Historic-Cultural Monument Application

FINDINGS

- The Holmby Building "exemplifies significant contributions to the broad cultural, economic or social history of the nation, state, city or community" for its association with the early development of Westwood Village by the Janss Corporation.

- The Holmby Building "embodies the distinctive characteristics of a style, type, period, or method of construction, [and] represents a notable work of a master designer, builder, or architect whose individual genius influenced his or her age" as an excellent example of the Mediterranean Revival architectural style and as one of the earliest commercial works of master architect Gordon B. Kaufmann.

CRITERIA

The criterion is the Cultural Heritage Ordinance which defines a historical or cultural monument as any site (including significant trees or other plant life located thereon), building or structure of particular historic or cultural significance to the City of Los Angeles if it meets at least one of the following criteria:

1. Is identified with important events of national, state, or local history, or exemplifies significant contributions to the broad cultural, economic or social history of the nation, state, city or community;
2. Is associated with the lives of historic personages important to national, state, city, or local history; or
3. Embodies the distinctive characteristics of a style, type, period, or method of construction; or represents a notable work of a master designer, builder, or architect whose individual genius influenced his or her age.

SUMMARY

The Holmby Building is a 1929 two- and three-story commercial building located on the west side of Westwood Boulevard between W. Le Conte Avenue and W. Weyburn Avenue in the Westwood neighborhood of Los Angeles. Designed by architect Gordon B. Kaufmann (1888-1949) in the Mediterranean Revival architectural style, the subject property was commissioned by the Janss Investment Corporation. The Holmby Building was part of the initial development phase of Westwood Village, which officially opened in 1929.

Westwood Village was developed in the late 1920s by the Janss Investment Corporation as a commercial center for the newly-established University of California, Los Angeles campus. The product of advanced planning and ongoing design control, Westwood Village featured a diverse mix of businesses which could serve the wide variety of customers in the area, including both students and homeowners. Janss planned to construct grocery and drug stores as well as branches of downtown department and specialty stores. Although Westwood Village opened on the eve of the stock market crash of 1929, its development remained largely unaffected by the ensuing economic downfall. Within five months of opening, Westwood Village had grown to include more than fifty businesses, with at times as many as nine stores opening per week. As development progressed, Janss continued to emphasize the principles of planning and incremental growth which had characterized the initial design of the Village. The Janss Investment

Corporation continued to retain control of the development of Westwood Village until the mid-1950s.

Rectangular in plan, the subject building occupies almost the entire parcel with zero setback. It is of concrete construction with smooth cement plaster and painted brick veneer cladding and has a hipped and gabled roof with clay tile at the street-facing elevations and a flat roof at the rear. The primary, east-facing elevation is asymmetrically composed and is articulated as a series of five individual volumes, designed to appear as a row of buildings. There are primary entrances to each volume, all consisting of glazed metal doors, some with transoms and sidelites, and all volumes have interior chimneys. A tall, octagonal clock tower with cast iron ornamentation, a balcony, and a pyramidal spire rises at the southeastern corner of the building. There are recessed loggias with Ionic columns on the second story of the center volume and the third story of the second volume from the north. Other ornamentation includes string courses, pilasters, pediments, balustrades, and molded plaster window surrounds. The rear, west-facing elevation is unified by a blind arcade infilled with brick that extends the length of the façade. A number of secondary retail entrances consisting of contemporary metal fully-glazed doors with transoms and sidelites are located at the rear, and are either set at grade or accessed via shallow steps. Fenestration consists of single-lite metal casement windows, multi-lite metal casement windows, metal storefront windows, arched transom windows, round fixed windows, and awning windows. Interior features are inclusive of terrazzo flooring, plaster crown molding, open staircases with metal handrail and balusters, barrel-vaulted ceilings, a double-loaded second floor corridor.

Gordon Bernie Kaufmann was born in 1888 in London, England and graduated from London Polytechnic Institute around 1908. He arrived in California in 1914, settling in Fresno, and relocated to Los Angeles in 1915. After a partnership with architect Roland E. Coate, Kaufmann formed his own architectural practice in 1924. Kaufmann's work in Southern California spans over four decades and includes hotels, commercial buildings, residences, theaters, and churches. Between the 1920s and 1940s he constructed several residential and commercial buildings in the Greater Los Angeles area, including Greystone Mansion in Beverly Hills (1926), Santa Anita Park in Arcadia (1934), Los Angeles Times Building (1935, HCM #1174), the Earl Carroll Theater (1938, HCM #1136), the Hollywood Palladium (1940, HCM #1130), and Park La Brea (1948). Kaufmann passed away at the age of 60 in 1949.

The subject property has experienced several alterations that include redivision of interior units in 1932; replacement of some windows in 1938; the relocation of the exterior stairway in 1946; the removal of finials and urns from the roof in 1950; re-roofing in 1951 and 1952; the installation of a door in 1959; corrections to the parapet in 1960; wet sandblasting in 1961; the addition of store space in 1965; the enclosure of the second-story front porch in 1970; the addition of a window opening in 1974; the repair of motor vehicle damage in 1980; interior store remodel in 1983; the glazing of the loggia in 1984; and re-roofing in 1994 and 2003.

SurveyLA, the citywide historic resources survey, identified the subject property as individually eligible for listing under the state and local designation programs as an excellent example of Mediterranean Revival commercial architecture in Westwood Village, for its association with the original development of Westwood by the Janss Corporation, and as a work of master architect Gordon B. Kaufmann. The subject property is also identified as a locally significant historic resource in the Westwood Village Specific Plan.

DISCUSSION

The Holmby Building meets two of the Historic-Cultural Monument criteria.

The subject property "exemplifies significant contributions to the broad cultural, economic or social history of the nation, state, city or community" for its association with the early development of Westwood Village by the Janss Corporation. Although development of the tract started in 1922, it was not until December 1927 that the Janss Investment Corporation announced the development of a planned commercial district, Westwood Village, and it launched two years later. To ensure that the identity of Westwood Village remained a cohesive, unified complex, the Janss company implemented design guidelines for building exteriors that extended to a loosely defined range of Mediterranean styles. These styles complemented the Italian and Romanesque architecture of the adjacent university campus. Along with the Janss Dome, the Holmby Building was one of the first two buildings to be developed by the company in Westwood Village and was intended to define the character of development in the Village and serve as a model for subsequent construction efforts.

The Holmby Building also "embodies the distinctive characteristics of a style, type, period, or method of construction" as an excellent example of the Mediterranean Revival architectural style. The building's low-pitched hipped and gabled clay tile roof, simple, horizontal massing, arched openings, and limited use of applied decoration are all reflective of the style. Other distinguishing features include the clock tower, upper-story loggias, divided-lite casement windows, and decorative molded window surrounds.

Furthermore, the subject property "represents a notable work of a master designer, builder, or architect whose individual genius influenced his or her age" as one of the earliest commercial works of master architect Gordon B. Kaufmann. Starting his own firm in 1924, five years prior to the completion of the subject property, and having a career that spanned more than 40 years, the subject property represents one of Kaufmann's early commercial designs and the earliest example of his work in Westwood Village.

Despite interior and exterior alterations, the subject property retains a sufficient level of integrity of location, materials, design, setting, workmanship, feeling, and association to convey its significance.

CALIFORNIA ENVIRONMENTAL QUALITY ACT ("CEQA") FINDINGS

State of California CEQA Guidelines, Article 19, Section 15308, Class 8 "*consists of actions taken by regulatory agencies, as authorized by state or local ordinance, to assure the maintenance, restoration, enhancement, or protection of the environment where the regulatory process involves procedures for protection of the environment.*"

State of California CEQA Guidelines Article 19, Section 15331, Class 31 "*consists of projects limited to maintenance, repair, stabilization, rehabilitation, restoration, preservation, conservation or reconstruction of historical resources in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic buildings*."

The designation of the Holmby Building as an Historic-Cultural Monument in accordance with Chapter 9, Article 1, of The City of Los Angeles Administrative Code ("LAAC") will ensure that

future construction activities involving the subject property are regulated in accordance with Section 22.171.14 of the LAAC. The purpose of the designation is to prevent significant impacts to a Historic-Cultural Monument through the application of the standards set forth in the LAAC. Without the regulation imposed by way of the pending designation, the historic significance and integrity of the subject property could be lost through incompatible alterations and new construction and the demolition of an irreplaceable historic site/open space. The Secretary of the Interior's Standards for Rehabilitation are expressly incorporated into the LAAC and provide standards concerning the historically appropriate construction activities which will ensure the continued preservation of the subject property.

The City of Los Angeles has determined based on the whole of the administrative record, that substantial evidence supports that the Project is exempt from CEQA pursuant to CEQA Guidelines Section Article 19, Section 15308, Class 8 and Section 15331, Class 31, and none of the exceptions to a categorical exemption pursuant to CEQA Guidelines Section 15300.2 applies. The project was found to be exempt based on the following:

> The use of Categorical Exemption Class 8 in connection with the proposed designation is consistent with the goals of maintaining, restoring, enhancing, and protecting the environment through the imposition of regulations designed to prevent the degradation of Historic-Cultural Monuments.
>
> The use of Categorical Exemption Class 31 in connection with the proposed designation is consistent with the goals relating to the preservation, rehabilitation, restoration and reconstruction of historic buildings and sites in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties.

Categorical Exemption ENV-2020-5542-CE was prepared on November 11, 2020.

BACKGROUND

On September 21, 2020, the Director of Planning determined that the application for the proposed designation of the subject property as an Historic-Cultural Monument was complete. On October 15, 2020, the Cultural Heritage Commission voted to take the property under consideration. On November 10, 2020, a subcommittee of the Commission consisting of Commissioners Barron and Kanner conducted a site inspection of the property, accompanied by staff from the Office of Historic Resources. The original expiration date of December 29, 2020 is tolled, and a revised date will be determined pursuant to *the Mayor's March 21, 2020 Public Order Under City of Los Angeles Emergency Authority re: Tolling of Deadlines Prescribed in the Municipal Code and April 17, 2020 Public Order Under City of Los Angeles Emergency Authority re: Tolling HCIDLA Deadlines and Revising Expiration of Emergency Orders*.

SUMMARY

The Holmby Building is a 1929 two- and three-story commercial building located on the west side of Westwood Boulevard between W. Le Conte Avenue and W. Weyburn Avenue in the Westwood neighborhood of Los Angeles. Designed by architect Gordon B. Kaufmann (1888-1949) in the Mediterranean Revival architectural style, the subject property was commissioned by the Janss Investment Corporation. The Holmby Building was part of the initial development phase of Westwood Village, which officially opened in 1929.

Westwood Village was developed in the late 1920s by the Janss Investment Corporation as a commercial center for the newly-established University of California, Los Angeles campus. The product of advanced planning and ongoing design control, Westwood Village featured a diverse mix of businesses which could serve the wide variety of customers in the area, including both students and homeowners. Janss planned to construct grocery and drug stores as well as branches of downtown department and specialty stores. Although Westwood Village opened on the eve of the stock market crash of 1929, its development remained largely unaffected by the ensuing economic downfall. Within five months of opening, Westwood Village had grown to include more than fifty businesses, with at times as many as nine stores opening per week. As development progressed, Janss continued to emphasize the principles of planning and incremental growth which had characterized the initial design of the Village. The Janss Investment Corporation continued to retain control of the development of Westwood Village until the mid-1950s.

Rectangular in plan, the subject building occupies almost the entire parcel with zero setback. It is of concrete construction with smooth cement plaster and painted brick veneer cladding and has a hipped and gabled roof with clay tile at the street-facing elevations and a flat roof at the rear. The primary, east-facing elevation is asymmetrically composed and is articulated as a series of five individual volumes, designed to appear as a row of buildings. There are primary entrances to each volume, all consisting of glazed metal doors, some with transoms and sidelites, and all volumes have interior chimneys. A tall, octagonal clock tower with cast iron ornamentation, a balcony, and a pyramidal spire rises at the southeastern corner of the building. There are recessed loggias with Ionic columns on the second story of the center volume and the third story of the second volume from the north. Other ornamentation includes string courses, pilasters, pediments, balustrades, and molded plaster window surrounds. The rear, west-facing elevation is unified by a blind arcade infilled with brick that extends the length of the façade. A number of secondary retail entrances consisting of contemporary metal fully-glazed doors with transoms and sidelites are located at the rear, and are either set at grade or accessed via shallow steps. Fenestration consists of single-lite metal casement windows, multi-lite metal casement windows, metal storefront windows, arched transom windows, round fixed windows, and awning windows. Interior features are inclusive of terrazzo flooring, plaster crown molding, open staircases with metal handrail and balusters, barrel-vaulted ceilings, a double-loaded second floor corridor.

Gordon Bernie Kaufmann was born in 1888 in London, England and graduated from London Polytechnic Institute around 1908. He arrived in California in 1914, settling in Fresno, and relocated to Los Angeles in 1915. After a partnership with architect Roland E. Coate, Kaufmann formed his own architectural practice in 1924. Kaufmann's work in Southern California spans over four decades and includes hotels, commercial buildings, residences, theaters, and churches. Between the 1920s and 1940s he constructed several residential and commercial buildings in the Greater Los Angeles area, including Greystone Mansion in Beverly Hills (1926), La Quinta Inn near Indio (1927), Los Angeles Times Building (1935, HCM #1174), the Earl Carroll Theater (1938, HCM #1136), the Hollywood Palladium (1940, HCM #1130), and Park La Brea (1948). Kaufmann passed away at the age of 60 in 1949.

The subject property has experienced several alterations that include redivision of interior units in 1932; replacement of some windows in 1938; the relocation of the exterior stairway in 1946; the removal of finials and urns from the roof in 1950; re-roofing in 1951 and 1952; the installation of a door in 1959; corrections to the parapet in 1960; wet sandblasting in 1961; the addition of store space in 1965; the enclosure of the second-story front porch in 1970; the addition of a window opening in 1974; the repair of motor vehicle damage in 1980; interior store remodel in 1983; the glazing of the loggia in 1984; and re-roofing in 1994 and 2003.

SurveyLA, the citywide historic resources survey, identified the subject property as individually eligible for listing under the state and local designation programs as an excellent example of Mediterranean Revival commercial architecture in Westwood Village, for its association with the original development of Westwood by the Janss Corporation, and as a work of master architect Gordon B. Kaufmann. The subject property is also identified as a locally significant historic resource in the Westwood Village Specific Plan.

CRITERIA

The criterion is the Cultural Heritage Ordinance which defines a historical or cultural monument as any site (including significant trees or other plant life located thereon), building or structure of particular historic or cultural significance to the City of Los Angeles if it meets at least one of the following criteria:

1. Is identified with important events of national, state, or local history, or exemplifies significant contributions to the broad cultural, economic or social history of the nation, state, city or community;
2. Is associated with the lives of historic personages important to national, state, city, or local history; or
3. Embodies the distinctive characteristics of a style, type, period, or method of construction; or represents a notable work of a master designer, builder, or architect whose individual genius influenced his or her age.

FINDINGS

Based on the facts set forth in the summary and application, the Commission determines that the application is complete and that the property may be significant enough to warrant further investigation as a potential Historic-Cultural Monument.

BACKGROUND

On September 21, 2020, the Director of Planning determined that the application for the proposed designation of the subject property as an Historic-Cultural Monument was complete. The original 30-day expiration date of October 21, 2020 per Los Angeles Administrative Code Section 22.171.10(e)1 is tolled, and a revised date will be determined pursuant to *the Mayor's March 21, 2020 Public Order Under City of Los Angeles Emergency Authority re: Tolling of Deadlines Prescribed in the Municipal Code and April 17, 2020 Public Order Under City of Los Angeles Emergency Authority re: Tolling HCIDLA Deadlines and Revising Expiration of Emergency Orders.*

CITY OF LOS ANGELES
Office of Historic Resources/Cultural Heritage Commission

HISTORIC-CULTURAL MONUMENT
NOMINATION FORM

1. PROPERTY IDENTIFICATION

Proposed Monument Name: Holmby Building			Original historic name
Other Associated Names: Holmby Hall			
Street Address: 901-951 South Westwood Boulevard		Zip: 90024	Council District: 5
Range of Addresses on Property: 901-951 S. Westwood Blvd.; 10904-10		Community Name: Westwood	
Assessor Parcel Number: 4363018001	Tract: Tract No. 10600	Block: 2	Lot: 1
Identification cont'd:			
Proposed Monument Property Type: ● Building	○ Structure	○ Object	○ Site/Open Space ○ Natural Feature
Describe any additional resources located on the property to be included in the nomination, here:			

2. CONSTRUCTION HISTORY & CURRENT STATUS

Year built: 1929 ● Factual ○ Estimated	Threatened? None
Architect/Designer: Gordon B. Kaufmann	Contractor: P. J. Walker Co.
Original Use: commercial building & dormitory	Present Use: commercial building
Is the Proposed Monument on its Original Site? ● Yes ○ No (explain in section 7) ○ Unknown (explain in section 7)	

3. STYLE & MATERIALS

Architectural Style: Mediterranean Revival		Stories: 2&3	Plan Shape: Rectangular
FEATURE	*PRIMARY*		*SECONDARY*
CONSTRUCTION	Type: Concrete poured/precast		Type: Select
CLADDING	Material: Stucco, smooth		Material: Brick
ROOF	Type: Combination		Type: Flat
	Material: Clay tile, rounded		Material: Tar
WINDOWS	Type: Casement		Type: Fixed
	Material: Steel		Material: Steel
ENTRY	Style: Corner		Style: Off-center
DOOR	Type: Glass		Type: Glass

HISTORIC-CULTURAL MONUMENT
NOMINATION FORM

4. ALTERATION HISTORY

List date and write a brief description of any major alterations or additions. This section may also be completed on a separate document. Include copies of permits in the nomination packet. Make sure to list any major alterations for which there are no permits, as well.	
	Please see attachments.

5. EXISTING HISTORIC RESOURCE IDENTIFICATION (if known)

☐ Listed in the National Register of Historic Places	
☐ Listed in the California Register of Historical Resources	
☐ Formally determined eligible for the National and/or California Registers	
☐ Located in an Historic Preservation Overlay Zone (HPOZ)	○ Contributing feature ○ Non-contributing feature
☑ Determined eligible for national, state, or local landmark status by an historic resources survey(s)	Survey Name(s): SurveyLA, 2015
Other historical or cultural resource designations:	

6. APPLICABLE HISTORIC-CULTURAL MONUMENT CRITERIA

The proposed monument exemplifies the following Cultural Heritage Ordinance Criteria (Section 22.171.7):	
☑	1. Is identified with important events of national, state, or local history, or exemplifies significant contributions to the broad cultural, economic or social history of the nation, state, city or community.
☐	2. Is associated with the lives of historic personages important to national, state, city, or local history.
☑	3. Embodies the distinctive characteristics of a style, type, period, or method of construction; or represents a notable work of a master designer, builder, or architect whose individual genius influenced his or her age.

HISTORIC-CULTURAL MONUMENT
NOMINATION FORM

7. WRITTEN STATEMENTS

This section allows you to discuss at length the significance of the proposed monument and why it should be designated an Historic-Cultural Monument. Type your response on separate documents and attach them to this form.

A. Proposed Monument Description - Describe the proposed monument's physical characteristics and relationship to its surrounding environment. Expand on sections 2 and 3 with a more detailed description of the site. Expand on section 4 and discuss the construction/alteration history in detail if that is necessary to explain the proposed monument's current form. Identify and describe any character-defining elements, structures, interior spaces, or landscape features.

B. Statement of Significance - Address the proposed monument's historic, cultural, and/or architectural significance by discussing how it satisfies the HCM criteria you selected in Section 6. You must support your argument with substantial evidence and analysis. The Statement of Significance is your main argument for designation so it is important to substantiate any claims you make with supporting documentation and research.

8. CONTACT INFORMATION

Applicant

Name: FYJA, LLC	Company:	
Street Address: 825 South Barrington Avenue	City: Los Angeles	State: CA
Zip: 90049	Phone Number: 310-820-2988	Email: bbeitler@beitler.com

Property Owner Is the owner in support of the nomination? (●) Yes ( ) No ( ) Unknown

HISTORIC-CULTURAL MONUMENT
NOMINATION FORM

9. SUBMITTAL

When you have completed preparing your nomination, compile all materials in the order specified below. Although the entire packet must not exceed 100 pages, you may send additional material on a CD or flash drive.

APPLICATION CHECKLIST

1. ✓ Nomination Form
2. ✓ Written Statements A and B
3. ✓ Bibliography
4. ✓ Two Primary Photos of Exterior/Main Facade (8x10, the main photo of the proposed monument. Also email a digitial copy of the main photo to: planning.ohr@lacity.org)
5. ✓ Copies of Primary/Secondary Documentation
6. ✓ Copies of Building Permits for Major Alterations (include first construction permits)
7. ✓ Additional, Contemporary Photos
8. ✓ Historical Photos
9. ✓ Zimas Parcel Report for all Nominated Parcels (including map)

10. RELEASE

Please read each statement and check the corresponding boxes to indicate that you agree with the statement, then sign below in the provided space. Either the applicant or preparer may sign.	
✓	I acknowledge that all documents submitted will become public records under the California Public Records Act, and understand that the documents will be made available upon request to members of the public for inspection and copying.
✓	I acknowledge that all photographs and images submitted as part of this application will become the property of the City of Los Angeles, and understand that permission is granted for use of the photographs and images by the City without any expectation of compensation.
✓	I acknowledge that I have the right to submit or have obtained the appropriate permission to submit all information contained in this application.

4. ALTERATION HISTORY

Initial construction permits were filed for the Holmby Building in June 1929, and a certificate of occupancy for the building was issued in October that same year. Today, the property continues to function as a commercial building with a mix of professional and retail tenants. As a continuously operating commercial property, the building has housed a number of businesses over time, and building permits indicate that the majority of alterations undertaken in the years following the building's initial construction have been related to tenant improvements to individual interior office spaces, many of which have been reconfigured, as well as alterations to ground-floor commercial storefronts, all of which have been altered.

A partial list of building permits is included below and notes those alterations and additions which appear to have been the most comprehensive in nature, or involved work to the exterior of the building. Permits related to individual tenant improvements, storefront remodeling, and/or revisions to plans during the course of initial construction are not noted. Descriptions of work performed are included exactly as they appear in building permit records.

YEAR	PERMIT NUMBER	JOB ADDRESS	WORK PERFORMED	ARCHITECT	OWNER
1929	1929LA15075	921-931 Westwood	New Store & Dormitory	Gordon B. Kaufmann	Janss Investment Corp.
1932	1932LA10164	921-935 Westwood	[…] Change rooms 209 to 228 inclusive from dormitory to business college.	Gordon B. Kaufmann	Janss Investment Corp.

7. WRITTEN STATEMENTS

A. Proposed Monument Description

Exterior

The Holmby Building at 901-951 Westwood Boulevard is located on the west side of Westwood Boulevard, between Le Conte Avenue to the north and Weyburn Avenue to the south in the Westwood neighborhood of Los Angeles. The building occupies nearly all of the parcel and is set at the sidewalk on the north, east, and south. A surface parking lot adjoins the property to the west.

The Holmby Building was designed by architect Gordon B. Kaufmann in the Mediterranean Revival style and completed in 1929. The building is two and three stories in height and has a rectangular plan and complex massing consisting of multiple volumes. It is of concrete construction clad in smooth cement plaster and brick veneer, with a combination roof of clay tile and built-up roofing; the rear portion of the building has a flat roof with built-up roofing. All of the building's façades are asymmetrically composed; the building as a whole – which occupies the entire block – is designed to appear as a row of buildings in a Mediterranean village and is articulated as a series of five individual volumes, with each volume comprising a different segment of the building. The rear (west) façade of the building is unified by a blind arcade infilled with brick that extends the length of the façade. A number of secondary retail entrances are located on the rear façade; these are set either at grade or accessed via shallow steps. The entrances consist primarily of contemporary metal fully-glazed doors, some of which have transoms and sidelights. Fenestration on the rear façade consists of single and paired metal casement windows with divided lights, fixed metal windows with divided lights, and pierced screens.

The exterior of each of the five segments comprising the primary (east) façade fronting Westwood Boulevard is illustrated in the following diagram and described in detail below. The addresses noted for each segment represent street addresses visible from the public right-of-way.

Segment A (943-951 Westwood Boulevard/10907-10909 Weyburn Avenue)

Segment A comprises the southeastern corner of the building fronting the intersection of Westwood Boulevard and Weyburn Avenue. The segment is two stories in height and is anchored by a clock tower at the southeastern corner. The segment is clad in smooth cement plaster and has a combination roof with a flat roof with built-up roofing and hip and shed roofs of clay tile with boxed eaves and a cornice. There are three interior chimneys.

The southeastern corner of the building fronting the intersection is dominated by a tiered octagonal clock tower, which serves as the visual focal point of the Holmby Building. The lower tier of the tower features battered buttresses that rise to a stringcourse below decorative screens and a continuous corbeled balcony with a Venetian-style balustrade featuring trefoil arches on colonettes. The upper tier features four clock faces oriented in the cardinal directions and framed by pilasters supporting an entablature with dentil cornice, a parapet with eight octagonal finials, and a pyramidal spire. Fenestration on the clock tower consists of three recessed metal casement windows with molded surrounds, two of which are pedimented and supported by cast stone brackets. The southern side of the tower is also accented by a pierced screen.

Façades along Westwood Boulevard and Weyburn Avenue are asymmetrically composed, with the second story set back from the ground-floor storefronts above a pent roof with clay tile roofing and a continuous cornice. The segment's primary entrance is situated at the southeast corner at the base of the clock tower and is set at the sidewalk. It consists of a pair of fully-glazed metal doors sheltered by a projecting dentiled hood supported by metal posts. The entrance is flanked by two similarly hooded storefront windows at the base of the clock tower. Other ground-floor storefronts along the east and south façades consist of projecting bays with fully-glazed storefronts accented by metal posts. Fenestration at the second story consists of recessed contemporary metal casement windows and infill panels set within original molded surrounds, some with molded sills.

Segment B (937-941 Westwood Boulevard)

Segment B is situated immediately to the north of Segment A. The segment is two stories in height and is clad in smooth cement plaster. It has a side-gable roof of clay tile with overhanging open eaves, shaped rafter tails, and a cornice. There is one interior chimney. The primary (east) façade fronting Westwood Boulevard is asymmetrically composed; the ground-floor storefront consists of two pedestrian entrances with recessed entrance doors set within contemporary concrete surrounds flanking a fully-glazed metal storefront window with divided lights. Entrance doors are fully-glazed metal doors with divided lights and sidelights and metal hardware. The second story is defined by a band course and is composed of three bays with decorative panels separated by pilasters. Fenestration is recessed and consists of metal casement windows with divided lights.

Segment C (923-933 Westwood Boulevard)

Segment C is situated in the center of the block. The segment is two stories in height and is clad in smooth cement plaster. It has a combination roof with a flat roof of built-up roofing and a shed roof of clay tile with overhanging open eaves and shaped rafter tails. There are two interior chimneys. The

primary (east) façade fronting Westwood Boulevard is asymmetrically composed; the ground floor consists of five contemporary storefronts with fully-glazed metal doors flanked by storefront windows and topped by arched transoms. The second floor is defined by a recessed loggia (subsequently enclosed with glazing) which extends the full length of the segment. The loggia has a parapet with stylized Ionic columns supporting the overhanging shed roof.

Segment D (919-921 Westwood Boulevard)

Segment D is situated immediately north of segment C. The segment is three stories in height and is clad in heavily textured cement plaster. It has a hipped roof of clay tile with overhanging open eaves and shaped rafter tails. There is a penthouse situated at the southwestern corner. The primary (east) façade fronting Westwood Boulevard is asymmetrically composed; the ground-floor storefront consists of two pedestrian entrances with recessed entrance doors set within contemporary plaster surrounds flanking a central storefront window with a contemporary plaster surround and a pediment. Entrance doors are contemporary fully-glazed metal doors with sidelights and metal hardware, and the storefront window is a fully-glazed metal window with divided lights. A contemporary round window hangs above each pedestrian entrance. The upper stories are defined by string courses; composition of the second story is dominated by a central window surround consisting of pilasters topped by a pediment with a keystone. Fenestration at the second story consists of contemporary paired and single casement windows with surrounds. The third story is defined by a recessed triple-arch recessed loggia (subsequently enclosed with glazing) with stylized Ionic columns.

Segment E (901-911 Westwood Boulevard/10912-10914 Le Conte Avenue)

Segment E comprises the northeastern corner of the building fronting the intersection of Westwood Boulevard and Le Conte Avenue. The segment is two stories in height and is clad in brick masonry veneer, with an attic story clad in smooth cement plaster. The attic story has a cross-gabled roof with tight eaves and a cornice set behind a hipped roof with boxed eaves and a cornice. The primary (east and north) façades fronting Westwood Boulevard and Le Conte Avenue meet at a chamfered corner to the northeast and are asymmetrically composed, consisting of a series of storefront bays framed by rusticated piers. The building's primary entrance is situated at the chamfered corner and consists of a single entrance door set at the sidewalk. The primary entrance door is a contemporary fully-glazed metal door with a sidelight and transom set within a cast stone surround with a molded architrave and a transom light. A secondary entrance is situated on the north façade facing Le Conte Avenue in the easternmost bay, which is faced with stone. The entrance is set at the sidewalk and consists of a pair of fully-glazed contemporary metal doors with metal hardware.

Ground-floor storefronts within each bay consist of contemporary fully-glazed metal doors and storefront windows topped by a band course and a blind arch with a contemporary round window.

The second story is characterized by a continuous balcony with a metal railing which extends the full length of both façades and is supported by consoles. Fenestration at the second story is recessed and consists of French doors with divided lights and contemporary casement windows. Fenestration at the attic story is recessed within molded surrounds and consists primarily of contemporary awning-style

windows, along with a group of three original metal casement windows with divided lights at the northwestern corner along Le Conte Avenue.

Interiors

Building entrances at 941 Westwood (Segment B) and 921 Westwood (Segment D) open to common lobbies which provide access to offices located on the second floor of the Holmby Building. With the exception of the common lobby areas and second-floor hallways, the interior of the Holmby Building has been completely altered as a result of tenant improvements over time.

The entrance at 941 Westwood Boulevard opens to a lobby with terrazzo flooring, baseboards, and painted plaster walls. It has an open dog-leg staircase with a molded stringboard and metal handrail, baluster, and newel posts. An elevator is located at the rear of the lobby.

The entrance at 921 Westwood Boulevard opens to a lobby with contemporary terrazzo flooring, baseboards, and painted plaster walls. It has an open straight staircase with a stylized metal handrail and baluster. An elevator is located at the rear of the lobby.

The second-floor corridor is accessed via both lobbies and is double-loaded in plan with a central hall with carpeted flooring, baseboards, and painted walls. Ceilings are flat with crown molding or barrel-vaulted and finished in textured stucco. Interior doors appear to be contemporary and are primarily flush wood doors with transom panels and metal hardware.

Alterations

Exterior

While the Holmby Building has been subject to some alterations since initial construction was completed in 1929, on the whole the property remains intact. Subsequent exterior alterations have included the remodeling of all of the ground-floor storefronts and the removal of a portion of the original smooth cement plaster veneer through sandblasting. One interior chimney at the northern end of the building was removed. The clock tower was also remodeled and existing clock faces and windows were replaced and the original weathervane was removed. Existing upper-story loggias were enclosed with glazing. Some exterior decorative elements have also been removed, including decorative urns and finials, and some pierced screens have been replaced with new windows.

Original entrances have been altered and/or covered and original entrance doors have been replaced along the street-facing façades. Some existing door openings on the rear façade have also been filled in. The building's fenestration has also been subject to alterations over time, including the replacement of original windows and the resultant resizing and/or partial enclosure of original window openings; the enclosure of existing window and door openings on secondary façades; the removal of original window features such as shutters; and the introduction of new windows and/or new window surrounds.

Interior

Interior common areas of the Holmby Building are relatively modest and utilitarian and nature. Archival documentation associated with the development of the interior spaces over time is confined to the information included in building permit records; no archival photos of interior commercial spaces or common areas were identified as part of this study and, as a result, our understanding of baseline existing conditions at the time of original construction is limited. However, based on information included in building permit records as well as visual observation, it is clear that some alterations have been made to the interior of the Holmby Building. Ground-floor commercial storefront interiors have been completely altered; ground-floor interior common areas have been subject to some alterations undertaken in conjunction with tenant improvements. Interior lobbies at 941 Westwood (Segment B) and 921 Westwood (Segment D) have retained their original configurations and major elements, including the lobby staircases, but have been subject to changes in fixtures and finishes. Some finishes appear to date from the period of significance and may be original, including the flooring in the 941 Westwood lobby, but could not be confirmed without additional documentation. In addition, the existing elevator in the 921 Westwood lobby was replaced in 1949; an elevator was added to the 941 Westwood lobby at an unknown date.

The second floor of the Holmby Building has been subject to a number of alterations associated with tenant improvements. The double-loaded central corridor has retained its original configuration but dimensions have been altered due to the addition and/or relocation of interior partitions associated with the reconfiguration of original office spaces over time. Some original plaster moldings appear to remain extant but on the whole original fixtures and finishes appear to have been replaced.

Character-Defining Features

The Holmby Building retains significant exterior and interior character-defining features that reflect its original Mediterranean Revival design by architect Gordon B. Kaufmann and its association with the early development of Westwood Village.

Extant exterior character-defining features include the following:

- Rectangular plan and two- and three-story height with clock tower
- Zero setback along street-facing façades
- Complex massing consisting of multiple volumes
- Concrete construction clad in smooth cement plaster and painted brick veneer
- Combination roof with clay tile and built-up roofing
- Roof features including open overhanging eaves with shaped rafter tails, boxed eaves, cornices, interior chimneys, and penthouse
- Tiered octagonal clock tower with cast stone decorative accents, balcony, and pyramidal spire
- Asymmetrical façade composition articulated as a series of five individual volumes with ground-floor storefronts
- Recessed upper-story loggias with parapet walls and columns
- Projecting balcony with metal railing supported by consoles

- Decorative façade accents such as pilasters, string courses, belt courses, and pierced and decorative screens
- Primary entrances situated at the northeast and southeast corners and common office entrances at 921 Westwood and 941 Westwood
- Primary entrance surround at the northeast corner with molded architrave and transom
- Decorative window surrounds with molded details including sills, pediments, keystones, and decorative panels
- Fenestration including paired French doors with divided lights and paired metal casement windows with divided lights

Interior character-defining features also remain extant in the common areas of the building and include but may not be limited to the following:

- Configuration of common interior lobbies at 921 and 941 Westwood
- Double-loaded second-floor corridor
- Dog-leg and straight open staircases with metal handrails, balusters, and newel posts, some with stylized details
- Terrazzo flooring dating from the period of significance
- Plaster crown moldings

Integrity

Historic integrity is the ability of a property to convey its significance and is defined as the "authenticity of a property's historic identity, evidenced by the survival of physical characteristics that existed during the property's prehistoric or historic period."[1] The National Park Service defines seven aspects of integrity for historic resources. These are *location*, *design*, *setting*, *materials*, *workmanship*, *feeling*, and *association*. The integrity of the subject property is evaluated below based on these seven aspects.

The Holmby Building has undergone some alterations since initial construction was completed in 1929. However, despite these changes, a majority of the building's exterior and interior character-defining features remain intact and the property continues to reflect its original design by Gordon B. Kaufmann and its association with the early development of Westwood Village.

- Location: The subject property remains in its original location at 901-951 Westwood Boulevard in Westwood. Therefore, the property retains integrity of *location*.

[1] U. S. Department of the Interior, National Park Service, *National Register Bulletin 16A: How to Complete the National Register Nomination Form* (Washington, DC: 1997).

- Design: On the whole, despite some alterations over time, a number of the essential physical features reflecting the original Mediterranean Revival design and development of the subject property remain intact. These include but are not limited to its rectangular plan and complex massing; concrete construction; combination roof with multiple volumes; roof details including open overhanging eaves, shaped rafter tails, and interior chimneys; tiered octagonal clock tower; asymmetrical façade composition; upper-story recessed loggias and projecting balconies; decorative façade accents such as pilasters, string courses, belt courses, and screens; and decorative window and door surrounds. The National Park Service states that "a property important for association with an event, historical pattern, or person(s) ideally might retain *some* features of all seven aspects of integrity: location, design, setting, materials, workmanship, feeling, and association. Integrity of design and workmanship, however, might not be as important to the significance…A basic integrity test for a property associated with an important event or person is whether a historical contemporary would recognize the property as it exists today."[2] Although the building has undergone some alterations over time, it retains a majority of the character-defining features related to its development during the period of significance and would remain recognizable to the developers of Westwood during the 1920s. Therefore, the property retains integrity of *design*.
- Setting: Although some infill construction has been added over the years, many of the buildings constructed as part of the initial development of Westwood Village remain extant. Further, the character of more development efforts reflects a similar mix of functions and use on a similar scale, and the area has retained its historic identity as a mixed-use neighborhood commercial district. Thus, the property retains integrity of *setting*.
- Materials: The subject property retains a number of the materials related to its original construction. These include but are not limited to clay tile roofing, shaped wood rafter tails, smooth cement plaster and painted brick veneer, cast stone decorative accents and window surrounds, cast stone columns, paired French doors with divided lights, and metal casement windows with divided lights. Therefore, the property retains integrity of *materials*.
- Workmanship: As noted above in Design and Materials, the building retains the physical evidence of Mediterranean Revival-style commercial architecture in 1920s Los Angeles. Therefore, the building retains integrity of *workmanship*.
- Feeling: The property retains integrity of *location*, *design*, *setting*, *materials*, and *workmanship*, and thus continues to express the aesthetic sense of 1920s Mediterranean Revival commercial

[2] U. S. Department of the Interior, National Park Service, *National Register Bulletin 15: How to Apply the National Register Criteria for Evaluation*, by the staff of the National Register of Historic Places, finalized by Patrick W. Andrus, edited by Rebecca H. Shrimpton (Washington, DC: 1990; revised for Internet, 2002).

architecture, and the historic sense of early Westwood Village. Therefore, the building retains integrity of *feeling*.

- Association: The building retains integrity of *location*, *design*, *setting*, *materials*, *workmanship*, and *feeling*, and thus continues to express its direct and significant link to the early development of Westwood Village. Therefore, the property retains integrity of *association*.

The Holmby Building as a whole retains integrity of integrity of *location*, *design*, *setting*, *materials*, *workmanship*, and *feeling*, and as a result continues to convey its original historic identity and significance as a significant example of initial commercial development in Westwood Village and as an important example of the work of master architect Gordon B. Kaufmann.

B. Statement of Significance

The Holmby Building at 901-951 Westwood Boulevard meets the following criteria for designation as a Historic-Cultural Monument:

1. *Is identified with important events of national, state, or local history, or exemplifies significant contributions to the broad cultural, economic or social history of the nation, state, city or community;*

   Commissioned by the Janss Investment Corporation and designed by architect Gordon B. Kaufmann, the Holmby Building is significant for its association with the early development of Westwood and Westwood Village. Along with the Janss Dome, the Holmby Building was one of the first two buildings to be developed by the company in Westwood Village and was intended to define the character of development in the Village and serve as a model for subsequent construction efforts. The period of significance for the building under this criterion is 1929-1931; this period commences with the building's completion and concludes with the end of the first wave of development in Westwood Village, after which the Janss Corporation shifted their focus from the sale of property to the development of land.

3. *Embodies the distinctive characteristics of a style, type, period, or method of construction; or represents a notable work of a master designer, builder, or architect whose individual genius influenced his or her age.*

   The Holmby Building was designed by master architect Gordon B. Kaufmann and represents the earliest example of his work in Westwood Village. It is an excellent example of the Mediterranean Revival style and reflects the architectural standards developed by the Janss Investment Corporation to define the character of Westwood Village. The period of significance for the building under this criterion is 1929, the year the building was completed and opened to the public.

The Holmby Building was identified in 2015 through SurveyLA as eligible for state and local designation under Criteria A/1/1 as an excellent example of early commercial development in Westwood Village and for its association with the original development of Westwood by the Janss Corporation; the building was also identified under Criteria C/3/3 as an excellent example of

Mediterranean Revival commercial architecture in Westwood Village associated with the original development of Westwood by the Janss Corporation, and as the work of master architect Gordon B. Kaufmann.

Association with the Development of Westwood

Land Acquisition and Early Development

The land comprising present-day Westwood Village was first developed in the early 1800s as part of a Mexican land grant gifted to retiring Spanish soldier Jose Maximo Alanis by Governor Micheltorena. Alanis was farming the land as early as the 1820s but did not receive formal title to the land, which he called the Rancho San Jose de Buenos Ayres, until 1843.[3] The property encompassed 4,438 acres and was bordered by the foothills of the Santa Monica Mountains to the north, the boundary of the present-day City of Beverly Hills to the east, present-day Pico Boulevard to the south, and present-day Sepulveda Boulevard to the west.

Although Alanis eventually sold the land, it remained a working ranch through several changes in ownership. In 1852 Benjamin D. Wilson purchased half of the ranch for the bargain price of $662.75; growing inflation compelled Wilson to pay $16,000 for the other half of the ranch, which he bought six years later.[4] In 1884 the ranch was purchased by John Wolfskill, a rancher-turned-politician who purchased the property for ten dollars an acre. Three years later, during the height of the land boom, Wolfskill sold Rancho San Jose de Buenos Ayres to the Santa Monica Land and Water Company for one hundred dollars an acre.

In an effort to capitalize on the land boom, the Santa Monica Land and Water Company planned to subdivide the ranch and create a townsite called Sunset, whose boundaries included present-day Westwood Village. Eight hundred lots were platted for the town; planned development included the construction of a railroad line, a hotel at the corner of present-day Wilshire and Beverly Glen Boulevards, and a cemetery. Initially called the Sunset Cemetery, the burial grounds were established in the 1880s and now comprise a portion of the Pierce Brothers Westwood Village Memorial Park; the site stands today as the only extant example of development from the Town of Sunset. The Town of Sunset failed when the Santa Monica Land and Water Company went bankrupt, and in 1891 the Rancho San Jose de Buenos Ayres was returned through foreclosure proceedings to John Wolfskill, who resumed farming the land until his death in 1913.[5] Wolfskill sold off several smaller parcels of the ranch in the years before his death; however, the majority of the land remained intact. Upon his

[3] Marc Wanamaker, *Images of America: Westwood* (Charleston, SC: Arcadia Publishing, 2010), 7.
[4] Michael Gross, *Unreal Estate* (New York: Broadway Books, 2011), 42. Wilson was a prolific real estate developer who specialized in rancho land; he later went on to play an influential role in establishing the Indiana Colony, forerunner to the City of Pasadena.
[5] Wanamaker, 7.

death, John Wolfskill's ranch was the single most valuable property between Beverly Hills and the Pacific Ocean.[6]

The Wolfskill ranch remained undeveloped for several years. Wolfskill's heirs held out against prospective developers, believing that as high-end development pushed further westward their ranch land became more valuable.[7] Finally, in 1919, the Wolfskill family was approached by Arthur Letts. Letts was born in 1862 in Holdenby, Northamptonshire, England. Holdenby had been the Letts family seat for generations, and throughout his life Arthur Letts retained a deep affection for his birthplace. The parish of Holdenby was frequently referred to familiarly as Holmby, a name that would figure prominently in Letts's real estate dealings as he sought to honor his ancestral home.

As the second-eldest son, Arthur Letts knew that he would never inherit the family estate. After working as an apprentice in a dry goods store for three years, Letts departed for Quebec with his younger brother, Frank. With his previous retail experience, Letts found steady work in mercantile establishments, but over time he began to believe that America offered greater opportunities. Following a brief stint in the military, Letts decamped to Seattle after his discharge, where he worked in another store until it burned down in the citywide fire of 1889, "prompting him to pitch a tent nearby and open one of his own."[8] Letts had married Florence Philip in 1886, and the couple went on to have three children: Edna, Gladys, and Arthur, Jr.

In 1895 Arthur Letts relocated to Los Angeles, where his timing proved to be serendipitous. The J. A. Williams dry goods store at Fourth and Broadway had just gone bankrupt, and creditors had asked for a public auction of the store's stock. Letts sensed an opportunity; while at the time the Broadway was not located in the city's main business district, he believed that business activity would eventually expand in that direction.[9] His winning bid at the auction netted him the store's stock for just over half of its estimated value, and he renamed the business the Broadway Department Store.

Letts introduced many innovations with his new retail venture, and he found almost immediate success. The Letts family quickly joined the ranks of Los Angeles society, and both of the Letts daughters made particularly advantageous matches: Edna married Malcolm McNaghten, a Broadway Department Store executive, in 1912, and Gladys married Harold Janss, a real estate developer, in 1911. Within several years, Arthur Letts began to use his newfound wealth to dabble in real estate development. His independent access to his own significant capital gave him the edge over

consortiums of real estate developers who relied on shareholders or outside investors. Ultimately, Letts' wealth positioned him as uniquely qualified to acquire the Wolfskill Ranch.

> Over the six years since John Wolfskill's death, many suitors had approached his family, seeking to buy and subdivide what remained of Rancho San Jose de Buenos Ayres. But the Wolfskill heirs were "difficult to approach and hard to please," wrote Letts's biographer. "Besides, they wanted all cash." In 1919, in a lightning raid, Letts secured a deal for the land with a $500,000 certified check and a promise to pay three times that amount on transfer of title.[10]

Newspapers rejoiced in the acquisition, declaring that the "merchant prince" had provided the missing link in the chain of development from downtown Los Angeles to the Pacific Ocean. "The Wolfskill Ranch has long been the key to the city-to-sea development ambitions of Los Angeles," declared the *Los Angeles Times*. "Mr. Letts has never given a more convincing demonstration of his faith in Los Angeles and its future than in the purchase of this land domain standing between Los Angeles and its destiny. Just as he foresaw the vast growth in population of this city and section and built a business house to meet the needs of a city of a million, he has now looked ahead and visioned the progress of Los Angeles to the sea."[11]

Arthur Letts stated that he would immediately set about improving the tract, and made it clear that his plans included a substantial residential development.[12] The *Los Angeles Times* declared that the area was so primed for construction, the neighborhood could almost build itself. "Because of the natural slopes the homesite subdivisions will not interfere with nor detract from each other…Practically every acre of the land acquired by Mr. Letts is of a topographical fitness for residential subdivision."[13] In addition, the tract boasted two existing paved thoroughfares, Wilshire and Santa Monica Boulevards, as well as a third proposed route, Beverly Boulevard. The tract also claimed a Pacific Electric Railway line, an established natural gas main, and electricity and telephone connections. The only utility that remained to be installed was water; in that regard, the new development was seen as a solution to the problem of "aqueduct surplus" from Owens Valley.[14]

Although the *Times* heralded the imminent arrival of Letts's new subdivision, development activity did not begin until 1922. At some point in the interim, Arthur Letts transferred the Wolfskill acreage to

the Janss Investment Corporation, which was co-owned by his son-in-law, Harold Janss.[15] The transfer may have been a strategic move on Letts's part, as "the Janss company had been in the subdivision business in and around L.A. for two decades and had experience Letts lacked," notes Michael Gross.[16]

The Janss Investment Company

The Janss Investment Company was originally founded by Peter Janss, a Danish-born doctor who settled in Los Angeles with his family in 1893. Within several years, Peter Janss had begun to invest in real estate, focusing on the sale and subdivision of land.[17] He was soon joined by his brother, Herman Janss, who became a specialist in farmland, a move which allowed the business to expand.[18] The family operated under several business entities, including the Janss Company, the Janss Investment Corporation, and the Janss Investment Corporation.[19] In 1906, Peter Janss asked his son, Edwin – also a doctor – to move to Los Angeles and join the family business. Edwin's success in guiding the company through the economic troubles that resulted from the Panic of 1907 convinced him to give up medicine for business.[20] Edwin's younger brother, Harold, soon quit college to join the family business.

By 1911, the company recorded revenues of $1.5 million dollars.[21] Over time, the firm became perhaps the largest developer of residential real estate in southern California, platting nearly 100,000 acres by 1929.[22] Richard Longstreth credits several factors for the family's success.

> The company's growth stemmed from atypical practices. The tracts purchased were unusually large – Belvedere Heights had 6,000 lots – they were improved by the company in short order, and the selling price was low. Through one of the most aggressive newspaper advertising campaigns in Los Angeles, Janss sold lots fast – 1,000 in Belvedere Gardens in the first ten months. The benefits derived from this economy of scale were targeted to the lower-middle and prosperous working classes, who found the quality of the sites and prospects for quick growth of a full-fledged residential area

[15] Gross, 121. Historian Michael Gross gives the date of the transfer as 1920; although most historical accounts claim that Letts sold all of the Wolfskill property south of Wilshire Boulevard to the Janss interests in 1922 and the remainder of the property soon after, Gross notes that deed records indicate that Letts retained a stake in the land, while letting the Janss family oversee its development. See also Gross, 123. A. H. Wilkins, former sales manager for Janss, later recalled that the brothers purchased the land in parcels from Letts, starting at Pico and working north. See "Down Memory Lane in Westwood: Pioneer A. H. Wilkins Recalls Dynamic History of 'Village'," *West Los Angeles Citizen*, January 10, 1963.

> appealing. Much like those of the Los Angeles Investment Company, Janss's undertakings could reach epic proportions because of capital derived from an army of shareholders (25,000 in 1922).[23]

Further incentives were offered to prospective working-class homebuyers in the form of low down payments, which were accompanied by installment plans costing families as little as five dollars a month. As a result, by the time the Jansses assumed control of the Letts tract, they had already become well-known for developing some of the region's largest and most significant subdivisions, including Belvedere Gardens (now known as Boyle Heights), Belvedere Heights, Ramona Acres (now known as Monterey Park), Sierra Park, Yorba Linda, and the 47,000-acre Van Nuys-Lankershim ranch.

Development of Westwood

According Longstreth, the Jansses began to develop the Letts tract in much the same way as they had with earlier ventures: making basic improvements to, then feverishly promoting, land subdivisions. "No comprehensive plan was prepared, nor was the final product envisioned as a distinct community … Indeed, there was little cohesiveness to the whole."[24] This may have been due in part to the piecemeal fashion in which the brothers acquired the land from Letts;[25] however, as Longstreth acknowledges, the company's tendency to secrecy makes an analysis of their plans difficult, as "the company seldom revealed its intentions except on a piecemeal basis when the sale of property was about to commence."[26] In October 1922 the *Los Angeles Times* announced the first subdivision of the tract along with the opening of the Westwood unit.[27] The original Westwood unit was bounded by Santa Monica Boulevard to the north, Beverly Glen Boulevard to the east, Pico Boulevard to the south, and Sepulveda Boulevard to the west.[28] "While this is not the largest project, in point of acreage, handled by the Janss Investment Corporation, it will exceed, in retail value, by several millions of dollars any subdivision activity heretofore undertaken," reported the *Times*.[29] Although the subdivision was intended to be largely residential, provisions had also been made for commercial development along Santa Monica and Westwood Boulevards. In an effort to entice motion picture studios to relocate to the area, Janss dubbed the development "the Second Hollywood," where, it was hoped, a business center could be developed "similar in scale and function to the burgeoning one on Hollywood

Boulevard."[30] Several commercial buildings were constructed along Santa Monica Boulevard;[31] however, as Longstreth notes, "little came of the effort. Among the problems was the bisection of Santa Monica Boulevard by a Pacific Electric car line, whose more even grade imposed physical as well as psychological barriers to motorists. A decade after the scheme was launched, most of the frontage remained vacant."[32]

Commercial activity in Westwood languished for several years after the opening of the tract, prompting Richard Longstreth to observe that "even with considerable resources at one's command and an attractive general location for business, an outlying center could not be willed into existence."[33] The stimulus for further economic development would not arrive until 1925, when it was announced that the University of California would establish its new Southern Branch campus in Westwood.[34] The University's commitment to build in Westwood was a hard-won success for the Janss brothers, who had campaigned vigorously along with sixteen other communities including Burbank, Fullerton, Palos Verdes, and Pasadena.[35] At the time, "the university was seen as a major stimulus to surrounding development," writes Richard Longstreth, "attracting not just faculty but many persons of means who believed proximity to an institution of higher learning enhanced land values."[36] Harold and Edwin Janss saw things more plainly: "There was no reason to move there," a Janss descendant later recalled, "so [their] concept was that the university would create jobs and be the basis for a community."[37]

Recognizing the value that the presence of the university would add to their development plans for Westwood, Harold and Edwin Janss told university officials that they would work with them "in every way to promote the development of a University campus and any territory around it so that any and all objectionable features would be eliminated."[38] As a further incentive, the Janss Investment Corporation offered to sell the Westwood land comprising the proposed site of the campus to the University at a price which was substantially below market value. Although the Janss brothers' loss on the sale of the land numbered in the millions of dollars, their gamble paid off.

> At 3 o'clock in the afternoon of March 21, 1925, Robert Sproul, then vice-president and comptroller for the University, announced at Berkeley the choice was Westwood…By five o'clock that same afternoon L.A. papers had extras out, and the

> next day thousands of Angelenos came out to see what was this "Westwood." [Janss executives] were ready for them with picnics.[39]

The Janss Investment Corporation sold more than $600,000 in homesites in the first twenty-four hours following the announcement. The company immediately opened a second unit of the subdivision up for sale south of Wilshire Boulevard; it sold out within forty-eight hours. Within four days of the announcement, Janss had sold roughly 275 lots totaling $1,000,000 – what the company had previously been making per month for the last year.[40]

Development of Westwood Village

Edwin and Harold Janss realized that the assured expansion of the surrounding suburbs along with the projected enrollment of the University – 6,000 students – would necessitate a more developed commercial district than the efforts previously attempted in Westwood. This time, the Janss brothers envisioned a business district – dubbed Westwood Village - that would be accessible to students while simultaneously creating the destination shopping center and "Second Hollywood" of which they had dreamed. Indeed, "the target audience comprised residents not only of surrounding tracts created by the same developer, but also of communities further afield."[41] However, as Richard Longstreth writes, "The Santa Monica Boulevard fiasco no doubt contributed to taking an entirely different approach: the second attempt to rival Hollywood was carefully planned."[42] Therefore, before construction commenced on Westwood Village, the Janss Investment Corporation spent the next three years conducting a detailed survey of newly-constructed commercial centers "that were considered premier examples of their kind in other parts of the country."[43] Although the methodology for their survey and research is unclear, "in all likelihood it included early examples of integrated complexes and perhaps other cases where an individual or firm played the dominant role in advancing development."[44]

Several key factors were emphasized in the Janss Investment Corporation's strategic pre-development planning of the Westwood Village site: siting, circulation, and accessibility; design and architecture; and commercial and business development. The Jansses hired noted urban planner Harland Bartholomew, as well as Bartholomew's former employee L. Deming Tilton, to assist them in the planning of Westwood Village. Bartholomew became the nation's first full-time city planner in 1914, when he

went to work for the City of Newark.[45] He became well-known for introducing the concept of comprehensive planning, which focused on transportation and circulation in response to the population's growing dependence on and enthusiasm for the automobile. Over the course of his career, he prepared comprehensive plans for more than 500 cities and counties and also developed zoning ordinances for cities, counties, and states. Tilton, who relocated to Santa Barbara after working at Harland Bartholomew & Associates, was named Santa Barbara County's first planning director; he was active in the reconstruction of the Santa Barbara town center following the 1925 earthquake.

Bartholomew and Tilton worked in partnership with Gordon Whitnall, director of the Los Angeles City Planning Department, to develop the plan for Westwood Village. The site selected for the development was bounded by the University entrance at Le Conte Avenue to the north and Wilshire Boulevard to the south. Wilshire Boulevard was already a well-established thoroughfare connecting nearby Beverly Hills to Los Angeles; as a result, from the start accessibility was deemed of paramount importance to the site.[46] In order to avoid further traffic congestion, commercial development was excluded from the properties fronting Wilshire Boulevard. The area was bisected by Westwood Boulevard, the principal north-south route connecting Wilshire Boulevard to Le Conte Avenue. Since Westwood Boulevard terminated at Le Conte Avenue, the arrangement limited through traffic. Within the Village, Bartholomew and Tilton adopted a unique layout which addressed traffic issues as well as real estate concerns.

> Vehicular circulation would be diffuse because Westwood Boulevard was one of an irregular grouping of streets laid out to facilitate flow in a more or less equal measure. Westwood Village stood in sharp contrast to Hollywood or the Miracle Mile in having a minimal hierarchy of streets, but it was equally dissimilar to Palos Verdes, Tyrone, or Market Square in having no clearly identified center – no plaza, no green, no singular focal point of any kind. Beyond enhancing the movement of automobiles, this arrangement maximized property values throughout the complex by having all frontage seem desirable to merchants and customers alike.[47]

Frontage was one of the few characteristics indicated on the tract map filed in December 1927 for Tract No. 9768, which would comprise Westwood Village. In an effort to maintain flexibility and appeal, no lots were platted in the original layout; instead, Janss worked with commercial clients individually to determine the lot size and configuration best suited to their particular needs. At the

time, a prospective entrepreneur had two options: one could purchase the land and assume responsibility for construction according to Janss design guidelines, or one could contract with Janss to have the company develop their chosen property to their requirements, after which it would be leased to them. This was likely the preferred option, as Edwin Janss later stated, "We felt that the usual speculative buyers would not carry out the plans the company had envisioned for Westwood Village."[48]

In order to safeguard against overly rapid growth, Janss implemented the development plan for Westwood Village incrementally. Rather than develop the entire commercial district at once, buildings were constructed several units at a time, "at a pace that must have seemed snaillike compared to conventional speculative practice," remarks Richard Longstreth.[49] However, because it was based on a site plan and guidelines for growth, not on a design per se, this approach also made it easier to respond to changes in market conditions over time.[50]

Market conditions played a significant role in determining the initial mix of businesses included in Westwood Village, which was as significant – if not more so – than its design. A variety of operations were made possible – and, indeed, desirable – due to the diversity of the surrounding market. Thousands of students and others with relatively modest disposable incomes lived nearby, as did more prosperous contingents in the Janss Investment Corporation's own tracts; the surrounding upscale communities of Brentwood, Pacific Palisades, Santa Monica, Beverly Hills, and West Hollywood were also among the target demographic.[51] Janss took a long view towards the overall development of the Village, however, and strategized accordingly. Paralleling the policy to develop the complex at a gradual, more or less even pace was one that kept leading stores at a modest initial scale so that trade would hinge on an assemblage of well-known outlets, rather than on a single, enormous one.[52] It was this mix that set Westwood Village apart from other commercial developments.

> In contrast to other shopping centers developed during the interwar decades, Westwood Village was conceived from the start as a home for numerous branches of leading downtown stores…Yet other stores catered to routine needs… [and] finally, there was a broad spectrum of independent specialty stores, some relocated from the precinct near the university's previous campus on Vermont Avenue, others newly established. The array of retail establishments was matched by few outlying centers prior to World War II, and made Westwood Village competitive locally with

> Hollywood and the Miracle Mile. But unlike the latter development, which was mainly a focus for retail and personal services, Westwood Village addressed a wider range of consumer needs.[53]

Although the goal was to eventually house several hundred businesses, Janss announced that only two or three dozen establishments would be included in the initial group. Moreover, only one establishment purveying a given type of goods or service would be allowed to operate at first.[54] Competing stores would be added according to market demand – a determination that would be made only through careful study. While new businesses were allowed, the relocation of existing businesses – already familiar to students at the university's Vermont Avenue campus – was also encouraged. The Janss brothers recognized the advantage of an already-established economy and offered free rent in Westwood Village to encourage campus retailers to relocate.[55]

Janss announced the development of Westwood Village in December 1927, and planning continued through 1928. True to form, the company continued to publicize additional details in a piecemeal fashion to heighten anticipation. "Store locations will be restricted to one and in a few instances two merchants in each line of business for the first school semester at least in order that a complete service may be given shoppers from the outset," teased the *Los Angeles Times* in May 1928. "Sales Director A. Harold Wilkins said that requests for shop locations have been already received from many of the largest and most successful merchandisers on the Coast with several from concerns which have operated exclusively in the San Francisco area."[56] The *Times* may have understated the matter in this instance: the limitations served to fuel demand by prospective retailers, as did the knowledge of the ready-made customer base that awaited them upon the opening of the University. The Janss Investment Corporation reportedly received so many offers from prospective businesses the entire complex could have been built in a single campaign had Janss so chosen.[57]

The public received its first glimpse of the company's vision for the business district in July 1928, when the Janss Investment Corporation hosted a "Magic City Exposition."[58] The exhibition featured a number of model homes, which were available for inspection, as well as a miniature village which depicted the future plan for Westwood Village and "the unique features planned." The exhibition remained open throughout the summer, and the model Westwood Village was updated accordingly as

plans progressed, adding miniature versions of the first two buildings to be erected. By the time the showcase closed in September, the *Los Angeles Times* noted that "one of the features of the exhibit which has proven unusually interesting to visitors is the first complete plan of the new university business village. The village, planned to be one of the most beautiful and complete community business centers in America, has been attracting wide attention in city planning centers."[59]

Once the initial mix of tenants had been established, a second tract map was filed in March 1929 for Tract No. 10600 detailing the first subdivision of the Village into parcels for individual buildings. The company had exercised tremendous leverage in the commercial composition of the site, selecting not only the merchants that would be included in the initial development, but their location as well. Businesses were initially placed along Westwood Boulevard in order to achieve a critical mass along the Village's main thoroughfare, but some parcels were left vacant for "complementary" establishments to be added later.[60] Around this time, the Janss Investment Company announced the establishment of its Business Research Department, which was billed as "an added service to prospective investors and store owners" that "engaged in preparing data relative to the commercial prospects of the various types of business needed in the Village area."[61] The department, however, also benefitted Janss: its study of growth, demand, and market conditions assisted the company in its strategic implementation of the plan for Westwood Village.

In order to set the tone for the design of Westwood Village, the first two units to be constructed – the buildings which had been memorialized in the model village – were developed by the Janss Investment Corporation itself.[62] Both buildings occupied prominent locations with significant frontage along Westwood Boulevard; situated at strategic intersections, they marked the unofficial boundaries of the initial phase of development. Construction commenced first on the Janss Building, designed by campus architects Allison & Rible, which occupied a triangular parcel in the heart of the Village at the intersection of Westwood Boulevard and Broxton and Kinross Avenues and served as both the physical and operational nexus of the Village. The second unit to be developed by Janss was the Holmby Building, which was designed by Gordon B. Kaufmann.

Several months after construction began in Westwood Village, the University of California's Southern Branch campus (now known as the University of California, Los Angeles) officially opened in September 1929. Although Janss officials had estimated that construction of the initial development within the Village would be finished by that time, most Village businesses were not yet open and

buildings had not yet been completed. However, the Janss Investment Corporation made sure the Village was open to visitors in order to drive interest; the company reported that nearly 10,000 people visited the site in the month of August, in advance of the opening of the campus.[63] Several smaller businesses did open in September; however, the grand openings for larger operations took place in November 1929. Among the first businesses to launch then were the Ralphs grocery store – also one of the first commercial lots to be sold – the Janss Building, and the Safeway market.[64] Once construction was completed, the turnaround was swift, and over twenty businesses were opened by the end of November.[65] That same month, Janss also announced the construction of the Village's first department store, Desmond's, and declared that with its opening "Westwood Village will have obtained the basic shopping requirements of a complete merchandising center."[66] Smaller retail operations continued to launch throughout the following year.

Although Westwood Village opened on the eve of the stock market crash of 1929, its development remained largely unaffected by the ensuing economic downfall. Indeed, a *Los Angeles Times* writer asserted years later that the Depression "turned out to be the best thing ever for the Village," as it eliminated the prospect of speculative developers.[67] While construction may have slowed, it did not halt; within five months of opening, Westwood Village had grown to include more than fifty businesses, with at times as many as nine stores opening per week.[68] As development progressed, Janss continued to emphasize the principles of planning and incremental growth which had characterized the initial design of the Village. Care was taken to situate larger department stores, which were more likely to require additional space in the future, next to adjacent vacant parcels so the stores could expand as market conditions warranted.[69] Gas stations were strategically located to serve the motoring public as well as function as landmarks for the Village. Indeed, a promotional brochure for the Village published around 1940 declared, "It's a relatively short drive from anywhere. Just watch for the towers."[70] Service stations were placed at intersections along Westwood Boulevard and marked with towers emblazoned with the logo of each station, which served as a visual guide to orient shoppers within the precinct.[71]

Around 1930, the Westwood Village Business Association was formed to sponsor group advertising, coordinate merchandising events, and stage street festivals – all to enhance customer draw.[72] The response was such that in 1931 the Janss Investment Corporation relocated its main office from the company's former downtown site to its headquarters in Westwood Village. Most operations now focused on the development of land rather than the sale of property – a complete reversal in practice from only three years previous.[73] By 1934, there were 172 businesses in the Village; a number which continued to grow as the United States emerged from the Depression: just two years later, 225 businesses were counted.[74]

Perhaps the most significant indicator of the growth of Westwood Village comes in a comparison of its statistics in the first ten years of operation. Although the commercial district was launched in 1929 with just 34 establishments, by 1939 the Village included 452 offices and stores – an increase of over thirteen hundred percent, which was achieved during the nation's greatest economic depression to date.[75] Over 1,700 people were employed in the Village, and the total improvement in the area to date was estimated to be $72,000,000.[76]

By 1945, Westwood Village was "pretty much sold out," Janss director A. H. Wilkins recalled in later years.[77] Initial development in the Village had been primarily concentrated in those blocks along Westwood Boulevard and Le Conte and Weyburn Avenues closest to the adjacent campus. However, in subsequent years construction activity expanded south along Westwood Boulevard and then eastward and westward to the surrounding streets as the Village began to gain in popularity as a commercial district independent of campus life.

The Janss Investment Company continued to retain control of the development of Westwood Village in the years following World War II. By the mid-1950s, however, the Edwin and Harold Janss – who had worked side by side in the operation of the Janss Investment Corporation for nearly fifty years – wanted to go their separate ways. Harold Janss decided to leave the company, and the two brothers divided their remaining company assets in half, with Harold assuming control of Westwood Village and Edwin keeping the family ranch in the Coachella Valley.[78] Both men retired from the Janss Investment Corporation.

[78] Gross, 164.

Harold Janss subsequently began to divest himself of his interests in Westwood Village; in 1954 the Janss Investment Company headquarters, which had long been known as simply "The Dome," were sold to the Bank of America for nearly one million dollars.[79] That same year he transferred the remaining Westwood Village properties to George Gregson, a Janss Investment Corporation executive who had married Edwin Janss's daughter, Patricia. In 1955, George Gregson sold the Westwood Village holdings to hotelier and real estate developer Arnold Kirkeby for $6,500,000. The purchase, which was noted by the *Los Angeles Times* as "one of the largest real estate deals in Los Angeles in some time," included twenty buildings with fifty stores, an office structure, a garage, and fourteen parking lots. A filling station was the sole property retained by Gregson.[80] The twenty buildings now belonging to Kirkeby represented some of the Village's most prominent commercial operations, with tenants including Sears, Fedway Department Stores, Desmond's, A&P, Safeway, J. J. Newberry, J. C. Penney, and Barker Brothers.

Architecture in Westwood Village

While the development process within the Village may have been somewhat flexible, the design guidelines were decidedly less so. Adopted by the Janss Investment Corporation to ensure some measure of control over land in which they did not retain ownership, the design guidelines for Westwood Village ensured that the identity of the Village was one of a cohesive, unified complex. Oversight was provided by a company-appointed Board of Architectural Supervisors, which was charged with approving all building proposals. The guidelines were comprehensive in nature and included recommendations for all aspects of planning and construction.

> Building fronts had to be at least seventeen feet high, but no more than two or three stories – probably to avoid overconcentration of business in any one part as well as to avoid discordant streetscapes. At the same time, some buildings situated at strategic points in the complex could incorporate towers…Strict control was exercised over details, including signs. Oversight did not stop when construction was completed; all alter external changes to buildings came under the same scrutiny.[81]

Other guidelines established for building exteriors allowed architects to work with a "loosely defined spectrum of historical sources associated with Mediterranean Europe"[82] which would complement the Italian and Romanesque architecture of the adjacent university campus. These styles were popularized during the 1920s, when "just as everything grew in the Southern California garden, so too did every

architectural tradition take hold as well," historian Kevin Starr observed.[83] As the focus on regional expression through architecture evolved, Mediterranean Revival and Spanish Colonial Revival examples prevailed; "here were two styles supported by the regional myth of California as the Mediterranean shores of America and even, in the case of Spanish Revival, supported by a slight degree of historical justification."[84] By the mid-1920s, the Spanish Colonial Revival style had become the style considered to be most representative of Southern California.[85] The historical architecture of the Mediterranean region also lent itself to able translation across a wide variety of building types, and its popularity was due in part to the fact that historical examples could easily be adopted for any need.

> Traveling through Andalusia, aspiring architects such as Austin Whittlesey…noted with delight the rich courtyard types and structures – the urban patio house, the fortified urban palace or *alcazar* (many of them later recycled as apartment dwellings), the snug courtyard inns… the open marketplaces and monastery cloisters, the farmhouses combining living quarters and workspaces around a central courtyard…As Santa Barbara and San Clemente showed, many of these forms were directly applicable to Southern California, albeit the courtyard format was now being used for city halls and courthouses, public high schools, hotels, restaurants, and…bungalow courts.[86]

Architects of the period were well-versed in these historicist styles, and Westwood Village stood out for its association with several leading practitioners. Virtually all shopping centers conceived during the 1920s were the product of a single team of collaborating designers. Janss, on the other hand, appears to have sought the involvement of numerous prominent architects and architectural firms for Westwood Village; participating architects included Allison & Allison; Gordon Kaufmann; Morgan, Walls & Clements; Parkinson and Parkinson; S. Charles Lee; and Paul Revere Williams.[87] "Variety in form, detail, and character was encouraged," writes Richard Longstreth. The result, he observes, was "a showcase of stylish, historicizing commercial architecture, rivaled in its extent by few places nationwide."[88] The overall effect was intended to suggest a "village" rather than a city; the area would be cohesive and meet an unusually high architectural standard.[89] Early units were designed to

resemble a series of smaller buildings constructed at different times.[90] The Village's character would resemble that of the natural, incremental development of a Mediterranean village over many years.

The Holmby Building

The Holmby Building was one of the first two buildings to be developed by the Janss Investment Corporation in Westwood Village, and one of the first commercial buildings to open in the Village. Along with the Janss company headquarters, the design and construction of the Holmby Building was intended to define the character of Westwood Village and serve as a model for subsequent development. The Janss brothers commissioned master architect Gordon B. Kaufmann to design the Mediterranean Revival-style building, which occupied the westerly side of the 900 block of Westwood Boulevard and extended north from Weyburn Avenue to Le Conte Avenue. The building's location at the entrance to the university campus made it a focal point of student interaction with the commercial operations of Westwood Village.

Kaufmann's design for the three-story Holmby Building created one of the earliest mixed-use developments in Westwood Village. The ground floor was composed of commercial storefronts, which were primarily leased by small retail operations; the upper floors included office space as well as dormitory facilities – an important consideration in the early days of UCLA, when housing space for students was in short supply. The inclusion of the dormitory facilities, which were known as Holmby Hall, highlights the evolving character of Westwood Village over time: dormitories and residential income properties were initially considered to be a significant part of the development of Westwood Village, although the area is now more closely associated with its commercial identity. While technically located off-campus, Holmby Hall served as the first women's dormitory for the University.[91]

Construction of the Holmby Building was announced in April 1929, and the building was opened to the public in November that same year.[92] At the time the Holmby Building was one of only two commercial blocks included in the initial development of Westwood Village, the other being the Janss Investment Corporation headquarters. Between the two buildings, there were thirty commercial spaces available for lease to potential tenants.[93] One of the earliest tenants of the Holmby Building was the Weaver-Jackson Company, a prominent beauty supply company which operated a chain of salons. The company signed a ten-year lease on a storefront in the building at 915 Westwood Boulevard and

[90] Richard Longstreth notes that this treatment was likely directed by L. Deming Tilton, who had overseen a similar building campaign in Santa Barbara, where the city also adopted design guidelines on appearance. See Longstreth, *City Center to Regional Mall*, 166.

opened the popular Weaver-Jackson Beauty Shop.[94] Another early operation was the Albert Sheetz Mission Candy Company, which opened its twenty-fifth store in the Holmby Building at 937 Westwood Boulevard in 1931. The company's Westwood Village location was the largest of the chain, and included a private banquet room.[95]

By 1932, the Westwood Village directory listing for the Holmby Building noted the kind of representative assortment of retailers which the Janss brothers had hoped to achieve in Westwood Village. The building's tenants included a bookseller, barber shop, and dry cleaner, as well as a variety of clothing and accessory, gift, and décor shops. The southern end of the complex was anchored by the Janss Pharmacy, which was operated by Marlowe C. Janss. The Janss pharmacy was later replaced by the Westwood Drugstore, which remained in operation until the 1980s.[96]

However, while retail operations remained strong, changes were underway for the upper floors of the Holmby Building. In 1932, the Sawyer School of Business, "one of the oldest and most prominent business colleges in Southern California," announced plans to open a branch school in Westwood Village. In doing so, the company signed a ten-year lease to occupy roughly two-thirds of the second floor of the Holmby Building.[97] Building permit records indicate that at least a portion of the dormitory space on the second floor was converted for occupation by the business school; Gordon Kaufmann returned to design the alterations. The following year, the Sawyer School of Business acquired an additional 6,000 square feet of space in the building; in total, their occupancy accounted for more than half of the space in the entire building.[98] The school remained in operation at the site through the early 1940s.

Over time, original businesses in the Holmby Building closed, and storefronts were subsequently altered to meet the needs of incoming tenants. Since its opening in 1929, however, the Holmby Building has housed a variety of retail establishments and other commercial operations which serve the community, a trend which continues to this day.

Mediterranean Revival Architecture

The Holmby Building is an excellent example of Mediterranean Revival commercial architecture. The Mediterranean Revival style is distinguished by its eclectic mix of architectural elements from several regions around the Mediterranean Sea, including Spain, Italy, southern France, and North Africa. Much of the American architecture of the late 19th and early 20th centuries can be broadly classified as

ultimately Mediterranean in origin, including the Beaux Arts, Mission Revival, Spanish Colonial Revival, and Italian Renaissance Revival styles. By the 1920s, the lines between these individual styles were frequently blurred and their distinguishing characteristics blended by architects who drew inspiration from throughout the Mediterranean region. These imaginative combinations of details from varied architectural traditions resulted in the emergence of a distinct Mediterranean Revival style.

In contrast to the more academic and more literal interpretations such as the Andalusian-influenced Spanish Colonial Revival style or the restrained, dignified Italian Renaissance Revival style, the broader Mediterranean Revival frequently incorporated elements of Italian and Spanish Renaissance, Provençal, Venetian Gothic, and Moorish architecture into otherwise Spanish Colonial Revival designs. The Mediterranean Revival style is sometimes more formal and usually more elaborately composed and ornamented than the simpler, more rustic Spanish Colonial Revival style, and often more flamboyant than the sober Italian Renaissance Revival style. Typical features of the Mediterranean Revival style include arched entrance doorways with richly detailed surrounds; arcades and loggias; stairways and terraces with cast stone balustrades; and Classical decorative elements in cast stone or plaster, including architraves, stringcourses, cornices, pilasters, columns, and quoins.

Character-defining features of the Mediterranean Revival style include:

- Frequently symmetrical façade
- Rectangular plan and two-story height
- Hipped roof with clay barrel tiles and wide boxed or bracketed eaves, or eave cornice
- Exterior walls veneered in smooth plaster
- Wood-sash casement windows, typically with divided lights; sometimes double-hung windows; Palladian windows or other accent windows
- Arched door or window openings
- Elaborate door surrounds
- Arcades, colonnades, or loggias
- Terraces and stairs with cast stone balustrades
- Cast stone or plaster decorative elements including architraves, stringcourses, cornices, pilasters, columns, and quoins
- Decorative grilles of wood, wrought iron, or plaster
- Balconies, patios or towers
- Decorative terra cotta or glazed ceramic tile work

Association with Gordon B. Kaufmann

Gordon Bernie Kaufmann (1888-1949) was one of the most significant and versatile architects practicing in Southern California in the first half of the 20th century. Born in London, England in 1888, Kaufmann studied at the London Polytechnic and the Royal College of Art before immigrating to Canada about 1910. There he met and married his wife Eva, whose delicate health precipitated the family's move to Los Angeles in 1914. In 1916 Kaufmann was working as a draftsman in the office of Pasadena architect Reginald Johnson, and by 1920 he was Johnson's associate.[99] In 1922 Johnson and Kaufmann partnered with architect Roland E. Coate, Sr. in the firm of Johnson, Kaufmann and Coate, which designed All Saints Episcopal Church in Pasadena (1923) and St. Paul's Episcopal Cathedral in Los Angeles (1924) as well as a number of large houses in the Spanish Colonial and Mediterranean Revival styles.[100]

Kaufmann left the firm and formed his own practice in 1924, quickly establishing a reputation as one of Southern California's leading residential designers. He designed Greystone (1926), the Beverly Hills mansion of oil heir Edward Doheny, Jr., one of the grandest estates in the Los Angeles area, and won an American Institute of Architects (AIA) award in 1926 for his design of the Eisner residence, a Mediterranean Revival villa planned around three courtyards.[101] His residential designs in the "Californian" style, a personal interpretation of Mediterranean villas, were informal and closely related to their lavishly landscaped exteriors, and yet still managed to convey a sense of the grandeur of their more formal Italian and Spanish prototypes. Kaufmann incorporated this distinctive style into his designs for larger, non-residential commissions such as the Scripps College for Women in Claremont (1926), the La Quinta Inn near Indio (1927), and the Athenaeum at the California Institute of Technology (Caltech) in Pasadena (1930).[102]

Kaufmann's body of work follows stylistic patterns distinctive to Southern California where the Spanish Colonial, Mediterranean and period revival styles of the 1920s shifted towards the Art Deco, Streamline Moderne, and Modern styles in the 1930s and 1940s. This trend is reflected in Kaufmann's designs for the *Times Mirror* Press building (1931) in downtown Los Angeles; the monumental *Los Angeles Times* building (1931-35), the chief oeuvre of his career; Boulder Dam (1931-36) on the Colorado River; the Santa Anita Park racetrack in Arcadia (1934); the Earl Carroll Theatre (1938) and Palladium nightclub (1940), both in Hollywood; and the Park La Brea apartments

in Los Angeles (consulting architect with J.E. Stanton, 1948). Kauffman was awarded the Legion of Merit for his service with the U.S. Army Chemical Warfare Division from 1942-45.[103]

Kaufmann's reputation as an architect earned him leading roles in the Fine Arts Alliance[104] and the Construction League of California, the latter position affording him opportunity to weigh in on recommendations to establish California's Uniform Building Code.[105] With a portfolio of such breadth in building types and styles, Kaufmann proved himself an architect of unique distinction. He died in Los Angeles in 1949 at the age of 60.[106]

Conclusion

The Holmby Building has a rich and distinctive history, representing important cultural associations and architectural achievement in Los Angeles. The building is significant for its association with the initial development of Westwood and Westwood Village; as an excellent example of Mediterranean Revival commercial architecture in Los Angeles; and as the work of master architect Gordon B. Kaufmann.

In addition to fulfilling the criteria for significance, the building has retained integrity of *location*, *design*, *setting*, *materials*, *workmanship*, *feeling*, and *association* and continues to exhibit a number of character-defining features dating from the period of significance. For these reasons, the property is eligible for designation as a Los Angeles Historic-Cultural Monument.

Arthur M. Letts -- Holmby House

Born in Holdenby, England, Arthur Letts (1862-1923) was one of ten children (four boys, six girls) born on the Letts estate, which dated back 400 years. At 16, Arthur was sent to apprentice at a dry goods store for three years, a trade which he no doubt learned very well. During his work he and younger brother Frank became enamored of opportunities they'd heard of in America. As the second son, he would not inherit the estate, so in July, 1883, two years after serving his apprenticeship, he and Frank embarked for Quebec, only notifying parents Richard and Caroline AFTER they'd boarded the steamer.

His first work in Canada was on a farm near Toronto, but Arthur was not cut out for manual labor. He moved on to Toronto proper, working in a large mercantile store, and volunteered for the Queen's Own Rifles, fighting in the Battle of Cut Knife Creek. In 1886, he married Florence Philp (1868-1944), with law-student friend George Ira Cochran serving as Best Man. Arthur advanced steadily at John Kay Co. in Toronto, but after six years in Canada, believed his best opportunity would be in the U.S. He then set out for Seattle, arriving just a few days prior to the city-wide fire in June, 1889. Having little success, he then headed for L.A. in 1895 (based mostly on enthusiastic letters from Cochran, who had moved there when Arthur went to Seattle). With just $500 in his pocket--according to biographies, it wasn't much so far, but his fortunes were about to change.

Arthur Letts, at the time of his wedding

As he arrived in L.A., The Broadway Dept. Store, J.A. Williams & Co., Proprietors, had just gone bankrupt. While not in the main business district, Arthur believed in time that the business center would move that direction. Creditors asked for a public auction for the store's stock, estimated value $15,000. Arthur bid $8,167, winning the bid by $80. He needed $5,000 cash, with the balance due in 30 days. The Los Angeles National Bank loaned him $5,000, based on the loan's co-signer's good credit. That would be his old friend and Best Man, George Cochran. The rest of what was owed would be paid back from the sale of excess stock.

The next day a quarter-page ad went into the L.A. Herald, advertising "the greatest bargains ever seen".

Arthur knew this was his big break. As his biographer stated "He began work regularly at 6 in the morning and continued frequently until after midnight. Literally, he did not quit until every task was done for the day." While this tenacity was to provide unbelievable success in business, it probably created personal issues with his family.

He made money from the start, and his fortune grew quickly. By 1907, he had purchased 100 acres of land with a small knoll in the far-out Los Feliz area of Hollywood, and here he had built his mansion of success, calling it Holmby House in honor of his native homeland.

Holmby House and Gardens ca. 1910

Living in the house in 1910 according to the census were Arthur and Florence, daughters Edna (1887-1966), Gladys (b.1889), son Arthur Jr. (1891-1959), along with three maids, a chauffeur, a cook, and a gardener.

Shopping in a "department store" back when Arthur started in Los Angeles was very different from today. Imagine all transactions rounded to the nearest nickel--one of Broadway's "firsts" was to provide exact change for each transaction. He was first in Los Angeles to use marked, fixed pricing--prior to that each item was a negotiation between you and the clerk. Another first in L.A. was the Broadway's offer of store credits for returns. Before that if you bought it, you owned it. At Christmas, as biographer Kilner wrote, "he was right there with an ad inviting the children to come to The Broadway and see a 'real live Santa Claus.' Santa was to be loaded with presents, and would give a bag of candy free to every little boy and girl who came to see him".

Changes were also introduced on the employee side. Beginning in the Spanish-American War, full salary was given to all employees who volunteered and were called up for service, and Arthur agreed to provide pensions to any employee's family who lost his life during the war, to the full amount of the salary the employee was receiving when he enlisted. At a time when children had to work to support their family, he worked with the Board of

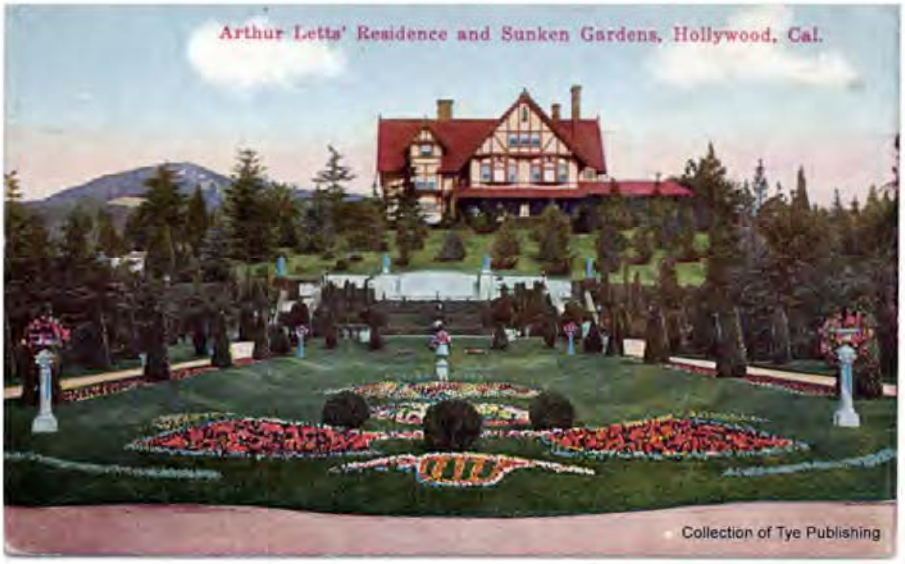
Education to use one of their teachers to open a school in the store for child workers. Each morning employees under eighteen were allowed to attend the 1 1/2 hour class, which included arithmetic, grammar, composition, history and other topics. He provided half-day holidays each week during July and August, and shortened daily working hours for employees, closing at 5:30 p.m., a full hour earlier than usual.



Postcard of the Residence and Gardens, ca. 1910

Arthur had many interests outside work. Besides his love for horticulture (creating the gardens you see above), he also bred Collies on the property, bringing over from England a championship winner Ravenswood to start a line of Collies in California. The kennel grew to become too large for the estate, and so he set to find good homes for the dogs, and turned more attention to his flowers.

In 1909, the estate was a stop on the Points of Interest for Hollywood tour, which also included Paul De Longpre's residence about a mile away. The Herald write-up in their Sunday magazine:

Arthur Letts' Mansion and Grounds

Immense country place. Large sunken gardens. A full acre of every known variety of cacti. Flowers in profusion. The largest coca plumosa drive in Southern California. Grounds open to visitors Thursdays.

In 1905 Arthur accepted the office of Vice-President of the L.A. Y.M.C.A. The directorate had been recently reorganized, with Frederick Rindge taking on the President position. But Rindge died before most action could be taken, and Arthur as president, drove a subscription drive for a new Y.M.C.A. building downtown, and by 1908 the new building was completed. This service was augmented by his volunteering for the Boy Scouts of America, serving as a National Vice-President in 1917. He donated ten acres for use as a camp site in Nichols Canyon. It was used until the 1950's, when it was sold by the Boy Scouts for development, with the exception of a small 1/4 acre strip, which contains a memorial to J.B. Lankershim, who also donated camp land.

Camp Arthur Letts in the 1920's
(today's address for the tents would be 7551 Kimdale Lane)

John G. Bullock was new in Los Angeles in 1896, searching for a job. Arthur hired him as part of the bankruptcy sale on the first day of The Broadway's existence. By 1906, Bullock had progressed to buyer for Men's Furnishings, but assisted throughout the store. That same year, the Broadway lease was about to expire, and in a protective move, Arthur took on a second lease in a partially-completed new building at 7th and Broadway. Bullock was chosen to organize a company and save the location in the event it would be needed for The Broadway, which

was rapidly outgrowing its current location. "Bullock's" was opened in March, 1907, with a large lighted sign on the roof, attracting curious crowds from around the city. Within a month, it was noticed that the better merchandise was moving well, but not so the usual goods. Buyers were ordered to focus future purchases with this new upscale clientele in mind. Bullock's was such a success, Arthur decided to keep both stores, empowering Bullock to organize the business. He took P. G. Winnett (Vice-President) and one other executive from The Broadway with him to Bullock's. Everyone else in the organization had not been associated with The Broadway. Upon Letts' passing the business of Bullock's, which had been started with $250,000 in capital, was valued at $7,000,000.

Janss Real Estate map
(courtesy of raremaps.com)

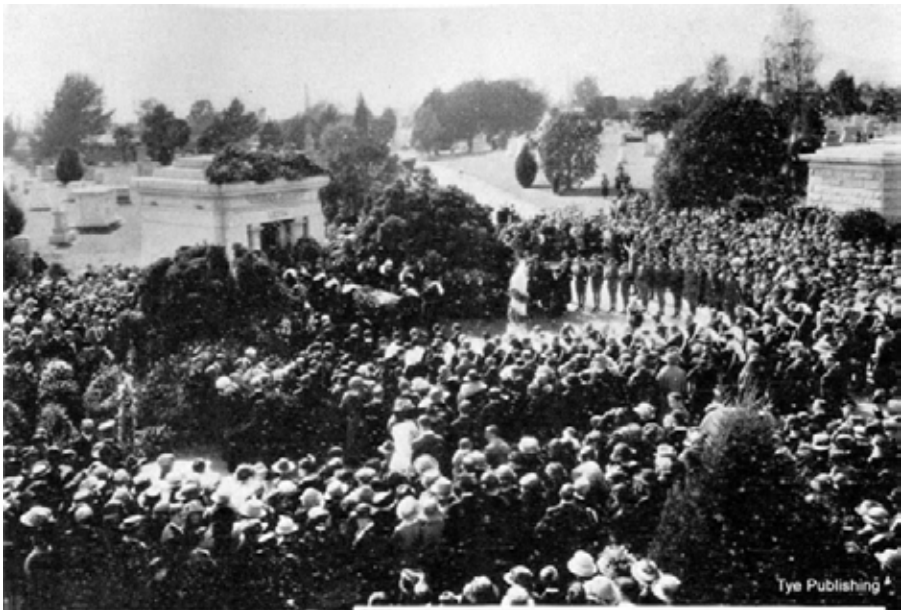
Arthur knew real estate was great for investment in fast-growing Los Angeles. And with his significant access to capital, it was just a matter of time before he made one of his most significant purchases. In 1919 heirs to the Wolfskill Ranch (Rancho San Jose de Buenos Aires) were ready to sell, but they wanted cash. The former ranch consisted of over 3,200 acres, with an approximate border of Pico Blvd. on the south, L.A. Country Club on the east, Sunset Blvd. on the north, and I-405 on the west. Purchased for $2 Million, Arthur turned over development to his son-in-law Harold Janss' company, Janss Investment Co. The area south of Wilshire contained land reserved for movie studios. The townsite of Westwood was laid out, which by 1927 contained 4,000 people. In 1923 Arthur discussed with UCLA Regent Edward Dickson the idea of a new campus in Westwood. Janss Investment followed up after Arthur's death by offering land to the state and city at a price significantly under market value. And so construction started on the new campus--the first building being the Dickson Court Bridge connecting the main quad to the admin building. (The small valley it crossed has long since been filled.) Another part of the original Westwood Campus? Janss Steps (see below left)

Looking down Janss Steps, 1977

Janss Investment continued with the development of the rancho creating estate lots from 3/4 acre and up, and planning an ultra high-end neighborhood, named Holmby Hills. Many of the Janss and Letts families would end up owning houses there (six, in fact).

1923 was not the best year for Arthur. According to *Unreal Estate*, a recent book focused on the owners of Holmby Hills and Beverly Hills residences through the years, Arthur went to Florence and asked for a divorce, citing desertion for the prior year. But soon after, Arthur suffered a nervous breakdown, and per the New York Times, was dead of double pneumonia within a month. Did he ask for a divorce? It is known that upon Arthur's death she immediately left the house, going to San Francisco where a Charles Quinn lived. From there she applied for a passport stating intentions to travel to Europe. Her return in June, 1924 through the port of New York was as Florence Quinn, wife of Charles. Together with Charles, she was to move to Holmby Hills in the early 1930's just down the street from two of her children, remaining at 141 South Carolwood until her death in 1944.

Holmby House in Happier Times
(courtesy of USC Digital Collections)



At the Funeral Service

Thousands attended the funeral for Arthur. The eulogy was given by the Rt. Rev. Horsfall Johnson of the Episcopal church. Burial was in the family crypt at today's Hollywood Forever Cemetery.

With Arthur's passing The Broadway was sold to a group of investors led by son-in-law Malcolm McNaghten (married to daughter Edna), who had been a Vice President of Finance at The Broadway. John G. Bullock led the buyout for his namesake department store. Son Arthur Jr. who had become

The Family Mausoleum Today

President of The Broadway upon his father's death, focused his efforts on the real estate side of the family business after the department stores were sold. And besides the breakup of business, Arthur Jr. divorced in 1930, while daughter Gladys divorced in 1932.

Holmby House and the gardens itself were first finished about 1907. On the property in 1923 were Arthur and Florence in the main house, and daughter Gladys and husband Harold Janss lived in a grand house on a portion of the northeast corner of the land. But what was to happen to the main house and gardens with Arthur's death? It had been Arthur's stated wish to keep the gardens, to the extent he had provided money in his will for maintenance. Neither Florence nor Edna nor Gladys nor Arthur Jr. would try to live up to Arthur's wish. Harold the developer led the creation of "Franklin Avenue Square", razing the house completely. Some of the exotic plants were moved to Arthur Jr.'s new house in Holmby Hills, and Henry Huntington procured many of the exotic cacti for use in his cactus garden in San Marino. In less than 30 short years, the house had been built, then torn down. Nothing remains today.

Fascinating reading! My husband is related to the Philps from Ontario, so this was very interesting to see how

far one of the branches had come! Thanks for a great post.

Bradford - wonderful, wonderful posts! The Letts home plays a major role during the Harold Lloyd 1924 feature comedy Girl Shy.

I have written three books explaining where Charlie Chaplin, Buster Keaton, and Harold Lloyd filmed their movies decades ago. They all used LA mansions in their films. You can read about the Letts home at page 158 of my Lloyd book Silent Visions.

I plan to contact you soon with more comments and questions.

Cheers,
John Bengtson

A very interesting post.

My Great Grandfather was Arthur's first cousin but this side of the family stayed in the UK.

John's post regarding Harold Lloyd (one of my childhood favourites) was also a great link, watching the movie and seeing the house and gardens is just amazing.

I have often wondered what happened to Arthurs possesions when he died as much of it was from the UK and included a diary written by his father on a voyage to Australia. I assume his children inherited it but I wonder if anyone has the diary now or whether it is one of those things that gets lost or thrown away.

Once again a great post.

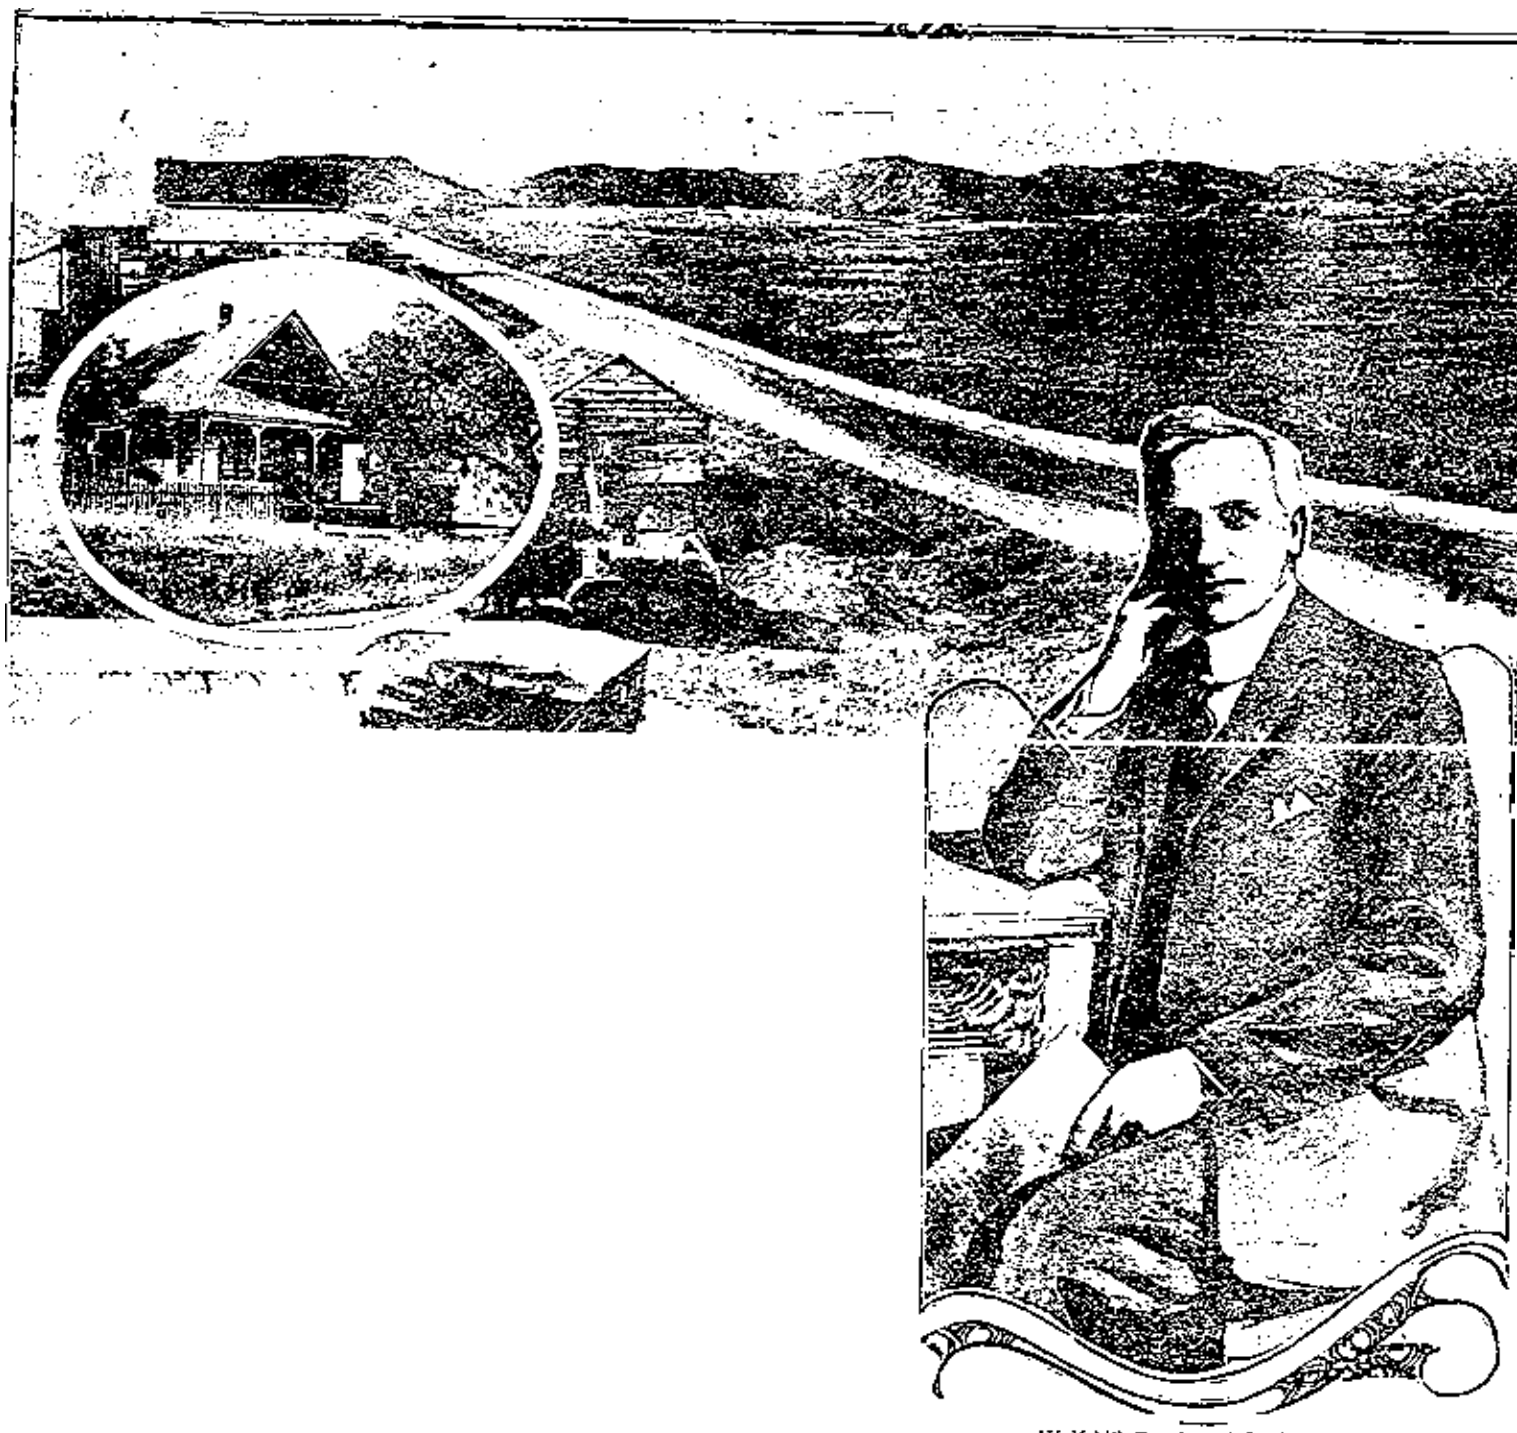
ARTHUR LETTS BUYS THE WOLFSKILL RANCH FOR TWO MILLIONS CASH.



Wolfskill Ranch and Its Purchaser.

The large panorama was taken from the roof of the old ranch-house (also shown at left), front at the corner of Wilshire boulevard and Beverly Glen drive, the road shown in the picture. Below is Arthur Letts; the bust, also, at the right, is of Charles G. Andrews, who handled the deal for the Wright-Callender-Andrews syndicate.

MONUMENTAL REAL ESTATE DEAL.

Thirty-three Hundred Acres Between Los Angeles and West Beaches Sold to Merchant Prince for Record Cash Price; to be Fine Residence Tract.

Long coveted by many moneyed investors, prize of prizes in the local land market and the despair of a generation of subdivisionists, the great Wolfskill ranch of 3296 acres, one of the last of the undivided land domains between Los Angeles and the west beaches, passed yesterday into the hands of Arthur Letts, merchant prince, property owner and far-visioning business man and capitalist of this city. Mr. Letts last night announced his intention of converting it into a fine residential district. Development work will begin at once.

Two million dollars cash was the consideration for which the Wolfskill family finally parted with the property, which has so long beckoned the suburban developers of the Southwest metropolis. The sellers were Matt Ashby Wolfskill, who resides on the ranch; Ney Wolfskill, who is in business in Fresno, and their invalid sister, Edith Irene Wolfskill, a resident of Pasadena. The Wright-Callender-Andrews Company handled the transaction, Charles G. Andrews of that firm, personally acting in the negotiations.

Aside from its magnitude and [illegible] the deal had a dramatic interest, not to be found in the ordinary large real estate transaction. From an extended series of negotiations, which had looked dubious of fulfillment for many days, the deal finally developed at a late and under circumstances that lends it a "thriller."

The Wright-Callender-Andrews syndicate secured control of the property under a ninety-day option [illegible] something of a feat in itself, as the owners had always refused to entertain offers of any kind up to that time. The uncertainty of financial conditions operated to prevent the company's securing purchasers willing to go into so large a venture, and up until yesterday it seemed that the option would have to be allowed to expire unexercised, it is understood. In fact, that another Los Angeles capitalist, in the conviction that the deal would fall through, had entered into negotiations to buy a large part of the property directly from the owners.

AT ELEVENTH HOUR.

Then the proposition was put up to Mr. Letts. Yesterday afternoon at 5 o'clock, a little seven hours before the time of expiration of the Wright-Callender-Andrews option, Henry W. O'Melveny, of the law firm of O'Melveny, Millikin & Tuller, Mr. Letts's attorneys, tendered to William Robert Mitchell, of Dunnigan, Britt & Edwards, attorneys for the Wolfskills, a certified check for $2,000,000 to clinch the bargain for the new owner. The eleventh hour tender was a complete surprise to the givers of the option when they heard of it from their attorney several hours later.

The great holding which Mr. Letts has added to his many other valuable properties, was known of old as the Rancho San Jose de Buenos Aires, and is still so marked on maps of record. Through its long association with the Wolfskill family, it long since came to be known under that name.

The ranch skirts Pico boulevard on the south for about two miles, extending northward to the foothills three miles away. It lies to the west of the Los Angeles Country Club property and the lands of the Rodeo Land and Water Company, bordering both, and has for its western boundary the Soldiers' Home grounds and a part of the town of Sawtelle.

A third of the land in level and of this portion approximately 500 acres, mostly in the southwest corner of the holding, along Pico boulevard, is ideal bean land. On the mesa north of Wilshire boulevard the ranch is a sea of green barley fields. South of Wilshire boulevard and adjoining the west line of the property is an old walnut grove, ninety acres in extent. The annual cultivation of these crops has constituted the ranching operations of the holding for a generation. The improvements consist of the main ranch-house, built a number of years ago near the site of an older structure that was destroyed by fire, together with a number of houses for tenants and help on different parts of the property.

MR. LETTS'S PLANS.

Mr. Letts plans to convert the big tract into one of the most beautiful and attractive residential districts in all [illegible] that the purchase will not only [illegible] the United States. He said last night he proposes to show not only his confidence in the city of Los Angeles and its future to so strong that he has no doubt what- [illegible] tens of thousands of well-to-do people here.

(Continued on Eighth Page.)

Reproduced with permission of the copyright owner. Further reproduction prohibited without permission.

WOLFSKILL RANCH SOLD.

Arthur Letts Buys Great Close-in Tract for Two Millions, Cash.

(Continued from First Page.)

The chief reason for investing [illegible] will make a great sum of money in Los Angeles real estate, he said, is that he has full confidence in the continued growth and prosperity of the city where he has built up a big business and achieved business success such as few other men have attained."

Recognized as one of the greatest connoisseurs of plants and landscape architecture in America, Mr. Letts' supervision of the subdivision of the tract into homesites will be an important factor in creating a district of beautiful homes. His first step will be to employ a landscape architect to work out the details of the subdivisions. Mr. Letts has already determined in a general way improvements to be made.

The topography of the land is such that it lends itself remarkably well to subdivision. Because of the natural slopes the homesite subdivisions will not interfere with nor detract from each other.

One feature of the improvements that will be undertaken soon will be the building of a number of winding boulevards with decorative parkways. While he has not yet decided on all the details of subdivision, Mr. Letts intimated last night that he intends to expend a large sum of money in improving the property.

LONG SOUGHT FOR.

The availability of the holding for immediate subdivision and development, due to its situation immediately between the western suburbs of Los Angeles, including Beverly Hills and the business region extending back from the beaches, has led one large realty concern after another in the past decade to make flattering, but unavailing, offers looking to the marketing of the land. Two parcels only have been detached from the property—one the 200 acres transferred ten years ago to the Country Club Holding Company as a site for the present Los Angeles Country Club, and the other a piece comprising 440 acres of foothill land sold six months ago to J. M. Danziger and now included in the latter's large foothill estate to the northwest of Beverly Hills. Practically every acre of the land acquired by Mr. Letts is of a topographical shape for residential subdivision.

Besides Pico boulevard, which forms the southern boundary of the property, two other city-to-sea paved highways make the ranch lands readily accessible to Los Angeles. Both Wilshire and Santa Monica boulevards pass through the tract, the latter carrying the Pacific Electric Railways line to Santa Monica by way of Sawtelle. The proposed new Beverly boulevard, to be formed by the extension of the new West First-street boulevard out Temple street west of Vermont avenue and westward from the city proper through Beverly Hills to Santa Monica, will pass directly through the property practically on the line between the present ranch and the foothill purchase of Mr. Danziger.

In addition to the existing paved highways and the prospective boulevard, the tract has as a beginning toward residential development the advantage of a natural-gas main bisecting the property, together with electricity and telephone connections. As all but a narrow strip of the holding along Pico boulevard is included in the Westgate Annex to the city of Los Angeles, Owens River aqueduct water is secured as rapidly as the property can be developed and the pipe mains put in. All that portion of the land lying on the east of Rimpau Wilshire boulevard, several hundred acres in all, is frostless and adapted by soil and elevation to the cultivation of lemons, the rest of the acreage being suitable to a diversity of plantings.

WOLFSKILL HISTORY.

John Wolfskill, forty-niper, farmer, State Senator and one of the most enterprising and picturesque men of the fortune-hunting days, was essentially a land developer and, from the time he first set foot in the State, believed implicitly in the greatness of its future. From the day he acquired his first land in 1838, when he purchased the original Encendido grant of 14,000 acres from Judge O. S. Wilkerson of San Diego, he remained a large land owner up to the day of his death, in December, 1912.

Mr. Wolfskill, before he became interested in the development of Los Angeles, was identified with the early history of the Encendido Valley. He bought the original Encendido grant for $3000, the deal including 500 head of cattle, which he sold for $1000. This made the immense ranch cost him $3000 cash. He continued to hold that property until 1837, when he sold it to northern capitalists for $125,000. The following year the ranch was sold for $175,000.

Mr. Wolfskill died at his home, 222 Arroyo terrace, Pasadena, on December 19, 1912, leaving no will. He was 77 years old. Five heirs survived him—his wife, Mrs. Susanna E. Wolfskill, also a pioneer and a native of Independence, Mo.; Mrs. W. Wolfskill, a son; Matt Wolfskill of Ventura, and Miss Irene B. Wolfskill of Pasadena. The estate was appraised at that time as being worth $1,150,000 in real estate and $50,000 in personal property. The land holdings comprised principally the property west of Beverly Hills, just acquired by Mr. Letts. Mr. Wolfskill acquired this property about 1884 from the original grantees for a sum approximately $10 an acre. His idea was to hold it unimproved and develop it as it ripened, and with this intention built a large house into which the Wolfskill family was preparing to move at the time of Mr. Wolfskill's death. Mrs. Wolfskill, who was Miss Susanna E. Moore, died in January, 1913.

MR. LETTS.

Arthur Letts, counted among the most progressive and successful merchants in America, has been identified with the business and social life of Los Angeles since 1896, when he came here following the disastrous Seattle fire, which wiped out the business of the firm by which he was employed. He was born in England in 1852, and when a young man crossed the ocean for the opportunities of the new world, for a time settling in Toronto, Can.

Mr. Letts's first business venture in Los Angeles was to acquire the dry goods business of J. A. Williams & Co., at Fourth and Broadway, which had become bankrupt. The location of the store was considered too far south of the then center of the business district to promise success, and Mr. Letts' friends sought to dissuade him in the venture which to them seemed risky. He gave the business the name it bears today—The Broadway Department Store—and from the first, despite early handicaps and discouragements, he made it successful.

The growth that followed Mr. Letts's venture is part of the history of the phenomenal development of Broadway. In 1899 the Broadway occupied the entire ground floor of the Hellman and Hellet Building. In 1910 the adjoining Hellman Building was purchased. In 1905 the upper floors of the Hellet and Hellet Building were acquired, and in the next year the Stanson Building, adjoining the Hellman. Mr. Letts built the present fine building in 1914.

Besides his large interest in the property and business development of Los Angeles, Mr. Letts has always been interested in education and juvenile welfare. His home, Helbilly House, at the head of Kenmore avenue, Hollywood, is surrounded by a magnificent park of thirty acres, filled with rare and beautiful trees and flowers. His two hobbies are horticulture and the collection of rare marbles, of which his house and garden are filled with many brought from various parts of the world.

Among the popular movements in which Mr. Letts has been a power of strength is that of the Boy Scouts. Practically from the inception of the organization he has taken a large and active interest in its affairs and has given considerable sums of money in cash, prizes and other forms to promote its welfare in Southern California and generally.

Mr. Letts is a member of the California Club, Los Angeles Country Club, Automobile Club of Southern California, Los Angeles Realty Board, Municipal League, Hollywood Board of Trade, and the Bohemian Club of San Francisco. He was formerly president of the Y.M.C.A., president of the Retail Dry Goods Association, and is a trustee of the State Normal School here, a member of the Hollywood Lodge F. and A. M., and a Knight Templar.

BIG DEAL STIRS BUSINESS MEN.: Wolfskill Ranch Sale Means Great ...
Los Angeles Times (1886-1922); Apr 16, 1919;
ProQuest Historical Newspapers: Los Angeles Times (1881-1990)
pg. II5

BIG DEAL STIRS BUSINESS MEN.

Wolfskill Ranch Sale Means Great Activities.

Plans for Subdividing Great Ranch Take Form.

Purchaser will Develop it on Elaborate Scale.

The announcement in yesterday morning's Times of the purchase by Arthur Letts of the great Wolfskill ranch for $2,000,000 was the chief topic of conversation among business men yesterday, especially in realty circles where there is a strong conviction that sales and development of real estate have by it received a tremendous impetus.

Mr. Letts received many applications yesterday from landscape architects, engineers and contractors. He will start on the big job of subdivision as soon as he has fully developed his general plan and has retained a landscape architect.

In arrangement and ornamentation with trees, plants and shrubs the big tract will be one of the most distinctively-beautiful communities in the world. Mr. Letts has an enormous collection of rare trees and shrubs gathered in all the countries of the world. He has the vision to design the work and he knows what trees would be most effective and where to get them. He said yesterday that he is prepared to spend a very large sum of money in developing the property.

That one of the first home sites to be improved will be one selected by Mr. Letts for a country home for himself that will be one of the famous show places of California is very probable.

W. M. Garland, president of the National Real Estate Association declared yesterday that the deal will have a big influence on the growth of Southern California and will strengthen confidence of investors, big and little, in the solidity of the value of real estate here.

"It is one of the best indications," he said, "of the immediate and future prosperity of Southern California that we have had. The purchase of the Wolfskill ranch and the announcement that it will be subdivided into beautiful homesites, coupled with the purchase of Catalina Island by William Wrigley, Jr., are having an influence on every line of business, and a wonderful bearing on the development of Southern California.

"The property has been purchased by a far-seeing investor who realized what a wonderful opportunity exists for creating a high-grade community. Its distinctively beautiful setting has attracted the attention of many prospective investors, but it remained for Mr. Letts to make the venture.

"Mr. Letts will not only profit by his investment, but he will add greatly to the wealth of Los Angeles and its artistic values."

MOMENTOUS WOLFSKILL RANCH TRANSACTION.
Los Angeles Times (1886-1922); Apr 16, 1919;
ProQuest Historical Newspapers: Los Angeles Times (1881-1990)
pg. II4

MOMENTOUS WOLFSKILL RANCH TRANSACTION.

Prominent among the epochal land transactions affecting the development and progress of Los Angeles must be recorded the purchase by Arthur Letts on Monday of the great Wolfskill ranch lying between Beverly Hills and Sawtelle. As a direct result of this monumental deal the decade-long dream of a suburban development stretching from West Los Angeles and Hollywood to the sea becomes an assured realization of the immediate future.

Rival cities of the Pacific Coast States have been wont to talk in terms of amusement and even derision of the aspirations of the inland city of Los Angeles to reach out to salt water. They have witnessed, not without a barely concealed admiration, the tremendous feat of this West Coast metropolis in creating a great artificial harbor from the mud flats of San Pedro and Wilmington, contenting themselves with poking fun at the Shoestring Strip devised to link the city with its water front. The deal just concluded by the great merchant of Broadway and the plans with which he expects to follow it up give Los Angeles the laugh on these other cities that have thought it could never get to tide water.

The Wolfskill ranch has long been the key to the city-to-sea development ambitions of Los Angeles, at least so far as the nearer west beaches are concerned. The southward advance of the city along the great highways running to the harbor is gradually taking care of the oceanward progress of Los Angeles in that direction. The westward expansion can be accomplished almost at a bound now that the old Rancho San Jose de Buenos Aires has been purchased for subdivision.

Northwest Los Angeles has crept westward along the foothills until its residents look down into Sherman from their high mesa sites and farther south the city proper is reaching ever seaward along Wilshire, Santa Monica, Pico and Washington boulevards.

Beyond Sherman, and already linked to it by a scattering residential development, lies the beautiful suburb of Beverly Hills, already grown into an important community. Between Beverly Hills and Sawtelle and separating the westward residential extensions of Los Angeles from the eastward expanding beach communities lies the 1300-acre land holding which has just been acquired by the far-visioned business man and capitalist who had already contributed so much to the upbuilding of this southwest metropolis. Once this broad expanse of land has been cut up into homesites and parcelled among homeseekers and builders the gaps between Los Angeles proper and its future ocean front will be filled in in a hurry.

Mr. Letts has never given a more convincing demonstration of his faith in Los Angeles and its future than in the purchase of this land domain standing between Los Angeles and its destiny. Just as he foresaw the vast growth in population of this city and section and built a business house to meet the needs of a city of a million, he has now looked ahead and visioned the progress of Los Angeles to the sea. His investment, including the enormous sum he will spend in the laying out and improvement of his purchase, will run into several millions; but he knows that the inevitable advance of the city along its predestined line of development will bring him back his money with ample interest. And it may be well believed that back of the financial consideration and even transcending it in the mind of the projector of this splendid undertaking is the personal satisfaction he feels in being in a position to do the thing that will bring Los Angeles so much nearer to the realization of one of its great ambitions.

The most immediate advantage that will accrue to the city of Los Angeles through the subdivision of the Wolfskill ranch will be the opening thereby of a new and important market for the aqueduct surplus. With the exception of a narrow strip of land along Pico boulevard, all of the property is included within the limits of the Westgate annex and is hence in reality a portion of the city. With three fine paved boulevards traversing the holding and with natural gas, electricity and telephones already available in the district, the ranch domain lacks only a modern and ample water system to be ready for division into homesites. It therefore becomes to the advantage of both the city and Mr. Letts to complete arrangements for the distribution of the aqueduct water at the earliest possible moment. And Mr. Letts has announced that he does not expect to lose any time in perfecting his comprehensive subdivision plans.

With the addition of Mr. Letts's great holding to the residential suburbs of Los Angeles there will no longer be any excuse for Santa Monica staying out of the municipal fold and foregoing the benefits of the aqueduct water service. Sawtelle is already in the city, as is the Westgate district and an area north of Santa Monica Canyon reaching to the sea and having an extensive beach front. As long as the Wolfskill property lies as a great open region between the north beach community and the westward reaching suburbs of Los Angeles, Santa Monica is bound to feel a certain isolated individuality. Soon, however, thanks to Mr. Letts, Santa Monica will be side by side with a developing portion of residential Los Angeles and to all intents and purposes a part of its larger neighbor. For the city by the sea to decline to participate in the benefits offered by the city which built and owns the aqueduct under conditions such as these would be for both cities to lose much of mutual value with no benefit whatever as compensation for either. Santa Monica will vote for annexation soon.

The confidence shown by Mr. Letts in entering upon so large a real estate enterprise is bound to have an uplifting influence on realty, business and financial conditions in Los Angeles, and this is something that is needed even yet. The purchase of the Wolfskill ranch is in many ways the most notable of the series of great transactions which began but a few months ago with the purchase of Santa Catalina Island by William Wrigley. Last week saw the epochal transfer of the 850-acre Dodson ranch adjoining San Pedro, a transaction insuring the early addition to Los Angeles of a brand new residential area in its harbor district. Such deals by men of means point the way to investors generally and are certain soon to lead to a wave of activity that will restore Los Angeles at a bound to its normal condition of prosperity.

HISTORIC RANCHO TO BE SUBDIVIDED SOON

Wolfskill Property, Acquired by Arthur Letts Two Years Ago, Will Go on Market

The famous Wolfskill ranch, one of the largest pieces of undeveloped property between Los Angeles and the ocean, a tract—part of an old Spanish land grant—comprising 3300 acres, has been taken over by the Janss Investment Company and will be subdivided into homesites. The consideration involved in the purchase of the property, formerly owned by Arthur Letts, will be in excess of $7,000,000, according to officials of the Janss company.

The company's engineering department is now engaged in preparing plans for the subdivision and improvement of the first unit of the big tract, located in the southwest section of the ranch, and it will be opened as soon as these plans can be completed.

The development program, tentatively prepared by the Janss Investment company in conjunction with the City Planning Commission, contemplates the construction of many miles of streets; it is the intention of the subdividers, according to Harold Janss, secretary of the company, to develop a street system which will be in advance of the immediate requirements.

Outstanding in the street construction program will be the establishment of an entirely new boulevard, paralelling Santa Monica Boulevard, and extending through the entire tract. This boulevard will be on the eastern side of the Pacific Electric tracks, and will have the effect of doubling Santa Monica Boulevard in width.

The company is also prepared to assist in the Wilshire Boulevard project, which contemplates the widening of the Boulevard, and its beautification with ornamental plantings and works of art. Sufficient land along the portion of Wilshire Boulvard that extends through the property will be deeded to the city to insure its development along the lines indicated in the plans prepared for the project, according to Mr. Janss. In this stretch, according to present plans, Wilshire Boulevard will be widened from 100 to 232 feet.

An abundance of water, Janss company officials say, will be afforded the entire tract from the new Stone Canyon reservoir, which will supply water to the district between Beverly Hills and the ocean.

About one-third of the ranch is comprised of level land. North of Wilshire Boulevard are a series of high knolls, and the extreme northern end extends well into the higher mountain ranges. Beverly Boulevard, when built, will extend along the base of the higher lands.

Th eeastern boundary of the Wolfskill ranch adjoins the property of the Los Angeles Country Club. From that point, the ranch extends westward for a distance of about two miles to the Soldiers' Home at Sawtelle. Pico Boulevard forms the extreme southern line, the property extending from that point northward to the Danziger Estate, which it surrounds on three sides.

For many years the ranch has been used for general farming purposes although south of Wilshire Boulevard there is a fine walnut grove of ninety acres. Beans and barley have been the principal crops for the past thirty years. With the exception of the residence erected by the late John Wolfskill a number of years ago, improvements are nominal, consisting of farm buildings and ranch houses for employees.

The ranch came into the hands of Mr. Letts in April, 1919, when a certified check for $500,000 was delivered to the Wolfskill heirs by Mr. Letts, who has been working session of the ranch. The deal session of the ranch. The deal was at that time involved a record price for Los Angeles realty.

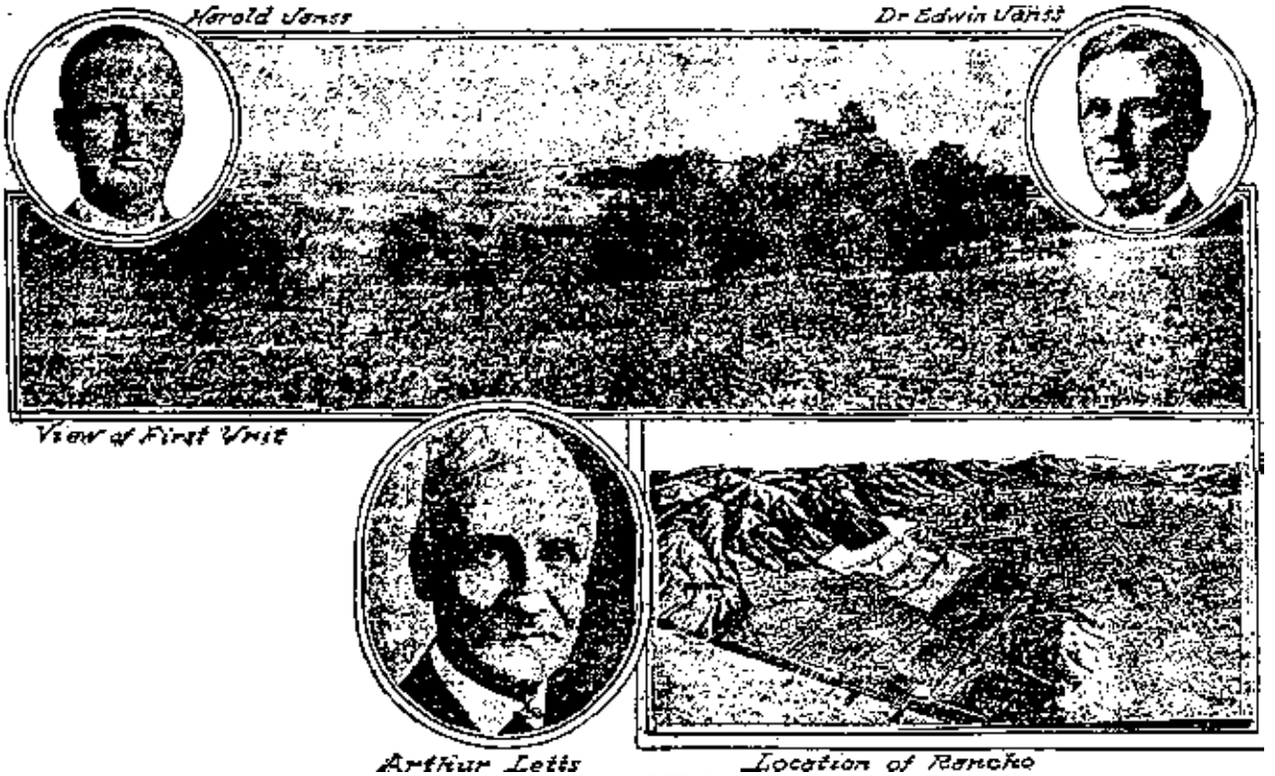
The Wolfskill ranch, indicated on official maps as the Rancho San Jose de Buenos Aires, is one of the historic land grants of Southern California. It was acquired about 1854 by John Wolfskill, a pioneer in the development of Southern California. A man of great enterprise, Mr. Wolfskill, who believed implicitly in the future of Southern California, devoted himself principally to land development. When he acquired the tract, for which he paid about $10 an acre, he planned to keep it intact, and to develop it into a ranch. With this in mind, the present residence was built, but owing to the death of Mr. Wolfskill in 1912, at the age of 77, the house was never occupied by the family.

Mr. Wolfskill was survived by five heirs, Mrs. Susanna E. Wolfskill, his wife, New W. Wolfskill, a son, Matt Wolfskill of Venice and Miss Irene B. Wolfskill of Pasadena. His estate, at that time, was valued at $1,500,000, and consisted principally of real estate, of which the Wolfskill ranch formed the major portion.

Mr. Wolfskill's first venture in California real estate consisted of the purchase of the Escondido grant of 13,000 acres from Judge O. S. Witherby of San Diego. For the Escondido property he paid $5000, the deal including 500 head of cattle, which he later sold for $5000. He owned the Escondido ranch until 1852, when he sold it to northern capitalists for $133,000. Shortly afterward he acquired the vast acreage soon to be divided into residential sites.

While this is not the largest project, in point of acreage, handled by the Janss Investment Company, it will exceed, in retail value, by several millions of dollars any subdivision activity heretofore undertaken. The company has subdivided and marketed a 2500-acre tract at Yorba Linda, and it also subdivided 47,000 acres of Van Nuys-Lankershim lands into little farms. More recent enterprises of the company include Los Feliz Square, in Hollywood, and Belvedere Gardens in the eastern section of the city.

Vast Property to Become Community of Homes



Views of Wolfskill Ranch and Its Subdividers

This ranch of 3300 acres, west of Beverly Hills, is to be put on the market by the Janss Investment Company. Arthur Letts, the owner, purchased the property about two years ago from the heirs of the Wolfskill estate.

pg. V9

WESTWOOD IS PLACED ON MARKET

First Part of Walfskill Ranch is Opened by Janss Investment Company

Westwood, the subdivision of the Walfskill ranch, 3300 acres of scenic territory between the city and Santa Monica, is to be opened to homeseekers and investors today by the Janss Investment Company. The tract comprises approximately 1000 residential and business lots, situated west of the Los Angeles Country Club on Santa Monica Boulevard and the Rancho Country Club on Pico Boulevard.

"Hundreds of requests from homeseekers in Westwood have already been received," said Harold Janss, of the Janss Investment Company, yesterday. "The continual turnover of property on Western avenue during the past three years will, we believe, be duplicated again in Westwood.

"Our predictions for the success of Westwood are based upon our past performances. In the brief space of one generation the Janss Investment Company has successfully marketed forty-nine subdivisions in Los Angeles, its suburbs and nearby farming sections. We have provided homesites for more than 100,000 persons and have transacted an aggregate volume of business running into tens of millions.

"Westwood is fortunate in its close proximity to the churches of eight denominations. There are two grammar schools and the new $85,000 Woodrow Wilson Junior High School in the vicinity. The ... for a high school to cost approximately $200,000 has already been selected close by. A plan of civic beautification is being evolved by our engineers, in co-operation with the City Planning Commission."

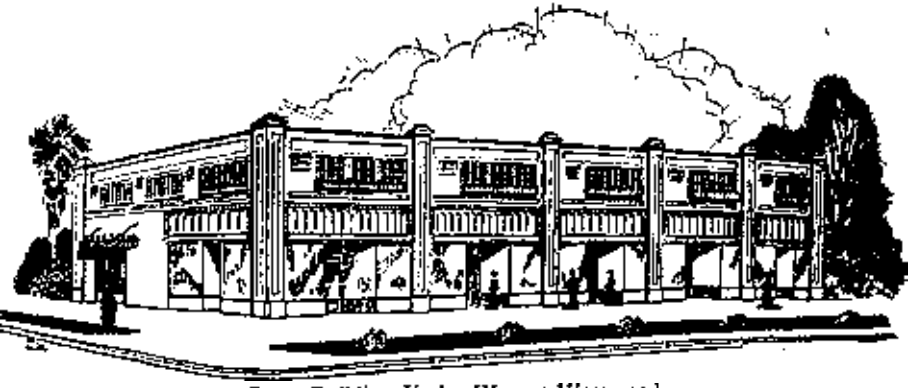
pg. V6

Suburban Improvement Nearing Completion



Store Building Under Way at Westwood

Store Building Being Erected at Westwood

Being erected at a cost of $35,000, a brick and terra-cotta construction store building will soon be completed at the corner of Santa Monica Boulevard and Veteran avenue, Westwood. The structure contains five store-rooms facing on Santa Monica and ten apartments onhead entered on the Veteran-avenue side.

The owners of the new business and apartment-house are the Investment Associates, Inc., composed of officials and executives of the Pacific Mutual Life Insurance Company.

Alfred G. Mann is president of the association and Roy Hoagland secretary. Another store building for Westwood is being erected at the corner of Mississippi avenue and Westwood Boulevard at a cost of $15,000.

A Merry Widow

An English woman recently wrote to a newspaper that she began life as A. Mann (Alice Mann.) She married a Mr. Husband and so became A. Husband. He died and she married again, this time a Mr Malden. Becoming a widow for the second time, she concludes that though born A. Mann, she will die A. Malden.—[Boston Transcript.

Kadletz Now in Business for Himself

A new firm, which will be known as F. W. Kadletz and Company, has been organized for the purpose of specializing in the selling and leasing of downtown properties. Their new business home is located on the eighth floor of the Pacific Mutual Building. The senior member of the firm, Mr. F. W. Kadletz, has been actively engaged in the real estate business and associated with W. I. Hollingsworth and Company for the past twelve years. With him as junior member is his son, F. S. Kadletz, who is a graduate of the College of Law, University of Southern California, and since his graduation has been associated with the same firm.

Both members of the new organization are active in the affairs of the Los Angeles Realty Board, Mr. F. W. Kadletz having joined the Board in 1911.

During Mr. F. W. Kadletz's association with W. I. Hollingsworth and Company he handled some of the largest transactions in the close-in business district.

Starting at Home

One effective way of lightening the work of the President, in which the politicians wish to appear to be much concerned, would be to stop pestering him about jobs.—[Chicago News.

INVESTMENT RESERVE OF CITY PROVED: WESTWOOD LOT SALES ARE $1,000,000 A
Los Angeles Times (1923-1995); Mar 25, 1925; ProQuest Historical Newspapers: Los Angeles Times
pg. A11

INVESTMENT RESERVE OF CITY PROVED

Westwood Lot Sales Are $1,000,000 After Site for University is Chosen

Proof that thousands of dollars are available for investment in Los Angeles residential properties is demonstrated in the sale of more than $1,000,000 in homesites in the Westwood district during the last four days by the Janss Investment Company. Since the announcement of the Board of Regents that the University of California, Southern Branch, is to be located at Westwood, there has been a consistent demand for residence property in the area.

According to Harold Janss, head of the investment company, more than $600,000 in homesites were sold within twenty-four hours after the decision had been made by the university officials. On Monday approximately $265,000 in lots were purchased, while yesterday the books showed sales aggregating $265,000. The total sales for these four days amounted to more than $1,000,000, or approximately 275 lots.

Officials of the company placed a new unit on the market Saturday and it was sold out within forty-eight hours. All property transactions represented sales of sites south of Wilshire Boulevard and included resales and new sales. Mr. Janss said yesterday his company had been averaging at least $1,000,000 in sales each month for the last year.

It was estimated that more than 100,000 persons viewed the site of the university at Westwood last Sunday.

Harland Bartholomew, 100, Dean of City Planners

By JOAN COOK

Harland Bartholomew, the dean of comprehensive city planning in the United States, died Saturday at his home in Clayton, Mo., a suburb of St. Louis. He was 100 years old.

Mr. Bartholomew, a consulting engineer, was appointed to Federal planning committees by three Presidents, Herbert Hoover, Franklin D. Roosevelt and Dwight D. Eisenhower.

In 1941 President Roosevelt appointed Mr. Bartholomew to a committee to recommend a limited system of national highways. He also helped plan the Metro subway system in Washington, and he represented the Rockefeller interests in the restoration of historic Williamsburg, Va.

President Eisenhower appointed Mr. Bartholomew chairman of the National Capital Planning Commission a position he held for seven years, A City Planner in Newark Mr. Bartholomew became the nation's first full-time city planner in 1914, when he went to work for the city of Newark. Two years later he went to St. Louis as a city engineer, and he later opened a consulting firm, Harland Bartholomew & Associates, which now has its headquarters in Memphis. He retired in 1965. His firm prepared comprehensive plans for more than 500 cities and counties, including Bal Horbour, Fla., St. Croix, V.I., and Grand Bahama Island in the Bahamas. Mr. Bartholomew also prepared plans for the reconstruction of the resort community of Bar Harbor, Me., after two-thirds of it was destroyed by a forest fire in 1947.

His firm also assisted in the preparation of many zoning ordinances. including a statewide ordinance for Hawaii.

He was an early advocate of slum clearance and city planning, and served on the national Slum Clearance Advisory Committee. His ideas helped shape the Housing Act of 1937 and the Housing Act of 1949.

Mr. Bartholomew was born in Stoneham, Mass., and received his civil engineering training at Rutgers University. He taught civic design at the University of Illinois from 1918 to 1956.

Mr. Bartholomew, who was widowed three times, is survived by five stepchildren: George Ball of Travers City, Mich., Barbara Cosden of Manhattan, Dorothy Friestedt of Washington and Georganne Pollnow and R. F. Funston Jr., both of St. Louis. He is also survived by three grandchildren and seven great-grandchildren.

BUSINESS VILLAGE PLANNED: Commercial Development Near University Campus to be Un
Los Angeles Times (1923-Current File); May 6, 1928;
ProQuest Historical Newspapers: Los Angeles Times (1881-1990)
pg. E5

BUSINESS VILLAGE PLANNED

Commercial Development Near University Campus to be Unique Exploitation Project

Ground plans for the new Westwood Hills University business village were virtually completed this week. Located at the southern entrance to the university campus, the site of the village extends north from Wilshire Boulevard 1400 feet to the university grounds and about midway between the fraternity and sorority "rows." Westwood Boulevard will be the principal artery.

Unique to a point probably never before approached by any similar business district in America, the present plans are the result of more than eighteen months research and planning by the Janss Investment Company, developers of the area.

Uniform type of architecture of Spanish-Mediterranean design has been chosen and all building plans will be subject to the approval of a board of architectural supervisors. The style of architecture has been chosen to blend with the general improvement of the campus and the buildings now under construction which are expected to be completed this year. Grading and leveling of the site has been under way for the past ninety days and the laying of curbs, streets and sidewalks is expected to start within the next two weeks. The first building to be erected in the village will be built by the Janss Investment Company as a pattern for future construction.

Plans for this structure are now virtually completed and involve an investment of $250,000 exclusive of the site.

Store locations will be restricted to one and in a few instances two merchants in each line of business for the first school semester at least, in order that a complete service may be given shoppers from the outset. Sales Director A. Harold Wilkins said that requests for shop locations have been already received from many of the largest and most successful merchandisers on the Coast with several from concerns which have operated exclusively in the San Francisco area.

ARCHITECTS TO AUGMENT WORK HERE

Employment Bureau Will be Conducted Free for Draftsmen

Los Angeles Architectural Club has recently embarked on a program to make itself a factor of definite usefulness in the building development of the community, it was stated yesterday. Heretofore its activities have been largely devoted to the social and educational interests of members.

To make the program effective the club has opened a new office in Room 510 Architects' Building, with Miss Virginia Smith in charge as executive secretary.

The new plans include the formation of an employment bureau and a small house plan service and are intended to aid not only members and architects, but the public as well.

The employment bureau has been created to help place, without any fee, all unemployed draftsmen who will register with the club.

With the active co-operation of all the architects interested in the development of California's small housing, the small house plan service of the Architectural Club wants to be of definite benefit to the builders of small homes, it is declared. To encourage artistic building the small house plan service will sell stock plans designed by capable architects at a nominal price.

WILLIAM M. GARLAND DELEGATE TO G.O.P.

Col. William May Garland, director-at-large of the California Real Estate Association, delegate for Coolidge four years ago at the National Republican convention, is a delegate this year on behalf of Herbert Hoover, and will attend the Kansas City convention in June, and the following week will be present at the Louisville convention where the realty men will select a national president. Col. Garland was president of the national association during the World War, and served two years. Following these conventions he will attend the Olympiad in Europe.

INDUSTRIAL MART ACTIVE: Manufacturing Property Brokers Disclose Deals ...
Los Angeles Times (1923-Current File); Jul 8, 1928;
ProQuest Historical Newspapers: Los Angeles Times (1881-1990)
pg. E5

INDUSTRIAL MART ACTIVE

Manufacturing Property Brokers Disclose Deals Consummated Recently Totaling $400,000

The expansion of local wholesale and manufacturing firms, as well as increased interest in the purchase of properties by investors, is indicated by a report of the J. W. Lewis Company, wholesale and manufacturing property brokers. According to Max Eisner, the head of the company, sales aggregating approximately $400,000 have been recently consummated, the majority being cash transactions.

The southeast corner of Sixth and San Pedro streets has been sold for the Francisca W. Shepherd estate to a local investor; it has a frontage of 200 feet on San Pedro street, 143 feet on Sixth street, and 125 feet on Crocker street. No immediate improvements are contemplated, as the lease on the present buildings occupying the property has several years to run.

Newmark Brothers, wholesalers of coffees, teas and spices, have acquired the triangular parcel at the southeast corner of First and San Pedro streets, which adjoins their present plant, giving this firm a combined frontage of approximately 307 feet on First street and 160 feet on San Pedro street.

The property at 1621-1629 South San Pedro street was sold for A. E. Nicholls to a local concern, which will improve it at some future time for its own use; the holding comprises 52,641 square feet, and has a frontage of 143 feet by a depth of 364 feet.

The Davis Upholstering and Furniture Company has purchased the northeast corner of Maple avenue and Thirty-third street from the Shepherd estate and has also acquired the existing lease covering the property. The site fronts 192 feet on Maple avenue and 104 feet on Thirty-third street, and has trackage at the rear; it will be improved in due course with a modern building several stories in height for the company's own use.

The United Tent and Awing Company will occupy the brick building at 759-761 North Spring street for factory and warehouse purposes, as soon as extensive alterations have been completed. The building is 43 feet wide by 171 feet deep, and is three stories in height on the Spring-street front, and two stories in height on the New High street front; it was purchased from R. McD. Taylor. The general offices and display rooms of the company will be maintained at its present South Los Angeles-street location.

The Mason Manufacturing Company, manufacturers of lamp shades, candlesticks and wrought-iron specialties, has acquired from the Austin Securities Company a parcel of ground at 858 East Sixtieth street, 120x223 feet in size, with trackage. Construction of a modern one-story and mezzanine brick factory building costing $50,000 already has been started and is being rushed to completion for occupancy by the company.

Apartment for Wilshire Area Costs $750,000

Construction of a $750,000 five-story apartment hotel in the heart of the Wilshire district is rapidly gaining headway, according to Alfred T. Pelton, president of the Interstate Mortgage and Investment Company. The new building, which last week reached the third-story stage, is at 720 South Normandie avenue.

The plans, drawn by Milton M. Friedman, architect, call for an imposing structure of French renaissance in design. It will be known as the Chalfonte, and upon completion it is to be under the direction of I. C. Cordean, managing director for all apartment-houses and hotels owned and operated by the Interstate company. The Chalfonte, it is understood, will contain 100 up-to-date apartments.

According to Mr. Pelton, no definite date for completion of his company's new acquisition in this exclusive district has been set. It was indicated, however, that the building should be ready for occupancy by December 1, next.

FAIR-SIZED AWARDS IN STEEL MART

Consumers Purchase Only for Present Demands With Trading Moderate

BY DON PRETRIDGE
Associate Editor, Iron Trade Review

In commenting on the condition of the Pacific Coast iron and steel markets this week, Iron Trade Review will say: "Trading was not heavy and present indications point to lessened demand during the next month or two. Little third-quarter buying is being indulged in, consumers being content to purchase only for their immediate requirements.

"Concrete bar awards totaled 1114 tons, bringing the aggregate for the year to 48,759 tons as compared with 25,150 tons for the corresponding period in 1927. The largest letting involved 425 tons for a power house, penstock and dam at Eugene, Or. The Pacific Coast Steel Company took 175 tons for an apartment on Spring street, Seattle. Bids open on July 16 for 2300 tons for Drainage Improvement District No. 26 at Los Angeles.

"Little new business is before plate fabricators for figures and awards totaled less than 600 tons. The Moore Drydock Company obtained 575 tons for a carfloat for the Santa Fe at San Francisco. Awards so far this year total 16,341 tons as compared with 45,072 tons for the same period last year. Sacramento will open bids next week on 100 tons of three-sixteenth material for a riveted pipe line. Prices are weak and 2.25 to 2.30 cents c.i.f. represents the range.

"Several fair-sized structural awards were placed this week and included 1700 tons for the Spokane Medico-Dental Building, booked by the Hodius Steel and Equipment Company; 1125 tons for the Kettle Falls bridge in Washington, placed with the United States Steel Products Company; 900 tons for a factory for the Illinois-Pacific Glass Company at Vernon, taken by Llewellyn Iron Works, and 470 tons for an apartment in Los Angeles, awarded to the Baker Iron Works. To date this year 77,597 tons have been booked as compared with 79,229 tons for the corresponding period in 1927. New inquiries include 450 tons for a clinker storage building at Seattle for the Pacific Coast Cement Company. Prices are firm at 2.35 cents c.i.f.

"The only cast iron pipe award of importance involved 1260 tons of twenty-inch Class B and 884 tons of six to twelve-inch Class 250 for Los Angeles, placed with Grinnell Company and the American Cast Iron Pipe Company, respectively. To date 43,565 tons have been booked, compared with 47,462 tons for the same period last year."

Realty Shows Large Profits to Investors

"Land is the foundation of all wealth," a well-known truth and to Los Angeles in particular is this aphorism applicable.

A striking example of the profits that have been derived from investments in real estate syndicates is incorporated in a financial statement of Hugh Evans & Co., which shows the percentage of returns on a number of their subdivisions activities: Wilshire-Fairfax, 285 per cent; Westgate Acres, 410 per cent; Lower Tiger Tail, 245 per cent; Hollywood Scenic, 300 per cent; Hollywood-Beverly, 280 per cent; Hollywood Vista, 300 per cent; Colina Park, 300 per cent; Western avenue industry, 350 per cent, and Hollywood Crescent, 1050.

MAGIC CITY EXPOSITION WILL OPEN

Transition of University Area to Be Shown in Display Next Week

The Magic City Exposition at Westwood Hills will be opened next week, the Janss Investment Company announced yesterday.

The exposition is housed in a miniature oasis, especially created by a noted landscape architect. With the Aladdin lamp idea as a motif, the exhibit will deal with the transition of Westwood Hills from a grain field to a city of 2000 homes during the short time since it was opened. The location is on Loring avenue, adjacent to the new University of California campus.

The purpose of the exhibit is to illustrate the great changes which have taken place in Westwood Hills since development was started by the company. It will also offer plans for future development including the new business village adjacent to the university campus. It is pointed out that while partial plans for the village project have been disclosed from time to time, the exposition will offer visitors their first practical glimpse of many of the unique features planned.

AUTO COMPANY TO ENLARGE QUARTERS

HUNTINGTON PARK, July 7. (Exclusive)—The Howard Automobile Company has started the construction of a two-story brick addition to its present building on Pacific Boulevard, which, when completed, will cost approximately $20,000. W. C. Payne, local contractor, has been awarded the contract.

REAL ESTATE BOARDS ASK BRANCH OFFICES

A number of local realty boards throughout the State have passed resolutions urging establishment of more branch offices and resident deputies by the State Real Estate Department in order to increase the efficiency of its jurisdiction in communities now served by the adjacent metropolitan area. Among the boards which have passed such resolutions are Long Beach, Pasadena, Riverside, San Jose, Santa Ana, Santa Barbara and Van Nuys, according to an announcement from the California Real Estate Association headquarters.

ProQuest Historical Newspapers: Los Angeles Times (1881-1990)
pg. E5

HOMES REPRESENT HUGE SUM

Twelve Dwellings Added to Magic City Exhibition in Westwood

Los Angeles may now boast its first million-dollar home exhibit, with the addition this week of twelve new homes to the Westwood Hills magic city home exposition, announced this week by the Janss Investment Company.

With a value of $120,000, the homes bring the total investment in the exhibit to $920,000, according to an estimate by A. Harold Wilkins sales director of the Janss organization. This includes the cost of the unique exhibits included at the magic city headquarters.

A total of sixty-eight new homes are now open for inspection as a part of the exhibit, which has proven the most successful in the history of the event. The homes range in value from $6500 to $60,000 and in size from five to ten rooms. Visitors are welcome both daily and Sunday from 9 a.m. until 6 p.m. Locations are furnished by attendants at the magic city headquarters, located in the tent near the intersection of Beverly and Beverly Glen boulevards.

One of the features of the exhibit which has proven unusually interesting to visitors is the first complete plan of the new university business village. The village, planned to be one of the most beautiful and complete community business centers in America, has been attracting wide attention in city planning centers. This week for the first time two miniature models of the first buildings to be erected in the village have been added to the display.

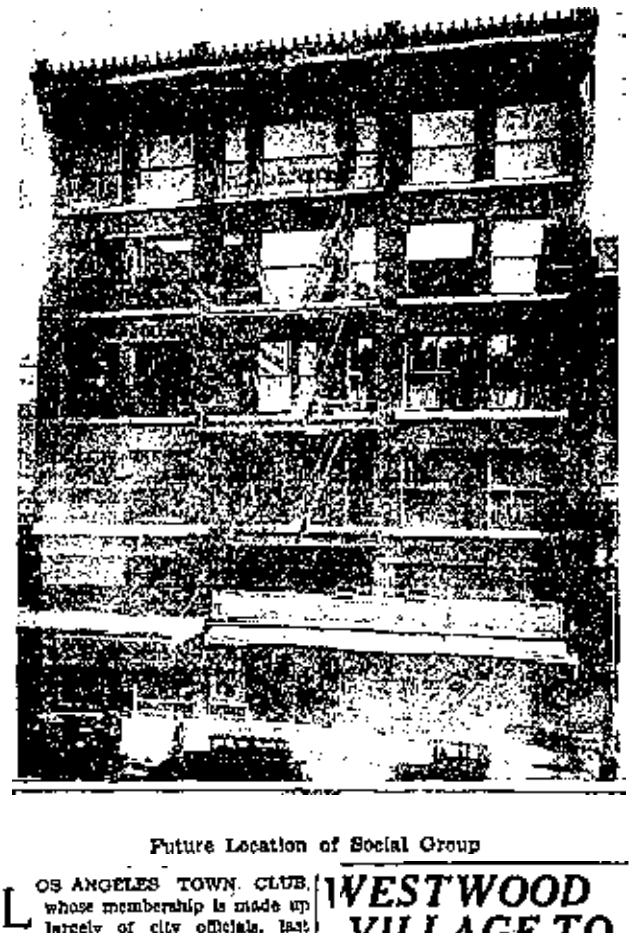
TOWN CLUB TO HAVE NEW HOME: Organization Will Remodel Building
Los Angeles Times (1923-Current File); Mar 24, 1929;
ProQuest Historical Newspapers: Los Angeles Times (1881-1990)
pg. E16

TOWN CLUB TO HAVE NEW HOME

Organization Will Remodel Building



Future Location of Social Group

LOS ANGELES TOWN CLUB, whose membership is made up largely of city officials, last week leased for twenty years the five-story Hosfield Building at 240 South Broadway. Harry Grossman, real estate broker, who handled the deal, announced the rental, together with improvements, to be made to be in excess of $500,000.

The structure, which has a sixty-foot frontage on Broadway and a depth of 160 feet, will be entirely renovated for athletic and social club purposes.

The board of governors of the organization includes Harry E. Ingley, Police Commissioner; Mayor Cryer; Clarence J. Morley, former Governor of Colorado; Daller A. Bigford and Leonard Wilson, judges of the Municipal Court; Dr. E. J. Lickley, ex-City Prosecutor; Chief of Police James E. Davis; Fire Chief R. J. Scott; Frank E. Johnson of the People's National Bank; L. V. McCarslo, secretary of the city Pension Commission; W. H. Anthon, building safety commissioner; A. Robert Kellogg, captain of police; Dana Hosen of the San Americano Petroleum Company; John McKeon of the Richfield Oil Company; John R. Quinn of the Bergland National Bank; M. L. Stern of the May Company; Dr. W. C. Lucas; Albert C. Page of the Union Oil Company; Munro Montgomery of Montgomery Brothers; E. Manchester Boddy of the Illustrated Daily News; Thomas L. Garrett for the United States Veterans' Bureau; Harry M. Sugarman and Maj. J. M. Leuebbobough, both of West Coast Theaters, Inc.; W. A. Knoet of the Pacific Mutual Life Insurance Company; Lewis B. Whitehead, assistant City Attorney; F. W. Pasek, W. P. Troth and M. A. McDonnell.

Paving Work on Short Cut Has Started

Work started last week on the paving of the first unit of the proposed Pasadena-San Fernando Valley short-cut through La Tuna Canyon, according to the Los Angeles City Engineering Department.

Starting from Clybourne avenue in Roscoe, both Radford and Penrose avenues will be paved, connecting with La Tuna Canyon Boulevard at Wheatland avenue. A twenty-foot concrete strip with five-foot shoulders will be carried up to within a short distance of Belmont Country Club in the first part of the program. This paving, according to Roy Hambaugh of Phillips & Hambaugh, developing Belmont Country Club, will furnish motorists with a scenic drive near Los Angeles.

Councilman Charles Randall of this district declared that a petition is on file for the completion of the paving over the pass in La Tuna Canyon, connecting with Honolulu avenue in Sunland, thus bringing Pasadena and San Fernando Valley points fifteen to twenty minutes closer. This part of the work is expected to come later this year, he indicated, as city engineers are now plotting the route at the Van Nuys offices.

SOUTH GATE LOTS SOLD

SOUTH GATE, March 23. (Exclusive) — Twenty-one lots belonging to Thomas Watkins, bond and investment broker of Chicago, have been sold to M. M. Pearson, an eastern investor, according to McGreyne & Silvester, real estate men. It is stated that the new owner will build on the newly acquired property.

AIRPLANE BRINGS SCHOOL PUPIL

First Student to Use This Method of Travel Enrolled at University College

University College has registered its first student to come to school by airplane.

F. M. Nicholls of San Diego flew up to Los Angeles last Monday night, when the spring quarter of the downtown division of the University of Southern California opened, and enrolled in a class in building and property management which is headed by Rollin H. Drake, superintendent of buildings, Santa Ana schools.

Nicholls is superintendent of the new California Building in San Diego, and plans to attend the class in building management at the Trojan night school, which is scheduled to meet on Mondays from 7 p.m. to 9:30 p.m. for the next twelve weeks.

WESTWOOD VILLAGE TO OPEN SOON

Location Requests Being Received from Business Concerns Here

Preparations for the opening of the Westwood Hills Business Village area are being completed according to the Janss Investment Corporation.

In declaring the tentative opening date for the Village as the first week in April, Edwin Janss announced that an added service to prospective investors and store owners has been provided by the forming of a business research department.

This department is engaged in preparing data relative to the commercial prospects of the various types of business needed in the Village area.

"As the date set for the opening nears," Mr. Janss said, "we are finding the interest of investors and store operators mounting, due to the limited amount of business frontage which will be available. As the protective restrictions on the adjoining properties make any enlargement impossible, it must be realized that the business frontage opened at the beginning must suffice for years even in face of predicted customer growth.

"While the student population of the new Westwood Hills campus of the University of California will undoubtedly provide considerable revenue for merchants who locate in the Village which directly adjoins the campus at the southern entrance, expert advisers point out that the central location fronting on Wilshire Boulevard will insure a clientele not only from Westwood Hills, but from the entire surrounding area which comprises the fastest developing section of the city.

"Our files already hold location requests from many of the leading downtown merchants of this city and San Francisco. The initial building program, which is expected to get under way about April 1, calls for two Mediterranean type structures costing approximately $400,000 exclusive of land value."

Many Listen to Lecture on Boulder Dam

East Side residents to the numbers of 750 gathered at the Beverly Boulevard Assembly Hall of the J. B. Ransom Corporation Monday evening to hear Willis E. Stone speak on "The Boulder Dam Project and What It Means to Southern California."

The gathering was arranged by President Ransom to accommodate people who were unable to hear Stone when he first delivered his lecture to members of the sales organization, in conjunction with the educational program which the Ransom Corporation is sponsoring for its salespeople.

The official Los Angeles Bureau of Power and Light motion picture, "Taming of the Giant," was also shown.

Master Plan for Redlands Higher Sections Sought

REDLANDS, March 20.—A master plan to which all future development on the heights section of this city, especially along Sunset Drive, will conform is to be presented by the Planning Commission to the City Council and property owners. It is the largest plan of the kind ever proposed here. The properties affected lie east of Smiley Heights and include the country club area and tracts lying on both sides of Sunset Drive.

In this area, according to discussion at a meeting of the Planning Commission last night, lies one of the most vital developments for Redlands. If controlled and properly developed it will mean millions for the community, but if allowed to continue without proper planning it will be a hodge podge of unattractive hill settlements, the commissioners declared.

DEMAND IN FOOTHILLS INCREASING

Many Lots Purchased Near Site of San Gabriel Dam for New Homes

Lots are in increasing demand by prospective builders in the foothill district near the site of the San Gabriel Canyon dam, according to Penn Phillips, Los Angeles real estate dealer. Phillips declared that he had just sold thirty building sites at Azusa to persons who are planning to erect homes on all of them.

Plans for houses for five of the thirty lots have already been drawn. Construction of these is to be started at once.

"The old law of supply and demand is causing a building activity at Azusa and near-by places that has never been realized there before," said Phillips. "This activity is following the commencement of construction of the $25,000,000 flood control dam in the San Gabriel Canyon.

"When builders buy lots in quantity in any district, it is certain that a construction boom is at hand. But Azusa and the San Gabriel dam district in general are not alone in this promising activity, for I am sure that the whole of Southern California is now entering an unusual era of prosperity, which will aid the real estate market.

"Unless my deductions are wrong, we will soon be enjoying a very much improved real estate market. This will be promoted by the large amount of money that will be put into circulation here during the construction of the Boulder dam and other large civic projects, including the aqueduct for the Metropolitan Water District.

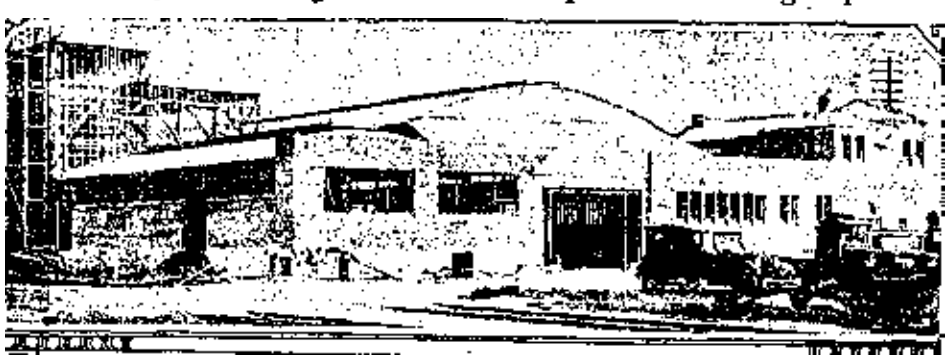
Factory Building Will Be Completed During April



California Stucco Plant Under Construction

Designers of the plant shown above aim to give it an architectural beauty comparable to public buildings. The Austin Company, builders, declare the structure will be ready for occupancy within two weeks.

INDUSTRIAL UNITS RUSHED

Builders for Manufacturers Report Structures Will be Ready for Occupancy Next Month

The Austin Company of California reports construction for several firms identified with the local building industry. Among the plants now building are the California Stucco Company, manufacturer of stucco and plaster materials; Hunt Putty Company, manufacturer of wood and steel sash putty; the Conveyor Company, designers and builders of building material handling equipment, and the Schumacher Wallboard Company.

The plant of the California Stucco Company, Central avenue and East Sixty-second street, is nearing completion and is intended to be one of the most beautiful industrial buildings in Southern California. It will be of Spanish design, two stories in height with a basement and 147 by 188 feet in area, containing 18,000 square feet of factory floor space on the first floor. It is expected to be ready for occupation within the next two weeks.

Work on the plant of the Hunt Putty Company will be completed this week. The structure, which will house the only firm on the Pacific Coast manufacturing putty exclusively, will have a capacity of 14,000 pounds of putty per day. It is located at Seventy-eighth and Nadeau streets.

Work on the plant of the Conveyor Company was started last week. It is to cover five and three-fourths acres.

The factory will be 100 x 129 feet of corrugated steel construction and saw-tooth design. The brick office building will measure 110 x 50 feet.

An addition to the plant of the Schumacher Wallboard Company will be completed this week. This unit consists of a material handling plant with a sixty-foot elevator for dumping materials into mixing bins, a material receiving building and underground pit for the conveyor system.

WESTWOOD WILL OPEN UNIT SOON

Erection of Two Business Buildings Near University Starts This Week

Preopening reservation requests for property in the Westwood Hills Business Village unit has made it necessary to place the property on the market one week ahead of schedule, Edwin Janss of the Janss Investment Corporation announced this week.

Preopening demand for lots in the village exceeded that of any unit opening in the twenty-seven-year history of the Janss organization, according to A. Harold Wilkins, vice-president and sales director.

The first two buildings to be erected in the village area will go under construction tomorrow. They will embrace thirty outlets, or store rooms, and cost approximately $500,000 to complete. Plans for additional village structures are now virtually completed, it was announced, and include one of the most attractive branch bank buildings ever projected.

The village is planned to be in operation as a complete trading center by the opening of the fall semester at the new University of California campus, at which time it has been announced by university authorities that the entire student enrollment of some 6000 will be removed from the present Vermont-avenue location to Westwood Hills.

The location of the village is considered one of the most commercially valuable ever projected in recent years, according to business property experts.

HEAD OFFICE OPENED BY LINDSAY COMPANY

LINDSAY, March 30. (Exclusive) A San Joaquin Valley headquarters for the Brogdex Company, owners of patent processes for treatment of fruit prior to packing and shipping, has been established here. Several crews are at work installing equipment in eleven citrus packing-houses in this and adjoining districts. The company is maintaining a warehouse and supply depot as well as office headquarters here.

MANY VISIT RUNNYMEDE PULLET UNIT

Central Poultry Plant Had Formal Opening to Public Last Week

Last week Runnymede threw open its central poultry plant and new pullet farm for the inspection of the stockholders of the company, many of whom had never visited these plants before.

Five hundred people were present to hear a report of the company's activities and progress and to see how these two plants are operated. The visitors were driven around the plant, which occupies eighty acres, shown through the packing-house where the eggs are graded and packed for shipment, and taken on a trip through the various tracts of land which the company has been marketing and which lie within a few miles of the plant.

A luncheon was served and D. H. Riker, president of the Runnymede Finance Company, reported the progress of the company. His report showed installment real estate contracts receivable as of January 31, amounted to $1,749,875.15, and that the company had total assets of $2,867,752.69, with a net worth of $785,993.56 after provision for Federal taxes.

W. G. Laussen, founder of the town of Reseda, told the audience that he attributed 60 to 70 per cent of that town's recent growth in population and business activities to the Runnymede project, which is located there.

NEW ESTATE WILL BE ON VIEW TODAY

Vista del Lago to Be Open for Inspection by Appointment

Following the recent opening of 325 acres of residential estates in Hollywood Knolls, G. W. Newport, sales manager, announced yesterday the completion of Vista del Lago. Newport declares that Vista del Lago has been built by the owners and developers of Hollywood Knolls not only to demonstrate the limitless possibilities for individual architecture to which the sloping hills of this property lend themselves but to set a precedent of typical Southern California architecture and complete home decoration.

Ashton & Denney were the architects of this expansive estate, which represents a strict adherence to the true type of Spanish design. The interiors and complete furnishings were executed under the personal supervision of Paul Francesco Lupo, while the furnishings and draperies have been supplied by Los Angeles concerns and are said to be striking examples of the artistry of California craftsmen.

Vista del Lago will be formally opened for inspection by appointment today, according to Newport.

WALNUT PARK WORK TO BE STARTED SOON

WALNUT PARK, March 30. (Exclusive)—Street construction work is soon to be started on the south side of Florence avenue in county territory. The contract has recently been awarded to Griffith Brothers of Los Angeles.

Lindsay Orange Grove Figures in Transaction

LINDSAY, March 30. (Exclusive) R. E. Bartlett and M. Hallested of Oakland have purchased the twenty-acre orange grove three miles northeast of Lindsay owned by Mrs. Jessie Cruickshank. Hallested and Bartlett in turn disposed of this place to Z. E. Page and H. E. Whelden of Lindsay.

The grove is one of the best producers in the district, the trees being about sixteen years old. It consists of ten acres of navels and ten of Valencias. While the consideration was not given, groves of similar valuation in this district recently have brought $1500 per acre.

BELL WATER COMPANY BEGINS STRUCTURE

BELL, March 30. (Exclusive)—The Bell Water Company has started the erection of a new two-room stucco office building to be located on Otis avenue, south of Baker avenue. The new building will be used for the transaction of the company's business here.

EXTENSION OF BEVERLY SUGGESTED

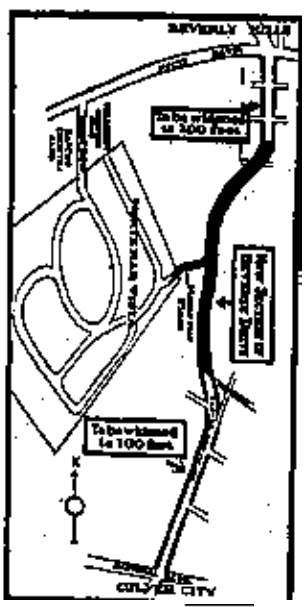
Major Boulevard Plan Would Open Route Both to Beaches and Valley

Plans for making Beverly Drive a major intercommunity boulevard extending from Van Nuys in the San Fernando Valley to the beaches southwest of Inglewood were forwarded Tuesday when M. M. Morris, president of the Greater Beverly Drive Improvement Association, filed a petition with the City Council requesting authorization to widen and extend Beverly Drive from Pico street south to Exposition Boulevard at the city limits of Culver City. The petition also requested a short connecting extension of Monte Mar Place to form a new east entrance to the community of Monte Mar Vista, lying between Rancho, Hillcrest and California country clubs, an area now reached only by Motor avenue from Pico.

Beverly Drive from Pico Boulevard south to Sixteenth street and Castle Heights avenue from Exposition Boulevard north to Cattaraugus street are already open but under the proposed proceedings they will be widened to 100 feet. The long gap through the Marble Head Land Company and the Wachter property will be condemned and improved for the same width, thus producing a direct connecting link between Beverly Hills and Culver City shorter than any boulevard now existing. Maps of the proposed improvement were presented at the same time by the engineers, Henry Z. Osborne and Walter E. Jessup.

The Beverly Drive petition carried the indorsement of the San Fernando branch of the Los Angeles Chamber of Commerce and the Chambers of Commerce of Ventura Boulevard, Beverly Hills, Palms, Inglewood and Culver City.

INTERCOMMUNITY BOULEVARD DUE



New Route to Beaches

A movement has been started by the Greater Beverly Drive Association to widen and extend the drive from Pico on to the beaches, and to make a shorter route to Culver City.

STUDENTS TO DIRECT PLANTING OF SHRUBS

LOMITA, March 30. (Exclusive) One hundred and fifty varieties of trees and shrubs have been brought to the Narbonne High School grounds through the courtesy of the California Botanical Gardens, and are being used to beautify the grounds. A. F. Willebrandt, director of agriculture and Kazamosa Hirata of the senior students are directing the plantings.

MARKETING METHOD SOUGHT

Rabbit Breeders in Session Consider Co-operative Marketing Idea as Solution to Problem

Methods of marketing rabbits of breeding-stock were discussed at a meeting of the Fontana Rabbit Breeders' Association held recently at the United States Rabbit Experiment Station in Fontana.

The discussions resulted in an agreement that best procedure is a marketing plan along the lines of that operated by the poultry industry in that community.

The California Rabbit Breeders' Association has appointed a committee to submit a method of solving the problem, and the local association delegated W. F. Danvers to serve on the committee.

President A. M. Davidson submitted the California Rabbit Marketing Association report presented by John T. Lunch, explaining the methods for co-operative marketing of fur and meat stock; and many of the members in this district signed contracts to do their marketing through the association. There was also a general discussion for the co-operative buying of hay. The breeding of rabbits is declared one of the major industries in the community of Fontana and close co-operation among the ranch owners is desired. Early acceptance of workable plans is now looked for in this district.

John W. Mejrr, acting director of the Federal rabbit station, reported that Dr. Roger W. Truesdell, of Pomona College, will lecture to the Fontana rabbit breeders on the subject, "Spark Plugs of Nutrition," at the next regular meeting, April 2, at the Fontana Woman's Clubhouse.

Apartment and Store Building Development Planned

Structures Will Rise at Florence and Western Avenues

A $250,000 development for Florence and Western avenues, $100,000 of which will be expended at once, the balance later, was announced last week. A four-story apartment with two store rooms on the main floor costing $75,000 and a $25,000 garage building will be erected soon. A second apartment, a two-story bank and office building, and a drive-in market costing, in all $100,000 are planned for the future Kemper Nowland, architect, Chamber of Commerce Building, drew the plans for J. Y. Parker, owner.

FIRM REPORTS MANY DEALS

Transfers Along Whittier Boulevard in Belvedere Gardens in Six Months Total $1,000,000

The sale of thirty-two parcels of real estate in the past six months involving in excess of $1,000,000 was announced last week by A. C. Hastings of the firm of Coldwell, Cornwall & Banker. All of the property was business frontage along Whittier Boulevard in Belvedere Gardens.

Many of the sales are reported to be of developed property now occupied by chain store concerns. Other sales were of unimproved corners which will be improved with business buildings.

Chief among the sales are: Southwest corner of Whittier Boulevard and Arizona avenue for $85,000; eighty-five feet of frontage between Arizona and Kern avenues to Ralph Kolb Chamberlain, for $90,000, later leased to the F. & W. Grand Stores, Inc., for twenty-five years and to be improved at the expiration of present lease; northwest corner of Kern avenue fronting sixty feet on Whittier Boulevard to Charles R. Shrub of San Francisco; southwest corner of Fullerton avenue and Whittier Boulevard, ninety-one-foot frontage, for $73,000 to M. L. Frohling; the southeast corner of the same intersection with the same frontage to Ralph Chamberlain for $63,000; and the northeast corner of Woods avenue and Whittier Boulevard with a frontage of ninety-one feet to the Investment Properties Corporation for $70,000.

Other properties sold include eighty feet near Vancouver avenue to O. J. Rector for $35,000; eighty feet near Clark avenue for $18,000 to C. J. Gonaker, and forty feet of frontage near Woods avenue to C. M. Bishop for $28,000.

INCREASED ACTIVITY IN AREA SEEN

Many Buildings Being Constructed in Beverly, Fairfax Section

Increased activity in the Beverly-Fairfax area, following completion of paving of Beverly Boulevard, and the extension of the bus line from Harper avenue to La Cienega Boulevard, was reported yesterday by Jack Evans, manager of the Wilshire office of Hugh Evans & Co. extensive operators in that territory.

This activity is apparent from La Brea avenue to La Cienega, according to Evans, but particular interest in Beverly Boulevard between Fairfax avenue and La Cienega has been indicated recently by a number of major sales between those arteries. Sale of the corner of Beverly and Hayworth just one block west of Fairfax, was negotiated by Hugh Evans & Co. recently, the purchase price said to have been in excess of $55,000.

Six new buildings have risen on Beverly Boulevard between Fairfax and La Cienega since the first of the year, and a number more are projected for early construction, according to Evans.

Teasdale Goes to Continental as Executive

Clayton A. Teasdale of Los Angeles has been elected vice-president of the Continental Casualty Company with headquarters in Chicago according to a report from that company.

Teasdale has been president of the California Agencies, Inc., for many years. His appointment came in recognition of his success in the California field.

SECOND UNIT AT VILLAGE ANNOUNCED

Business Block to Rise at University Entrance Early Next Month

The second large business block to go under construction in Westwood Village at the entrance to the University of California campus will be started May 1, it was revealed this week.

The structure, to cost approximately $250,000, will be of Spanish Mediterranean architecture in keeping with the general improvement plan for the village and is to be completed before the scheduled opening of the university in September. It will occupy an entire block of Westwood Boulevard frontage, extending from Le Conte to Weyburn avenue and is directly across the street from the recently announced $50,000 improvement for the entrance to the university campus and buildings from Westwood Village.

This business block is the seventh improvement to be announced for the village since its opening less than a month ago, according to officials of the Janss Investment Corporation, and brings the value of announced and started construction to approximately $750,000 during that period, it is estimated.

Already under construction is a $200,000 store and office building, the Doheny dormitory, Helen Matthewson dormitory, Masonic clubhouse, Chi Omega sorority house and ground has been broken for a large Y.W.C.A. dormitory.

Lake Club to Hold Blossom Fiesta in May

Lake Norconian Club is preparing for a blossom festival scheduled for Sunday afternoon, May 5.

At this festival will appear Michio Ito, interpreter of Oriental lances, who will offer a number of "dance poems and color visions" expressive of the Orient.

According to Rex B. Clark, owner-manager of the club the summer months will bring a notable gathering of representative Americans interested in golf, swimming, riding aquatic sports and other country club and recreational features for which the Lake Norconian Club is known.

New Loan Firm in Operation at Beverly Hills

The Consigny Building and Loan Association began operation in Beverly Hills yesterday. Eugene F. Consigny, president of the Beverly Bond and Mortgage Company, Inc., heads the new association.

Other officers are Arthur L. Erb, vice-president; Walter H. Sage, vice-president; William Gibson, secretary and treasurer. The directors are Walter H. Sage, Eugene F. Consigny, C. R. Tuttle, William Gibson, Arthur L. Erb, Charles D. Lamb and Anita B. Consigny. Members of the advisory board are F. N. Benham, Thomas O. Bonney, Woodworth Clum, H. Clay Dean, Dr. Howard G. Dennis, Edward J. Hummel, H. S. Harrison, Carl Imhoff, Earl C. Jameson, M. J. O'Rourke, Charles S. Robinson, E. O. Rutherford, Fred M. Shelton, E. F. Stoltz, Vance W. Wallin and Richard O. Waltz.

New Slauson Avenue Plant Almost Ready

Within the next thirty days the new plant of the Conveyor Company located at East Slauson and Boyle avenue will be ready for operation, according to the Austin Company, engineers and builders.

The two-story office building and warehouse is practically completed and the steel frame work of the mill building has been erected.

The factory building will be 100x120 feet, of corrugated steel construction and sawtooth design. The office building will be of brick, 110 by 50 feet. The front section, 40 by 50 feet, will be two stories, while the remainder will be a one-story warehouse.

Comprising nearly six acres, the new site will enable the company to greatly increase production. All structural assembly will take place in a large outdoor shop.

Gas Appliance Company to Build on Bay

The Ward Heater Company, gas floor furnace producers, yesterday announced through its president, E. E. Sproat, consideration of plans for establishment of a branch factory or assembly plant in Oakland. This decision was made following the return from the San Francisco Bay District of Wiley J. Kerr, general manager, who surveyed business conditions as affecting the local concern in that territory.

The volume of sales in Northern California recently reached proportions which made the preparation of such plans necessary, Sproat declared. Demand for gas burning home-appliances took an upward trend almost a year ago when contracts were signed for the piping of natural gas from the Kern and Kings county oil fields to San Francisco and adjacent cities.

TRADE EAST OF ROCKIES FOUND GOOD

Cement Company Official Back From Territory Says Busy Building Year Seen

Completion of plans for another Los Angeles industry to extend its market to new and more distant fields was announced yesterday by O. A. Low, vice-president of the Monolith Portland Cement Company and the Monolith Portland Midwest Company, following his return from a six weeks' survey of the territory just east of the Rocky Mountains.

The company's headquarters in the Midwest field are at Denver and a large sales force has just been completed and is functioning under direction of S. D. Clinton, Low said. More adequate quarters have just been established in Denver in the Security Building.

"The section from which I just returned had a severe winter, with the result that construction activity has been retarded," Low explained. "Prospects for an unusually heavy building year are apparent, however, and our new $2,000,000 plant of the Midwest company at Laramie, Wyo., is operating at capacity now in anticipation of what is to come. Nebraska, Wyoming and Colorado have been backward in highway construction, but have come to a realization that good roads make for prosperity. Consequently, their eyes are turned toward their highway plans and much activity in that line of construction is probable."

NEW HOMES TO RISE AT DANA POINT

Seacoast Community Plans Many Dwellings to be Built During Summer

Added impetus to the building campaign under way at Dana Point is reported by Harry T. Hudson, sales manager of the seacoast community, midway between Los Angeles and San Diego. Dempsey Brothers, builders, have started a series of homes at Dana Point. George W. Cassil, builder, of Riverside, has started the first of a series of homes on view lots.

The American Builders, Inc., of Los Angeles, report that they will start within two weeks the erection of a business and apartment structure and a bungalow court. The Lincoln Mortgage Company has contracted for two homes, which will soon be started on the palisades, with plans for others under way. A number of others are preparing for homes, residential income and business buildings at Dana Point.

"While Dana Point is not a seasonal proposition," declared Hudson, "it is true as in the case of all other seacoast developments, that the spring and summer months are, from a psychological standpoint, the most active in developing property of this character. As a result, we are augmenting our present sales organization by forming sales divisions throughout the communities of Southern California, such as San Bernardino, Redlands, Riverside, Pomona, San Diego, Santa Ana and many others, and at the same time materially adding to our Los Angeles sales force."

pg. D12

Many Inspect Business Area at Westwood

Nearly 10,000 persons inspected the site of new Westwood Village the model business area adjoining the University of California campus, during the past thirty days according to estimates from the Janss Investment Corporation offices.

A number of stately palms, each more than fifty feet in height, have been placed in the central parking through Westwood Boulevard and this improvement, together with a semitropical landscaping of the property at the entrance, is proving an added incentive to motorists to drive through the village and thence north along sorority row and the university campus to Beverly Boulevard.

Janss organization officials expect that the village construction now under way will be completed by the middle of September in time for occupancy when the campus opens on the 20th inst.

Beaches Will Greet Visitors Over Holidays

Hundreds of thousands of persons are expected to visit the beaches today and tomorrow for the final holiday of the vacation period Mandalay Beach with a three-day program planned, is preparing for thousands, according to Elmer C Phipps, general sales director.

Free dressing rooms and showers for bathers, dancing, punch, balloons for kiddies and a guessing contest are among the attractions planned for Mandalay over this week-end, Mr. Phipps declared. The new administration building constructed along East Indian style of architecture, is practically completed and will be used for dancing, Mr Phipps said.

Increasing numbers are flocking to this beach each week, according to reports from Homar Jukes, tract manager. The improvement program includes landscaping, piers yacht harbor, and the development of 700 acres of land immediately adjoining the beach for airport, golf course and polo field.

Glass Concern Delays Start of New Plant

SANTA ANA, Aug. 31. (Exclusive)—The Pittsburgh Plate Glass Company, which purchased a large tract of land for a big factory in Santa Ana, may not start actual construction of its plant for several months, it was intimated today by William C. Jerome, president of the local Chamber of Commerce.

When the bean crop of the former owners of the site on Bristol street is harvested, probably late in September, the glass company will undertake boring operations in connection with the plant's foundation. These borings may require several months.

Secretary George Rayner of the Chamber of Commerce is expected to return from the East in a month with full information concerning the company's plans, Jerome said.

JEWISH COMMUNITY CENTER TO BE BUILT

HUNTINGTON PARK, Aug. 31 The B'nai Yehuda congregation of this city has purchased the property at 6008 Middleton street, and the seven-room house on this site is to be remodeled as a Jewish community center. It is expected that the work will be completed by the 15th inst., so that the building can be dedicated on that date. This building, however, will be used only temporarily. Louis Jaffe is chairman of the building committee.

BELL REALTY BOARD TO RESUME SESSIONS

BELL, Aug. 31. (Exclusive)—Members of the Bell Realty Board who have been holding sessions only once a month during the summer months, will resume their weekly sessions Wednesday night when they will meet in the offices of the Chamber of Commerce.

WESTWOOD VILLAGE TO CELEBRATE

Community Plans Affair for Formal Opening Next Month

Although a number of firms in the Westwood Village have held individual openings during the past few weeks, the general celebration and formal opening of the business village is being planned for early next month, according to recent reports.

The event, heralded as the outstanding celebration held in Westwood Hills since the opening of the university at its new campus, will attract thousands, developers declare. Several large features are planned under the supervision of the Janss Investment Corporation, which is fostering the new Westwood Village business district.

Tentative plans for the opening were discussed at a recent meeting of merchants now located there or soon to open establishments, university regents and faculty. Chamber of Commerce officials and several members of the Janss Investment Corporation, all of whom were guests of Dr. Edwin Janss and Harold Janss at a luncheon meeting held in Holmby Hall in the village. Following the meeting the party inspected the various buildings.

Preparations are now under way for the formal opening of the Janss Investment Corporation offices in the new $300,000 administration building located on Westwood Boulevard midway between Wilshire Boulevard and the entrance to the U.C.L.A. campus.

It is reported that approximately fifty new stores will be located in the Westwood Village at the university campus entrance.

Settlement for Mexican Laborers at Catalina

Spanish Architecture Features Street

Above is shown the Mexican settlement at Catalina Island, built by William Wrigley, owner, to solve the housing problem at the island. Low rents and cleanliness are declared features of the plan.

New Dwellings Being Erected in Near-by Area

HUNTINGTON PARK, Nov. 9. (Exclusive)—Construction of a number of residential properties here is reported. P. V. King has started the erection of a two-story, sixteen-room, four-family apartment-house on Mountainview avenue to cost $9200.

Alice J. Rydell is building a home on Live Oak street at a cost of $4000. H. H. Sawyer has started the erection of a $2300 two-unit apartment on Marbrisa street. George W. Goodle is erecting a residence on Sixtieth street to cost $3000. William D. Bailey has begun the erection of a duplex dwelling on Stafford street, which is to cost $4500. Mr. Bailey also is erecting a garage with apartments above at the same site to cost $1900. Lyle Parsons is building a $2000 residence on Malabar street.

Desert Hotel Will be Opened Next Saturday

Rapid progress is being made on the final details of construction of the Del Tahquitz Hotel at Palm Springs, being erected for Fritzi Ridgeway, Hollywood screen star, with only approximately a week left before its scheduled opening.

Since Miss Ridgeway has tentatively set the date of the 16th inst. for the opening decorative artisans are rushing the details of the structure that it may be completed and furnished in the interval remaining.

The leaseholders, Mr. and Mrs. Arthur E. Hamilton, who have taken over the hotel for a period of fifteen years, have made preparations to take charge and assist in the opening.

Business Units Completed in University Area

Bringing the number of business houses in Westwood Hills to a total of fifty, the Weaver-Jackson Company this week announces a ten-year lease of quarters in the Holmby Building adjoining the southern entrance to the University of California campus.

The consideration is reported at $50,000 and is to result in a beauty parlor according to plans now being developed by the Weaver-Jackson organization. The structure will face Westwood Boulevard which is the main entrance artery into the university campus.

In announcing the closing of the Weaver-Jackson lease this week, the Janss Investment Corporation also reports that the store structures of both Ralphs Grocery Company and the Safeway organization are rapidly nearing completion and are expected to be occupied soon.

Large Acreage Near Visalia in Transfer Deal

VISALIA, Nov. 9. (Exclusive)—One of the largest real estate transactions announced here in recent months is that by which the 320-acre property owned by Mrs. Fannie Wilcox was transferred to L. L. Richard through the agency of Maurice Ryan, local realty broker.

The land sold is located about two miles southeast of Visalia in what is considered one of the most fertile areas in this district. Consideration in the transfer, though not confirmed, is said to be between $45,000 and $50,000.

Beverly Hills Twelve-Room Home in Deal

The Arthur M. Kelley Company of Beverly Hills, report the sale to Mr. and Mrs. Beverly Scott of Hollywood of the new two-story twelve-room Spanish home at 724 Rexford, situated on three-quarters of an acre of ground. The consideration named was in excess of $30,000.

The house was built and designed by William C. Schultz, who has been active in the building of larger homes in Beverly Hills.

NEW SIGNALS ORDERED

HUNTINGTON PARK, Nov. 9. Two additional traffic signals are to be installed in the city, the City Council ordering one at Santa Fe and Florence avenues, and the other at Irvington and Santa Fe avenues.

TUBERCULAR HOSPITAL TO BE ERECTED

Ground Will be Broken at Tucson Within Fortnight for Railroad Institution

TUCSON (Ariz.) Nov. 9. (Exclusive)—Within a fortnight construction is to be started on a $500,000 tubercular hospital for employees of all divisions of the Southern Pacific Railway system. The site is in the lower part of the city, near the Congress-street bridge over the Santa Cruz River, ground acquired, together with passenger and freight-station buildings, from the El Paso and Southwestern Railroad through consolidation of the two lines several years ago. Tucson has gained prominence as a health resort since erection of a $1,000,000 Veterans' Bureau hospital here.

A hospital, to cost $100,000, is to be erected this winter in Safford by the Morris & Squibb Hospital, Inc. It is backed by Dr. J. W. Morris and Dr. H. W. Squibb.

Safford has a new hotel, the Buena Vista, just completed at $100,000 cost, by Fred Waughtal, who has taken over its management. It is of Spanish type, with artistic interior finish. Fifty bedrooms have been provided, with a large lobby and parlors.

Plans are being drawn by Henry O. Jamstad for an $80,000 home for the local Young Women's Christian Association, which is headed by Mrs. J. W. Clarson, Jr. Construction will be started by January 1. It is proposed to provide clubrooms for several civic organizations, as well as dormitory accommodations for a large number of young women.

AGENT APPOINTED

SAN FRNANDO, Nov. 9. (Exclusive)—V. S. Walter, local real estate dealer, has been appointed agent in this section for Miller & Lux, owners of large tracts of land in San Joaquin Valley.

Hotel Under Construction at Coronado

SAN DIEGO, Nov. 9. (Exclusive) Arthur Kunze has been awarded the contract for the erection of a $75,000 hotel-apartment building to be erected at Coronado for Mr. Pickford. Construction is under way.

Architect Frank L. Hope, Jr. prepared the plans and specifications.

The structure will be of Spanish type of architecture and built in the form of a triangle with a large court in the center. It will be two stories and basement in height and will contain twenty-two apartments and thirty-six hotel rooms.

REALTY MAN BACK FROM EASTERN VISIT

Many tourists will visit California during the coming season and many easterners will come here to take up permanent residence, according to F. Winstanley, realty broker, just returned from a tour of the East.

The realty man reports visiting the Chicago branch of the Los Angeles Chamber of Commerce in charge of J. P. Ahlburn and paid a high tribute to the work being done there by the chamber.

NEW HOMES PLANNED

BELL, Nov. 9. (Exclusive—Francis R. Dyer has started the erection of three new six-room residences on Brompton avenue, each to cost $3500.

Reproduced with permission of the copyright owner. Further reproduction prohibited without permission.

BUSINESS UNITS WILL BE OPENED: Three Westwood Village Concerns Plan Events for Co
Los Angeles Times (1923-Current File); Nov 17, 1929;

BUSINESS UNITS WILL BE OPENED

Three Westwood Village Concerns Plan Events for Coming Week

Three business houses openings in Westwood Village are scheduled for this week with the announcement of Ralphs Grocery Company that its new store facing Westwood Boulevard north of Wilshire Boulevard will be formally dedicated the 21st inst., with opening events extending over Friday and Saturday.

The Safeway Stores plan the formal opening of their new establishment at Westwood Village this week. The store adjoins that of Ralphs.

The new Ralphs store marks the advent of the organization into the Westwood Hills-Santa Monica area. The establishment is declared one of the most beautiful exclusive grocery marts in the West. It is of Spanish-Mediterranean design and incorporates several new architectual departures.

The other opening scheduled for this week is that of the $250,000 Janss Investment Corporation office in Westwood Village at the intersection of Westwood Boulevard and Broxton avenue.

The new quarters will serve as a general realty headquarters and rental office for all of Westwood Hills as well as administration headquarters for Westwood Village.

Included in the departments having headquarters in this new office will be general sales, rental, architectural, financing, building and insurance departments, the latter four being operated by the Westwood Mortgage and Investment Company, an allied organization of the Janss Investment Corporation.

Because of the large number of visitors expected to attend the double opening, additional parking space has been provided throughout the village.

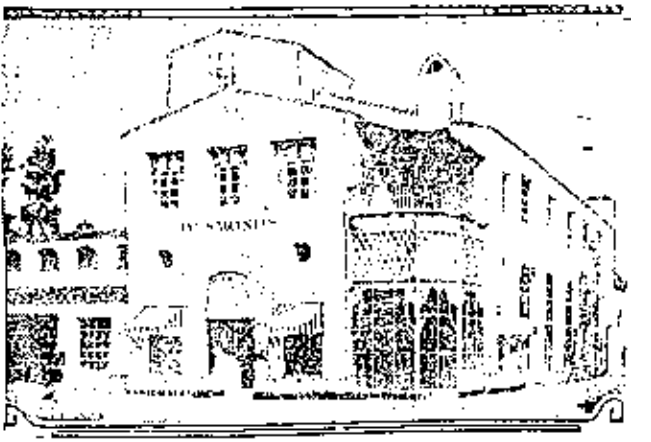
NEW DESMOND STORE PLANNED: Firm Will Build in Westwood Village
Los Angeles Times (1923-Current File); Nov 24, 1929;
ProQuest Historical Newspapers: Los Angeles Times (1881-1990)
pg. D2

NEW DESMOND STORE PLANNED

Firm Will Build in Westwood Village



Mercantile Establishment Pictured

FOLLOWING closely the disclosing of expansion plans for Desmond's Wilshire Boulevard store, comes an announcement from Ralph R. Huestman, president of Desmond's, that ground is about to be broken for a fifth Desmond store to cost approximately $200,000. This new store will be known as Desmond's Westwood and will be located at the southwest corner of Westwood Boulevard and Weyburn avenue in Westwood Village, adjacent to the new campus of the University of California at Los Angeles.

The building will be of Mediterranean design conforming with the architecture of Westwood Village. It will occupy an area of 40x100 feet and will have two floors and a basement. The interior will carry a Spanish-colonial motif. Much emphasis will be placed on "atmosphere," and many new and novel ideas in store design will be incorporated in the structure. In place of the usual arrangement of store space, the floor plan will consist of several large rooms, opening into each other.

The new unit while intended primarily for university men and women, will be designed and merchandised so as to permit its serving Bel-Air, Brentwood, Westwood Hills, Holmby Hills, Culver City and the Santa Monica Bay district.

Plans call for the completion of Desmond's Westwood early next spring. The architects are John and Donald Parkinson and the property deal was handled through the offices of the Janss Investment Corporation.

Desmond's four present stores are located on Broadway near Sixth, on Wilshire Boulevard, near La Brea, in the Spring-street Arcade, and on West Seventh street near Flower.

In confirming the transaction this week the Janss Investment Corporation announced that with the Desmond development and other deals now pending the Westwood Village area will have obtained the basic shopping requirements of a complete merchandising center. More than twenty of the Westwood Village stores already have been opened to the public and are now in service.

This week marked the opening of three new houses with Ralphs Grocery store, a Safeway store and the new Janss Investment Corporation offices. These three structures it was stated represent an investment of $300,000. An estimate of 100,000 people was placed on the number of visitors to Westwood Village this week for the opening of the three houses.

NINE SHOPS OPEN DOORS THIS WEEK

Fifty Stores Operating in Westwood Village Mercantile Area

Nine new shops formally open their doors for business in Westwood Village this week—bringing the total number in operation in this area to more than fifty.

Among the merchants to bring their services to the village is Desmond's Westwood, the fifth of the Desmond's chain shops. It occupies its own building at the corner of Westwood Boulevard and Weyburn avenue, one block from the university campus and two blocks from Wilshire Boulevard.

The building is of typical Mediterranean architecture. An extensive program inaugurated the opening yesterday and today.

Last night a fashion show was offered on the second floor. The program for this afternoon and evening includes a series of entertainment for boys, pie-eating contest, circus acts and a glider exhibit. Tomorrow evening, Desmond's will offer "University Night," an affair for girls.

Music lovers are anticipating the opening this week-end of the new Kelly Music Building. It is located one-half block south of Desmond's and provides a number of special opening features to which the public is invited.

This week-end will also see the opening of the Weaver-Jackson Beauty Salon in Westwood Village. The Potter Hardware Company, the "Huddle," the Village Fruit Market, the Village Awning Company and the recently enlarged Newland's Steak House.

Westwood Village was founded less than a year ago by the James Investment Corporation.

PROJECT AT LIDO ISLE TO BE HURRIED

Development Near Balboa Being Hastened by More Than Fifty Workmen

NEWPORT BEACH, March 15. (Exclusive)—The Griffith Company is speeding up the preliminary work on Lido Isle, which will transform the vacant island in Newport Bay into a residential area.

A thirty-five-foot road has been built from Newport Boulevard to the island and a temporary road encircling the island has been finished. The sewer on the mainland part of the property is almost completed and material is being distributed for the sewer system on the island itself.

Olberg Brothers, subcontractors, have fifty men working on a bridge from the mainland to the west end of the island. In addition to the bridge the $1,170,000 job includes connections for water, sewers, lights, phones and gas—all except the ornamental light standards being underground; also streets, curbs and walks.

Water and sewer connections have been completed on the Pink tract of Balboa peninsula, and work is about to start on the curbs and paving. Ornamental lights will follow. This improvement is costing $38,000.

Rock will be dumped now for groin No. 2 at the harbor entrance, the temporary railway track having been laid from the end of the Pacific Electric tracks in Balboa. The Standard Dredging Company is preparing for dredging the entrance channel to a depth of fifteen feet at low tide, and a width of 250 feet.

Work has begun on the Beek tideland project on the mainland north of Balboa Island. Dredging in connection with this job is among several private dredging projects planned for the bay this spring. Others are around Bay Island, west of Lido Isle.

Two Sessions for Salesmen Due This Week

The class for brokers and salesmen who desire to take the examination for real estate license will meet Tuesday in Room 817, R.K.O. Building, Eighth and Hill streets. Classes begin at 7 p.m. and continue for eight periods of two hours each. The class will be in charge of Ivan A. Thorson. While of special interest to those who have to take the examination, it is also declared of general interest to any property owner or real estate operator.

The advanced class, open to those who have finished the foregoing course, meets on Friday, at the same hour and is in charge of

Distributors Soon to Finish New Building

Ryan & Mosher, Ltd., distributors for India tires, are completing a building at 1335 South Flower street which will house the activities of the organization. It is 50x150 feet in dimensions and contains 10,000 square feet of floor space. Black and white modernistic tile is being used as exterior trimming.

The company acquired the property on a ten-year lease, involving a total rental of $51,000, from W. A. Brown. The Jack C. Henderson Company, realty brokers, handled the transaction.

Citrus Groves at Redlands in Reported Sale

REDLANDS, March 15. (Exclusive)—Robert D. Stitt, orange grower of Redlands, has sold his sixty-acre grove in the Highgrove district for $130,000. T. H. Peppers of the Western Fruit Growers, Inc., is the purchaser.

Fred Arth has sold eight acres of navels and grapefruit in the Greenspot district to Harold Wolverton, who owned acreage adjoining. This property was sold for $25,000, it is reported.

Rodney L. Crammer has just purchased for $60,000 a twenty-acre orange grove from L. E. Johnson on East San Bernardino avenue. Mr. Johnson owns about 100 acres in the West Highland district.

The sale includes rights in the Judson Mutual Water Company and its wells, orchard heaters and much equipment. The crop goes with the grove. The acreage was formerly owned by Frank W. and Lawrence L. Moore of the Sunset Orange Company.

Pasadena Bank Plans Addition

PASADENA, March 15. (Exclusive)—Architects Bennett and Haskell are preparing preliminary plans for a $50,000 addition to the First Trust Building at the corner of Colorado street and Madison avenue, for the First Holding Company. The addition will adjoin the present structure on the east.

The building is to have store rooms on the ground floor and the entire upper floor is to be occupied by a group of physicians. It is to be of reinforced concrete construction, 52x80 feet in area and will be of the same type of architecture as

COMMUNITY ACTIVITY TOLD

Number of Leases Reported Closed and Building Work Speeded Throughout Westwood

A number of new leases and intense building activity were reported yesterday by Dr. Edwin Janss, president of the Janss Investment Corporation.

A two-story building for the J. J. Newberry Company is being rushed to completion and will be ready for occupancy about July 1. The Newberry concern will occupy some 10,000 square feet in this structure, which is of the Spanish-Mediterranean style of architecture to which the village is restricted.

The Albert Sheetz Mission Candy Company signed a ten-year lease during the week for a store 30x85 feet in the Holmby Building on Westwood Boulevard, to be opened about July 1. This, the twenty-fifth Sheetz store, will be the largest in the chain and has in addition a large private banquet room. Elaborate interior decorations are planned, which will turn the interior into an old Spanish garden, the tables filled into arches covered with handmade tiles. A feature is a second entrance from the Fox Theater into park

The Beller Construction Company is reported to have announced that work on the Fox Building will be completed in June. It is expected that the furnishings will be installed in time for opening some time in August.

Another development is the opening next Thursday of the Westwood Village Market, occupying a store and basement 60x85 feet on Glendon avenue.

Another chain enterprise to enter into the Westwood Hill district last week, was the drive-in Waberne stand sponsored by McDermott and Jackson. This will be located on Westwood Boulevard, just south of Wilshire Boulevard.

Merchants in the village report an increase in tourist business, for which the Westwood Village Apartment Owners Association has been striving.

Southland Architectural Beauty Exemplified

ST PETER'S AND ST PAUL'S CHURCH, WILMINGTON

PELLISSIER BUILDING, WILSHIRE BOULEVARD

JAMES P. MACKEL RESIDENCE, SAN MARINO

EXHIBIT DRAWING LARGE CROWDS

These three photographs were selected from more than 500 as being typical of the display of Southern California architecture now open to the public in the Architects' Building Material Exhibit in the Architects' Building at Fifth and Figueroa streets. The Wilmington church was designed by Architects Newton and Murray, the Pellissier Building by Morgan, Walls & Clements and the Mackel residence by Douglas McLellan.

LAGUNA TO GET OLYMPIC HOMES

Plans Revealed for Novel Beach Development

Games Village Units to Be Permanently Kept

Choice Ocean-View Tract to Be Opened Up Soon

A permanent Olympic Village in which houses occupied by the Tenth Olympiad athletes are to be re-erected on ocean-view homesites back of Laguna Beach was announced yesterday by Fred A. Leach, president of the Leach Realty Corporation.

Formal opening of the property will be celebrated next week-end.

"This is the first time in history that a distinct and separate village has been built to house the Olympic contenders," Mr. Leach said. "Approximately 400 homes have been erected to house 1300 athletes from forty-seven different countries. They, therefore, have a sentimental as well as a practical value of which hundreds of families seeking week-end homes will want to take advantage. We expect to build a permanent Olympic Village of which Southern California can be justly proud."

The Olympic houses will be sold by the organization at actual cost, with no profit, he said.

The Leach Corporation of Laguna Beach controls some of the choicest property in the region, gently sloping hillsides, commanding gorgeous views of the Pacific Ocean and the town of Laguna Beach itself. Eighty per cent of the sites will have an unobstructed view of the ocean.

Each of the Olympic houses contains two rooms, shower, basins and closet space. They have been built in such a way that they may be easily dismantled, transported to a new location and re-erected.

APARTMENT OCCUPANCY IMPROVING

Good Season Experienced by Operators With Many Games Visitors Here

Optimistic reports of improving conditions in the apartment-house industry were revealed yesterday by E. W. McCaffrey, vice-president of the Calancorporation, owner of nine Class A apartment-houses in the Hollywood and Wilshire areas. An occupancy figure of 85 per cent is reported with a three-point gain during the past thirty days, when ordinarily a summer drop in occupancies is anticipated.

A survey made recently by J. R. Davis, supervisor for the company, shows a marked improvement in delinquency accounts, fewer tenants being in arrears for rent than in many months past.

"Olympic Games visitors are aiding the industry," Mr. McCaffrey reports. "We have made a number of rentals to such visitors and many of our tenants report they are entertaining guests here for the Games. Ordinarily the summer occupancy figure is about 75 per cent and I believe the increase at this time indicates steadily improving conditions."

GAS STATION STARTED

MONTEBELLO, Aug. 6. (Exclusive)—Construction has started on a modern super-service station at the corner of Eighteenth street and Whittier Boulevard in this city. Don Lynn is the owner, while J. Halvorsen is the contractor. The permit for the building was issued for $2500.

ARCHITECTS' EXHIBITION LURES MANY

Plans, Drawings, Pictures of Outstanding Southland Buildings on Display

Homes, gardens, schools, churches and buildings that have won world-wide reputation for the architecture of Southern California, are seen in the exhibition now being held in the Architects Building in honor of the Olympic visitors to Los Angeles.

The collection of 520 pictures, representing the work of leading California architects, presents a complete survey of the architectural achievements of the past ten years.

Members of the Southern California Chapter, the American Institute of Architects, the State Association of California Architects, and many landscape architects are participating in the exhibition, and the committee in charge of the selection of pictures includes Carlton Monroe Winslow, chairman; Roland E. Coate, W. L. Risley, Claud Beelman, Frank Vigers, Jonathan G. Ring and Roberts Dennis Murray.

For the duration of the Olympic Games the exhibition will be open to the public every day except Sunday from 9 a.m. to 9 p.m. and on Sundays from 2 to 5 in the afternoon. A committee of architects will act as hosts during this time. The display is located in the Architects Building at Fifth and Figueroa streets.

BIG PACKING PLANT JOB ADVANCES

Fine New Citrus Unit in in Porterville Rapidly Takes Shape

PORTERVILLE, Aug 6. (Exclusive)—The new brick packing-house of the Sunflower Packing Corporation is rapidly assuming shape here with a number of men employed.

This plant, with equipment, will represent an investment of about $100,000 and is expected to be ready for use far in advance of the navel season.

It will replace a packing-house destroyed by fire in the spring. Part of the machinery is being installed as construction proceeds. It is expected to be the largest citrus house in Tulare county.

TWO NEW HOMES

NORTH HOLLYWOOD, Aug. 6 (Exclusive)—A. L. R. Smith of the Universal Pictures Corporation this week moved into his new home at 6127 Lankershim Boulevard. Ralph B. Carter, assistant manager of the Roosevelt Hotel, Hollywood, this week bought the new seven-room home at 11204 Sarah street, erected by R. W. Denapia.

Commercial School to Open in Westwood

With the completion of extensive remodeling operations and the signing of a ten-year lease at an approximate rental of $75,000, the Sawyer School of Commerce, one of the oldest and most prominent business colleges in Southern California, announced yesterday their plans for opening a branch school for the fall term this year, on the second floor of the Holmby Building in Westwood Village.

The Holmby Building, designed by Gordon B. Kaufmann, and reputed to be one of the finest pieces of architecture in Los Angeles, is located in the heart of Westwood Village and extends for an entire block along Westwood Boulevard, from Weyburn avenue to Le Conte avenue.

Practically two-thirds of the second story is embodied in the lease for the Sawyer school and something over 7000 square feet of this space was included in the alteration project in order to develop the fifteen classrooms and offices required.

McMichael Honored With Appraisal Job

Stanley L. McMichael, M. A. I., Los Angeles realtor and appraiser received notification during the past week of his appointment to the membership committee of the American Institute of Real Estate Appraisers of the National Association of Real Estate Boards.

In this position he will supervise the acceptance of members to the institute, for California and adjacent States.

The new institute was launched at Cincinnati in connection with the national convention of realtors after five years of preparatory work. Only 121 charter members were named at time of organization, ten of whom are located in Los Angeles county.

Mr. McMichael has published eleven books on real estate, now used by real estate classes in sixty-five universities.

Washington Acknowledges Bank Request

The California Real Estate Association, through its president, Peter Hanson, has received from the White House an acknowledgment of its request that Los Angeles be considered as location for one of the branches under the new Home Loan Bank system, with the information that the recommendation will be brought to the attention of the Federal Home Loan Bank Board as soon as it is formed.

FARM LAND DECLARED IN UPTREND

Watson Declares Plenty of Money Available for Good Agricultural Buys

Evidence of a decided note of returning confidence among the agricultural interests of the State was reported last week by Dudley D. Watson, general sales representative of California Lands, Inc., on his return from a month's trip, during which he visited practically every farming center in the State.

In spite of prevailing low prices for most farm products, giving rise to the general opinion that farmers as a whole have been operating at a loss, Mr. Watson stated that the far-sighted ones who planted their land to diversified crops, have been making money.

"There is still plenty of money available for the purchase of well located farm land, Mr. Watson said.

"While industry has been in a slump for two or three years," he added, "agriculture has come through a ten to twelve-year depression and the encouraging attitude of the farmers of California clearly indicates their faith in the agricultural future of this State.

Cash Popular in Porterville

PORTERVILLE, Aug. 6. (Exclusive)—Cash is talking in Porterville these days.

A cursory survey of the local business centers revealed a noticeable increase in cash transactions in all lines.

The Federal tax on checks and the bank fee of 4 cents per check where a stipulated balance is not maintained on deposit was generally accepted as the explanation.

In the rural communities, people save their nickels.

BUSINESS SCHOOL EXPANDS
Los Angeles Times (1923-Current File); Feb 5, 1933;
ProQuest Historical Newspapers: Los Angeles Times
pg. 20

BUSINESS SCHOOL EXPANDS

Keeping pace with development in Westwood Village, the Sawyer School of Business yesterday announced a new expansion in its coaching and seminar departments which will embrace the use of an additional 6000 square feet of floor space in the Holmby Building and a ten-year lease that will entail an approximate income of $60,000 to the Holmby Corporation, owners.

The Holmby Building, designed by Gordon Kaufmann, and said to be one of the finest evidences of business architecture to be found in Southern California, was finished in 1929.

The school, long established at Eighth and Flower streets in downtown Los Angeles, opened its Westwood Village branch with a space covering 6000 square feet. The additional 6000 square feet put into use at this time provides for the school more than half the space in the entire building, which extends from the southern gate of the campus of the University of California at Los Angeles for an entire block along Westwood Boulevard to Weyburn avenue.

The Village branch of the school was opened last September with a reported enrollment of 125 students in the business department and 250 in the coaching departments.

FOUR HOMES RISE IN SAN FERNANDO AREA

VAN NUYS, Feb. 4. (Exclusive) New spring building in the San Fernando Valley Annex includes a home to cost $3150 being erected by J. M. Merritt at 10851 Ohary street. William Shaw is building a $1200 dwelling in the Sepulveda section. Fred E. Peak is erecting a $1500 home at 10348 Wesley avenue. In the Van Nuys section, W. E. Wolcott is building a $1500 home at 13735 Vanowen street.

Transformed Barley Field Attests City's Development

Westwood Hills Area Typical of Southland's Great Progress

By Kenneth Crist

Twelve years ago today's Westwood Hills site was a sprawling barley field amidst barley fields. It was the 3300-acre Rancho San Jose de Buenos Aires. Now it's a thriving community of schools,

Harold Janss

colleges, commerce and people—some 25,000 persons.

Laced to Los Angeles by major high-speed boulevards, it's simply another step in the city's march to the sea.

That's exactly what Harold Janss will tell you about it. When he and his brother, Dr. Edwin Janss, developers of that area, first saw it they knew only that it rested in the path of an expanding metropolis and that some day Los Angeles would reach out in all directions to become the great city of the West.

FAITH JUSTIFIED

"Los Angeles is still doing that," Janss will tell you. "There is nothing to hamper the city. For industry it offers cheap power, and plenty of it. For its population it guarantees an abundance of water at reasonable rates. For its future it can look toward all four directions; toward the East for more business, toward a developing Mexico and South America, toward a prosperous north country and out beyond the Pacific's horizon where new customers will be asking for products.

"It seems to me," Janss will continue, "that the experience of Westwood Hills is bound to be repeated elsewhere as a growing demand for Greater Los Angeles properties continues to exert its force."

INDEX TO FUTURE

Harold Janss is definitely convinced that money made in Los Angeles real estate in the past is but an index of the wealth to be gleaned from it in the days to come.

"Westwood Hills," he'll insist, "was virtually born in the depression. They called the real estate business throughout the United States 'dead' at that time. It wasn't dead. In Southern California it moved ahead in spite of untoward influences elsewhere. Let's look at some statistics:

"In 1929 there were 34 offices and stores in Westwood Village. This year there are more than 452 employing 1700 people. The estimated total improvement to date involves about $72,000,000. That figure, of course, embraces work done in the entire Westwood Hills area.

REALTY ATTRACTIVE

"The experience of the Janss Investment Corp. here has proved that Southland people are interested in real estate even when other business is 'off,'" Janss will add. "Right now Westwood is seeing its two largest commercial expansion programs."

Dr. Janss has been in the real estate business for 40 years. Harold Janss has been active in it for 28. These men have watched Belvedere Heights grow, Yorba Linda develop, the San Fernando Valley expand, and Hollywood reach up toward a new high. They have been definitely concerned in all these areas.

"That's why I can predict that all Los Angeles will move ahead," Harold Janss will point out.

WISE INVESTORS

"The wise investor will buy real estate now. Many people have made money in the business. Land, instead of becoming a burden, is increasing constantly in both potential and real values.

"The Southland of tomorrow will be different than it is today. It will be a greater country, with greater possibilities. There is no way that you can escape that fact!"

Tribute

TO the Westwood Village Business Association, whose president, Thomas J. Dixon (left above), sits in front of the Community Clubhouse, one of the most important buildings in the Village. Here 110,000 men and women of nearly 100 civic, social, patriotic and religious organizations meet annually.

And to the Village business men and women represented in this booklet. Leaders in community life, they have helped to make a picture-story of Westwood Hills and the Village, long a dream of the Association's president, a reality.

And to Dr. Edwin Janss (right above), Harold Janss and A. H. Wilkins, the founders of a community which for all-around living — business, social, recreation, education, entertainment — is second to none in the country.

Compiled and published by the Westwood Hills News-Press, 1055 Gayley Avenue, Westwood Village, Los Angeles, Calif. Copies of "Westwood Hills" obtainable at the News-Press, at your Westwood book store or news dealer.

Westwood Village

Eleven Short Years

NEW ORLEANS' Old French Quarter and New Mexico's Taos, ancient and famed American centers, have for years drawn travelers from the four corners.

Today, to the same travelers, out to see their country, Westwood Village (within Los Angeles) belongs in that charmed category of places on the must list. Yet just eleven years ago the Village was only a part of a sloping stretch of wheat and bean fields.

And while many a visitor, caught by the charm of living in Westwood Hills, has returned to acquire a home and spend his years here, a peek into history discloses that Westwood has always been a place of rich, fine living.

Unquestionably the Indians, back beyond history as we know it, lived a pleasant life here, with food easy to grow, animals easy to hunt. In 1769 Captain Gaspar de Portola and Father Crespi led a little band of Spanish explorers through the canyon that now is Sepulveda Boulevard's route. From then on through the years of Maximo Alanis and his Rancho San Jose de Buenos Ayres the area has enjoyed a life that is leisurely, comfortable, satisfying. Always there have been flowers and feasts, dancing and games, music, love and laughter.

Señor Alanis aptly named his ranch St. Joseph of the Pleasant Breezes. The pleasant breezes still blow. The pleasant life still goes on.

35 Cents Per Acre

First Anglo-Saxons to acquire the rancho were Dr. Wilson W. Jones and William T. B. Sanford. Soon part of it was sold for 35 cents per acre. Through various hands the acreage passed, and for many years it was owned by John Wolfskill, who obtained it in 1884 for $40,000, all 4,000 acres at $10 each. It was to soar in value to the point of being fabulous.

Arthur Letts, founder of one of Los Angeles' largest department stores, purchased the ranch in 1919 for $2,000,000. From Nebraska had come Dr. Peter Janss, a gentleman of vision, and the father of two of the Village's founders. In 1922 the Janss Investment Corporation took over the job of developing Westwood. Scattered homes came first, then in 1929 the Village had its first business building. In that year, too, came the fast-growing University of California at Los Angeles, to Westwood.

Today the Village and its community represent an investment of $100,000,000. The Spaniards who found gold in the Santa Monica Mountains and packed it down Sepulveda Canyon to the sea had no more amazing experience than those who have watched the magic of Westwood's growth in eleven short years.

Beautiful Bel-Air, Holmby Hills and Brentwood have kept the pace. It was down from their hills the Spaniards came with hides and tallows, wines and grains. Today down from these same hills roll limousines and station wagons, roadsters and coupes, carrying ladies to market in the Village's picturesque streets and patios.

Today, the Village is the sort of place where - - -

Shops and buildings done in the manner of the Mediterranean and Southern Spain bring architects and civic planners from everywhere to study and absorb ideas.

Photographers for national advertisers come for natural color street and shop backgrounds, and amateurs are forever shooting both "still" and moving pictures. (Whether you know it or not, Westwood Village has probably stared up at you from pages of magazines.)

Business men from Massachusetts and Iowa, from Texas and Tennessee, come to visit, then remain to attempt to wangle the purchase of a shop, a store or a plant so that they may return to live in Westwood.

Perfume from Java, frocks fresh from the designer, sprouts from Latvia, Royal Copenhagen china, and other of the world's treasures may be found in the shops.

Men and women linger over luncheon in open sky-roofed patios and deck tea rooms and cafes.

Golf courses galore, polo fields, bridle paths, tennis courts, even bowling greens, and the ocean with its miles of public and private beaches, are all only a few minutes by motor car.

On the back cover is a map showing the easy ways to reach the Village from the Metropolitan Los Angeles area. It's a relatively short drive from anywhere. Just watch for the towers.

Bank Buys Westwood Landmark

pg. A3

Bank Buys Westwood Landmark

A Moorish-domed Westwood Village landmark has been acquired by the Bank of America for a price "just under $1,000,000," the bank announced yesterday.

Jesse W. Tapp, vice-chairman of the bank board of directors, said the Janss Building at Westwood Blvd. and Broxton Ave. will continue as the home of the bank's Westwood Village branch.

Included in the purchase, Tapp said, was a nearby 80x100-foot parking lot.

Long Beach to Get Historic Ranch House

The Long Beach City Council yesterday took steps to acquire the remainder of the historic Rancho Los Cerritos by authorizing expenditure of $80,000 to buy the original ranch house and its surrounding property.

City Manager Samuel E. Vickers was ordered to execute a lease option agreement for acquisition of the 110-year-old ranch house and 4.74 acres of landscaped ground at 4600 Virginia Road.

The property will be obtained from Llewellyn Bixby Jr., descendant of the prominent Long Beach family, which has owned the site for more than a century.

The original rancho was 27,000 acres in extent. Long Beach will make a historic shrine and park out of the property.

Westwood Area Sold at $6,500,000

Kirkeby, Associates Acquire Village Business District

Westwood Village has been purchased for $6,500,000 by A. S. Kirkeby, hotel chain operator, and a group of investors from George Gregson, it was announced yesterday.

Included in the transaction, one of the largest real estate deals in Los Angeles in some time, are 20 buildings in which are situated 50 stores, an office structure, garage and 14 parking lots.

Title was conveyed to Kirkeby Realty Co. on all of Gregson's property in the Village with the exception of a filling station, retained by Gregson.

Acquired From Janss

Gregson acquired the properties last year from Harold Janss of the family which developed the Village.

Among the various buildings' tenants are Sears Fedway Department Stores, Desmond's, A&P, Safeway Stores, J. J. Newberry Co., J. C. Penney Co., Chandlers' Shoes, Barker Bros. and others.

Kirkeby also announced yesterday he has signed a contract to purchase from Saks & Co. the northwest corner of Wilshire Blvd. and Camden Drive in Beverly Hills. Frontage embraces 178 feet on Wilshire Blvd. and 450 feet on Camden Drive. The Saks Gift Shop, which now occupies the property, will be moved into the main Saks store within a few months.

Hotel Holdings

Kirkeby operates the Beverly Wilshire Hotel here, the Hampshire House, Gotham and Warwick Hotels in New York City, the Warwick in Philadelphia, Kenilworth in Miami, National de Cuba in Havana, El Panama in Panama City and the Saranac Inn in New York State's Adirondacks.

DOWN MEMORY LANE IN WESTWOOD

Pioneer A. H. Wilkins Recalls Dynamic History of 'Village'

West La Angeles Citizen - 10-63

By GERALD FARIS

WESTWOOD — No one has as yet written the history of Westwood — the dynamic transition of vacant farmland into a rich business and residential community.

But this doesn't mean that this "miracle of the 1920's" isn't written down somewhere. It is—in the memory of A. H. Wilkins, for nearly 40 years one of the three key figures in the Janss Investment Corporation, the land company that built Westwood.

Attention Turns

The Janss brothers — Edwin and Harold — whom Wilkins joined in 1911, had already "created Canoga Park," "put the people in Ramona Acres (later called Monterey Park)," and founded a community of moderately priced homes in Belvedere Gardens on the Eastside, when it turned its attention to Westwood in 1922.

"Coming out west was quite a decision for us to make," Wilkins recalled the other morning, seated in a comfortable chair in the living room of his rambling Spanish-style home on Strathmore Dr. — the home he built in 1928 on the highest knoll skirting Wilshire Blvd. between downtown Los Angeles and Santa Monica, and second on the block.

"Belvedere Gardens was the best development the Janss company ever made, and we still had 3,000 active accounts there when Westwood — which became our in-toto dream — came along.

"I was sales manager, a vice president, and a director, too, and I had to look ahead. This land out here was the cream of all left un-subdivided. It was really a city in itself, roughly the same size as Beverly Hills.

The only buildings on the vast acreage—which stretched from Pico Blvd. to the foothills, and from the little town of Sawtelle to the Los Angeles Country Club and Heath Ave.—belonged to the Wolfskill Ranch, consisting of a near-new ranch house and two barns on the present site of the Mormon Temple.

The land had earlier been purchased from the Wolfskill heirs by Arthur Letts, owner of the Broadway and Bullock's department stores, for whom Wilkins had worked in 1905 as an assistant buyer.

The Janss brothers purchased the land in parcels from Letts, starting at Pico and working north until the "heart" — Westwood Village — was finally opened up in 1928.

"When we started," Wilkins said, "there was nothing out here. The Sawtelle Soldiers' Home was very small, a collection of old frame buildings.

Nothing On Pico

"There was nothing on Pico Blvd., and only a couple of estates south of Pico, and beyond that, Culver City.

"Our first sales office was at Santa Monica and Westwood boulevards, a solid eucalyptus and walnut grove extending to Sepulveda Blvd."

Offices were later built at Santa Monica and Beverly Glen boulevards, and at Beverly Glen and Wilshire. Because there "was no way to bring the people out here," collection centers were maintained in Belvedere Gardens for those accounts, and five offices kept open in the then-metropolitan areas of Los Angeles and Hollywood.

"Although we didn't start subdividing until 1923," Wilkins said, "people began asking us in '22 what we were going to do with the land. They made reservations in advance.

"Our salesmen couldn't even find the lots at first, and we had to put in high stakes to locate the tracts."

First Home Built

The first homes built on land subdivided by Janss were on Midvale Ave. south of Santa Monica. The area between Santa Monica and Wilshire was developed in 1924 and 1925, and ground broken north of Wilshire in 1926.

"The north sold very fast," Wilkins said. "People wanted those high-priced homes. Beverly Hills was well developed by this time, and Bel-Air started after we did."

Janss salesmen interested merchants in the expanding community, and in 1928, work began on the Village which was officially opened April 12, 1929.

"Desmond's and Bullock's were the first stores to come in," Wilkins went on. "Bullock's was first located where Fedway is today.

"We sold a site for Ralph's Markets—one of the first commercial lots to be sold. Later, we sold Sears."

The first building to be constructed in the Village now houses the Bank of America. For several years, it was the headquarters of the Janss firm and in a dining room on the second floor, the Janss people entertained friends from the new UCLA campus and business associates.

Fooled Onlookers

One of the next buildings to go up was the Holmby Bldg. on Westwood Blvd. between Weyburn and LeConte avenues, designed to look like several individual buildings. The Janss Company owned the structure for a long time.

The firm built most of the commercial buildings in the Village. They put in all streets, curbs, street lights and two storm drains which are still in use.

North of Wilshire the utilities were put underground. "We'd have put them underground south if we'd thought of it then," Wilkins remarked.

"We wanted to build for the future, so we laid out a master plan. We had our own engineer, and hired planners. As each section developed, we looked over the plans of the next, and sometimes changed them."

Land south of Wilshire was subdivided in 40 to 60-acre tracts, but that north in the Westwood Hills was in considerably smaller plots.

"We would have 25 to 30 different builders working on houses at one time," Wilkins said. "We tried to limit the number of lots to two per builder in order to avoid 'tract home' designs."

Planned Look

Buildings in the Village were limited by restrictions to a Mediterranean style, which also extended to the sorority houses on Hilgard Ave., which "shot up" after the founding of UCLA.

UCLA was a "gift" to the state of California by Beverly Hills, Santa Monica and Culver City, who were interested enough in locating a university in Westwood that they developed a bond issue, purchased 360 acres from the Janss Corporation at cost, and donated the land to the university in 1946.

"The university had quite an impact on our growth," Wilkins explained, "and we had wonderful sales as a result, sales in expensive areas."

Although the depression hit in 1929, it wasn't felt in the Westwood Hills until about 1931.

"A lot of people went dead on sales," Wilkins related, "and up until 1934, we had to make extra sales efforts, and do a great deal of advertising to get back.

Had Ready Cash

"But the company had enough capital to keep on. We took houses back, in order to keep confidence, and were able to do so because we had cash on hand. We probably put out about $5 million in loans to help people out, but this property was theirs, and we didn't want to see it go by the boards."

Things picked up again in the mid-30's, and when the Village got around to celebrating its seventh anniversary in 1936, it had 225 active businesses as compared with 34 in 1929, and in 1935, had issued in excess of $5 million in building permits. Its population stood at 14,000, and 6,000 students were enrolled at UCLA.

A staff of 160 salesmen was kept busy through 1940 and today, Wilkins said, most of the Realtors on Westwood Blvd. are former Janss salesmen. The Village was "pretty much sold out by 1945."

"When I closed the office in 1950, I quit the real estate business," Wilkins said. "When I told Ed and Harold I was quitting, they said, 'Wilk, you can't quit.' But I said, 'I'm gonna. I have a few years left, and I want to play.' I sent my license to sell real estate back to Sacramento. That's how determined I was."

Founded Bureau

Wilkins—a charter member of the Los Angeles Advertising Club and founder of the Better Business Bureau—had virtually grown up with Westwood.

"After leaving the Broadway, I went back to Canada and joined an advertising firm in Toronto. I had the Times sent to me, and had been reading Janss ads. They interested me."

In 1911, the "California sun" became too strong, and Wilkins came back to Los Angeles.

"I went up to the Janss office, then at Sixth and Main streets. But both Ed and Harold were getting married, so I sat on their doorstep until they came back.

"When they did, I told them, 'I want to be a part of your institution' and they took me on. I still feel I was a fortunate young man."

THE JOHN WOLFSKILL RANCH, WHERE THE MORMON TEMPLE NOW STANDS
. . . this is where Westwood began

WESTWOOD: THE CASE OF THE BARTERED BRIDE: It came as a shock when the ...

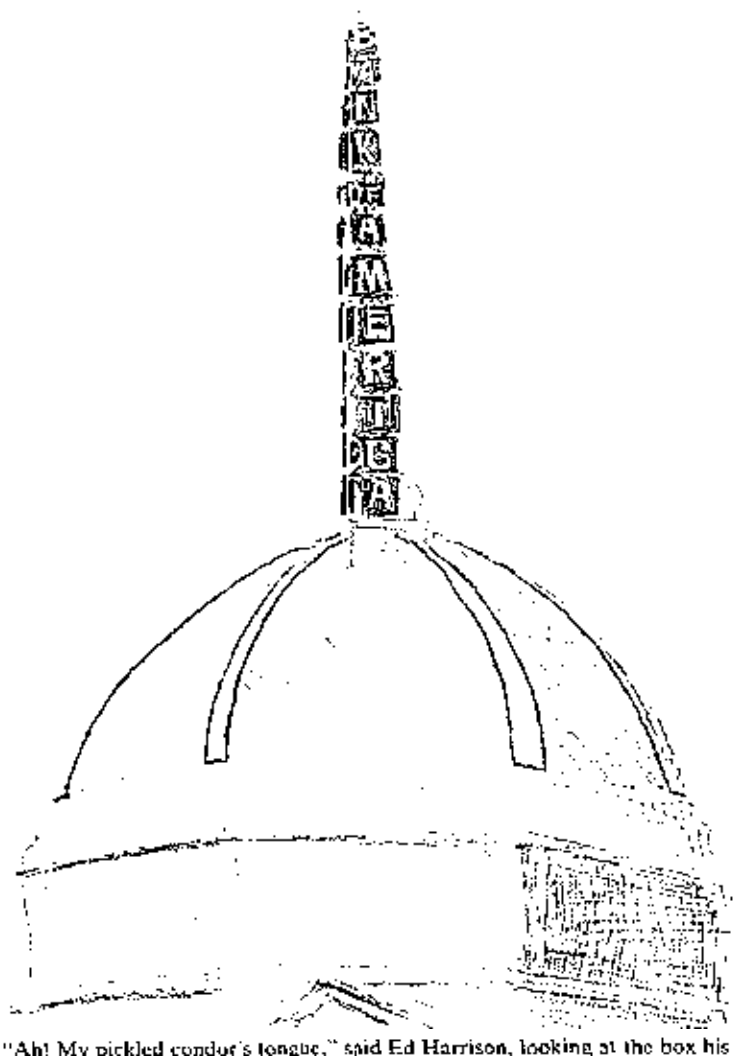
WESTWOOD: THE CASE OF THE BARTERED BRIDE

The management of this "model village" is using computers to try and figure out how to keep its charm, as new buildings soar, and the everpresent traffic jams up.



"Ah! My pickled condor's tongue," said Ed Harrison, looking at the box his secretary had just rushed in with, there in a glass executive suite 14 stories up in Harrison's own Westwood high-riser. Everyone gathered around the large wormwood desk where he opened the package . . . but, DARN! it was not the pickled condor's tongue at all, but just another stuffed woodfinch that somebody wanted to trade.

It's not every day that you get to see a pickled condor's tongue, and disappointing to Ed Harrison, too, because as a major bird scientist specializing in that most huge beast of the American air, the condor, he'd like to have his specimen back. But Ed's that affable type of Western businessman whom nothing really ruffles; impeccably groomed, graying hair brushed back from high tanned forehead, custom-tailored in gray glen-plaid, he can juggle several different projects at one time—from condor preservation to the development of Westwood; people come and go from his informal office, others sit around a low table in leather chairs having coffee. Beside and above the people stands a large, thick telescope; condor-size, on its tripod, this scope stands braced for instant magnification of anything going on in Westwood Village. From his glass nest on the 14th floor of the building he owns, Ed Harrison can see whatever happens down there.

What he sees is *transition;* transition L.A.-style, with all the drama, screams, and scars. He looks out on Westwood Village, that most carefully planned and unified model village, and he sees a most awkward and graceless *transition* into anonymous metro-city.

Nearly everyone here has experienced Westwood. Everyone has been charmed by its orderliness, the clean openness—a model college town. For many people it marks The Age of Innocence, that cool and leisured time before the Pressure came. It speaks The Thirties!

Westwood today is a compressed time-capsule of the L.A. pueblo being wrenched from sleepy ranchero and shocked into 21st Century metro-city. It was the last L.A. ranchero to come intact into the present day of high-rise.

Although Gaspar de Portola happened onto this village of "friendly and docile" Indians 200 years ago (on that August day in 1769 they gave him food and sweet spring water), not another Spaniard came along until about 1820. Then Don Maximo Alanis came out from the pueblo to a spring in a grove of sycamores. From this ridge he could see the shining sea, and smell the fresh ocean breezes and, as this was St. Joseph's Day, he called his new homestead El Rancho San Jose de Buenos Ayres.

Like everything else in Southern California, the ranch passed through the hands of Don "Benito" Wilson—after whom Mount Wilson is named—and ended up with a gentleman farmer named John Joseph Wolfskill. He loved nothing better than to ride free over his 2,000 breeze-fanned acres; and he regretted that his property should get tangled in the Santa Monica land-boom of the 1890s when a town called Sunset was planned where Beverly Glen now crosses Santa Monica Blvd. At the time 640 acres were dedicated, apparently forever, to the Soldiers Home. When this boom went bust, Sunset town vanished and Wolfskill got back all but the Federal land (which was later transferred west, to its present location). Today you can see, through the fence, this Federal Preserve—just as tranquil, as unsoiled as it was then; original pinnacled gingerbread buildings peek through leafy trees, and there's the verandah from which President McKinley spoke on his only California visit in 1899.

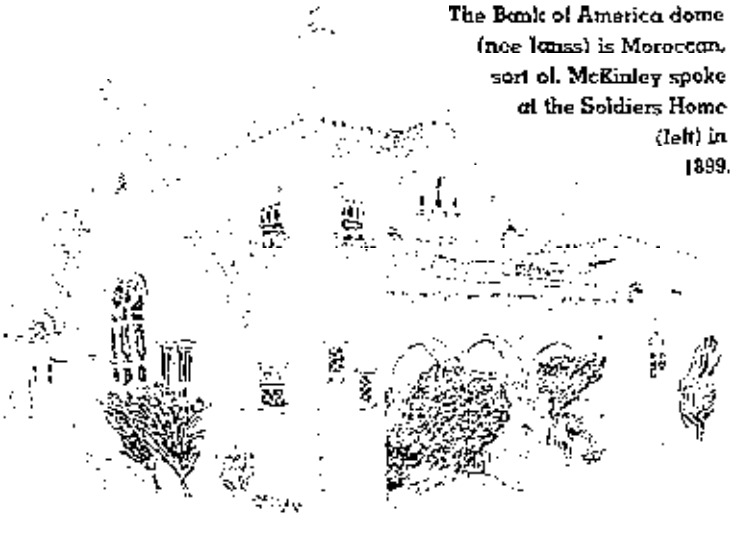
The large, comfortable "Sunday House" that Wolfskill built for his family shortly before his death in 1913 was the same house that Harold Lloyd used for making movies. The Mormon Temple stands there now, but mothers whose children are in the adjoining Emerson Junior High School today can remember when they themselves went to Emerson and slipped off to play *SPOOK* through the falling-down rooms of that scary old house.

Wolfskill's heirs understood the value of this, the last undivided ranchero in L.A.; they understood that those incredible 234 miles of aqueduct built to the Owens River had made L.A. free to grow—FREE at last and forever from that awful zanja-system that ran like varicose veins everywhere throughout the city; those water-ditches from water-company to customer dictated the city limits. Never again would L.A. be reduced to pumping the cienegas (marshes) during droughts. In 1913 no other city, ever, had ventured so far for water, but L.A.'s spunk had again made it possible for her to grow!

Somebody else who expected watered real-estate to boom was one Dr. Peter Janss, not too long out from Nebraska. He was so confident of boom that he called his doctor son back from graduate training in Freudian Vienna and his other son back from non-Freudian Princeton. These sons, Dr. Ed and Harold Janss, would develop that land in Conejo Valley which was sure to bloom when water poured from Owens-Mouth. Yes, this land of sand-squalls was sure to bloom—but not just then!

More immediate was the Wolfskill ranch which had just been bought by the famous Arthur Letts, one of the few Angelenos who could ante up the cool two-million *cash* that the Wolfskill heirs wanted. This millionaire Letts was the same determined Englishman who had arrived in L.A. bankrupt from the Seattle panic of 1893. In the meantime he had founded the Broadway Department store and turned it into a showplace of the West.

Hal Wilkins had come down from Canada to work with Mr. Letts, but already the change of control had begun. Wilkins says that Mr. Letts



The Bank of America dome (nee Janss) is Moroccan, sort of. McKinley spoke at the Soldiers Home (left) in 1899.

paid the cool two-million in 1919 for the Wolfskill property for the express purpose of demonstrating his faith in the growth of Los Angeles! In that confused recession after World War I, L.A. had just a lot of orange juice and a deadly freight-rate: pretty puny prospects. With his innate showmanship, Arthur Letts saw that movies could be a gateway for L.A.—and for the world—because motion pictures could EDUCATE everyone, everywhere. He would combine movies with education on the "Letts Tract."

But Regent Edward Dickson already had walked these Wolfskill hills and found them so "Berkeley-like . . . sloping, with their view of the shining sea" that he determined to make them the site of the University's Southern Branch. He went to Arthur Letts at once. Letts agreed, then and there, but his health was failing; he was passing more and more of the control of his properties on to the Janss brothers, especially as Harold Janss was now his son-in-law by marriage to his youngest daughter, Gladys. Regent Dickson found the Janss brothers to be "men of vision" and provision was made for the University at one end of "Westwood" while acreage at the other end was being subdivided for something called Fox Movie-Tone Studios (one hoped they could pay!); this same acreage that has now become aluminum Century City once was Westwood, east Westwood.

For the name of Westwood had to be settled on. Sawtelle was there . . . waiting. Already an established town of sidewalks and oiled-streets, it had in fact once *arrested* J. J. Wolfskill himself for riding his horse on its oiled street. Now with cottages for soldiers' dependents, this town (under the name of Barrett Villas—after Col. Barrett, long-time commandant of Soldiers Home) tried to join Santa Monica. That failed and it tried to join L.A. under the name of Sawtelle (after W. E. Sawtelle, whom R. C. Gillis, the owner of San Vicente, had put in charge of the soldier subdivision. It couldn't wait to unite with this choice new thing that looked so good (what with movies and all).

"Men of vision" indeed, the Brothers Janss saw in Sawtelle the Crunch of Established Competition. They sent Hal Wilkins scurrying through the Westchester (N.Y.) County telephone book for the same kind of "class" name that Burton Greene had given to his Beverly Hills (this from his home suburb in Boston, Beverly Farms). "Holmby" would have been nice in honor of Mr. Letts' forebears' English hometown but the name was still in use then for a small development along Holmby Avenue (now Kenmore) that led up to the Holmby Estate in Hollywood. Wilkins found Westwood in the telephone book; it sounded wonderful, they latched on to it in a hurry, announced themselves, and then found that *it*, too, was already in use.

Quick! They tacked "Hills" onto their "Westwood" to keep it from getting mixed up with a small hamlet up in Lassen County—Feather-River Country—which, though tiny, is the *registered* post office of Westwood, California. Any official Westwood of L.A. dissolved in the Big Annex of 1926 but this amazing confusion still persists. Ask your telephone operator for the area code of Westwood and she'll tell you you don't need an area code to dial Westwood. Only after you insist there really *is* another Westwood will she inquire and be amazed to find out its area code is 916—and for all those 40-some Christmases now *THOUSANDS* of Christmas cards, bags and bags of them, meant for here go *there*, to that little snow-shrouded post office which knows very well all this COULDN'T be for little ole them; so they forward everything back to 90024, or 25, as the Zip may be.

It wasn't confusing enough at first for anyone to complain about because our Westwood Hills name didn't catch on. Regent Dickson kept talking up "the Letts site" while the Regents were also considering Beautiful-Downtown-Burbank as another possibility for their "Southern Branch." But the Golden Spine along L.A.'s western front pulled itself into one cohesive, persuasive bid, with Santa Monica, BevHills, Alphonzo (father of the Congressman) Bell's Bel-Air, and Venice joining with L.A. to guarantee a gift of 383 acres for the University's Southern Branch. At 3 o'clock in the afternoon of March 21, 1925, Robert Sproul, then vice-president and comptroller for the University, announced at Berkeley the choice was Westwood—not "Letts site"—but *WESTWOOD!* By five o'clock that same afternoon L.A. papers had extras out, and the next day thousands of Angelenos came out to see what was this "Westwood." Wilkins and Janss were ready for them with picnics.

This is why the first square of UCLA is named Dickson Plaza (not to mention the Art Monolith), and why that wide staircase down which thousands of UCLAns have scrambled their legs to Westwood Plaza is called the Janss Steps. (The student will know already the wherefrom of Wolfskill Drive, which runs around the athletic field; would he also know that De Neve Circle around the dorms is for the founder of L.A.? This Circle and the De Neve Park with plaque-stone donated by Janss-Holmby are the only monuments to our founder, Felipe de Neve, in all the megalopolis.)

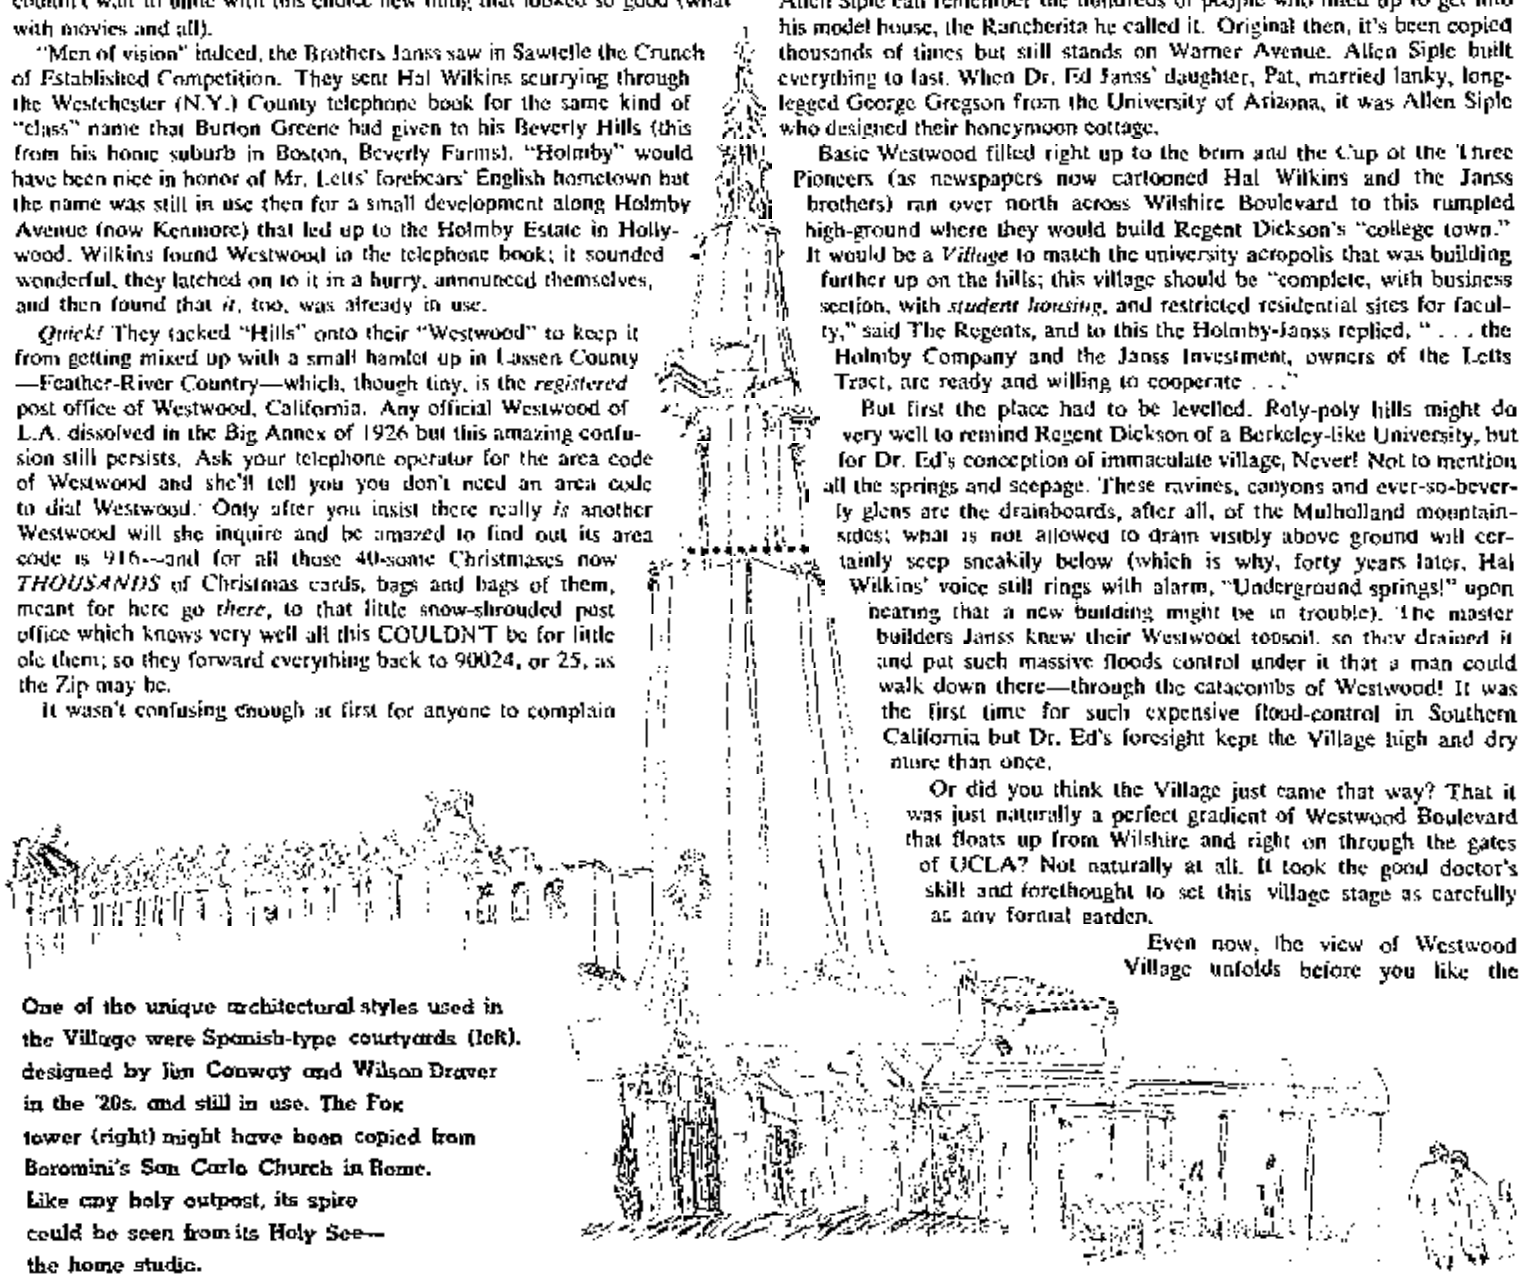
With the University secured, Westwood could only go UP! It was the time of the Iowa invasion; a car could *DRIVE* to California. To prove it, a caravan headed by movie-star Joe E. Lewis drove from Wilshire Boulevard to Chicago. Midwesterners found out they didn't *HAVE* to live through winters like that. Wave after wave of well-heeled migrations made Westwood the *wunderkind* of the West; 2,200 snug bungalows sold by 1927. Allen Siple can remember the hundreds of people who lined up to get into his model house, the Rancherita he called it. Original then, it's been copied thousands of times but still stands on Warner Avenue. Allen Siple built everything to last. When Dr. Ed Janss' daughter, Pat, married lanky, long-legged George Gregson from the University of Arizona, it was Allen Siple who designed their honeymoon cottage.

Basic Westwood filled right up to the brim and the Cup of the Three Pioneers (as newspapers now cartooned Hal Wilkins and the Janss brothers) ran over north across Wilshire Boulevard to this rumpled high-ground where they would build Regent Dickson's "college town." It would be a *Village* to match the university acropolis that was building further up on the hills; this village should be "complete, with business section, with *student housing*, and restricted residential sites for faculty," said The Regents, and to this the Holmby-Janss replied, " . . . the Holmby Company and the Janss Investment, owners of the Letts Tract, are ready and willing to cooperate . . ."

But first the place had to be levelled. Roly-poly hills might do very well to remind Regent Dickson of a Berkeley-like University, but for Dr. Ed's conception of immaculate village, Never! Not to mention all the springs and seepage. These ravines, canyons and ever-so-beverly glens are the drainboards, after all, of the Mulholland mountainsides; what is not allowed to drain visibly above ground will certainly seep sneakily below (which is why, forty years later, Hal Wilkins' voice still rings with alarm, "Underground springs!" upon hearing that a new building might be in trouble). The master builders Janss knew their Westwood topsoil, so they drained it and put such massive floods control under it that a man could walk down there—through the catacombs of Westwood! It was the first time for such expensive flood-control in Southern California but Dr. Ed's foresight kept the Village high and dry more than once.

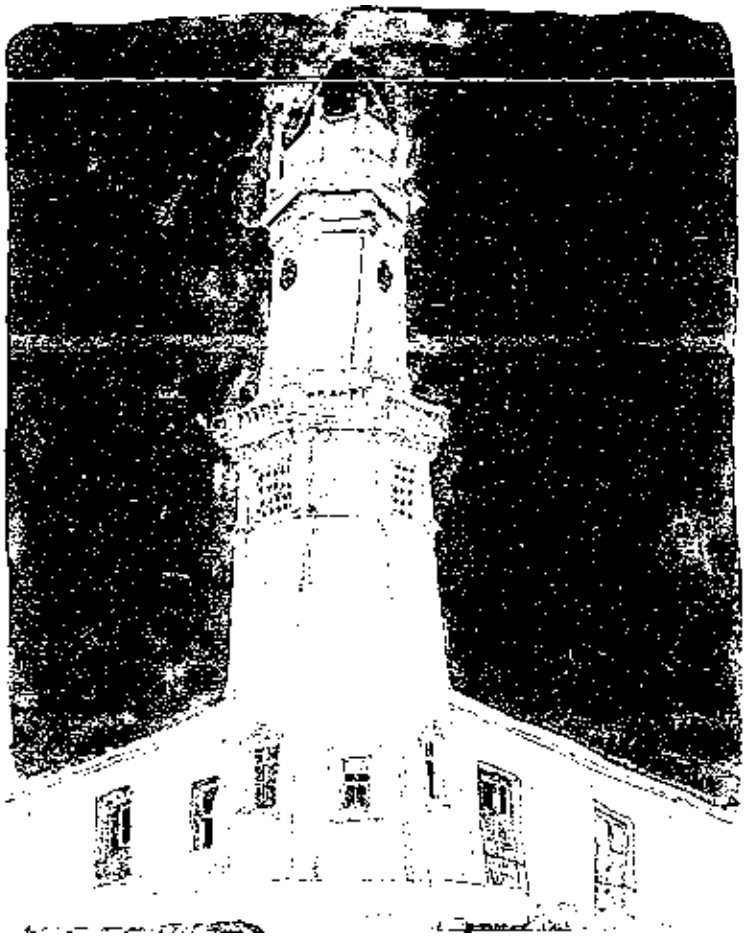
Or did you think the Village just came that way? That it was just naturally a perfect gradient of Westwood Boulevard that floats up from Wilshire and right on through the gates of UCLA? Not naturally at all. It took the good doctor's skill and forethought to set this village stage as carefully as any formal garden.

Even now, the view of Westwood Village unfolds before you like the



One of the unique architectural styles used in the Village were Spanish-type courtyards (left), designed by Jim Conway and Wilson Draver in the '20s, and still in use. The Fox tower (right) might have been copied from Boromini's San Carlo Church in Rome. Like any holy outpost, its spire could be seen from its Holy See—the home studio.

Reproduced with permission of the copyright owner. Further reproduction prohibited without permission.



The Holmby Clock Tower, built in an English-Norman style, was supposed to have student housing in the upper floors. Students never lived there, and for a long time the clock gave the wrong time.

leaves of an Italian fan. Even with high-risers where parks used to be, this fan shows the bulge on the round romanesque rotunda of Ralphs market there with the low loping arches for windows; it's now become some kind of a German Bratskeller for students, but with the lid around the top it still looks like a huge cookie-jar. And the center leaf of this fan always *HAS* to be that Monticello-like mosque that is the Janss Dome; you look straight into its big, square opening from Wilshire Blvd. It's become the Bank of America now, with a pylon on the top that says so (but that's as it should be, because the former Bank of Italy should fit in with all this "Mediterranean" decor). Behind the Dome you glimpse the stern Holmby Clock Tower, its peak as high and pointed as the Janss Dome is round and blunt. The left leaf of this Italian fan leads you straight up Broxton Avenue to the superwhite plu-perfect buttressed spire of the Fox Theatre. Shining-pure by daylight, glamorous spun-sugar by night floodlight, this Fox tower could have been copied from Boromini's San Carlo Church in Rome, but those coupled columns up there in pure-blue Westwood air look very Spyros Skouras Greek to me; at the top there's that flashing beacon that says F-O-X! You can see it clearly from the home studio itself.

So well-known is this view into Westwood Village that hardly anyone pauses to note that its effect is an illusion; it uses the same technique of the Parthenon (the rising gradient) to look bigger than it really is, and the effect is one of spread when in fact all these buildings are quite close together. The straight shoot to the Fox spire is not straight at all, and already the elevated triangle on which the Janss Dome sits is beginning to drift off in the direction Westwood Boulevard itself is tending. "We literally moved hills to get this topography," said Dr. Ed . . . that and almost two years of planning and work.

The result was that when the Village opened for sale in the spring of 1929, "we had enought applications for property to sell the Village three times over," according to Dr. Ed. Hal Wilkins, who was vice president in charge of sales says. "Sometimes there'd be $400,000 worth of buy orders waiting in my drawer." But the Jansses were very mindful of their commitment to Regent Dickson—this was to be a *pure* college town. Nothing more than beer could be bought within one mile, and not even beer at first. Both the Janss Dome and the Holmby Tower were built as *student dormitories* in the upper stories. The very careful Dr. Ed said, "We felt that the usual speculative buyers would not carry out the plans the company had envisioned for Westwood Village."

The Village opened right into the teeth of the Depression. It turned out to be the best thing ever for the Village; any "speculative buyers" vanished at once, and in fact the Holmby-Janss interests kept almost total control which gave the Village the unity it has preserved until—just yesterday. All signs were rigidly controlled, none were to stick out into the street, nothing should break these carefully planned lines-of-sight. All buildings had to be at least 17 feet in height (no marginal shops). But most important of all, everything had to be built in "Mediterranean style," whatever *that* meant; the Janss board would decide what that meant.

Through it all ran elegant Westwood Boulevard, a full fifty-feet wide when nobody had any idea what traffic would become. A chain of long lozenge-shaped islands ran down the center of the Boulevard, with flowering islands of red-pointed callas, birds-of-paradise, and slim stalks of coco-palms; these made a chain that leads right up through the University and on up to join with Sunset Boulevard where the original Don Maximo's St. Joe springs bubble.

Village and University were supposed to harmonize their architecture in "Mediterranean style," but up at the top of the Janss Steps, Royce Hall and the Powell Library, as they took shape, resembled the University of Bologna, which is not on the Med, no matter how you slice it.

Even the Village itself differed on what was "Med" and what was not. The way architect Stiles Clements designed the Ralphs rotunda seemed "Med" enough, and J. C. Allison's Janss Dome could be considered like a Moroccan mosque, but the Holmby Tower (designed by Gordon Kaufman) was definitely English-Norman and both the original Bullocks, and Desmonds (designed by Percy Lewis), wanted to modernize their storefronts. Desmond's already had green roofiles in honor of its founder, Irish Donny Desmond.

So Harold Janss decided to tour this area of Europe and determine once and for all what "Mediterranean style" meant. Italy was fine, of course; he saw things he knew in Naples and in Rome. He saw familiar mosques elsewhere, but when he got to Algiers he found the French architects there had all been converted to Le Corbusier and were casting concrete in those rounded shapes that might be called "organic." Such radical structures would never do for Westwood Village. He said the hell with it—there really *wasn't* anything you could say was definitely "Mediterranean style." To this day, when anyone says "the Village was built in Mediterranean style," they always add ". . . whatever *that* means!"

The Village developed styles that were its own: The Spanishy courtyards that Jim Conway and Wilson Draver created on Glendon (for the Harrison family, whose nephew Ed today waits for pickled condors' tongues in his building) are a style known definitely as authentic "Village," especially Foster's store and the old El Encanto Restaurant. The most distinctive mark of Westwood Village were the spires that you could see for miles rising up into the blue pre-smog. Every filling-station had a big white spire. Some, like the Standard station, were 150 feet high (with "Standard Service" lettered down the side—it took plenty of spire to take in all those letters). But Associated had a high spire, too, and a neon Flying-A flashed on top of its column like an aerial performer balancing in the night. The Mobil Flying Horse, red wings flapping, was also a Village landmark. Atop of everything was the Village Theatre spire flashing F-O-X! to all West L.A. At night the lights on all those spires made the Village visible for miles; the only oasis rising out of West L.A.'s clump of darkness. Harold Janss said, "We keep putting up all these spires and we'll turn the place into a Baghdad."

It came as a shock when the Janssses announced they sold their Dome.

He wasn't really worried about the Village going Iraqi. Its style would stay for another thirty years - the most successful and stable of the California model villages, often studied by architecture classes, replanned in theory to preserve its charm, but so very little changed in *fact* that when those daddies of World War II came back on the GI Bill to finish college, it was the same old Village. They could thrash out wartime traumas over oceans of beer at Dude's; they could drive their first post-war cars into Truntan Fairless' drive-in for burgers & fries, just as their fathers before them had driven their roadsters with the rumble-seats into the Hi-Lo on that very spot, the world's first drive-in restaurant. The entire eating-in-car industry was launched from this corner of Wilshire and Westwood Blvd. (where Dillingham is now putting up 21 stories).

It came as a shock when the Janssses announced they were selling their Dome to the Bank of America—this symbol—for a million dollars. This was in 1954, and then came the earth-shaking announcement that *all* the Janss interests in Westwood had been sold to one Arnold Kirkeby for 6.3 million dollars. This in 1955, and the screams could be heard for miles! Who knew *what* Kirkeby would do with all this heritage; and Arnold Kirkeby himself seems not to have been sure whether he had bought a white elephant or a gold mine.

Emotional capital is not the same as money, however, and while Westwood had grown into the hearts of the people, all that vast acreage out in the Conejo Valley (remember that land that the original Dr. Peter Janss bought at the time of Owens-Aqueduct) was finally ready to bloom, all 10,000 acres of it. A new generation of Janssses was ready to develop it; Westwood had to be cashed to develop the new Conejo.

The transfer to Kirkeby established a kind of rule of thumb. The Janssses sold their

continued on page 31

What's really hurting Westwood is disgorgement. Streets are glotted.

Dome in a separate transaction, and when the rest of their Village was sold to Kirkeby George Gregson, as Dr. Ed's son-in-law, kept the park on the northwest corner of Wilshire and Westwood Blvd. When Arnold Kirkeby decided to pass the pudding on, *he* kept the park on the *east* side of Westwood Blvd. So this rule turns out to be that each thumb pulled a plum out of the pudding that was worth more than he paid for the whole thing in the first place.

On George Gregson's former park now stands the Med-green Linde Medical Bldg., and on Arnold Kirkeby's former park stands the 21 stories of the Kirkeby Center (which really does strive to make a "Mediterranean" point with those elegant panels of travertined marble). "Finest office building in town," says George Gregson from his 14th floor office there. Howard Hughes thought it was fine enough for his personal office, too, being close to his home in Bel-Air. As Kirkeby's first customer, Hughes took the entire top floor while deciding whether to bring all of his Romaine Street crew out to Westwood, but then he opted entirely for Vegas and Kirkeby was able to put a penthouse restaurant there.

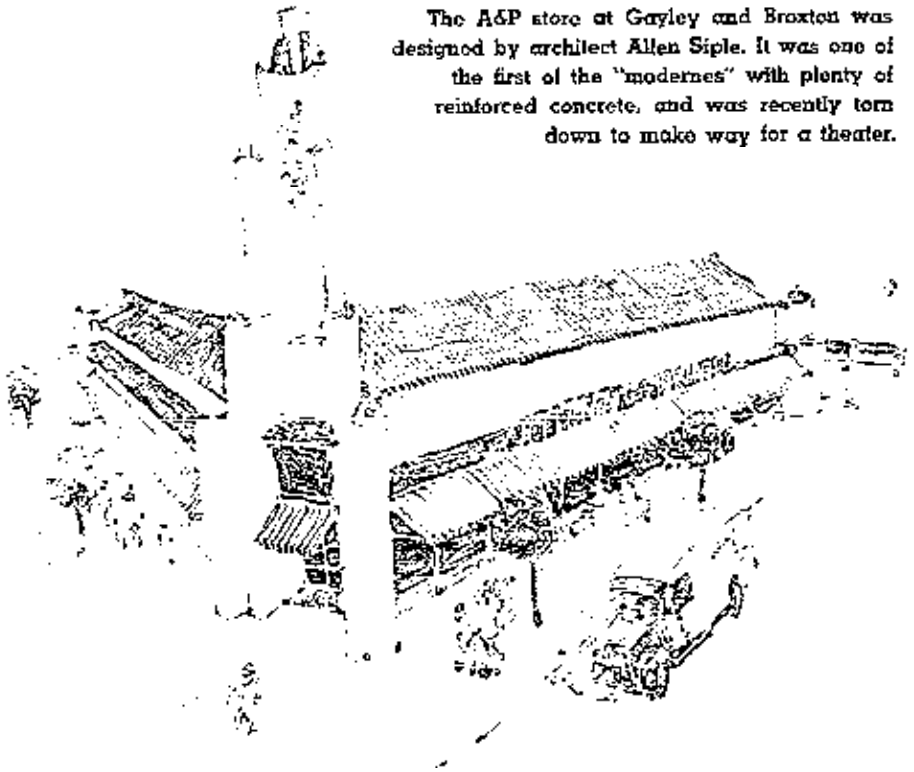
Apparently Harold Janss approves the "Mediterranean" intent of Kirkeby ("whatever *that* means") for he too has an office in the building; all the others have gone on to other ventures. Harold remains the Village's last Janss.

All these high-risers pride themselves on being self-sufficient. Each takes care of its own. Kirkeby parks its own with room to spare; Westwood Center, too, as with the Dillingham and the spanking-new Fed. UCLA has towers and towers of those automated gates that take "four quarters only" even for just ten minutes (something complicated about a refund somewhere).

The only parking problem in Westwood is the political war that some students wage against the University. Only, it's been Welton Beckett's new Bullock's that bore the brunt. The students feel that if the University furnishes free education it should also furnish free parking, the car being an educational necessity in Southern California. These students resist paying UCLA parking fees; each morning they rolled down the ramp into Bullock's parking-basement just as though they were going to buy something. A doorman stood guard, of course, trying to figure out what was a student and what was a shopper. How was he to know that Aunt Agatha in her 1927 Essex was taking Life-Long-Learning, and that Miss Mini-Mod in her Morgan Sports was basement parking to buy a lot of see-through mini-things? So, there was hell to pay (instead of Bullock's) when the doorman guessed wrong and had Miss Mini's Morgan towed away while the contraband Essex parked free. Every day was battle-day at Bullock's Underground—until they got in turnstiles.

What's really hurting Westwood is *disgorgement*. Every afternoon Ed Harrison looks down from his 14th story glass-nest to see the streets of Westwood Village coagulating into glot! Cars are streaming out of Kirkeby, out of his own Westwood Center, out of UCLA towers, and, yes, up out of Bullock's Basement! All heading for the ONE way out. All these cars are trying to disgorge onto a Wilshire Boulevard that's already been gorged to the hilt by BevHills/Century City Outbound, all heading for junction with San Diego Freeway.

Right now Westwood Village is caught like a nut in a cracker. UCLA presses down from the North and will soon seal an antiseptic wall of Medical-Center along the



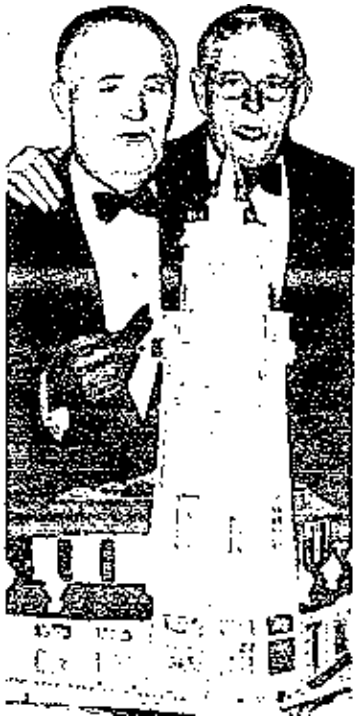
The A&P store at Gayley and Broxton was designed by architect Allen Siple. It was one of the first of the "modernes" with plenty of reinforced concrete, and was recently torn down to make way for a theater.

Reproduced with permission of the copyright owner. Further reproduction prohibited without permission.

Manny Borenstein is consulting computers in order to solve the Problems of Westwood.

West (where Sonja Henie's outdoor ice-rink used to melt); herds of automobiles push in from the East, all wheels stampede for this confluence of Santa Monica/San Diego/Wilshire and the whole city is heading for the Pass. Who has the answer?

Harold (L) and Ed Janss mark Westwood's 8th birthday with Holmby Clock Tower cake. Above, the Janss dome building.



Well, maybe Manny Borenstein; anyway, he has the Problem. He's the latest one to buy it, from Janss to Kirkeby via Kreedman to Manny and his friends (less some plums along the way). Manny's working terribly hard to figure something out ("I don't even have time for my family"). His office is right inside that Holmby Clock Tower; but Manny has no time to waste in his office anymore; he's never there. A secretary says, "Go over there to that sign that says Public Parking and ask the parking attendant, Ray. He'll tell you where Manny is." Ray directs you across an alley and up a back entrance into what you thought was just the back-end of Old Bullock's No. 1, now Manny's College Bookstore. But not at all! What you have blundered into is bank upon bank of computers, where everybody is busy studying data—until the worried man in the middle with that sheaf of multi-printout in his hand says, "Who're you?" It turns out that Manny Borenstein is consulting at least two combines of computerization in the back of the bookstore. Has he been able to come up with an answer? Well, he shuffles a little with that. He assures you—whatever the computers come up with—that he, Manny Borenstein, means the best for the Village ("whatever *that* means").

The signs are plain to see. Whether you reckon the Village to be forty years old (according to Janss) or 200 years old (according to Portola), you need only to look at the clock on the old Holmby Tower outside Manny Borenstein's office; the clock is all spruced up now with gold hands and bronze numerals. Repaired after many years of faulty operation, the clock is giving the heart of Westwood the correct time. This machine, at least, is doing right by Manny—and, maybe—Westwood.

DAILY BRUIN

[Orientation Issue] News: The changing face of Westwood

BY NATALIE BANACH

NEWS

SHARE

TWEET

Tall prairie grass swaying in the wind and beds of lima beans aren't pictures the average student would paint of UCLA or Westwood Village. Yet that is what today's well-known images of Royce Hall and Diddy Riese cookie wrappers emanate from.

Having been shaped and molded by a variety of political, economic and social forces, both the campus and the Village started off as the Rancho San JosÃ© de Buenos Ayres, a vast tract of land spanning over 4,400 acres where black-tail deer once grazed.

Since then, the demographic, geographical and social landscapes have changed, but local historians and business owners say pioneering developers have remained integral in shaping the Westwood students associate with today.

Often criticized as lacking an identity, today's Westwood is a conglomeration of establishments ranging from the imposing Oppenheimer Towers to popular student eatery U Dog to the iconic Fox Tower. So it can be hard to imagine that the Village was first envisioned and guided under one defining principle: creating the perfect college town.

"They knew that a university would bring culture and vitality to an area that was populated by jack rabbits,". said Steven Sann, owner of the 930 restaurant at the W Hotel in Westwood and local historian.

The university, which was originally the Southern Branch of the University of California, was first situated on Vermont Avenue and began holding classes in 1919 before it grew too large and moved to its current location in 1927.

The first to follow through on plans to develop Westwood were Edwin and Harold Janss, two brothers who in the early 1920s bought the land that now includes UCLA and Westwood.

The Jansses began grading streets and planning the town of Westwood, a community that included a bowling alley and malt shop, both of which served as escapes from the one library on the newly constructed campus.

"They really designed a "˜town for the gown,'". Sann said, adding that the Janss brothers marketed the community with this slogan, which referred to a centuries-old tradition of faculty donning gowns to class.

The brothers believed every building and store should serve the needs and wants of the university population, Sann said, so even the second floor of their headquarters, which today houses the upscale restaurant Eurochow, was furnished and used as a men's dormitory.

One of the first businesses to come to Westwood that year was Oakley's, a family-owned barber shop that still operates today under Larry Oakley.

Oakley tells the story of how his uncle Burt was cutting Harold Janss' hair one day in a shop on Vermont Avenue and Janss gave him an offer he couldn't refuse.

"He told Burt, "˜If you come out to Westwood and open up a barber shop, we'll give you six months free rent.' … We've been here ever since,". Oakley said.

The Village also once boasted one of the world's only year-round outdoor ice skating rinks, called the Tropical Ice Gardens, complete with a Swiss chalet and bleacher seating for 10,000.

As more developers arrived in Westwood, they brought along their own ideas, ultimately helping to change the Village into what it is today, an amalgam of sights and experiences.

One of the major trends to hit Westwood arrived on the heels of the 1960s, when a developer named Manuel Borenstein played a significant role in the Village.

"By the 1970s, the Village drifted and morphed into a regional entertainment zone for Southern California. Manny Borenstein strongly fueled this," Sann said.

According to longtime residents, the 1950s and '60s witnessed the flourishing of foreign and independent films in Westwood.

One of the first art houses in Los Angeles was the Landmark Regent Theater, built in 1966 on Broxton Avenue, where a French film by director Claude Lelouch played to a full house for 96 consecutive weeks.

Soon movie theaters began to open all over Westwood, and from 1965 to 1975 the number of theaters in the Village went from three to 18. The increase also altered the type of movies that would come to play on the big screen.

"Back then, people would stand in line forever. When "˜The Godfather' played, people were waiting in line for hours. It was the dawning of street entertainment culture. … There became this carnival atmosphere in Westwood," Sann said.

The constantly evolving nature of the Village has resulted in a variety of developers touting distinctive ideas about how to better the area. At one time, developer Larry Taylor said he would entice high-end stores like Gucci, Versace and Armani to the area.

"He talked big and talked about several Rodeo Drives. That was the way he sold his concept," said Sandy Brown, president of the Holmby-Westwood Property Association, a group of single-family homeowners that is heavily involved in Westwood's developments.

Westwood's current situation has attracted a wealth of developers amid talk of a dwindling economic situation.

Many say the Village is often synonymous with empty storefronts, a dismal parking situation and an overconcentration of pharmacies.

Today's developers, including Jeff Katofsky, who plans to build a multiplex behind Jerry's Famous Deli, and Alan Casden, who is in the process of building Palazzo Westwood, a $100 million retail and residential complex, have now congregated in the Village and talk about a new course of action.

"Westwood has evolved over the years. It went from being a town built around the university to an entertainment center. Now it has no identity,"□ said Howard Katz, vice president of community development for Casden Properties.

While many developers agree revitalization is necessary, Katz said his company will focus on supporting Westwood's permanent living population, as opposed to transient visitors.

"If you go to Westwood for lunch, it's busy. If you go there for dinner, it's busy. But if you go any other time, you don't see many people. You have a community that's not served well by Village uses,"□ Katz said.

Currently, the development company has begun the first stage of excavation on its Glendon Avenue lot, which is slated to take about four to six months. Like many other developers before them, Casden Properties has come to Westwood with grand plans to redirect and redefine the area.

Local business owners and residents now say the changing dynamics of the Village have become a constant, and as much as developers have played their part, the area has also been a product of the times.

"More than by the individual developers, Westwood has been a sign of the times and the economy. … In general, people developed a more casual style and fancier stores went out of business,"□ Brown said.

Yet as a result of the Village's close proximity to UCLA, a business' attention to the university population may be vital to its functioning, something Oakley can attest to.

"Over 40 percent of our customers come from UCLA proper, and I do the entire medical staff. We've done the deans of the medical school and the law schools. We know what's going on,"□ Oakley said.

Application to Alter, Repair, Move or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

BUILDING DIVISION

Application to Alter, Repair, Move or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

Application to Alter, Repair, Move or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

19. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

Date _____ Applicant _____

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

20. I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____ Lender's Address _____

21. I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

I realize that this permit is an application for inspection, that it does not approve or authorize the work specified herein, that it does not authorize or permit any violation or failure to comply with any applicable law, that neither the city of Los Angeles nor any board, department, officer or employee thereof make any warranty or shall be responsible for the performance or results of any work described herein or the condition of the property or soil upon which such work is performed. (See Sec. 91.0202 LAMC)

DECLARATIONS AND CERTIFICATIONS

LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date 9-28-82 Lic. Class B-C44 Lic. Number 353-9528 Contractor Lowell E. Newby (Signature)

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

☑ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

☐ I am exempt under Sec. _____, B. & P. C. for this reason

DECLARATIONS AND CERTIFICATIONS

LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date _____ Lic. Class _____ Lic. Number _____ Contractor _____ (Signature)

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

☐ I am exempt under Sec. _____, B. & P. C. for this reason _____

Date 4-18-83 Owner's Signature Robert M. Lester, Pres. Pine Realty, Inc.

WORKERS' COMPENSATION DECLARATION

18. I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.).

Policy No. _____ Company _____

☐ Certified copy is hereby furnished.

☐ Certified copy is filed with the Los Angeles City Dept. of Bldg. & Safety.

Applicant's Mailing Address _____

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

19. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

Date 4-18-83 Applicant Robert M. Lester, Pres., Pine Realty, Inc.

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

20. I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____ Lender's Address _____

21. I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

I realize that this permit is an application for inspection, that it does not approve or authorize the work specified herein, that it does not authorize or permit any violation or failure to comply with any applicable law, that neither the city of Los Angeles nor any board, department, officer or employee thereof make any warranty or shall be responsible for the performance or results of any work described herein or the condition of the property or soil upon which such work is performed. (See Sec. 91.0202 LAMC)

DECLARATIONS AND CERTIFICATIONS

LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date _____ Lic. Class _____ Lic. Number _____ Contractor _____ (Signature)

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code. Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031 5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code. The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

☐ I am exempt under Sec. _____, B. & P. C. for this reason _____

Date August 2, 1983 Owner's Signature Pine Realty, Inc. Robert Testa, Pres.

WORKERS' COMPENSATION DECLARATION

18. I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.).

Policy No. _____ Insurance Company _____

☐ Certified copy is hereby furnished.

☐ Certified copy is filed with the Los Angeles City Dept of Bldg. & Safety.

Date _____ Applicant's Signature _____

Applicant's Mailing Address _____

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

19. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

Date 8-2-83 Applicant's Signature Robert Testa Pres. Pine Realty

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

20. I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____ Lender's Address _____

21. I certify that I have read this application and state that the above information is correct I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes

I realize that this permit is an application for inspection, that it does not approve or authorize the work specified herein, that it does not authorize or permit any violation or failure to comply with any applicable law, that neither the city of Los Angeles nor any board, department, officer or employee thereof make any warranty or shall be responsible for the performance or results of any work described herein or the condition of the property or soil upon which such work is performed. (See Sec 91.0202 LAMC)

DECLARATIONS AND CERTIFICATIONS

LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date 9/13/83 Lic. Class B Lic. Number 385230 Contractor _____ (Signature)

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

☐ I am exempt under Sec. _____, B. & P. C. for this reason _____

Date _____ Owner's Signature _____

WORKERS' COMPENSATION DECLARATION

DECLARATIONS AND CERTIFICATIONS

LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date 11-17-83 Lic. Class B Lic. Number 385-230 Contractor Mark Bregman (Signature)

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code. Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

☐ I am exempt under Sec. _____, B. & P. C. for this reason _____

Date _____ Owner's Signature _____

WORKERS' COMPENSATION DECLARATION

18. I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.).

DECLARATIONS AND CERTIFICATIONS

LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date _____ Lic. Class _____ Lic. Number _____ Contractor _____ (Signature)

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

☐ I am exempt under Sec. _____, B. & P. C. for this reason _____

LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date OCT 17, 89 Lic. Class B Lic. Number 440892 Contractor Kenneth Reyes (Signature)

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

☐ I am exempt under Sec. _____, B. & P. C. for this reason _____

OWNER-BUILDER DECLARATION

I hereby affirm, under penalty of perjury, that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business & Professions Code. Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chap. 9 commencing with Sec. 70000 of Div. 3 of the Business & Professions Code) or that he or she is exempt therefrom & the basis for the alleged exemption. Any violation of Sec. 7031.5 by any applicant for a permit, subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

☐ I, as the owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec 7044, Business & Professions Code : The Contractors License Law does not apply to the owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not intend to improve for the purposes of sale).

☐ I, as the owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business & Professions Code: The Contractors License Law does not apply to the owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law).

☐ I am exempt under Sec. _____ Bus. & Prof. Code for the following reason: _____

Print: _____ Sign: _____ Date: _____ ☐ Owner ☐ Authorized Agent

FINAL DECLARATION

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein Also, that it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, that neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed.

Print: Deborah L. Scott Sign: Deborah Scott Date: 6/16/97 ☐ Owner ☒ Contractor ☐ Authorized Agent

Unless a shorter period of time has been established by an official action, plan check approval expires one and a half years after the fee has been paid. This permit expires two years after the fee has been paid or 180 days after the fee has been paid and construction has not commenced, or if work is suspended, discontinued or abandoned for a continuous period of 180 days (Sec. 98.0603 L.A.M.C). Claims for refund of fees paid on permits must be filed within one year from the date of expiration for permits granted by the Department of Building and Safety (Sec. 22.12 & 22.13 L.A.M.C).

15. Building Relocated From:

16. CONTRACTOR, ARCHITECT, & ENGINEER NAME	ADDRESS		CLASS	LICENSE#	PHONE #
(A) Terry Charles	45 La Purisima,	Rancho Santa Margarita, CA		C11658	714-660-7900
(C) Edwards Neil Construction Inc	905 South Myrtle Avenue,	Monrovia, CA 91016	B	712723	

Unless a shorter period of time has been established by an official action, plan check approval expires one and a half years after the plan check fee has been paid. This permit expires two years after the building permit fee has been paid or 180 days after the fee has been paid and construction has not commenced or if work is suspended, discontinued or abandoned for a continuous period of 180 days (Sec. 98.0602 LAMC). Claims for refund of fees paid must be filed within one year from the date of expiration for permits granted by the Dept. of Building & Safety (Sec. 22.12 & 22.13 LAMC).

17. LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. (For 1 or 2 family dwellings, use the declaration attachment if separate general, electrical, plumbing, and/or HVAC contractor's & workers' comp declarations are desired.)

License Class: B Lic. No.: 712723 Print: Scott Cooney Sign: Scott Cooney

18. WORKERS' COMPENSATION DECLARATION

I hereby affirm, under penalty of perjury, one of the following declarations:

☐ I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☑ I have and will maintain workers's compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are: Carrier: ABI Brokers Los Angeles Policy Number: 712723

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Sign: Scott Cooney Date: 8,7,97 ☐ Contractor ☑ Authorized Agent ☐ Owner

WARNING FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES

19. CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's name: Lender's address:

20. ASBESTOS REMOVAL

Notification of asbestos removal: ☑ Is not applicable ☐ Letter was sent to the AQMD or EPA Sign: Scott Cooney Date: 8,7,97

21. OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Section 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 commencing with Sec. 7000 of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as the owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business & Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year from completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale)

☑ I, as the owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business & Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.)

☐ I am exempt under Sec. Bus. & Prof. Code for the following reason:

Print: Scott Cooney Sign: Scott Cooney Date: 8,7,97 ☐ Owner ☑ Authorized Agent

22. FINAL DECLARATION

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein. Also that it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, that neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

RE: DETERMINATION OF ZONING USE AND PARKING - BriteSmile

In response to your letter of November 30, 1998, requesting a Zoning Use and Parking determination for Brite/Smile proprietary teeth whitening retail centers, please be advised of the following:

The proposed Brite/Smile retail centers will be interpreted as a *"retail store/salon use"* so long as there *are no dental procedures other than teeth whitening performed by the* the Brite/Smile centers *staff*. The required parking will be calculated as required for a "retail store use".

Otherwise, the use will be interpreted as a *dental clinic*. The required parking is calculated at "one automobile parking space per 200 square feet of total floor area", L.A.M.C. Section 12.21A4(d)(3).

Claims for refund of fees paid must be filed within one year from the date of expiration for permits granted by the Dept. of Building & Safety (Sec. 22.12 & 22.13 LAMC).

17. LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. If doing work on a residential property, I certify that I hold a valid certification as a Home Improvement contractor per B&P Code, Section 7150 2c. The following applies to B contractors only: I understand the limitations of Section 7057 related to my ability to take prime contracts or subcontracts involving specialty trades.

License Class. _____ Lic. No.: _____ Print: _____ Sign: _____

18. WORKERS' COMPENSATION DECLARATION

I hereby affirm, under penalty of perjury, one of the following declarations:

☐ I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☐ I have and will maintain workers's compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: _____ Policy Number: _____

☒ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Sign: X _____ Date: 9/8/2000 ☐ Contractor ☒ Authorized Agent ☐ Owner

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

19. CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's name: _____ Lender's address: _____

20. ASBESTOS REMOVAL

Notification of asbestos removal: ☒ Is not applicable ☐ Letter was sent to the AQMD or EPA Sign: _____ Date: 9/8/2000

21. OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Section 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 commencing with Sec. 7000 of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as the owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business & Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year from completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale)

☒ I, as the owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business & Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.)

☐ I am exempt under Sec. _____, Bus. & Prof. Code for the following reason: _____

Print: Jonathan Kenedon Sign: _____ Date: 9/8/2000 ☐ Owner ☒ Authorized Agent

22. FINAL DECLARATION

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein. Also that it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, that neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

19. ASBESTOS REMOVAL DECLARATION / LEAD HAZARD WARNING

I certify that notification of asbestos removal is either not applicable or was sent to the AQMD or EPA as per section 19827.5 of the Health and Safety Code. Due to the possible presence of lead-based paint, lead safe work practices are required on all repairs in pre-1979 buildings that disturb paint. Failure to do so could create lead hazards that violate California Health and Safety Code Section 17920.10 and Section 105256 and may be subject to a $1000 fine or criminal prosecution. For more information call LA County's Department of Health Services at (800)524-5323. In order to locate a Lead Certified Professional and obtain additional information, call California DHS at (800)597-5323 or go to the DHS Website at http://www.dhs.ca.gov/childlead/html/GENclist.html.

In the event that any box (i.e. 1-16) is filled to capacity, it is possible that additional information has been captured electronically and could not be printed due to space restrictions. Nevertheless, the information printed exceeds that required by Section 19825 of the Health and Safety Code of the State of California.

15. Building Relocated From:

16. CONTRACTOR, ARCHITECT, & ENGINEER NAME	ADDRESS		CLASS	LICENSE#	PHONE #
(C) Down Town Design & Construction Inc	4736 Elmwood Avenue #D,	Los Angeles, CA 90004	B	490729	

PERMIT EXPIRATION/REFUNDS: This permit expires two years after the date of the permit issuance. This permit will also expire if no construction work is performed for a continuous period of 180 days (Sec. 98.0602 LAMC). Claims for refund of fees paid must be filed within one year from the date of expiration for permits granted by LADBS (Sec. 22.12 & 22.13 LAMC). The permittee may be entitled to reimbursement of permit fees if the Department fails to conduct an inspection within 60 days of receiving a request for final inspection (HS 17951).

17. LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. The following applies to B contractors only: I understand the limitations of Section 7057 of the Business and Professional Code related to my ability to take prime contracts or subcontracts involving specialty trades.

License Class: **B** Lic. No.: **490729** Contractor: **DOWN TOWN DESIGN & CONSTRUCTION INC**

18. WORKERS' COMPENSATION DECLARATION

I hereby affirm, under penalty of perjury, one of the following declarations:

(__) I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

(X) I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: **State Comp. Ins. Fund** Policy Number: **1869670**

(__) I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

19. ASBESTOS REMOVAL DECLARATION / LEAD HAZARD WARNING

I certify that notification of asbestos removal is either not applicable or has been submitted to the AQMD or EPA as per section 19827.5 of the Health and Safety Code. Information is available at (909) 396-2336 and the notification form at www.aqmd.gov. Lead safe construction practices are required when doing repairs that disturb paint in pre-1978 buildings due to the presence of lead per section 6716 and 6717 of the Labor Code. Information is avaiable at Health Services for LA County at (800) 524-5323 or the State of California at (800) 597-5323 or www.dhs.ca.gov/childlead.

20. CONSTRUCTION LENDING AGENCY DECLARATION

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).
Lender's name (if any):_____ Lender's address:_____

21. FINAL DECLARATION

I certify that I have read this application **INCLUDING THE ABOVE DECLARATIONS** and state that the above information **INCLUDING THE ABOVE DECLARATIONS** is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein, and it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

By signing below, I certify that:

(1) I accept all the declarations above namely the Licensed Contractor's Declaration, Workers' Compensation Declaration, Asbestos Removal Declaration / Lead Hazard Warning, Construction Lending Agency Declaration and Final Declaration; and
(2) This permit is being obtained with the consent of the legal owner of the property.

License Class: **B** Lic. No.: **947272** Contractor: **PACIFIC CONTRACTING GROUP INC**

18. WORKERS' COMPENSATION DECLARATION

I hereby affirm, under penalty of perjury, one of the following declarations:

(_) I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

(_) I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier:_____ Policy Number:_____

(X) I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

19. ASBESTOS REMOVAL DECLARATION / LEAD HAZARD WARNING

I certify that notification of asbestos removal is either not applicable or has been submitted to the AQMD or EPA as per section 19827.5 of the Health and Safety Code. Information is available at (909) 396-2336 and the notification form at www.aqmd.gov. Lead safe construction practices are required when doing repairs that disturb paint in pre-1978 buildings due to the presence of lead per section 6716 and 6717 of the Labor Code. Information is avaiable at Health Services for LA County at (800) 524-5323 or the State of California at (800) 597-5323 or www.dhs.ca.gov/childlead.

20. CONSTRUCTION LENDING AGENCY DECLARATION

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).
Lender's name (if any):_____ Lender's address:_____

21. FINAL DECLARATION

I certify that I have read this application **INCLUDING THE ABOVE DECLARATIONS** and state that the above information **INCLUDING THE ABOVE DECLARATIONS** is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein, and it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

By signing below, I certify that:

(1) I accept all the declarations above namely the Licensed Contractor's Declaration, Workers' Compensation Declaration, Asbestos Removal Declaration / Lead Hazard Warning, Construction Lending Agency Declaration and Final Declaration; and
(2) This permit is being obtained with the consent of the legal owner of the property.

PERMIT EXPIRATION/REFUNDS: This permit expires two years after the date of the permit issuance. This permit will also expire if no construction work is performed for a continuous period of 180 days (Sec. 98.0602 LAMC). Claims for refund of fees paid must be filed within one year from the date of expiration for permits granted by LADBS (Sec. 22.12 & 22.13 LAMC). The permittee may be entitled to reimbursement of permit fees if the Department fails to conduct an inpection within 60 days of receiving a request for final inspection (HS 17951).

17. LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. The following applies to B contractors only: I understand the limitations of Section 7057 of the Business and Professional Code related to my ability to take prime contracts or subcontracts involving specialty trades.

License Class: **B** License No.: **904878** Contractor: **SECURITY VAULT WORKS INC**

18. WORKERS' COMPENSATION DECLARATION

I hereby affirm, under penalty of perjury, one of the following declarations:

(_) I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

(_) I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: **Twin Cities Fire Ins. Co.** Policy Number: **42WBGT3006**

(_) I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

19. ASBESTOS REMOVAL DECLARATION / LEAD HAZARD WARNING

I certify that notification of asbestos removal is either not applicable or has been submitted to the AQMD or EPA as per section 19827.5 of the Health and Safety Code. Information is available at (909) 396-2336 and the notification form at www.aqmd.gov. Lead safe construction practices are required when doing repairs that disturb paint in pre-1978 buildings due to the presence of lead per section 6716 and 6717 of the Labor Code. Information is available at Health Services for LA County at (800) 524-5323 or the State of California at (800) 597-5323 or www.dhs.ca.gov/childlead.

20. CONSTRUCTION LENDING AGENCY DECLARATION

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's Name (If Any): _____ Lender's Address: _____

21. FINAL DECLARATION

I certify that I have read this application **INCLUDING THE ABOVE DECLARATIONS** and state that the above information **INCLUDING THE ABOVE DECLARATIONS** is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein, and it does not auhorize or permit any violation or failure to comply with any applicable law. Furthermore, neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

By signing below, I certify that:

(1) I accept all the declarations above namely the Licensed Contractor's Declaration, Workers' Compensation Declaration, Asbestos Removal Declaration / Lead Hazard Warning, Construction Lending Agency Declaration, and Final Declaration; and

(2) This permit is being obtained with the consent of the legal owner of the property.

I certify that notification of asbestos removal is either not applicable or has been submitted to the AQMD or EPA as per section 19827.5 of the Health and Safety Code. Information is available at (909) 396-2336 and the notification form at www.aqmd.gov. Lead safe construction practices are required when doing repairs that disturb paint in pre-1978 buildings due to the presence of lead per section 6716 and 6717 of the Labor Code. Information is available at Health Services for LA County at (800) 524-5323 or the State of California at (800) 597-5323 or www.dhs.ca.gov/childlead.

20. CONSTRUCTION LENDING AGENCY DECLARATION

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's Name (If Any): _____ Lender's Address : _____

21. FINAL DECLARATION

I certify that I have read this application **INCLUDING THE ABOVE DECLARATIONS** and state that the above information **INCLUDING THE ABOVE DECLARATIONS** is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein, and it does not auhorize or permit any violation or failure to comply with any applicable law. Furthermore, neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

By signing below, I certify that:

(1) I accept all the declarations above namely the Licensed Contractor's Declaration, Workers' Compensation Declaration, Asbestos Removal Declaration / Lead Hazard Warning, Construction Lending Agency Declaration, and Final Declaration; and

(2) This permit is being obtained with the consent of the legal owner of the property.

PERMIT EXPIRATION/REFUNDS: This permit expires two years after the date of the permit issuance. This permit will also expire if no construction work is performed for a continuous period of 180 days (Sec. 98.0602 LAMC). Claims for refund of fees paid must be filed within one year from the date of expiration for permits granted by LADBS (Sec. 22.12 & 22.13 LAMC). The permittee may be entitled to reimbursement of permit fees if the Department fails to conduct an inspection within 60 days of receiving a request for final inspection (HS 17951).

17. LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. The following applies to B contractors only: I understand the limitations of Section 7057 of the Business and Professional Code related to my ability to take prime contracts or subcontracts involving specialty trades.

License Class: **B** License No.: **642751** Contractor: **J P CONSTRUCTION CO**

18. WORKERS' COMPENSATION DECLARATION

I hereby affirm, under penalty of perjury, one of the following declarations :

( ) I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

(X) I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: **STATE COMP. INS. FUND** Policy Number: **9048017**

( ) I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

19. ASBESTOS REMOVAL DECLARATION / LEAD HAZARD WARNING

I certify that notification of asbestos removal is either not applicable or has been submitted to the AQMD or EPA as per section 19827.5 of the Health and Safety Code. Information is available at (909) 396-2336 and the notification form at www.aqmd.gov. Lead safe construction practices are required when doing repairs that disturb paint in pre-1978 buildings due to the presence of lead per section 6716 and 6717 of the Labor Code. Information is available at Health Services for LA County at (800) 524-5323 or the State of California at (800) 597-5323 or www.dhs.ca.gov/childlead.

20. CONSTRUCTION LENDING AGENCY DECLARATION

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's Name (If Any): _____ Lender's Address : _____

21. FINAL DECLARATION

I certify that I have read this application **INCLUDING THE ABOVE DECLARATIONS** and state that the above information **INCLUDING THE ABOVE DECLARATIONS** is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein, and it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

By signing below, I certify that:

(1) I accept all the declarations above namely the Licensed Contractor's Declaration, Workers' Compensation Declaration, Asbestos Removal Declaration / Lead Hazard Warning, Construction Lending Agency Declaration, and Final Declaration; and

(2) This permit is being obtained with the consent of the legal owner of the property.

I hereby affirm, under penalty of perjury, one of the following declarations :

( ) I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

(X) I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: **EVEREST NTL. INS. CO.** Policy Number: **760001485515**

( ) I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

19. ASBESTOS REMOVAL DECLARATION / LEAD HAZARD WARNING

I certify that notification of asbestos removal is either not applicable or has been submitted to the AQMD or EPA as per section 19827.5 of the Health and Safety Code. Information is available at (909) 396-2336 and the notification form at www.aqmd.gov. Lead safe construction practices are required when doing repairs that disturb paint in pre-1978 buildings due to the presence of lead per section 6716 and 6717 of the Labor Code. Information is available at Health Services for LA County at (800) 524-5323 or the State of California at (800) 597-5323 or www.dhs.ca.gov/childlead.

20. CONSTRUCTION LENDING AGENCY DECLARATION

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's Name (If Any): _____ Lender's Address : _____

21. FINAL DECLARATION

I certify that I have read this application **INCLUDING THE ABOVE DECLARATIONS** and state that the above information **INCLUDING THE ABOVE DECLARATIONS** is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein, and it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

By signing below, I certify that:

(1) I accept all the declarations above namely the Licensed Contractor's Declaration, Workers' Compensation Declaration, Asbestos Removal Declaration / Lead Hazard Warning, Construction Lending Agency Declaration, and Final Declaration; and

(2) This permit is being obtained with the consent of the legal owner of the property.

15. BUILDING RELOCATED FROM:

16. CONTRACTOR, ARCHITECT & ENGINEER NAME	ADDRESS		CLASS	LICENSE #	PHONE #
(A) MARCHI, BRETT ERNEST	2599 BASELINE AVENUE,	SOLVANG, CA 93463		C15267	
(C) 3 STEP KITCHEN & BATH	12956 BURBANK BLVD,	SHERMAN OAKS, CA 91401	B	914579	

PERMIT EXPIRATION/REFUNDS: This permit expires two years after the date of the permit issuance. This permit will also expire if no construction work is performed for a continuous period of 180 days (Sec. 98.0602 LAMC). Claims for refund of fees paid must be filed within one year from the date of expiration for permits granted by LADBS (Sec. 22.12 & 22.13 LAMC). The permittee may be entitled to reimbursement of permit fees if the Department fails to conduct an inspection within 60 days of receiving a request for final inspection (HS 17951).

17. LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. The following applies to B contractors only: I understand the limitations of Section 7057 of the Business and Professional Code related to my ability to take prime contracts or subcontracts involving specialty trades.

License Class: B License No.: 914579 Contractor: 3 STEP KITCHEN & BATH

18. WORKERS' COMPENSATION DECLARATION

I hereby affirm, under penalty of perjury, one of the following declarations:

( ) I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

( ) I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: STATE COMP. INS. FUND Policy Number: 7130034278

(X) I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

19. ASBESTOS REMOVAL DECLARATION / LEAD HAZARD WARNING

I certify that notification of asbestos removal is either not applicable or has been submitted to the AQMD or EPA as per section 19827.5 of the Health and Safety Code. Information is available at (909) 396-2336 and the notification form at www.aqmd.gov. Lead safe construction practices are required when doing repairs that disturb paint in pre-1978 buildings due to the presence of lead per section 6716 and 6717.of the Labor Code. Information is available at Health Services for LA County at (800) 524-5323 or the State of California at (800) 597-5323 or www.dhs.ca.gov/childlead.

20. CONSTRUCTION LENDING AGENCY DECLARATION

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's Name (If Any): _____ Lender's Address : _____

21. FINAL DECLARATION

I certify that I have read this application **INCLUDING THE ABOVE DECLARATIONS** and state that the above information **INCLUDING THE ABOVE DECLARATIONS** is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein, and it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

By signing below, I certify that:

(1) I accept all the declarations above namely the Licensed Contractor's Declaration, Workers' Compensation Declaration, Asbestos Removal Declaration / Lead Hazard Warning, Construction Lending Agency Declaration, and Final Declaration; and

(2) This permit is being obtained with the consent of the legal owner of the property.

(C) INNOVATIVE CONSTRUCTION	15151 SPAR STREET,	GARDEN GROVE, CA 92843	B	868057	(858) 610-6900

PERMIT EXPIRATION/REFUNDS: This permit expires two years after the date of the permit issuance. This permit will also expire if no construction work is performed for a continuous period of 180 days (Sec. 98.0602 LAMC). Claims for refund of fees paid must be filed within one year from the date of expiration for permits granted by LADBS (Sec. 22.12 & 22.13 LAMC). The permittee may be entitled to reimbursement of permit fees if the Department fails to conduct an inspection within 60 days of receiving a request for final inspection (HS 17951).

17. LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. The following applies to B contractors only: I understand the limitations of Section 7057 of the Business and Professional Code related to my ability to take prime contracts or subcontracts involving specialty trades.

License Class: **B** License No.: **868057** Contractor: **INNOVATIVE CONSTRUCTION**

18. WORKERS' COMPENSATION DECLARATION

I hereby affirm, under penalty of perjury, one of the following declarations :

(X) I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

( ) I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: **EVEREST NTL. INS. CO.** Policy Number: **760001485515**

( ) I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

19. ASBESTOS REMOVAL DECLARATION / LEAD HAZARD WARNING

I certify that notification of asbestos removal is either not applicable or has been submitted to the AQMD or EPA as per section 19827.5 of the Health and Safety Code. Information is available at (909) 396-2336 and the notification form at www.aqmd.gov. Lead safe construction practices are required when doing repairs that disturb paint in pre-1978 buildings due to the presence of lead per section 6716 and 6717 of the Labor Code. Information is available at Health Services for LA County at (800) 524-5323 or the State of California at (800) 597-5323 or www.dhs.ca.gov/childlead.

20. CONSTRUCTION LENDING AGENCY DECLARATION

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's Name (If Any): _____ Lender's Address : _____

21. FINAL DECLARATION

I certify that I have read this application **INCLUDING THE ABOVE DECLARATIONS** and state that the above information **INCLUDING THE ABOVE DECLARATIONS** is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein, and it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

By signing below, I certify that:

(1) I accept all the declarations above namely the Licensed Contractor's Declaration, Workers' Compensation Declaration, Asbestos Removal Declaration / Lead Hazard Warning, Construction Lending Agency Declaration, and Final Declaration; and

(2) This permit is being obtained with the consent of the legal owner of the property.

PERMIT EXPIRATION/REFUNDS: This permit expires two years after the date of the permit issuance. This permit will also expire if no construction work is performed for a continuous period of 180 days (Sec. 98.0602 LAMC). Claims for refund of fees paid must be filed within one year from the date of expiration for permits granted by LADBS (Sec. 22.12 & 22.13 LAMC). The permittee may be entitled to reimbursement of permit fees if the Department fails to conduct an inspection within 60 days of receiving a request for final inspection (HS 17951).

17. LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. The following applies to B contractors only: I understand the limitations of Section 7057 of the Business and Professional Code related to my ability to take prime contracts or subcontracts involving specialty trades.

License Class: **B** License No.: **943545** Contractor: **ALL AMERICAN CONSTRUCTION**

18. WORKERS' COMPENSATION DECLARATION

I hereby affirm, under penalty of perjury, one of the following declarations:

( ) I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

(X) I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: **STATE COMP. INS. FUND** Policy Number: **912842615**

( ) I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

19. ASBESTOS REMOVAL DECLARATION / LEAD HAZARD WARNING

I certify that notification of asbestos removal is either not applicable or has been submitted to the AQMD or EPA as per section 19827.5 of the Health and Safety Code. Information is available at (909) 396-2336 and the notification form at www.aqmd.gov. Lead safe construction practices are required when doing repairs that disturb paint in pre-1978 buildings due to the presence of lead per section 6716 and 6717 of the Labor Code. Information is available at Health Services for LA County at (800) 524-5323 or the State of California at (800) 597-5323 or www.dhs.ca.gov/childlead.

20. CONSTRUCTION LENDING AGENCY DECLARATION

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's Name (If Any): _____ Lender's Address : _____

21. FINAL DECLARATION

I certify that I have read this application **INCLUDING THE ABOVE DECLARATIONS** and state that the above information **INCLUDING THE ABOVE DECLARATIONS** is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein, and it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

By signing below, I certify that:

(1) I accept all the declarations above namely the Licensed Contractor's Declaration, Workers' Compensation Declaration, Asbestos Removal Declaration / Lead Hazard Warning, Construction Lending Agency Declaration, and Final Declaration; and

(2) This permit is being obtained with the consent of the legal owner of the property.

(E) DANG, VINH DUC LE	1209 W ALTON AVE,	SANTA ANA, CA 92707		C65096	

PERMIT EXPIRATION/REFUNDS: This permit expires two years after the date of the permit issuance. This permit will also expire if no construction work is performed for a continuous period of 180 days (Sec. 98.0602 LAMC). Claims for refund of fees paid must be filed within one year from the date of expiration for permits granted by LADBS (Sec. 22.12 & 22.13 LAMC). The permittee may be entitled to reimbursement of permit fees if the Department fails to conduct an inspection within 60 days of receiving a request for final inspection (HS 17951).

17. LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. The following applies to B contractors only: I understand the limitations of Section 7057 of the Business and Professional Code related to my ability to take prime contracts or subcontracts involving specialty trades.

License Class: B License No.: 775947 Contractor: GRAY I C E BUILDERS

18. WORKERS' COMPENSATION DECLARATION

I hereby affirm, under penalty of perjury, one of the following declarations :

( ) I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

(X) I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: LIBERTY INS. CORP. Policy Number: WA765D2896050

( ) I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

19. ASBESTOS REMOVAL DECLARATION / LEAD HAZARD WARNING

I certify that notification of asbestos removal is either not applicable or has been submitted to the AQMD or EPA as per section 19827.5 of the Health and Safety Code. Information is available at (909) 396-2336 and the notification form at www.aqmd.gov. Lead safe construction practices are required when doing repairs that disturb paint in pre-1978 buildings due to the presence of lead per section 6716 and 6717 of the Labor Code. Information is available at Health Services for LA County at (800) 524-5323 or the State of California at (800) 597-5323 or www.dhs.ca.gov/childlead.

20. CONSTRUCTION LENDING AGENCY DECLARATION

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's Name (If Any): _____ Lender's Address : _____

21. FINAL DECLARATION

I certify that I have read this application **INCLUDING THE ABOVE DECLARATIONS** and state that the above information **INCLUDING THE ABOVE DECLARATIONS** is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein, and it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

By signing below, I certify that:

(1) I accept all the declarations above namely the Licensed Contractor's Declaration, Workers' Compensation Declaration, Asbestos Removal Declaration / Lead Hazard Warning, Construction Lending Agency Declaration, and Final Declaration; and

(2) This permit is being obtained with the consent of the legal owner of the property.

** Approved Seismic Gas Shut-Off Valve may be required. ** no change on occupancy for propose change of use , due to fixed seat at class room, additional 7 parking stalls required for proposed change of use, per servuyor, (e) 140 parking stalls provided on site . replace required 7-parking stall (less than 10% of (e) 140 parking) with 28 bicycle parking on site . OK

In the event that any box (i.e. 1-16) is filled to capacity, it is possible that additional information has been captured electronically and could not be printed due to space restrictions. Nevertheless the information printed exceeds that required by section 19825 of the Health and Safety Code of the State of California.

15. BUILDING RELOCATED FROM:

16. CONTRACTOR, ARCHITECT & ENGINEER NAME	ADDRESS		CLASS	LICENSE #	PHONE #
(A) DEUTSCH, DANIEL	5855 GREEN VALLEY CRICLE #105,	CULVER CITY, CA 90230		C13029	(310) 820-0606
(C) ALL AMERICAN CONSTRUCTION	20020 OXNARD STREET,	WOODLAND HILLS, CA 9136	B	943545	(818) 917-8886

PERMIT EXPIRATION/REFUNDS: This permit expires two years after the date of the permit issuance. This permit will also expire if no construction work is performed for a continuous period of 180 days (Sec. 98.0602 LAMC). Claims for refund of fees paid must be filed within one year from the date of expiration for permits granted by LADBS (Sec. 22.12 & 22.13 LAMC). The permittee may be entitled to reimbursement of permit fees if the Department fails to conduct an inspection within 60 days of receiving a request for final inspection (HS 17951).

17. LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. The following applies to B contractors only: I understand the limitations of Section 7057 of the Business and Professional Code related to my ability to take prime contracts or subcontracts involving specialty trades.

License Class: B License No.: 943545 Contractor: ALL AMERICAN CONSTRUCTION

18. WORKERS' COMPENSATION DECLARATION

I hereby affirm, under penalty of perjury, one of the following declarations:

(X) I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

( ) I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: STATE COMP. INS. FUND Policy Number: 9128426

( ) I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

19. ASBESTOS REMOVAL DECLARATION / LEAD HAZARD WARNING

I certify that notification of asbestos removal is either not applicable or has been submitted to the AQMD or EPA as per section 19827.5 of the Health and Safety Code. Information is available at (909) 396-2336 and the notification form at www.aqmd.gov. Lead safe construction practices are required when doing repairs that disturb paint in pre-1978 buildings due to the presence of lead per section 6716 and 6717 of the Labor Code. Information is available at Health Services for LA County at (800) 524-5323 or the State of California at (800) 597-5323 or www.dhs.ca.gov/childlead.

20. CONSTRUCTION LENDING AGENCY DECLARATION

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's Name (If Any): _____ Lender's Address : _____

21. FINAL DECLARATION

I certify that I have read this application **INCLUDING THE ABOVE DECLARATIONS** and state that the above information **INCLUDING THE ABOVE DECLARATIONS** is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein, and it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

By signing below, I certify that:

(1) I accept all the declarations above namely the Licensed Contractor's Declaration, Workers' Compensation Declaration, Asbestos Removal Declaration / Lead Hazard Warning, Construction Lending Agency Declaration, and Final Declaration; and

(2) This permit is being obtained with the consent of the legal owner of the property.
