not the case with the businesses in the buildings on the Project site. The businesses that once occupied these spaces no longer remain and no longer have any association with the buildings. Furthermore, there is no indication that the businesses located here were significant to the commercial history of Los Angeles, state, or nation. Therefore, the Commercial Identity theme was not utilized.

The sub-theme Neighborhood Downtowns and Villages, 1909-1960 was examined for its relevance, but it more accurately describes groups of buildings evaluated as potential historic districts, rather than individual buildings. Pacific Avenue is more accurately described as a streetcar commercial corridor, which is examined below in relation to 1309-11 and 1319-23 S. Pacific Avenue. It was not evaluated as a potential historic district during SurveyLA or for the purposes of this report for the reasons outlined above.

Also consulted and included in this report is information drawn from the *LGBT Historic Context Statement*, prepared for the City of Los Angeles, specifically the theme “Gay Bars as Social Institutions, 1920-1980,” which is potentially relevant to 1331 S. Pacific Avenue.

Neighborhood Commercial Development, 1880-1980¹⁴

For its first thirty-five years under Anglo-American rule, Los Angeles was essentially a small town. Residents numbered 1610 in 1850. This increased to 4,385 by 1860, to 5,728 by 1870, and to 11,183 by 1880. There were no geographically separate neighborhoods with their own business districts. Commerce of all sorts concentrated around the Old Plaza and the newer business district to the south, and most residents lived within walking distance of this commercial core.

Within this walking city, however, distinct neighborhoods emerged that were determined by the economic and ethnic composition of the residents. As the Anglo-American population moved south, the blocks around the Old Plaza were left to others. The district around the Plaza Church became home for Mexican Americans, while the section to the east and southeast, including North Los Angeles Street, became Chinatown. The retail businesses along these blocks were neighborhood businesses, in that they provided services for a distinct group living nearby.

At the same time, along the edges of the walking city, there were settlements that combined scattered homes with an occasional commercial establishment. This establishment typically served as a sort of general store such as one would find in rural settlements of the day. The pattern of a single freestanding commercial building, sitting among dwellings, is one that survived well into the twentieth century.

¹⁴ The following is excerpted from Los Angeles Citywide Historic Context Statement, Context: Commercial Development, 1859-1980, Theme: Neighborhood Commercial Development, 1880-1980, prepared by Daniel Prosser for the Office of Historic Resources, August 2017, 3-11. Footnotes are only included for direct quotations. For complete footnotes, please see the original document.

The Streetcar Era, 1885-1920

The neighborhood as something spatially separate from the central city, complete with its own commercial district, was a product of the streetcar. The streetcar allowed residents to disperse and, in the process, seek shops and services closer to their new homes.

Los Angeles began developing public transit as early as 1874. A horse-drawn streetcar line began service that year along a two-and-one-half-mile route that went from the Plaza south along Main and Spring Streets to Sixth. It was followed by a number of other short and unconnected routes. By 1876 a horsedrawn car line had been extended north along Spring Street (then known as San Fernando Road), across the Los Angeles River, and into Lincoln Heights (then known as East Los Angeles) along North Broadway (then known as Downey Avenue). By 1880 a second horse car line also crossed the river and ran along Aliso Avenue to serve Boyle Heights. But, before the population boom of the late 1880s, there was simply not enough demand to justify widespread construction of lines such as these.

This changed with the influx of newcomers. In the decade between 1880 and 1890 Los Angeles grew from 11,183 to 50,395. The result was an increase in both the number and reach of the horse car lines, as well as the installation of cable cars and experiments with crude electrically-powered transit. By 1889, the lines to Lincoln Heights and Boyle Heights had been converted to cable cars, and a cable car line ran northwest along Temple Street to serve the newly opened subdivision of Angelino Heights. Additional cable cars ran south on Grand to Jefferson and west on Seventh Street to Alvarado. Experimental electric lines ran south on Maple to 32nd Street and west on Pico to Harvard.

The creation of these early lines set a pattern that would be followed by the electric trolleys in the decades to come. Developers of horse and cable routes first built their lines into vacant land. They then subdivided the land into home sites. They understood that a neighborhood commercial district was necessary for a residential subdivision to be successful, and laid out narrow lots along the streets containing the car lines. These plots were marketed to investors who would build storefronts and business blocks.

The oldest and most developed of these early neighborhoods was Lincoln Heights. It was within the original city limits of Los Angeles and had been subdivided in 1873. Most of the city's industry at this time was located adjacent to the rail lines along the banks of the Los Angeles River, and Lincoln Heights was well located to serve as a home for workers. By the late 1880s a neighborhood commercial district had been constructed around the corner of North Broadway and Truman Streets, and contained business buildings such as the Hayden Block. The district was later demolished to make way for the Golden State Freeway (Interstate 5).

The growth that had begun with the boom of the 1880s continued for the next several decades. The population of 50,395 in 1890 increased to 102,479 in 1900 and to 319,198 in 1910. By 1920 it reached 576,673. The city accommodated these newcomers by spreading out from its historic walking-city limits, and creating new neighborhoods with their own commercial business districts.

What made this spread possible was the development of an increasingly efficient streetcar network. Beginning in the mid-1890s the streetcar system experienced two changes that greatly extended its reach. The first was the perfection of an electrically-driven streetcar, making use of overhead wires that fed the car's motors through the use of a top-mounted pole, or trolley. As these electric cars, or trolleys as they were popularly known, became more dependable, they replaced the earlier horse-drawn and cable cars, and gave the city a device that allowed for faster and cleaner mass transit.

The second change was the consolidation of the streetcar lines into a coordinated network. Through a number of changes in ownership, the various routes by 1911 had become two complementary companies. The narrow-gauge Los Angeles Railway extended into all parts of the city except for the northwest. The standard-gauge Pacific Electric, primarily an interurban system, served the northwest part of the city via Glendale Boulevard to Echo Park and via Sunset to Santa Monica and Hollywood Boulevards. The Los Angeles Railway, or LARY, carried almost ninety percent of the riders within the city limits. The Pacific Electric, or PE, transported the remainder.

The growth of the streetcar network occurred rapidly. As early as 1893, new trolley lines extended toward the south on Central Avenue to Slauson and toward the southwest to Vermont and Exposition. By 1898, lines extended to the west along Seventh and Ninth Streets to Hoover, and on First to Alvarado. By 1900 they were joined by lines extending west along Washington Boulevard and First Street, and south along San Pedro and Main. The older lines that crossed the river were extended further east, and a new line introduced along what is today's Valley Road in Lincoln Heights.

By 1914 the development of the network was basically complete. The area within five miles of Downtown was covered with a web of streetcar routes. To the northeast a line provided service on North Figueroa Street (then Pasadena Avenue) to Highland Park. To the southeast the older First Avenue line was joined by a line on Cesar Chavez Avenue (then Brooklyn Avenue) to serve Brooklyn Heights. To the south, lines ran on Central Avenue to Manchester Boulevard, and on Broadway and Vermont Avenues to south of Imperial.

On the west side, the West Adams line extended to La Brea, and the Washington, Pico, and Tenth Street lines to well past Crenshaw. The Third Street line reached as far as Highland. Important for the emergence of neighborhood commercial districts were the points where lines crossed. This was particularly true for the Vermont line, which extended from south of Imperial Highway to north of Melrose, and crossed all the important east-west lines of the LARY.

There were, in addition, lines that served more distant sections. A LARY line extended north to Eagle Rock and southwest to Hyde Park and Hawthorne. The PE's service to Santa Monica extended its Westgate branch into Brentwood via San Vicente Boulevard, and the line to Hollywood crossed the Cahuenga Pass to reach Van Nuys and the San Fernando Valley. The Venice Short Line provided rapid access to the beach resort via what later became Venice Boulevard.

The expansion of the streetcar network led to differentiation between neighborhood and Downtown commerce. The streetcar increased the distance between residential districts and the central city, and, at the same time, made access to the central city easier. The result was that major retailers, such as department stores, built large-scale establishments Downtown to serve the specialized needs of customers, while neighborhood stores increasingly limited their stock to everyday requirements and were content with smaller, less impressive, structures.

The neighborhood shopping districts based on trolley service took on the look of small towns. North Figueroa Street, then known as Pasadena Avenue, in Highland Park was typical. Single story storefronts and two-story business blocks, with shops below and professional office above, lined the streetcar route like a Midwestern Main Street. Interspersed among the attached storefronts and business blocks were the occasional freestanding institutional building that predated the coming of the train. The trolley car dominated the street, with only the occasional wagon to add congestion.

There were, at the same time, a few residential areas that remained without transit. Much like the earlier fringes of the city, these areas had their own commercial centers, often consisting of no

more than a crossroads market or general store. If there was more than one building, they typically assumed a linear pattern, similar to that found along the streetcar routes. This followed from the same kind of subdivision pattern of narrow business lots fronting on what the developer hoped would become a heavily trafficked boulevard.

The Period of Transition, 1920-1945

During the 1920s, Los Angeles became a city of metropolitan scale. Its population grew from 576,673 in 1920 to 1,238,048 in 1930. It managed further to increase its size during the economically difficult years of the 1930s, and numbered 1,504,277 residents in 1940.

Serving this population by 1920 were at least ten outlying commercial districts, each containing eighty or more businesses. They ranged from the older close-in districts such as Lincoln Heights to the newer and more distant Van Nuys in the San Fernando Valley. Along South Broadway alone, between 42nd and 50th Streets, there were approximately 180 businesses, selling dry goods, jewelry, shoes, men's wear, hardware, plumbing supplies, paint and stationary.

In addition to these major neighborhood centers there existed numerous smaller ones. The typical neighborhood commercial district of the 1920s contained between forty and sixty businesses. It continued the architectural pattern from the period before 1920, but with fewer multi-story blocks and more single-story storefront rows. Perhaps the most important change, in terms of tenants, was the growing prevalence of chains, particularly drug and grocery stores. During the 1920s these chains preferred renting space in storefront blocks, rather than construct their own iconic buildings. This would change.

These neighborhood commercial districts were for the most part streetcar commercial development, products of the expansion of the trolley network in the pre-war years. By the end of the 1920s, however, they had begun to give way to business districts dependent instead upon the automobile. This early arterial development at first followed the pattern of corridor-like lines of shops and business blocks characteristic of streetcar development. By the late 1920s, however, different relationships to the street, in attempting to deal with the automobile, had emerged.

The automobile had become a common presence on the streets of Los Angeles as early as 1910. But it was in the decade after the First World War of 1917 and 1918 that car ownership in Los Angeles became the norm. At the same time, the trolley system began to decline as a means of transportation. Neither the Los Angeles Railway nor the Pacific Electric expanded its system significantly after 1913 and ridership per capita of both systems fell after the mid-1920s, once auto ownership became common. ...

During much of the 1920s, the architecture of the older streetcar and the newer auto-dominated arterial corridors was essentially the same. The most common form of building for both was the storefront. It consisted of neutral commercial space to be rented. A storefront building provided a location for retail purposes that could change over time, with each tenant adapting the space to fit the needs of the merchandise through minor interior alterations and exterior signs.

The neutral-space storefront building could be single- or multi-storied. Single-story buildings were typically called storefront blocks and consisted of rows of shops facing the street. Each storefront contained an entrance and a show window. Multi-storied buildings were known as business blocks and combined storefronts on the first floor with rental space above. This rental space generally consisted of offices for professionals such as physicians, dentists, and lawyers, although it could also contain apartments or meeting space.

The single-story storefront block was more common, although along some of the more heavily trafficked routes and at intersections the multi-story business block could be found. The single-story

form was particularly popular along the newer arterial shopping streets that had no streetcar lines and depended exclusively upon the automobile. It could contain as few as two units, but many had around six units and a few as many as ten.

The goal of the owner was to have a mix of tenants that would provide a steady income. Owners often used real estate brokers to find them. Ideally a drug or grocery store, often the outlet of a chain, would move in, as a means of attracting a steady flow of customers to make the rest of the spaces attractive. The neutral nature of the individual storefronts made them suitable for such a variety. Owners were willing to combine storefronts for tenants, such as chain grocery stores, which required larger spaces.

Construction after the First World War was almost universally of masonry. Brick and terra cotta were common, and employed in a pier-and-spandrel mode, which allowed for an open storefront. The style could be considered a sort of commercial vernacular, with the pier-and-spandrel structure providing a rhythm to the line of similar-sized storefronts. On to this were grafted ornamental details in a variety of styles. Inevitably, however, the signs of the merchants overwhelmed the architecture.

There were those buildings that, while working within the storefront and business block format, broke with the commercial vernacular. This was particularly the case in the newer, and often more prosperous, shopping districts which were dependent upon the automobile rather than the streetcar. More elegant forms and adventurous massing were employed. Early arterial commercial development along corridors such as Beverly Boulevard was in particular characterized by this development.

Streetcar Commercial Development, 1880-1934¹⁵

The Streetcar Commercial Development sub-theme consists of buildings in a commercial corridor setting that are located along or near streetcar lines. It includes individual buildings as well as historic districts. Their defining characteristic is their relationship to a specific mode of transportation, the streetcar.

The period of significance begins in 1880, when creation of a streetcar system began. It ends in 1934, by which time the streetcar had been replaced by the automobile as the most common mode of transportation. During its period of greatest popularity, from 1900 to 1930, Los Angeles had one of the most extensive streetcar networks of any city in the county. There are relatively few intact examples of streetcar-oriented neighborhood commercial architecture left, particularly in concentrations dense enough to qualify as districts.

Streetcar commercial development is most commonly characterized by a dense fabric of attached retail buildings, with storefronts placed directly on the sidewalk. The significant characteristic is this pedestrian orientation, with no accommodation for the automobile. The most important architectural feature is the storefront. It commonly contains a show window, with a recessed entrance placed either to the side or in the center and flanked by windows.

Making use of the storefront are a number of specific building types. They include the single-story storefront block, consisting of one or more storefronts, and the multi-story mixed-use building,

¹⁵ Excerpted from Los Angeles Citywide Historic Context Statement, Context: Commercial Development, 1859-1980, Theme: Neighborhood Commercial Development, 1880-1980, Sub-Theme: Streetcar Commercial Development, 1880-1934, prepared by Daniel Prosser for the Office of Historic Resources, August 2017, 19-20.

consisting of a storefront or storefronts on the ground floor and offices, meeting space, or residential units above. Those containing offices or meeting spaces were commonly known as commercial or business blocks. Those with residential units, particularly single bay entities, were early versions of today's live/work buildings, with the upper floor often inhabited by the proprietor of the business below.

The eligibility standards and integrity considerations for Streetcar Commercial Development, 1880-1934 are listed in **Table 2**, below.

Restaurants, 1880-1980¹⁶

The restaurant sub-theme consists of neighborhood resources purpose built to house food service establishments. The neighborhood restaurant catered to locals, and was not dependent upon a patronage drawn from other neighborhoods. As such, it reflected the economic level and, oftentimes the ethnically-based tastes, of the neighborhood. Many of Los Angeles neighborhood restaurants are also evaluated under the Commercial Identify theme as the founding or long-term location of well-known, and often iconic, establishments. Restaurants are also important property types discussed in each of the ethnic-cultural themes separately developed as part of the citywide historic context statement.

The neighborhood restaurant as a distinct business emerged in the decades after the Civil War. It began as an offshoot of a tavern, hotel, or grocery store. An example of this was the well-known Little Joe's Restaurant, which once stood at 900 North Broadway. The building housing Little Joe's was originally the Grand View Hotel. It contained two storefronts on its ground floor in the early 1900s. On the right was a retail space while on the left was a dining room and kitchen, most likely for hotel guests. ...

A more direct predecessor of the neighborhood restaurant was the luncheonette. It evolved from the soda fountains of the late 1800s. The luncheonette provided counter service, with perhaps a small kitchen in the rear, and served light meals. Some were parts of drugstores or variety stores, while others were independent businesses.

By the early 1900s the luncheonette had developed into the neighborhood café. The café was a form that could be found both on the main streets of small towns and in neighborhood business districts which functioned very much like small towns. Between 1910 and 1940 the local café served as a social gathering place for the neighborhood. It fit into the standard storefront found in the streetcar-based neighborhood commercial district. It consisted of a long, narrow space, with a counter along one side, tables or booths along the other, and the kitchen in the rear. ...

Besides the café, by the 1920s there were two other neighborhood restaurant types. One was the tea room. It was an upscale, more respectable version of the café. The café was often seen as a primarily masculine environment, while the tea room catered to women. The menu consisted of lighter items, the prices were higher, and the surroundings more sedate. Tea room owners were often women, and the setting was typically domestic, with converted dwellings instead of storefronts providing quarters. ...

The second alternative to the café was what historians have called the destination restaurant. This was a facility that provided a special experience as well as food. Atmosphere and design were stressed. Menus were more elaborate and prices higher. Unlike the café and tearoom, alcohol was typically available, surreptitiously during Prohibition and openly afterward.

The destination restaurant was rare in a neighborhood setting. It was typically found Downtown, particularly as parts of hotels, along specialized business strips, such as Hollywood Boulevard and the Miracle Mile, or in resorts such as Venice. ...

¹⁶ Excerpted from Los Angeles Citywide Historic Context Statement, Context: Commercial Development, 1859-1980, Theme: Neighborhood Commercial Development, 1880-1980, Sub-Theme: Restaurants, 1880-1980, 1880-1934, prepared by Daniel Prosser for the Office of Historic Resources, August 2017, 100-105.

After the Second World War, the storefront-based neighborhood café was replaced by the auto-oriented coffee shop. These were free-standing structures, with their own parking lots, which reflected the shift toward neighborhood commerce based on widespread ownership of the automobile. Like the café, the coffee shop combined counter service with table and booth service, and like the café, generally did not serve alcohol. Some identified themselves as family restaurants, with less space for the counter and with the table and booth service in a separate space.

The post-war coffee shop in Los Angeles was often in Googie style. The name of the style stems from its first use in a coffee shop of that name designed in the late 1940s. (This relationship is explored fully in the Googie sub-theme under the theme of Postwar Modernism.) Many of the coffee shops were parts of chains. As such, certain features, in particular the signs, were standardized Googie forms.

The eligibility standards and integrity considerations for Restaurants, 1880-1980 are listed in **Table 3**, below.

Bowling Centers, 1949-1970¹⁷

Bowling Establishment History

Prior to 1920, bowling alleys in America were typically located in urban areas, in or near saloons. They were usually dark and dingy places, often found in basements, with only one or two bowling lanes. They were seen as places where working-class men gathered to drink and gamble and take part in disreputable, unproductive, and sometimes criminal behavior. Women, and men who considered themselves respectable citizens, rarely entered early bowling establishments.

With the advent of Prohibition in 1920, owners of saloons with bowling alleys had to appeal to a broader market to survive without alcohol sales. Whereas many establishments shut down during Prohibition, others transformed into full-fledged, large-scale bowling parlors, and efforts were made to clean up the sport's sordid reputation. The word "alley" was often dropped from the name of bowling establishments around this time to distance the sport from its earlier reputation. Words like "bowl" or "lane" were used in place of "alley" in business names. The bowling industry also introduced bowling alley design guidelines, loans to upgrade facilities, and a lighter ball for women. This made it possible to attract a wider range of male customers to the sport and, by the late 1920s, women were bowling in greater numbers. The game's popularity grew steadily during the 1930s and through World War II.

League play became increasingly important to the sport just before the war. Industrial leagues, which were sponsored by companies for their employees, were particularly common. This practice was thought to be a way for the company to encourage their employees to socialize with each other and take part in wholesome entertainment. League play helped to further distance bowling from the gambling and cash prizes that characterized the early history of the sport.

During World War II, there was a surge in popularity in bowling because the United States military constructed approximately 4,500 lanes on military bases to provide servicemen with recreation. This was often the first exposure to the game for many soldiers. Meanwhile, "ladies leagues" filled bowling alleys back home. After the war ended, men and women started to bowl together in leagues for the first time. In 1947, the Truman administration installed a one-lane bowling alley in the White House, signifying that the sport had become a true American pastime. Just before the U.S. entered World War II, there were an estimated 12 million bowlers in the United States, making bowling the most popular competitive sport in the country. After the war, in 1948, there were 20 million bowlers across the nation.

By the 1950s, the bowling industry had successfully established itself as a form of entertainment suitable for all members of the family and, at this point, bowling establishments entered an era of the modern bowling center. Bowling centers were typically constructed in upwardly-mobile middle class postwar suburbs, where they were designed to serve as visual landmarks in these communities. They often reflected the modern aesthetic of the suburbs and many were designed

¹⁷ Excerpted from Los Angeles Citywide Historic Context Statement, Context: Commercial Development, 1880-1980; Theme: Post-WWII Recreation, 1940-1975; Sub-Theme: Bowling Centers, 1949-1970, prepared by Sandra Shannon for the Office of Historic Resources, September 2017, 3-9. Footnotes are only utilized for direct quotations from their original sources or when they contain additional information. For full footnotes, please see the historic context statement.

by noted architects in the Googie style with sweeping roofs, modern materials, futuristic details, and flashy signs.

Bowling centers were larger than previous bowling establishments and much more elaborate. Forty to 60 lanes became the norm and they had the latest technology including air conditioning, automatic pinsetters, foul detectors, and underground ball returns. Interiors were lavishly designed, and lobbies often contained features like colorful carpeting, murals, fountains, and sculptures. Bowling centers of this sort were constructed rapidly during the 1950s and early 1960s as the popularity of the sport surged and suburban land was abundant and relatively inexpensive. It was not unusual for the construction of these buildings to cost more than one million dollars, a considerable sum of money at the time.

In addition to distinctive architecture and design, bowling centers offered a variety of amenities to attract a diverse clientele. Coffee shops, cocktail lounges, music performances, concession stands, pro shops, instructional programs, and childcare facilities were standard offerings. Many were open 24 hours to accommodate workers on industrial night shifts. With these lavish services and amenities, bowling centers earned a reputation as “the people’s country clubs.” In addition to providing leisure activities for middle-class suburbanites, bowling centers often served as community centers, particularly in newly developed areas that may have lacked community meeting space. Boy scouts, churches groups, women’s clubs, and other organizations gathered in the meeting rooms and banquet halls of modern bowling centers.

Bowling provided an important social opportunity for women in postwar suburban America. While bowling centers were generally full during evening and weekend league play, the lanes were often empty during weekday hours. Childcare, laundry, and grocery shopping services were introduced at bowling centers to attract housewives during the day. The addition of these services was a strategic move by the industry. There was concern that if women were bowling during the day, they would not be taking care of their household responsibilities. The industry addressed this by creating an environment in which they could do both. For example, a woman could turn in a grocery list when she arrived to bowl and, when she was done playing her groceries would be ready for pick up. This arrangement substantially increased business during the weekday.

With suburban women convinced of the wholesomeness of bowling, they allowed their children to participate in the sport. Prior to World War II, children rarely bowled. After the war, junior leagues filled the lanes after school, providing business owners with an additional stream of revenue. In 1959, membership in the Junior Congress bowling association totaled nearly 400,000 children.

Because of racial segregation, the extravagant bowling center experience was generally restricted to suburban whites. Early saloon bowling alleys were generally not racially discriminatory, however. It was not until the 1920s and 1930s, when bowling started to become a more mainstream sport, that establishments began to segregate. Segregation at the local level was fueled by the ban of minorities by the national men’s, women’s, and youth bowling associations. In response to this ban, The National Bowling Association was established in 1939. Members were predominantly African American; however, the organization also welcomed Asian, Latino, and Native American bowlers. By 1943, the association had a membership of 1,800.

The National Bowling Association primarily worked to help minorities get access to bowling facilities. For example, the organization was sometimes able to create arrangements with white business owners who would open their rear doors to minority bowlers on certain days or after regular business hours. Typically, minorities could not build their own bowling establishments because they were unable to obtain construction loans from white lenders. The National Bowling Association, instead, stepped forward with assistance. Within a few years of establishment, the organization had invested \$450,000 in African American owned and operated facilities. Often

times, however, the facilities that minorities were able to purchase were older bowling alleys that white owners no longer wanted. These establishments were usually smaller, outdated, and deteriorating properties in urban areas and nothing like the lavish and modern “people’s country clubs” of the white suburbs.

In addition to helping minorities access bowling facilities, The National Bowling Association worked to eradicate the discriminatory covenants of the American Bowling Congress and the Women’s International Bowling Congress. Although the associations’ racial restrictions were removed in the 1950s, discriminatory practices persisted locally at bowling establishments. In the early 1960s, African American bowlers took part in a series of sit-ins at bowling establishments, refusing to leave until they were allowed to bowl. Although these protests were often successful and despite the passage of the 1964 Civil Rights Act, the segregation of bowling was still informally practiced in many parts of the country.

Bowling Decline

After the bowling heyday of the 1950s and 1960s, many bowling establishments went out of business. This occurred for a variety of reasons. In the late 1960s, bowling center were overbuilt in certain markets, and less successful centers were forced to close their doors. Later, league play became less popular with the public in general, and as women entered the workforce in greater numbers during the 1970s, bowling centers were once again empty during daytime hours. The reason that most bowling centers closed, however, was due to rising land values. As land became more and more valuable, bowling centers were targeted for redevelopment because they occupied large parcels of land.

While many historical bowling establishments have been razed, numerous others have been altered. In the 1970s and 1980s, many bowling center [sic] were purchased by large corporations and stripped of their original character defining features and signage for a more corporate look.

Bowling in Los Angeles

The history of bowling in Los Angeles parallels the national context. Early newspaper articles show evidence that there were saloons with bowling alleys in the greater Los Angeles area around the turn of the century, and that there were public concerns about the morality of the activity that took place in these early establishments. With the advent of Prohibition, bowling alleys disassociated from saloons and began gaining respectability. Two early 1920s bowling alleys in Los Angeles were located at Jensen’s Recreation Center at 1700 W. Sunset Blvd. (1924, City Historic-Cultural Monument No. 652) and Highland Park Bowl at 5621 N. Figueroa (1927).¹⁸

By the 1930s, several bowling establishments opened in Los Angeles with characteristics of the bowling centers that would later become prevalent. The Hollywood Recreation Center (demolished), for example, opened in 1938 in the Streamline Moderne style with 22 lanes, a restaurant, and bar.

More significant was the Sunset Bowling Center (demolished), which opened in 1939 on the site of the former Warner Brothers studio in Hollywood, where the first talking motion picture was made.

¹⁸ The bowling alley is no longer extant in Jensen’s Recreation Center. The recently restored Highland Park Bowl at 5621 N. Figueroa is a contributing feature of the Highland Park Historic Preservation Overlay Zone and was not resurveyed for SurveyLA. No other extant prewar bowling alleys have been identified in Los Angeles.

It was the largest bowling establishment in the world at the time and touted as the “bowling showcase of the world” and “home to the famous 52 lanes in a row.”¹⁹

By 1946 bowling was gaining popularity in the Los Angeles area and the *Los Angeles Times* began a regular feature called “Down the Alley,” written by long-time sportswriter Don Snyder.²⁰ By the late 1940s, large-scale and elaborate bowling centers were being rapidly constructed in developing areas in and around Los Angeles.

Although there were over 100 bowling center [sic] in the greater Los Angeles area by the early 1960[s], by 1985 there were only 34. Centers began closing in the 1960s because of the intense competition in the local market. Starting in the 1970s, many bowling centers were demolished for redevelopment. Those that survived were often remodeled over time. Today, very few postwar bowling centers remain in the city of Los Angeles.

Bowling Center Architecture in the Postwar Period

Bowling centers were typically vast, one story, stand-alone structures. They were often located in or near new suburban shopping centers in areas where there was sufficient land to construct the building and its sprawling surrounding parking lot. Many of these establishments were designed by noted California architects of the time including Armet & Davis; Martin Stern, Jr.; Ron Cleveland; and Powers, Daly, and DeRosa. While some bowling centers were somewhat restrained examples of Mid-Century Modern, many others employed the Googie style. This style of roadside architecture was common to bowling alleys as well as coffee shops, motels, gas stations, and car washes. Between 1954 and 1961, the Long Beach-based firm of Powers, Daly, and DeRosa designed over one hundred bowling establishments across the United States in what was called the “California-style.”

Googie bowling centers used sweeping shapes, slick lines, dramatic angles, and futuristic forms, such as parabolas, boomerangs, and domes. Modernistic elements like exposed structural systems, tapered columns, and expansive plate glass walls were common. New building materials of the time such as steel, glass block, plywood, and plastic, were an important component of the futuristic designs. The use of vivid colors was typical, as was the incorporation of abstract imagery like starbursts. Most centers had large-scale, bold signs with neon and, sometimes, moveable parts that served as extensions of the building design. They were quite imposing when illuminated at night.

On the inside, bowling centers had elaborate, open floor plans. Fixtures including a shoe rental counter, scorekeeper tables, seating, and automatic ball returns. Lanes were usually arranged in one long row across from the service and amenity areas, although some centers had a back-to-back configuration in which two sets of lanes flanked a central concourse. Most centers additionally had a restaurant, lounge, nursery, billiards, offices, meeting space, and banquet rooms. Themes for the extravagantly decorated interiors included Egyptian and Tiki/Polynesian.

The eligibility standards and integrity considerations for Bowling Centers, 1949-1970 are below:

¹⁹ Marc Wanamaker, “Images of America: Hollywood 1940-2008” (Charleston, SC: Arcadia Publishing, 2009), 31; No Author, “Large Crowd of Bowlers Attends Sunset Opening,” *Los Angeles Times*, May 30, 1939, A13.

²⁰ “Down the Alley” ran from 1946 until about 1971 and featured information on leagues, tournaments, and bowlers both locally and nationwide. According to his obituary, Snyder specialized in writing about bowling and received several awards from the Bowling Writers Association of America. “Long Time Bowling Writer Snyder Dies,” *Los Angeles Times*, May 9, 2009.

Gay Bars as Social Institutions, 1920-1980²¹

The writer and critic John Loughery observed in *The Other Side of Silence*, "the gay bar was an important focus of homosexual life in America, for the practical purposes of seeing new faces and old friends and as an emblem of cultural survival." ²² While Loughery was writing specifically about gay men and bars, the statement is equally true for lesbians, bisexuals, and transgenders. Furthermore, the gay bar as a social institution also applies to other businesses that catered to LGBT persons such as nightclubs, restaurants, and coffee shops. Despite the fact that they could be raided by the police at any time, these were often the only places where LGBT persons could be themselves. The character of these places varied widely, reflecting the socioeconomic and ethnic/racial diversity within the LGBT community.

During the first decades of the 20th century, bars, nightclubs, and other venues were neither

²¹ Excerpted from GPA Consulting, "Lesbian, Gay, Bisexual and Transgender (LGBT) Context Statement," Los Angeles Citywide Historic Context Statement (City of Los Angeles Office of Historic Resources, September 2014), 56-63.

exclusively gay nor exclusively straight. Masked balls at places like the Merced Theater provided cover for nonconforming sexual and gender behavior. There were also numerous bars, dance halls, and theaters in Downtown Los Angeles where like-minded men and women could find one another. However, such places tended to be more favored by gay and bisexual men than lesbians, and were more patronized by working-class than middle-class LGBT persons.

The earliest concentration of gay bars and establishments in Los Angeles began on Bunker Hill and extended south on Hill Street to Pershing Square and then east to Main Street, specifically between Hill and Main. Bunker Hill and Pershing Square have great significance in early gay life in Los Angeles. Bunker Hill was a bohemian neighborhood that was already known to gay men by the 1910s, and it persisted as a haven for gay men through the 1950s. Pershing Square was not only a cruising area, but also a place where people gathered to discuss issues, including homosexual issues.

The adoption of the 18th Amendment to the U.S. Constitution in 1919 prohibited the sale of alcoholic beverages. Promoted by social conservatives as a means of improving public morals and health, the ban went into effect on January 17, 1920. As the federal government lacked the means to enforce the ban, it resulted in the proliferation of organized criminal syndicates that produced, imported, and transported alcohol throughout the country. In urban areas such as Los Angeles, an underground speakeasy culture developed where people from all walks of life in search of a drink were forced to mix with one another. The ascent of the motion picture industry and the influx of actors, writers, and designers during this era brought about particularly glitzy speakeasies. These speakeasies allowed for the emergence of a more visible and tolerated gay and lesbian life in a largely middle-class context for the first time.

The side streets off of Hollywood Boulevard, such as Ivar, Cosmo, and Cahuenga, were home to numerous speakeasies. They did not advertise their existence, and many were open only briefly before they would be raided by the LAPD and closed. Nightclubs that endured slightly longer included B.B.B.'s Cellar, the Montmartre, and Jimmy's Backyard. Although they were also patronized by straights, they were referred to as "queer bars" and "pansy joints" because they featured female impersonator revues.²³ So accepted were such performances, that the nightclubs and the movie stars that attended were actually written up in magazines like the *Hollywood Reporter* and *Variety*.²⁴ An African American entertainment district developed around the same time along Central Avenue. It was anchored by the Dunbar Hotel, which opened in 1928. The jazz club that occupied the ground floor also featured performances showcasing male and female impersonators. The Club Alabam, next door to the Dunbar, hosted an annual drag ball.

After the repeal of Prohibition in 1933, drinking alcohol was once again legal, but being homosexual was not. Male and female impersonators continued to perform, but not in drag. A new law had been enacted forbidding even entertainers from wearing clothing of the opposite gender.²⁵ The Rendezvous nightclub in Hollywood booked female impersonators Julian Eltinge and Ray Bourbon. On opening night, Eltinge dressed in a tuxedo, referred to his gowns on stage, and re-counted his famous performances. After a few nights, he was so discouraged that he retired to his house in Silver Lake. Eltinge was followed by Bourbon who had been performing at B.B.B.'s Cellar and Jimmy's Backyard. At the Rendezvous, he starred in his own revue, "Don't Call Me Madam." Like Eltinge, Bourbon was very private about his sexuality. He was married twice and

fathered at least one son.²⁶ The revues during this period were notably less glamorous and more vulgar than those that occurred during the so-called "Pansy Crazy" when the audience was more mixed.²⁷ At any rate, the LAPD began to crack down on such nightclubs. The difference is that instead of liquor law violations, the owners, performers, and patrons were charged with indecency or lewd conduct.

LGBT persons and gay-friendly businesses adopted several survival strategies in response to the escalation in surveillance and harassment from the LAPD during the 1930s. Many bars and nightclubs moved to the Sunset Strip. Positioned between Hollywood and Beverly Hills, the Sunset Strip was an unincorporated area of Los Angeles County at the time. Today it is part of the City of West Hollywood. The Los Angeles County Sheriff's Department was more lax in policing homosexual behavior and regulating bars and nightclubs catering to LGBT persons. This permissiveness allowed for the gradual ascendancy of West Hollywood as the fulcrum of the LGBT community during the late 1960s and 1970s.

Establishments in Los Angeles responded by keeping a lower profile. One approach was to cater to both gays and lesbians and sympathetic straights, making it difficult to tell a gay bar from a straight one. Bars and nightclubs also had self-imposed rules of conduct that prohibited same-sex dancing or even touching. Thus, minimizing the potential for entrapment by the LAPD Vice Squad. Middle-class LGBT persons had the option of patronizing hotel bars such as the Biltmore in Downtown or the Christie in Hollywood. During the Great Depression, such businesses went into survival mode, just like gays and lesbians. Needing all of the customers they could get, gays, bisexuals, and lesbians were permitted, so long as they were discreet, in other words, so long as they were not too flamboyant in their dress or manner. Middle-class gays and lesbians, however, already took pains to distance themselves from the "obvious" crowd, believing that they perpetuated negative stereotypes and drew unwanted attention.

The outbreak of World War II was felt throughout Los Angeles and the LGBT community was no exception. As a major port of embarkation on the West Coast and with the build up of the local defense industry, Los Angeles was flush with new employment opportunities as well as sailors and soldiers. This new economy and population led to the proliferation of gay and lesbian bars during the war years. According to Allan Bérubé, "These were among the first exclusively gay and lesbian bars in America. They branched out from, and sometimes replaced, the bohemian cafes, hotel bars, skid row taverns, nightclubs, and cafeterias of the 1930s where "queers," "fairies," and "dykes" could blend in with other social outcasts."²⁸ The military attempted to keep men and women away from known gay and lesbian establishments by posting signs that proclaimed "OUT OF BOUNDS TO MILITARY PERSONNEL," but were largely unsuccessful.²⁹ The influx of military personnel reinvigorated "The Run," a section of 5th Street that connected Pershing Square with the gay bars on Main Street.

Gay bars that emerged during World War II included the Crown Jewel, Harold's, and Maxwell's in Downtown and the House of Ivy and the Windup in Hollywood. However, the bar and nightclub scene expanded well beyond Downtown and Hollywood during the 1950s. This growth was partly supported by a California Supreme Court case that allowed homosexuals to assemble in public

places, so long as they were not committing any illegal or immoral acts on the premises. The case involved the Black Cat, a popular gay bar in San Francisco not to be confused with the bar by the same name in Silver Lake. After the repeal of Prohibition, the state's most common way of controlling the growth of the gay subculture was the revocation of liquor licenses. In 1951, the State Board of Equalization suspended the liquor license of the Black Cat based upon the fact that it was a place where homosexuals socialized. The owner, Sol Stoumen hired an attorney to appeal the decision that made its way to the Supreme Court. The Court ruled in *Stoumen v. Reilly* that a bar could not lose its liquor license because it catered to a gay clientele. Thus, California became the first state where gay bars could legally operate.³⁰

There was a notable increase in lesbian bars and nightclubs during the 1950s, particularly in the neighborhoods of Westlake and North Hollywood. Here again, these gathering places illustrate the class distinctions in the LGBT community. Middle-class lesbians tended to socialize in private homes with small groups of friends. Professional women during this period could not risk being arrested in a lesbian bar for fear of losing their jobs, which were already limited to certain fields such as education and medicine. But for working-class and young women still living at home, bars were the only places to meet other lesbians and feel like they were part of a community.³¹ The Lakeshore Club, the If Club, and Open Door became fixtures in Westlake with working-class lesbians of all races and ethnicities.

Redheads and the Star Room were also working-class lesbian bars, but they catered to specific ethnic/racial groups. Redheads, later just Reds and now Redz, began operation in Boyle Heights in the 1950s and drew a predominately Latina clientele. The Star Room, although not in the City of Los Angeles, was notable for attracting mostly African American patrons from South Los Angeles and Watts. The owner Jo Heston had to marry a man in order to buy the bar because laws at that time didn't allow women to own bars. The laws also prevented Heston from pouring liquor, so the bar had male bartenders.³²

The Westlake neighborhood became popular with gay men as well, especially after the redevelopment of Bunker Hill. The decline of Bunker Hill as a gay neighborhood and the rise of Westlake, Echo Park, and Silver Lake during the 1950s, resulted in the increasing level of class and ethnic/racial segregation of the venues remaining Downtown. Gender-transgressive persons and lower-income African Americans and Latinos became the primary patrons at the remaining venues including the Waldorf and Harold's as well as the inexpensive nearby cafes and theaters that also served as gathering places.

In 1955, the state once again attempted to reign in the number of gay and lesbian bars. The California legislature made it illegal for a bar to serve as a "resort for illegal possessors or users of narcotics, prostitution, pimps, panderers, or sexual perverts." Though this legislation was unconstitutional, it emboldened the Department of Alcohol and Beverage Control to suspend or revoke the licenses of gay bars simply as a result of seeing persons they deemed homosexual on the premises, because homosexuality was considered a sexual perversion. Not until 1959 did the California Supreme Court reaffirm that "a license may not be suspended or revoked simply because homosexuals or sexual perverts patronize the bar in question."³³ This ruling, however, can

hardly be viewed as a victory for gay rights. On the one hand the Court ruled again that it was legal for LGBT persons to congregate, but on the other hand the language in the ruling conflated homosexuality with sexual perversion.

During this period, LGBT persons began to realize that they would continue to be treated like second-class citizens unless they took action. The first known resistance to arbitrary police harassment in Los Angeles occurred at Cooper's Donuts, a popular gathering place for transgender persons on E. 5th Street. According to *Queerty*, this is the way the event unfolded:

Two cops entered the donut shop that night, ostensibly checking ID, and arbitrarily picked up two hustlers, two queens, and a young man just cruising and led them out. As the cops packed the back of the squad car, one of the men objected, shouting that the car was illegally crowded. While the two cops switched around to force him in, the others scattered out of the car.

From the donut shop, everyone poured out. The crowd was fed up with the police harassment and on this night they fought back, hurling donuts, coffee cups and trash at the police. The police, facing this barrage of [pastries] and porcelain, fled into their car calling for backup.

Soon, the street was bustling with disobedience. People spilled out in to the streets, dancing on cars, lighting fires, and generally wreaking havoc. The police return with backup and a number of rioters are beaten and arrested. They also closed the street off for a day [sic].³⁴

This minor but significant rebellion transpired ten years before the better-known rebellion at the Stonewall Inn in New York City and seven years before a similar occurrence at Compton's Cafeteria in San Francisco. The event demonstrated that while the lives of gays and lesbians was difficult, transgenders were the most abused and discriminated against members in the LGBT community because they were so visibly nonconforming. Indeed, many gay and lesbian bars rejected transgender persons because they were targets for the police.

In 1965, a San Francisco businessman by the name of Bob Damron published and sold an address book of all of the bars, nightclubs, restaurants, and coffee shops he visited in his travels across the U.S. Damron's Address Book has been updated annually since 1968 and has been called Damron Men's Travel Guide since 1999. The first volume of the Address Book listed 84 bars, restaurants, and coffee shops that catered to gays and lesbians in the greater Los Angeles area. The Address Book divided Los Angeles into four segments: Hollywood, Metropolitan Area (which included Downtown, Westlake, Echo Park, and Silver Lake), West and Southwest (Including West Hollywood), and the San Fernando Valley.³⁵ While most of these establishments are now gone and it is unknown how long they operated, the Address Book helps to document the settlement patterns of LGBT persons in Los Angeles.

The increase in the number of neighborhood bars and nightclubs during the 1960s reflected not only the geographic dispersion of the LGBT community, but also an increasing segregation of patrons along gender, ethnic/racial, and class lines. The places that epitomize this phenomenon

³⁴ "Before Stonewall, There Was the Cooper's Donuts and Compton's Cafeteria Riots," QUEERTY, accessed on July 1, 2014, <http://www.queerty.com/before-stonewall-there-was-the-coopers-donuts-and-comptons-cafeteria-riots-20111007/2>.

are the Catch One Disco and Circus Disco in Hollywood. Catch One in Midcity was established in 1972 as a nightclub for African Americans, while the Circus was established in 1975 for Latinos. Both were founded in response to the discrimination gay men of color experienced at predominately white venues in West Hollywood. Nightclubs like Studio One would discourage non-whites from entering by demanding multiple forms of identification. Both places are still in business and played vital roles for LGBT persons of color, not just places to have fun but also places to develop social support.

Gay bars were also places where people became engaged politically. It is no coincidence that two gay bars played prominent roles in the gay liberation movement in Los Angeles. In 1967, the LAPD swarmed the Black Cat in Silver Lake, beating and arresting sixteen patrons and bartenders for exchanging same-sex kisses. The police raid sparked the largest public gay rights demonstration to date. A similar incident in 1968 occurred at The Patch in Wilmington. Ironically it was the liberation of LGBT persons that resulted in the decline of gay bars by the end of the century. LGBT persons now have other opportunities to meet one another and feel safe socializing in straight bars and restaurants.

The eligibility standards and integrity considerations for Gay Bars as Social Institutions, 1920-1980 are below:

1309-11 S. Pacific Avenue

Criterion A

To be eligible for listing in the National Register under Criterion A, a property must have a direct association with events that have made a significant contribution to the broad patterns of our history. The context and theme considered in this evaluation is Commercial Development, 1859-1980, Neighborhood Commercial Development, 1880-1980. The applicable sub-theme is Streetcar Commercial Development, 1880-1934. This context is applicable to both Criteria A and C and was utilized for both evaluations for the property.

The advent of the streetcar in Los Angeles began as early as the 1870s. In San Pedro, Pacific Avenue developed as one of the main streetcar corridors as early as the turn of the twentieth century. The Pacific Electric streetcar's Point Frermin Line ran along Pacific Avenue, and the thoroughfare developed as one of the primary commercial corridors in the community.³⁶ Commercial development began along Pacific Avenue after the turn of the century; in the area more immediately surrounding the building at 1309-11 S. Pacific Avenue, commercial development did not become well-established until the 1910s. The historic context statement notes that "neighborhood shopping districts based on trolley service took on the look of small towns," which was the case for Pacific Avenue in San Pedro, where low-rise commercial buildings lined the street and contained a variety of businesses including markets, restaurants, and other retail.³⁷

In evaluating a property's significance under Criterion A, one must consider the larger events or trends with which it is associated. *National Register Bulletin #15* points out that "Mere association with historic events or trends is not enough, in and of itself, to qualify under Criterion A: the property's specific association must be considered important as well."³⁸ The building at 1309-11 S. Pacific Avenue does not appear to be associated in a significant manner with the development of Pacific Avenue as a commercial corridor related to the streetcar or streetcar-related commercial development in Los Angeles more generally. It was constructed in the early 1930s, after the development of the street as a streetcar-related commercial area was well underway. The property represents a development trend in general but not in a manner more significantly associated with that trend than other properties in the city. The eligibility standards for the property type are rather general in nature, and almost any extant commercial building related to the streetcar could meet many of them. The building is a typical example of the property type, so although it meets many of the eligibility standards for a streetcar commercial building, that does not mean it is significant for representing this trend of commercial development in Los Angeles. In addition, the building has been extensively altered from its original 1930s design (see discussion of integrity below), and many of the character-defining and associative features of a streetcar

³⁶ Historic Resources Group, 5-6.

³⁷ Prosser, 8.

³⁸ *National Register Bulletin #15*, 12.

commercial building, most notably one of its storefronts, have been lost. The property does not appear to be significant under Criterion A for its association with this context.

Criterion B

To be eligible for listing in the National Register under Criterion B, a property must be associated with the lives of persons significant in our past.

Oscar Zuercher constructed the building for use as a pharmacy. According to the 1920 Federal Census, Zuercher was born in 1881 in Minnesota and was married to Catherine. They had a daughter, Dorothea. The Zuerchers lived in Minnesota and North Dakota before moving to California. They lived in San Pedro until at least 1937. By 1939, Zuercher was living in Van Nuys or Encino (the same address is listed in both cities in various city directories). No further information was found about Zuercher to indicate that he would be considered a person significant in our past.

By 1946, La Rue Pharmacy, owned by McDonald La Rue, occupied the building. Research did not uncover any information about La Rue. No information was found about Ernest R. Collins, who occupied the space at 1311 S. Pacific Avenue by 1960. No information was found about Arthur C. Holloway to indicate he could be considered a significant individual in our past.

Based upon the research conducted for this report, the property does not appear to be significant under Criterion B.

Criterion C

To be eligible for listing under Criterion C, a property must embody the distinctive characteristics of a type, period, or method of construction, represent the work of a master, possess high artistic values, or represent a significant and distinguishable entity whose components may lack individual distinction.

The building at 1309-11 S. Pacific Avenue is a typical example of a streetcar commercial building designed with Art Deco stylistic influences. Streetcar commercial buildings were constructed throughout Los Angeles along historic streetcar routes. The subject building is typical, altered example of the property type. It displays a number of the character-defining features of the type including: one story height, is set to the sidewalk limit, accommodates one or multiple tenants, has a lack of dedicated parking, has one or more storefronts opening directly onto the sidewalk, and has storefronts with large display windows. The historic context statement emphasizes that "the most important architectural feature [of the type] is the storefront [...which] commonly contains a show window, with a recessed entrance placed either to the side or in the center and flanked by windows."³⁹ As noted in the analysis of integrity below, the building's storefronts (one of the most important character-defining features of a commercial building) have been altered. Therefore, the building no longer embodies the distinctive characteristics of its type.

The building was designed with elements of the Art Deco style. The Art Deco style first caught the public eye in America with Eliel Saarinen's entry into the 1922 Chicago Tribune competition to design its new building. Saarinen's design, which took second place, was an ethereal skyscraper with soaring verticality and stylized Gothic detail. The style was popularized by the Exposition

³⁹ Prosser, 19.

Internationale des Arts Décoratif et Industriels Modernes in Paris in 1925. The style used the tools of industrialization for artistically expressive purposes and quickly took hold in the United States. It celebrated a break from historic precedence, the decorative arts, new construction and fabrication methods, and creative uses of technology in the modern world, particularly within booming cities of the 1920s. In Los Angeles, it was applied to high profile, large-scale buildings at the dawn of the Great Depression, such as the Oviatt Building (1928), Bullock's Wilshire (1929), Eastern Columbia Building (1930), and Sun Realty Building (1931).⁴⁰

The character-defining features of the Art Deco style from the LAHCS Outline are outlined in the table below.

Table 9: Art Deco, 1926-1939	
Context: Architecture and Engineering, 1850-1980	
Sub-Context: L.A. Modernism, 1919-1980	
Theme: Related Responses to Modernism, 1926-1970	
Sub-Theme: Art Deco, 1926-1939	
Property Type: Commercial	
Eligibility Standards	
<ul style="list-style-type: none">• Was constructed/developed during the period of significance• Retains the essential character-defining features of the Art Deco style• Exhibits quality of design through distinctive features	
Character-Defining/Associative Features	
<ul style="list-style-type: none">• Emphasis on verticality• Smooth wall surfaces, such as stucco• Zigzags, chevrons and other stylized and geometric motifs as decorative elements on façade• Metal windows, often fixed sash and casement	
Integrity Considerations	
<ul style="list-style-type: none">• Setting may have changed (surrounding buildings and land uses)• Location, may have been moved for preservation purposes• Original use may have changed• Some windows and doors may have been replaced, as long as openings have not been altered and original fenestration patterns have not been disrupted• Original color palette may have been painted over or may no longer be evident	

The building located at 1309-11 S. Pacific Avenue displays stylistic influences of the Art Deco style, including the decorative elements on its primary elevation above the storefronts. However, it does not display the distinctive characteristics of the style otherwise; it can more accurately be described as a vernacular commercial building with some Art Deco elements. In addition, it is constructed of unreinforced masonry, a typical method of constructed from the period. It is not

⁴⁰ Excerpted from GPA Consulting, "Wilshire Mullen Project, Los Angeles, California Historical Resource Technical Report," December 2018, 27.

significant under this aspect of Criterion C for embodying the distinctive characteristics of a type, period, or method of construction.

No architect was specified on the original building permit, only a contractor (Sid Spearin). Research indicates that Spearin was responsible for the design and construction of the Wilmington Woman's Clubhouse in 1927 and a storefront at 455-49 W. 6th Street in San Pedro in 1935.⁴¹ He was also the designer and builder for the Fleming-Weber Company, created in 1927 by William Wrigley Jr. The firm was responsible for the construction of buildings in Wilmington, San Pedro, and Long Beach. By 1929, the company had constructed over a hundred buildings in those communities including an entire block of homes on Eucalyptus Avenue in Long Beach (1929) and a branch bank on Avalon Boulevard in Wilmington (1933, Walls and Clements were the architects).⁴² The firm existed until at least 1940. It is not clear if Spearin's work for the Woman's Clubhouse in Wilmington and storefront on W. 6th Street were independently undertaken or designed under the auspices of the Fleming-Weber Company.

National Register Bulletin #15 defines a master as "a figure of generally recognized greatness in a field, a known craftsman of consummate skill, or an anonymous craftsman whose work is distinguishable from others by its characteristics style and quality."⁴³ While the Fleming-Weber Company and Spearin appear to have been prolific builders in San Pedro and surrounding communities and contributed to the built environment there, they are not recognized in literature or historical sources as masters. Their work does not display a higher level of workmanship than other builders from the period. Rather they are among the many builder/developers working in Southern California during a period of extensive development. Therefore, it cannot be said the building was the work of a master architect, and it is not significant under this aspect of Criterion C.

The building at 1309-11 S. Pacific Avenue was evaluated for its potential to possess high artistic value. High artistic value typically refers to "an aesthetic ideal," such as stained glass or sculpture. *National Register Bulletin #15* states that "a property is eligible for its high artistic values if it so fully articulates a particular concept of design that it expresses an aesthetic ideal."⁴⁴ This is not the case for the building at 1309-11 S. Pacific Avenue. It does not articulate a particular, unique concept of design that would lead it to express an aesthetic ideal or high artistic value.

The last aspect of Criterion C, representing a significant and distinguishable entity whose components lack individual distinction, refers to historic districts. The buildings on the Project site were each evaluated individually, and the surrounding area does not appear to be a potential historic district. Although it developed in the late 1910s and 1920s as the primary commercial corridor of San Pedro, it was not identified as a historic district during SurveyLA. It does not appear to possess the distinct sense of time and place that would lead it to qualify as a potential historic district. Therefore, this aspect of Criterion C does not apply.

⁴¹ No Author, "San Pedro Store Planned," *Los Angeles Times*, August 11, 1935, 20.

⁴² No Author, "Company Buys Whole Block of Long Beach Homes," *Los Angeles Times*, June 9, 1929, E7; No Author, "Building Permit Asked," *Los Angeles Times*, November 12, 1933, 18.

⁴³ *National Register Bulletin #15*, 20.

⁴⁴ *National Register Bulletin #15*, 20.

For all the reasons outlined above, the property does not appear to be significant under Criterion C.

Criterion D

To be eligible for listing under Criterion D, a property's physical material must have yielded or may be likely to yield, information important to history or prehistory.

This criterion generally applies to archaeological resources but may apply to a built resource in instances where a resource may contain important information about such topics as construction techniques or human activity. In any case, the resource must be the principal source of information. This is unlikely to be true for the property at 1309-11 S. Pacific Avenue. Therefore, it does not appear to be significant under Criterion D.

Integrity

To be eligible for listing in the National Register, properties must retain their physical integrity from the period in which they gained significance. In the case of architecturally significant properties, the period of significance is normally the date of construction. For historically significant properties, the period of significance is usually measured by the length of the associations. As the property does not appear to be significant under any of the National Register criteria, it has no period of significance. Nevertheless, the property was analyzed against the seven aspects of integrity: location, design, setting, materials, workmanship, feeling, and association. While some factors of integrity are more important than others depending on the property, a majority of the seven recognized factors should be retained.

The property retains integrity of location, as it has not been moved. The building has seen numerous alterations since its construction in 1932, including alterations to its storefronts, its most dominant design feature. Therefore, it no longer retains integrity of design. The property retains integrity of setting, as the surrounding setting has not changed significantly since the building was constructed in 1932. It continues to consist of commercial and residential properties. The building no longer retains integrity of materials and workmanship, as many of its materials (including the entire south storefront) are reflective of a later period of time. Although not completely lost, the building's integrity of feeling has been significantly impacted by the alterations to its primary elevation. While it is still evident that the building was constructed during the 1930s due to the stylistic detailing above its storefronts, this is one of the few clues remaining that reveal its date of construction. The property was not found to be significant under Criteria A or B. Since integrity of association is defined as "the direct link between an important event or person and a historic property," and no important events or persons were found to be associated with the property, integrity of association does not apply.

Conclusion

There is no evidence that the property at 1309-11 S. Pacific Avenue possesses historic or architectural significance. In addition, the building has been significantly altered, most notably its storefronts, and it no longer retains integrity. According to the analysis enumerated above, the property does not appear to be eligible for the National Register under any criteria.

1319-23 S. Pacific Avenue

Criterion A

To be eligible for listing in the National Register under Criterion A, a property must have a direct association with events that have made a significant contribution to the broad patterns of our history. The first context and theme considered in this evaluation is Commercial Development, 1859-1980, Neighborhood Commercial Development, 1880-1980. The applicable sub-theme is Streetcar Commercial Development, 1880-1934. This context is applicable to both Criteria A and C and was utilized for both evaluations for the property.

The advent of the streetcar in Los Angeles began as early as the 1870s. In San Pedro, Pacific Avenue developed as one of the main streetcar corridors as early as the turn of the twentieth century. The Pacific Electric streetcar's Point Frermin Line ran along Pacific Avenue, and the thoroughfare developed as one of the primary commercial corridors in the community.⁴⁵ Commercial development began along Pacific Avenue after the turn of the century; in the area more immediately surrounding the building at 1319-23 S. Pacific Avenue, commercial development did not become well-established until the 1910s. The historic context statement notes that "neighborhood shopping districts based on trolley service took on the look of small towns," which was the case for Pacific Avenue in San Pedro, where low-rise commercial buildings lined the street and contained a variety of businesses including markets, restaurants, and other retail.

In evaluating a property's significance under Criterion A, one must consider the larger events or trends with which it is associated. *National Register Bulletin #15* points out that "Mere association with historic events or trends is not enough, in and of itself, to qualify under Criterion A: the property's specific association must be considered important as well."⁴⁶ The building at 1319-23 S. Pacific Avenue does not appear to be associated in a significant manner with the development of Pacific Avenue as a commercial corridor related to the streetcar or streetcar-related commercial development in Los Angeles more generally. It was constructed well after Pacific Avenue's establishment as a streetcar-related commercial corridor and late in the history of the streetcar in Los Angeles in general. It simply represents the continued development of Pacific Avenue, and it does not represent streetcar-related commercial development more so than the numerous other properties in the city. In addition, the building has been extensively altered (see integrity discussion below) and no longer possesses the associative features of a streetcar commercial building as outlined in the *LAHCS*. It does not appear to be significant under Criterion A for its association with this context.

The second context and theme considered in this evaluation is Commercial Development, 1859-1980, Neighborhood Commercial Development, 1880-1980. The applicable sub-theme is Restaurants, 1880-1980.

The building housed the restaurant called Madame's Chop Suey (later the Madame Café and New Madame Café) from at least 1946 until at least 1970. It also housed the Barrel House Café from at least 1950 until at least 1985. The spaces at 1323-33 S. Pacific Avenue (this building and the adjacent one to the south) were associated with the Turf Club Café by 1946. None of these

⁴⁵ Historic Resources Group, 5-6.

⁴⁶ *National Register Bulletin #15*, 12.

restaurants remain in the building currently. No information was found about these businesses during the course of research. Efforts were made to uncover information from the San Pedro Bay Historical Society, but nothing was found in their archives to indicate they could be considered significant.

The historic context indicates that “the café was a form that could be found both on the main streets of small towns and in neighborhood business districts which functioned very much like small towns. Between 1910 and 1940 the local café served as a social gathering place for the neighborhood. It fit into the standard storefront found in the streetcar-based neighborhood commercial district.”⁴⁷ Although they postdate the general trend of neighborhood restaurants, the restaurants housed in the building at 1319-23 S. Pacific Avenue fit more into this category of restaurant than the postwar automobile-oriented coffee shop. However, the building was not designed as a restaurant, one of the eligibility standards for the type (“was historically designed and used as a restaurant). The building was rather constructed as a general commercial building that later happened to house restaurants in its storefronts. It does not possess any character-defining or associative features of a restaurant, both because it was not purpose-built as one and because it has been extensively altered. The building does not appear to be significant under Criterion A for its association with this context.

Criterion B

To be eligible for listing in the National Register under Criterion B, a property must be associated with the lives of persons significant in our past.

The building was constructed by J.F. Gaffney of Asheville, North Carolina. Minimal information was found about a J.F. Gaffney, who lived in Asheville in 1924 and 1925. There is nothing to indicate that he could be considered a person significant in our past. No information was found about an individual by the name of J.F. Gafferey, so it is likely that his name was indeed Gaffney.

Alton C. Duchaine, who owned the building from at least 1933 until at least 1961, was born in 1897 and is listed as living in Long Beach in the 1930 Federal Census. He was married to Ethelyn and was an accountant and later an office manager in the oil industry. Minimal information was found otherwise, and there is nothing to indicate that he could be considered significant in our past. No information was found about C.E. Duchaine, who is listed as owning the building in 1936.

No first names were given for J. and W. Moore, and no information was found about associated individuals with those first initials. Minimal information was found about an individual by the name of Lawrence Victorino.

Research indicates that Anthony (or Antonio) Lauro was born in Italy (various dates ranging from 1904 to 1922 are given for his birth) and passed away in 1985. It appears that there was more than one individual with this name living in San Pedro at approximately the same time. A Venezuelan folk composer by the same name was uncovered during research, but he does not appear to have had any association with San Pedro or the businesses located in the building.

Numerous commercial tenants and individuals associated with those businesses have occupied the building. There is no evidence to suggest that any of the individuals associated with these

⁴⁷ Prosser, 101.

businesses could be considered significant in our past. Therefore, the property does not appear to be significant under Criterion B.

Criterion C

To be eligible for listing under Criterion C, a property must embody the distinctive characteristics of a type, period, or method of construction, represent the work of a master, possess high artistic values, or represent a significant and distinguishable entity whose components may lack individual distinction.

The building at 1319-23 S. Pacific Avenue is an example of a streetcar commercial building from the 1920s. However, it has been extensively altered and no longer possesses the character-defining features of its type. Any stylistic features it once possessed have been removed. The building is a typical unreinforced masonry building from the 1920s; it does not embody the distinctive characteristics of a method of construction any more than similar buildings from the period. It is not significant for embodying the distinctive characteristics of a type, period, or method of construction.

The original building permit is difficult to decipher, but the architect listed appears to be James C. Peterson. No information was found about an architect by that name, and the building does not appear to be significant as the work of a master.

The building at 1319-23 S. Pacific Avenue was evaluated for its potential to possess high artistic value. High artistic value typically refers to "an aesthetic ideal," such as stained glass or sculpture. *National Register Bulletin #15* states that "a property is eligible for its high artistic values if it so fully articulates a particular concept of design that it expresses an aesthetic ideal. This is not the case for the building at 1319-23 S. Pacific Avenue. It does not articulate a particular, unique concept of design that would lead it to express an aesthetic ideal or high artistic value.

The last aspect of Criterion C, representing a significant and distinguishable entity whose components lack individual distinction, refers to historic districts. The buildings on the Project site were each evaluated individually, and the surrounding area does not appear to be a potential historic district. Although it developed in the late 1910s and 1920s as the primary commercial corridor of San Pedro, it was not identified as a historic district during SurveyLA. It does not appear to possess the distinct sense of time and place that would lead it to qualify as potential historic district. Therefore, this aspect of Criterion C does not apply.

For all the reasons outlined above, the property does not appear to be significant under Criterion C.

Criterion D

To be eligible for listing under Criterion D, a property's physical material must have yielded or may be likely to yield, information important to history or prehistory.

This criterion generally applies to archaeological resources but may apply to a built resource in instances where a resource may contain important information about such topics as construction techniques or human activity. In any case, the resource must be the principal source of information. This is unlikely to be true for the property at 1319-23 S. Pacific Avenue. Therefore, it does not appear to be significant under Criterion D.

Integrity

To be eligible for listing in the National Register, properties must retain their physical integrity from the period in which they gained significance. In the case of architecturally significant properties, the period of significance is normally the date of construction. For historically significant properties, the period of significance is usually measured by the length of the associations. As the building does not appear to be significant under any of the National Register criteria, it has no period of significance. Nevertheless, the building was analyzed against the seven aspects of integrity: location, design, setting, materials, workmanship, feeling, and association. While some factors of integrity are more important than others depending on the property, a majority of the seven recognized factors should be retained.

The property retains integrity of location, as it has not been moved. The building has seen extensive alterations since its construction in 1924, including alterations to its storefronts, likely application of stucco over original cladding, and infill of windows on the west elevation. Therefore, it no longer retains integrity of design. The property retains integrity of setting, as the surrounding setting has not changed significantly since the building was constructed in 1924. It continues to consist of commercial and residential properties. The building no longer retains integrity of materials and workmanship, as many of its materials are reflective of a later period of time. The building no longer retains integrity of feeling due to its extensive alterations. It does not possess any features that point to its 1924 date of construction. The property was not found to be significant under Criteria A or B. Since integrity of association is defined as "the direct link between an important event or person and a historic property," and no important events or persons were found to be associated with the property, integrity of association does not apply.

Conclusion

There is no evidence that the property at 1319-23 S. Pacific Avenue possesses historic or architectural significance. In addition, the building has been significantly altered, most notably the storefronts on its primary elevation, and it no longer retains integrity. According to the analysis enumerated above, the property does not appear to be eligible for the National Register under any criteria.

1331 S. Pacific Avenue

Criterion A

To be eligible for listing in the National Register under Criterion A, a property must have a direct association with events that have made a significant contribution to the broad patterns of our history. The first context and theme considered in this evaluation is Commercial Development, 1880-1980; Post WWII Recreation, 1940-1975. The applicable sub-theme is Bowling Centers, 1949-1970. This sub-theme applies to both Criteria A and C. No separate sub-theme exists for bowling centers constructed before or during World War II, since so few examples remain.

The earliest bowling centers in Los Angeles were constructed at the beginning of the twentieth century, though they were not widely used due to a reputation for hosting questionably moral activity. During the 1920s, with the onset of Prohibition, bowling alleys became independent from their saloon roots and more attractive to a wider audience. Early bowling alleys were constructed in Los Angeles in the 1920s, including Jensen's Recreation Center (1924) and the Highland Park

Bowl (1927).⁴⁸ The Hollywood Recreation Center (1936) and Sunset Bowling Center (1939, demolished) are other examples that predate the World War II period. It was not until after the war that bowling centers became a widespread feature of recreation in Los Angeles.

In order for a property to be significant under Criterion A, it “must clearly be important within the associated historic context.”⁴⁹ It is not enough for a property to be associated with an event or trend, it “must [also] have an important association with the event or historic trends.”⁵⁰ Research revealed that San Pedro had two bowling alleys as early as 1926, the Pacific Bowling and Recreation Academy (this does not appear to have any affiliation with the later Pacific Bowling Center and was at a separate location) and the San Pedro Bowling Alley. Nearly a dozen bowling alleys are listed in Los Angeles in general that same year. By 1940, the date the subject building was constructed, there were already numerous bowling alleys in greater Los Angeles. This likely indicates that although the pastime had not reached the same level of widespread popularity that it enjoyed in the postwar years, bowling was becoming more commonly accepted during World War II.

The Civic Bowling Center at 1331 S. Pacific Avenue was one of two bowling alleys in San Pedro listed in the 1946 city directory. The other was the Twentieth Century Bowling Alley at 476 W. 5th Street. Although the building was one of two bowling alleys in San Pedro, it was simply one of numerous examples of the type in Los Angeles in general in the early 1940s. Furthermore, simply being constructed early in a trend does not equate to significance. The building does not appear to have a significant association with the early proliferation of the sport. There is no evidence, from the research conducted for this report, that it was significant in the more general history of recreation in Los Angeles or San Pedro in particular. There is no evidence to suggest that the Civic Bowling Center or the Pacific Bowling Center could be considered significant businesses in the community or significant in the context of recreation in Los Angeles in general. The building does not appear to be significant under Criterion A for its association with this context.

The building was also evaluated in the context of the more general commercial development of San Pedro in the twentieth century. As discussed previously, Pacific Avenue developed in the 1910s and 1920s as a streetcar-related commercial corridor. By 1940, when the building at 1331 S. Pacific Avenue was constructed, development was largely infill. Therefore, the building merely represents a continuation of commercial development rather than a significant trend in that development. The property does not appear to be significant for its association with this context.

The building was also evaluated in the context of LGBT history in Los Angeles, specifically the theme “Gay Bars as Social Institutions, 1920-1980” in the *LGBT Historic Context Statement*. Recollections from community members suggest that the business located in the building, the Dancing Waters Club, may have been a gay bar for a period of time. Research was conducted to corroborate this, but no information was found. The Dancing Waters Club, or Waters Club as it was also known, does not appear in known inventories of gay establishments such as Bob Damron’s Address Book. Even if it had been a gay bar, it is unlikely to be significant for its association with this context, given the difficulty of locating information about it. The property does not appear to be significant within this context.

⁴⁸ Shannon, 6.

⁴⁹ *National Register Bulletin #15*, 12.

⁵⁰ *National Register Bulletin #15*, 12.

The Dancing Waters Club, commonly known as the Waters Club, was also host to numerous bands that were part of the development of punk rock music in San Pedro in the late 1970s and early 1980s. Research suggests that punk rock music in San Pedro was a smaller and less well-known iteration of the developments that occurred in Hollywood and Los Angeles more generally. Bands that made an appearance at the Dancing Waters Club included the Reactionaries (some of whom later formed the Minutemen), the Wigs, and Soft White Underbelly (later Blue Oyster Cult). While some of the bands that performed at Dancing Waters went on to become important within the punk music genre, there is nothing to suggest that the Dancing Waters Club would convey their significance. Research suggests that these bands played there periodically rather than being associated with the venue on a permanent basis (i.e., they were not the house band). Bands perform at numerous venues over the course of their careers and not all will be significant because of this. *National Register Bulletin #15* notes that a property must not only be associated with an event or historic trend, but that “association must be considered important as well.”⁵¹ This does not appear to be the case, given how difficult it was to locate information about Dancing Waters as a punk music venue. Beyond the recollections of locals who attended performances at the Waters Club and a history of San Pedro punk music published by local show promoter Craig Iberra, minimal information was found about the property in association with punk music.⁵² This suggests that the property does not have a significant association with the development of punk music, and the property does not appear to be significant under Criterion A.

Criterion B

To be eligible for listing in the National Register under Criterion B, a property must be associated with the lives of persons significant in our past.

The building was constructed by Nick Pericich. Pericich was born in 1893 in Yugoslavia and immigrated to the United States in 1911. According to the 1930 Federal Census, he lived on 20th Street and owned a grocery store. Pericich was married to Edna M. Pericich. As early as the 1921, Pericich’s address is listed as 1245 S. Centre Street, San Pedro and his name is categorized under meat markets. By 1928, the Thirteenth and Centre Grocery and Meat Market is listed in the San Pedro city directory as being located at 1245 S. Centre Street. It is listed as being owned by August Felando, Paul Bogdanich, Nick Baskovich, and Nick Pericich. By 1930, Pericich is listed as living at 1320 20th Street and lived there until at least 1956. By the mid-1950s, he appears to have been retired; although other members of the family are listed as being associated with the store, Nick Pericich is not. He passed away in 1959. It is unclear if Pericich had any association with the bowling alley besides owning the building. No information was found connecting Pericich to a bowling alley in San Pedro, or any other businesses outside the market on Centre Street.

Louis Pesce owned the building by 1945. Louis M. Pesce was born in France in 1905 and was married to Blanche. They had a son, Louis M. Pesce Jr. According to the 1940 Federal Census, Pesce lived in Inglewood and is indicated as being the owner of a bowling alley. The census indicates that he lived in San Pedro in 1935. Prior to this, he was the assistant sales manager of a baking company and lived in Los Angeles. Pesce passed away in 1976 in Palos Verdes.

⁵¹ *National Register Bulletin #15*, 12.

⁵² “A Wailing of a Town, An Oral History of Early San Pedro Punk and More, 1977 – 1985,” End Fwy Press, accessed November 11, 2019, <https://endfwy.bigcartel.com/product/a-wailing-of-a-town-an-oral-history-of-early-san-pedro-punk-and-more-1977-1985>.

The 1946 city directory indicates that Pesce also owned the Twentieth Century Bowling Alley in San Pedro. His son was junior manager. Joseph Ivelia Jr. was co-owner of the Twentieth Century Bowling Alley and the Civic Bowling Center. Ivelia was born in 1916 and passed away in 1991. He owned the Twentieth Century Bowling Alley by 1940 and was living in San Pedro. Prior to that he was a clerk in a grocery store. By 1957, he owned the Pacific Bowling Center, the later business occupying 1331 S. Pacific Avenue. There is no evidence to suggest that either Pesce or Ivelia could be considered individuals significant in our past. In 1969, Al Cordiero (or Cordeiro) purchased the building. Minimal information was found about an individual by that name, and there is no evidence that they could be considered significant in our past.

For all the reasons outlined above, the property does not appear to be significant under Criterion B.

Criterion C

To be eligible for listing under Criterion C, a property must embody the distinctive characteristics of a type, period, or method of construction, represent the work of a master, possess high artistic values, or represent a significant and distinguishable entity whose components may lack individual distinction.

The building at 1331 S. Pacific Avenue was constructed in 1940 as a bowling alley, though its characteristics have more in common with a prewar commercial building than a bowling alley. At least one other prewar bowling center, this one from the 1920s and also located in San Pedro, had a similar appearance, with brick construction and characteristics more akin to a commercial building than a larger bowling center. Other examples of prewar bowling alleys include the Jensen's Recreation Center (1924), Highland Park Bowl (1927), Hollywood Recreation Center (1938, demolished), and the Sunset Bowling Center (1939, demolished). They were constructed either as part of larger recreation buildings, in the case of Jensen's, or as purpose-built bowling centers, in the case of the Hollywood Recreation Center, which had a restaurant and bar as well as 22 bowling lanes.⁵³ As the century progressed, they took on character-defining features similar to those that became more prevalent in the larger bowling centers constructed after the war.

By contrast, the building at 1331 S. Pacific Avenue is a relatively small bowling alley and is located along a commercial strip in a manner more resembling a pre-WWII commercial building. It had a restaurant and unidentified office space in front and bowling lanes to the rear. The restaurant was located in the northern portion along Pacific Avenue. The building was constructed in 1940, prior to the period of significance specified for Bowling Centers in the LAHCS. If it were intact, it might be considered significant as an early example of a bowling alley in Los Angeles. However, it has been significantly altered and no longer retains any exterior or interior features that point to its use as a bowling alley. The restaurant originally located in the northeast corner of the building has been infilled with glass block. It now has configurations of a walk-up restaurant and storefront (and altered ones at that) more than any character-defining features of a bowling alley or recreation building. It is not significant for embodying the distinctive characteristics of a type.

The building was designed with elements of the Streamline Moderne style. At the onset of the Great Depression, the richly ornamented Art Deco style was rejected for its excess; however, the same fascination with modern technology, movement, and efficiency that drove the Art Deco

⁵³ Shannon, 7.

movement would still be expressed in the Streamline Moderne style's distinct modern aesthetic by the mid-1930s. Influenced in part by industrial designers who perfected "streamlined" designs for objects like trains and airplanes to minimize wind resistance, the style is characterized by sweeping lines, curved corners, smooth surfaces, and a strong horizontal emphasis. The style was well-suited for the economic hardship of the 1930s, as it was relatively inexpensive to build using simple materials that still gave it an eye-catching appearance.⁵⁴

The character-defining features of the Streamline Moderne style from the *LAHCS* Outline are outlined in the table below.

Table 10: Streamline Moderne, 1934-1945	
Context: Architecture and Engineering, 1850-1980	
Sub-Context: L.A. Modernism, 1919-1980	
Theme: Related Responses to Modernism, 1926-1970	
Sub-Theme: Streamline Moderne, 1934-1945	
Property Type: Commercial	
Eligibility Standards	
<ul style="list-style-type: none">• Was constructed during the period of significance	
<ul style="list-style-type: none">• Retains the essential character-defining features of the Streamline Moderne style from the period of significance	
<ul style="list-style-type: none">• Exhibits quality of design through distinctive features	
Character-Defining/Associative Features	
<ul style="list-style-type: none">• Horizontal orientation	
<ul style="list-style-type: none">• Rounded corners and curved surfaces, emulating a "windswept" appearance	
<ul style="list-style-type: none">• Flat or nearly flat roofs	
<ul style="list-style-type: none">• Speedlines at wall surfaces, such as horizontal moldings and continuous sill courses	
<ul style="list-style-type: none">• Smooth stucco cladding	
<ul style="list-style-type: none">• Metal, often steel casement, windows	
<ul style="list-style-type: none">• Unadorned wall surfaces, with minimal ornament	
<ul style="list-style-type: none">• Windows "punched" into walls, with no surrounds	
Integrity Considerations	
<ul style="list-style-type: none">• Setting may have changed (surrounding buildings and land uses)	
<ul style="list-style-type: none">• Location, may have been moved for preservation purposes	
<ul style="list-style-type: none">• Original use may have changed	
<ul style="list-style-type: none">• Replacement of some windows and doors may be acceptable if the openings have not been resized and original fenestration patterns have not been disrupted	
<ul style="list-style-type: none">• The addition of security features such as screen doors and bars at windows	

The building at 1331 S. Pacific Avenue possesses some characteristics of the Streamline Moderne style, most notably the two decorative towers with rounded corners on the primary elevation.

⁵⁴ Excerpted from GPA Consulting, Long Beach Design Guidelines: Streamline Moderne Style Guide, December 2017.

However, it is not an excellent example of the style nor does it embody the distinctive characteristics of Streamline Moderne architecture. In addition, it has been significantly altered. It is not significant for embodying the distinctive characteristics of a type, period, or method of construction (it is built of typical materials from the period).

William F. Durr is listed as the building's architect. Durr was a San Pedro-based architect who practiced primarily from the 1910s through the 1940s. He designed several warehouses single-family residences, and multi-family residences in San Pedro. Other examples of his work include the San Pedro Women's Clubhouse at 1139 S. Gaffey Street (1913), an addition to the Lippman Building (1923), an addition to the French Sardine Company cannery (1928), a commercial building at 461 W. 6th Street (1929), the Eagles Club Building at 9th Street between Grand Avenue and Gaffey Street (1931), the Jewish Community Center, San Pedro (1934), the Pacific Boulevard School auditorium in Huntington Park (1936), and a new cannery for the French Sardine Cannery in the area of San Pedro known as Fish Harbor (1941). Minimal information was found about Durr beyond newspaper articles briefly mentioning his work. *National Register Bulletin #15* defines a master as "a figure of generally recognized greatness in a field, a known craftsman of consummate skill, or an anonymous craftsman whose work is distinguishable from others by its characteristic style and quality."⁵⁵ Durr was a local architect who practiced for at least 30 years in San Pedro, but no scholarship was found to indicate that he could be considered a master architect. The building does not appear to be significant under this aspect of Criterion C.

The building at 1331 S. Pacific Avenue was evaluated for its potential to possess high artistic value. High artistic value typically refers to "an aesthetic ideal," such as stained glass or sculpture. *National Register Bulletin #15* states that "a property is eligible for its high artistic values if it so fully articulates a particular concept of design that it expresses an aesthetic ideal."⁵⁶ This is not the case for the building at 1331 S. Pacific Avenue. It does not articulate a particular, unique concept of design that would lead it to express an aesthetic ideal or high artistic value.

The last aspect of Criterion C, representing a significant and distinguishable entity whose components lack individual distinction, refers to historic districts. The buildings on the Project site were each evaluated individually, and the surrounding area does not appear to be a potential historic district. Although it developed in the late 1910s and 1920s as the primary commercial corridor of San Pedro, it was not identified as a historic district during SurveyLA. It does not appear to possess the distinct sense of time and place that would lead it to qualify as potential historic district. Therefore, this aspect of Criterion C does not apply.

For all the reasons outlined above, the property does not appear to be significant under Criterion C.

Criterion D

To be eligible for listing under Criterion D, a property's physical material must have yielded or may be likely to yield, information important to history or prehistory.

This criterion generally applies to archaeological resources but may apply to a built resource in instances where a resource may contain important information about such topics as construction

⁵⁵ National Register Bulletin #15, 20.

⁵⁶ National Register Bulletin #15, 20.

techniques or human activity. In any case, the resource must be the principal source of information. This is unlikely to be true for the property at 1331 S. Pacific Avenue. Therefore, it does not appear to be significant under Criterion D.

Integrity

To be eligible for listing in the National Register, properties must retain their physical integrity from the period in which they gained significance. In the case of architecturally significant properties, the period of significance is normally the date of construction. For historically significant properties, the period of significance is usually measured by the length of the associations. As the property does not appear to be significant under any of the National Register criteria, it has no period of significance. Nevertheless, the property was analyzed against the seven aspects of integrity: location, design, setting, materials, workmanship, feeling, and association. While some factors of integrity are more important than others depending on the property, a majority of the seven recognized factors should be retained.

The property retains integrity of location, as it has not been moved. The building has seen numerous alterations since its construction in 1940, including extensive alterations to its storefronts and addition of incompatible signage. Therefore, it no longer retains integrity of design. The property retains integrity of setting, as the surrounding setting has not changed significantly since the building was constructed in 1940. It continues to consist of commercial and residential properties. The building no longer retains integrity of materials and workmanship, as many of its materials, especially those on the primary elevation, are reflective of a later period of time. The building's integrity of feeling has been affected by its alterations but the building's overall sense of feeling from 1940 remains. It therefore still retains this aspect of integrity. The property was not found to be significant under Criteria A or B. Since integrity of association is defined as "the direct link between an important event or person and a historic property," and no important events or persons were found to be associated with the property, integrity of association does not apply.

Criteria Consideration G

Because the property's significance for its association with punk music occurred within the last fifty years, Criterion Consideration G must be applied. Criterion Consideration G states that "a property achieving significance within the last 50 years is eligible if it is of exceptional importance."⁵⁷ Minimal information was found about the property's association with punk music in San Pedro in the late 1970s and early 1980s. It does not appear to have a significant association with the history of punk music specifically, or music in Los Angeles more generally, much less be of exceptional importance within this context. The property does not appear to meet Criteria Consideration G.

Conclusion

There is no evidence that the property at 1331 S. Pacific Avenue possesses historic or architectural significance. In addition, the building has been significantly altered, most notably its storefronts, and it no longer retains integrity of design, materials, or workmanship. According to the analysis enumerated above, the property does not appear to be eligible for the National Register under any criteria.

⁵⁷ *National Register Bulletin #15*, 41.

4.3 California Register of Historical Resources

The California Register criteria for eligibility mirror those of the National Register. Therefore, the properties appear to be ineligible for listing on the California Register for the same reasons outlined above.

4.4 Los Angeles Cultural Heritage Ordinance

Likewise, because the City of Los Angeles criteria were modeled on the National and California Registers criteria, the properties appear to be ineligible for designation as an HCM for the same reasons outlined above.

5. CONCLUSIONS

The properties located at 1309-11, 1319-23, and 1331 S. Pacific Avenue are not currently designated under national, state, or local landmark or historic district programs. Furthermore, they were not identified in SurveyLA. A records search prepared by the SCCIC revealed a potential prior evaluation of the property at 1311 S. Pacific Avenue; the building was given a Status Code of 5S2 (individual property that is eligible for local listing or designation). However, no other details or further documentation was available as part of the record search results. Since no date of evaluation was given, it is assumed that the evaluations are at least five years old, and the properties were re-evaluated as potential historical resources as part of the environmental review of a proposed Project on the site in compliance with CEQA.

GPA concludes that none of the properties appear to be eligible for listing in the National and California Registers, or for designation as an HCM due to a lack of significance and integrity. Additionally, they do not appear to contribute to a potential historic district. The recommended Status Code for the properties on the Project site is 6Z, ineligible for designation at the national, state, and local levels through survey evaluation. Therefore, the properties are not historical resources subject to CEQA. As the Project would have no impact on historical resources, no further study is recommended or required.

Appendix A – Résumé

ELYSHA PALUSZEK is an Associate Architectural Historian at GPA. She has been involved in the field of historic preservation since 2009. Elysha graduated from the University of Southern California with a Master of Historic Preservation. She has since worked in non-profit and private historic preservation consulting in California. Elysha joined GPA in 2010 and her experience has included the preparation of environmental compliance documents in accordance with the California Environmental Quality Act and Section 106 of the National Historic Preservation Act; Historic Structure Reports; Historic American Buildings Survey/Historic American Engineering Record recordation;

large-scale historic resources surveys; National Register of Historic Places nominations; local landmark nominations; and evaluations of eligibility for a wide variety of projects and property types throughout California. She has also completed numerous context statements on a wide array of property types and historic themes.

Educational Background:

- Master of Historic Preservation, University of Southern California, 2010
- B.A., History, College of William and Mary, 2008

Professional Experience:

- GPA Consulting, Associate Architectural Historian, 2018-Present
- SWCA, Architectural Historian, 2018
- GPA Consulting, Architectural Historian II, 2010-2015
- City of Los Angeles Office of Historic Resources, Intern, 2010-2011
- Los Angeles Conservancy, Graduate Intern, 2010
- Pasadena Heritage, Graduate Intern, 2009-2010
- National Trust for Historic Preservation, Intern, 2009

Qualifications:

- Meets the Secretary of the Interior's Professional Qualifications Standards for history and architectural history pursuant to the Code of Federal Regulations, 36 CFR Part 61, Appendix A.

Professional Activities:

- Los Angeles County Historical Landmarks and Records Commission, 2013-2017

Selected Projects:

- World Trade Center, Los Angeles, CEQA Historical Resource Evaluation Report, 2018
- Mira Loma Detention Center Women's Facility, Los Angeles County, CEQA Historical Resource Technical Report, 2016
- City Market of Los Angeles, CEQA Historical Resource Technical Report, 2015
- 1111 N. Los Robles Avenue, Pasadena, National Register Nomination, 2013
- 1121 N. Los Robles Avenue, Pasadena, National Register Nomination, 2013
- Old Vallejo City Hall, National Register Nomination, 2013
- Old Vallejo Masonic Temple, National Register Nomination, 2013
- Hotel Rosslyn Annex, Los Angeles, National Register Nomination, 2013
- Willys Knight Building, Los Angeles, CEQA Historical Resource Technical Report, 2013
- 500 Broadway, Santa Monica, CEQA Historical Resource Evaluation Report, 2013
- Claremont Graduate University Master Plan, CEQA Historical Resource Technical Report, 2013
- Bel Air/Beverly Crest Historic Resource Survey, SurveyLA, 2012-2013
- 1335 East Grand Avenue, Pomona, CEQA Historical Resource Technical Report, 2011
- 1717 Gramercy Place, Hollywood, CEQA Historical Resource Evaluation Report, 2011
- Jack's Restaurant, Whittier, CEQA Historical Resource Evaluation Report, 2011

Re: Records Search Results for the 1309-1331 S. Pacific Ave Project

The South Central Coastal Information Center received your records search request for the project area referenced above, located on the San Pedro, CA USGS 7.5' quadrangle. The following reflects the results of the records search for the project area and a no radius:

As indicated on the data request form, the locations of non-archaeological resources and reports are provided in the following format: ☒ custom GIS maps ☐ shape files ☐ hand-drawn maps

Non-archaeological Resources within project area: 0	None
Resources listed in the OHP Historic Properties Directory within project area: 0	None
Resources listed in the Historic Properties Directory that lack specific locational information: 1	SEE ATTACHED LIST FOR INDIVIDUAL PROPERTY STATUS CODES - These properties may or may not be in your project area
Reports within project area: 2	LA-02399 and LA- 10527

Please forward a copy of any resulting reports from this project to the office as soon as possible. Due to the sensitive nature of archaeological site location data, we ask that you do not include resource location maps and resource location descriptions in your report if the report is for public distribution. If you have any questions regarding the results presented herein, please contact the office at the phone number listed above.

The provision of CHRIS Data via this records search response does not in any way constitute public disclosure of records otherwise exempt from disclosure under the California Public Records Act or any other law, including, but not limited to, records related to archeological site information maintained by or on behalf of, or in the possession of, the State of California, Department of Parks and Recreation, State Historic Preservation Officer, Office of Historic Preservation, or the State Historical Resources Commission.

Due to processing delays and other factors, not all of the historical resource reports and resource records that have been submitted to the Office of Historic Preservation are available via this records search. Additional information may be available through the federal, state, and local agencies that produced or paid for historical resource management work in the search area. Additionally, Native American tribes have historical resource information not in the CHRIS Inventory, and you should contact the California Native American Heritage Commission for information on local/regional tribal contacts.

Should you require any additional information for the above referenced project, reference the record search number listed above when making inquiries. Requests made after initial invoicing will result in the preparation of a separate invoice.

Thank you for using the California Historical Resources Information System,

Michelle Galaz
Assistant Coordinator

*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

The commercial building at 1309-11 S. Pacific Avenue was constructed in 1932. The one-story building is rectangular in plan, constructed of unreinforced masonry, and has a flat roof with flat parapet and concrete molding. It is designed with Art Deco stylistic elements. Below the roof, the brick is set into a decorative basket weave pattern. A decorative cast concrete stringcourse has a pattern of alternating triangles and half-moon shapes interspersed with vertically fluted projections.

The building has two storefronts on the east elevation. The north storefront is comprised of a recessed single door with sidelight on one side. The door is flanked by display windows. Both the door and windows have been boarded over. Below both display windows are tile bulkheads. The south storefront has been infilled and covered with textured stucco. It has three fixed vinyl windows with vinyl fanlights and a single wood paneled door with a security screen, also with a vinyl fanlight above. Above both storefronts are divided steel and aluminum transom windows with pebbled glass. (See continuation sheet on page 3.)

Period of Significance 1880-1934 Property Type Commercial Applicable Criteria N/A
(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The property was evaluated for eligibility for listing in the National Register of Historic Places.

Criterion A

To be eligible for listing in the National Register under Criterion A, a property must have a direct association with events that have made a significant contribution to the broad patterns of our history. The context and theme considered in this evaluation is Commercial Development, 1859-1980, Neighborhood Commercial Development, 1880-1980. The applicable sub-theme is Streetcar Commercial Development, 1880-1934. This context is applicable to both Criteria A and C and was utilized for both evaluations for the property.

The advent of the streetcar in Los Angeles began as early as the 1870s. In San Pedro, Pacific Avenue developed as one of the main streetcar corridors as early as the turn of the twentieth century. The Pacific Electric streetcar's Point Fermin Line ran along Pacific Avenue, and the thoroughfare developed as one of the primary commercial corridors in the community (Historic Resources Group, 5-6). (see page 3)

*Recorded by: Elysha Paluszek, GPA Consulting *Date 04/11/2019 ☒ Continuation ☐ Update

P3a. Description (cont.)

The walls on the north and south are shared with commercial buildings on either side. The west elevation features two single doors covered with security screens and multi-light steel industrial sash windows covered with security bars. Several window openings on the west elevation have been infilled with concrete block. A large exterior brick chimney is located at the northeast corner of the building. To the east of the building is a raised concrete deck that serves as a surface parking lot.

Alterations to the building include the installation of seismic anchor plates, reconfiguration and infill of the storefronts on the east elevation, replacement of the transom windows, and infill of window openings on the west elevation. The interior of the building has also been altered, and no original fabric remains. The building permit record indicates that the storefronts were altered in 1949 and 2000.

Ownership and Tenant History

For much of the building's history, each storefront (1309 and 1311 S. Pacific Avenue) has been occupied by a separate business. The building was constructed in 1932 by Oscar Zuercher, a druggist who opened Zuercher Pharmacy in the building at 1309 S. Pacific Avenue. Zuercher Pharmacy remained in the building until 1937, though listings for the business in city directories for some years call the business Zuercher Pacific Pharmacy. It is also later called Zuercher Rexell Pharmacy. Therefore, Pacific Pharmacy, which occupied the building beginning in 1938, may have been a successor. La Rue Pharmacy had moved into the space by 1946. The business remained in the building until at least 1995 and was owned by McDonald La Rue.

1311 S. Pacific Avenue was occupied by Paramount Laundry by 1946. It was joined by Los Angeles Harbor Cleaners by 1950. These businesses utilized the building until at least 1957. By 1960, United Vending Services and Ernest R. Collins are listed as occupying this portion of the building. By 1980, Arthur C. Holloway is listed as the tenant.

1311 ½ S. Pacific Avenue is not listed separately until 1950. By this time, Ernie Collins Watch and Jewelry Repair was the tenant. This business is listed at the address until at least 1970.

B10. Significance (cont.)

Commercial development began along Pacific Avenue after the turn of the century; in the area more immediately surrounding the building at 1309-11 S. Pacific Avenue, commercial development did not become well-established until the 1910s. The historic context statement notes that "neighborhood shopping districts based on trolley service took on the look of small towns," which was the case for Pacific Avenue in San Pedro, where low-rise commercial buildings lined the street and contained a variety of businesses including markets, restaurants, and other retail (Prosser, 8).

In evaluating a property's significance under Criterion A, one must consider the larger events or trends with which it is associated. *National Register Bulletin #15* points out that "Mere association with historic events or trends is not enough, in and of itself, to qualify under Criterion A: the property's specific association must be considered important as well" (Andrus and Shrimpton, 12).

The building at 1309-11 S. Pacific Avenue does not appear to be associated in a significant manner with the development of Pacific Avenue as a commercial corridor related to the streetcar or streetcar-related commercial development in Los Angeles more generally. It was constructed in the early 1930s, after the development of the street as a streetcar-related commercial area was well underway. The property represents a development trend in general but not in a manner more significantly associated with that trend than other properties in the city. The eligibility standards for the property type are rather general in nature, and almost any extant commercial building related to the streetcar could meet many of them. The building is a typical example of the property type, so although it meets many of the eligibility standards for a streetcar

CONTINUATION SHEET

Page 4 of 6

*Resource Name or # (Assigned by recorder) 1309-11 S. Pacific Avenue

*Recorded by: Elysha Paluszek, GPA Consulting *Date 04/11/2019 ☒ Continuation ☐ Update

commercial building, that does not mean it is significant for representing this trend of commercial development in Los Angeles. In addition, the building has been extensively altered from its original 1930s design (see discussion of integrity below), and many of the character-defining and associative features of a streetcar commercial building, most notably one of its storefronts, have been lost. The property does not appear to be significant under Criterion A for its association with this context.

Criterion B

To be eligible for listing in the National Register under Criterion B, a property must be associated with the lives of persons significant in our past.

Oscar Zuercher constructed the building for use as a pharmacy. According to the 1920 Federal Census, Zuercher was born in 1881 in Minnesota and was married to Catherine. They had a daughter, Dorothea. The Zuerchers lived in Minnesota and North Dakota before moving to California. They lived in San Pedro until at least 1937. By 1939, Zuercher was living in Van Nuys or Encino (the same address is listed in both cities in various city directories). No further information was found about Zuercher to indicate that he would be considered a person significant in our past.

By 1946, La Rue Pharmacy, owned by McDonald La Rue, occupied the building. Research did not uncover any information about La Rue. No information was found about Ernest R. Collins, who occupied the space at 1311 S. Pacific Avenue by 1960. No information was found about Arthur C. Holloway to indicate he could be considered a significant individual in our past.

Based upon the research conducted for this report, the property does not appear to be significant under Criterion B.

Criterion C

To be eligible for listing under Criterion C, a property must embody the distinctive characteristics of a type, period, or method of construction, represent the work of a master, possess high artistic values, or represent a significant and distinguishable entity whose components may lack individual distinction.

The building at 1309-11 S. Pacific Avenue is a typical example of a streetcar commercial building designed with Art Deco stylistic influences. Streetcar commercial buildings were constructed throughout Los Angeles along historic streetcar routes. The subject building is typical, altered example of the property type. It displays a number of the character-defining features of the type including: one story height, is set to the sidewalk limit, accommodates one or multiple tenants, has a lack of dedicated parking, has one or more storefronts opening directly onto the sidewalk, and has storefronts with large display windows. The historic context statement emphasizes that "the most important architectural feature [of the type] is the storefront [...which] commonly contains a show window, with a recessed entrance placed either to the side or in the center and flanked by windows" (Prosser, 19).

As noted in the analysis of integrity below, the building's storefronts (one of the most important character-defining features of a commercial building) have been altered. Therefore, the building no longer embodies the distinctive characteristics of its type.

The building was designed with elements of the Art Deco style. The Art Deco style first caught the public eye in America with Eliel Saarinen's entry into the 1922 Chicago Tribune competition to design its new building. Saarinen's design, which took second place, was an ethereal skyscraper with soaring verticality and stylized Gothic detail. The style was popularized by the Exposition Internationale des Arts Décoratifs et Industriels Modernes in Paris in 1925. The style used the tools of industrialization for artistically expressive purposes and quickly took hold in the United States. It celebrated a break from historic precedence, the decorative arts, new construction and fabrication methods, and creative uses of technology in the modern world, particularly within booming cities of the 1920s. In Los Angeles, it was applied to high profile, large-scale

CONTINUATION SHEET

Page 5 of 6

buildings at the dawn of the Great Depression, such as the Oviatt Building (1928), Bullock's Wilshire (1929), Eastern Columbia Building (1930), and Sun Realty Building (1931) (GPA Consulting, 27).

The building located at 1309-11 S. Pacific Avenue displays stylistic influences of the Art Deco style, including the decorative elements on its primary elevation above the storefronts. However, it does not display the distinctive characteristics of the style otherwise; it can more accurately be described as a vernacular commercial building with some Art Deco elements. In addition, it is constructed of unreinforced masonry, a typical method of construction from the period. It is not significant under this aspect of Criterion C for embodying the distinctive characteristics of a type, period, or method of construction.

No architect was specified on the original building permit, only a contractor (Sid Spearin). Research indicates that Spearin was responsible for the design and construction of the Wilmington Woman's Clubhouse in 1927 and a storefront at 455-49 W. 6th Street in San Pedro in 1935. He was also the designer and builder for the Fleming-Weber Company, created in 1927 by William Wrigley Jr. The firm was responsible for the construction of buildings in Wilmington, San Pedro, and Long Beach. By 1929, the company had constructed over a hundred buildings in those communities including an entire block of homes on Eucalyptus Avenue in Long Beach (1929) and a branch bank on Avalon Boulevard in Wilmington (1933, Walls and Clements were the architects). The firm existed until at least 1940. It is not clear if Spearin's work for the Woman's Clubhouse in Wilmington and storefront on W. 6th Street were independently undertaken or designed under the auspices of the Fleming-Weber Company.

National Register Bulletin #15 defines a master as "a figure of generally recognized greatness in a field, a known craftsman of consummate skill, or an anonymous craftsman whose work is distinguishable from others by its characteristics style and quality" (Andrus and Shrimpton, 20).

While the Fleming-Weber Company and Spearin appear to have been prolific builders in San Pedro and surrounding communities and contributed to the built environment there, they are not recognized in literature or historical sources as masters. Their work does not display a higher level of workmanship than other builders from the period. Rather they are among the many builder/developers working in Southern California during a period of extensive development. Therefore, it cannot be said the building was the work of a master architect, and it is not significant under this aspect of Criterion C.

The building at 1309-11 S. Pacific Avenue was evaluated for its potential to possess high artistic value. High artistic value typically refers to "an aesthetic ideal," such as stained glass or sculpture. *National Register Bulletin #15* states that "a property is eligible for its high artistic values if it so fully articulates a particular concept of design that it expresses an aesthetic ideal" (Andrus and Shrimpton, 20).

This is not the case for the building at 1309-11 S. Pacific Avenue. It does not articulate a particular, unique concept of design that would lead it to express an aesthetic ideal or high artistic value.

The last aspect of Criterion C, representing a significant and distinguishable entity whose components lack individual distinction, refers to historic districts. The buildings on the Project site were each evaluated individually, and the surrounding area does not appear to be a potential historic district. Although it developed in the late 1910s and 1920s as the primary commercial corridor of San Pedro, it was not identified as a historic district during SurveyLA. It does not appear to possess the distinct sense of time and place that would lead it to qualify as a potential historic district. Therefore, this aspect of Criterion C does not apply.

For all the reasons outlined above, the property does not appear to be significant under Criterion C.

CONTINUATION SHEET

Page 6 of 6

*Resource Name or # (Assigned by recorder) 1309-11 S. Pacific Avenue

*Recorded by: Elysha Paluszek, GPA Consulting *Date 04/11/2019 ☒ Continuation ☐ Update

Criterion D

To be eligible for listing under Criterion D, a property's physical material must have yielded or may be likely to yield, information important to history or prehistory.

This criterion generally applies to archaeological resources but may apply to a built resource in instances where a resource may contain important information about such topics as construction techniques or human activity. In any case, the resource must be the principal source of information. This is unlikely to be true for the property at 1309-11 S. Pacific Avenue. Therefore, it does not appear to be significant under Criterion D.

Integrity

To be eligible for listing in the National Register, properties must retain their physical integrity from the period in which they gained significance. In the case of architecturally significant properties, the period of significance is normally the date of construction. For historically significant properties, the period of significance is usually measured by the length of the associations. As the property does not appear to be significant under any of the National Register criteria, it has no period of significance. Nevertheless, the property was analyzed against the seven aspects of integrity: location, design, setting, materials, workmanship, feeling, and association. While some factors of integrity are more important than others depending on the property, a majority of the seven recognized factors should be retained.

The property retains integrity of location, as it has not been moved. The building has seen numerous alterations since its construction in 1932, including alterations to its storefronts, its most dominant design feature. Therefore, it no longer retains integrity of design. The property retains integrity of setting, as the surrounding setting has not changed significantly since the building was constructed in 1932. It continues to consist of commercial and residential properties. The building no longer retains integrity of materials and workmanship, as many of its materials (including the entire south storefront) are reflective of a later period of time. Although not completely lost, the building's integrity of feeling has been significantly impacted by the alterations to its primary elevation. While it is still evident that the building was constructed during the 1930s due to the stylistic detailing above its storefronts, this is one of the few clues remaining that reveal its date of construction. The property was not found to be significant under Criteria A or B. Since integrity of association is defined as "the direct link between an important event or person and a historic property," and no important events or persons were found to be associated with the property, integrity of association does not apply.

Conclusion

There is no evidence that the property at 1309-11 S. Pacific Avenue possesses historic or architectural significance. In addition, the building has been significantly altered, most notably its storefronts, and it no longer retains integrity. According to the analysis enumerated above, the property does not appear to be eligible for the National Register under any criteria.

California Register of Historical Resources

The California Register criteria for eligibility mirror those of the National Register. Therefore, the property appears to be ineligible for listing on the California Register for the same reasons outlined above.

Los Angeles Cultural Heritage Ordinance

Likewise, because the City of Los Angeles criteria were modeled on the National and California Registers criteria, the property appears to be ineligible for designation as an HCM for the same reasons outlined above.

The building located at 1319-23 S. Pacific Avenue is a one-story unreinforced masonry commercial building constructed in 1924. The original building permit indicates that the architect was J[illegible] Peterson and the contractor was J.C. Anderson of San Francisco. It is rectangular in plan and has a flat roof with low flat parapet. The building's east elevation is clad in textured stucco. It features three storefronts. The north and center storefronts are each comprised of a single glass and metal storefront door with angled aluminum display windows on either side and transoms above. The center storefront's door has a sidelight on one side as well. The south storefront consists of a single wood slab door on the south side and partial-height display windows on the north side. A blade sign reading "Enigma Bar" is affixed above the south storefront. The bulkheads below all three storefronts have been covered with textured stucco. (See continuation sheet).

*Recorded by: Elysha Paluszek, GPA Consulting *Date 04/11/2019 ☒ Continuation ☐ Update

P3a. Description (cont.)

The building shares north and south walls with the neighboring buildings. The west elevation is painted brick with window openings infilled with concrete block. Like the building at 1309-11 S. Pacific Avenue, there is a raised paved surface parking lot to the west of the building. It is accessed by concrete steps with a metal railing. Immediately to the west of the building is a small single-story storage building with a flat roof; it is clad in stucco and has a single slab door covered with a metal security screen. It was constructed in 1961.

Alterations to the building consist of reconfiguration of the storefronts on the east elevation, application of textured stucco, and installation of seismic anchor bolts (visible on the west elevation). The primary (east) elevation of the building has been extensively altered. The building permit record indicates that alterations to the storefronts began as early as 1933, when a door was moved to the south side of the elevation, the storefronts were changed (further details were not provided), and an 8-foot partition was installed in the building from north to south. In 1938, a skylight was installed. In 1941, the storefront for 1323 S. Pacific was altered again; the transoms were removed and replaced with plaster and glass. In 1942, the doors for 1321 S. Pacific Avenue were changed. In 1960, a permit was filed for a parapet correction. A sign for the Barrel House Café, located at 1323 S. Pacific Avenue, was added in 1963. It is no longer extant. In 1985, a projecting sign was added. Between 1988 and 1989, the building was retrofitted for earthquake safety. The building was reroofed in 2003, and the building's roof was altered over the main elevation in 2005 as part of fire damage repairs. The interior of the building was remodeled in 2004 and the portion of the building at 1321 S. Pacific Avenue was changed from retail to office and storage.

Ownership and Tenant History

The building located at 1319-23 S. Pacific Avenue was constructed in 1924 by J.F. Gafferey (or Gaffney) Sr. of Asheville, North Carolina (later Gaffney is recorded as living in Long Beach). By 1933, A.C. Duchaine owned the building. By 1936, C.E. Duchaine owned the building, although A.C. Duchaine is again listed as the owner in 1961. By 1963, the owner is listed as J. and W. Moore, who at the very least owned the business at 1323 S. Pacific Avenue. Lawrence Victorino owned the building by 1988. By 2004, Evangelos and Toula Bitsakis owned the building. For much of the building's history, it was occupied by separate businesses in each storefront (1319, 1321, and 1323 S. Pacific Avenue).

In 1926, the earliest listing for 1319 S. Pacific Avenue, the Electrical Contractor Manufacturing and Supply Company occupied the building. The San Pedro Glass and Mirror Company occupied 1319 S. Pacific Avenue in 1928 and 1930. Frank Shields was the manager. The company was in the manufacturing and wholesale business. The business was owned by Doral C. Smith, George A. Bergeman, and Daniel K. Allen, according to the 1930 San Pedro city directory. By 1946, 1319 S. Pacific Avenue was occupied by a pet shop owned by Mrs. M.A. Ostendorf. By 1950, it was occupied by the San Pedro Pet Shop. The business remained in the building until at least 1970. By 1985, it was utilized by G&M Recycling Jeans. By 1990, the space at 1319 S. Pacific Avenue was occupied by Alamo Video.

The space at 1321 S. Pacific Avenue was occupied by Sunset Dye Works in 1926 and 1928. Frank Harris and Muriel Rickard are listed as the managers for those dates, respectively. By 1942, Osen Café occupied the storefront. By 1946, the space was occupied by Madame's Chop Suey, presumably the same business as Madame Café, which occupied the space from at least 1950 until at least 1985. It was listed as the New Madame Café beginning in 1970. By 1990, the space was utilized by Golden House Chinese Restaurant and by Taqueria Azteca by 1995. The space was converted to office use and storage in 2004.

1323 S. Pacific Avenue housed a fruit and vegetable dealer business owned by Joseph Cenatiempo in 1926. By 1928, it housed the Pacific Home Brew Company, owned by Joseph Cenatiempo and John Vix. The business provided beverage-related supplies, including malt, hops, caps, and bottles. By 1930, the address was associated with F. K. Applebaum's drug store. By 1946, the address was associated with Anthony Lauro's bowling alley and the Turf Club Café (the listing includes 1323-33 S. Pacific Avenue, this building and the one next door). From at least 1950 until at least 1985, it was occupied by the Barrel House Café, owned by J. and W. Moore.

CONTINUATION SHEET

*Recorded by: Elysha Paluszek, GPA Consulting *Date 04/11/2019 ☒ Continuation ☐ Update

B10. Significance (cont.)

The advent of the streetcar in Los Angeles began as early as the 1870s. In San Pedro, Pacific Avenue developed as one of the main streetcar corridors as early as the turn of the twentieth century. The Pacific Electric streetcar's Point Fermin Line ran along Pacific Avenue, and the thoroughfare developed as one of the primary commercial corridors in the community (Historic Resources Group, 5-6). Commercial development began along Pacific Avenue after the turn of the century; in the area more immediately surrounding the building at 1319-23 S. Pacific Avenue, commercial development did not become well-established until the 1910s. The historic context statement notes that "neighborhood shopping districts based on trolley service took on the look of small towns," which was the case for Pacific Avenue in San Pedro, where low-rise commercial buildings lined the street and contained a variety of businesses including markets, restaurants, and other retail.

In evaluating a property's significance under Criterion A, one must consider the larger events or trends with which it is associated. *National Register Bulletin #15* points out that "Mere association with historic events or trends is not enough, in and of itself, to qualify under Criterion A: the property's specific association must be considered important as well" (Andrus and Shrimpton, 12). The building at 1319-23 S. Pacific Avenue does not appear to be associated in a significant manner with the development of Pacific Avenue as a commercial corridor related to the streetcar or streetcar-related commercial development in Los Angeles more generally. It was constructed well after Pacific Avenue's establishment as a streetcar-related commercial corridor and late in the history of the streetcar in Los Angeles in general. It simply represents the continued development of Pacific Avenue, and it does not represent streetcar-related commercial development more so than the numerous other properties in the city. In addition, the building has been extensively altered (see integrity discussion below) and no longer possesses the associative features of a streetcar commercial building as outlined in the *LAHCS*. It does not appear to be significant under Criterion A for its association with this context.

The second context and theme considered in this evaluation is Commercial Development, 1859-1980, Neighborhood Commercial Development, 1880-1980. The applicable sub-theme is Restaurants, 1880-1980.

The building housed the restaurant called Madame's Chop Suey (later the Madame Café and New Madame Café) from at least 1946 until at least 1970. It also housed the Barrel House Café from at least 1950 until at least 1985. The spaces at 1323-33 S. Pacific Avenue (this building and the adjacent one to the south) were associated with the Turf Club Café by 1946. None of these restaurants remain in the building currently. No information was found about these businesses during the course of research. Efforts were made to uncover information from the San Pedro Bay Historical Society, but nothing was found in their archives to indicate they could be considered significant.

The historic context indicates that "the café was a form that could be found both on the main streets of small towns and in neighborhood business districts which functioned very much like small towns. Between 1910 and 1940 the local café served as a social gathering place for the neighborhood. It fit into the standard storefront found in the streetcar-based neighborhood commercial district" (Prosser, 101).

Although they postdate the general trend of neighborhood restaurants, the restaurants housed in the building at 1319-23 S. Pacific Avenue fit more into this category of restaurant than the postwar automobile-oriented coffee shop. However, the building was not designed as a restaurant, one of the eligibility standards for the type ("was historically designed and used as a restaurant). The building was rather constructed as a general commercial building that later happened to house restaurants in its storefronts. It does not possess any character-defining or associative features of a restaurant, both because it was not purpose-built as one and because it has been extensively altered. The building does not appear to be significant under Criterion A for its association with this context.

Criterion B

To be eligible for listing in the National Register under Criterion B, a property must be associated with the lives of persons significant in our past.

CONTINUATION SHEET

Page 5 of 6 *Resource Name or # (Assigned by recorder) 1319-23 S. Pacific Avenue

*Recorded by: Elysha Paluszek, GPA Consulting *Date 04/11/2019 ☒ Continuation ☐ Update

The building was constructed by J.F. Gaffney of Asheville, North Carolina. Minimal information was found about a J.F. Gaffney, who lived in Asheville in 1924 and 1925. There is nothing to indicate that he could be considered a person significant in our past. No information was found about an individual by the name of J.F. Gafferey, so it is likely that his name was indeed Gaffney.

Alton C. Duchaine, who owned the building from at least 1933 until at least 1961, was born in 1897 and is listed as living in Long Beach in the 1930 Federal Census. He was married to Ethelyn and was an accountant and later an office manager in the oil industry. Minimal information was found otherwise, and there is nothing to indicate that he could be considered significant in our past. No information was found about C.E. Duchaine, who is listed as owning the building in 1936.

No first names were given for J. and W. Moore, and no information was found about associated individuals with those first initials. Minimal information was found about an individual by the name of Lawrence Victorino.

Research indicates that Anthony (or Antonio) Lauro was born in Italy (various dates ranging from 1904 to 1922 are given for his birth) and passed away in 1985. It appears that there was more than one individual with this name living in San Pedro at approximately the same time. A Venezuelan folk composer by the same name was uncovered during research, but he does not appear to have had any association with San Pedro or the businesses located in the building.

Numerous commercial tenants and individuals associated with those businesses have occupied the building. There is no evidence to suggest that any of the individuals associated with these businesses could be considered significant in our past. Therefore, the property does not appear to be significant under Criterion B.

Criterion C

To be eligible for listing under Criterion C, a property must embody the distinctive characteristics of a type, period, or method of construction, represent the work of a master, possess high artistic values, or represent a significant and distinguishable entity whose components may lack individual distinction.

The building at 1319-23 S. Pacific Avenue is an example of a streetcar commercial building from the 1920s. However, it has been extensively altered and no longer possesses the character-defining features of its type. Any stylistic features it once possessed have been removed. The building is a typical unreinforced masonry building from the 1920s; it does not embody the distinctive characteristics of a method of construction any more than similar buildings from the period. It is not significant for embodying the distinctive characteristics of a type, period, or method of construction.

The original building permit is difficult to decipher, but the architect listed appears to be James C. Peterson. No information was found about an architect by that name, and the building does not appear to be significant as the work of a master.

The building at 1319-23 S. Pacific Avenue was evaluated for its potential to possess high artistic value. High artistic value typically refers to "an aesthetic ideal," such as stained glass or sculpture. *National Register Bulletin #15* states that "a property is eligible for its high artistic values if it so fully articulates a particular concept of design that it expresses an aesthetic ideal. This is not the case for the building at 1319-23 S. Pacific Avenue. It does not articulate a particular, unique concept of design that would lead it to express an aesthetic ideal or high artistic value.

The last aspect of Criterion C, representing a significant and distinguishable entity whose components lack individual distinction, refers to historic districts. The buildings on the Project site were each evaluated individually, and the surrounding area does not appear to be a potential historic district. Although it developed in the late 1910s and 1920s as the primary commercial corridor of San Pedro, it was not identified as a historic district during SurveyLA. It does not appear to possess the distinct sense of time and place that would lead it to qualify as potential historic district. Therefore, this aspect of Criterion C does not apply.

CONTINUATION SHEET

Page 6 of 6 *Resource Name or # (Assigned by recorder) 1319-23 S. Pacific Avenue

*Recorded by: Elysha Paluszek, GPA Consulting *Date 04/11/2019 ☒ Continuation ☐ Update

For all the reasons outlined above, the property does not appear to be significant under Criterion C.

Criterion D

To be eligible for listing under Criterion D, a property's physical material must have yielded or may be likely to yield, information important to history or prehistory.

This criterion generally applies to archaeological resources but may apply to a built resource in instances where a resource may contain important information about such topics as construction techniques or human activity. In any case, the resource must be the principal source of information. This is unlikely to be true for the property at 1319-23 S. Pacific Avenue. Therefore, it does not appear to be significant under Criterion D.

Integrity

To be eligible for listing in the National Register, properties must retain their physical integrity from the period in which they gained significance. In the case of architecturally significant properties, the period of significance is normally the date of construction. For historically significant properties, the period of significance is usually measured by the length of the associations. As the building does not appear to be significant under any of the National Register criteria, it has no period of significance. Nevertheless, the building was analyzed against the seven aspects of integrity: location, design, setting, materials, workmanship, feeling, and association. While some factors of integrity are more important than others depending on the property, a majority of the seven recognized factors should be retained.

The property retains integrity of location, as it has not been moved. The building has seen extensive alterations since its construction in 1924, including alterations to its storefronts, likely application of stucco over original cladding, and infill of windows on the west elevation. Therefore, it no longer retains integrity of design. The property retains integrity of setting, as the surrounding setting has not changed significantly since the building was constructed in 1924. It continues to consist of commercial and residential properties. The building no longer retains integrity of materials and workmanship, as many of its materials are reflective of a later period of time. The building no longer retains integrity of feeling due to its extensive alterations. It does not possess any features that point to its 1924 date of construction. The property was not found to be significant under Criteria A or B. Since integrity of association is defined as "the direct link between an important event or person and a historic property," and no important events or persons were found to be associated with the property, integrity of association does not apply.

Conclusion

There is no evidence that the property at 1319-23 S. Pacific Avenue possesses historic or architectural significance. In addition, the building has been significantly altered, most notably the storefronts on its primary elevation, and it no longer retains integrity. According to the analysis enumerated above, the property does not appear to be eligible for the National Register under any criteria.

California Register of Historical Resources

The California Register criteria for eligibility mirror those of the National Register. Therefore, the property appears to be ineligible for listing on the California Register for the same reasons outlined above.

Los Angeles Cultural Heritage Ordinance

Likewise, because the City of Los Angeles criteria were modeled on the National and California Registers criteria, the property appears to be ineligible for designation as an HCM for the same reasons outlined above.

P3a. Description (cont.)

The east elevation is decorated with vertical rounded towers trimmed with neon, and it features three storefronts. The north storefront has been infilled with glass block and marble. The center storefront features curving windows of glass block with marble below and three paneled wood doors with ovular lights. It has a roll-up metal storefront screen. The south storefront has a recessed wood paneled door with ovular light. To the south of the door is an aluminum and glass restaurant window. The bottom portion of the storefront is clad in green marble. It has a metal roll-up storefront screen. The transom windows above all three storefronts have been boarded over. Letterboard signs are located above the north and south storefronts. A neon blade sign is located above the center storefront.

The north and south elevations are painted brick. The south elevation has a single slab door that provides access to the mezzanine. It has metal and concrete steps with a metal railing. The building occupies the entirety of its parcel, and the west elevation was not accessible.

The storefronts on the building's east elevation have been extensively altered. Their configuration has been completely changed, and new doors and windows have been installed. Building permits indicate that a garage once located on the property was demolished in 1959. In 1969, the interior was altered for conversion to a night club and a second means of egress was added. In 1970, the Dancing Waters Club erected a sign on the building's east elevation; the similarity of the sketch accompanying the permit and the sign located on the east elevation today suggests that they are one in the same. In 1986, 1991, and 2004, the building was re-roofed.

Ownership and Tenant History

The building at 1331 S. Pacific Avenue was constructed in 1940 by Nick Pericich. The building was used as a bowling alley and restaurant. It is listed as the Civic Bowling Center in the 1946 San Pedro city directory. It was co-owned by Joseph Ivelia Jr., who also owned the Twentieth Century Bowling Alley, located at 476 W. 5th Street.

By 1945, the building was owned by Lars (or Louis) Pesse (seen elsewhere as Pesce). The 1946 city directory indicates that it was co-owned by Joseph Ivelia Jr. In 1946, the addresses of 1323-33 S. Pacific Avenue are indicated in the San Pedro city directory as being a bowling alley and as housing the Turf Club Café, owned by Anthony Lauro. From at least 1950 until at least 1964, the building was occupied by the Pacific (or Pacoima) Bowling Center. The Phase I ESA lists the name as Pacoima Bowling Center in 1950 and 1954, but the name is listed as "Pac Bowling Center" in 1957, 1960, and 1964. It is more likely that the name was Pacific Bowling Center, as indicated on a building permit from 1959. It also housed a restaurant. In 1969, it was converted into a night club called Dancing Waters Club, owned by Al Cordeiro (or Cordeiro). By 1970, Dancing Waters Club occupied the building. In 1980, C.L. Skate Rentals and Sales moved into the building; that is the only year in which they were found listed in telephone books. Dancing Waters Club remained in the building until at least 2001. By 2004, the Helio and Olga Cordeiro Trust owned the building.

B10. Significance (cont.)

The earliest bowling centers in Los Angeles were constructed at the beginning of the twentieth century, though they were not widely used due to a reputation for hosting questionably moral activity. During the 1920s, with the onset of Prohibition, bowling alleys became independent from their saloon roots and more attractive to a wider audience. Early bowling alleys were constructed in Los Angeles in the 1920s, including Jensen's Recreation Center (1924) and the Highland Park Bowl (1927) (Shannon, 6). The Hollywood Recreation Center (1936) and Sunset Bowling Center (1939, demolished) are other examples that predate the World War II period. It was not until after the war that bowling centers became a widespread feature of recreation in Los Angeles.

In order for a property to be significant under Criterion A, it "must clearly be important within the associated historic context" (Andrus and Shrimpton, 12). It is not enough for a property to be associated with an event or trend, it "must [also] have an

*Recorded by: Elysha Paluszek, GPA Consulting *Date 04/11/2019 ☒ Continuation ☐ Update

important association with the event or historic trends" (Andrus and Shrimpton, 12). Research revealed that San Pedro had two bowling alleys as early as 1926, the Pacific Bowling and Recreation Academy (this does not appear to have any affiliation with the later Pacific Bowling Center and was at a separate location) and the San Pedro Bowling Alley. Nearly a dozen bowling alleys are listed in Los Angeles in general that same year. By 1940, the date the subject building was constructed, there were already numerous bowling alleys in greater Los Angeles. This likely indicates that although the pastime had not reached the same level of widespread popularity that it enjoyed in the postwar years, bowling was becoming more commonly accepted during World War II.

The Civic Bowling Center at 1331 S. Pacific Avenue was one of two bowling alleys in San Pedro listed in the 1946 city directory. The other was the Twentieth Century Bowling Alley at 476 W. 5th Street. Although the building was one of two bowling alleys in San Pedro, it was simply one of numerous examples of the type in Los Angeles in general in the early 1940s. Furthermore, simply being constructed early in a trend does not equate to significance. The building does not appear to have a significant association with the early proliferation of the sport. There is no evidence, from the research conducted for this report, that it was significant in the more general history of recreation in Los Angeles or San Pedro in particular. There is no evidence to suggest that the Civic Bowling Center or the Pacific Bowling Center could be considered significant businesses in the community or significant in the context of recreation in Los Angeles in general. The building does not appear to be significant under Criterion A for its association with this context.

The building was also evaluated in the context of the more general commercial development of San Pedro in the twentieth century. As discussed previously, Pacific Avenue developed in the 1910s and 1920s as a streetcar-related commercial corridor. By 1940, when the building at 1331 S. Pacific Avenue was constructed, development was largely infill. Therefore, the building merely represents a continuation of commercial development rather than a significant trend in that development. The property does not appear to be significant for its association with this context.

The building was also evaluated in the context of LGBT history in Los Angeles, specifically the theme "Gay Bars as Social Institutions, 1920-1980" in the *LGBT Historic Context Statement*. Recollections from community members suggest that the business located in the building, the Dancing Waters Club, may have been a gay bar for a period of time. Research was conducted to corroborate this, but no information was found. The Dancing Waters Club, or Waters Club as it was also known, does not appear in known inventories of gay establishments such as Bob Damron's Address Book. Even if it had been a gay bar, it is unlikely to be significant for its association with this context, given the difficulty of locating information about it. The property does not appear to be significant within this context.

The Dancing Waters Club, commonly known as the Waters Club, was also host to numerous bands that were part of the development of punk rock music in San Pedro in the late 1970s and early 1980s. Research suggests that punk rock music in San Pedro was a smaller and less well-known iteration of the developments that occurred in Hollywood and Los Angeles more generally. Bands that made an appearance at the Dancing Waters Club included the Reactionaries (some of whom later formed the Minutemen), the Wigs, and Soft White Underbelly (later Blue Oyster Cult). While some of the bands that performed at Dancing Waters went on to become important within the punk music genre, there is nothing to suggest that the Dancing Waters Club would convey their significance. Research suggests that these bands played there periodically rather than being associated with the venue on a permanent basis (i.e., they were not the house band). Bands perform at numerous venues over the course of their careers and not all will be significant because of this. *National Register Bulletin #15* notes that a property must not only be associated with an event or historic trend, but that "association must be considered important as well" (Andrus and Shrimpton, 12). This does not appear to be the case, given how difficult it was to locate information about Dancing Waters as a punk music venue. Beyond the recollections of locals who attended performances at the Waters Club and a history of San Pedro punk music published by local show promoter Craig Iberra, minimal information was found about the property in association with punk music (End Fwy Press, n.d.). This suggests that the property does not have a significant association with the development of punk music, and the property does not appear to be significant under Criterion A.

Criterion B

To be eligible for listing in the National Register under Criterion B, a property must be associated with the lives of persons significant in our past.

The building was constructed by Nick Pericich. Pericich was born in 1893 in Yugoslavia and immigrated to the United States in 1911. According to the 1930 Federal Census, he lived on 20th Street and owned a grocery store. Pericich was married to Edna M. Pericich. As early as the 1921, Pericich's address is listed as 1245 S. Centre Street, San Pedro and his name is categorized under meat markets. By 1928, the Thirteenth and Centre Grocery and Meat Market is listed in the San Pedro city directory as being located at 1245 S. Centre Street. It is listed as being owned by August Felando, Paul Bogdanich, Nick Baskovich, and Nick Pericich. By 1930, Pericich is listed as living at 1320 20th Street and lived there until at least 1956. By the mid-1950s, he appears to have been retired; although other members of the family are listed as being associated with the store, Nick Pericich is not. He passed away in 1959. It is unclear if Pericich had any association with the bowling alley besides owning the building. No information was found connecting Pericich to a bowling alley in San Pedro, or any other businesses outside the market on Centre Street.

Louis Pesce owned the building by 1945. Louis M. Pesce was born in France in 1905 and was married to Blanche. They had a son, Louis M. Pesce Jr. According to the 1940 Federal Census, Pesce lived in Inglewood and is indicated as being the owner of a bowling alley. The census indicates that he lived in San Pedro in 1935. Prior to this, he was the assistant sales manager of a baking company and lived in Los Angeles. Pesce passed away in 1976 in Palos Verdes.

The 1946 city directory indicates that Pesce also owned the Twentieth Century Bowling Alley in San Pedro. His son was junior manager. Joseph Ivelia Jr. was co-owner of the Twentieth Century Bowling Alley and the Civic Bowling Center. Ivelia was born in 1916 and passed away in 1991. He owned the Twentieth Century Bowling Alley by 1940 and was living in San Pedro. Prior to that he was a clerk in a grocery store. By 1957, he owned the Pacific Bowling Center, the later business occupying 1331 S. Pacific Avenue. There is no evidence to suggest that either Pesce or Ivelia could be considered individuals significant in our past. In 1969, Al Cordiero (or Cordeiro) purchased the building. Minimal information was found about an individual by that name, and there is no evidence that they could be considered significant in our past.

For all the reasons outlined above, the property does not appear to be significant under Criterion B.

Criterion C

To be eligible for listing under Criterion C, a property must embody the distinctive characteristics of a type, period, or method of construction, represent the work of a master, possess high artistic values, or represent a significant and distinguishable entity whose components may lack individual distinction.

The building at 1331 S. Pacific Avenue was constructed in 1940 as a bowling alley, though its characteristics have more in common with a prewar commercial building than a bowling alley. At least one other prewar bowling center, this one from the 1920s and also located in San Pedro, had a similar appearance, with brick construction and characteristics more akin to a commercial building than a larger bowling center. Other examples of prewar bowling alleys include the Jensen's Recreation Center (1924), Highland Park Bowl (1927), Hollywood Recreation Center (1938, demolished), and the Sunset Bowling Center (1939, demolished). They were constructed either as part of larger recreation buildings, in the case of Jensen's, or as purpose-built bowling centers, in the case of the Hollywood Recreation Center, which had a restaurant and bar as well as 22 bowling lanes (Shannon, 7). As the century progressed, they took on character-defining features similar to those that became more prevalent in the larger bowling centers constructed after the war.

By contrast, the building at 1331 S. Pacific Avenue is a relatively small bowling alley and is located along a commercial strip in a manner more resembling a pre-WWII commercial building. It had a restaurant and unidentified office space in front and bowling lanes to the rear. The restaurant was located in the northern portion along Pacific Avenue. The building

CONTINUATION SHEET

Page 6 of 7

*Resource Name or # (Assigned by recorder) 1331 S. Pacific Avenue

*Recorded by: Elysha Paluszek, GPA Consulting *Date 04/11/2019 ☒ Continuation ☐ Update

was constructed in 1940, prior to the period of significance specified for Bowling Centers in the *LAHCS*. If it were intact, it might be considered significant as an early example of a bowling alley in Los Angeles. However, it has been significantly altered and no longer retains any exterior or interior features that point to its use as a bowling alley. The restaurant originally located in the northeast corner of the building has been infilled with glass block. It now has configurations of a walk-up restaurant and storefront (and altered ones at that) more than any character-defining features of a bowling alley or recreation building. It is not significant for embodying the distinctive characteristics of a type.

The building was designed with elements of the Streamline Moderne style. At the onset of the Great Depression, the richly ornamented Art Deco style was rejected for its excess; however, the same fascination with modern technology, movement, and efficiency that drove the Art Deco movement would still be expressed in the Streamline Moderne style's distinct modern aesthetic by the mid-1930s. Influenced in part by industrial designers who perfected "streamlined" designs for objects like trains and airplanes to minimize wind resistance, the style is characterized by sweeping lines, curved corners, smooth surfaces, and a strong horizontal emphasis. The style was well-suited for the economic hardship of the 1930s, as it was relatively inexpensive to build using simple materials that still gave it an eye-catching appearance (GPA Consulting).

The building at 1331 S. Pacific Avenue possesses some characteristics of the Streamline Moderne style, most notably the two decorative towers with rounded corners on the primary elevation. However, it is not an excellent example of the style nor does it embody the distinctive characteristics of Streamline Moderne architecture. In addition, it has been significantly altered. It is not significant for embodying the distinctive characteristics of a type, period, or method of construction (it is built of typical materials from the period).

William F. Durr is listed as the building's architect. Durr was a San Pedro-based architect who practiced primarily from the 1910s through the 1940s. He designed several warehouses single-family residences, and multi-family residences in San Pedro. Other examples of his work include the San Pedro Women's Clubhouse at 1139 S. Gaffey Street (1913), an addition to the Lippman Building (1923), an addition to the French Sardine Company cannery (1928), a commercial building at 461 W. 6th Street (1929), the Eagles Club Building at 9th Street between Grand Avenue and Gaffey Street (1931), the Jewish Community Center, San Pedro (1934), the Pacific Boulevard School auditorium in Huntington Park (1936), and a new cannery for the French Sardine Cannery in the area of San Pedro known as Fish Harbor (1941). Minimal information was found about Durr beyond newspaper articles briefly mentioning his work. *National Register Bulletin #15* defines a master as "a figure of generally recognized greatness in a field, a known craftsman of consummate skill, or an anonymous craftsman whose work is distinguishable from others by its characteristic style and quality" (Andrus and Shrimpton, 20). Durr was a local architect who practiced for at least 30 years in San Pedro, but no scholarship was found to indicate that he could be considered a master architect. The building does not appear to be significant under this aspect of Criterion C.

The building at 1331 S. Pacific Avenue was evaluated for its potential to possess high artistic value. High artistic value typically refers to "an aesthetic ideal," such as stained glass or sculpture. *National Register Bulletin #15* states that "a property is eligible for its high artistic values if it so fully articulates a particular concept of design that it expresses an aesthetic ideal" (Andrus and Shrimpton, 20). This is not the case for the building at 1331 S. Pacific Avenue. It does not articulate a particular, unique concept of design that would lead it to express an aesthetic ideal or high artistic value.

The last aspect of Criterion C, representing a significant and distinguishable entity whose components lack individual distinction, refers to historic districts. The buildings on the Project site were each evaluated individually, and the surrounding area does not appear to be a potential historic district. Although it developed in the late 1910s and 1920s as the primary commercial corridor of San Pedro, it was not identified as a historic district during SurveyLA. It does not appear to possess the distinct sense of time and place that would lead it to qualify as potential historic district. Therefore, this aspect of Criterion C does not apply.

For all the reasons outlined above, the property does not appear to be significant under Criterion C.

Page 7 of 7

*Resource Name or # (Assigned by recorder) 1331 S. Pacific Avenue

*Recorded by: Elysha Paluszek, GPA Consulting *Date 04/11/2019 ☒ Continuation ☐ Update

Criterion D

To be eligible for listing under Criterion D, a property's physical material must have yielded or may be likely to yield, information important to history or prehistory.

This criterion generally applies to archaeological resources but may apply to a built resource in instances where a resource may contain important information about such topics as construction techniques or human activity. In any case, the resource must be the principal source of information. This is unlikely to be true for the property at 1331 S. Pacific Avenue. Therefore, it does not appear to be significant under Criterion D.

Integrity

To be eligible for listing in the National Register, properties must retain their physical integrity from the period in which they gained significance. In the case of architecturally significant properties, the period of significance is normally the date of construction. For historically significant properties, the period of significance is usually measured by the length of the associations. As the property does not appear to be significant under any of the National Register criteria, it has no period of significance. Nevertheless, the property was analyzed against the seven aspects of integrity: location, design, setting, materials, workmanship, feeling, and association. While some factors of integrity are more important than others depending on the property, a majority of the seven recognized factors should be retained.

The property retains integrity of location, as it has not been moved. The building has seen numerous alterations since its construction in 1940, including extensive alterations to its storefronts and addition of incompatible signage. Therefore, it no longer retains integrity of design. The property retains integrity of setting, as the surrounding setting has not changed significantly since the building was constructed in 1940. It continues to consist of commercial and residential properties. The building no longer retains integrity of materials and workmanship, as many of its materials, especially those on the primary elevation, are reflective of a later period of time. The building's integrity of feeling has been affected by its alterations but the building's overall sense of feeling from 1940 remains. It therefore still retains this aspect of integrity. The property was not found to be significant under Criteria A or B. Since integrity of association is defined as "the direct link between an important event or person and a historic property," and no important events or persons were found to be associated with the property, integrity of association does not apply.

Conclusion

There is no evidence that the property at 1331 S. Pacific Avenue possesses historic or architectural significance. In addition, the building has been significantly altered, most notably its storefronts, and it no longer retains integrity of design, materials, or workmanship. According to the analysis enumerated above, the property does not appear to be eligible for the National Register under any criteria.

California Register of Historical Resources

The California Register criteria for eligibility mirror those of the National Register. Therefore, the property appears to be ineligible for listing on the California Register for the same reasons outlined above.

Los Angeles Cultural Heritage Ordinance

Likewise, because the City of Los Angeles criteria were modeled on the National and California Registers criteria, the property appears to be ineligible for designation as an HCM for the same reasons outlined above.

Re: CPC-2019-4908-c0-db-spr

The Northwest San Pedro Neighborhood Council has reviewed the plans for the proposed project at 1309-1331 S Pacific Avenue. This is a 102-unit project that includes 12 units for very low income households and a mix of studio, one, and 2-bedroom units. The proposed project will transform this portion of the Pacific Avenue Corridor.

We are encouraged that the project will provide more than the minimum number of required parking spaces. We support the project, including the request for a reduced setback at the north end of the property in exchange for greater setback where the property abuts homes, with the following recommendations:

- Include a children's play area in the open space provided at the rear of the property with perhaps a sandbox, climbing equipment, and tricycle path.
- Provide attractive project signage to reflect the commercial nature of the neighborhood and to enhance the visual streetscape.
- Install solar, not just be solar ready
- Install flashing lights on the crosswalks at 13th and Pacific

Thank you for the opportunity to comment on this proposal. Please keep us posted as it progresses through the planning and development process.

Sincerely,

A handwritten signature in black ink that reads "R. Regalado".

109K

2130 South Pacific Avenue
San Pedro CA 90731

January 14, 2020

Connie Chauv
City Planner
200 N. Spring Street, Room 720/721
Los Angeles, CA 90012

Dear Ms. Chauv,
I am writing regarding the proposed project site located at 1309 – 1331 South Pacific Avenue in San Pedro, case number CPC-2019-4908-DB-SPR.

I am a longtime property owner and resident nearby on Pacific. I welcome thoughtful, sustainable, and safe development in the area, but this proposed project does not meet those criteria because the developers are petitioning to circumvent CEQA, city, and community standards. Instead their team is attempting to avoid regulations by requesting a Categorical Exemption and other exceptions/entitlements in order to maximize the size of the building and their profit.

It is critical to note that the same developers are proposing another 100-unit building (almost identical in scope) just seven blocks away at 2111 – 2139 S Pacific Avenue, and so the *combined effects* of these two projects on traffic, air quality, and other community impacts must be carefully studied. In some circumstances, piecemealing development in order to avoid Environmental Impact studies regarding cumulative effects is illegal.

Regarding the Requested Actions on the Notice of Public Hearing:

Requested Action 1

I strongly oppose the Categorical Exemption requested by the Developer and their representatives.

As per CEQA guidelines: "This class is not intended for projects that would result in any significant traffic, noise, air quality, or water quality impacts." Without community-centric impact studies it is not possible to determine the 'significant effects,' and the developers' self-assessment as filed is misleading and insufficient.

re: Categorical Exemption for Traffic Study:

As a resident on Pacific I can say that there are already significant traffic issues here. During peak hours it's very difficult to reach the freeway in a reasonable amount of time because of congestion. Additionally, drivers regularly circle surrounding blocks looking for street parking, which is often unavailable.

A Traffic Study is necessary to assess the viability and safety of this project, and again, the *cumulative effect* of general traffic caused by the Developers' two proposed projects, only seven blocks apart, must be analyzed.

re: Categorical Exemption for Air Quality (AQ) Study:

The project as proposed does not appear to qualify for a CEQA Categorical Exemption. According to The State of California Public Resource Code, Division 13 Environmental Quality and the State of California Environmental Quality Act and CEQA Guidelines, Section 15300:

"If the proposed project has less than 80 residential units AND involves less than 20,000 cubic yards of soil export, it will not likely exceed the SCAQMD construction or operational thresholds, and therefore will not require an Assessment."

This project exceeds both of those limits. The listed soil removal should also be looked at carefully, as the number of parking spaces has increased from the original filing.

Airborne particulates are already extremely high in San Pedro and neighborhoods surrounding the Port. Our community has some of the highest childhood asthma rates in the city. Given this, extra precautions should be taken in the area rather than awarding developers Categorical Exemptions. An AQ study is critical.

And again, the cumulative effect of this project and the developers' other planned project just seven blocks away must be assessed.

Requested Action 2 - Density Bonus/Affordable Housing Incentive Program

Off-Menu Incentives for a Housing Development Project totaling 100 units, reserving 12 units for Very Low Income.

The Density Bonus increase is unwarranted, especially without community impact and traffic studies. Additionally the high number of vacancy rates for market rate housing projects in San Pedro underscores that increased density does not equal increased tenancy. Particularly if there are mostly market-rate rather than affordable units. The builders are asking for increased density simply to maximize profits.

- **12 units of Very Low Income housing is insufficient** given the serious affordable housing shortage in our City. I would propose, at a minimum, doubling the number of affordable units.

- **I oppose the Floor Area Ratio (FAR) of 2.65:1 in lieu of 1.5:1 as otherwise permitted in the C2-1XL-CPIO zone and San Pedro Community Plan.** The FAR should be in keeping with current standards set in the C2-1XL-CPIO zone and San Pedro Community Plan. This will make the project in sync with the long-term vision and plan for the community.

- **I oppose the 20 percent reduction in the required open space,** to allow 8,831 square feet in lieu of the 10,950 square feet otherwise required by LAMC Section 12.21 G. Profit-driven developers should not be allowed to cheat the community on quality of life issues. The community deserves more - certainly the minimum that is required by LAMC Section 12.21 G should be the baseline.

Requested Action 3

I oppose the 15.5-foot increase in the maximum building height to allow 45 feet 5 inches and four stories. This is not in keeping with the surrounding one and two story homes, and the maximum three story apartments in the area. A maximum of three stories is suitable for the neighborhood and will help to scale the project back from 102 units to a more appropriate size.

Requested Action 4 - Site Plan Review

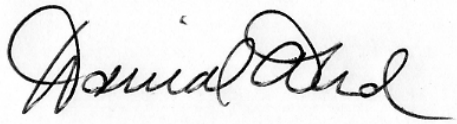

The project is oversized according to current standards, and should be built in accordance with CEQA environmental rules, community/traffic impact studies, the San Pedro Community Plan, the Pacific Corridor Plan. For-profit developers should not be allowed to circumvent these standards.

Community members don't have teams of lawyers, lobbyists, and influencers, nor are we adept at understanding the intricacies of building codes, laws, regulations, and loopholes. We are depending on the expertise and fairness of City Planning to develop a safe, reasonable, community-centric project. We are counting on you.

Your careful determination will set a standard for future development in San Pedro - it's critical right now!

Your support means a great deal to me personally, and to my neighbors on Pacific Avenue. Thank you very much for your work on behalf of the community.

Sincerely,

A handwritten signature in black ink, appearing to read "Danial Nord". The signature is fluid and cursive, with the first name "Danial" being more prominent than the last name "Nord".

Hello Connie,

Thanks again for calling me on Wednesday.

I'm following up to clarify my request for the # of CU YDS of soil scheduled to be removed from the proposed [1309-1331 S. Pacific Avenue](#) project.

I found this Environmental Assessment Form online for the developer's other project at 2111 Pacific, which shows the grading and also the soil export/removal.

Perhaps there is a similar form for the [1309-1331 S. Pacific Avenue](#) project?

Thank you again for your support.

Best regards,

Danial

RE: case number: CPC-2019-4908-DB-SPR

Date: January 15, 2020

As a San Pedro small creative business owner, homeowner and a professor at California State University Long Beach, I favor responsible and holistic development in our community. But I strongly oppose the Categorical Exemption that they are lobbying for at 1309-1331 S. Pacific Avenue. Here are some facts to be considered:

The developers' funding comes from a crowdsourced investment scheme based in Washington D.C. Their only goal is to obtain the largest return, and they have zero stake in the community once the construction is complete. This is why their low budget design aims to cram 100 units into one block. Who would be paying for the infrastructure upgrade that would be needed for this increase in density? Sewage and Electrical, systems are already overloaded in the area. Without an environmental study how would this be addressed?

Although the same developers are proposing two projects on this stretch of Pacific with over 100 units each, the cumulative impact of these multiple projects are not being addressed. There could be up to 400 additional cars clogging a seven block area of Pacific Ave. which is also a Tsunami Evacuation Route. City Planning and Environmental impact studies must be implemented to assure safe and sustainable growth in our San Pedro community!

While there surely is a demand for low income housing, the developers designate a small proportion for this purpose. The majority of their project is market rate, yet scores of these new developments in San Pedro still remain largely vacant.

The Exemption and Concessions that the developers are lobbying for would enable them to avoid City and State regulations. What on earth would be the reason to sacrifice the wellbeing of our community? Speculators are not entitled to bypass environmental review, traffic planning, noise, air quality, and parking impact studies that would impact all of coastal San Pedro.

I do support the development of a housing project, as long as the developers abide by the city's regulations with proper review, and is amended with suggestions by the Neighborhood Council and other concerned stakeholders. I hope that City Planning will listen to the community's recommendations and not allow a Categorical Exemption.

Sincerely,

Fran Siegel

To: Connie Chauv <connie.chauv@lacity.org>

Thank you Connie,

I appreciate that you and Shannon hosted the community hearings for the two proposed developments on Pacific Avenue in San Pedro which I attended and signed up to receive the notices.

Thank you for giving the community the opportunity to speak. I was pleased to see the tremendous showing of community members who have very serious concerns regarding both projects. As expressed by many, I am all in favor of development and improvement in San Pedro but not with Categorical Exemptions. These proposals are not supported by the community as they were presented at the hearing. The developers do not seem to be interested in the impact of their project in our town, and because they are not community stakeholders, their desires are not in alignment with our community needs, desires, or concerns.

I urge you to not recommend any exemptions for this project. The developer needs to adhere to the rules regulations and studies that have been set by the Department of Building and Safety. The developer came off as arrogant, uninformed, and out of touch with our community. If the exemptions are allowed by the city of Los Angeles, this would set a precedent for continued exemptions on all future projects. As expressed by every participant, with the exception on one community member and the city council office, we want growth, improvement, positive development. We do not want unrestrained development that does not serve the needs of the community.

Thank you.

Fran Siegel

Subject: Re: Out of Office Response Re: following up: 2111-2139 S. Pacific Ave - case number: CPC-2019-4884-CU-DB-SPR

To: Shannon Ryan - City of Los Angeles <shannon.ryan@lacity.org>

Dear Shannon,

I realize that you were out until last Monday - so I'm following up to my email from 1/31 because I need some information from you.

I'm writing with three questions related to the proposed development: [2111-2139 S. Pacific Ave](#) - case number: CPC-2019-4884-CU-DB-SPR.

First of all, I was told that the CPC hearing related to the project in question has been changed to March 12th. Can you confirm this date?

Secondly, I am trying to obtain copies of the Environmental Assessment Forms for both the [2111-2139 S. Pacific Ave](#) project and also the developer's other project at [1309-1331 S. Pacific Avenue](#).

How can I obtain copies of these two forms?

One reason it's important is because the requirements for AQ Studies [CP-7828 (07.23.20180)] are related to number of units and soil export.

I do have a copy of the Environmental Assessment Form for 2111-2139 S. Pacific Ave project that was posted on one of the Neighborhood Council websites. However I'm not sure where it originated from or if it is the final document that was filed.

It lists 20,000 CU yards of soil export for the 2111-2139 S. Pacific site for 65 parking spaces - although the hearing notice stated that there are 75 parking spaces. I assume that if there was an increase in parking spaces there was also an increase in soil export?

In any event the project appears to be outside the exemption requirement of "less than 20,000 CU/yards of soil export."

The reason I also need the [1309-1331 S. Pacific Avenue](#) Environmental Assessment Form is that it has 127 subterranean parking spaces (as per the hearing notice) - almost double that of the developer's 2111-2139 project - so I am assuming that the soil export is correspondingly far greater than 20,000 CU/yards.

As you may know the San Pedro portside community suffers from extreme levels of particulates related to the shipping/trucking industries, so AQ studies and related precautions during construction projects are critical to community health.

Finally, regarding traffic studies, I was confused about the Developer's assertion at the hearing that they had done a traffic study and that there were no impacts. Perhaps I misunderstood?

Have traffic studies been filed for the two projects?

Also they did agree that there was no study done to analyze the cumulative effects of both projects (within seven blocks). I remember them sheepishly stating that they could "take a look at that..."

I understand that there is a formal process in conjunction with the DOT, which has the final approval over traffic studies/impacts. Am I correct?

If so, **can you help me to obtain copies of the two traffic studies?** Or point me to the appropriate contact at DOT to obtain copies?

I don't know where to turn, so your help is very much appreciated.

Thank you again for your advocacy.

Sincerely,

Danial

Hello,

Thank you for your e-mail. I am out of the office and will return on Monday, February 3.

If you would like to schedule an appointment to review a project case file, please contact:

- Sierra Riego De Dios (213) 978-1371 | sierra.riego@lacity.org

I will respond to your email when I return to the office. Thank you for your patience.

Sincerely,
Shannon

Case # CPC 2019-488-CU-PB-SR

Dear Ms Ryan,

As you know construction in San Pedro is at an all time high due to the efforts of Councilman Mr Busciani. However, further construction of monstrous bldgs on Pacific & 22nd & Pacific & 14 is unnecessary as traffic on Western & Gaffey is already a disaster. We oppose further development including granny flats.

Sincerely

Antonio & Anna Amalfitano

Hi Connie,

I've been reading the 1735 page report and have not yet found an original reasoning for the height limit, only that there is one and it's 30 feet. I've also been searching the planning website and found only how to identify if there is a height requirement and have yet been able to find any reasoning for it. Could you direct me to the page in the staff report where you address the reasoning behind the 1XL height limit in this area?

Much appreciated,

Army

Hi Connie,

Following up on this. Can you please tell me the original intent of the 30 foot building height limit by the C2-1XL-CPIO Zone and CPIO Section IV-2.A.2?

On Tue, Mar 3, 2020 at 11:41 AM Army Feth <army.feth@gmail.com> wrote:

Hi Connie,

One more thing I forgot to ask you. Can you please explain the reasoning behind the development standard of a 30 feet max on buildings in this neighborhood? They are asking for this requirement to be waived and I would really like to understand the intent of the requirement. From the notice below for your reference:

Pursuant to LAMC Section 12.22 A.25(g)(3), the following one (1) Waiver of Development Standards:
a. A 45-foot and 5-inch building height in lieu of the 30 feet otherwise permitted by the C2-1XL-CPIO Zone and CPIO Section IV-2.A.2.

Thank you!

Army

Hi Army,

Thanks for taking my call. As mentioned, this case is still scheduled for the March 12th CPC meeting. There would be several other cases on the agenda, which starts at 8:30am, but we do not know exactly what time the item will be called up. The deadline for secondary submissions to CPC is 48 hours prior, so Tuesday at 8:30am.

Hope this helps.

On Mon, Mar 2, 2020 at 2:16 PM Army Feth Linderborg <army.feth@gmail.com> wrote:
Hi Ms Chauv,

I'm a homeowner who lives across the street from this proposed project. I spoke at the last community hearing on January 16, and plan to attend the next one on March 12. I was hoping to speak to you about some of the details ahead of time. Please forgive my ignorance of city policy and procedure. This is my first time becoming involved in anything like this. I really love my neighborhood though, and want to make sure I do everything I can to do what's best for the community.

1. Meeting Scheduling

I received an invitation to the March 12 meeting by mail, but the time says only "after 8:30 a.m." Is there a known end time? I'll need to make childcare arrangements to attend and knowing how late I could be there will be very helpful.

Also, I cannot find this meeting listed anywhere on the website <https://planning.lacity.org/about/commissions-boards-hearings#hearings>

Also, the case summary and documents page for the case number for 1309-1331 South Pacific [CPC-2019-4908-DB-SPR](#) has zero documents available.

There is a listing for 2111 – 2139 S. Pacific Avenue on March 12 that says cancelled. I know these two projects are by the same developer. Was the 1309-1331 meeting to be combined with this?

2. Submission of Materials

The invitation states that the recommendation report will be posted no later than 7 days before the meeting, putting that at Thursday March 5. But since we are in the Harbor district, we must submit all responses to the Recommendation Report by no later than 3 pm on Thursday the week prior to the Commission Meeting, which is also Thursday March 5. Is there any flexibility on this timeline? Could the Recommendation Report be published earlier this week? Or could the deadline be pushed back to 48 hours prior like other districts? I've attached the invitation for your reference.

3. Hearing Details

Can you please give me a run down of what will occur? Who will be speaking? Will the public be allowed to comment like at the January 16 meeting, and if so how much time will be allotted to each speaker? Will a decision about the many exceptions to current zoning rules the developer is asking for be made? Does this hearing determine the outcome of this proposal, or will there be more steps?

Thank you so much for your guidance on this. I'm hard at work getting my submission together and appreciate you clarifying the details for me.

Best,

Army

March 10, 2020

City Planning Commission
200 North Spring Street, Room 720/721
Los Angeles, CA 90012
connie.chauve@lacity.org
cpc@lacity.org

Dear City Planning Commission,

My name is Army Linderborg. I bought my first home in 2015, and it's within 500 feet of the proposed development at 1309-1331 Pacific Ave. I bought here because I wanted to live in LA by the beach, and buying a house in San Pedro was the only affordable option. I knew it was a sound investment, but I've also come to find that the diversity of the human experience here is remarkable, and the constant visibility of natural and man made wonder is inspirational.

As this place grows and evolves, it's our duty to honor history, nurture and protect our natural resources, and maximize potential inclusively. Nearly five years into my residency here, I work tirelessly to implement these practices and help make my neighborhood better for everyone who lives here now, or might one day, or who just wants to visit for a while.

My house came with mature fruit trees, and since hundreds of lemons, guavas and kumquats have become my responsibility each year, I've been on a mission to help prevent home grown food from going to waste. With the help of like minded residents and business owners, I've created a neighborhood fruit swap system, where San Pedro neighbors pick the surplus fruit from the mature fruit trees that blanket the neighborhood to swap with each other, and share with local residents less fortunate. I also lead fruit picking and trading tours. Locals get a free fruit picking service as well as a variety of free produce picked from other San Pedro residences. Travelers get a distinctly San Pedran experience and a ton of fresh fruit. The tours have brought people from Saudi Arabia, China, Germany, and countless other parts of the world to San Pedro who come for the fruit end up taking my recommendations to do a little shopping, maybe take a hike, go to this great place for dinner, watch the sunset at the beach, etc, when they otherwise might have skipped San Pedro entirely on their trip to LA.

I'm also an active volunteer at Green Girl Farms, a local nonprofit dedicated to implementing local food producing systems. Their flagship farm is on 14th and Mesa, one block from the proposed development. In 2019, I partnered with Green Girl Farms to apply for an LA2050 grant to plant a Public Orchard at the east end of 14th St, on a blighted strip of unbuildable city owned land one half mile from the proposed development. We also applied for a Great Streets Grant to address the problems of Gulch, the busy critical connection street adjacent to the proposed Public Orchard strip where the current system is for people to push strollers and wheelchairs down the middle of a steep road because there is no sidewalk on either side. Community support for both these projects was huge, but we didn't get either grant.

I'm no stranger to the heartbreak of civic engagement in Los Angeles. Discouraging times are just part of the process. Fighting for things that will make our community better, not just wealthier, is my civic duty, and that's why I must speak out about this proposed development. It will, without a doubt, make our neighborhood a worse place to live than it is now.

I've read the staff recommendation report, and have outlined below some factors that were not taken into account. Please take them under consideration before you make your final decision. At the end of this document, I will propose some amenities that could be included in a revised proposal that would make our neighborhood better for all residents, present and future.

The Amazon Prime Effect-Hidden Traffic Factors

The traffic study says that although there will be an additional 372 daily trips from this corner, it will not impact traffic at all. But what about idling vehicles? A building with a 102 units and parking up to 5 levels below residences means shopping can be very inconvenient, and delivery drivers will be coming and going all day long. Not just FedEx and UPS, but the multitude of independent Amazon delivery drivers will have nowhere to park and nowhere to stage. On the side streets, everyone just Pedro Parks. Our system is to quickly and illegally double park while running a package to the door, retrieving a forgotten item from home, or picking someone up. As density increases, this is not a sustainable method. Pasted below is the actual Google Maps street view of my house at 463 W 14th St, where you can see a UPS truck pulled over on the wrong side of the road, blocking the bike lane as well as the view of my house.

The main entrance for this proposed development is planned for Pacific, which has a parking lane, bike lane, and traffic lane on each side with a turning lane in the middle. This leaves these delivery drivers with two options: Idle in the bike lane, partially blocking the traffic lane too,

causing drivers to swerve to avoid it, or idle in the turning lane, like they do on Abbot Kinney in Venice, making it impossible to turn into the local businesses or onto the local streets nearby. If they idle on 14th just off Pacific, cars turning right onto 14th from Pacific will have to swing wide into oncoming traffic on 14th to avoid them. This proposed development is on a very busy corner where children from elementary, middle and high school walk every day. 14th Street and Pacific is also a major bike lane junction. All the elements are there for this unregulated intersection to become a death trap. And then there are the Uber and Lyft drivers developers claim will be picking up and dropping off here non stop because that's the future. Where will they wait when all the Pedro Parking spots are taken up by the Amazon delivery drivers? Pacific is also the main route for Emergency Services, and the fire station on 16th is busy. Any additional congestion on this road could impede their swift travel.

Waiving our Development Standards-Privatizing the Sunset

One of the great equalizers in this neighborhood is our height cap. The topline of the San Pedro Community Plan is for a "high quality of life for all residents that builds upon distinct natural beauty." This means everyone has the opportunity to see the sun rise and set. Studies have shown the mental health benefits of simply watching a sunset include prosociality, gratitude, mindfulness and general satisfaction with life. Sunsets create a connection to the natural world, even on days you can't get out of the busy city. I can't tell you how many times we've all stood on the sidewalk, or in front of the laundromat, completely entranced by the sunset. We don't have hills below Pacific. We'll never get the views of elevation others in our neighborhood get. But we all play by the rules and don't build too high so that everyone has the opportunity to see the free show nature puts on every morning and night. A four and a half story building on this site would block the entire hill of the Palos Verdes Peninsula and most spectacular part of the nightly sunset, like in the photo below of the proposed sight from the laundromat on 14th St at sunset on March 7 2020.

Building a nearly five story high, almost city block wide building on this corner will eliminate the sunset view over the Palos Verdes Peninsula for residents below Pacific, and eliminate the sunrise view over the port for those above Pacific. This project would privatize the sunset for only a very few, on the upper west facing floors of this proposed development, which is unconscionable. There is no reason the building can't be three stories tall. This would bring the total amount of apartments down to 75, increasing the Very Low Income ratio to a true 16%, not

the 11% it's currently at, and allow for loading spots for delivery drivers in the parking garage. It would also be the same height as the other apartment buildings on Pacific.

This proposed development is zoned C2-1XL-CPIO, like the rest of Pacific in this area, so every building in the neighborhood must abide by a 30 foot height limit. The staff report says that the proposed four story, 45 foot and 5 inch tall building is similar to other buildings in the neighborhood, but that's simply not true. Nothing is taller than three stories anywhere around, and this building is also nearly an entire city block long. It will tower over everything around it, like it towers over the two story tire store in the artist's rendering. It will stick out like a sore thumb and be visible from great distances. It's a full 50% higher than the neighborhood's highest buildings. The view from 15th street looking north below shows the scale of the neighborhood.

This is in direct defiance of the San Pedro Community Plan for the Pacific Corridor, which prioritizes prevention of exactly this in the Redevelopment Plan by implementing Residential Design Standards: "To ensure that new construction within existing neighborhoods will be compatible with its surroundings. The scale and character of new residential construction needs to be especially sensitive to the height, massing and orientation of existing residences."

Not Enough Mix of Income Levels-Exacerbating the Housing Crisis

Traffic and sunsets are both defining characteristics and important conversation topics in Los Angeles. But what will be the most detrimental thing about this proposed apartment building is that it will sit largely empty while people sleep in the streets and make the housing crisis worse.

A March 9 search of available listings in San Pedro shows 496 available rentals. 398 of these listings are concentrated at just two apartment buildings: The Vue a 304 unit building built in 2008, and 550 Harborfront, a 375 unit building that opens this year. This building ironically partially blocks the view from the Vue. Both buildings are about \$1000 higher than the average rental rates for one, two and three bedroom units in San Pedro. There is just no demand for apartments like this. Young people don't want to rent a really expensive apartment in an up and coming area. A mortgage on a house in San Pedro is lower than that rent. Rent has actually gone down here by 4.4% in the last year.

Yet this is one of 10 proposed, under construction, or recently completed projects that have bare minimum amount of affordable or low income units required to trigger density bonuses while building an obscene amount of apartments only very wealthy people who don't live here can afford. Only one majority affordable housing building has recently been approved in our neighborhood. Brava. Here's what else is coming down the pipeline for Central San Pedro:

111 N Harbor Blvd, 120 units, only 10 affordable
407 N Harbor Blvd, 63 units, only 8 affordable
511 N Harbor Blvd 137 units, only 16 very low income
222 W 6th St, 228 units, adaptive reuse, no proposed affordable or low income units
337 W 7th St, 32 units, no affordable or low income units
444 W 5th St 99 units, only 8 low income
420 W 9th St, 56 units, only 6 extremely low income
550 Harbor View, 375 units, no affordable or low income units
2100 Pacific Ave, 101 units, only 12 very low income (the same developer, only 8 blocks away from 14th and Pacific)

This is 1,313 new apartments proposed, with only 18 affordable units, 8 low income, 40 very low income, and 6 extremely low income. This means 1313 above rate units, and 72 affordable to extremely low income units, with the ratio of haves to have nots at 19 to 1. Meanwhile, the most recently published homeless count in San Pedro was over 600. Buildings like this make the housing crisis worse. Livable apartments sit empty while people sleep on sidewalks.

There was a similar luxury construction boom in downtown Los Angeles. Vacancy rates in that neighborhood have been in the double digits since 2018, while there are nearly 4800 people living on Skid Row. We must learn our lessons from other neighborhoods in Los Angeles that are now trying to play catch up. The San Pedro Community Plan does not want large

concentrations of public housing. The only way to avoid that in the future is to dedicate more space to building lower rent units now.

The average household income in San Pedro is around \$64,000, and landlords are advised not to rent to anyone for whom the rent would be more than 30% the monthly income. This would mean an appropriate rent would be \$1600 a month, and there are currently only 20 apartments in San Pedro available at that rate, most of which are studios and one bedrooms and would be challenging to fit an entire household into.

A more responsible use of a 102 unit building would be to add 12 affordable units, 12 low income units, and 12 extremely low income units. This would put the mix more at 50% above market and 50% at or below. We could bank on the financial potential of residents by timing these out over a period of XX years, like the very low income units time out after 55 years. I'm sure an expert could come up with the right numbers that would ensure new development meets housing demand while still turning a profit for the landlord. If all ten new developments did something like this, we could make a real difference much quicker.

San Pedro is in a unique position to be a leader here. We do not need to approve everything that comes our way. We need to be selective, and approve only developments that have the best interest of every resident, current and future, in mind. This proposal isn't even LEED certified like the last development of three story townhouses built by this developer a few blocks away. This proposal is backsliding. It defies the San Pedro Community Plan. It provides no new public gathering space even though it demolishes a block's worth of potential for that. And worst of all, it only allows for 12 very low income units, 90 high end units, and nothing in between.

The developers expect us to be grateful for the bare minimum and bend over backwards to accommodate them. We can't be so thirsty. San Pedro is a Coastal California Community. We are about the safest bet you can make in real estate. Developers will always want to build here. We should only entertain forward thinking proposals that take into account the environment, preserving public spaces with access to nature, and features that provide potential for increased prosperity for existing and future residents.

The fact of the matter is that substantial affluence isn't coming to San Pedro until after a lot of blue collar people get to work building it. Housing these workers should be our first concern. Rents will go up in time, they always do. We shouldn't blaze over community gathering places to make way for isolated buildings for theoretical rich people who want a fancy apartment in a low income parts of town. The corner in question has so much more potential as a place for the whole neighborhood to come together.

Better for the Block-Things that will Really Increase Neighborhood Value

To build this proposed development, a series of buildings must be bulldozed, all of which were built to be community gathering spaces. Music venue, ice cream parlor, local bar; these are a

few of the opportunities to gather that we will never get back if this development goes through. The shame of it all is that a gathering space is exactly the thing this vibrant community needs.

This strip of Pacific is very alive, with multi-generational foot traffic and a diverse mix of local business. In just a one block radius, we've got a local newspaper, ballet studio, art galleries, two laundromats, Croatian fried chicken, florist, furniture store, corner store, dollar store, Mexican takeout, teriyaki and burger stand, elementary school, glass craftsman, and donut shop. The car culture industry gets its own list. In just a couple blocks along Pacific we've got a European classic car restoration service, motorcycle sales and service, body shop, upholstery shop, car care center, tire store, car wash and a weekly appearance by the Snap On tool truck driver.

But what we don't have is a space where people in an array of income and age levels can gather. That's all we need. The 800 person capacity music venue that will be torn down was that. The bowling alley that building was originally built to be was that. If we allow this proposal to go through as is, we will lose this corner as a community space forever.

In my recent deep dive into Los Angeles zoning and planning, I've learned that extractions are expressly forbidden. This means we can't ask developers to provide things for the community as conditions for building. Conversely, it's perfectly acceptable for developers to ask for breaks, incentives, and entitlements from the community as conditions for building. Developers are encouraged to offer amenities that will improve the community as a whole through the San Pedro Community plan, but they aren't required or expected to do so. My suggestion is that we stop approving plans that don't include amenities that offset the hardships big development brings to our community. Keep our standards high. We're worth it!

We have an opportunity to bring everyone in San Pedro up during this new wave of development. I know first hand how hard that can be in this city. But if we don't even try, if we don't put the lessons we learned in other neighborhoods to use, what kind of city planning is that? Accepting the bare minimum should not be an option. Developers should be fighting for our spaces, and blazing trails for the future of a sustainable, happy, 3rd LA, not offering average plans that do nothing to honor or improve the spectacular place they plan to build. New development should be a jumping off point to discuss how something brand new can best serve the community as a whole.

Below are some amenities this particular block could really use that could easily be incorporated into a building that also houses hundreds of people. These are just my first ideas. If the developers met with the community and brainstormed, like the Great Streets Grant Recipients do to determine the best possible plan of action for a corridor, imagine what could be accomplished. Community collaboration is key when working to substantially increase density.

Playground-the nearest swingset is a mile uphill.

Public Park-rooftop parks are common in other cities, and a great way to preserve accessibility to the natural world while increasing density vertically.

Community Kitchen-this area is hub for local food producers and has beloved street vendors. A community kitchen could help residents launch new cottage kitchen business, host cooking classes, serve as catering space for events, and generate income for the building, while also providing cooking space for those who don't have any. Community kitchens are being common in new developments across LA.

Rooftop Bar/Restaurant-great way to give back those sunsets to the community, create jobs, and provide income for the building even in times of high vacancy.

Outdoor Food Court- this route is frequented by teenagers who just want a place to go hang out and snack. Mothers with toddlers in the neighborhood want the same thing. Let's give these two groups a place to hang out together. A bonus is a boost to the babysitting economy.

Zumba-if just one ground level room or rooftop space was devoted to community fitness classes, it would be life changing for the block. There is no yoga, no battle ropes, not even a kettlebell in the entire Pacific corridor.

Public Parking-Unbundled parking spaces mean there's a possibility for a covered parking surplus at this building, meaning spaces could be rented or donated to members of the community.

Maker Space-a place to share tools, create together, encourage creativity, and pass down knowledge from generation to generation

Sunrise Sunset Bridge- exterior stairs on both sides of the building could lead to a public platform where neighbors could climb to take in unobstructed views of their neighborhood. This bridge would have no access to private rooftop decks or apartments.

Thank you for your consideration in this matter. I urge you not to approve this building as proposed. It's at a good starting point, but there's so much more than it can be. To pull the trigger now would be dismissive of our neighborhood. We need to give this block, and this future development, the time and consideration to reach its full potential.

Best,

Army Linderborg

A Day on 14th and Pacific, in case you've never been:

Every morning the sun rises over the Port of Los Angeles, illuminating our high functioning global society just before it beats down on the residents who live on a sidewalk lined with tents along Plaza Park. This sidewalk is now full and I saw the first tent south of 14th St last week. The fog horn blows until the marine layer gets up and leaves. The donut shop and the laundromat open first so we can all get to work getting today's coffee in and yesterday's coffee stains out. The streets are thick with school kids walking to 15th St Elementary, Dana Middle School, and San Pedro High before classes start. The next group to hit the streets are young men selling hot fresh tamales from rolling coolers, announcing their arrival in sing song hollars that can be heard in plenty of time to grab your cash and meet them on the sidewalk. When they get near my house they yell "pina para nina!" if the pineapple tamales haven't sold out yet because they know they are my little girls' favorite. On Wednesdays the farm on 14th and Mesa opens up for a farmers market, and San Pedrans arrive in droves eager to purchase produce grown right there and fresh sourdough bread made just up the road. People run, walk their dogs, push strollers, go to work, work at home, relocate their worldly belongings when the homeless encampments are broken up. The guys from the halfway houses take group trips to Dollar Tree. Helicopters chase criminals through the streets. One time a teenager with orange hair shot a gun off at 7:30 in the morning. The street was on lockdown and helicopters were circling and hovering, but the kid got away by getting on the city bus a couple blocks away. A group of old men hang out in the parking lot in front of the South Pacific Market doing scratchers. When they win the owner proudly displays the ticket in the window. I'll bring a group of tourists picking and trading fruit through the neighborhood with me, handing out fresh picked tangerines or avocados to whoever we pass. When school's out the kids are too, heading to the Boys and Girls Club for incredible after school programs, or San Pedro City Ballet, both on 13th St, walking home or to the park or store, enjoying the moments of transient freedom in their day. At 4:30 the Air Force Base plays the National Anthem and it can be heard for miles. The ice cream trucks start to circle, delighting every resident with no air conditioning. The Snap On truck parks outside the locally owned Meineke, delighting every gear head craving new tools. The sun heads over the hills that build into the peak of the Palos Verdes Peninsula, setting in a spectacular backwards for California style: over land to the west while the pacific ocean flows through the port to the east. Toys That Kill practice in a garage directly across the alley from my house, and I get a free live punk show (audio only) before the lead singer heads down to Sardine, the brand new punk rock venue and bar he opened on 11th and Pacific in a former bakery space. It took two years to get all the approvals from the city. At 9:00 the Air Force Base plays Taps, and the day is done for me. The dive bars and taco trucks keep Pacific Ave up later. On nights that it rains I worry about people's tents leaking. Dogs bark at raccoons occasionally throughout the night. The pickup trucks that take union workers to work before dawn start up and drive off, and then the sun rises over the Port of Los Angeles to start another day.

Hi Connie,

Regarding the projects at [1309 S. Pacific](#) and [2111 S. Pacific](#) in San Pedro CA, case numbers CPC-2019-4908-DB-SPR and ENV-2019-4909-CE and CPC-2019-4884-CU-DB-SPR and ENV-2019-4885-CE, it's imperative that both of these projects be heard together.

2111 S. Pacific has been continued to a date uncertain due to a plethora of irregularities and 1309 S. Pacific shares many of the same issues.

Sincerely,
Noel Gould

To: connie.chauv@lacity.org

Cc: Alison Becker <alison.becker@lacity.org>

Connie,

This case does not qualify for a Categorical Exemption under CEQA and the City's own rules.

And also, the cumulative impact of this case together with CPC-2019-4884-CU-DB-SPR/ENV-2019-4885-CE (2111-2139 Pacific) was not adequately considered under the CEQA law.

The two cases must be heard together for that reason as well. 2111 S. Pacific has been continued to a date uncertain due to a plethora of irregularities and [1309 S. Pacific](#) shares many of the same issues.

This hearing must be continued.

To: Connie Chauv <connie.chauv@lacity.org>

Cc: Shannon Ryan - City of Los Angeles <Shannon.Ryan@lacity.org>, "michelle.singh@lacity.org" <michelle.singh@lacity.org>, "Ana.Guerrero@lacity.org" <Ana.Guerrero@lacity.org>, "vince.bertoni@lacity.org" <vince.bertoni@lacity.org>, "mayor.garcetti@lacity.org" <mayor.garcetti@lacity.org>

Hello Connie,

I didn't receive a reply from you regarding my email yesterday re: the Citywide Planning Commission hearing scheduled for Thursday 3/12. It appears that the hearing is still being held?

Given that so many meetings, events, and universities are cancelling and closing locally due to COVID-19, I am disturbed that the Mayor's Office/City Planning is not also rescheduling the proceedings to a safer/better time. It's a shame that older Angelinos and people with underlying health conditions are being forced to attend public hearings at the risk of their health, or risk not being heard. What an awful choice!
And it certainly seems discriminatory.

As mentioned it has been quite distressing to learn that I should not attend the CPC hearing (because of underlying health conditions), as I prepared a number of critical points for presentation, and now will not be able to present them.

In lieu of that, I hope that you have read yesterday's email and will consider my point that the documentation that has been cited in the recommendation is in conflict with itself and therefore prevents the public (and Planners) from drawing accurate conclusions about the proposed project (pasted below).

Will you really recommend the project knowing that the underlying documentation is inconsistent and incorrect?

from my email on Tuesday:

"...One very serious and important point that I had hoped to present is the many discrepancies - mismatched figures - in the the AQ studies and case file documents for this (and both of the developers' projects).

For example:

The 1309-1331 project (see attached docs) lists 23,348 cu/yds of soil export on the AQ analysis. But on the Environmental Assessment form it lists 20K cu/yds of import (?) and 20K cu/yds of export and 2,500 cu yds of grading.

And the hearing notice that was mailed to the community listed only 2,500 cu/yds of grading - omitting the other soil removal (whereas the 2111 Pacific project's Hearing Notice lists a recent change to 20K cu/yds of grading and 20K cu/yds of soil removal - **totaling 40K cu/yds - for a project with half the number of subterranean parking spaces**. Clearly there is something wrong here!

And it's important to note that although the 2111 Pacific project's Hearing Notice lists those 40K cubic Yards, the related Environmental Assessment Form (attached) lists only 18,000 cu/yds of soil export.

These discrepancies show that the project documentation is in disagreement with itself, and have made it impossible for the community to figure out what's going on.

Perhaps most importantly it points out that the AQ study should be invalidated until the actual figures are sorted out and verified, and the impacts are recalculated, so that City Planners can be accurate in their assessment/recommendation of the project and the requested Categorical Exemptions.

The hearing should be postponed until all of the shifts in numbers for grading, soil removal, etc. can be sorted out and the case file properly amended. **And certainly it should be at a time when *all* members of the community have the option to attend and be heard.**

And please note that the documents on which recommendations have been made are filled with these kinds of discrepancies - I have only cited this one glaring example.

Finally, because the figures are incorrect they may affect the cumulative impacts of this and the Developer's other nearby project - so the hearings should certainly be held concurrently, as they were previously."

Thank you for considering this.
Sincerely,
Danial Nord

Subject: exception + or rescheduling of CPC hearing - case number CPC-2019-4908-DB-SPR

Hello Connie and Cecilia,

I am writing regarding the hearing scheduled for 3/12 for 1309-1331 South Pacific Avenue [case#: CPC-2019-4908-DB-SPR].

I hope that the CPC will reschedule the hearing based on special circumstances that I have cited below.

First of all, I had planned to attend the hearing to present some critical issues, but because of COVID-19 and my underlying health condition I have been advised to avoid this kind of public building/gathering.

I understand that under normal circumstances the Rules & Operating Procedures do not allow community members to email comments within 48 hours of the meeting, and that during this time-frame fifteen hard copies must be submitted the day of the meeting.

But this is not a normal situation, and it seems wrong to require people to attend under the circumstances. Will the CPC force vulnerable people who suddenly cannot go to the hearing either to go (at risk of their health) or not be heard?

Can you please extend the acceptance of digital letters, or reschedule the hearing in lieu of requiring people to attend?

Secondly - one very serious and important point that I had hoped to present is the many discrepancies - mismatched figures - in the the AQ studies and case file documents for this (and both of the developers' projects).

For example:

The 1309-1331 project (see attached docs) lists 23,348 cu/yds of soil export on the AQ analysis. But on the Environmental Assessment form it lists 20K cu/yds of import (?) and 20K cu/yds of export and 2,500 cu yds of grading.

And the hearing notice lists only 2,500 cu/yds of grading - omitting the other soil removal (whereas the 2111 Pacific project's Hearing Notice lists a recent change to 20K cu/yds of grading and 20K cu/yds of soil removal - **totaling 40K cu/yds - for a project with half the number of subterranean parking spaces.** Clearly there is something wrong here!

And it's important to note that although the 2111 Pacific project's Hearing Notice lists those 40K cubic Yards, the related Environmental Assessment Form (attached) lists only 18,000 cu/yds of soil export.

These discrepancies show that the project documentation is in disagreement with itself, and have made it impossible for the community to figure out what's going on.

Perhaps most importantly it points out that the AQ study should be invalidated until the actual figures are sorted out and verified, and the impacts are recalculated, so that City Planners can be accurate in their assessment/recommendation of the project and the requested Categorical Exemptions.

The hearing should be postponed until all of the shifts in numbers for grading, soil removal, etc. can be can be sorted out and the case file properly amended.

And please note that the documents on which recommendations have been made are filled with these kinds of discrepancies - I have only cited this one glaring example.

Finally, because the figures are incorrect they may affect the cumulative impacts of this and the Developer's other nearby project - so the hearings should certainly be held concurrently, as they were previously.

I hope to hear back from you very soon.

Sincerely,
Danial Nord

MEETING INFORMATION

MEETING HELD BY:

City Planning Commission

DATE:

March 12, 2020

TIME:

after 8:30 a.m.

PLACE:

Los Angeles City Hall
Council Chambers
200 North Spring Street, Room 340
Los Angeles, CA 90012

PUBLIC HEARINGS PREVIOUSLY HELD:

January 16, 2020

The recommendation report(s) with exhibits will be available on-line no later than **seven (7) days** prior to the Commission Meeting and will be accessible on-line at planning.lacity.org by selecting "Commissions & Hearings". Reports are hyperlinked to the case numbers included in the agendas.

STAFF CONTACT:

Connie Chauv, City Planner
200 North Spring Street, Room 720/721
Los Angeles, CA, 90012

PROJECT INFORMATION

PROJECT LOCATION:

1309-1331 South Pacific Avenue

CASE NO.

CPC-2019-4908-DB-SPR

CEQA NO.

ENV-2019-4909-CE

COUNCIL DISTRICT:

15 - Buscaino

ZONE:

C2-1XL-CPIO

PLAN AREA:

San Pedro

LAND USE:

Neighborhood Commercial

PLAN OVERLAY:

San Pedro CPIO

APPLICANT:

RKD 13 PAC., LP

REPRESENTATIVE:

Jonathan Lonner, Kristen Lonner, Dave Zohn, Josh Guyer, Burns & Bouchard, Inc.

PROJECT DESCRIPTION

The project is the construction of a 4-story, 45-foot and 5-inch tall residential building comprised of 102 dwelling units (including 12 Very Low Income units). The project will be approximately 83,158 square feet in floor area with a Floor Area Ratio ("FAR") of 2.65:1. The project will provide 127 parking spaces in 2 subterranean levels. The site is currently improved with 3 vacant commercial structures, with 26 trees on the subject site and 4 trees along the public right-of-way, all of which will be removed to clear the lot. The project will also involve the grading of approximately 2,500 cubic yards of soil.

Threshold b) Would the project result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or State ambient air quality standard?

(1) Construction

A cumulatively considerable net increase would occur if the project's construction impacts substantially contribute to air quality violations when considering other projects that may undertake construction activities at the same time.

Individual projects that generate emissions that do not exceed SCAQMD's significance thresholds would not contribute considerably to any potential cumulative impact. SCAQMD neither recommends quantified analyses of the emissions generated by a set of cumulative development projects nor provides thresholds of significance to be used to assess the impacts associated with these emissions.

Construction-related emissions were estimated using the SCAQMD's CalEEMod 2016.3.2 model using assumptions from the Project's developer, including the Project's construction schedule of at least 16 months. **Table 5** summarizes the potential construction schedule that was modeled for air quality impacts.

Table 5
Potential Construction Schedule

Phase	Duration	Notes
Demolition	Months 1-1.5	3,511 tons of debris hauled up to 41 miles away
Grading	Month 2.5-3.5	23,348 cubic yards of soil export hauled up to 41 miles away
Building Construction	Months 3.5-8.5	
Architectural Coatings	Months 12-16	
Source: DKA Planning, 2019		

The Project would be required to comply with the following regulations, as applicable:

- SCAQMD Rule 403, would reduce the amount of particulate matter entrained in ambient air as a result of anthropogenic fugitive dust sources by requiring actions to prevent, reduce or mitigate fugitive dust emissions.
- SCAQMD Rule 1113, which limits the VOC content of architectural coatings.
- SCAQMD Rule 402, which states that a person shall not discharge from any source whatsoever such quantities of air contaminants or other materials which cause injury, detriment, nuisance, or annoyance to any considerable number of persons or to the public, or which endanger the comfort, repose, health, or safety of any such persons or the public, or which cause, or have a natural tendency to cause, injury or damage to business or property.

¹ Project address must include all addresses on the subject site (as identified in ZIMAS; <http://zimas.lacity.org>)
CP-1204 [11.10.2016] Environmental Assessment Form Application

F. **Grading.** Specify the total amount of dirt being moved:

☐ 0-500 cubic yards ☒ More than 500 cubic yards

If more than 500 cubic yards (indicate amount): 2,500 cubic yards

G. **Import/Export.** Indicate the amount of dirt to be imported or exported:

Imported: 20,000 cubic yards Exported: 20,000 cubic yards

Location of disposal site: _____

Location of borrow site: _____

Is the Project Site located within a Bureau of Engineering (BOE) Special Grading Area? ☐ YES ☒ NO

If YES, a **Haul Route** is required.

H. **Hazardous Materials and Substances.** Is the project proposed on land that is or was developed with a dry cleaning, automobile repair, gasoline station, or industrial/manufacturing use, or other similar type of use that may have resulted in site contamination? ☐ YES ☒ NO

If YES, describe: _____

If YES, a **Phase I Environmental Site Assessment (ESA)** is required.

I. **Historic, Cultural and/or Architecturally Significant Site or Structure.** Does the project involve any structures, buildings, street lighting systems, spaces, sites or components thereof which are designated or may be eligible for designation in any of the following? If YES, please check and describe:

☐ National Register of Historic Places: _____

☐ California Register of Historic Resources: _____

☐ City of Los Angeles Cultural Historic Monument: _____

☐ Located within a City of Los Angeles Historic Preservation Overlay Zone (HPOZ): _____

☐ Identified on SurveyLA: _____

☐ Identified in HistoricPlacesLA: _____

Does the Project affect any structure 45 or more years old that does not have a local, state, or federal designation for cultural or historic preservation? ☒ YES ☐ NO

VERY URGENT: pls continue CPC hearing March 12, 2020/tomorrow

Robin Rudisill <wildrudi@me.com>

Wed, Mar 11, 2020 at 5:44 PM

To: vince.bertoni@lacity.org, Mayor Eric Garcetti <mayor.garcetti@lacity.org>

Cc: ana.guerrero@lacity.org, Cecilia Lamas <cecilia.lamas@lacity.org>, Danial Nord <danielnord@hotmail.com>, Noel Gould <aquarianstudios@hotmail.com>, Army Feth Linderborg <army.feth@gmail.com>, June Smith <burling102@aol.com>, J Campeau <campeau.jw@gmail.com>, fran siegel <fs10002@yahoo.com>, "yoginimarcel@icloud.com" <yoginimarcel@icloud.com>, Allen Franz <afranz@pacbell.net>, "jjsocalifornia@yahoo.com" <jjsocalifornia@yahoo.com>, "vcmcintire46@yahoo.com" <vcmcintire46@yahoo.com>, Alison Becker <Alison.Becker@lacity.org>, Connie Chauv <connie.chauv@lacity.org>, Planning CPC <cpc@lacity.org>, Shannon.Ryan@lacity.org, Michelle Singh <michelle.singh@lacity.org>

Mr. Garcetti and Mr. Bertoni,

Under the circumstances of our County's state of emergency, of which you are aware as much as anyone, we implore you to continue the CPC hearing for tomorrow morning for the project at 1309-1331 Pacific Ave (CPC-2019-4908-DB-SPR and ENV-2019-4909-CE).

There are several residents in the San Pedro community who were originally planning on attending the hearing and have important input, some of whom have specific medical reasons why they should not attend the hearing in person during this state of emergency, and others who are simply following the County's directive that we should not attend public meetings/events unless it is absolutely mandatory.

Also, a few of us tried to submit comments but they were rejected as they were just a few minutes (4 minutes or less) past the deadline. We weren't aware until the very last minute that the CPC deadline was different than the APC deadlines. We are told that the only way we can give our input is to come to the meeting with 15 copies of our letter.

This is not acceptable given the situation we are all in.

Can you PLEASE continue this hearing until such time that allowances can be made for the public to have due process in providing their input to the Commission at this hearing, WHICH IS EXTREMELY IMPORTANT TO THIS COMMUNITY AND ITS FUTURE.

***For the Love of Los Angeles
and our precious Coast,***

Robin Rudisill
