Glossary of Terms and Qualifiers

Work Order: 16-03-1400 Page 1 of 1

Qualifiers	Definition
*	See applicable analysis comment.
<	Less than the indicated value.
>	Greater than the indicated value.
1	Surrogate compound recovery was out of control due to a required sample dilution. Therefore, the sample data was reported without further clarification.
2	Surrogate compound recovery was out of control due to matrix interference. The associated method blank surrogate spike compound was in control and, therefore, the sample data was reported without further clarification.
3	Recovery of the Matrix Spike (MS) or Matrix Spike Duplicate (MSD) compound was out of control due to suspected matrix interference. The associated LCS recovery was in control.
4	The MS/MSD RPD was out of control due to suspected matrix interference.
5	The PDS/PDSD or PES/PESD associated with this batch of samples was out of control due to suspected matrix interference.
6	Surrogate recovery below the acceptance limit.
7	Surrogate recovery above the acceptance limit.
B	Analyte was present in the associated method blank.
BU	Sample analyzed after holding time expired.
BV	Sample received after holding time expired.
CI	See case narrative.
E	Concentration exceeds the calibration range.
ET	Sample was extracted past end of recommended max. holding time.
HD	The chromatographic pattern was inconsistent with the profile of the reference fuel standard.
HDH	The sample chromatographic pattern for TPH matches the chromatographic pattern of the specified standard but heavier hydrocarbons were also present (or detected).
HDL	The sample chromatographic pattern for TPH matches the chromatographic pattern of the specified standard but lighter hydrocarbons were also present (or detected).
J	Analyte was detected at a concentration below the reporting limit and above the laboratory method detection limit. Reported value is estimated.
JA	Analyte positively identified but quantitation is an estimate.
ME	LCS Recovery Percentage is within Marginal Exceedance (ME) Control Limit range (+/- 4 SD from the mean).
ND	Parameter not detected at the indicated reporting limit.
Q	Spike recovery and RPD control limits do not apply resulting from the parameter concentration in the sample exceeding the spike concentration by a factor of four or greater.
SG	The sample extract was subjected to Silica Gel treatment prior to analysis.
X	% Recovery and/or RPD out-of-range.
Z	Analyte presence was not confirmed by second column or GC/MS analysis.
	Solid - Unless otherwise indicated, solid sample data is reported on a wet weight basis, not corrected for % moisture. All QC results are reported on a wet weight basis.
	Any parameter identified in 40CFR Part 136.3 Table II that is designated as "analyze immediately" with a holding time of <= 15 minutes (40CFR-136.3 Table II, footnote 4), is considered a "field" test and the reported results will be qualified as being received outside of the stated holding time unless received at the laboratory within 15 minutes of the collection time.
	A calculated total result (Example: Total Pesticides) is the summation of each component concentration and/or, if "J" flags are reported, estimated concentration. Component concentrations showing not detected (ND) are summed into the calculated total result as zero concentrations.

DESCRIPTION

Description of Water : Purge water from Monitoring Wells

Volume/Weight: 500 Units: gallons Container(s): Poly tank

This non-hazardous waste water is monitoring well purge water, auger rinsate, sampling equipment rinsate, tank rinsate, combination thereof, or as described above. Described water may contain dissolved hydrocarbons. I certify that the above named material has been properly described and classified according to applicable regulations, and possesses no characteristics hat would require its handling as hazardous waste.

1.0 INTRODUCTION

On behalf of Aramark Uniform & Career Apparel, LLC (Aramark), Apex Companies, LLC (Apex) has prepared this Fourth Quarter 2018 Groundwater Monitoring Report for the Former Welch's Uniform Facility property, located at 3505 Pasadena Avenue, Los Angeles, California (Site, Property, or Subject Property).

In January 2018, Aramark completed the acquisition of Ameripride Uniform Services (AmeriPride). AmeriPride was the responsible party associated with the subject property (Former Welch's Uniform). With Aramark's acquisition of AmeriPride, Aramark has now assumed environmental responsibility for the Former Welch's Uniform facility property. During an introduction meeting on September 5, 2018, between Aramark, the Department of Toxic Substance Control (DTSC), and Apex, the DTSC requested a groundwater monitoring plan for the seven (7) existing monitoring wells related to the subject property. In a letter dated September 14, 2018, Apex, on behalf of Aramark, proposed the current Groundwater Monitoring Plan. The plan consists of three (3) quarterly groundwater monitoring events that will be reduced to semiannual events in 2019. This groundwater report is the first of the three (3) quarterly monitoring events.

1.1 Physical Setting

The Site consists of an approximate 2.6-acre, vacant parcel located in a mixed residential and industrial area of Los Angeles, California. Based on the USGS Los Angeles Quadrangle Map (USGS, 1994), the elevation of the Site is approximately 366 feet above mean sea level (msl). The Site is located approximately 3.5 miles northeast of downtown Los Angeles near the confluence of the Los Angeles River and Arroyo Seco Channel (Figure 1, *Site Location Map*).

1.2 Property Information

The following table summarizes the property and site contact information.

Table 1-1
Property and Site Contact Information

Subject	Information
DTSC Property Reference Name Facility Address	Former Welch's Uniform Facility 3505 N. Pasadena Avenue, Los Angeles, California 90031

Environmental Contractor Apex Mailing Address Apex Contact	Apex Companies, LLC 1962 Freeman Avenue Signal Hill, California, 90755 Mr. Andrew Drummond, PG
Current Site Use	Vacant
LA County Assessor Parcel Number	5205-004-010
Latitude and Longitude	34° 5' 9" N (34.0859° N) and 118° 12' 48" W (118.2131° W)

2.0 *BACKGROUND*

2.1 Property Description

The Subject Property is located at 3505 Pasadena Avenue, in Los Angeles, California and is composed of a single parcel of land identified by the Los Angeles County Office of the Assessor as Parcel No.: 5205-004-010. The Property is currently vacant and available for sale through Aramark's Real Estate Department. Currently, the Property is entirely enclosed with fencing with entry from Pasadena Avenue at the intersection of E. Avenue 35 through a double gate, which is chained and locked. The Subject Property is relatively flat with a very shallow gradient to the west.

2.2 Historical Property Occupants

According to previous reports (Removal Action Work Plan (RAW), 2012), uniform laundry services have operated on portions of the Property preceding circa the 1920s. The 1920 Sanborn Map identifies a business at 119 W. Avenue 35 (located in approximately the northwest portion of the current Site) as being the location of Pacific Laundry, a uniform laundry.

The City Directory Abstract listed Welch's Uniform Laundry Company as being established at 3505 Pasadena Avenue in 1924 and continues to list various uniform cleaning and linen supply business carrying Welch's name up through the year 2000. Laundry activities associated with the Former Welch's Facility included receiving, sorting, fresh-water washing, dry-cleaning, tailoring, pressing, and the shipping of work uniforms, linens, and towels to industrial and commercial businesses, schools, and hospitals.

2.3 Acquisition

In January 2018, Aramark completed the acquisition of Ameripride Uniform Services (AmeriPride). AmeriPride was the responsible party associated with the Subject Property (Former Welch's Uniform). With Aramark's acquisition of AmeriPride, Aramark has now assumed the environmental responsibility of the Former Welch's Uniform facility's property.

2.4 Groundwater Monitoring Plan

During a meeting on September 5, 2018, between Aramark, the Department of Toxic Substance Control (DTSC), and Apex, the DTSC requested a groundwater monitoring plan for the seven (7) remaining monitoring wells associated with the Subject Property. In a letter dated September 14, 2018, Apex, on behalf of Aramark, proposed a Groundwater Monitoring Plan, summarized on the following table (Table 2-1, *Groundwater Monitoring Plan*).

Table 2-1
Groundwater Monitoring Plan

Wells Sampled	Frequency and Duration		
	4th Q 2018 – 2nd Q 2019	4th Q 2019 – 2nd Q 2021	2nd Q 2022
MW-3	Quarterly	Semiannual	Annual
MW-9A	Quarterly	Semiannual	Annual
MW-9B	Quarterly	Semiannual	Annual
MW-10A	Quarterly	Semiannual	Annual
MW-10B	Quarterly	Semiannual	Annual
MW-15	Quarterly	Semiannual	Annual
MW-16A	Quarterly	Semiannual	Annual
GWM Events	3 Quarterly Events	4 Semiannual Events	1 Annual Event

Reports will be submitted to DTSC by the 30th of each month following the end of the sampling quarter.
This monitoring plan may be amended and/or modified based upon continued trend analysis.

3.0 GEOLOGY AND HYDROGEOLOGY

3.1 Regional Geology

The Subject Property and vicinity is located along the northern edge of the Central Block of the Los Angeles Basin, which lies in the Peninsular Range geomorphic province of southern California (CDWR, 1961). The Los Angeles Basin is an active structural depression that is bounded by the Santa Monica Mountains to the northwest, the Whittier Fault to the northeast, the San Joaquin Hills to the southeast, and the Newport-Inglewood Fault Zone to the southwest. The Central Block is a wedge-shaped portion of the Los Angeles Basin about 55 miles long that extends from the Santa Monica Mountains at the northwest toward, and including, the San Joaquin Hills at the southeast, and widens from about 10 miles at the northwest to more than 20 miles at the southeast. This geomorphic province is characterized by elongated northwest-trending mountain ridges separated by straight-sided, sediment-floored valleys (Yerkes, 1965).

The Former Welch's Uniform property is located at the west end of the Repetto Hills near the convergence of the Arroyo Seco Channel and the Los Angeles River. The sediments that underlie the area have been identified as Quaternary alluvial stream channel deposits consisting of unconsolidated silts, sands, and gravels. The sedimentary rock that underlies the Site is Puente Formation sandstone and is of Tertiary age. The Site is situated immediately over the Elysian Park Anticline which extends between the Elysian Hills to the west and the Repetto Hills to the east (CDMG, 1970). The Elysian Park Fault is located approximately ½-mile south-southwest of the Site. The Fault runs roughly parallel to the Elysian Park Anticline and exhibits upthrown strata on the south side of the fault line (CDMG, 1970).

3.1.1 Site Geology

Soils encountered during previous drilling from the surface to a depth of approximately 70 feet bgs included gravels and fine to coarse-grained sand. Generally, a fill material consisting of fine to coarse sand has been encountered from the surface to between 5 and 10 feet bgs. A soil horizon consisting of interbedded lenses of silty clay, clayey silt, and fine-grained sand is encountered between 68 and 83 feet bgs. This is underlain by medium to course-grained sand to a depth of approximately 93 feet bgs. Based on the physical description of the sand below 83 feet bgs and regional geology, the sand below 83 feet represents the Puente Formation sandstone.

3.2 Hydrogeology

According to information previous reports, the Site is located in the northernmost portion of the Downey Plain in the Los Angeles Basin at the southwestern end of the Arroyo Seco Watershed and near the confluence of the Los Angeles River and Arroyo Seco Channel. The Arroyo Seco Watershed, a sub-watershed of the Los Angeles River Watershed, stretches 22 miles from its headwaters in the San Gabriel Mountains to its confluence with the Los Angeles River. The Arroyo Seco Channel borders the northwest Site boundary, at this location the Arroyo Seco is a concrete-lined drainage channel with an elevation that is approximately 30 feet below the grade elevation of the Site. The mean flow in the Arroyo Seco where it enters the Los Angeles River ranges between a low of 11.6 cubic feet per second (cfs) in July to a high of 252 cfs in February (USACE, 2005).

3.2.1 Site Hydrogeology

The Site is located at the Los Angeles Narrows where the Los Angeles River enters the Central Basin from the San Fernando Groundwater Basin and where the Arroyo Seco Channel enters the Los Angeles River. The Arroyo Seco Channel conveys intermittent flow from the Arroyo Seco Watershed but is not interconnected with any named upgradient groundwater basin. Regional groundwater information (CDWR, 1961) and previous subsurface investigations indicate that the first water bearing zone beneath the Site is the Gaspur Aquifer at about 35 feet bgs. In the area of the Site, the Gaspur aquifer is approximately 60 feet thick, generally unconfined, characterized by transmissivities on the order of 250,000-gallons per day per foot, and is reportedly underlain by non-water bearing sedimentary rocks (CDWR, 1961). Groundwater in the Gaspur aquifer in the vicinity of the Site is not used as a water supply source. According to the USGS, the regional groundwater gradient in the area is to the south-southwest (USGS, 2003). The local groundwater gradient at the Site has also consistently been to the southwest.

4.0 GROUNDWATER MONITORING PROGRAM

Groundwater monitoring was initiated at the Former Welch's Uniform Facility in 1989, since this initiation date, regular groundwater monitoring events have been conducted by previous contractors with monitoring reporting being submitted on behalf of AmeriPride to the DTSC.

The recent quarterly groundwater monitoring event was conducted at the Subject Property on December 4, 2018, which fulfills the quarterly monitoring requirement for the Fourth Quarter 2018. The monitoring program included the measurement of groundwater levels and collection of groundwater samples for laboratory analysis. The monitoring program objectives are to evaluate groundwater flow direction and gradient (horizontal) in the shallow groundwater monitoring zone and to evaluate the distribution of chemicals of concern (COC), primarily chlorinated volatile organic compounds (CVOCs) consisting of tetrachloroethene (PCE), trichloroethene (TCE), and cis-1,2-dichloroethene (cis-1,2-DCE) in each of the monitoring zones (shallow (A) and deep (B)).

To meet these objectives of the groundwater monitoring program, a total of seven (7) wells were monitored, which are located both on-site (6 wells) in addition to one (1) downgradient off-site well. These wells were monitored in accordance with the monitoring program (Figure 2, *Site Vicinity and Well Location Map;* Table 1, *Existing Monitoring Well Construction Details*).

During the Fourth Quarter 2018 monitoring event, groundwater levels and samples were collected from seven monitoring wells in the sampling program, (five shallow and two deep screened wells). The following identification is utilized to distinguish each of the groundwater zones:

- A Series Wells: Shallow Zone (MW-3, MW-9A, MW-10A, MW-15 (offsite well), and MW16A)
- B Series Wells: Deep Zone (MW-9B and MW-10B)

4.1 Groundwater Monitoring Procedures

Apex contracted Blaine Tech Services, Inc., (Blaine Tech) located in Los Angeles, CA to conduct the groundwater monitoring event. During groundwater monitoring and prior to collecting groundwater samples, Blaine Tech measured the depth to static groundwater in each monitoring well with an electronic water-level indicator. All wells were then purged and sampled in accordance with low-flow and minimal drawdown sampling protocols.

During the purging of the wells, water-quality parameters consisting of temperature, pH, electrical conductivity, dissolved oxygen (DO), oxidation reduction potential (ORP) and turbidity were measured with a field instrument and recorded on field purge logs. A groundwater sample was collected after the water-quality parameters had stabilized based on low flow methodology (Appendix A, *Well Purging Logs*).

Once the water-quality parameters had stabilized or a sufficient number of water quality parameters were measured and recorded, a groundwater sample was collected using new tubing connected to the submersible pump. Following sample collection, Blaine Tech labeled and placed each water sample in a chilled ice chest pending transportation to the analytical laboratory. All samples were relinquished under standard chain-of-custody protocols to Eurofins Calscience, a state-certified laboratory, located in Garden Grove, California.

4.2 Equipment Decontamination

The equipment utilized during the groundwater monitoring event was decontaminated between each consecutive usage. Groundwater sampling equipment was washed in a dilute tri-sodium phosphate solution, rinsed with potable water, and final rinsed with distilled water between each sampling location.

4.3 Investigative Derived Waste

The groundwater extracted from the wells was contained in a single 55-gallon Department of Transportation (DOT)-approved steel drum. During purging, an average of 3 liters (L) of water were purged from each well, totaling 22.2 L (5.9 gallons) for all 7 wells. The drum was labeled and stored on-site pending profiling, manifesting, and transportation to an off-site recycling facility for disposal. Apex will include the manifest in the next quarterly monitoring report.

5.0 GROUNDWATER MONITORING RESULTS

This section of the report summarizes the data collected during the Fourth Quarter 2018 groundwater monitoring event from the seven (7) monitoring wells.

5.1 Groundwater Elevation and Flow Direction

The groundwater elevation was calculated by subtracting the depth to groundwater from the elevation of the top of the casing at each well in each of the groundwater zones. Groundwater elevation data was plotted on the site plans of each zone and groundwater contours were created to estimate the groundwater flow direction and horizontal gradient in the "A" series wells. The horizontal hydraulic gradient is defined as the slope of the water table. It is calculated by taking the

change in groundwater elevation over the change in distance between monitoring wells or lines of equal potential (Table 2, *Groundwater Elevations)*.

5.1.1 Shallow Groundwater Zone (A Series Wells)

Groundwater levels ranged in the shallow zone from 36.95 feet below top of casing (ft-TOC) in monitoring well MW-16A to 42.31 ft-TOC in monitoring well MW-10A. Groundwater elevations ranged from 314.18 feet below mean sea level (ft MSL) in monitoring well MW-15 to 329.00 ft MSL in well MW-3.

Based on an evaluation of the potentiometric map generated from the groundwater elevations, the groundwater flow direction in the shallow groundwater zone flows to the southwest with an estimated horizontal hydraulic gradient of approximately 0.011 during this monitoring event (Figure 3, *Groundwater Potentiometric Map*). The groundwater flow direction and gradient are consistent with the historical monitoring events.

5.1.2 Deep Groundwater Zone (B Series Wells)

Groundwater levels ranged in the deep monitoring zone from 39.80 ft-TOC in monitoring well MW-9B to 41.72 ft-TOC in monitoring well MW-10B. Groundwater elevations ranged from 325.18 ft MSL in monitoring well MW-10B to 326.76 ft MSL in well MW-9B. Since these wells are directly adjacent, groundwater contours or gradient was not calculated.

5.2 Water Quality Parameters

During purging activities, water-quality parameters consisting of temperature, pH, electrical conductivity (Ec), oxidation reduction potential (ORP), dissolved oxygen (DO), and turbidity were measured at regular intervals and recorded on field purging logs. Since this is the first quarterly monitoring event conducted by Apex, water-quality parameter trends have not been established for the groundwater zones. The following briefly describes the water-quality parameters that are measured during groundwater monitoring events.

- pH is a measure of the acidity or alkalinity of a solution, numerically equal to seven for neutral solutions. In general, groundwater may range from six to eight standard units.
- Temperature (degrees Celsius (˚C)) is typically measured during groundwater monitoring to establish a baseline temperature of groundwater over time and seasonally.
- Ec (micro-Siemens per centimeter (μS/cm)) is a measure of a solution to conduct electricity. The conductivity of groundwater is directly related to the concentration of ions in groundwater. In general, conductivity increases as ion concentration increases.
- ORP (millivolts (mV)) is the measure of electron activity and is an indicator of the relative tendency of a solution to accept or transfer electrons. The ORP of groundwater generally ranges from -400 to +600 mV. In general, the lower the ORP of groundwater, the more reducing the system, and the more likely that reductive dechlorination will be efficient.
- DO (micrograms per liter (mg/L)) is the measure of dissolved oxygen content in water and related to the ORP. In general, contaminants that induce an oxygen demand in water will reduce the DO.
- Turbidity (nephelometric turbidity units (NTUs)) is a measure of the suspended particulate matter in the water and

an indicator of pumping stress on the formation. In general, a turbidity of less than 5 NTUs is preferable prior to the collection of a groundwater sample.

The following briefly summarizes the water-quality parameters. The purge logs are provided as Appendix A and a summary of the water-quality parameters are provided as Table 3, Groundwater Quality Parameters.

5.2.1 Shallow Zone Parameters

- A review of the purge logs indicates that the average pH measured during purging activities in A Series Wells was 6.85, indicating near neutral conditions. Additional pH data is required to establish the trend of pH in the shallow groundwater zone.
- A review of the purge logs indicates that the average temperature measured during purging activities in A Series Wells was 22.4 ˚C (72.3 degrees Fahrenheit (˚F)). Additional temperature data is required to establish the trend of seasonal temperature in the shallow groundwater zone.
- A review of the purge logs indicates that the average Ec measured during purging activities in A Series Wells was 1,695 µS/cm (0.1695 siemens per meter (S/M)). Additional Ec data is required to establish a water-quality trend.
- A review of the purge logs revealed the shallow zone wells resulted in averaged negative ORP measurements of -41.18 mV, indicating a reducing potential. Groundwater samples from these wells also revealed decreasing concentrations of VOCs indicating active natural attenuation. Additional ORP data is required to establish a reducing trend.
- A review of the purge logs indicates that the average DO measured during purging activities in A Series Wells was 2.32 mg/L. The lowered DO in combination with ORP data supports that active natural attenuation is potential supporting the decreasing VOC trends. However, additional DO data is required to establish a trend and correlation.

5.2.2 Deep Zone Parameters

- A review of the purge logs indicates that the average pH measured during purging activities in B Series Wells was 7.02, indicating neutral conditions. Additional pH data is required to establish the trend of pH in the deep groundwater zone.
- A review of the purge logs indicates that the average temperature measured during purging activities in B Series Wells was 22.5 ˚C (72.5 degrees Fahrenheit (˚F)). Additional temperature data is required to establish the trend of seasonal temperature in the deeper groundwater zone.
- A review of the purge logs indicates that the average Ec measured during purging activities in B Series Wells was 1,786 µS/cm (0.1786 S/M). Additional Ec data is required to establish a water-quality trend.
- A review of the purge logs revealed that the two B Series Wells, MW-9B and MW-10B, resulted in relatively low ORP measurements, indicating an overall reducing potential.
- A review of the purge logs indicates that the average DO measured during purging activities in B Series Wells was 1.53 mg/L. Additional DO data is required to establish a trend and correlation.

5.3 Analytical Program

The groundwater samples were analyzed for VOCs in accordance with U.S. Environmental Protection Agency (USEPA) Method 8260B (Table 4, *Groundwater Monitoring Well Sampling Information*).

5.3.1 Analytical Results – Volatile Organic Compounds

The following sections summarize the analytical results for VOCs detected in each groundwater zone and the analytical results are summarized in Table 5*, Groundwater Analytical Results* and Figure 4*, Groundwater Analytical Results.* Groundwater trend graphs for the seven (7) active groundwater monitoring wells are provided as Appendix B, *VOC Concentration and Hydrograph vs. Time*. The *Analytical Laboratory Report and Chain-of-Custody Record* are provided as Appendix C.

5.3.1.1 Shallow Groundwater Zone (A Series Wells)

The following summarizes the analytical results of VOCs detected in the shallow groundwater zone.

- PCE was not detected (<1.0 micrograms per liter (µg/L)) in two (2) on-site wells, MW-3 and MW-10A. The reported PCE concentrations in the three (3) remaining shallow wells ranged from 5.1 (MW-3) to 11 µg/L (MW-16A).
- TCE was not detected (<1.0 µg/L) in one on-site well MW-3, and below the California Maximum Contaminant Levels (MCLs) in three wells (MW-9A, MW-10A, and MW-15). The reported TCE concentration of 5.1 µg/L was detected in one well MW-16A, which is slightly greater than the CA MCL of 5.0 µg/L.
- Cis-1,2-Dichloroethene (Cis-1,2-DCE) was not detected (<1.0 µg/L) in a groundwater sample collected from one shallow-zone monitoring well MW-3 and below the CA MCL of 6.0 µg/L in MW-15. Concentrations ranged from 8.3 µg/L in MW-10A to 32 µg/L in MW-9A.
- Other VOCs were not detected in any of the groundwater samples from the shallow monitoring wells.

5.3.1.2 Deep Groundwater Zone (B Series Wells)

The following summarizes the laboratory results of VOC analyses of the two-deep groundwater zone.

- PCE was not detected (<1.0 µg/L) in both on-site deep zone wells MW-9B and MW-10B.
- TCE was not detected (<1.0 µg/L) in well MW-9B and was slightly above the laboratory's reporting limit (RL) MW-10B at a concentration of 1.1 µg/L, which is below the CA MCL for TCE.
- Cis-1,2-Dichloroethene (Cis-1,2-DCE) was not detected (<1.0 µg/L) in well MW-9B and below the CA MCL for Cis-1,2-DCE in well MW-10B.
- Other VOCs were not detected in any of the groundwater samples from these two monitoring wells.

5.4 Quality Assurance / Quality Control

Two QA/QC samples were submitted to the laboratory for analysis during this quarter of groundwater monitoring. Sample DUP1 was a duplicate water sample of MW-15 and sample TB-01 was a trip blank. The laboratory reported a similar

concentration of the chemicals detected in the groundwater sample from MW-15 and the duplicate sample DUP1. The laboratory reported no detectable compounds in the trip blank.

6.0 CONCLUSIONS

- Groundwater monitoring and sampling activities were conducted on December 4, 2018.
- Results of the groundwater measurements are generally consistent with historical water levels.
- The flow direction and horizontal gradient in the shallow zone (A Series Wells) is to the southwest with an estimated horizontal gradient of 0.010. The flow direction was not calculated in the deep groundwater zone (B Series Wells) since these wells are located directly adjacent to each other.
- ORP and DO water quality measurements indicating active natural attenuation is potentially occurring.
- VOC distribution is adequately defined in the shallow zone.
    - PCE concentrations detected in shallow groundwater wells ranged from non-detect to a maximum concentration of 11 µg/L (MW-16A).
    - TCE concentrations detected in shallow groundwater wells ranged from non-detect to a maximum concentration of 5.4 µg/L (MW-16A), which is slightly above the CA MCL for drinking water.
    - Cis-1,2-DCE concentrations detected in shallow groundwater wells ranged from non-detect to a maximum concentration of 32 µg/L (MW-9A).
- VOC distribution is adequately defined in the deep zone.
    - PCE was not detected in either of the two-deep zone groundwater monitoring wells.
    - TCE concentrations detected in the deep groundwater wells are either non-detect or below the CA MCL for drinking water.
    - Cis-1,2-DCE concentrations detected in the deep groundwater wells are either non-detect or below the CA MCL for drinking water.

7.0 RECOMMENDATIONS

Based on the analytical results, water quality parameters, observations, and water levels from the groundwater monitoring events, Apex makes the following recommendations:

- Continued quarterly groundwater monitoring in the shallow and deep groundwater zones pursuant to the groundwater monitoring program.

- Measuring depth to groundwater in all groundwater monitoring wells during each monitoring event to establish groundwater flow and gradients.
- Continue to measure and establish ORP and DO trends to evaluate natural attenuation.

Notes:
E_h = standard reduction potential (calculated from ORP using method recommended by instrument manufacturer)
mV = millivolts
mg/L = milligrams per liter
NTU = nephelometric turbidity units
NM = Not Monitored
NR = No Purge Record
ORP = field measured oxidation-reduction potential (various reference electrodes)
S/M = siemens per meter
ug/cm = Beginning March 2011
Water quality parameters taken inside well with a Horiba U-22 except MW-13A, MW-13B, MW-14, MW-15, K-1 and K-2
* = Dissolved oxygen likely elevated because of air lift techniques
† = Specific conductivity instrument showing an error message
**=Turbidity meter not functioning properly

ABBREVIATIONS / LEGEND:

B: Potential bias error, analyte detected in quality control blank
EPA: Environmental Protection Agency
J: Estimated value
µg/L: Micrograms per liter
MCL: California EPA Maximum Contaminant Level for drinking water August 2015
---: Not analyzed, not available, well lost, destroyed, or abandoned
U: Non-detect at or above method detection limit
VOCs: Volatile organic compounds
BOLD Indicates concentrations at or above listed screening levels
[1]: A Compilation of Water Quality Goals (August 2003 and updates), CalEPA RWQCB - Central Valley R
[2]: California Office of Environmental Health Hazard Assessment Public Health Goal
[3]: Well K-3 not purged on 6/29/00 due to low walter level.
[4]: Chloroform, 2013 Tier 1 ESL = 80 ug/L

CF Chloroform
1,1-DCE: 1,1-dichloroethene
c-DCE: cis-1,2-dichloroethene
t-DCE: trans-1,2-dichloroethene
MTBE: Methyl tertiary butyl ether
1,1,1,2-PCA: 1,1,1,2-tetrachloroethane
1,1,2,2-PCA: 1,1,2,2-tetrachloroethane
PCE: Tetrachloroethene
TCE: Trichloroethene
TEPH: Total extractable petroleum hydrocarbons expressed as diesel

Screening Levels for Other VOCs (µg/L)

Methylene chloride = 5 ug/L (MCL)
Vinyl Chloride = 0.5 ug/L (MCL)
1,2-Dichlorobenzene = 600 ug/L (MCL)
1,2,4-Trichlorobenzene = 5 ug/L (MCL)
1,1,1,2-tetrachloroethane = 1.0 ug/L (MCL)
Bromoform = 80 ug/L (2013 Tier 1 Environmental Screening Level)
Dibromochloromethane = 80 ug/L (2013 Tier 1 Environmental Screening Level)

SPH/Purge Water Drum Log Sheet

Site Address: ~~APEX~~ Ameripride

STATUS OF DRUM(S) UPON ARRIVAL						
Date	12/4/18					
Number of drum(s) empty:	0					
Number of drum(s) 1/4 full:	0					
Number of drum(s) 1/2 full:	0					
Number of drum(s) 3/4 full:	0					
Number of drum(s) full:	0					
Total drum(s) on site:	0					
Are the drum(s) properly labeled?	N/A					
If any drum(s) are partially or totally filled, what is the first use date:	N/A					

If you add any product to an empty or partially filled drum, make sure the drum has at least 20 gals. of water in it first. Just offload purgewater into the drum, or DI water.
The drum MUST be steel AND labeled with the appropriate label.

STATUS OF DRUM(S) UPON DEPARTURE						
Date	12/4/18					
Number of drums empty:	0					
Number of drum(s) 1/4 full:	1					
Number of drum(s) 1/2 full:	0					
Number of drum(s) 3/4 full:	0					
Number of drum(s) full:	0					
Total drum(s) on site:	1					
Are the drum(s) properly labeled?	Y					

LOCATION OF DRUM(S)
Describe location of drum(s): to the left of site entrance inside of the fence

FINAL STATUS						
Number of new drum(s) left on site this event	1					
Date of inspection:	12/4/18					
Logged by BTS Field Tech:	BV					
Office reviewed by:						

Please Notify Properity Owners of any Drums left onsite

Eurofins Calscience (Calscience) certifies that the test results provided in this report meet all NELAC Institute requirements for parameters for which accreditation is required or available. Any exceptions to NELAC Institute requirements are noted in the case narrative. The original report of subcontracted analyses, if any, is attached to this report. The results in this report are limited to the sample(s) tested and any reproduction thereof must be made in its entirety. The client or recipient of this report is specifically prohibited from making material changes to said report and, to the extent that such changes are made, Calscience is not responsible, legally or otherwise. The client or recipient agrees to indemnify Calscience for any defense to any litigation which may arise.

Work Order Narrative

Condition Upon Receipt:

Samples were received under Chain-of-Custody (COC) on 12/04/18. They were assigned to Work Order 18-12-0245.

Unless otherwise noted on the Sample Receiving forms all samples were received in good condition and within the recommended EPA temperature criteria for the methods noted on the COC. The COC and Sample Receiving Documents are integral elements of the analytical report and are presented at the back of the report.

Holding Times:

All samples were analyzed within prescribed holding times (HT) and/or in accordance with the Calscience Sample Acceptance Policy unless otherwise noted in the analytical report and/or comprehensive case narrative, if required.

Any parameter identified in 40CFR Part 136.3 Table II that is designated as "analyze immediately" with a holding time of <= 15 minutes (40CFR-136.3 Table II, footnote 4), is considered a "field" test and the reported results will be qualified as being received outside of the stated holding time unless received at the laboratory within 15 minutes of the collection time.

Quality Control:

All quality control parameters (QC) were within established control limits except where noted in the QC summary forms or described further within this report.

Subcontractor Information:

Unless otherwise noted below (or on the subcontract form), no samples were subcontracted.

Additional Comments:

Air - Sorbent-extracted air methods (EPA TO-4A, EPA TO-10, EPA TO-13A, EPA TO-17): Analytical results are converted from mass/sample basis to mass/volume basis using client-supplied air volumes.

Solid - Unless otherwise indicated, solid sample data is reported on a wet weight basis, not corrected for % moisture. All QC results are always reported on a wet weight basis.

DoD Projects:

The test results contained in this report are accredited under the laboratory's ISO/IEC 17025:2005 and DoD-ELAP accreditation issued by the ANSI-ASQ National Accreditation Board. Refer to certificate and scope of accreditation ADE-1864.

Glossary of Terms and Qualifiers

Work Order: 18-12-0245 Page 1 of 1

Qualifiers	Definition
*	See applicable analysis comment.
<	Less than the indicated value.
>	Greater than the indicated value.
1	Surrogate compound recovery was out of control due to a required sample dilution. Therefore, the sample data was reported without further clarification.
2	Surrogate compound recovery was out of control due to matrix interference. The associated method blank surrogate spike compound was in control and, therefore, the sample data was reported without further clarification.
3	Recovery of the Matrix Spike (MS) or Matrix Spike Duplicate (MSD) compound was out of control due to suspected matrix interference. The associated LCS recovery was in control.
4	The MS/MSD RPD was out of control due to suspected matrix interference.
5	The PDS/PDSD or PES/PESD associated with this batch of samples was out of control due to suspected matrix interference.
6	Surrogate recovery below the acceptance limit.
7	Surrogate recovery above the acceptance limit.
B	Analyte was present in the associated method blank.
BU	Sample analyzed after holding time expired.
BV	Sample received after holding time expired.
CI	See case narrative.
E	Concentration exceeds the calibration range.
ET	Sample was extracted past end of recommended max. holding time.
HD	The chromatographic pattern was inconsistent with the profile of the reference fuel standard.
HDH	The sample chromatographic pattern for TPH matches the chromatographic pattern of the specified standard but heavier hydrocarbons were also present (or detected).
HDL	The sample chromatographic pattern for TPH matches the chromatographic pattern of the specified standard but lighter hydrocarbons were also present (or detected).
J	Analyte was detected at a concentration below the reporting limit and above the laboratory method detection limit. Reported value is estimated.
JA	Analyte positively identified but quantitation is an estimate.
ME	LCS Recovery Percentage is within Marginal Exceedance (ME) Control Limit range (+/- 4 SD from the mean).
ND	Parameter not detected at the indicated reporting limit.
Q	Spike recovery and RPD control limits do not apply resulting from the parameter concentration in the sample exceeding the spike concentration by a factor of four or greater.
SG	The sample extract was subjected to Silica Gel treatment prior to analysis.
X	% Recovery and/or RPD out-of-range.
Z	Analyte presence was not confirmed by second column or GC/MS analysis.
	Solid - Unless otherwise indicated, solid sample data is reported on a wet weight basis, not corrected for % moisture. All QC results are reported on a wet weight basis.
	Any parameter identified in 40CFR Part 136.3 Table II that is designated as "analyze immediately" with a holding time of <= 15 minutes (40CFR-136.3 Table II, footnote 4), is considered a "field" test and the reported results will be qualified as being received outside of the stated holding time unless received at the laboratory within 15 minutes of the collection time.
	A calculated total result (Example: Total Pesticides) is the summation of each component concentration and/or, if "J" flags are reported, estimated concentration. Component concentrations showing not detected (ND) are summed into the calculated total result as zero concentrations.

ATSDR Agency for Toxic Substances & Disease Registry

Public Health Statement for Trichloroethylene

CAS#: 79-01-6

(/ToxProfiles/tp19-c1.pdf) **PDF Version, 63 KB** (/ToxProfiles/tp19-c1.pdf)

This Public Health Statement is the summary chapter from the Toxicological Profile for trichloroethylene (/ToxProfiles/TP.asp?id=173&tid=30). It is one in a series of Public Health Statements about hazardous substances and their health effects. A shorter version, the ToxFAQs™ (/toxfaqs/TF.asp?id=172&tid=30), is also available. This information is important because this substance may harm you. The effects of exposure to any hazardous substance depend on the dose, the duration, how you are exposed, personal traits and habits, and whether other chemicals are present. For more information, call the ATSDR Information Center at 1-800-232-4636.

Overview

This Public Health Statement summarizes the Agency for Toxic Substances and Disease Registry's (ATSDR) findings on trichloroethylene, including chemical characteristics, exposure risks, possible health effects from exposure, and ways to limit exposure.

The U.S. Environmental Protection Agency (EPA) identifies the most serious hazardous waste sites in the nation. These sites make up the National Priorities List (NPL) and are sites targeted for long-term federal clean-up activities. The EPA has found trichloroethylene in at least 1,051 of the 1,854 current or former NPL sites. The total number of NPL sites evaluated for trichloroethylene is not known. But the possibility remains that as more sites are evaluated, the sites where trichloroethylene is found may increase. This information is important because these future sites may be sources of exposure, and exposure to trichloroethylene may be harmful.

If you are exposed to trichloroethylene, many factors determine whether you'll be harmed. These include how much you are exposed to (dose), how long you are exposed (duration), how often you are exposed (frequency), and how you are exposed (route of exposure). You must also consider the other chemicals you are exposed to and your age, sex, diet, family traits, lifestyle, and state of health.

What is trichloroethylene?

Trichloroethylene is a colorless, volatile liquid. Liquid trichloroethylene evaporates quickly into the air. It is nonflammable and has a sweet odor.

The two major uses of trichloroethylene are as a solvent to remove grease from metal parts and

as a chemical that is used to make other chemicals, especially the refrigerant, HFC-134a. Trichloroethylene has also been used as an extraction solvent for greases, oils, fats, waxes, and tars; by the textile processing industry to scour cotton, wool, and other fabrics; in dry cleaning operations; and as a component of adhesives, lubricants, paints, varnishes, paint strippers, pesticides, and cold metal cleaners.

What happens to trichloroethylene when it enters the enviornment?

Most of the trichloroethylene used in the United States is released into the atmosphere by evaporation, primarily from degreasing operations. Once in the atmosphere, the dominant trichloroethylene degradation process is reaction with hydroxyl radicals; the estimated half-life for this process is about 3–7 days. This relatively short half-life indicates that trichloroethylene is not a persistent atmospheric compound. Most trichloroethylene in surface waters or on soil surfaces evaporates into the atmosphere, although its high mobility in soil may result in it moving into groundwater below the soil surface. In these subsurface environments, trichloroethylene is only slowly degraded and may be relatively persistent. Trichloroethylene and other volatile organic chemicals may diffuse from contaminated groundwater and soil and migrate into air spaces beneath buildings to enter the indoor air, a process termed vapor intrusion.

How might I be exposed to trichloroethylene?

You may be exposed to trichloroethylene from trichloroethylene-contaminated air, water, food, or soil, or direct skin contact. You are most likely to be exposed to trichloroethylene by drinking trichloroethylene-contaminated water; you may also be exposed by breathing trichloroethylene released to the air from trichloroethylene-contaminated water. If you work in the degreasing industry or another industry where trichloroethylene is produced or used, you may be exposed by breathing in trichloroethylene-contaminated air or by contacting the chemical with your skin. Some trichloroethylene is released to the air by its evaporation from products such as adhesives, paints, and coatings; and through its evaporation from trichloroethylene-contaminated soil at landfills.

You may also be exposed to trichloroethylene by consumption of trichloroethylene-contaminated foods, by contact with consumer products containing trichloroethylene, and by direct contact with trichloroethylene-contaminated soil.

How can trichloroethylene enter and leave my body?

Trichloroethylene can enter your body from trichloroethylene-contaminated air, water, food, or soil.

Trichloroethylene in air can easily enter your body when you breathe. Most of the trichloroethylene that you breathe in will go into your bloodstream and into other organs. A small amount of trichloroethylene in the air can also move through your skin and into your bloodstream.

When trichloroethylene is found in water, it can enter your body when you drink or touch the water or when you breathe in steam from the water. Most of the trichloroethylene that you breathe in or drink will move from your stomach or lungs into your bloodstream. When you touch water containing trichloroethylene (such as showering or bathing with trichloroethylene-contaminated water), some of it can get through your skin into your body. Also, you can be exposed when trichloroethylene in groundwater evaporates and migrates into air spaces beneath buildings to enter the indoor air, a process termed vapor intrusion, and you breathe that contaminated indoor air.

Trichloroethylene has been detected in table-ready foods at concentrations generally in the range of 2–100 ppb.

You can be exposed to trichloroethylene in soil when small amounts of soil are transferred to your mouth accidentally, when your skin touches the soil, or when you breathe air or dust coming from the soil. You can also be exposed when trichloroethylene in soil evaporates and migrates into air spaces beneath buildings to enter the indoor air, a process termed vapor intrusion, and you breathe that contaminated indoor air.

Once in your blood, your liver changes much of the trichloroethylene into other chemicals. When the body absorbs more trichloroethylene than it can break down quickly, some of the trichloroethylene or its breakdown products can be stored in body fat for a brief period. However, once absorption ceases, trichloroethylene and its breakdown products quickly leave the fat.

You will quickly breathe out much of the trichloroethylene that reaches your bloodstream; most of the trichloroethylene breakdown products leave your body in the urine within a day.

How can trichloroethylene affect my health?

The health effects of trichloroethylene depend on how much trichloroethylene you are exposed to and the length of that exposure. Environmental monitoring data suggest that trichloroethylene levels the public might encounter by direct contact or through air, water, food, or soil, are generally much lower than the levels at which adverse effects are elicited in animal studies. However, some drinking water sources and working environments have been found to contain levels of trichloroethylene that may cause health problems.

Trichloroethylene was once used as an anesthetic for surgery. People who are overexposed to moderate amounts of trichloroethylene may experience headaches, dizziness, and sleepiness; large amounts of trichloroethylene may cause coma and even death. Some people who breathe high levels of trichloroethylene may develop damage to some of the nerves in the face. Other effects seen in people exposed to high levels of trichloroethylene include evidence of nervous system effects related to hearing, seeing, and balance, changes in the rhythm of the heartbeat, liver damage, and evidence of kidney damage. Some people who get concentrated solutions of trichloroethylene on their skin develop rashes.

Relatively short-term exposure of animals to trichloroethylene resulted in harmful effects on

the nervous system, liver, respiratory system, kidneys, blood, immune system, heart, and body weight.

Exposure to trichloroethylene in the workplace may cause scleroderma (a systemic autoimmune disease) in some people. Some men occupationally-exposed to trichloroethylene and other chemicals showed decreases in sex drive, sperm quality, and reproductive hormone levels.

Long-term exposure studies in animals have mainly focused on carcinogenicity and relatively insensitive noncancer end points following oral exposure; these studies are not helpful in defining noncancer end points in humans following long-term exposure. However, depressed body weight and evidence of effects on the thymus were reported in one recent study of mice exposed to trichloroethylene via their mothers during gestation and lactation and via the drinking water for up to 12 months thereafter.

There is strong evidence that trichloroethylene can cause kidney cancer in people and some evidence that it causes liver cancer and malignant lymphoma (a blood cancer). Lifetime exposure to trichloroethylene resulted in increased liver cancer in mice and increased kidney cancer in rats at relatively high exposure levels. There is some evidence for trichloroethylene-induced testicular cancer and leukemia in rats and lymphomas and lung tumors in mice.

The Department of Human Health Services (HHS) has classified trichloroethylene as "*known to be a human carcinogen*" based on sufficient evidence of carcinogenicity from humans. Similarly, the International Agency for Research on Cancer (IARC) has classified it as "carcinogenic to humans" and EPA has characterized it as "carcinogenic in humans by all routes of exposure." These agencies concluded that there were sufficient evidence from human studies that trichloroethylene exposure can cause kidney cancer in humans. There is also some evidence of an association between trichloroethylene exposure and non-Hodgkin's lymphoma in humans.

How can trichloroethylene affect children?

This section discusses potential health effects of trichloroethylene exposure in humans from when they're first conceived to 18 years of age.

Trichloroethylene is expected to affect children in the same manner as adults. It is not known whether children are more susceptible than adults to the effects of trichloroethylene.

Some human studies indicate that trichloroethylene may cause developmental effects such as spontaneous abortion, congenital heart defects, central nervous system defects, and small birth weight. However, these people were exposed to other chemicals as well. In some animal studies, exposure to trichloroethylene during development may have caused effects such as decreased body weight, increased incidences of heart defects, functional or structural changes in the developing nervous system, and effects on the immune system.

How can families reduce the risk of exposure to trichloroethylene?

If your doctor finds that you have been exposed to significant amounts of trichloroethylene, ask whether your children might also be exposed. Your doctor might need to ask your state health department to investigate. You may also contact the state or local health department with health concerns.

Exposure to contaminated drinking water should be limited. Trichloroethylene has been detected in some drinking water supplies. For bottled water, consumers should contact the bottler with specific questions on potential contaminants.

If you live near an industrial site where trichloroethylene is produced or is a byproduct or you live near a hazardous waste site where it has been discarded, there may be high levels of trichloroethylene in the water and soil. If you find your home water supply and/or soil to be contaminated with trichloroethylene, consider using a cleaner source of water and limiting contact with soil (for example, through use of a dense ground cover or thick lawn) to reduce exposure to trichloroethylene. By paying careful attention to dust and dirt control in the home (air filters, frequent cleaning), you can reduce family exposure to contaminated dirt. Some children eat a lot of dirt. You should prevent your children from eating dirt. You should discourage your children from putting objects in their mouths. Make sure that they wash their hands frequently and before eating. Discourage your children from putting their hands in their mouths or from other hand-to-mouth activity.

Trichloroethylene is widely used as a solvent for extraction, waterless drying, and finishing, and as a general purpose solvent in adhesives, lubricants, paints, varnishes, paint strippers, pesticides, and cold metal cleaners. Follow instructions on product labels to minimize exposure to trichloroethylene.

Are there medical tests to determine whether I have been exposed to trichloroethylene?

Trichloroethylene and its breakdown products (metabolites) can be measured in blood and urine. Because trichloroethylene and its metabolites leave the body fairly rapidly, the tests need to be conducted within a few hours after exposure. Tests for trichloroethylene and its metabolites in the blood or urine require special analytical equipment not readily available at medical facilities. Some metabolites of trichloroethylene can be formed from chemicals other than trichloroethylene, so detection of these metabolites in blood or urine does not guarantee that one has been exposed to trichloroethylene.

For more information on the different substances formed by trichloroethylene breakdown and on tests to detect these substances in the body, see Chapters 3 and 7.

What recommendations has the federal government made to protect human health?

The federal government develops regulations and recommendations to protect public health. Regulations can be enforced by law. Federal agencies that develop regulations for toxic substances include the Environmental Protection Agency (EPA), the Occupational Safety and

Health Administration (OSHA), and the Food and Drug Administration (FDA). Recommendations provide valuable guidelines to protect public health but are not enforceable by law. Federal organizations that develop recommendations for toxic substances include the Agency for Toxic Substances and Disease Registry (ATSDR) and the National Institute for Occupational Safety and Health (NIOSH).

Regulations and recommendations can be expressed as "not-to-exceed" levels; that is, levels of a toxic substance in air, water, soil, or food that do not exceed a critical value usually based on levels that affect animals; levels are then adjusted to help protect humans. Sometimes these not-to-exceed levels differ among federal organizations. Different organizations use different exposure times (e.g., an 8-hour workday or a 24-hour day), different animal studies, or emphasize some factors over others, depending on their mission.

Recommendations and regulations are also updated periodically as more information becomes available. For the most current information, check with the federal agency or organization that issued the regulation or recommendation.

EPA set a maximum contaminant level goal (MCLG) of zero as a national primary drinking standard for trichloroethylene; EPA noted liver problems and increased risk of cancer as potential health effects from long-term exposure above the maximum contaminant level (MCL) of 0.005 milligrams per liter (mg/L; 5 ppb).

OSHA set a permissible exposure limit (PEL) of 100 ppm for trichloroethylene in air averaged over an 8-hour work day, an acceptable ceiling concentration of 200 ppm provided the 8-hour PEL is not exceeded, and an acceptable maximum peak of 300 ppm for a maximum duration of 5 minutes in any 2 hours.

NIOSH considers trichloroethylene to be a potential occupational carcinogen and established a recommended exposure limit (REL) of 2 ppm (as a 60-minute ceiling) during the usage of trichloroethylene as an anesthetic agent and 25 ppm (as a 10-hour time-weighted average [TWA]) during all other exposures.

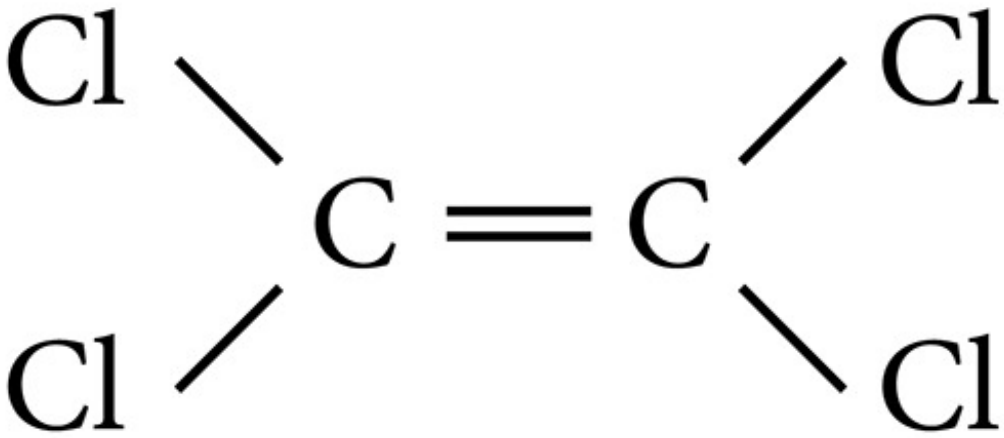
9Tetrachloroethylene

Nicole Nijhuis, Miranda Loh, and Paul Harrison.

General description

Tetrachloroethylene (PCE) (CAS Registry Number 127-18-4; C_2Cl_4; molecular weight 165.83) is a readily volatile, colourless liquid with an ether-like smell (1). Its main physical and chemical properties are as follows (2–5): molecular weight 165.83 g/mol; density (at 20 °C) 1.6227 g/ml; melting point approximately −22 °C; boiling point 121 °C; water solubility (at 25 °C) 150 mg/litre; vapour pressure 18.47 mmHg at 25 °C (2), 1.9 kPa at 20 °C, 3.2 kPa at 30 °C and 6.0 kPa at 40 °C (3); Henry's Law constant 0.018 atm-m^3/mol at 25 °C; log K_{ow} (octanol/water partition coefficient) 3.40 (measurement value) and 2.97 (estimated value); and log K_{oc} (octanol/carbon partition coefficient) 177~350 (measurement value). The reaction rate constant against the hydroxyl radical is 1.7×10^{-13} cm^3/molecule per second at 25 °C, against ozone 2.0×10^{-23} cm^3/molecule per second at 25 °C and against the NO_3 radical 5.2×10^{-17} cm^3/molecule per second.

Its structural formula is:



Common synonyms include perchloroethylene, PCE, ethylene tetrachloride, tetrachloroethene, 1,1,2,2-tetrachloroethylene, carbon dichloride, perchlor, tetrachloroethane, carbon bichloride, PERC, PCE and perk.

Conversion factors

At 760 mmHg and 20 °C, 1 ppm = 6.897 mg/m^3 and 1 mg/m^3 = 0.145 ppm; at 25 °C, 1 ppm = 6.782 mg/m^3 and 1 mg/m^3 = 0.147 ppm.

Applications and uses

Major industrial applications of PCE are as a synthetic raw material of hydrochlorofluorocarbon, a dry cleaning agent, a degreaser for manufactured metal parts and an industrial solvent. Other applications include the finishing and processing of textiles, the production of paint removers and printing inks, and the formulation of adhesives and specialized cleaning fluids. Consumer products that may contain PCE include adhesives, fragrances, spot removers, stain removers, fabric finishes, water repellents, wood cleaners, motor vehicle cleaners and dry-cleaned fabrics (6–8). In Japan, 69%, 18%, 12%, and 1.3% of PCE was used as a synthetic raw material of hydrochlorofluorocarbon, a dry cleaning agent, a degreaser and an industrial solvent, respectively (9).

Production

The estimated production volume in the United States in 1990 was 137 kilotonnes, compared to 282 kilotonnes in 1980 (2). In 1994, the total production of PCE in the EU was 164 kilotonnes. Of this amount, 78 kilotonnes was sold for use within the EU, 56 kilotonnes were exported and the remainder used as a chemical intermediate within the chemical industry (10). For Japan and the United States, it was 178 and 102 kilotonnes, respectively (1). In Canada, where PCE is no longer produced, the demand in 1990 was

estimated at 14 kilotonnes (7). In Japan, the production and supply of PCE was 25 and 37 kilotonnes, respectively. No estimates of consumption levels are available for other parts of the world.

Analytical methods in air

Common methods of measuring indoor concentrations of TCE include integrated active and passive sampling methods using tubes packed with a carbon-based sorbent or evacuated SUMMA canisters (passivated canister sampling apparatus), or diffusion samplers such as charcoal badges. Canister sampling involves controlling the flow of air into a pre-evacuated canister. Sorbent tubes and badges retain compounds according to the affinity of the sorbent for that compound. For sorbent or charcoal sampling, the analytes must first be extracted thermally or chemically, then separated using gas chromatography and identified using a detection method such as mass spectrometry (11). Personal exposure studies often use these sorbent-based methods.

Environmental fate

There are no known natural sources of PCE. The Henry's Law constant indicates that PCE is expected to volatilize rapidly from water surfaces and that volatilization from moist soil surfaces may occur (1). Concentrations in ambient air may fluctuate widely over relatively short periods of time depending on the strength of the emission source, variations in wind direction and velocity, and scavenging and photodecomposition (6).

The half-life in the atmosphere has been estimated to range from 70 to 250 days (2).Considering the atmospheric concentrations and reaction rate constant of the hydroxyl radical and ozone, this removal from atmosphere is mostly due to reaction with hydroxyl radicals. This process is temperature-dependent, with increased reaction rates in the summer. The results of biodegradability tests suggested that the biodegradability of PCE is extremely low in environmental water (12,13); it may persist in groundwater for several months or more (7).

The main sources resulting in ambient air concentrations are industrial emissions and releases from building and consumer products. Releases are primarily to the atmosphere, but the compound is also released to surface water and land in sewage sludges and in other liquid and solid waste, where it can evaporate rapidly to the atmosphere.

ATSDR has estimated that 80–85% of the PCE used annually in the United States is released into the atmosphere (2). Atmospheric emissions result from evaporation during dry cleaning, metal degreasing, the production of fluorocarbons and other chemicals, and miscellaneous solvent-associated applications (14). However, the percentage is likely to be lower in the United States at present, owing to improved technology and regulatory

restrictions. Almost all PCE enters the atmosphere unchanged. A small proportion enters water and wastewater. From surface water, PCE volatilizes owing to its relatively low water solubility and high vapour pressure.

Indoor sources and pathways of exposure

Inhalation is the most common route of exposure to PCE for the general population. Ingestion of contaminated drinking-water may also be important in areas with highly contaminated water. While PCE has been found in some food items, particularly from local source contamination, not enough data are available to estimate exposure through this route (2).

Indoor sources

Consumer products described above are sources of indoor PCE exposure. Contaminated drinking-water may be a source of indoor PCE exposure when taking a shower or washing dishes. Workers from dry cleaning establishments have been found to become sources of PCE at home by exhaling PCE in their breath (15). Dry-cleaned clothes are also possible sources of PCE in a house.

The air in dry cleaning facilities and neighbouring homes or facilities can contain elevated concentrations of PCE. Soil pollution with PCE has resulted in indoor air concentrations of these chemicals in residential homes. These chemicals can evaporate from the soil, permeate through floors and result in elevated indoor air concentrations. PCE can permeate through synthetic water pipes and contaminate drinking-water, thus leading to exposure during bathing or showering.

Drinking-water

Exposure can take place by drinking contaminated water as well as volatilization. In the United States, PCE is not detectable in drinking-water in most cases. The EPA Groundwater Supply Survey of 945 drinking-water systems nationwide reported PCE in 75 out of 945 systems in 1984; the median level of the positive samples was about 0.75 µg/litre, with a maximum of 69 µg/litre (2). In several studies in Canada, PCE was detectable in 6–60% of the tested samples. Reported mean values ranged from 0.1 to 0.9 µg/litre (6). In several other countries, including Germany and the United Kingdom, similar results have been observed (8,16). In some villages in Finland, concentrations of up to 180 µg/litre were found (17). In Japan, PCE levels in 99.7% of drinking-water (n = 5600) were less than 1 µg/litre with a maximum of 7 µg/litre in 2007 (18).

Food

Data on concentrations of PCE in food are scarce. In some studies from Germany and Switzerland reported in the early 1980s, relatively high total intakes of 87–170 µg/day

were found (16). The results of market basket surveys in the United States, reported in 1987 and 1988, indicated lower levels. From the results of these surveys, total daily intake via food has been estimated at 0.12–65 μg/kg body weight (6). Several groups of researchers have reported elevated concentrations of PCE in fatty food products in residences and markets, owing to contamination from dry cleaning establishments nearby. In a supermarket near a dry cleaning shop in Germany, concentrations were 36 μg/kg and 110 μg/kg in cheese and margarine, respectively (8). In one instance in the United States, a very high PCE concentration was found in margarine (up to 50 mg/kg) in a shop next door to a dry cleaning establishment (2). Moreover, food grown on contaminated soil can contain PCE. In Japan, the daily maximum levels of PCE in the diet between 1990 and 1999 (n = 72~81 in each year) were 4.4 μg/kg wet weight (14).

Indoor air concentrations and relationship with outdoor levels

Residential concentrations

In several United States cities (New York, Los Angeles, Chicago, Minneapolis, St Paul, Baltimore, Elizabeth and Houston), median indoor residential concentrations ranged from 0.4 μg/m^3 in spring (Minneapolis) to 3.5 μg/m^3 during winter (New York City) (19–26). The 90th percentiles ranged from 1 μg/m^3 in Minneapolis in the spring to 14 μg/m^3 in New York City during the summer (23).

Geometric mean concentrations of PCE in the homes of dry cleaning workers have been found to be 265 μg/m^3, while non-exposed homes had a mean concentration of 2 μg/m^3(15). Also, shops, offices or homes that share a building with a dry cleaning establishment have been found to have higher levels of PCE than those that are not near dry cleaners. A study of apartments in neighbourhoods with different income levels and ethnic compositions in New York City between 2001 and 2003 found overall geometric mean levels of 34 μg/m^3, although in low-income neighbourhoods, the geometric mean was 256 μg/m^3. Apartments with no dry cleaners in the building had a geometric mean concentration of 3 μg/m^3. Before 1997, when New York adopted stricter regulations for dry cleaners, PCE was found to be about 340–360 μg/m^3 in residential buildings with a dry cleaning establishment (27).

In a national survey of dwellings in France, a median concentration of 1.4 μg/m^3 was found, with a 90th percentile of 5.2 μg/m^3(28). In the European multinational urban air study EXPOLIS (29), median levels of PCE inside homes in Helsinki were not detectable, while they were 0.6 μg/m^3 in Basel. The 90th percentile in Basel was 2.9 μg/m^3. In Oxford, United Kingdom, the median indoor residential PCE concentration was 1.9 μg/m^3, and 6.3 μg/m^3 at the 90th percentile. Homes in Athens had a median indoor level of 4 μg/m^3 and a 90th percentile level of 14.3 μg/m^3. Milan and Prague were found to have median concentrations of 7.4 and 8.7 μg/m^3, respectively, with 90th percentiles of

28.1 μg/m^3 and 26.1 μg/m^3, respectively. Median outdoor residential PCE levels were under the detection limit in Helsinki, 0.7 μg/m^3 in Basel and 1.7 μg/m^3 in Oxford. The 90th percentiles in Basel and Oxford were 1.4 μg/m^3 and 3.4 μg/m^3, respectively. In Athens, Milan and Prague, the median outdoor residential levels were 2.3 μg/m^3, 4.1 μg/m^3 and 5.3 μg/m^3, respectively. Median personal exposure levels were lower than the indoor levels.

In 25 homes surveyed in Shimizu, Japan, geometric mean indoor PCE concentrations were 0.16 μg/m^3 in summer and winter, with geometric standard deviations of 2.34 μg/m^3 in summer and 2.77 μg/m^3 in winter (30). The geometric mean concentration outside these homes was 0.11 μg/m^3 in both summer and winter, with geometric standard deviations of approximately 2 μg/m^3 in both seasons. In a national survey of dwellings in Japan, median indoor PCE concentrations in residential houses in 1997 (n = 180) and 1998 (n = 205) were 0.4 μg/m^3 (mean 1.8 μg/m^3; maximum 83.5 μg/m^3) and 0.3 μg/m^3 (mean 1.9 μg/m^3; maximum 43.4 μg/m^3), respectively (31).

Non-residential microenvironments

Predicted PCE concentrations in the air around metal degreasing machines were found to range from about 10 000 μg/m^3 to above 1 million μg/m^3, depending on the type of machine. In Germany, mean personal air samples in occupational environments with degreasers ranged from 18 000 to 40 000 μg/m^3(10).

Exposure to PCE from dry cleaning affects both workers and members of the general public. A study in Finland of personal exposure of workers in commercial and industrial dry cleaning operations using dry-to-dry machines found that machine operators had the highest exposure levels (28 000 and 32 000 μg/m^3 at commercial and industrial sites, respectively). Customer service workers had the lowest exposures, with an average of about 800 μg/m^3(32). Another study of dry cleaning establishments in Chicago found indoor levels of PCE ranging from 12 000 to 355 000 μg/m^3(33).

A survey of stores in a one-level commercial building in New Jersey found a median concentration of 690 μg/m^3 and a 90th percentile of 4200 μg/m^3 in a dry cleaning establishment in the building, and a median of 570 μg/m^3 and 90th percentile of 5800 μg/m^3 (8 hour average) in a neighbouring clothes rental shop, which may have also contained dry-cleaned clothes (34). The neighbouring shop on the other side had lower levels, but the median was still nearly 90 μg/m^3, a level much higher than the average indoor environment. Dry cleaned clothes have been shown to emit PCE (2,32).

A survey of 70 office buildings across the United States (in which there were no complaints) found a median indoor PCE level of 1.5 μg/m^3 and a 95th percentile of 18 μg/m^3(35). A study of mechanically ventilated non-office and office buildings in Hong Kong SAR, China found arithmetic mean levels of 1.4 μg/m^3 (SD = 3.4) and 1.9 μg/m^3

(SD = 9.2), respectively (36). Median indoor concentrations at workplaces of the EXPOLIS participants were under the detection limit in Helsinki, 1.2 μg/m^3 in Basel, 3.5 μg/m^3 in Athens, 5.4 μg/m^3 in Milan and 3.7 μg/m^3 in Prague. The 90th percentile of workplace levels were 3.1 μg/m^3 in Basel, 10.6 μg/m^3 in Athens, 17.5 μg/m^3 in Milan and 10 μg/m^3 in Prague. The workplaces were typically offices. A survey of stores in Boston, MA found that geometric mean levels of PCE in stores and restaurants were near or under 3 μg/m^3(37).

Ambient air

Residential outdoor median concentrations ranged from 0.3 μg/m^3 in Minneapolis (spring) to 1.7 μg/m^3 in Los Angeles (winter). The median outdoor concentrations of PCE in Shimizu (Japan) were 0.2 μg/m^3 (mean 0.5 μg/m^3; maximum 4.7 μg/m^3) and 0.2 μg/m^3 (mean 0.7 μg/m^3; maximum 10.8 μg/m^3), respectively (30). Outdoor levels in rural Canada were found to have a mean of 0.04 μg/m^3 and a maximum of 7 μg/m^3(38).

Indoor : outdoor ratios in New York and Los Angeles from a study in a low-income group of teenagers were between 1 and 2 at the median and did not have large standard deviations relative to the median (except for New York homes in the winter) (23). The earlier Total Exposure Assessment Methodology (TEAM) study found higher indoor : outdoor ratios in the cities of Bayonne and Elizabeth, NJ, with arithmetic means ranging from 2 in summer to 7 in winter and 5 in the winter in Los Angeles (39,40). The medians were not reported but are likely to have been lower than the arithmetic means.

Personal exposure

Median personal exposures of the teenagers were 2.2 μg/m^3 in Los Angeles and 3.7 μg/m^3 in New York, although the mean in New York was 8.8 μg/m^3, indicating a more skewed distribution with some higher values (19–26). The New York indoor home distribution was also fairly skewed. The RIOPA study in Los Angeles, Elizabeth and Houston found that adult personal air concentrations had lower medians than means, with a particularly large difference in Elizabeth, where the median was 0.56 μg/m^3 and the mean was 17.3 μg/m^3(26). Indoor and outdoor residential mean concentrations in Elizabeth, however, were near 1 μg/m^3 and were detectable in only 24% of outdoor samples and 39% of indoor samples, while in personal samples PCE was detected in 44% of the samples (26).

Personal exposures to PCE are most influenced by indoor concentrations. PCE can reach extremely high levels indoors, even in non-occupational environments such as homes or businesses that are in the same building as or close to dry cleaners. The TEAM studies found that higher personal PCE exposures were associated with visits to dry cleaners (39,40). Unlike other industries that use PCE, such as metal degreasing, dry cleaners are often located in residential, non-industrial commercial and business districts and may

affect both the occupants of neighbouring establishments and food. Indoor environments next to dry cleaners have been found to have PCE concentrations of several hundreds of $\mu g/m^3$. Indoor environments without sources of PCE have concentrations well below 10 $\mu g/m^3$, with median concentrations near 1 $\mu g/m^3$ in many areas. Dry-cleaned items can be an occasional source of PCE in some homes.

Toxicokinetics

Absorption

PCE is readily absorbed in the gastrointestinal tract and the lungs. Pulmonary uptake is proportional to ventilation rate, duration of exposure and, at lower atmospheric concentrations, the concentration in the inspired air (2). In both humans and animals, initial uptake following inhalation is rapid, with rates levelling off after a few hours of exposure. The available data suggest that a high proportion is absorbed in humans, but actual percentages have not been reported. In rats, the proportion absorbed was approximately 55–70% after 1 minute, gradually declining to 40–50% after 2 hours (41).

Dermal absorption from the gaseous phase is negligible. However, dermal absorption of significant amounts of PCE is probably possible in some situations. Dermal absorption of PCE solutions resulted in measurable levels of the compound in the breath, reaching a maximum 10 minutes after exposure (16). Experiments in hairless guinea-pigs have shown substantial dermal absorption from dilute aqueous solutions (21). In vitro dermal absorption of PCE in aqueous solution through freshly prepared and previously frozen human skin was measured and compared to absorption of other volatile organic compounds in aqueous solution (42). The dermal absorption of PCE from a soil matrix was compared in rats and humans using real-time mass spectrometric exhaled breath technology and physiologically based pharmacokinetic (PBPK) modelling (43).

Distribution

Repeated inhalation exposure to PCE results in accumulation of the compound in the body, especially in fatty tissue since it is lipid-soluble. PCE crosses the placenta and can be found in breast milk; the fetus and nursing neonates may therefore be at increased risk of adverse effects from maternal exposure (2,44,45). In rats, distribution to the brain, liver and kidneys has also been demonstrated (2,46). In a study in mice, transplacental transport of unchanged PCE has been observed (2). In rats and goats, it has been shown that excretion of unchanged PCE in milk occurs after intraruminal administration (23,24). Following inhalation exposure of lactating rats to a concentration of 4070 mg/m^3 (600 ppm) for 2 hours, total body burden for the pups was up to about 14 mg/kg body weight (23). Since women have a higher proportion of body fat than men, it is assumed that women retain PCE longer (47).

Biotransformation

In experiments in humans and rats, it was observed that most of the absorbed amount of PCE is exhaled unchanged. The two principal pathways of PCE metabolism that occur in the liver and kidney of experimental animals are cytochrome P450-dependent oxidation and glutathione conjugation. The hepatotoxic, nephrotoxic and carcinogenic effects of PCE depend on its metabolism to reactive metabolites, which may covalently bind to cellular macromolecules.

Cytochrome P450 enzymes primarily catalyse PCE oxidation. Presumably, CYP2E1 plays an important role in this process in rodent liver and kidney as well as human liver. This results in the formation of a PCE-epoxide, which further reacts to trichloroacetyl chloride. Trichloroacetyl chloride can react with amino groups in macromolecules, resulting in hepatotoxicity. When it reacts with water it forms trichloroacetic acid.

Trichloroacetic acid is the principal metabolite recovered from urine in both humans and rodents following inhalation exposure to PCE. Another metabolite that can be formed by the cytochrome P450 pathway is dichloroacetate. Di- and trichloroacetate are associated with hepatic toxicity and carcinogenicity. Other metabolites of PCE by the P450 pathway that have been identified are shown schematically in Fig. 9.1(48,49).

Fig. 9.1

Metabolism of PCE by the P450 pathway. *Note*. Identified urinary metabolites: 1 = PCE; 2 = PCE epoxide; 3 = trichloroacetyl chloride; 4 = trichloroacetate; 5 = trichloroethanol; 6 = trichloroethanol glucuronide; 7 = oxalate dichloride; 8 = trichloroacetyl (more...)

There is a broad range of halogenated hydrocarbons and other small organic molecules that are oxidized by CYP2E1. Several drugs as well as physiological or pathological conditions may lead to the induction of CYP2E1. This implies that under certain conditions, prior or concurrent exposure to chemicals such as ethanol or acetaminophen may influence the response to PCE. Also, individual susceptibility due to genetic polymorphisms in CYP450-dependent metabolism can result in altered toxicity.

PCE is conjugated by glutathione to S-(1,2,2-trichlorovinyl)glutathione (TCVG). No significant effects were found of PCE or TCVG on cytotoxicity or mitochondrial function in isolated hepatocytes from rats or in isolated liver mitochondria from rats or mice. Therefore, it is unlikely that the liver is a major acute target for PCE or TCVG. Glutathione conjugation of PCE, followed by activation of trichlorovinylcysteine (TCVC), is

responsible for nephrotoxicity and possibly nephrocarcinogenicity (49,50). Fig. 9.2 shows the metabolites of PCE by the glutathione conjugation pathway, so far as they have been identified to date.

Fig. 9.2

Metabolism of PCE by the glutathione conjugation pathway. *Note*. Identified urinary metabolites: 1 = PCE; 2 = TCVG; 3 = TCVC; 4 = NAcTCVC; 5 = NAcTCVC sulfoxide; 6 = 1,2,2-trichlorovinylthiol; 7 = TCVCSO; 8 = 2,2-dichlorothioketene; 9 = dichloroacetate. (more...)

Species-dependent differences in biotransformation

Mice metabolize PCE to trichloroacetic acid to a greater extent than rats. In rats, saturation of the oxidative metabolism at exposure concentrations exceeding 678 mg/m^3 (100 ppm) prevents the occurrence of the high trichloroacetic acid concentrations that are observed in mice at these dose levels. The available evidence indicates that in humans too, saturation of the oxidative metabolism of PCE occurs at ≥ 678 mg/m^3 (≥ 100 ppm) (51). In a comparative study, the urinary levels of *N*-acetyl-*S*-(1,2,2-trichlorovinyl)-*L*-cysteine, one of the final metabolites in the glutathione biotransformation pathway, were shown to be higher in rats than in mice after inhalation exposure to PCE. In vitro tests in hepatocytes and kidney fractions of rats, mice and humans suggest that the potential for this biotransformation in the kidneys is also lower in humans than in rats (2,6,52). Experimental data show that rates of TCVG formation in rats and mice are higher in males than in females, the formation rates in mice being higher than in rats (48,53).

The overall kinetics of PCE oxidative metabolism differs significantly between humans and rodents. The excretion of trichloroacetic acid after inhalation of PCE has been shown to be slower in humans than in rats. The elimination half-time of trichloroacetic acid in the urine was approximately 4.1-fold longer in humans than in rats exposed to 10 or 40 ppm PCE. Maximal trichloroacetic acid concentrations in blood were 3- to 10-fold lower (depending on dose) in humans than in rats (48,54). It is assumed that saturation of PCE metabolism occurs at lower doses in humans (55,56).

While the target organs for toxicity in general are similar for different species, this is not the case for carcinogenicity.

Sex-dependent differences in biotransformation

Regarding renal toxicity, sex differences have been found in experiments on rats and mice. PCE is demonstrated to cause a significant release of lactate dehydrogenase in isolated kidney cells from male but not from female rats. TCVG causes much more lactate dehydrogenase to be released from male than from female rat kidney cells. Examination of effects on mitochondrial respiration in suspensions of isolated mitochondria showed that PCE and TCVG are more toxic in renal mitochondria from male rats than in those from female rats. Respiratory function in (renal) mitochondria from mice was significantly inhibited by PCE and TCVG, but showed little sex dependence (49). Experimental data showed that TCVG formation in kidney and liver subcellular fractions from male rats and mice were invariably higher than corresponding values in female rats and mice (53).

Elimination

In humans and animals, the major part of the absorbed amount of PCE is exhaled unchanged. In humans, 80–100% of the uptake was exhaled as parent compound in the 7 days following a single 4-hour inhalation exposure to 488 or 976 mg/m^3 (72 or 144 ppm) PCE. In rats, the proportion is somewhat lower (68%). Elimination of PCE from adipose tissue is relatively slow (calculated half-life 55 hours) owing to the high adipose/blood partition coefficient and the low rate of blood perfusion to this tissue (2). Excretion of metabolites in urine represents only a small proportion of the inhaled dose. Following single inhalation exposure in humans, only 2% of the uptake was found as the major urinary metabolite, tetrachloroacetic acid. This compound was excreted from the blood with a half-life of 75–80 hours. In another study, its half-life in urine was estimated at 6 days (16).

In a study in which humans were exposed by inhalation to 6.8 mg/m^3 (1 ppm) PCE in the air for 6 hours, the average recovery by exhalation was calculated to be 82%. This implies that about 18% was metabolized. PCE was readily detected in alveolar air and venous blood; trichloroacetic acid was found in venous blood and urine. Recovery was primarily through exhaled air; only a small amount (less than 1% of intake) of trichloroacetic acid was excreted via the urine. Between about 63% and 93% of the intake was exhaled as parent compound 6 days after the exposure; 0–10% was estimated to be exhaled as PCE after the 6-day period (57). An inhalation study in humans and rats exposed for 6 hours at different concentrations of PCE showed excretion of trichloroacetic acid and the acetylated metabolite N-acetyl-TCVC in the urine of both species. Excretion of the N-acetyl-TCVC was significantly higher in male than in female rats (54).

In rat studies, high concentrations in the milk have been observed, peak concentrations being an order of magnitude higher than in maternal blood (58). Experimental data in lactating goats showed that, following intraruminal administration of an equal volume mixture of PCE, TCE and methyl chloroform, the milk secreted during the 24 hours

following the administration contained 6.43 mg PCE (in addition to TCE and methyl chloroform). PCE demonstrated the greatest tissue partitioning compared to TCE and methyl chloroform, being persistently in the blood and secreted into the milk (59). Limited data in humans also show that PCE is excreted in the milk (60).

Biomarkers of exposure

Biological monitoring of exposure to PCE can be carried out by measuring levels of the parent com pound in blood, urine or exhaled air or of the metabolites in blood or urine. These methods have been applied for assessing both occupational and non-occupational exposure.

There has been discussion in the literature as to whether measurement of the parent compound in blood or in exhaled air is the preferred biological index to monitor PCE exposure (47,61–63). A study in humans showed that correlation coefficients (r) between environmental PCE and PCE-B (PCE measured in blood), PCE-Alv (PCE measured in alveolar air) and PCE-U (PCE measured in urine) were 0.94, 0.81 and 0.67, respectively. A high correlation was also found among biological indices: the r value was 0.96 between PCE-B and PCE-Alv, 0.95 between PCE-B and PCE-U, and 0.87 between PCE-Alv and PCE-U (61). The examined biological indices proved sensitive enough for biological monitoring of low exposure to PCE and can give substantially similar information in terms of exposure evaluation. PCE measurement in alveolar air offers some practical advantages over the other exposure indices.

Measuring of metabolites (trichloroacetic acid, trichlorethanol) in blood or urine may not necessarily represent exposure to PCE because some related chlorinated hydrocarbons (TCE, 1,1,1-trichloroethane) are converted to the same metabolites (2).

Physiologically based pharmacokinetic modelling

Several groups of researchers have developed PBPK models for PCE and several of the models have been evaluated. Table 9.1 provides an overview of these efforts (41,46,58,60,64–79).

Table 9.1 Physiologically based pharmacokinetic (PBPK) models for PCE metabolism

Species	Input parameters and calibration	Model application
Mice, humans	Data from single-dose inhalation	Human cancer risks estim of the predicted amounts i in mice and humans, and incidences in mice
Humans	Partition coefficients determined in vitro; metabolic parameters from occupational studies	Simulation of the time-cou concentration in blood for inhalation exposure
Mice, rats	Partition coefficients determined in vitro; metabolic parameters from oral and/or inhalation exposure studies in rats and mice	Simulation of the amount o metabolites in mice or pro PCE following a single inh in rats
Humans	Animal data and metabolic parameters derived from data on urinary levels of trichloro compounds in urine of workers exposed to PCE	Simulation of the time-cou unchanged PCE
Rats, humans	Partition coefficients determined in vitro; metabolic parameters calculated and optimized from inhalation studies in rats and humans	Simulation of the proportio and body burden in rats a

Table 9.1

Physiologically based pharmacokinetic (PBPK) models for PCE metabolism.

Most PBPK models for PCE share the four-compartment structure (liver, fat, rapidly perfused tissues and slowly perfused tissues) and steady-state description of lung equilibration developed by Ramsey & Andersen (80) for styrene. Only one of the published models (71) provides a description of the kinetics of trichloroacetic acid, the major metabolite of PCE.

Some studies have focused on the evaluation of these models. In one, the key parameters and predictions for PBPK models for mice, rats and humans developed by different groups of researchers were compared. The amounts of metabolized PCE predicted showed considerable differences (about 12- to 14-fold for humans). Most of the differences in risk-related model predictions were due to the choice of the data sets used for calibrating metabolic parameters (V_{max}, K_m) (77,81). A statistical approach to some of the PBPK models for PCE in mice, rats and humans showed that the kinetic parameters defining the metabolic rate were the most important parameters for model sensitivity (82).

Health effects

Identification of studies

Epidemiological studies on health effects of PCE exposure were identified from electronic searches and hand searches of references in former reviews by WHO. Electronic searches were made in PubMed in July 2008, with an update in June 2009. We intended to identify all studies with original data on health effects of PCE and the main descriptors used were “tetrachloroethylene” and “perchloroethylene”. In addition, studies that examined the health effects of PCE were identified through hand searches of earlier reviews of the topic, citations within papers identified on health effects of PCE and searches on the web sites of international or national health assessment agencies, including WHO, the European Commission, Health Canada, IARC, ATSDR, USEPA, the United Kingdom Committee on Carcinogenicity of Chemicals in Food, Consumer Products and the Environment and the US National Institute for Occupational Safety and Health. Papers known to the expert group in 2009 concerning health effects of PCE were also used.

Of 148 papers identified, 59 were relevant to the health effects section of this chapter. These papers were included in the discussion presented below, addressing human exposure and epidemiological issues (37), children (0), animal studies (10), cell studies (4), reviews (4) and other studies (4). In addition, 11 reports of the above-mentioned agencies were used in the “Health effects” section.

Effects on experimental animals and in vitro test systems

Toxicological effects

PCE has a low acute inhalation toxicity (LC_{50} in rodents ≥ 16.6 mg/litre). Acute oral toxicity is also low (LD_{50} in rodents ≥ 3000 mg/kg body weight) (6).

The liver, kidneys, blood and CNS are the target organs for systemic effects. Hepatic effects occur at lower dose levels in mice than in rats. In a series of experi ments in mice, continuous (24 hours/day) inhalation exposure for 30 days at concentrations of 61, 251, 508 or 1017 mg/m^3 produced a dose-related increase in liver weight at all dose levels. Morphological changes in the liver were observed at 251 mg/m^3 and, as stated but not fully reported, at all other dose levels as well. Plasma butyrylcholinesterase activity showed a slight increase at ≥ 251 mg/m^3. The reversibility of the effects was exami ned at 1071 mg/m^3 only, showing that at 120 days after cessation of treatment, only a slight increase in liver weight remained (83).

Within the United States National Toxicology Program (NTP) subchronic inhalation studies were carried out in rats and mice. In mice, liver effects were observed at 1350 mg/m^3 (≥ 200 ppm) or higher. Karyomegaly of the renal tubule epithelial cells was observed at ≥ 1350 mg/m^3 (≥ 200 ppm). At 680 mg/m^3 (100 ppm), no effects were seen but at this level no histopathological examination of the liver was carried out. In rats, mild congestion of the liver was seen at ≥ 1350 mg/m^3 (≥ 200 ppm) (lower concentrations not tested), with congestion of the lungs, decreased survival and growth retardation at higher dose levels (84). In chronic studies, renal tubular cell karyomegaly was observed in female rats and mice at both 1356 and 2712 mg/m^3 (200 and 400 ppm) in rats and 678 and 1356 mg/m^3 (100 and 200 ppm) in mice.

In addition, in rats, renal tubular hyperplasia (males), thrombosis and squamous metaplasia in the nasal cavity (males and females) and hyperlasia in the adrenal medullae (males) or cortices (females) were found. In mice only, liver cell degeneration and necrosis were seen at both concentrations (84). A study exposing mice to 2040 mg/m^3 (300 ppm) perchloroethylene gas for 6 hours daily for 5 days revealed regeneration of olfactory mucosa. Two weeks and three months after exposure, the nasal mucosa was examined histopathologically. After two weeks, ciliated epithelium started to replace the olfactory epithelium. Damage was more persistent in the nasal mucosa of the olfactory region than in the respiratory region (85).

CNS effects have been observed at high dose levels. In the short-term NTP experiment in rats and mice, neurological symptoms were observed only at the highest concentration of 11 860 mg/m^3 (1750 ppm) (84). Biochemical changes in brain tissues have been observed in rats and gerbils at concentrations of ≥ 407 mg/m^3 (≥ 60 ppm). However, the toxicological significance of these changes is unclear (2). In a recent short-term study in

rats, decreased weight of brain regions and reductions in neuronal marker proteins were seen at 4080 mg/m^3 (600 ppm) but not at 2040 mg/m^3 (300 ppm) (86). Haematotoxicity was observed in an inhalation study in mice at test concentrations of 915 and 1830 mg/m^3 (no other concentrations tested) in which the animals were exposed for 6 hours/day, 5 days/week for 7.5 or 11.5 weeks (87). Rats that were acutely exposed to a high dose (500 mg/kg oral) of PCE and others subchronically to lower doses (5 and 50 mg/kg oral), showed significant effects on nociception and locomotor activity (88). An inhalation study assessed the effects of PCE on sustained attention in rats performing a visual signal detection task. It showed that inhaled PCE acutely impaired sustained attention in rats, and its potency weakened on repetition of the exposure. Accuracy was significantly reduced at 3390 mg/m^3 (500 ppm), significantly elevated response time was seen at 6780 mg/m^3 (1000 ppm) and significantly reduced trial completions were found at 10 170 mg/m^3 (1500 ppm) (89).

Limited teratogenicity studies in rats, mice and rabbits suggest that PCE produces fetotoxicity and embryotoxicity at high dose levels (≥ 2034 mg/m^3). In a behavioural teratogenicity study in rats, neuromuscular ability in pups was decreased at 6100 mg/m^3 (900 ppm) but not at 2034 mg/m^3 (300 ppm) (2). In a study on developmental toxicity, embryos from rats were explanted on gestational day 120 and cultured for 46 hours in the presence of PCE. Exposure to PCE ranging from 3.5 to 15 mM caused concentration-related effects on growth and development. The presence of hepatic microsomal fractions in the culture medium partially prevented the effects of PCE on the measured parameters of embryo growth and development (90). A study showed altered behaviour in adult mice orally exposed to PCE as neonates (5 and 320 mg/kg PCE/day between days 10 and 16 postnatally), indicating neonatal susceptibility of brain maturation in achieving long-lasting changes in adult behaviour (91). A developmental study in rats following inhalation exposure to PCE showed maternal responses that were of limited toxicological significance. Developmental effects at 600 ppm consisted of reduced gravid uterus, placental and fetal weights and decreased ossification of thoracic vertebral centra. Developmental effects at 1695 mg/m^3 (250 ppm) were of minimal toxicological significance, being limited to minor decreases in fetal and placental weights. There were no developmental effects at 441 mg/m^3 (65 ppm) (92).

PCE at 68–2043 mg/m^3 (10–300 ppm) was found to increase, in a concentration-dependent manner, ACh- and high K+-induced muscle contraction in tracheal tissue from swine. Swine tissue was used because there are many similarities between swine and human airways. More research is necessary to be able to conclude that these responses play a role in airway impairment and hyperresponsiveness after PCE exposure (93). A study using renal cell suspensions of rats and mice showed that PCE caused acute renal cellular toxicity in rats and mitochondrial toxicity in rats and mice (49).

Carcinogenic effects

Data on the carcinogenicity of PCE have been evaluated in various health assessment documents (2,6,51). PCE-induced nephrotoxicity and nephrocarcinogenicity have been associated with metabolism by the glutathione conjugation pathway to form TCVG (48,53).

Oral and inhalation studies with NTP have been performed in mice and rats. In a gavage study in B6C3F1 mice (time-weighted average (TWA) daily dose levels of 536 and 1072 mg/kg body weight in males and 386 and 772 mg/kg in females), increased incidences of hepatocellular carcinomas were found in males and females (4/37, 32/49 and 27/48 in males and 2/40, 19/48 and 19/48 in females). In Osborne Mendel rats, no increase in tumour incidence was seen. This study has various limitations: numerous dose adjustments during the study, early mortality related to compound-induced toxic nephropathy, and pneumonia due to intercurrent infectious disease in both rats and mice (2,94). In the inhalation study in B6C3F1 mice (test concentrations 100 and 200 ppm, 6 hours/day, 5 days/week for 103 weeks, corresponding to 680 and 1360 mg/m^3), incidences of hepatocellular carcinomas were increased (7/49, 25/49 and 26/50 males and 1/48, 13/50 and 36/50 females). In F344/N rats (test concentrations 200 and 400 ppm, 6 hours/day, 5 days/week for 103 weeks, corresponding to 1360 and 2720 mg/m^3), PCE caused dose-related increases in the incidence of stage 3 mononuclear cell leukaemia in animals of both sexes: in males, 20/50 in controls, 24/50 at the low dose and 27/50 at the high dose; in females, 10/50, 18/50 and 21/50, respectively. The historical control for mononuclear cell leukaemia in rats in the same laboratory was 47% in males and 29% in females. Uncommonly occurring renal tubular cell adenomas or adenocarcinomas were found in male rats (adenomas,1/49 in controls, 3/49 at the low dose and 2/50 at the high dose; adenocarcinomas, 0/49, 0/49 and 2/50, respectively).

Although induction of peroxisome proliferation as a mechanism underlying the hepatocarcinogenic effect of PCE in mice appears attractive, a poor quantitative correlation was seen between peroxisome proliferation and tumour formation in the liver following administration by inhalation.

The induction of kidney tumours observed in male rats provides only weak evidence for (human) carcinogenicity. The observed increase in incidence is not statistically significant. In addition, two different mechanisms of action have been proposed for the induction of these tumours: alpha 2µ-globulin nephropathy, an effect specific for male rats, and formation of genotoxic metabolites in the kidneys as the final step of the glutathione biotransformation pathway. Given the low incidences observed, combined with the data on the mechanism of induction, it can be concluded that the result in male rats is equivocal evidence only for a risk of renal cancer in humans.

A review of six carcinogenicity studies of PCE in rats concluded that evidence of increases in mononuclear cell leukaemia has been seen in two studies in the F344 rat but not in other strains, and that as a rat-strain-specific effect it is not considered to be relevant to

the evaluation of human cancer risk (95).

IARC (96) has concluded that the results of the available animal bioassays provide sufficient evidence for carcinogenicity in animals.

Mutagenicity

Comprehensive reviews are available of the data obtained from the many studies carried out with PCE (2,51,96). In vitro studies include tests for gene mutations in prokaryotes and eukaryotes and tests for chromosome aberrations in mammalian cell lines. In vivo studies include tests for chromosome aberrations in bone marrow in rats and mice and a dominant-lethal assay in rats. In addition, several studies have been carried out on DNA damage in vitro and in vivo. The body of results shows absence of mutagenicity of PCE in virtually all of the systems tested. The few weakly positive results may be due to the presence of mutagenic stabilizers in the test samples (2,51). Binding of PCE in vivo to unpurified DNA from several organs was noted in one study, although no covalent binding to purified hepatic DNA could be demonstrated in another. In the other available in vivo studies, it is not known whether the test compound (or its metabolites) reached the target tissues. This observation reduces the value of the negative results observed. Nevertheless, an in vivo study, in which male mice were administered PCE intraperitoneally, assessed the induction of micronuclei in hepatocytes and reticulocytes and showed that PCE might have a clastogenic effect in hepatocytes (97). For the metabolites of PCE that are formed by conjugation with glutathione (a minor biotransformation route demonstrated in rodents), positive results were obtained in in vitro studies in *S. typhimurium* TA 100 (reverse mutation), with metabolic activation with kidney microsomes, in the presence of glutathione and glutathione transferase (96).

Interactions with other chemicals

Results of studies on the influence of ethanol on the metabolism and toxicity of PCE in liver did not show synergism (2,98). Increased urinary excretion of metabolites of PCE and enhanced hepatotoxicity have been observed in rats following pretreatment with polychlorinated biphenyls (2). Simulation of interaction thresholds for human exposure to mixtures of TCE, PCE and 1,1,1-trichloroethane was done with PBPK models. Model simulations indicated that during combined exposures, certain toxicological effects may be expected to occur at lower exposure levels compared with PCE exposure alone (73,99).

Effects on humans

Exposure to PCE can affect the CNS, eyes, kidney, liver, lungs, mucous membranes and skin. CNS effects have been most frequently noted (44).

The odour threshold in air for detection of PCE is 8 mg/m^3. The odour threshold in air for recognition of PCE is 3–4 times higher (16).

Acute poisoning incidents

Acute exposure to PCE at air levels of 100–200 ppm can cause irritation of the skin, eyes and upper respiratory tract. Non-cardiogenic pulmonary oedema, nausea, vomiting and diarrhoea can occur. CNS effects have also been observed with acute inhalation exposure to PCE at 50–300 ppm. At these levels, neuromotor effects may be seen and results of certain coordination and behavioural tests may be abnormal. At higher air concentrations, loss of consciousness can occur (44).

Several acute PCE intoxications have been reported. In one case, up to 16 mg was ingested by a 6-year-old boy weighing 22 kg. He was admitted to hospital one hour after ingestion, where his condition deteriorated from somnolence to coma. The initial blood level was 21.5 µg/ml. He recovered completely without liver, renal or CNS injury and was discharged on day 9 (100). In another report, a 32-year-old man became semi-comatose and experienced oliguric acute renal failure after accidental ingestion of 75 g PCE. A renal biopsy performed on the 19th day after ingestion showed severe acute tubular necrosis. He regained normal renal function after five haemodialyses and conservative treatment. The amount of PCE in the blood and urine were not measured (101).

Three fatalities due to inhalation of PCE have been reported in the literature. A concentration of 4.5 mg/l was measured in the blood of a man aged 53 years weighing 70 kg, who died while he was cleaning and recycling PCE by distillation (102). A two-year-old boy died due to PCE that had been retained in the curtains of his bedroom. A concentration of 66 mg/l blood was measured (103,104). Finally, a 33-year-old man clearing a line in a dry cleaning establishment died with a blood concentration of 44 mg/l (105). A fatality due to poisoning by both PCE and TCE has been described, a 45-year-old woman being discovered unconscious and in cardiac arrest in a laundry area. Examination revealed that she was deeply comatose and had acute respiratory distress syndrome and severe metabolic acidosis. Cardiovascular instability and acute renal failure occurred and eventually the patient died; the results of the autopsy are described in the paper. The blood levels of PCE 2, 4, 5, 6 and 7 days after hospital admission were respectively 1319, 758, 787, 436 and 656 µg/l (106).

Effects on the CNS

Depending on the concentration, acute exposure can result in loss of coordination, reversible mood and behavioural changes, or potentially anaesthetic effects. People chronically exposed to PCE may experience ataxia, disorientation, irritability, peripheral neuropathy, short-term memory deficits and sleep disturbance. Reversibility depends on the degree of severity of the exposure and associated effects (44).

PCE has been associated with neurobehavioural dysfunction, including reduced attention in humans. In a series of controlled short-term studies in limited numbers of human volunteers, neurological symptoms (including dizziness, drowsiness and decreased

functioning in motor coordination tests) and visual system dysfunction were observed at ≥ 678 mg/m^3 (≥ 100 ppm) and 339 mg/m^3 (50 ppm), respectively (2,16,107,108). Limited information on neurological effects following long-term exposure was obtained in occupational studies in dry cleaning workers. In a cross-sectional study with two groups of exposed workers (exposure concentrations 83 ± 53 mg/m^3 and 364 ± 114 mg/m^3, duration of exposure 127 or 141 days), small effects on scores in psychological tests were found. However, the response did not correlate with the exposure level in this study (2,6,109).

In another study in female dry cleaning workers with exposures of 6.8–408 mg/m^3 (4-hour averages, median 102 mg/m^3) and PCE concentrations in the blood of 12–864 mg/l (median 145 mg/l), performance test scores in a test battery for neuromotor functions were decreased. Neither duration of exposure nor blood concentration of PCE was significantly correlated with performance (110). In cross-sectional studies in dry cleaning workers, effects on blue–yellow colour vision were found at mean PCE concentrations of 42–102 mg/m^3(111,112). In Italy, PCE-induced impairment of colour vision was studied in 33 dry cleaning workers. Exposure was evaluated with passive samplers and colour vision was assessed. Two years later, the workers were re-examined. The exposure to PCE had increased in subgroup A (median 1.7 ppm vs 4.3 ppm). In subgroup B, exposure was reduced (median 2.9 ppm vs 0.7 ppm). Colour vision worsened in subgroup A but no vision changes were noticed in subgroup B, indicating that an increase in exposure during a 2-year period can cause colour vision to deteriorate (113).

A case report described a 57-year-old woman exposed to supposedly high concentrations of PCE while working at a dry cleaning shop, who suffered from blindness for 9 days in the left eye and 11 days in the right eye with optic neuritis. Blood concentrations of PCE 48 and 80 hours after onset of the optic neuritis were respectively 1.08 mg/g and 0.65 mg/g (114).

In a prospective population-based cohort study on 88 829 children, offspring from dry cleaners (144 children) were followed from birth to age 21–33 years. Preliminary findings suggested an increased incidence of schizophrenia (4 cases) in these children (115). However, it should be mentioned that there was no exposure characterization, there were few cases and few details were provided. These findings need to be corroborated in follow-up studies.

Research from 2002 suggests that chronic, environmental exposure to airborne PCE adversely affects neurobehavioural function in healthy individuals. A significantly lower visual contrast sensitivity was reported in apartment residents exposed to PCE (daytime mean 620 μg/m^3, nighttime mean < 100 μg/m^3) compared to unexposed controls. The

reliability of these data was later discussed in the literature. Methodological limitations preclude a definitive attribution of causation, and further research is necessary to draw reliable conclusions (99,116).

Effects on the liver

Case reports of human exposure to PCE show that it can cause hepatotoxic effects in humans, which include abnormal liver function tests (48), cirrhosis, hepatitis, hepatomegaly and liver cell necrosis (44). A dose–response relationship in humans for the effects on the liver is not completely known. In case studies of high accidental exposures, effects on the liver have been reported. In limited studies in dry cleaning workers exposed to a TWA concentration of 143 mg/m^3 (21 ppm) over a 6-year period, serum enzymes indicative of liver function were not affected (62,112). A study in dry cleaners frequently exposed to PCE concentrations of 16 ppm (8-hour TWA) revealed mild to moderate hepatic parenchymal changes as determined by hepatic ultrasonography (117).

Renal effects

Nephrotoxic effects have been described in humans (48,118,119). Symptoms of renal dysfunction, including proteinuria and haematuria, have been associated with accidental exposure to anaesthetic concentrations of PCE vapour (2). In several cross-sectional studies in dry cleaning workers, the effect of PCE on renal function was examined. Female workers exposed for an average of 14 years to an estimated TWA concentration of 68 mg/m^3 (10 ppm) had increased urinary levels of lysozyme and ß-glucuronidase suggestive of mild renal effects (120). No effects were observed in workers estimated to have been exposed to a TWA concentration of 142 mg/m^3 (21 ppm) for 6 years (62). In a cross-sectional study, about 20 markers of early nephrotoxic effects were measured in workers in dry cleaning facilities (n = 50). Exposure was determined by analysing air samples collected during 4-hour periods randomly selected over the working week. The median exposure concentration was 102 mg/m^3 (range, trace–580 mg/m^3). Compared to the control population, the exposed group had significantly higher frequencies of abnormal values for a number of the markers in urine, including albumin, transferrin, tissue-nonspecific alkaline phosphatase and brush-border antigens. The significance of the findings cannot be easily assessed but may represent an early stage of clinically silent but potentially progressive renal disease (118). At an average airborne exposure of 8.4 mg/m^3 (range 2.2–44.6), a PCE-related effect on the tubular reabsorption of retinol-binding protein in urine was observed in exposed workers from a dry cleaning shop (119).

Since there are sex- and species-dependent differences in bioactivation and detoxification pathways, more knowledge about the metabolism of PCE in several target organs and in different species is needed to improve human risk assessment (50).

Reproductive and developmental effects

A few epidemiological studies have reported reproductive or developmental abnormalities due to exposure to PCE in drinking-water. The 1998 Camp LeJeune study reported a weak association between PCE exposure due to contaminated drinking-water and birth weight outcomes for small-for-gestational age births. Stronger associations were observed between PCE exposure and birth weight for infants of mothers who were 35 years of age or older and for infants of mothers with a history of fetal death (121). Another study found oral cleft defects associated with PCE-contaminated drinking-water. The authors indicate that this study cannot resolve whether the drinking-water contaminants caused the adverse birth outcomes; these findings should therefore be followed up utilizing available drinking-water contamination databases (122).

In a comment on this paper, it is suggested that the oral cleft defects found are biologically plausible (123). According to these authors, a study of mothers with pregnancies affected by neural tube defects in Dublin (124) suggests a mechanism for the induction of neural tube defects related to a metabolic slowdown of the methionine synthase reaction. Recently, two cohort studies examined the effects of prenatal exposure to PCE-contaminated drinking-water on adverse birth outcome and risk of behavioural disorders. It was concluded that prenatal and early postnatal PCE exposure is not associated with disorders of attention, learning and behaviour (125). Further, it was suggested that prenatal PCE exposure does not have an adverse effect on birth weight or gestational duration (126).

The results of several studies have indicated that occupationally exposed women might suffer higher rates of spontaneous abortion (127–129). Exposure was classified by reported work history. A significant effect was found when the work tasks included dry cleaning for at least one hour daily or the women reported handling of PCE at least once a week (128,129). A significantly higher risk was found in operators compared to non-operators (127), but other studies have not found this association (130,131). Furthermore, a case-referent study performed within two cohorts did not give any substantial support to the hypothesis that exposure to PCE at work during pregnancy enhances the risk of adverse pregnancy outcome (132). A retrospective time-to-pregnancy study among Finnish women indicated a reduced ability to reproduce among 20 women exposed to PCE (concentration not clear) for 1–4 days a week or daily by inhalation. It should be noted that the studies have a number of limitations, primarily that exposure concentrations are not available (133).

The Camp Lejeune study of ATSDR (134) was not included in this guideline, since an error was made in the exposure classification; these data will be re-analysed by ATSDR at a later stage.

Mutagenic and carcinogenic effects

IARC concluded in 1995 that there is evidence for consistently positive associations between exposure to PCE and the risks for oesophageal and cervical cancer and non-Hodgkin's lymphoma. These associations appear unlikely to be due to chance, although confounding factors cannot be excluded and the total numbers in the cohort studies combined are relatively small. IARC therefore concluded that there is limited evidence for the carcinogenicity of PCE in humans (96).

PCE is reasonably anticipated to be a human carcinogen on the basis of limited evidence from studies in humans and sufficient evidence of carcinogenicity from studies in experimental animals. PCE has been studied by observing laundry and dry cleaning workers, who may also have been exposed to other solvents, especially TCE but also petroleum solvents. In several cohort and proportionate mortality studies, excesses have been reported of lymphosarcomas, leukaemias and cancers of the skin, colon, lung and urogenital tract. Some excess of lymphomas and of cancers of the larynx and urinary bladder was seen in a large cohort of dry cleaners. A familial cluster of chronic lymphocytic leukaemia has also been related to dry cleaning. Although these studies suggest a possible association between long-term occupational exposure to PCE and increased lymphatic malignancies and urogenital cancers, the evidence must be regarded as inconclusive because workers were exposed to petroleum solvents and other dry cleaning agents as well as PCE (135).

The results of a study in differently exposed dry cleaners and launderers indicated a reduction in oxidative DNA damage in exposed dry cleaners compared to launderers. The mean value for PCE in the blood of these dry cleaners was 0.078 mg/l, and the TWA was < 5 ppm in air for 17 out of 18 dry cleaners. However, PCE could not clearly be identified as the source of the effect (136). In two studies for genetic effects (sister chromatid exchanges and/or chromosome aberrations) in lymphocytes of occupationally exposed workers, no clear-cut effects were found (6). Another study showed modulation of the expression of some genes related to cancer induction in human cord blood cells (137).

A population-based case-control study was undertaken to investigate the association between breast cancer and PCE exposure from public drinking-water (drinking-water consumption as well as bathing habits were taken into account). The same author performed a more extensive case-control study a few years later. Both studies suggest that women with the highest PCE exposure levels have a slightly to moderately increased risk of breast cancer. Analyses of the same data using a newly constructed personally delivered dose model to make a more accurate estimation of the exposure did not significantly change the subjects' exposure classification (138–140). An association between PCE exposure from public drinking-water and lung cancer and possibly colorectal cancer was suggested, based on another population-based case-control study (141).

A paper from 2003 assessed (based on specified methodological and scientific quality criteria) 44 epidemiological papers that provided reasonable data on up to 17 cancer sites.

The authors concluded that no evidence for an association between breast, prostate, skin or brain cancer and exposure to PCE was demonstrated. A relationship between PCE and cancer of the oral cavity, liver, pancreas, cervix and lung was considered unlikely by the authors. Scientific evidence was considered inadequate for laryngeal, kidney, oesophageal and bladder cancers (142).

In 2006, the epidemiological literature since 1990 on occupational chlorinated solvent exposure was reviewed. The paper reviewed 28 studies of PCE, all but 5 of which focused on workers in the dry cleaning industry with few or no other chemical exposures. Within the study populations with multiple exposures, three studies found some increased risk of biliary and liver or brain cancer; in the other studies, no increased risk for renal cell carcinoma or for any cancer was found. Census records for those working as a “dry cleaner or laundry worker” or from a database of those being monitored for PCE exposure were linked to cancer registries (three studies) and statistically significant increased risks for liver and pancreatic cancer, Hodgkin's lymphoma and leukaemia were found. In general, findings in occupational cohort studies have not been consistent, even within the same industries (143).

Health risk evaluation

Critical health outcomes

The main health effects of concern are local irritation (eyes, mucous membranes, respiratory tract and skin), effects on the CNS and cancer. Effects on the liver and kidneys have also been reported.

CNS effects and local irritation

The evidence is sufficient to conclude that PCE can cause irritation of mucous membranes and the respiratory tract. These effects generally occur at high concentrations. Acute exposure to PCE at air levels of 680–1360 mg/m^3 (100–200 ppm) can cause irritation of the skin, eyes and upper respiratory tract in humans. Moreover non-cardiogenic pulmonary oedema, nausea, vomiting and diarrhoea can occur. CNS effects have been observed at high dose levels in rats and mice. In humans, CNS effects have also been observed with acute inhalation exposures of 340–2040 mg/m^3 (50–300 ppm) of PCE. The evidence is sufficient to conclude that there is an association between PCE and CNS effects at sufficiently high concentrations. Since high concentrations typically do not occur in indoor environments for a long period of time, these end-points are not taken into account when setting the guideline value.

Liver and kidney effects

The evidence of an association between PCE exposure and effects on the liver is

suggestive. Hepatic effects have been observed in rats and mice in subchronic studies. Case reports of accidental exposures of humans to PCE confirm that hepatotoxic effects can occur in humans, including abnormal liver function tests, cirrhosis, hepatitis, hepatomegaly and liver cell necrosis.

There is suggestive evidence of an association between PCE exposure and effects on the kidneys. In chronic studies, renal effects were observed at 1360 and 2710 mg/m^3 (200 and 400 ppm) in rats and at 680 and 1360 mg/m^3 (100 and 200 ppm) in mice. Reversible kidney damage in humans (e.g. proteinuria and haematuria) has been associated with accidental exposure to acutely toxic concentrations of PCE vapour. A long-term exposure study showed that renal effects may develop at lower concentrations, with the reported onset of renal damage occurring following exposure to a median concentration of 102 mg/m^3 (range, trace–576 mg/m^3).

Reproductive and developmental effects

A few epidemiological studies have reported developmental abnormalities due to PCE exposure in drinking-water (reduced birth weight and oral cleft defects). Other studies concluded that prenatal PCE exposure does not have an adverse effect on birth weight or gestational duration. Some studies have consistently indicated that occupationally exposed women might suffer higher rates of spontaneous abortion, while others found no association. All the above-mentioned studies have limitations, primarily that the exposure concentrations are not available. Therefore the evidence stays suggestive.

Cancer risk

IARC concluded that the results of the available animal bioassays provide sufficient evidence for carcinogenicity to animals. In these studies, an increased incidence of adenomas and carcinomas was observed in the livers of exposed mice. There is suggestive evidence from mechanistic studies that humans are likely to be less sensitive to the development of these tumours following PCE exposure. A low incidence of kidney tumours among male rats has been reported.

It can be concluded from this small and statistically non-significant increase, together with the data relating to the possible mechanism of induction, that the result in male rats is equivocal evidence only for a risk of renal cancer in humans.

The significance for humans of the increased incidence of mononuclear cell leukaemia, as observed in two studies in F344 rats, is unclear. This is due to the lack of understanding of the mechanism underlying the formation of this cancer type (which has a high background incidence) and the suggestion that it might be a rat-strain-specific effect.

IARC concluded in 1995 that there is evidence for consistently positive associations between exposure to PCE and the risks for oesophageal and cervical cancer and non-Hodgkin's lymphoma.

These associations appear unlikely to be due to chance, although confounding factors cannot be excluded and the total numbers in the cohort studies combined are relatively small.

A paper from 2003 assessed (based on specified methodological and scientific quality criteria) 44 epidemiological papers that provided reasonable data on up to 17 cancer sites. The authors concluded that no evidence for an association between breast, prostate, skin or brain cancer and exposure to PCE was demonstrated.

A relationship between PCE and cancer of the following sites was considered unlikely by the authors: oral cavity, liver, pancreas, cervix and lung. Scientific evidence was considered inadequate for laryngeal, kidney, oesophageal and bladder cancers. Since then, new studies have been published, but the evidence concerning the carcinogenicity of PCE is still not conclusive. The evidence for an association therefore remains suggestive.

From the weight of the evidence from mutagenicity studies, there are no indications that PCE is genotoxic. Although several in vitro studies indicate that conjugation of PCE with reduced glutathione (a minor biotransformation route demonstrated to occur in rodents) produces renal metabolites that are mutagenic in *S. typhimurium* TA 100, the significance of the latter results for humans is doubtful. In two studies investigating genetic effects (sister chromatid exchanges and/or chromosome aberrations) in lymphocytes of occupationally exposed workers, no clear-cut effects were found.

In conclusion, carcinogenicity is not used as an end-point, since there are no indications that PCE is genotoxic and there is some uncertainty about the epidemiological evidence as well as the relevance of the animal carcinogenicity data to humans. However, because of the remaining uncertainty about the carcinogenicity of PCE, it should be kept under review.

Health relevance of current indoor exposures

Inhalation of PCE is the major route of exposure in the general population. Ambient air concentrations of PCE are generally < 5 $\mu g/m^3$ in urban areas and typically < 1 $\mu g/m^3$ in rural areas. Indoor concentrations are generally well below 20 $\mu g/m^3$, with median concentrations ranging from 0.16 to 8.7 $\mu g/m^3$ in the described studies. These concentrations are an order of magnitude below concentrations that can be relevant for health.

Indoor PCE air levels may be up to 5.0 mg/m^3 (4–24-hour average) in buildings with dry cleaning operations where PCE is used. There is sufficient evidence to conclude that

concentrations in premises next to dry cleaning operations can exceed safe concentrations. This should be the focus of concern.

Conclusions of other reviews

IARC concluded that there is evidence for consistently positive associations between exposure to PCE and the risks for oesophageal and cervical cancer and non-Hodgkin's lymphoma. PCE is classified by IARC as a Group 2A carcinogen (probably carcinogenic to humans) (96).

The EU classified the substance as carcinogenic category 3 (substances that cause concern for humans owing to possible carcinogenic effects but in respect of which the available information is not adequate for making a satisfactory assessment) and risk phrase 40 (limited evidence of a carcinogenic effect) (144).

USEPA does not currently have a classification for the carcinogenicity of PCE but has calculated a provisional inhalation unit risk estimate of 5.8×10^{-7} $(\mu g/m^3)^{-1}$. A provisional value is one that has not received Agency-wide review (145).

The United Kingdom Committees on Toxicity, Mutagenicity and Carcinogenicity of Chemicals in Food, Consumer Products and the Environment concluded that there was "no satisfactory epidemiological evidence to associate PCE exposure to cancer in the available cohort studies" (146).

The US National Institute for Occupational Safety and Health considers PCE to be a potential occupational carcinogen (147).

ATSDR has derived both an acute inhalation minimal risk level (MRL) of 1.38 mg/m ^{3} (0.1 ppm) and a chronic inhalation MRL of 0.28 mg/m^3 ^{1} (0.04 ppm) (2).

Guidelines

Carcinogenicity is not selected as the end-point for setting the guideline value for three reasons: the epidemiological evidence is equivocal, the animal tumours detected are not considered relevant to humans, and there are no indications that PCE is genotoxic. The derivation of a guideline value is at present based on two non-neoplastic effects as the critical end-point: impaired neurobehavioural performance and early renal changes.

On the basis of a long-term LOAEL for kidney effects of 102 mg/m ^{3} in dry cleaning workers, a guideline value of 0.25 mg/m^3 has been calculated. In deriving this guideline value, the LOAEL is converted to continuous exposure (dividing by a factor of 4.2 (168/40)) and divided by an uncertainty factor of 100 (10 for use of a LOAEL and 10 for intra-species variation). Recognizing that some uncertainty in the LOAEL exists because the effects observed at this level are not clear-cut and because of fluctuations in exposure

levels, an alternative calculation was made based on the LOAEL in mice of 680 mg/m^3 and using an appropriate uncertainty factor of 1000. This calculation yields a guideline value of 0.68 mg/m^3.

A chronic inhalation MRL of 0.28 mg/m^3 (0.04 ppm) has been derived by ATSDR based on the LOAEL of 15 ppm identified in the Ferroni study (110). The MRL was calculated from this concentration by expanding to continuous exposure (8/24 hours, 5/7 days) and dividing by an uncertainty factor of 100 (10 for use of a LOAEL and 10 for human variability). This reference found significantly prolonged reaction times in workers occupationally exposed to an average of 15 ppm for about 10 years (2,110).

The value and appropriateness of establishing a short-term guideline value is questionable because acute effects occur only at very high concentrations of 50 ppm (340 mg/m^3) and higher, compared to generally observed levels in close proximity to dry cleaning facilities. Establishing a long-term value is more protective of human health.

On the basis of the overall health risk evaluation, the recommended guideline for year-long exposure is 0.25 mg/m^3. This is the same as the previous WHO guideline (148).

> The guidelines section was formulated and agreed by the working group meeting in November 2009.

Summary of main evidence and decision-making in guideline formulation

Critical outcome for guideline definition

Effects in the kidney indicative of early renal disease and impaired neurobehavioural performance. Carcinogenicity is not used as an end-point as there are no indications that PCE is genotoxic and there is uncertainty about the epidemiological evidence and the relevance to humans of the animal carcinogenicity data.

Source of exposure–effect evidence

–

Based on a health surveillance study of dry cleaning workers exposed to PCE, the long-term LOAEL for kidney effects was considered to be 102 mg/m^3. This was adjusted for continuous exposure by dividing by a factor of 168/40. Further, factors of 10 for use of a LOAEL and 10 for intra-species variation were incorporated, leading to a guideline value of 0.25 mg/m^3(62).

–

Based on a study of 30 female dry cleaning workers exposed to PCE for an average of 10 years (110), a LOAEL of 103 mg/m^3 (15 ppm) has been derived and a chronic-duration inhalation MRL of 0.28 mg/m^3 (0.04 ppm) calculated.

Supporting evidence

–

Several epidemiological studies on renal changes and exposure to PCE, including studies in dry cleaning facilities. The significance of these findings cannot be easily assessed, but may represent a relationship between long-term exposure and effects on the kidney in humans (48, 118,119, 120).

–

Associations between PCE exposure and neurobehavioural symptoms were suggested in two studies (108,109).

Results of other reviews

–

ATSDR derived a chronic inhalation MRL of 0.28 mg/m^3 (0.04 ppm) (44).

–

IARC: Group 2A (probably carcinogenic to humans) (96).

Guideline

0.25 mg/m^3 – annual average.

Comments

No change in the guideline as compared to *Air quality guidelines for Europe* (148).

Info on Prop 65

About Proposition 65

oehha.ca.gov/proposition-65/about-proposition-65

January 12, 2015

What is Proposition 65?

Proposition 65 requires businesses to provide warnings to Californians about significant exposures to chemicals that cause cancer, birth defects or other reproductive harm. These chemicals can be in the products that Californians purchase, in their homes or workplaces, or that are released into the environment. By requiring that this information be provided, Proposition 65 enables Californians to make informed decisions about their exposures to these chemicals.

Proposition 65 also prohibits California businesses from knowingly discharging significant amounts of listed chemicals into sources of drinking water.

Proposition 65 requires California to publish a list of chemicals known to cause cancer, birth defects or other reproductive harm. This list, which must be updated at least once a year, has grown to include approximately 900 chemicals since it was first published in 1987.

Proposition 65 became law in November 1986, when California voters approved it by a 63-37 percent margin. The official name of Proposition 65 is the Safe Drinking Water and Toxic Enforcement Act of 1986.

What types of chemicals are on the Proposition 65 list?

The list contains a wide range of naturally occurring and synthetic chemicals that include additives or ingredients in pesticides, common household products, food, drugs, dyes, or solvents. Listed chemicals may also be used in manufacturing and construction, or they may be byproducts of chemical processes, such as motor vehicle exhaust.

Learn how chemicals are added to the list.

What does a warning mean?

If a warning is placed on a product label or posted or distributed at a workplace, a business, or in rental housing, the business issuing the warning is aware or believes that it is exposing individuals to one or more listed chemicals.

By law, a warning must be given for listed chemicals unless the exposure is low enough to pose no significant risk of cancer or is significantly below levels observed to cause birth defects or other reproductive harm.

Learn about how businesses can comply with Proposition 65.

Who administers Proposition 65?

The Office of Environmental Health Hazard Assessment (OEHHA) administers the Proposition 65 program. OEHHA, which is part of the California Environmental Protection Agency (CalEPA), determines in many cases whether chemicals meet the scientific and legal requirements for placement on the Proposition 65 list, and administers regulations that govern warnings and other aspects of Proposition 65.

Learn what to expect at meetings of the Proposition 65 Committees.

Who enforces Proposition 65?

The California Attorney General's Office enforces Proposition 65. Any district attorney or city attorney (for cities whose population exceeds 750,000) may also enforce Proposition 65. In addition, any individual acting in the public interest may enforce Proposition 65 by filing a lawsuit against a business alleged to be in violation of this law.

Lawsuits have been filed by the Attorney General's Office, district attorneys, consumer advocacy groups, and private citizens and law firms.

What are the penalties for violating Proposition 65?

Penalties for violating Proposition 65 by failing to provide notices can be as high as $2,500 per violation per day.

Where can I get more information on Proposition 65?

Visit our Proposition 65 Warnings website.

1914 Flood

The Homestead Blog

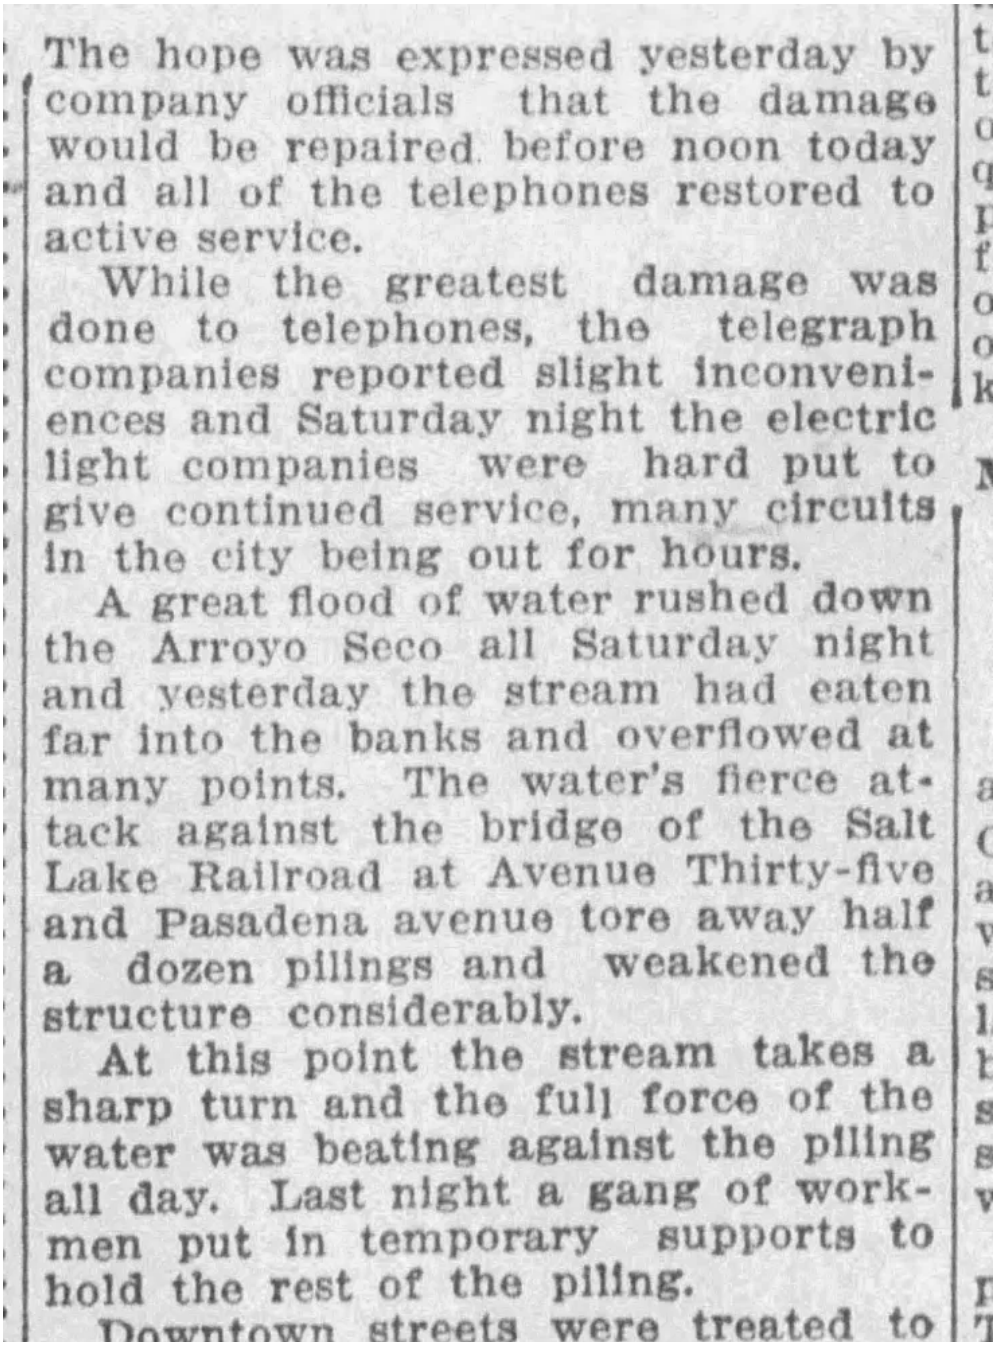
Creating advocates for history through the stories of greater Los Angeles.

Here Comes the Flood: The Deluge of January and February 1914

by Paul R. Spitzzeri

Today was the last of several days of heavy rain in a region parched for most of the last several years, including a bone-dry 2017-18 season of under five inches in downtown Los Angeles and coming after five straight years of under ten inches until the 2016-17 season of nearly twenty. Much of the officially recorded precipitation history, dating back to 1877, shows occasional wet years (2004-05 at 37 inches, 1997-98 at 31 inches, etc) with dry spells that often last three to five years (and, once in a while, more–such as in the late 1940s/early 1950s.)

This month has brought about five inches of rain locally on top of the four so far this season, so this is encouraging given the uncertainty about what our winter rainy season might portend. Of course, those areas that are fire-scarred from recent conflagrations have had to contend with potentially devastating mud slides, another fairly frequent winter problem.



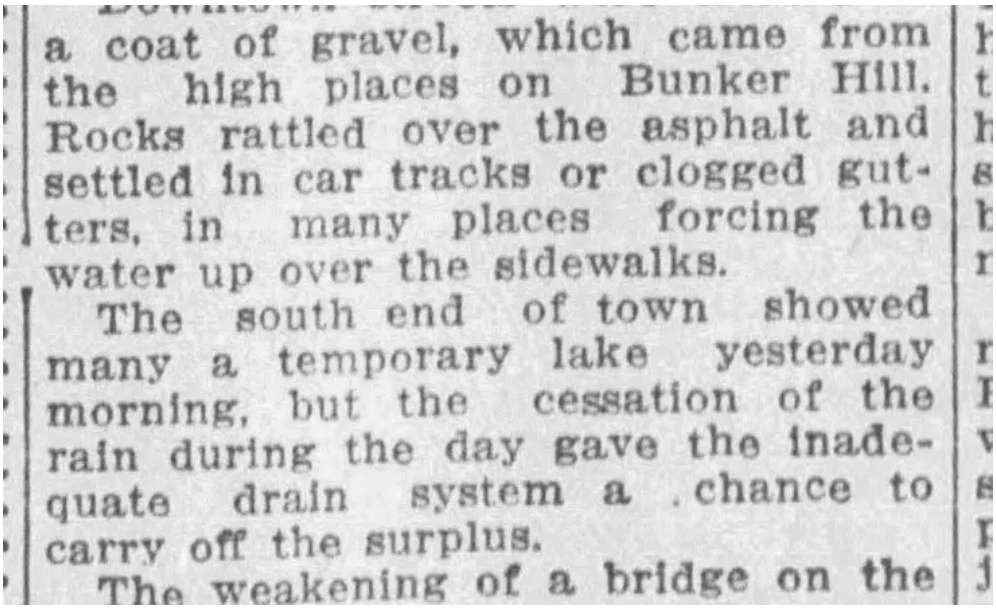
The hope was expressed yesterday by company officials that the damage would be repaired before noon today and all of the telephones restored to active service.

While the greatest damage was done to telephones, the telegraph companies reported slight inconveniences and Saturday night the electric light companies were hard put to give continued service, many circuits in the city being out for hours.

A great flood of water rushed down the Arroyo Seco all Saturday night and yesterday the stream had eaten far into the banks and overflowed at many points. The water's fierce attack against the bridge of the Salt Lake Railroad at Avenue Thirty-five and Pasadena avenue tore away half a dozen pilings and weakened the structure considerably.

At this point the stream takes a sharp turn and the full force of the water was beating against the piling all day. Last night a gang of workmen put in temporary supports to hold the rest of the piling.

Downtown streets were treated to



a coat of gravel, which came from the high places on Bunker Hill. Rocks rattled over the asphalt and settled in car tracks or clogged gutters, in many places forcing the water up over the sidewalks.

The south end of town showed many a temporary lake yesterday morning, but the cessation of the rain during the day gave the inadequate drain system a chance to carry off the surplus.

The weakening of a bridge on the

Los Angeles Times, *19 January 1914.*

Still, we can be at least thankful for the comprehensive flood control system we have to minimize the effects of heavy rain and flooding, when these conditions do occur. These improvements, mainly handled by the U.S. Army Corps of Engineers, can be traced back to early efforts by Los Angeles County to implement a flood control system after devastating floods in the winter of 1914.

That season totaled over 23 inches of rain, the most tallied in over twenty years, and most of this fell in storms that drenched greater Los Angeles in January and February. As heavy rainfall struck, much of the precipitation fell in our heavily granitic and steeply sloped San Gabriel Mountains, sending cascades of water down canyons and into rivers, creeks, and washes.

Times, *19 January 1914.*

Without channels to efficiently (some would say too much so, given the need to capture and store water these days) direct water to the Pacific Ocean, these watercourses overflowed their banks and/or their channels changed. Flooding caused the destruction of homes and other personal property, ravaged farms and ranches, and, in a few cases, led to the tragic loss of life.

In mid-January, a storm hit that also brought big, powerful waves pounding the coast, especially west-facing areas like Venice and Redondo Beach. At the former, a wooden boardwalk was partially destroyed, while, at the latter, 50,000 sandbags were used to shore up the area where a boardwalk and cottages lined the coast.

Times, *27 January 1914.*

Rainfall totals, meanwhile, ranged generally from 3 to 7 inches in most areas. The foothill areas at the base of the San Gabriels had most of the largest totals, including Glendora at 6.57 inches, Sierra Madre at 5.21 inches, and Pasadena at nearly 4 inches. It was Glendale, which sits at the bottom of the Verdugo range, that had the highest rainfall totals, at just below 7 inches.

In its reporting, the *Los Angeles Times* of 19 January, noted that:

> A great flood of water rushed down the Arroyo Seco all

> Saturday night [the 17th] and yesterday the stream had eaten far into the banks and overflowed at many points. The water's fierce attacks against the bridge of the Salt Lake Railroad at Avenue thirty-five and Pasadena avenue tore away half a dozen pilings and weakened the structure considerably.

A touched-up photograph showed the extent of the damage to the pilings at this bridge, which was not considered to be at "the danger point" and which was "to be repaired at once."

A little more than a week later, another powerful storm system slammed the region and the *Times* referred to it as a "storm king," adding that it was "one of the most severe storms in the history of Southern California . . . leaving in its wake complete saturation, demoralized traffic, demolished bridges, undermined houses and uprooted trees." Most of the property damage was said to be with roads and bridges, though at least three lives were known to have been lost.

Times, *27 January 1914.*

Elsewhere the paper stated that the Arroyo Seco, which means "dry creek" became "Arroyo Humedo," which translates into damp creek (perhaps *mojado*, or wet, would have been more accurate?):

> Streets ran rivers in the storm of Sunday and Sunday night and the traffic connections of this city and the entire Southland were materially impaired all day, yesterday, and will be necessarily curtailed even today and perhaps tomorrow.
>
> This side of Sycamore Grove [along the Arroyo Seco near Highland Park] the Salt Lake tracks were undermined and washed away for twenty feet or more. At one place rails and ties had entire disappeared below [sic] the

surface. At another place on the washout the force of the water was so great that it swept trees and bales of hay against the steel rails so violently that the rails were bent double.

Floodwaters from the Los Angeles and San Gabriel rivers were expected to silt up the inner portion of the Port of Los Angeles. It was estimated that just over 6 1/2 inches of rain was dropped on Pasadena during this latest deluge, pushing the seasonal total to about 20 inches. It was stated that "this was one of the heaviest storms Pasadena has ever had" and "about the most disastrous one that has been recorded here." An older bridge under the newly completed (and now landmark) Colorado Street Bridge was washed away and a dam nearby was also obliterated.

Times, *27 January 1914.*

In the eastern San Gabriel Valley and its connection with the Inland Empire, the *Times* published photos of flood damage in Covina, Irwindale, and San Dimas, showing mangled roads, washed out bridges, flooded orange groves, and damaged houses.

Reported deaths included young William Clark, only 12 years old, who was carried into the Los Angeles River at the bridge on Upper Main Street. In Villa Park in Orange County, Frank Rios was drowned, though no details on the incident were reported. Near the community of Old Mission, where the Temple family lived (and Walter P. Temple, Jr. seventy-five years later, told me he vividly remembered the flood and the washout of the bridge over the Rio Hondo just east of his family's home, though he was just turning five years old at the time), Felipe Rodriguez was with a group of men lassoing timber that was washed downstream in the San Gabriel River when he was yanked off the bridge and into the rushing torrent.

Times, *29 January 1914.*

The strangest death was of Hugh Haven, a retired executive of the famed Marshall Field department store in Chicago, and a resident of Monrovia. He left Los Angeles in a late evening streetcar, which was delayed by flooding and took about three hours to reach Monrovia. Haven and another man secured a taxi, but with streetlights out because of the storm, the car could not find the house, so Haven exited the vehicle and began walking.

It was believed he slipped while trying to get from the street to a sidewalk and the 55-year old was pulled by rushing water into a culvert. He tried to stop himself by grabbing wooden boards in the culvert and his hand was trapped "pinning him beneath the water." Haven's body was found there the next morning by a boy delivering milk with his employer.

Times, *27 January 1914.*

As strong as that storm system was, there was another massive one over three days towards the end of February that wreaked more havoc and devastation on the greater Los Angeles region. The Homestead's collection has about a dozen photographs taken during the winter 1914 floods, almost all from that February deluge.

Two of the most recent acquisitions are the ones highlighted here. One of these is taken along the San Pedro, Los Angeles and Salt Lake line bordering the Arroyo Seco and it dramatically shows the ten-foot swell in that creek, the twisted steel rails of the line along the

caved-in bank, a downed power pole, and groups of people gathered at the scene. At the top right to the south is the corner of Griffith Park. Captioning reads "Feb. 1914 / Flood along Arroyo Seco / Salt Lake R.R. near Sycamore Grove, Cal."

This snapshot from the Homestead's collection shows the twisted track of the San Pedro, Los Angeles and Salt Lake Railroad along the Arroyo Seco (Dry Creek) near Highland Park in February 1914, likely after the three-day deluge of the 20th through 22nd of that month. The view looks south towards Griffith Park, the northeast limit of which is at upper left.

The second photo is equally compelling and centers on a single-story wood-frame residence that slid down a destabilized bank and into a

watercourse, perhaps the Los Angeles River. In the foreground is a twisted pipe, likely a water pipe or maybe a gas line. A group of people stand near the house and, in the distance, is a steel bridge and part of a cement and construction company. In the same hand as with the other image, the caption here reads, "Los Angeles, Cal. / Destruction from flood. Feb. 1914."

These photos, along with others in the museum's holdings, are fascinating documents of the floods that, along with others that took place two years later, were the impetus for a concerted effort by local and then national officials to deal with the flood risks that were manifested during those occasional, but dangerous, heavy winter rains.

This dramatic image shows a home that slid down a washed-out bank of what might have been the Los Angeles River and was taken by the same photographer and at the same time as the above view.

Work moved slowly at first and then significant gains were made during the 1920s. Even during the Great Depression some improvements were made, though, in 1938, powerful deluges and severe flooding wreaked devastation in mountain canyons where resorts and cabins were destroyed (it was also the final blow for the Mt. Lowe Railway, as well), in foothill regions such as La Cañada-Flintridge and La Crescenta where much property and a number of lives were lost, and along rivers, including the *barrio* community of Atwood in present Placentia in Orange County, where the Santa Ana River overflowed, destroyed many homes, and killed quite a number of residents.

After World War II, with the local and national economies humming, flood control reached a pinnacle with channelization of rivers, creeks and washes, the construction of dams, and other measures enacted. These days, there is talk of reverting some of the watercourses to a more natural state, while still allowing for the mitigation of flood risk. Where flood control will take is in upcoming years will be interesting to see.

Fire Code

SECTION D104
COMMERCIAL AND INDUSTRIAL DEVELOPMENTS

D104.1 Buildings exceeding three stories or 30 feet in height. Buildings or facilities exceeding 30 feet (9144 mm) or three stories in height shall have at least two means of fire apparatus access for each structure.

D104.2 Buildings exceeding 62,000 square feet in area. Buildings or facilities having a gross building area of more than 62,000 square feet (5760 m^2) shall be provided with two separate and approved fire apparatus access roads.

> **Exception:** Projects having a gross building area of up to 124,000 square feet (11 520 m^2) that have a single approved fire apparatus access road when all buildings are equipped throughout with approved automatic sprinkler systems.

D104.3 Remoteness. Where two fire apparatus access roads are required, they shall be placed a distance apart equal to not less than one half of the length of the maximum overall diagonal dimension of the lot or area to be served, measured in a straight line between accesses.

Parking Survey

141/ 151 W Ave. 34 Proposed Project
Los Angeles, CA 90031

Prepared by Patricia Camacho, Concerned Neighbor and Property Owner

Parking Spaces = 211 Total

- W Ave. 34 = 33
- W Ave. 33 = 35
- E Ave. 33 = 28
- Pasadena Ave. (Ave. 35 and Ave. 33) = 61
- Pasadena Ave. (Ave. 31 to Ave. 33) = 27
- E Ave. 35 = 27
- Artesian St (one way, no sidewalk) = NO PARKING
- Artesian St (South of Ave. 33) = NO OVERNIGHT PARKING
- Humboldt St. = NO OVERNIGHT PARKING

-

Other Considerations

- Street Cleaning two times a week on every street listed
- Overnight parking limited in the area
- Pedestrian safety: no sidewalk on Artesian St (main access point for proposed project), no street lighting
- W Ave. 34 (main access street): difficult to make a left turn onto and off this street from Pasadena Ave. during heavy traffic
- Only 363 parking spaces will be allocated for 468 residential units
- Metro ridership continues to decline
- Other new developments in the area will also impact parking

Audit of Income-Restricted Housing

RON GALPERIN
CONTROLLER

January 23, 2017

Honorable Eric Garcetti, Mayor
Honorable Michael Feuer, City Attorney
Honorable Members of the Los Angeles City Council
All Angelenos

Re: Audit of Income-Restricted Affordable Housing Units in Los Angeles: *A Review of the City's Density Bonus Program and Overall Oversight*

How do we create more affordable housing[1] in Los Angeles? That is one of the most fundamental questions our City faces as it seeks to achieve a lofty goal of having 100,000 new units built by 2021, of which 15,000 would, hopefully, be deemed affordable.

The City has a number of policies and programs that aim to help the City achieve its goal -- among them our density bonus program[2], which is a tool used to incentivize developers to include very low, low, and moderate income housing units in their new developments. The program offers density bonuses and other incentives, such as reduced parking requirements, in exchange for a certain percentage of on-site affordable housing. Landlords utilizing the program enter into covenants recorded against title to the property that restrict the rent on the units for 55 years.[3]

But, just how effective has the density bonus program overseen by the City's Housing and Community Investment Dept. (HCID) been in achieving the construction of new income-restricted affordable units -- particularly in buildings with primarily market rate housing? How many income-restricted units were created through the program in affordable housing projects? And, how effective has the City been in monitoring and overseeing income-restricted units generally across the City?

To answer these questions, my office is today releasing an audit entitled: Income-Restricted Affordable Housing Units in Los Angeles: *A Review of the City's Density Bonus Program and Overall Oversight.*

---

[1] *For purpose of the report, and this letter, affordable housing refers to income restricted units monitored only by HCID, and excludes HACLA-overseen projects and units.*

[2] *State Law has permitted density bonuses since 1979, and since the passage of Senate Bill 1818 in 2004, CA has mandated cities offer them. Los Angeles adopted a density bonus ordinance in 2008.*

[3] *The time period for rent restriction of density bonus units was changed from 30 years to 55 years pursuant to AB 2222, signed by Governor Brown on September 2014.*

Density Bonus Law Has Not Lived Up to Its Potential

We found that 21 percent of new multi-family projects, of five units or more, built between 2008 and 2014 (169 of 790 projects) utilized some aspect of the density bonus program -- resulting in 4,463 units designated as affordable. However, just 329 of these units were created in market-rate projects throughout the City -- an arguably minimal impact when considering our overall affordable housing needs. While the Dept. of City Planning and HCID have reported higher numbers, we sought to zero in on actually completed projects and on actual units that can be attributed to the density bonus program. The data highlights the modest impact the density bonus program had on creating affordable housing in market rate projects. The results suggests that incentives may not be of enough value for market rate developers and that the cumbersome process serves as a further disincentive.

The City's Monitoring Program

Our audit also examined oversight and monitoring[4] of City's overall stock of 28,482 income-restricted units overseen by HCID. This includes density bonus units, Section 8 units, Community Redevelopment Agency project units, and other income-restricted units. The Controller's Office has mapped the locations of all such units, and can be found at www.lacontroller.org/geopanel_la. While we found reasonably adequate monitoring and a 93 percent compliance rate, better oversight tools are needed to deal with conditions we found of some owners collecting more rent than allowed and some tenants exceeding income guidelines.

Based on a thorough analysis of information available for 2014, we found the following:

- For 1,482 units (5.2%) -- landlords charged higher rents to tenants than allowable under covenants to which landlords agreed. When such circumstances are identified, HCID's contractor is charged with sending letters to owners demanding remediation.
- For 464 units (1.6%) -- tenant earnings exceeded program guidelines. In more than two-thirds of such instances, tenants reported incomes that exceeded limits by at least $5,000 per year and, in one case, by $149,000.
- For 1,056 units (3.7%) -- no one verified tenant incomes when tenants moved in.
- For 1,181 tenants, no income was reported at all.

Recommendations

To achieve better results, our auditors recommend that the City should:

- Set a target for how many affordable density bonus units it seeks to achieve in the coming years;
- Consider revising the density bonus ordinance to review the percentage set-asides and the "on-menu" and "off-menu" incentives;
- HCID should work with its contractor to better report on compliance status for each unit monitored, and better institutionalize and document policies and procedures.
- Request a legal opinion for options the City has in developing policies to transition over-income tenants out of income-restricted units.

[4] *HCID contracts with Urban Futures Inc. to conduct monitoring.*

Furthermore, I encourage the Dept. of City Planning and policy makers to explore:

- Create additional incentives that could be offered through the density bonus program. This might include additional density or permitting micro units;
- Streamline processes to enhance the experience and attractiveness of the density bonus program. This might include modifications to the current process of site plan review and expedited processing of Environmental Impact Reports;
- Conduct a legal analysis of what opportunities might exist, within the density bonus program, to allow market-rate developers to create income-restricted units off-site -- or to pay equivalent values into a fund which would build income-restricted units throughout Los Angeles.
- Review how Area Median Income (AMI) levels are defined for the purpose of the density bonus program.[5] Holding income levels to a more stringent standard than prescribed in State law is arguably preventing the City from optimizing the number of affordable units built in new developments. If the optional higher rent levels were permitted, we may be able to incentivize more developers to provide the nearly double amount of low-income units; and
- Expedite updates to the City's density bonus program pursuant to changes to California law that took effect Jan. 1, 2017. On September 28, 2016, Governor Brown signed AB 2501, AB 2556, AB 2442, and AB 1934 which amended the State Density Bonus Law. The Dept. of City Planning reports it is currently updating the City Ordinance to reflect the changes in the law. In addition, ordinance amendments will need to acknowledge AB 2280 (2008).

In Summary

The City's Density Program is not living up to its potential -- but with modifications thereto, along with enhanced oversight by the City of income-restricted affordable housing units, we can -- and must -- improve the availability of housing for all Angelenos.

Respectfully submitted,

Ron Galperin
CITY CONTROLLER

---

[5] *The State's Health & Safety Code allows to cities to designate a unit as income when it is to be restricted to tenants with incomes of 30% to 60% of AMI - or "at a level not to exceed 30% of gross income of the household", which permits a higher allowable rent level when incomes are between 60% and 80% AMI. The City of Los Angeles, however, currently takes allows a unit to count as income-restricted only if the unit is set aside for tenants with incomes of 30% to 60% of AMI. The net result of this policy is that almost every market rate density bonus developer chooses to provide very-low income units, which only require approximately HALF the amount of restricted affordable housing units to be provided.*

SUMMARY

THE ROLE OF DENSITY BONUSES IN CREATING AFFORDABLE HOUSING

Los Angeles needs more housing – both in the form of market rate units, and affordable units available exclusively to individuals and families with low incomes. Without additional units, housing costs will continue to soar, hurting other sectors of the economy and exacerbating problems such as homelessness.

One tool intended to create more housing is the City's Density Bonus program, whereby

(a) private developers can add up to 35% more units to their projects than zoning would ordinarily allow, and/or be granted relief from other zoning restrictions. In exchange, the developers agree to set-aside 5% to 30% of the total units as affordable for various levels of low and moderate income tenants;[1]

(b) affordable housing developers can also participate.[2]

State law has permitted Density Bonuses since 1979, and since the passage of Senate Bill 1818 in 2004, California has mandated that cities offer them. Los Angeles adopted a Density Bonus ordinance in 2008.

This audit focused on two main questions:

- How much additional affordable housing has the Density Bonus program actually created since 2008?

- Did the City adequately ensure that the affordable housing created through Density Bonuses and other subsidized programs stayed affordable?

Based on a review of land use covenants, from 2008 to 2014, we found that the Density Bonus program resulted in only 329 *additional* affordable housing units built in market rate developments within the City. While affordable housing developments took advantage of the Density Bonus program incentives, the land use covenants were not explicit as to how many additional

[1] The audit report refers to these as "market-rate developments/projects" built by private developers without government assistance.
[2] The audit report refers to these as "affordable housing developments/projects" that received government subsidies or financing assistance.

units were built. As a result, we were able to identify only 97 *additional* units, and while more may have been built, the data could not corroborate this.

We also found that City efforts are inadequate to ensure that affordable housing is occupied only by eligible low-income persons and that those persons are not overcharged.

The Density Bonus program should help add housing for low-income individuals and families as well as help add more market rate units. But how successful is this program?

THE MEASURABLE IMPACT ON AFFORDABLE HOUSING

In 2015, the City's Housing and Community Investment Department (HCID) HCID reported to the City Council that 4,668 affordable housing units were built in 201 projects that had participated in the Density Bonus program since 2008. However, this number included several duplicate projects, and one project that was terminated. Eliminating the duplicate and terminated projects results in 169 projects and 4,463 units. This number represented the units set aside as affordable in market rate developments as well as ALL of the income-restricted units in affordable housing projects that took advantage of any aspect of the Density Bonus program, including reduced requirements for parking spaces. It should be noted that HCID was not required to calculate and report the number of incremental[3] affordable units that were created because of the Density Bonus program.

Accordingly, we sought to determine how many additional affordable units were built only due to the Density Bonus program. This required us to review the land use covenants that HCID prepared for each of the projects. While approximately 21% of all eligible multi-family projects that were completed and available for occupancy from 2008 through 2014 took advantage of some aspect of the Density Bonus program, we determined that the program led to the creation of 329 additional affordable units within market rate projects and at least 97 additional units within affordable housing projects. We noted that private market rate developers took advantage of the program more often than affordable housing developers, building 54% (91 of the 169) of the projects.

[3] Incremental unit refers to the *additional* unit(s), i.e., above the number specified by the zoning code for a particular multi-family housing project, that were created as a result of the City's density bonus incentive.

In launching the City's Density Bonus program, policymakers did not set goals for how to measure success. To set such goals, policymakers would have to weigh the relative benefits of easing some restrictions imposed on developers, the benefit of providing additional income-restricted affordable units, and the quality of life and community concerns related to greater density.

If the City determines that the Density Bonus program should be a more significant component to addressing its affordable housing needs, options to encourage more developers will need to be explored. It is difficult to assess what incentives might need to be offered or changed to entice more developers to take advantage of the program. For example, we surveyed developers who previously participated in the Density Bonus program. While 16 of the 19 developers who responded indicated they would participate in the Density Bonus program again, one stated that the total number of bonus units was not sufficient; four said the process added too much time to their project timeline.

According to the Regional Housing Needs Assessment, the City will need 82,002 units of all sorts to meet housing demands by 2021, and 46,590 of those should be deemed affordable.

IMPROVEMENTS NEEDED IN MONITORING AND ENFORCEMENT

Land use covenants are intended to ensure that the affordable units remain affordable. They are recorded along with the property's title for a set period of time (typically 30 years per SB 1818, or 55 years per that law's 2014 revision).

In an attempt to ensure that the units stay affordable, HCID contracts with a monitor to check on tenant income and the rent charged after the units are occupied. HCID contracts for monitoring of all units within the City's affordable housing inventory.

In examining whether or not the affordable units built through the Density Bonus program in fact remained affordable, we assessed whether the City adequately monitored ALL of its affordable housing stock, so that these units remain occupied by eligible low and moderate income tenants.

The City's income-restricted affordable housing stock includes approximately 28,000 units including:

- Units within projects that received government funds through the City, such as long-term loans from the City's Affordable Housing Trust Fund and/or Federal and State housing funds;
- Units within projects that received funds from the former Community Redevelopment Agency; and
- Units created through City Land Use Concessions such as the Density Bonus, when there was no exchange of funds but the developer was relieved of some land use or zoning requirements.

The City monitors all of these affordable units through a private company under contract, and those efforts are more extensive than any other city we benchmarked. All tenants are required to report their income to their landlords, who then report that income to the City's contractor, along with the amount of rent they charged each tenant.

While it would be tedious and costly to gather this information through other means, the 2014 monitoring data raises several concerns regarding:

- **Landlords Who Charged Too Much** – In 1,482 units – or 5.2% of the affordable housing stock monitored by the City, landlords charged tenants more rent than allowed under affordable housing program rules.

- **Tenants Who Earned Too Much** -- In 464 units, which represents 1.6% of the City's affordable housing stock, tenants exceeded the income requirements for affordable housing. In some cases, the excess was small, but in more than two-thirds of the cases, tenants reported exceeding the income limits by more than $5,000. In one case, a household earned $149,000 more than the income limit.

- **Tenants Without Reported Earnings** -- For approximately 1,200 tenants, no income amount was reported. We question if all of these tenants actually earned nothing from work wages, personal businesses, unemployment/disability benefits, social security, retirement accounts, dividends or other investments.

We also found that HCID failed to verify tenant income in 1,056 units – or 3.7% of all affordable units – before the tenants moved in. While these tenants may have still qualified, HCID is supposed to ensure that landlords only rent affordable units to tenants who meet the income requirements.

Also, in 18% (5,221) of the restricted units, landlords accepted Housing Choice Vouchers (Tenant-Based Section 8 Rental Assistance) though they received other government subsidies for their housing project. While it is legal

to layer these programs, the housing vouchers are designed to help tenants occupy market rate units. When tenants with vouchers occupy restricted units, it reduces the number of affordable units that could be available to other families who do not have vouchers but still need assistance.

Cumulatively these numbers negatively impact the number of affordable housing units available to the City's low-income residents. Furthermore, while the City can compel landlords to return rent they overcharged, the City has no way to transition tenants out of affordable housing if they exceed income requirements. Given how pressing the need for housing is, more can be done to ensure that the City's restricted affordable housing stays truly affordable, and units are available to those in need.

RECOMMENDATIONS

If Policymakers determine that Density Bonus units should be a significant component of the City's affordable housing strategy, to improve the program, with an eye toward increasing the number of additional units built, we recommend:

- Exploring how to get more developers to build affordable units through the Density Bonus program, such as by possibly increasing incentives.

To improve transparency of the Density Bonus program results, we recommend:

- Better tracking of the number of market rate and affordable units that developers build.
- Simplifying/standardizing covenants and making them available online for easy public access.

To improve enforcement for all affordable housing and to make sure units go to those in need, we recommend:

- Developing policies to gradually transition over-income tenants out of affordable housing.
- Ensuring that all tenant income is properly verified.

- That Council consider restricting the use of Housing Choice Vouchers to privately-owned units.

REVIEW OF THE REPORT

On June 21, 2016 we provided a draft of this report to HCID, Department of Building and Safety (DBS) and Department of City Planning (DCP) management. We met with HCID representatives at an exit conference held on July 6, 2016 and received written comments from DBS and DCP management. We considered the comments and clarifying information provided as we finalized the report.

DEPARTMENTS' RESPONSE AND ACTION PLAN

The Housing and Community Investment Department, Department of City Planning and the Department of Building and Safety all provided a formal response and Action Plan (See Appendix X). Below is our assessment and comments pertaining to each Department.

Housing and Community Investment Department

The Department agreed with ten of the thirteen recommendations directed to the Housing and Community Investment Department, and we now consider three Recommendations (2.2, 2.3 and 6.1) as Implemented, and seven Recommendations (1.3, 1.5, 1.6, 2.1, 3.1, 3.4, and 3.6) as Partially Implemented.

HCID disagreed with three recommendations (3.2, 3.3, and 3.5) related to income thresholds and Housing Choice Vouchers.

Income Thresholds and Transitional Policies

To ensure the City's affordable housing stock is occupied by those who are in most need, Recommendations 3.2 and 3.3 urged HCID to develop a removal policy for tenants who surpass an over-income threshold, as well as a timeline for tenants to transition out of the restricted unit when they exceed the income limit. HCID expressed concern that such removal policies would create displacement in the City's tight housing market. The Department also indicated that could result in tenants' under-reporting income or disincentivizing tenants to increase their incomes in the future. The Department proposed as an alternative to work with the City Attorney to draft a policy to increase the rent paid by tenants that exceed income limits.

The intention of the original recommendation was to ensure that existing restricted units remain occupied by genuinely low-income, eligible tenants. By allowing tenants whose incomes exceed original program guidelines to remain in restricted units indefinitely and without a transition plan, those restricted units will not be available for those in greater need.

Housing Choice Vouchers

HCID also disagreed with Recommendation 3.5, to consider restricting the use of Housing Choice Vouchers (HCVs) to privately owned units. The Department indicated that it considers HCVs a source of income for tenants, and it does not want to limit access to a restricted unit based on their source of income. The Department also indicated that prohibiting the use of HCVs in City financed units would increase the existing hardship for voucher holders to find landlords who accept HCVs, due to the high rents and low vacancy rates in the City. The Department noted that the exclusion of Section 8 tenants contradicts guidelines of the HOME Investment Partnerships Program, which is leveraged with the City's Affordable Housing Trust Fund.

While we acknowledge these issues, the audit demonstrates the impact of the current policy, which results in fewer affordable housing options for eligible Los Angeles residents. If an individual with HVC rental assistance occupied an apartment outside of HCID's inventory (e.g. a privately-owned unit), two low-income households could be served. The intention of implementing the recommendation was to increase the number of units in the City available to eligible low-income residents. We urge the Department to reconsider this policy should the City's housing market become less tight in the future.

Department of Building and Safety

Management agreed with the four recommendations addressed to the Department of Building and Safety. Based on their response, we now consider all four (1.3, 1.4, 1.6 and 3.4) as Partially Implemented. The Department indicated that it is collaborating with HCID and DCP to develop or improve their information systems, which will increase the efficiency of tracking and subsequent reporting of milestones related to units created through the Density Bonus program. The Department also indicated that it plans to work with HCID to develop an automated process to ensure HCID's Occupancy Monitoring unit is immediately notified when a Certificate of Occupancy is issued for a housing project with restricted units. This will help ensure HCID's Occupancy Monitoring Unit can certify tenants' income *before* they move into the unit.

Department of City Planning

Management agreed with the three recommendations addressed to the Department of City Planning. Based on their response, we now consider all three (1.3, 1.6, and 4.1) as Partially Implemented. DCP also indicated a commitment to collaborate with HCID and DBS to improve the tracking and reporting of units created through the Density Bonus program.

Background

Studies suggest that individual families and the community-at-large benefit from affordable housing. The stability of an affordable mortgage or rent can improve childhood development, school performance and health outcomes. Further, affordable housing increases spending and employment in the surrounding economy; this spending acts as an important source of revenue for local governments, and reduces the likelihood of foreclosure and its associated costs.

The City's blueprint for meeting housing and growth is the 2013-2021 Housing Element of the General Plan. It states that from 2000 to 2010, rents increased 31% in real terms, while incomes only increased 1.2%. In 2014 the average rent for a two-bedroom/two-bathroom apartment ranged from $2,400 to $2,600.[4]

According to the Regional Housing Needs Assessment[5] (RHNA) the City will need an additional 82,002 new units through 2021 to meet demand, and 46,590 of these units (57%) should be affordable. In April 2015, the Mayor released the "Sustainability City pLAn," which directs City Departments to minimize the loss of existing affordable housing units and includes a specific goal to build 100,000 *total* housing units by 2021. In October 2015, Mayor Garcetti announced a goal to build and preserve 15,000 *affordable* units by 2021.

To be part of the City's affordable housing inventory, a unit must be restricted by both income and rent guidelines. California's Department of Housing and Community Development (HCD) establish these guidelines each year. Income guidelines consider household income and size, while the rent guidelines consider household income and number of bedrooms. To occupy a restricted unit, residents must prove they do not exceed the applicable income level limits. Likewise, the owner cannot charge more rent than the unit's associated income level.

For Density Bonus projects, three[6] categories based on the Area Median Income (AMI) dictate the income and rent limits:

- Very Low (50% of AMI)
- Low (80% of AMI)
- Moderate (120% of AMI)

[4] Realfacts Database.
[5] The Regional Housing Needs Assessment (RHNA) is mandated by State Housing Law as part of the periodic process of updating local housing elements of the General Plan. It is completed by the Southern California Association of Governments (SCAG).
[6] Some programs consider a fourth income category, Extremely Low, which is 30% of AMI.

DENSITY BONUSES

One of the tools the City uses to increase affordable housing units is the Density Bonus program. Density Bonuses are a type of ***Land Use concession***, in which there is no exchange of funds, but rather developers are relieved of some land use requirements.

The Density Bonus program allows a developer to build more residential market-rate units (bonus units) than the Zoning Code allows, ***if*** the developer commits to set aside a certain number of restricted affordable units within the project. The percent of bonus units granted depends on the corresponding income-level[7] of the affordable housing units (very low-income, low-income, or moderate-income). Conversely, the number of restricted affordable units required depends on how many bonus market rate units the developer requests to build, or the number of incentives they wish to use.

For example, if the original project includes 10 base units, and the developer requests the 10% low-income Density Bonus option, they would be required to set aside one low-income unit, (10 x 10% = 1) and they would be allowed to build two bonus market-rate units (10 x 20% = 2). The additional units that are created because of the Density Bonus can be described as "incremental units."

Incremental Unit – refers to the *additional* unit(s), i.e., above the number specified by the zoning code for a particular multi-family housing project, that were created as a result of the City's density bonus incentive.

Exhibit 1: Density Bonus Calculation Example		
Project begins with **10** base units:		
Low Income		
Set-Aside Affordable Units	Bonus Market Rate Units	Total Units After DB
10 x 10% = 1	10 x 20% =2	12

The terms of each Density Bonus agreement are formalized through a covenant agreement. When a covenant is officially recorded with the County, the restricted units become part of the City's affordable housing inventory.

[7] See Appendix V for a table of the bonus unit and income level and bonus unit for the required set-aside percentages.

THE CITY'S DENSITY BONUS PROGRAM

State law and City ordinances dictate how the City can offer Density Bonuses to developers. In 2004, the California State Legislature passed Senate Bill Number 1818 (SB 1818), which stipulated that all local governments must grant developers the option of a Density Bonus. SB 1818 also dictated:

- The terms of affordability for restricted units must be at least 30[8] years, but can be longer if required by the financing/rental subsidy programs.
- The Density Bonus option must be offered to developers of projects with 5 or more units.
- The number of bonus units can vary depending on the number of restricted units included for very low income, low income or moderate income levels. However, the percentage of bonus units cannot exceed 35% of the total units originally proposed.
- Municipalities must offer developers at least one to three incentives. While a municipality has some discretion, they must include options related to parking reductions, yard setbacks, and open space.

EXHIBIT 2: DENSITY BONUS ILLUSTRATION

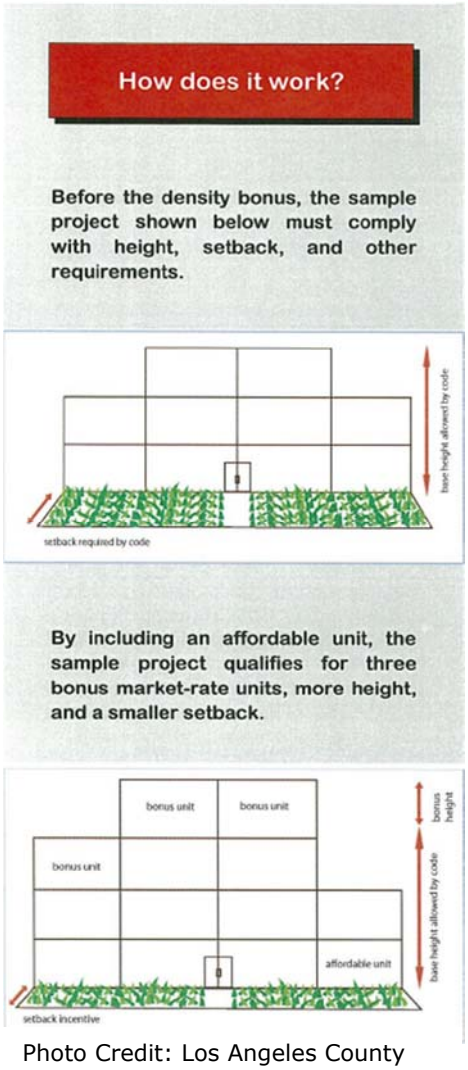

Photo Credit: Los Angeles County Department of Regional Planning

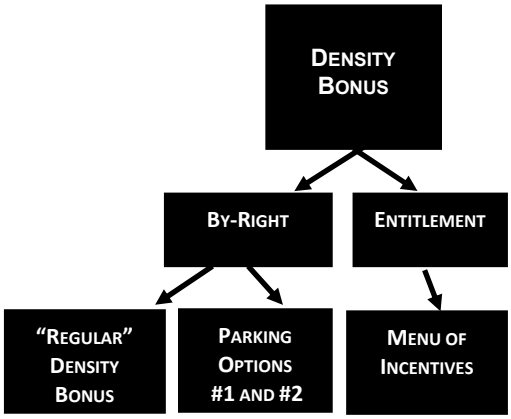
City Council approved the City's Density Bonus program[9] on April 15, 2008.

In the City, Density Bonuses usually fall under two categories, By-Right or Entitlement. These categories have different sub-programs and specific application and approval processes.

[8] AB 2222 revised the terms from 30 to 55 years, effective January 1, 2015.
[9] Ordinance No. 179681. Los Angeles Municipal Code Section 12.22

A. Density Bonus By-Right

Exhibit 3: Density Bonus Components



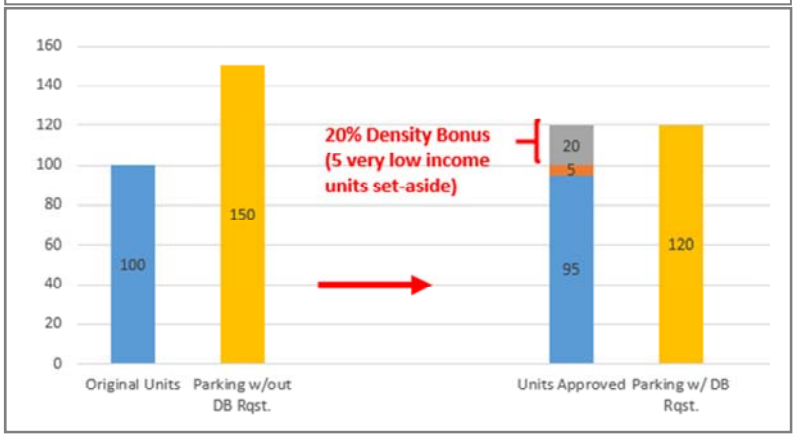
The By-Right Density Bonuses are also referred to as "ministerial", because they meet the Zoning Code and are *automatically* granted if the development is approved. Since the By-Right Density Bonuses do not require a request for relief from the Zoning Code, the developer does not submit an application to the Planning Department; rather, the developer is only required to submit the request to DBS during the building permit review process. Further, the City does not collect a fee for the By-Right Density Bonuses.

"Regular" By-Right Options

The City's Ordinance stipulates that a Density Bonus must be provided if developers agree to one of the following:

- Include requisite number of Low or Very Low Income Restricted Affordable Units
- Include Senior Citizen Housing
- Include Common Interest Development[10] with Low or Moderate Income Units, or with Low or Very Low Income units for rent
- Donate Land
- Include Child Care Facility
- Convert Multi-Unit Buildings to Condominiums

EXHIBIT 4: EXAMPLE OF DB WITH PARKING REDUCTION



By–Right Parking Reductions

A second component of the Density Bonus By-Right is the parking reduction option, in which the developer may reduce the number of parking spaces required by

[10] Common-interest developments or CIDs, include condominiums, retirement communities, vacation timeshares, and other housing developments comprised of individually owned units, in addition to shared facilities and common areas.

the Zoning Code. Since the parking reduction option is by-right, the bonus units and reduced parking are automatically approved, if they agree to set-aside affordable units.

Exhibit 4 illustrates how a Density Bonus with parking reduction works. In this example, if the developer agrees to set aside five units restricted for very low income residents, the development could include an additional 20 market rate units, ***and*** decrease the number of required parking spots by 30.

B. Entitlement Density Bonus (with Incentives)

In accordance with SB 1818, in addition to the By-Right Density Bonus options, the City offers a menu of additional Density Bonus incentives available to developers. Below is a summary[11] of the "menu" of the incentives, detailed in Ordinance No. 179681:

- up to 20% decrease from **yard/setback** requirements,
- up to 20% increase from **lot coverage** requirements;
- up to 20% decrease from **lot width** requirements;
- up to 35% increase from **floor area** ratio requirements;
- an increase in the **height** requirement equal to the percentage of the Density Bonus; and
- up to 20% decrease from **open space** requirements.

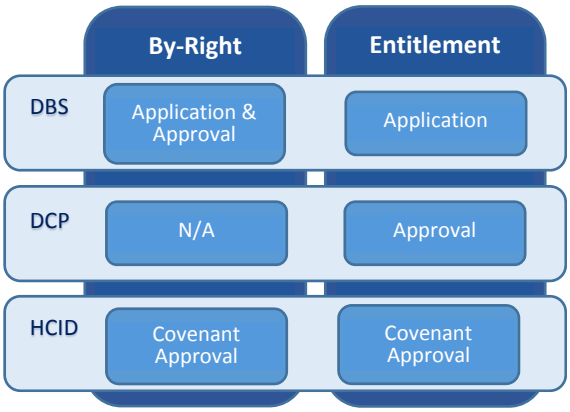
Developers may request one or more of the above incentives. Developers can also request additional incentives that are not on the list, which are considered "off-menu."

Unlike by-right Density Bonuses, developers must pay a fee to apply for these incentives. The fee depends on the type and number of incentives, and is based on the administrative costs incurred by Department of City Planning staff to review and process the application.

[11] See Appendix VI for a detailed listing of the incentives.

DENSITY BONUS APPLICATION AND APPROVAL

Several City Departments administer and oversee the Density Bonus program application and approval phases. The specific process is determined by whether a Density Bonus project is By-Right or Entitlement.



The Department of Building and Safety

A developer begins the application process with the Department of Building and Safety (DBS) by requesting a building permit.

- **By-Right**
  DBS will process requests for a by-right/parking reduction Density Bonus. For these projects, DBS staff will calculate and verify the number of units in a project; review all building plans; and approve the project. DBS staff also issue building permits so construction can begin and Certificates of Occupancy once construction is complete, prior to tenant move-in. The Certificate of Occupancy allows an owner to begin leasing/selling the units.

- **Entitlement**
  If a developer requests an entitlement Density Bonus, DBS staff refer the developer to the Department of City Planning (DCP) for all aspects of project review.

Department of City Planning
(Entitlement Density Bonus Reviews Only)

The Department of City Planning (DCP) only reviews Density Bonus applications when a developer requests entitlements in the form of incentives. During the entitlement review, DCP determines the number of restricted and bonus market rate units. The Density Bonus ordinance[12] directs staff to round-up to the next whole number of units.

According to DCP staff, most entitlement projects are large and complex. The review process of entitlement projects requires additional steps such as public

[12] LAMC Section 12.25 (c), (7) *Fractional Units*. In calculating Density Bonus and Restricted Affordable units, any number resulting in a fraction shall be rounded up to the next whole number.

hearings. These tend to lengthen the duration of the City's review and delay approval needed to initiate construction. DCP staff must also verify that the project plans comply with the City's General and Specific Plans, as well as conditions set in State law.

An assigned City Planner reviews a development case file to ensure it is accurate and complete. For entitlement Density Bonus projects the review typically includes:

- ✓ Ensuring the project complies with the Zoning Code;
- ✓ Calculating the number of bonus and restricted units;
- ✓ Conducting environmental review to comply with the California Environmental Quality Act (CEQA);
- ✓ Conducting public hearings (if required);
- ✓ Presenting recommendations to the Planning Commission; and
- ✓ Writing the final Letter of Determination, which details the outcome of the entitlement review.

According to the Department, staff does not conduct detailed pro forma analyses of off-menu incentives. DCP staff also indicated that the typical entitlement review process takes 1-2 months. While we did not audit the timeframe for the entitlement review, we did survey developers who participated in the Density Bonus program to understand their experience. We asked them if they had plans to participate in the Density Bonus program again in the future. While most of the developers who responded indicated that they would, 21% indicated that the process added too much time to their project timeline.

After DCP staff issues a Letter of Determination on entitlement projects, Public Counter staff conducts a detailed review of project plans to ensure conditions of approval and environmental mitigations have been incorporated into the project plans prior to DBS issuing a building permit.

The Director of City Planning or the City Planning Commission (CPC) authorizes the Entitlement Density Bonus projects.

- ➢ A project with one to three on-menu incentives is approved by the Director of the Department of City Planning.

- ➢ A project with more than three incentives, or incentives that are off-menu is reviewed by the CPC.

Housing and Community Investment Department

Staff at the Housing and Community Investment Department (HCID) are responsible for preparing the land use covenants which dictate the terms of the Density Bonus projects.

After HCID drafts the Covenant, the City Attorney reviews and approves it. The approved draft is sent to the owner for signature. HCID completes the approval, then sends the executed covenant to the LA County Recorder. The covenant and all its stipulations will remain on the property's title despite any change in ownership or foreclosure proceeding.

Upon project completion and covenant execution, DBS issues the Certificate of Occupancy, which initiates HCID's monitoring responsibilities.

DENSITY BONUS MONITORING

HCID monitors restricted units to ensure that tenants meet income requirements and owners comply with rent guidelines.

Urban Futures Bond Administrators (UFBA) – Occupancy Monitoring

HCID's Occupancy Monitoring Unit contracts with an outside provider, Urban Futures Bond Administrators (UFBA) to monitor all of the City's designated restricted units. The most recent contract for calendar year 2014, totaling $680,000, was awarded through a Request for Proposal (RFP) in 2013. The contract was amended in December 2014, to extend through calendar year 2015, and increased the amount by $710,000, for a total of $1,390,000. Funding for the contract is derived from the Municipal Housing Finance Fund (MHFF) and the Federal HOME Investment Partnerships Program (HOME) Fund.

Reported Density Bonus Units

In May 2014, a council motion (Council File 14-0692-S1) instructed HCID to prepare a report responding to questions related to the affordable units that were produced since the City implemented the Density Bonus ordinance. In April 2015, HCID reported that 201 Density Bonus properties with 4,668 affordable housing units had been constructed since 2008 pursuant to the City's Density Bonus Ordinance.

HCID also reported that 73% (3,400 of 4,668 units) were within affordable housing developments; while 27% (1,268 of 4,668 units) were within market rate developments, and the vast majority of the units were occupied by low-income families (e.g., in 2014 a family of four with income of $68,300, or less.)

Exhibit 5: HCID's Reported Restricted Units Created 2008 - 2014							
Number of SB 1818 Properties	Very Low Income		Low Income		Moderate Income		Total
201	899	19%	3,693	79%	76	2%	4,668

The report also indicated that most of the restricted affordable units were located in Council Districts 1, 9 and 13.

However, as described in Finding 1, HCID's reported number of projects and restricted units did not show the impact of the Density Bonus program on the City's affordable housing stock, in terms of *additional* units created.

Specifically, we found that HCID reported the total restricted affordable units within the developments that took advantage of the program, without distinguishing the number of added bonus units that were restricted as affordable. Our review of the covenants identified 169 SB 1818 properties that were constructed from 2008 thru 2014, which generated 329 additional affordable units within market rate projects and at least 97 additional units within affordable housing projects.

While the Density Bonus program requires the developer to set aside units for very low, low or moderate income tenants, generally, only the market rate developments incrementally added to the City's affordable housing stock. In contrast, with few exceptions, affordable housing developments seemingly continued with the same number of planned affordable units, but requested other incentives available through the program, such as parking reductions. In those cases, we could not determine if there was an *incremental* increase to the City's affordable housing stock resulting from the Density Bonus.

We also reviewed every covenant in detail to determine the number of projects built by private developers (i.e., without government assistance) compared to subsidized affordable housing projects that participated in the City's Density Bonus program.

- 54% (91 of 169) of the Density Bonus projects were built by private developers; while,
- 46% (78 of 169) of the Density Bonus projects were affordable housing projects that received other financial subsidies through the City or other government agencies.

Density Bonuses Have Evolved

Prior to the City's formal Density Bonus program, restricted units were approved through Land Use Entitlements, such as Conditional Use Permits or the Mello Act.

- ✓ The Department of City Planning issues **Conditional Use Permits** which allows the City to consider land use options that are otherwise not allowed within a Zone.

- ✓ The **Mello Act** dictates that if existing restricted housing units in California's Coastal Zone are converted or demolished, the low and moderate income designated units must be replaced. Further, if a new housing development is built, it must include restricted units.

Most recently, in September 2014, the California State Assembly approved Assembly Bill 2222 (AB 2222), which modified SB 1818, and requires developers applying for Density Bonus projects to adhere to the following:

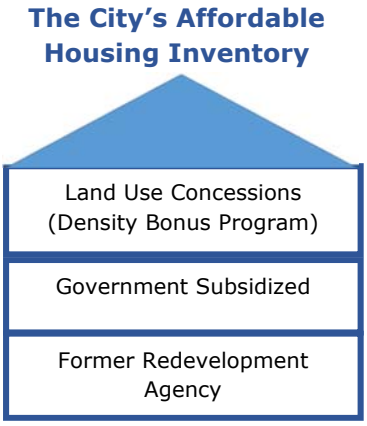
- The term of affordability must be 55 years or longer for all very low and low-income units (an increase from 30 years required by SB 1818); and

- For new or redevelopment of buildings with existing rent restricted units, owners must replace those units with the same number to be made available for, and occupied by, persons and families in the same or lower income category.

AB 2222 Implementation Concerns

The Department of City Planning and the Housing and Community Investment Department are considering a revised Density Bonus ordinance to incorporate AB 2222. However, there is controversy regarding the implementation of AB 2222 because of its requirement to replace existing, as well as any demolished, affordable housing units associated with the City's Rent

Stabilization Ordinance (RSO).[13] The RSO was designed to protect tenants from excessive rent increases while allowing landlords a reasonable return on their investments. Although subject to rent limits, RSO units are not income restricted and can be occupied by any household. Consequently, they differ from the City subsidized or Land Use Units that require an affordable housing covenant and are subject to monitoring activities.



Currently, developers may invoke the California Ellis Act provision to remove RSO regulations from a rental unit by demolishing it altogether, permanently removing it from the housing market, or keeping it vacant for 5 consecutive years. By demolishing and then rebuilding a new rental unit, a developer can circumvent the RSO. As such, there is concern that if the City implements an AB 2222 ordinance that requires developers to replace all existing/demolished RSO units, this would discourage developers from utilizing Density Bonuses. There are also questions about whether all RSO units should be maintained as affordable, since some RSO units are not below market rate. For example, if an RSO unit is vacated and re-rented every year when a rent increase is permitted, the Owner can maintain market-rate rent, thereby the unit is not part of the broad population of "affordable" housing.

THE CITY'S AFFORDABLE HOUSING INVENTORY

The Density Bonus program, and other Land Use Concessions are part of the City's larger effort to provide affordable housing. The City also offers affordable housing through Government Subsidized programs (which directly finance affordable housing units) and through units inherited from the former Community Redevelopment Agency (which used to help finance units in economically blighted zones.)

➢ GOVERNMENT SUBSIDIZED

The Housing and Community Investment Department of Los Angeles (HCID) helps to administer various types of funding including Community Development Block Grants (CDBG) and HOME Investment

[13] The Rent Stabilization Ordinance became effective May 1, 1979. Generally, landlords are allowed to increase the rent 3%-8% every 12 months in accordance with the annual rent increase percentage, which is based on the Consumer Price Index (CPI).

Partnerships Program[14] to preserve or build affordable housing for low-income residents. HCID uses the City's Affordable Housing Trust Fund Program (AHTF), to administer the majority of this funding, which provides long-term loans through a competitive process to developers, typically non-profit organizations that focus on affordable housing. The Department also acts as "pass-through" funder for State-issued bonds, which provide financing for affordable housing projects.

Developers generally leverage the City funds with other sources of funding to build rental units for low and very low-income households. HCID's projects and programs are categorized as follows:

i. **Major Projects** - New construction or major rehabilitation projects, funded through the AHTF.

ii. **Housing Opportunities for People with AIDS (HOPWA)** – HOPWA funds are leveraged to develop new permanent supportive affordable housing for persons living with HIV/AIDS and their families.

iii. **Bond Projects** - Newly constructed units developed using funds made available through the sale of multi-family housing revenue bonds.

iv. **Neighborhood Preservation Program (NPP)** - The NPP includes rehabilitation/preservation of smaller properties.

v. **Homeownership Programs** – though not for rental units, these homeownership loans are primarily financed through several programs, including:

- The HOME Program;
- The Neighborhood Stabilization Program (NSP); and
- The 2014 Low Income Purchase Assistance Program (LIPA)

➢ **FORMER COMMUNITY REDEVELOPMENT AGENCY (CRA) PROJECTS**

The Community Redevelopment Agency (CRA) was created in 1948 for the purpose of addressing blight within the City of Los Angeles, by

[14] The U.S. Department of Housing and Urban Development administers the CDBG and HOME funding.

building affordable housing, creating living-wage jobs, developing commercial and industrial sites and making public improvements. However, in 2011 California dissolved[15] Redevelopment Agencies to help mitigate the State's deficit. Subsequently, in June 2012, HCID became the successor entity for the CRA and is now responsible for enforcing the income compliance for all of the pre-existing CRA affordable housing units. The City's Earthquake Emergency Loan Program units also fall under the former CRA portfolio.

- **Earthquake Projects** –The projects are primarily rehabilitation projects financed with other HUD funds.

"Layered" Units

HCID cannot readily determine the number of individual affordable housing units because many units are layered. "Layered" units are located in housing projects with/subsidized by multiple financing programs. Layered units are routinely monitored and "counted" more than once since HCID monitors affordable housing according to the program that created or financed the unit. For example, a CRA project might also have received a Density Bonus. In this case, it may be monitored in accordance to the Density Bonus guidelines and the CRA guidelines. For example, as of Spring 2016, HCID's portfolio consisted of an estimated 40,218 units. In contrast, our audit determined that there were 28,482 unduplicated units based on 2014 monitoring data. HCID's inventory does not include all of the affordable units administered by the Housing Authority of the City of Los Angeles (HACLA).[16]

Audit Objectives

The overall objective of this audit was to evaluate the effectiveness of the City's application and monitoring processes for Density Bonuses as related to affordable housing. The audit focused on the Density Bonus application and approval process through the Department of City Planning, the Department of Building and Safety, and the Housing and Community Investment Department.

[15] The State of California dissolved all Redevelopment Agencies throughout the State with the passage of Assembly Bill 1X26, which took effect February 1, 2012.

[16] HACLA's portfolio includes 79,379 units, which consist of Public Housing Units, Housing Choice Vouchers, Project Based Section 8 properties and other housing assistance program units. Source: HACLA's 2016 Final Agency Plan.

Background

While the scope of this audit focused on the Density Bonus program, we also reviewed the monitoring and enforcement processes for all of the City's affordable housing programs, as managed by HCID.

The audit also included benchmarking and an assessment of related practices of other jurisdictions and agencies.

A survey was sent to developers regarding their experience and opinions regarding the City's Density Bonus program, and a direct mailing was sent to tenants who reported $0 income in 2014, in an effort to collect their earned income amount.

Findings and Recommendations

Section I: Density Bonuses - Unclear Benefits for Affordable Housing

Given the City's housing shortage, proponents of the Density Bonus program view it as an important tool to increase the number of housing units throughout the City. Some may also consider the Density Bonus program an optimal and cost-effective way to increase affordable housing, since the City does not directly contribute public dollars to construct these units. However, there are other issues and indirect costs involved. Critics indicate that the Program accelerates growth and strains the City's infrastructure, including public safety services, roads, schools, and the sewer and water delivery systems. Opponents also voice concern that additional development changes community character. These views have led to public debate regarding density in general.

The City is required by State law to implement a Density Bonus program; therefore, the question is not whether the City should administer a program; rather, what are the quantitative goals of the program, and what is the City's strategy to achieve those goals?

Our audit sought to evaluate the success of the Density Bonus program, but this was difficult because policymakers have not set unit goals or criteria by which to measure its success. While it may have been assumed that the program would create additional housing in the City, including restricted affordable units, it is unclear to what extent the City intended to rely on the Density Bonus program to generate additional income-restricted units to increase the City's supply of affordable housing.

In approving the City's land use regulations, and more specifically, the provisions of the Density Bonus ordinance for by-right development as well as for each entitlement application submitted through City Planning, policymakers must weigh the relative benefits of easing some restrictions imposed on developers, with the benefit of providing additional income-restricted affordable units, while also considering quality of life and community concerns relative to density. Public policy, as effected through ordinances and related program goals, should clarify what the City is willing to provide to help meet the housing needs of residents through increased density.

We identified shortcomings that have prevented departments from providing the data needed by policymakers to inform a strategy and specific goals for the Density Bonus program. Without this information, policymakers do not

have a baseline that would inform a strategy or specific goals for the City's Density Bonus program or allow for adequate program evaluation in the future.

Finding No. 1: None of the administering Departments separately track or report the number of additional units, including the incremental affordable housing units, generated by the Program. Further, the City does not effectively track applications and approvals for Density Bonuses and only began tracking the Land Use restricted affordable units in 2008.

As a result, the City cannot measure the impact of the Density Bonus program. Specifically, it cannot determine the number of bonus units (as either restricted affordable or at market rate) the program has generated. Nor can it assess how the various concessions provided to developers are actually increasing the City's affordable housing stock.

The City Cannot Identify the Number of Density Bonus Units Created

In May 2014, a council motion (Council File 14-0692-S1) instructed HCID to prepare a report responding to questions related to the affordable units that were produced since the City implemented the Density Bonus ordinance. Approximately one year later HCID reported that 4,668 affordable housing units had been constructed since 2008 pursuant to the City's Density Bonus Ordinance, and most of the affordable housing units were located in Council Districts 1, 9 and 13.

However, based on our review, we found a compilation error with HCID's number of SB 1818 projects reported to City Council, and the categorization of some projects as affordable housing vs. market-rate.

Project Count

During our review of HCID's analysis of SB 1818 projects, we found that the Department's project count included duplicate projects and a terminated covenant.

Once these were removed, we identified 169 SB 1818 properties constructed from 2008 thru 2014, as opposed to the 201 reported.

Exhibit 6: April 2015 HCID Report to Council Regarding SB1818 Properties and Units Constructed during 2008 - 2014	
Total Number of Properties	Total Number of Affordable Units
201	4,668

- *Duplicate Projects*
  HCID manually entered project data in separate excel worksheets and tabulated totals incorrectly. We identified this error by consolidating all of the worksheets and running a duplicate check based on the covenant number and address.

- *Terminated Covenant*
  The Department also included a project that was not a part of the City's Density Bonus program. Staff explained that prior to construction, the developer pulled the building permits for the project and terminated the Density Bonus covenant. However, HCID had not removed the covenant from the list of active Density Bonus projects.

Exhibit 7: Auditor Review of SB1818 Properties and Units Constructed during 2008 - 2014	
Total Number of Properties	Total Number of *Incremental* Affordable Units
169	329 Market Rate projects At least 97 Affordable projects

Project Categorization

During our review of the 169 covenants we also noted the funding sources used to finance the projects to determine the number of ***projects*** built by private developers without government assistance (considered market rate developments), compared to subsidized affordable housing projects that participated in the City's Density Bonus program. We found that some of the projects had to be re-categorized and found:

- 54% (91 of 169) of the Density Bonus projects were built by private (market rate) developers; while,

- 46% (78 of 169) of the Density Bonus projects were subsidized affordable housing projects.

This provides some perspective regarding the participation in the Density Bonus program. Our review found that private developers participated in the program at a slightly higher rate than affordable housing developers.

Incremental Restricted Units

While Council did not specifically request the incremental (new, our "bonus") units generated through the program, we reviewed each of the covenants in an effort to show the effect of the Density Bonus program on the City's affordable housing stock. Since the incremental restricted units are not specifically tracked, we had to review the descriptive language included in the covenants, and calculate the units when the information was available. We identified 329 additional affordable units within market rate projects and at least 97 additional units within affordable housing projects, were generated through the City's Density Bonus program from 2008 thru 2014.

Incremental Restricted Units within Affordable Housing Developments

HCID reported 4,668 affordable units were generated through the Density Bonus program and were restricted under a land use covenant. The Department reported in their count generally *all* of the restricted units within the affordable projects that participated in the Density Bonus program, because those were the total number of restricted units cited in the land use covenants.

For example, if a subsidized affordable housing project also received a Density Bonus allowing it to build 12 units rather than 10 as originally planned, all are restricted as affordable, and HCID tracked and reported all 12 as restricted for land use purposes.

However, for this example, we reported the two additional (i.e. incremental) units as a means to measure the true impact of the Density Bonus program on the City's affordable housing inventory.

Alternatively, if a project is for market-rate units, only 1 of the units within the 10 originally planned (base) number of units would be set aside as affordable, while 2 additional bonus units would be rented at market rate.

Exhibit 8: Example of How the Incremental Units are Considered for Market Rate Housing Projects

Base Units	Required set-aside affordable units	Bonus/Incremental Units			Total Units After DB
10	10% x 10 = 1 Unit	10 x	20% =	2	12
This 1 affordable unit is within the 10 base units		***Ideally, HCID would be able to report these 2 units***			

Our review noted that most of the subsidized affordable housing developments that took advantage of the Density Bonus program did so to realize parking reductions, rather than to build bonus units. In some cases, according to City staff, a subsidized project may not have been viable without a Density Bonus concession; however, the covenants do not clearly identify when this is the case. While more incremental units may have been created as a result of the Density Bonus program, an exact number could not be determined as part of this audit. None of the City departments involved (i.e. HCID, DBS or DCP) distinguish the base number of units the project had prior to obtaining the Density Bonus in any of the application documents, the incremental units are not separately tracked.

Lack of Tracking Prior to 2008

HCID and DCP staff indicated that prior to the formal Density Bonus ordinance in 2008, Density Bonus units may have been granted to Owners through Conditional Use Permits and the Mello Act. This was attributed to the fact that the City did not adopt an ordinance to implement the Density Bonus program until 2008, even though the State passed the Density Bonus statute in 2005. Thus, between 2005 and 2008, no policies were in place to administer the Density Bonus program. DCP management explained that Planners reviewed Density Bonus cases using the Conditional Use Permits criteria (LAMC Sec. 12.24) and/or Public Benefit Projects (which require a covenanted agreement, per LAMC Sec.14.00).

HCID also expressed concern regarding the complete inventory of Density Bonus units. Staff indicated that there have been instances when Owners have called to ask questions about a covenant (restricting the income eligibility or rent) tied to their property, but HCID did not have a record of the covenant in its databases or files. If HCID does not have a record of the covenant, they cannot track or monitor the associated units. In 2010, HCID hired a new Manager for the Land Use unit who established a process to track covenant information in order to report on the total number of units created within each income level and affordable housing program. The ability to track Density Bonus units has since improved; however, there are still information system limitations.

Evaluating the Success of the Density Bonus Program Requires Consistent Data Collection and Adequate Systems

Standard Covenant Language

Identifying the incremental units required a detailed review of each of the 169 covenants because the covenants have different language and describe the incentives in different ways. For example, some of the covenants include a Density Bonus percentage and others do not. While recent covenants appear more standardized, the information still varies; a standardized template would allow HCID to more easily collect consistent data. As such, HCID should work with the City Attorney to standardize the Density Bonus covenant templates. Further, in order to facilitate transparency and ensure the terms of the covenants are known to the owners and the general public, HCID should post executed covenants on the departmental website.

Multi-Department Effort – Disjointed Systems

Multiple databases and systems also hinder the administering department's efforts to effectively track and report on the Density Bonus program. Since these databases and systems do not interface, departments cannot easily identify the total number of bonus market rate units the City has approved, nor the number of restricted affordable units gained over time. Significant manual effort is required to determine the number of restricted and bonus units developed as a result of the Density Bonus program. Further, although City staff indicated that the vast majority of the Density Bonus requests are granted, no department analyzes the approval rate for the Density Bonus requests – whether *By-Right* or *Entitlement.*

Each of the three departments that administer Density Bonuses (DBS, DCP and HCID) has its own information systems/databases to track its role in the review, approval, and monitoring process. However, none of the systems can compile summary metrics that would help evaluate the Density Bonus program overall.

- *Department of Building and Safety*
    - *Plan Check Inspection System (PCIS)*

      DBS uses the Plan Check and Inspection System (PCIS) to track the Plan Check process, clearances, Building Permits, and Certificates of Occupancy for all types of development.

Within PCIS the Density Bonus project applications are identified by the clearance description field: "Housing Density Bonus". However, PCIS is limited in its capability to *identify* restricted units, bonus units, and incentives, and to distinguish whether a project is By-Right or Entitlement. Although this information can be found in narrative fields, it cannot be extracted for summary reporting.

- *Department of City Planning*

  - *Planning Case Tracking System (PCTS)*

    The Planning Case Tracking System is used by DCP staff to track development projects with entitlement Density Bonus requests. In addition to capturing necessary planning information such as lot size and zone information, PCTS tracks fee-related information, and review process milestones.

    In response to the Mayor's 2014 housing initiative, DCP is implementing changes in PCTS to distinguish the number of affordable units from market rate units approved. PCTS will also be able to track the number and type of units at three stages of development: application, approval, and construction. While this will help provide data regarding the Density Bonus program, it will only report on projects developed since July 2013. As a result, it will not allow DCP to evaluate the effectiveness of the Density Bonus program since its inception in 2008.

- *Housing and Community Investment Department*

  - *Housing Information Management System (HIMS)*

    The Housing and Information Management System (HIMS) is a web-based system developed internally by HCID in 2008 to maintain information for the entire affordable housing stock that is funded and monitored by HCID.

    While HIMS has a module to track its monitoring of government subsidized units, it lacks a separate module to track project details such as the number of market rate versus restricted units within a Density Bonus project. HIMS cannot report the number of units

in a Density Bonus project, or the significant details of the overall program. Consequently, the Land Use unit uses a separate Access database and Excel spreadsheets to record Density Bonus project details. These disparate databases make it difficult to efficiently aggregate Density Bonus data.

- *Land Use and Environmental Services Unit Access Database*

  HCID's Land Use Unit uses the Land Use Access Database to track land use covenants. It includes information on the housing program, project name and address, project description, and unit description (floating/fixed, set-aside units, income requirements, number of bedrooms, etc.). However, based on our review of a sample of projects, the database is incomplete.

- *Land Use and Environmental Services Unit Excel Spreadsheets*

  HCID's Land Use Unit Manager uses Excel spreadsheets to track the total number of Land Use covenants and related restricted affordable units by income level. The spreadsheets also distinguish between the market rate and City subsidized Density Bonus units, but it does not distinguish the By-Right and Entitlement projects.

Since there are multiple databases that track Density Bonus applications and approvals, a universal tracking number, which would standardize project identification numbers throughout all databases, could facilitate the application and approval rates. However, a unique identifier does not solve the problem of free-form, narrative fields that cannot be queried to yield quantitative reports. Similarly, incentives granted through the Density Bonus program are also tracked in free-form text fields, so they cannot be easily aggregated or reported either.

Further, while DCP and DBS track Density Bonus applications in their respective systems, neither department reports on the number of Density Bonus applications or approvals in a consistent or meaningful way; nor does either department use the numbers to report on the Density Bonus program overall.

HCID tracks the number of approved Density Bonus applications as they execute the covenants, but it does not have efficient processes to track and report on the Density Bonus projects and units. Due to the lack of

comprehensive data collection (prior to 2008), system integration and consistent, robust data collection, none of the departments can ensure that the various concessions provided to developers are actually increasing the affordable housing stock, or market rate housing stock.

Review the Percentage Set-Asides and Menu of Incentives

Since the City has not set unit goals for the Density Bonus program, and the administering departments are considering how to implement AB 2222, (pg. 10) it is an ideal time to review the percentage set-asides and the on-menu incentives developers have requested to identify which have resulted in producing incremental affordable units. One of the developers who responded to our survey stated that the number of bonus units was not sufficient. Reviewing the incentives and units generated by them would allow policymakers to determine whether or not the Density Bonus ordinance should be revised to maximize the number of additional units it generates. For example, since we found that most affordable housing developers participated in the program to realize parking reductions, should the City mandate that affordable housing developers build additional incremental affordable units when they utilize a parking reduction? In addition to the type of incentives, City stakeholders could also consider revising the current affordable and bonus percentages in the ordinance in an effort to attract more developers. More developers may participate if the percentages of Density Bonus units allowed increased.

In order to determine the impact of the Density Bonus program on the City's housing stock, both as affordable restricted and at market rate, policymakers must first identify the goals of the program, and what a successful program will accomplish. Once these have been decided, DBS and DCP should work with HCID to track the number of units a developer proposed **prior** to the Density Bonus calculation and the number of approved incremental bonus units, and separately identify those additional Density Bonus units as restricted affordable units, or market rate units to determine the impact of the program.

Exhibit 9: The City's Current Density Bonus Percentage for Low Income Units

% Low Income Units	% Density Bonus
10	20
11	21.5
12	23
13	24.5
14	26
15	27.5
16	29
17	30.5
18	32
19	33.5
20	35

Recommendations

If policymakers determine that Density Bonus units should be considered a significant component of the City's affordable housing strategy, Mayor and Council should:

1.1 Set a target goal for the number of incremental restricted units the Density Bonus program is expected to generate. This will allow for periodic evaluations to review the success of the City's Density Bonus program, and its impact on the City's affordable housing inventory.

1.2 Request an analysis from DCP/DBS/HCID identifying the percentage set-asides and the on-menu incentives requested by developers in prior Density Bonus projects to determine which have been most effective in encouraging Developers to participate in the Density Bonus program, and consider revising the ordinance to increase outcomes.

To accurately determine the impact of the Density Bonus program on the City's affordable housing inventory, DCP, HCID and DBS should:

1.3 Work together to track the number of units a developer proposed prior to the Density Bonus calculation (base units) and, the number of approved incremental bonus units. In addition, separately identify bonus units as either market rate or restricted as affordable, and determine the incremental affordable units that are created through the program.

To enable reporting on the types of Density Bonus units that were requested, approved and constructed, DBS Management should:

1.4 Consider updating the Plan Check and Inspection System similar to the updates the Department of City Planning is incorporating in the Planning Case Tracking System.

HCID Management should:

1.5 Develop a standardized template for the Density Bonus covenants. Also consider making each recorded covenant publicly accessible and mapping each project location on the Department's internet site.

To overcome report shortcomings and evaluate the effectiveness of the Density Bonus program, DBS, DCP and HCID should:

1.6 Consider developing and using a unique identifier for all projects that can be used by all departments involved in administering development projects. This would enable stakeholders to track the projects' progression and report on the status of various milestones.

Finding No. 2: HCID does not report the occupancy compliance rate (income and rent) of the restricted units under the Density Bonus program or the City's entire affordable housing inventory to stakeholders.

Therefore, the City lacks assurance that its entire Affordable Housing inventory actually remains affordable, and in line with the goals of the program.

Data collection and accurate reporting is critical for the transparency of public policies and programs. In addition to providing information regarding the City's progress towards the development of affordable housing, as discussed in the previous finding, Density Bonus program data can help assess compliance with income and rent guidelines. This information would help stakeholders determine if the program is helping meet the need for affordable housing in the City, and assess whether or not resources are maximized.

The City has made a substantial effort to monitor and enforce affordable housing guidelines, but the information collected is not being used in the most constructive manner because HCID is limited in its ability to trend the compliance of any one program type or project, and the department does not summarize results to analyze the occupancy monitoring compliance rate. Further, HCID does not formally report the compliance rates of the units in the City's affordable housing inventory to stakeholders, because the current systems used by the Department and its contracted Monitor, Urban Futures Bond Administrators (UFBA) do not have the ability to aggregate the total number of restricted units that exceed income and/or rent limits.

UFBA's Case Management System (CMS)

UFBA developed their proprietary Case Management System (CMS) in 2012, and primarily uses it as a repository for documents related to tenant income and rent. On an annual basis, owners are required to report tenants' annual income and provide rent rolls to UFBA.

While the process differs for each affordable housing program, once CMS is updated with the required documents, UFBA reviews as follows:

- Annual Occupancy Summary **-** Owners complete an "Occupancy Summary," which documents the annual income for residents in restricted units and the rent paid by the tenant. Any subsidies[17] that contributed to the total rent are also noted. The Occupancy Summary is also intended to note changes in household composition and/or new tenants. Once completed, the Occupancy Summary is uploaded to CMS.

- Based on the Occupancy Summaries, UFBA determines whether the unit complies with rent and income guidelines. UFBA's assessment is reflected in a Project Overview report, which lists each unit, the associated income and rent amount, as well as the compliance status.

Each month, UFBA bills HCID for each unit monitored by submitting an invoice and the Project Overview reports to support the work completed.

CMS is a critical tool because it can track compliance/non-compliance at the project and unit level. Although each unit is reviewed in detail by UFBA at least once a year, and the compliance information is in CMS, HCID does not request or review the data in an aggregated manner.

Although UFBA logs monitoring details for each restricted unit, CMS is not currently programmed to run compliance/status reports. For example, to obtain information for our data analysis, UFBA had to ask their CMS developer to compile a database with the monitoring information for each unit monitored during 2014.

EXHIBIT 10: URBAN FUTURES BOND ADMINISTRATION FEE SCHEDULE

Program	Fee
Bond Only	$17
Major Projects (MP)	$27
Neighborhood Preservation Project (NPP)	$22
Earthquake (EO)	$20
Land Use (LU)	$14
Community Redevelopment Agency (CRA)	$17
Housing Opportunities for Persons with AIDS (HOPWA)	$17
Single Family Homeownership Residency Monitoring	$15

Further, for all properties constructed with federal funds, HUD requires the City to monitor tenant household incomes and rents for compliance with HOME and other program requirements. UFBA bills HCID different monitoring fees per unit, dependent on the program type since there are different levels of review. For example, UFBA reviews income source documentation and supporting documents for each Major Project unit, but only reviews a

[17] Examples of subsidies include utility assistance or Section 8 vouchers.

project summary that includes limited self-reported information for the Land Use units.

The City's contract with UFBA totaled $1.4 million for Fiscal Years 2014 and 2015, to monitor all of the City's restricted affordable units included in HCID's inventory, based on the fee schedule.

Based on our benchmarking, HCID and UFBA's monitoring activities go beyond the efforts of other cities. For instance, Sacramento and Santa Ana do not monitor their entire affordable housing inventory; instead, they sample a percentage of those units annually. Our benchmarking found that the City of Los Angeles monitors a larger volume of affordable housing units than other cities, and was the only agency to utilize an outside contractor to conduct its monitoring.

Inconsistent Data Entry

Based on our data analysis, we noted HCID does not utilize consistent or standard address fields in its databases. For example, the same project may be entered in the system under two different naming conventions; 123 S. Main St., may also be in the system as 123 South Main Street. This issue makes it difficult to efficiently and accurately report on the entire inventory of affordable housing units.

Since HCID/UFBA do not have efficient reporting systems, the City cannot analyze compliance trends over the years or across program types. In addition, since HCID and UFBA lack a robust system that can track monitoring of a unit according to multiple program restrictions, it cannot report aggregated results. As a result, the City lacks assurance that its Affordable Housing Units are occupied solely by residents who meet income eligibility criteria; or that an Owner is collecting rent within the allowable limit. (See Finding No. 3)

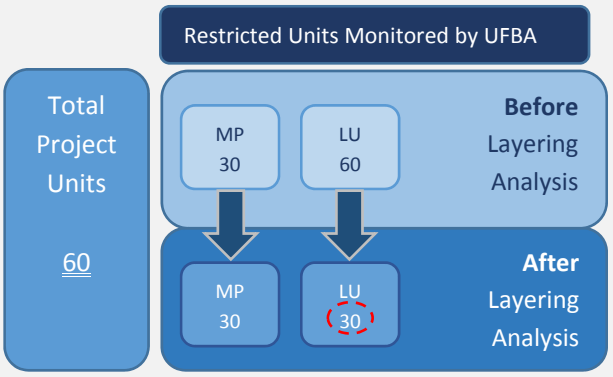
Double Monitoring

Our analysis identified 1,490 units that were monitored more than once in 2014. While the vast majority were required to be monitored more than once because of specific program guidelines, we noted that 379 Land Use restricted units were still "double monitored" in 2014.

When tenants begin occupying a new affordable housing project, HCID forwards the project information to UFBA, and the units are added to the

annual monitoring schedule. Although some projects are restricted by multiple program guidelines, Land Use restricted units should only be monitored once according to the most restrictive program. For example, a 60 unit project restricted by Land Use (all 60) and Major Project (30) guidelines may have been monitored 90 times. In this case, 30 of the units should be monitored according to Major Project guidelines, which are the most restrictive, and the remaining 30 units should be monitored in accordance with the Land Use guidelines.

EXHIBIT 11: EXAMPLE OF DOUBLE MONITORING ANALYSIS



MP = Major Projects Program LU= Land Use

Since UFBA double monitored 379 units, HCID paid UFBA an additional $5,306. Since these Land Use units were layered with a more restrictive program type, they could have only been monitored once.

The OM unit completed an analysis to determine how many of the Land Use units were unnecessarily "double monitored" and directed UFBA to discontinue monitoring the Land Use units that are layered with more restrictive programs. The OM Unit should ensure that all Land Use units layered with any other program type are removed from the monitoring list and are not double monitored in future cycles.

Recommendations

To assess whether the City's affordable housing supply (including Density Bonus units) remains affordable, HCID management should:

2.1 Work with UFBA to generate a monthly/quarterly report on the compliance status for each unit monitored. This should be used to assess the compliance rate for the City's affordable housing inventory.

2.2 Develop a standard format for entering project/address information in HIMS and CMS to enable HCID to efficiently

identify projects and determine the number of restricted units to ensure unduplicated unit counts.

2.3 Continue to ensure that Land Use units subject to multiple program restrictions are only monitored once against the most restrictive requirements.

Section II: The City Cannot Enforce Compliance for All Affordable Housing Programs

Given the limited supply of affordable housing units in the City, it is imperative that the restricted affordable units are occupied only by income eligible individuals. Further, since developers already receive benefits for building affordable housing (such as direct financing or Density Bonuses), they should not gain the additional benefit of collecting more rent than is allowed. The City should make every effort to ensure all affordable units remain affordable in exchange for any benefit provided to owners.

Although the primary focus of the audit was Density Bonuses, we reviewed the available 2014 monitoring data for all of the restricted units in the City's affordable housing inventory. This included Land Use Concession units, Government Subsidized units and former CRA units. We found that not every affordable housing unit is going to those in need, reducing the options for those residents most in need.

Finding No. 3: **The City's actual affordable housing inventory is less than the number of restricted units listed on paper, because some tenants exceed income guidelines and some owners collect more rent than allowed. Our analysis found that 6.8% (1,946) of the units exceeded affordability restrictions, such as restrictions on household income (1.6%) or rent (5.2%).**

- **HCID failed to conduct the initial income verification for 3.7% (1,056) of the tenants upon move-in, and there is a risk that these tenants may also exceed income limits.**

While the City can require owners to reimburse tenants for rent that was over-collected, the City does not have a process to remove tenants who surpass the income guidelines. If these rates hold steady the City's true affordable housing inventory will continue to decline, and will always be lower than the number of restricted units on paper.

We also noted that in 18% (5,221) of the restricted units, landlords accepted Housing Choice Vouchers (Tenant-Based Section 8 Rental Assistance), in addition to receiving financing for their housing project. While legal, tenants with vouchers who occupy restricted units reduce the number of units that would otherwise be available to families in need.

The Occupancy Monitoring (OM) Unit at HCID is responsible for monitoring all of the City's designated affordable units to ensure that residents meet the income guidelines and that owners collect the correct rent amounts. HCID's OM staff conducts an initial income verification before a prospective tenant can move into an affordable unit restricted by a Land Use concession. Thereafter, HCID relies on Urban Futures, Inc. to conduct annual monitoring to ensure units and tenants meet affordability requirements. HCID and the City Attorney's Office are responsible for enforcing the City's housing regulations.

OVER- INCOME TENANTS

We reviewed the data for every restricted affordable unit that was monitored in 2014[18], and found tenants in 464 units that exceeded income requirements considering their household and unit size. Overall, 69.4% of the 464 households exceeded income limits by $5,000 or more.

Exhibit 12: Over-Income Ranges		
$0-$100	5	1.1%
$101-$1,000	50	10.8%
$1,001-$5,000	87	18.8%
$5,001-$10,000	77	16.6%
$10,001-$20,000	124	26.7%
$20,001-$50,000	100	21.6%
> $50,001	21	4.5%

Some tenants were nominally over the limit; for example, five instances were within $100 of the income limit. However, there were some egregious cases, with one household earning more than $149,000 over the income limit. In effect, these households are depriving genuinely low-income households of affordable places to live.

Exhibit 13: Over Income Data Statistics	
Total	464 Units
Lowest	$10
Highest	$149,018
Average	$15,709
Median	$10,539

In addition, 1,181 units in the 2014 monitoring data noted no tenant income. As this appeared questionable, Auditors sent letters to those tenants requesting their income to determine if there were additional units where tenants exceeded income restrictions. While we received only 251 responses to the survey, we noted an additional 8 tenants exceeded the income limits. Based on these responses, an additional 3% of residents in affordable housing could exceed income limits. As these were self-reported amounts, it is possible that the income amounts were also under-stated.

However, using a conservative approach that considers only the affirmative responses to the direct mailing and the monitoring data, we found that overall 1.6% of the tenants exceeded income limits in 2014.

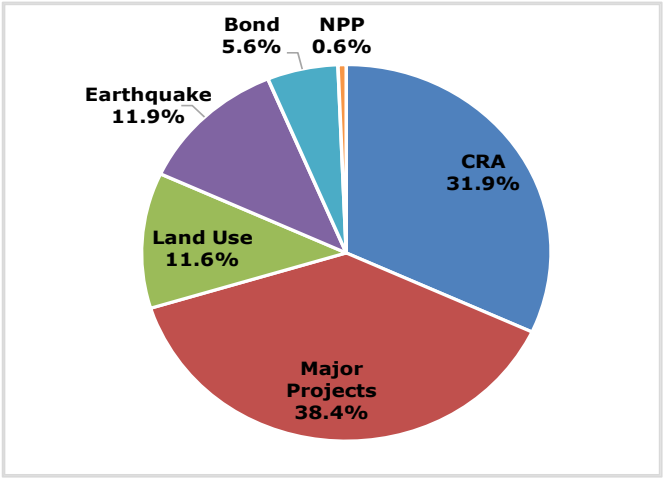
[18] Since the data was requested in 2015, the only complete year of data available was for 2014.

Exhibit 14: Over-Income Households in 2014							
	Bond	**CRA**	**Earth-quake**	**Land Use**	**Major Projects**	**NPP**	**Total**
# of Over-Income Units	**26**	**148**	**55**	**54**	**178**	**3**	**464**
# of Total* Units	2,208	10,822	1,244	4,333	9,680	195	**28,482**
% of Over-Income Units by Program Type	1.18%	1.37%	4.42%	1.25%	1.84%	1.54%	**1.63%**

*Includes the tenants from the direct mailing responses and the 2014 UFBA monitoring data.

Most of the over-income units fall under the (former) CRA and Major Projects programs, though proportionally, units under the Earthquake program had the most over-income tenants. It is possible a tenant may have been *initially* income qualified when they moved in; however, over time, their income may have increased above the eligible threshold.

Exhibit 15: Over-Income Units by Program Type



Missing Initial Income Verifications

Though required for Density Bonus projects, we found that HCID did not conduct income verification for all prospective tenants; thus, there is a risk that tenants exceeding income limits moved into a restricted unit. We found that HCID did not conduct the initial income verification for 3.7% of the tenants that occupied City administered restricted affordable units.

Exhibit 16: Units without Initial Income Verification							
	Bond	**CRA**	**Earthquake**	**Land Use**	**Major Projects**	**NPP**	**Total**
# of Units Missing Initial Income Verification	115	218	112	611	0	0	**1,056**
# of Total Units	2,208	10,822	1,244	4,333	9,680	195	**28,482**
% of Total Units	5.2%	2.0%	9.0%	14.1%	0.0%	0.0%	**3.7%**

HCID's Occupancy Monitoring unit must verify that a Certificate of Occupancy (CofO) is issued before an owner can lease any/all newly-built restricted unit(s). To prevent an owner from leasing a restricted unit without the initial income verification, the Occupancy Monitoring unit should immediately contact owners that have obtained a Certificate of Occupancy.

The Occupancy Monitoring unit is responsible for completing the initial income verification, a multi-step process. Once HCID finds that the CofO has been issued, the Occupancy Monitoring staff emails the ***owner***[19] the Tenant Income and Rent Certification (TIRC) documents. Owners must complete and remit the TIRC package to the Occupancy Monitoring unit for every new tenant that the owner wants to move into a restricted unit. Within 10 days, staff reviews and responds to requests. The OM unit maintains an Income Certification Log to track the time-frames throughout the initial TIRC process, with a date the package was submitted, forwarded, reviewed, and completed. If the TIRC document package is not complete, Occupancy Monitoring sends a request for missing information, and the owner must respond within 5 days. OM staff will close the file after 5 days and the owner will be required to start the process over again, by resubmitting documents. If documents are complete, Occupancy Monitoring reviews the relevant income documents which can include bank statements or W-2s. If unemployed, the tenant must provide social security statements, disability insurance, etc. HCID OM staff references the annual income and rent schedules to verify eligibility. (See Appendix VI for rent and income schedules.)

<u>Lack of Electronic Communication between HCID and DBS</u>

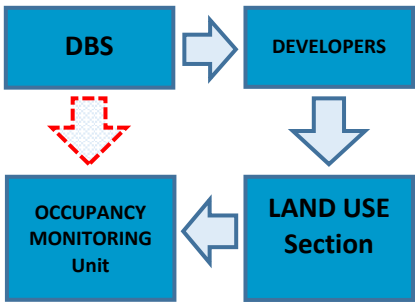
Missed initial income verifications will likely be avoided if the Department of Building and Safety proactively involves HCID's Occupancy Monitoring unit prior to issuing the Certificate of Occupancy. Doing so would mitigate the risk

[19] The City does not contact the tenants directly. All communication regarding tenant(s) income and rent collected is sent directly to the building owner/property manager.

of inadequate verification of tenant income eligibility and related impact to the City's affordable housing stock.

By default, the clearance process ensures that developers will notify HCID of an application when they begin the covenant preparation process. However, DBS does not have an automated reporting capability to: a) remit approved Density Bonus applications, or b) notify HCID when a Certificate of Occupancy for the projects is issued. This lack of communication between DBS and the Occupancy Monitoring unit poses a risk that owners may lease restricted units before the City can verify that a prospective tenant is qualified to occupy a restricted unit.

HCID's Land Use section staff must manually look up each individual covenant in DBS' Plan Check and Inspection System (PCIS) and notify the Occupancy Monitoring unit. Currently, only the Land Use section can verify issuance of the CofO because staff has direct access to PCIS to complete the covenant sign-off.



Student Verification/Eligibility in Restricted Units

If an adult tenant of a restricted affordable unit is a student, they must submit proof of school enrollment. Our direct mailing to tenants in restricted units that did not report any income in 2014 provided an anecdotal example of why it is important to monitor student eligibility. A tenant called regarding the letter and indicated that he was not aware he was occupying a restricted affordable unit. He explained that he was a recent law school graduate and could not recall his income for the prior year. The tenant did not provide his current income to the audit team, however, it is possible that his current income exceeds the limit, as he has since graduated, and is now gainfully employed.

In response to questions from the City Council's Housing Committee, HCID proposed conducting additional verification of income for students who apply to occupy restricted units, by requiring them to disclose whether they are being claimed as a dependent by someone else, and to provide that person's tax returns. The Housing Committee's interest illustrates the importance of the Initial Income Certification process to the City's affordable housing inventory.

Inability to Remove Over-Income Tenants from Restricted Units

Over-income tenants are problematic because the City lacks adequate enforcement mechanisms to remove tenants who exceed income requirements. Specifically, the City has no policies or legal processes in place to evict tenants that exceed income limits and continue to occupy restricted units. HCID management indicated that the Department does not want to "be in the business of removing residents from their homes," as it contradicts their mission. According to HCID, the City should not penalize individuals who work hard and increase their income over time, since the intention of providing affordable housing is to help residents improve their circumstances.

However, other governments have approached the tenant over-income issue through transition programs which gradually remove over-income tenants, and free up affordable units for those in greater need.

- HUD

  The U.S. Department of Housing and Urban Development (HUD) issued a public housing final rule in December 2004 which gave public housing authorities[20] discretion to establish and implement policies that would require families with incomes above the eligibility income limits to find housing in the unassisted market.

Exhibit 17: Over-Income Threshold Example

Tenant Initially Earns	= $45,000
AMI Threshold example	= $63,000
200% AMI	= $126,000
Once tenant reaches 200% AMI or more	→ Transition Out

- San Francisco

  San Francisco has a high demand for affordable housing, and does not allow tenants to remain in restricted units if their income exceeds a specified level. If the tenant's income exceeds the Area Median Income (AMI) by 200%, the City transitions them out of a restricted unit no sooner than the end of the (current) lease term of the tenant Household.

[20] This rule is specifically addressed to public housing authorities (PHAs), which manage public housing buildings that are constructed with public funds and managed directly by a local government entity. The Housing Authority of the City of Los Angeles oversees these buildings for the City. These buildings do **not** include restricted affordable units constructed by non-profit or private developers that require covenants, and are considered separate from the City's affordable housing inventory.

- TCAC Funded Projects

  Projects that receive a tax credit from the State Tax Credit Allocation Committee (TCAC) must also adhere to stringent income regulations. If a tenant's income exceeds 140% of the AMI, the unit is no longer considered affordable by the TCAC, and the owner is at risk of losing the tax credit.

Establishing over-income threshold limits and a transition policy would support tenants improving their financial situation over time, while also keeping restricted units available for those most in need, thus helping more households over the long-term.

Fixed and Floating Units

Given that the City lacks policies to evict ineligible tenants, including "floating" units in all covenants may be a desirable interim option, as they provide a relatively quick remedy to ensure the project remains compliant with the intent and restrictions of the affordable housing covenant.

Covenants requiring restricted affordable units will stipulate either "fixed" or "floating" units. While a fixed unit is always designated as affordable (e.g. Unit #1A), a project with floating units allows any comparable unit in the development to serve as a restricted unit. For example, if a tenant exceeds income limits in a restricted unit, the owner must lease the next available, comparable unit to an eligible household at the income level stipulated in the covenant. This is in contrast to when an over-income tenant is living in a "fixed" unit, and the owner must wait until the tenant moves out in order for the new tenant to meet income guidelines.

Floating units should be considered an interim solution because monitoring them is complicated, as the restricted unit may change during each monitoring cycle.

OWNERS COLLECTED MORE RENT THAN ALLOWED

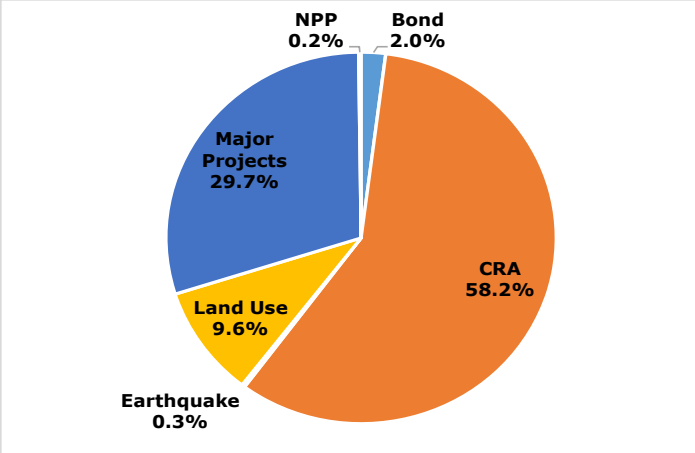
Based on the 2014 monitoring data, UFBA reported that 5.2% of the owners collected more rent than allowed by the associated program guidelines.

Exhibit 18: Units for which Owners Collected More Rent Than Allowed							
	Bond	**CRA**	**Earthquake**	**Land Use**	**Major Projects**	**NPP**	**Total**
# of Over Rent Units	**30**	**862**	**4**	**143**	**440**	**3**	**1482**
Total # of Units	2,208	10,822	1,244	4,333	9,680	195	**28,482**
% of Total Units	1.4%	8.0%	0.3%	3.3%	4.5%	1.5%	**5.2%**

Most of the over-rent units fall under the (former) CRA and Major Projects programs.

City policy requires that in instances of over-rent collection, UFBA notifies the owner, and gives the owner two weeks to reimburse the tenant.

Exhibit 19: Over-Rent Units by Program Type

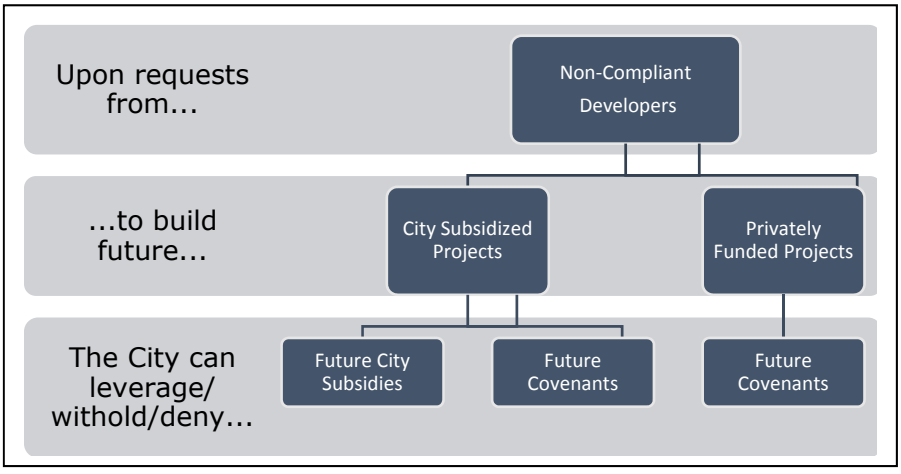


Penalties for Developers

Government-Subsidized Projects

HCID has stringent policies to enforce compliance for government-subsidized projects. For example, if owners do not respond to letters from the City Attorney to correct any non-compliant issues, HCID's Asset Management Division can withhold future Affordable Housing Trust Fund (AHTF) financing if the developer re-apply for public funding.

Exhibit 20: HCID Compliance Enforcement Methods



Land Use Projects

For Land Use projects that did not receive government funding, HCID has little recourse for non-compliance. Developers of these projects have already received a land use concession through the Density Bonus program; therefore, the City cannot

leverage much beyond denying a covenant on a future project. HCID's current policy directs staff to conduct a compliance check for developers applying for a new covenant. Developers with non-compliant projects will *not* be issued any new covenants, unless non-compliance issues are remedied. However, developers do not face any monetary threats such as penalties or withheld funding.

SECTION 8 VOUCHERS USED WITHIN RESTRICTED AFFORDABLE HOUSING PROJECTS

Often times, multiple programs are layered within a restricted affordable housing project. For example, a developer may receive HUD funding and a Low-Income Housing Tax Credit to build affordable units, AND a tenant may utilize voucher assistance (commonly known as Section 8 Project-Based or Housing Choice Vouchers) to help cover the rent. We noted 10,408 of the units within the City's affordable housing stock that were monitored by HCID in 2014 accepted Section 8 Vouchers.

Financing and Renting Affordable Housing

The more common financing and rental assistance programs, which are frequently layered, are described below:

Financing Affordable Housing

Affordable housing developers use many tools to finance restricted affordable housing projects, including direct federal funds from HUD, or the Low-Income Housing Tax Credit.

- *HOME Investment Partnerships Program (HOME)*

  The "HOME Investment Partnerships Program" (HOME), allocates formula funds to participating jurisdictions to increase the number of families served with decent, safe, sanitary, and affordable housing and to expand the long-term supply of affordable housing. HCID is the City's administrator of HOME funds and awards funds to developers based on competitive applications.

- *Low Income Housing Tax Credits*

  Created by the Tax Reform Act of 1986, the LIHTC program gives California's Tax Credit Allocation Committee (TCAC) the authority to issue tax credits to incentivize developers to build affordable housing.

Renting an Affordable Unit

Low-income families, as well as the elderly, and the disabled may benefit from Section 8 Vouchers to help cover the cost of their rent. Federal funds are allocated by HUD to local public housing agencies (PHAs), who administer the Vouchers. The Housing Authority of the City of Los Angeles (HACLA), is the City's PHA. A housing subsidy is paid to the landlord directly by the PHA on behalf of the participating family. The family then pays the difference between the actual rent charged by the landlord and the amount subsidized by the program, but cannot exceed 30% of the family's monthly income.

There are two types of Section 8 Vouchers, Project-Based Vouchers and Housing Choice Vouchers:

- *Project-Based Voucher (PBV)*

  Project-Based Vouchers are attached to a particular unit in a building. The owner agrees to reserve some or all of the units in a building for low-income tenants, and in return HUD guarantees to make up the difference between the tenant's rent contribution and the rent amount in the owner's contract with the government. In 2014, 5,187 PBVs were included in City restricted units.

- *Housing Choice Voucher (HCV)*

  In the Housing Choice Voucher program, also referred to as Tenant-Based Vouchers, the participant is free to choose housing that meets the requirements of the program, including privately-owned single-family homes, townhouses and apartments. In 2014, 5,221 HCV's were applied towards rent in City-restricted units.

Project-Based Voucher (PBV)	Housing Choice/Tenant-Based Voucher (HCV)
Stays with the Unit • Non Transferrable	Stays with the Tenant • Can be applied towards rent in any unit (including privately owned) that meets program guidelines.

Since HCVs are tenant-based assistance, the subsidy is tied to the low-income tenant, not the unit. When the tenant moves, the HCV can move with the tenant. Whereas the PBV subsidy is attached to a specific unit, and is not transferrable. If the tenant moves out, the subsidy stays with the unit and benefits the next low-income tenant that moves in.

Consider Restricting the Use of Housing Choice Vouchers to Non-HOME Financed Units

While legal, tenants with HCVs who occupy restricted units reduce the number of units that would otherwise be available to families who are also in need, but do not have a HCV. Although federal law prohibits owners who have received HOME financing from refusing to rent to tenants with HCV, the impact of this policy results in fewer affordable housing options. If the tenant with rental assistance rented an apartment outside of HCID's inventory (e.g. privately-owned unit), two low-income households could be served. In other words, rent for the unit that would otherwise be restricted as affordable will not be available to those without a voucher. We are not questioning the legality of these practices, but rather how they are not necessarily in-line with the spirit of the City's housing goals and needs. Therefore, in order to ensure the City's restricted affordable units are maximized, it may be ideal to restrict the use of Housing Choice Vouchers to non-HOME financed, privately-owned units.

If the City considers prohibiting owners that accept government funding to build units from also accepting HCVs from tenants, this may eventually increase the number of affordable units. This is, of course dependent upon the availability of HCVs and private owner participation.

OBSERVATION REGARDING OWNERS WHO MAY COLLECT HIGHER RENT WHEN TENANTS HAVE RENTAL ASSISTANCE

Exhibit 21: Over Rent Data Statistics (For Units with Rental Assistance)	
Total	4,621
Minimum	$1
Maximum	$1,423
Average	$266
Median	$213

We also noted that rent collected by owners of restricted affordable units exceeded the rent limits for 16% (4,621) of the units that accepted Section 8 vouchers, either Project Based or Tenant Based. Our analysis found that 76% of these owners collected $100-$500 per month more rent from tenants that received additional rental assistance.

Exhibit 22: Monthly Over Rent Range (For Units with Rental Assistance)		
$0-$100	694	15.0%
$100-$500	3,515	76.1%
$500-$800	251	5.4%
$800-$1,500	161	3.5%

Affordable housing financing programs set rent and income levels, and tenants are expected to pay the rent amount. When a tenant has qualified for a voucher, the tenant is responsible for paying a portion of the rent (based on 30% of their monthly income), while the voucher

covers the difference with funds from HUD through the Housing Authority of the City of Los Angeles (HACLA). To maximize their rental income, an owner will actually prefer a tenant with rental assistance over one without.

Federal law allows owners to collect a fair market rent amount as determined by the Department of Housing and Urban Development, which may be more than the rent limits, though less than market rate.

Exhibit 23 shows how a unit occupied by a tenant with a voucher subsidy could appear to exceed rent limits.

Exhibit 23: Example of Voucher Subsidy Increasing Monthly Rent Amount	
Fair Market Rent as Determined by HUD	$800 (Market Rent $1200)
Tenant Contribution	$100 (based on 30% monthly income)
Voucher	$600 (based on family size and fair market rent comparable)
Rent Collected	$700
Rent Limit	$650 (based on program restrictions)
Over Rent	$50

In these cases, the owner may collect higher rent than what appears specified by the regulations. This is the explanation for the 16% of apparent "over-rent" units we noted.

VACANCY RATES

Given the dire need for affordable housing, the Department should make all efforts to make the vacancy rate in its portfolio zero. While the monitoring data is based on one point in time, we noted a vacancy rate of 3%.[21]

HCID management indicated that this is lower than the citywide vacancy rate (approximately 5%) and explained that OM staff review the individual monthly project compliance reports and call owners to ask about the status of a unit when 10%, or 2 or more units are vacant. According to staff, property managers usually state that units are not vacant for very long, and the vacancy is attributed to a unit being cleaned after a tenant moved out.

Currently, marketing a restricted unit and finding an eligible tenant is the responsibility of the owner. However, to help owners market restricted affordable units and minimize vacancies, the City recently signed a contract with socialserve.com and the County of Los Angeles. Socialserve.com operates a database that is linked to the County's housing resource center website, which will eventually list all of the restricted units in the City. Per staff, the Major Projects units are currently on the site, and over the next two years, it will be updated to include the City's entire inventory of restricted

[21] Since HCID does not track or report vacancy rates in an aggregated manner, we could not trend this to determine if 3% is representative of the monthly average.

affordable units. To ensure full participation, property managers will have to register their affordable units on the site to remain compliant with program requirements.

Occupancy Monitoring Policies and Procedures

Throughout the audit, we noted that the Occupancy Monitoring unit does not have Policies & Procedures that detail the monitoring and enforcement processes for the City's restricted units. In addition to formal institutional knowledge, policies and procedures are important because they ensure all stakeholders clearly understand their role and they provide transparency to a unit's function.

Recommendations:

To ensure the City's affordable housing stock is occupied only by those who are most in need, HCID should develop and propose the following to policymakers:

3.1 An over-income threshold for tenants who occupy restricted units.

3.2 Removal or transitional policies for tenants that surpass the over-income threshold.

3.3 A timeline/deadline transitional tenants will have to meet, when required to vacate a restricted unit.

To ensure initial income certifications are completed in a timely manner, HCID and DBS management should:

3.4 Consider implementing an automated process to ensure HCID's Occupancy Monitoring Unit is immediately notified when a Certificate of Occupancy is issued for a Housing project with restricted units.

In an effort to maximize the number of affordable housing options in the City, HCID should urge policymakers to:

3.5 Consider restricting the use of Housing Choice Vouchers to non-HOME financed, privately-owned units.

To provide additional transparency and maintain institutional knowledge, HCID should:

3.6 Ensure all of the processes, procedures and polices relevant to monitoring the City's affordable housing inventory are clearly documented.

Section III: The City is Missing Opportunities to Collect Density Bonus Related Fees from Developers

While there are flaws related to the reporting and enforcement for the Density Bonus program and the City's affordable housing in general, developers continue to build units. Since the Program is intended to increase the number of affordable units in the City, efforts should be made to improve administrative processes as well, specifically those related to Density Bonus fees.

Per City financial guidelines, departments can charge fees for services if permissible by state and federal law, and if a group who benefits from the services is identifiable. These fees should support the full cost of operations, including all direct and indirect and capital costs. In the case of residential development, developers directly benefit from the various City services involved in reviewing and approving a project for construction and completion, and subsequent monitoring efforts to ensure compliance with requirements.

Finding No. 4: Density Bonus related fees collected by the Department of City Planning have not been updated since 2011. There is a risk that fees do not cover the administrative costs to review the Density Bonus entitlement applications.

If a developer intends to request incentives through the entitlement process they must pay a fee. The Density Bonus ordinance dictates the fees for the entitlements/incentives as outlined in the table.

EXHIBIT 24: DENSITY BONUS ENTITLEMENT APPLICATION FILING FEES

Type of Application	Fee
Density Bonus including a request for one or more Incentives included in the Menu of Incentives	$7,115
Density Bonus including a request for an Incentive not included in the Menu of Incentives	$23,287
Density increase in excess of that permitted	$20,718

We found that the Department of City Planning has not reviewed or updated the Density Bonus Entitlement Application Filing fee amounts since 2011. Given increases in salaries and other associated costs for completing the application reviews, there is a risk that DCP has not been

recovering the administrative costs related to entitlement reviews of Density Bonus applications.

Developers that apply for one or more of the ***on-menu*** incentives are charged the lowest flat-fee. Developers pay higher fees when requesting incentives that are not on the menu (off-menu), or request density increases in excess of that permitted. The fees are remitted into the Planning Case Processing Special Fund, which helps to offset the staff costs involved in processing planning and land use applications.

Per the City's Revenue Policies, departments shall monitor "all user charges and fees for the City" *on an annual basis*, "to determine that rates are adequate and each source is maximized."

DCP management indicated that a fee study is currently underway to determine if fees are adequately recovering costs, given the last fee increase was phased-in as of 2011. DCP selected an outside contractor to complete the study, which is expected to be completed during 2016.

Recommendation:

The Department of City Planning should:

4.1 Ensure that the entitlement fee study is completed as soon as possible and implement the appropriate fees in a timely manner.

Finding No. 5: The City is missing opportunities to collect fees that would help offset costs associated with the Density Bonus program, and the development of affordable housing.

The City does not currently collect a fee from developers to cover the administrative costs associated with preparing the covenants for Density Bonus Projects. If the City adopts a covenant fee, HCID could potentially collect $366,000 per year.

Despite the various administrative processes involved in executing the covenants, the City does not collect a fee from developers to cover the costs involved to draft the covenants for Density Bonus projects, or any of the affordable housing developments subject to a covenant. HCID staff indicated that developers have requested the ability to pay an expediting fee to the covenant process. Collecting a preparation fee would allow HCID to hire more staff to complete the process in a more expeditious manner.

Once a development is approved for a Density Bonus, the developer must work with HCID's Land Use and Environmental Services Section (Land Use Unit) to execute an Affordable Housing Land Use Covenant.

To start the covenant execution process, the developer must submit documents to HCID's Land Use Unit, including a covenant application, the building permit application, and the grant deed.

Once the covenant is drafted, HCID sends a copy to the City Attorney for review and approval. If approved, the covenant is sent to the owner, who has 30 days to review it, sign it, make 4 notarized copies, and send one notarized copy back to HCID. Upon receipt, it must be signed by HCID's General Manager. This signature allows Land Use staff to sign off on the clearance sheet, allowing the developer to move forward with the building permit approval process.

Exhibit 25: Developer Response Results Regarding Fee Payment

Would your Firm be willing to pay a fee to expedite the covenant preparation process?	#	%
Yes	17	89%
No	2	11%
Totals	19	100%

The developer must then file a notarized copy of the covenant with all signatures with the County Recorder's Office to ensure the covenant, and all its stipulations, remain on the property's title through any future change in ownership or foreclosure proceeding.

Currently, HCID funds Land Use unit staff salaries with funds from the Municipal Housing Finance Fund (MHFF), Community Development Block Grants (CDBG), and HOME Investment Partnerships Program (HOME) grants. However, the grant sources have administrative service caps, so the amount of funding that can be used to pay HCID staff salaries is limited. Consequently, the number of staff that HCID can hire to help execute covenants is also limited.

In contrast, City Planning, which is also involved in processing and reviewing Density Bonus related applications, collects administrative-related fees to offset its staff costs.

Proposed Affordable Housing Covenant Preparation Fee

In 2013, HCID completed a fee study that considered the various activities performed by Land Use staff and proposed five categories of fees related to the preparation ***and*** enforcement of affordable housing covenants. If the "Affordable Housing Covenant Preparation Fee" is adopted, developers would pay $5,999 to HCID when they submit a Land Use application. Based on a projected annual number of projects, HCID estimated that the new fees, if adopted, would generate $365,932[22] per year in additional revenues to the City.

Based on our review of HCID's methodology to determine the covenant fee, it appears that staff included the appropriate activities and cost components. The methodology considered direct costs, which include the salaries and benefits for HCID Clerical and Analyst[23] staff, as well as City Attorney staff involved in the covenant preparation process. HCID also used Cost Allocation Plan (CAP) 34 to calculate the indirect costs such as fringe benefits and building leases.

In 2014, the City Administrative Officer reviewed the methodology used by HCID, and approved the fee for consideration by City Council. However, as our audit fieldwork, the Housing Committee has considered the fee, but not yet adopted it.

[22] Based on the historical average of 61 covenants per year through 2014.
[23] Management Analyst and Senior Management Analyst

We surveyed developers and 89% of those that responded, indicated they would be willing to pay a fee to expedite the covenant preparation process.

Recommendation

City Council and the Mayor should:

5.1. Approve a covenant fee that would cover the current administrative costs related to executing the covenants for all affordable housing projects, including Density Bonus projects. Once adopted, periodically review and adjust the fee to reflect the administrative costs involved in preparing covenants.

Finding No. 6: HCID has not consistently collected an annual monitoring fee from owners to help cover the costs of monitoring the restricted units to ensure compliance with income and rent guidelines.

While HCID has actively monitored restricted units for the last 10 years, HCID only began consistently collecting a monitoring fee of $135 for each restricted unit in 2013. This amount is stated in covenants prepared since 2013. Older covenants stipulated varying monitoring fees; for example, $50/restricted unit, $75/restricted unit, or 5% of the gross rent collected. It is unclear how fees included in older covenants were determined, and there was no formal effort to collect a monitoring fee from owners of projects associated with these older covenants. According to HCID management, the City Attorney's Office has advised them not to collect fees retroactively. For example, for covenants executed in 2010 that include a $75/restricted unit monitoring fee, HCID only collected the fee for monitoring completed in 2013 and 2014. The department did not bill the owner for monitoring the unit in 2010, 2011 or 2012.

HCID conducted a fee study in 2013 which determined that the monitoring fee amount should be $135. Starting in January 2014, HCID began billing project owners for monitoring activities on an annual basis. HCID bills project owners on one invoice for all monitored covenants. All fees collected are remitted to the Municipal Housing Finance Fund (MHFF). According to the current process, the monitoring fee billed each year pertains to the monitoring conducted during the previous calendar year. For example, monitoring fees collected in 2014 corresponded to monitoring performed during calendar year 2013.

Through 2015, HCID sent collection letters seeking $881,635 in monitoring fees, and has received $734,960 from owners.

Exhibit 26: Affordable Housing Monitoring Fees Billed and Collected for 2013 & 2014

Monitoring Year	# of Units	Total Amount Billed	Total Amount Collected	% Collected
2013	4,750	$334,260	$274,810	82%
2014	6,193	$547,375*	$460,150	84%
		$881,635	$734,960	83%

**This includes the prior year uncollected amount of $66,615.*

HCID should have been applying a consistent fee methodology to determine the monitoring fee amounts, and more importantly, it should have been collecting fees as soon as the restricted units were occupied.

Since HCID did not collect a monitoring fee, other funding sources, (including limited CDBG grant monies) were used to pay the contracted monitor, UFBA.

Recommendation

HCID should:

6.1 Review the current monitoring fee amount of $135 per restricted unit, to ensure it is appropriate and continue to collect it for each affordable unit monitored on an annual basis.

GLOSSARY OF KEY TERMS

AMI- Average Median Income

By-Right Density Bonus - Also referred to as "ministerial." Land uses which do not require a variance from the Zoning Code, and are automatically granted if the development is approved.

Covenant - A regulatory agreement or contract which dictates the terms of conditions for the use of the land, which is tied to the deed.

DBS – Department of Building and Safety

DCP – Department of City Planning

Developer- Individual or firm that funds and/or builds new real estate projects, including the new construction and renovation of existing building(s).

Entitlement Density Bonus–Land uses which require a variance from the Zoning code. They must be requested as a "conditional use" and approved by the Director of City Planning or the City Planning Commission.

HUD – Federal Department of Housing and Urban Development

HCID – Housing and Community Investment Department

HIMS- Housing and Information Management System used by HCID staff to track restricted affordable housing project details.

Incremental Unit(s) – The *additional* unit(s), i.e., above the number specified by the zoning code for a particular multi-family housing project, that were created as a result of the City's Density Bonus incentive.

Layered Units – A restricted affordable housing unit that is subject to multiple programs, guidelines, and related restrictions generally defined by the type of financial assistance provided.

OM Unit- Occupancy Monitoring Unit at HCID, responsible for monitoring the income and rent compliance for the City's restricted affordable units.

PCIS – The Plan Check and Inspection System used by Department of Building and Safety staff to track building plans' processes and fees.

GLOSSARY OF KEY TERMS (cont.)

PCTS – The Planning Case Tracking System used by Department of City Planning staff to track the planning review processes.

UFBA – Urban Futures and Bond Administration

APPENDIX I: ACTION PLAN

	Finding	Page	Recommendation	Page	Entity Responsible for Implementation	Priority
Section I: Density Bonuses: Unclear Benefits for Affordable Housing						
1	None of the administering Departments separately track or report the number of additional units, including the incremental affordable housing units, generated by the Program. Further, the City does not effectively track applications and approvals for Density Bonuses and only began tracking the Land Use restricted affordable units in 2008.	16	If policymakers determine that Density Bonus units should be considered a significant component of the City's affordable housing strategy, Mayor and Council should: 1.1 Set a target goal for the number of incremental restricted units the Density Bonus program is expected to generate. This will allow for periodic evaluations to review the success of the City's Density Bonus program, and its impact on the City's affordable housing inventory.	24	Mayor City Council	A
			1.2 Request an analysis from DCP/DBS/HCID identifying the percentage set-asides and the on-menu incentives requested by developers in prior Density Bonus projects to determine which have been most effective in encouraging Developers to participate in the Density Bonus program, and consider revising the ordinance to increase outcomes.	24	Mayor City Council	A

APPENDIX I: ACTION PLAN

6	HCID has not consistently collected an annual monitoring fee from owners to help cover the costs of monitoring the restricted units to ensure compliance with income and rent guidelines.	50	6.1 Review the current monitoring fee amount of $135 per restricted unit, to ensure it is appropriate and continue to collect it for each affordable unit monitored on an annual basis.	51	HCID	B

A –High Priority *- The recommendation pertains to a serious or materially significant audit finding or control weakness. Due to the seriousness or significance of the matter, immediate management attention and appropriate corrective action is warranted.*
B –Medium Priority *- The recommendation pertains to a moderately significant or potentially serious audit finding or control weakness. Reasonably prompt corrective action should be taken by management to address the matter. Recommendation should be implemented no later than six months.*
C –Low Priority *- The recommendation pertains to an audit finding or control weakness of relatively minor significance or concern. The timing of any corrective action is left to management's discretion.*

APPENDIX II: FINANCIAL SCORECARD

Finding/Recommendation	Page	Category	Financial Impacts
Finding No. 5: The City is missing opportunities to collect fees that would help offset costs associated with the Density Bonus program, and the development of affordable housing.	47		
The City does not currently collect a fee from developers to cover the administrative costs associated with preparing the covenants for Density Bonus Projects. If the City adopts a covenant fee, HCID could potentially collect $366,000 per year.		Increased Revenue	Adopting a covenant preparation fee could generate approximately $366,000 each year for HCID.
Recommendation 5.1: Approve a covenant fee that would cover the current administrative costs related to executing the covenants for all affordable housing projects, including Density Bonus projects. Once adopted, periodically review and adjust the fee to reflect the administrative costs involved in preparing covenants.	49		

Cost Recovery: Monies that may be recoverable.

Cost Savings and Efficiencies: Cost savings opportunity and process enhancements.

Cost Avoidance: Monies that are lost but are avoidable in the future.

Increased Revenue: Revenue opportunities.

Wasted Funds: Monies that are lost and not recoverable due to reckless act or mismanagement of funds.

We strive to identify and recommend actions that will result in real financial impact, whereby the City can achieve significantly more through cost savings and/or increased revenue than the cost of the audit function. The above dollar estimates are dependent upon various factors, such as full implementation of audit recommendations and should not be used as guaranteed amounts

APPENDIX III – AUDIT SCOPE AND METHODOLOGY

We reviewed the effectiveness of the City's application and monitoring processes for Density Bonuses since 2008 through 2014, as related to restricted affordable units. The audit focused on the Density Bonus application and approval process through the Department of City Planning, the Department of Building and Safety, and the Housing and Community Investment Department (HCID). We also reviewed the monitoring and enforcement processes related to the City's affordable housing inventory, as managed by HCID. Audit fieldwork was primarily conducted from October 2015 through February 2016 and generally covered activities FY 2008-2009 through FY 2013-FY 2014. This audit was performed in accordance with Generally Accepted Government Auditing Standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives. In accordance with these standards and best practices, we performed the following key tasks:

Interviews and Observations

We interviewed Department of Building Safety, Department of City Planning and the Housing and Community Investment Department staff involved in the administration and oversight of the City's Density Bonus program. These interviews included staff from HCID's occupancy monitoring contractor, UFBA. We also reviewed project case files, and relevant information systems and databases.

Data Analyzed

We analyzed 2014 monitoring result data of the City's restricted affordable inventory provided by UFBA. We used the data analysis software, IDEA and Excel to remove duplicated units, identify tenants who exceeded income limits, and owners who collected more rent than the limits.

Benchmarking

We surveyed other agencies throughout the country regarding the administration and oversight of their Density Bonus programs. We received responses from the cities of Glendale, Sacramento, Santa Ana and San Francisco. See Appendix IV for the benchmarking results.

APPENDIX III – AUDIT SCOPE AND METHODOLOGY

We sent a survey to developers who previously built projects in the City, to understand their experience and solicit their opinion regarding the City's Density Bonus program. See Appendix IX for their results.

We sent a direct mailing to tenants who did not report any income in 2014, in an effort to collect their earned income amount. See Appendix VIII for the results of the responses.

APPENDIX IV Benchmarking

These are the results of benchmarking with other cities, regarding their Density Bonus programs.

	Santa Ana	Sacramento	San Francisco	Glendale
1) When did your City start administering Density Bonuses?	2011	Likely when the state law took effect.		2006
2) How many Density Bonus projects have been built in your City since you started administering Density Bonuses?	4	1 or 2		
2a) How many restricted (affordable) units are in those projects?	24	I don't know.		127 As reported in 2014-2012 Housing Element
3) Does your City have a Density Bonus goal?	No	No		Yes, One Density Bonus Project per Year
3a) If yes, please describe your City's Density Bonus goal and if it is referring to the restricted, market rate, or overall units.				
4) What is the threshold for developers to be eligible for Density Bonuses? (e.g. in LA, the development has to be >5 units)	5 or more units	>5 units		
5) What departments are involved in administering Density Bonuses?	Planning and Building Agency, Community Development Agency (Housing Division)	Community Development Department and the Sacramento Housing and Redevelopment Agency (SHRA)		Department of City Planning

APPENDIX IV Benchmarking

	Santa Ana	Sacramento	San Francisco	Glendale
6) What type of incentives are most popular, and why?	Density, Parking, Setbacks	Concessions are not very attractive because we updated our zoning code in 2013 to better facilitate urban infill development that has streamlined entitlements, and context sensitive, flexible development standards.		
7) What fees do developers incur in the application process for Density Bonus projects, and how much are they?	Not applicable	No fee.		
8) Does your City collect a monitoring fee?	No	Yes	Yes	Does not currently collect a monitoring fee, but in process of conducting study.
8a) If yes, how often is the monitoring fee collected?		Semi annually	Annually	NA
8b) If yes, how much is the monitoring fee?		.15% of original loan amount. If there is a bond, than it is .15% of bond.		
9) Instead of providing restricted units on-site, can developers opt to pay in-lieu fees towards city-owned affordable housing development?	If subject to the Housing Opportunity Ordinance (Inclusionary Housing), then yes	No		
9a) If yes, how much are the in-lieu fees?	Various, however currently revising Housing Opportunity Ordinance. Under the new Ordinance, proposed at $15 per habitable s.f.			

APPENDIX IV Benchmarking

	Santa Ana	Sacramento	San Francisco	Glendale
10) How does your City monitor affordable housing units to ensure they are occupied by eligible tenants? For example, do you collect and review income verification documents from tenants or from owners?	City staff will inspect housing units 1-3 years to ensure Health and Safety for the tenants, as well as conduct on-site review of tenant files and income verification documents. Both are completed in a sampling of the units. In addition, the City request annual reports for the affordable units which includes a rent roll. Finally, City staff has started to monitor evictions of units while completing annual on-site visits.	No. SHRA reviews a minimum 20% sample annually. The owner/manager collect and verify to insure income qualification.	The Mayor's Office of Housing monitors the income and rent of the affordable and restricted units.	
11) Does your City have a contractor to monitor your affordable housing projects to ensure owners are complying with income verification requirements?	No	No	No	No
12) How often does your City monitor its contractor to ensure the contractor is correctly and efficiently monitoring affordable units?				
13) If your City has a contractor, how often does the contractor verify tenant incomes?				
14) Does your City distinguish between fixed and floating units?	No	Yes	SF does not allow floating units.	

APPENDIX IV Benchmarking

	Santa Ana	Sacramento	San Francisco	Glendale
15) Are the same monitoring standards used for monitoring market rate projects as for monitoring government subsidized projects? If so, please describe.	Currently, yes the same monitoring standards are utilized for both market rate projects and monitoring government subsidized projects. The City uses the HUD standards for inspections (DSS) and will put the unit on an inspection cycle between 1-3 years. The City also utilizes the same forms for the inspection of units and the file inspections.	With the exception of our Rental Housing Inspection Program, we do not monitor market-rate projects.		
16) What is your City's definition of occupancy noncompliance?	Lack of income verification document, restricted units not occupied by eligible tenants, tenants were not income qualified at entry, occupancy standards at unit entry (lease up)	Over income, overcharging of rent, not being in compliance with affirmative marketing requirements, not maintaining property standards, and any other violations of the loan agreement.		
17) What percentage of your City's Density Bonus restricted units are in compliance, i.e. occupied by only eligible households?	100%	I don't know.		Don't Know

APPENDIX IV Benchmarking

	Santa Ana	Sacramento	San Francisco	Glendale
18) How does your City enforce compliance?	Through recorded agreements with the developer and annual inspections.	SHRA has compliance violation fees, recommend change of property management, technical training to get management back on track. Otherwise owner goes into default on loan.	To enforce compliance with income requirements	
18a) Do you impose a penalty on owners if they are not complying?	No	Yes		No
18b) If you charge a noncompliance fee, how much is it?	No	Multiple fees		
19) Does your City have a process to remove ineligible tenants who no longer meet the income requirements?	Standard legal procedure	Yes	Yes. Once they exceed 55% of the Area Median Income, they have 6 months to transition out.	No

Appendix V
Detailed Menu of Density Bonus Incentives Per LAMC Section 12.22 A25 (f)

Tables in the City's Density Bonus Ordinance
LAMC Section 12.22 A25 (c)1 and (c)4

The tables dictate the percentage of (how many) Bonus Market Rate units a developer can include in a project if they agree to include the corresponding percentage of restricted affordable units.

% Very Low Income Units	% Density Bonus

Appendix VI
Detailed Menu of Density Bonus Incentives Per LAMC Section 12.22 A25 (f)

Menu of Incentives. Housing Development Projects that meet the qualifications of Paragraph (e) of this subdivision may request one or more of the following Incentives, as applicable:

1. **Yard/Setback.** Up to 20% decrease in the required width or depth of any individual yard or setback except along any property line that abuts an R1 or more restrictively zoned property provided that the landscaping for the Housing Development Project is sufficient to qualify for the number of landscape points equivalent to 10% more than otherwise required by Section 12.40 of this Code and Landscape Ordinance Guidelines "O."

2. **Lot Coverage.** Up to 20% increase in lot coverage limits, provided that the landscaping for the Housing Development Project is sufficient to qualify for the number of landscape points equivalent to 10% more than otherwise required by Section 12.40 of this Code and Landscape Ordinance Guidelines "O".

3. **Lot Width.** Up to 20% decrease from a lot width requirement, provided that the landscaping for the Housing Development Project is sufficient to qualify for the number of landscape points equivalent to 10% more than otherwise required by Section 12.40 of this Code and Landscape Ordinance Guidelines "O".

4. **Floor Area Ratio.**

   i. A percentage increase in the allowable Floor Area Ratio equal to the percentage of Density Bonus for which the Housing Development Project is eligible, not to exceed 35%; or

   ii. In lieu of the otherwise applicable Floor Area Ratio, a Floor Area Ratio not to exceed 3:1, provided the parcel is in a commercial zone in Height District 1 (including 1VL, 1L and 1XL), and fronts on a Major Highway as identified in the City's General Plan, and

      a. the Housing Development Project includes the number of Restricted Affordable Units sufficient to qualify for a 35% Density Bonus, and

b. 50% or more of the commercially zoned parcel is located in or within 1,500 feet of a Transit Stop/Major Employment Center.

A Housing Development Project in which at least 80% of the units in a rental project are Restricted Affordable Units or in which 45% of the units in a for-sale project are Restricted Affordable Units shall be exempt from the requirement to front on a Major Highway.

5. **Height.** A percentage increase in the height requirement in feet equal to the percentage of Density Bonus for which the Housing Development Project is eligible. This percentage increase in height shall be applicable over the entire parcel regardless of the number of underlying height limits. For purposes of this subparagraph, Section 12.21.1 A.10 of this Code shall not apply.

   i. In any zone in which the height or number of stories is limited, this height increase shall permit a maximum of eleven additional feet or one additional story, whichever is lower, to provide the Restricted Affordable Units.

      a. No additional height shall be permitted for that portion of a building in a Housing Development Project that is located within fifteen feet of a lot classified in the R2 Zone.

      b. For each foot of additional height the building shall be set back one horizontal foot.

   ii. No additional height shall be permitted for that portion of a building in a Housing Development Project that is located within 50 feet of a lot classified in an R1 or more restrictive residential zone.

   iii. No additional height shall be permitted for any portion of a building in a Housing Development Project located on a lot sharing a common lot line with or across an alley from a lot classified in an R1 or more restrictive zone. This prohibition shall not apply if the lot on which the Housing Development Project is located is within 1,500 feet of a Transit Stop but no additional height shall

be permitted for that portion of a building in the Housing Development Project that is located within 50 feet of a lot classified in an R1 or more restrictive residential zone.

6. **Open Space.** Up to 20% decrease from an open space requirement, provided that the landscaping for the Housing Development Project is sufficient to qualify for the number of landscape points equivalent to 10% more than otherwise required by Section 12.40 of this Code and Landscape Ordinance Guidelines "O".

7. **Density Calculation.** The area of any land required to be dedicated for street or alley purposes may be included as lot area for purposes of calculating the maximum density permitted by the underlying zone in which the project is located.

8. **Averaging of Floor Area Ratio, Density, Parking or Open Space, and permitting Vehicular Access.** A Housing Development Project that is located on two or more contiguous parcels may average the floor area, density, open space and parking over the project site, and permit vehicular access from a less restrictive zone to a more restrictive zone, provided that:

   i. the Housing Development Project includes 11% or more of the units as Restricted Affordable Units for Very Low Income households, or 20% of the units for Low Income households, or 30% of the units for Moderate Income households; and

   ii. the proposed use is permitted by the underlying zone(s) of each parcel; and

   iii. no further lot line adjustment or any other action that may cause the Housing Development Project site to be subdivided subsequent to this grant shall be permitted.

APPENDIX X
Departments' Response and Action Plan

As part of our audit protocol, we requested a formal response and action plan from each Department involved in the audit.

A formal response, including comments and planned actions, was received from the Housing and Community Investment Department; the Department of Building and Safety; and the Department of City Planning, which are included in this section. It should be noted that all three departments have already begun to implement the audit's recommendations.

Report Title: Impact of the Density Bonus Incentive Program on Affordable Housing
Department Responsible for Implementation: **Housing (HCID)**
Reported Status Date: October 20, 2016

				Department Reported Information			
Finding #	**Summary Description of Finding**	**Reco No**	**Recommendation**	**Current Status**	**Basis for Status**	**If I/P, % Complete**	**Target Date for Implementation**
Section I	**Density Bonuses: Unclear Benefits for Affordable Housing**						
1	None of the administering Departments separately track or report the number of additional units, including the incremental affordable housing units, generated by the Program. Further, the City does not effectively track applications and approvals for Density Bonuses and only began tracking the Land Use restricted affordable units in 2008.		To accurately determine the impact of the Density Bonus program on the City's affordable housing inventory, DCP, HCID and DBS should:		Currently working with DCP and DBS to improve the City's affordable housing inventory tracking.	0%	2017
		1.3	Work together to track the number of units a developer proposed prior to the Density Bonus calculation (base units), and the number of approved incremental bonus units. In addition, separately identify bonus units as either market rate or restricted as affordable, and determine the incremental affordable units that are created through the program.	PI			
1	None of the administering Departments separately track or report the number of additional units, including the incremental affordable housing units, generated by the Program. Further, the City does not effectively track applications and approvals for Density Bonuses and only began tracking the Land Use restricted affordable units in 2008.		To enable reporting on the types of Density Bonus units that were requested, approved and constructed, HCID Management should:		Currently have a standardized template in place and continue to work with the City Attorney to improve the template on an on-going basis. HCID will work with the Systems Unit to create a link on the HCID website to access City Clerk's website for a copy of the covenant.	50%	n/a
		1.5	Develop a standardized template for the Density Bonus covenants. Consider making each recorded covenant publicly accessible and mapping each project location on the department's internet site.	PI			
			To overcome report shortcomings and evaluate the effectiveness of the Density Bonus programs DBS, DCP and HCID should:		Currently working with DCP and DBS to develop a unique identifier for all projects in all departments.	0%	2017
		1.6	Consider developing and using a unique identifier for all projects that can be used by all departments involved in administering development projects. This would enable stakeholders to track the projects' progression and report on the status of various milestones.	PI			
2	HCID does not report the occupancy compliance rate (income and rent) of the restricted units under the Density Bonus program or the City's entire affordable housing inventory to stakeholders.		To assess whether the City's affordable housing supply (including Density Bonus units) remains affordable, HCID management should:		UFBA currently provides monthly compliance report. HCID will work with UFBA to generate an enhanced report to assess the compliance rate.	50%	2017
		2.1	Work with UFBA to generate a monthly/quarterly report on the compliance status for each unit monitored. This should be used to assess the compliance rate for the City's affordable housing inventory.	PI			
		2.2	Develop a standard format for entering project/address information in HIMS and CMS to enable HCID to efficiently identify projects and determine the number of restricted units to ensure unduplicated unit counts.	I	HCID has developed a standard format for entering project/address information in HIMS and CMS. New projects that are sent to UFBA use this standard format.	100%	n/a
		2.3	Continue to ensure that Land Use units subject to multiple program restrictions are only monitored once against the most restrictive requirements.	I	HCID will continue to ensure that Land Use units subject to multiple program restrictions are only monitored once against the most restrictive requirements.	100%	n/a

Report Title: Impact of the Density Bonus Incentive Program on Affordable Housing
Department Responsible for Implementation: **Housing (HCID)**
Reported Status Date: October 20, 2016

				Department Reported Information			
Finding #	**Summary Description of Finding**	**Reco No**	**Recommendation**	**Current Status**	**Basis for Status**	**If I/P, % Complete**	**Target Date for Implementation**
Section II	**The City Cannot Enforce Compliance for All Affordable Housing Programs**						
3	The City's actual affordable housing inventory is less than the number of restricted units listed on paper, because some tenants exceed income guidelines and some owners collect more rent than allowed. Our analysis found that 6.8% (1,946) of the units exceeded affordability restrictions, such as restrictions on household income (1.6%) or rent (5.2%).	To ensure the City's affordable housing stock is occupied only by those who are most in need, HCID should develop and propose the following to Policy Makers:					
		3.1	An over-income threshold for tenants who occupy restricted units.	PI	HCIDLA has determined that it will establish an over-income threshold, which is consistent with other affordable housing funding restrictions. If a household is deemed to be over-income, HCIDLA will implement a rent increase (i.e. rent to be charged at 30% of income) without eviction, for over-income tenants residing in restricted units. This policy will apply only to units that are only restricted by a Land Use covenant, so that there is no programmatic conflict with other funding sources/programs, which allow tenants to go over-income without raising their rent. Within the next 90 days, HCID will draft language for the City Attorney's consideration to amend the covenant to include this over-income remedy.	10%	2017
		3.2	Removal or transitional policies for tenants that surpass the over-income threshold.	D	Implementing removal policies for over-income tenants would create displacement of tenants in a housing market with high rents and low vacancy rates. It may also cause the unintended consequences of encouraging people to under-report income or to dis-incentivize increasing tenant's household income. Instead, HCIDLA, in consultation with City Attorney, will review the implement a rent increase (i.e. rent to be charged at 30% of income) for over-income tenants residing in restricted units, without eviction.	n/a	n/a
		3.3	A timeline/deadline transitional tenants will have to meet, when required to vacate a restricted unit.	D		n/a	n/a

				Department Reported Information			
Finding #	**Summary Description of Finding**	**Reco No**	**Recommendation**	**Current Status**	**Basis for Status**	**If I/P, % Complete**	**Target Date for Implementation**
3	The City's actual affordable housing inventory is less than the number of restricted units listed on paper, because some tenants exceed income guidelines and some owners collect more rent than allowed. Our analysis found that 6.8% (1,946) of the units exceeded affordability restrictions, such as restrictions on household income (1.6%) or rent (5.2%).	To ensure initial income certifications are completed in a timely manner, HCID and DBS management should:					
		3.4	Consider implementing an automated process to ensure HCID's Occupancy Monitoring Unit is immediately notified when a Certificate of Occupancy is issued for a Housing project with restricted units.	PI	Working with HCIDLA Systems and DBS to implement.	0%	2017
		In an effort to maximize the number of affordable housing options in the City, HCID should urge policy makers to:					
		3.5	Consider restricting the use of Housing Choice Vouchers (HCV) to non-HOME financed, privately owned-units.	D	HCIDLA disagrees that tenants with HCV should be prohibited from living in a restricted unit due to their source of income, a HCV. The impact of implementing a prohibition of Section 8 in restricted units would increase the existing hardship that voucher holders experience in finding landlords to accept Section 8 due to the extremely high rents and low vacancy rates in Los Angeles. This exclusion of Section 8 tenants also runs counter to a mandate of the major funding source of the Affordable Housing Trust Fund; HOME prohibits turning down tenants with Section 8.	n/a	n/a
		To provide additional transparency and maintain institutional knowledge, HCID should:					
		3.6	Ensure all of the processes, procedures and polices relevant to monitoring the City's affordable housing inventory are clearly documented.	PI	In process.	10%	2017
6	HCID has not consistently collected an annual monitoring fee from owners to help cover the costs of monitoring the restricted units to ensure compliance with income and rent guidelines.	**6.1**	Review the current monitoring fee amount of $135 per restricted unit, to ensure it is appropriate and continue to collect it for each affordable unit monitored on an annual basis.	I	Completed review; Land Use Fees Transmittal approved by the Mayor pending final ordinance by the City Attorney.	100%	2016

FORM GEN. 160 (Rev. 6-80)

CITY OF LOS ANGEL.ES
INTER-DEPARTMENTAL CORRESPONDENCE

October 13, 2016

TO: Siri A. Khalsa, CPA
Interim Director of Auditing
Office of the Controller

FROM: Vincent P. Bertoni, AICP
Director of Planning
Department of City Planning

SUBJECT: **RESPONSE TO FINAL DRAFT AUDIT REPORT "IMPACT OF THE DENSITY BONUS PROGRAM ON AFFORDABLE HOUSING"**

Thank you for the opportunity to review the Controller's Office final draft audit of the Density Bonus program. Upon my appointment as Director of Planning this year, the Department of City Planning (DCP) has prioritized affordable housing in a number of work programs across Department divisions—through policy, entitlement review and clearances, and operational improvements. I am fully committed to improving our planning processes and procedures in all aspects of the DCP's operations to achieve positive outcomes in the production of affordable housing, and working collaboratively with your office to identify future areas of change.

The DCP is charged with implementing housing policies through individual project entitlement review, and through developing ordinances and Municipal Code updates for City Planning Commission, City Council, and Mayoral consideration. The Department's emphasis on quality affordable housing production is evidenced by the recently accelerated initiation of affordable housing and density bonus policy work, a new dedicated BuildLA unit, and a new Priority Housing Project Program that operates with expedited functions across the Department. Additional details on these work programs are provided in subsequent pages in specific responses.

I support the full evaluation of the Density Bonus process, policy, and practice, with the goal of creating additional housing that is affordable to low income households. To this end, I will also work closely with the Housing and Community Investment Department (HCID) and the Department of Building and Safety (DBS) to integrate recommended procedures and improve the intersecting responsibilities outlined in this report.

The following pages include responses to your recommendations. For additional assistance or follow up on the comments below, please contact Lisa Webber, Deputy Director (213-978-1274 / lisa.webber@lacity.org), or Shana Bonstin, Principal City Planner (213-978-1217 / shana.bonstin@lacity.org).

DEPARTMENT OF CITY PLANNING COMMENTS ON DENSITY BONUS AUDIT

Recommendation No. 1.2: (Mayor and Council should...) Request an analysis from DCP/DBS/HCID identifying the percentage set-asides and the on-menu incentives requested by developers in prior Density Bonus projects to determine which have been most effective in encouraging Developers to participate in the Density Bonus program, and consider revising the ordinance to increase outcomes.

The Department recently prioritized affordable housing in our long range policy work program, and this year created a Housing Policy Unit designed to focus on these efforts. An update to the Density Bonus Ordinance and Affordable Housing Incentive Guidelines (AHIG) began work in July 2016. Background work has been done to identify areas that require revision. The team is compiling data on existing cases and cataloging which incentives were used most frequently. A component of the policy program will be to work with developers to receive practical input and feedback from the completion of projects in previous cases.

As a part of the Density Bonus Ordinance amendment, the Department will be reevaluating the processes with an aim to streamline procedures such that compliance review could be accomplished by a ministerial sign-off process or a Director-level determination, in lieu of a lengthier approval and determination at the City Planning Commission level. This would also serve to address the concern noted in the summary section of the audit (bottom of page ii), stating that some developers said the existing "process added too much time to their project timeline" to continue to utilize it.

Recommendation No. 1.3: (DCP, HCID, and DBS should...) Work together to track the number of units a developer proposed prior to the Density Bonus Calculation (base units) and, the number of approved incremental bonus units. In addition, separately identify bonus units as either market rate or restricted as affordable, and determine the incremental affordable units that are created through the program.

The DCP is committed to coordinating with HCID and DBS to track the units as recommended by your report. Currently, the Department captures housing unit data for projects when application forms with detailed calculations are submitted and reviewed as part of the DCP entitlement process. Potential future upgrades to the Department's Planning Case Tracking System (PCTS) and the Dwelling Unit Data Tracking function include the creation of new fields to electronically capture this data—incremental bonus units and whether they are market rate or restricted affordable. Furthermore, in working with HCID and DBS, this effort can be coordinated to complement the DBS permitting and HCID covenant recordation processes and also capture data for ministerial projects.

Recommendation 1.6: (DBS, DCP, and HCID should...) Consider developing and using a unique identifier for all projects that can be used by all departments involved in administering development projects. This would enable stakeholders to track the projects' progression and report on the status of various milestones.

The DCP is actively collaborating with DBS on the BuildLA program, which will permit a single application tracking system for use by all departments within the City. A function of this program will be a unique project identifier, equivalent to a "universal" identification number. This year, DCP filled the initial staffing positions for the dedicated BuildLA efforts, in anticipation of commencing work with the consultant, Accela, by the end of the year.

As well, the Department created the Priority Housing Project Program (PHP) this year, in response to the Mayor's Executive Directive 13. The program offers streamlined processing services for qualifying (20%+) affordable housing projects. Prioritization occurs with dedicated staff in each geographically-organized Project Planning Division and Affordable Housing Liaisons at our Development Services Center and the Citywide Policy Division. A housing scorecard has been developed to track the Department's progress. Since January 2016, 20 new projects with a total of 1,883 units have been filed and are being monitored through this program.

Recommendation No. 4.1: (DCP should...) Ensure that the entitlement fee study is completed as soon as possible and implement the appropriate fees in a timely manner.

The DCP received funding to conduct a comprehensive fee study in Fiscal Year 2014/15 and initiated the study in January 2015. The contractor has been working with staff to conduct the fee study and analysis, which includes a review of Density Bonus related fees. A draft report from the contractor is expected this month, October 2016, and the Department is preparing a report on fee revisions to achieve full cost recovery to the City Council. This will address a portion of the concern that existing fees do not cover administrative costs associated with Density Bonus review.

In L.A., conditions placed on developers go unheeded

"It bothers me that the community was taken advantage of," said land use consultant Robert Cherno about the deal with the Grove. (Luis Sinco / Los Angeles Times)

By EMILY ALPERT REYES AND DAVID ZAHNISER

JAN. 6, 2015 | 6 AM

Worried about how new shops, bars and apartments might affect Los Angeles neighborhoods, community groups and city officials have tried to tie strings to local development.

They have demanded parking spots to ease the crunch on crowded streets, sought to limit the hours businesses can stay open, and even insisted on community perks such as a senior center. But many neighborhood activists complain that once the city gives the green light for development, those promises are overlooked.

For example, in the Fairfax area, the Grove was supposed to include a 500-square-foot employment office along with its gleaming shops and buzzing restaurants, according to planning documents. Yet last year — more than a decade after the mall opened — the city planning department found that no such job center existed.

The Grove developer, Caruso Affiliated, created a new online portal for hiring and said it was providing job postings and applications at its concierge desk, steps that satisfied the planning department. But that happened only after years of hectoring by a local consultant, who remains unconvinced that the developer and property owner Gilmore Co. fulfilled their promises.

ADVERTISING

“It bothers me that the community was taken advantage of,” said land use consultant Robert Cherno. “I’m not asking them to do anything they’re not supposed to do.”

Another case recently landed the city in court: The developer of a 22-story apartment building in Hollywood was required by the planning department to preserve the facade of the Old Spaghetti Factory, a restaurant building on the site. Yet two years ago, the developer obtained a permit from another city agency to raze the entire structure. A similar facade was built in its place.

In an internal email, one city official called it a “demo permit fiasco.” A judge invalidated construction permits for the building last year, throwing its future into question.

And in yet another case, city planners required the 526-unit Da Vinci apartment project alongside the 110 Freeway to have a ventilation system with higher-strength air filters to capture some of the particles produced from vehicle exhaust. Developer G.H. Palmer Associates did not take steps to install the proper equipment until after The Times began asking city officials about the requirement, a Building and Safety spokesman said.

City officials say thin staffing at the Department of Building and Safety and a monitoring system driven by complaints rather than proactive enforcement has made it harder to ensure that such conditions are followed. Such “conditions of approval” are requirements that a project must satisfy to comply with municipal and environmental

rules, planning officials say.

The problem has persisted over time. Five and a half years ago, then-Controller Laura Chick said she had long wondered who made sure developers adhered to such restrictions.

“The answer is, ‘No one,’” Chick wrote in an introduction to a related audit. Her report found that none of the city departments involved in vetting new developments could ensure that such promises were kept.

In reaction, city departments pledged to coordinate better and change their ways. But the same complaints emerged again two years ago, when City Councilman Paul Koretz wrote in CityWatch, an independent newsletter and website on neighborhood issues, that the “valiant and unstinting efforts” of local groups to impose restrictions were not necessarily paying off.

In the face of such frustrations, the city created a new team in the planning department in 2013. It is focused exclusively on new cases in which businesses have agreed to specific conditions in order to serve alcohol or provide live entertainment.

“The system is set up, right now, basically on the honor system,” said Rocky Wiles, supervisor of the Condition Compliance Unit. “We shouldn’t rely on the community to be enforcing these conditions. It should be the department. But that takes a lot of resources.”

Her unit currently has four employees, including Wiles herself. Wiles wants to charge new fees that will pay for more workers to conduct spot inspections of projects, but it is unclear when the unit will be able to tackle other conditions besides those tied to alcohol and live entertainment.

Critics argue that beyond the new unit, the problem needs to be tackled systematically,

with a transparent way to watchdog all kinds of projects once they are completed. “There needs to be regular monitoring. And there needs to be definitive actions based on the findings,” said Mike Eveloff, president of the advocacy group Fix the City.

Part of the problem is that the city and its planners sometimes impose conditions that it has no practical way to enforce, said Building and Safety spokesman Luke Zamperini. Though the planning department crafts conditions, his agency is responsible for investigating alleged violations.

Zamperini said that in one case, a Jewish school was required to have only “so many people in there for so many purposes” after certain hours — a rule that would require an inspector to stop in and question people about why they were there, he said. When a Building and Safety inspector tried to meet with a school official during Friday religious services, it spurred an uproar.

“He had no idea it was Yom Kippur,” a major religious holiday, Zamperini said.

Planning officials also say that some kinds of conditions that have been offered up by businesses cannot be legally enforced, either because they are not tied to planning department findings about how the development will affect the area, or because they fall under the jurisdiction of another agency, such as the California Department of Alcoholic Beverage Control.

Nearly a year ago, City Atty. Mike Feuer warned a Venice neighborhood group that some kinds of conditions related to selling alcohol — including banning the sale of single cans or limiting the number of exterior signs advertising alcohol — were prohibited. David Greene, president of the Eagle Rock Neighborhood Council, said he now tells residents to think carefully about whether they want new businesses that serve alcohol, instead of trying to soften their effects with restrictions on hours, signage or operations.

“There’s no system to enforce them,” Greene said.

Last year, the planning department found that there was no evidence of the jobs program and recruiting office that had been promised at the Grove. Associate Zoning Administrator David Weintraub said that since then, the developer had created a jobs website and provided space at its concierge desk for job seekers to meet the requirements. Caruso Affiliated sent a statement to The Times saying it was confident that it was “satisfying the hundreds of conditions outlined … for the property.”

Cherno is still not convinced. In addition to the jobs center, Cherno and Diana Plotkin — president of the Beverly Wilshire Homes Assn.— point to a provision that promises a 3,000-square-foot senior center for the use of the community. The planning department says an existing community room on the second floor of the Historic Farmer’s Market met that requirement.

Plotkin said that wasn’t what they expected when they worked out the conditions. Cherno said one condition required that the local City Council office be involved in the design of the community center, but the Farmers Market room was built before 1939. And the space is reached by a flight of stairs that makes it inaccessible for people in wheelchairs.

Weintraub said the room was not in violation of city rules because it was built before wheelchair accessibility was required. He said the council office had vetted and approved the community room, which has been heavily used — holding more than 1,800 meetings last year, according to the company.

Twelve years ago, the Beverly Wilshire Homes Assn. sued the city and the Grove owner over the community room and other conditions. The attorney who represented them, Rob Glushon, said they eventually struck a settlement after securing funding for traffic control but abandoned the quest for a new community room because he thought the wording was not clear enough to keep pushing. When asked about the promises tied to

the Grove, Councilman Tom LaBonge said he had never gotten a complaint about what he called “a much loved center of community activity.”

His deputy, Renee Weitzer, argued the Grove had met the requirements to provide a job center.

“They have an office. They have a bulletin board. That’s considered a job center,” Weitzer said.

City Watch LA

The California Cargo Cult Shilling for Real Estate Speculators

DICK PLATKIN / 24 SEPTEMBER 2020

PLANNING WATCH-The South Pacific cargo cults are gone, but we have plenty of modern cults, and the one I regularly encounter is the Supply-and-Demand cult.

Like the Cargo Cult, (photo above: Mock Cargo Cult P-52 airplane built on Melanesian Island) which built mock airplanes to lure back the riches left by Japanese and Allied flyers during WWII, our modern cultists imagine that zone changes are the market magic the will

create real estate fortunes. It will not only make investors and their champions rich, but also solve the worsening housing crisis and turn car habituated Angelenos into regular bus and subway riders.

We can dismiss the Cargo Cults as an imaginative effort by Neolithic communities to get more goods airdropped on their islands. But the Supply and Demand cults that thrive in the California State Legislature, LA's City Hall, and in lobbying groups nurtured by pro-development interests, need to be thoroughly demystified.

First, those who rattle on about supply and demand treat it as a natural law, akin to gravity. They could not be more wrong. If they had stayed alert in their introductory economics courses, they would know that this "law" only applies to financial transactions where investors make acceptable rates of profit. If the profits are not there, investors look elsewhere. Real estate developers will not meet the massive unmet demand for affordable housing by going broke. Unmet demand does not automatically trigger an increase in supply, and excess supply does not automatically usher in price cuts.

Second, like automobile and fine art markets, the housing market is segmented. If Toyota produces more low-price Corollas, the cost of an expensive Lexus will not drop. Or, flooding the art market with $35 paintings of dogs playing poker will not reduce the price of a Claude Monet masterpiece. It will still set you back $50 to $100 million.

A series of recent studies confirm that the misunderstood law of supply and demand invoked by the real estate industry and their followers to extract upzoning gifts from elected officials -- has no bearing on LA's segmented housing market. More luxury apartments have not and will not create low-income housing for the homeless and the rent burdened. For that matter, rising vacancy rates in luxury housing have barely caused rents to decline, while vacancies in middle-income apartments have not had any impact on rents. In fact, some tenants are facing rent increases in complexes, like Park LaBrea, with empty apartments.

A key tenet of the Supply-and-Demand cult is that upzoning -- the deregulation of zoning and environmental laws -- will produce a housing boom. Market magic will cause housing prices to fall and transit ridership to rise. What these cultists deliberately overlook is that

according to the City Council-certified General Plan Framework Element EIR, Los Angeles has an abundance of underdeveloped commercial parcels. They allow the by-right construction or apartment houses in every Los Angeles community. As Move LA wrote in CityWatch, LA's long commercial corridors, like Ventura and Pico Boulevards, have ample bus service, high commercial vacancy rates, and zoning that already permits apartments. Any developer who wants an in-fill building site has the "pick of the litter." Plus, the bus and rail lines on these corridors allow density bonuses. The new apartment buildings could reach six stories. In some corridors, like Wilshire Boulevard, they could even build 42 story luxury skyscrapers.

The most important study is The Vacancy Report: How Los Angeles Leaves Homes Empty and People Unhoused. Prepared by the UCLA Law School, Strategic Actions for a Just Economy (SAJE), and the Alliance of Californians for Community Empowerment (ACCE), its findings discredit the Supply-and-Demand cult's explanations and solutions for the housing crisis. The report explains why *building more (expensive) housing* will not solve LA's housing crisis:

- "With more than 36,000 unhoused residents, Los Angeles simultaneously has over 93,000 units sitting vacant, nearly half of which are withheld from the housing market.
- "Over 22 square miles of vacant lots are owned and kept vacant by corporate entities.
- "The pattern of development occurring all across Los Angeles further contributes to the vacancy and houselessness crises, as new units are priced beyond the reach of most Angelinos, leading to an excess supply of high-rent housing that fails to lease, and therefore fails to house people, coupled with a crisis of unmet need for housing for the most vulnerable.
- "High vacancy rates in expensive luxury housing developments are a core symptom of a broader speculative housing system . . . Speculative practices yield an unbalanced production of vacant luxury development at a time when evictions are fueling a loss of affordable rental units, increasing numbers of corporate landlords

are unaccountable to low-income tenants.

- "We are failing to build enough covenanted, deeply affordable housing.
- "Beyond the immediate need for shelter, the economic devastation that has resulted from the pandemic has put hundreds of thousands of renters at risk for eviction and houselessness, magnifying the already desperate need for new permanently affordable and stable housing.

These findings are reinforced by two additional studies. In June 2020 LA's Department of Housing and Community Investment (HCID) reported to the City Council on vacant housing units in Los Angeles. They found that LA's housing shortage is concentrated in mid and low-end units. Since so many of the city's vacant apartments are in high-end buildings, this excess does not address the housing crisis faced by lower income Angelinos:

LA's citywide vacancy rate is between 6% to 7%, amounting to approximately 85,000 to 100,000 empty units. . .Higher-end, 4 or 5-star-rated dwelling units are disproportionately vacant while mid-and low-end units have especially low vacancy rates. In addition, neighborhoods with a greater proportion of new, high-end units have some of the highest vacancy rates in the City. . .while those areas experiencing less residential development have vacancy rates consistently below 5 %."

In UCLA's Hotel California: Housing the Crisis report, we also learn that increasing poverty, not a housing shortage, is the key factor leading to homelessness.

"The 2020 Greater Los Angeles Homelessness Count asked more precise questions than in the past about chronic homelessness and found that out of the 66,436 people experiencing homelessness in Los Angeles, 25,460 are chronically homeless. . .The vast majority of these are unsheltered. We anticipate that Los Angeles will soon have to contend not only with chronic homelessness, but also with a growing first-time homeless population and a much higher proportion of unhoused families with children. As indicated earlier in this report, even prior to COVID-19, . . .a majority expressed economic hardship as the cause of homelessness. . . These numbers will grow rapidly as job loss and housing insecurity combine to displace rent-burdened tenants facing unemployment without

replacement income and eviction protections."

While it is difficult to collect hard data on those leaving Los Angeles because of the pandemic and/or hard times, **For Rent** signs are popping up in every apartment district. At the same time, homelessness is increasing despite rising vacancy rates. While we wait for hard data, at least one thing clear. Landlords are not slashing rents. Either they are boxed in by loan conditions, or they expect to soon rent their empty apartments to tenants paying top dollar.

For the Supply-and-Demand Cult none of this makes the slightest sense. In their world investors should respond to the unmet demand for low-priced apartments by building them. Likewise, landlords should respond to high vacancy rates by dramatically lowering rents. But none of this is happening. When magical thinking forms your understanding of the world, facts and analysis do not cloud your thinking, especially when generous real estate developers subsidize you.

Gentrification and Neighborhood Revitalization: WHAT'S THE DIFFERENCE?

Apr 05, 2019

Renovated former tobacco warehouses near downtown Durham, North Carolina

There are many definitions for gentrification, which can make discussions about development and displacement confusing.

Many anti-displacement activists define gentrification as a profit-driven, race, and class change of a historically disinvested neighborhood. "Disinvested" in this context means areas that businesses and governments have abandoned—where there has been little new development or

maintenance of existing buildings or institutions. Gentrification occurs where land is cheap and the chance to make a profit is high due to the influx of wealthier wage earners willing to pay higher rents.

One case of extreme gentrification is the Bay Area in California, which is undergoing a radical makeover due to the rise in technology companies replacing old industries and jobs. New people moved in to work for these companies and replaced the pre-existing residents. Land values and housing prices increased dramatically, as did the pressure for property owners to get the most out of rents on urban spaces. The Bay Area has become the second densest urbanized area in the country after Los Angeles.

The Bay Area has grown radically wealthier, but the newfound wealth coming from the tech, medicine and finance businesses goes to a small percentage of people. (The area has more millionaires and billionaires than New York City.) The upper layers of the labor force are getting paid very well, allowing them to outbid ordinary working people, the elderly, and people with disabilities for homes. This increased competition for housing has left areas like Oakland and the San Francisco Mission less affordable for long-term residents.

Race is tied to class and power in gentrification. Most of the wealthy and well-paid in the Bay Area are white while those being displaced are people of color, who typically have less income to bid for housing and are more often renters at greater risk of eviction. The elite can hold onto their claims to the city because they also hold the political power.

There are ways, however, to revitalize neighborhoods without also gentrifying them. One is to use a positive development model that builds a new vision of community health and sustainability that benefits all residents. Community organizing that brings different groups to the same table to identify a shared interest and common struggle is key to ensuring development that empowers entire communities.

The development process should enable community members to identify the types of housing, services and infrastructure that should exist in their neighborhood. The process should value longtime residents' visions of neighborhood change and give the power of decision-making to community residents. A healthy community is one that acknowledges and supports the importance of racial equity, community and culture.

Public agencies can foster positive development by supporting a shared neighborhood vision and working with community institutions to ensure a successful revitalization that values culture, health, and positive human development, not just increased economic activity. Agencies should help ensure lasting change though development without displacement.

Advocates from United for a New Economy – Denver, Colarado Credit: John Goldstein

Displacement — The Real Enemy

The most common problem people associate with gentrification is the displacement of residents from a neighborhood experiencing redevelopment. Displacement happens in various ways. "Direct displacement" is when residents are forced to move because of rent increases and/or building renovations. "Exclusionary displacement" is when housing choices for low-income residents are limited. "Displacement pressures" are when supports and services that low-income families rely on disappear from the neighborhood.

Although displacement is cited as the most common concern of gentrification, the research on gentrification and displacement is unclear. Ingrid Gould Ellen and Gerard Torrats-Espinosa studied the long-term effects of gentrification and tracked racial change over time. They defined gentrification narrowly as an increase of income in a neighborhood compared to the larger metro region over time.

The researchers found that a growing number of low-income neighborhoods occupied predominantly by people of color have gentrified in recent decades, although most have remained low-income. Gentrification in the short-term has brought racial integration for many of these neighborhoods, and neighborhoods that became racially diverse through gentrification

remained racially diverse past the initial gentrification period. Some neighborhoods that experienced gentrification in the 2000s, however, did experience a more significant rise in white population in the short term and may not experience the same racial stability in the long term.

Gentrification can also benefit neighborhood residents by lowering poverty rates and exposing residents to more opportunity. Recent studies found that public housing residents in gentrifying neighborhoods are exposed to less violent crime, are more often employed, and have higher incomes and greater educational attainment than their counterparts in low-income neighborhoods. Urban revitalization also brings more services to an area. A lack of choice and competition in disinvested neighborhoods may cause families to pay more for goods and services. **There can be benefits to gentrification, but only to long-term residents who are not pushed out. Development without displacement is the key. Fighting against displacement rather than fighting against development should be the focus.**

An exclusionary effect of gentrification is the high cost of rents that force low-income households to move to lower-cost neighborhoods with fewer resources. Displaced low-income households most likely end up in new low-income neighborhoods. Many vulnerable households that do move are renters and are at greater risk of moving to neighborhoods that have lower home values, high unemployment rates, lower median incomes and poor public-school performance.

Cultural displacement is also common. The closing of long-time neighborhood landmarks like historically black churches or local restaurants can erase the history of a neighborhood and with it a sense of belonging. The influx of a new population of upper- and middle-income residents can also change the political landscape, with new leaders ignoring the needs of long-time residents. The loss of long-time residents' political power leads to further withdrawal from public participation and a loss of control.

Although gentrification can bring about racial diversity, integration, neighborhood improvements, and greater access to services, advocates need to actively promote policies that protect tenants from displacement. Preserving the subsidized housing in gentrifying neighborhoods can ensure that income and racial diversity remains in a neighborhood over time. Governments should also create more affordable low-income homes in gentrifying neighborhoods through new construction and acquisition. Housing subsidies should require long-term or permanent rather than temporary affordability. The next section of *Tenant Talk* will explore these solutions in more detail.

Local Policy Solutions for Preventing Displacement

Grace Townhomes formed by the Community Justice Land Trust. Photo: Domus, Inc

The data on displacement due to gentrification is insufficient. Many researchers have measured the problem at the city or metro level, but there are few studies that look at neighborhood or "submarket" areas. There is also not a silver bullet or list of sure-thing policies to prevent displacement, but the following are some of many tools that can help combat gentrification. They include baseline protections for the most vulnerable residents, producing and preserving affordable homes, non-market-based approaches to housing and community development, and approaches to community participation.

Community Land Trusts

One of the biggest problems with gentrification is land. Developers and investors buy land when it is affordable in struggling neighborhoods, and then wait for the right moment to move forward with profitable development. Community Land Trusts (CLTs) are one way to keep land owned by the community and to fight against rapid property value escalation.

CLTs are nonprofits that own land - received as donations or bought with government subsidies - to ensure it stays affordable for long periods. The land is used for housing or other community purposes. If it's for housing, the homes are sold to lower-income families, but the land is still owned by the CLT. When a CLT homeowner moves, they sell the home back to the CLT or another low-income family. The CLT homeowner receives a more modest return on their investment than a regular homeowner when they sell because they "share equity" (the land portion) with the CLT.

Some concerns with CLTs are that they are costly to implement (require substantial funding), especially in gentrifying neighborhoods, and they rarely provide homes to extremely low-income families. CLTs also usually operate on a small scale, which could be helped if cities gave public land to CLTs and established supporting organizations to build them.

The Community Justice Land Trust (CJLT) in Philadelphia, PA, was created in 2010 by a community coalition that included the Women's Community Revitalization Project (WCRP) and the Philadelphia Association of Community Development Corporations. Philadelphia CJLT addresses the community's recent dramatic increases in housing prices, the rise in new development that did not consider existing needs, and the problem of vacant land and abandoned buildings. The land trust has 36 rent-to-own townhomes and plans to develop 75 more. It is governed by an advisory committee of residents and other stakeholders, as well as WCRP board members.

Research on one of the largest CLTs in the U.S.—Champlain Housing Trust in Vermont —shows that lower-income affordability continued and improved between generations of homebuyers, homeownership was expanded for persons left out from the market, most homeowners gained wealth, and most homeowners bought market-rate homes after they left the CLT. Though CLTs provide limited opportunities for the homeowners to build wealth, they help sustain relative affordability for lower-income households over time.

Rent Control

Rent-control policies offer protections from sudden rent increases, establish maintenance standards, provide the right to a lease renewal, provide the framework for organizing and litigation, and set limits on security deposits. These policies directly affect neighborhood affordability by preventing rents from skyrocketing, enabling residents to stay in their apartments for the long term. Basically, rent control sets a cap on how much a landlord can charge for the rent.

New York Housing March, January 2018. Photo: Ethan Fox

New York has the strongest rent-control policies in the U.S. The Emergency Tenant Protection Act (ETPA) of 1974 established details for rent control and allowed eight counties to voluntarily participate. Currently, 966,000 apartments (45% of the rental market) are rent-stabilized in New York. Since the 1990s, when the law was weakened, the state has lost 300,000 units of rent-stabilized housing. Landlords can remove apartments from rent control when a renter vacates the apartment and then make substantial improvements. This loophole has led landlords to harass, frighten or incentivize renters into leaving their rent-regulated homes.

The ETPA is due to expire in 2019. The Upstate Downstate Housing Alliance sees this as an opportunity to strengthen and expand tenants' rights and is calling for the state to undo provisions that incentivize the loss of rent-regulated units and to extend the rent stabilization framework to the entire state.

Rent-control policies must be carefully implemented to avoid negative consequences. First, rent controls are not tied to specific residents, so there is no way to ensure they are benefiting the people most in need; there are many examples of higher-income, even wealthy, people benefitting from rent control while extremely low-income people remain homeless or on housing assistance wait lists. Second, landlords and developers regularly attack rent control laws, so a strong advocates' rights coalition is needed to ensure proper enforcement and to

advise renters on seeking legal recourse. Third, landlords often argue that legal cap on rents leave them too little income for repairs and maintenance, so rent control policies must be paired with enforceable building standards.

Just-Cause Eviction Ordinances

Every rental lease has an end date, even those made by spoken agreement. It is common that when a lease expires, it automatically renews month-to-month on the same terms as the previous lease. Many renters are displaced because at the end of any given lease term, the landlord can simply "not renew" the contract. Some jurisdictions prevent such displacement by passing "Just-Cause" eviction ordinances stipulating that a landlord cannot evict a renter unless there has been a specific violation of the lease. Non-renewal is no longer an option.

Seattle, WA, has had a just-cause eviction ordinance in place since 1980 that applies to verbal leases and month-to-month leases. In these cases, a landlord may ask a tenant to leave for 18 specific reasons, such as failure to pay rent or renter damage to the property.

Just-cause eviction protections are most effective when paired with rent control. If there is no limit on the amount a landlord can increase the rent, a landlord often can just double the rent, and effectively push the renter into moving, without a just cause for eviction.

Community Benefits Agreements

Community benefits agreements (CBAs) are legal contracts signed by a developer and community groups. They spell out the benefits a developer promises to provide to the community as part of a development. CBAs give community groups a voice in shaping projects and the legal authority to enforce developers' promises.

For CBAs to be effective, they need to be created by active community-based coalitions willing to stay involved during the development process to hold the developers accountable. Coalitions must ensure any CBAs include fair benefits that are reflective of the community's wishes. If CBAs are weak, they cannot be changed and can be used by developers to look good in the public eye without delivering substantive benefits.

"CBAs give community groups a voice in shaping projects and the legal authority to enforce developers' promises."

Cherokee Denver had purchased the Gates rubber factory in Denver, CO, in 2001 to redevelop the site. They worked with the community to create a CBA that included affordable homes and job guarantees, but the project fell through because of the recession. Broadway Station Partners (BSP) finally bought the land in 2018 to create a mixed-use development. The community surrounding the factory site formed a CBA with BSP, similar to the now-repealed Cherokee Gates Urban Redevelopment Plan. BSP agreed to build 338 affordable homes (affordable for 40 years) and to hire local construction workers. This strong CBA required community groups to stay engaged with developers over nearly 20 years to ensure that redevelopment would have community interests at heart.

Gates Rubber Factory. Photo: John Goldstein

Tenant Option to Purchase

"Tenant option to purchase" (TOP) is a tool for residents facing eviction because the property owner intends to sell the property, demolish it, or convert to another use. Cities can pass a TOP policy to require that any housing unit undergoing such changes is offered to residents first before being sold, demolished or re-rented on the private market. The benefits of TOP policies are that they create legal rights for individuals and families faced with displacement, they can ensure housing stability for existing tenants by giving them an option to return to their original homes after being relocated, and they can increase living standards that benefit the existing tenants.

The District of Columbia has an effective Tenant Opportunity to Purchase Act (TOPA). This law requires owners of properties with two or more rental units give tenants and/or tenant associations the option to buy the apartments before a property conversion takes place. If the owner does not provide tenants the option to purchase, the tenants can pursue a lawsuit against the owner. According to Scott Bruton at the Coalition for Nonprofit Housing and Economic Development, TOPA is the most valuable tool the District has for preserving affordable rental housing. Without TOPA, affordable housing developers would lose out to for-profit, market-rate developers in buying multifamily rental properties.

Regulating and Taxing Short-Term Rentals

Research shows that short-term rentals correlate with fewer regular rental units (each unit that gets converted to a short-term rental, takes one away from renters), increased rents, and higher property values, which all lead to displacement. Jurisdictions could regulate and tax the short-term rental operators, many of whom work through AirBnB. Jurisdictions could limit the number of days per year a room or apartment can be rented short-term, require a local contact person be licensed for short-term rentals and fine offenders, and require that only apartments occupied by a permanent resident who is leaving temporarily may be rented short-term.

Taxing short term rentals is another option. Citizen's Housing and Planning Association (CHAPA) advocates were successful in getting a state law passed that applies the 5.7 % hotel and motel room tax to short-term rentals (effective July 1, 2019), excluding homeowners who rent their units for two weeks or less during the year. At least 35% of the revenue generated must fund affordable housing, the first state to do so. The law also allows jurisdictions the authority to create additional local taxes, makes short-term renters obtain $1 million in liability insurance, and creates a public registry of short-term rentals. It remains to be seen whether this bill, the first of its kind, prevents the future loss of affordable homes.

"The benefits of TOP policies are that they create legal rights for individuals and families faced with displacement..."

Vacancy Taxes

Rents rise when there is insufficient housing for all who need it. Vacant properties, of course, provide no housing. Some real estate investors buy buildings and let them sit empty – a phenomenon called "speculation" - often in areas at risk of gentrification where land can be relatively cheap. Real estate investors buy the property and allow it to sit empty because that

costs less than managing the building and making sure it's up to local codes. When the right development opportunity arises, they sell the property or demolish it to make way for something new.

In some communities, speculation has led to a rapid growth in vacant apartments, and some jurisdictions have begun taxing property owners who refuse to make homes available for rent. Voters in Oakland, CA, passed such a tax law by a vote of 68%-31%. The new tax will generate about $10 million annually, which will the city will then invest in affordable housing.

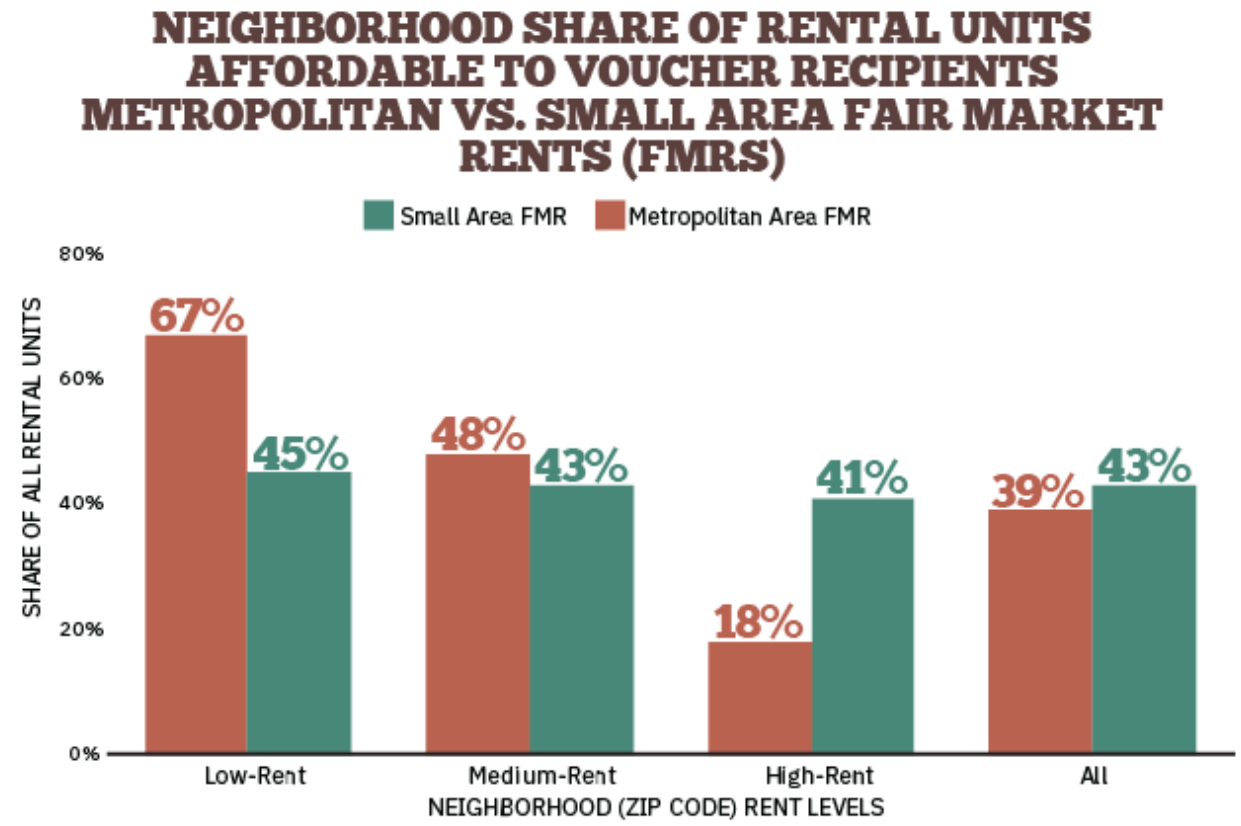
Small Area Fair Market Rents Can Help Minimize Harm Due to Gentrification

Small Area Fair Market Rents (SAFMRs) are a potential tool to minimize displacement of residents and help ensure an income mix in gentrifying neighborhoods.

What are Small Area FMRs?

SAFMRs base the value of a Housing Choice Voucher to a landlord on rents in a ZIP Code. Without SAFMRs, the value of a voucher is based on Fair Market Rent (FMR), which is based on rents in an entire metro area. Metro areas have many areas with very different market rents. A voucher pays the difference between 30% of a household's income and the voucher "payment standard." Public housing agencies (PHAs) set a payment standard (the amount a landlord gets from a voucher) at 90% to 110% of the FMR. As a result, the FMR voucher value is often not enough for rents in gentrifying neighborhoods.

Use of SAFMRs ensure payment standards (the value of vouchers) are more in line with neighborhood rental markets, making vouchers more valuable in higher-rent neighborhoods, such as those undergoing gentrification. Vouchers that pay less that the market rate make it difficult to rent in gentrifying neighborhoods. Household often end up paying more than 30% of their income for rent (paying the difference between the voucher payment and landlord's market rent).



Source: NYU Furman Center (2018).

Minimizing Displacement and/or Fostering Mixed-Income Neighborhoods

Where SAFMRs are available, long-time residents with vouchers (or voucher applicants) living in gentrifying neighborhoods might be able to remain in their homes, avoiding displacement as landlords attempt to cash in on rising demand for rental housing. Use of SAFMRs before a neighborhood fully gentrifies can help new income-eligible households move into a neighborhood to take advantage of the improving community features and provide a healthy mixed-income area.

Required and Voluntary SAFMRs

A new HUD regulation required PHAs in 24 metro areas to begin using SAFMRs on April 1, 2018. SAFMRs have to be used by all PHAs in those metro areas, not just the PHA in the major city – e.g., 19 PHAs in the Philadelphia metro area must use SAFMRs, not just the Philadelphia PHA. More metro areas could be required to use SAFMRs in the future. PHAs anywhere can voluntarily use SAFMRs, and residents should advocate for their PHAs to use them. A list of the 24 metro areas can be found at: https://bit.ly/2Vt3KLq (https://bit.ly/2Vt3KLq)

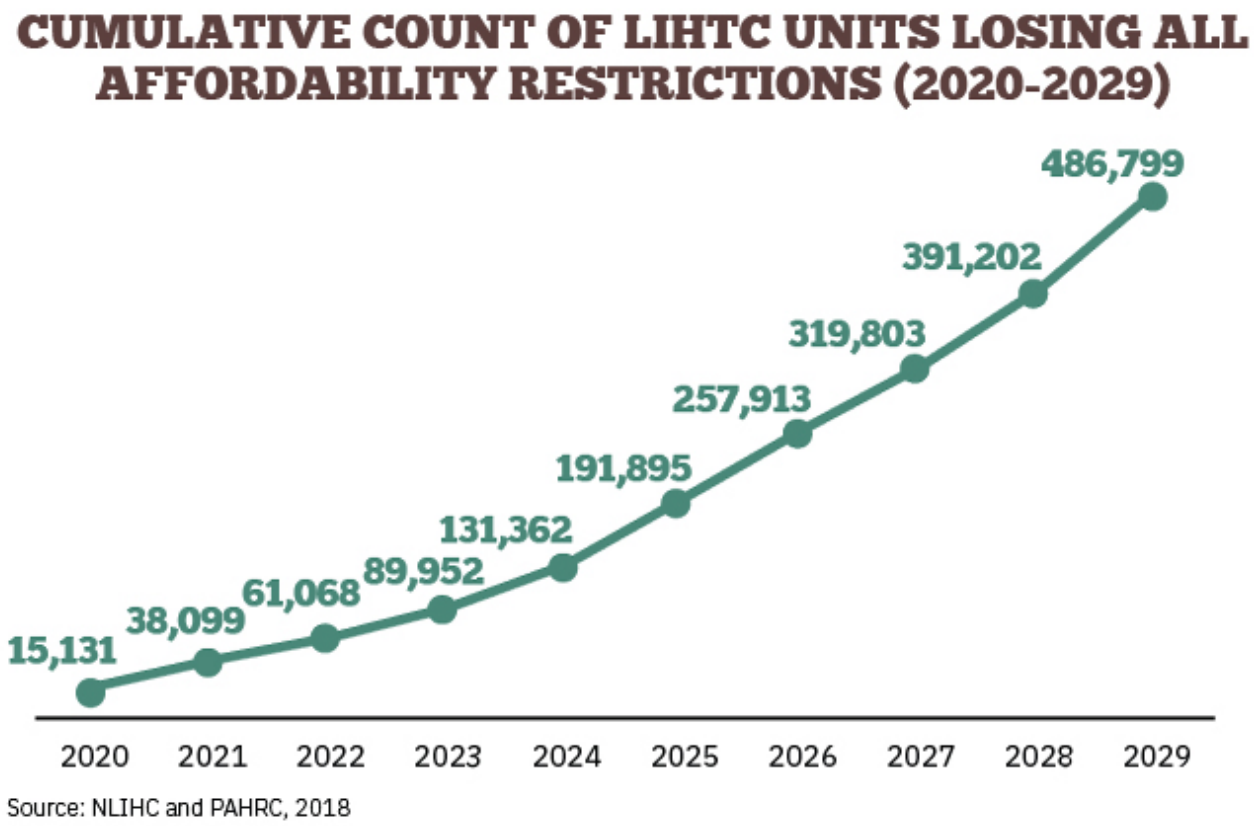
One issue, however, is that landlords are not required to rent to households with vouchers. There are two categories of exceptions:

- Landlords must accept vouchers if their building is assisted by the Low Income Housing Tax Credit, HOME, or national Housing Trust Fund programs.
- Some cities and states have laws that ban "source-of-income" (SOI) discrimination, prohibiting landlords from refusing to rent paying with a voucher, Supplemental Security Income, or Social Security. The Poverty & Race Research Action Council annually updates a list of SOI laws at: https://bit.ly/2DKnFQ0 (https://bit.ly/2DKnFQ0)

Extended Affordability Requirements are a Tool to Preserve Affordable Housing

The lowest-income renters face a national shortage of more than seven million affordable, accessible and available rental units, and only one in four eligible low-income renters receives the assistance they need. The affordable housing crisis could worsen when 279,207 publicly subsidized rental homes reach the end of their affordability periods over the next five years; these homes could convert to market-rate rents without additional subsidy. One way to prevent future losses of affordable homes is to extend affordability requirements.

Many state legislatures have chosen to extend the federal Low-Income Housing Tax Credits (LIHTC) housing affordability requirements beyond the year 30 limit. LIHTC is the largest federal affordable housing production in the U.S., and many LIHTC homes risk being converted to market rate housing once affordability restrictions expire. The states with extended mandatory affordability requirements include Pennsylvania, Florida, Vermont, Maine, New Hampshire, Oregon, Utah, Hawaii, Colorado, Maryland, and Connecticut*. Most of these states have affordability requirements of 35 to 50 years; they are 60 years in Oregon, 99 years in New Hampshire, and permanent in Vermont.



Vermont's permanent affordability requirement was created in the 1980s because many affordable homes built with HUD and USDA funding had affordability requirements expiring at that time. Many property owners chose to convert the affordable units to market-rate housing, leading to a massive displacement of the lowest-income renters. At the same time, HUD was reducing affordable housing subsidies available to state and local governments.

The "Vermont Housing and Conservation Trust Fund Act in 1987" requires any housing subsidized by the state must be permanently affordable to lower-income Vermonters. Compliance is monitored by a community-based nonprofit or a public agency like the Vermont Housing and Conservation Board (VHCB). Over the past thirty years, VHCB has assisted nonprofits and municipalities develop 8,300 permanently affordable homes. In addition to homes made permanently affordable, VHCB prevented virtually all affordable homes built with HUD and USDA subsidies from turning into market-rate housing.

Solutions like permanent or extended affordability requirements protect the limited supply of affordable homes, which in turn can effectively ensure low-income residents remain in their neighborhoods. NLIHC advocates for the longest possible affordability periods in all federal programs, and while progress is slow, advocates can win extended or permanent affordability requirements for states or cities' uses of federal dollars!

Opportunity Zones—A Potential New Challenge in the Fight against Gentrification

The "Tax Cuts and Jobs Act of 2017"—President Trump's massive tax cut law that mostly benefits wealthy Americans and corporations — created "Opportunity Zones," 8,700 ZIP codes where governors have determined a need for more investment and where those who do invest will now receive significant tax benefits.

The Opportunity Zones (OZ) concept—more investment in struggling neighborhoods — could be a good thing. Senators Tim Scott (R-SC) and Cory Booker (D-NJ), who authored the plan, hope to address blight and crumbling infrastructure. As passed, however, the law does not incentivize, much less require, the investments be used to benefit long-term residents by building affordable housing, supporting local businesses, creating decent-paying jobs, or providing other types of community benefits. Investor-developers can now receive large federal tax benefits to build anything from hotels to luxury condos to corporate office buildings, as long as they build it in an OZ.

Housing Trust of Rutland County makes renovations to Heritage Courts in Poltney, VT

To compete for a governor's OZ designation, a ZIP code had to have a poverty rate of at least 20% or a median income no greater than 80% of the area median income. ZIP codes can be quite large, include a variety of income groups, and contain wealthy pockets or a major university or an arts district in an otherwise poor area. Also, not all OZ ZIP codes need to meet the "low-income" definition; up to 5% of the OZs can include ZIP codes next to a "low-income" ZIP code, as long as the adjacent ZIP code has a median income no more than 125% of the low-income ZIP code. All of the OZ investment activity could happen in the wealthier ZIP code, with little or no benefit to the neighborhoods in need.

Combating this new gentrification pressure will require advocates to engage with local officials approving the developments. Advocates should argue that proposed projects in OZs must include permanently affordable rental housing. Advocates must also urge their members of Congress in Washington, DC, to call upon the Department of Treasury to issue strong and clear regulations for OZ investments that require a focus on extremely low-income people, increase affordable rental housing, and support the neighborhood development vision of long-term residents.

"Combating this new gentrification pressure will require advocates to engage with local officials approving the developments."

Some have merely asked for "transparency" by requiring OZ administrators to report outcomes – an after-the-fact exercise. Without strong regulations at least providing incentives, if not requirements, that protect long-term residents from displacement and ensure real benefits to low income communities, the reporting will be an empty exercise.

Gentrification: A Community's Ethnic Erasure

Fernanda Sanchez

2018 NonViolence Capstone Thesis

California State University Polytechnic Pomona

Gentrification: A Community's Ethnic Erasure

Introduction

From the pachuco eras, to the high school walk-outs, East LA has always contributed to the history of Los Angeles. Our streets littered with colors and stories, are home to our most vulnerable group of minorities. Currently, these communities are confronted with the threat of displacement in the form of gentrification. Gentrification looks different in every community, but the effects are the same; underprivileged residents are displaced out of their homes and communities. This pattern is what is referred to as *gentrification*. This occurrence has been seen all over the United States and has impacted countless families and people. Gentrification is an urgent sociological issue because it creates segregation, displaces residents out of their homes, and contributes to ethnic erasure.

In this thesis, my efforts will be mainly focused in the communities of North East Los Angeles, specifically Highland Park and Lincoln Heights. In these communities, gentrification has had serious economic, demographic, sociological, and cultural impacts. In the efforts of implementing nonviolence methodologies learned throughout the program, I will incorporate Gandhi's nonviolent methods, specifically from the works where Gandhi introduces the concept of *satyagraha,* as well as where he claims that non violence starts with the self. The reason for this, is because Gandhi's methodology has been used as a model in historic civil movements, by activists who studied and executed his teachings, such as Martin Luther King Jr and Cesar Chavez. Utilizing Gandhi's framework in the context of community activists fighting

gentrification may provide a strategy, or even a solution, on how to organize and make change effectively, given that most efforts thus far have been to no avail.

I have seen first hand, the negative effects gentrification has had on my communities. My neighboring community of Highland Park, has been massively affected by gentrification, and the community I am currently residing in, Lincoln Heights, is currently experiencing the first waves of gentrification. These experiences are what have motivated this project.

A National Issue

The term 'gentrification' was first coined by sociologist Ruth Glass, in her book, *London: Aspects of Change*. It is here where Glass expressed her concern of middle class folks being displaced from their neighborhoods to the point where the "whole social character of the district is changed" (Glass, 1963). Glass's observations of these impacted London neighborhoods clearly captured the unjust significance of gentrification happening all over the globe. Since then, this sociological phenomena has evolved, and the term has been used to describe similar social situations, in which people are displaced and replaced by wealthier people. Additionally, because displacement looks different in every community, gentrification may also entail other sociological aspects, such as arts, music, local businesses and so on. In short, gentrification is the displacement of an economic and social class from a neighborhood/geographical area.

According to *Governing Magazine*'s data report where the Census' demographic tract data was analyzed, gentrification has increased by 11% since the 90's.[1] Like many other scholars, *Governing* recognizes that "researchers define gentrification differently" and therefore

[1] Governing 2015, accessed February 3, 2018.

their research was conducted by computing " growth rates [...] for eligible tracts' inflation-adjusted median home values and percentage of adults with bachelor's degrees" [2]. That is to say, this data report ranks the cities with the highest percentage of communities being gentrified in the United States, by utilizing the Census' Bureau's American Community Survey form the years of 2009 to 2013[3]. Their data report, places Portland Oregon as the number one city on the list at 58%; meaning, 58% of Portland Oregon's population are gentrifiers[4]. This data report concludes that the 4 cities Portland, Washington, Minneapolis, and Seattle, have 50% or more of their communities being gentrified. This inevitably means that numerous people are being directly displaced due to gentrification; their oppression has been swept under the rug in the name of "economic growth". In this report, Los Angeles ranks 27 and has been characterized by unprecedented patterns of gentrification that have been seen in Los Angeles.

The case study, '*Weak-Center' Gentrification and the Contradictions of Containment: Deconcentrating Poverty in Downtown Los Angeles,* conducted by Ellen Reese, Geoffrey Deverteuil, and Leanne Thatch, focuses on the poverty in Skid Row, as well as the effects gentrification has on social, welfare aid in Downtown Los Angeles. This case study begins with the focus on the initial signs of urban gentrification that were first seen in Los Angeles, and attributes such urban gentrification to local government policies and private capitals that further repress the poor[5]. The homelessness population in urban cities is high, and so, gentrification becomes a strategy to get rid of the homeless population[6]; specifically by relocating the homeless

[2] Governing February 2015, accessed February 3, 2018
[3] (Governing February 2015, accessed February 2018)
[4] (Governing February 2015, accessed Feb 3 2018)
[5] (Reese et al, 2010)
[6] (Newman and Wyly, 2006)

to much less densely populated streets. This case study also highlights how many urban cities follow this model throughout the US (Reese et al, 2010). Looking specifically at Downtown Los Angeles, they look at the population and demographics of Los Angeles as a whole. The population of homelessness is highest in Skid Row, which leads to local government to resort to deconcentration of the homelessness population[7]. That is to say, the government seeks methods such as gentrification, to alleviate the streets from the dense homeless population. Yet, on the flipside of the coin, in suburban areas gentrification displaces folks, resulting in a spike in the homeless population, being that those who are displaced from their homes often have nowhere to immediately go.

North East Los Angeles

Highland Park is a small community, minutes away from Downtown Los Angeles. Growing up here, Highland Park was predominantly Lainx folks. The shops down York and Figueroa Avenue were once a reflection of the Latinx community; now, Highland Park sits pretty on Vogue Magazine pages. Highland Park has now been nicknamed "Ground Zero" for gentrification[8].

The year 2014 was a historical one for Highland Park, as nearly 30 apartment buildings were bought out, and gained new owners[9]. This consequently lead to these apartment buildings being remodeled, increased in property value, and displaced the tenants that had been living there for years[10]. To break this down a bit further, Highland Park has the area of less than 4

[7] (Reese et al, 2010)
[8] (Bogado January 2015, accessed February 2018)
[9] (LA Times December 2014, accessed January 31 2018)
[10] (LA Times 2016, accessed January 31, 2018)

square miles, compared to Los Angeles area of 503 square miles[11]. Within this small geographical area, hundreds of residents were removed from their homes. This first big wave severely disrupted the community, and spiked the homeless population; many of the displaced families were faced with the ugly truth that comes with gentrification: homelessness[12]. Highland Park is no longer the ethnic oasis it once was, and it all happened within a matter of years.

The lack of a rent control policy highly contributes to the gentrification in Highland Park. One of the components of the policy of rent control, is that tenants who are being kicked out of their home without notice, mainly due to new ownership, must be financially compensated. The establishment of RSO (Rent Stabilization ordinance) secured buildings built prior to October 1, 1978 to rent and eviction regulations[13]. This means, buildings that were built post 1980, no longer qualify for rent control[14]. In the year of 2005, more than 9,000 apartments lost their rent control in Los Angeles[15]. This big loophole leads to vulnerable tenants who are not covered by RSO. By not being compensated when kicked out, tenants face a dehumanizing dilemma of being evicted without any resources nor financial compensation. The United Nations has declared housing to be a human right, and therefore these residents of Highland Park are being denied their basic human right[16].

Community members, friends, family members, were removed from their 20+ years home, and were left homeless. Because these tenants were a vulnerable group of community members, many of them non english speaking immigrants, they became an easy target to harass

[16] (Universal Declaration of Human Rights, accessed February 4, 2018)

and displace. And so, gentrification spread like wildfire. Buildings were being bought, and people were being kicked out. Arroyo Park by the 110 freeway exit was filled with families who had just been dislocated; it was all over the news for a few days and then everyone forgot about them[17]. Highland Park is no longer the neighborhood it used to be, in both demographic and economic respects. All the Latinx "Mom and Pop" shops have been replaced with yoga studios and trendy hipster bars, and overpriced services[18].

Those In Favor of Gentrification

There are those in the communities, who are not against gentrification. For communities such as mine, Lincoln Heights, gentrification is just beginning to ripple. The older generation seems to always give the same argument: gentrification makes communities safer and prettier. Although this may hold some truth to it, gentrification is a lot more complex, and will ultimately also displace those who are in favor of it. This has been seen in other communities; the demographics of fully gentrified communities are completely changed[19].

There is also negative backlash from the incoming folks, the gentrifiers and the investors. The narrative going around is that, they are fixing our neighbourhoods and increasing property value, and should therefore be thanked, and we, the native community, should be thankful for that[20]. This ideology perfectly reflects the confidence and position of power these new folks feel entitled to; they are not here to co-exist, they are here to take over.

Gentrification: The Incoming Neighbor

It remains vitally important to recognize the detrimental effects gentrification has on a community. These effects are as follows: displacement, segregation, homelessness, and ethnic erasure. The long term aftermath of gentrification, is something that is often overlooked, yet is still something incredibly serious.

Displacement can be seen in a wide variety of ways. Displacement can come about through: eviction, unaffordable rent spikes, and business replacements with high priced goods. Majority of the residents are low income renters. When a community in North East LA is being gentrified, property value starts to increase as the economic stew starts to simmer. This leads to mass displacements as property and land suddenly becomes a "hot buy". As seen in Highland Park, those who are being displaced oftentimes do not have anywhere to immediately seek refuge. Through this immediate form of eviction, homelessness becomes an outcome of gentrification[21]. Hardworking families who have been living in a stable home, suddenly face a violent and immediate form of homelessness, without any sort of transitional aid.

These families and people who have been affected by gentrification, must eventually find a place to go, but where do they go? The communities around them are also facing gentrification; they cannot go there either. The communities that are still affordable and in Los Angeles, such as South Gate, will then become highly populated, more than it already is simply because there is nowhere else to go; a shapeless form of segregation in the image of a ghetto without fences.

The same pattern that was seen in Highland Park is now being seen in my community of Lincoln Heights. Lincoln Heights is the neighbouring community to Highland Park; it is

[21] (LA Times, 2016, accessed February 2018)

borderline Downtown Los Angeles and Chinatown, leaving it to be a prime spot for hipster heaven. Here in North East LA, the first clear indication of gentrification was first seen when the local businesses started to change. I remember driving down Figueroa and York and realizing how fast everything was changing. These first trendy businesses to open up in these "up and coming" communities caused a ripple effect. These new businesses do not cater to the native community, and therefore a form of displacement, as not only do native locals now have to travel elsewhere for the goods that they require because their local shop has been replaced, the overpriced goods of these trendy new businesses are not in demand by the native community. The scene and the aesthetics of the community start to change as well. The old school taqueria is no longer suitable for the scenery of these new residents; the restaurant is bought out and turned into a new hipster bar or cafe[22]. These new businesses emerging also bring up the property value of the neighborhood, creating a wave of investors taking over property at the opportune time. This is also where the genuine, cultural aspect of the community also leaves; the authentic ethnic businesses are no longer being patronized, and so also go out of business. The businesses with the iconic decades old murals are suddenly bought out and painted over. Our art suddenly does not have a space in our communities anymore. All that is left behind is a community full of new affluent folks, and their trendy businesses. An instance of ethnic erasure is seen in Vogue's recent article "An Insider's Guide to Los Angeles's Highland Park" which was written in 2017, after gentrification took its toll in the Highland Park Community[23]. This article glorifies the new

[22] This literally happened in my neighborhood, where the historic *Tacos Chapalitas*, was replaced by *The Heights*, a trendy bar.
[23] Conrad May 2017, accessed March 2019

trendy and artsy shops in Highland Park, not once mentioning any remaining ethnic shops in Highland Park; it's as if our Latinx community was never there.

My community of Lincoln Heights is surely a prime contender for being gentrified next; the businesses on Broadway are already changing. These businesses include 'Vintage Music Shops', Cafes, Bars, Farmer's Markets, and Art Studios. I have lived here since 1998, and can say that Highland Park's experience of accelerated gentrification, will be the new trend for its neighboring communities. I say this, because these new businesses, the new incoming gentrifiers, have all happened within a matter of 4 years. The community consensus seems to be torn; there are those who are aware of the negative impacts of gentrification, as they were seen to our fellow community members of Highland Park, and there are those who believe that gentrification is the key to economically lifting low-income communities. We have seen that rhetoric spewed by our politicians, unaware that they too are digging their own grave; once the demographics of a community change, they will surely vote for someone to better represent them.

For the purposes of this Nonviolence Capstone thesis, we shall move on to the integral part of this project: implementing nonviolent methodologies, as a form of organizing efforts to fight gentrification.

Solution: Implementing Gandhi's Methodology

Gandhi's civil movements made historical waves and had long lasting impacts. Gandhi's method of nonviolence has been influential and used in historical social movements in the United States. In this thesis, we will focus on the efforts of Martin Luther King Jr, and Cesar

Chavez, as they both attribute their methodology in their civil disobedience tactics, to Gandhi himself[24].

These historical movements are important to draw upon, because the civil issues they were confronting were violent at times, just like gentrification in North East LA is facing right now. That is to say, gentrification is creating segregation within these communities, a clear form of structural violence. If the native local residents are being pushed out of their neighborhood due to changes occurring brought by gentrification, then these residents are forced into different neighborhoods. However, the neighboring communities are also being gentrified, which leads to the question: where do the displaced community members go? It seems that they would have to go to a neighborhood they can still afford, which pushes them into a low income, overpopulated, impoverished neighborhood. This aftermath caused by gentrification, creates a division, ultimately segregating those who are poor. If we look at Dr. Martin Luther King's response to segregation through his nonviolent social movements, we will find that oftentimes this resistance was in the form of nonviolent civil disobedience[25]. The same methodology can be applied here. One of the key components to Dr. Martin Luther King Jr's movement, was that of keeping everyone informed through his very powerful speeches. This allowed for everyone to be unified, informed, and on the same page, as well as creating solidarity for those who were being marginalized. This sort of unity, allowed for the successful organization of social movements in the form of civil disobedience. Dr. Martin Luther King Jr also kept those outside of the

movement aware of the issues his people were facing; communication to the opposing side is something that requires calculation. His letter from Birmingham Jail for example, created a platform in which those who were in power, in this case clergymen, to be informed and see the importance of his movements[26]. In this letter, Dr. King illustrates the importance of nonviolent civil disobedience: civil disobedience opens up the path for negotiation[27]. By creating a "crisis packed" situation, the door to negotiation will open, which can only furthers the agenda of nonviolent method[28].

There needs to be unity and clarity in the message of the movements in order to be successful. Much like Gandhi's Salt March and The Great March, or Cesar Chavez Worker's Strike, and the social movement in Africa led by Gandhi for example, started by unifying the Indian community first, and getting them all on the same agenda of non-violence before participating[29]. Gandhi established the notion of 'on-violence starting at the individual level; the individual must encompass nonviolence methodologies and practices. For Gandhi, this inevitably meant that a non-violent social movement on a larger scale, all of the participants are unified, both in following the message of the movement and upholding its nonviolent methods.

Upholding nonviolence methodologies is quite the disciplined sacrifice. This means that if the participants are faced with violence, they cannot fight back. Ultimately, Gandhi argues that this sort of peaceful reaction demonstrates how important the injustices the people are fighting

for are[30]. More importantly, because the protest was in a nonviolent way, the message will be able to be expressed on a larger platform; the world will start listening to the demands, allowing for rational negotiation. This is how Gandhi led the movements, rallies, and marches in South Africa; he started by teaching individuals the power of non-violence strategies[31].

Such efforts can be reinforced by nonviolent demonstrations such as a well-organized and well attended march with a clear agenda, like voicing that reinstating rent control for everyone and educating renters on their rights. Community members can also unify to boycott the in-coming businesses in the neighborhoods that do not cater to the already existing community. Much like the tea boycotts in India, or the grape boycott led by Cesar Chavez, boycotting businesses or a product, not only sends a message, but creates direct impact as well. Boycotting seems to be a successful form of nonviolence strategy and can absolutely be implemented in our North East Los Angeles communities, by boycotting gentrifying businesses and redirecting patronage to local businesses owned by members of the community, in order to preserve the culture of the community.

My best efforts in compiling a solution in addressing gentrification in North East LA specifically, is by following a '4-Step Nonviolent Process'. The four steps are as follows: Nonviolence within Oneself, Dialogue, Voting, and Boycotting. The protests in Highland Park for example, made other communities aware of the gentrification yet failed to have any beneficial impact in addressing the problem, it seems. This conclusion comes from the overall outcome of the amount of people displaced. Where did these movements and efforts of our locals

go wrong? I do not have an explanation for this all, but we can certainly assess, critique, and compare social movement strategies.

There were a couple of marches in Highland Park to protest gentrification[32]. Like most marches that happened, they were fueled by emotions, justifiably so. Oftentimes, these movements resulted in vandalism of the new hipster businesses that took over the community. This created a lot of tension between native locals and incoming residents. If we compare this to the nonviolent Salt Marches led by Gandhi, we can see that they both had a clear message, however, Highland Parks efforts were of course not within the nonviolent framework, and the question stands if non violence is the key for a successful social movement.

If nonviolence starts with the self at the individual level, one must refrain from the rhetoric of "us vs them", which is one Gandhi's main teachings; do not make the movement personal[33]. Recognizing this however, is very different from implementing. Specifically, asking folks who have been displaced, harassed, and dehumanized, to make a movement without making personal, will require a lot of conscious effort. Oftentimes, I have questioned whether this is possible or not, I am then reminded of the participants in Gandhi's, MLK, and Ceasar Chavezs' movements. I have often seen the mindset of "hipsters vs us", given that there is ethnic tension in the North East LA communities facing gentrification. This in itself, is a form of segregation, and a civil movement motivated by such ideals, will not succeed, according to Gandhi's teachings. This is because this sort of mentality perpetuates segregation and hatred, and

[32] https://boomcalifornia.com/2019/01/16/protesting-displacement-and-the-right-to-the-city/
[33] Chandel, Bhuvan. "Gandhi on Non-Violence (Ahimsa)." *Diogenes* 61.3-4 (2014): 135-42. Web.

restrains one from being nonviolent as well as gaining allies. This is why nonviolence needs to start with the self.

We will take a look into an instance when a social movement did not encompass nonviolent methodologies. If we look at the case of Amy Biehl, a student who was murdered in the riots of Apartheid South Africa, we see how hatred blidnly motivated the oppress. Amy Biehl was a fulbright scholar writing a thesis on Nambian independence and was an ally as she was working there as an anti-apartheid activist[34]. She was unfortunately murdered during the riots, and was immediately seen as a threat because she was right, without realizing she was in fact an ally. This segregated view on the issue of "whites vs blacks", perpetuated violence against an ally. This is why nonviolence starts with the self, so that a civil movement does not carry out violent actions.

Non-violent methods include an honest dialogue. It seems like facilitating an open dialogue of gentrification and creating dialogue among the residents in an open forum so as to educate the community on renter's rights, and to bring awareness to the incoming community on their contribution of displacing community members. Community council meetings, for example, can be used to engage and encourage members in the discussion of nonviolent movements and what they entail in order to be successful. Such meetings can underscore the need for the involvement of the whole community to launch a unified response to people in power who make decisions in favor of gentrification. Nonviolent movements require involvement, and this means that the whole community needs to unify and participate in dialogue at community meetings, where people in power, such as neighborhood councils, are present.

---

[34] Jwili, Helen, et al. *Long Night's Journey into Day: South Africa's Search for Truth &Amp; Reconciliation*

These community dialogues must also include the gentrifiers, as inclusion is another part of a nonviolent social movement. Looking at the civil rights movements, specifically that of the *Lunch Counter Sit-Ins*, reveals the importance of having allies in a social movements[35]. White allies helped the protesters prepare for the lunch counter sit-ins, as well as helped spread the message of what was going on leading to a larger platform to voice the issues at hand[36]. It is a given that not all gentrifiers will be allies, nevertheless including them in these dialogues may create allies out of people who once were not.

Voting is a nonviolent tool that can further create progress for the community. It is imperative to also take legal matters back into the hands of the community members. This can be done, by bringing back rent control onto the ballot. Additionally, voting representatives who recognize the detrimental effects of gentrification, would add a layer of protection to the rights of the natives of these North East LA communities, because currently our district representatives do not view gentrification as a threat. Allies are a key feature in this process as well, so that they can vote with the community, and help protect our culture and rights.

Lastly, a more direct form of action is that of boycotting incoming businesses, in order to protect already existing ethnic businesses. The Ceasar Chavez grape boycotts for example, brought awareness to the injustices the farmworkers were facing, and also allowed allies to participating in this movement, by also boycott these companies[37]. Similarly, by boycotting the incoming gentrifying businesses, we allow others to participate in the efforts against

gentrification, as well as directly fighting gentrification. This will inevitably mean that allies are necessary to carry out this form of civil disobedience. Which is why, dialogue must first take place before direct action ensues. It is important to send the message to those who want to be allies, that moving into an ethnic community must result in embracing the culture, rather than replacing. This would include patronizing ethnic businesses, and boycotting incoming, high priced businesses that contribute to ethnic erasure. Those gentrifying businesses that have already taken over the community, must also hold accountability for their contributed displacement, and must foster a welcoming atmosphere for local natives in their spaces, because oftentimes that is not the case.

Conclusion

It is important to note that my efforts for this thesis render a basic synthesis and analysis on gentrification in North East Los Angeles communities and applicable nonviolence methodologies to address gentrification in these North East Los Angeles communities. Gentrification can and should be addressed in many different ways, from legal laws, to social movements. The key component is that it must be in the framework of nonviolence, as a whole, and at the individual level. The community also needs to recognize that allies are important and a key component in successful civil movements.The urgent injustices that arise out of gentrification nevertheless, such as homelessness and segregation, are reasons why gentrification should be immediately recognized as a threat to our communities. Our East Los Angeles Natives deserve a home and safe space to call their own. Our humble vulnerable minorities have the right to housing without the constant fear of being displaced by those who fail to see them as humans.

With this framework, addressing gentrification and protecting those negatively affected by it, is a realistic possibility.

LA Times

As gentrification closes in, immigrants in Lincoln Heights find their American dream slipping away

Mejia, Brittny; Mozingo, Joe; Castillo, Andrea . Los Angeles Times (Online) , Los Angeles: Los Angeles Times Communications LLC. Apr 3, 2018.

ProQuest document link

ABSTRACT (ENGLISH)

Steve Kasten, a commercial real estate agent who opened his office on North Broadway 35 years ago, said it's natural that Lincoln Heights is the "new phenomenon" as people are squeezed out of the neighborhoods to the north and west. The housing crunch is fueled by a national population bulge, with the millennial generation entering the housing and rental market on the heels of the much smaller Generation X. At the same time, the previous big generation, the baby boomers, are staying in their homes longer. In such a small room, her life outside the building became more important — her interactions with the grocery clerk, cooking for the needy at the Buddhist temple on Broadway, her morning walk with friends around the lake in Lincoln Park. The mile-long strip was still mostly filled with bargain stores, money transfer businesses, hairstylists, florists, shoe repair shops, old bars, Mexican and Chinese cafes, fast-food restaurants and chain pharmacies.

FULL TEXT

Fidela Villasano's entire world was upending.

In August, her landlord sold the tiny clapboard bungalow where she had lived for 55 years, and the new owner notified her that he wanted her out in the next few months.

Like so many in Lincoln Heights, this tiny, rawboned 89-year-old woman had lived through a time of gang violence, high crime and police oppression. She never expected to be forced out by real estate values.

But, with just $900 a month from Social Security, where in Lincoln Heights could she afford to live? Where in Los Angeles?

Villasano's ouster had been 30 years in the making, since moneyed interests began combing through the hills of Silver Lake, Echo Park and Hollywood looking for fixer-uppers. They quickly turned scruffy neighborhoods into well-appointed, artsy enclaves for professionals with Audis and six-figure incomes.

In the last decade, gentrification grew closer to Lincoln Heights, transforming downtown L.A. and Chinatown on one side, and Eagle Rock and Highland Park on another. To the people getting squeezed out, the white hipster became the avatar for the invasion. Now he was knocking on the door of Villasano's 103-year-old home.

The Times spent months exploring one of Los Angeles' oldest neighborhoods and immigrant strongholds at a time of heightened anxiety over the Trump administration's threats to deport immigrants in the country illegally. Among the 74% of residents who rent in Lincoln Heights, the fear of eviction was just as consuming.

The gentrification in and around central Los Angeles has made Lincoln Heights a prime target for investors. It sits just a mile and a half from downtown and has its own walkable commercial district on Broadway. The views from its hillsides at night rival much wealthier perches in the Hollywood Hills or Mount Washington. And its streets are lined with apartments ready for renovation and sought-after "character homes," to use real estate parlance —old Victorians and Craftsman bungalows.

When the Eastlake Avenue bungalows' new owner first started coming around last year with contracts to vacate voluntarily, Villasano and others in the four courtyard units consulted one another on whether they would sign.

Israel Jinez hadn't planned to sign, but he eventually did when a neighbor did. The new owner, a Brentwood man, offered them $20,000 to vacate so he could renovate the four bungalows with no one in them.
Jinez, who had lived there for seven years, asked to have until Jan. 1 so he could try to find a new place for him, his wife and their 2-year-old daughter.
He searched throughout Lincoln Heights and Echo Park, where he'd once lived, hoping to stay close to his job as a bartender and cashier in Hollywood. A year earlier, though, his employer cut his hours back to 60 a month, so he was bringing in just $600.
He couldn't find a rental below $1,500 for a single, nearly double the rent on Eastlake Avenue. The $20,000 would cover that difference for two and a half years.
"We're not going to find anything cheap anywhere here," Jinez said.
Villasano lived with her disabled son. When she first moved there in 1962, she paid $40 a month, and last year she paid $640 a month. She worked for 35 years in Mexican restaurants and puts the money from Social Security toward rent and bills.
After more than half a century, her routines were etched into this neighborhood: the daily walk to McDonald's for morning coffee, afternoon chats with a friend in the courtyard, tending the grapevine she planted decades ago, her Sunday trek to Sacred Heart Church.
"I don't have anywhere to go," she said. "I want to stay where I am."
She didn't fully understand why she had to go. Her son signed the agreement. She had no choice.
In January, she and her family moved into a two-bedroom house in Boyle Heights for $2,000. But she must climb stairs and has no bedroom. At night she lies on a couch, disoriented and unable to sleep. For weeks, she returned to her old house in Lincoln Heights every morning.
She would stop at the McDonald's for her coffee. Then, she would walk over to the courtyard of her bungalow and sit in her plastic chair, talking to her neighbor and waiting for her dog, which escaped before she moved. On a recent day, she watched workers pull out a bathroom sink and drawers from her longtime home, tossing them in a trash pile.
***
Chris Vielma, 36, gets about 20 calls and several letters a month with offers to buy the green bungalow that his father, an immigrant from Mexico, bought from an Italian family in 1967.
One wanted the 89-year-old home next to the 5 Freeway as a starter house for his daughter and asked Vielma to name a price. Others have offered as much as $600,000.
Vielma doesn't plan to go. There are too many memories here —his dad planted the mango tree and rosebushes in front. Also, he loves the neighborhood and its history. He just hopes it doesn't change too much. Many of the residents around him, even in the single-family homes, are renters who would have no choice if a buyer came along and wanted to move in themselves.
"I'm all for improvements, but how are they making it better by getting rid of some of the people who enjoy being in this area?" he said. "For those who have heart in it, they really work hard to live where they're at."
Others say the change is inevitable. Steve Kasten, a commercial real estate agent who opened his office on North Broadway 35 years ago, said it's natural that Lincoln Heights is the "new phenomenon" as people are squeezed out of the neighborhoods to the north and west.
"If it changes the makeup of the community …should you stop it? How can you?" he said. "That's free enterprise, and the marketplace dictates what people want."
The housing crunch is fueled by a national population bulge, with the millennial generation entering the housing and rental market on the heels of the much smaller Generation X. At the same time, the previous big generation, the baby boomers, are staying in their homes longer. All of this is causing a housing shortage —an acute one in Los Angeles, where rent eats up 37% of average household income, compared with 27% nationwide.
While longtime homeowners have benefited from the rise in property values, renters —many in the neighborhood for decades —are being displaced.

Some have moved inland to San Bernardino, Hemet and Victorville, the last stock of relatively affordable housing in the region, or even farther, to Las Vegas and Phoenix.
Some move to South L.A., where prices have not risen as dramatically as they have on the Eastside.
Others pack more people into smaller apartments. A number have moved back to Mexico.
In Boyle Heights, activists have protested new art galleries and coffee shops.
But in Lincoln Heights, the trend has met little resistance. When the Heights Deli &Bottle Shop replaced a popular meat market on Broadway, offering more than 350 top-rated wines and craft beers, the complaints stayed within social media and neighborhood chatter.
Dave Mull, 29, was one of the young newcomers —a skateboarder from Vermont who works at Trader Joe's and films skating videos. In 2015, he moved into a house off Moonstone Drive, splitting the $2,400 monthly rent with his two brothers and another roommate.
In the year after he moved in, his landlord raised the rent a couple hundred dollars, but compared with other parts of the city, it was still a deal. When Mull wasn't working, he was filming around the neighborhood with his friends or hanging out at the Heights deli.
"I feel like a lot of people are moving over this way," Mull said. A friend found a studio apartment, and his girlfriend's co-worker found a place off Daly Street. "It seems like people are kind of scooting over from Silver Lake and down from Highland Park, because that's being gentrified now."
Like other newcomers, he felt conflicted over the question of whether he played some small role in pushing people out just by moving here.
Although Mull moved in with his girlfriend in Los Feliz in January, his brothers still live in the house in Lincoln Heights.
"It's definitely ideal for skateboarders to be kind of low key and manage to be so close to downtown and pay so little," he said.
But "so little" is a relative term when people of so many different means are colliding in one neighborhood.
Yang Ya, 87, would be out on the streets if she had to pay what Mull paid —and she almost was last year.
She lives in a single-room unit, 8 feet by 15 feet, with communal bathrooms and a kitchen down the hall. Her rent is $362. The widow, whose husband was killed in an American bombing in Vietnam, survives on $900 she gets monthly from Social Security.
When Yang, who is Vietnamese Chinese, arrived in California from Vietnam, she worked in Lincoln Heights garment factories, trimming loose thread for $15 a day.
When she moved into her building on Main Street 17 years ago, her rent was $170 a month. The bottom floor was a garment factory, with eight single-room occupancies above, rented by five other Cantonese speakers, one Korean and one Spanish speaker. She relished being independent from her son and daughter-in-law, with whom she had been living. And she could take the bus to Chinatown to shop, see the dentist and doctor, and visit friends.
Yang retired at 80. In such a small room, her life outside the building became more important —her interactions with the grocery clerk, cooking for the needy at the Buddhist temple on Broadway, her morning walk with friends around the lake in Lincoln Park.
A little over a year ago, she read an eviction notice on her front door.
The owner wanted to modernize the apartments and get higher-paying tenants.
Panic hit. Most of the residents were in their 80s and 90s, and didn't know how to look for new housing. One of the younger tenants, in his 60s, searched for apartments and reported back that the cheapest rent was $600 to $800.
"I couldn't sleep at night," Yang said. "I thought about it all day, every day."
Her son and his wife lived with their grown children in an already overcrowded apartment in Monterey Park. She would have no bedroom if she moved in with him. She dreaded the idea of losing her independence.
Fortunately, one of her neighbors learned that a group, Chinatown Community for Equitable Development, was helping renters in the area challenge evictions. With its guidance, the residents banded together and met with the owner.

After months of negotiations, the landlord backed off, allowing them to stay with a small increase in rent and a new rule that the tenants had to clean the communal areas themselves.

The battle over gentrification has been waged mostly in the dim corridors of rent-controlled apartment buildings like Yang's. Nearly 80% of apartments in the ZIP Code that includes much of Lincoln Heights are rent controlled, meaning landlords can only raise the rent about 3% every year on current tenants. The law places restrictions on landlords seeking to evict tenants in order to charge even more.

The average amount paid by renters in Lincoln Heights is $1,024 a month, according to census data. But the average rental on the market is $2,439, up almost $800 in the last four years, according to research conducted by Zillow.

Among the legal options available to landlords is converting rentals to condos, in which case they can legally evict tenants but must offer relocation assistance. Landlords also can try to persuade tenants to leave voluntarily, often with cash buyouts. Another option is to claim the tenant violated terms of the lease.

Small violations overlooked during weak rental markets often become an easy means to an eviction.

In February, 10 months after a Calabasas real estate firm bought her building on Sichel Street for $1.8 million, tenant Santa Moreno got a notice to "pay rent or quit," claiming she was late.

Moreno, 51, shared the one-bedroom apartment with her husband, her pregnant daughter and her daughter's boyfriend. They paid $1,030 a month, plus utilities. They had low-paying jobs —she was a housekeeper, her husband sold tacos from a cart —and her daughter received disability payments for a hearing impairment. They struggled to get by but said they paid their rent on time every month.

She said she sent the company, Elite Holdings, copies of the MoneyGram receipts showing the payment was made on time. Nevertheless, the new landlord filed an "unlawful detainer," which is a legal way to evict someone who hasn't paid rent.

Moreno and her family went to court June 9 to fight the claim.

At the courthouse downtown, Judge Lisa K. Sepe-Wiesenfeld addressed the Morenos and nearly 80 others who had come to contest eviction notices.

"We are going to urge you to consider settlement seriously," she said. "You can see how full the courtroom is here. Some people come three or four times just to be assigned a trial. You've spent all day here. That means you've missed time from work, school, family."

Her message to landlords: If you don't settle, you could be stuck with a troublesome tenant for years. And she told tenants that if they lose their case, their wages could be garnished and they would be stuck for 10 years on an "evicted" list visible to future landlords.

Moreno's name was called, and she and her family moved to the cafeteria to negotiate with the landlord's two attorneys.

"Are you going to move or are you going to stay?" one of the attorneys asked.

"We want to stay," Moreno said.

"They don't want you to stay, no matter what," the attorney countered.

Both sides returned to court to say they could not reach an agreement. Moreno tried to show her paperwork to the judge, who told her she'd have to wait for a trial.

Moreno decided not to fight, and she promised to be out by the end of August in exchange for a free month's rent and $2,000.

**

Dr. Bob Baravarian, a foot and ankle surgeon and a founder of the Westwood real estate development firm Neilson Hammer, was looking for "new, up-and-coming neighborhoods." He found one in Lincoln Heights.

In Broadway's vintage storefronts, he saw the potential for new cafes, bars and boutiques. The mile-long strip was still mostly filled with bargain stores, money transfer businesses, hairstylists, florists, shoe repair shops, old bars, Mexican and Chinese cafes, fast-food restaurants and chain pharmacies. But investors were slowly making inroads. The Heights bottle shop came first, followed by the B Twentyfour coffee shop and then a gastropub,

Lincoln Kitchen &Tap.
In August 2016, Neilson Hammer purchased a 20-unit brick apartment building on Broadway for $2.05 million, twice the property's assessed value.
Baravarian said the 90-year-old building had "good bones" but was a "disaster inside." He said that the wiring and plumbing were ancient and corroded, and that the building should have been gutted 20 years ago.
That's what he planned to do, in order to rebuild midrange apartments. "There's a need for buildings in all levels, and our goal is to supply the mid-level to upper mid-level building," he said.
Baravarian conceded higher rent was the "double-edged sword of renovation" and "has gotten a bad name in the community, because quote 'you're kicking the poor tenants out.' "He said his firm tries to help displaced renters find new places and gives them time.
"We do it on a very friendly basis; we don't force anybody out," he said. "Sometimes it takes months, sometimes it takes three years to …give them the time and effort they need to move."
The tenants pushed out of the building, though, describe a far different experience.
Martha Ponce, 66, was paying $842 for her one-bedroom apartment she had shared with her husband for nine years.
Two months after Baravarian's firm bought the building, they received a "cash for keys" contract to vacate the building in 45 days for $1,250.
Ponce she wanted to stay in the area —her 63-year-old husband worked as a cook nearby at USC's Keck School of Medicine. But they could find nothing in their price range.
The owner had hired a property manager, NBK Realty Management of Sherman Oaks, to get the tenants out. Lena Salameh, property supervisor, led the effort, with a young man translating for the Spanish speakers, Ponce said.
"In the beginning, she was so nice, saying, 'You should get out because these owners are offering you $1,250, and if you don't take it, you're not going to get anything,' "Ponce said.
Many felt they had no choice but to vacate. Fifteen of the 20 families took the $1,250 and left before the deadline.
Ponce signed the contract but realized she could not find a place in time. She contacted the same group Yang had, Chinatown Community for Equitable Development, which set her up with a legal aid attorney to advise her of her rights and negotiate with the landlord.
NBK started posting notices on her door that the sheriff would come to evict her.
Jose "Pepito" Viramontes Ruiz, 79, and his wife, Maria Elena Bobadilla Aguilar, 84, had lived together in their apartment for 36 years. Bobadilla used a walker, and Viramontes was blind. He was a locally famous Mexican ballad crooner, known as "Señor Pepe," who sang at swap meets and El Amigo Cafe.
"Maria and Pepito signed the papers without knowing what it said," Ponce said.
The couple joined Ponce, Consuelo Olvera and two other tenants to fight for more time and money. They posted notes on their doors asking not to be bothered by NBK and to contact their lawyer with questions. Olvera had signed the document to move out but hadn't known what it was, she said. It was her son who later told her what she had signed.
"It bothered me to know that he made an idiot out of me," Olvera said of the NBK representative, "signing a paper that I shouldn't have signed."
When Neilson Hammer offered $5,000 to leave, she agreed with her son to take it.
The others also worked out better deals. Viramontes and Bobadilla received around $20,000, including several months of free rent. Ponce got $15,000 and stayed until April.
Ponce found a much smaller studio apartment nearby that, with utilities, costs her about $500 more per month than she paid before. She had to leave furniture behind —a glass table with chairs, a dresser, a kitchen island —because none of it would fit. She and her husband quarrel in the small quarters. She put up a divider so she doesn't have to look at the kitchen from her bed.
"Here I feel like I'm in a cell," she said. "I take the dog walking. I never walked the dog so much, because I need to get out."

Viramontes, meanwhile, no longer sings his ballads at El Amigo. Failing to find anything affordable in the area, he and his wife, Bobadilla, now live in Tijuana with her son, hoping they can move back home one day soon.
Neilson Hammer never renovated the property. On Oct. 11, the firm sold it for $3.5 million —a $1.5 million profit —to a group of investors.
The main reason, Baravarian said, is that “Lincoln Heights hasn’t really developed the way we thought it was going to develop.
“Lincoln Heights hasn’t had that pop yet.”

A local homeowner's perspective: DIR-2019-6048-TOC-SPR-WDI-1A

Clarence Naylor <clarence.naylor@gmail.com> Mon, Sep 28, 2020 at 3:09 PM
To: cpc@lacity.org

Hi LA City Planning Commission,

I'm a homeowner at 3534 Griffin Avenue in Los Angeles, around the corner from the proposed Pinyon Group development at Ave 34 / Pasadena Ave.

I found out about this initiative from a neighbor and became encouraged the more I researched it. I also contacted my Concilmember and now you directly.

I've lived in the community for two and a half years and have come to know a lot of residents. My one neighbor has lived there since 1995 and another other since 2001. I've learned there has been pressure from investors to buy up housing inventory, and flip it. The community is accepting and understands that everybody needs a place to live, but there is an underlying reality that good housing is in short supply.

I am supportive of the project as the community desperately needs more housing options. It's *unthinkable* for this project to be blocked when good housing is so badly needed and there's the space for it. Other reasons I support this project are:

- We have safety issues in the community, including gang activity. By taking vacant warehouse land and replacing it with residents will enhance the neighborhood and it's development
- The local economy requires this development. Local restaurants, like Gamboge on Broadway in Lincoln Heights, which opened during the pandemic have seen dramatic decreases in their patronage. Other restaurants along Broadway and Figeroa are saying the same thing. It will be a years long recovery and we cannot afford to turn away new middle income residents
- Access to transit, there are only so many sites that are close to the Gold Line in the area. Prior to the pandemic I would use the Gold Line to get DTLA and sometimes as far as Hollywood (through the Red Line transfer). It's a unique opportunity to have a development site that's mere feet away from transit. This supports not only the environment, but also our transit infrastructure

I urge you to strongly consider approving the 34th St / Pasadena Ave development and hope my thinking has been useful. Thank you for the work your team does in making Los Angeles a great city to live and work and please let me know if any other information would be helpful.

Thank you,

Clarence Naylor

FIX THE CITY

September 23, 2020

Via Email:

Nicholas.Hendricks@lacity.org, James.K.Williams@lacity.org

RE: OPPOSITION TO DIR-2019-6048-TOC-SPR-WDI-ENV-2016-273-MND-REC1

Dear Mr. Hendricks and CPC Members:

It is my understanding that this project was denied by CPC and sent back for more community outreach. Fix the City wishes this letter of opposition to be included in the record for this project. We respectfully address the following concerns regarding both the TOC requests and reliance on an MND (for a different, earlier project) for such a massive project.

A FULL EIR IS REQUIRED

In the name of environmental justice, this community deserves to have the full disclosure and analysis of adverse environmental impacts as promised to all Californians through the preparation of a full EIR that in particular, addresses the issues of toxic contamination, public safety (level of service including response time and staffing) for LAFD and LAPD, and the impacts on the narrow local street system..

Please provide a definition or standard by which the City determines whether infrastructure and emergency services are adequate.

ENFORCE THE LABOR STANDARD

The Planning Department has failed to enforce Measure JJJ's Labor Standard (Section 5) by granting discretionary incentives that were not authorized by JJJ and only available through Section 5, which requires compliance with the Labor Standard and training and local hires. The discretionary/additional incentives approved for this project are only available to Section 5 projects under Section 5(e).

Fix the City calls upon CPC to enforce the Labor Standard for this project, including the training program for local hires. In the name of social justice, the good jobs and prevailing wage promised by JJJ must be provided to East LA. This project could bring hundreds of good jobs to East LA. But it is not in compliance with the Labor Standard of JJJ (Ordinance No. 186483).

JJJ DID NOT AUTHORIZE TOC TIERS

The calculation of increased FAR and density for TOC projects is required to be determined by **the base zone and density** (LAMC 12.22 A31(b)(2)(i) and **not** TOC Tiers. TOC Tiers are based on distance from major transit stops and not as the Initiative requires, on the base zone and density. Therefore, the entire calculation of base incentives was unlawful and must be revised. The revision will require basing

increased density and FAR on base zone and density, and hopefully, require a much larger amount of affordable housing than currently required.

JJJ DID NOT AUTHORIZE DISCRETIONARY/ADDITIONAL INCENTIVES FOR TOC

JJJ Section 6 is limited to two or three ministerial incentives "described herein" in the Initiative ((LAMC 12.22 A.31(b)): 1) increased density, 2) increased FAR, and 3) reduced parking. CPC lacks authority to augment those incentives by approving discretionary incentives that were not described herein and not approved by the voters. The approval of additional/discretionary incentives not described herein violates City Charter Section 464(a).

Only the voters can modify TOC incentives. However, "discretionary" or "additional" incentives can only lawfully be accomplished through Section 5 of JJJ, which requires a public notice, public hearings, established findings and robust environmental scrutiny.

Relief from the City's **Transitional Height Ordinance** was not approved by the voters in JJJ. Therefore, approval of the TOC Guideline Transitional Height requirement for this project is unlawful and in violation of City Charter 464(a).

Likewise, approval of RAS3 yards was included in JJJ Section 6. Therefore, this approval must be rescinded.

Fix the City urges CPC to deliver the promise of JJJ to deliver more affordable housing, not token amounts, and by enforcing the Labor Standard for any project seeking discretionary/additional incentives.

Sincerely,

Laura Lake

Laura Lake, Ph.D.

RE PROPOSED LUXURY APARTMENT NEXT TO OLD TOXIC WASTE DUMP

Jamie Patterson <jamie.epatterson@gmail.com> Mon, Sep 28, 2020 at 3:04 PM
To: GILBERT.CEDILLO@lacity.org, CPC@lacity.org

Hi Im contacting you to demand a new environmental study to assess the impact that building a proposed luxury apartment structure next to a toxic waste dump (land that was deemed to toxic to ever build on) will have on the community surrounded pasadena ave and ave 34, especially the elementary school across the street (and multiple other schools only blocks away!)

That the community was denied a public hearing about this is appalling and the entire thing reeks of bribery- especially as this was a project approved by the planning commission when two city council members on that commission have since been indicted/convicted for just that.

This project on its own is terrible for the community-lack of proper parking (only 286 parking spots for a building with 468 units) and only 14% will be affordable for the community, the idea of building something this monstrous on that corner next to land that was essentially a toxic waste dump is appalling.

Please protect the health and community of your constituents, demand an environmental impact study before this goes anything further.

135 Avenue 34 Proposed Project

Martin Barrera <mbarrera@laleadership.org> Fri, Sep 25, 2020 at 12:27 PM
To: cpc@lacity.org, gilbert.cedillo@lacity.org, gerald.gubatan@lacity.org

DIR-2019-6048-TOC-SPR-WDI-1A
ENV-2016-273-MND-REC1

Hello,

My name is Martin Barrera . I am a teacher at Los Angeles Leadership Academy High School in Lincoln Heights.I am emailing today to express my disapproval regarding the proposed development project on Avenue 34 in the Lincoln Heights community.

In my 7 years of teaching in this community, I have had many students leave our school due to the skyrocketing prices in rent. Many families cannot afford to stay in their homes and affordable housing in the community is scarce.
This proposed project to construct a high density luxury apartment will only exacerbate this growing issue. Although the developers claim to make 14% of the apartments available to low income renters, the targeted income ranges for this designation are still higher than the median household income of the community. Therefore, their efforts to address housing inequality in the community are performative at best. Given the available data on rising homelessness in the adjacent Highland Park and Boyle Heights, it is critical that developers invest more time and energy to analyze the housing landscape and the drastic impact this project will have on the working class people who live here.

In addition, the proposed project seeks to break ground on a site adjacent to a known toxic dumping ground. Maps and scientific data show that these chemicals have permeated into the groundwater which currently flows into the proposed subterranean parking garage for the luxury apartments. That entails that excavation will indeed unearth this toxic groundwater and expose the neighboring residents to carcinogenic fumes and toxic particles that have sat in the soil for decades. Not to mention that the site is also across the street from Hillside Elementary which will undoubtedly impact the health and well-being of our youth and their families.

There, I demand you listen to community feedback and halt this project before it can do any damage to the people of Lincoln Heights. The residents of this community deserve a better housing option if they are truly to be considered as stakeholders in this project. That will require true mediation and not corporate efforts to ameliorate dissent. The working class people of Lincoln Heights deserve compassionate,data driven proposals by developers who take the time to incorporate community feedback.It takes a deep level of cooperation to effectively create sustainable living conditions that benefit the neighborhood and the city.

Sincerely,

--

Dear City Planning Commissioners,

I am writing as a local property owner, employer, and member of the Lincoln Heights Business Improvement District (the BID) in support of the appeal to this project.

Case numbers:
DIR-2019-6048-TOC-SPR-WDI-1A
ENV-2016-273-MND-REC1

Our 124 Year old Los Angeles based Company made a substantial investment in our Lincoln Heights headquarters 15 years ago where we now employ over 100 associates who live and work in our immediate area. As a community we have formed our BID which works tirelessly to maintain our community where the City simply can not.

While we absolutely support additional affordable housing in the area, we are very concerned about this development (as currently proposed) at 135 W. Avenue 34 and its potential impact on our community and the current residents and businesses herein.

Our concerns remain centered on the parking, traffic, pedestrian safety, and environmental contamination potential arising from the proposed excavation and development.

The community simply does not have the infrastructure required to reasonably accommodate the projected 1,400 plus new residents and their vehicles without causing harm to established business and residents that have supported the area for decades. Adequate streets and sidewalks are simply not present to serve a development of this magnitude. A simple site walk will verify this.

We have repeatedly reached out to the developer who has provided absolutely no acknowledgement of the community's concerns... much less a plan to substantially address and remedy the concerns. We have invited the developer to provide solutions and none have been forthcoming. We have made suggestions such as relocating the ingress egress away from the Ave 34 Alley and onto Pasadena Avenue where a driveway apron already exists. Our suggestions have been completely ignored. I have attached a photo of the current planned project exit into Avenue 34 / Artisan Alley....which has no sidewalks and is bounded by the Gold Line and another property.

In addition to the congestion issues, when we built our project on Ave 33, we were held to strict compliance from the DTSC due to the presence of PCB's and other contaminants in the soil and groundwater in the area. The groundwater level has changed substantially over the past 90 years when the maps were made. We spent millions to bring our warehouse project into compliance.

The subject property on Ave 34 is surrounded by properties documented to have contaminants and in fact sits right in the groundwater plume between the Welches site to the North and our Site to the South. There are additional monitoring wells on adjacent and nearby properties.

I simply ask that the commission require specific DTSC approval for the excavation as currently planned (it has changed since the original plan was submitted in 2017) to assure the community that we, as neighbors..as well as the school across the street, are not at risk from this pending excavation and residential development.

These seem to be very simple issues;

1. Address the traffic, parking, and pedestrian safety issues.
2. Change the project exit from the Ave 34 alley with no sidewalks to the Pasadena Avenue existing exit.
3. Certify that the DTSC has approved the development and that there is no environmental risk to the community.

Address the above and build the project....we will welcome new neighbors... but the project should safely fit into the community, the community should not be steamrolled into accepting a giant project without reasonable community cooperation by the developer.

Dear Councilmember Cedillo,

I write in solidarity with our neighbors and the larger Lincoln Heights community to express my deep concern regarding the proposed plan for 141 Avenue 34. We run a small business on Pasadena Avenue and Ave 34 (with our main entrance on Avenue 34), which has already been impacted by the economically crushing events of Covid-19 in the last two months.

In reviewing the proposal, I am compelled to voice my strong concerns about the insufficient plans for a singular point of egress on Avenue 34 and Artesian avenue, which is already narrow and limited. This plan as devised proves to create both a potentially dangerous and overwhelming traffic scenario within the narrow confines of a residential street. I am also deeply concerned about the impact on street parking that this project proposes, with almost 500 units being serviced by just over 300 parking spots. The obvious overflow this would create stands to dramatically disenfranchise surrounding businesses and residents from reasonable access to their long time homes.

Finally, I have very serious concern about the environmental issues associated with the site slated for the parking structure for the development. This is an issue that requires due diligence and rigorous attention. Proceeding with approval of this project without conducting a thorough investigation, soil tests, and exploratory research about the potential dangers and long term impacts on the environment and health of surrounding residents would be reckless, willfully negligent, and to my mind, unlawful.

I am invested in Lincoln Heights as one of Los Angeles' most precious, vital and historically relevant neighborhoods. Its residents have already suffered a significant blow by the events of this current pandemic, and this project stands to endanger their livelihoods and daily experience even further. The site of the proposal is flanked by generations of long time residents, small businesses, schools, and a vibrant community. It is a moral and ethical responsibility to consider the welfare and best interest of the community. Please allow a forum for the community's concerns to be heard, and investigate and disclose the results of this research prior to approval.

Thank you for your time and consideration. I hope you are staying safe in this uncertain time.

Amanda Ross-Ho

Artist, Amanda Ross-Ho Studio, Inc.
Associate Professor, University of California, Irvine

Hello Michelle,

I hope that you're staying healthy during this difficult period. I'm writing to voice my concern regarding a proposed project adjacent to our small business, located at Avenue 34 and Pasadena Ave in Lincoln Heights. Members of our community are struggling for economic survival during the pandemic crisis, and we fear that there are numerous inevitable complications of this project that would further impact the safety and security of neighborhood residents and workers.

In particular, I am deeply troubled by the potential environmental hazards that this project will entail. Longstanding issues with ground contamination on the adjoining property have resulted in that lot's longtime vacancy; in my understanding, the development of an underground parking structure here would result in extensive excavation of this dangerously compromised soil. Thorough environmental testing and further studies of the potential health impacts of this construction are absolutely critical, and mitigating danger to surrounding occupants must be considered.

Further, the proposed plan provides insufficient solutions for the dramatic increase in traffic that would result from the singular point of access to the development at Avenue 34 and Artesian Avenue. As proposed, nearly 500 new units would be serviced by just over 300 parking spaces, meaning that the surrounding streets will likely be inundated with an overflow of vehicles that will create complications for existing residents in regards to parking and access to their homes and businesses.

Our commitment to our neighbors and our community requires that we more carefully and meaningfully account for the needs and concerns of its most hardworking and vulnerable members. Please help us honor this position via an open and transparent process that elevates the voices of our current residents, and with a more exhaustive examination of the potentially disruptive aspects of the project. Thank you for your time.

Erik Frydenborg
Erik Frydenborg Studio

Hello Jose,

I'm writing you with my serious concerns regarding Pinyon's proposed project on W Avenue 34 in Lincoln Heights. Both my family and myself are deeply embedded in the Lincoln Heights community, and specifically the block directly next to this proposed project. My grandfather worked at sewing factories in Lincoln Heights in the 1960's, and then opened his own swimwear factory at Pasadena Ave and W Avenue 33 in the '70's. My father took over the family business in the '90's, and now I operate a business on Ave. 34 directly across the street from the proposed project. My family's history with the neighborhood gives me specific insight into how this proposed project would affect our community.

I fully support adding affordable housing units in our neighborhood, and know that there is a real need for more housing in Los Angeles. However, we need the help of our city to ensure that developers respect the health and safety of our community.

I have two main concerns about this project. The first one has two elements, that when combined will create a dangerous situation on Ave 34, 33, and Artesian. The project proposes 311 parking spaces for shared by nearly 500 residential units and 16,000 sq. ft. of retail. We have been attending Neighborhood Council meetings and trying to communicate with Pinyon. The one time that they showed up to a meeting, our first question was for them to explain the shortfall in parking, and how they thought the neighborhood could support it. Their quick answer was that this project is close to the Metro, and they expect the majority of their tenants in these luxury apartments would not have cars. We've heard that the building's one-bedroom apartments will go for $3200/month. It is unlikely that people who can afford this kind of rent will not also own cars in Los Angeles, with couples probably owning 2 cars. At a minimum, this will flood our already crowded streets with hundreds of cars looking for parking spaces. They are alotting 25 parking spaces for the commercial businesses, leaving 286 spots for residents.

On W Avenue 34 alone, there are three businesses and four residences that already do not have full driveways or adequate parking, and rely on street parking both for themselves and their clients. These businesses and families would be drastically affected by the parking spaces that this project would take from the community. Pinyon proposed at the Council meeting that they might work to get parking passes for the neighborhood. This does not address the overcrowding on the streets, or that clients of these neiborhood businesses will also need to park on the street.

The second part, and perhaps more dangerous aspect of this project is the proposed main entrance/exit. Pinyon has designed the only access to the parking lot on W Avenue 34 at Artesian St. If you live on W Avenue 34, the quickest way to get to the I-5, the 110 Freeway, the 2, San Fernando St, or local businesses like Home Depot, is to take Artesian St, and this is the street onto which this building's parking lot empties out. Artesian is a one-lane, one-way 14 foot wide street with no sidewalks or space to add pedestrian access. There is insufficient lighting, there is a blind corner, and there is a railroad crossing at the end of it. There are also several established fixtures in the community that bottleneck traffic on this route. The film production on Lacy St often shuts down street traffic, the large warehouse on Artesian at W Avenue 33 has large trucks constantly coming in and out during the day, and the taco stands on Artesian draw nightly crowds of parked cars and hundreds of pedestrians. All of these things make a major egress for hundreds of additional cars highly problematic and dangerous for pedestrians. The developers might suggest that tenants can make a left on Pasadena Avenue and drive across the 110 north to Figueroa, and then make a left and drive back down to Avenue 26 to access these points, but we all know that people will want to take the most direct route, especially if their parking lot exits in that direction. To reinforce this point, apps like Google Maps and Waze always direct us to travel down Artesian Street towards Lacy Street, even though we live closer to Pasadena Avenue. If anyone thinks that people will avoid the street their driveway lets out onto, and the one their maps program tells them to use, they are mistaken.

This proposal invites significant danger to pedestrians. There is a middle school directly across the street from this proposed project. There is also an elementary school which is accessed from our side of the 110 by a pedestrian walkway at the corner of Artesian and Ave 33, right at the railroad crossing. Furthermore, the developer suggests that most of the building's tenants won't have cars, and will be attracted to the property based on its proximity to the Metro. Supposing this is true, hundreds of tenants would share Artesian St with cars to walk down this same small 14-ft wide one-way street which has no sidewalk, and no room for a sidewalk, in order to access the Lincoln/Cypress Metro station. This is a huge oversight on the part of the planners, and really it boggles my mind that this proposal has even been made. It puts us and our neighbors, existing businesses, and remarkably this project's tenants at risk.

This project raises other concerns, also. I know that there is long-standing documented soil and groundwater pollution of petroleum and VOC's on the property sandwiched between this proposed project and the Arroyo Secco River.

Obviously, there is no underground fence to prevent polluted groundwater from moving across property lines. This project proposes excavating a two-story underground parking lot. Pinyon proposes using the polluted site as a staging ground for this construction. There is a middle school 50 feet away from this project. The representatives for Pinyon displayed no knowledge of this pollution at the Council meeting, and offered no concrete ways to show that this wouldn't pose a harm to the neighborhood or hundreds of schoolchildren across the street. Isn't it our shared responsibility to protect the health of hundreds of children who will spend eight hours a day across the street from this project?

I've looked at the environmental review for this project, and it was conducted for a different proposal entirely several years ago. That review was for far fewer residential units, with more parking spaces than units, putting less strain on surrounding infrastructure. It calls for a different layout of the buildings. It calls for a one-story underground parking lot, not a two-story one. It calls for preserving a historical brick building on the property. It also makes no specific reference to the ground pollution. It's important that a new environmental review be conducted that looks at this developer's new proposed use of the site, and that considers the health and safety concerns that the surrounding neighbors have been unanimous in voicing.

I understand that this project has been slated for expedited review, and that a public hearing is not scheduled. However, I'm also aware that a public review is required if the proposal raises controversy in the community. This proposal has raised significant controversy. There is a growing frustration, and many neighbors have expressed their anger that City Planning is not listening to us, and taking into account our basic health and safety concerns. Local businesses have expressed worry that Pinyon is dumping this major project in our neighborhood without providing the infrastructure to support concievably as many as 800 new residents. I hope our city will represent our desire for new projects to integrate an understanding of their site and neighborhood into the way they're designed, and to make the community's health and safety a top priority. I'm asking you to delay approval of this project until those concerns are met.

I really appreciate you taking the time to hear our concerns. Please let us know how we can facilitate a public hearing. Thank you for your time and attention to this matter.

Sincerely,
Anthony Lepore

Dear José, Michelle, et al:

I am a stakeholder in the Avenue 34/Pasadena Ave/Artesian St. community as well as a 17+ year resident and property owner in the 90031 zip code. I was recently made aware of the massive development proposed across the street from where I recently established my business and signed a long-term lease.

My multiple concerns include the following:

- The amount of parking is out of alignment with the number of residential units in the complex.

- The amount of parking is out of alignment with number of office and retail units in the complex.

- I understand the diminished parking ratios because of the adjacency to transit - but given our current global situation, does it make sense to design a parking-deficient project if public transportation ceases to be a viable option in the future?

- Avenue 34 is a one-block long virtual cul-de-sac, which transitions onto Artesian, a very narrow one-way street close to my building. As is, this an extremely dangerous condition, with cars from Avenue 33 frequently entering Artesian in the wrong direction to sneak onto Avenue 34; what will happen when the traffic is multiplied a hundred-fold because all access to and from this project occurs off of Avenue 34?

- I am deeply, deeply concerned about the vacant lot where the proposed and pitifully inadequate underground parking is to occur. It is well known in the community that these lots are an environmental wasteland. I have seen nothing in the project documents that would suggest there is an update to the previous Environmental Impact Report, nor any mention of CEQA. Have those requirements been waived without proper scrutiny, or even a survey of the occupants of the surrounding properties? I know I would not want to expose myself, nor the multiple people in my workplace, to any potentially harmful chemicals or airborne toxic particulates triggered by the excavation of this land that such studies would uncover.

I hope that, should the project make it to construction, the people of Avenue 34 will not be inundated with noise, potentially toxic dust, and construction-related road closures that would interfere with our ability to do business. I further hope that elected officials will listen and work closely with city staff in the planning and building departments to implement and enforce the legitimate concerns voiced by us, the community stakeholders, and not default to tired lip service masking an inappropriate and suspicious alliance with the developers.

I look forward to attending the next (zoom) community meeting and being able to voice these concerns in person, publicly, and on the record.

Please include my email in any community correspondence related to this proposed development.

Thank you

Pae White

Good afternoon Councilman Cedillo,

As a Lincoln Heights community member and a property owner across the street from the proposed project at 141 W. Avenue 34, I would like to express my concerns regarding the multitude of safety and environmental complications for the community in which this development is proposed.

Re:

- DIR-2019-6048-TOC-SPR-WDI

- ENV-2016-273-MND-REC1

The project has several addresses in 90031:

- 141 W Avenue 34
- 151 W Avenue 34
- 3401 Pasadena Avenue

Attachments:

- **Parking Study** for Surrounding area of proposed project

- **Northeast Community Plan Monitoring** (pages II-5 and II-6) which states "The Plan has been prepared to depict appropriate long term land uses on the basis of information and policies at the time of adoption. The Plan takes cognizance of the 2010 SCAG population, unemployment, and housing forecasts. However, the Plan depicts residential densities and commercial and industrial intensities designed to limit development because of existing shortfalls in needed infrastructure and services and in anticipated delays in providing them.

Parking:

- 313 total parking spaces for 468 units (233) and 40,000 sq ft (80) of creative office/commercial space

- Within a half mile radius of the project, there are a total of 211 parking spaces. I walked each street and counted spaces based on average vehicles parked correctly:

    - W Avenue 34 = 33

    - W. Avenue 33 = 35

    - E. Avenue 33 = 28
    - Pasadena Ave (between Ave. 35 and Ave. 33) = 61
    - Pasadena Ave (between Ave. 31 and Ave. 33) = 27
    - E. Avenue 35 = 27
- Street cleaning on every street listed above, twice a week
- No overnight parking on nearby Humboldt and Artesian Streets
- Local businesses will also be affected by lack of parking

Traffic:

- Vehicles entering and exiting the only point of access to the entire development on W Ave. 34/ Artesian St.
    - Artesian St. is a one-way, narrow (14ft) street with no sidewalks and poor lighting
- No street light on Pasadena Ave and Ave. 34 making a left turn on/off Pasadena Ave extremely challenging, especially during peak traffic hours

Loreto Elementary and Hillside Elementary Schools:

- Pedestrian safety concerns along school walking routes with increased traffic
- Impact of construction on student health (dust and debris) and student learning (noise)

Environmental:

- Adjacent lot: former site of Welch's, an industrial cleaning facility where industrial uniforms were dry cleaned. If proposed development is providing subterranean parking, excavation may disturb the organic chemicals that were dumped on the site for years

We ask that you keep the community informed of any updates to this project and prioritize the voice and concerns of those who will be severely impacted by such an over-development to this area.

Thank you for your time and consideration.

Patricia Camacho

Good Morning,

As nearby property owners, we have multiple concerns regarding the above proposed Residential Complex. It is a common fact that construction of any type increases traffic flow, noise levels, dust, dirt and general safety issues.

Our current parking situation meets the needs of surrounding homeowners but as you can imagine that will change if we have to accommodate large construction vehicles such as: bull dozers, dump trucks, backhoes and workers personal vehicles. There is no overnight parking and twice a week the street cleaning makes parking difficult. A lengthy construction project creates unwanted inconveniences of those living close by.

It is pretty obvious that this residential complex will NOT have ample parking to accommodate so many residents. With only a little over 300 parking spaces and almost 500 new units, there is no question, it will create more parking issues for us.

Another concern of ours is this crazy idea to have a proposed entrance to this large complex on W. Avenue 34. Traffic traveling down Artesian Street (one-way) and towards Pasadena Ave. (no traffic light) will create a traffic nightmare for those making a left-hand turn onto Pasadena.

As a parent, we are even more concerned with the safety of the children traveling to and from the local Elementary schools located less than a mile from the proposed site. I will have 2 of my children walking to and from school on a daily basis and we are very worried for the overall pedestrian and student safety with the increase of vehicles, construction supplies and workers. The noise factor alone is annoying to local homeowners and often distract children at school. Increased dirt and dust pose a health issue for children and homeowners.

In summary, we strongly feel that such a large complex will overtake the current neighborhood. To share our small neighborhood with almost 500 new residents will create unwanted concerns with traffic, noise, health and safety issues for us and children.

Sincerely,

The Martinez Family

I have been a resident of West Avenue 34 for 12 years. I am deeply concerned about the risk to our public health and safety that the proposed development plan at 141 West Avenue 34 will bring to our neighborhood, lives and livelihood. The street simply will not accommodate the potential volume of parked cars and new residents. The one way street (Artesian) will place lives in grave danger and the neighborhood schools and small businesses will be compromised due to sound, dust and debris. Students and teachers social emotional security and growth will be jeopardized.

Thank you in advance for taking the seriousness of these concerns into consideration.

Erin Trefry
Educator

Hello Jose,

I'm writing to express my concern at a proposed project in my neighborhood. I recently went to a meeting of the Lincoln Heights neighborhood council, where a developer presented a proposal for a massive new development on W Avenue 34.

I understand that this project is supposed to have 486 residential units, but only 311 parking spots, and many of those spots would be reserved for additional commercial units in the building. This is a short block, bordered on one side by Pasadena Avenue, where parking is restricted, on another side by the metro tracks, and on another by a vacant lot. That means that if this project were to include the number of units they are proposing, our street and all the surrounding streets would be overwhelmed by the tenants of these new buildings. It's conceivable that as many as 700 cars would be entering and exiting this building every day.

There is only one point of access to this entire project, and it is on my street. W Avenue 34 is a narrow street, with a one-way only outlet on Artesian St, which is an unusually narrow street, with a blind corner, and no sidewalks, right next to a railroad crossing. This seems to be inviting an uncomfortable level of danger to this block. I'm attaching a photo of this street below.

There are other concerns we have as well. The lot directly next to this proposed project has been vacant for years due to dangerous ground contamination. This developer plans to dig a multistory underground parking lot right next to this site. I asked about the environmental risks and impact at the meeting, but the developer couldn't articulate anything regarding this, which leaves me very disturbed, as I live directly across the street from this proposed construction.

Will there be further opportunities for the community to voice their concerns about this project before it is approved? It seems to need a lot of reconsideration before it can proceed in a way that won't invite environmental harm, increase traffic dangers, and contribute to congestion on the streets.

Thank you for listening to my concerns.
Sincerely,
Michael Hayden

As a small business owner and operator on West Avenue 34, I am adamantly opposed to the current proposal for construction and development at 141 West Avenue 34.

The plan threatens the infrastructure of the neighborhood from a socio-economic perspective and contradicts the outlined intentions to accommodate metro riders. The number of housing units in the plan far exceed the number of reasonable parking opportunities and will compromise day to day business.

A shortage of underground parking units will cause massive overflow and will jeopardize our neighborhood and businesses.

Thank you,
Phil Wagner
President Alustretch LA

Hi Phillip,

I am a building owner on Avenue 34 and concerned about the parking and traffic problems the project will bring. There are only 311 parking spaces for 486 units and 12 retail stores. Also the entry to the building is a narrow one way street which will cause a lot of traffic. Please let me know about any updates on the project.

Thank You,
Joe Lepore

Dear Michelle,

My partner and I own two businesses that operate between West Avenue 33 and West Avenue 34, and we work closely with artists who live and work on these two blocks as well.

Given my investment in the neighborhood and its surrounding area, I have sincere concerns about the development proposed by the Pinyon Group at 141 West Avenue 34–especially as it relates to environmental concerns, socio-economic impact, and untenable congestion as it relates to traffic and parking. I fear that it will compromise daily business in the area, and will have the opposite intended effect for the neighborhood.

Please do not hesitate to be in touch if you have any questions or wish to discuss further. In the interim, I appreciate your consideration.

Thank you,
Meredith Bayse

Hello Michelle,

My name is Adam Moskowitz and I operate a small business in Lincoln Heights. It has come to my attention that a developer has proposed a massive new project on W Avenue 34. My business is within a 2 block radius of the proposed project and will be significantly impacted by aspects of its development outlined below.

I know that the city currently is in desperate need of more housing. However new housing cannot come at the cost of crippling an entire existing community. This particular project has some major issues that I have outlined below. Please consider the impact this unresponsible planning will have on my fellow citizens.

I want to make very clear that I am in favor of developing that land. I think our neighborhood could greatly benefit from a responsible addition of new residences.

The proposed project for 486 residential units will have only 311 parking spots, and many of those spots would be reserved for additional commercial units in the building. This is a short block, bordered on one side by Pasadena Avenue, where parking is restricted, on another side by the metro tracks, and on another by a vacant lot. In other words, if this project were to include the number of units they are proposing, our street and all the surrounding streets would be overwhelmed by the tenants of these new buildings. Even if the project as outlined over represented the number of cars they anticipate, it would lead to immense congestion.

The entrance/exit for the development is W Avenue 34. This street is narrow with a one-way only outlet on Artesian St, an even narrower street with a blind corner and no sidewalks directly adjacent to a railroad crossing. I am greatly concerned that this will create a dangerous bottleneck situation which could potentially result in some nasty accidents.

It is harder and harder to be heard with the pandemic keeping us isolated. Moving forward with this while we are unable to properly communicate is wrong. It seems to need a lot of reconsideration before it can proceed in a way that won't invite environmental harm, increase traffic dangers, and contribute to congestion on the streets.

Thank you for your time.

Sincerely,
Adam Moskowitz

Michael Hayden	90031	This project will overburden the surrounding streets, provides insufficient parking, poses environmental hazards, has avoided public input, and will present safety risks for pedestrians and residents of this neighborhood.
Pedro Ramirez Jr	90031	These luxury apartments are just another form of gentrification and a way to push out the local residents of Lincoln Heights. Rent will come at an exorbitant rate and no one but outsiders will be able to afford it.
veronica	90031	Gentrification
Rae Dawn Chairez	90031	What are developers getting for putting up these developments? What benefits does the community receive? Where was the community input? What wasn't there any community engagement? These are developers will just drive up rent prices.
Patricia Camacho	90031	Overdevelopment for the infrastructure in this neighborhood, parking concerns for several surrounding streets, environmental concerns with excavation of compromised soil, increased traffic during peak hours On Ave 34 and Pasadena Ave (already difficult to make a left on/off Pasadena Ave, pedestrian safety with school safety routes affected, Avenue 34 and Artesian St (very narrow st with no sidewalks) can't withstand the increase in the number of vehicles driving in and out of complex, not enough parking spaces provided to tenants, limited affordable units,
Alicia robles	90031	Create more traffic, unsafe for students walking to school.
Victor robles	90031	400+ luxury apartments do not cater to a community of lower income persons,
Anthony Perez	90031	The project will not benefit the community as a very low percentage of these units will be allocated for low income people. The housing project will cater to the middle - upper classes — bringing an influx of affluent people, contributing to our overall housing crisis.
Susan Flores	90031	Local residents should have priority access to affordable housing units. Additionally, there should be more units designated for affordable housing.
Sara Rattani	90031	This will be detrimental to the financial stability of this community.
Elizabeth Ramirez	90065	Projects like this displace local residents who cannot afford the increase of rent, these apartments are not targeted for low to moderate income families who already live here, traffic, traffic, traffic, no, please go away.
Donald Nollar	90065	This project does not include enough desperately needed affordable and very low income housing . Homelessness and displacement is rapidly increasing in Lincoln Heights/Cypress Park and Highland Park. We need affordable units, not more luxury housing. There is already plenty of luxury housing available. This land should be used for majority affordable/very low income housing.
Fernanda	90031	Gentrification is the erasure of our people
Sabrina Acosta	90032	Oppose Gentrification
Carinosa robles	90031	It brings a negative impact on our community. Pushing residents out of the area and heavily impacting the density of the area.
Diego Zapata	90031	My community is not for sale.
michael montes	90031	fast tracked approval without community input
Albert Salazar	90031	It will displace others in my community
Mitra Khayyam	90031	The nearby streets cannot handle the traffic from so many new units and residents.
Salar Rajabnik	90031	This project is totally blind to the needs & means of the community & seeks to alienate this who already live here & replace them enticed gentrifiers. There has not been transparency around the process, nor input from within the actual community.
Christopher Morales	90031	Councilmember Cedillo has consistently failed to listen to and accept community input for his developmental projects, which is unethical and wrong.
Erika Gallo	90031	OPPOSE. You already destroyed our city, don't destroy Lincoln Heights!
Jorge Garcia	90032	No community input!
Paulina Pierce	90031	The city has been engaged in nefarious negotiations with developers and those investigations need to be complete before allowing large tracts of our community to be given away to developers to create luxury housing that we don't need.
Jon Price	90031	We deserve to have a fair opportunity to weigh in on this project!!! Please let me know what we can do to help.
Kim Henderson	90013	Need more information on both sides to decide
Naomi Gonzalez	91801	Unaffordable housing, more traffic and displacement of people as well as where will the displaced people afford to live?
CALEB lyons	90026	Community first!!! We need transparency and answers!

Hector Rodriguez	91802	Don't do it
Santos Vasquez	90012	Affordable Housing is the answer for Lincoln Heights - NO TO UNAFFORDABLE GENTRIFICATION!!!
Mariela	90031	We don’t need more luxurious apartments we need low cost apartments
Ish Ness	90042	More traffic, not enough parking for tenants, and not affordable housing.
Zulibeth Inda-Lara	90031	I’ve been living in Lincoln Heights since 1979. Everything has disappeared, our Heritage, our people. Rent increases have spiked up tremendously due to new constructions by of Luxury buildings around our community. The Historical Landmarks are disappearing and you are destroying our land...
Amanda R Ross-Ho	90031	I am a small business owner near the corner of Pasadena and 34. This giant, bloated development is a threat to the historically vital and vibrant community of Lincoln Heights, and its long standing residents. The project has not been thoroughly researched or vetted and the community has not been given the opportunity to voice its opinions adequately in advance of such a massive project. Pushing this project through during a global pandemic is completely unethical. I strongly oppose this project and as a resident of 90031 do not support any parties pushing to move this forward. There is strong support for this position on the part of the residents of LH. Listen to the community!
Max Maslansky	90031	It will displace local residents and undermine working families.
Vanessa Carrasco	90031	
Matt R	90031	We don’t need luxury condos in Lincoln Heights. It will drive up prices and make the neighborhood unaffordable for current residents and bring in people who don’t respect this history of the neighborhood or the community.
Daphne Trr	90031	The neighborhood does not need luxury condos; this is going to negatively impact the community and cause the cost of living to increase. To pursue this sort of build without public input is a seedy move by Cedillo and the Pinyon Group. The neighborhood needs more low income housing!
Celeste	90031	Will cause too much congestion and take away from the community
Kevin Break	90031	it's too large
Jherika Martin	90031	I oppose this project because there is already a heavy push to gentrify, which doesn’t take into consideration the people and community already living there. Bringing in a new complex will create hardship on the already existing community, drive rent up, and push the community out. These complexes are clearly built to push out the existing community to gentrify and brings into expensive places where people of color cannot live. This is clearly for profit and these developers do not care about our community and should not be allowed to build this.
Vanessa	90031	
Michael Nunez	90031	It will create parking worst for people who live in apartments.
Maria Delgadillo	90031	No community input or involvement. Poor planning regarding parking and actual needs of the community
Linda Wobbe	90031	Dangerous precedent not to hold hearings and respond to community input.
Emily chang	90031	
Angelina Nieto-Rodriguez	90031	It will displace current residents
Melany Guzman	90031	It is unethical to create luxury apartments in a neighborhood where the majority of renter’s only make a yearly income of around $30,5000.
Erika Gallo	90031	I oppose this project.
Adam Cooper	90031	Lincoln Heights is a historic neighborhood that has survived gentrification and real estate exploitation.
Rubi Gomez	90031	The type of gentrification Gio Cedillo insists on bringing into our neighborhoods will not be tolerated. Gil Cedillo, you have failed to provide affordable housing to your existing constituents and safe guard them against homelessness or living in crowded situations to keep their heads above water, and with COVID adding more fuel to the housing crisis, you now expect us to be okay with luxury apartments? I think not. We don’t want your luxury apartments here, now now, not tomorrow, not ever. I have seen the displacement and damage the recent luxury apartment developments have done to our neighbors in Chinatown, and for you to try this now in Lincoln Heights is unacceptable. This community refuses to be displaced by your actions.
Darla	90031	This does not help the citizens of Lincoln Heights. I along with 30,000 residents have been living here for over ten years. We have watched neighboring towns go through this same process and become gentrified, causes the humble citizens to flee in search of somewhere they can live without poverty. Leave this town to the humble people that live here. We don’t need these type of developments. This is why homelessness is rising in Los Angeles, this is the problem, and projects like these are direct correlation to people who once had a home, having to live on the street with their families. In times like these, the community needs to come together and not allow a project like this to happen.
Lena	90031	Its unethical and all about greed. this isnt uplifting the community, its pushing out hardworking people. did you forget your background Cedillo. dont go against your people. we put you in this position and we can gladly remove you.
Elida	90031	we are demanding answers we do not need this luxury Appartments inflating rent and cost of living
leslie olmos	90031	We need low income housing, that is priority!

Sandra H.	90031	This many units in this historically residential neighborhood will transform our community into another hip urban wasteland where traffic, congestion, and the added density (468 units, meaning at least another 1,500 people fighting it out for parking and city resources) will fundamentally change the small town feel of Lincoln Heights. My family history goes back to 1940's and for long as I can remember, LH has always been working class with single family residences, mixed in with smaller appartment units. LH is fast becoming unaffordable and attracting affluent people aiming to make us the next Highland Park. We do not need such dense housing montrosities in our beautiful neighborhood. The proposed structures are out of place with the rest of the Victorian and Craftsman houses. I am appalled that Cedillo and the Pinyon group think they can change our neighborhood, our history, and our culture. We deserve better. Stay out of LH!
Sarah Esther Marie Chavez	90031	Luxury apartments shouldn't be made when our current renters are being forced out of their communities.
Pamela morales	90065	I oppose the project because it will not be affordable and will only displace many people from the community. I oppose the project because it will also add to the gentrification that has been going on with the hard working class of Lincoln Heights.
Katharine Pinney	90031	Oversized, overpriced, will cause tremendous traffic, does not fit into the architecture of historic community, and bare minimum affordable units. We don't need architecturally lazy market rate apartments. We need affordable, thoughtful, housing. You know, for the working class.
Andrea Pena	90031	I don't support displacing a community or people
Iris Lizeth Casarrubias Montanez	90031	
Magali Hernandez	90031	I am against gentrification in our community.
Anahi	90023	
Catalina Bolivar	90042	It will displace many families and community members.
Juliet Matamoros	90042	As a POC I do not support this because in specific I have seen many minorities kicked out of low income neighborhoods. While others call it investing in a neighborhood, I call it gentrification. This is also causing numbers to skyrocket in Los Angeles' current homeless crisis. These neighborhoods were made for affordable living and were once considered "dangerous" our towns are not your trend.
elix	90031	I personally think it would displace and destroy the current community.
Ric	90031	I don't want to see my neighbors displaced for more unaffordable housing.
Ric	90031	I don't want to see my neighbors displaced for more unaffordable housing.
Shannon	91205	Oppose
Sarah riojas	90031	Because it will change our city forever and cause a chain reaction kicking out the families of Lincoln Heights
Wilson Ho	90031	We are in the middle of a pandemic. Most of the residents in Lincoln Heights are not being employed due to HEALTH concerns due to our incompetent leadership running in this country. Some who are undocumented cannot afford to get unemployment benefits again, lack of a leadership but also due to systemic oppression. Having this project being built will directly affect thousands who have lived in Lincoln Heights for possibly generations. Stop the gentrification that allows those privileged to move into the city because they "feel like it." It is true that some people need to move out of their current place due to inconvenience for them, but they do not need luxurious living platforms. They need affordable living places that does not cost an arm and a leg from those who cannot afford to live around said luxury.
Maria A	90032	Our affordable housing stock will be seized by flippers and investors and lifelong residents will be permanenty displaced or houseless.
Alexis Meraz Garcia	90031	We need more affordable housing in the area and housing/business that serve and can be afforded by the community.
Salar Rajabnik	90031	This project threatens the wellbeing of the working class families & individuals who make up Lincoln Heights. Our well being & shelter must not be sacrificed for another predatory gentrification project.
Brody Albert	90031	Does not consider the historic Lincoln Heights community. Will eventually displace economically vulnerable tenants. No gentrification! We need low income housing.
Danielle Salazar	90031	it promotes gentrification and the removal of current low income residents. It does not benefit the community, only the councilman.
Frank Prieto	90042	Quality of life. Adding units will undoubtedly add to traffic. Along with market rates that will only turn the community into a business rather than social construct built around families and pillars of American ideals and principles.
Vicki Aguilar	90032	Because low income families were evicted for overpriced housing that is marketed towards affluent people not from this neighborhood. We need more affordable housing for families that are long time residents of Los Angeles. Not overpriced singles and lofts for "artists"
Iris Casarrubias	90031	
Robert Nichols	90027	I support low income and public housing in Los Angeles.
Khalilah	90031	We need to protect and preserve the community of Lincoln heights
Andrea Villanueva	90031	The people and families of Lincoln Heights deserve transparency about gentrification that is happening in our neighborhoods. We have the right to voice our concerns and fight back. We have a voice

Alexis Meraz garcia	90031	We need more affordable and secure housing for Lincoln Heights. Luxury apartments and developments threaten the livelihood of long time residents who are struggling to remain in the area. I firmly say no to the gentrification of Lincoln Heights.
Brenda Albarran	90031	Because we are all a community and we should empower one another!!
Mandy Almendra	90031	Not needed for Lincoln Heights due to the already overcrowded neighborhood
Matthew Cardoza	90031	I have multiple reasons for opposing this project , but the one that sticks in my craw is this! What's with all the shiestyness that surrounds almost all of the current building project in this area. How come poeple (residents) are not being given even the slightest bit of say on the way our proud city grows and takes shape?
Maria Delgadillo	90031	No community input
Jose Salazar	90031	Because there is no respect for the community's opinions or needs
Zulibeth Inda-Lara	90031	I'm a struggling single parent of 3 minors, whom resides 2 blocks from the new plan development. My rent will increase dramatically and most likely I will need to relocate and loose my home. Please reconsider
Hector and	91802	Because we don't need need them
veronica villa	90031	We already have to much people here don't need anymore and we want to keep our community at our at offerdable price we could offer with those luxuries appt. I bet the prices are gonna go up
Alina Infante	90031	Affordable housing is at stake
Dawn Montanez	91732	oppose GENTRIFICATION
Karina g	90031	We dont need more apartments or more ppl in the city ,so many ppl losing there jobs!! put something better that will benefit the city...
Patricia vidaurri	90031	it is too crowded no parking and it will probably be to expensive and low income housing
Allegra Padilla	90029	Lincoln Heights and LA need affordable housing not unaffordable luxury units. Stop gentirifying our amazing city especially as we face a pandemic.
Taily Pulido	90022	I moved out of Lincoln Heights because I could no longer afford to live there but my church is still there. The community is in need of affordable housing, not more luxury housing that will displace more people. This displacement is literally putting families on the street. Having worked in the community, I know that now, when a family loses their residence in Lincoln Heights they cannot afford to find a new place in Lincoln Heights. To continue to ignore that reality and displace the working class is unconscionable.
Brenda Valentin	90031	Our community needs more affordable housing for our residents. Not a luxury high rise apartment.
Eric Sunada	91801	This is gentrification at its worst
Mojica Martinez	90031	I've live in Lincoln heights for 40yrs , all my life. I don't want our community to change like that. Our people won't be able to afford those appartments and our rent will increase.
Francisco cortez	90031	It will affect low income families
Juliana Aguirre	90031	Community don’t need luxury apartments
Pako	90031	Not benefiting the local population
Eduardo Castillo	90042	I will have to face increased traffic on my way to work. This will also fuel gentrification which will in turn fuel the homeless crisis in Los Angeles.
Cary cronenwett	90031	Itvis a threat to the community
Dania Gomez	90031	Higher prices in a low income neighborhood pushes natives out and gentrification
Anthony bin	90031	There is not enough parking in the area as it is.
Alejandro Mondragon	90031	Although i am all for diversity i feel this is a step in the wrong direction. If anything this wpuld be a detriment to the community and its cultural integrity.
Evelyn Rojas	90032	Gentrification is hurting our hoods, they need to be stopped asap!
Jennifer	90031	It would usher in an extremely violent displacement of low income, minority residents, not restricted to just those on the current property. Not only is this ethically immoral, it would contribute to a worsened public health crisis by making already housing insecure folk struggle to find new housing during an unemployment and housing crises, on top of the existing pandemic. There are no protections on place for Lincoln Heights residents from ongoing gentrification and it seems like city council member Cedillo would care less if thousands of his constituents are left helpless. It’s his job to act in his constituents’ benefit. Start with shutting down this development.
Rosario Escoto	90031	Lincoln Heights is already over populated. There is no parking on the streets. The cost of living is so high multiple families are forced to live together in one small home or even apartment. This will just make the situation worse. Gil Cedillo does not have his best interest at heart for the residents of Lincoln Heights. The streets are full of furniture and trash, especially in the VERY NEGLECTED ALLEYS in the avenues. Our streets are uneven and have tons of potholes, more people, more cars will create more of that. This is not a positive thing for our community!
Stephanie Martinez	90031	This is my community and I don’t want to see gentrification take over and displace everyone here.
Irving Mendoza	90031	Projects like these are the reasons why Lincoln Heights is becoming gentrified. I doubt that the landlords and the city are going to care what the residents of Lincoln Heights have to say.
leslie olmos	90031	we need low income housing and affordable rents for residents not new townhouses or high end apartments
Danica Campos	90031	This development will run out the very people who built the community.

Hannya Ortiz	90031	I oppose this project because it has had zero community input, I think this is a crucial part of the planning process. It is crucial that they provide more affordable housing in this area, if not the homeless crisis will only worsen.
Juan M Castro	90065	This only helps a certain kind of people
Tom Marble	90031	Not enough parking and the vehicular entrance and exit should be on Pasadena Avenue with dedicated deceleration and acceleration lanes.
Shanine Jaimes	90042	I do not want developers deciding the future of our communities without our input
Dara	90018	If and when anyone builds housing in this city it needs to be on a liberatory basis - not further gentrification.
Dalesy Sarceño	90006	Community needs more AFFORDABLE housing not market rate developments that raise rent for everyone!
Diana Iai	90031	
Cindy Perez	90031	I oppose this because gentrification of neighborhoods is modern day colonization. We have no where to go. This is our home. You cannot make us leave.
Cynthia White	90031	It is insensitive in scale, it will block the light for any building across the street from it. It is completely out of proportion to the neighborhood. It reeks of bribes and dirty dealing.
Edward	90021	For the detrimental effects it will cause to the community, of which I am a part of.
Vince Caldera	90065	As a native Angeleno, the residents in Lincoln Heights are my neighbors, to see that they even have to demand this dialogue is disgusting. This conversation is necessary. This will affect so many marginalized groups of people and hurt those just trying to live. If Gil goes forward with this proposed project without hearing and listening to the people, he will be a disappointment to me and the communities that actually make this city so great.
Fabiana Paredes	91101	Because any big changes to a community must be done for and with the community
Brenda Contreras	90032	City Council needs to STOP this disaster of a project from moving forward. The residents of the historic neighborhood of Lincoln Heights have legal rights and their concerns MUST be addressed. The conditions under which City Planning approved this project are highly questionable and possibly Illegal. An investigation is mandatory due to the current revelations of the widespread pay-to-play transactions happening in our city government and validated by the FBI. This type of project is extremely inappropriate as it does not serve the needs of the community and in turn would lead to the displacement of those that need housing security the most. City Council MUST DENY this project from moving forward and must also investigate other projects that have been approved by City Planning with similar questionable motives.
Melissa Alcala	90031	The homeless crisis is a nightmare. By continuously adding more unaffordable housing the homeless crisis will grow. This is not what is needed, we need affordable housing for families and elderly. I'm tired of seeing homeless people everywhere.
John Mejia	90031	We don't need luxury apartments. We need affordable housing. We need Recreation Centers for children with resources that can help better their future in education and creativity.
Armando Ruiz	90031	Because it will further displace my neighborhood. It will exacerbate the homelessness crisis.
Davi de la cruz	90031	I am a long time resident of south central Los Angeles. I have temporarily moved to Lincoln Heights as I work towards saving the funds and purchasing a home in the neighborhood I was born and raised. I have noticed that housing in this area is not as affordable for working-class families, and increasing the amount of market rate housing in this neighborhood will further impact long-time residents. In order to preserve historic residents who have lived here as a result of legacies of disinvestment, now that improved streets and neighborhoods have come to 90031, long time residents have a right to continue living here. Market rate housing and no promises to preserve rent controlled housing is a threat to this right to stay in this neighborhood. I oppose this because long time residents should not be illegally evicted, or pushed out by supposed "market pressures." Our elected officials are supposed to be able to step up and find ways to preserve long time residents right to continue living in this neighborhood.
Sarah Choung	92833	We need to stop displacing those already in the community. The LA council/government needs to reform their zoning laws so that we can continue to provide affordable housing vs continue having the current rules and regulations that are so strict and costly that only luxury housing companies are able to build properties. The city needs to stop taking advantage of suffering communities. Gentrification does not solve the problem, it ignores it.
Yesenia Varela	90031	It is a clear indication of what City Hall members want our community to look like and it's not at all what our community represents. This is the home of hundred of working class folk who everyday care for their homes and their families. It is not ok that they target established communities!
Lola Gonzalez	90042	Gentrification like this is violent to a community. Especially during a pandemic.
Erica Hwang	90027	Housing is a human right. This move would take us further from guaranteeing this right by snatching away affordable housing for luxury apartments in a pandemic that disproportionately impacts lower income folks. It is not right to value capital over human life. This development will contribute to gentrification and increasing homelessness and will uphold systemically racist ideals by refusing to listen to residents of color who understand the negative impact this will have on them.
Evan Jourden	90942	Not right for the neighborhood
Pooja D	90029	It is wrong, predatory and exploitative to allow housing to be ripped away for a so called market from an already disenfranchised community rooted in the area. The social cost of this greatly outweighs any benefit this real estate group can tout will come of buying off rent controlled buildings in communities where the vast majority of folks are renters and unable to purchase homes despite living there for decades. Even having to social capital to fight for their homes is difficult to come by for numerous reasons tipping the scales yet again to this LLC.
Aurora García-Barrera	92802	Gentrification is another form of discrimination and we have to stop it! Families are being displaced, and during the pandemic especially that is significantly harmful to the wellbeing of our communities. We must value people and their lives over property and profit.

Araceli Hernandez	91345-3123	We need affordable housing and housing for the homeless. This will cause more displacement.
Michael Stoltz	90031	This project will dramatically affect my neighborhood displacing many long time residents and shifting the makeup of Lincoln Heights.
Jackie Rodriguez	92869	Because this is a threat to our health and well being, gentrification is violence!!
Bri	90031	I am against Gentrifying the area because will lead to pushing hardworking families who can't afford expensive rent. Gentrification is part of systematic racism. By building you will be pushing Latinos out of their community.
Eric	90033	Having this kind of development will be detrimental to the current long time residents of LINCOLN HEIGHTS and it's neighbors like myself. This will displace even more residents as it will add to the already growing gentrification. It will further erase the working class and continue to push families deeply rooted in Lincoln Heights out on to the streets.
Jamie	90031	Lincoln heights is being gentrified and the people who have lived there are being pushed out those communities and that's not fair to them.
Sarah Kim	90007	I don't want people to be displaced.
Saul Soto	90023	GENTRIFICATION IS VIOLENCE
Christine Martinez	90031	Because gentrification is genocide
Jenny Lin	90034	Why are we building more UNAFFORDABLE housing during a HOUSING CRISIS?!? But we all know the answer to that question... this development is about PROFIT, not PEOPLE, and this development's going to look good in your pockets even though it's going to sit empty for years because PEOPLE CAN'T AFFORD IT. MAKE IT 100% TRULY AFFORDABLE OR GET OUT.
Maia Schall	90068	That is ugly as hell and does not meet the needs nor the aesthetic of the neighborhood.
Tiffanie Lanmon	90065	As a member of this community, I see everyday the people this would most disproportionately impact - this is NOT a good solution for affordable, inclusive housing. Our neighborhood and the people that built it deserve more!
Jordan Kolesnik	90031	We need affordable housing, not luxury development in 90031, as well as rent control along commercial corridors to protect local small businesses. The condominium project will facilitate the erasure and displacement of the current residents and business owners.
Yenny		I'm opposing this project because families will be displaced who will inherently become homeless. Once these ugly buildings go up everyone forgets about the families who are struggling to pay rent in this pandemic and raise the the rent to where the people who are from here will not be able to afford.
Miguel Perez Guzman	90032	Fuck the rich. They cannot continue their systematic erasure of people ESPECIALLY during a pandemic. If it isn't beneficial to my neighbors and myself then it doesn't belong in my community.
Sonia garcia	90063	This development is a direct threat to the community and ushers in immediate displacement of POC and family's. Stay the fuck out of north east la and east la!
Rhys Ernst	90031	Lincoln Heights neighborhood council was bypassed and never approved the project.
Michael flores	90031	It will cause a lot of despair for low income families
Fernando	90031	
Eduardo Castillo	90042	Stop fast tracking luxury developments! Gentrification has lead to only suffering for those who are not profiting from it. We need low income housing more than ever, not luxury condos.
Guadalupe Garcia	90031	If the city continues to build expensive housing, we push out low-income individuals. This leads to homelessness among families, uprooting to search for affordable housing, and creates a classist divide. How can someone push for profit over the livelihood of people? Convert to affordable housing, invest in section 8 housing, we can invest in the community in a myriad of ways that doesn't push out a while ass group of people.
Jennifer Mendoza	91030	I was born & raised in Lincoln Heights. I worked in the area & seen first hand that this is not going to be an afforded living place for the people living in the area. People already can barely afford the cost of living as it is. This will NOT help.
Maria Mejia	90031	I oppose this project because it will further exacerbate the parking issues in the community by bringing in a large influx of people.
Jesus Becerra	90031	No Blue Collar job with decent pay would be able to afford housing in this area. MIDDLE CLASS are under attack and this Project proves it!
Julianna Avila	90031	We need to help our community grow not by luxury apartments but instead through helping our residents survive this pandemic. There are elder people being kicked out of their homes and are outside of grocery stores begging for money. I have seen them!
Brian Kupillas	90068	It lacks proper standards for cultural integration in addition to community outreach. It will not be for those living in Lincoln Heights, but for those wanting to replace the population with a new demographic.
Jose Munoz	90063	Unfair to the local community and the people that grew up there
Katharine Pinney	90031	Oversized (will bring more traffic and there is already a large amount to Pasadena Avenue), market rate units when rents here for working class already very hard to meet, predict bottom store front units will be empty just like the units by cypress park gold line station. This sets a precedent for market rate apartments and dense development in a working class neighborhood. In addition, the design of the project, if one can call it that, is trite and in short redundant of faux modern garbage around the city. Evidently designing a project in keeping with the historic nature of the community is something not taught in urban planning and architecture programs. Or the ubiquitous orange door, horizontal fence, is what sells so who cares right?

Ghazal Hashemi	90042	I support the working class community of Lincoln Heights & their right to fair and affordable housing. Community input is essential!
Sonia Rivera	90031	Too much traffic already, hard to find parking on the streets. we do not need another apartment complex this large especially with Covid 19 too many people to social distance.
Shervin Ravan	90039	Human decency
Andrew Zacarias	90031	I oppose this project cause it's going to affect the community with more trouble it's going to shut down our local businesses that have been here for years ! It's going to raise rents on people mostly hard working families that are barley managing to get by we don't need this "Beverly Hills" type of vibe we are good just the way we have been for DECADES! We refuse to have this project made!!!!
Javier Garcia	90031	The community is overcrowded and if we are going to build something it should be affordable to the people of the exit community.
Anna Su	90042	I think this development displaced residents who have lived in the neighborhood for long term. The scale of the project is too large, disruptive and changes the face of the community in a negative way.
Rosa Castañeda	90031	This apartment complex will continue to hurt the people of LH and further displace families. This project will bring more affluent outsiders while it fails to address any substantial, serious concern or action that will help secure and protect the people already living in LH from being displaced. This project is not addressing our needs and therefore will not benefit the people of LH. We the people of LH need to be included in the decisions and changes being made to our neighborhood by outsiders and politicians only concerned about power and profit.
Sara Flores	90031	I oppose the project because it does not benefit the community. Rent is expensive as is, and this project will only make low income families less likely to afford to stay in the area.
Tanya Bertone	90026	Luxury apartments will only raise the rent in a working class neighborhood like Lincoln Heights. These do nothing to benefit the community
Melissa C	90031	86% unaffordable. Whats the point? Were all a small low income community & your bringing a whole apartment complex that’s unaffordable. Theres no point
Taylor Robinson	90027	These developments are ruining our communities. Not to mention it’s a heinous monstrosity. Please, preserve don’t destroy!
Dalia	91775	
Kristofer	910001	We need affordable housing NOT overpriced housing.
Elizabeth Bagasao	91030	It’s affordable housing or nothing! Gentrification is war on the poor.
Blanca Velasco	90031	It will only push out families that are already having a hard time trying to make ends meet.
Janet Marshall	91030	In South Pasadena, we also have huge RHNA numbers to meet, but the only housing that's being built is luxury housing. Our Mission/Meridian Transit Village development built in 2005 received numerous breaks because of its proximity to transit. To date, not one single resident there commutes by train.
Veronica Ortega	90031	We need to conserve our community & keep it affordable to the people who already live here!!!
Israel Gutierrez	90031	Because they remove the opportunity for people who have lived there for generations to have the opportunity to own property and people who come to gentrify these neighborhoods don’t usually participate and exclude the Hispanic and other people of color.Because they remove the opportunity for people who have lived there for generations to on property and people who come to gentrify these neighborhoods don’t usually participate and exclude the Hispanic and other people of color
Amy Jo	90068	This area does not need luxury housing, it does not cater to the population and will displace the people who have lived there for decades
Marcus m	90039	For the safety and well being of the Working class and black and brown communities
Yesenia Moreno		The people around this neighborhood can not afford to pay $2500 for a one bedroom.
Jaime Escamilla	90031	I oppose the wrongful eviction of tenants
Jaime Escamilla	90031	I oppose the wrongful eviction of tenants
Irene Farr	90031	The development does not work to support the community and works to displace it instead. Even if the structure includes low income units, the city is not advocating for the needs of local citizens. Instead, it’s giving in to the developer’s bottom line.
Darla Yan	90031	This project is going to displace thousands of residents that have lived in Lincoln Heights for years, some their whole lives. We have watched this happened to surrounding neighborhoods, we will not allow it to happen here. We the people have a voice and we will be heard.
Jeffrey Berger	90027	Community input and Transparency in transactions are the minimum requirements. I oppose the lack of Ethics.
Sarah Ramirez	90031	This housing will not benefit the people of Lincoln Heights. This is a low income community who is already suffering from the effects of gentrification. This will only serve to further oppress and displace its people. They will face more evictions and will pay more rent as a direct result of this project. I absolutely do not approve of this “luxury” development in our community, they have no place here since they will not be built to help, benefit, or uplift the people of Lincoln Heights, but rather do the complete opposite. We need projects that will help to enrich our community, we need AFFORDABLE housing FOR the people of Lincoln Heights. Our community is not for sale.
Arthur Hale	90031	After considering the historical impact of such projects in low income areas in the past, one can reasonably assume that this project will do nothing but financially and culturally devastate the pre existing, long standing and culturally rich existing community that adores Lincoln Heights and calls it home.

Anthony Pérez	90031	This project is of little effort to lift up the low income people in this neighborhood who are on the verge of becoming homeless, due to a surge in rent costs in the city of L.A. This project is unaffordable to almost 90% of the population in and surrounding Lincoln Heights.
Megan Plunkett	90026	Because I support efforts to not let LA become a playground for the rich and their developments. The City's history can't be erased any longer. LA is for the people
Darlene Olivarez	91802	Preserve Lincoln heights. Stop the removal of affordable housing.
Suani Garcia	90032	I don't support gentrification in my neighborhood.
Monica Alcantar	90031	NO TO GENTRIFICATION!!!!!
Jeselle Gomez	90032	Stop taking housing from low income communities! Invest that wealth in the community NOT GENTRIFICATION!
Marlen	90032	GENTRIFICATION
junior amezcua	90026	fuck gentrification
Josephine	90031	Our rent will be higher
Samuel	90004	No to luxury apartments on our neighborhoods
Maria De La Cruz	90003	I oppose this project because this is not for the community's these will be use to gentrify the community and slowly push away people that been living there and it is not ok .
Viviana	91042	Projects like these leave less homes for poverty stricken families, gentrify communities, and leave less room for POCs.
Belen	93309	
Nicole Corona	90031	Gentrification has impacted low income communities of color for far too long. This new development will cause a negative domino effect on our community; it will increase property values, thus rendering low income families unable to afford housing in Lincoln Heights. It is disrespectful to the community to sideline our perspectives and move forward with a project as if our lives weren't impacted.
Kate Stewart	90042	We need affordable and green housing. Keep people in the homes they have. Lining the pockets of developers.
Carrie Cook	90031	Too many units and not enough dedicated affordable housing
Maria Alvarado	90026	STOP GENTRIFICATION!
Alexsa Durrans	90031	This will cause displacement and harm for so many families and people who have lived in the area for generations. A resident myself I have seen and also experienced the displacement first hand. It is terrible and must stop. There are much better uses for that space and the community needs to be heard.
Noelia	90031	It is not fair for the residents that have been living in this community for more than 20 years. Gentrification is real and it does not benefit the low income families. These luxury projects should be built in communities where money is not a problem. Building this luxury apartments not only hurts our community but also the families that would be affected.
Noelia	90031	It is not fair for the residents that have been living in this community for more than 20 years. Gentrification is real and it does not benefit the low income families. These luxury projects should be built in communities where money is not a problem. Building this luxury apartments not only hurts our community but also the families that would be affected.
devika wickremesinghe	90031	we dont need luxury development we need community support
Anahi olivo	90023	
Diego Trujillo	90031	This will displace more long life families away no low income housing what a shame
Celista Lopez	90031	The current residents of Lincoln Heights matter! If they get evicted families will be homeless!
William Jamaica		Because it is gonna skyrocket rent and kick the working class people out thier homes
Elliot Shaffer	90065	Please preserve one of the last truly diverse neighborhoods in LA by NOT APPROVING this project. Additionally the traffic congestion brought by this project will make this area and surrounding areas more dangerous and prone to accidents.
Nicholas Lowe		It displaces people and brings in outsiders to a community and disrupts the neighborhood. Los Angeles needs more affordable housing and services for the community, not more luxury condos.
Marc garcia	91803	The incoming generation of Lincoln heights residents seeking housing as they move out of their parents homes should have reasonable and affordable access to housing in the neighborhoods. This project won't tend to the needs of the community.
justine robles	90039	people will loose their homes. it wont help the community and the people that already live in the community. its not right
erni walker	90031	this is gentrification at its most obvious and dangerous. it will disproportionately affect POC in our neighborhood and un-house families
Blanca	90065	This will continue to disproportionately push out the people who already live in the area
Abby Janto	90027	Will lead to overcrowded parking. Does not serve neighborhood
Jessie Licon	90022	Because there was not enough community input, they are marginalizing us people of color
Benni quintero	90002	I don't want to see more Black and brown people displaced
Karla O Juarez	90031	It's erasing our culture, and community. Pushes for more gentrification and it's allowing for displacement of our people.

Ian Byers-Gamber	90041	High rents will promote furthered gentrification, while not enough parking in the structure will have a huge impact on an already impacted neighborhood street parking situation. Los Angeles needs affordable housing NOW not luxury developments.
Angel Alvarado	90038	I stand in solidarity with those living in Lincoln Heights. The violent gentrification going on especially right now during the COVID-19 pandemic and Black Lives Matter movement is especially heinous. The people of Lincoln Heights should have final say on what this property should be used for. Transparency should be key, and construction should be halted immediately!
Valerie McCann	90065	
Lisa Del Castillo	90026	As a Los Angeles Native, from North East LA it is exhausting to see ugly, unaffordable housing ruin neighborhoods and push out families who were living there first. The gentrification causes extreme displacement and ruins the true culture of Los Angeles.
Rachel Jones	90032	Gentrification is violence against the poor and working class, and a meeting is the bare minimum these developers could do to act with accountability.
Jonathan Cowie	90041	This is not serving the community and will only end up taking money out of the neighborhood and contributing to the displacement of local residents.
Alexander Kujawski	90065	The city needs to stop supporting luxury housing and start supporting low income housing. We have an extreme housing crisis in Los Angeles. The city council needs to stop making it worse by allowing luxury development projects to take place. Also, we know that Huizar isn't the only one getting kick backs from developers. We're watching you, Los Angeles City Council.
Xiomara Castillo	90041	I don't support gentrification
J. Pena	90723	If the city really wants to fix the issues in our communities you don't do it by using developers to bring in the desired demographic and kick out people who have been here for generations and made LH what it is. Gentrification is displacing too many people and this project in the midst of a pandemic is a lack of empathy and consideration on behalf of our city officials.
Magali	90018	Because gentrification is wrong
Kestrel Valdez	90065	We need more housing in our communities not more projects that cater to white wealthy individuals!
Clio Wilde	90042	This is a colossal waste of time and space and money and will be a massive displacement to the community
Marissa Sanchez	90810	They don't need it there
Luke Forsyth	90031	1. Ugly and 2. Unfair planning process
Brandy	90033	Money should be going directly into the communities already present in Lincoln heights. This building will contribute to the affordable housing crisis, displacing families and uprooting/disrespecting life and culture.
Sophie Brotman	91030	This project will hike rent up in the area and displace local people who have lived in the area for a long time. This is intentional gentrification and should be stopped IMMEDIATELY.
Melanie Bellomo	90031	This project is a threat to the residents of Lincoln Heights. These apartments will fast-track the gentrification of our neighborhood, displacing countless residents, many of whom have been here their entire lives. The fabric of this neighborhood is the residents. This neighborhood is culturally and historically significant BECAUSE of the people who have lived her and fought to keep Lincoln Heights' culture. This project is violence to our low income residents and will push them into houselessness or worse. We deserve a place at the table.
Olivia	90012	I oppose the displacement of long-term tenants
Liz	90065	This is not going to help our low income population nor is it in the best interest of the community. No more gentrification
Arian Armenta	90039	Land development should not be approved without beginning a conversation with the community. Not only would this result in high rent displacing current residents, it continues to showcase the systemic flaw and selfish agenda of City Hall. Any change should be made for the people and by the people.
Fatima Nieto	91387	THIS IS FURTHERING THE DISPLACEMENT OF WHAT HAS EXISTED HERE FOR A LONG TIME JUST TO GENTRIFY IT WITH "LUXURY APTS"! THIS IS NOT OKAY
Gustine Fudickar	90027	Worrisome for current residents
Kathryn Sauma	90027	I have lived in Lincoln Heights and have witnessed the tight knit community. It is one the most intact communities in LA and does not need it's streets becoming overcrowded from a huge apartment building that cannot support parking spaces for it's own residents in said building. If these homes are not focused on housing the community of Lincoln Heights, and priced at a rate that people can afford, then the project is threatening the culture and community of that neighborhood, a historic neighborhood. If the community and Lincoln Heights council has not been a part of conversations and decision making, then the approval of the project is ignoring the people it will affect most, and begging the question: what is the motive for building a 400+ apartment building (with half the parking spaces able to accommodate potential renters)? What are you hiding that you are afraid will not be agreeable by making decisions without consulting the community? And finally, this practice of gentrification is a furthering of colonial practices like that of taking land from Native peoples in the US, those of which have been pushed out and given homes on land that is nutrient depleted and scarce of resources. Gentrifying Lincoln Heights is asking people who have lived there for decades to move out, further away, distant from their community, roots, and resources that THEY built in the neighborhood—to be reaped by newcomers who do not have anyone else's well-being in mind besides their own (the building owners and planners especially). Let's learn from history instead of repeating it blindly and ignorantly.
James Arriaga	90031	It's not good for the neighborhood
Melissa Alonso	90031	It is a way to push out the working class

Marissa Soto	90032	Gentrification is the erasure of black and brown communities, the erasure or our culture and most importantly it is the erasure of fellow Angelenos like myself who call this area our home. Gentrification needs to stop or else innocent families and individuals will suffer.
Samantha Shay	90026	This means the destruction of an already important space for our community.
Christopher Garcia	90034	New Luxury Apartments will displace those affected by Novel Coronavirus job loss
Janine Alburo	90033	fuk gentrification!
	90031	I don’t want anymore gentrifiers in Lincoln heights.
Jennifer Bobadilla	90255	I oppose evictions.
Natalie Saenz	90032	
Kloe Galindo	90032	468 new apts is unnecessary!!!
Richard Ramirez Jr	90032	
Miles Brenninkmeijer	90031	The city of Los Angeles is facing a housing crisis as a direct outcome of developments such as these. WE DONT NEED LUXURY UNITS WE NEED AFFORDABLE HOUSING. This is disgusting that the city is run by money from projects like these that are only intended to ruin the city and the lives of those these developments displace.
Gabriel	90032	
Bianca argueta	90007	Gentrification!!!
Destinee	90031	It will displace people who live in the community, it will affect the community by bringing the rich class over here to an old community and taking over
Leticia Maria Muro	90065	Lack of affordable units and increase in surface street congestion.
Joyce	90031	No to gentrification
Annabelle Quezada	90302	The wrong kind of resource into the community
Danielle	92101	More affordable housing is the key to improving California communities, NOT luxury apartments.
Victoria Pierce	90034	
Breeann Rapan		This community needs to be heard.
Elizabeth Miller	90012	It will dismantle the creative, cultural identity of Lincoln Heights
Lucas fracher	90026	This is a politically corrupt development
Alexandrea Piraino	93535	I grew Up in north east LA and lived there 33 years of my life. Due to all the luxury apartments/condos and gentrification, I was Forced to move away from my own home town last year. I am Happy to have the town uplifted and Modified just not to the extent that people are taking advantage and the locals being taken from their own homes due to price gouging rents and mortgages. Our low income and homeless families deserve low income housing. We should be saving the communities people not devastating their entire lives. Please do not built more luxury apartment/condos. Build affordable housing for the locals. Thank you
George jackson	91744	Grew up in Lincoln heights ave 21. It’s always been a area where low income families can raise their children in a safe relatively affordable environment and it’s why the community has been able to be self sustaining with little help from the government. If you take away the affordability you push out the families that built the sense of community you find so attractive.
Gen Dur	90031	More traffic. Changing community
Alin	90032	It’s a dumb project
Paulina Amador	90065	Why are we building a “luxury” complex when are people within the community are struggling to stay in their homes and not get illegally evicted!! There was also no sort of communication about this to the people living here!
Sam	90065	There must be community input on a project this large. What needs does it serve and does it serve them for the community of Lincoln heights or for gentrifiers and profit?
Rogelio Chavez	90031	No on gentrification
Safira Patel	90033	LA city planning should be working on concrete ways to promote growth and invest in the current population and community, rather than adding 500 new LUXURY units to the community.
Shirley Guzman	90032	This building will feed into gentrification and the displacement of Lincoln Heights community members!! The community did not ask for this and we don not want it!
Anastasia	90041	This will displace many from their home town. Not good for the hood.
ian	90032	no one in the community was consulted... pushing development forward in the midst of city hall’s pay to play scandal... displacing neighbors for LUXURY APARTMENTS???? they should be ashamed
Isabella D’Agnenica	90031	Born, raised, and currently living in Lincoln Heights, I want to ensure that my neighbors and my own family are able to continue to live safely and affordably in our beloved neighborhood.
William park	90033	Build affordable housing.

Brittany	90301	In much of LA you'll find luxury apartments but you'll also find a large population of homeless folk. I live in Inglewood and we are battling a transition of gentrification and resident displacement. I'm signing this petition to help residents from being displaced. AFFORDABLE housing is a necessity Luxurious housing is not.
Creighton Baxter	90031	Lincoln Heights deserves better than ugly condos. We deserve accessible living spaces for the workin class communities already in Lincoln Heights.
David Amaya	91754	Poor communities always get the short end of the stick or nothing at all.
Niamh	90039	
Selena Ortega	90031	This project is not geared towards helping resents reside there and there has be ZERO community input or involvement
Téa	90065	
Sadie Spezzano	90042	Further erases communities that have been continually uprooted and pushed out due to gentrification, this apt complex will hurt the community
Annabel Shabestari	90717	The lack of community involvement in decision making is unacceptable. This will greatly impact the neighborhood and current residents must be consulted.
Ken	90033	I wish to see communities of color intact. Every housing development only serves the rich and the white and is directly harmful to communities which have existed in these places for years at this point. Communities of color deserve to thrive, not just people who can afford massive apartments. Actively displacing people and contributing to the homeless problem is evil.
Mica	90027	This displaces residents.
Ashley Kron	90031	This project is a violent affront on the long-standing communities living in Lincoln Heights. Most people have lived here for 20-30 years. My neighbors grow fruit in their yards, have dogs, raise kids. A project like this would only attract affluent, white people into an area and slowly displace the predominantly Latinx community that already lives here. We do not need giant complexes we need affordable housing.
Sadie	90021	This 400+ units of luxury condos will displace residents while not serving the already existing community.
Janelle Reyes	90004	Large developments of luxury apartments further the process of gentrification and displacement of the neighborhood's native community, in this case the Lincoln Heights area. This project does not serve the Lincoln Heights community and I oppose it completely.
Jasmine Kuo	90024	The project will displace vulnerable populations who have called Lincoln Heights home for their entire lives especially during the pandemic. The community should be involved in the decisions made about them
Rob Scharlach	90033	Fuck gentrification
Karin Nord	90031	No more gentrification! No more displacing people.
Nicole Martins-Boyte	90026	Do not build
Lucia hajek	90031	As a resident of Lincoln Heights, this "project" is extremely unsettling. Our community is not up for grabs in this scheme to displace minorities. This is our home. We'd like to preserve the community and put a halt to further gentrification and displacing current residents with this gaudy complex.
Reyna Colt-Lacayo	94602	
stephanie loza	90279	no more gentrification
Marlon Mara-Lenoble	90032	This new building with directly harm the community of Lincoln Heights, and must have a chance to be opposed.
sam s	90065	the gentrification of working class POC dominant neighborhoods, especially during a housing crisis, will only further harm the community and those who reside within in
Jenny	90026	
Amanda	90065	Keep Lincoln heights affordable!!
Andrea Mejia	91791	I oppose the gentrification of Lincoln heights and the community needs to be involved in this dialogue.
Kyle Canyon	90065	Luxury housing is not what this neighborhood needs. This project puts multi generational families at risk and threatens to eradicate this neighborhoods community.
Evelyn Beadle	91030	We do NOT need luxury apartments. Stop this gentrification and blatant disregard for the community that is already in place & opposes this construction.
Elizabeth Diaz	90042	If long time residents of Lincoln Heights can't afford to live in the proposed project, what is the point? BIG NO to the project
Nour lubeid	90065	Against the displacement and stripping of our community
cal kevany	90042	it doesn't belong in the neighborhood, people never asked for this
Allynikoltchev	90065	To keep the community safe from gentrification
Paul Sperry-Fromm	90065	This will harm long term residents of the neighborhood and lead to more developments that displace residents and create an unaffordable environment
zoe	90031	no gentrification in Lincoln Heights. we don't need luxury apartments here, especially in this pandemic. we need public assistance and services.

Amy	90031	Unfit environment for luxury apartments
Hannah Sullivan	90031	
Ethan	90031	A luxury modern eye sore of an apartment building is not what this historic neighborhood needs. Why not invest in the buildings and businesses that are already there?
Legier biederman	90031	!!!
Briana Olmos	90031	I live in this community and love it too much to let it become Just some place to visit. We deserve better than this .
Annie Brennen	90023	It displaces members of the community who are already there and won't be able to survive or afford the gentrification.
Kevin Boog	90012	Resident of Lincoln heights that opposes any displacement of tenants/ whitewashing of the beautiful brown heritage that defines Lincoln heights.
Arrow de Wilde	90027	My family is born and raised in east la & this would completely ruin the neighborhood & a lot of families lives. Lincoln heights doesnt need a bunch of yuppies coming & ruining whats been there for so long & what many natives call home.
Valeria Garcia	91801	Gentrification anywhere is a threat to low income people. I am in opposition of this project because this building will displace low income people and will spike the rent and living prices to the point that it will become impossible for low income people to live there as seen in echo park, Inglewood, Koreatown, and countless other areas in LA.
Nick Campbell	90004	Gentrification is evil
Andrea Romero	90012	We need affordable housing for vulnerable communities not luxury apartments that we cannot afford. The rich are ruining the city and ruining lives. This is violence.
NICO GARCINI	90068	it displaces low-income brown and black people and will destroy lincoln heights as we know it
Lesly palestino	90022	Because it's wrong and gentrification will eventually push all our people away as long as we let this happen
Tyler haberkorn	90036	We don't need more luxury condos that gentrify and kick out the people that have been living here for decades.
Solita	90004	This development will displace long time communities of Lincoln heights and was approved without the council of the community. It is blatant disregard for the people of Lincoln heights.
Delilah	90026	
Geno Sanchez	90020	Lincoln Heights needs more affordable/low income housing. Not luxury projects that will displace current residents.
Mallory Leisten	90012	Affordable housing is a human right, this development will displace many families who have lived in the neighborhood for generations. Ending gentrification begins with pausing these housing developments and asking 'Who is building this? And for who? And how will it impact this area's most marginalized?'
Karen Arechiga	91321	I do not support the community being pushed out of their own community to profit greedy investors and developers.
Brooke Robie	90031	Will further create gentrification
Lauren Crow	90031	Because it will push our families and erase history
Diana Parker	90031	Because the community was not involved in the decision and gentrification affects the health and well-being of the people in the community
Mary Salazar	90012	Leave our community alone
Sebastian schiff	90032	We need affordable housing. It housing for profit.
Claudia	90012	I oppose this new construction for its disregard for the community where it will reside. LA county is currently experiencing a crisis of AFFORDABLE housing. We do not need more luxury apartments that will sit empty or will further push out communities of color.
Cb	90032	Gentrification is bad.
Isabella manderson	90042	Ugly. Ruins the character of Lincoln heights
SHAY OGRADY	90041	Protect the community—housing should be affordable and for all.
Pascal Vieira	90008	Not what the community wants or needs
Lucia D'Agnenica	90031	I believe building this without the community's consent is wrong.
Germaine wimmer	90042	Ruins the character of li cool heights
Eden Fenwick	90042	Stop the gentrification of east/northeast LA. Luxury developments like this displace POC & BIPOC who have lived in the community for generations.
Ricky	90026	
Victoria Cuan	90023	Developments such as this push local communities out and increase gentrification, thus increasing cost of housing and living for working families who have lived in these neighborhoods all their lives!
Veronica munguia	90042	We need sustainable and affordable housing. This project will directly negatively impact local residents and increase displacement.

Krista H	90065	Because it's the largest land development in Lincoln heights, and do they really need to destroy and displace another neighborhood? Are we trying to move more people to LA during a pandemic? The numbers here are so high already. You know how many hours less people are in LA? You don't fix a housing crisis by demolishing blocks and building luxury apartments. That only further displaced people of low income and brings new people here. Leave the heights alone!
Lisa Hoxter	90042	We need affordable housing not luxury condos.
Megan Rose	90031	This project will cause displacement and will further escalate the gentrification in Lincoln Heights.
Sophia boli	90004	This isn't helping the community. I used to live in this part of town and I loved it bc it was u touched by gentrification and still felt like real LA
Guinevere Alcaraz	90012	Because the building of luxury apartments higher the cost of the neighborhood which in turn raises rent which pushes black and brown people out of their own homes. This perpetuates a system of capitalism and generational poverty.
Jenny Sotelo	90031	A project of this magnitude will forcibly evict And displace an already vulnerable community, putting thousands at risk.
Khalilah	90031	We must protect and preserve our community. The project does not do this. It is ugly and will be affordable
Adam Green	90029	Gentrification kills and the community of Lincoln Heights clearly opposes this gaudy, supremacist new development.
audrey leshay	90027	this is gentrification at its worst, and by fast tracking it during COVID the city is taking advantage of its community members. no new developments unless they are low-income housing or housing for the unhoused, and no new developments until the city takes time to reinvest in its original members instead of pushing them out.
Matthew Brush	90010	for the reasons listed. Los angeles does not need luxury housing—we need housing that is affordable and accessible to everyone who needs it.
Amelia DeFosset	90012	
Emily	90042	We are in a pandemic, the last thing we need is more unaffordable housing in a neighborhood that has already been rapidly changed
Vanessa Riegel	90029	No displacement!
Jane moseley	91352	Gentrification is an exploitative offense committed against communities of color.
Renee Ramirez	85338	I had to move out of my home in Boyle Heights and Highland Park due to gentrification and now to see this happening in Lincoln Heights is heartbreaking. Knowing the friends and family who live there will not be able to afford their homes if these buildings go up. This property should be used to HELP the community, not to drive out the people who have roots there.
Miller Robinson	90031	Luxury condo/apartment buildings like the one that is being planned with displace current and long standing residents of Lincoln Heights. These new complexes will drive rents up and absolutely do not service the community that already is living here and is actively opposed to these builds. I have a lot of houseless neighbors who already can't afford housing in this neighborhood! With more and more luxury apartments popping up the rate of houselessness will just grow and grow. Older folks and families are most vulnerable to these new buildings, people that own local businesses will suffer because the people that will be able to afford these new apartments will not be shopping in Lincoln Heights or supporting out local economy. It's unethical and selfish of these developers to build these units that are inaccessible to the immediate community in Lincoln Heights and will further displace long-standing vulnerable residents of Lincoln Heights. We don't want profiteering developer buildings in our neighborhoods!!
Ahmed	92091	Disrupting the areas heritage and inhabitants for capita
Sage Sherlock	90031	We don't need ugly gentrification condos going up, without care and style, just so some corrupt real estate developers can make easy money off of "an up and coming neighborhood." It's unethical and displaced people who have lived in Lincoln Heights for generations
Cristobal Chimil	90033	It's a horrible thing for the community. Lincoln hights doesn't need it.
Marc Babcock	90027	This is a family neighborhood and one of the few affordable neighborhoods in the city. We must protect neighborhoods like this at all costs.
Brenda Llamas	90031	The project perpetuates gentrification and normalizes/ spreads the displacement of BIPOC
eden	90027	we don't need more luxury apartments that are inaccessible for the community we don't need more landlords intimidating and causing violence to the community this is NOT IT!!!!
Allyn Iwatsuru	90031	This will ruin a historically significant neighborhood for a multitude of reasons
Raul Vasquez	90031	I oppose the project because rents in the area are already out of control. People who have lived in the neighborhood for decades are being priced out by uncontrolled rent increases and heartless landlords and groups capitalizing on these disgusting trends. No one should be uprooted from their homes that they have been at their entire lives just so out of town people can come in and push them out because they have more money to drive up the market.
Wesley tsai	91801	Gentrification
Ben Bruker	90029	The people don't want it
Remy Smith	90020	This project will displace low income families.
Gwen Hollingsworth	91108	This project is another example of gentrification that will only harm and displace the majority minority and working class community of Lincoln Heights. It is highly unethical and violent and I oppose damaging this community.
Heaven Aguilar	90012	There are better options to utilize the vacancy than building luxury apartments and slowly eliminating the cultural diversity in Lincoln Heights.

Lauren	91602	
Laura Mulleavy	91106	We need to support and protect our neighborhoods from housing that does not benefit its current city residents.
Conor	91381	Because gentrification results in the displacement of our community members
Jesse Hoffman	90004	Because it harms an already struggling community and will further isolate long time residents from keeping housing.
Fátima Ramirez	90031	We need affordable housing not luxury apartments.
Yarden Erez	90019	
Simone	90026	This kind of development project is one of the most permanent / final stages of gentrification, pushing out the community that created the neighborhood you cruelly and carelessly erase and paint over with soulless whiteness.
Esmeralda	90032	It is a threat to the preservation and culture of Lincoln Heights and citizens. Gentrification is pushing out residents that have lived here for over 20 years.
Crystal	90033	We like our community as it we just improvements to already existing problems, we do not need more gentrification
Claire Redman	90042	An extremely luxury development is antithetical to the community already residing in Lincoln Heights. To take away so much potential housing for the working families of 90031 is morally bankrupt and it is WRONG. More than likely the building will not even serve this ridiculous capacity, creating empty apartments when we have THOUSANDS of unhoused Angelinos.
Lucian Buscemi	90026	Housing in LA is becoming unaffordable for many residents and this will probably make it that much worse. Plus the building would be an ugly eyesore
Xia Jimenez	90039	Gentrification and the building of these complexes is an act of violence I have seen forced into my neighborhood and communities that I would not wish on others.
Zoë Lappin	91344	As a born and raised Angeleno, this kind of development threatens the way of life and wellbeing of my neighbors. To continue to build luxury complexes, that are exempt from rent control, is to ignore the reality of the people of Los Angeles. We are not all wealthy, and these developments continue to expand the wealth gap, and push Angelenos out of their homes and historic neighborhoods. In a city plagued by homelessness, and food insecurity, new luxury developments and other such symptoms and causes of gentrification, do nothing to help the majority. House real Angelenos. Not rich transplants.
Gracie gray	91320	Gentrification of this community is actively displacing those that were here first.
Snow Martin	90068	End the displacement of local non white los angeles residents for profit! this is wrong and has to stop!!!
Alexis	90033	Luxury apartments are not for the people of the community
Jackie	90033	Let’s not gentrify our neighborhoods.
Anaiah	90042	Gentrification is VIOLENCE
Katie Herrera	90042	Stop destroying our communities, take your “luxury apartments “ to the South Bay.
Nick Angelo	90041	Setting a continually destructive precedent for the erasure of historic neighborhoods and the continual displacement of longtime working class residents
Arlin Alger	90042	I oppose this project as it will displace many long standing community members in the near future.
Arlin Alger	90042	I oppose this project as it will displace many long standing community members in the near future.
Jesse Sappell	90042	
Kace Colwell		
Kace Colwell		
Ross Chait	90042	This is not in the interest of the community that brought this neighborhood up. This is in the interest of people who do not care about the community.
lena hindes	90041	gentrification, ugly, dont need it, need affordable housing and community led projects
Jasmin palacios	90032	I am tired of families and la natives being pushed out of their neighborhoods due to skyrocketing rent and irrelevant businesses. This neighborhood does not need coffee shops, little boutiques, or expensive ass apartments that no one can afford. It needs resources to educate and bring a community together.
Daniel Ray Bengston	90031	
Nadia Gallardo		It is unnecessary construction and it is not keeping the community’s best interest in mind.
McKinley	90026	To Stop gentrification and illegal evictions
Gianni	91505	To prevent the further displacement of people in the area
Dinah	90031	I oppose the project because in the end many people are going to be displaced with the cost of rent going up.
Trevor Neuhoff	90211	These developments change the shapes of entire communities. If they are going to trey and put it in this neighborhood they must have a public discourse with members of the community at the very least. Especially during a pandemic this is a disgusting project to have to transparency on
Robert	91206	I strongly disagree about this project. I feel it’s unfair for the local community and this will heavily affect the area’s rent control. Gentrification needs to be stopped. If this project continues, many more will come and many families from lower income communities will be pushed out of their homes. We need to end this now!
Michael Keehan	90031	Nobody wants this shit building in the neighborhood

Paloma Maisonet	90068	I oppose the project because gentrifications commonly displaces communities of color, like the community in Lincoln Heights, and I don't want to see that happening in a place where I formally lived.
Martin Tzonev	90065	Its evil
Catalina Bulgach	90029	GENTRIFICATION
Alexandria Gradillas	91801	Community displacement
Kelsey	90042	Not right!!! Gentrification!
Ariel		
Katia Amador	90032	I'm all for improving our communities but this project seems to be taking advantage of that, so for that, I oppose this project.
Karen Law	91030	It will not serve the needs of the community unless it's 100% truly affordable meaning 100% of the units are rented at ELI (extremely low income) and if the property is restricted to an affordable housing covenant to keep it affordable for the next 100+ years. Regardless, the community needs to be involved in discussions and feedback sessions before anything is approved!
Steven Schaefer	90814	As the oldest neighborhood in Los Angeles, it is vital we keep its historic touch and keep the residents living here who've called this sector of LA home for numerous years. This is a pure example of profit over people. This development project shouldn't even be considered to begin a phase of development here. An absolute joke.
Liana May	90065	It is ruining the peace of the neighborhood and causing pollution . And it is taking away from the community has been there forever.
Senia Iniguez	90042	It's a threat to the community because it promotes gentrification
sara mcgrath	90027	
Stephanie Rodriguez	90042	This is NOT what the community needs or wants! It will only work to further gentrify north East LA.
Alessandro	90028	Because these luxury projects are agents of displacement that destroy communities and offer little in the way of meaningful affordable housing or servicing the actual needs of the community that lives there
Gracie	90026	for displacing locals and ignoring the demands and needs of those indigenous to the lincoln heights community
Jake Hjortland	91101	LA needs affordable housing now! The city needs to respect and preserve working class communities. Housing is a human right. LA does not need another hideous building full of vacant, luxury apartments towering over unhoused, displaced and working people. Let the people of Lincoln Heights decide the future of their community.
Nataly	90031	We dont need luxury, we need affordability!!
Anna Ramsey	90068	
jack lutsky	90045	no to gentrification in lincoln heights and to the displacement of the working class latinx individuals and families!
Danielle Garciano	91107	Stop gentrification and keep affordable housing!
Kathrina Lorenzo	91311	These developments displace life long residents of the neighborhood all to profit and make housing UNAFFORDABLE. Enough is enough. No more gentrification.
Kimberly Figueroa	90042	It is an unnecessary project that will do more harm to our community
Eavan burke	90274	
Gissel Gonzalez	90042	The community doesn't need it!!!!!
Bri Cee	91911	It will displace locals from their homes and strip them of their right to affordable housing.
Jacob	90028	I would like to move to LH and a development like this robs the neighborhood of what I find desirable
Aimee	90031	They didn't ask me
Angelina	91502	No gentrification
Thorson Munoz	91722	This project is detrimental to the livelihood of the 30k of Lincoln Heights; the completion of this project will result in major displacement and homelessness for residents of Lincoln Heights, many who lack the financial means to look for another place to live. Gentrification is lawful colonialism, colonialism will always result in genocide; only it will be committed by people in uniform
James Cherry	90019	its too expensive for this neighborhood its displacing life long residents who are mainly poc, so its removing the cultural significance of this area. This is actively going to increase the cost of living for the area and push out lower income families from their homes.
Evan Burke	92104	This will push longtime residents out through gentrification.
Kim Cuevas	90011	Because Lincoln Heights has been one of my families many homes and, it would be a shame to see it disappear.
Samaria	91780	I don't want families to be evicted from their homes during a pandemic, this is horrendous and evil.
Julie	90031	We're aren't getting a say in our neighborhood.
Shannon Sullivan		Moving forward with this project is essentially moving forward with contribution to LAs already large housing crisis.

Chris mathis	90042	It’s fucking horrid and would bring more gentrifier trash to the neighborhood
Mia Fernandez	91103	Even though I do not live in Lincoln Heights, I have lived in communities that have been gentrified—my dad is currently homeless due to forced eviction to build luxury homes. Gentrification is violence. For these communities to undergo decades of racist zoning laws and then have wealthy people enter their communities just to take it from them and force them out all over again is inherently violent. If the community largely does not support a project because it wouldn’t benefit the community, that project shouldn’t happen. Plain and simple.
Van rosales	90004	Gentrification is genocide and this project will directly affect the Black and Brown community of Lincoln Heights
Daria Solovyeva	90019	Gentrification of lower income/ historic neighborhoods is incredibly detrimental to the lower class people and the already suffering communities that’s plummeted in evictions. The people of Lincoln heights are being illegally evicted and displaced daily. I demand this project halt, or upon completion being turned into a shelter for the houseless.
Benjamin Harper	90042	Enough gentrification! Let people keep their neighborhoods and communities instead of cramming personality-free, overpriced houses everywhere.
Bailee Cowperthwaite	90026	Affordable housing
talin	91106	theyre erasing the culture
Jackson Crites	90031	This project will drive up the price of the neighborhood that consists mostly of renters, causing displacement. I oppose any and all luxury developments especially in working class neighborhoods.
Elizabeth Estrada	90640	it’s genocide to the community
Noah sharp	90066	I oppose the project because I have lived near Lincoln heights and have valued the authentic culture and found beauty without the need for luxury condos. It’s easily one of the last & best places in the city that isn’t so capitalized on. Please do not approve.
Lizzie Rutkevich	90024	A gentrification project of this magnitude will do nothing but tear apart the Lincoln Heights community by displacing residents whose families have lived there for decades and established the local culture. The community of Lincoln Heights needs investments like community services, affordable housing, and rent support during this pandemic. Instead of alotting resources to the community, this new unit development project would throw away the resources Lincoln Heights residents so direly need for unaffordable and hideous luxury housing for the developers own profit, not the need of the community.
Aileen J	90032	I oppose this project because I believe that there is an over crowding in LA and this does not help. This also makes living in the area harder for people and families who have resided in this area for years, no one should be subject to higher rent prices due to these apartments. Another reason I oppose this project is because it most likely will not be good for the environment to house people in overcrowded areas.
Kimberly Rodarte	90011	This is a home to many and it shouldn’t be gentrified. White people already have so many other places they could choose from. WHYYYY OUR STREETS?
Ivy	90032	Overpopulation
nikki houston	90031	lincoln heights is beautiful the way it is don’t destroy it with harmful gentrification investments
adan	90042	North east la has undergone extreme gentrification starting on York, and expanding to Figueroa and even more areas. The disease of gentrification is what drives communities apart while actively driving out residents who’ve lived there for years all because a loft “needs” to be built. The only thing this will do is harm the community
Hayley Shore	90065	Gentrification / ruining the neighborhood
Corinne Dyson	91104	This project aims to displace the community, not serve it. I’ve been a resident of Lincoln Heights and believe the city’s no. 1 priority should be investing IN the existing community of historically disenfranchised people.
Gabi Rudin	90029	Affordable housing needs to be built. We don’t need more luxury apartments. LA has a homelessness/housing crisis
Valeria luna	90001	We need to end gentrification
Ariana Delawari	90031	Gentrification is hurting so many people
Paulette serrano	90006	
Nicholas Orenday	91803	my friends and family live there, and i want their neighborhood to be alright
Sasha Barron	91042	it’s the gentrification of a highly culturally saturated city of families and citizens that are struggling to even make a living enough to live there. Projects like this and other possible future ones will eventually raise costs in the community, pushing out citizens and leaving people homeless.
Samantha	90012	Communities need affordable housing not more gentrification
Jenna	90029	Luxury apartment complexes displace people of the community who have been there long before these projects are erected. They raise rents, force businesses to close, and eradicate neighborhoods. This will disproportionately affect people of color and low-income folks.
Arthur Cooke	90026	i have friends and family members who live in lincoln heights and despite my relationship to the area any and every community should be funded from the roots and grow organically and collectively. this project is gentrification.
Karina	90012	I live next to Lincoln Heights and this affects and displaces my community deeply as well. We must stop gentrification which is modern colonization by rich folks who don’t care about community and working class people. WE HAVE HAD ENOUGH
Sterling Wells	90042	This development will displace long-time local residents and make people homeless.
Melissa Vega	90033	It’s taking away potential for affordable housing in the community. It’s an eye soar

Abigail valdez	91103	
Ted Davis	90042	There are enough gentrified parts of LA to build this complex in already. Don't turn Lincoln Heights into the next Echo Park. Preserve the affordability and heritage of a historic and diverse LA neighborhood.
Natalie	91730	Gentrification kills
Aram Vanerian	90031	Raising rent prices, pushing families out
Nicholas Santana	90004	Community don't need it
Migdalia	90031	no
Iran flores	90031	It will start raising up rent around and in Lincoln heights and that doesn't benefit that actual ppl who live in this small city
Tiffany Virgen	90201	Yes I oppose, no to gentrification
Isabella	91754	
Heather Harris	90026	Because building huge monstrous building is encroaching on a community that does not need this build a city park or something that helps the community not hurts it!!!!
Valentina	90032	It will create more displacements and illegal evictions
Daisy Galindo	90041	This project would dismantle the neighborhood for low income families. We've already seen what developers have done to surrounding neighborhoods like highland park. We must support low income communities now more than ever. There is simply no need for mega luxury apartments in this neighborhood.
Benjamin Vinkovic	90041	Gentrifications, and rent cost. People should not be shoved out of there neighborhoods for apartments for the wealthy.
Ashley Sanchez	90065	Will kick out low income families
Ryan watts	90031	stop the gentrification and extermination of one of Los Angeles first neighborhoods, allow those who were born/grew up here remain and be able to use their rights and freedom to maintain/establish new businesses and continue to be able to keep their homes and community.
Jasmine	90031	These luxury apartments will most likely be unaffordable to those who would typically be able to afford to live in Lincoln Heights. There's a chronic homelessness issue in Los Angeles. We should work on housing the homeless before building a gigantic luxury apartment that will most likely sit semi-vacant.
Jasmine	90031	These luxury apartments will most likely be unaffordable to those who would typically be able to afford to live in Lincoln Heights. There's a chronic homelessness issue in Los Angeles. We should work on housing the homeless before building a gigantic luxury apartment that will most likely sit semi-vacant.
Julia yerger	90031	The development will lead to gentrification, which will lead to displacement of long time residents. The community must be heard and their lives taken in to account.
Karina	90042	fuck these transplants
Joseph	90042	These landlords/tenants trying to get rid of people of color
Izzy	90032	There has been no conversation with the local residents
Martha Rayo Osuna	90640	I am against the displacement of black and brown communities. This should be turned into affordable housing instead.
Amanda Brown	90031	It's displacing Latino and black people!!!
rachel mcgovern	90026	genrefication
Janelle Snyder	90031	This project would completely destroy the integrity of our neighborhood and would displace many. Gentrification has no place in 90031, no resident wants this!!!
Yazmin Escamilla	90033	
Audrey Harrison	90012	I oppose the project because we need to protect our communities especially communities as diverse as Lincoln Heights. Gentrification displaces the people who made these neighborhoods great and takes away their home not just in literal structure but in community in familiarity and social circles as well. Not to mention the trend is that it effectively displaces Black brown and other people of color from their own neighborhoods allowing wealthy (More socially mobile) white new comers to start and take the neighborhood from those who literally created its culture. Los Angeles does not need anymore gentrification or buildings which will increase the rate of new comers to our neighborhoods. Look towards community leaders for imagining how to built and increase affordable housing not money hungry developers who don't understand or know the community at all.
Sarah Veyna	91107	There needs to be actual measures to protect the poor POC communities of Pasadena, not displace them.
Joanie aguilar	90065	It's taking from the community
Soleil	90291	No gentrification
Juan Carbajal	90065	I have grown up near Lincoln Heights my whole life. Watching it become overrun with new developments and businesses while simultaneously displacing countless community members is not right. This proposed project would destroy the community further

Andrew Lane	90024	In the midst of a global pandemic that is devastating Los Angeles and disproportionately affecting our Black and Brown communities, is the worst possible time for us to gentrify Lincoln Heights and displace its BIPOC and working class residents. This project is a weapon of white supremacy and inexcusable cruelty towards these communities. Angelenos will not stand for the gentrification of Lincoln Heights.
Andrew Lane	90024	In the midst of a global pandemic that is devastating Los Angeles and disproportionately affecting our Black and Brown communities, is the worst possible time for us to gentrify Lincoln Heights and displace its BIPOC and working class residents. This project is a weapon of white supremacy and inexcusable cruelty towards these communities. Angelenos will not stand for the gentrification of Lincoln Heights.
Andrew Lane	90024	In the midst of a global pandemic that is devastating Los Angeles and disproportionately affecting our Black and Brown communities, is the worst possible time for us to gentrify Lincoln Heights and displace its BIPOC and working class residents. This project is a weapon of white supremacy and inexcusable cruelty towards these communities. Angelenos will not stand for the gentrification of Lincoln Heights.
Marley McMahon	10011	Protect the people
Lauren Kim	90027	The community could use a number of things before even thinking about building this. This also will send rent prices up for people who already are living paycheck to paycheck.
Sabrina Strausbaugh	90005	I do not support illegal evictions or gentrification
Benjamin Kujawsko	90031	
a	90038	
Maya Abee	90032	The city of Lincoln Heights would not benefit from this development. It is not in the community's best interest and that needs to come first. I have grown up in El Sereno, in close proximity to Lincoln Heights and I have watched it change over the years. This will hurt more people than it will help. Displacement from neighborhoods is a leading cause of homelessness and during a pandemic no one should be forced from their homes.
Ted Gerike	90012	This development will tarnish the neighborhood. We need affordable housing, not luxury condos.
Sarah Veyna	91107	Correction: Because the displacement of low income POCs needs to stop in Los Angeles.
Cindy	92782	Development should not be a top-down decision making process. This project will affect those living there for the rest of their lives. Please do not impose another burden upon this community especially during these trying times. We know developers have the money, but save it for something else right now. We do not need another luxury apartment complex that'll evict another very-much-alive community. Displacement is real, and this community really does not need that.
Julia Garder	90065	We need affordable housing not luxury developments
Jenelle Smith	90017	it will push people out
Lauren Dunn	91104	
Maria-Elena Kaser	92649	I oppose all forms of gentrification and displacement of citizens who have no reason to be kicked out, especially when the only reason is greed.
Amanda Kwong	91770	
aaliyah	90032	it's that right
Dorrin	90024	Screw gentrification
Cole Prentice	90027	Gentrification
Adam Baldwin	90065	We do not need more high income housing in Los Angela's let alone on this side of town. These buildings are getting built all over the city. No one even moves in, and we're left with an empty eyesore that causes rents to rise and other developments to follow suit. DO NOT RUIN OUR HOME.
Jason torres	90601	Quit gentrifying our city.
Aaron Minardi	90042	The increasing number of new developments without rent control will continue to push people out of their neighborhoods. LA doesn't need more luxury apartments we need leaders/laws that care about our citizens!
Pablo Garcia	91801	Luxury condos and gentrification is not what the community needs. Not 400+ of them especially. Why is that the biggest project the community has gotten, and why has it been hidden/fastracked during covid?
Ryan moore	90031	It does not support the existing community, and would lead to further gent ification the the mixed class working neighborhood
Lawrence Luna Jr	90601	We must preserve and rejuvenate our Los Angeles neighborhoods rather than forfeit them to gentrifiers that displace families who have called this home for generations. Im disgusted and appalled that the city sped this project through approval under Covid. It should be mandatory for the city to include the neighborhood in any planning or development. The people's voice must not be silenced.
Leslie Zamora	91324	I oppose this project because gentrification rises prices for the people who have been living there. By building this department it is erasing the culture of the community.
Donajy Baez	90026	fuck gentrification
Crystal Gomez	90042	Because people within the community deserve affordable housing.
Sam Sweet	90031	Developers need to be checked by the people whose lives they affect. Residents of LH have a right to be heard and as a resident of Highland Park I'm ready to push back on their behalf.

Antonia Oliver	90019	These developments will drive up rent costs for surrounding residents who have lived in Lincoln Heights for a long time and deserve to have their voices and needs prioritized over profits for people who don’t even live in the neighborhood
Joanna Ewing	90065	Gentrification kills
Carlos	90041	
Mila Ryder	91604	This project poses a massive threat to neighborhood families and their housing!
Valerie Moreno	91709	
Ronda	91803	
Harmony tividad	90068	Protect lincoln heights
Chris Sirney	90039	Fuck rich people trying to fuck over local economies so they can make more money. Also the buildings will ruin the look of the city
Christina cooney	90029	These buildings are ugly and do not promote community. They do not blend in with the existing community.
Marijayne Cortez	90640	There's no need to raise rents and push people out.
Jenna	91106	The community should decide whether or not to have such a large "project" take place.
Rachêl Barocio	90022	Because it puts people who are at risk and marginalized in a compromising and displacing position. It’s unethical. Entirely unethical.
emylou	91791	I oppose the project because it will negatively impact the current residents lifestyle, culture, and neighborhood.
sierra	90042	gentrification is wrong!!!!
Sophia Negrini	91755	Because you will make everyone who lives in Lincoln heights become homeless
Veronica Martinez	90033	I do not support gentrification
Francesca L	91103	Preserve communities in Pasadena. Also the build plan looks ugly as fuck.
Kristi Stuart	91505	Gentrification kills
Andrea Regino	90032	Because people shouldn’t be kicked out of their homes to make room for people that can afford “luxury” apt. Stop gentrifying.
Charlie Powers	91702	Bullshit gentrification will ruin the community.
Amanda Straws	90031	Direct threat to our community
Julian garcia	90031	This project was never brought to the attention of the residents in lincoln heights. And as a resident of said community i feel disrespected and taken advantage of by such a huge project being started in the community with out community consent
Aaron Sperske	90068	I oppose this project as it destroys the culture of Lincoln heights and displaces long-standing community members.
mach burgess	91001	Gentrification is violence.
Valeria	90255	This is will displace residence and cause risks to them.
Katherine montgomery	90042	Project is out of scale with the neighborhood, also does not offer enough low income housing.
Marissa alanis	90033	We need to conserve our communities and do what’s best for the people not politicians.
Amber perez	90032	We dont need anymore complexes or housing units. Families are already struggling to make ends meet as it is.
Paige Arevalo	91106	Use that money to support the people and community who are and have been there!
Jennifer Gomez	90019	It directly impacts then cost of current low income housing as well as gentrifies a neighborhood rich with cultures . It is a direct attack of POC communities
Kelsey Reckling	90031	
Nick	91204	a 468 unit luxury apartment building will destroy the neighborhood of Lincoln Heights and will drive out life long residents of the neighborhood. There is too many empty ‘luxury’ buildings near by, its not necessary at all. Fill the 700 unit building in Chinatown first.
Zaira	90032	Why make people suffer ? I’m here to spread awareness of what’s going on.... we’re here to help the communities not separate and make people angry.
Fiona Baler	91786	It does not put the people of Lincoln heights first!
Phoebe O’Connell	90046	Although I am not from Lincoln heights I was born and raised in Los Angeles. In my lifetime I have seen rapid changes across the city, changes that cater towards modern poorly constructed buildings with retail on the first floor and sky rises towering above. Developers are destroying Los Angeles, more importantly developers are destroying neighborhoods full of black and POC communities, developers with plans to gentrify and repurpose neighborhoods that already have strong and vibrant communities that do not deserve to be pushed out. Fuck developers! Preserve Lincoln Heights.
Christopher Pecaro	90031	

Jade Mena	90032	The well-being of the community
Pablo Saravia	90031	This is killing the culture of Lincoln Heights. We refuse gentrification
Wesley Doloris	91364	The project is a slow/ (not so) subtle push-out of a community.
Madison Snaric	97128	
Lizbeth Figueroa	90026	Tired of Los Angeles getting expensive and gentrifying our homes for only the wealthy to enjoy. Kicking out generations of families to move somewhere else
Dustin Stafford	90048	Don’t gentrify the neighborhood
Margo Gutierrez	91711	Stop gentrification! Stop capitalism!
Savannah Garcia	90031	NO ! No parking will be insane. Don’t need it
sophie	90232	
Brenda	90032	
Cristina Estrada	91770	I oppose gentrification and homes that are not affordable for the local community.
Rocco Rivetti	90065	Build affordable housing for communities not luxury displacement
David	90405	
Isabella Van Ranzow	90031	Large scale developments enable gentrification and the displacement of the people of this community. Licoln Heights will not be another York Blvd for politicians and developers to profit on the disenfranchisement of actual community members who have been here for far longer than any politician’s term in office. City planning projects such as these do not bring more money into the community for actual community members, and are ugly. Licoln Heights is the oldest city in Los Angeles and deserves for its legacy to be preserved not developed over. If you want to stimulate the community’s economy then invest in the real community and its people, not gentrifiers. I urge Councilmember Cedillo to take a walk down Broadway and reflect on the changes that have occurred just in the last five years. The prevalence of colonial-esque gentrifiers is plainly evident - but for now, so is the legacy of this community. So, I urge Councilmember Cedillo to reconsider this decision for development, and come serve the people of the community who elected you!
thomas	90292	NO BENEFITS, ONLY CORRUPTION
Jennifer	90057	It is going to ruin the neighborhood.
Christina Perez	90063	I live close by and I do not want luxury apartments to displace the community.
Nicholas Murphy	90017	Stop building luxury apartments / condos. Stop the displacement. Shady business deals, shame in Gil Cedillo
ruth	90032	lincoln heights is already beautiful as it is!!! leave it alone!!!
Alice	91803	Luxury units are unnecessary and will cause hardship and trauma for LAs most vulnerable. We do not need anymore empty luxury apts for business men to use as a tax scheme.
Allegra Samp	90405	
Alli Menscher	90042	The absolute last thing any community needs in these trying times is a new luxury apartment building. How about a community center or garden instead?
diana	91340	wrong
Katja Farin	90041	I oppose the project because the new development has to be for the people that live there not for gentrifiers coming in. Also the city/residents should have a voice in huge developments in their neighbors hoods.
Miranda Palarea	90031	There’s no need to gentrify Lincoln heights
Dominique Flores	90042	Gentrification is violence to those who live in the community. Building new apartment complexes like this pushes out locals and forces them to relocate in neighborhoods they’ve lived in their whole lives. Prioritize the people and not these expensive gentrification buildings.
Samantha Eddo	90033	This housing project will force long time residents out of the area and encourage developers to infiltrate Lincoln Heights. We can not afford to lose any more historic LA neighborhoods to gentrification, and the stewards of this neighborhood do not deserve to be displaced for mere profit.
Evelyn	90631	The gentrifications of our cities worsens inequality and displaces families. We need affordable housing, not housing to raise the already criminal rent prices.
Lauren	90031	NO MORE GENTRIFICATION!
Gage	91506	It is wrong and nobody has asked the residence if this was okay
Melina	90032	Leave Lincoln heights alone!! This thing is atrocious and inconsiderate of the existing community
Jaime Bravo	90255	No luxury living should be established in underserved, redlined, low home-ownership Lincoln Heights. Where are the affordable renting units for singles, students, and ex cons? Is there opportunity for community dialogue prior to breaking ground? Where is GIL CEDILLO?
Megan	90041	It will displace people living in those neighborhoods
Kaylah n	91801	Gentrification
Noel	90031	I have been a Lincoln heights residence all my life. We do not need this fancy apartment complex just so more people can come into our neighborhood and eventually kick us all out . I do not support this gentrification.
Lauren Hanna	91730	Because gentrification is violence

Palentina Lam	91775	
Skyla	90032	No gentrification
Mario Muruato	90031	The inner city does not need this attention it was cause chaos with the entitled new people
Kimberly	90063	Action is being made without asking what the community thinks.
Maggie young	90031	This kind of developement is Gentrification. Gentrification is white terrorism. Abolish developers. Abolish greed. Abolish white supremacy.
Deyssi	90026	
Izabella Espadas	90031	I do not support the gentrification of my neighborhood
jalen williams	90063	we dont need our city gentrified
Nathan Ward	90042	Renters all over NELA will be impacted by the effects of gentrification. This project is the worst example of intentionally pushing out low income residents and a neighborhoods culture.
Christine Whitney	90042	This project will destroy the character of the community and will be a huge catalyst for gentrification. We want more affordable rent not displacement.
Julianna Sy	90031	I love my neighborhood and all the people living in it now - everyone that i know here is middle class / lower middle class, and a luxury apartment building would devastate families and communities that have been here for generations.
Jack Hjerpe	90028	
Naomi	90031	Black people + People of Color in LA are being left no where to go because of the gentrification that has kicked them out of the neighborhoods they grew up in. I live in Lincoln Heights and have noticed that the cost of living is not as inflated as other areas. I don’t want to see the neighbors I love and care about be dislocated.
Dulce	91942	This is gentrification
Myrka Santana	90063	This building is being built to erase the commuting of Lincoln Heights.
Naima	91801	
Semilla marquez	91950	gentrification destroys our communities and culture
Angelic Montes	90018	
Jaya	91604	
Gina	90031	
Edward De Jesus	90004	To protect the community and to keep the heritage of the area alive.
Kevin Dixon	90065	Huge multi family developments are an eyesore, and will displace residents who will be unable to afford the luxury units being proposed
Alexander Arellano	90031	Rising cost of living expenses in East LA push the native community out. Building such a large structure would contribute to this at the expense of the community.
Ruben Galindo	90032	Will eventually lead to rise in rent in area and move families out of the neighbors
Shelby	90027	Because it’s gentrification and it affects mostly people of color who are low-income. The city does not need more expensive homes. What we do need is to provide housing for low income families and the folxs who have lived all their lives here.
alison kafka	90031	lincoln heights is a historic neighborhood that does not need any more unnecessary gentrification! stop pushing rent up for residents.
Carlos Reyes	90031	Unfair against local renters and business owners in the area.
Bee	89183	GENTRIFICATION
Pilar Wong	90041	Gentrification is constantly portrayed as “improvement” and when people see projects like this they think “we need more housing so that’s good” but they don’t understand that it’s doing the exact opposite. It’s taking a community and ripping it apart from the inside by not allowing people access to affordable housing. It’s making the housing crisis worse. People need AFFORDABLE and SUSTAINABLE housing. (as in they can stay for a long time and rent won’t escalate). Being born and raised in Los Angeles, I know Lincoln heights is a community where people stick together and survive together. By labeling neighborhoods as “up and coming” and building luxury complexes that push people out of their own homes with no where to go. It’s not fair. Lincoln heights is supposed to be a place where people can go and afford to live with a roof over their head. We’ve seen in happen with Dogpatch in San Francisco. We’ve seen it in parts of compton. Eagle Rock. Inglewood. My home was once a crack house that people would look down upon with our neighborhood. Now white hipsters are moving in and labelling it as “classic” or “authentic” and driving out local businesses. All my favorite childhood places have been wiped out and replaced with a constant cycle of badly designed businesses that last no longer than 3 months and charge $11 for a burger. I don’t want to see this happen again. Not to Lincoln Heights. All of East LA is being turned white and rich as skid row grows. People turn their backs on working people just trying to make it and provide for those they love. If we don’t have our livelihood, what will we have left?
Shannon Pollak	90056	This neighborhood as well as any will not benefit from over priced apartment complexes of which, due to already strong racial and economic wealth disparities, displace residents more than they house them. Those involved with implanting this complex are not connected to the lincoln heights community in any such way. This project is ultimately stealing space from locals who could otherwise be creating more public resources that serve the needs of the community they know and care about. This project is not welcome here.

Jacob	90031	The gentrification of our historic neighborhood
Julianna Lopez	90065	To stop gentrification and overpopulating underfunded and under resourced communities during a nationwide pandemic!
Ron Noval	90015	Stop harming poor people.
Jacob hinojos	90031	Because I love how our neighborhood
Maya Lee-Morales	91103	It would be devastating to all the residents that live in this area already with low income.
Jackie Q	91776	
Kitty Perez	90069	El espacia es debe de ser para la gente de Lincoln heights
Mai sir Wong	90041	Don't let this happen again. This happened to highland park and it can't happen again. It's downhill from here. Fuck gentrification.
Angelica Vargas	90031	This area is very populated as is and with this construction it will not only affect the Elementary School environment across the street where I yousto work at before but to the area around itself where it's hard already to find parking and the safety of the children would become more affected . Plus no neighborhood committee was set for this huge project construction to businesses around the area. So that's poor planning
Sabrina	90031	A threat to the community- the people who have grown up here and lived here their entire lives!
Bjorn Rojas	91604	People should be making these decisions within their community, this project will affect all of their lives and the people in charge wont have to experience that. Its inherently wrong
Valeria Hernandez	90031	I'm a resident of Lincoln heights and live right down the street there is enough traffic here every morning apartments would make it way worse go build fancy building somewhere else us people who have lived and grown up in Lincoln heights are not in aw of these new fancy projects we dislike it!!! GET OUT
Alejandra Arevalo	90031	This city has members that have created and cultivated a community of people that have been around for many years. It is completely rude to try to implement this without even having a conversation with the members of this city. There should have been a conversation and request to have OUR opinion and obviously it is a NO. We will not allow the rich and unmatched history of Lincoln Heights to become another playground for commercial properties and real estate.
Danielle Allianic	92606	Please do not gentrify this area.
Stevie ochoa	91790	Very simple. This is gentrification.
Michael Millis	91342	gentrification
Jessica	90032	I oppose this project because what these people are doing is wrong and just thinking about the long term effects that this could cause to residents is horrible, I myself have been quite familiar with Lincoln heights because I grew up in Los Angeles and to see this happening is awful, I would say that me myself, I am not a fully educated person in gentrification or many topics that may be uncomfortable to talk about but I want to educate myself and stand up for what I believe is wrong and right. I come from a Hispanic family and often times I think that I'm shielded from important information or on topics that like i said can be uncomfortable to talk about and I think now is the time to talk and to think and also to educate yourself on everything happening in the world.
carmen madera	90022	gentrification
Makarya	91754	
Alejandra Velasco	90032	This development project will do nothing for the community besides displacing hundreds of low income families in the process, and thousands more in the aftermath.
Alejandra Velasco	90032	This development project will do nothing for the community besides displacing hundreds of low income families in the process, and thousands more in the aftermath.
	91030	Gentrification in a community such as Lincoln heights will only hurt the people living in it
Carlos sandoval	90065	This project is not conducive to maintaining a healthy socio-economic ecosystem in this neighborhood for the current inhabitants
Valeria Valenciana	90031	
Oscar Gonzalez	90032	Because there's already been gentrification in my hood here in El Sereno
Josie Vasquez	90032	
Isabel Morales	91780	
Roman Sabino	90802	Fuck this shit!!!!
Cynthia Mancilla	90031	It's unnecessary and a waste of money. Build this somewhere else.
Sebastian sena	90063	Stopping gentrification
Daniel Solano	90022	I'm an educator in Lincoln heights. I work with many low income families. I fear this will only make things harder on the families that are already struggling.
Patrick Kellycooper	90031	During an unprecedented economic crisis, the last thing this neighborhood needs is more luxury development. Stop this development now!
Hayley Brownell	91604	
Mario Loving	90013	Preserving the current community.

Kimberly	90031	It’s unfair. I grew up here lived here for twelve years, low income, and afraid of higher rent.
Elliot Glasser	90041	I oppose this project because we need to protect the diversity that East LA contributes to the greater city of Los Angeles. We need to protect the people of LA whose culture is admired but who are repeatedly pushed aside to line the pockets of investors. A development like this will be an eyesore and will threaten the livelihood of generations of East LA natives
Marco C.	90031	Gentrification
Brandon Cun		Stop trying to take over the neighborhood of low income families! They have no where to go! FUCK 12
Magdalena Castillo	90022	Gentrification should be a crime
Elena Muruato	90031	There has been no dialogue with the community about this project, the land being used has been declared a toxic waste site how will this affect the health of the children at the school just one block away? Will there be enough parking for residents of this new building ? And will there be a designated amount of units that offer affordable housing during the housing crisis in Los Angeles ?
Giselle Lopez	90031	Gentrification
Paulaine sano	91364	We can’t let the community be affected by this project. I oppose gentrification.
Giselle Lopez	90031	Gentrification
Anahit Momjian	90004	This development is dangerous to the community who’ve been living in Lincoln Heights. It’ll further displace longtime residents, just like other developments like this in the past.
Esmeralda	90022	Anti-gentrification and anti-displacement of low income people of color that have been getting kicked out of Lincoln Heights.
Fatima Jimenez	90065	I’m against the construction or development of this luxury building because it specifically displaces people of color and drives the cost of living up for the families who have been living in these low income neighborhoods for decades, prior to gentrification.
Victor	90042	Cause it’s happened to me before and I know how it feels
Jade olyn	90001	Gentrification is violence. Keep it out of Lincoln heights.
Maria Castillo	90032	Gentrification is not okay and putting Thousand people at stake. Think about the people !
JayCee	91504	It displaces the actual community that has been living there for years
bryan Santisteban	90020	the community doesn't need another apartment complex. Add more community parks or some more beneficial.
Alexia Rodriguez	92629	Our affordable housing stock will be seized by flippers and investors and lifelong residents will be permanenty displaced or homeless.
Michelle Holguin	90042	Gentrification is violence towards the community that has been in the area forever. Gentrification causes an increase in rent, therefore an increase in evictions. Gentrification is structural racism because it conforms to the DESIRES (not needs) of white individuals. A working class community does not need luxury apartments to drive them out of their community.
Jamie	90031	The people living in Lincoln Heights lives there because it is affordable. All the people living there now are poor working class Latinos and African Americans, building these luxury apartments will raise the rent for everyone and will make it impossible for these poor working people to make due.
Alanna Aguiar	90027	LINCOLN HEIGHTS HAS THE LOWEST INCOME RATE IN LOS ANGELES. GENTRIFICATION IS VIOLENCE. BUILD A COMMUNITY CENTER. BUILD A HOMELESS SHELTER. BUILD A SCHOOL, ANYTHING TO BENEFIT THIS COMMUNITY WHO LUXURY APARTMENTS WILL WORK TO DISPLACE. IT’S 2020 AND THE PEOPLE WILL NO LONGER TURN AWAY AS REDLINING TAKES PLACE.
Bryan Martínez	90023	It’s not fair to the people and current residence of Lincoln heights
Matilda Nunes	91204	Because gentrification is killing LA.
Sophia Dueñas	91604	the community should belong to the people, not the wealthy.
Ara Adzhemyan	91501	
Daniela Sanchez	90044	It threatens the community’s safety and forcefully rushes them out of their home neighborhood. Gentrification is violent.
Helen S	90023	MORE AFFORDABLE HOUSING.
Cassidy	90031	We don't need that!
Autry Haydon	90028	FUCK GENTRIFICATION. CREATE AFFORDABLE HOUSING. HOUSING SHOULD BE A HUMAN RIGHT.
Alexis Rafael	90042	It runs out the families that actually need a home and destroys the community that has been there for more than 20 years.
Anastasia	91316	Because building “luxury housing” is an insult to the thousands of unhoused/housing-unstable folx in this city! Lincoln Heights is not my community, but it is a home to many who are central to its long history. Units like these accelerate gentrification and displacement, and they do not add any cultural value. And the irony of building luxury apartments in a neighborhood shaped by redlining and keeping home ownership away from those who need it most... laughable.
Asunción Rubalcava	90031	The ground water has already been polluted for over 100 years

Jennifer Gordon	90026	
Pauline Bissell	90065	
Jennifer Jordan	91104	Keep Lincoln heights affordable for Angelenos!
Concepcion RUBALCAVA	90031	This is cultural genocide
Maximiliano rubio	90031	Lincoln heights doesn't need "Luxury apartments" it need affordable housing. Before building an apartment complex that are going to raise the rent and prices around the area Lincoln heights need to focus on the community that lives here already.
Andrew	92807	Fuck gentrification
Damian Lopez	90031	It's not fair to anyone who lives in Lincoln heights whatsoever
Austin Wasielewski	94121	Gentrification is violence, and the construction of these condos are another effort in a long line of buildings to displace, and not house, local people. The construction of such edifices must be stopped to preserve the integrity of Lincoln Heights!
Cynthia Diaz	95811	I lived in highland park from 2009-2015 during its gentrification process and saw with my own eyes people getting displaced. Friends of mine being kicked out of their apartments by developers. Cashiers at local stores asking me if I knew how this could be stopped because they had no where to go.The people of lincoln heights should not have to go through this!
Mateo	90042	Cause big business don't care about the hood! They just wanna take the money that's out here and fuck over the people that actually build this community
Yolanda olmos-alvarez	91768	We dont need buildiings such as this taking over the neighborhood. More Crowds, traffic.
Gina Zamudio	91104	Gentrification displaces brown and black families!
Patricia holguin	90042	You are erasing my culture and rent is TOO HIGH!
Melissa Ramirez	90255	Far too many people have been displaced already. Enough.
Jayson Viado	90065	Gentrifying neighborhoods does nothing but displace low income families who are being held down in society by systemic racism. It's not fair and it's not right to be imposing these projects on to communities. Let the communities do what they need to do to live their lifestyle or help them out by funding resources for them.
Abril Guzman	90031	Lincoln Heights doesn't need these apartments if it will start the works of gentrification. The fact that they did not meet with the people of Lincoln heights is disrespectful. Many of these residents will loose their homes if this starts to happen. My family included.
Brian Uriarye	90042	Because fuck Gentrification
Fernando Enciso Jr	90012	I am against gentrification
Graciela Muñoz	90042	It's affect my students that live in the areas and community. I speak out for my students and their families.
Alexis parada	90031	
Yadira Loreto	90032	This project will affect all surrounding zip codes in the area. I live down the hill by LHS. My local grocery stores are all down N Broadway and especially that Smart & Final on Daly. I know for a fact prices will spike, more than they already are with the pandemic going on. Local stores will disappear, housing around the area will spike. We will lose our affordable neighborhood. I've lived here my entire life and there are better ways to increase our community economic development to enhance economic opportunities and improve social conditions in the most sustainable method, as long as it does not displace our community. This project is decreasing our opportunities. We are a DISADVANTAGED community. Please help us improve our economic, social, ecological and cultural well-being.
Brent	90031	Would bring too many people/traffic to Lincoln Heights
Ashly nava	90033	Because I went to school there in Lincoln heights and seeing new projects like these takes the whole meaning of Lincoln heights.
Maria Jimenez	90023	I oppose any and all projects that bring gentrification into working class neighborhoods as the people are being forced out for said projects or will be forced out eventually because their cost of living there will go up.
Sarah Wilson	90014	The lack of transparency from elected officials is absolutely disrespectful. With COVID-19 and sprawling evictions, this tone-def gentrification project utterly fails to acknowledge the needs of a severely impacted community and will only further the plight of the working class people who live there. It's shameful.
Maryjane Leyva	90042	I'm against gentrification.
Phoebe	91722	Because gentrification causes thousands to lose their homes for the profit of the 1%
Ryan Essex	90031	The community deserves a voice - this neighborhood is being erased
Victoria Velez	90065	Gentrification
Julie Curl	90042	I'm against the displacement of the people in our community.
Rachel Trudden	91205	Gentrification is violence
alexis nida	90280	
Daniel Whitmore	90027	This Corp project will hurt the community

Nicole Norman	90045	This is gentrification. We cannot attempt to displace residents who have lived here for decades for the sake of profit (especially during a global pandemic and financial crisis). It seems clear why this is a selfish and racist project.
Aliza	91733	i'm tired of places i knew growing up are continuing to be gentrified. this isn't fair.
Jade christensen	90026	
Jasmine	90031	Give me one good reason why I should support this project ? no more luxury apartments LA has enough empty ones.
Alex Santana	91607	It’s unnecessary and doesn’t need to displace any families or hurt any kids.
sam maurer	90057	I want lincoln heights to maintain its community and affordability. also this gentrification architecture is ugly seriously
Nicholas Winfrey	90032	Don’t want to see neighborhood become more gentrified/congested/long-term residents displaced
Caitlyn Baidas	90031	LA and it's residents are struggling when it comes to sufficient affordable housing. Lincoln Heights has generations of families along with many low-income residents who will be pushed out due to this "luxury development". The least you can do is hear the truth of the people of Lincoln Heights. Listen to those who's livelihoods will be affected by this.
Ariadna Ordowskij	90027	This will devastate the community rather than invite diversity. Eyesore of a development, what sort of growth is expected?
Daniel delatorre	90038	Gentrification is a threat to the neighborhood and the families in the community. We can’t afford it.
Ana Aguirre	91107	This project cannot and should not be permitted to continue because of the gross negligence of bringing it up within the community. Additionally, this project will displace valuable community members who have been historically discriminated against in favor of gentrifying the area. These people, and this community deserves better.
Charles Moothart	90026	I believe the community should have a say in developments that affect their lives and their space.
Yoli Patzkowski	90031	Seeing people being evicted because of rising rent prices in Lincoln Heights over the years, it’s unfair and unethical to be adding to this problem especially during a detrimental pandemic.
Nathalia	90023	It’s a threat to the community
Julian Reinoso	90032	We don’t need luxury apartments. We need affordable ones
Riley	90042	Gentrification
Nicholas Montecino	90042	Unaffordable housing for the native people of Lincoln Heights.
mario almaraz	90031	STOP GENTRIFICATION.
Nicole Prokes	90031	
Bruna Gill	90065	It breaks my heart to see a place that’s been my home my whole life get sold out for profit of people who aren’t even from here.
Tania enriquez	90046	Decolonize LA
Chris Swainston	90012	It will be devastating to the community spiking rent, kicking out families, destroying the culture. Architecture of the building is horrible, it does not represent LA or Lincoln Heights history. This blatant gentrification of rich investors that bring nothing to the community and have no connection to the neighborhoods in Los Angels. Do not let this happen
scarlet	90026	last thing we need right now is more luxury buildings
Valerie Chavez	91103	Gentrifying this community has the power to displace many low income families that have lived there all their lives. This is not right and it is not what the people want.
Felix plunier	91711	Keep it og
Rachel Ritter	90020	Gentrification is violence! This project will be extremely damaging to the Lincoln Heights community.
Dan	90042	
Jack baker	90065	The project does not serve the existing community of Lincoln heights.
Cesar Vargas	90031	F*ck gentrification. This development project would not serve the interests of our community instead it would drive those already here out.
Anthony vu	90029	This will not help the community. This is the worst form of gentrification
Emily Deremo	90042	To keep Lincoln heights affordable for families and locals.
Cole	90066	Gentrification is violence
Jazmine	90031	The people of Lincoln heights don’t need any more reason to increase rent that we already struggle to afford. This would bring eviction for people who are already struggling, pushing our people out even more. It’s a community that should be helped and saved.
Ava Adler	90049	This is gentrification in all of its silent violence. Impacting the health and wellbeing of residents of Lincoln Heights.
Karina Garcia-Guillen	90031	The construction of this building will disproportionately displace POC in Lincoln heights, which include senior citizens, the most vulnerable members of society. Lincoln heights has already undergone a wave of gentrification that has displacement many low income families, further construction of luxury apartments in such a vulnerable area will have detrimental effects for la gente of Lincoln heights.
Chris Hess	90031	I’m in opposition to the displacement of local residents of Lincoln Heights.

Danielle	90065	we don’t need overpriced buildings in an area that is struggling financially
Daniel	90031	This will not allow for those who need housing to afford these new uncontrolled rents.
Sofia Arreguin	90069	Gentrification ruins communities and livelihoods!
Aimee Myers	90026	
Agnes Artoonian	91307	Because it’s hurting the community.
Peter Silva	90042	Gentrification contributes to homelessness
Ana cortes	90063	Ruining history!!
maxine rhea	90042	
Kris Chau	90026	This displaced longtime residents and community centers, in a time when the wage gap and disparities are at their widest. We need more community and less exclusive luxury. The predatory real estate practices in Los Angeles needs to stop!
Marilyn Medina	90042	GENTRIFICATION, no housing offered to people in the community, needs to be low income housing, All units should be for low income.
Samantha serrano	91776	It is taking away from residents who have lived there for many years. It is raising rent and moving natives out of their homes.
Stefany Mijangos	90031	This will not benefit the people of Lincoln Heights. This will allow for rent to have higher rates and will eventually end up pushing all of the working class out of neighborhood.
Christy Velez	90032	I oppose this project due to It being unaffordable housing in the community.
Luke Csehak	90042	The community should be in charge of deciding what new housing best suits its needs.
Jakob Quiles	90031	Not affordable to hound adults from the NELA area
sunday smith	92587	it will lead to gentrification
Cynthia Garcia	92701	
Jason Taylor-Pestell	90031	For a community that has several projects to meet the housing needs of those socio-economically less fortunate, this new building proposal seems contrary to its needs and dismissive of their voice. We should be actively involving the concerns and needs of the current residence, especially if it is something that may end up displacing families and/or local businesses immediately or in the long term.
Dillon	90031	It seems as if it will skyrocket rent in the coming years for the surrounding area
Isis Frias	90255	Gentrification is something that drastically and negatively affects communities that have long been homes to people of color, immigrants, and low-income families, causing thousands and thousands of these people to move out of their homes. We should be preserving our culture and history in neighborhoods like Lincoln Heights instead of gentrifying communities that only benefit those with wealth and privilege. This should not be happening. End gentrification now. This is one of the first steps to eradicating it.
Vanessa Klaus	91311	Stop gentrifying cities and start building affordable housing for the people that already live in that area
Tiffany Do	90012	Fuck gentrification
coleman moore	91103	the project needs to be considered carefully by the community at large
Lucy	90065	
Martha Velez	90031	I oppose the project due to the unaffordable housing it will bring to the community.
Andrea Jimenez	90032	I believe there are better things we could do rather than gentrify the community that is already present like making sure families stay together in their long time homes and also protect the land that's trying to be taken over by culture vultures and big time real estate agents
Isaac escoto	90029	I believe it the building of this complex is made to attract people of higher wealth to avneighborhood thats homes a community of diverse and working class people who run small businesses. I believe that building complex’s such as this one will only attract more high price facilities and will raise the overall rent of the area thus resulting in an unfair living situation for good hardworking families.
Janelle	91605	This community deserves a voice, affordable housing, families will be displaced for this. They deserve to be able to continue living in their OWN neighborhoods. The housing should reflect the incomes of the community.
Allie Ihm	90063	
Amy Demir	90032	We are tired of gentrification !!
Jasmine Velez	90031	I oppose the project due to the unaffordable housing it will bring to the community.
Henry Tull	91030	Stop Gentrification in historically Latino, architecturally significant neighborhood.
Mario Ruiz	90033	We need affordable housing not this !
Nicholas DeMarie	90039	It’s gentrification and displacement at its worst
Ezmeralda Landeros	90031	These will not be affordable and only raise the rent for the area. Fuck gentrification
Jessica Lopez	90031	Illegal evicting of residents

Lee Landey	90012	
Berend Williges	91405	It further pushes out lower income families and gentrifies the community. It loses its soul and longtime community members just for some profit and it’s disgusting.
Karla	90937	This project is devastating to community members. Gentrification has already effected this community. If this project moves forward it will have a lasting impact on community members of this neighborhood.
Eli	90065	preserve the history of lincoln heights at all costs. it is real LA.
Emma Carpenter	91030	Let people live
Christina Rodriguez	90723	Displacing our community members and families
Diego Rojo	90031	
Cormac Pickering	90041	Stop displacing people who can’t afford your ridiculous rent rates.
Gabrielle Sigrist	90042	This will further gentrify Lincoln Heights and push out it’s historic residents who have lived there for generations - all during a pandemic where many of these folks are unemployed and unable to pay their rents, facing eviction. This is an insult and injustice to them.
Perla rivera	90262	Our community is already being impacted by gentrification. We don’t need luxury apartments.
Delia Loez	90031	Illegal evicting of residents. Area will be over populated .
Emily Hogg	90039	I love Lincoln heights and the community who already resides there!
Grisel Garcia	90033	I oppose this project because it is against the people of Lincoln Heights, this is a community that had long standing residents and some of these residents, are now older and will be displaced form a place they call home. It will also inflate the market in our neighborhood,while it's great for the property owners, it doesn't protect renters who have been here for years.These projects are self serving to the developers and not in the best interest for the people in Lincoln Height,.
Justine	90042	Building this complex will put the people of Lincoln Heights in danger
Jesus Lopez	90031	Will increase illegal eviction. Area will be over populated
Jennifer Rodriguez	90031	Our community has hard working low income families, projects like this will greatly affect us & we will no longer be able to afford living in the area.
Rebeca	91605	
Jacob arias	90032	Not ethically correct
Nicole Livingston	91342	The last thing Lincoln Heights needs is a luxury condo project. The community must be engaged and meaningfully examine what must be done to fulfill current needs. The culture of Los Angeles has been destroyed by these types of luxury buildings and Lincoln Heights is no ones “new frontier” of gentrification. The community needs affordable housing and resources for affordable, healthy food.
atzel martinez	90039	i am opposed to the incoming evictions of residents
Amanda schulz	90042	Corrupt developers kill
Nora quinn	90026	We do not want another luxury condo in Lincoln heights
Denisse	90031	I want my community to remain as it is. I was born and raised In Lincoln heights and to see how gentrification is affecting it, it saddens me. Don’t let the Lincoln heights neighborhood many of us knew and grew up in Vanish over some luxury apartments. We were fine before all this gentrification stuff started happening. Honestly the neighborhood consisted of So much and one word I can describe as is “home”. I will never see myself leaving this please because it’s a wonderful community but the way it’s changing, I feel like I don’t know it anymore. It’s devastating to see how drastically it has change due to knew business, that I know my community would’ve never agreed on having. So Many tenants and so many business have been force to go out of business and leave there homes due to an increases in rents and new construction. We want the old Lincoln heights back. We just ask you to take in consideration for the people that were born and raised in this community. Don’t ruin it for us. We love Lincoln heights.
Mira Sabety	91786	Gentrification leads to mass homelessness and stress on lower income families. This is the first step.
Jamie	90027	We don’t need any more apartments to ruin historic neighborhoods
J	90033	Gentrification is an act of colonialism.
Jessica Embick	90042	No more luxury housing! It does not help the community. We have enough luxury housing.
yesenia alvarado	90031	Not affordable housing; will displace people
Matthew De La Cruz	90026	Not right
Paulina Montano	90032	Because this is not the affordable housing that Lincoln heights needs. This is gentrification.
sara kleinbart	90042	
Nathan nera	90031	I dislike caucasians
Jason	90032	It is not fair to the community

Andrea Morales	91722	This is a demand that gentrification be stopped!
Genna BloomBecker	90065	This community matters and must be treated with respect. Not what we have now- disregard for any of our lives and indifference to our inevitable displacement.
Sarah	90813	
Alejandra Coronado	90815	Lincoln Heights is a family city not another high scape
Eliana Valcarcel	84105	Gentrification is a crime and needs to be stopped.
Adrian Rodriguez	91331	It impacts the community and families of the students I teach in this area negatively.
Gabriela Mogollon	90031	Gentrification
Michael DeMaio	90031	The statement accompanying this petition describes how I feel about this development on a personal level. Fuck luxury developments, fuck forced displacement, fuck developers & fuck the corrupt city council working for developers and their own interests in stead of working class people.
Edwin Moya	90004	I oppose this project because it is removing low incoming families from their households.
Lauren McClelland	91325	
Daisy	90031	
Briana Villareal	91321	This project is displacing those who live in the community, as well as over crowding our community.
Devin Bierman	90031	It will raise housing costs throughout the neighborhood and cause displacement of working class residents
Alexander Morales	90023	Expensive and luxury apartments are not the way in driving down housing costs in California. This will only lead to increasing displacement and the proliferation of gentrification in vulnerable communities.
Linda Tovar	90026	the community of Lincoln Heights does not want or need this development.
Joss	90044	because the people who live in that area don’t need a gentrifier to come and destroy what they have left of their community.
Jairo Baez	90031	To stop gentrification
Jimena	90031	It is a threat to our community and life long members!
Tracy Argueta	90255	We must protect underprivileged neighborhoods from gentrification.
Molly Bounds	90065	I oppose the erasure and pricing out of the existing community. This development provides no resource to the existing community there, only for hypothetical outsiders. And it will surely displace people who were born there, who have long invested themselves in this neighborhood. It is also a very ugly structure that does not meet the Standards of beauty of the historic architecture which surrounds it. This neighborhood needs more amenities before it needs more tenants. Where can people get fresh produce? Build that facility instead. Invest in boys and girls club if you want to actually serve the tenants who care for this neighborhood.
claire quilala	90026	Stop this development!
Paola Gonzalez		No gentrification
Pamela Holash	91205	STOP GENTRIFICATION AND KICKING OUT HISPANIC AND MINORITIES OUT OF THEIR HOMES!!! NO ONE WANTS THIS!! ENOUGH IS ENOUGH
Ginger Wilson	91030	Fuck gentrification
James Flores	90032	I support what they’re doing.
Carlos Ramirez	90031	I love my community the way it is. I don’t wanna see my community gentrified
Timothy Samayoa	90033	Because these apartment are ruining the beauty of this community
Christine Stormberg	90026	Destroying lives for profit
Alex	90404	I don't support expensive gentrification in communities that will no longer be able afford living there.
	90031	It’s gentrification
Carrie	90005	
Ramond McCusker	90032	Save the latinx community! Revitalization not gentrification!
Stacy Le	91767	its such a diverse community and i dont want corporations coming in and pushing residents out
Amy phung	90032	I have concerns if this new development will cause a rise in rent for locals in the community. I am also concerned if this will contribute to gentrification within our neighborhood
Hayden	90031	The people of Lincoln Heights deserve to not be displaced!

Xira Doctor	90004	The building of this luxury property does nothing to help the community of Lincoln Heights who have resided in their neighborhood for decades. This luxury building is gentrification and serves to erase the rich history and community of Lincoln Heights in the name of moving more Los Angeles transplants to displace the population who have made their homes here.
john burtle	90042	
Fatima Lopez	90660	I am opposed to the project because, for the majority of my life, I lived in Lincoln Heights. I will not stand for the gentrification of my beloved neighborhood. I still have family there and I definitely don't want them or the other residents of the neighborhood to suffer because of this project. Lincoln Heights belongs to the people, no one is getting in ruining what we've preserved for so long.
Izaiah	90031	gentrification ain't okay we been living here for years no reason to start doing this now
Brian Martin	90032	
Michelle Garcia	90255	stop the gentrification of Lincoln Heights!!!!
Diana Martinez	90031	There is no need for luxury apartment. It is going to displace so many people and cause rent to go up .
Lucia Barranco	90031	There shouldn't be such big and abrupt changes to the neighborhood without the consent of the community— we must be well informed and taken into consideration, our lives depend on this place and many of these development efforts threaten our livelihoods.
Criscelle Vargas	90031	I am tired of money being allocated to the WRONG REASONS. Rent is constantly increasing for our community, thus forcing tenants out who have been living in this community for years. This project will only further escalate this problem. This is exactly how gentrification starts. Stop trying to bring new people into the community and how about we focus on the current residents of the community, focus on their needs in the midst of a pandemic, and not focus on trying to further gentrify such a history rich neighborhood.
Michael Weaver	90031	i don't want "luxury apartments" in my neighborhood
Nicolas	90031	A project of this magnitude will increase illegal evictions in Lincoln Heights and contribute to the Ellis acting of multi family properties. Our affordable housing stock will be seized by flippers and investors and lifelong residents will be permanenty displaced or homeless.
Ivyanne Sigerson	90065	we need to house our unhoused not influencers
Patricia Garcia	90031	It will further gentrify our community and displace many working class individuals.
Marilyn Gallegos	90031	Gentrification
Tifanny Cuevas	91030	I think it should be kept as is. We don't need anymore unnecessary gentrification.
Daniela		It will displace working class families as many will be forced to leave due to an increase in rent.
Andre Narvaez	90638	Lack of affordable housing
Edith Chacon	90031	this will create a tremendous traffic to our community.
Isa-Bella Blanc	90031	A project of this magnitude will increase illegal evictions in Lincoln Heights and contribute to the Ellis acting of multi family properties. Our affordable housing stock will be seized by flippers and investors and lifelong residents will be permanenty displaced or homeless.
Michelle Jarmon	90065	No.
Scarlett	90031	Gentrification
Amanda Chacon	90031	Mucho traffico
Kimberly Barajas	90031	This is gentrification , once luxary apartments are built the prices around my neighborhood increased as if it isn't already being gentrified. Save what's left of NELA
Griffin Fuller	60304	Because the development of these units will be the first in a line of dominoes to fall towards gentrification.
jazmin mendoza	90033	Gentrification. Displacement.
Marisol	90065	
Mary Berger	90031	. A project of this magnitude will increase illegal evictions in Lincoln Heights and contribute to the Ellis acting of multi family properties. Our affordable housing stock will be seized by flippers and investors and lifelong residents will be permanenty displaced or homeless.
Samuel briseno	90042	We've been losing whole communities to this and if it continues homelessness will soon follow unless we help fund the existing community instead of acting like nothings there and building right over it
Camm Harrison	90042	
Amy Uthenpong	91754	It is wrong to displace thousands of people who built the original culture of Los Angeles. Especially during a pandemic, this is utterly malevolent.
Faith	90031	I oppose the project because gentrification.
Vanessa hernandez	90012	I oppose this project because it will increase eviction and erase our community
Yvette Arreola	90031	The people of Lincoln Heights do not support gentrifictation. We will not be ran out of our neighborhood of 40+ years!
Vanessa	90031	Because this is just going yo tyun the neighborhood

Sofia Alieninova	90008	I oppose this project because it will displace more people. The people of Lincoln Heights need more affordable housing!!! Not luxury apartments way above their income and unattainable to them. Not to mention the businesses it will drive away because of higher rent prices!!!! This is an atrocious project.
Phoebe enriquez	90031	
David	90065	My family loves in Lincoln Heights. Developers are vampires. Developments like this suck the blood out of communities and displace current residents. They raise the cost of living beyond what current residents can afford.
Emily	90024	Developers area disease and do nothing but ruin the city I have grown up in my entire life and love
Juan Garcia	90031	468 unit Luxury development at ave 34/ Pasadena Ave is a threat to our health and well being. Gentrification is violence on Lincoln Height's working class (19%) Asian and (77%) Brown brothers and sisters. Lincoln Heights is the oldest most historically diverse neighborhood in LA and residents have had to endure generations of racial inequity. 77% of Lincoln Heights residents are renters - the majority with a median household income below $30k a year. We have the lowest home ownership rate in LA at 23% from historic redlining, discriminatory bank lending and racist deed covenants. We need people from Lincoln Heights to be part of the decision making. In Solidarity, JG
Anna Czosnyka	90041	This is not what the community wants or needs. For starters, the plans include 468 units but only 287 parking spaces, which would lead to massive overcrowding of the surrounding streets. This is just the tip of the iceberg however. We as a country are more aware than ever before of systematic racism and inequalities that are so insidious within our social and economic structures. It would be remiss not to point out that this absolutely classifies as white supremacist and structural oppression. The community of Lincoln Heights does not want or need luxury units. Their community needs funding for schools, transportation, social services and more, but they do NOT need luxury units. Luxury units will only serve to bring in more rich, and likely white, residents who will continue the gentrification of the neighborhood. Gentrification contributes to structural racism and oppression. Gentrification is culture erasure. Gentrification will likely increase the homeless crisis and contribute to the disappearing middle class. It does not have to be this way but in order for things to change, we have to change. We have to say no to luxury developments pushing BIPOC communities out of their neighborhoods and to consider human needs and human interest over capital. Humans matter more than property.
Edwin Davila	90033	Fuck Gentrification and it’s transients
Andrea ramirez	90031	Fuck gentrification and fuck cedillo for
Bryan Payton	90291	
Andrew Hall	90031	It will displace the locals and erase the history and culture of Los Angeles’s oldest neighborhood. On top of that its really ugly and will just attract horrible people to live there.
Sara Gernsbacher	90032	The Lincoln heights community can not sustain a luxury building, it will drive people out of the community they’ve lived in for generations and are struggling more now due to Covid-19 it would be completely reprehensible to go ahead with this plan and would only ensure an entire community would be pushed out of their home.
Diana Guzman	90031	More of my people will be displaced and this is a historic neighborhood we do not need more gentrifications we need more funding for our people and local schools
Luis fierros	90031	
Karen Balbuena	90063	I oppose because me and my family were recently evicted from the same area that this is taking place due to gentrification. I do not wish for rent to increase making it hard for folks that have lived here for years to be displaced.
Henry Trejo	90041	Because My neighborhood has been gentrified and I’d like to ensure it doesn’t happen in Lincoln Heights.
Marie Claire Macadar	90020	I oppose this project because it will directly cause the displacement of people who have been in this neighborhood for many generations // Opuesto este proyecto porque va a directamente causar el desplazamiento de gente que ha vivido en este vecindario por muchas generaciones
Moises avila	90033	Because We as a community need to stand together For our people
Nancy Mendoza	90032	
Emily	90039	This doesn’t follow the spirit of the neighborhood, and puts the current residents and small businesses at risk
Lucas Gorham	90031	I do not want the building here
Kate Morgan	90065	The only housing development this city should be investing in should be for the homeless and underprivileged.
Mia	90031	Will raise rent and force people to move away
Ruben gonzalez	90026	I oppose this project because family's businesses and business owners will be kicked out of there home and lose everything plus most of these familys and business owners depend on there business and use there money on food, rent, clothes, health ensures, there children, there family in need, taxes, retiermemt, etc and these business owners/ familys will become homeless and will not be able to feed themselves or there children plus 468 luxury apartments rent are to high to the point where low class familys cant adored rent
Ivy	90041	Gentrification
Marcella		It’s unethical and will be overly priced. Help the community FIRST
Rat Rathowen	91780	It’s an eyesore.

Josue	90032	Community displacement
Anel	90031	The Los Angeles districts have been changed due to gentrification and families are forced to move to the inflation!! No more, enough!!!
Danielle Trejo	91791	Gentrification is harmful to the people already there this will only displace many people and businesses
Julia Greenburger	90034	I am anti-capitalist
Nik H	90031	Grossly insufficient community outreach for a project of this scale. It should also include more affordable housing than the baseline TOC requirement. Many more affordable units need to be provided in this project, as it currently fails to take into account the neighborhood in which it is located
Christian Gonzalez	90032	
Amy Hernandez	90037	Power to the People.
Vanessa Ramírez	90042	This project is gentrification which is violent towards people in the community.
Fiona Sassoon	90291	Gentrification is violence against people of color and low-income communities. The City of Los Angeles needs step up to support its locals and save more space for affordable housing.
Sandy	22211	Stop forcing people out ! What a heartless project this is.
Napawee Pakpoom	90039	
Uriel	90031	no gentrification
Libier Figueroa	90895	Because gentrification is always wrong
Pedro Morales	90031	We are a working class community with low income residents and people who live day by day. We don't want your luxurious apartment that will not contribute anything to our neighborhood. We need rent control and low income housing, not luxury apartments. LINCOLN HEIGHTS IS NOT FOR SALE.
Eliana M	90031	We need more affordable housing in this neighborhood, not these luxury projects that are obviously outside the spending bracket of current residents.
Annie Guzman	90065	THIS NEIGHBORHOOD IS HOME TO SO MANY HARDWORKING PEOPLE WHO CANNOT AFFORD LUXURY HOMES
Adrian Morales	90031	I am strongly against the displacement of (traditionally lower-income and Latino/Asian) Community members that will ultimately happen with the development of this property. This community is not for sale and the members of this community should have a say in the further development of Lincoln Heights so our long term interests are accounted for in that planning.
Lainey Racah	90031	This development project will not enrich the lives of long term residents of Lincoln Heights- we need our representatives to support residents in making investments in the current community so that it can thrive.
Olivia Toledo	90042	Gentrification is violence!
Andrea Lopez	91342	Gentrification is killing our communities
Alexander Castillo	90031	People are having a tough time paying rent now, once this is completed, rent will go up higher in this area.
Willie	90031	I do not agree with this project because this project will cause rent to go up and families will be left homeless. It’s not right for this too happen to poor families.
Catherine Acosta	90031	
Clara Cohen	92592	This petition is not a request. It's a Demand by the 30,000 residents of Lincoln Heights for Gil Cedillo, Pinyon Group and LA City Planning to face the People who will be affected by this project for the rest of their lives. A 468 unit Luxury development at ave 34/ Pasadena Ave is a threat to our health and well being. Gentrification is violence on Lincoln Height's working class (19%) Asian and (77%) Brown brothers and sisters. Lincoln Heights is the oldest most historically diverse neighborhood in LA and residents have had to endure generations of racial inequity. 77% of Lincoln Heights residents are renters - the majority with a median household income below $30k a year. We have the lowest home ownership rate in LA at 23% from historic redlining, discriminatory bank lending and racist deed covenants. Why aren't we being included in the dialogue? This housing is not for our community and will only serve to displace us. This is the largest development in the history of Lincoln Heights and the community was never informed or included in the conversation. Lincoln Heights neighborhood council was bypassed and never approved the project. The city approved this by fast tracking it during Covid-19 and the City Hall Pay-to-Play scandal. How do we know the politicians and developers weren’t doing back door deals on this project? Is it ethical for City Hall to push a project of this magnitude on an already suffering community thats currently being illegally evicted and displaced? Neither the city, the councilman or the developer facilitated a single conversation with the public for the biggest development in the history of our neighborhood. City Planning went ahead and approved it. We demand transparency from our elected officials and a seat at the table regarding this new construction. This is the year 2020, not 1940. The people of Lincoln heights demand to be heard. This is part of a long trajectory fulfilling City Hall's agenda to displace and erase our community.
Noelle Wong	91754	
Gabriela Castaneda	90031	This is not what we need in the community right now. There are other things that should be fixed and looked at first.
Roberta Klug	90063	

Ineliz Ruiz	90031	This our community. Not only with gentrify and push LH natives out of our homes, but will cause disturbances to the peace hence construction and parking will be more impossible than already is. Rent will raise and will change everything. We don’t need a huge building in our town. It’s meant to be our home, not to feel as we are being pushed out.
Alfred	90032	The rent price is above the gross median of the community
Mario Alonso Felix	90033	It will lead to the displacement of low income community members. This can not happen during a pandemic it would be reckless and border on a human rights abuse.
Jose Guzman	90031	There is no need for luxury apartments in Lincoln Heights, especially when a majority of renters in the area make around $30,000 a year. What we do need is affordable housing and rent controlled apartments to help those that are homeless. Building luxury apartments will not only raise rent in the area, but will also lead to illegal evictions of long time residents, as a result, contributing to homelessness in los angeles.
Jenny Eav	90031	I think it is important to retain diversity and the cultural history of Lincoln Heights.
Daniel Schubert	90065	Eyesore
Noah Garcia	91732	Our money could be contributing to the community instead of this development
Francisco Vasquez	91201	Because gentrification is baaaad
Daniela	90042	I don't
Jocelyn	90220	Because I can
Alejandro Barrios	90031	FUCK GENTRIFIERS!!! Stop pushing out the low income families from my neighborhood out!
Emma Hirji-Johnson	90405	Gentrification consistently affects communities of color negatively, and is never an adequate solution to any sort of community issue.
Jesus Figueroa	90031	Lincoln Heights will not be gentrified. I along with several other families have been evicted from our homes. The fact that this project was rushed without community input is shady and the neighborhood will not stand for this.
Shayna	90505	
Jacqueline Brown-Gaines	90008	Gentrification is the devil’s work
Haily	90031	No to the project
Lily Baxter	90031	Disruptive to the neighborhood, gentrifying
Cyrus Esfandiary	90063	Yes I oppose the project, stop the gentrification of this community.
Samantha	90012	The possibly of displacing thousands of families in order to build a, “luxury” apartment complex is in-humane. People who live in the community have the right to reject this project, and should’ve given the option to be involved in the conversation.
Diane Tran	90031	WE NEED AFFORDABLE HOUSING NOT MORE LUXURY CONDOS.
Megan Maguire	90065	This project is a violent attack on working class long time residents of Lincoln Heights. Los Ángeles is nothing without its real residents.
Alex Craig	90031	This development is a threat to the community.
Kylen	90068	
Anne Ritschel	90026	Because it’s literally gentrification. It’s going to uproot the entire socioeconomic landscape of the area. Creating more wealth disparity in la. Which is the last thing we need. And also because it’s ugly and Lincoln heights is beautiful
Diego	90042	No new projects should be slated after the arrest of Huizar. He oversaw multiple real estate developments and essentially sold Northeast LA away. No new housing should be immediately slated. It undermines the sanctity of the neighborhood
Rene Camarillo	90031	This project will the change demographic of historic Lincoln Heights. This construction of this complex will allow wealthy residents which in response will force the community to cater to them as the community becomes gentrified. This neighborhood does not need luxury apartments. Please keep integrity in the people and culture and not allow Lincoln Heights to become too expensive to live for those who have lived here all their lives.
Juana Mariscal	90033	Gentrification
Sarah Castro	90640	Gentrification is wrong
Jackie		
Chris Thach	90031	Displacing historical cultural and low income families
Krista Sison	90026	Because the people refuse gentrification.
Vic Mendoza	90032	families are being forced out by gentrification. Their homes are being turned into spaces that aren't meant for them despite being part of the community for decades
Maya	90065	
Caterra Cornejo	90031	Lincoln heights doesn’t need luxury housing, it needs affordable housing and grocery stores.

Tracey Escobar	90031	gentrification will not help community
Ana Cecilia Alvarez	90031	We need community input ok development and affordable housing - NOT more luxury condos.
Amy	91105	Stop gentrifying my community
Stephanie Espina		I myself, along with my family have been directly affected by gentrification in Chinatown. If there is anything I can do to stop this from happening to other families I am all for it.
Sophie Roessler	90065	gentrification and rent raising will push out families of this historic neighborhood
Melisa Ulkumen	90004	Gentrification
Richard Ordonez	91745	Tryna kick us out
Alexus Anderson	90014	Gentrification of communities ruins lives, durning a pandemic it’s even worse
Carmelita Flores	90640	This will displace so the local residents. What’s wrong with these people? Jesus.
Joana De La Rosa	90022	Yes SHUT IT DOWN. these are the same ppl who try to keep us in the lower class trying to build places in our community that don't benefit our people. How many of us can actually afford living there? We need low income housing!we need places that are goin to benefit the future generations! We need more resources!
Jenny MCKeown		LA does not need another Luxury apt complex. It would be destroying a historic district.
Gabrielle	90032	It unfairly displaces families who have been living in the area for decades. I can’t imagine that these units will be affordable for the average LH resident who makes $30k or less per year.
Gabrielle L Hart	91501	Gentrification is violence.
Gabrielle L Hart	91501	Gentrification is violence.
Xiao Yumi	90034	shame on this project, for pointedly not including the voices it seeks to displace and erase；new infrastructure should support the existing community, not further disenfranchise them.
Albert Ontiveros	90042	It will displace long time residents and increase rent throughout the neighborhood
Meadow crosby	93023	This building is historical and should be protected
april canacho	90660	Displacing long term community members.
Francesca	90041	Yes
Bianca Kingwell	90068	The gentrification of lei colon heights will displace the folks who live there!
Emely Vasquez	90026	The project isn’t in the best interest of the current residents in the area.
Ineliz Ruiz	90031	This our community. Not only with gentrify and push LH natives out of our homes, but will cause disturbances to the peace hence construction and parking will be more impossible than already is. Rent will raise and will change everything. We don’t need a huge building in our town. It’s meant to be our home, not to feel as we are being pushed out.
Elena	90031	This project further gentrifies the community and hurts its longtime residents.
Amber	90031	
Citlali	90032	This type of luxury living is unaffordable to the citizens of Lincoln Heights.
Angel Perez	90031	Trying to gentrify a community that doesn’t want to be gentrified
Yalitza	90023	
Dana Barone	90031	Environmental review, full permit and local resident review and should be done. The corruption of Jose Huizar will not be tolerated even in the poorest of communities.
Jacqueline Aquino	90031	Gentrification and for profit is affecting our community and it’s longtime residents negatively. Let the community be heard
Rebecca Ramos	90031	Gentrification is pushing out our local residents!!! Do not gentrify Lincoln Heights like Echo Park
Jaya Tengco	90031	This development is a direct threat to The Lincoln Heights community
Deserei	90032	It is wrong.
Emily Gramajo	90065	Gentrification
ana villapudua	90031	gentrification.
Conor Kinsman	90039	Lincoln heights community deserve to be heard and actually listened to.
Lidia Gutierrez	90042	Los Angeles desperately needs affordable housing. This project will not be affordable housing but will instead lead to the displacement of many, many people & families. This project does not fit the community’s character whatsoever.
Deborah Samano	90040	I grew up in North East LA and agree with all the statements made in this call for petition. No to Gentrification! Support and protect Historic neighborhoods.
Joanna	90032	Luxury apartments should be built around people who make minimum wage
Dulce	90031	Gentrification, rent

Guadalupe Mendoza	90031	
Nicolas Antonio Reyes	91106	Neighborhoods need more affordable housing, not luxury apartments that will make everything in the area more expensive as well.
Raquel p	90042	No one can afford these over prices apts that are just going to sit empty taking up space or when they do occupy it'll just be with racist gentrification kicking out the community as always kicking out the community that will not be able to afford these "luxury" Apts also adding to the parking problem no please consider not building this
Sherrie Chavez	90031	Because current Lincoln heights residents And surrounding areas would not benefit from it or would be able to afford to live in them
Olga Diaz	90031	Gentrification access to affordable housing
Diana Ortiz	90032	I oppose this project because it doesn't benefit the community of Lincoln Heights. It is too expensive for them to afford , and it disrupts their already formed lives by pushing them out so wealthier people can live in the area.
Alexis Serrano	90023	
Gracie	47304	Lincoln Heights has been a historical landmark and safe place and home environment for the working class POC. It would be abuse and overall inhumane to strip this away from anyone, and especially taking it away from POC during COVID-19 and the current state of the world.
Jessica Ichel	90033	Because I don't want anymore gentrification
Jorge Barreto	90031	I strongly oppose structures that are intended to gentrify my neighborhood. The community has many historic values that are at risk because of projects such as this one.
Andres Fuentes	90032	Not enough affordable housing.
Nanette Sullano	91602	Cultural and Residential Displacement
Sally Arias	90031	It will create further inequality in housing for a the current low income residents in the community and infrastructure such as this should be presented to the community before moving forward.
Evan	91202	It will take away homes from people in my community.
Mia	90063	I grew up in Lincoln Heights before moving to City Terrance and I can't sit back and allow my childhood neighborhood become a victim gentrification. Long time residents of this neighborhood should not be forced to relocate, this is their home and they deserve to live freely and easily. Stop the oppression of BIPOC.
MARIA RAMOS	90012	I oppose because it will put the people currently living in Lincoln heights at risk of losing their homes.
Gesselle	90063	I've grown up in these areas all my life and when you take over someone's community and theirs mo respect or overnight to the people in that area thats disrespectful the people should have a say weather these buildings for the rich should be build. Remember this is a lower income area and highline the prices in our areas won't help us grow and that isn't right build this stuff in the Valley, Hidden Hills, and Thousand oaks.
Lauren reed	92688	Because this project will push rent controlled individuals out of there homes in the middle of a pandemic.
Annie wilkes	90031	It's will cause people to be dis placed. Unless it is 50% affordable housing I don't see how this helps residents of Lincoln heights
Jorge Reyes	90065	Inflation and gentrification are hurting community health
Nicole	91030	this project displaces people who have lived here for generations and continues to perpetuate gentrification
Odalis	90062	NA
Josephine Gualpa	90026	I oppose this project because it would be detrimental to the community surrounding it and people would be unnecessarily evicted and that is not right.
Yasmeen	90008	My Lincoln Heights neighbors will be vulnerable to evictions etc and this is indeed a violent act to get them out of their own neighborhood. They must be involved in the project conversation.
Michelle alanis	90033	Gentrification has to stop. Pushing people out with no choice is WRONG
Samantha Mendoza	90031	This area is already seeing the effects of gentrification slowly trickling in. I've lived here a majority of my life and fear I won't be able to do so in the near future. This project will kill the community.
Joddie O	91801	This project leaves people on the streets. That's NOT cool.
Hermes Agustin Jr	90044	It will force families to move out and find no where to go and it's simply Gentrification
Kate lee	90032	
Jesus Rodriguez	90031	Then you guys start raising up rent on the community to kick all Latinos out
Marivel		
kelly luo	90031	bc fuck gentrification
Tony Jardines	90031	We should have a vote as to how this place is improved.
Alena	90031	WE DONT NEED ANY MORE BIG APARTMENT COMPLEXES!!!
Maria	90033	This city is my home. Home to a lot of people. Stop kicking us out.
Brendan lopez	90032	This will undermine small business

Mazacuauhtli Burrola	91722	gentrification is warfare
Ashley Arreola	90031	This community is our home. The fact that they are trying to build bigger and HIGHLY EXPENSIVE rent complexes is just sad. They want to change our culture & push us out of this community.
Eric	90042	Because the rich come to kick out the working class for their own benefit. Not realizing they will put thousands of residents in the streets just for their benefits, for example look at highland park, echo park.
Brandy allen	90026	Against gentrification and development that effects traffic and original residents
Paola tapia	90031	This project is meant to push out the community members that currently reside in lhts. These buildings won't support our community members.
Roberto Soriano	90012	Because it's wrong.
Bernadette Arias	90031	I oppose this project because it's kicking out all of the residents in my lovely neighborhood including myself it makes it harder to live in an apartment where I can barely afford it and the same goes with my mother we've lived here for such a long time since I was a child and it's so sad to see this neighborhood dissipate into some thing that was once so beautiful and filled with culture
Atziri Cervantes	90042	
Marissa	91605	Stop pushing locals out! Housing needs to be affordable and building luxury housing that middle or even lower class people can't afford IS NOT FAIR!
Bryan Vasquez	90023	Because no one is going be able go afford this ugly ass housing
Kristian Cardenas	90031	No community benefits and not enough affordable housing
Patrice	94546	
Jonathan Diaz	90033	Gentrification
Esther Ibarra	90063	Gentrification needs to stop.
Abraham garcia	90640	can't built without notifying the neighborhood residents
Sabrinna Bates		
Jasmine Alvarez	90031	The folks of Lincoln Heights will not survive this if this building is built. The people of Lincoln Heights—the REAL people, the working class people—can not afford these ridiculous luxury apartments and will be forced to leave. We've seen this countless time in other North-East LA neighborhoods and we can't let it happen again. We should protect our community from further gentrification. Gentrification is modern day colonization and it is violent.
Sandy vuong	90031	We deserve to have a say in OUR community!!
Sabrinna Bates		
Kary	91801	THIS IS DISGUSTING. LA — ESPECIALLY NORTHEAST LA — DOES NOT NEED LUXURY APARTMENTS. THIS IS NOT WHAT AFFORDABLE HOUSING LOOKS LIKE. THIS IS A COMPLETE DISREGARD FOR COMMUNITY NEEDS & COMMUNITY RESPECT. HOW DARE YOU @ GIL CEDILLO ALLOW THE GENTRIFICATION OF ONE OF THE MOST HISTORICALLY RICH LA NEIGHBORHOOD BE SUBJECT TO GENTRIFICATION IN THE NAME OF "BETTER BUSINESS DEVELOPMENT." I WAS BORN AND RAISED IN LINCOLN HEIGHTS & HAVE BEEN FORCED TO MOVE OUT TO THE SAN GABRIEL VALLEY DUE TO INCREASED RENT & PROPERTY/PROFIT HUNGRY LANDLORDS! PLEASE USE THIS SPACE AND THE FUNDING FOR SOMETHING THAT WILL NOT ONLY MEET BUT SUSTAIN THE LINCOLN HEIGHTS COMMUNITY 🔥🔥🔥
Elaine Huynh	91732	Los Angeles and neighborhoods throughout America have a long history of gentrification, which is a product and function of systemic racism. I believe there is value, beyond the economic, in Lincoln Heights without luxury developments. Luxury developments destroy rich, deeply interwoven communities in Los Angeles, and I do not want to see this happen in Lincoln Heights. The city of Los Angeles can act on their position that Black Lives Matter by opposing this project.
Lucy	90026	
Elizabeth Herrera	90031	This must include affordable housing options for low income families
Sandy Frias	90065	The fact that residents were not informed of structure. Low income community members will Not be able to afford to live here and be displaced in order to build structure. Community members will not have priority application access. This is not for the Community and it is not a structure that the community would benefit from
Stephanie S	91331	The people of Lincoln Height should be prioritized rather than gentrifyers
Jamie patterson	90041	This goes directly what the neighborhood needs and the pricing is INSANE. Shady tatics to even get this project this far is a terrible sign of what's to come
Kaili Ward	91764	cultural gentrification
Barbara	90031	Opposed to gentrification
Jose	90031	Gentrifications
Scarlett	94122	It's cultural genocide! Fight gentrification at all costs!
Kasha	91423	it's destroying a community

erika dominick	90006	LA does not need more luxury housing, especially not the expense of working class people of color, and especially not without public comment.
Amanda	90033	It should stay for the community!
kora colasuonno	91607	toxic luxury housing is not what the people of lincoln heights want or need, and will only exacerbate the growing housing crisis for the entire region.
Justine zimbron	90026	Displacement of current residents
Alejandra Guzman	90063	The displacement of an entire community is never going to be okay. Communities are not for sale! During a pandemic, to build luxury apartments in a lower-income neighborhood where local residents can not afford to live in said properties is pure evil. Gentrification and capitalism are the real pandemic.
Miranda Peraza	90031	Honestly seeing gentrification in the Lincoln Heights community is really sad. This is a community that has to help build each other up. Not a community that needs a big fancy corp. to drive out the history of the people.
Tracey Truong	90031	Yes
Anagabriel Castro	90032	
Edwin Coro	90031	Doesn't represent the people who live there and places it out of reach
Celeene	90280	Many residents in Lincoln Heights are already struggling to live in the city. There is no doubt this project will increase rent therefore making it more difficult for residents. These units are not affordable for many residents, which will further increase the gentrification of the city.
Enzo Gonzalez	90023	This project will displace native residents through gentrification
Eric Hernandez	90032	People who’ve lived their lives in Lincoln Heights don’t deserve to be forced out of their homes by gentrifiers.
Skylar fisher	90066	The construction of these luxury condos will further the displacement of families who have lived in Lincoln Heights for generations.
Cindy Davalos	91764	
Madeline Pena	91104	yes
Hailey Moreno	90042	No gentrification !
Adrienne mercado	90031	Pollution concerns
Kimberly Cortez	90003	Lincoln heights needs to keep its culture and not be exposed to gentrification like so much of Los Angeles!
Susan Mackin	90042	It will negatively affect the community and people living there
Jailene	90031	This project does not serve our community. Our community did not approve this. This project will end up pushing out long term residents of Lincoln Heights, it would be the start of a violent wave of gentrification.
Virginia Finney	90005	Because the gentrification of this city is a violation of human rights. And because this building is ugly as fuck.
Tawney Elayda		This is a threat to the Lincoln Heights community and would displace many.
Juliette Contreras	90005	It’s bad for the community
Simon	90023	Lincoln heights has felt with a wave of gentrification for the past 10 years and enough is enough. All this would bring is higher rent for low income families like my self. Lincoln heights is one of the oldest community’s in LA.
katherine torres	91706	
Michelle	91306	
Carl Cortez	90033	
Jenisse lara	90031	Gentrification Is doing more harm than good in our communities of color
Chris Cervantes	90031	I’m against this project because it will displace long time residents and only negatively affects those that will be able to stay in terms of raising their property taxes and erasing the community that made the neighborhood a place of desire anyway.
Jose duran	90031	It’s not fair for the people that have been here for many years to be kick out of their homes that they work hard to get for some investors who already have lots of money to kick them out like nothing
Emely Ocampo	90031	I oppose this project because it displaces many immigrant families who have planted their roots in this community. This will just drive up the very apparent homeless problem in LA. These projects are toxic to communities of color.
Elisa Rosales	90280	This is not what the people in the community want or need. The community's needs as well as their opinion have to be taken into consideration. The people should matter more than profit!
Selenah Marti	90032	I want to uplift my community, not destroy it. Building these developments would further contribute to gentrification at the expense of our people.
Remi Riordan	90004	I’m against gentrifying developments that displace people.
Sixto pena	90031	It displaces low income renters!!
Nial morgan	90038	Fuck corrupt developers

Rebecca Rivera	90031	It displaces people from the community
America Sanchez	90031	Gentrification has already taken over too many neighborhoods and Lincoln heights should not be one of them. I've already had too many friends get kicked out due to this issue and it is not right.
Danny Bermudez	90033	
Melina piedra	90065	It would drive working class families out of the area and cause gentrification in the community
Brandy S	91106	
Kenneth Chip	90031	
Sebastian Meza	90032	This is not what the Lincoln Heights community needs, and is a blatant example of pushing gentrification and erasing the culture that has been set here for almost a hundred years. The Lincoln Heights Community does not approve of this, and was done without the permission of the community.
Reynaldo	90280	Gentrification
Nicole Campos	90031	People are being wrongfully shoved out of their homes. They've spent years here and are losing their homes due to the selfishness and greed of local politicians. They have done absolutely nothing to help the community and instead focus on making money off the displacement of people in this community. This is absolutely despicable and must stop.
Emily leon	90042	This project will displace life long residents of Lincoln Heights. We do not need more luxury apartments in our neighborhoods.
juan leon	90031	It's erasing our community.
Rosette Simityan	91042	It threatens the cultural integrity of the local community
Liam forde	2472	There is never an excuse to take away housing. It is never defendable or acceptable
Raquel Rodriguez	90031	The last thing my neighborhood / LA needs is another luxury apartment complex. Four generations of family has/ currently lives in this area.. we need more development for affordable and equitable housing to preserve the spirit of this city instead of becoming a hollow devoid of genuine life.
Cinthia Carlos	90031	
Skyler conner	90042	It’s horrible
Esmeralda Ordaz	91744	It is not affordable housing for the existing community
Diana	90031	This project isn't for people like the ones in Lincoln Heights. No, you want to import newer, richer people to "boost" this city/neighborhood. Where will we go? We'll see our neighborhood changed by people whom we've never even met, such as you. You're not for the people of Lincoln Heights OR Los Angeles. No one is. All you care about is the money you can get from the land we live on. We'll be "hip" and "urbanized" and "modern." You'll just bring in new voters FOR YOU. The neighborhood won't be a neighborhood anymore. It'll be a soulless hub for workers and you're the king of the hill.
Daniel Esquivel	90065	It’s taking away from the community. The community is losing its roots. Terrible terrible idea.
Iiia Xochipilli	90007	I am indigenous
Michael Aldana	90031	Gentrification will kick out community members who cannot afford the rent and bring in those who don’t understand the culture.
Lizette	91204	Taking away from the community.
Carol	90031	Gentrification has slowly started to take over our community leaving out on the street our most vulnerable, long-time residents and beloved members. This project is a perfect example of that.
Elizabeth Zamora	90032	This housing is not for OUR community and will only serve to displace us.
scarlett dennis	90032	gentrification is violence
Hugo Hernandez Jr.	90031	I Oppose This Project Because This Is Gentrification & Will Make Lincoln Heights Rent Sky Rocket Throughout The Neighborhood & N.E.L.A. And Will Forced Us To Get Kicked Out Of Our Neighborhood & Remove Our Culture, History, Brown People & Presence From Lincoln Heights!
Ashley Boyd	90031	Keep Lincoln Heights charming and true. This mega luxury building will further damage this neighborhood and displace locals. It’s is truly an eye sore. Get out of here with your capitalism
Karla Coronado	90031	Lincoln Heights does not need any more gentrification. Gentrification will lead to families being pushed out of their homes. There is a rising increase of homelessness and gentrification is one major contributing factor leading to it.
Carmen Flores		Instead of taking from the community invest that money for the betterment. These people are hardworking people who do many of the laborious jobs no one else wants in order to provide for their families in hopes of better opportunities for their children.
Estefania Hernandez	90019	Tired of these people coming in making rent unaffordable kicking the brown and black families that make this community
Rachel Weinstein	90027	End gentrification

Jeannette Hernandez	90201	This could lead to an increase of rent for the surrounding properties leading to the displacement of many families.
Venice Malabanan	90011	Because gentrification kills the culture in the community and kicks hard working people out of their homes
Jazmine	90032	Lincoln Heights has always been a neighborhood that provides affordable housing for the lower income community. This project would force many families to relocate during a pandemic which is inhumane and cruel
Bailey Brown	90026	Not affordable/colonizing/unwelcoming design/not asked for by the community.
Camila Pernisco	91801	Lincoln Heights is a culturally significant neighborhood that deserves to be appreciated & lived in by its current inhabitants, never gentrifiers who'll displace those who have worked hard to achieve their American dream.
Diana	93304	"Lincoln Heights is the oldest most historically diverse neighborhood in LA and residents have had to endure generations of racial inequity." just more powerful white people taking from POC running them outta their home so these "important" people can built their stupid complex, it must end and ikr must END NOW
Jorge Hernandez	90023	There's no need to build something that isn't needed especially when it will effect many in the Lincoln community. There was never a hearing or even an attempt to ask those in the community if they agreed or opposed to this "project".
Brazyl Thompson	95336	As someone who goes to school in Pasadena, and struggled and still struggled to find DECENT housing in a city so unnecessarily expensive even in terms of nearby food on all blocks, there really is no need to keep building faux luxury apartments that will only cause the housing rates and nearby shops, stores, groceries, schools (like I said, I currently attend a school in Pasadena) to go up. What Pasadena DOES need is accessibility to more affordable spaces: Food, parks, even street traffic. Because Pasadena is being morphed into a "business-tourist" town, the traffic has always been horrible, the jobs in the area don't pay enough for decent housing, and even gyms/parking garages in Pasadena are overpriced. These luxury apartments will cause everything to skyrocket due to inflation and influx of "business people", also it's very clear that an apartment complex with that many units is bound to have many flaws and unnecessary problems for a very high price. I struggled finding housing out in Pasadena, and upon returning to finish out my education, I will not be stationing myself in an area that is clearly taking advantage of people who actually need to be in this town, or have already been living in this town. On top of that, we need more AFFORDABLE HOUSES and neighborhoods. NOT more duplexes, condos, townhouses and apartment-mall complexes. Especially when there's no parking available anywhere. Pasadena already isn't great in terms of accessibility and affordability. There are already empty units/rooms all over this town that no one is living in due to it not being affordable. Fill those rooms/units first instead of the solution being to build more luxury apartment complexes. The solution should be to raise the wages and lower the rent.
Amanda Rojas	90032	Lincoln Heights is a beautiful community that is being threatened by this project. It will erase the culture and hurt its members in so many ways.
Anthony Zavala	90042	The rapid pace of market rate and luxury housing developments threatens the sustainability of the community of Lincoln Heights, especially during such a critical time. No one is against the development of more housing in Los Angeles but if there is no concerted effort to build housing that is AFFORDABLE, then you create a process of displacement for profit.
Grace Rosenman	91206	Let people continue to live lives in their homes please.
James Aguila	90032	lifelong residents will be permanenty displaced or homeless.
Julia Peters	91104	It's gentrification pure and simple. I have friends who grew up/still live in the community and I know developments like these negatively impact them.
Jacob kaiser	94133	Historical preservation. People won't want to visit the us when every prince of history is erased in the name of profits.
Michelle	90063	Gentrification is affecting our under serving communities!
Alvaro Parra	90031	This project will endanger the current residents renting in 90031 by setting a precedent towards unsustainable housing development and rent raising. We don't want luxury apartments to start a trend in Lincoln Heights of building monstrosities that few people in this zip code can actually afford.
Juliana Barbera	90046	
Ashley	90002	
Michelle Chin	90065	Why do we need more ugly luxury housing? What's wrong with building affordable housing for people who are already in the neighborhood?
Tanya Alvidrez	90031	Displacement of the people of lincoln heights
Annie Hawkins	97703	
Augie Calabro	90026	it will negatively affect the community and displace a lot of people who have lived here for generations
Alyssa Flores	90032	I don't want to see this neighborhood become gentrified and replace my brown brothers and sisters along with all the other communities living within lincoln heights.
Ashley Moran	90032	I have friends whose familles have lived in Lincoln Heights all for generations. I myself frequently shop and eat at the restaurants there. This development is going to do nothing for the existing community, but push them out. This development will kill the exisiting community and culture and push them. If you allow this happen, you prove to everyone that you care more about profits than you do the well-being of real live people.
Melissa Zamora	90032	Gentrification is oppression . This project needs to be thoroughly reviewed given the recently uncovered corruption in our local government .
Yesenia	90033	We demand a meeting !!

Sky Avery	90065	This project will indeed be a direct threat to residents around the area who have not consented to this. I do not consent the building of this development in my community.
Cameron Kessler	93001	
Megan Carabine	90942	Gentrification issues and will create indirect financial hardships for the families who have lived there for decades
Annie Brennen	90023	It displaces members of the community who are already there and won't be able to survive or afford the gentrification.
Hellen Jo	90042	No one in Lincoln Heights asked for luxury development. All of NE Los Angeles is in dire need of *affordable* housing, not fast-tracked back room deals made to line developer and politician pockets, while expediting gentrification at the cost of the everyone else!!
Orlando Almader	90031	
Jenny P.	90031	I oppose the project because it's unlawful and there wasn't any consent from the community given.
Jason Lee	91206	Given the amount of corruption in city hall, with two councilmembers caught in pay for play scandals in the past few years, and given the crisis of affordable housing in this city, we cannot let developers continue to raze entire neighborhoods in this fashion for the benefit of only themselves and the councilmembers they are paying off, at the expense of the past, present and future residents of the neighborhood.
Jorge Trujillo	90042	Luxury apartment units do not benefit the community of Lincoln Heights in any way whatsoever. The construction of this project will actually harm residents who have been living in this neighborhood for years and decades as it will drive up living costs in the area to exorbitant amounts that the majority of residents cannot afford. This will also draw new residents who can afford these more expensive living costs thus driving out the current residents. The luxury apartments cannot be constructed under any circumstances if the well-being of the current residents of Lincoln Heights are actually being considered.
Alexa	90031	It's kicking people out of the community it raises prices and claim to better the community by getting rid of the low income people of the community
isabelle pinto	90032	fuck gentrification!
Tatiana	90031	This project erases the history and the community that's been there for years.
Diana Diaz	90011	Im myself am LA resident and undergoing through eviction due to gentrification and seeing culture being erased and natives being removed from their homes, is totally unfair. We need our voices to be heard.
Cheyanne	90032	I live close to this area and it seems as if it pushing out a lot of people who lived here for a long time.
Rita Franco	92801	If it isn't affordable housing then what's the point? Help the people not push them out. Why do we need to allow another out of state company take over and make property in a place it's not needed. I'm outraged, make it stop, my friends and family do not need to be pushed out.
John	90031	...
Juliana McCullen	90045	It will cause affordable housing to go out the window and displace an entire community of people. This is gentrification at its most blatant, and it's unacceptable and disgusting that developments like this still happen without any regard for the people that already live in these communities.
Jocelyn Andrade	90031	Our home deserves to stay a home!
Brendan Nafarrate	90065	This project will further displace residents of Lincoln Heights and continue gentrifying this Latinx working class neighborhood. At this time when the nation is facing an unprecedented amount of evictions and a housing crisis this project will further exacerbate the existing crisis in Los Angeles. Furthermore, it would of be surprising to find out Gil Cedillo Is as corrupt as Jose Huizar and is likely being paid off to allow this project to continue.
Ilana KoZlov	90036	This will increase the amount of evictions in the neighborhood and I oppose that and will bring in gentrifying businesses that will hurt the micro economy of the neighborhood
Lila Funge	90039	
roger garciS	90031	Will displace many community members
Lesly Martinez	90031	
Eduardo Peralta	91773	
adriana	90015	Dtla has enough apartments. Go put them there stay away from our neighborhood
Jessica Campos	90250	
Dava	90043	there needs to be more low income housing, NOT LUXURY
Lee Atkinson	10573	it is malicious to insert high rent housing into a lower income area.
Christine Huang	90031	
Zitlali	94555	
Germain	90031	Going to attract more tourists and they will want to move here and that will raise the rent.
Chloe Alvarez	90012	These luxury apartments will increase gentrification in Lincoln Heights. It will harm businesses and has the chance to erase a historical community, that is Lincoln Heights.
Andrew Quintanilla	90033	The project will negatively impact the people of Lincoln Heights in many ways.

Sam perez	90042	It displaces people
Geronimo Flores	90031	Ugly too many buildings not enough affordable housing
Naui Munoz	90032	Because I do not agree with the construction of apartments that will benefit affluent and predominantly white people / displace and push out the working class perdominantly POC community that have resided in those areas for generations. POCs are already disadvantaged economically, educationally, and systematically and deserve to live without the threat of being displaced from their homes simply because of the fact that they have less income.
Alex Fofonoff	90031	I oppose this gentrification, the displacement of longtime residents, and the destruction of neighborhoods
Iris Valera	90031	I oppose of this project, because once they start building the "luxury" apartments, rent will go up, and the people who have been here they're whole lives, will have to be forced out of they're homes because they will no longer afford to live here! STOP THE PROJECT (Fuck gentrification)
Daniel Calderon	90042	I am against gentrification
Jennifer	90033	I oppose the project because it relocates people who have lived their for ages and makes fun for upper middle class which also happens to mainly white people.
Gladys Lopez	91731	I oppose this project because I believe that by building these apartments there could be a start of gentrification. This will lead to many Lincoln height natives to have no choice but to leave their home due to an rent inflation.
Elaine Chang	90031	
Lily Noyes	90036	The money spent making this new, extremely unnecessary development should be going torwards direct action to help the existing community. If Lincoln Heights gets gentrified, the existing community will face losing their home.
Vanessa	90041	Some people can’t afford these condos it will only create a even more populated area. With more condos equals more traffic around us. The people who will afford to rent these condos will be people with money. These hard working people will be pushed to other areas of work. And slowly like most of La it will just be filled with these apartments
Olivia Barrett	90028	It will lead to displacement and prioritizes corporate profit over housing justice
Kathy Osegueda	90031	I oppose the project because you’d be leaving my friends and neighbors without their homes. You’d be forcing them to relocate, when this has been their neighborhood forever. It’s not fair.
Ivy Marks	90042	We don’t need any more developments like this! Gentrification is violence!
Nuong Tran	90023	It will displace a lot of low income families
Julia	55343	This will hurt a community
Gabriela	90032	We don’t need these developments that aren’t affordable and push out lower income families
Thomas	90746	Gentrification
Jenny Lee	90026	I'm tired of low-income communities being affected by housing. We need rent control and affordable housing, not more housing for the rich or middle class.
Abbi	93405	
Liz Fieschko	90029	Community decisions must include the community that lives there!
Andrea Galan	90031	
Jasmyn Lemus	92011	Against Gentrification
Maya Rosado	90031	fuck gentrification
Corina Lash	91030	I am against gentrification
Adrian Contreras	90042	I don’t believe building this luxury apartment is the solution to affordable housing in Los Angeles. But most importantly to not displace it’s current residents, who would be affected by this decision to construct this project.
Cameron Masters	91506	It’s gentrification and is possibly funded and approved in a corrupt and untransparent manner
Michelle	90032	I can’t afford an apartment in the hood I grew up in. Gentrifiers need to stay out of our community. All they bring is a higher cost of living. LEAVE US ALONE.
Saul Munoz	91406	Save avenue 34
Joseph Waggoner	90026	Doesn’t provide affordable housing
Chloe ricks	90808	I oppose all projects that enforce the gentrification and displacement of members within the community.
Francisco	90033	Our community is united
Franco betancourt	90031	It remove a lot of the neighborhood history as well as living a lot of low income families with out a homes
Dakota Booher	91351	
Matthew	91103	gentrification is bad
Abraham Machuca	90031	It pushes my friends and neighbors out of their homes without any aid or input
Analuisa Alvarez	90031	

Areeba Zahid	90044	unsustainable, expensive, eyesore
Gianna Bermeo	90041	NO TO LUXURY APARTMENTS. INVEST IN LINCOLN HEIGHTS LOCALLY
Willow	91702	The building would displace a community that is already struggling
Danielle trejo	91331	It will raise the rent and put the community in jeopardy
Frances Freeman	90034	Because it puts the current community in danger.
Martha Sanchez	90063	Its unfair to the real and vulnerable surrounding communities!
Byron Arreola	90042	Gentrification is cultural erasure.
Amy Hoang	90031	It's nice to see the community change but, we want to be beautiful in our own way. Since there are many working-class, low-income families in our neighborhood, we are not ready to see Lincoln Heights take action without hearing the voices of the people. Also, gentrifying will increase the homeless population, especially since Los Angeles has one of the largest populations of homelessness.
Rosie	90016	Because I care
Olivia	90027	
David Cruz Terrazas	90031	It could negatively impact the current residents of our neighborhood. Majority of the residents are low-working class. New housing projects are going to be priced at market value which many residents will not be able to afford that. Lincoln Heights is antique and important asset in the history of Los Angeles, one of the oldest as well. For that reason many homes are subject to rent control. Market valued homes attract a different class group and gradually there will be less lower-working class residents. And there simply isn't any aid for them.
Paulina	90032	
Renata Rodriguez	91733	This project is harmful to the community as it will continue to spike the problems of gentrification
Esther Gomez	91342	It is unfair to force people out of their homes just to build a new model and raise up the rent This should be stopped and allow the people that already live in the building to stay where they call home and don't have to look for new places in a short period of time
Amoura Gonzalez	90004	Fuck gentrification
Jesse Gonzalez	91706	I am sick of the displacement of brown people within that community.
Aya Newman	94703	Gentrification is violence.
Isabella Juarez	90031	Will kick our current tenants raise prices of homes kick out culture we have in lincoln heights
Toni Gallardo	90005	He is corrupt! and 86% unaffordable this is not what the community is wants. he is corrupt and therefore those projects should be under investigation or on hold until the people can speak to city officials who are not biased or getting paid off.
Gadiel	90031	Gentrification
Annie Lin	90027	
Joy Yukumoto		
Pamela Garcia	90031	I oppose to this project because gentrification will come to place and this will hurt our community, it destroys the community history, and culture. LA living has become extremely expensive rent will skyrock and demand people that have lived in Lincoln heights for many generations move out. As a high-school graduate from Abraham Lincoln and college graduate. I find having difficulties to find a place to live here in Lincoln heights where I grew up and not be able to contribute or give back to my community.
Aketzachialli Lopez	90042	I oppose gentrification.
Amanda Flores	90660	Gentrification
Julian Izaguirre		
Fernando Hernandez	90032	Accommodating affluent neighbors while forgetting the entire community seems like a major disconnect between community members and who actually resides in LH
Isabel Gallegos	90063	When hundreds are suffering due to the covid pandemic and already struggling to pay bills and rent why is another large apartment being built that will be inaccessible to the very people who live in that community? Hundreds will be displaced directly or indirectly in years to come by this construction.
Agustín McCord	90029	I visited a friend at ave 32 and Pasadena the other day at dusk. I admired the unity of the community, strength of relationships of neighbors who walked among each other familiar and greeted each other from their front yards. The corner market was a meeting point. I felt the authenticity. The neighborhood will be destroyed by these condos if we don't speak up now. Please preserve the integrity of Lincoln heights!
Gabriel Salvatierra	90029	Luxury developments should be outlawed entirely
Hope stutzman	90034	If you are elected as a representative of your community you must serve that community. There is no way luxury housing should be permitted when you have residents who are unhoused or housing insecure. It is our representatives job to serve the people, not profit.
Ashley Palma	90006	

Arom Choi	90032	Lincolm Heights is one of the oldest neighborhood in LA with diverse communities. Don't want this project to ruin any people's lives who's been keeping Lincoln Heights beautiful. People over profit. Always.
Lauren Lauer	91362	It will displace many low income renters that are already apart of the community.
Jorgie Tlāchia Inin Ilhuicāc	90063	The displacement of Black and Brown people in historically POC neighborhoods (and traditionally Tongva unceded territories) by gentrification continues the cycle of uprooting said POC people, further removing and displacing them, as well as continues the cycle of genocide on Black and Brown and Black and Brown Indigenous bodies by means of gentrification. Implementing "luxury apartments" in POC communities will continue to put POC lives in danger, not to mention allowing the contuation and perpetuation of modern day manifest destiny.
Harper McCallie	91030	
Arleth Tomas	90004	
Roxy Wills	90004	
phoebe		
Benjamin Phillips	90012	Out of scale and insensitive to cultural dynamics of historic community
Charlotte lethbridge	90026	It will destroy the community
joana chaichang azterbaum	91104	bc we need affordable communally owned housing that meet our needs, not profit driven condos that lie predatory and vacant during a housing crisis and pandemic
Briana Lara	90032	Because it pushes out the current class that lives here
Jennifer Solares	90012	Gentrification is going to drive people of this community out. Families have been in this part of Los Angeles for generations and this is only going to drive up prices and drive families out of Lincoln Heights. Protect this community and the roots they have founded here.
Antonio	90031	Yes
Gabby Espina	90033	
Brianna Cruz	91776	
Leah Clancy	90042	My neighbors deserve better. This building would destroy the community. It is shameful.
vesta javaheri	91030	
Matiana Parra	90031	We need affordable housing for the community that lives in Lincoln Heights and need to protect renters rights.
Bianca juarez	90031	this is going to gentrify the whole community. My family has been here since the 90s and this project will erase all the culture we have in this community!!! This will cause property value to raise causing more and more displacement and homelessness.
Natalie Christine Saenz	90032	Because I’m tired of seeing the places I’ve grown up going to and seeing being erased :(tired of the gentrification
Arthur G Lopez	90032	Cause I’m tired of seeing communities being gentrified...
Alison	90065	This is yet another act of violence against marginalized people. We do not need another gentrified, white-washed neighborhood in LA.
Mackenzie Ferro	91801	There kicking out the people who built the city there trying to get rid of the middle/lower class!!!
Lili Peper	90026	Because it is going to destroy the neighborhood.
sage perez	90033	it is bad for community. Fuck their fancy gentrifier apartments.
Karla Esquivel	90031	We should use the money to help the homeless and to build homes for the less fortunate.
Xochitl Anceno	94931	I don’t support gentrification
Ashley	90065	we didn’t ask for it!
Debie	90031	It will ultimately cause for rent to increase meaning many families won’t be able to keep up with the rent; therefore, they would lose their homes.
Brandon Bonilla	90004	It will displace working class people of color
Nelly Sepulveda	90031	We can’t afford more evictions
Melah	90018	It’s not okay to do something that will directly impact the community without first discussing it with the community.
Denisse Ojeda	90031	gentrification!!
Elora	91208	I grew up in cypress park on Isabel St and Maceo. I was forced to move out of the home my family had lived in for 3 generations because of gentrification like luxury apartments. Luxury apartments only hurt low income communities. They have already turned Highland park into a place I don’t recognize and uprooted so many families. Don’t let them do it to Lincoln Heights too.
Daniela	91343	No to gentrification !
Lisabeth collins	90029	Los angeles in the midst of a housing and eviction crisis does NOT need more luxury housing, the city is GLUTTONOUS w luxury housing
Joseph Rihn	90042	We need affordable housing NOT luxury housing.

Caitlin Wylde	90026	No more useless high cost ugly condos and housing units when low income housing is so desperately needed esp during COVID
Rita Del Cid	90004	Lincoln Heights is the first district in Los Angeles. We need to preserve the history of our city and stop gentrification. We need to protect our friends, families and our local businesses. Making new buildings that will raise rent and property in the neighborhood will only destroy the families, friends and businesses that have been living there for years, even generations. We need to value our residents and respect what they have built and preserved.
Michelle Schimek	90027	As residents of the community we DEMAND this not be built. NO ONE SHOULD BE DISPLACED for this.
Sam Torres	90255	Gentrification is violence ,the preservation of culture is important ,people shouldn't be ripped of their homes
Malia	91605	
Brittany Pires	90038	No more big developments. No more gentrification. No more luxury apartments when we have a deadly housing issue. Stop pushing out families. Stop eliminating integral LA communities. Stop targeting BIPOC. Fuck your sky rise. Fuck👏🏽money 👏🏽hungry 👏🏽white 👏🏽superiority👏🏽 Tiny dick havin , good for nothing, can't access a mental competency to save his ass RACIST BASTARDS
Justine Bernacet	90042	We don't need our people to be pushed out of their homes to make room for only those who can profit and make wealth off of the community we built.
Brandon Olmos	91732	Bc you didn't ask.
Flynn Namala	90008	
Malik Gay-Bañuelos	90031	Gentrification threatens those who have lived in this community for generations. The rise in rent has forced many out of this place that we love so much. The community deserves to be heard regarding such a large community development.
Mia Shlakman	90266	Gentrification is garbage!
Ava Balise-zsarko		
Dahma	90033	Luxury apts put low income and immigrant community members at risk of being displaced. This project is a step toward gentrification which hurts communities of color, and low income communities during the pandemic when it is crucial to stay at home and when many are struggling financially.
Andrea Suarez	95403	I am opposed to the gentrification of a neighborhood that has been populated by people of color for years. This development would have devastating impacts on the community. They were never included in the conversation and they deserve to have a say with what happens in their own neighborhood.
Andrew Vasquez		This will facilitate displacement of viler able community members
Kelly Daugherty	92026	That's a culture you shouldn't take
Camille Derouin	90068	It's bullshit
Marc	90746	This is so wrong and gentrification should be abolished. This is pure evil
Joshua Morales	90018	The current residents and communities will be dealt the short end of the stick.
Kris	90031	
Esmeralda	90032	Gentrification
Annie Pendergrast	90042	Gentrification
Gladys vaca	90031	We need housing for the hard working people of this community. Not housing for foreigners
Georgia	90041	gentrification further displaces marginalized groups in a city where extreme homelessness already booms. rich white folk do not need more luxury apartments. This city is already riddled with far too many fancy high rises to take over lincoln heights as well.
Diemmi	90012	This neighborhood is home to hundreds of low income residents. No one wants luxury apartments to raise the prices of the whole neighborhood and potential spike rents. Opposing gentrification.
Paul mccaffrey	90031	To Stop luxury housing, gentrification and displacement.
teri newman	90006	bc gentrification is bad and ppl's homes are at stake
Blanca Moreno	90063	Over crowding and its home to many Latinos
Veronica Morataya	90031	
Tom Park	90020	Displacement of current occupants
Fernanda	90033	Corruption
cuahutemoc tapia	90018	communities should be left to the communities. gentrification is a crime and should be curbed at least and reversed at best.
Lisset Silva	90810	It's not beneficial and will harm those in the community more.
Anna Flores	90063	This project will displace Latinos in the community by increasing rents and evicting people from their homes.
Natalie Ramirez	91342	This project will leave people the people have lived here in the streets.

Stella s	90068	It’s oppressive and ugly
Maxwell laurance	95062	
Olivia crawford	90031	Gentrification will push residents out of this beautiful city and destroy the community
Francesca		I want Lincoln heights to maintain it’s community. Building this new unit would jeopardize individuals in Lincoln Heights.
Liza	90031	
Ramona Gomez	90006	Gentrication/ Housing in affordability
Paula Peng	90034	We do not need ANY MORE LUXURY DEVELOPMENTS DISPLACING COMMUNITIES IN LA. The gentrification stops with US!
Gerardo Navarro	90063	I grew up in Lincoln Heights (209 S. Avenue 19), me and my family were practically forced out by the owner raising the price of the rent and we could no longer afford it. We ended up moving to the neighboring town, Boyle heights, I would not want any other Lincoln Heights residents to be a victim of gentrification so I do not support this. It does not surprise me that Gil Cedillo did this, he’s the same person who got a half a million grant to pay police officers to walk the streets of highland park because people would write “Fuck Gentrification”. His gentrifyers felt threatened so they made sure to put police to threaten its native residents.
Andrew Rodriguez	90032	
Sasha Fuentes	90029	Gentrification is the worst!
Jazlyn	90012	Gentrification is the worst thing to happen to our diverse communities.
Becky Diep	90031	My community should not be gentrified.
Clarisse Lopez	90041	projects such as these price out the long-standing communities within the area
Rozzie	90745	Stop gentrifying neighborhoods
Jaylin Erath	90017	Gentrification ruins lives
Andrew B	90031	Gentrification has already taken parts of Highland Park, Boyle Heights and other Latino communities. The transplants who come here are mostly white invaders who have harassed my community by calling the police on us, threatening us in the streets and otherwise shutting down true expressions of our culture while taking what they perceive to be the best parts for themselves.
Jose Luis Herrera	90031	Lincoln Heights is a low-income community with a homelessness problem that the city needs to put their attention to. Housing is already commodified, even though it should be an accessible human right to everyone, and luxury housing is Lincoln Heights is a slap in the face to those already struggling with housing situations and making ends meet.
veda faust	11121	
Maryann Vasquez	90065	To Stop gentrification
Madeline Lough	90031	Lincoln heights is a beautiful community and it needs to be preserved! This development will only serve to displace the people that make the community what it is.
Meredith Hamilton	90042	It is disgusting that LA's city hall is actively participating in the displacement of lower income people by bypassing their community led councils. The endgame of which, is the erasure and replacement of culture, history, and community, with a gentrified playground for the wealthy.
karsen	91506	blatant gentrification that will cause erosion of culture and people who live here.
Isabella Rios	91107	No to gentrification, no to displacement. Stand with residents and the community over corporate interests.
Alynda Garcia	90032	Don’t Gentrify Lincoln Heights
Diana		please no.
Vivi	90012	it would disturb the community and end up contributing to displacement and be an eyesore
Evelyn Vasquez		
Meaghan Mullaney	90042	It would ruin the integrity and charm of the neighborhood
Daniel Estrada	90032	It’s simply not right that families are getting pushed out of neighborhoods they’ve been in for years, to bring in people who don’t care about the displacement. Voices need to be heard
Daniela	93117	An existing community should not be pushed out of their neighborhood due to an increase in rent that clearly they cannot afford.
mirza	90022	Gentrification isn’t right. The working class can’t handle this, especially during this pandemic.
Paola Santos	90031	Noone in our community will be able to afford this. We do not want this to be like highland Park.!!!!
Minerva Camargo	90031	This will only serve in displacing me and my mother .
Carmen	90020	We cannot keep pushing out homeless / lower income housing. LA already has a massive homeless population and the demolishing of this building will only contribute to a problem that we have not yet even begun to solve.

Mike carillo	91201	
Adam Corona	90065	The fact that the community has no say in the matter, and the fact that the evictions and displacement is taking place at such a high rate is wrong. Let the people who live in the community have a voice.
Nikole Morales	90026	This project will and is the first of many to come that will continue to displace the people of Lincoln Heights. The median household income is below 30k, this project will invite those who are way above that income threshold further displacing the very people that make up that community, which would eventually lead to the bigger issue of homelessness and poverty in the greater LA area.
Brianna Henriquez	91204	Gentrification effects the community, families will have to move out due to rent increase, families will have to face homelessness which is already effecting families in neighborhoods that have been already gentrified, erasing culture and communities that have been apart for many many years.
Yahtil	90242	
Amelia	90065	
Scott Hodges		It would be bad for the community.
Keko Jackson	90033	Let the community talk and down with the development and displacement
Beatriz	90004	Because it's wrong
Carina amador	92104	
cynthia	90031	We have enough gentrification in our neighborhood. We should be focusing on what serves the community, not how it can be exploited for money.
Annette	90031	I don’t agree with displacement of families.
Gabriel Morales	90031	People in my community are being pushed out, and I grew up on this street.
Roger Hallaway	90019	The city of Los Angeles does not need more luxury housing. It needs more affordable housing for the everyday people who actually live and work within the city.
rebeca	95116	
kathleen c	91343	I am against gentrification.
Erick	90031	I am someone who has been displaced because of gentrification. My family went from paying $800/month in a house I lived in for 21 years in Lincoln Heights to paying more than double ($1,800) for a house in Lincoln heights. ENOUGH IS ENOUGH.
Arlene Rivera	90042	We need affordable housing for all. Not just for the rich.
Lizeth Ruiz	90031	This project will displace countless people and contribute to the problem of homelessness.
Isabel	90033	
Diana Choi	90020	get these fucking luxury developers out of LA, they’re gentrifying colonizers
Leslie	90031	I oppose this project because I live in lincoln heights & I know the struggle of paying bills like rent for families of poc. My own family struggles with our $1,000 rent. This project will most likely kick many families out of their homes because of the rent raise. Its not fair that white people just place ‘Luxury’ whatever, wherever they want because they feel like it. Its selfish because they clearly didnt think of the people who live in that area. This is a home to many families who will find it hard to live anywhere else. If I was placed in that situation, I’d want people to take notice and sign this petition as well as Im doing.
Jose Perez	90022	No to gentrification
Abrielle Stedman	90041	Let’s maintain the current culture in the neighborhood.
Vanessa	90031	I have lived here in Lincoln Heights since 1995! I want this neighborhood to stay affordable and not be dislocated.
Melinda Parker	90065	It’s nonsense!!! We do not need that big of a complex anywhere in this city...
Devin	91601	The input of the locals wasn’t considered. This construction is paving the way for more gentrification 🤦🏽‍♀️
Katarina Gleicher	90042	It does not reflect what the people want
Anthony Garcia	90031	Low income families losing their homes or ability to rent. Creating more homelessness in our city that is already enduring a health and financial pandemic.
Katherine Grace Wall	90042	This is gentrification, pushing out a cultural center in LA for characterless apartments that will only be affordable for the rich to move in.
Jessica Espinoza	90032	Fix the homeless problem in our communities before building new luxury structures
Frank Vasquez	90065	We don't need luxury. We need 100% affordable housing for low income resident that are already in Lincoln heights
Jackie Villaseñor	91790	I don’t want to see the neighborhood where I grew up, taken over by gentrification. We cannot let another city with so much culture be taken over with apartments that are not suitable for people that make up the working class of this city.
Kai Schelly	90065	To protect the community
Brenda	90032	We love our community and diversity.

Matthew Padilla	87124	Yes
Morgan Purcell	90032	Gentrification is a direct threat to the working class and minorities in the community
Lupita Gonzalez	90031	Gentrification
Lizbeth Meza	90031	taking away community of lincoln heights
Samuel smith	90039	It’s gentrification at its finest.
Priscilla v	90065	Lincoln height didn’t approve this
Isabella Tong	92620	This directly negatively impacts residents and created illegal evictions, inflated prices, etc. It is a cultural genocide on the working class community of Lincoln Heights. Furthermore, the public was not informed of these developmental decisions, making it unarguably politically corrupt.
Ana	90031	I have lived here my whole life my mom grew up here I grew up here. I love Lincoln heights. The control rent is necessary for the Latin community here. Building this horrible building will bring outsiders to Lincoln heights driving the community away. They’ll be coming to an “up and coming” community looking for the culture but the culture will be gone. It’ll turn into another white washed community. With this being built rent will sky rocket everyone will leave and Lincoln heights will be lost. There’s no need to fix what’s not broken and trying to turn Lincoln heights into highland park and echo park will surely break it.
Carolyn Fernandez	90031	I oppose this project for the sake of the community, the space being taken from residents whom have built lives in our neighborhood and making this neighborhood beautiful and full of its charming nature. This new development would suck the beauty out of this neighborhood and become a Tyrant to the people whom work hard to stay here in OUR neighborhood which is made up of our roots. You will not take what’s left of our community.
Lucia Lopez	90031	I oppose this project because this is a low income community and it needs more community resources not expensive housing.
Juan Nolasco	90065	
Nicole Ramirez	90065	There is no purpose for housing in this area.
joseph grasso	90005	i am a believer in the rights of humans to live where they were raised. where they feel they belong
Emelyne Camacho	90042	These apartment complexes do not provide help for the communities that live around it. It is counterproductive in the idea that low income communities need more resources (the city of LA loves to show off how much they assist low income communities. This is a perfect example of gentrification, it pushes certain income and racial groups. I live in Highland park and went to school in boyle heights, I do not want this in my community. I dont want my community to suffer any longer.
luis leon	90032	Well for one rents will raise up making low income residents leave and all these business workers care about is money than other people's families. These families will have to move and make new friends, new jobs and for what? Dumb residential areas? No, we the people from Lincoln Heights demand this to STOP
Nathalie Zamora	91755	
Mallory	90032	Lincoln heights is a place of history and families, not for generification
Kristina Montecino	90042	Fuck Gentrification. Gil Cedillo’s dream is to gentrify the places we have left. I live in Highland Park. I know it too well.
Joel Montejo	90031	It unfairly displaces the Black/Latinx residents in Lincoln Heights who face the pressure of such projects through increased rent, discrimination, etc.
Cesar M Navarro	91107	Lincoln Heights is home to family and friends who have been a part of the community for decades.. this project along side with many like this displace my people; many of them who have contributed so much for their families and the greater Los Angeles. These luxury suites have no business being in the community. It's inconsiderate and unfair to not only me, but to many many people who born and raised here.. we may be socially distant, but locally we are united.
Mitchell Valine	91001	I do not live in Lincoln Heights, but I don't like gentrification. This has to be stopped.
Jesse Marinero	90731	Gentrification is cultural erasure
Nathaly	92570	Its where my mom went to school
Nicole	90017	This project will not only raise rent, but it will not be affordable enough for the community that currently resides in Lincoln Park, thus erasing the community. Gentrification is direct violence to lower income families and families of color.
Gabrielle	90062	The people who are raised here and call it home deserve to keep their home
Valeria Villela	90031	
Minu jun	90042	LA needs more affordable housing and spaces for those affected by covid. Not apartments that’ll further gentrify Lincoln heights and cater only to the wealthy!
Natalie monge	90031	Gentrification
Zoe	96067	Because it will effect the people
Anonymous	N/a	This project should never be part of Lincoln Heights. This building may bring up tourists or luxurious people to bring in more of a unhealthy environment. Plus, most of us won’t be able to afford the pricing for a one night stay at this ridiculous building. This building is out of place, comparing our neighborhoods to that one luxury building felt as if we were forgotten, left out, we as a community were driven out because of that building.
Génesis Nam	90004	

Alexander Villasenor	90031	Lincoln Heights need affordable housing. Not luxury condos that the community cannot afford.
Crystal Gamboa	90031	
Zelideth Padilla	90670	Stop gentrifying our cities and displacing communities vulnerable to erasure.
Mia	95403	This is gentrification. You are displacing people from their homes and attacking those in the area by building LUXURY apartments in a middle to low class area without community input. Stop criminalizing the poor. This is OUR home.
Aylin	90026	I oppose because displacement of people of color is not right. People deserve the place they have been living for in years. I live in Echo Park and have seen this happen. Do not let it spread more please.
Linda	90031	It increases cost of living!!!
Karla Vega	90042	Gentrification is forcing families to leave the cities they grew up in and it's not okay. Their families built this city and shouldn't be forced out bc LA is the new trendy hot spot, let those people stay in West Hollywood.
Rachel Rosales	92881	You're taking away one of the greatest things that makes LA so unique and beautiful; which is it's rich diversity of people of different backgrounds that are willing to welcome you with open arms.
Alfonso Meza	90032	Because this is a classic case of gentrification, rents in the area will skyrocket and will push out families that have lived their whole lives in the Lincoln heights community.
Mike T	90031	It will cause displacement of the people here
Justin W	90032	Gentrifying developments do not support or invest in communities.
Jocelyn	91306	Bad
Carlos C Tejeda	90031	I have serious concerns that the project may have been pushed due to corrupt back door deals and not due to the best interest of the residents of Lincoln Heights or Angelenos at large.
Connor Johnson	91207	Gentrification is wrong and evil.
Kristi case	90057	Stop Displacing Local communities and gentrifying for your profit and stripping our city of any culture
Celine Merino	90038	Gentrification has been tearing up LA communities for far too long. The people's voices matter and when they stop, listen.
Nicole Ice	91206	
Sam	92651	For families's homes
Sarah Ginsburg	90039	Lincoln Heights is one of the most special neighborhoods Los Angeles has and this is because it hasn't gentrified as fast as other neighborhoods like Echo Park and Silver Lake. But a development like this would change everything and bring in a bunch of people that would not contribute to the neighborhood in a positive way or care at all about preserving the beauty that is there.
Morgan Marshall	90002	We must keep our communities safe from. Building units like these raise rent and gentrify black communities.
Lex Darco	90027	Housing is a human right!
Emily	90650	It's contributing to gentrification, which its impact can be extremely negative.
Margarita	90031	It doesn't represent/benefit our community
Danielle Franco	90063	I hate gentrification.
Angelina	90026	I don't like
damon	91205	It doesn't seem motivated by the community. It would be disturbing the peace; ironically becoming the eye sore because certain people want to monetize a view.
Jade Muslar	91104	I'm a resident of Pasadena and don't think it's a good move for the community. Many people here are also students and it's hard enough to find affordable housing close to campus
Matthew Ribarich	90031	There's been no public accountability or input into this project, it threatens the lives and homes of everyone in Lincoln Heights, in a time when evictions are skyrocketing and everyone is out of work it's unfathomable that we'd be allowing luxury condos to be built instead of keeping people housed and focusing on bolstering the neighborhood and it's residents. This project is not compatible with a continued quality of life for current Lincoln Heights residents. We say no to development and rich developers buying their way into doing whatever they want with no public accountability. .
Alan ortiz	90031	I oppose this project because these Caucasian's and Asians move in and think they big shot and start thinkin this they area now and they give the rules like no and we can't do nun because if shi cracks they winning cause of money
Juan	91732	I oppose this project because we as a community in the Northeast Los Angeles had no say in this projects construction and the people developing did not even have the enough respect for our community to even open up a dialogue and I believe transparency is what we need in times like these. We as the people of the community have seen many of these types of project displace and gentrify our people and make living in our community impossible. We demand to meet with the people of this project and to speak with any other person called for on this petition. I'm not asking.
Brianna Doria	90032	Put a stop to gentrification.
Jonathan adame	90063	Fuck the city council members for allowing this gentrification to continue. Build something we need , not 400+ apartments we can't fucking afford.
Matthew Rodriguez	90031	I want to help my community even more.

Talib Mudiwa	90019	Unethical
Joe Gamache	90039	I oppose this project because it will rip apart the social fabric of the Lincoln Heights. This is an act of violence against some of the most vulnerable members of the community by greedy developers, and the property-owning capitalist class they serve, and they cannot be allowed to get away with it.
Mercy Solorzano	91801	Gentrification is not ok. Driving out low income families mostly of color for profit shouldn't be the answer. These communities have been the home for many POC specially Latinx and Asian Americans.
Javaun Crane-Bonnell	90042	Gentrification with luxury apartments erases the history of the neighborhood and pushes lifetime residents out. It is the last thing that the community needs. There needs to be more affordable housing, not more exclusive housing.
Melissa cortez	93550	Its Gentrification
Bianca	92804	This is a threat to the city and the community. Building luxury apartments in a neighborhood where people value community more than amenities wouldn't add any value to the producer, consumer and the Lincoln heights natives.
kimberly moulic	90041	because we don't need any more WHITE men moving into our land. disgusting. you could've funded something else like creating shelter for homeless but this??? wow.
Hannah Kang	53511	I condemn the gentrification and displacement of a POC neighborhood.
tom	10002	i'm sick of developers and greedy politicians displacing communities and ruining lives. community > capital.
Andrew Tulin	91801	
Andrew Patton	95112	Gentrification forces poverty. People can't afford rent as is
Diego	90031	
Lucero Tolentino	90042	Despite the fact there is so much gentrification going on, the people who live near will get kicked out equals homelesness
Andrew Emard	90065	lincoln heights / LA doesn't need more "luxury" apartments that can sit empty for months or years while thousands live on the brink of losing their housing / are forced onto the street bc of a developer manufactured housing shortage
Jaqueline Espinosa	90065	I oppose this project because the city should be providing affordable housing and not luxury apartments for the upper class or drawing attention to upper class.
Maggie Wood	91302	
Matt Endler	90033	This housing does not serve the community that the are belongs to.
Leticia Llamas	90031	
Laura Shumate	90068	The residents of Lincoln Heights that have been there for years and decades won't be able to afford the rents that will go up in the a) new building b) their current homes as landlords will raise the rents out of greed and possibly begin to try and sell their buildings for more money. This will displace these residents and community, gentrifying these people right out of their homes. Ultimately, the landlords and owners think they will win, but they will suffer too as this imbalance and disregard for human welfare over money will inevitably come back to haunt them in their own homes. There should be protections from ourselves and greed. This will devolve into ruin. We are living it now. And that is why it shouldn't be built.
Alejandrina Anguiano	91104	I oppose a project that's clearly in favor of the displacement of people who are already struggling.
Iiia Xochipilli	90007	I'm indigenous
Paige McGhee	90032	We should start with appreciating Lincoln Heights for all it has, create a plan to renovate the spaces in the community for the community that already lives there...not for gentrifiers.
		It will only serve to displace low-income families
Gabriela Ruiz	90031	I'm afraid for my health and being pushed out of my home. Please don't let the construction pass.
Annabell lee	1060	Gentrification is violence, do not displace people out of their homes
Daniela Encarnacion	90065	Lincoln Heights does not need luxury apartments. The area is already heavily populated and being so close to Chinatown and Downtown will only bring more people and more traffic. Luxury Apartments are usually rented by gentrifiers, coming from out of state, the people who actually grew up and live in the community can't afford the apartments that's are being built and end up being displaced because rent is ridiculous in Northeast L.A.
Daniela Romero	91214	It will do more damage for community members than good.
Karina	90020	Gentrification is pushing people out of their communities. Overpriced housing is raising the cost of living in what used to be home to hard working families who are just trying to make it in this life and succeed. Gentrification pushes these families put of their homes and further away from the city in order to keep the status of the newer constructions' luxe lifestyle.
Joshua Trujillo-Flores	90063	
Isela Cortez	46224	I used to live in Lincoln heights and even go to school in the area. Currently I live in Indiana, but I would hate to see that they build luxury apartments if people have to move out their homes and have no where to go, just for those new apartments to be built. Do not build them.
Celeste Barajas	90031	this project will only hurt the community in Lhts not help. They are building unaffordable units to push people out of their own community and replace them with white people that can afford them. You want to help then put money into the community not apartment buildings to make it more crowded in an already crowded community

Bridget Smith	7023	This project is part of a national pattern of gentrification and destruction of marginalized communities. The fact that this project was undertaken without any input from the community speaks to the fact that those involved in the project have no respect for the current residents of Lincoln Heights, and therefore should not be trusted to build in the neighborhood.
Jared petrich	90057	I dislike those buildings a lot
Kenny flores	90012	
Joseph Gallucci	90031	This is a direct assault by the city and developers on the residents of Lincoln Heights, and a repulsive eyesore to boot. We need protections for renters against evictions and displacement, not tacky unaffordable luxury housing!
Ashley Evangelista-Mendiola	90031	I oppose this project because I was not aware of it until now. I do not approve the further displacement and erasure of the community living in Lincoln heights for many years. The community wants a public hearing for this project.
John	90031	It will change the neighborhood for the worst
Ellery Smoller	90036	It would cause too many evictions. We don’t need more housing developments
Dalton Lopez	90031	Gentrification / rise of rent
Briana	90065	
Karla contreras	90031	Because it will gentrify a community already dealing with high rent . People can not afford to live here and will be pushed out.
Reuben	92055	Fuck gentrification
Steve Lucero	90031	This project does not reflect or support the community. We will not tolerate these inflated development projects!
Emely	90031	Gentrification
Alyssa Julian	90026	Building luxury units in an otherwise very working class neighborhood will drive up rent costs and push out the neighbors that have built the community
Arthur Aguirre	90042	The community does NOT need luxury apartments that have an arbitrary price on them. I can’t even live in my old NELA neighborhoods anymore!
Robert Aguirre	90031	Gil Cedillo is a sellout. People over profits!
Gabriela Cervantes	90022	It will raise cost of living in Lincoln Heights and force life-long residents to relocate.
Alondra	90020	Oppose the project
Arasely sanchez	90602	Gentrification ruins our communities
Grecia C	91764	Going forward with this project will displace families who have been the heart and soul of this community for the sake of “development.”
Amanda Lanza	90031	It is not in consideration of the communities needs
Sabrina Lieu	91208	Gentrification displaces people and raises prices, none of which we need.
Eric Freeman	90004	Fuck Gentrification
Hannah Brown	90042	luxury housing hurts the community
Harley	90601	Destruction of the community
Jerry Garcia	90041	Because this housing development is just going to make it so it’s too expensive to live there and it will kick out people who have been living in Lincoln Heights for years.
Lilly Armstrong	91206	
Taylor Burch	90068	Please stop ruining this city with unaffordable housing please stop gentrification
Melody Morales	90022	the community was not asked for their input!! families who reside in lincoln heights for many years will be torn from their homes because they will no longer be able to afford housing. GENTRIFICATION IS THE ABSOLUTE WORST!!!
Ariel Aguilar	22153	NO MORE GENTRIFICATION!!!
Charlotte Zhang	90019	Because LA City Planning, city council, and the property developers they are in bed with care more about profit than the lives and well-being of working class people of color. These people are corporate grifters and deserve to face the consequences for their actions, and the community should have the agency to make decisions to protect its members from potentially life-threatening displacement amidst a pandemic, economic devastation, and cultural/ historical erasure.
Isaac Valdez	90270	Against the project because it’s pushes gentrification
Maddie Johnson	90068	Gentrification is violence
Frances emm	90068	Because gentrification is the work of DEVILS. We can’t let any more gentrifiers and polluters into this neighborhood.
Ricardo Luna	91803	This project is going create more traffic and the term Luxury just states this is a prominent location for high salary residents which should be suspended as companies do not want to make affordable housing for those at minimum wage. Considering that LA planning is working on this blueprint before hand they should work along Traffic Engineers and see the issues it would cause in just traffic flooding by vehicles and the repairs in pavement for moving cars on road with this 468 more added vehicles on this location.
Jacqueline	93727	This is gentrification

Juliana Sorelli	90068	This Project is ridiculous and a scam, it's going on all over the city with every one of these horrid projects sitting empty.Also as this health crisis has proved it before, there is great danger to suddenly concentrate this amount of people in such a small space. What will you do in an another crisis? How do you evacuate that many people in case of an earthquake? Another thing, luxury isn't living in some cheaply made death trap with over 400 units...We need healthy environments and affordable housing. We don't need anymore of this junk in Los Angeles. You are turning this city into a monstrosity. Empty buildings, and camps of homeless people everywhere. It's an embarrassment. A project of this magnitude will increase illegal evictions in Lincoln Heights and contribute to the Ellis acting of multi family properties. Affordable housing stock will be seized by flippers and investors and lifelong residents will be permanenty displaced or homeless.
Emma home		I oppose it because it start to erase the history of the city. This city has culture and beauty in it with the current buildings it has.
Andrew Tam	90012	It’s not what the community needs and is honestly an eyesore
Sophie Reiff	90065	Our neighborhood does not need more luxury condominiums. We need affordable public housing for our CURRENT residents - not expensive housing only attractive to new residents. We want to see our multi-generational community have more secure housing, as well as secure housing for our currently houseless community-members. We do NOT need condominiums for people who do not even live in our neighborhood already. And saying that a portion of these units will be “affordable” is NOT the same or enough — we have seen that excuse used time and again, with the units built being virtually inaccessible. No - we want an entire unit of affordable housing. None of this gentrifying, luxury condominium stuff. Thank you, next!
Natalia MacAdams	90031	This is not consistent with what Lincoln Heights is about. Continuing to displace low-income residents and eliminate affordable housing is a scourge on our city. Our neighborhoods are being ruined by developers and we don’t want them.
Vanessa Munoz	91103	They should start that project on a empty parking lot
David	90032	Stop over developing our city for your own personal gain our community is not your personal bank!!!!!
Jette Kavanagh	90012	I oppose this project because we’re losing culture and affordable housing for those who need it
Sabrina Bachelier	90019	¡Basta!
Courtney Rice	90032	
Isaac Diax	90033	Its a legal way of trying to kick out people out. FUCK that.
Anatalia Zavaleta	90023	We don’t need overpriced apartments kicking out the local community. Especially with apartments like this that would rather be empty + overpriced than filled with people who are part of the community
Joey	90016	Do not plunder Lincoln Heights. This is pure evil. You cannot disrupt this neighborhood ever, but especially during this pandemic where brown folx are struggling to survive. Lincoln Heights does not need your bright, shiny building. Leave this neighborhood alone.
Andrew McLean	90012	It’ll be terrible for a city like Lincoln Heights.
Grant cdebaca	90026	This kind of project doesn’t belong ANYWHERE in East LA. Greedy out of touch developers like this who have no roots in or understanding of a community like Lincoln heights are a cancer on working class Los Angeles, the life blood of this city.
Perla Perez	90032	This is unacceptable.
Simone Rein	91103	Large scale residence buildings such as these force out low income residences and gentrify the neighborhood beyond recognition. Please do not move forward with this project in respect to their people and culture that currently reside in Lincoln Heights. People are more important than profits.
Torianne Schiff	90032	Our community needs affordable housing, not high end development.
Brigette Plascencia	90031	We need more low income housing not high end housing
Giorgia Mannucci	90041	Gentrification is a violent practice that puts in danger always the most vulnerables. Protect the area and support the rich local community instead of building for the rich outsiders.
Pilar Duralde	90042	There is already a lack of affordable housing. Evictions have begun. The community of Lincoln heights has a cultural and communal history too precious to be ripped apart.
Daphne Quijada	90031	I live in the area almost my whole life and I don’t want our community to get moved or changed for other people’s privilege. It isn’t right. We’re already struggling in so many ways but we try to keep our community together and good. This will just ruin everything.
Sarah Shelby	90049	I want developers to engage with the communities that they are affecting, every action has effects and the ramifications are clear in this case. A public meeting or forum is the least any business owner can do, though they are used to just doing what they want without pushback.
Ariana Baez Romero	90031	No gentrificación
Francisco Rios	90031	No gentrificación
Sonja giordani	90065	
Ellena Rodriguez-Davey	90031	To keep the integrity if the neighborhood and keep housing affordable for the people of the area

Ulises F Angeles	90022	The amount of effort and taxpayer's money wasted this project could be used for community enriching programs and improve overall quality of daily life. Cedillo obviously does have Lincoln Heights majority working class residents in mind with this corrupt move.
Lillie Wiszniewski	98499	
Jackie	90815	
Cynthia	90023	We don’t need more gentrification in this city.
Emily	90026	
William Forgey	90027	It’s not good for the community
yesenia Gonzalez	90255	Gentrification only displaces people jn out community who are already facing financial, mental, and health problems. The people were not included in this conversation and that is not fair.
Hugh Blunden	90017	I can’t stand corporate greed especially from people who don’t even take a moment to reflect actions or respect placed on an already suffering community. The fact that most of these projects are lead by vultures that don’t even live in LA!!! It boils my blood! If I can stop this type of capitalistic desease in any way in this country, then I will. This is just a start.
Mariah Vaca	90031	This change, with which the neighborhood residents were not consulted on, will change their lives indeed by hiking up rent prices and forcing out families that have been here for decades. This isn't Echo Park and it's not about to follow the same path. The City of LA is composed of thousands of home-deserving working class and tax-paying citizens. All of that work and effort should not go unrecognized and overshadowed by a personal project.
Ignacio Mejia	90018	City hall is planning to erase and displace the community of Lincoln Heights
Sydni Wilmore	90042	Because although I grew up in highland park, my whole family resides in Lincoln heights and I don’t want to see my city gentrified even more than it is :/
Alicia	91106	
Jessica	90001	Gentrification is unnecessary
Adriana sanchezy	90031	Because gentrification causes so much suffering and displaces minorities and people who make less. It’s not right to make housing so expensive that the people who have been living in those neighborhoods can’t afford to stay in their neighborhoods any longer. It’s pure greed and modern day colonization of the land from people who have already been established there.
Jane	91202	
Nico Moreta	90039	Lincoln Heights is a lower income neighborhood made up of primarily Latinx and Asian families. Huge development projects like this increase rent, whitewash, and push out these people from their own neighborhood (aka gentrify). This development project is a huge step towards gentrification, and is colonialist in nature. The architecture is ugly and doesn’t retain any of the inherent culture of the surrounding neighborhood. Plus, who is gonna rent these expensive apartments? Not the people of Lincoln Heights. No it’s intended to bring in wealthier people and foreign commercial businesses to saturate the market and overpower the homegrown businesses that the community thrives on and vice versa. DO NOT GO THROUGH WITH THIS PROJECT!
Sergio Hermosillo	90230	we need more affordable housing
Chloe Gilinsky	90026	Lincoln Heights residents do not want to be displaced and have their community disrupted by shitty luxury housing when there is an affordable housing shortage in Los Angeles.
susan	90031	it will displace many families and hurt the local businesses around the area.
David Reyes	91103	Fuck gentrification. Preserve the POC & Latinx culture in these LA communities
Nicholas Mueller	90033	This development represents the dismantling of the community that has resided in Lincoln Heights much longer than any member of the Pinyon group. The sheer size of this development will ruin the community in the inevitable price hike in rent will forcibly remove families that have been a part of the community for a very long time.
Roxanne De Ment	90065	We need more adorable housing in the area, not a luxury high rise.
Aya	90033	Tenants are people, not disposable property
isis mejia	90063	i’m against displacing people in the area/poc and rising rent/property value and making it inaccessible for people who had previously lived there
Jeremy yoshioka	90034	Lack of transparency is troubling.
Hannah Thorner	94707	
Patricia Orenday	91803	Increase illegal evictions and make rent in area unaffordable
Lauren Risha	95616	I oppose the project because it is not for the people of Lincoln Heights and is just further contributing to the displacement/ eviction of communities and the gentrification of the area.
Juliette	91803	Unaffordable housing for residents!
Sara parsley	90019	Enough gentrification! Protect POC

Anna	91324	I'm tired of these ugly and tasteless luxury apartments filling up every corner of LA. They tear down LA establishments, pieces of our history, our architecture, and displace the working class and people that have been here forever. Half these luxury apartment units end up sitting empty anyway. We have enough of them throughout LA county, we don't need more.
Anna	91324	I'm tired of these ugly and tasteless luxury apartments filling up every corner of LA. They tear down LA establishments, pieces of our history, our architecture, and displace the working class and people that have been here forever. Half these luxury apartment units end up sitting empty anyway. We have enough of them throughout LA county, we don't need more.
Stephany Del Cid	91204	It will not help the local community and it will promote gentrification & displacement.
Cassidy	11385	This project will displace many members of the community. It is negligent to put profit over the community.
Zoei Gigliotti	90041	The people of Lincoln Heights deserve to have a voice in this matter. This development could drastically change their lives- and not for the better. Luxury housing and developments are not catered to local angelenos (like myself and many people who live in Lincoln Heights). By allowing luxury developments you are pushing out those who built LA and it made it the cultural haven it is today.
Stephanie	90031	This project will affect all those living in Lincoln Heights. There are already people and small businesses who are getting pushed to move out. This housing is not for our community but for others who will displace us if rent increases.
Victor Barraza	90020	Because Lincoln Heights has been a community and part of the history of L.A. County. These corporations just come in and take over everything which is not right and move out people so I support this petition thank you for your time
Cittlalli	90031	Displacement of long time residents. It will also create a rise in rent.
Allie	92831	
Nicole Aldrete	90031	Affordable housing
Samantha Garcia	90002	It's an injustice to the minority community. Gentrification will not be tolerated.
malissa	90004	it's unethical
Dominique Vargas	90031	I've lived in Lincoln heights my entire life. 2 weeks after I was born my parents moved from hillside village out of my paternal grandparents house and moved into my paternal great grandparents house located in Lincoln Heights. My neighborhood is beautiful and our people do not need to be pushed out of our own community. The majority of families who live here have been here for generations.
Reyna Rivera	90039	Displacement of current Lincoln Heights residents. And raised price of living in Lincoln Heights.
Violet Overn	90026	We don't need luxury condos we need affordable housing.
Textli Gallegos	90022	I grew up in Lincoln heights and I do not want to witness another wave of gentrification and erasure of yet another one of our LA communities.
Jeffrey Amado	90063	It's my community and to move families out just because y'all wanna do a damn project, AGAIN, dose t mean it's okay to just decide that.
Leola Sanchez	90405	I oppose the project because we should protect low income households and families and as well as historical areas.
Sophia Wessell	90036	It would destroy the character of Lincoln heights, as brand new huge modern apartment buildings tend to do to any neighborhood.
Alina Ponce	92880	Gentrifications occurring in our own cities have ripped apart families, small businesses, & dreams of young POC in this country for too long. Our parents were relocated & forgotten about but not us!
Alfredo Escalera	90031	I recently moved into the neighborhood. I'm aware the families that neighbor me have resided in Lincoln heights for their entire life and if this goes through those families will not be able to sustain a proper life style if property values sky rocket theses families will be unable to pay the inflated rent cost and will be Unable to pay and therefore forced to either live on the street or in cars.
Kimberly Berry	91001	I want to live in a city where my kids' teachers can live, where social workers and postal workers can live. Affordable housing is a right. We all own this land.
Mei Su	90031	Because this project won't be good for the community
Colm Daly	91207	The displacement of the current community is wrong
charlie	92649	
Niomi Munoz	90031	The city needs to help the community, not drive out their residents who have lived there for years. Lincoln Heights is full of beautiful Latino and Asian families that just need support by the city to bring the neighborhoods back to their old glory. We do NOT need another luxury apartment. Not only has it driven out its original residents, but it's also torn down old homes and buildings which is erasing the beautiful history of Lincoln Heights and the families who have once lived in this city.
Alejandro	90011	Gentrification of low income areas.
Valerie Lytle	90031	This prospect will encourage gentrification of the area, increase displacement, and increase the number of evictions in the area. It is violent and unnecessary
Ana Santos	90031	This is not being built to benefit or uplift the community.
Wendy Yao	90012	It doesn't serve the existing community's needs or include their input
Valerie	90029	All new building plans need to Invest in the current community. Build resources for them. Please hire from within the neighborhood on ANY new construction jobs.

Aaron marrufo	90031	It's not fit for the community and its erasing our community and gentrifying and kicking out the people who lived here for years
Sebastian Gonzalez	90063	Cedillo has always continually used my image in various projects and helping the community has always been a photo opportunity for him. I can’t sit idly by while the neighborhood is being gentrified.
Aaron marrufo	90031	It's not fit for the community and its erasing our community and gentrifying and kicking out the people who lived here for years
Stephanie	90031	Stop gentrification
Genaro Hernandez	90023	
Daniel Garcia	90640	To stop gentrification!
Jack Symes	91105	This is an obvious and blatant injustice and disservice to the resident of Lincoln Heights who may be displaced from their homes as a result of this project. Think about the consequences this decision would hold for so many already already scraping by.
Belinda Rodriguez	90006	This project will ruin a community that has been residing there for years. Rents will be raised, slowly pushing out residents and eliminating culture. Save buildings like this for Santa Monica, a city already ruined by gentrification. If new residents want to live in our communities, they must live there’s as is.
Larry Molinar	91331	I'm against gentrification
Laura Oliden	90032	To persevere the neighborhood. This project is a direct threat to drive out all the people who have lived in Lincoln Heights their entire life.
Wessim BenSaid	90065	Because it affects various families and businesses. It is an attempt to separate us as a community and mess with the cultural identity of the community
Erica Almodovar	90023	This will displace the community of Lincoln heights.
esmeralda molina	90031	Lincoln Heights is a community enriched by people from such diverse backgrounds. We need to protect this from companies coming in, displacing families from their homes, to make profit off of what was NOT built nor nourished by them. gentrification is evil and we can’t let what happened to highland park, happen here in lincoln heights. there’s so much heart and soul in these streets. it’s sacred.
Jessica Bley	90031	I oppose the building of large multi unit establishments to preserve the natural history of Lincoln Heights
Francine Yep	91107	
Ariana Robles	91016	To protect the community of Lincoln heights from greed!
Paloma Macias	90031	It is an infringement on the community.
Dasha cuevas	90022	This project feeds into gentrification and would hurt the lower/ middle class economy.
Joanna Sanchez	90501	I may not live there but I have friends and family that do. Immigrant families built Lincoln heights, echo park, highland park and East Los. This city is forgetting the History of racism and displacement. Remember white people did not want working class people in their communities such as Beverly Hills , Hollywood and other parts of wealthy neighborhoods. Now all of a sudden you are trying to profit a dollar on these so called flipping the neighborhoods . Maybe make housing more affordable and have rent control. Houses in LA are over 800,000 ? Why?
Lily Taggart	90065	It threatens to push out the community already living here and would not contribute anything to this neighborhood.
Ron Vargas	90031	When the project in Lincoln Heights was pushed through for the historic societee it ended up being very bad for the people who lived in the area not being able to change things on their house without a panel of people giving them permission this is not a Communist country so to me whenever Someone is trying to be push Something through without the public's authorization or approval it Is bad for the people in that surrounding area
Leilani Gonzalez	90201	its unfair
Anya	91030	I use to live in Lincoln Heights and I don’t want it to become something that is not. It is a beautiful historical neighborhood and this will just ruined it, plus it would suck for many families that live here now and would have to move.
veronika syrop	90016	destroying our city
Hershel	90016	These large ugly apartment compounds are destroying LAs historic communities and displacing residents who have lived within these neighborhoods for decades.
marley	90027	i’m anti gentrification!!!!
Steve Zarazua	91706	Gentrification hurts our communities by displacing low income families out of their homes from the increased rent and general increased cost of living within the community. Fuck gentrification.
Kathryne dameron	90032	How in gods name are you going to push a project like this through; in the shadow of the gross political corruption marring The LA development infrastructure? This reeks of corruption and you better believe if it’s rushed into existence against the wishes of the community, I for one will be demanding an investigation by the FBI.
Elizabeth Origel Gabriel	91020	My parents and family members reside in Cypress Park and have been part of the community for over 20 years. Developments like this don’t offer enough low income housing to the current residents in the area. Market rate pricing is not affordable to all, therefor this project should not be part of this community. I choose our people over profit.
Anthony	90031	Threatening my livelihood
Crystal Santamaria	90033	
Ariana Perez	91723	Fuck gentrification

Michelle Guzman	90016	i have similar incidents happening in my neighborhood and i know the harms it brings to the people who have always lived there.
Christine Stephanie	91732	Family and friends live in this area.
Alberto L Duarte	91104	We need to preserve our cities heritage
Stefhani	90032	
Andrew Lawson	90026	Communities should be involved in decision making regarding new developments.
Nick Taggart	90065	This type of corruption and destruction of our beautiful city must stop!
Tara Castellano	91101	
Adrian Apana	91202	The inequity that it brings to the people of the community—to put money into the pockets of big spenders who place no value on the history of an area, nor seek to truly give help to the communities there, while it is within their power to do so.
Bianca Mendez	90037	Because if it's not for the people, we don't want it!!
Mel Mendoza	90031	Gentrification hurts communities
Evan	90004	This project will harm the fabric of the community and displace people. No more gentrification.
Monica Farge	95123	Displacing the people of Lincoln heights without even having an open dialogue is unfair. Having luxury apartments open up, knowing it does not aid the community is also unfair.
Carlos Gonzalez	90031	I stand against gentrification and the construction of luxury apartments such as this one that will run out long time residents of Lincoln Heights.
Alvin	92832	This happened in my own community. I can no longer do anything about it in my own community, but i can help other communities prevent this. Stop gentrification
Kellen Harrison	90065	It’s two blocks from me and will drastically change the neighborhood
Julienne	95123	
Nai	77024	
Jacqueline li	91030	There is already an incredible lack of affordable housing available and too many luxury apartment buildings with vacancies. We don’t need more unaffordable housing/gentrification of neighborhoods. We need to address the problems at hand. Why do we live in the richest country in the world yet have so many homeless people in the streets?
Jesus	90031	Will be kicking out people of low income who won’t be able to afford anything outside the rent control zone
Stevie Hammork	92691	The over priced eye sores that are “luxury” apartments take character and community away from Lincoln Heights. The money used to create these monstrosities would be better used to help the communities low income residents and make the city better for the people that live there currently. Do better
Itla Tamayo	90031	
Paul Tamayo	90031	rent will go up and wont be able to afford current living lifestyle
Marissa Casillas	90042	It will dispose of families that have lived there for years and they will end up homeless or struggling to find somewhere affordable to live
Filibardo Mora	90260	Making City officials and Government transparent is key to making true change not only in communities like Lincoln Heights, but statewide.
Jenn	90004	No to gentrification
Amy Rodriguez	90033	YES. Erasure of culture, gentrifications, the fact that this project isnt made for the community its made to attract people from other cities and completely displaces members of the community.
Jennifer Moreno	90063	It does not serve the existing people in the community
Elias Pack	90065	The developers are preying on the economic powerlessness of the neighborhood. If the median income of the median current resident of the neighborhood could not permit that resident to afford the structure's median apartment price, then this is an act of economic violence.
Crystal Latonio	90026	Gentrification is Genocide
Alexis	90032	Will raise rent and destroy small business this isn’t a luxury neighborhood and there is already enough apartment why don’t they make shelters for homeless families instead of bringing in more people with money who don’t donate
Aranza	90042	
Hunter Tidwell-Higgins	91406	
Landon	98042	It sounds like gentrification of Lincoln heights.
Megan Waldau	91355	Gentrification is genocide.
Taylor	98107	Growing up in Los Angeles/Pasadena, and now living in Seattle, bearing witness to wave after wave of gentrification, I am standing up for my childhood home in the hopes that it remains socially, culturally, financially, and spiritually intact. Please reinvest in the community instead of building yet another garish luxury condo building.
John Salseda	91030	Gentrification

Adam Jerro	90031	No public housing option, no community involvement.
Alondra Romero	90031	To help make my community better for the residents already living in it.
Jamie Vivaldo	90031	Not what the community needs
Katya Zirulnik	90033	Luxury housing is not needed anywhere in LA and particular in this community. There is a lack of affordable housing that's crippling the security of hardworking families. People over profit.
Keven Acevedo	90031	The project will rise the average rent in Lincoln heights
Jina Rabinoff	90031	Lincoln Heights needs affordable housing! Not luxury apts.
Jen	90001	I'm opposed to gentrification and rent raising in predominantly latinx communities. This project will push out low income families who rely on communities like Lincoln heights for housing.
Nury Bolanos	90031	We were never advised of this new project . Gentrification Destroys communities, pushes out our diversity in our community .
Ismael Salazar	90031	Because it displaces working class people who already struggle to live in this community. Pushing this project forward will only displace more people.
Rory Hayes	90041	Gentrification is wrong
Diego Chiat	90039	Because it will displace families
Fabio Beltran	90027	I oppose the construction of any building that threatens the stability of the existing community. This construction will lead to consequences like raising the cost of living and diluting the diversity within the community. I strongly recommend to focus on assisting the current community to get through this pandemic, instead of outsourcing residents that do not respect the people that have upheld this community for generations.
Rebekah Sanchez	90031	!!!
Gina Niekus	90041	It is a product of government corruption and gentrification.
Alexa Soto	77338	
Brian b	90031	Gentrification
Miranda	91706	It is gentrifying a very culturally inclusive area
Tristan neihart	90043	Luxury apartment raise rents to exorbitant prices that people who grew up and have families ties in these areas can not afford. These types of projects do not benefit the people who actually care about our city and the cultures that make it what it is.
Jessica Garcia	92346	Because fuck gentrification
Liz Munoz	90706	Gentrification will lead to not only erasure of the culture but to eviction of low income families
Francisco Rodriguez	93505	I never asked for these to built
Jonathan	90717	Yes, I oppose this project. stop the modern colonization of p.o.c communities,
Cecilio	90057	I quote from the article above " . Lincoln Heights is the oldest most historically diverse neighborhood in LA and residents have had to endure generations of racial inequity". We are dealing with so much for people to start worrying about getting pushed out from their homes.
Priscilla Hernandez	91732	Displacement of families is not cool
Victoria Rojas	90042	
Sam orlin	90042	The gentrification and displacement that comes from this project has no need in Lincoln heights
Gabriel Partida	90065	These development projects are hurting us who have lived here.
Vanessa	93421	Saving the community
Jacob	90032	I don't support gentrification and would rather invest in affordable housing for the existing community
Marco f	90006	I'm against the displacement of low income people to develop a luxury condo project
Leonel Hernandez	90066	It will raise rent on the minority community that lives there
Alyssa	90094	Stop gentrification
William hird	90005	Luxury apartments do not serve the people who live in those communities - instead they force longtime residents out and are a lightning rod of gentrification. The only reason these are being built are to service high income individuals moving into neighborhoods and the fact that these are extremely profitable for developers. The community deserves to say NO to something so damaging being placed in their neighborhood. Fuck this its happening everywhere.
Emily Jacobo	90031	These new complex will just bring more economic hardship to the community and those surrounding it. The new apartments on griffin avenue by the la leadership primary have caused such a big change in the neighborhood and whom lives within. This project will make the problem even worse.
Katherine	90041	
Jennifer	90057	Gentrification pushes out our people. Our people get displaced from their homes! it's not fair to let rich folks do this to our people especially people of color.

Alfred	90027	This development will only continue to displace and erase the Lincoln Heights community.
Daniela	90031	We are tired of gentrification
Sergio Ramirez	90046	I was a Citizen of LH during my teens, and know in my heart that that building is not being made for the Generations of families who have lived there. It is all for Profit
Maggie SanFilippo	90026	It will force people out of their homes and raise rents
David Burrill	90031	This is another way to gentrify culturally diverse neighborhoods and to drive out P.O.C. who are low income while you drive up cost of living. Not in our neighborhood
Lindsay Barker	90042	Fuck gentrification! Building luxury condos will push out lower and middle class working families!
Erin Walsh	90035	Disrupting the Lincoln Heights community with this apartment complex is a blatant example of gentrification. Communities of color will be displaced by this project, and it is insulting that the Lincoln Heights community has had no say in this approval.
Valentina Zapata	91754	Stop the gentrification. Stop the evictions.
Salma Rojas	90041	I refuse to sit idly by as rich people gentrify neighborhoods thus displacing low-income communities of color. This is not the type of investment in communities that we want!!!
Noa Rosenberg	90004	
Israel Hernandez-Rodriguez	90640	The obvious gentrification of one of the most Historically Diverse communities in LA is absolutely repulsive.
Miguel Abriz	91406	Not fair to the low income community and minorities
Jessica Lara	90201	I strongly oppose this project because tenants will be illegally evicted. Displacing them from housing in a neighborhood that belongs to them. Lincoln Heights residents deserve to heard and should not be excluded from this conversation.
Claire Hunter	90031	I love my community and do not want further displacement
Jeremie Peters	91202	Gentrification is one of the most vile forms of racism/classism and must be stopped
Justin Aragon	91755	Gentrification is not for the people. The people of Lincoln heights do not want this in their neighborhood.
Jessica Takeda	94720	we need affordable housing, not luxury condos
Robert Pena	90033	We do not need almost 500 luxury apartments that will displace many families.
Nancy	90042	We need affordable housing not luxury condominiums which will only cause GENTRIFICATION
Samuel Ruvalcaba	90638	
Bridget	90026	Because I'm tired of them tearing down our buildings and gentrifying the area with apartment complexes. I'm tired of them building apartments where the people who have lived in the area for years are being kicked out and can't afford these new apartments or the growing prices for the area.
Preston Mendell	90019	I used to live in Lincoln Heights a few years back and knew this day would come. I always try to draw a line between development, which is a sort of inevitability in urban life, and rampant gentrification. The idea of a building this MASSIVE and largely unaffordable monstrosity on a toxic site is absolutely wrong.
Favio Espejo	90032	This will create a chain of events of people wanting to gentrify a low income neighborhood. This will encourage gentrification in our neighborhood and will displace many people who'll struggle to find somewhere else to live
alexiss palarea	90031	
Christian Diego Baez	90011	My People are being supressed by Genderfication and a lot of shade is happening behind this project
Brittany	90026	You're going to be moving on members of the community who have been there for generations.
Priscilla Rodriguez	90031	The proposed project will push locals out.
Samantha Avitia	90032	
Sierra Morris	90035	Stop gentrification
Ashley Del Cid	90026	New luxury apartments have been coming up for the past 10years one on every block in the neighborhood that i grew up in saw my entire neighborhood get torned down and the people living here for decades get pushed out in a couple weeks for out of staters, lets face it, white people. all businesses turned into pop up coffee shops or boutiques that last about a month before being up for lease again.. theres no respect for the community that has been there and just a bulldozing of LA's culture that is what brings those outsiders, to turn it into what? a shopping hub where all those that work in the city can't actually afford it but cater to those that can, cater to people that stole what was ours and neighborhoods that they didnt want but now see they can turn a profit..
Charles	90031	Doesn't seem right
Rafa Mendez	91744	The community never had a say on whether it should be built, and it will only lead a path to homelessness/ displacement of the community
Mikel	90006	It seems dramatically out of step with the neighborhood. Also there's no way it will be affordable for the people that already live there. I used to live in Lincoln Heights, and appreciated it's architecture and history most of all.

Israel Lopez	90066	
Brenda Romero	90037	Because no one asked for it.
Devin Ratliff	90026	
Carissa Velasquez	91803	These apartments will not be affordable for the community who live there and will therefore be of no service to the people who have lived their for decades. Stop gentrification NOW
Mabel Rojas	90022	Lincoln heights is a brown Latinx community, I would hate to see this change!!
Joshua	90031	Development on poisonous toxic materials in ground
Xiana	90063	Fuck gentrification
Augusto Dabos	91101	gentrification is genocide
Sophia Lang	92028	This project will displace so many lower income families and individuals, maby of whom will struggle to find another living situation they can afford.
Nadia mendoza	90041	We don’t need more luxury apartments when there’s businesses and families who are going to get pushed out. This isn’t any city for these people, it’s their homes and where they have spent all their lives.
Nadia mendoza	90041	We don’t need more luxury apartments when there’s businesses and families who are going to get pushed out. This isn’t any city for these people, it’s their homes and where they have spent all their lives.
Thomasina Sanders	90039	Gentrification destroys communities
Adali Olivares	91770	With little to no public I put, no development of this size should be approved. Especially with the fact that it will affect current residence near the proposed site in regards to the negative effects of gentrification. This includes environmental impacts as well as displacement of nearby tenants.
Andrew Orozco	93550	I am a former resident of the area and have family currently living there.
Cesar Hernandez	90019	I am advocating for equal housing rights for minorities. In such a historic location such as Lincoln Heights, La Raza will not be pushed out nor be gentrified
Cindy Balbuena	90063	I used to live in Lincoln Heights, but rent got too expensive. My family, and a lot of families lost their homes. This should not traumatizes the families already living in that area by making it unaffordable. This displacement happens way too much in Black and Brown communities.
Alyssa Aldaz	90041	
Megan Miller	90042	I want the people who live there to be able to continue living there. I don’t want people to be pushed out because of a “luxury condo”
Charles Galin	90032	Bringing unnecessary spending instead of the necessary spending in the community
Stephanie Galindo	90032	Bringing unnecessary spending instead of the necessary spending in the community
Priscilla Galan	90031	Unaffordable Housing in a low income area only sends one message to the people who live there, that they are not wanted.
Lucila Caro	90065	To protect affordable housing in Lincoln Heights
Samantha	90022	I support the community not corporations.
Alex Emmons	90031	No more over priced ugly condos in East LA
Isabella Rodriguez	90032	It’s trying to erase and displace the community that already lives here.
Celeste Escobedo	90003	the culture of poc in la is in jeopardy as culture vultures that push gentrification into neighborhoods with Rich history
Maya Chen	90041	This project directly counters the needs and wants of the neighborhood and community. Los Angeles is already suffering from gentrification, and this will only further this crisis.
Jennifer	90023	The rent is making it unaffordable for many Black and Brown families to stay in that area.
Ashlianne Sharma	95747	Gentrification is bad
Dana	91321	Spend money on the people who already live in Lincoln heights; youth programs and community gardens would be a much larger benefit than an apartment that will make the poor poorer.
Orville	90042	It threatens to displace the current residents of the neighborhood.
Sharon Escalante	90033	Gentrification will ruin LA. It’s authenticity will diminish and the people living here will have to relocate and no longer have their homes where they have lived for years due to highly priced luxury apartments as such.
Daisy		Gentrification will ruin a community of Chicano citizens
Valerie Benavides	90033	This building will threaten people living in the community with evictions and could cause rent increases in the community.
Nicole Cavazos	91773	Stop the gentrification of Lincoln Heights to protect the lives of the members of the community
Alexandra Slusser-Banh	93720	

Destiny	90065	to protect our neighborhoods against gentrification
Cristina Carrillo-Dono	90063	it doesn't not support the community. It hurts it
Janelle Ketcher	90031	Development like this requires community input
Sylvia Ramirez	90031	This housing is not for our community and will only serve to displace us.
jasmine martin-partovi	90089	
Eireann O'Grady	90027	No community input
Carolina	90031	Because it's my neighborhood and we should be ask if it's ok to build something so big somewhere i was born and raised.
Steve	90031	No gentrification
Justine	90032	I believe that people should not be forced out of their neighborhoods by greedy developers!
Jazmin soto	90031	The cost of living will go up, and the middle class can't afford.
Thalia	91107	Gentrification is violence
Ellie Butler	93953	
Olivia Caplow	90039	It's just enough already. Not only does it displace human beings... it's super ugly. "Ugly" doesn't even suffice as to how much of an utterly oppressive eyesore this building is. Also are we this deeply incapable of reading the room? Does now really seem like the appropriate time to build a truly hideous slop of "luxury apartment living" when pretty much the entire country is unemployed in the midst of a global crisis/pandemic? Not to mention a major housing crisis that literally has been screamed about on every news media....Thank you but, absolutely no thank you. Ps. Who gave these architects a degree.... this schematic is trash.
Monserrath Resendiz	90023	Gentrification leads to displacement of the community members. I oppose this project because it'll harm the working class community of Lincoln Heights.
Rebecca Lopez	91801	It will displace the residents of Lincoln Heights and the new residence will not house current residents of Lincoln Heights due to it being unaffordable.
Anna Sanchez	92139	
Esmeralda Dimas-Perez	90033	I oppose to this project because I do not find it fair, that the council didn't try to make it public.Also many people will be kicked out and lose their homes, all for money.We need to let their voices be heard and they will be.It is really unfair.Many people might end up homeless.
Adam Verdugo	90029	Because the building threatens the lively hoods and businesses in Lincoln Heights
Anthony Johnson	90007	It's gentrification and it is trying to erase the community
Emily Connor	90029	This is exploiting the neighborhood and pushing out a community that has been there for a very long time.
Gena Salorino	90031	We need affordable housing not luxury housing
Kristine Escobar	90065	The project threatens the families and communities that reside in the area. This leading to a domino effect whose ending has potential to be catastrophic for some.
Raul Cordova	90031	It displaces disenfranchised people in need of affordable housing
Emily Campos	90002	We need public housing in Los Angeles, not luxuries apartments. The culture of the community does not need to be changed.
Steve Abee	90032	It doesn't fit the neighborhood in terms of needs and design. You need housing for the people. Not the wealthy.
Grace Gallagher	90020	Displacement is wrong. Everyone need the right to affordable housing in their neighborhood
Asya behram	90026	I love Lincoln heights we do not need another huge developer coming in.
Scott Williams	90031	This is not affordable housing. We have enough luxury housing.
Axel Hernandez	90031	It is not being built in correlation with the wants and needs of the neighborhood!
April	90023	We need AFFORDABLE living not expensive gentrifications apartments that the community can't afford.
Nicole Y		
Kassy	91342	It is not fair to the people living in this community.
Vanessa M. Peralta	90032	I disagree with the displacement of minorities who have called Lincoln Heights their home for practically their whole lives. I would like to see change for the established community members currently living in the area instead of bringing outsiders from other areas to these "affordable housing" projects.
Marta G	90031	we dont need luxury apartments in our neighborhood, but more parks, other recreational stuff for the families already residing in LH
Emily Schkolnick	90064	Preserve the diversity and integrity of our neighborhoods. Fuck predatory landlords and developers who are only after a profit and are destroying the cultural fabric of our city, exacerbated even faster by the COVID disaster.
Olivia Giron	90042	i hate gentrification.

Vanessa M. Peralta	90032	I disagree with the displacement of minorities who have called Lincoln Heights their home for practically their whole lives. I would like to see change for the established community members currently living in the area instead of bringing outsiders from other areas to these “affordable housing” projects.
Diana murrieta	90023	Lincoln heights is not a place for luxury apartments that will only end up displacing the people who’ve raised their entire families in the community.
Jonathan Sandoval	90031	In my defense and experience living in Lincoln Heights, the volume of traffic will increase, given people commute towards downtown direction to avoid freeway traffic. Pasadena Ave is not wide enough to act as a commercial street. Also as a whole neighborhood we need more affordable housing that matches incomes with peoples wages.
Sammantha Rodriguez	90033	Lincoln Heights is a historic community. If the people who have lived here for YEARS can’t afford the rent then why build it ? Why up the pricing of housing that can be used for people who want to live close to their parents ? AND WHY is the advertisement only have yt people ?
Ava	90065	
X	92704	Building luxury apartments in a largely POC inhabited neighborhood in no way considers the context or the people living there. It will directly misplace hundreds of families in favor of creating more unaffordable luxury housing and further raising property values to unattainable heights. The proposal of this project is disrespectful and inconsiderate.
Katherine Gutierrez	90033	People over profit ! Not profit over people ! Gentrification is a racist act !
Cassandra Gutierrez	90031	
Jazmín García	90031	Para proteger nuestra comunidad
Miles Kantner	19607	
Mikalia Rhodes	92058	Historical reasons and I don’t believe the current residents should become eventually homeless over some unnecessary building development. Let people be!?
Keith b3	90006	Displacement of low income people in our communities is not acceptable! Gentrification is the biggest disgrace to all our communities. We pay our taxes just like everybody else but when those taxes dollars finally start to make a difference in our communities and in our streets the people who live in these communities get pushed out to make way for the richer. Why should I pay taxes if the minute that makes my community a nicer place to live I am forced to leave and suffer again in order to make way for the more affluent people who have no connections here? We all deserve a place to live and we will not be pushed out!
Jasmine Guerrero	90065	As a homeowner in this neighborhood, I am vehemently against the displacement of families of color in the name of profit for greedy developers.
Zach Fraser	91108	Value the integrity of current residents city.
Angelina cruz	90032	Gentrification will not be permitted!
Lukas E Medina	90631	Build affordable housing for the people that need it the most.. luxury apartments are destroying the communities and culture that makes LA beautiful... Invest into your people... Not rich yuppies that come from other states and gentrify the community.
Isabel Ortiz	92703	
Kharis O.	90031	Our community doesn’t need this, it pushes people out and erases the history of the neighborhood.
Mia pedroza	91706	Peoples homes
Emily	90031	Because gentrification has displaced a plethora of POC and is a huge problem in our community
Noemi G		Lincoln heights needs affordable housing
Kaylee Abad	90033	I think this project is unethical and corrupt.
Evan Main	90031	As a citizen of the Lincoln Heights area, I want to protect my community by keeping development projects away from the neighborhood. It’s a class warfare action out to displace working class people.
Zyanya Blad	90006	Because FUCK gentrification/ FUCK this stupid high end apartment, BUILD AFFORDABLE HIUSING FOR THE COMMUNITY
Karina Vargas	91342	we don't support gentrification in this house
Dylan Agra	90004	
Megan Spatz	90031	It is violent gentrification and will result in long term damage to Lincoln Heights residents. We need to keep the neighborhood affordable and accessible to the community that already lives there
Marcus	92806	Gentrification sucks
Diana Pena	90014	Because luxury apartments are not affordable to everyone and it causes a lot of gentrification and displaces so many people. Look at what happened in DTLA this should not happen again!
alyssa	90033	gentrification, nobody thinks about the people who have grew up here & know this as home.
Frank	90012	The idea that the development of a property this big and neighborhood-/city-altering could go forward without a forum for residents to voice their concerns, objections, and needs is absurd and a gross overstepping on the part of councilmember Cedillo (my councilmember)’s duties in representing their interests. It’s that simple. These plans plainly serve special interests and capita over those of the people of Lincoln Heights and all Los Angeles. I fully support these demands and call on City Council to follow suit.

Andrea Gutierrez	90032	Most residents in the neighborhood will not be able to afford the increase of rent and will lead to more homelessness
Andrea Gutierrez	90032	Most residents in the neighborhood will not be able to afford the increase of rent and will lead to more homelessness
Christian Arcos	90032	
Leslie nova	90032	
Brennah	90042	This development will negatively impact local residents and communities.
Shaden Martinez		Creating this luxury building will add to the gentrification of the city of Los Angeles and slowly but surely push out those who live in poverty who can not afford to live there.
Cecilia González		I oppose this project because it is a direct representation of gentrification; those apartments are not being built to house residents of color in Lincoln Heights who are already housing-insecure. They are being built to serve white gentrifiers who will only displaced locals and make housing further inaccessible.
Kevin shiramizu	91001	As a former resident of Elysian Valley, I was priced out of my neighborhood luxury developments, along with many other residents. Our city needs affordable housing where people can live. Not investment properties for wealthy to sit empty often as Airbnb units and overpriced rentals that so few in the community can afford to occupy. We have plenty of that trash in LA already and Lincoln heights doesn't need any of it.
Camille	90065	
Daisy lara	90042	Not right
Crystal Quinden	90031	Lincoln Heights is home to many working class immigrant families that have been here for generations. A luxury condo would price out many of these families that have kept this neighborhood alive. Please protect the natural landscape of our home and rich culture of our community. For the well being of the people of Lincoln Heights, you cannot let this project proceed.
Jorge Plascencia	90031	The community belongs to the people; not to the selected few.
Sarah McIntosh	90013	No more NIMBYS
Emily RUIZ-CAMACHO	91744	Keep gentrification out of Lincoln Heights.
Daniela Lozada	91506	I grew up in Lincoln Heights, attended Lincoln HS and even though I lived a neighborhood away, (Cypress Park) this displacement and gentrification is enough! How many times will wealthy people profit off of hard working low-income families? Mainly Latinos? This is absurd and insulting to all the people that have lived there all their lives claiming to "help them" with "affordable housing".
Jenny		
Kerrie	90042	The community already living here deserves to decide whether or not something of this magnitude is allowed to forever change their neighborhood
Antonio Ramirez	90023	FUCK COLONIZATION
Jacob Solis	90065	This building is a threat to the community and is a physical manifestation of political corruption and greed.
eleanor	93105	anti gentrification. housing will be built and no one will move in because the original residents will not be able to afford it
Nico		This development isn't for the residents that have BEEN living in Lincoln heights, it's for the developers and gentrifiers that make coin from displacing those working class black and brown communities. This shit looks ugly. It looks violent. It looks like blades and surveillance and it should stay the fuck out of Lincoln heights.
Asia	90043	Gentrification
Colleen Canles	90041	Stop displacing low income families with luxury apartments
Minh Lam	90031	If we can't afford the apartment. It shouldn't be built.
Esmeralda Guzman	90063	our community is being changed, the rent isn't even affordable for the working class so why build these shits. This will affect our surroundings making shit even more populated
Mya	91030	
Marina Bermudez	91406	This is gentrifying our beautiful Lincoln Heights and causing high risks to the community itself.
shayda milani	90042	preserve the neighborhood stop gentrifying everything please for the love of god
Jenny	90031	I am opposed to gentrification and the displacement of families and individuals who have lived in Lincoln heights and have been part of the community their whole lives.
Darline Lopez	90031	I support low income housing and do not support gentrification.
Frida Gonzalez	90255	Gentrification is harmful towards working class communities.
Bora Lee	91030	Because gentrification is VIOLENCE
LAURA DE LA GARZA	90031	El public de Lincoln heights no quiere este proyecto. En estos momentos necesitamos proyectos que apoyen a las personas de ingresos bajos and a las personas mayores de edad

Sivan Silver-Swartz	90012	
Reymundo	90012	Because Gentrification is Genocide.
Jacob Gutierrez	90041	I do opposed the gentrifications of Los Angeles
Alexandra Gas	90031	Lincoln Heights is defined by it’s community and diversity. Keep Lincoln Heights a safe haven for them.
Nydia Garcia	90026	This isn’t gonna be an equal housing opportunity for the people in the community & homelessness is really high
Raquel Puerto	90031	Gentrifying continuously displaces people of color
Emma Bradford	90031	Stop displacing residents!!!
Jamie	90018	people cannot afford high rent
JENNIFFER Davila	90650	Don’t displace communities that have been there for ages. The fact that they did not inform any of you guys just shows they do not care about the middle class and below.
Aned Martinez	90033	Because my community is not ok with this and the community matters
Edson Escoto	90029	Because it will not benefit the community only drive out residents and erase the identity of the neighborhood.
Marisela Calvillo	90031	It’s pushing people out of homes
Alyss	91801	In a city where fair and affordable housing is hardly available, we don’t need more “luxury” apartment buildings. We need AFFORDABLE housing. We need to reject gentrification and allow low-income native angelenos live where they have been born and raised. Save these people their homes. They are the reason neighborhoods like Lincoln Heights and Highland Park are considered cool and are some of the most sought after neighborhoods to live in. Gentrification is inhumane.
rebeca g	90033	gentrification is violence against the people who reside & occupy lincoln heights.
Moises Duarte	90031	UNNECESSARY, LEAVE LINCOLN HEIGHTS THE WAY IT IS.
Carolina	90032	Building “luxury” buildings will bring in affluent folks, pushing out those who have been living in the community for years. It will ultimately add to the gentrification within Lincoln Heights, making the area financially difficult for low-income families.
Sayah	90032	this project will displace low-income families already struggling to survive in their community.
Alyssa Dancel	91606	My neighborhood of North Hollywood (5minutes from the Arts district) has become significantly gentrified over the course of my 21 years growing up here and I would HATE for anyone to be displaced from their home areas they grew up in. It is sad and UNBELIEVEABLE.
Jazmin navarro	91765	It is Inhumane to displace residents that belong to the community. It’s important to cater to the existing community, making sure they are heard and their needs are met!
Robert Z	90004	I'll seen my neighbor get affect by this 'luxaruy' complexs that hard working, low social-economic class people can't afford. It is unfair that the rich can come and displace whenever they want. Enough is enough. Hard working people deserve better. Not the rich.
Jennifer Ayon	90031	Protect our community
Bree Tomás	90026	Gentrification is modern colonialism. Stop displacing people for profit.
Lisa Chen	90024	Homelessness is one of the biggest problems in Los Angeles despite there being plenty of vacant units. With COVID-19 exasperating these problems, it is unethical to continue with this project and further gentrify Los Angeles.
Natalie	91502	Gentrification is a horrible and negatively impacting the citizens, rather than helping
Amy Ludwig	90042	This is luxury housing that will not serve the community. It should not have been fast-tracked.
Citlali	95117	We must fight back against gentrification always
Angie Soto	90031	I oppose to this project. Lincoln Heights is predominately a Latino, asian, and recently black community with low income families. Hard working families live in these areas for a sustainable living and we shouldn’t gentrify our communities to make it seem more “luxurious” especially during a pandemic. Rent would go up, and the families here shouldn’t be the ones in charge of moving when we have been working and living here for a long time. Gentrification is a huge problem for low income families because we barely get by as it is, and want to make it seem more attractive to people who can actually afford other luxuries. Please, put an end to unnecessary luxuries, people are living here and do not need more people put out to street and move to places where we cannot afford rent.
Andrew M	90022	I don’t support gentrification.
Justine Estrada	90031	
Theresa Lopez	91601	LA has way too much luxury housing not to mention our homelessness crisis! We need to stop gentrifying our communities by tearing them down and replacing them with complexes no one can afford or live in
Ian Vargas	90065	It will exacerbate the continued displacement of working class residents of Cypress Park and usher in gentrification pushing more of the neighborhood out of their homes.
allyson garcia	90022	i oppose gentrification
Jessica Herrera	90042	The people of North East LA deserve better than a man like Cedillo who is ready to kick us out onto the streets for profit. We demand better than this. This is our home.
Elvira Gil	90031	It's gentrification!!!!!
Tshering	90042	Because it very shading passed by someone who is not hearing the need of his citizens

Charlie Kanter	91302	Oppose illegal evictions and to stop gentrification in Lincoln Heights
janelle yanez	91605	because fuck gentrification
Alexander Fraser	90039	Gentrification and the development of LA has to slow down.
Fernando Diaz	91702	This petition is not a request. It's a Demand by the 30,000 residents of Lincoln Heights for Gil Cedillo, Pinyon Group and LA City Planning to face the People who will be affected by this project for the rest of their lives. A 468 unit Luxury development at ave 34/ Pasadena Ave is a threat to our health and well being. Gentrification is violence on Lincoln Height's working class (19%) Asian and (77%) Brown brothers and sisters. Lincoln Heights is the oldest most historically diverse neighborhood in LA and residents have had to endure generations of racial inequity. 77% of Lincoln Heights residents are renters - the majority with a median household income below $30k a year. We have the lowest home ownership rate in LA at 23% from historic redlining, discriminatory bank lending and racist deed covenants. Why aren't we being included in the dialogue? This housing is not for our community and will only serve to displace us. This is the largest development in the history of Lincoln Heights and the community was never informed or included in the conversation. Lincoln Heights neighborhood council was bypassed and never approved the project. The city approved this by fast tracking it during Covid-19 and the City Hall Pay-to-Play scandal. How do we know the politicians and developers weren’t doing back door deals on this project? Is it ethical for City Hall to push a project of this magnitude on an already suffering community thats currently being illegally evicted and displaced? Neither the city, the councilman or the developer facilitated a single conversation with the public for the biggest development in the history of our neighborhood. City Planning went ahead and approved it. We demand transparency from our elected officials and a seat at the table regarding this new construction. This is the year 2020, not 1940. The people of Lincoln heights demand to be heard. This is part of a long trajectory fulfilling City Hall's agenda to displace and erase our community.
Grace Haggerty	90042	We need affordable housing, not luxury developments that will increase housing prices and displace current Lincoln Heights residents.
Zoë Takaki	90291	Fuck gentrification
Leslie	90031	doesn’t serve our community any good, it’s not helping the community members in anyway
Kristian Cardenas	90031	Not enough affordable housing. No CBA
Gresia Fernandez	90033	This is the first step to gentrification
Clara Keane	90041	The people of Lincoln heights deserve to be and MUST be heard and taken seriously! Especially during the current pandemic, when millions of people have lost their jobs, fallen ill, or gotten illegally evicted, NEIGHBORHOODS LIKE LINCOLN HIGHTS, and their CURRENT communities, MUST BE PROTECTED AND PRESERVED, not put at even more risk (by greedy developers, rent gauging, and gentrification) than they are already facing.
Rudy Hernandez	90033	Because gentrification is not okay. Those buildings are pushing out our community so that the middle class can move in. We already have enough gentrification going on with the USC Medical campus, so we don’t need anymore gentrification.
Brandon Mensah	90025	It’s a lack of care and shows priority of expanding land for profit more than the lives of the current human beings currently residing in that area.
Terrence Robinson	90041	Stopping cultural genocide.
Khristine Camarena	90033	Because it erases the community.
Nancy Esparza	90023	what they're doing isn't right
Conor	93108	gentrification is destroying our communities
Carl Cortez	90033	
Abigail Vasquez	90706	FUCK GENTRIFICATION BITCH
Paulina Casas	90075	Creating new apartments for the rich will not benefit the community, if anything this will hurt and damage the community. Most cannot afford to live in the condos you are building and this condos will just increase the price of rent and housing which will leave many with out a home. Create ADFORABLE HOUSING for those life long residents not for rich people.
Grace Miller	90042	this is not what is best for community
Samantha Ricci	92116	
Ernesto Lopez	90065	Gentrification
Ana Godoy	90280	Although I do not live in Lincoln Heights I work in the Eastside with high school students who attend Lincoln and Wilson High School and have heard from them first hand the struggles their family has endured to make ends meet to pay for rent. This project does not improve the current residents or housing crisis that exist in LA. Community input needs to be taken into account and there needs to be access to affordable housing for the current community in Lincoln Heights. In the wake of a global pandemic housing security is on the rise so I urge you to listen to the community most impacted by this project and find solutions to support renters during this pandemic.
Izzy	92805	This project will be taking away an opportunity to build affordable housing for those in need who cannot afford a luxury apartment. It is useless and won’t provide anything to our community. It will sit there unused while people are out here on the streets because there are no affordable places to live. I will be living two cities away from my college because I can’t find a place cheap enough to live nearby. It is insulting that I have to go out of my way to be able to have a basic necessity taken away from me because a few rich people want to have a luxury apartment. Eat the rich and f**k them.

Katelyn Vasquaz	90640	
Stephanie Ramirez	90033	They are gentrifying my community and hurting the livelihood of hundreds of locals.
Jerylee	90033	Gentrification is classist, racist, and evil. I do not stand by letting rich white people modernly colonize the hood. It happened before but it won't happen again.
Ruby	90029	
Oliver Bentley	90017	I oppose the gentrification and displacement of the community, especially for the sake of a luxury condo amidst a pandemic, recession, and housing crises.
Isaac Mendoza		The intentions of these buildings are not to support the community that resides there, but to drive them out.
Aimee Alvarenga	90026	These luxury apartments are not representative of community wants or needs. They do not represent the best interests of the community, which the apartment buildings will be inaccessible to.
Lucy CapittiFenton	91401	Displacement for the purpose of gentrification is horribly wrong and hurts the lincoln heights community that should be protected.
Katherine Salvación	90018	This neighborhood needs to remain preserved. Keep this gross building and the people that will come with it out.
Megan Purdome	90041	Development without communication with the community is inherently a threat to the community. While any such project is threatening, the very least the city can do is offer clear and direct communication and collaboration. Neighborhoods must be protected for the people who live in them.
Peter	48104	
Loucin Chrikjian	91304	It will displace thousands of low income poc, mainly of the Latino community, whose existence in Lincoln Heights is crucial to Los Angeles and it's vibrant culture
Abigail Perez	94066	Gentrification is evil and selfish. Low income families will only suffer more and I will not let that happen.
norma	91776	Gentrification is harmful to those already struggling to live there.
Christina Solis	90032	This project would become the reason low income families that have lived in Lincoln heights for generations to become displaced from their homes
Jonathan Casella	90021	If LH needs anything it's affordable housing; the last thing it's needs is this vulgar dormitory of greed and exploitation.
Kyla Langotsky	90024	This type of development should be illegal. Without discussing with the community, you expect to destroy them. Dialogue is a necessity, but also consider how wrong creating luxury housing in a Lincoln Heights would be — you would end up displacing and leaving homeless hundreds of long-term residents as rent prices skyrocket. No more gentrification. Move along.
Vanessa Casas	91801	
Chloe salem	91423	
Helen McColpin	91001	Luxury developments hurt the community. No gentrification!!!
Jordan Schmid	93534	The last thing anyone needs in California is unaffordable housing in a gentrified neighborhood full of rich and obnoxious frat boys/entitled elitists, to push out the poor&disenfranchised communities to other corralled ghettos
Romelyn Gutierrez	90004	I am against gentrification.
Donovan Ramirez	90039	It's a form of neo colonialism that attempts to displace already struggling communities. Put more money into preserving the neighborhood instead of trying to replace it. These same gentrifiers speak down on us POC all the while exploiting us and our cultures altogether. I'm not down with this.
Sade Obi	91791	im sick of gentrification
Aurelio Barrientos	90032	Higher rent
reyna	90063	it's not right!
Christina m	90023	It contributes to the displacement of marginalized people!
Joey Young	91106	It's not considering the wants/needs of its community members
Cecy avila	90065	Leave our city alone! We don't need your shit.
Frances	90032	This building will add to our problems! It is not for our community, made up of THE WORKING CLASS. Unaffordable and will only encourage the rest of the community to be wiped out!!!!!
Adrianne S	90041	
Lizette	90032	Lincoln heights needs to remain affordable for those who have been living there!! No new homes!!
Jose	90032	Further displacing residents, will not help. Building a luxury complex, will not help. We need to take care of those within the community. This is not the way to beautify the community.
Sofie Armine Dreskin	90041	Gentrification is violent! Los Angeles needs affordable housing and canceled rent not luxury condos.
Emily M	90031	Gentrification is wrong!

Lynn Rivera	90065	With homelessness being a rampant problem throughout Los Angeles this will only make this issue worse for our neighborhood and those who have built this community. It will create unnecessary congestion through the building of the project and adding of additional residents to the area. We need affordable housing and this is not the answer.
Cristine Murillo	90031	As a local Lincoln Heights resident, I can attest that Lincoln Heights does not need luxury housing but rather more low income equal opportunity housing. I do not support the gentrification/uproot of the local community.
Tom Amsbry	91104	it will increase rent and the price of goods and services in the Lincoln Heights area, further gentrifying a neighborhood that is already seeing displacement of low income families.
Kyla	90068	threat to our health and well being
Tuliese Ioau		
Sam Horn	90005	Lincoln Heights, and Los Angeles in general does not need more luxury housing. We need affordable housing that does not break up our communities. I live next to a construction site for a luxury development and it saddens me to know that the city does not care about its residents, just lining the pockets of a select few.
Jeanette Martinez	90031	because middle class and lower wouldnt be able to afford this plus this doesn't fit into our community
Uriel	90031	We dont need it. This only raises rent for those who are already apart of this community. This will slowly kill our community over time.
Kimberly Lara	90042	I oppose this project because the community will be affected by this project for the rest of their lives. Building this development is a form of gentrification, which is a form of erasing our community and placing violence on us. It does not better the community, but only destroys it. Additionally, it is not needed for the community and will only serve to displace it.
Christian Gutierrez	90280	
Oskie Mignon	90040	Keep large projects out of small communities. This will displace current residence (mostly of color) in favor of rich white folk and distort the current Latino culture that thrives on that area.
Natalie Mercado	90039	
Ashely	90032	Why take without asking
Adriana Soto	90031	We need more affordable housing for the people in our community; no to gentrification and the displacement of the people in our community.
Ashley Hernandez	90031	NOT GOOD FOR THE COMMUNITY
Andrew Lujan	90032	How about fixing the issues in our community first, before inviting others in. We have bigger issues at hand.
Johnny Hinojos	90031	Bad for the community
Alexandria Villarreal	90660	It’s detrimental to our neighborhood . build it in Beverly Hills
Gwyneth	91024	A 468 unit Luxury development at ave 34/ Pasadena Ave is a threat to our health and well being.
Gerard Mellini	90022	It was fast tracked during a corruption scandal. The community does not need to be gentrified and have renters displaced
Erin Espana	90002	
Lidia Bressoud	90032	This does not serve the working class BIPOC community that has been living and residing in Lincoln Heights. This “project” is meant to erase and displace the diverse working class community. Lincoln Heights says NO to gentrification.
Carla Majano	91502	I have family that still live in Lincoln Heights. We need to support our community whether we still live there or not , we need to be the voice for those who cannot speak up.
Kimberly Delgado	90303	The project is spurring more gentrification and displacement. There is no room for displacement during the course of a pandemic. Furthermore, this will disrupt the low-income communities /residents of Lincoln Heights.
Brenda galan	90031	Because this is something that should be done to help Communities , make these for low class working not for wealthy people to come and take what we have worked for to keep as ours .
Justin Ruiz	90042	Because FUCK gentrification
Irma Sanchez	90031	It will bring increase cost to living and begin to push those who lived in the area for years out.
Kia raab	91024	
Isabella Granados	90022	This project would bring white folk to the hood raising the rent for the long standing residents eventually driving them out. Gentrification erases communities of color. Gentrification is genocide.
Helen Alonzo Hurtado	90019	While I don’t live In Lincoln Heights, I work in this neighborhood and I oppose this project because it will displace my students and their families. We do not need more luxury apartments, we need and demand affordable housing. The majority of luxury apartments are sitting empty in this city while families are struggling to find a place to live. It is disgusting if our city council allows this project.
Skylar Echard	91030	Stop displacing residents from their homes to build luxury apartments they destroy neighborhoods!!
Michael Caballero	90032	it will increase gentrification creating a dramatic increase in property values and create more property taxes for people who may not be prepared for that putting people out of homes and forcing renters to be displaced

Alicia Miyares	90065	ITS NOT EQUITABLE
Leticia white	90042	You are running out good restaurants and other people’s homes! No need to do this! Leave the neighborhood alone
Iris Jill Aranda	90027	Because it'll hurt the community and it'll displace families.
Shirley	90031	The community will be affected so as my family.
Candelaria Morales	90004	You can’t move the people
Marco Covarrubias	90065	Because this land must be used for affordable housing at minimum
Devin	91504	Gentrification is a horrible thing and we need to keep our Latin communities in tact so they can enjoy the place they’ve always called home in peace.
Vincent Acuña	90031	Because we don't need Gil's disrespectful neoliberal policies affecting our communities and opening the flood gates to displacement via gentrification. If he wants to represent well off whites, go run for a seat in West Hollywood. He doesn't represent us and never will.
Donna Tran	90011	This is extremely harmful to a community of low income, working class folks who need affordable housing. Many of them have built a legacy spanning generations in this area. Building more apartments with NO rent control does not help the community. Instead, it will lead to more families homeless and jobless.
Joanna Ruiz	90022	Gentrification is not the answer.
Isa R	90716	This project will affect so many people living in Lincoln Heights. Gentrification ruins lives !
Majadi Patterson	90301	
Paulina curiel	90039	It will raise rents for the community and force people out. This “luxury” project is unaffordable to the existing community so why put it in their home? Go put it in a higher income area where its not a burden to people
Miguel Munguia	91331	Gentrification displaces people of color and this will negatively impact the people who reside in this neighborhood. We need more affordable housing in Los Angeles, not luxury condos.
Jessica brooke touchstone	32533	I used to live in LA. Regentrification is happening all over the US and while it may boost the economy temporarily it is a permanent issue on the citizens living in the area. We do not need high rise apartments for the masses but rather a boost to the local locavores in the area who work tirelessly to build their own environment. We do not need Starbucks and McDonald's along with apartment complexes. It creates a complex to the citizens who have long lived in the area. We need local support, mom and pop stores, and the beautification of the area - I'm talking parks, farmers markets. Etc. Its not about the bigger and better, but rather qualifying then quaint.
David salazar	90026	For the preservation of the existing community and culture that resides in Lincoln heights, it must remain there as it is the way the people enjoy it
Alec Reyes	91016	
Allie Kiekhofer		I am a lifelong LA resident and have watched countless LA neighborhoods be consumed by gentrification by way of luxury housing, which destroys existing communities people en masse into homelessness. Lincoln Heights must not suffer the same fate. Especially during an unprecedented pandemic with mass evictions looming and no affordable housing or contingency plan in place, greenlighting this project is not only irresponsible but actively racist toward working-class BIPOC Angelenos who have made their home in Lincoln Heights. I wholeheartedly oppose the 34th St/ Pasadena development.
Kristina niessner	90041	Gentrification
Kimberly	90005	Community members needs must be ensured over luxury development projects.
Edith	90875	We don’t need luxury housing now, we need affordable housing now ESPECIALLY because of the pandemic. So many people are going to be evicted, this project lines greedy pockets and doesnt help the people.
Carlos Carmona	90031	It will skyrocket rent in the surrounding area, causing low income, hard working people too vacate because of high rent.
Andres Montesinos		I have suffered gentrification once before and I can say that it is no a fun ride
Victoria Trinh	90020	It’s displacing folx who’ve been living there. It also isn’t a project that was asked for by the people!
Darcy Bartoletti	90031	Because Los Angeles is unaffordable to live and it’s getting worse.
Sara Horn	91403	
Stephanie Hernandez	90017	No gentrificación!
Emily	90034	fuck gentrification!!!!
Rosa	90255	Gentrification affects the lower class community in a negative way.
Juan Lopez	90003	Gentrification
addie	10011	
Nat Tereshchenko	90004	This community needs affordable housing, infrastructure, and economic support NOT luxury developments that will further exacerbate the housing crisis. Developments like this are DESTROYING communities
Erica	91344	

Cristian Ramirez	91711	Because community matters
Lily James	90068	It promotes gentifrication in Lincoln Heights.
Kyla Gelev	90004	I am against the unlawful eviction of people and also gentrification for the benefit of white people and businesses that do not care about the communities they are destroying in the process of gaining wealth.
Jack flores	90065	We need more affordable housing projects for locals to move out on there own and the ability to stay within the North East Los Angles area.
Kevin Chu	90012	Gentrification displaces working class communities and encourages people who do not contribute to the local community to come through and wreck it bc it is "trendy".
Yvonne Gavriel	90042	Projects in communities are suppose to help and benefit the people who have been there. The establishment of this building will only affect the community in a negative way! The building will displace families and possibly leave many others to face homelessness. How is this building positively contributing to the community? Who can afford to live in this building? Why is this project being left in a dark room, these injustices need to be stopped and shined a light on.
Jake Peters	91776	No gentrification
brandy alvarado	90065	This would be displacing so many people who have lived in this community for years. Lincoln Heights was my home for 8 years and I know it is a community for the middle class families. Do not take this from them. Stop displacing our people and separating FAMILY.
isabella jacobe	91203	
Briana Rosas	90042	There's a homeless crisis in LA county, and there are families that need affordable housing, seniors need affordable housing, immigrants need affordable housing, and college students. Stop building luxury housing for the white and rich. Serve the community.
cyndy	90042	because it is gentrifying the neighborhood.
Danni Fry	90033	Yes do not build this monstrosity
Yajaira Villarreal	90031	Because I live here and I fear displacement
Lauren Garrett	90025	Because people shouldn't be displaced during a pandemic! Where will the residents go when the rent inevitably rises because a gigantic corporate housing unit has taken up abortion of the community.
Jay	90012	
Zion	90032	gentrification is 21st century colonialism
Sabrina Herrera	90031	We don't need more unaffordable housing in Lincoln heights
Angela	90031	
Enrico Cortes	90057	Longtime residents will be displaced from their homes. Rent increases to the area will result in a large amount of illegal evictions and many elderly residents will be forced on to the streets.
Leslie Santiago	93550	I am currently not living in Lincoln Heights, but I used to live in Cypress Park up until 2016. The reason I live in Palmdale now is because of gentrification efforts and building projects like this one. I know what it is like to be displaced; I have experienced it first hand. Being displaced from your own neighborhood that you grew up in is not what these residents need. They don't need luxury apartments, and they don't need 3 years of construction across their streets. They need to be heard. It is bad enough many of them have to live near very polluted areas (freeways, factories etc). Construction will only release more toxins into their communities, and they don't need that. Disturbing the community and the natural life that has setting it's roots for years and years should not have to be a sacrifice for luxurious apartments that won't benefit the residents of Lincoln Heights one bit. Bringing out the toxins from the ground will further put this community at risk. If this project happens, your new tenants will not be suffering... it will be the Lincoln Heights residents who have built their lives here who will have to bear the lower end of the rung. Not only will this project inevitably displace residents, but it will affect their health severely as well. Don't pass this project .
Priscilla	90021	
Blanca Rodriguez	90031	I am a resident of lincoln heights and im scared of getting displaced
Belen	90032	
Claudia Guzman	90031	New project equals gentrification. The goal is for affordable housing for low income families.
Erbey Pineda	90031	As a low income person creating these luxury apartments will only kick low income families from the area. It is wrong that they Latinos, Hispanics, and African Americans as pieces of meat.
Luis Landeros	91342	Gentrification is violence
lyric	90057	there are enough luxury properties in los angeles - we need affordable housing with community in mind
Jaqueline	90031	
Hector Montano-Reyes	90031	It's gonna rise the price of rent among the people whom live in the neighborhood.
Conrado Huerta	60629	No gentrification no more oppression!
Diana Betancourt	90039	This project will only provide housing to the rich. It will cause a domino effect of further increased rent due to gentrification. No one in the community will benefit from the project.
Dalia gonzalez	91104	This will drive up the price of living in this neighborhood.
Andrew Miranda	90039	We can't stand to continually see the blatant racism towards working class minorities and their communities within these kinds of actions and its time they listen to us.

Shar	91208	I oppose the project because Los Angeles is built on history not luxury apartments.
Amairani	90033	I oppose because community members are not being included. The project is not for the community! In which will only serve to displace community members.
Ezekiel Stratton		This development hurts 90% of Lincoln heights residents. This development is a blatant and obvious attempt to displace a population in a largely rent controlled area and shift demographics away from the minority communities that currently inhabit it. When projects like these, which are bad for at least 70% of the community (low income housing eligible renters) it's obvious to see that the governing entities are more interested in lining the pockets of real estate developers than the well-being of the communities they were intended to serve.
faith	91302	the people of licoln hights are here and deserve to be heard
Amanda Sanchez	90022	minorities should have a say in what they want in their communities, especially when it comes to having housing that's actually affordable
Daneyda Garcia	90031	As it is homelessness has become a greater issue for families in the community there is need for affordable housing not the opposite
Naomi Clements Gettman	90031	It is harmful to the Lincoln Heights community because it will displace the families that already live there
Oona Foley	91030	Fuck gentrification
Anahi	90031	The reason I oppose this project is because I will not stay here and watch my community disappear. A lot of things won't be the same. I say NO to these "luxury apartments"!!!!!!
Joel Martinez	90031	Bad
Vanessa López	91342	Gentrification only harms those who live in the area and either makes it harder for them to survive financially or drives them out of the homes.
Daneyda Garcia	90031	As it is homelessness has become a greater issue for families in the community there is need for affordable housing not the opposite
Briana Gonzales	90031	This will ruin the community!
Gabriel reyes	90031	Because this is are neighborhood there trying to push people out with high rents. I personally know people that got kick out of there homes or forced to move out cause there either scared no papers or don't know they rights this has to stop.
Laura	91423	Very against gentrification
Jennifer Aparicio	90031	A "project" like such does not help the community. It only allows luxury to be seen at a wider range than before. If this was an attempt to help the Lincoln Heights neighborhood, developers would work on affordable units that would fit the predominantly low income residents of the area such as the already developed, Manitou Vistas Apartments. Putting in place these units would only drive out the hard working class as it has already happened in other communities of North East Los Angeles.
Ahladini Veerina	90041	Displacement is not ok, the people of Lincoln Heights must be heard.
Jacqueline	90006	My family is from Lincoln Heights and I'm tired of rich white people colonizing every inch of my city, forcing natives out.
Diana J	90031	Gentrification and displacement are preventable, although the developers might have invested to create this project, it is not a project that is meant for the community that has lived in and created Lincoln Heights as we know it. During the pandemic the Latinx community has borne the brunt of its deleterious effects, including loss of income and fatalities. This project does not enhance our community—it violently pushes us out, exacerbating the economic burden the pandemic is already presenting. This property is an investment project at the expense of Lincoln Heights residents, there is a risk for developers and investors as our leaders you must fight for our security not external developers that will not feel the impact of housing insecurity if this project is completed.
Diana J	90031	Gentrification and displacement are preventable, although the developers might have invested to create this project, it is not a project that is meant for the community that has lived in and created Lincoln Heights as we know it. Penelope Uribe -Abee	90032	I work as a city employee at the Lincoln heights youth art center. This project effects the constituents we serve because it poses a threat to low income housing, we don't need a luxury development . Not to mention the traffic and pollution it will cause in the neighborhood
Desiree Garcia	90640	I oppose the project because I have been a member of the Lincoln Heights community in Los Angeles since birth. I was raised in Lincoln Heights.
Daviona Moore		I oppose this project because this is gentrification at its finest.
Anna Gonzalez	90606	Because it's wrong and not helpful for the community of Lincoln heights

Jacqueline Mejia	91030	I oppose this project because I am in community with people in Lincoln Heights and their lives are not being regarded with this project, in fact their lives are being blatantly disregarded and treated as disposable. It's violent and dangerous. It also is not democratic at all. The city's politicians are supposed to be working for the community not against it.
Christine Severin	90004	We don’t need another big apartment pimples! Overcrowding, years of construction, no parking, tearing down trees, close to an elementary school... the reason goes on and on. Please don’t allow this!
Abigail	90031	To stop the illegal evictions and prevent further gentrification to the community
Annie Woods	91103	It is not fair to change a historical neighborhood just to make expensive, generic “luxury” housing.
Isabella scaffidi	90015	
Yazmin	92701	I oppose the project because the community of Lincoln Heights deserves their elected officials to have their interest be a priority. That is not the case by building a luxury building that the most of the community cannot afford and again have the underserved working class be put out of their own city.
Stephanie Morales	90032	I’m opposed to the project because I feel Lincoln heights don’t need this luxury high end complex. We need affordable housing instead and help in the community.
JESSE sanes	90031	Bc it will destroy the fabric of the LH community and erase generations of culture
Kirsten	90065	To preserve the genuine charm of Lincoln heights
Jason Venzor	90007	I oppose further expansion of gentrification in beautiful Lincoln heights.
C. javier Rodríguez	90065	aside from there been homes and building already there. this will only increase the cost of rent, increase cop harassment of houseless folks and POC and contribute to gentrification of our communities.. ei. more stupid coffee shops and yoga studios...
Lonnie	91755	Lived here when for years when younger/anti-gentrification
Jose Alvarez	90031	Working class family homes should not be preyed on by investments groups.
Jonathan Maghen	91602	Affordable housing is a human right
Julio	90031	Gentrification
Andy soto	90242	Prefer to keep my opinions to myself
Mariana Romero		It would take away a school so close to the Community . It would also bring non necessary bickering when we are happy the way things are there .
Victor Heras	90033	Completing this “project” is a form of gentrification and should not be displayed in a powerful, diverse working class neighborhood. The people must have a say in such a “major” development
Sharon	91344	Gentrification leads to impoverished people to homelessness with no care.
Johnny Langan	90027	This is a disservice to an established neighborhood. Not only is this project unnecessary, it is actively detrimental to the existing community (which has already had to navigate the negative impact of gentrification). This will force families out of their homes, decrease quality of life and give further power to systems that favor the wealthy and the white. This cannot happen!
Michelle Jarmon	90065	Ask the community what it wants. No gentrification.
Martin M Gonzales	90031	we need apartments. Not luxury apartments the people who live here can't afford those .causing people who would live here leave ..we don't need rich generalized people here that will try to change our culture!
Jaime M Reyes	91104	This is the PEOPLES LAND! You’re just pushing all the hardworking people who built and worked their whole lives here for people to enjoy hard work we’ve done to survive here and for them to know no history!
Krystal Diaz	90031	This will cause displacement to many low income people in our community.
yodit	2118	unfair to the people that live there
Jasmine		This will take away from the community more than it will provide.
Lillie Campos	90032	Gentrification has no place in Lincoln Heights. Build affordable housing for its residents instead of luxury housing for outsiders.
Aaron Elvis Jupin		It’s displacing a community in a multitude of ways. We don’t need any more of these high end apartments that are not only and eye sore but also don’t provide any housing for the community it’s moving into.
Elsa Teodocio	90005	Because it is not made to benefit the people who live there or of low income. These new homes will end up forcing people who live there to move because they need to make space for construction and later will cuase rent to increase.
Corina Perez	90032	Community displacement
Amanda Lucido	90029	Because this housing development is erasing the culture of Lincoln Heights as well as the livelihoods and opportunities of individuals who have lived there for generations. It is an extreme example of negative gentrification and the fact that it was escalated so rapidly during COVID suggests that there are corrupt motives.
Molly Miller	90065	This building does not have the community at its interests
Stephen Sariñana-Lampson	90031	Project scope & scale inconsistent with community's carrying capacity.
Jose Avila	90032	I do not want this long standing and beautiful community to be erased by pure greed.

Rachael Buley	90046	Buildings like this are ruining the city
Nicole	91786	I grew up around Lincoln Heights, there's a clear sense of culture and community, and building this would put a gaping hole in it.
Ellen Connaughton	90029	I don't want to see another LA generation get priced out of an east side neighborhood
Gisselle Mauricio	90065	It will cause gentrification and bring more trash to the river
Rich Thach	90031	It doesn't help the community already there.
Zoe Peretz	90019	Let people be able to afford their living spaces! Stop moving families out
Ariel Quist Sprawls	90031	We are in a CRISIS right now for renters and low income families. Please, do not put so much money toward luxury housing. Do not let wealthy people exploit the goodness of this area. Use the space for the people who need it most right now, use it for the people of Lincoln Heights. MORE Affordable housing would be so much better for those of us living here now!
Elsie	91202	To build a building that will change the lives of MANY, the cities OCCUPANTS must have a say in these plans. We say NO to sneaky development projects that know damn well we don't want them. If they made affordable housing, you know they'd have allllll this talk. But when the city has the opportunity to build expensive housing in an area with "room" to build and make money off of, they ask NOBODY. City developers should keep NO secrets from the people living there, it makes no sense and it's not democracy. Case closed.
Francisco Rodriguez	90032	Everything can have place in this city, but not in this working class neighborhood- where low income families living there will be pushed out to accommodate white rich people
Gabey	91740	i don't support gentrification
Jessica Noriega	91723	Absolutely disgusting.
Ian Betancourt	91201	Families who've lived and strived in THEIR city for generations will be removed for the selfish act of making profit off a building that does not belong in that neighborhood.
Samantha Williams	90033	This project has the potential to displace families who make this community, and inconvenience those who would continue to live here if the building does go up
Gisselle Ulloa	90023	I oppose the project because it is important to reserve as much community history as possible, gentrification is one of the biggest problems out there for low income communities that seem appealing to the more fortunate to live in, yet instead of moving I'm homes that are already available.
Maddie Velasco	91709	This is my hometown and we need to keep the gentrification out!
Arlene Alvarez	90006	gentrification will not be tolerated in our comunidad. Before they build multi million dollar condos. Fix the community and help the people!
Charlotte Umanoff	80210	I used to live near Lincoln Heights and spend time there and there's no way in hell that this project will do anything but harm the communities that have called LH home for so long. Projects of this scale should ALWAYS require community input and not doing so is violence. NO al proyecto 🙅‍♀️🙅‍♀️🙅‍♀️
Samantha Perez	90031	We need affordable housing and the ability to voice concerns
Marlene Deras	90031	Gentrification is harmful
Brianna	90504	
victor go	90014	investing in the communities as contributed, voted and approved by the folks who live there is absolutely necessary to keep gentrification from displacing folks who have built that community.
Lucia Borunda	90003	Because gentrification is a killer
Kristen tiscareno	90011	We need affordable housing for the already residing people of this state
Lavonne Ramirez	90065	We need affordable housing in Lincoln Heights.
Matthew Flores Figueroa	90042	It is destroying the culture of diversity that used to exist in LA
Catherine	91101	We need more AFFORDABLE HOUSING in LA, not this junk!!
Georgia	90042	Because of my demographic, I am complicit in gentrification. I want to do what I can to counteract the effects of my presence in NELA.
claire gianoli	91342	i do not believe this will benefit the residents of lincoln heights
Shelby Gogreve	90042	Gentrification and disrespect to community. Will harm families and businesses.
Tess Langseth-DePaolis	90042	This project will displace Lincoln Heights residents and is a violent act of gentrification.
Evelyn R. Cornejo	90039	I have family and friends that live in this community and the more "affordable" buildings they do the more expensive it will become and they will be forced to move
Evelyn R. Cornejo	90039	I have family and friends that live in this community and the more "affordable" buildings they do the more expensive it will become and they will be forced to move

Sophia Li	90063	To fast track a development that will drastically change and rapidly gentrify Lincoln Heights without involving the community at all is unethical and will only hurt the residents of Lincoln Heights.
Pedro Villaneda	90031	Gentrification without limitation or accountability is segregation, and stealing.
Karla Guardado	90031	I oppose the project because the majority of our community rents and rent is expensive enough as it is. This will only push out the people will no longer afford to live here. It will break out community apart.
Ciaran Brown	40204	This project will only hurt the people who have lived in Lincoln Heights, some for generations. The intent is not to invest in the community but to change the community.
Julia Driscoll	22207	It will harm the existing community
Madolyn Gianoli	90033	
Matea	90039	Because what is needed is more affordable housing. This development only further gentrifies an area that needs protection from gentrification.
Lua K	90024	
Barker Thompson	90039	Gentrification ruins communities.
Nellie farrow	90042	Gentrification and displacement
Stephanie Lopez	90031	These luxury apartments will not benefit the Lincoln Heights community. I have been living here for over 25 years and I have seen how neighboring communities have been affected by gentrification and even Lincoln heights.
Anahi Gildo	90031	The soil is toxic
Guthrie King	90036	Gentrification is violent action on the longtime residents of any neighborhood, but especially Lincoln Heights. I am vehemently opposed to “new development” that excludes the current economic make up of a neighborhood.
Sebastian Lara	91502	It is racist
Miriam Gabriel	90042	Projects like these do not contribute to the community in anyway.
Robbyn caudillo	90032	Keep gentry out of Lincoln heights
Samantha	90063	
Blair Windette	90018	Luxury apartments are not good for LA. How many empty units are around the city right now? Do better for the people
Danielle Groode	91401	Gentrification harms the people and the community
Karlin Eddo	90068	It will squeeze out more affordable housing. We need more affordable housing not more housing for only the wealthy. Plus it looks terrible!
Teresa Perez	90042	Stop pushing people out of their homes
Sakkara Payne	85020	From my what I have read and researched: no one in Lincoln Heights was given a heads up about this. This happening right under the communities nose, and that, is vile. As well as all to similar to The Berlin Conference of 1884-1885. Where the European Nations broke up Africa for themselves like a pie. The natives were NOT consulted nor informed, even though they have been there decades before them. I am against Secret meetings. I am against destroying The Culture that thrives in Lincoln Heights. The Culture that has always been there, that has been fought for, that has Roots; deep into the hearts of the People. I am not a resident of California, but I was, for 5 years. I’ve been to York Boulevard in Highland Park. Seen the vast difference of what is and what used to be. The Culture is hanging on by a thread and They have the scissors. I am against Gentrification because it benefits ONLY white people, and their interest. It leaves POC and low-income families with absolutely nothing. For who? White people that ALREADY run this country? No. This is not 1885, and we are not going to allow this.
Frances	90272	We need affordable housing not gentrification!
Daniela Aviles	90031	I oppose this project because it is furthering the gentrification agenda in Lincoln Heights.
Luz Colunga	92570	The gentrification of the small communities of color must END NOW. These communities have had enough of being pushed out of their homes simply to satisfy powerful white people with money.
Denise Espinosa	90065	Unnecessary
Arianna Zamora	90063	Because if those homes are built no one will move into them and they'll keep trying to make lincoln heights into a wealthy area and the Lincoln heights we know will be erased
mae powell	94607	the neighborhood should be for the people! this gentrification needs to be stopped.
Xochi Maberry-Gaulke	90039	It will price out residents who have been living in that area for generations.
Addison King	90041	The largest modern construction project in the city’s history should provide more transparency than is currently being given. Let the community speak!
Elena Grimaldi	11237	Gentrification at the sake of people’s homes and livelihoods is not cool!!! Invest in neighborhoods / areas don’t rip them apart for a “luxury” experience 🤮
Sabrina	91803	Gentrification
Barbara	90031	Overcrowding

Teagan langseth		
Thor Fienberg	90065	Unethical
Madeleine Giles		
Eren Vazquez	90031	I oppose this project because we need to keep Lincoln Heights in tact and they’re only doing this to wipe away our people who are only trying to survive.
Saya Maeda	90041	
Saya Maeda	90041	
Katherine Delgado	91801	This project does not have the community in mind and is only focused on the monetary gains created from this development. This will not help to create a healthy ecosystem in the community and will displace so many people!
Eva Townsend	90039	I oppose development of Lincoln heights and the increasing cost of living for long time residents of the area
Grace muller	91104	
Mario Guardado	90004	This project will displace many low income and minority residents from their homes during a time of income loss and increased rent.
Gary lopez	90065	this project will be an eyesore that is an open invitation for the eradication of the culture of the people who made this neighborhood what it is.
Debbie Hernandez	90065	Itll enable increasing property costs of the surrounding areas in a neighborhood that is already in the middle of fighting gentrification
anythony	90063	i dont support the continued attempt to displace low income communities by building luxury apartments who will eventually raise the price of rent in the community
Martha Topete	90031	Lincoln heights has been my home since I was born and it cannot get gentrified
Cristabell Fierros	90031	Instead of building a condo, build affordable housing especially during economic travesties and pandemic turn out. Lincoln Heights has a high population of low income tenants and majority are elders. This also does not insure building plans, such as health codes and landscaping.
Sofía	90031	This is one of the oldest neighborhoods in LA. I don’t care about flashy new condos. What we need is a community that supports all the businesses and families along Broadway. There have been a few “hipster” places opening but they support the community, higher people in the community. But kicking people out so only the 1% can survive here is a fucking crime. At least it should be.
Marlene Arteaga	90033	
Miryam	90031	It does not benefit those living in LHts
Claire coudray	91786	I oppose gentrification of this area
Ariel Climer	90005	I have seen high rise developments go up around my neighborhood in Ktown and many low incomes families have lost places to rent. Just because minimum wage went up a little bit doesn’t mean people can afford rents $1000 higher than before. We need affordable housing.
Joshua Camacho	90031	THIS DEVELOPER AND THE CITY OF LOS ANGELES DO NOT CARE ABOUT ITS RESIDENTS!!! THIS MAN WILL PROFIT AT THE EXPENSE OF THE PEOPLE WHO HAVE LIVED HERE FOR YEARS. HOW DOES ANYONE THINK IT IS OKAY TO BUILD 500 APARTMENTS ON TOXIC POISONOUS GROUND??? THE CITY OF LOS ANGELES AND ITS CORRUPT POLITICIANS HAVE TO BE STOPPED
Madaline Nevarez	90032	
Jacqueline M Colindres Paz	91405	gentrification is not ok.
Saul Narro	90042	It does not belong in Lincoln Heights
Naomi Rubalcava Levinthal	94707	I live in the Bay Area where gentrification is an ongoing issue that pushes working class communities out of entire cities and neighborhoods. I know that this is an issue that I have contributed to, and so those of us who have contributed to the problem must do better at listening to these communities and putting their needs first. The way this project is being undertaken with little to no input from the community is incredibly disrespectful and harmful. The people of Lincoln Heights deserve to have their voices heard and listened to.
Gabriel Gutierrez	90065	None of the affordable housing units have benefited residents along with the liquor licenses approved for incoming businesses that are not in support of the community. Adding this luxury development is antithetical the health and wellness of Lincoln heights and the surrounding communities. Gil Cedillo has ignored his constituents and continuing forward with this will continue proving cedillo supports developers, not residents.
Leigh Marks	90031	the rent is too damn high in this neighborhood already.
Yanet Lopez	90031	Because it’s not fair to cultural history.
Vanessa Duran	90042	I am against the gentrification with a 468 luxury apts to the city of Lincoln Heights, jeopardizing the community with majority of members being minority and unable to handle the gentrification ramifications to the city.
Bella Bilandzija	91001	Stop removing people from their homes. This will only create more division. Listen to your fellow people.
Dylan Sanders	90042	Corporate development destroys the historical culture of Lincoln Heights, leading to more homelessness & poverty of already marginalized communities
Daniela Hernández	90023	We must stop displacement of Lincoln Heights residents! Luxury apartments are not wanted or needed; we need more affordable housing to address the needs of our community.

Laila Jaffer	91106	Luxury apartment buildings have no place in East LA with the city's current housing crisis. We absolutely have no capacity for this kind of development right now, especially with so many current residents in need of such different resources due to Covid & income inequality.
Alana Bradley	90031	The economic recovery that lies ahead post-pandemic is long and fraught. This development will not pump money into our neighborhood, but into the pockets of investors, management companies, and developers outside this community. We can certainly have nice things without eroding the economic foundation of our most vulnerable people. Start developing with the current community at the forefront.
salla	91104	
Alexandra Brown	90065	We need affordable housing for the community. No luxury high priced units at all should be built here!
Alessandra Okuma	90063	I'm against gentrifying our communities
Pedro Gonzalez	91770	Time and time again, new "developments" tag along with increased rents and erasure of culture and history. People will be forced to move out of their community and potentially into the street. By the time this project would finish, working class families will already be hit with, what we are already seeing, mass unemployment and economic recession.
rudy f	90007	we need to protect local communities !!!
Kelsey Aloise	90042	We need affordable housing, not fast tracked luxury condos with zero community input!
Joell	91791	For the people that have been living there for years
Tommie Leon	90037	It's going to damage the community that has been there.
Nicolas Gomez	92675	This luxury development project failed to properly inform, and include, the residents of Lincoln Heights. Any meaningful dialogue that may have authorized, or given consent to the project, bypassed the neighborhood city council.
Nicolas Gomez	92675	This luxury development project failed to properly inform, and include, the residents of Lincoln Heights. Any meaningful dialogue that may have authorized, or given consent to the project, bypassed the neighborhood city council.
Ireri	90033	We need affordable housing in Lincoln heights not luxury apartments. There is already a housing crisis here which has gotten worse as a result of Covid 19. This mass project will contribute to the displacement of working class families in our city. No to gentrification !
Katherine Borkov	11209	
Julie	90012	No more gentrification!!!
Alejandra Colon	90042	It does not support the current low income families that live in that area.
Janice Santiago	90031	This will only mke it worse for existing rent controlled housing already at risk. Stop this gentrification in my neighborhood.
Lesly Monsalve	90033	Because Latinx and Asian American communities should not be displaced. Community before profit.
Joe Rodriguez	90031	It is another project that will displace moreresidents of our community of Lincoln Heights.It is also illegal and the community of LH was not taken into considertion
Addis Daniel	90016	We need more low income housing not luxury Apts
Jeffrey	90031	I don't think it's a good idea because it's in a low income community and if it gets build it's going to rise rent in other residential areas. I live in a rent control building and having affordable housing is important. I totally understand that the person maybe owning the building got bought out but that doesn't mean they shouldn't hear about the people have to say. There is enough people in Los angels and this is just going to attract more traffic we need to think about the environment and population!!
Felicity Alexander	90031	Gentrification. Traffic. Noise. Disrupting the neighborhood. Neighborhood doesn't need it.
Lisa Nicola	90042	Public health!!!
Rebecca Schroeder	90042	This is an awful addition to the community.
Alex Fernandez	90031	This is marginalization of underserved families and poses a danger to the cultural integrity and economic stability of the community.
Daniel Soto	90036	As a fellow resident of the city of Los Angeles who rents an apartment—and who relies on the city's rent control ordinance in order to afford to live and work here—I stand in solidarity with the residents of Lincoln Heights who vehemently oppose this proposed new luxury apartment complex. This development does nothing to serve the current residents of Lincoln Heights, nor does it benefit the millions of residents of LA who are currently unhoused and/or facing housing instability during a global pandemic.
Naomi Menezes	90004	The prevalence Luxury units being built in Los Angeles is detrimental to the health and community of the city in the long term
Naomi Menezes	90004	The prevalence Luxury units being built in Los Angeles is detrimental to the health and community of the city in the long term
John Lam	90031	All the dust and pollutants from demolition and building
Citlali	90022	I do not want to see another historic neighborhood get overruled by the wealthy. Fight it as much as we can.

Henry Perez	90031	Our community needs affordable housing. Luxury housing leads to displacement.
Joseph Lorge	90012	We do not need more unaffordable housing developments that displace members of the established Lincoln Heights community
Kasey Ventura	90032	We’re in a housing crises and witnessing folxs being displaced - during a pandemic we should house the most vulnerable not create luxury housing
Gabe Allanoff	90290	Gentrification is an act of violence, racism, and white supremacy, and we will not allow it.
rhiannon wilson	90004	
Charlette Gibbs	91604	because genification is apart of systematic racism, especially within larger cities.
Ashley Velasco	90017	I have witnessed hundreds of families go from a one bedroom apartment to their cars if they're even lucky to own a car. We need to stop and consider that not all families are making hundreds of thousands of dollars a month and as it is can barely make ends meet. We need more affordable housing for thousands of hard working angelenos.
Sydney	94112	So many citizens will be displaced. They will lose their homes just because a luxury condo will be built there. No one living in Lincoln heights can afford a luxury condo. Gentrification needs to stop.
Valerie vargas	90065	It will be pushing out current residents who are there and raise prices in the neighborhood forcing generations else where in a city that is already expensive
Frances	90039	The installation of new apartment buildings in areas primarily inhabited by POC is an act of violence! It’s a capitalist device to drive long-time residents out of their homes and allow white, upper-class intruders to move in.
Lucie		Displacing families is violence
Hilary Siegal	90004	We need to protect the surrounding community and their best interests, which this project goes against.
Arabelle Van Ranzow	91106	
Rafael Guzman	90065	No need for luxury apartments in this area. When the current residents and population in the area can't afford it, it is a problem.
Daisy	90032	
Michelle Reyes	91343	Gentrification sucks!!!
Audrey Harrison	90012	Fuck gentrification. They don’t even know the neighborhood they are in, says enough they don’t deserve to be there they are crooks.
Laura Recchi	90026	Unfair housing development practice
Carina Zamora	90031	This project will only pose a threat to our low income community and vanish it.
Sophie Yun	91107	
Adan Alonso	91801	We need more affordable housing, not luxury apartments. I respect everyone’s right to make a profit but not at the expense of people being able to afford a home, apartment, or be subjected to exorbitant rent increases based purely on speculation/greed.
Kevin Caballero	91780	Residents were not spoken to regarding the construction of the building. Encroaching gentrification. Unsafe building.
Rocio Vela	90031	The community would not benefit from the project one bit. First the rent would be so high that the community could not afford the rent. Then the additional traffic the project create. Lastly the wast it would create. Environmental wast is to high of a price the community would have to pay.
Angelica Loa Perez	90640	This development will further gentrify the Lincoln Heights community. Our current, largely immigrant and low-income residents should be prioritized over the interests of outside investors and developers. Lincoln Heights needs affordable housing and current residents deserve the right to stay in their homes!
Nicole Battaglia		86% unaffordable housing in a community with a median income of 30K amounts to forced displacemebt
Katherine M	90023	Gentrification has been at its high in Boyle Heights; Our rent has skyrocketed in the past several years due to the area being built for apartments that are beyond our cost.
Janette	90022	
Martha Vazquez	90065	Because it will bring price up of rental for people in low income community of LH. Also after what jose huizar did no project should be allowed of rebuilding apartments to gain profit.
Kaivalya	90024	Gentrification is parasitic. It displaces so many folks. Lincoln heights is a strong and beautiful community. Do not dismantle it.
Brian Ocaranza	90031	We don't need more people here. We are crowded. Are schools here are small. We dont want the whites and rich to move here. No no no. Why not build another school. Genterfication!!!
Lia Gamino	90031	We do not need this huge project in our small community. Also, no one ever asked the people of this community for our input.
Jose	90031	I oppose this project because it won’t benefit the community it’s just going to create hoax and a lot of traffic! This is a step to gentrification and that is what is planing to happen in Lincoln heights. We have to stop it before it becomes a bigger part in our life. Lincoln heights is full of culture and by putting those apartments the prices would go up causing la raza to move out. I don’t know how people could do such a thing. They are here just to destroy our community. GENTRIFICATION IS VIOLENCE STOP IT RIGHT NOW THE COMMUNITY OF LINCOLN HEIGHTS WONT ALLOW THIS TO HAPPEN!! IT WONT BE HAPPENING MUCH LONGER!!
Oscar Zaldana	90031	We don’t need luxury apartment in Lincoln Height. This project will increase illegal eviction. This project will hike up the rent in the neighborhood. The people in Lincoln Height didn’t get a say on this development.

Juliana Aguirre	90031	Because we have luxury apt and it will take away for what we stand for as cummunity
DEVIN	90031	
Bethsaida Brooks	90042	stop gentrification in our communities!
Steven Alatorre	90032	We the people affected by gentrification know all to well the affects and aftermath of such a project. The only ones who don’t seem to consider or care are the developers funding these projects and those that will live in those spaces.
Meg		Because the people do not want this and disrtbing nature
Sara Silva	90026	It is not fair to build luxury apartments in an area where the current people living there cannot afford. This will displace many families who have been living in the neighborhood for generations and invite more gentrifiers.
Tessa Williamson	90011	The ground is toxic, this is unhealthy
Antonio	90063	If the housing doesn't benefit the community or isn't community friendly then it can only damage he community
	90031	After knowing that Jose Huizar was paid off in order to approve developing plans why aren’t we putting a hold and reviewing all plans in Los Angeles County. How do we know that Gil Cedillo knows what he’s doing or that he’s not being bought? Also, how do we know if the person who works for City Planning is fit for the job , I believe that person should be reviewed and fired without paid leave. I also demand the person who approved these plans to show us why they approved it without community input . For Cedillo , you claim to care for immigrant families but how can you care for immigrant families if they are being displaced , if you and your team keep pushing them out of the place they now call home. If you’re a sellout like Huizar just resign already. I oppose this project because 1. I do not trust how these projects get approved by the city 2. There was no community input 3. You did not make the community aware in the languages that they speak /understand 4. Cedillo should be under investigation too
Stacy Dawson Stearns	90039	1) With one member of City Council already under FBI investigation for development-related crime and corruption with others to follow - all projects that were passed through the gate without proper community input and dialogue MUST BE HALTED and RE_EVALUATED immediately. Cedillo could very well be looking at FBI agents at his door any day now. 2) Rich white people need to stop gentrifying Lincoln Heights with massive buildings that don't have ample parking and that are out of price range for current residents. This building is bullshit on every level. The CITY NEEDS TO PUT A RED LIGHT ON ALL DEVELOPMENT of this kind and focus on the renters who are facing eviction in the pandemic. Follow the money- let's see if Huizar had anything to do with this.
Lauren Bollinger	90042	Working people of Lincoln Heights deserve affordable housing! Not luxury developments that will only further displace them and lead to gentrification.
Teagan Jarvis	90041	It will impact too many negatively
Kiara	90031	It will displaced a ton of people and break the community we worked so hard to maintain.
Angel d	90031	Our community needs affordable housing, not luxury. Luxury housing will also bring forth gentrification and displacement of longtime residents.
jasmine figueroa	90201	people i care about are being affected
Victoria Urenia	90031	This project does not serve the needs of people in Lincoln Heights. This unaffordable luxury apartment project would lead to further displacement and gentrification of our community.
Emilia P	91208	I don’t believe renters should be evicted to make space for gentrification of their own community.
Andrea	89139	Anti-gentrification
Dominic Colangelo	90029	I oppose this project because it will further displace the citizens and split the community of Lincoln Heights. With its rich history embedded in Los Angeles culture, the project will be a divisive factor in the community for generations to come. It pushes the poverty line in an area where residents are struggling to pay bills and want to stay in their homes.
Jay hernanez	91402	cultural values
Michael	90031	No public input ... density impacts
Kristen ann	91118	Stop gentrification. Stop greedy developers.
Lukas Jann	90039	Because it is a force of gentrification in a classically low income community. The methods being used to secure this space assume that no one will speak out for the people being pushed to the side, so we must speak out.
Ian H	90065	Putting luxury units in a place where homelessness is on the rise and people are struggling to keep their houses during a global pandemic is morally reprehensible.
Andrea Aguilar	90065	Oppose
Kenndra ayala	90063	I want to preserve my community I don’t want it to be gentrified like highland park is
Kimberly Menjivar	90031	low-income families need more opportunities and resources to escape their struggles and move forward to provide a better lifestyle for their children and themselves.
Nicholas Gehlken	92154	This project is for pure economic gain. Massive amounts of money generated from this project will go into the coffers of developers who do not know or live in the low income community of Lincoln Heights. The area is in crisis with this pandemic and high unemployment, and it is predatory and insidious for city leaders to welcome such project and veil it as beneficial for all. This project will only lead to displacement and alienation of Lincoln Heights residents in their own neighborhood which they built and fought for.
Sabrina Farooq	91007	Gentrification is evil!
Carlos Gomez	90011	Say no to gentrification!

Tiara Jackson	90026	I oppose these “luxury” units being built as this will only GENTRIFY Lincoln Heights thus displacing thousands of residents and families. It will do nothing but add to the housing/houseless crisis in LA. NO ONE WANTS THIS!!! AND ITS UGLY AF!
Nicolette Norgaard	90019	This is unnecessary, unaffordable housing that is negatively gentrifying Lincoln Heights
Celia Fonseca	90031	Son demasiados apartamentos para esta comunidad que ya de por si carecemos de recursos..el trafico seria un caos..aparte ya tenemos escuelas sobrepobladas..
Victoria	91780	
Alexander Propios	11221	It’s gentrification at its finest! Black and brown people will be forced out of this neighborhood that they’ve occupied for GENERATIONS! Stop this corruption!
Ian Nelson	91780	This project seems to clearly lead to the displacement of many Angelenos. It is unethical & greedy.
Victoria Urenia	90031	This project does not serve the needs of people in Lincoln Heights. This unaffordable luxury apartment project would lead to further displacement and gentrification of our community.
Vance Pfaucht	90041	Gil Cedillo is carrying on the elitist political culture that has plagued Los Angeles as a "major city" (and not a virtual city-state with it's own economic atmosphere, impoverished underclass and sizable homeless population) and this project is a glaring example of Cedillo's abandonment of the interest of the working people. This project should be repurposed into a lightly monitored unhoused civillian apartment complex, with supervised injection sites.
Jessica Navarro	90034	People deserve affordable housing not luxury shit that no one can afford. Plus that building will make the area even more expensive, causing more people forced out from there homes. It time to demand affordable homes/ apartments!!!
Jay Carlon	90042	The Pieter Performance Space has been home to many BIPOC and queer people for over a decade. Loosing this place, having just closed last month, has been tragic, and to see that it’s becoming luxury apartments is the epitome of blatant erasure and Genocide.
Juan Castro	90065	It doesn’t benefit the community of lhts
Margaux Hernandez	90270	The community needs affordable housing.
Natalia guerrero	91776	
Dafna erana	90042	Gentrification is violence; housing injustice is racial injustice
Jennifer wong	90031	We don’t need more unaffordable housing in Lincoln heights! Gentrifying developers need to get out of and stop trying to profit off of our communities. I am a homeowner here in Lincoln heights and I oppose this project.
Melissa Mateo		
Ruby	97217	I oppose gentrification of any neighborhood.
Lupe Davalos	90033	Just another project meant to run out low income residents. How can you make luxury apartments in a low income neighborhood like this? That's so unethical. People here are already struggling and as renters, they're susceptible to wild rent increases. I oppose this 100%.
Brenda Zhang	90039	This project serves outside interests at the expense of Lincoln Heights communities. We don’t need more speculative development anywhere in Los Angeles or in this country. Power back to the people.
Leigh Adams	91001	I love this community for its life and culture. This proposed monstrosity has nothing to do with either of those things. It is more of an invasion than an improvement. Insufficient planning, where’s the parking? Yuck!
Ariadne Makridakis Arroyo	91205	I don’t believe in the wrongful eviction and displacements of people and communities that have lived and sustained Lincoln Heights for years with zero transparency or community input.
Kelly Majewski	90026	It is an outrage that there has been no public outreach for this project. LA is a city in a pandemic, in a housing crisis, in a climate crisis. We should be looking at ways to help the community that already exists there and in the surrounding areas. Start by building truly affordable housing not just a few token units. It has been proven that luxury apartments near transit have over an over again gentrified areas and pushed out the previous communities. Developers can no longer get away with checking a couple of boxes for transit oriented designs an a few affordable units. It’s time to do more and do better!
Nickole Broom	90041	gentrification is detrimental to the ORIGINAL people who deserve to live there!!!! instead of throwing away the black & brown folx of your community, why not invest & better the ALREADY EXISTING communities & housing! do not kick people out of their homes in a time of a PANDEMIC just for white people to feel comfort of a new apartment. plus unemployment is up more than ever who’s gonna move in anyways???? OPPOSE!
Gabriella Sanchez	90014	This area needs more affordable housing. Not luxury apartments.
Amanda Medina Segura	90041	I oppose this because of the impact it’ll have on further displacing residents. People over profit.
Nancy	91744	Gentrification disrupts the minority population negatively
Felisa Vasquez	92507	I oppose the project because being from South central LA, I know what it looks like when many people are displaced because they cannot afford to pay rent. As well because I know that if my family lived there, they would not be able to afford such an expensive place and disproportionate displacing them. I DO NOT want this to potentially happen to my family members and NEITHER to other people. Why is it that council members think that they know what is best for their constituents when they DON’T have conversations with their constituents and the community. This is shameful and council members SHOULD be meeting with the community that they so call ‘serve.’

Mia Miranda	90280	
Alyssa	90022	I do not want to ruin our neighborhood with this
Esmeralda	90023	There is a need for more affordable housing instead of luxury!
Blanca Martinez	90031	We need more affordable housing in our community not for profit/large business that will disrupt and displace people at risk in our community. These developers know nothing of the community and do not seek to enrich it. They seek to profit and they are not wanted here.
Yuzu	90041	It’s unacceptable to displace people especially in the midst of a global pandemic.
Ricardo Parada	90067	the community deserves to have a larger say in what is happening in Lincoln Heights, this is just furthering gentrification and forcing out longstanding families and resident
Isabel Norsten	99041	We need to support communities now rather than investing in development that harms communities by displacing them and leaving them out of pivotal dialogues. Gentrification is violence.
HBN	90031	Soul of the neighborhood cannot be regentrified -
Marilyn Hernandez	90022	We need affordable housing
Angel Jimenez Jr	90032	Is against preserving the cultural normality and stability of the current residence.
Skylar Cummings	90041	I oppose the development and the gentrification of the communities who live in Lincoln Heights
Joe Merrell	90027	We need affordable housing in the city! No more unaffordable luxury (and often vacant) apartment buildings!
Alexis Torres	89147	Luxury apartments like this make places less affordable for the minority communities.
Joe	90034	It’s accelerating gentrification, it’s environmentally hazardous, and it’s disrespectful to the community of Lincoln Heights as there is no genuine community outreach or engagement- it’s just “checking a box” something the City of LA is all too familiar with
Sophannarot Sam	90042	
TeaganKowitz	91321	
Ivy	90041	Because it is unethical and selfish to allow for gentrification that will increase illegal evictions in Lincoln Heights and contribute to many families and individuals being pushed out of their homes. There already is a lot of gentrification in Lincoln’s Heights and will leas to more homelessness. This community deserves affordable housing. Please please do not let this apartment complex be built — the people of Lincoln Heights deserve better.
Angelina Long	90031	This project is not favorable to our community and it’s going to put us at risk. Residents will be displaced and our community will be further gentrified.
Puja Titchkosky	91207	Because they are taking homes away from brown and Black people and families to make another building that LA does not need.
Magdalena Olivas	90032	I oppose it because it'll increase rent and people in this community will be forced out more than they already are. I oppose this because it is not for the people of Lincoln heights
Jose Olmos	90031	Opposition towards this project because this development will not address affordable and sustainable housing in the area
Pinkie Young	90031	I used to live around the corner, please protect this neighborhood from increasing gentrification! I saw many families get evicted from our block, and our neighborhood!!
Misty	90031	
Marvin	90031	Parking issues, land issues, home displacement, gentrification, the business of the street in mornings will cause for chaos to the neighboring school
Edith		
Jocelyne Sanchez	90032	I saw how luxury apartments accelerated gentrification in both of the neighborhoods I grew up in, South Central and East LA. They are violent and displace so many of our wonderful community members. We don’t need more colonialism.
Marissa Guangorena	90031	They are trying to run us out of our own community .
Paul Pescador	90031	
Adrian Chavarin	90031	I use to live in 1848 1/2 Workman street for 22 years. We where forced to move out and inky got offered about 10,700 but at the time money didn't matter. The problem was that my dad was go injured while moving out the house for not having hand rails in the stairs and because of that we didn't get accepted in no houses because my dad didn't have prove of paystubs and my mom wasn't winning in of money. Also my mom was in the proceed if you exams that's she had beginners of cancer and it turned out that she did have cancer stage 2. What these people are doing is really sad because the house are there right now and not in use. I couldn't go to school no more so I had to work to help my dad pay rent and all utilities we pay.
Anya silverman	90041	The project will displace people who have lived in Lincoln Heights for decades. We do not need it. Listen!

Rochele Gomez	90042	The only housing units that should be built right now are affordable housing units. This large development is for the rich and will make the area unaffordable for people who have been living there for generations. People are dying of COVID, or have lost their livelihoods, and will possibly end up homeless. Instead of addressing the homeless crisis, our city officials keep giving us large developments that will only worsen the issue by pushing out hard working people in “up and coming neighborhoods”. Council member Cedillo continues to fail the people of his district, he has been bought out by the rich and has long forgotten what it’s like to struggle. Garcetti just smiles and hopes no one will remember how awful his term as Mayor of Los Angeles was when he runs for congress—you will not get my vote. Stop this development and save Lincoln Heights from the rich developers who don’t understand the culture and neighborhood that makes Lincoln Heights what it is. Why do only the rich get to decide what type of housing units will be built and where they will go? Why has the city not created ordinances to stop the rapid gentrification? I have lived in LA my whole life, my Latinx family lived in Silverlake in 90s and I have seen how that area has change to cater to white rich people. I want this stop—no luxury condo/lofts. Listen to the people, we deserve to be heard!
Kate	90004	The cultural diversity of Lincoln Heights is at risk.
Kate	90004	The cultural diversity of Lincoln Heights is at risk.
Sanne Hamelink	6217 NN	
Cristina Garcia	90031	A low income neighborhood has no need for luxury apartments.
john burtle	90042	
Whitney Woodard	90019	There are already people living on the land. Don’t take it away from them. Serve the people not businesses.
Amara Higuera	90031	Developers are violent and this city allows for violence and pain to be inflicted on the people of LA everyday.
Aliza	90029	
Zac Flores	90033	People Over Profit! Community oversight over new development to ensure it’s equitable and combats displacement.
Nadia Franco	91205	
Sebastian Gil	90031	this project will kick out hundreds of poor renters out of the community and the community will become gentrified and thats not right. People who have been living here for 50+ years have developed a sense of community and unity and this will only break them apart
Danielle Torres	90033	Been removed from housing before due to gentrification and the retail selling of the property.
Lluvia Higuera	90031	Because it will contribute to more displacement.
sasha	91381	i oppose the displacement of members of lincoln heights community, these projects amplify gentrification, furthering racial inequality
Sergio Sanchez	90031	I can't fathom why this is even a question. But it's obviously the right thing to do.
Janet	90210	It’s gentrification and destroying what stood there before. This wealth could be used to aid the homeless and lower income areas but no, it’s going to be made into overpriced, prison-like apartments that demand renters make 3x the rent, pushing out the people who live in the area. Gentrification!! It always starts like this.
Janis	90031	Gentrification is violent, racist, and unnecessary. I implore these politicians to think about what truly serves the low-income POC population of Lincoln Heights. Instead of putting money into this market-rate project which will surely lead to rising rent costs in the area and significant displacement, City Council needs to actually invest in the existing community and provide rent relief. The fact that City Council fast-tracked this project during a PANDEMIC is completely deplorable and shameful!
Iris Licea	90002	Because things become more expensive for the community, they should invest in the community not take from it
Jennifer wong	90012	Stop gentrifying our rich and diverse LA city. We need to invest in people of color and not turn everything into a eden for Karen’s. We lose our identity and become every other corporate cut out city. When you travel across America, there’s no character any more. LA should be for all people and these units fail to do that.
Maya Bon	90290	gentrification is an insidious scourge that eats away at communities, at neighborhoods. we need to reframe how we view the term "development" so that it is focused on the betterment of the people who live within a proposed area. if "development" is strictly for capital, it is not "development" at all, it creates unjust outcomes that leave people hopeless. I stand with the people of Lincoln Heights.
Ruby Corona	90063	Unaffordable housing and gentrification
Marissa samayoa	90031	Preserve our community to what it actually is
olivia biera	90012	it is not affordable housing and lincoln heights is dense enough in population. plenty of units are already empty in dtla.
Isabel Muller	90042	
Carolyn A Hauk	90031	We need less gentrification in the rare few historically black and brown communities. Keep housing for all available. This will raise property value in the area and kick hundreds out from their homes due to rent rises. Also they're ugly!!!
miri hindes	90041	it is wrong for our community. out of scale. it does not serve long time residents. it is poorly planned. will change the area forever. greedy. out of touch.
Kyle Lydic	15963	
Sarah G	91803	DO NOT GENTRIFY LINCOLN HEIGHTS. I spent a large portion of my life here and my grandparents still live here, they are senior citizens, this would cause immeasurable damage to them and the community! PEOPLE BEFORE PROFITS!!!!

Jimena Iaso	90032	Because it promotes the displacement of wetIrking class families (gentrification)
Stephanie Guzman	91342	This housing is not for the community! Rise up and speak up against gentrification.
Jordyn aamot	91801	The project will kick out the current black and brown communities.
Brian	90038	By building projects like this and not including any local community leaders is wrong and bad for the feature of the community. Gentrification sucks !!!
Stephen Kamhi	90023	Need to involve the community when making decisions like this!
Kayla	90006	We need to preserve the neighborhood and the people in them. Big corporations do not need to move in and displace locals.
Chelsea Hughes	90004	Because we don't need more expensive high rise buildings in LA
Adrian Martin	90031	Housing is expensive in LH already and this project will only increase our rents. This community is low income
Maya	92345	There's probably no people of color that can afford this housing so it's not right.
Gemma Lurie	90064	gentrification is war on low income communities and cultural genocide on poc. People over profit always. These city officials are in bed with landlords and developers and poc experience the direct impact of this greed and unchecked power.
Nathan Lee	93063	Because FUCK these rich idiots and their stupid money. They think they're so smart but they can't even fathom the suffering of another human being. They'd sell their own family for more cash I swear. These type of people are a cancer and they shouldn't be allowed in our communities, MUCH LESS deciding the future of the collective community. How can anyone try this shit and look at themselves in the mirror. Destroying hundreds of lives and they don't even blink. FUCK YOU PINCUSHION GROUP U FUCKING LAMEOS
Promise K Williams	90242	gentrification hurts communities. It pushes out hard working people who worked hard to build their businesses.
Sophia Torres	90032	Having New apartments at higher cost for rent is a way to move black and brown communities out of their homes.
Marco Cervantes	90063	i don't like gentrification.
Steven Garcia	90032	It will only cause suffering.
Isabella	90027	Developers are ruining peoples' lives
Javier Alvarez	90031	Because I believe it will ruin the livelihood of Lincoln heights.
Tom Norris	90031	There is not enough affordable housing. We do not need luxury apartments with sky high rents!
Chloe Welmond	90019	People over profit !! Gentrification is violence
Mayra lopez Ramirez	90031	I have lived in this community for 26 years. I went to the Elementary across the street from the property. This project will cause lots of problem in this area, traffic will be created. Making the school zone not safe for the students. There will be lots a accidents due to the traffic. Cost of living in this community will rise, causing families to loose their homes. Homes that they have known all their lives. You will be making Lincoln Heights change in the way we don't want it to change. Invest your money on fixing all the pot holes in the community streets.
Natalia Guerra	90274	Because gentrifiers are displacing long-term residents & that's impacting mostly poor brown people. People have strong relationships to their space and their neighborhood communities. Wealth & capitalism should not interrupt those relationships, especially not through displacement.
Loki Blaque-Lee	90017	
elspeth	94102	stop gentrifying the last remaining affordable neighborhoods. money does not culture make, and building these would begin to erase the identity of those who live there, by catering to the gentrifiers and not putting this money into community development. you can't cover up culture and silence a neighborhood for the sake of profit.
Olivia Onek	94110	It will push out communities of color and cause gentrification.
Radha	2466	
Maya Schubert	90031	This will displace and disrupt the community in Lincoln heights, for something they are not asking for and do not want.
Erica Barrios	90015	This is not serving the community it's being built in. Luxury buildings are taking over this city without ever being fully rented out because NONE OF US CAN AFFORD THEM. Yet still more are being constructed. Stop destroying communities!
Wendy Lau	94704	Housing crisis in LA is getting worse every year. I've seen my hometown, HLP, getting gentrified through my high school years and it pains me to see my neighbors being forced to move out because they cannot afford rent. Knowing its happening in a community near mine I want to help them stay.
Diego Espino	90063	I went to High School in Lincoln heights (Bravo High School). Its my community, and I know that the apartments being built will not be affordable for the families in the community. This in turn will lead to wealthier individuals moving into our community and creating a demand for high priced goods. Like you know, gentrification.
Tyler Le	90031	We dont need anymore evictions in our neighborhood. Prices for rentng have gone up throughout California, and now this luxury apartment that clearly no current Lincoln heights residents can't afford?!? No thank you. This project should be relocated elsewhere.

Ariel Molina	91304	The Heights is an innercity that consist of individuals who are middle/ lower class, it doesn't seem right to make profit where it doesn't belong.
Camellia Aftahi	92025	
Mason Allport	90012	The last thing this neighborhood, and LA as a whole, needs is a luxury development. We need affordable and/or FREE housing now to keep families in their communities.
Jennifer Moreno	90031	
John Conant	90026	Affordable housing for all! Invest in communities! Stop gentrifying them! All neighborhood developments should be led by the neighborhood!
Jasmin Morales	92553	I'm oppose to this project because it will not serve the community and only harms the community.
Morgan Henshaw	91107	The community needs affordable housing options, not luxury living! Folks are being forced out on a weekly basis, families that have been Lincoln Heights residents for decades. This project spits in the face of the community.
Siobhan Furnary	90031	We should instead use the space for a community garden. Something to uplift and enrich the community. Thank you.
Ariel Bustos	91106	
Hannah O	90049	Gentrification harms the disenfranchised, the poor, those of color. It must be stopped
Natalie	90041	
Danny Palacios	90031	My neighborhood
Sophie Prettyman-Beauchamp	90802	This project would displace even more low-income people who have lived in the community for generations. The entire nation is going to need a long economic recovery period due to the pandemic, and this will only create more housing inequity and homelessness.
Joel Garsy	90065	Lincoln Heights is one of the last remaining neighborhoods of LA. I support its residents.
Kevin Fistanic	90066	End gentrification, protect our diverse cultures!
Jorge tapia	90031	I oppose gentrification.
Justine Juarez	90032	It will displace already suffering residents and increase the already increased homeless population. Lincoln Heights does not need luxury apartments it needs affordable housing.
Patricia	90026	Infiltrating local communities and removing locals from their homes due to increases in housing. These apartments are ugly and ruining all culture of Los Angeles
Angelina Nieto	90031	Gentrification is bad
Brooke Ely	91208	Current residents shouldn't be evicted so rich people can move it
Stacey Perez	92521	I oppose this project because it's destructing the Lincoln Heights community! We need more resources for our people not more luxury complexes.
Claudia Carrillo	90022	No
David Camacho	90031	Inefficient, unethical project
Maggie Quan	90031	This project is a threat to the community that makes Lincoln Heights what it is. For far too long our neighborhood council and powers that be have sold the community out, to USC Keck and other communities. What little rentals we have, greedy landlords have pushed out long-term, immigrant, senior and disabled residents. This is also at a time when we should be protecting our long time residents and small businesses.
Sally b	90031	Endangering community and local businesses
Julia	90039	Do not absorb a section of this community and therefore push out opportunities for the local community to engage with this space.
Bhavini Patel	90047	It displaces thousands of family-owned businesses and will only widen the gap between the poor and the rich.
Leidy castillo	90031	This project will destroy Lincoln heights and it will leave many tenants without a home.
Daisy Elliott	90011	The community needs to be a part of this conversation. They need a seat at the table.
Nathaniel Carbajal	90031	Gentrification
Diana Subdiaz	9177"	I'm opposed gentrification. The residents of Lincoln heights would be negatively impacted by the project. Rise in homelessness.
Suzanne Nordberg	90031	I'm new to the neighborhood but if this project is being pushed through without the local community being able to voice their concerns then it is just wrong.
Luke Forsyth	90031	Not consistent with neighborhood
Michelle Suarez	90065	The Lincoln Heights community needs to have a say on housing developments. Housing developments change so much in a neighborhood, and the city needs to do its job to include the voices of the communities, especially those most affected by gentrification and displacement.
Eduardo Sanchez	90008	Against gentrification
rosemarie camacho	90063	this housing does not help the community and will help to displace many families as they are priced out.

Borrah Jackson	90001	
Marialicia Gonzalez	90031	It will hike up rent prices and further displace our current residents!! NO GENTRIFICATION.
Melissa Palacios	90031	
Wendy Chu	90031	My family has lived in Lincoln Heights since 1985. Our community needs affordable housing for immigrant families, not luxury condos!
Madison clark	90057	This project does not help the community, it hurts it. Luxury developments such as this one suppresses neighbors surrounding it and excludes the working class from reaching attainable housing. This is unacceptable.
Glafira Lopez	90605	This project will eventually lead to people being displaced because they will no longer be able to pay the cost of rent, and people in the area can't afford the cost of rent for this building.
Benjamin Whistler	97214	As a former Californian, projects such as this pushed me out of California; as a child of landlords, it's easy to spot a project detrimental to an entire neighborhood's character. As a grandchild to one of the 1990 ADA's architects, the parking issue will make it harder for people with less obvious disabilities to park close to home and diminish the quality of life they and we are all entitled to; as someone living outside of Lincoln Heights, this project is an eyesore and I see no reason to visit the area as a tourist and contribute to the local economy.
Nina Hadzi-Nesic	90041	Because it's unfair to displace lifelong residents and because this project would increase homelessness the city says it wants to solve. Because putting profit and luxury apartments before people (and before consulting with the people) is beyond unethical.
jessica meza	90001	i oppose the project because it is unfair to the people already living there. not only will the rent prices rise, but parking spaces will be hard to come by, and they'll be uprooted because they won't be able to stay in a new fancy area.
Gisell	90040	I do not support gentrification
Isabella Sanchez	90042	Inhuman
Andrea Kraybill	90042	No community input, displacement of local residents, favoring gentrification with no consideration of the local community and residents who will be affected for decades to come. Shameful behavior!
Jonas Mosesson	90026	Because gentrification needs to stay out of Lincoln Heights
lauren espinoza	90032	I don't want this in my community as it will negatively impact people like my grandmother and cousins who live there.
Chantal	90040	Gentrification is a threat to the well beings of local, situated residents.
Meesha Merat	90057	We must protect long time residents. This 'luxury' apt building is not what the people need or what - listen to the people. Understand the harms of gentrification
Alondrq	90018	Its a hazard
		its a hazardous threat to our communities health and well being!!!
David Foster	90255	Gentrification does no good to low-income communities. It just pushes people out instead of elevating them.
amber	90028	highly oppose
Sam F	90065	LA needs affordable housing
Crystal Carrera	90242	We need more low income housing not luxury apartments.
Vanessa Franco	91723	Not really they did this in highland Park and also in boyle heights this is not how it was in 1940s 1950s or 1960s this is 2020 kicking people out of houses or apartments that is really wrong to raise the rent up high people cant afford right now to pay high rent
Jonathan P Douglas	90065	I stand with my neighbors as a member of the working class myself. We need affordable housing not more gentrification.
Katharine Pinney	90031	Oversized, will increase traffic (and traffic already backs up on Pasadena Ave), we don't need high end developments let alone ones that have to architectural thought to their "design" or the history of the neighborhood, the retail will most likely remain vacant like the retail spaces at the Cypress Park Gold line Station, and it's hideous. It does reflect any sort of place making philosophy.
Vanessa Giannini	90031	1. It's too large on a two lane residential street. 2. It is an ugly box in the middle of beautiful historic homes. 3. Not enough parking for such a huge influx of residents. 4. You haven't listened to what the neighbors want. Los Angeles has deep history especially this arts area. This building and all of the new developments are hideous and will not age well. Developers deep pockets need to stay the hell out of NELA
Olivia	90012	
Jill D'Agnenica	90031	We have plenty of luxury housing in Los Angeles. We need more affordable housing. Especially in our working class neighborhood.
Brent Armendinger	90031	We need actually affordable, rent stabilized housing, not more luxury developments!
Kate MacQuarrie	91103	
Daryl Bergman	90004	
Ikee cosby	90032	

Kathryn Endler	90066	This project disrupts the community of Lincoln Heights by raising rent in the neighborhood, pushing people out of their homes, and threatens the cultural community by operating under the assumption that they have the right to alter a community in such high velocity without having any input from the individuals who actually live there, and have lived there for decades if not more.
Alejandro Tapia	90031	I want to keep my community affordable for its local members.
Kristen Rederscheid	90042	The economic fallout resulting from the current pandemic is about to exacerbate the ongoing housing crisis in Los Angeles. Not only is NELA and District 1 already experiencing record homelessness, but impending mass evictions will leave many more people without affordable housing. I'm anticipation of this, and in response to the pre-existing plagues of homelessness and gentrification in our city, we absolutely cannot allow luxury housing to be constructed in Lincoln Heights. Rather, our efforts and resources must be poured into acquiring and providing stable affordable housing for people.
Spenser Theberge	90065	We need to support community based developments NOT profit based developments!!
Ruby Martinez	90065	The community needs affordable housing or some type of resource center rather than a luxury complex that brings no community benefit. My neighborhood is experiencing an increasing problem with the homeless where they are entering private property for food or essentials and we see nothing being done.
Abdul Qutub	22182	Because I support working class people
Jaden Mckernon	90012	it will force people out of their homes and its unfair to the community living there
Jeff	90015	This is an egregious wrong. Plain and simple.
Jessica Burk	91006	
Sophie Richman	90065	Because it will disrupt so many of our neighbor's living situation and it has clearly not been planned out with any consideration of those who live nearby.
Lauren L	90012	This will raise rent in surrounding areas, drastically affecting the low income families that live in the community.
Sandra Guerrero	90031	It will hurt our community
Nic Yim		
Diego	91001	f gentrification
Pamela Cohen	90042	We need housing developments that are designated 100% for very low income tenants to stem the housing crisis and keep our same neighbors, not evict them.
Calvin	90032	There is no place for luxury apartments in Lincoln heights. La city council should work on developing affordable housing for tenants and their constituents, the People who voted for them in the first place.
Mateo Celada	90004	It's WRONG
Jhani Randhawa	91106	I do not live in Lincoln Heights though I stand in solidarity with my community there in their thriving. Developers such as Pinyon have taken advantage of the health and human services crises exacerbated by Covid-19, as well as the often life-saving practices of social distancing and remote labor, to bypass collecting thorough community input. This housing development is a blatant move to drive up living costs & displace years- if not generations-deep residents of Lincoln Heights. I absolutely oppose this sloppy, opportunistic move to place capital above human lives and dignity.
Ashley Ayala		Taking away affordable housing
Sylvia Osorio	90031	I was born and raised in this neighborhood. I went to sacred heart high school. Lincoln heights is my home and we have all Struggled together in this neighborhood. Now to have someone come in and destroy the neighborhood just so a big company can come make $ off of us the working class is ridiculous. These ppl have worked hard to have their homes . They have gotten up at 4 or 5 in the morning to get on the 83 or the 45 to take them work . They have walked in extreme heat,rain and cold nights to come to the place that they have struggled to keep, their homes . How do I know this , because my mom did this exact same thing.
Jessica Ceballos Campbell	90042	
Philip	91001	Because the building of these mostly luxury units exacerbates the housing crisis by inducing the gentrification of the neighborhood, which is historically made up of brown and asian people. There are environmental implications of the project, including groundwater contamination. And it's been an all-around non-democratic process of approving the project.
Diane Bedrosian	92010	I spent time in the area at USC Keck School of Medicine. This project is much too density for the area. It will be a disaster and will displace people and leave people homeless.
Carolyn Krammer	90031	This is happening everywhere. Developers are trying to get rid of lower cost affordable housing. They come in and bulldoze communities and leave them without housing. Our neighborhood needs to be strong and do not sit by and let these bully out of town developers come in and take your community. This is happening all over Southern California. Fight for what you believe in.
dimei wu	90024	LA has a housing problem that disadvantages poorer people who are often minorities, and this apt doesn't fix the housing problem! More housing is not the answer, and a luxury multi unit apartment is definitely not the answer, as it will squeeze people out to the streets, or just out of LA (which then exacerbates traffic issues...) Please make life better for the poor and middle class, instead of giving our lives up for the rich--an action that ultimately harms everyone.
Evan Perkins	90065	The income of the general population in Lincoln will not correlate to the price of rent here. The community doesn't want or need this building.

Alyssa Kahn	90031	This development will displace too many people
Clint Dodson	90031	
Melissa sisneros	90031	Stop taking away from our community !
Drew Fournier	90031	Free, prior, and informed consent coming from the lincoln heights community that cares deeply about their neighborhood and stands to be drastically affected by a project of this magnitude is absolutely necessary for this project to go forward.
Anh Montealvo	90031	Our streets and community resources cannot handle this influx of traffic.
Laura Stinger	90065	As a neighbor of this zip code I often come to Lincoln heights for community dance class, to eat at small locally owned restaurants and to enjoy the small scale diverse streets on walks around the area. I stand in solidarity with Lincoln heights long-term residents against corruption by city planning, commissioners, and council-members. The residents of the area MUST be engaged with before a plan of this magnitude goes through, especially with the trials for corruption that are in process. This area does not need luxury condos they need financial assistance to buy their homes. LA should have enough vision to provide low-income housing solutions to long term community members without giant luxury condos, corruption and gentrification.
Gustine Fudickar	90027	Rent hikes ultimately driving residents out of the neighborhood
Fatima Austin	90065	Yes
Angie Town		
Kate O'Brien	90048	This is going to displace families from an historic neighborhood and they deserve to be heard. It's unethical. Stop letting developers with deep pockets be the only voice dictating how the city changes.
Janet Sarbanes	90065	Why does it always have to be luxury housing? Why not housing for regular people?
Max Himelhoch	90026	
Saul Narro	90042	It’s not hearing the voice of the community and they should before any type of development
Clement Tsang	90031	Gentrification and profiteering.
Sheriden Smith	90042	Lack of affordable housing options for tenants, blatant gentrification, and a lack of community inclusion on planning.
Drew Fournier	90031	Free, prior, and informed consent coming from the lincoln heights community that cares deeply about their neighborhood and stands to be drastically affected by a project of this magnitude is absolutely necessary for this project to go forward.
Francis Nguyen	90042	This project will proportionately displace and marginalize the Latino/Lincoln Heights community even more. No more gentrification of long term residents by greedy developers. That housing project being proposed is not for the community, it's an invitation to push out the existing community.
Sage Sims-Bleser	90230	To protect thriving neighborhoods from opportunist and harmful development that does not serve the community
Laura Bartczak	90039	
Alexis Diaz	90031	I live in this neighborhood and I don’t to be affected by those “luxury” apartments...
Jesse	91733	Gentrification is a horrible thing and it will raise the annual income of the region
Samantha Mazzola	91606	I oppose anything that will induce gentrification and displacement of marginalized communities
Liam	91030	It'll artificially raise the annual income of the region
Rita Kassak	90042	This will cause displacement and it is NOT affordable housing. We are sick of luxury housing that sits empty and has no regard for those who actually live in the community.
Juan Chantes	90031	This will start the gentrification of our community & will push the ones currently living in the area out. Who will live in these buildings? Upper middle class? Stop abusing our community.
Mary McGuire	91205	LA does not need any more displaced people. This would no doubt be the outcome of such a project.
RICHARD MCCARTHY	90031	Not sufficient parking, height concerns, traffic, pollution and close to or on the site of former designated hazard material area.
Adriana Meza	90031	All this project will do is displace the people of our community and bring in people who’ll will gentrify it. This is unfair to everyone who lives her since it won’t provide enough affordable housing for our current residents.
Daneyda Garcia	90031	As it is homelessness has become a greater issue for families in the community there is need for affordable housing not the opposite
L. Campos	90042	I demand transparency from elected officials. The community deserves to be heard. This development will contribute to more displacement, traffic and pollution.
Ben Bekey	90042	Housing is a basic human necessity. LA doesn’t need more luxury housing, especially in Lincoln Heights where most residents are working-class renters. There’s corruption at every level of this project, from not consulting residents to fast tracking during a pandemic to planning a parking garage on a documented environmentally toxic site to the developer bribing non-residents to speak in support of the project at city planning meetings... I could go on and on.
SHeffer Bruton	90065	This structure does not fit with the current or historical style of the neighborhood. It will block views and significantly change the value of the property surrounding it.

Viri Gamino	90031	I’m against the developments in place
Martin Cervantes	90031	I oppose this project because if it passes many more people will be displaced from their homes. We don't need more gentrification around here.
Liza Galvan	90031	The fact that there was no community input and the developers lack knowledge of the area and safety factors. There's is distrust and there seems to be a hidden agenda for this project. The potential displacement of residents (many who are elderly and low income) will be directly affected. 66 "affordable units" isn't enough. This location is an heavily trafficated because of it's accessibility to connecting neighborhoods and local schools. The traffic will increase significantly.
Haruka Sometani	90019	Small communities must be protected and not forced out by the developers.
Luz María tapia	90031	These buildings will ruin our community
Jaime Gamino	90031	I’m against gentrification. Protect the community.
Marilyn Gladle	90065	1) Parking, mixed use status should not apply, Density, Polluted soil open to environment, Streets can not handle the additional projected traffic, the small metro stop if used, will be impacted so that current users will not be able to access, etc
Xavier Flores	91101	No more unaffordable luxury condos, if you want to build something build low income housing to house the record high homeless in LA
Albert Lopez	90039	I went to school just west of Lincoln Height, I know the neighborhood well and have many friends there. Such a development would shatter the social framework and sense of community in this predominantly Latino/Mexican-American neighborhood. It would contribute to the processes of gentrification and displacement. It is yet another case of speculative development that does not serve the need of providing adequate affordable and low income housing in the inner-city.
Michelle Litchfield	90065	The vast majority of the people who purchase these units will own at least one car per unit, particularly in the era post-covid, when Metro is no longer safe and those who can afford to avoid it drive themselves instead. (And the people who purchase these units will definitely be able to purchase a car.) Where will all of the cars park? How will the cars impact local transportation? The EIR is not accurate in regards to cars and traffic due to the fact that it was created pre-covid. And the developer no longer wants to excavate under the full site to include more parking because they know they are at risk of disturbing toxic, contaminated soils.
Samantha Garcia	90031	NO, there’s no need for it. No parking, more problems.
Emily Tetri	91207	This would destroy a neighborhood and culture and force people out of their homes.
Sandra Martinez	90031	
Rebekah Lasarow	90037	It doesn’t support or give anything to the community. There is not nearly enough low income housing in the planned apartments planned.
Jennifer	90031	This is not beneficial for our low income community
Olivia	90042	This is not what the people of Lincoln heights want. Respect the community! Don’t build this building!
Lilia Jimenez	90065	The building would negatively impact the community.
Justine	90031	I live in Lincoln Heights, this is a small diverse neighborhood with a lot of Ma & Pop shops around. You can just see & feel the history all over here. This type of project will only hurt the residents of Lincoln Heights and serve no purpose but only to the wealthy. This project IS very hurtful to all residents living here and to the overall neighborhood itself and it's image. We are transparent on our side and simply do not want this in our neighborhood. Period.
Kelly Rodriguez	92395	It’s gentrification of a city that doesn’t want it, nor do they need it.
Bianca juarez	90031	TO STOP WIDE SPREAD GENTRIFICATION IN LA!
Thomas Hallett	90031	That monstrosity belongs in a field where no one will see it, not ruining the place I call home. Strongly opposed to this so called project
Lucas Celler	90031	This building is a result of corruption and it should not exist
Claudia Acuna	90033	
Penelope Jones	90065	Too dense for an already crowded area; no high rises in our area; no affordable housing; adds to already bad traffic situation
Mia Huitzil	90031	The community of people residing here need to have a voice available for them and deserve to have a say in what is being put in our communities.
Cecilia	91606	
Phoebe Kobabe	91204	No more Luxury Apartments!! This is not that the community needs.
Wendy Gutschow	91030	Gentrification is wrong and unjust. Lincoln Heights has already suffered due racist systems being put in place. That have affected home ownership.
Ariel velasco	90031	With the current housing crisis in Los Angeles, it is disgusting to build luxury apartments anywhere. Stop gentrification.
Dario sanmiguel	90031	Prefer low income uncorrupted projects
Skarleth Herrera	90022	i oppose because our community needs to take care of its own community before they take care of the needs of outsiders

sam wentz	90039	because gentrification is violence
Veronica Rico	91331	Porque el proyecto va ha deslojar a mucha Gente de la comunidad y no va haber recursos suficientes para la gente que van a ser deslojadas. Entiendo que El nuevo establecimiento va a tener 'low income tenants' pero ya se que eso solo es para unir los requisitos de zoning. Al fin y Al cabo sale perdiendo la gente pobre a causa de algunos cabrones/as que nomas se quieren bolsar mas billullo. He visto como arruina comunidades cuando un large development occurre y no quiero que pase eso a la comunidad de mi amigo.
Layne zolninger	90031	It does not represent the community. It is ugly. The site is not safe due to toxic waste. It does not include anywhere near enough parking, and there is not sufficient space for 500 more cars to park in the neighborhood. This project is a perfect representation of the ugly face of gentrification in Los Angeles. The design is soulless. And it will only be rented by wealthy white people from outside of the neighborhood. It does not serve Lincoln Heights. It usurps Lincoln Heights.
Linette C Woron	90042	It looks like the City wants to turn Figueroa into Wilshire Blvd- there are many people who can't afford the rising rents. I myself am disabled on a fixed income 1/2 what I used to make when working, just hanging on. And I own!! Stop the gentrification w/ NO thought to working class people of this City!! I always vote, I pay taxes. Where is Affordable Housing??
Dydia DeLyser	90031	A working-class community like Lincoln Heights cannot sustain over 400 luxury housing units.
Aren Zolninger	90031	This housing is not for our community and will only serve to displace our lifelong members.
Anita Martinez	90031	Out of scale with our historic community. We need housing for our working class community that is increasingly getting pushed out of homes in this area. Luxury rentals are going empty in other neighborhoods, namely Downtown Los Angeles (per recent LA Times article). There is no demand for this type of construction/apartments here in Lincoln Heights.
Alan	90031	Too many units, not enough parking, overall disruption and disrespect to the community including paid shills to pose as residents in support of the project. No one in the neighborhood that I know supports it.
Jocelyn Ortega	90063	lincoln heights doe not need luxury housing. it needs affordable housing instead, we need to keep the people in that community safe and not gentrify the area. Hear what the community has to say and listen to their needs!
Miguel Ayala	90032	I oppose this project because it is an attempt to erase the Black, Brown, Asian communities and we will not stand for this.
Miguel Ayala	90032	I oppose this project because it is an attempt to erase the Black, Brown, Asian communities and we will not stand for this.
Michael Shifflett	90031	Excavation will release harmful chemicals in the vicinity of a residential area and an elementary school. Proposed number of units per sqft is too dense. Lack of parking spaces will cause undue burden for existing residents to find street parking. Affordable to market rate unit ratio is too low
Renee salazar	90031	We Need Low IncomeApts.To Help Familys Struggling !!!
Jeri Ruiz	90031	I'm signing because I oppose this giant project that brings nothing but congestion and more displacement of our longtime residents.
Christopher Richmond	90031	This project is to dense for the block, under-parked and there have been inadequate soil testing.
Joyce Fortune'	90031	No affordable housing assigned in the development. Size not suited for community.
Ian Endsley	90031	too high density , too expensive
Sky Spiegel	90031	I fear for the life and we'll bring of myself and my family as funding and resources get poured into new plans that will leave us vulnerable to the affects of gentrification. I ask for a say and pray that you all will listen and we will he heard so the money and resources can be put into restoring and aiding the families already here.
Michael Alvarado	90004	It's wrong!!!
Michele Young	95666	It's a great area. I used to live near by.
Melissa McNeely	90042	This development goes against the community of Lincoln heights in a staggering way. Neighborhoods are not just land to build expensive developments on, they are created by people, over time, that know each other and build a shared history. This proposed development is a slap in the face to every current resident of Lincoln heights. It tells them that their lives and existence on this land isn't as important as the short term money the land can generate by allowing this monstrosity to be built.
Laura maxwell	90039	We need affordable housing, not overpriced luxury condos.
Noemi	90026	This project will displace people in need, those who diversify Lincoln Heights, those who make up this beautiful culture in LA.
Sammi spatz	90065	
Monica Jarquin	90302	I oppose this project because what we need right now is affordable housing, not luxury apartments!!
Anna Eisenman	90031	
Adam young	90004	This is going to create huge problems for the existing residents of Lincoln heights!!!
David Camacho	90031	Inefficient, unethical project
Mara Fisher	90031	This would be the largest housing development seen thus far in Lincoln Heights and does not represent the needs of the current residents of our neighborhood. This development would increase illegal evictions and fasttrack Lincoln Heights into further gentrification. Furthermore, the proposed structure(s) are completely incongruent with the current architectural landscape of the neighborhood.

Michael Navarro	90031	Not enough affordable housing units
Marcela Galeas	90033	This project was done without the consent or knowledge of the affected community. The people in this community are already in a difficult situation, going through with this project will only make their situations worse.
Zinzi Edmundson's	90065	Cruel eviction of neighborhood businesses, ruthless greed, blithely (racistly) dismantling YET ANOTHER community... I could go on!
Oscar Flores	91754	A project of this magnitude will increase illegal evictions in Lincoln Heights and contribute to the Ellis acting of multi family properties.
Matthew velis	90015	Historic areas should be kept how they are. Lower income areas should be crept how they are with improved education and resources. Stop kicking family's out with no where to go
Samuel Bosson	90031	This does not do anything to help the community of Lincoln Heights.
Kevin Lessley	90027	This development does not benefit the people of the community. It's not what they need. It's another eyesore in our city.
Daneyda Garcia	90031	As it is homelessness has become a greater issue for families in the community there is need for affordable housing not the opposite
Caleb Lyons	90026	I demand an end to this huge development that was secretly slipped by the public in a pandemic. There must be a dialogue with the people in the community of Lincoln Heights before another unaffordable monstrosity ruins another neighborhood of this great city.
Bruce Harrison	90712	I grew up in that area and would be a shame to see this building go up.
David Camacho	90031	Inefficient, unethical project
Clementine creevy	90042	Terrible use of funds!!! Please nobody wants this!
Marianne Verrone	90026	
Xenia Holm	43202	
Flynn Nicholls	90042	
Edith Almader	90031	
Amanda Gomez	91011	468 Luxury apartments at ave 34/ Pasadena ave are a direct threat to our community
Joan Robles	90065	Because they're trying to force hard working Latinos outta our community, no one right now during a pandemic can afford luxury apartments. And now with people coming forward that they were being paid to be pro for the proposed project is ridiculous. They need to investigate, we don't need another Huizar experience in our neighborhoods.
Patrick Albertolle	90041	It would completely destroy the neighborhood, the transplants will bring nothing new.
alexandra wuest	90065	This project doesn't serve the residents of this neighborhood and would exploit the neighborhood while displacing current residents.
Sandra Herwerth	90031	Size of proposed development out of scale for already densely populated Lincoln Heights. Lack of parking will result in tense situation for residents and will cause conflict. A suden population explosion of up to 2,000 new residents will put strain on resources and upset cultural balance. This is a power grab by thoughtless city leaders, in the pockets of greedy developers, who could care less about LH, its citizens and our way of living. No more development in LH!!
Jon Coplon	90042	We support including affordable housing in projects this size
Kae Whalen	90031	A lack of affordable housing in Los Angeles does not justify the violence of eviction and demolition of these homes—not to mention that the housing this project would eventually provide is almost certainly going to price out anyone remotely low-income or in danger of being unhoused. On top of that, there are a staggering number of empty lots in Lincoln Heights and LA at large, which could be used to benefit the unhoused and low-income residents of this city.
Adam young	90004	This is going to create huge problems for the existing residents of Lincoln heights!!!
Christian Sanchez	90043	history of lincoln heights needs to be preserved
Steven	90031	I oppose the project because of the possible rise in rent.
Cynthia Cuprill	90031	impact to community members - need mixed income housing not luxury apartments
Dave Chapple	90065	This does not belong in this neighborhood and will be met with resistance through every turn! Measure JJJ and the TOC plans do not take into account "taking down" and neighborhood that has been here for generations. Not fair. Political BS.
Ramon Lopez	90032	Gentrification
Leslye	90031	I'm oppose this project because it's gentrifying the community which means raise rent for renters who have lived there for several years destroy the culture in the neighborhood and erasing any sense of history we have left in the community.
Derek Allison	91016	I work at a school one block from this site, and this development would greatly impact the community I serve
Gabriel Quiroz	90063	This project is accelerating the gentrification of this community we need affordable housing for the current residents,not luxury apartments. The people of Lincoln Heights can't afford these luxury apartment, aren't you supposed to work for them and protect their interests? No on building luxury apartments on AVE 34
Anya Kushwaha	76092	Preserve the historic area of Lincoln Heights!

Sheyla	90601	i was already gentrified. Lincoln heights was my home for 26 years, as soon as i was born, it was all i knew. 2670 sichel st #5 is where all my memories are. I lost it due to developers coming in and claiming it. Lincoln heights is not new. Why is it changing now? People have homes and lives here where they are rent controlled. Do not uproot the people like i was. Not having anywhere to go causes homelessness and that is already an issue in LA. Gentrification hurts EVERYONE. Instead of luxury housing, make affordable housing for everyone. Or a better after school program for Lincoln high, gates elementary and the surrounding schools. Make it into something for the people that already live there not for the vultures.
Amber Ramirez	90031	I oppose this project because it is only going to hurt the people of Lincoln Heights. Buildings like these would bring more gentrifiers to our neighborhood and cause the displacement of low income POC.
miri day	90041	out of scale. the community doesn't want it.
D. Estrada	90042	This is not what the community needs
Valerie v	90029	Hurts communities. We need affordable housing!!!!
Stephanie Salinas	90046	I oppose all gentrification threats to longtime LA residents who are the backbone of this STATE and COUNTRY! Power to the people always.
Manuel M. Gutierrez	90025	Keep your gentrification out of communities who are already being oppressed from every direction, least we need is this hideous structure raising the rent on a low income community.
Amy Yao	90290	Housing should consider the economics of the current neighborhood and its citizens. There needs to be more affordable housing and not just more mega apartment condo complexes that are hardly affordable!!
George Gerst	90031	The project is way to big, and the developers have tried to get it passed without community involvement, and they have skirted the law if not broken it. We have evidence of bribery on TAPE!
Ansis Hoheisel	90026	Lincoln Heights needs affordable housing that fits in with the scale and character of the neighborhood! This monstrosity of a development will inevitably lead to the Gentrification band displacement of one of LA's most historic and most diverse neighborhoods. People > Profit!!
Max Maslansky	90031	It will accelerate further development and displace working class families
nancy soto	90031	This project is dangerous to our community and will displace many people
Jeremy Hansen	90031	Raise housing prices to push out lower income families, lack of parking.
Hesper Dominguez	91770	It's distasteful and unnecessary.
OMAR BRIAN CERROS	90262	Unaffordable housing
Vanessa S	90042	I oppose the project because of the displacement of families that the building of these condos will cause.
Anthony Lepore	90031	The construction site is adjacent to a lot that has been polluted for 68 years. This is an environmental hazard.
Angela Celestino	90032	This project targets my friends and family who've live in and love lincoln heights. This project isn't for the low income people of LA!!
Karla Orozco	90003	It is unfair to make a decision without the consent of those who reside in the area if you're going to build homing at least have the decency to make them affordable to the people (locals) who already reside in that area. I hate Gentrification!
Rogelio Perez	90011	As a former resident of Lincoln Heights it pains me to know that there's people being forced out of their homes due to rising prices. Not only do I believe that this sort of displacement is harmful and unethical, I also believe it's very insidious to disrupt the long cultural history of Lincoln Heights.
Frank	90031	This project is not intended to benefit any of us living in the area.
Salvatore Franchino	N/A	I support the project! 66 low income units near a mass transit station sound amazing. It'll help welcome new neighbors to your neighborhood and help alleviate high housing costs.
Amara Leipzig	90026	I am a resident of Historic Filipinotown where I have watched the same process unfold and destroy this neighborhood. What I watched happened before a global pandemic and the extreme lack of assistance to renters and mortgage payers during this time, so I can only imagine the impact now. We need to be providing (truly) affordable housing, not luxury apartments. This development is a disgrace.
Anna Heeter	98075	This new housing will negatively affect communities of color and push low-income people and families out of the area. They absolutely rely on the prices of their houses remaining the same and may end up losing their housing if this gentrification is allowed to happen.
Myrka Santana	90063	Lincoln heights needs affordable housing for the community that cannot afford high paying rent.
Joey Forsyte	90031	There are already three huge projects with laughable or no affordable housing. We need to protect this community. We expect our representative to not just meet us, but fight for us.
Melissa Hernandez	90032	To keep our community at affordable rate.
Marco Villarreal	90031	I want Lincoln Heights to stay affordable to myself and all of its residents
Vic Mendoza	90032	
peggysue piedra	90062	stop gentrification everywhere!
Cassandra Renteria	90031	I grew up in Lincoln heights! My whole family still resides there!! I do nt want my childhood erased!!

Chuck miskevich	90031	Because gentrification is evil and we need to leave Lincoln heights to its tenants who have lived there for years. We're talking generations.
Kevin Perez	90063	I want to help save the tenants being oppressed in Lincoln Heights.
Marilyn Gallegos	90031	Why would I support a project that I didn't know was happening in my neighborhood? And I don't want this neighborhood to be become hipster . They keep taking over our community's !
Vanessa	90031	We need to stop gentrification. The people of this community can not afford to live in these new "luxurious" buildings. This is unfair!
Zach Callahan	90031	Lincoln Heights is a peaceful, working class neighborhood. This building will do nothing to serve the community, which is already reeling from the economic effects of coronavirus. Instead, it will displace people and make way for people who have no investment in or appreciation for this unique and diverse community.
Chloe	90069	Because there should not be luxury apartments here. It's ruining the neighborhood
Jennifer Islas	90031	Many low class families live in Lincoln heights, how are they expecting for them to pay for high cost rent in a pandemic? There's only so much that these "benefits" can provide for them, it isn't enough!
Jenny tchang	90031	
Karina G.	90031	This is capitalism at its worst...build luxury apartments in other locations unless you are willing to take short term losses for long term gain...by investing in the communities being gentrified and exploited with these huge and unfair projects. Allow low income families into these luxury apartments or get out of these neighborhoods that mean so much to the people who have lived there thru generations; As these families deserve a good future instead of worrying about what neighborhoods they'll afford that won't affect their commutes and uproot their lives.
Allison Miller	90032	I live 2.5 miles from this site and find the socio-economic and environmental risks of this development abhorrent. There is no defense for this other than greed. Now, of all times, is the most obscene time to consider building something that will out the entire community at risk, on many levels.
Britt Woods	90041	I do not want the excavation of polluted soil near schools. We need to protect our children.
Katelyn	91001	Damage to the community in many ways. Examples being unaffordable, toxic grounds, no parking
rachelle Sawatsky	91001	It will displace long-time renters and community members. I have huge concerns for the environmental degradation of the site and the danger to be had by excavating it.
Rochelle	90031	The residents of this neighborhood deserve housing that they can afford. No more gentrification!
Erin	90031	It is a huge heath and public safety risk to an entire community and will impact generations of people and their lives and livelihood
Phil	90031	Dangerous one way access and egress along with toxins in the groundwater make this a public heath and safety issue
Nancy C.	90031	I think that's this project will bring up the gentrification percentages up and it'll also cause other people to have to move out of their current home to something they can afford. This project will most certainly make this happen and yes we do need a change but not something that'll affect someone else's life and force them to move somewhere else.
Phil	90031	Dangerous one way access and egress along with toxins in the groundwater make this a public heath and safety issue
Matthew Johnson	90023	The development is on toxic land, it contains far too few low-income residences, and there are not enough parking spaces for the amount of units.
Math	90026	
Jordana Rodríguez	96818	Having family in the area of Lincoln Heights and talking to them about the problems just shows how little effort the people from the City Hall take towards situations, it's all about the money. Gentrification also, not only will people lose their homes to new development, they will also lose their way of life and traditions. The people that live in the area should have a say on how their community will grow.
Minerva Flores	90031	I wasn't informed about this project at all and I am concerned about its impact on the residents of LHTs. I demand that a community meeting with the developers, city councilman and all involved in this project be scheduled so that the residents' voices may be heard.
Chloe	90022	My family grew up in Lincoln's heights and is seeking affordable housing but cannot afford luxury condos. Also it is an eye sore and will create more parking issues than there already is. This is not what the people who are actually from this community need!!!!
Aileen Jacquez	90032	I oppose this project because it will take a way from a lot of under privileged families who have lived in this part of LA county for years, to replace them with people who only want to live in this area because it is "trendy". Peoples homes are should not be taken away for that reason. You are also looking to build in an area that is already over populated. Putting in these apartments will only make things worse. There is already a large population of homeless growing in the Lincoln heights area due to Covid why displace more families just to please uncultured white people who don't full comprehend that paying for where they live has kicked out entire families!
Fatima	91387	This is pure erasure of history without any intention - just a bogus human with $ and no life or no culture. Keep this historic building as is and quit trying to erase others history!!!!!
Alex chaves	90063	
Hayden	90027	I don't agree with it.
Aseneth Flores	90031	There plenty of newly built luxury apartments. More are overkill. We need affordable apartments for working people.
Hayden	90027	I don't agree with it.

Sammy	90042	We need affordable housing, not luxury apartments
lindsay brant	91201	Because local residents should always have a voice in their future and because this development puts a whole community at risk of environmental toxicity and displacement
Hanneke Skerath	90048	
Karen	90032	Because Lincoln heights nor any side of NELA is for sale. Fuck gentrification and fuck anybody tryna displace the community.
Fyodor		They’re uprooting innocent families and homes for capitalistic greed
miriam horton	82414	people who can’t fight for themselves have been pushed around and kicked out of their own homes for far too long it needs to stop
Andy Seymour	90065	I oppose this development because it isn't wanted by or accessible to the Lincoln Heights community, and will lead to the displacement of the working class people of color who have lived in this neighborhood for generations.
Emily Miller	48912	
Mena Kim	19066	Because I have basic human empathy and don’t think luxury apartments are more important than human lives.
Jocelyn Litalien	3301	Putting 30000 bipoc out of a home for your own capitalistic greed is disgusting , especially now with the virus.
Gwen J		They have not considered how this project may harm or gotten the approval from the community
cj valdes	10001	
Maria	91506	Absolutely
Itzel	91340	
Hayat	99501	It’s wrong
Micah prado	28205	because this is wrong
Rachel	11222	gentrification on this scale robs local families of their ability to continue living as they have where they have and inequitably impacts people and communities of color.
Astrid	90065	This community is filled with low income families. Adding luxury buildings will kick out many of the families that been there for more than 10+ years
Gabrielle Garcia	90031	I am against displacement of our low income communities, and against the possible environmental damage that will happen if a development of this scale is approved. I do not trust our city officials to run enough tests to determine if this is safe for our community. We must demand full transparency and ensure no corruption is happening within these projects.
Tye	77027	
Halia Reiter	55320	
Sam Mercer	10001	It’s just wrong
sam	90039	we do not need luxury apartments, toxicity released via the building of this project, and gentrification kills.
Ringgo	90031	I believe we should preserve the history of this town.
london hayes	90048	
Kylie Potter	30263	this place already has homes for people no need to make more expensive ones
Liberty	78704	I oppose gentrification and injustice for poc
Kendall	75605	Because racism needs to end now. This is a revolution.
Isela	90033	What we need is low income apartments not luxury apartments. Luxury apartments will only rise up the rent and put more people on the streets
Jazmín Sandoval	91605	No to gentrification! This raises prices for low income people and families who have historically lived in these neighborhoods and now they want to put flashy expensive buildings driving out the minorities and creating more division, homelessness, and poverty.
Alanna Holt	90039	I oppose the violent displacement of working class Latinx communities. I oppose the City intentionally neglecting poor communities and then using the conditions they created as an excuse to then displace those communities.
Rubi	90031	Fuck gentrification also if you build this you don’t care about this community.
Anairis Morales	90037	Los Angeles Native should be able to afford rent but because of gentrification so many are being pushed away from their city!
Chloe Miri	91316	This is a blatant act of gentrification. In gentrifying the neighborhood, what is being done is essentially the rapid displacement of the community members. This causes greater homelessness in a city with one of the largest housing crises. Building unaffordable luxury apartments and housing will make it impossible to sustain a reasonable lifestyle for the community and will increase the issue of homelessness which is already an immense problem.
Lorraine Orgaz	90031	This project will displase me and my family. We have live here all of my life and this development will only harm our community
Tim Gibbons	90065	you must request community response prior to change
Zoe Jones	87106	Its bad for the environment and gentrification hurts predominantly poorer communities of color

Matthew	90010	Bc we need affordable housing not more luxury high rises
Helen Luna	90011	
Jesse	90035	Development encourages real estate speculation which drives up rents and forces our long term communities
Liam	2472	Bc these luxury apartments are not needed.
Lilla McMillan	90065	The community needs to be included in the conversation, they deserve the chance to be heard and say no if they do not want this new development in their community. It will change the neighborhood and make it an unsustainable and unaffordable place for them to live in the future, making way for more and more development and further exacerbating economic divides.
Cherith Zanghi	90012	These predatory projects drive up the cost of housing and displace the community. We demand affordable and equitable housing
Lindsay R	92648	
Mckenna harrell	71730	
Sabrina Torres	90032	We need to keep the health of the people safe by them staying home without the worry of having no home.
Mia Desiree	90032	housing is a human right and im tired of seeing predatory and opportunistic developers with the help of complicit politicians aiding in the displacement of local community members
Natalie Carrillo	90063	I cannot stand by and watch the displacement of my community.
Xinrui Chen	90032	I do not want my LA brothers and sisters to be displaced. I have grown up in this neighborhood and wish to keep communities intact.
Carolina Rendón	90031	Keep Lincoln Heights affordable for our residents of Lincoln Heights! Lincoln Heights is full of so much great history and due to gentrification, our neighborhood is now over priced! Lincoln Heights is our home!
Tracie Sánchez	90032	I oppose the project because of the environment impact the project May have on the surrounding community. Additionally I have concerns about gentrification and its potential affect on the livelihood and well-being of low income Families in Lincoln Heights. If built, the project would provide luxury luxury apartments while providing no access to low income families of Lincoln heights. Finally, Parking in the immediate surrounding is extremely limited and additional development would create an additional stress on parking availability and traffic levels.
Audrey Densmore	91344	I oppose displacement of local residents
Elvira Gil	90031	It’s Gentrification of the community!
Marlen	90032	This building does not serve the people of this community! This building will displace the people who have always lived here. Us brown and black people also deserve to stay and live in a community where we grew up. This is our home. Not a project for someone to come into and make profit off. Ridiculous!
Nelly Olivares	90031	I’ve been displaced before and I don’t want others to suffer what I experienced
Lorena Garido	90042	Because affordable housing stock will be seized by flippers and investors. lifelong residents will be permanently displaced or homeless
Elizabeth Moroni	90042	This project won’t protect the residents of Lincoln Heights, it’s unethical
Germán Montealvo	90031	Contaminated soil and air quality risks to entire area, lack of lower income units for residents and traffic increase on such a narrow street across the street from a school.
Ivon	90723	No to gentrification
Melisa Lopez	90039	
Michael Rosales	90042	Parking and traffic are already bad
Paige Arevalo	91106	
Mazie preite	90041	We need affordable housing and common decency for families
Travis Read-Davidson	90042	We need to prioritize communities when considering development projects. L.A. does not need more “luxury” housing, investment properties, or for profit housing corporations. We need truly affordable housing, and we need it NOW! We will not stand idly by while city council members take bribes and payoffs from developers to build more projects like this one. These tone deaf immoral developer projects serve only to make a handful of rich people richer and are destroying the fabric of the Los Angeles community.
Michael Kaphahn	90031	Because the the community wasn’t in the conversation. Gentrification and parking concerns
Abrielle Stedman	90041	The neighborhood doesn’t need this.
Sterling Wells	90042	We need to protect our community from gentrification. We need affordable housing to end homelessness. City Hall is corrupt and allows developers to break laws and they need to be held accountable to the laws that our citizens have voted for. City council members need to be accountable to their constituents, not destroy our communities through corruption with developers. Protect renters!
Francesco	90042	Housing is a right. Tax incentives and subsidies are provided to flippers but not to long term residents of Lincoln Heights? Flipping is not a job. It’s not hard work. It’s exploitation and should be illegal. Invest in the community

Julian Hoeber	90041	This proposal has wildly inadequate parking and will lead to overcrowding of streets and terrible traffic. The increased density will not come with commensurate services or be easily navigated and will lead to blight. Above all it will eventually price out a long-standing, diverse and vibrant community that will be replaced with a homogeneous populace. This is the antithesis of intelligent urban planning. It will harm the urban complexity that makes Los Angeles a great city for all sorts of people.
Aris Sevilla	90031	LA's housing and gentrification crises will only be exacerbated by more luxury housing
Ross Caliendo	90026	I am anti gentrification
James Krone	60607	Because it’s disgusting
Eden Lopez	90031	Protect the essence of what Lincoln heights is. The hard working people that make Lincoln Heights. Improve the heights for those of us that live here, not price people out to benefit rich individuals/developers.
Carolina Meza	90031	Because I live in the area and we live in a historical landmark and should be preserved as such
Rogelio Chavez	90031	No te gentrification
Lauren Esqueda	90022	I oppose this because the gentrification of Los Angeles is getting out of hand. Residents that have been here for many years should be able to reside in the communities that they love and are really all they know.
Ben Angelo	90031	It displaces historically marginalized groups who have called Lincoln Heights home for many decades. It was proposed and passed without the approval of the neighborhood. It will spell doom for the culture, businesses and residents of LH. Greedy opportunists are acting in their own interest during a time we as a nation are fighting a pandemic and systemic racism and classism. This is a shameful embarrassment for this city.
Francine Banda	93035	I oppose gentrification and the displacement of my people
Ashleigh Washington	90031	Current and long term residents of Lincoln Heights deserve safe supportive housing, not to be displaced from their neighborhood with no offer of the housing being built to them.
Alyssa Jaquez	91746	Gentrification is not good for the community.
RICHARD CHAVEZ	90031	This project is not good for my community. It’s going to drive out the people who really love this city and bring in people who already destroyed downtown LA
Gautam jain	91364	People have the right to remain in their place of residence without threat of being forcibly removed. This is an overreach of power and a disgusting display of the continuing supremacy of ownership over basic human rights.
Christal Perez	91770	Moving out poc during a pandemic is wrong. Also traffic density problems and terrible urban planning.
Legier Biederman	90031	Illegal evictions! horrendous development
Irwing Ornelas	90012	Why do we need luxury apartments? Just build normal homes.
Annabel Shabestari	90717	Will not serve the existing community of Lincoln heights and may likely actually harm the quality of life for the entire neighborhood.
Isabel Layton	90031	I stand with my neighbors. Out of over 400 luxury apartments only 66 are available to low income residents? What a joke. I'm appalled that this large of a projected was approved without the community's consent. What an eye sore. If this project moves forward it will cause immediate and severe irreversible damage to this community.
Maria Herrera	90031	This housing is not serving our community
Paola Alvarado	90031	We must put an end to gentrification and support our community.
Marleen Munoz	90032	It will increase evictions and likely cause more gentrified to move to our Lincoln Heights and El Sereno communities
Samantha Mendoza	90031	The effects of gentrification on the demographic that resides in Lincoln heights will be catastrophic. People have lived here their whole lives, they do not deserve to be pushed out of the community they built to further capitalistic endeavors.
Maria Herrera	90031	This housing is not serving our community
Gabriella Sanchez	90014	This development would threaten the rent and housing stability for people already living in the neighborhood.
Maria Herrera	90031	This housing is not serving our community
Stephanie Castillo	90031	I oppose this, it goes against this community , the research speaks for itself & during this time it is not what the community needs there are far more better improvements that should be brought to this area
Dorian Pinuellas	90031	School safety, more traffic
Yadira Cruz	90031	GENTRIFICATION IS CLASS WAR. IT IS AN ACT OF COLONIALISM. LINCOLN HEIGHTS BELONGS TO THE PEOPLE. IT BELONGS TO OUR WORKING CLASS COMMUNITY. It will be detrimental to our environment in the hills.
Jazmin Oceguera	90063	Gentrification
Lucius Nicholson	90031	Not beneficial to the neighborhood
Mark Llamas	90031	This project will make my neighborhood more difficult to afford for my low income family and neighbors. Stop This project
Christian Adams	90031	It’s the beginning of the end of my history and culture.
Janice	90031	The community is already suffering and this project brings illegal evictions and displaced residents. This isn't ethical!

Forrest Penny-Brown	90031	It is not in keeping with the spirit/culture/wishes of the community
Eden Lopez	90031	Do not see how it benefit the existing community. Perhaps the new community you want but what about the existing community. Traffic conditions, air quality conditions, wastewater conditions, parking conditions, changes the community..
Dydia DeLyser	90031	I oppose forced gentrification, inappropriate development, and environmental risk for the community
Camille Kolodziejski	90031	Unsafe for Lincoln Heights health— stressful for our community in terms of mass gentrification
Jossef Virgen	90031	Environmental racism! We gotta protect the health of the neighborhood and avoid a huge wave of gentrification
Bella Fabiani	90041	To protect Lincoln Heights and the families that live there
Patrick Martinez	90041	Because this is a form of economic violence and will displace many of the existing residents in Lincoln Heights
Martina Risteska	90028	Because excavating the land will release toxic fumes into the air and the people of Lincoln Heights deserve better than that. Let's help protect this space from big money that has no interest in what's best for the community and only sees dollar signs. We don't need more of that!
Zion		tired of seeing our community destroyed
David Vera	90031	Because it will affect people that I care about
Robin Voves	90031	Keep housing affordable in Lincoln Heights!
Valeria Hernandez	90031	I oppose this project because Lincoln heights has been my home since birth. I seen these streets change over the past year and remember the day gentrification slowly started happening here. First it was Lincoln mini mall being torn down to be built into a doll park tree that didn't even end up staying open because it wasn't a good store to put here! Now we have allot of for lease space in shops in Broadway and all for what? People are losing their business because they can't afford to PAY! Many people I know are being kicked out of their houses and it is not ok! We will NOT LET THIS HAPPEN we have seen to many neighborhood communities that have changed because of gentrification just like highland park.. the history of highland park isn't even there within itself anymore because everything has changed and that isn't going to happen here! How is it that you can have homeless people on the sidewalks and in the community you want to build luxury apartments in, the fact that there's no remorse for people and their family. Another reason as to why I oppose this project is because I live about a block away and always use that street when other sections are blocked off, since it is a street that has a lot of traffic during the morning especially! It would be difficult for me and my siblings to get to school on time because of this and I know because I used to take the bus on that street every morning to school which is what caused my tardy slips. Now imagine having 400 or more residents here.. infront of a elementary in the front of a busy street not so great if you ask the community and the people who live here, who take these busy streets everyday, and who are parents of students at this elementary. I want to ask the city council how is this the the "American dream"? To the city of Lincoln heights it's opposite you're breaking OUR DREAMS we love our community the way it is and we always have we don't want luxury apartments, we don't want little "fancy coffee shops", we don't want THE BRINE we don't want the FLATOP mansion or anything new here in that matters especially if the people from OUR OWN COMMUNITY ARE BEING HURT BY THIS. It's Safe to say one should care for the people of its community and not the money you're getting out of what investments you bring here please reconsider this plan and thank you for taking time to read .
Oscar Ortega	90031	it's gentrification. It does not benefit the neighborhood. Its an attack on the working class
Kurt Webster	90031	If you are building an apartment complex with 1,500 residents and only 286 parking that is a BIG problem! Parking in this area is already troublesome!
ADAn	90032	A 468 unit Luxury development at ave 34/ Pasadena Ave is a threat to our health and well being.
Suki Diaz	90031	
Daisy Frias	90065	Because our neighborhoods are becoming more and more gentrified
Maria Martin	90022	gentrification causes homelessness!
Michelle Suarez	90065	I oppose this project because it will displace an entire community, and cause irreparable harm to human beings. It must be stopped.
D. Sherwood	90039	Environmentally unsafe, potencially environmentally illegal, including environmental impact, environmentally and culturally unsound for community. All environmental impacts must be researched and any impact entirely remediated into the future.
Jennifer Mendoza	91030	As someone who grew up in the community of Lincoln Heights this isn't an affordable project for the members of the community.
Tracie Sánchez	90031	I am afraid of the environmental impacts of the project, including the increased traffic, the potential affects on the river, the air quality, and the toxic waste located underground that may be exposed during construction. Additionally, I have concerns that the construction of this property will invite outsiders to displace low income immigrant Lincoln heights residents. Finally, I am not confident in the approval process the contractors have undergone to this point- I believe there may be some foul play.
Matt Whitmire	90065	It is not a clean lot to develop on and there are FAR too few parking spaces. The underground garage should be double the size before proceeding.
Lisa Marie Hanson	90065	We need a market not another luxury building
Brian B	90031	It's causes gentrification and will raise market value for all the residence
Maria Sanchez	90012	I live in the area. I strongly oppose gentifrication. I do not want the Latino and Asian community to be forced out of the Lincoln Heights neighborhoods. This project is unconsiderate to low income families. Even though it has claimed to provide low cost housing.

Sarah Hill	90031	Not only is it an environmental hazard for the people of Lincoln Heights, but it is an act of gentrification too and will force people out of their homes.
Sofia Ruiz	91502	Gentrified neighborhoods are a threat to small and local businesses!
Jack Foley	90031	It will displace people and ruin lives for the purpose of creating profit and pandering to the interests of the wealthy
