EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

USGS TOPOGRAPHIC MAP

Target Property Map:	5630795 LOS ANGELES, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

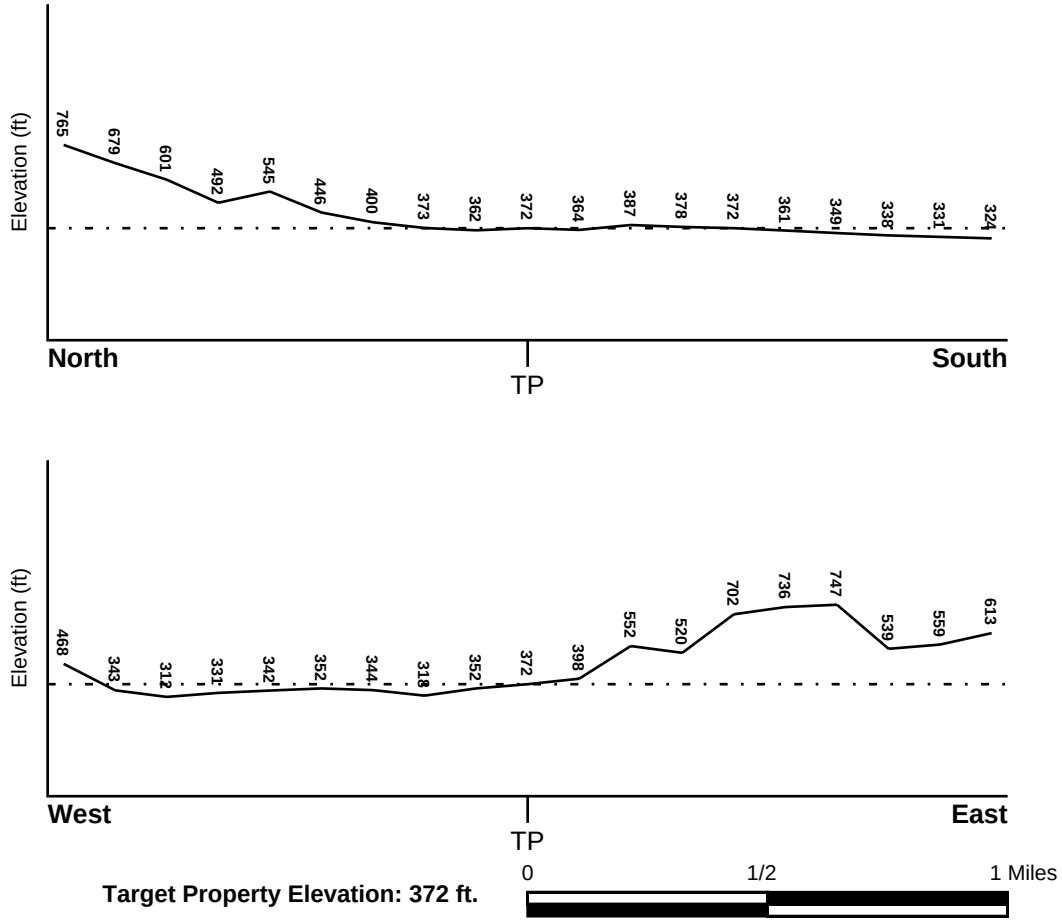
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

LOS ANGELES	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
2	1/2 - 1 Mile SSW	Not Reported
1G	1/2 - 1 Mile SSW	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	HAMBRIGHT
Soil Surface Texture:	gravelly - loam
Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class:	Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 10 inches
Depth to Bedrock Max:	> 20 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information

Environmental Assessments & Consulting

September 28, 2012

Mr. Robert Gonzales
Citizens Business Bank
1010 East Colorado Boulevard
Pasadena, CA 91106

Re: Phase I Environmental Site Assessment Report

Dear Robert:

Enclosed is our Phase I Environmental Site Assessment Report on the multi-tenant commercial property located at 135, 141 and 153 West Avenue 34 and 3401 and 3433 Pasadena Avenue in Los Angeles. Also enclosed is our invoice for services.

Effective July 1, 2012, the Governor of California terminated the California Registered Environmental Assessors (REA) Program. What does this mean for our clients? Nothing. Orswell & Kasman, Inc. will continue to prepare the same quality reports our customers have been accustomed to receiving. The USEPA and ASTM International have set standards which define the qualifications of environmental professionals. Although there is no longer a California registration program, all of our reports will be prepared by trained environmental assessors and reviewed by an ASTM Qualified Environmental Professional

If you should have any questions concerning any information in the report, please feel free to call me. Thanks again for the opportunity to be of service.

Sincerely,

James Orswell
Environmental Assessor

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

MULTI-TENANT COMMERCIAL PROPERTY
135, 141 AND 153 WEST AVENUE 34
3401 AND 3433 PASADENA AVENUE
LOS ANGELES, CALIFORNIA 90031

1.0 SUMMARY

Based on a review of regulatory records, historical site information, and a visual inspection of the subject property and surrounding area, this assessment has revealed no *recognized environmental conditions* or *historical recognized environmental conditions* in connection with the Property, except as follows:

1) The subject property is occupied by multiple tenants. The 3433 Pasadena Avenue building is currently occupied by Warner Brothers Studios, a prop and set design business. The business stores and uses large quantities of water-based paint, and waste paint is generated by the business activities. The hazardous materials and hazardous wastes appear to be properly stored and managed and no significant spills or leaks were observed on the premises; and

2) Eleven offsite locations have been identified as potential risks or threats to the subject property. According to the data, ten of the sites are not located in the near vicinity, and there is no indication that contaminants from these sites have migrated onto the subject property.

   The former Welch's Uniform Facility site (#5 on map), 3505 Pasadena Avenue, is located on the adjacent property to the north, and the business is identified by State of California Environmental Protection Agency (CAL-EPA) Department of Toxic Substances Control (DTSC) as an active hazardous waste site. According to the DTSC CalSite database records, the site was previously occupied by Welch's Uniform and the property was used as a laundry and uniform rental facility over a 70 year period. Environmental studies indicate the soil and groundwater beneath the facility is contaminated with volatile organic compounds including trichloroethene (TCE). In addition, the former Welch's Uniform Rental site is identified by the State of California Regional Water Quality Control Board (RWQCB) as having two open RWQCB Cleanup Program sites. The first case was first opened in December 1987. According to the RWQCB records, the groundwater was contaminated with non-petroleum hydrocarbons, and the site is undergoing verification monitoring. The second case was opened in December 1998 and the site is undergoing an assessment. A review of the City of Los Angeles Fire Department (LAFD) records revealed Welch's Uniform applied for a permit to remove a 2,000-gallon underground diesel fuel tank in 1987. Soil sampling beneath the tank revealed significant Total Petroleum Hydrocarbon as gasoline (TPH-g)

contamination (8,600 ppm). The groundwater beneath the site was determined to be about 35 feet below the ground surface, and the groundwater flows away from the subject property in a west-northwest direction. In February 1988, Welch's Uniform applied for a permit to abandon five underground storage tanks in-place, and in December 1988, Welch's Uniform applied for a permit to remove five additional underground storage tanks. In May 2004, Welch's Uniform applied for a permit to remove one additional 1,000-gallon underground storage tank. Soil sampling beneath the tank did not detect any contamination problems, and on October 26, 2004, the DPW/UGT issued a no further action letter for the closure of the 1,000-gallon underground tank. An inspection of the property revealed the site is currently a vacant lot, and remedial activities were being conducted on the site.

Should it be determined the groundwater beneath the subject property has in fact been impacted by the Former Welch's Uniform Rental site, it is the policy of the State of California and the United States Environmental Protection Agency not to hold property owners responsible for costs to clean up contaminated groundwater beneath their property, unless the owners contributed to the problem. There is no indication from a review of the regulatory records and a site inspection that the subject property has had any problems concerning the storage, usage or disposal of hazardous materials, and it appears the former Welch's Uniform Rental site is in the process of addressing the contamination problem.

Our review of regulatory and historical records, a visual inspection of the site and surrounding area, and interviews with the property owner and the safety manager for Warner Brothers Studios has found no evidence of other *recognized environmental conditions or historical recognized environmental conditions* which are likely to impact the subject property. Although data failure occurred in the historical uses of the Property prior to 1906, it is unlikely the data failure will impact the ability to identify *recognized environmental conditions.* Based on the results of this assessment, no further environmental studies are recommended for the site.

2.0 INTRODUCTION

2.1 Purpose

The purpose of this Phase I Environmental Site Assessment is to determine if any *recognized environmental conditions* or *historical recognized environmental conditions* exist on or near the subject property. As defined by ASTM Standard Practice E 1527-05, a *recognized environmental condition* is the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public

health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

The ASTM Standard defines a *historical recognized environmental condition* as a condition which in the past would have been considered a *recognized environmental condition*, but which may or may not be considered a *recognized environmental condition* currently. If a past release of any hazardous substance or petroleum products has occurred in connection with the property and has been remediated, with such remediation accepted by the responsible regulatory agency, this condition shall be considered a *historical recognized environmental condition.*

The ASTM Standard Practice E 1527-05 requires all obvious uses of the Property shall be identified at five year intervals from the present, back to the Property's first developed use, or back to 1940, whichever is earlier, using standard historical sources. Developed use includes agricultural uses or placement of fill dirt. Data failure occurs when these objectives are not met. Our review of standard historical sources include aerial photographs, fire insurance maps, local street directories, and building department or assessor's property records. Our experience in performing Phase I Environmental Site Assessments since 1990 has determined that the other standard historical sources identified in the ASTM Standard Practice E 1527-05 are not reasonably obtainable or likely to be sufficiently useful, accurate, or complete in terms of satisfying the objectives.

2.2 Detailed Scope of Services

This report is based on a preliminary study into the past and current uses of the subject property and the surrounding area. The report includes a visual inspection of the property and adjacent sites, and a review of regulatory agency records, aerial photographs, and other historic record sources. Also included in this report are maps, diagrams, and photographs pertaining to this site.

2.3 Significant Assumptions

The information in this report is furnished in good faith and was obtained from sources and databases considered to be reliable; however, nothing in this report should be construed as a promise or guarantee that the subject property is free of environmental hazards. In many instances, this report relies on regulatory database information provided by federal, state and local governmental agencies. Although the database information used in this report consists of the most recently released records, it may not reflect the actual current status of the case.

2.4 Limitations and Exceptions

This report was prepared in conformance to meet or exceed the scope and practice as set forth by the American Society for Testing & Materials (ASTM) Standard Practice E 1527-05, "Standard Practice of Environmental Site Assessments: Phase I Environmental Site Assessment Process." No tests were conducted, and no samples of air, water, soil or building materials were taken.

This report is limited in nature and should not be construed to be a characterization of environmental regulatory compliance or of any conditions above or below grade. The evaluations in this report are based on information provided by interviews, readily accessible regulatory and historical records and observations made during the site inspection. No independent verification of the information was obtained or performed by Orswell & Kasman, Inc.

Orswell & Kasman, Inc. prepared this report in a competent and professional manner in accordance with sound industry standards, practices and procedures. No warranty is provided regarding the actual site conditions described in this report beyond matters amenable to visual confirmation. We make no representation or warranty regarding the accuracy or reliability of information or documents provided by others and contained within this report.

2.5 Special Terms and Conditions

No special terms or conditions have been incorporated into the preparation of this report. There were also no limiting physical conditions such as rain or lack of electrical power, that had a limiting effect on the site inspection.

2.6 User Reliance

This report is prepared for the express use of the client, and its contents are considered to be privileged and confidential. Acceptance of this report constitutes an agreement by the client to assume full liability for information contained herein. This report is for the sole use and interpretation of the client and it is not be reproduced or distributed to outside parties.

3.0 SITE DESCRIPTION

3.1 Location and Legal Description

The subject property, 135, 141 and 153 West Avenue 34 and 3401 and 3433 Pasadena Avenue, Los Angeles, California, is located at the northwest corner of West Avenue 34 and Pasadena Avenue. The property is described as Los Angeles County Tax Assessor's Parcel Numbers (APNs) 5205-004-003, 5205-004-005, 5205-004-007 and 5205-004-011.

3.2 Site and Vicinity General Characteristics

The site consists of five industrial buildings with paved parking and storage areas, located in a mixed industrial, commercial and residential area of Los Angeles (see site plan).

3.3 Current Use of Property

The subject property is currently occupied by Ortiz Bros. Moving and Storage, Submission Factory, Water Wellness and Warner Brothers Studios. No heavy manufacturing activities take place on the site.

3.4 Descriptions of Structures, Roads, Other Improvements On Site

The subject property is occupied by five single-story light-industrial buildings, which are described as follows:

The 3401 Pasadena Avenue building consists of a single-story wood-frame and brick light-industrial structure which is divided into an office area and a warehouse area.

The 3433 Pasadena Avenue building consists of a single-story wood-frame and concrete-block light-industrial structure which is divided into an office area and a production area.

The 135 West Avenue 34 building consists of a single-story corrugated steel warehouse.

The 141 West Avenue 34 building consists of a large industrial warehouse which is divided into an office area and a warehouse area.

The 153 West Avenue 34 building consists of a single-story brick light-industrial building.

The heating, ventilation and air conditioning (HVAC) systems for the buildings appear to be mounted on the roofs of the three larger buildings and on the side of the 141 Avenue 34 building. No HVAC systems were observed for the smaller buildings located on Avenue 34. There are asphalt and concrete paved parking areas and open storage areas surrounding the buildings. The site and surrounding area are fairly level, and the subject property is connected to the municipal water and sewage systems.

3.5 Current Uses of the Adjoining Properties

North of the subject property is a vacant lot. Pasadena Avenue is to the east, and further east is Hillside Elementary School, an apartment building and several residences. Avenue 34 is to the south, and further south are several residences, three unidentified commercial buildings, a parking lot and two additional commercial buildings which are occupied by VGA Apparel and an unidentified screen printing business. West of the site is a railroad right-of-way and further west is an unidentified industrial building and a large parking lot.

4.0 USER PROVIDED INFORMATION

4.1 Title Records

No recorded land title records were provided by the client for review.

4.2 Environmental Liens or Activity and Use Limitations

The client has not provided any information concerning environmental liens or activity and use limitations.

4.3 Specialized Knowledge

No specialized knowledge of *recognized environmental conditions* or *historical recognized environmental conditions* in connection with the subject property has been provided by the client.

4.4 Commonly Known or Reasonably Ascertainable Information

The client has not provided any commonly known or reasonably ascertainable information within the local community about the subject property that is material to *recognized environmental conditions* in connection with the site.

4.5 Valuation Reduction for Environmental Issues

No information has been provided by the client which indicates the subject property is being sold or purchased at a significantly reduced price due to outstanding environmental issues.

4.6 Owner, Property Manager, and Occupant Information

Information provided by the owner, property manager, and/or occupants of the site are included in this report under Section 7.0, Interviews.

4.7 Reasons for Performing Phase I Environmental Site Assessment

The reasons for performing this Phase I Environmental Site Assessment are to satisfy commercial real estate lending requirements or provide due diligence information concerning the historical uses and current condition of the site.

4.8 Other User Provided Information

A Phase I Environmental Site Assessment Report was completed for the 141 Avenue 34 building by Orswell & Kasman, Inc. on March 2, 2000. The report indicates that the 141 Avenue 34

building was occupied by Studio 34, a film production studio and Select Storage, a storage facility. The report states that small quantities of water-based and oil-based paints were used and stored inside the building and the materials appeared to be properly stored and managed. The report stated that the property owner, Eric Ortiz was interviewed, and Mr. Ortiz stated the production companies are responsible for the disposal of any paint wastes which are generated inside the production areas. He was not aware of any chemical spills or contamination problems with the site. The report concluded that the adjacent property to the north (Welch's Uniforms) was identified as a clean-up site that was addressing the contamination problem, and based on the results of the assessment, no further environmental studies were recommended for the site.

A Phase I Environmental Site Assessment Report was completed on the 135 Avenue 34 and 3401 Pasadena Avenue buildings by Orswell & Kasman, Inc. on August 1, 2005. The report indicates that the buildings were occupied by United Finishing and Laminating, a commercial laminating business. The report states that small quantities of lubricating oil, bio-degradable detergents, glues and gear oil were observed to be used and stored inside the building and the materials appeared to be properly stored and managed. The report stated that the business owner, Pat Moller was interviewed, and Mr. Moller stated the business used and stored small quantities of hazardous materials, which were stored in five-gallon containers inside a fenced compound in the storage yard, and he said no hazardous wastes are generated from the business operations. He was not aware of any chemical spills or contamination problems with the site. The report concluded that the adjacent property to the north (Welch's Uniforms) was identified as a clean-up site that was addressing the contamination problem, and based on the results of the assessment, no further environmental studies were recommended for the site.

5.0 RECORDS REVIEW

5.1 Standard Environmental Records Sources

FEDERAL AGENCY RECORDS

United States Environmental Protection Agency (USEPA)
National Priorities List

The National Priorities List (NPL) identifies abandoned or uncontrolled hazardous waste sites which have been identified as possibly representing a long-term threat to the public health or environment. These sites have been identified as being highly contaminated with hazardous substances and represent the USEPA's target enforcement and cleanup efforts. Studies of individual sites are conducted by the USEPA to determine level of contamination, and the sites are then compared and ranked to other sites on the NPL.

A review of the USEPA National Priorities List dated September 2011 indicates there are no proposed, final or delisted sites within one mile of the subject property.

Phase I Environmental Site Assessment Report
135, 141 and 153 West Avenue 34
3401 and 3433 Pasadena Avenue
September 28, 2012

United States Environmental Protection Agency (USEPA)
Federal Superfund Liens List

The USEPA maintains a list of Superfund Lien sites that have been issued on properties throughout the United States. These sites have been remediated through the expenditures of Superfund monies; the purpose of the lien is to prevent the property owner from gaining a financial benefit from the federal government's cleanup and restoration activities.

A review of the July 2011 Federal Superfund List revealed there are no Superfund Liens on or adjacent to the site.

United States Environmental Protection Agency (USEPA)
Comprehensive Environmental Response, Compensation
and Liability Information System (CERCLIS)

The USEPA has developed a database known as CERCLIS which contains information on potential hazardous waste sites located throughout the United States. There are over 33,000 sites on the CERCLIS inventory. All sites are subjected to a preliminary assessment and thereafter are either placed on the National Priority List (NPL) or are placed in a category for those sites requiring no further Federal Superfund action.

A review of the September 2011 CERCLIS report indicates there are three CERCLIS sites within a ½ mile radius of the subject property:

Kennington Ltd. (ITT Cannon) (#1 on map)
3209 Humboldt Street
Los Angeles, CA 90031

This site investigation was opened in February 1994. According to the records, a preliminary assessment was completed in August 2001, and a site reassessment was completed in May 2006. No further remedial action has been reported for this site.

NI West Incorporated (#2 on map)
3011 Humboldt Street
Los Angeles, CA 90031

This site investigation was opened in January 1993. According to the records, a combined preliminary assessment and site assessment was completed in September 2005. No further remedial action has been reported for this site.

Jaybee Ajax Manufacturing (#3 on map)
301 West Avenue 26
Los Angeles, CA 90031

This site investigation was opened in March 2000. According to the records, a preliminary assessment was started in October 2002 and in July 2007. No further remedial action has been reported for this site.

There is one listed "No Further Required Action Planned" (NFRAP) site identified within a ½ mile radius:

Baron Manufacturing (#4 on map)
241 Avenue 26
Los Angeles, CA 90031

This site investigation was opened in June 1981, and a preliminary assessment was completed in September 1984. The investigation concluded that the facility does not qualify for the NPL and no further required actions are planned for this site.

United States Environmental Protection Agency (USEPA)
Resource Conservation and Recovery Act (RCRA)
Treatment, Storage or Disposal Facilities (TSDF)

The USEPA maintains a list of facilities which have been authorized to receive hazardous waste. These facilities have permits to treat, store, or dispose of the waste, as determined by the RCRA regulations. In addition, the USEPA publishes a list of those facilities who are subject to a corrective action, based on the facilities' waste handling and storage procedures. The facilities which are subject to a corrective action are identified as CORRACTS sites.

A review of the March 2011 RCRA TSDF list determined there are no known CORRACTS facilities within a one mile radius of the subject property. In addition, there are no non-CORRACTS TSD facilities listed within a ½ mile radius.

United States Environmental Protection Agency (USEPA)
Resource Conservation and Recovery Act (RCRA)
Hazardous Waste Generators

The USEPA maintains a list of facilities which are identified as generators of large and small quantities of hazardous waste. These facilities have permits to generate, store and dispose of the waste, as determined by the RCRA regulations.

A review of the March 2011 RCRA Hazardous Waste Generators list determined the subject property (American Caster Corporation, 141 West Avenue 34; Bad Teacher Construction

Warehouse, 3433 Pasadena Avenue) is identified as a small quantity hazardous waste generator. In addition, there are records of a large quantity hazardous waste generator identified on the adjacent property to the north (former Welch's Uniform site, 3505 Pasadena Avenue), and a small quantity hazardous waste generator to the east (Los Angeles Unified School District Hillside Elementary, 120 East Avenue 35),

United States Environmental Protection Agency (USEPA)
Institutional Control / Engineering Control Registries

The USEPA maintains a list of institutional and engineering controls for the purpose of tracking sites that may contain residual contamination or have activity and use limitations. Engineering controls are engineering measures designed to minimize the potential for human exposure to contamination by either limiting direct contact with contaminated areas or controlling migration of contaminants. Institutional controls are non-engineering controls used to restrict land use or land access in order to protect people and the environment from exposure to hazardous substances remaining at the site or facility.

A review of the September 2006 USEPA Institutional Control / Engineering Control Registry did not identify the subject property as having institutional or engineering controls.

United States Environmental Protection Agency (USEPA)
Office of Emergency and Remedial Response
Emergency Response Notification System (ERNS)

The USEPA maintains a list of locations which have reported a release of oil or hazardous substances to the federal government. Most of the data in this system is based on information that was received during the initial notification.

A review of the ERNS list for 1999 determined there are no reported incidents on the subject property.

United States Department of Homeland Security
United States Coast Guard
National Response Center (NRC)

The NRC is the national point of contact for reporting all oil, chemical, radiological, biological and etiological discharges into the environment anywhere in the United States and its territories. In addition to gathering and distributing spill data for Federal On-Scene Coordinators and serving as the communications and operations center for the National Response Team, the NRC maintains agreements with a variety of federal entities to make additional notifications regarding incidents meeting established trigger criteria.

Phase I Environmental Site Assessment Report
135, 141 and 153 West Avenue 34
3401 and 3433 Pasadena Avenue
September 28, 2012

A review of the NRC list for 2012 determined there are no reported incidents on the subject property.

STATE AGENCY RECORDS

State of California
Environmental Protection Agency (CAL-EPA)
Department of Toxic Substances Control (DTSC)

CAL-EPA is responsible for the regulation and enforcement of environmental health laws within the state of California, as set forth by the California Health and Safety Code. CAL-EPA is also designated by the USEPA to assist in enforcing federal environmental laws. CAL-EPA regulates companies involved in the generation, transportation, storage and disposal of hazardous substances. CAL-EPA records include the "CalSites" database, which is a listing of 7,800 known active, inactive and abandoned hazardous waste sites. These sites have previously been reported in the Abandoned Site Program Information System (ASPIS), Bond Expenditure Plan (BEP), and Cortese databases. CAL-EPA records also include a listing of the California Integrated Waste Management Board's "Active" and "Closed and Inactive" landfills database.

A review of the January 2012 CAL-EPA records determined there are six listed "CalSite" facilities within one mile of the subject property:

Kennington (#1 on map)
3209 Humboldt Street
Los Angeles, CA 90031

This site was placed in "Active" status in April 1996. According to the records, the soil is contaminated with polychlorinated biphenyls (PCBs), tetrachloroethylene (PCE), and other chemicals. A site investigation or remediation of the site is currently in progress.

Jaybee Site at Lincoln Heights (#3 on map)
301 West Avenue 26
Los Angeles, CA 90031

This site was placed in "Active" status in April 2004. According to the records, the soil is contaminated with naphthalene, toluene, and other chemicals. A site investigation or remediation of the site is currently in progress.

Phase I Environmental Site Assessment Report
135, 141 and 153 West Avenue 34
3401 and 3433 Pasadena Avenue
September 28, 2012

Former Welch's Uniform Facility (#5 on map)
3505 Pasadena Avenue
Los Angeles, CA 90031

This site was placed in "Active" status in May 2007. According to the records, the soil is contaminated with trichloroethylene (TCE). A site investigation or remediation of the site is currently in progress. According to the records, the site was previously occupied by Welch's Uniform and has been used as a laundry and uniform rental facility over a 70 year period. Environmental studies conducted at the site indicate the soil and groundwater beneath the facility is contaminated with volatile organic compounds including trichloroethene (TCE).

Loreto Street Elementary School Addition (#6 on map)
3408 Arroyo Seco Avenue
Los Angeles, CA 90065

This site was placed in "Inactive - Needs Evaluation" status in September 2006. DTSC has determined that a Preliminary Endangerment Assessment or other evaluation is required.

Victor Industrial Battery (#7 on map)
138 North San Fernando Road
Los Angeles, CA 90031

This site was placed in "Certified Operation and Maintenance – Land Use Restrictions" status in March 1995. According to the records, the soil is potentially contaminated with liquids with PH<=2, acid solution 2>PH with metals, and other chemicals. Properties with Land Use Restrictions have limits on future property uses required by DTSC due to residual levels of contamination or the type of cleanup actions conducted.

National Aircraft Equipment Co. (#8 on map)
275 North Avenue 19
Los Angeles, CA 90031

This site was placed in "Inactive - Needs Evaluation" status in July 2005. DTSC has determined that a Preliminary Endangerment Assessment or other evaluation is required.

There are no active, closed or inactive landfill sites within a ½ mile radius of the subject property.

Phase I Environmental Site Assessment Report
135, 141 and 153 West Avenue 34
3401 and 3433 Pasadena Avenue
September 28, 2012

State of California
Environmental Protection Agency (CAL-EPA)
Department of Toxic Substances Control (DTSC)
Land Use Covenants

CAL-EPA/DTSC utilizes Land Use Covenants (LUCs) to protect the public from unsafe exposures to residual contamination that is left in place after site remediation activities have been completed. The LUC imposes limitations on land use when hazardous materials, wastes, or substances remain on the property at levels which are not suitable for unrestricted use of the land. The LUC includes easements, servitudes, covenants, and restrictions which run with the land and continue into perpetuity unless modified or terminated in accordance with applicable law. All LUCs are signed by the DTSC and the landowner, and recorded in the county where the land is located.

A review of the January 2012 DTSC database records did not identify any deed restrictions on the subject property.

State of California
Water Resources Control Board
Regional Water Quality Control Board (RWQCB)
Land Use Covenants

RWQCB utilizes Land Use Covenants (LUCs) to protect the public from unsafe exposures to residual contamination that is left in place after site remediation activities have been completed. The LUC imposes limitations on land use when hazardous materials, wastes, or substances remain on the property at levels which are not suitable for unrestricted use of the land. The LUC includes easements, servitudes, covenants, and restrictions which run with the land and continue into perpetuity unless modified or terminated in accordance with applicable law. All LUCs are signed by the RWQCB and the landowner, and recorded in the county where the land is located.

A review of the June 2011 RWQCB database records did not identify any deed restrictions on the subject property.

State of California
Water Resources Control Board
Regional Water Quality Control Board (RWQCB)

The RWQCB is responsible for monitoring the quality and flow of groundwater, and they address other potential threats to the groundwater from surface spills and leaks. The RWQCB monitors the contamination problem, the investigation and any remedial action. Their database information includes active and closed Cleanup Program Sites, Land Disposal Sites, Leaking Underground Storage Tank (LUST) Sites, Military Cleanup Sites, Military Privatized Sites,

Military Underground Storage Tank Sites and registered underground storage tank sites (RWQCB sites) within the State of California.

A review of the January 2012 RWQCB records determined the subject property is not listed as a known RWQCB site. According to the records, there is one known open RWQCB LUST site within a ½ mile radius of the subject property:

Chevron Station #9-3707 (#9 on map)
2601 North Figueroa Street
Los Angeles, CA 90065

This site was opened in September 1992. According to the records, the site is identified as an open LUST Cleanup Site that is undergoing a site assessment.

According to the records, there are one active non-LUST RWQCB Cleanup sites adjacent to the subject property:

Former Welch's Uniform Rental Site (#5 on map)
3505 Pasadena Avenue
Los Angeles, CA 90031

This case was first opened in December 1987, and the site is identified as an open Cleanup Program Site that is undergoing verification monitoring. According to the records, the groundwater is contaminated with non-petroleum hydrocarbon. A second case was opened in December 1998. According to the records, the site is identified as an open Cleanup Program Site that is undergoing a site assessment.

There are no records of registered underground storage tanks on the subject property, however, there are historical records of an underground storage tank on the adjacent property to the north (Welch's Uniform Rental Site, 3505 Pasadena Avenue).

5.2 Additional Environmental Record Sources

State of California
Department of Conservation
Division of Mines and Geology (CDMG)

The CDMG conducts studies, publishes maps, and provides information concerning the geological formations throughout the state of California. CDMG research information is combined with information from the United States Geological Survey and the ensuing geologic maps of the state are prepared. These geologic maps also illustrate the approximate locations of known earthquake faults.

A review of the area map published by CDMG indicates the geologic area surrounding the subject property consists of Recent alluvium, which includes alluvial fan, flood-plain, and streambed deposits. The client may wish to refer to the enclosed geologic map.

State of California
Department of Oil
Gas and Geothermal Resources (DOGGR)

The DOGGR regulates the drilling, operation and abandonment of gas and oil wells throughout the state of California. If an active, idle or abandoned well is located on or adjacent to a proposed construction site, DOGGR requires a site plan review prior to issuing a building permit. Abandoned oil wells must meet standards established in 1984.

A review of the area map published by DOGGR indicates there are no producing, idle or abandoned oil wells on or adjacent to the subject property. The client may wish to review the enclosed map.

South Coast Air Quality
Management District (AQMD)

The AQMD is responsible for the development and enforcement of regulations concerning air emissions and airborne hazards from stationary sources in the South Coast Air Basin. AQMD maintains a "Hot Spot" list of facilities whose air emissions pose as a risk to the surrounding community.

A review of the AQMD records determined there are no "Hot Spot" facilities on or adjacent to the subject property.

Los Angeles County
Department of Public Works
Waste Management Division (DPW/WMD)

DPW/WMD maintains maps showing the locations of active, inactive or future solid waste landfill sites in Los Angeles County.

A review of DPW's major waste systems map determined there are two landfill sites within a ½ mile radius of the subject property:

Los Angeles City (Lacy Street) (#10 on map)
400 Avenue 26
Los Angeles, CA 90031

According to the records, this site is listed as an inactive, Class II (municipal waste) landfill.

Phase I Environmental Site Assessment Report
135, 141 and 153 West Avenue 34
3401 and 3433 Pasadena Avenue
September 28, 2012

Unnamed Site (#11 on map)
Avenue 26 and Figueroa Street
Los Angeles, CA 90031

According to the records, this site is listed as an inactive, Class II (municipal waste) landfill.

Los Angeles County
Department of Public Works
Hydraulic/Water Conservation Division (DPW/HWC)

DPW/HWC maintains contour maps and data of the groundwater levels in the Los Angeles County area. The map shows the depth to the aquifer, as well as the approximate flow direction.

A review of this data revealed the site is located at an elevation of approximately 380 feet above sea level, and the closest well is located about ½ mile northwest of the site, at Cypress Avenue and Huron Street. The elevation of the well is 366 feet above sea level, and the groundwater levels are 327 feet above sea level, or 39 feet below the ground surface. Based on the topography of the area, the groundwater flow is expected to be to the west, although this cannot be confirmed due to lack of nearby wells.

Los Angeles County
Fire Department (LACOFD)
Health Hazardous Materials Division

LACOFD maintains inspection and inventory records of companies involved in the storage and use of hazardous materials, petrochemicals, or hazardous waste. LACOFD attempts to maintain a current record of the types of hazardous substances that are utilized or stored at a particular site, and conducts periodic inspections for safety and compliance. In addition, LACOFD maintains records concerning hazardous material sites in Los Angeles County, which are reported to LACOFD by various regulatory agencies. Upon receiving the report, LACOFD monitors the cleanup process on the contaminated site.

According to the LACOFD files, there are no records of hazardous material handlers or hazardous waste generators for the subject or adjacent properties. A review of the Active Mitigation Complaint Control Logs determined there are no listed sites on or adjacent to the subject property.

City of Los Angeles
Fire Department (LAFD)

LAFD maintains inspection and inventory records of companies involved in the storage and use of hazardous materials or petrochemicals. LAFD attempts to maintain a current record of the types of materials that are utilized at a particular site, and conducts periodic inspections for

safety and compliance. LAFD also maintains records on underground storage tanks, issues installation and removal permits, and monitors the contamination cleanup process.

A review of the LAFD files determined there are no records of underground storage tanks or hazardous materials inventories for the subject property.

A review of the LAFD files for 3505 Pasadena Avenue, which is the adjacent property to the north, revealed the site was previously occupied by Welch's Uniform. In 1987, Welch's Uniform applied for a permit to remove a 2,000-gallon underground diesel fuel tank. Soil sampling beneath the tank revealed significant Total Petroleum Hydrocarbon as gasoline (TPH-g) contamination (8,600 ppm). The groundwater beneath the site was determined to be about 35 feet below the ground surface, and the groundwater flows away from the subject property in a west-northwest direction. In February 1988, Welch's Uniform applied for a permit to abandon five underground storage tanks in-place, and in December 1988, Welch's Uniform applied for a permit to remove five additional underground storage tanks. In May 2004, Welch's Uniform applied for a permit to remove one additional 1,000-gallon underground storage tank. Soil sampling beneath the tank did not detect any contamination problems, and on October 26, 2004, the DPW/UGT issued a no further action letter for the closure of the 1,000-gallon underground tank.

5.3 Physical Setting Sources

A United States Geological Survey (USGS) 7.5 Minute Topographical map of the subject property and surrounding area is included in the appendices of the report. The map shows the locations of the identified offsite environmental risks or threats described in the report.

5.4 Historical Use Information on the Property

City of Los Angeles
Building Department

A review of the building records for the subject property located the following records:

Date	Activity	Owner
	135 Avenue 34	
01/23	Reroof building	East/Northeast Economic Dev. Corp.
	137 Avenue 34	
01/23	Move residence from 2639 Lacy Bel Avenue	Charles Mattingly
04/61	Demolish dwelling	Cannon Electric Co.

Phase I Environmental Site Assessment Report
135, 141 and 153 West Avenue 34
3401 and 3433 Pasadena Avenue
September 28, 2012

Date	Activity	Owner
	137½ Avenue 34	
01/23	Move residence from 2641 Lacy Bel Avenue	Charles Mattingly
04/61	Demolish dwelling	Cannon Electric Co.
	139 Avenue 34	
01/23	Move residence from 2643 Lacy Bel Avenue	Charles Mattingly
04/61	Demolish dwelling	Cannon Electric Co.
	141 Avenue 34	
07/16	Add two rooms to residence	Chas Fishback
07/16	Construct garage	Chas Fishback
02/28	Add two bedrooms to house	Felipe Villarreal
07/53	Construct garage	Joseph Gomez
08/56	Demolish building	Teal House Wreckers
08/74	Demolish storage building	East/Northeast Economic Dev. Corp.
	141-149 Avenue 34	
09/56	Construct parking lot	Cannon Electric Co.
04/77	Grade for building site	Los Angeles Economic Dev. Corp.
04/77	Encroach into 169 Ave. 34 & 3505 Pasadena Ave.	Los Angeles Economic Dev. Corp.
07/77	Construct foundation only for factory	Los Angeles Economic Dev. Corp.
08/77	Construct light manufacturing building	Los Angeles Economic Dev. Corp.
11/77	Add office partitions	Los Angeles Economic Dev. Corp.
12/77	Add storage tank for plastic pellets	Los Angeles Growing Corp.
	143 Avenue 34	
08/06	Construct dwelling	F.H. Small
08/56	Demolish building	Teal House Wreckers
08/74	Demolish storage building	East/Northeast Economic Dev. Corp.
	145 Avenue 34	
08/06	Construct dwelling	F.H. Small
08/56	Demolish building	Teal House Wreckers
08/74	Demolish storage building	East/Northeast Economic Dev. Corp.
	147 Avenue 34	
08/06	Construct dwelling	F.H. Small

	3411 Pasadena Avenue	
12/10	Construct shed	John Murphy
09/11	Construct shed	John Murphy
08/14	Rebuild porch on residence	John Murphy
09/36	Construct truck shelter	Sophie Cubbison
12/36	Construct storage building	Sophie Cubbison
09/40	Move residence to 9815 Telfair Avenue	L. Simon
04/54	Reroof shed and loading dock with metal roof	Cubbison's Bakery
	3413 Pasadena Avenue	
06/41	Add 30' x 96' to bakery	Cubbison Cracker Co.
	3415 Pasadena Avenue	
07/87	Reroof building	Illig Construction Co.
	3415-3419 Pasadena Avenue	
07/65	Parapet correction	Crocker Citizen Bank Trust Dept.
03/87	Full compliance with Division 88	Illig Investment Co.

Phase I Environmental Site Assessment Report
135, 141 and 153 West Avenue 34
3401 and 3433 Pasadena Avenue
September 28, 2012

Date	Activity	Owner
	3419 Pasadena Avenue	
09/25	Addition to bakery	Cubbison Bakery
09/25	Demolish old building	Cubbison Bakery
11/25	Construct private garage	Cubbison Bakery
06/28	Enlarge building	C.H. Cubbison
06/28	Remove brick and wood building	C.H. Cubbison
08/28	Add mezzanine	C.H. Cubbison
03/47	Add mezzanine	Cubbison Cracker Co.
04/55	Add toilets	Cubbison Cracker Co.
07/56	Interior partitions	Canon Electric Co., Lessee
	3421 Pasadena Avenue	
01/08	Construct residence	Mary Lawson
05/14	Add gas outlets	May Lawson
01/17	Add room to rear of house	James Smith
10/61	Demolish residence	Cannon Electric Co.
	3421-3423 Pasadena Avenue	
10/12	Repair residence	Jerry Hickey
	3423 Pasadena Avenue	
10/12	Construct residence	Mary Lawson
01/24	Construct real estate office	Catherine L. Condra
10/61	Demolish residence	Cannon Electric Co.
	3425 Pasadena Avenue	
07/51	Demolish residence	Stran Steel Products Co.
07/67	Prepare building site	Smith Mailer Co.
07/67	Construct industrial building	Smith Mailer Co.
08/67	Remove and re-compact loose fill soil	Smith Mailer Co.
08/67	Add 20'x85' to manufactured building	Smith Mailer Co.
	3429 Pasadena Avenue	
11/12	Add chimney to residence	Mrs. Zonberg
07/51	Demolish residence	Stran Steel Co.
	3431 Pasadena Avenue	
06/11	Add 6' to back porch	A. Fornberg
12/12	Build outside chimney	A. Fornberg
07/51	Demolish residence	Stran Steel Co.

Phase I Environmental Site Assessment Report
135, 141 and 153 West Avenue 34
3401 and 3433 Pasadena Avenue
September 28, 2012

Date	Activity	Owner
	3433 Pasadena Avenue	
01/74	Add 26'x96' metal carport	Smith Mailer Co.
	3437 Pasadena Avenue	
04/06	Construct cow barn	Mrs. Sherman Smith
01/37	Construct private garage	William G. Short
09/38	General repairs	H.H. Moser
08/56	Demolish residence	Teal House Wreckers

No other building or demolition permits were on file for the subject property.

County of Los Angeles
Assessor's Office

A review of the Assessor's records for the subject property determined that the light industrial building located at 3401 Pasadena Avenue was constructed in 1948. In addition, the light industrial building located at 3433 Pasadena Avenue was constructed in 1967, the warehouse located at 135 West Avenue 34 was constructed in the early 1940's, the warehouse located at 141 West Avenue 34 was constructed in 1977, and the commercial building located at 153 West Avenue 34 was constructed in 1929. The current property owner is identified as ED 1125 LLC.

Historical Aerial Photographs

A review of historical aerial photographs of the subject property determined the following information:

Date of Photo	Description
May 1938	The subject property is occupied by two industrial buildings, several residences and an open storage yard.
July 1948	The subject property is occupied by nine industrial buildings, several residences and an open storage yard.
August 1952	The subject property appears to be about the same as the 1948 photograph.
July 1964	The subject property is occupied by nine industrial buildings, two residences, several vacant lots and parking areas.
October 1972	The subject property is occupied by ten industrial buildings, open storage areas and parking areas.

Date of Photo	Description
October 1980	The subject property is occupied by the five existing industrial building buildings.
August 1989	The subject property appears to be about the same as the 1980 photograph.
May 1994	The subject property is occupied by the five existing industrial buildings.
March 1997	The subject property appears to be about the same as the 1994 photograph.
June 2002	The subject property is occupied by the five existing industrial buildings.
March 2011	The subject property appears to be about the same as the 2002 photograph.

Historic Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps provide information on commercial and industrial properties, based on risk data gathered for the fire insurance companies. The maps show the number of buildings located on the property, and the type of construction. The maps also describe the various businesses located nearby, and show the locations of tanks, boilers, and other potential hazards.

A review of the Sanborn Fire Insurance Map collections from 1867-1970, located three maps for the subject property:

Date of Map	Description
1906	The subject property is occupied by 16 residences, 10 sheds, two barns and a small bakery.
1920	The subject property is occupied by 21 residences, nine sheds, seven garages, a bakery and portions of the Los Angeles Rock and Gravel Co., which consisted of eight buildings which were used as oil houses, greases houses, a tool house, an office and an auto repair canopy.
1951	The subject property is occupied by 22 residences, eight garages, a bakery and 10 commercial buildings which were used for offices, warehousing, storage and as workshops.

Historic City Directory Search

City Directories provide information on residential, commercial and industrial properties, and list the business name and address. A review of the historic directories provides an overview of the current and previous occupants of the site.

A search of the Haines Criss Cross City Directories, dated 1972-2009, determined the subject property has been previously occupied by Smith Mailer Inc. (1972-1987), GT Price Products (1972), Alta Canada Corp. (1987), American Bearing (1987), Laramada Corp. (1987), Lorac Financial Services (1987), Metal Service Corp. (1987), American Caster Corp. (1987-1992), Ann Mar Inc. (1987), Empire Button Co. (1987), William Pile Printing (1987-1992) and Bob Baker Productions (1992).

A review of the building permit records, historical aerial photographs, Sanborn fire insurance maps, assessor records and historic city directories determined the 153 Avenue 34 building was constructed over 83 years ago and the site was previously occupied by residences. The 141 Avenue building was constructed in 1977, and the site was previously occupied by portions of the Los Angeles Rock and Gravel Co., which included structures used for auto repair and two oil houses. The 141 Avenue 34 building was previously occupied by The Steel Framing and Building Corporation, several light-industrial buildings and several residences. The 135 Avenue 34 building was constructed over 62 years ago and the site was previously occupied by residences. The 3401 Pasadena Avenue was constructed in 1948, and the site was previously occupied by another commercial building and residences. The 3433 Pasadena Avenue building was constructed in 1967 and the site was previously occupied by several residences. The city directory listings indicate the subject property was previously occupied by metal work and printing businesses.

5.5 Historical Use Information on the Adjoining Properties

Historical Aerial Photographs

A review of historical aerial photographs of the adjoining properties determined the following information:

Date of Photo	Description
May 1938	North of the subject property is a large industrial facility with several industrial buildings. To the east is Pasadena Avenue, and further east is a commercial building and several residences. To the south is Avenue 34, and further south is a commercial building and several residences. To the west is a railroad right-of-way, and further west is an industrial facility with several light-industrial buildings.
July 1948	North of the subject property is a large industrial facility with several industrial buildings. To the east is Pasadena Avenue, and further east is a commercial building and several residences. To the south is Avenue 34, and further south is a commercial building and several residences. To the west is a railroad right-of-way, and further west is an industrial facility with several light-industrial buildings.

Phase I Environmental Site Assessment Report
135, 141 and 153 West Avenue 34
3401 and 3433 Pasadena Avenue
September 28, 2012

Date of Photo	Description
August 1952	The surrounding properties appear to be about the same as the 1948 photograph.
July 1964	North of the subject property is a large industrial facility with several industrial buildings. To the east is Pasadena Avenue, and further east is a commercial building and several residences. To the south is Avenue 34, and further south is a commercial building, several residences and a large parking lot. To the west is a railroad right-of-way, and further west is an industrial facility with several light-industrial buildings.
October 1972	North of the subject property is a large industrial facility with several industrial buildings. To the east is Pasadena Avenue, and further east are several commercial buildings and several residences. To the south is Avenue 34, and further south is a commercial building, several residences and a large parking lot. To the west is a railroad right-of-way, and further west is an open storage yard.
October 1980	The surrounding properties appear to be about the same as the 1972 photograph.
August 1989	North of the subject property is a large industrial facility with several industrial buildings. To the east is Pasadena Avenue, and further east are several commercial buildings and several residences. To the south is Avenue 34, and further south are several commercial buildings, several residences and a large parking lot. To the west is a railroad right-of-way, and further west is a vacant lot.
May 1994	North of the subject property is a vacant lot. To the east is Pasadena Avenue, and further east are several commercial buildings and several residences. To the south is Avenue 34, and further south are several commercial buildings, several residences and a large parking lot. To the west is a railroad right-of-way, and further west is a vacant lot.
March 1997	The surrounding properties appear to be about the same as the 1994 photograph.
June 2002	North of the subject property is a vacant lot. To the east is Pasadena Avenue, and further east are several commercial buildings and several residences. To the south is Avenue 34, and further south are several commercial buildings, several residences and a large parking lot. To the west is a railroad right-of-way, and further west is a parking lot.

Date of Photo	Description
March 2011	North of the subject property is a vacant lot. To the east is Pasadena Avenue, and further east are several commercial buildings and several residences. To the south is Avenue 34, and further south are several commercial buildings, several residences and a large parking lot. To the west is a railroad right-of-way, and further west is an industrial building and a parking lot.

Historic Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps provide information on commercial and industrial properties, based on risk data gathered for the fire insurance companies. The maps show the number of buildings located on the property, and the type of construction. The maps also describe the various businesses located nearby, and show the locations of tanks, boilers, and other potential hazards.

A review of the Sanborn Fire Insurance Map collections from 1867-1970, located three maps for the area surrounding the subject property:

Date of Map	Description
1906	The property to the north is occupied by six residences, a barn and three sheds. Pasadena Avenue is to the east and there is no map coverage available for the property east of Pasadena Avenue. South of the subject property is Avenue 34 and further south are two stores, 12 residences, nine sheds, a barn and a fruit packing building. West of the subject property is a railroad right-of-way and further west is vacant land and the Arroyo Seco wash.
1920	The property to the north is occupied by several residences, garages and sheds, and further north is a large industrial facility which is occupied by Pacific Laundry. Pasadena Avenue is east and further east are several residences, garages and sheds. South of the subject property is Avenue 34 and further south are several residences, garages, sheds and a fuel storage area. West is of the subject property is a railroad right-of-way and further west is vacant land and the Arroyo Seco wash.

Date of Map	Description
1951	The property to the north is occupied by several residences, garages and sheds and further north is a large industrial facility which is occupied by Welch's Uniform and Overall Cleaning Co. A dry-cleaning building is located within the Welch's Facility. Pasadena Avenue is to the east and further east are several residences, garages, sheds and Hillside Elementary School. South of the subject property is Avenue 34 and further south are two stores, several residences, garages, sheds and a scrap metal storage yard. West of the subject property is a railroad right-of-way and further west is a lumber yard which is occupied by Alliance Lumber and Investment Co.

Historic City Directory Search

City Directories provide information on residential, commercial and industrial properties, and list the business name and address. A review of the historic directories provides an overview of the current and previous occupants of the adjoining properties.

A search of the Haines Criss Cross City Directories, dated 1972-2009, found no listings for the adjacent property to the north. The property east of Pasadena Avenue has been previously occupied by Hillside Elementary School (1972-2009) and residences (1972-2009). The property south of Avenue 34 has been occupied by residences (1972-2009), Ishizaki Studios (1987), Argus Tool Manufacturing (1987), Smart Saver (1987-1992), Pasadena Avenue Market (1987-1992), AAA Fashions (1992), Tere's Fashions (1992-2009), Allied Die Cutting (1992), Three Star Refrigeration (1992), ACW Apparel Inc. (2009) and Water Land Inc. (2009). No listings were found for the adjacent property to the west

A review of historical aerial photographs, Sanborn fire insurance maps and historic city directories determined the adjacent property to the north has been vacant land for over 18 years and the site was previously occupied by Welch's Uniform and Overall Cleaning Co. The apartment complex east of Pasadena Avenue was constructed in the early 1970's and the site was previously occupied by residences. The Hillside Elementary School and residences east of Pasadena Avenue were constructed over 74 years ago and the school property was previously occupied by residences. The commercial buildings south of Avenue 34 were constructed over 40 years ago and the sites were previously occupied by residences. The residences south of Avenue 34 were constructed over 74 years ago. The industrial building west of the railroad right-of-way was constructed within the past ten years and the site was previously occupied by a large parking lot and open storage yard. Prior to the development of the storage yard and parking lot, the property west of the railroad right-of-way was occupied by Alliance Lumber and Investment Co. The city directory listings identified the surrounding properties have been occupied by manufacturing and metal work businesses.

6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

The site reconnaissance consisted of a walk through the entire property, and visually observing the structures, storage areas, and parking lots. No inspection was conducted under floors, above ceilings, or behind walls.

6.2 General Site Setting

The site consists of five industrial buildings with paved parking and storage areas, located in a mixed industrial, commercial and residential area of Los Angeles (see site plan).

6.3 Subject Property Observations

On September 19, 2012, an inspection of the subject property and surrounding area was conducted by Environmental Assessor James Robert Orswell. The subject property is occupied by five single-story industrial buildings, described as follows:

The 3401 Pasadena Avenue building consists of a single-story wood-frame and brick light-industrial structure (see photos #1 and #2) which is occupied by the Water Wellness Center, a business office, and Warner Brothers Studios, a warehouse television props. The building is divided into an office area and a warehouse area. Inside, the building has an open wood beam and an exposed concrete floor (see photos #3 and #4). A storage mezzanine is located above the offices and is accessed via a stairwell. There is no elevator in the building. The heating, ventilation and air conditioning (HVAC) system for the building appears to be mounted on the roof.

The 3433 Pasadena Avenue building consists of a single-story wood-frame and concrete-block light-industrial structure (see photo # 5) which is occupied by the Warner Brothers Studios prop department. The building is divided into an office area and a production area. Inside, the office ceilings are covered with suspended-grid acoustic tile and the floors are covered with vinyl tile (see photo #6). The production area has open wood beam ceilings and the floors are exposed concrete. Large quantities of water-based paint are stored and used inside the production area (see photo #7). No significant spills or leaks were observed on the production area floors. A sign on the exterior of the building indicates the building has previously been occupied by a die and metal stamping business. The HVAC system for the building appears to be mounted on the roof.

The 135 West Avenue 34 building consists of a single-story corrugated steel warehouse (see photo #8). A sign on the exterior of the building indicates the structure is occupied by the Submission Factory, a gym. The business was closed and the interior of the building was not available for inspection. No HVAC system was observed for the building.

The 141 West Avenue 34 building consists of a single-story concrete tilt-up, wood frame and brick warehouse (see photo # 9) which is occupied by Ortiz Bros. Moving and Storage. The building is divided into an office area and a warehouse area. Inside, the office ceilings are covered with suspended-grid acoustic tile and the floors are covered with vinyl tile or carpeting (see photo #10). The warehouse has an open wood beam ceiling and an exposed concrete floor (see photos #11 and #12). The warehouse area is used to store customers' personal belongings, and no hazardous materials were observed to be stored inside the warehouse area. There are several loading docks on the east side of the building. The HVAC system for the building appears to be mounted on the roof and side of the building.

The 153 West Avenue 34 building consists of a single-story brick commercial structure (see photo #13). The building was locked and access to the interior of the building was not available for inspection. No HVAC system was observed for the building.

Outside, between the buildings are paved parking and open storage areas (see photo #14). On the west side of the subject property, there is another large paved open storage area (see photo #15). Portions of the parking and storage areas were inaccessible for inspection due to the cluttered storage of large crates, trucks, miscellaneous objects and cars (see photo #16). Several roll-off storage containers were stored at the site, and access to the containers was unavailable at the time of inspection. Commercial trash bins are located in the paved parking and storage areas (see photo #17), and no signs of improper solid waste disposal were observed. The electrical power in the area is supplied by overhead utility lines which bisect the subject property (see photo #18) and also runs along Avenue 34. A ground-mounted electrical transformer is located on the west side of the 141 Avenue 34 building, and no signs were observed on the transformer indicating the presence of polychlorinated biphenyls (PCBs). No signs of illegal dumping or distressed vegetation were observed on the property. There was no evidence of underground storage tanks, septic tanks or monitoring wells on the property, and there was no indication of obvious contamination on the site.

6.4 Adjoining Property Observations

Northern Border

North of the subject property is a vacant lot (see photo #19). The property is identified by the State of California Environmental Protection Agency (CAL-EPA) Department of Toxic Substances Control (DTSC) as an active hazardous waste site and by the State of California Regional Water Quality Control Board (RWQCB) as having two open RWQCB Cleanup Program sites, and it appears that the property is in the process of undergoing remediation.

Eastern Border

East of the subject property is Pasadena Avenue, and further east is Hillside Elementary School, an apartment complex (see photo #20) and several residences. There were no visible signs of spills or contamination on the adjacent properties.

Southern Border

South of the subject property is Avenue 34. Located at the western terminus of Avenue 34, there were two groundwater monitoring wells (see photo #21). The wells were installed to monitor the groundwater contamination in the area from the former Welch's Uniform facility located further north. South of Avenue 34 are several residences (see photo #22), a parking lot and five commercial buildings which are occupied by VGA Apparel and several other unidentified tenants (see photo #23). There were no visible signs of spills or contamination on the adjacent properties.

Western Border

West of the subject property is a railroad right-of-way, and further west is an unidentified industrial building and a large parking lot (see photo #24). There were no visible signs of spills or contamination on the adjacent properties.

7.0 INTERVIEWS

7.1 Interview with Owner

Mr. Eric Ortiz, the property owner and owner of Ortiz Bros. Moving and Storage, advised he purchased the subject property in 2000, and he has occupied the site since 1993. He stated the buildings have been used for distribution and warehousing purposes. He said his business stores customers' personal items, and no hazardous materials are allowed to be stored inside the 141 Avenue 34 building. Mr. Ortiz advised the site has a closed and abandoned wastewater clarifier located on the west side of the 141 Avenue 34 building. Mr. Ortiz said the 135 Avenue 34 building is occupied by The Submission Factory, a gym and he is unaware of any hazardous materials being stored inside the building. In addition, Mr. Ortiz stated the 153 Avenue 34 building is used for storage of water, and no large quantities of hazardous materials are used or stored in the building. Mr. Ortiz said the property to the north was previously occupied by Welch's Uniform and the State of California has been conducting activities at the site for over a decade. Mr. Ortiz said he is unaware of the two groundwater monitoring wells located near the southwest corner of the site. Mr. Ortiz advised to the best of his knowledge, there are no underground storage tanks, septic tanks or wells on the site, and he is not aware of any other chemical spills or contamination problems.

7.2 Interview with Site Manager

Mr. Ortiz is the property manager (see Section 7.1 - Interview with Owner).

7.3 Interviews with Occupants

The unidentified safety manager for Warner Brothers Studios provided Orswell & Kasman, Inc with a copy of the hazardous materials handler permit for the small quantities of water-based paint stored and used within the 3433 Pasadena Avenue building. The safety manager stated that hazardous wastes in the form of waste paint are generated by the business activities and the wastes are collected by Rinco Environmental Services. The safety manager stated he is unaware of any contamination problems at the 3433 Pasadena Avenue building.

7.4 Interviews with Local Government Officials

No interviews with local government officials were conducted.

7.5 Interview with Others

No interviews with other people were conducted concerning the subject property.

8.0 FINDINGS

8.1 Recognized Environmental Conditions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E 1527-05 on the multi-tenant commercial property located at 135, 141 and 153 West Avenue 34 and 3401 and 3433 Pasadena Avenue, Los Angeles, California, the Property. Any exceptions to, or deletions from the Standard Practice are described in Section 2.4 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the Property, except as follows:

1) The subject property is occupied by multiple tenants. The 3433 Pasadena Avenue building is currently occupied by Warner Brothers Studios, a prop and set design business. The business stores and uses large quantities of water-based paint, and waste paint is generated by the business activities. The hazardous materials and hazardous wastes appear to be properly stored and managed and no significant spills or leaks were observed on the premises; and

2) Eleven offsite locations have been identified as potential risks or threats to the subject property. According to the data, ten of the sites are not located in the near vicinity, and there is no indication that contaminants from these sites have migrated onto the subject property.

The former Welch's Uniform Facility site (#5 on map), 3505 Pasadena Avenue, is located on the adjacent property to the north, and the business is identified by State of California Environmental Protection Agency (CAL-EPA) Department of Toxic Substances Control (DTSC) as an active hazardous waste site. According to the DTSC CalSite database records, the site was previously occupied by Welch's Uniform and the property was used as a laundry and uniform rental facility over a 70 year period. Environmental studies indicate the soil and groundwater beneath the facility is contaminated with volatile organic compounds including trichloroethene (TCE). In addition, the former Welch's Uniform Rental site is identified by the State of California Regional Water Quality Control Board (RWQCB) as having two open RWQCB Cleanup Program sites. The first case was first opened in December 1987. According to the RWQCB records, the groundwater was contaminated with non-petroleum hydrocarbons, and the site is undergoing verification monitoring. The second case was opened in December 1998 and the site is undergoing an assessment. A review of the City of Los Angeles Fire Department (LAFD) records revealed Welch's Uniform applied for a permit to remove a 2,000-gallon underground diesel fuel tank in 1987. Soil sampling beneath the tank revealed significant Total Petroleum Hydrocarbon as gasoline (TPH-g) contamination (8,600 ppm). The groundwater beneath the site was determined to be about 35 feet below the ground surface, and the groundwater flows away from the subject property in a west-northwest direction. In February 1988, Welch's Uniform applied for a permit to abandon five underground storage tanks in-place, and in December 1988, Welch's Uniform applied for a permit to remove five additional underground storage tanks. In May 2004, Welch's Uniform applied for a permit to remove one additional 1,000-gallon underground storage tank. Soil sampling beneath the tank did not detect any contamination problems, and on October 26, 2004, the DPW/UGT issued a no further action letter for the closure of the 1,000-gallon underground tank. An inspection of the property revealed the site is currently a vacant lot, and remedial activities were being conducted on the site.

8.2 Historical Recognized Environmental Conditions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E 1527-05 on the multi-tenant commercial property located at 135, 141 and 153 West Avenue 34 and 3401 and 3433 Pasadena Avenue, Los Angeles, California, the Property. Any exceptions to, or deletions from the Standard Practice are described in Section 2.4 of this report. This assessment has revealed no evidence of *historical recognized environmental conditions* in connection with the Property.

9.0 OPINION

Should it be determined the groundwater beneath the subject property has in fact been impacted by the Former Welch's Uniform Rental site, it is the policy of the State of California and the United States Environmental Protection Agency not to hold property owners responsible for

costs to clean up contaminated groundwater beneath their property, unless the owners contributed to the problem. There is no indication from a review of the regulatory records and a site inspection that the subject property has had any problems concerning the storage, usage or disposal of hazardous materials, and it appears the former Welch's Uniform Rental site is in the process of addressing the contamination problem.

Based on a review of regulatory and historical records, and interviews with the property owner and the safety manager for Warner Brothers Studios, and a visual inspection of the site and surrounding area, this assessment has found no evidence of *recognized environmental conditions or historical recognized environmental conditions* which are likely to impact the subject property. Although data failure occurred in the historical uses of the Property prior to 1906, it is unlikely the data failure will impact the ability to identify *recognized environmental conditions.*

10.0 CONCLUSIONS

Based on the results of this assessment, no further environmental studies are recommended for the site.

11.0 DEVIATIONS

This report was prepared in conformance to meet or exceed the scope and practice as set forth by the American Society for Testing & Materials (ASTM) Standard Practice E 1527-05, "Standard Practice of Environmental Site Assessments: Phase I Environmental Site Assessment Process." No significant deviations, deletions, or client-imposed constraints were made from this practice.

12.0 ADDITIONAL SERVICES

No additional services including a broader scope of services, liability/risk evaluations, or remedial activities are included in this report.

13.0 REFERENCES

All government records and maps were obtained directly from the regulatory agencies identified in this report. The fire insurance map information was obtained from Digital Sanborn Maps, 1867-1970, Ann Arbor, Michigan. The aerial photographs were obtained from BBL Consultants, Solana Beach, California; the United States Geological Survey, Menlo Park, California; or the United States Department of Agriculture, Salt Lake City, Utah. The city directory search information was obtained from Sherman Library and Gardens, Corona Del Mar, California.

14.0 STATEMENT OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professionals* as defined in §312.10 of 40 CFR 312. We have the specific

qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquires in conformance with the standards and practices set forth in 40 CFR Part 312. The individual qualifications of these professionals are included in the appendices of this report.

15.0 APPENDICES

15.1 Site and Vicinity Map

A United States Geological Survey (USGS) 7.5 Minute Topographical map of the subject property and surrounding area is included in the appendices of the report. The map shows the locations of the identified offsite environmental risks or threats described in the report.

15.2 Site Plan

A site plan of the subject property is included in the appendices of the report. The site plan shows the general location of the structures on the property, and other items of interest which were identified in the description of the site.

15.3 Site and Vicinity Photographs

Photographs of the subject property and surrounding neighborhood are attached to this report. These photographs were taken at the time of the site inspection.

15.4 Historical Research Documentation

Building permit records were obtained directly from the regulatory agency identified in this report. The aerial photographs summarized in this report were obtained from BBL Consultants, Solana Beach, California; the United States Geological Survey, Menlo Park, California; or the United States Department of Agriculture, Salt Lake City, Utah. The Sanborn Fire Insurance Map information was obtained from Digital Sanborn Maps, 1867-1970, Ann Arbor, Michigan. The city directory search information was obtained from Sherman Library and Gardens, Corona Del Mar, California.

15.5 Regulatory Records Documentation

All government records were obtained directly from the regulatory agencies identified in this report.

15.6 Interview and Research Documentation

All of the field notes and supporting information obtained from interviews and research concerning the subject property are maintained in the report file at the offices of Orswell & Kasman, Inc.

15.7 Special Contractual Conditions between User and Environmental Professional

No special contractual conditions or agreements exist between the client and any of the employees of Orswell & Kasman, Inc., and Orswell & Kasman, Inc. does not have any financial interest in the subject property.

15.8 Qualifications of the Environmental Professionals

Attached to this report are the résumés of Marty Kasman and James Orswell, who conducted the site inspection, the records review, and prepared the report.

APPENDIX

MARTY KASMAN

Marty Kasman, a principal of the company, is a Registered Environmental Health Specialist (#4927) and a Registered Environmental Assessor (#4022) with the State of California. He is also a USEPA/AHERA accredited Asbestos Management Planner and California Certified Asbestos Consultant (#99-2553). He received his Bachelor of Science and Master of Science degrees in Environmental and Occupational Health Science from California State University at Northridge. He also has a Certificate in Hazardous Materials Management from the University of California at Los Angeles (UCLA). In addition, Mr. Kasman also received specialized hazardous materials training at the Federal Law Enforcement Training Center in Georgia.

Mr. Kasman served fourteen years with the Los Angeles County Fire Department, as a Supervising Hazardous Material Specialist and Deputy Health Officer. For a majority of his Fire Department career, Mr. Kasman worked in the Criminal Investigations Unit, and he was assigned to the Los Angeles County District Attorney's Environmental crimes Task Force. His responsibilities included field and laboratory work in hazardous materials management, conducting inspections of industrial plant operations, and monitoring cleanup activities. In addition, Mr. Kasman has investigated hundreds of abandoned waste sites and other cases involving the illegal dumping of hazardous materials throughout Los Angeles County.

Mr. Kasman currently serves as an environmental consultant to industry management in the proper handling of hazardous materials and waste. He has taught courses in hazardous materials regulatory compliance and waste management at UCLA, California State University at Northridge, and the California Specialized Training Institute at San Luis Obispo. Mr. Kasman served on the State of California Local Unified Program Implementation Committee (LUPIC) to develop a standardized hazardous materials contingency plan.

Mr. Kasman's extensive education, training, and experience in hazardous materials management make him fully qualified to conduct environmental assessments and investigations. He is the former president, director, and a life-time member of the California Hazardous Materials Investigators Association. He is also a former director of the Local Environmental Enforcement Officers Association, and the Los Angeles County Association of Environmental Health Specialists. He is a member of California and National Environmental Health Associations, and the National Association of Government Guarantee Lenders.

JAMES ROBERT ORSWELL

James R. Orswell is a Registered Environmental Assessor with the State of California. Since graduating from Utah Valley University, he has participated in thousands of Phase I Environmental Site Assessment reports, Transaction Screen reports, soil vapor surveys, methane assessments, historical use reports and Phase II projects on commercial, industrial, and residential properties.

Mr. Orswell is an expert document writer, data collector and is an experienced mortgage loan officer. Since 2002, Mr. Orswell has worked in the environmental assessment and consulting field, researching and conducting numerous environmental investigations throughout the United States. He has worked directly with major lending institutions, real estate professionals, lawyers, city planners, and private clients. Mr. Orswell has worked along with the Department of Defense in plotting Former Used Defense Sites (FUDS) and is a Certified Mold Inspector. He has managed multiple underground storage tank removals, installation of soil vapor extraction systems and has overseen several subsurface investigations in Southern California.

He is also an Eagle Scout, volunteer with many non-profit organizations, and an avid outdoors enthusiast. Mr. Orswell's education, training, and experience provide him with the qualifications to conduct environmental assessments and investigations.

PREPARED BY:

James Robert Orswell
ASTM Environmental Professional

REVIEWED BY:

Martin A. Kasman
Project Manager

This report was prepared in conformance to meet or exceed the scope and limitations as set forth by the American Society for Testing & Materials (ASTM) Standard Practice E 1528-06. It is for the express use of the client, and its contents are considered to be privileged and confidential. Acceptance of this report constitutes an agreement by the client to assume full liability for information contained herein. This report is for the sole use and interpretation of the client, and it is not to be reproduced or distributed to outside parties. The information in this report is furnished in good faith and was obtained from sources and databases considered to be reliable; however, the accuracy of the information cannot be guaranteed. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professionals as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquires in conformance with the standards and practices set forth in 40 CFR Part 312.

This report is limited to an inspection of the property and the surrounding area, an interview with the current owner or occupant of the building, and a review of records and documents published by federal, state and local government regulatory agencies. The purpose of the environmental site assessment transaction screen is to identify *potential environmental concerns*.

SITE INSPECTION

Site and Vicinity Characteristics

The site consists of five industrial buildings with paved parking and storage areas, located in a mixed industrial, commercial and residential area of Los Angeles (Lincoln Heights District), California.

Descriptions of Structures and
Other Site Improvements

On April 17, 2015, an inspection of the subject property and surrounding area was conducted by ASTM Environmental Professional James Robert Orswell. The subject property consists of five separate, single-story industrial buildings, which are described as follows:

3401 Pasadena Avenue

On the east side of the subject property is a single-story wood-frame, masonry brick and concrete-block industrial building (see photos #1 and #2) which is currently occupied by Loot Crate, an online computer gaming service. The building is divided into an office area and a work area. Inside, the building has an open wood beam ceiling and an exposed concrete floor (see photos #3 and #4). A storage mezzanine is located above the offices (see photo #5) and is accessed via a stairwell. There is no elevator in the building. The heating, ventilation and air conditioning (HVAC) system for the building appears to be mounted on the roof.

In the southeast corner of the site is a single-story corrugated steel industrial building (see photos #6 and #7) which is currently occupied by The Submission Factory, a gym. The business was closed and the interior of the building was not available for inspection. No HVAC system was observed for the building.

3433 Pasadena Avenue

In the northeast corner of the subject property is a single-story, steel and wood-frame with masonry brick and concrete-block industrial building (see photos #8 and #9) which is also occupied by Loot Crate. The building is divided into an office area and a work area. Inside, the office ceilings are covered with suspended-grid acoustic tile and the floors are covered with vinyl tile. The work area has an open steel and wood beam ceiling and an exposed concrete floor which is partially covered with carpeting (see photo #10). A sign on the exterior of the building indicates the building was previously occupied by a die and metal stamping business. The HVAC system for the building appears to be mounted on the roof.

135 and 141 West Avenue 34

In the northwest corner of the site is a concrete tilt-up industrial building (see photos #11, #12 and #13) which is primarily occupied by Ortiz Bros. Moving and Storage & Atlas Van Lines, a moving business. The building is divided into two separate units, and each unit is divided into an office area and a warehouse area. Inside, the office ceilings are covered with suspended-grid acoustic tile and the floors are covered with vinyl tile or carpeting (see photo #14). The warehouses have open wood beam ceilings and exposed concrete floors (see photos #15 and #16). The 141 Avenue 34 warehouse area is used to store customers' personal belongings, and no hazardous materials are stored inside the warehouse area. There are several loading docks on the east side of the building. The 135 Avenue 34 unit is currently vacant and unoccupied (see photos #17, #18 and #19), and the unit was most recently occupied by Ortiz Bros. Moving & Storage. The HVAC system for the building appears to be mounted on the roof and side of the building.

153 West Avenue 34

In the southwest corner of the subject property is a single-story masonry brick and corrugated steel industrial building (see photos #20 and #21) which is currently occupied by Ortiz Bros. Moving, and is used to store non-hazardous items. The building was locked and access to the interior of the building was not available for inspection. The HVAC system appears to be mounted on the roof of the building.

Outside, between the buildings are asphalt-paved parking and open storage areas (see photos #22 and #23). On the west side of the subject property is another large asphalt-paved open storage area (see photos #24 and #25). A wastewater clarifier is located on the north side of the 153 Avenue 34 building. A storage canopy is also located in the southwest storage yard area (see photo #26). No large quantities of hazardous materials were observed to be stored or used at the site, and no hazardous wastes are generated by the business activities. No manufacturing activities take place at the site. Commercial trash bins are located in the paved parking and storage areas (see photos #27, #28 and #29), and no signs of improper solid waste disposal were observed in or around the trash bins. The electrical power in the area is supplied by overhead utility lines located along Pasadena Avenue and Avenue 34. Overhead power lines with pole-mounted electrical transformers also bisect the subject property from north to south (see photo #30). A ground-mounted electrical transformer is located on the west side of the 141 Avenue 34 building. No signs were observed on the ground-mounted or pole-mounted electrical transformers indicating the presence of polychlorinated biphenyls (PCBs). No signs of illegal dumping or distressed vegetation were observed on the property. There was no evidence of underground storage tanks, septic tanks or wells on the property, and there was no indication of obvious contamination on the site.

Current Uses of the Adjoining Properties

Northern Border

North of the subject property is a vacant lot (see photos #31 and #32). There are several piezometers and monitoring wells located on the site. The property is identified by the State of California Environmental Protection Agency (CAL-EPA) Department of Toxic Substances Control (DTSC) as an active hazardous waste site and by the State of California Regional Water Quality Control Board (RWQCB) as having two open RWQCB Cleanup Program sites. It appears that the property is in the process of undergoing remediation. There were no visible signs of spills or obvious contamination on the adjacent property.

Eastern Border

East of the subject property is Pasadena Avenue, and further east is Hillside Elementary School (see photo #33), an apartment complex (see photo #34) and several residences (see photo #35). There were no visible signs of spills or contamination on the adjacent properties.

Southern Border

South of the subject property is Avenue 34. Located at the western terminus of Avenue 34 are two groundwater monitoring wells (see photo #36). The wells are currently monitoring the groundwater contamination in the area from the former Welch's Uniform facility located further north. South of Avenue 34 are several residences (see photos #37 and #38), an unidentified commercial property (see photo #39), a parking lot (see photo #40), an unidentified water distribution business (see photo #41) and five commercial buildings which are occupied by VGA Apparel; an unidentified screen printing business; and several other unidentified tenants (see photos #42, #43 and #44). There were no visible signs of spills or contamination on the adjacent properties.

Western Border

West of the subject property is a light-rail right-of-way (see photo #45), and further west is an unidentified industrial building and a large parking lot (see photo #46). Although the adjacent property to the west (Metro Rail Pasadena Blue Line between Avenue 33 and French Avenue) is identified by the Department of Toxic Substances Control (DTSC) as a hazardous waste site that has been referred to the Regional Water Quality Control Board for oversight, there were no visible signs of spills, contamination or remedial efforts on the adjacent properties.

INTERVIEW WITH OWNER/OCCUPANT

Mr. Eric Ortiz, the property owner and owner of Ortiz Bros. Moving and Storage, advised he purchased the subject property in 2000, and he has occupied the site since 1993. He said the buildings have been previously used for warehousing, distribution, office space, a gym and a prop designer. Mr. Ortiz stated the 153 Avenue 43 building is used for storage of non-hazardous

items. He said the 141 Avenue 34 building is currently occupied by Ortiz Bros. Moving, and is used to store customer's non-hazardous personal items. Mr. Ortiz advised there is a closed and abandoned wastewater clarifier located between the 141 Avenue 34 and 153 Avenue 34 buildings. Mr. Ortiz said the 135 Avenue 34 unit is currently vacant and unoccupied, and was most recently occupied by Ortiz Bros. Moving. He advised the 3401 Pasadena Avenue property consists of two separate buildings. One of the buildings is occupied by Loot Crate, an online computer gaming service; and the other building is occupied by The Submission Factory, a gym. Mr. Ortiz stated the 3433 Pasadena Avenue is also occupied by Loot Crate. He said no large quantities of hazardous materials are stored or used at the site, and no hazardous wastes are generated by the business activities. No heavy manufacturing activities take place at the site. Mr. Ortiz said the property to the north was previously occupied by Welch's Uniform Facility and the State of California has been conducting activities at the site for over a decade. Mr. Ortiz said he is unaware of the two groundwater monitoring wells located near the southwest corner of the site, and has no information about the remedial efforts of the nearby site. Mr. Ortiz advised to the best of his knowledge, there are no underground storage tanks, septic tanks or wells on the site, and he is not aware of any other chemical spills or contamination problems. Additional details concerning the site are presented in the completed Transaction Screen Questionnaire, which is attached to this report.

REVIEW OF GOVERNMENT RECORDS

United States Environmental Protection Agency (USEPA)
National Priorities List

The National Priorities List (NPL) identifies abandoned or uncontrolled hazardous waste sites which have been identified as possibly representing a long-term threat to the public health or environment. These sites have been identified as being highly contaminated with hazardous substances and represent the USEPA's target enforcement and cleanup efforts. Studies of individual sites are conducted by the USEPA to determine level of contamination, and the sites are then compared and ranked to other sites on the NPL.

A review of the USEPA National Priorities List dated December 2012 indicates there are no proposed, final or delisted sites within one mile of the subject property.

United States Environmental Protection Agency (USEPA)
Federal Superfund Liens List

The USEPA maintains a list of Superfund Lien sites that have been issued on properties throughout the United States. These sites have been remediated through the expenditures of Superfund monies; the purpose of the lien is to prevent the property owner from gaining a financial benefit from the federal government's cleanup and restoration activities.

A review of the July 2011 Federal Superfund List revealed there are no Superfund Liens on or adjacent to the site.

United States Environmental Protection Agency (USEPA)
Comprehensive Environmental Response, Compensation
and Liability Information System (CERCLIS)

The USEPA has developed a database known as CERCLIS which contains information on potential hazardous waste sites located throughout the United States. There are over 33,000 sites on the CERCLIS inventory. All sites are subjected to a preliminary assessment and thereafter are either placed on the National Priority List (NPL) or are placed in a category for those sites requiring no further Federal Superfund action.

A review of the December 2012 CERCLIS report indicates there are three CERCLIS sites within a ½ mile radius of the subject property:

Kennington Ltd. (ITT Cannon) (#1 on map)
3209 Humboldt Street
Los Angeles, CA 90031

This site investigation was opened in February 1994. A preliminary assessment was completed in August 2001, and a site reassessment was completed in May 2006. According to the records, no further remedial actions have been reported for this site. Due to the distance, it is unlikely any contaminants from this site will have a significant impact on the subject property.

NI West Incorporated (#2 on map)
3011 Humboldt Street
Los Angeles, CA 90031

This site investigation was opened in January 1993. A combined preliminary assessment and site assessment was completed in September 2005. According to the records, no further remedial actions have been reported for this site. Due to the distance, it is unlikely any contaminants from this site will have a significant impact on the subject property.

Jaybee Ajax Manufacturing (#3 on map)
301 West Avenue 26
Los Angeles, CA 90031

This site investigation was opened in March 2000, and preliminary assessments were started in October 2002 and in July 2007. According to the records, no further remedial actions have been reported for this site. Due to the distance, it is unlikely any contaminants from this site will have a significant impact on the subject property.

There is one listed "No Further Required Action Planned" (NFRAP) site identified within a ½ mile radius:

Baron Manufacturing (#4 on map)
241 Avenue 26
Los Angeles, CA 90031

This site investigation was opened in June 1981, and a preliminary assessment was completed in September 1984. The investigation concluded that the facility does not qualify for the NPL and no further required actions are planned for this site. It is unlikely any contaminants from this closed site will have a significant impact on the subject property.

United States Environmental Protection Agency (USEPA)
Resource Conservation and Recovery Act (RCRA)
Treatment, Storage or Disposal Facilities (TSDF)

The USEPA maintains a list of facilities which have been authorized to receive hazardous waste. These facilities have permits to treat, store, or dispose of the waste, as determined by the RCRA regulations. In addition, the USEPA publishes a list of those facilities that are subject to a corrective action, based on the facilities waste handling and storage procedures. The facilities which are subject to a corrective action are identified as CORRACTS sites.

A review of the November 2013 RCRA TSDF list determined there are no known CORRACTS facilities within a one mile radius of the subject property. In addition, there are no non-CORRACTS TSD facilities listed within a ½ mile radius.

United States Environmental Protection Agency (USEPA)
Resource Conservation and Recovery Act (RCRA)
Hazardous Waste Generators

The USEPA maintains a list of facilities which are identified as generators of large and small quantities of hazardous waste. These facilities have permits to generate, store and dispose of the waste, as determined by the RCRA regulations.

A review of the November 2013 RCRA Hazardous Waste Generators list determined the subject property (American Caster Corporation, 141 West Avenue 34) is identified as a small quantity hazardous waste generator. In addition, there are records of a large quantity hazardous waste generator identified on the adjacent property to the north (Former Welch's Uniform Site, 3505 Pasadena Avenue), and a small quantity hazardous waste generator to the east (Los Angeles Unified School District Hillside Elementary, 120 East Avenue 35).

United States Environmental Protection Agency (USEPA)
Office of Emergency and Remedial Response
Emergency Response Notification System (ERNS)

The USEPA maintains a list of locations which have reported a release of oil or hazardous substances to the federal government. Most of the data in this system is based on information that was received during the initial notification.

A review of the ERNS list for 1999 determined there are no reported incidents identified on the subject property.

United States Department of Transportation
United States Coast Guard
National Response Center (NRC)

The NRC is the national point of contact for reporting all oil, chemical, radiological, biological and etiological discharges into the environment anywhere in the United States and its territories. In addition to gathering and distributing spill data for Federal On-Scene Coordinators and serving as the communications and operations center for the National Response Team, the NRC maintains agreements with a variety of federal entities to make additional notifications regarding incidents meeting established trigger criteria.

A review of the NRC list for 2012 determined there are no reported incidents on the subject property.

United States Environmental Protection Agency (USEPA)
Institutional Control / Engineering Control Registries

The USEPA maintains a list of institutional and engineering controls for the purpose of tracking sites that may contain residual contamination or have activity and use limitations. Engineering controls are engineering measures designed to minimize the potential for human exposure to contamination by either limiting direct contact with contaminated areas or controlling migration of contaminants. Institutional controls are non-engineering controls used to restrict land use or land access in order to protect people and the environment from exposure to hazardous substances remaining at the site or facility.

A review of the September 2006 USEPA Institutional Control / Engineering Control Registry did not identify the subject property as having institutional or engineering controls.

State of California
Environmental Protection Agency (CAL-EPA)
Department of Toxic Substances Control (DTSC)

CAL-EPA is responsible for the regulation and enforcement of environmental health laws within the state of California, as set forth by the California Health and Safety Code. CAL-EPA is also designated by the USEPA to assist in enforcing federal environmental laws. CAL-EPA regulates companies involved in the generation, transportation, storage and disposal of hazardous substances. CAL-EPA records include the "CalSites" database, which is a listing of over 7,700 known active, inactive and abandoned hazardous waste sites. These sites have previously been reported in the Abandoned Site Program Information System (ASPIS), Bond Expenditure Plan (BEP), and Cortese databases. CAL-EPA records also include a listing of the California Integrated Waste Management Board's "Active" and "Closed and Inactive" landfills database.

A review of the October 2013 CAL-EPA records determined the adjacent property to the west (Metro Rail Pasadena Blue Line between Avenue 33 and French Avenue) is identified as a hazardous waste site that was referred to the Regional Water Quality Control Board for oversight on December 27, 2001. According to the records, the site has had no known uses other than train traffic, and analytical test results indicated high concentrations of lead, polychlorinated bi phenyls (PCBs), tetrachloroethane (PCE) and trichloroethylene (TCE) contamination in the soil and groundwater beneath the right-of-way. No further information is available at this time. In addition, there are five listed "CalSite" facilities within one mile of the subject property:

Kennington (#1 on map)
3209 Humboldt Street
Los Angeles, CA 90031

This site was placed in "Active" status in July 2013. According to the records, the soil is contaminated with polychlorinated biphenyls (PCBs), tetrachloroethylene (PCE), and other chemicals. A site investigation or remediation of the site is currently in progress. Due to the distance, it is unlikely any contaminants from this site will have a significant impact on the subject property.

Jaybee Site at Lincoln Heights (#3 on map)
301 West Avenue 26
Los Angeles, CA 90031

This site was placed in "Active" status in April 2004. According to the records, the soil is contaminated with naphthalene, toluene, and other chemicals. A site investigation or remediation of the site is currently in progress. Due to the distance, it is unlikely any contaminants from this site will have a significant impact on the subject property.

Former Welch's Uniform Facility (#5 on map)
3505 Pasadena Avenue
Los Angeles, CA 90031

This site was placed in "Active" status in May 2007. According to the records, the soil is contaminated with trichloroethylene (TCE). A site investigation or remediation of the site is currently in progress. The 2.6 acre site was previously occupied by Welch's Uniform, a commercial linen and apparel laundering and delivery service. The former business operated at the site from the 1920s throughout 1988. TCE was first discovered at the site in 1988 when vapor extraction wells were first installed on the property. Several follow-up investigations have been completed at the site which included soil sampling, soil vapor sampling, the installation of 14 groundwater monitoring wells, the installation of seven soil vapor wells and semi-annual soil and soil vapor monitoring. In 1993, the buildings at the former Welch's Uniform Facility were demolished and removed from the site. In 2007, the Department of Toxic Substances Control

(DTSC) began overseeing the site investigations, monitoring and clean-up efforts at the site. Previous environmental studies conducted at the site indicate the soil and groundwater beneath the facility was contaminated with volatile organic compounds (VOCs) and petroleum based hydrocarbon cleaning solvents including tetrachloroethene (PCE) and TCE.
The current owner (AmeriPride Services Inc.) and the DTSC entered into a voluntary agreement to clean up the site. In 2013, a soil vapor extraction (SVE) system and 32 SVE wells were installed at the site to remediate the PCE and TCE contamination. The SVE system is scheduled to operate at the site until contamination levels are reached which do not pose a significant risk to human health and the environment.

Victor Industrial Battery (#6 on map)
138 North San Fernando Road
Los Angeles, CA 90031

This site was placed in "Certified Operation and Maintenance – Land Use Restrictions" status in March 1995. According to the records, the soil is potentially contaminated with liquids with PH<=2, acid solution 2>PH with metals, and other chemicals. Properties with Land Use Restrictions have limits on future property uses required by DTSC due to residual levels of contamination or the type of cleanup actions conducted. Due to the distance, it is unlikely any contaminants from this site will have a significant impact on the subject property.

National Aircraft Equipment Co. (#7 on map)
275 North Avenue 19
Los Angeles, CA 90031

This site was placed in "Inactive - Needs Evaluation" status in July 2005. DTSC has determined that a Preliminary Endangerment Assessment or other evaluation is required. Due to the distance, it is unlikely any contaminants from this site will have a significant impact on the subject property.

There are no active, closed or inactive landfill sites within a ½ mile radius of the subject property.

State of California
Environmental Protection Agency (CAL-EPA)
Department of Toxic Substances Control (DTSC)
Land Use Covenants

CAL-EPA/DTSC utilizes Land Use Covenants (LUCs) to protect the public from unsafe exposures to residual contamination that is left in place after site remediation activities have been completed. The LUC imposes limitations on land use when hazardous materials, wastes, or substances remain on the property at levels which are not suitable for unrestricted use of the land. The LUC includes easements, servitudes, covenants, and restrictions which run with the

land and continue into perpetuity unless modified or terminated in accordance with applicable law. All LUCs are signed by the DTSC and the landowner, and recorded in the county where the land is located.

A review of the October 2013 DTSC database records did not identify any deed restrictions on the subject property.

State of California
Water Resources Control Board
Regional Water Quality Control Board (RWQCB)
Land Use Covenants

RWQCB utilizes Land Use Covenants (LUCs) to protect the public from unsafe exposures to residual contamination that is left in place after site remediation activities have been completed. The LUC imposes limitations on land use when hazardous materials, wastes, or substances remain on the property at levels which are not suitable for unrestricted use of the land. The LUC includes easements, servitudes, covenants, and restrictions which run with the land and continue into perpetuity unless modified or terminated in accordance with applicable law. All LUCs are signed by the RWQCB and the landowner, and recorded in the county where the land is located.

A review of the November 2014 RWQCB database records did not identify any deed restrictions on the subject property.

State of California
Water Resources Control Board
Regional Water Quality Control Board (RWQCB)

The RWQCB is responsible for monitoring the quality and flow of groundwater, and they address other potential threats to the groundwater from surface spills and leaks. The RWQCB monitors the contamination problem, the investigation and any remedial action. Their database information includes active and closed Cleanup Program Sites, Land Disposal Sites, Leaking Underground Storage Tank (LUST) Sites, Military Cleanup Sites, Military Privatized Sites, Military Underground Storage Tank Sites and registered underground storage tank sites (RWQCB sites) within the State of California.

A review of the November 2014 RWQCB records determined the subject property is not listed as a known RWQCB site. There are also no known open RWQCB LUST sites within a ½ mile radius of the subject property. According to the records, there are three active non-LUST RWQCB Cleanup sites within a ½ mile radius of the subject property:

Cannon Electrical (#1 on map)
3209 Humbolt Avenue
Los Angeles, CA 90031

According to the records, the site is identified as an open Cleanup Program Site that is currently inactive. No information on potential contaminants has been reported. Due to the distance, it is unlikely any contaminants from this site will have a significant impact on the subject property.

Former Welch's Uniform Rental Site (#5 on map)
3505 Pasadena Avenue
Los Angeles, CA 90031

This case was first opened in December 1987, and the site is identified as an open Cleanup Program Site that is currently inactive. According to the records, the groundwater is potentially contaminated with solvents and non-petroleum hydrocarbons. A second case was opened in December 1998, and the site is identified as an open Cleanup Program Site that is undergoing a site assessment. According to the records, the site is potentially contaminated with petroleum, unidentified fuels, oil and volatile organic compounds (VOCs). Both of the cases were transferred to the Department of Toxic Substances Control (DTSC) for oversight on December 18, 2006.

Lacy's Street Dump (#8 on map)
Los Angeles, CA 90031

According to the records, the site is identified as an open Land Disposal Site that is currently inactive. No information on potential contaminants has been reported. Due to the distance, it is unlikely any contaminants from this site will have a significant impact on the subject property.

There are no records of registered underground storage tanks on the subject property; however, there are historical records of an underground storage tank on the adjacent property to the north (3505 Pasadena Avenue).

South Coast Air Quality
Management District (AQMD)

The AQMD is responsible for the development and enforcement of regulations concerning air emissions and airborne hazards from stationary sources in the South Coast Air Basin. AQMD maintains a "Hot Spot" list of facilities whose air emissions pose as a risk to the surrounding community. In addition, the AQMD Facility INformation Detail (FIND) database provides public information about facilities in the AQMD basin.

A review of the AQMD records determined there are no "Hot Spot" facilities identified on or adjacent to the subject property. According to the FIND database, the subject property (Bob Baker Productions, 3401 Pasadena Avenue) is identified as having inactive permits for a paint and solvent spray booth.

Los Angeles County
Department of Public Works
Waste Management Division (DPW/WMD)

DPW/WMD maintains maps showing the locations of active, inactive or future solid waste landfill sites in Los Angeles County.

A review of DPW's major waste systems map determined there are two landfill sites within a ½ mile radius of the subject property:

Los Angeles City (Lacy Street) (#8 on map)
400 Avenue 26
Los Angeles, CA 90031

According to the records, this site is listed as an inactive, Class II (municipal waste) landfill. Due to the distance, it is unlikely any contaminants from this site will have a significant impact on the subject property.

Unnamed Site (#9 on map)
Avenue 26 and Figueroa Street
Los Angeles, CA 90031

According to the records, this site is listed as an inactive, Class II (municipal waste) landfill. Due to the distance, it is unlikely any contaminants from this site will have a significant impact on the subject property.

Los Angeles County
Fire Department (LACOFD)
Health Hazardous Materials Division

LACOFD maintains inspection and inventory records of companies involved in the storage and use of hazardous materials, petrochemicals, or hazardous waste. LACOFD attempts to maintain a current record of the types of hazardous substances that are utilized or stored at a particular site, and conducts periodic inspections for safety and compliance. In addition, LACOFD maintains records concerning hazardous material sites in Los Angeles County, which are reported to LACOFD by various regulatory agencies. Upon receiving the report, LACOFD monitors the cleanup process on the contaminated site.

According to the LACOFD files, there are no records of hazardous material handlers or hazardous waste generators for the subject or adjacent properties. A review of the Active Mitigation Complaint Control Logs determined there are no listed sites on or adjacent to the subject property.

City of Los Angeles
Fire Department (LAFD)

LAFD maintains inspection and inventory records of companies involved in the storage and use of hazardous materials or petrochemicals. LAFD attempts to maintain a current record of the types of materials that are utilized at a particular site, and conducts periodic inspections for safety and compliance. LAFD also maintains records on underground storage tanks, issues installation and removal permits, and monitors the contamination cleanup process.

A review of the LAFD files determined there are no records of underground storage tanks or current hazardous materials inventories for the subject property.

According to the LAFD files for 3505 Pasadena Avenue, which is the adjacent property to the north, the records revealed the site was previously occupied by Welch's Uniform, a commercial laundering business. In 1987, Welch's Uniform applied for a permit to remove a 2,000-gallon underground diesel fuel tank. Soil sampling beneath the tank revealed significant Total Petroleum Hydrocarbon as gasoline (TPH-g) contamination (8,600 ppm). The groundwater beneath the site was determined to be about 35 feet below the ground surface, and the groundwater flows away from the subject property in a west-northwest direction. In February 1988, Welch's Uniform applied for a permit to abandon five underground storage tanks in-place, and in December 1988, Welch's Uniform applied for a permit to remove five additional underground storage tanks. In May 2004, Welch's Uniform applied for a permit to remove one additional 1,000-gallon underground storage tank. Soil sampling beneath the tank did not detect any contamination problems, and on October 26, 2004, the DPW/UGT issued a no further action letter for the closure of the 1,000-gallon underground tank.

HISTORICAL SOURCES

Historic Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps provide information on commercial and industrial properties, based on risk data gathered for the fire insurance companies. The maps show the number of buildings located on the property, and the type of construction. The maps also describe the various businesses located nearby, and show the locations of tanks, boilers, and other potential hazards.

A review of the Sanborn Fire Insurance Map collections from 1867-1970, located three maps for the subject property:

Date of Map	Description
1906	The subject property is occupied by 16 residences, 10 sheds, two barns and a small bakery.
1920	The subject property is occupied by 21 residences, nine sheds, seven garages, a bakery and portions of the Los Angeles Rock and Gravel Co., which consisted of eight buildings which were used as oil houses, greases houses, a tool house, an office and an auto repair canopy.
1951	The subject property is occupied by 22 residences, eight garages, a bakery and 10 commercial buildings which were used for offices, warehousing, storage and as workshops. The commercial buildings were occupied by "Steel Framing & Building Corporation."

A review of the Sanborn Fire Insurance Map collections from 1867-1970, located three maps for the area surrounding the subject property:

Date of Map	Description
1906	The property to the north is occupied by six residences, a barn and three sheds. Pasadena Avenue is to the east and there is no map coverage available for the property east of Pasadena Avenue. South of the subject property is Avenue 34 and further south are two stores, 12 residences, nine sheds, a barn and a fruit packing building. West of the subject property is a railroad right-of-way and further west is vacant land and the Arroyo Seco flood control channel.
1920	The property to the north consists of several residences, garages, sheds and three commercial buildings which are occupied by the Los Angeles Rock & Gravel Co. Further north is a large industrial facility which is occupied by Pacific Laundry. Pasadena Avenue is east and further east are several residences, garages and sheds. South of the subject property is Avenue 34 and further south are several residences, garages, sheds and a fuel storage area. West is of the subject property is a railroad right-of-way and further west is vacant land and the Arroyo Seco flood control channel.

Date of Map	Description
1951	The property to the north is occupied by a residence, a garage, two commercial storage building and a ten-car auto storage building. Further north is a large industrial facility which is occupied by Welch's Uniform and Overall Cleaning Co. A dry-cleaning building, a washing room and a 25-car auto storage building are located within the Welch's Facility. Pasadena Avenue is to the east and further east are several residences, garages, sheds and Hillside Elementary School. South of the subject property is Avenue 34 and further south are two stores, several residences, garages, sheds and a scrap metal storage yard. West of the subject property is a railroad right-of-way and a lumber yard which is occupied by Alliance Lumber and Investment Co. Further west is the Arroyo Seco flood control channel.

Historic City Directory Search

City Directories provide information on residential, commercial and industrial properties, and list the business name and address. A review of the historic directories provides an overview of the current and previous occupants of the site.

A search of the Haines Criss Cross City Directories, dated 1972-2009, determined the subject property has been previously occupied by Smith Mailer Inc. (1972-1987), GT Price Products (1972), Alta Canada Corp. (1987), American Bearing (1987), Laramada Corporation (1987), Lorac Financial Services (1987), Metal Service Corporation (1987), American Caster Corporation (1987-1992), Ann Mar Inc. (1987), Empire Button Co. (1987), William Pile Printing (1987-1992), Bob Baker Productions (1992), American Medical Wholesale (2009), Ortiz Transfer & Storage (2009), Ortiz Brothers Moving & Storage (2009), Select Storage (2009) and Studio 34 (2009).

A search of the Haines Criss Cross City Directories, dated 1972-2009, did not identify any listings for the adjacent property to the north. The properties east of Pasadena Avenue have been previously occupied by Hillside Elementary School (1972-2009) and residences (1972-2009). The properties south of Avenue 34 have been occupied by residences (1972-2009), Ishizaki Studios (1987), Argus Tool Manufacturing (1987), Smart Saver (1987-1992), Pasadena Avenue Market (1987-1992), AAA Fashions (1992), Tere's Fashions (1992-2009), Allied Die Cutting (1992), Three Star Refrigeration (1992), ACW Apparel Inc. (2009) and Water Land Inc. (2009). No listings were identified for the adjacent property to the west.

City of Los Angeles
Building Department

A review of the building records for the subject property located the following records:

Date	Activity	Owner
	135 Avenue 34	
01/23	Reroof building	East/Northeast Economic Dev. Corp.
	137 Avenue 34	
01/23	Move residence from 2639 Lacy Bel Avenue	Charles Mattingly
04/61	Demolish dwelling	Cannon Electric Co.
	137½ Avenue 34	
01/23	Move residence from 2641 Lacy Bel Avenue	Charles Mattingly
04/61	Demolish dwelling	Cannon Electric Co.
	139 Avenue 34	
01/23	Move residence from 2643 Lacy Bel Avenue	Charles Mattingly
04/61	Demolish dwelling	Cannon Electric Co.
	141 Avenue 34	
07/16	Add two rooms to residence	Chas Fishback
07/16	Construct garage	Chas Fishback
02/28	Add two bedrooms to house	Felipe Villarreal
07/53	Construct garage	Joseph Gomez
08/56	Demolish building	Teal House Wreckers
08/74	Demolish storage building	East/Northeast Economic Dev. Corp.
	141-149 Avenue 34	
09/56	Construct parking lot	Cannon Electric Co.
04/77	Grade for building site	Los Angeles Economic Dev. Corp.
04/77	Encroach into 169 Ave. 34 & 3505 Pasadena Ave.	Los Angeles Economic Dev. Corp.
07/77	Construct foundation only for factory	Los Angeles Economic Dev. Corp.
08/77	Construct light manufacturing building	Los Angeles Economic Dev. Corp.
11/77	Add office partitions	Los Angeles Economic Dev. Corp.
12/77	Add storage tank for plastic pellets	Los Angeles Growing Corp.
	143 Avenue 34	
08/06	Construct dwelling	F.H. Small
08/56	Demolish building	Teal House Wreckers
08/74	Demolish storage building	East/Northeast Economic Dev. Corp.

Date	Activity	Owner (continued)
	145 Avenue 34	
08/06	Construct dwelling	F.H. Small
08/56	Demolish building	Teal House Wreckers
08/74	Demolish storage building	East/Northeast Economic Dev. Corp.
	147 Avenue 34	
08/06	Construct dwelling	F.H. Small
08/56	Demolish building	Teal House Wreckers
08/74	Demolish storage building	East/Northeast Economic Dev. Corp.
	149 Avenue 34	
08/06	Construct dwelling	F.H. Small

No other building or demolition permits were on file for the subject property.

SUMMARY OF PREVIOUS ENVIRONMENTAL REPORT

On March 2, 2000, Orswell & Kasman, Inc. (OKI) prepared a Phase I Environmental Site Assessment Report on the 141 Avenue 34 building. The OKI report included a review of the regulatory records, a review of the historical documents, an inspection of the surrounding properties and an interview with the property owner. At the time of the inspection, the 141 Avenue 34 building was occupied by Studio 34, a film production studio; and by Select Storage, a storage facility. The report stated that small quantities of water-based paint and oil-based paint were stored and used inside the building and the hazardous materials appeared to be properly stored and managed. Mr. Eric Ortiz, the property owner, stated the tenants are responsible for the disposal of any waste paints which are generated by the business activities. He said he was not aware of any chemical spills or contamination problems with the site. The report concluded that the adjacent property to the north (Welch's Uniforms) was identified as a clean up site that was addressing the contamination problem. Based on the results of the assessment, OKI concluded that no further environmental studies were recommended for the site.

On August 1, 2005, OKI prepared a Phase I Environmental Site Assessment Report on the 135 Avenue 34 and 3401 Pasadena Avenue buildings. The OKI report included a review of the regulatory records, a review of the historical documents, an inspection of the surrounding properties and an interview with the tenant. At the time of the inspection, the buildings were occupied by United Finishing and Laminating, a commercial laminating business. The report stated that small quantities of lubricating oil, bio-degradable detergents, glues and gear oil were stored and used inside the building and the materials appeared to be properly stored and managed. Pat Moller, the tenant at the site, stated the business stored and used small quantities

of hazardous materials, which were stored in five-gallon containers inside a fenced compound in the storage yard. Mr. Moller advised no hazardous wastes were generated from the business activities, and he was not aware of any chemical spills or contamination problems with the site. The OKI report concluded that the adjacent property to the north (Welch's Uniforms) was identified as a clean up site that was addressing the contamination problem. Based on the results of their assessment, no further environmental studies were recommended for the site.

On September 28, 2012, OKI prepared a Phase I Environmental Site Assessment report on the subject and surrounding properties. The OKI report included a review of the regulatory records, a review of the historical documents, an inspection of the surrounding properties and interviews with the property owner and the tenant. The property consisted of five separate industrial buildings with paved parking and storage areas. At the time of the inspection, the subject property was occupied by Ortiz Bros. Moving & Storage, a moving company; The Submission Factory, a gym; Water Wellness, an office; and Warner Brothers Studios, a prop design business. Large quantities of water-based paint were stored and used inside the 3433 Pasadena Avenue building, and hazardous waste in the form of waste paint was generated by the business activities. The safety manager for Warner Brothers Studios, provided a hazardous waste manifest from Rinco Environmental Services stating an unknown amount of waste paint was collected and removed from the site. Eric Ortiz, the property owner, stated the tenant is responsible for disposing any hazardous wastes which are generated by the business activities. He said he was not aware of any chemical spills or contamination problems with the site. No signs of illegal dumping or distressed vegetation were observed on the property. There was no evidence of underground storage tanks, wells, or septic tanks on the property, and there was no indication of obvious contamination on the site.

A review of the building permit records, historical aerial photographs, Sanborn fire insurance maps, assessor records and historic city directories determined the 153 Avenue 34 building was constructed over 83 years ago and the site was previously occupied by residences. The 141 Avenue building was constructed in 1977, and the site was previously occupied by portions of the Los Angeles Rock and Gravel Co., which included structures used for auto repair and two oil houses. The 141 Avenue 34 building was previously occupied by The Steel Framing and Building Corporation, several light-industrial buildings and several residences. The 3401 Pasadena Avenue buildings were constructed between 1948 and 1953, and the site was previously occupied by another commercial building and several residences. The 3433 Pasadena Avenue building was constructed in 1967 and the site was previously occupied by several residences.

A review of environmental regulatory agency records did not identify any reported contamination problems with the subject property. Eleven offsite locations were identified as potential risks or threats to the subject property. According to the data, ten of the sites were not located in the near vicinity, and there was no indication that contaminants from those sites had migrated onto the subject property. The adjacent property to the north (Welch's Uniform Facility) was identified by State of California Environmental Protection Agency (CAL-EPA) Department of Toxic Substances Control (DTSC) as an active hazardous waste site. In addition, the adjacent property was also identified by the State of California Regional Water Quality

Control Board (RWQCB) as having two open RWQCB Cleanup Program cases. There was no indication from a review of the regulatory records and a site inspection of the subject property that the property had any problems concerning the storage, usage or disposal of hazardous materials. Based on the results of their assessment, the OKI report concluded, no further environmental studies were recommended for the site.

SUMMARY

Based on a review of regulatory records and a visual inspection of the site and surrounding area, no *potential environmental concerns* were identified with the subject property, except as follows:

Nine offsite locations have been identified as potential risks or threats to the subject property. According to the data, seven of the sites are not located in the near vicinity, and there is no indication that contaminants from these sites have migrated onto the subject property.

A review of the October 2013 State of California Environmental Protection Agency (CAL-EPA) Department of Toxic Substances Control (DTSC) records determined the adjacent property to the west (Metro Rail Pasadena Blue Line between Avenue 33 and French Avenue) is identified as a hazardous waste site that was referred to another agency for cleanup in December 2001. According to the records, the site has had no known uses other than train traffic. Seventeen borings were advanced along the railroad right-of-way area, and analytical test results indicated high concentrations of lead, polychlorinated bi-phenyls (PCBs), tetrachloroethane (PCE) and trichloroethylene (TCE) contamination in the soil and groundwater beneath the site. On December 27, 2001, the case was referred to the Regional Water Quality Control Board (RWQCB) for oversight, and no further information is available at this time; and

The former Welch's Uniform Rental Facility site (#5 on map), 3505 Pasadena Avenue, is located on the adjacent property to the north, and the business is identified by State of California Environmental Protection Agency (CAL-EPA) Department of Toxic Substances Control (DTSC) as an active hazardous waste site. According to the DTSC database records, the soil is contaminated with trichloroethylene (TCE). A site investigation or remediation of the site is currently in progress. According to the records, the 2.6 acre site was previously occupied by Welch's Uniform, a commercial linen and apparel laundering and delivery service. The former business operated at the site from the 1920s throughout 1988. TCE was first discovered at the site in 1988 when vapor extraction wells were first installed on the property. Several follow-up investigations have been completed at the site which included soil sampling, soil vapor sampling, the installation of 14 groundwater monitoring wells, the installation of seven soil vapor wells and semi-annual soil and soil vapor monitoring. In 1993, the buildings at the former Welch's Uniform Facility were demolished and removed from the site. In 2007, the Department of Toxic Substances Control (DTSC) began overseeing the site investigations, monitoring and clean up efforts at the site. Previous environmental studies conducted at the site indicate the soil and groundwater beneath the facility was

contaminated with volatile organic compounds (VOCs) and petroleum based hydrocarbon cleaning solvents including tetrachloroethene (PCE) and TCE. The current owner (AmeriPride Services Inc.) and the DTSC entered into a voluntary agreement to clean-up the site. In 2013, a soil vapor extraction (SVE) system and 32 SVE wells were installed at the site to remediate the PCE and TCE contamination. The SVE system is scheduled to operate at the site until contamination levels are reached which do not pose a significant risk to human health and the environment. In addition, the former Welch's Uniform Rental site is also identified by the State of California Regional Water Quality Control Board (RWQCB) as having two open RWQCB Cleanup Program cases. The case was first opened in December 1987, and the site is identified as an open Cleanup Program Site that is currently inactive. According to the records, the groundwater is potentially contaminated with solvents and non-petroleum hydrocarbons. A second case was opened in December 1998, and the site is identified as an open Cleanup Program Site that is undergoing a site assessment. According to the records, the site is potentially contaminated with petroleum, unidentified fuels, oil and volatile organic compounds (VOCs). Both of the cases were transferred to the Department of Toxic Substances Control (DTSC) for oversight on December 18, 2006. Lastly, a review of the City of Los Angeles Fire Department (LAFD) records revealed Welch's Uniform applied for a permit to remove a 2,000-gallon underground diesel fuel tank in 1987. Soil sampling beneath the tank revealed significant Total Petroleum Hydrocarbon as gasoline (TPH-g) contamination (8,600 ppm). The groundwater beneath the site was determined to be about 35 feet below the ground surface, and the groundwater flows away from the subject property in a west-northwest direction. In February 1988, Welch's Uniform applied for a permit to abandon five underground storage tanks in-place, and in December 1988, Welch's Uniform applied for a permit to remove five additional underground storage tanks. In May 2004, Welch's Uniform applied for a permit to remove one additional 1,000-gallon underground storage tank. Soil sampling beneath the tank did not detect any contamination problems, and on October 26, 2004, the DPW/UGT issued a no further action letter for the closure of the 1,000-gallon underground tank. An inspection of the property revealed the site is currently a vacant lot, and remedial activities were being conducted on the site.

Should it be determined the groundwater beneath the subject property has in fact been impacted by the Former Welch's Uniform Rental site or the Metro Rail Pasadena Blue Line site, it is the policy of the State of California and the United States Environmental Protection Agency not to hold property owners responsible for costs to clean up contaminated groundwater beneath their property, unless the owners contributed to the problem. There is no indication from a review of the regulatory records and a site inspection that the subject property has had any problems concerning the storage, usage or disposal of hazardous materials, and it appears the responsible parties are in the process of addressing the contamination problem.

RECOMMENDATIONS

Based on the results of this assessment, no further environmental studies are recommended for the site.

Appendix F

Professional Qualifications and Liability Insurance

Don Kellar, M.S., REP, PG
National Client Manager/Hydrogeologist
Los Angeles Office
don@frenviro.com
(310) 876 4128

Don Kellar is National Client Manager Manager and Hydrogeologist within Fulcrum Resources Environmental

Don specializes in helping clients with the following:

- Transaction Screen Assessment
- Phase I and II environmental site assessment
- Site investigation and assessment
- Technical site review
- RFI sample program management
- Alternative Energy
- Asbestos inspections associated with demolition, restoration and renovation
- Remediation and Monitoring Tactics
- Health and Safety- Environmental Construction/drilling
- CEQA/NEPA
- Agency Oversight Assistance

Key Experience/Key Projects -

World Oil Groundwater Monitoring and Sampling

- Performed field work, project management, budgeting, client management, and completion of report for over 200 sites nationwide. Mr. Kellar managed a total of 18 sites under World Oil Corporation, and an additional 10 sites under Exxon/Mobil. Mr. Kellar also had the privilege of conducting this work nationwide throughout California, Arizona, Colorado, Maine, Rhode Island, Connecticut, New York, Massachusetts, Nevada, and Michigan.

Phase I and II Environmental Site Assessments

- Performed over 2,000 environmental site assessments nationwide since 2001 that include but not limited to gas stations, dry cleaners, heavy manufacturing sites, multi-tract residential apartments and housing. Mr. Kellar also has extensive involvement with Non-CERCLA sampling per specific client protocol that include asbestos sampling, lead-based paint sampling, radon testing, and lead in water sampling.

  Mr. Kellar managed Bank of America's REO portfolio between 2008 and 2010 throughout the western United States. These assessments included a former landfill turned golf course, a former silver mine, numerous farming and agricultural parcels, brownfield redevelopments; recycling facilities; medical facilities; small and large shopping plazas; and developed or partially developed residential communities.

  Experienced as a client and project manager for over 30 Shell Oil Sites with duties ranging from surface and subsurface investigations; pilot studies; assistance with onsite engineer for Phase III remediation; and agency correspondence. Under the mentorship of numerous PGs, CHGs, and PEs, Mr. Kellar has become very experienced in the troubleshooting remediation options for prospective clients.

Health and Safety

- As former Health and Safety Officer for Geologic Services Corporation's West Coast Office, Mr. Kellar gained experience in identification, handling, disposal of different hazardous wastes, and the development of emergency response plans for gas stations and industrial sites.

Education

Bachelors of Science in Physical Geography, University of Michigan, 2002 Minor Music
Scholar Award 2001

Masters of Science in Hydrogeology, California State University Los Angeles, 2005

Professional Papers

Identification of Water Sources during Wet and Dry Months within Medea Creek Through Ion and Isotope Analysis. Research Paper for California State University-Los Angeles, October 2009

Certifications

- California Registered Environmental Assessor #30026
- 40-hour OSHA HAZWOPER with Refresher
- United States Green Building Council Member-Los Angeles
- National Registry of Environmental Professionals #624658052
- California Licensed Professional Geologist-#9192
- Florida Licensed Professional Geologist-#2858

Languages-English, Moderate Speaker of Spanish and Chinese

Ling (Caroline) Cao, M.S.
Principal Consultant/West Coast Operation's Manager
Los Angeles Office
ling@frenviro.com
(626) 429 1480

Ms. Cao is the Principal Consultant and West Coast Operation's Manager within Fulcrum Resources Environmental

Ms. Cao specializes in helping clients with the following:

- Transaction Screen Assessment
- Phase I and II environmental site assessment
- Site investigation and assessment
- Technical site review
- Biology and Ecology
- Property Condition Assessments
- Asbestos and Lead-based Paint inspections associated with demolition, restoration and renovation
- Lead-in-water and Radon Testing
- Consulting with Chinese Community
- Health and Safety- Environmental Construction/drilling
- CEQA/NEPA

Key Experience/Key Projects -

Palos Verde and El Sobrante Landfills
Corona Granite and Silicone Quarry

- Performed field work, project management, budgeting, client management, and completion of Phase I Reports. Ms. Cao was able to identify multiple environmental issues and provide client with direction and assistance with respective agencies.

Phase I and II Environmental Site Assessments

- Performed over 1,000 environmental site assessments nationwide since 2003 that include but not limited to former Talley Corporation in Thousand Oaks, SCGA Golf Course in Murrieta, the 536-acre Dos Lagos master-planned and mix-used development in Corona, and silica mines. Ms. Cao also performed due diligence on various gas stations, dry cleaners, chemical plants, heavy manufacturing sites, multi-tract residential apartments and housing. Ms. Cao also has extensive involvement with Non-CERCLA sampling per specific client protocol that include asbestos sampling, lead-based paint sampling, radon testing, and lead in water sampling.

  Mr. Cao has extensive experience with portfolio HUD projects under Fannie Mae and Freddie Mac Guidelines.

Business Development/Customer Service

- Ms. Cao has earned a stellar reputation with providing numerous clients with the excellent customer service on over 1,000 nationwide transactions. Ms. Cao's technical experience combined with customer service has played a vital role in the growth to date of Fulcrum Resources Environmental.

Ms. Cao is majority owner of Fulcrum Resource Environmental and is currently heading the company towards Government 8A status.

John Winkler, PG
Senior Geologist/Regional Manager
Thousand Oaks, California Office
Los Angeles, Ventura, Kern, Santa Barbara, and San Luis Obispo Counties
john@frenviro.com
(805) 338 8008

Mr. John Winkler is a Senior Geologist within Fulcrum Resources Environmental

John specializes in helping clients with the following:

- Phase I and II environmental site assessment
- Site remediation
- Technical site review
- Well installation – Monitoring/extraction/production/injection
- Groundwater monitoring and compliance activities
- Health and Safety
- Environmental Construction/drilling – Direct push/hollow-stem auger/mud rotary/air rotary/reverse circulation/CPT
- Hazardous Materials Management
- Waste profiling/treatment/disposal

Key Experience/Key Projects -

Restaurant Property, Malibu, CA

- Mr. Winkler provided environmental consulting for the seller of a property that was developed as a restaurant, but historically was occupied by a gasoline service station. The gas station was closed in the 1960's, prior to purchase by the property owner, and USTs were discovered and removed in 2004. Site assessments indicated petroleum hydrocarbon impact to soil and groundwater. Furthermore, seepage pits for wastewater complicated contaminant transport in the subsurface. Mr. Winkler assisted the property owner to identify the former UST owner/operator, who then agreed to assume Responsible Party status. Subsequently the property owner was able to complete the sale of the property.

Commercial Retail Center, Montebello, CA

- Mr. Winkler provided environmental consulting for a property owner seeking a refinance loan of a 7.56-acre multi-tenant retail shopping center. A Phase I ESA was conducted and an existing dry cleaner unit was determined to have operated for over 25 years, indicating a risk of a release of dry cleaning solvent. A Phase II assessment was conducted at areas of Haz Mat use. Results indicated low levels of PCE in soil and soil vapor below the unit, with no threat to groundwater, but a risk for vapor intrusion. To mitigate the risk, Mr. Winkler managed the following: 1) improvement of secondary containment; 2) improvement of engineered air flow; and, 3) installation of a vapor barrier. Based on the mitigation of the risk of vapor intrusion, the lender approved the loan.

.

Commercial Property, Pomona, CA

- Mr. Winkler provided environmental consulting for a property that was placed in receivership, partly to provide time to assess the environmental risks. A Phase I ESA was conducted and research indicated the site was developed in 1961, and USTs were installed on the property and subsequently removed, but closure was not documented. Additionally, data gaps on past site use existed. Site assessments indicated no significant impact from the fuel USTs; however, elevated concentrations of PCE in soil were detected. A nearby property had a catastrophic train derailment that released PCE to the subsurface and the elevated levels on the subject property were determined to have an off-site source. The UST case was successfully closed with the oversight agency.

Fields of Competence
- Environmental site assessments
- Environmental remediation
- Hazardous Materials Management

Education
- Bachelors of Science in Geology, University of New York at Cortland
- Certificate in Hazardous Materials Management, University of California, Santa Barbara

Certification

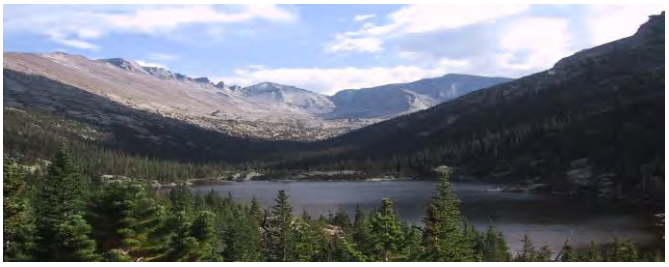
Jeffrey R. King, CPG
Regional Project Manager/Environmental Consultant
Hawaii Office
jeff@frenviro.com
(808) 344-2871



Jeff King is a Regional Project Manager and Environmental Consultant within Fulcrum Resources Environmental.

Jeff specializes in helping clients with the following:

- Transaction Screen assessment
- Phase I and II environmental site assessment
- Site investigation and assessment
- Senior technical review and peer review
- Subsurface investigation with various drill rig technologies
- Underground Storage Tank (UST) investigation, removal, and closure
- Asbestos, lead-based paint, hazardous materials inspection and sampling
- Mold and indoor air quality investigation
- Regulatory compliance/waste management/permitting
- Environmental health and safety
- Emergency response
- Storm water sampling
- Geophysics
- SPCC plans
- Remediation system O & M

Key Experience/Key Projects:

Environmental Site Assessments

- Performed hundreds of Phase I and II environmental site assessments (ESAs) nationwide for various clients on various commercial, industrial, residential, agricultural, and undeveloped properties. Also performed peer review for a national client of other consultant's ESAs.
- Project manager for Phase I ESA of a west Maui 4,000+ acre group of properties slated for future residential and commercial development. The properties consisted of former agricultural, industrial, commercial, and forest reserve lands.
- Project manager for Phase I ESAs and updates of several Oahu and Maui wind and solar farm properties for major alternative energy producers.

Site Characterization and Remedial Activities

- As a Michigan Certified UST Professional, performed senior technical review and oversight for numerous leaking UST sites throughout the state.
- Performed field investigation and report preparation for 14 previously removed USTs (within nine excavation areas) and two UST piping areas at the former Raco Airfield and BOMARC Missile Site in Michigan's Upper Peninsula. Most of the analytical testing was performed onsite using a mobile laboratory in order to delineate the extent of impact while at the site.
- Performed field investigation and report preparation for the removal of six USTs at an automotive repair facility in Highland Park, Michigan. Closure was obtained through application of RBCA techniques including indoor air quality evaluation, maintenance of pavement and floors, and filing appropriate notices of corrective action with affected parties and the Register of Deeds.

Asbestos, Lead-Based Paint, and Hazardous Materials

- Performed many inspections and surveys for various Maui and Hawaii properties including state hospitals, county facilities, major shopping malls and resorts, and other various sites.

Education

Bachelor of Science, Geology, University of California, Los Angeles, California, 1979

Graduate Courses in Hazardous Materials Management, Wayne State University, Detroit, Michigan, 1988-89

Risk-Based Corrective Action (RBCA) Course, Michigan Department of Environmental Quality, 1995

Certified Hazardous Materials Manager (CHMM) Overview Course, CHMM-Michigan, 2008

Certification

- Indiana Licensed Professional Geologist (LPG No. 1795)
- Hawaii Certified Asbestos Building Inspector (HI ASB No. 3545)
- Hawaii Certified Lead Risk Assessor (Cert. No. PB-0663)
- 40-hour OSHA HAZWOPER Training and current 8-hour refresher

Languages

- English, native speaker

Honors and Activities

Received a letter of commendation from Ford Motor Co. Environmental Services for outstanding project performance.

Served as local membership chair for Association of Environmental and Engineering Geologists (AEG). Also served on meeting committee for October 2004 national AEG meeting in Dearborn, Michigan.

Bryan Miles, P.G.
Regional Client Manager, Professional Geologist
San Diego & Orange County
bryan@frenviro.com
425.270.9914

Bryan Miles has been managing environmental site assessment and remediation projects in California since 2001. He has been a licenced Professional Geologist (CA 8739) since 2010.

Bryan specializes in environmental site assessment and remediation including the following specialties:

- Phase I and II environmental site assessment
- Contaminated site closure strategy (NFA)
- Vapor intrusion modeling
- Vapor intrusion mitigation
- Indoor air quality assessment and monitoring
- Groundwater modeling
- Contamination fate and transport modeling
- Site Conceptual Modeling
- Soil, soil vapor and groundwater sampling
- UST Removal
- Soil Vapor Extraction
- Chemical contamination analysis
- In-situ Chemical Remediation
- Remediation Action Plan preparation and implementation
- Geologic assessment and interpretation
- Regulatory guidance, interaction and management
- Health and Safety - Environmental Remediation/Construction/drilling

Key Experience/Key Projects:

Phase I and II Environmental Site Assessments

- Completed numerous environmental site assessments nationwide since 2001, including but not limited to retail gas stations, dry cleaners, metal plating facilities, railroad; and industrial, commercial and residential transactions.

- Vapor Intrusion, groundwater, and site conceptual modelling; as well as contaminant fate and transport.

- UST removal; soil, soil vapor and groundwater monitoring and sampling, monitoring well design and install.

Site Assessment and Remedial Project Highlights

- Successfully guided contaminated properties towards no further action (NFA) for numerous clientele including lenders, property owners, insurance agencies and brokers.

- Managed site investigation and remediation activities; including design and installation of two dual-phase extraction systems, for multiple responsible parties for a commingled free product and petroleum hydrocarbon groundwater plume encompassing two city blocks in the Harbor District to San Diego

- Guided oversight and technical support for In-situ bioremediation injection using Hydrogen Release Compound (HRC) and Oxygen Release Compound (ORC). at the BNSF Railroad Trigo Facility in Trigo, California

- Managed hydrogeologic and soil assessment related to leaking heating oil UST in downtown Seattle. Assessment included, soil sampling, indoor air sampling, well installation and LNAPL assessment. Project involved coordination with Ecology and neighboring stakeholders regarding off-site dissolved-phase and LNAPL plume migration.

- First responder involved with assessment and remediation for two major gasoline tanker spill (>2000 gallons) on Interstate 90 in Cle Elum Washington; spills occurred at separate times within 2015.

- Managed vapor intrusion source, assessment and mitigation including Johnson & Ettinger Vapor Intrusion Model for numerous site sites throughout California.

Education

B.S. Geological Sciences, University of California Santa Barbara, 2002

Certification

- California Licensed Professional Geologist (P.G.) #8739
- Washington Licenced Geologist (L.G.) #3090
- 40-hour OSHA HAZWOPER Training
- Adult and Pediatric First Aid/CPR/AED

Personal Interests

I have a passion for music, surfing and trail running. I have completed three ultra-marathons, three marathons, a 3-day stage race through the Colorado Rockies and numerous half marathons and shorter distances. I am a musician and singer-songwriter. I recorded an album and play at local restaurants and coffee shops. My greatest satisfaction comes from spending time with my family.

Hao Zhang, M.S., PE, QSD
Regional Project Manager/Engineer
San Francisco Office
hao@frenviro.com
(626) 840-7843

Hao Zhang is a Regional Project Manager and Engineer within Fulcrum Resources Environmental.

Hao specializes in helping clients with the following:

- Transaction Screen Assessment
- Phase I and II environmental site assessment
- Site investigation and assessment
- Technical site review
- RFI sample program management
- Hazardous Waste Tank System CUPA PE Certification
- Remediation and Monitoring Tactics
- Soil Vapor Extraction
- In-situ Chemical Remediation
- Remediation Action Plans Implementation
- Vapor Intrusion Mitigation
- Contaminated Site Closure
- Oil Well Abandonment
- Soil Management Plan Implementation
- Health and Safety - Environmental Remediation/Construction/drilling

Key Experience/Key Projects:

Phase I and II Environmental Site Assessments

- Performed over 200 environmental site assessments nationwide since 2014, including but not limited to gas stations, dry cleaners, heavy manufacturing sites, and multi-tract residential apartments and housing.

- Performed soil, soil vapor, and groundwater sampling and investigations.

- Supervised and conducted well installations, trenching, well gauging, groundwater monitoring, and MIP investigations.

Site Characterization and Remedial Activities

- Performed site investigation and remediation activities to address chlorinated solvents (PCE, TCE), petroleum hydrocarbons, benzene, ethylbenzene, MTBE, and chromium contamination in soil and groundwater;

- Prepared Corrective Action Plans (CAPs)/Remediation Action Plans (RAPs), pilot test and treatability study work plans, Soil Management Plans (SMPs), remediation status reports, and groundwater monitoring reports to meet environmental permitting requirements;

- Performed soil excavation, Soil Vapor Extraction (SVE), in-situ chemical injections, and soil flushing remediation strategies to achieve site clean-up goals and No Further Action letter for multiple contaminated sites.

- Performed vapor intrusion investigation and vapor mitigation system installation in construction of new buildings.

Health and Safety

As former Health and Safety Officer for Tetra Tech's Southern California Office, Ms. Zhang gained experience in identification, handling, and disposal of different hazardous wastes, and the development of emergency response plans for brownfield redevelopment and remediation sites.

Education

Bachelors of Science in Environmental Science, Nankai University, China 2007-2011

Master of Science in Environmental Science and Engineering, California Institute of Technology, U.S. 2011-2013

Certification

- California Licensed Professional Engineer (PE) #C85825
- California Qualified SWPPP Developer (QSD)
- 40-hour OSHA HAZWOPER Training
- 30-hour OSHA Construction Training
- 8-hour OSHA HAZWOPER Supervisor Training
- Adult and Pediatric First Aid/CPR/AED

Professional Publication & Presentations

Unique Injection Well Design and Implementation for ISCO at an Active Shopping Center. *26th Annual International Conference on Soil, Water, Energy, and Air,* ***Association*** *for* ***Environmental Health and Sciences Foundation (AEHS)****. 2016, March 23.*

Emily Sturnfield, MS, PG
Regional Project Manager
Fulcrum Resources Environmental
PO Box 13646
Seattle, WA 98198
emily@frenviro.com
cell: (847) 404 9982

Technical Expertise

- Transaction Screening Assessments
- Phase I Environmental Site Assessments
- Phase II Environmental Site Investigations
- Technical Site Review
- Site Characterization
- Brownfield Remediation
- NEPA Environmental Impact Statements
- Environmental Regulatory Compliance

Phase I and II Environmental Site Assessments

- Performed 500+ Phase I Site Assessments, including restaurants, commercial storage properties, office and residential properties, gas stations, dry cleaners, manufacturing sites, communications facilities, public works projects (such as roadway & sewer improvement projects) and former military installations (2011-2019).

- Extensive experience in proposal preparation and field work involving Phase II Assessments. Phase II Subsurface Investigations range from investigating dry cleaner sites, heavy manufacturing sites, or gas stations. I have been involved from proposal preparation and client management to completion of report and agency correspondence (2011-2019).

Remediation / Regulatory Closure

- Extensive experience with site characterization and remedial action / closure projects. Also experienced in preparing Corrective Action Plans, Remediation Action Plans, Site Closure Reports, and status/monitoring reports. (2011-2019).

Federal Compliance Experience

- Experience with facility regulatory environmental compliance inspections to assess and remediate facility compliance with local, state, and federal laws in the following states and territories: Washington, Oregon, California, Nevada, Montana, Arizona, and Guam.

Municipal Consulting Experience

- 6+ years as a consultant for municipal clients, providing a wide variety of environmental services, which include: Phase I & Phase II projects; agency negotiation and compliance expertise; brownfield remediation and site redevelopment; waste characterization; soil management; and technical environmental oversight of public works projects, such as wetland and stream management, local roads and sewer improvements, and grants (2011-2017).

- Project Manager for 3.5-million dollar Illinois Department of Transportation (IDOT) Hazardous Waste Contract as a consultant conducting Preliminary Environmental Site Assessments (PESA) and Preliminary Site Investigations (PSI), Soil Management Plans, and waste disposal management (2016-2017).

Education

Bachelors of Science in Geology, Northern Illinois University, 2009

Master of Science in Geology and Geospatial Science, Missouri State University, 2011

Certifications

- 40-hour OSHA HAZWOPER
- Washington Licensed Professional Geologist #3209
- Illinois Licensed Professional Geologist #196.001427
- Indiana Licensed Professional Geologist #2575
- Wisconsin Licensed Professional Geologist #1348

Greg L. Gavasse, MSSE, P.E.
Senior Engineer
Los Angeles Office
calquake@roadrunner.com
(805) 202 1362

Greg Gavasee is Senior Engineer within Fulcrum Resources Environmental

Greg specializes in helping clients with the following:

- Building Engineering Reports (over 3,500 Property Condition Assessments)
- Seismic Evaluations (PMLs, SELs, and SULs)
- Technical site review
- HUD, ASTM, FNMA, FREDDIE MAC, and GMAC
- Building Design Consulting
- Drainage, pavement, life safety, electrical, plumbing, mechanical, and structural analysis
- Government Agency Contracting

Key Experience/Key Projects -

High Rise Building-777 Tower, Los Angeles, CA

- Conducted a building engineering report that included a review of "as-built" plans, construction and maintenance documents; analysis of the electrical, plumbing, mechanical, conveyance, structural and life safety systems; review of the building interior and exterior components, and a complete review of the facilities compliance with the Americans with Disabilities Act (ADA). A seismic assessment (SEL/SUL) was also performed.

Los Angeles MTA Rapid Bus Project, Los Angeles, CA

- Mr. Gavasee was the project director in charge of consultant procurement/management, design development and final design, construction management, project scheduling using CPM, project compliance with federal, state, and local regulations, permitting, and construction monitoring. This public works project involved the installation of 62 Rapid Bus Shelters, which included street lighting, kiosks, changeable message signs, and hardscape. This state of the art bus shelter system communicates with busses via modern communication and updates passengers on bus arrival times. This project was completed in 21 days ahead of schedule and $630,000 of the set $4.6 million dollar budget.

Structural Engineering, Southern California

- Mr. Gavasee has conducted over 3,500 Property Condition Assessments and contains a wealth of knowledge within structural design and engineering. Design experience includes concrete tilt-up structures; wood, steel, and concrete frame structures; pier foundation for steel erector crane; pier foundations for monopole and lattice tower antennas; bridge load rating and retrofitting; fatigue and fracture critical analysis of steel bridges, and concrete and GFRC panels.

Fields of Competence

Previous representative employers –

- Cal-Quake Engineering, Inc

Jyh-Yih (Jerry) Ren, PhD, P.E.
Project Manager, Principal Consultant
Anaheim Office
renjyhyih@yahoo.com
(626) 780-8960

Jerry Ren is Project Manager and Project Engineer

Jerry specializes in helping clients with the following:

- Combustible soil gas control
- Residential area gas barrier design
- Oil field soil vapor control
- Landfill gas collection system design
- Landfill gas to energy
- Blower and flare station
- Gas recovery and treatment system design

Key Experience/Key Projects -

Norco Corona School District (Corona, CA)

- Served as Project engineer for the methane protection system design of Rosa Parks Elementary School. The system design included trench plan, membrane plan, and vent risers details.

Methane Mitigation Projects (Los Angeles, CA)

- Responsibility included soil gas test and methane barrier design for several clients where methane gas mitigation for building structures was required by local building codes.

Brea Olinda Master Community Association

- Responsibility included field supervising of monitoring of tar seeps and methane mitigation systems as well as directing of non-routine and emergency response services as required in accordance with the requirements of the Orange County Fire Authority and the City of Brea. The project experience included soil remediation system design.

University of Irvine (Irvine, CA)

- Responsibility included assisting in the preparation of a Remedial Action Plan (RAP) and feasibility study for soil and groundwater remediation using dual phase vapor extraction technology at a fleet services facility. The project experience included assisting in the design of a remediation system for soil and groundwater cleanup to bring the site to closure. Remediation of soil and groundwater was completed and verified by post-closure monitoring of groundwater.

Blue Ridge Landfill (Fresno, TX)

- Served as Project engineer for the engineering and construction of a $6M landfill gas (LFG) energy recovery system with 34-mile gas pipeline. The system designed for an initial capacity of 5,000 SCFM and a maximum capacity of 9,000 SCFM LFG. The compressor plant includes a screw gas compressor, gas dehydration in a custom designed heat exchanger skid, redundant outlet gas scrubbers, and gas analyzers to measure gas quality before injection into the pipeline.

Enoree Landfill (Greer, SC)

- Served as Project engineer for the engineering of a $500K siloxane removal skid assembly for a LFG energy recovery project. The skid assembly treated 1,200 SCFM LFG prior to burning in two Caterpillar 3520 engines. The process dehydrated the gas with a chilled water system and remove siloxane in several beds.

California Energy Commission (Los Angeles, CA)

- Served as Co-Principal Investigator for a CEC funded project ($95K) to develop an economical and robust process to remove siloxanes from biogas by evaluating the technical feasibility of a novel photodecomposition technology within the context of biogas treatment. Responsibility included: proposal preparation, system design, conducting experiments, budget preparation/management and final report preparation.

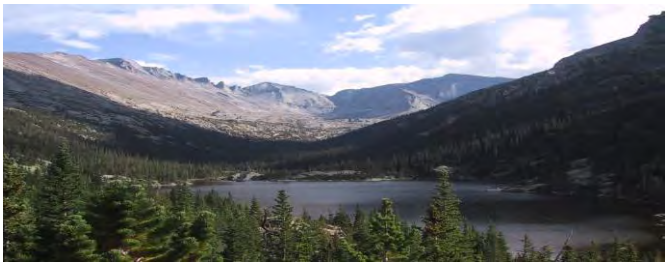
Christina Vickers, M.S.
Regional Director/Environmental Professional
Phoenix Office
Christina@frenviro.com
(313) 303-2316



Christina Vickers is a Regional Director and Environmental Professional within Fulcrum Resources Environmental.

Ms. Vickers specializes in helping clients with the following:

- Transaction Screen Assessments
- Database Reviews
- Phase I and II Environmental Site Assessments

Phase I and II Environmental Site Assessments

- Ms. Vickers has worked on hundreds of Phase I Environmental Site Assessments (ESAs) throughout the United States for sites including multi-family residences, high-rise offices, retail shopping centers, gasoline stations, automotive repair facilities, hotels, agricultural land, schools and industrial/manufacturing facilities.

- Ms. Vickers has completed Phase I ESAs for numerous real estate developers, brokers, attorneys and property owners in order to complete due diligence requirements for property transfers and acquisitions.

- Ms. Vickers has provided assistance with Phase II Subsurface Investigations by collecting groundwater and soil samples, preparing the samples for laboratory analysis, characterizing soil lithology and technical report writing. In addition, Ms. Vickers has provided assistance with Hazardous Materials Surveys and Asbestos Surveys by identifying hazardous building materials and potential asbestos containing materials within commercial properties, collecting and preparing the samples for laboratory analysis and technical report writing.

- Ms. Vickers has provided Quality Assurance/Quality Control reviews for hundreds of Phase I ESA reports completed on properties located throughout the Western United States.

Key Experience/Key Projects

Former Manufacturing Facility; Chandler, AZ.

- Ms. Vickers performed a Phase I Environmental Site Assessment for a retail shopping center with five tenant suites. The property was formerly developed with a circuit board manufacturing facility for approximately 37 years. Due to Volatile Organic Compound (VOC) impacts to soil, the property was accepted into the Arizona Department of Environmental Quality's Voluntary Remediation Program.

Car Dealership; Yuma, AZ.

- Ms. Vickers performed a Phase I Environmental Site Assessment of a forty-year-old car dealership. The property encompassed two non-contiguous parcels of land and included five automotive sales and service buildings, multiple aboveground storage tanks, underground storage tanks, spray paint booths, hazardous materials storage areas, and in-ground hydraulic lifts.

Truck Stop; Phoenix, AZ.

- Ms. Vickers performed a Phase I Environmental Site Assessment for a truck stop and travel center which included a convenience store, fast food restaurant, and a truck wash and repair facility. Over the course of 26 years, the property maintained a total of ten underground storage tanks with multiple releases reported for the tanks. In addition, the property included eight drywells, multiple aboveground storage tanks, oil/water separators and sumps.

Former Circuit Board Manufacturer; Tempe, AZ.

- Ms. Vickers performed a Phase I Environmental Site Assessment for a flex office/warehouse with a history of circuit board manufacturing. Ms. Vickers performed lengthy file reviews and discovered past tenants illegally dumped hazardous waste into an on-site drywell. A former tenant of this property was identified by the EPA as a responsible party for the South Indian Bend Wash Superfund site, with a documented VOC plume located beneath this property.

Gasoline Station Portfolio; Northern Arizona.

- Ms. Vickers completed Phase I Environmental Site Assessments for a mini-portfolio of gasoline stations located throughout northern Arizona. The gasoline stations either had multiple generations of underground storage tanks, documented releases, oil/water separators, car wash facilities, septic systems or on-site potable water wells etc.

Education

Bachelors of Science in Earth Sciences, University of Michigan-Dearborn, 2007

Master of Science in Environmental Science, University of Michigan-Dearborn, 2010

Heather N. Conner
Principal Consultant/East Coast Operation's Manager
Balitmore Office
heathernconner@gmail.com
(443) 735 8540

Heather Conner is the Principal Consultant and East Coast Operation's Manager within Fulcrum Resources Environmental

Heather specializes in helping clients with the following:

- Transaction Screen Assessment
- Phase I and II environmental site assessment
- Property Condition Assessment
- Technical consulting
- Project Management
- RFI sample program management
- Chesapeake Bay Critical Areas Plan Review and Inspection
- Regulatory Records Research and Review
- Asbestos-Containing Material (ACM) Operations & Maintenance Plan
- Lead-in-water and Radon Testing
- Remediation and Monitoring Tactics
- Agency Oversight Assistance

Key Experience/Key Projects -

Phase I and II Environmental Site Assessments

- Conducted over 1,000 nationwide Phase I environmental site assessments on sites ranging in nature from small commercial businesses to Superfund redevelopment areas, including but not limited to Lanterman Development Center (LDC); Beverly Center; City of Hope Medical Group; Fess Parker Resort Hotel Development Property; US Foodservices; portfolio project of various Residence Inn Extended Stay Hotels; River Rail Apartments; monitoring current landfills in City of Puyallup, Washington; and Tires Plus Total Car Care. Ms. Conner also performed technical consultant and remedial support for Brownfield redevelopment of historical Berk Oil and Pacific Metal Craft Sites.

  Ms. Conner is the Due Diligence Specialist for LRS Federal and works closely with the Project team, providing guidance for Phase I assessment activities.

Lanterman Development Center (LDC)

- Performed Site Assessment and Managed LDC Project. LDC is a 900-acre, State-owned campus for the developmentally disabled located in the city of Pomona, California. With a rich 100-year history, assessment of the LDC involved the inspection of 21 client residences, an acute hospital with sewage lift station, an auditory clinic, a library, a cafeteria, a vocational training center, storage buildings, recycling center, garden center, various staff buildings including residential dorms and dwellings, administration building, staff training facility, research building, conference center, credit union, police and emergency services, motor pool, grounds maintenance facility, power plant with underground storage tanks and boiler room, machine shop, laundry services, paint/woodworking shop, auto repair building, gas station, car wash, motor pool, and hazardous materials and waste storage facilities. Recreational facilities assessed included an auditorium, school, day care facility, swimming pool, playgrounds, camp with concession stand, cabins, and an amphitheater, carousel, equestrian center with a petting zoo, track, and a ballpark. In addition to these structures, the LDC campus utilizes its own water distribution system, equipped with two large reservoirs, a pump house, and various on-site water wells.

Education

Bachelors of Science in Biology with a concentration in Environmental Science, Salisbury University, 2001

Certification

- 40-hour OSHA HAZWOPER Training Certificate
- 4-Hour Disaster Training Certificate
- Maryland Sediment Erosion Control Certificate

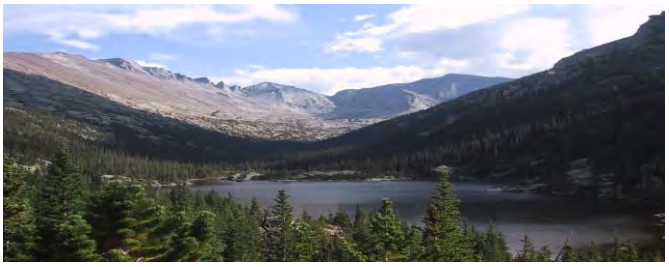
Wendy Moore, B.S.
Client Manager/Senior Environmental Scientist
Los Angeles Office
wendy@frenviro.com
(323) 315-0996



Wendy Moore is a Client Manager and Senior Environmental Scientist within Fulcrum Resources Environmental.

Wendy specializes in helping clients with the following:

- Transaction Screen Assessment
- Phase I and II Environmental Site Assessment
- Site investigation and assessment
- Peer report review
- Asbestos and lead inspections pre demolition, restoration and renovation
- CEQA/NEPA
- Agency oversight assistance

Key Experience/Key Projects -

- Managed and completed over 1,500 Phase I Environmental Site Assessments (ESAs) for various industries and properties including wireless telecommunications, hospitals, industrial, commercial, and landfills across North America since 2000. Implementation of American Society for Testing and Materials (ASTM) Standard Practice E1527-13 and U.S. Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) in the United States and CAN/CSA-Z768-01 and Ontario Regulation 153/04 in Canada (Ontario).

- Completed numerous National Environmental Policy Act (NEPA) Screening reports and Environmental Impact Assessment reports for the telecommunications industry.

- Completed numerous limited asbestos surveys and lead-based paint surveys for various facilities and properties. Activities included limited sampling and report writing

- Completed and assisted with various Phase I ESA and Phase II Investigations around the Los Angeles metropolitan area for the Albert Sweet Development Corporation.

- Managed and trained staff in completing a variety of environmental service related tasks.

- Managed numerous sub-consultants nationwide assisting with Phase I ESAs conducted nationwide.

- Assisted in various Phase II Investigations around the Los Angeles metropolitan area. Investigations included quarterly groundwater monitoring undertaken for Pentair, 2001 and groundwater well installation and soil sampling for Parish, Inc.

- Preparation of Quarterly RECLAIM reports and Annual Emissions reports for clients such as American Airlines, Inc. and Kal Kan Foods, Inc.

- Provided technical support on numerous major projects including the Charnock Initial Regional Response Activities on behalf of Shell Oil Company. Work on this and other projects involved data acquisition, processing as well as electronic conversion of boring logs.

- Participated in major subsurface investigation at Vernon Steel, California, including quarterly groundwater monitoring.

- Assisted with compilation of remediation team in New Orleans subsequent to hurricane Katrina (2006).

Education

Bachelors of Science in Earth Sciences, University of Johannesburg, South Africa, 1998*

Bachelors of Science Hons. in Geography and Environmental Management, University of Johannesburg, South Africa, 1999*

*Bachelors of Science certification issued by the University of Toronto - Comparative Education Service, 2000

Professional Papers

Key author in preparation of an *Initial Study and Mitigated Negative Declaration for the City of Hawthorne Refuse and Recycling Services System Update and Redesign*, 2002.

Certification

- Registered Environmental Assessor #08254

Darren Johnston
Director of Sustainability Consulting Services
Colorado Office
djohnston@uhgconsulting.com
(603) 661-5167

Darren Johnston is Director of Sustainability Consulting Services for UHG Consulting.

Darren specializes in helping clients with the following:

- Energy Audits
- LEED Certification
- AB1103
- Energy Star
- Water Audits
- Waste Audits
- Alternative Energy
- Sustainability Audits

Key Experience/Key Projects -

Energy Audits

- Performed field work, project management, budgeting, client management, and completion of report for clients in sites nationwide. Energy Audit reports have identified millions of dollars of opportunities to reduce energy consumption. Recently helped a client in Colorado reduce their energy consumption by over million dollars a year.

LEED Certification

- Have led LEED Certification efforts for clients seeking LEED-NC, LEED-EB, and LEED-ND. Responsible for managing the LEED process, project credit selection, LEED budgets, documentation, and LEED reports. Recently helped a corporate headquarters in Colorado receive a LEED Gold certification, and hotel in Florida receive a LEED Silver certification.

Energy Star

- Responsible for maintaining multiple client Energy Star portfolios. Manage, edit, input, and update Energy Star portfolios to maximize Energy Star scores. Recently helped multiple County buildings in Colorado achieve Energy Star awards.

Water Audits

- Responsible for analyzing the water usage of multiple clients across the United States. Through analysis and project management have assisted clients in implementing improved water reduction strategies. Recently helped a 250 unit apartment complex in Ohio reduce their water usage by greater than 50%, reducing their monthly bills by over $100,000 a year.

Sustainability Audits

- Responsible for analyzing the practices of organizations and providing input on how to operate their organizations more efficiently. Recently completed an audit for a domestic airline, analyzing their operations and providing recommendations on how to operate more efficiently.

Kristina Krissakova-Thomas
Environmental Assessor, Project Manager
Orange County Office
(949) 266 7173

Kristina Krissakova-Thomas is an environmental scientist and the Environmental Assessor and Project Manager within Fulcrum Resources Environmental primarily for Orange County and San Diego County.

Kristina specializes in helping clients with the following:

- Transaction Screen Assessment
- Phase I and II environmental site assessment
- Property Condition Assessment
- Project Management
- Regulatory Records Research and Review
- Agency Oversight Assistance

Key Experience/Key Projects -

Project Management

Ms. Krissakova-Thomas in an experienced environmental assessor and project manager. She conducted over 100 Phase I environmental site assessments on sites ranging in nature from small commercial businesses to Superfund redevelopment areas. Ms. Krissakova-Thomas is involved in all aspects of Phase I projects including field work, tenant/owner interviews, extensive agency file reviews, historical analysis, database reviews and the generation of final reports. Ms. Krissakova-Thomas is also an expert in consulting with owners, investors, lenders, and brokers.

Ms. Krissakova-Thomas prepared over 150 California Hazardous Material Business Plans for a major nationwide contractor's retail chain.

Ms. Krissakova-Thomas assisted in preparation of Health and Safety Plans and Work Plans as a part of environmental subsurface conditions assessments.

Ms. Krissakova-Thomas is also experienced in conducting environmental health and safety tenant audits for commercial and industrial facilities.

Proposals and Cost Preparation

Mr. Krissakova-Thomas is experienced in planning and assembling project proposals for Phase I Site Assessments. She is responsible for building and maintaining of a professional network and sourcing of new clients, primarily in the Orange and San Diego County area.

Tiffany N. Tona, M.S.
Project Manager
San Jose and Southern California
tiffany@frenviro.com
(657) 203-5549

Tiffany Tona is a Project Manager within Fulcrum Resources Environmental.

Tiffany specializes in helping clients with the following:

- Transaction Screen Assessment
- Phase I Environmental Site Assessments
- Historical Research Investigations
- NEPA Checklists and Compliance Assessments
- SHPO Compliance Assessments

Key Experience/Key Projects -

Phase I Environmental Site Assessments

- Performed Phase I Environmental Site Assessments since 2013, for various facilities that include but not limited to gas stations, car dealerships, manufacturing facilities, telecommunications facilities, commercial buildings, auto repair, agricultural farmland, apartment complexes, commercial offices, storage facilities, industrial facilities, and restaurants. Work performed in Northern and Southern California. Followed ASTM E 1527-05/All Appropriate Inquires Standards and current ASTM E 1527-13 Standards.

- Subsurface investigation projects include: leaking underground storage tank historical research and remediation planning for former and existing gas stations and automotive repair shops in Southern California; subsurface analysis of former and existing tank farms in Northern and Southern California; and remedial investigations of proposed and existing Telecom facilities for Verizon Wireless and AT&T.

NEPA Checklists and Compliance

- Performed NEPA Checklist reviews for compliance under the National Environmental Policy Act (NEPA) for proposed and existing Telecom facilities, and colocation agreements for Verizon Wireless and AT&T. Determination of compliance included the review and verification of environmental impact assessments conducted at proposed and existing telecom facilities regarding the facility's impact on migratory birds, local endangered flora and fauna, 100- and 500-year flood zone influences, as well as potential impact to human health. All compliance reviews were conducted in accordance with NEPA telecommunications standards.

Education

Bachelors of Arts in Japanese, University of Oregon, 2006

Masters of Science in Environmental Management, University of San Francisco, 2012
Thesis: Swift advancements in electronic waste management for New York City: Electronic Equipment Recycling and Reuse Act

Shauna Davis, M.S.
Midwest Regional Manager/Environmental Professional
Chicago Office
shauna@frenviro.com
(661) 331 1842

Shauna Davis is Midwest Regional Manager and Environmental Professional within Fulcrum Resources Environmental

Shauna specializes in helping clients with the following:

- Transaction Screen Assessment
- Phase I and II environmental site assessment
- Site investigation and assessment
- Technical site review
- Remediation and Monitoring Tactics
- Health and Safety
- NEPA
- Agency Oversight Assistance
- Conceptual Site Models

Key Experience/Key Projects -

Phase I and II Environmental Site Assessments

- Performance of over 400 environmental site assessments nationwide since 2007 that include but are not limited to gas stations, dry cleaners, heavy manufacturing sites, retail sites, oil and gas sites, multi-tract residential apartments and housing, power generation facilities, and landfills. Ms. Davis also has extensive involvement with Non-CERCLA sampling per specific client protocol that include radon testing and lead in water sampling.

- Ms. Davis also has experience in completion of Phase II Environmental Site Assessment reports and Groundwater Monitoring Reports for former and current industrial facilities undergoing remediation.

- Ms. Davis has experience in hydrogeological concepts effecting the fate and transport of contaminants in the environment and has participated in the completion of fate and transport models, capture zone analysis of remediation systems, and interpretation and analysis of water level transducer data.

Health and Safety

- Ms. Davis has performed annual Environmental Health and Safety Audits for commercial properties located throughout Southern California. Audits include assessment of fire suppression safety, warehouse safety, chemical inventory practices, and permitting and licensing.

- As former Chemical Hygiene Manager for the Environmental Protection Agency's research vessel Lake Guardian, Ms. Davis supervised safety of sampling activities, laboratory activities, chemical usage and storage, and performed quality control drinking water sampling and analysis.

Education

Bachelors of Science in Earth and Environmental Science, University of California - Irvine, 2006

Masters of Science in Geology, Emphasis in Hydrogeology, California State University - Los Angeles, 2012

Gabe Touma, CHMM
Midwest Operations Manager
Denver Office
Gabe@frenviro.com
(720) 468 2420

Gabe Touma is Midwest Operations Manager within Fulcrum Resources Environmental

Gabe specializes in helping clients with the following:

- Phase I and II environmental site assessment
- Site investigation and assessment
- Technical site review
- RFI sample program management
- Alternative Energy/solar/wind
- Asbestos in soil project management and remediation
- Asbestos inspections associated with demolition, restoration and renovation
- Lead in soil/surveys
- Indoor air quality
- Monitoring/remedial Well installation
- Health and Safety- Environmental Construction/drilling
- Noise surveys
- Waste profiling/treatment/disposal

Key Experience/Key Projects -

Santa Susanna Field Laboratory

- Under the direct oversight of the California Department of Toxic Substances Control (DTSC), conducted a Phase I Environmental assessment and historic review of a 3,000-acre property that operated as cold war facility. Operations included nuclear reactor experiments, rocket testing, space shuttle engine testing and missile development. Prepared a sampling analysis program and conducted RFI sampling and management of over 600 boring locations. Such efforts included the management of up to four field personnel as well as health and safety.

Stapleton International Airport

- Management for large construction projects involving excavation of hazardous materials including the Former Stapleton International Airport. Management of up to eight field personnel. Tasks included technical site management as well as health and safety.

Fields of Competence

- Industrial hygiene
- Environmental site assessments
- Environmental remediation

Education

Environmental Engineer/Southern Operations Manager
(Dallas, TX)
jeffsclifton@gmail.com
(214) 862 5620

Jeff Clifton is a Senior Environmental Scientist that performs Phase I Environmental Site Assessments/ Phase II Environmental Site Assessments/ Property Condition Assessments

Jeff specializes in helping clients with the following:

- Government FDIC Checklists for single-family residences
- Phase I and II environmental site assessment
- Site investigation and assessment
- Technical site review
- Property Condition Assessments
- Asbestos, lead, mold, and microbial inspections associated with demolition, restoration and renovation
- Remediation and Monitoring Tactics
- Health and Safety- Environmental Construction/drilling
- Agency Oversight Assistance
- Soil Engineering
- Environmental Compliance Audits

Key Experience/Key Projects -

Geotechnical Experience

- Mr. Clifton performed geotechnical testing involving Atterberg Limits, Plastic Limits, Sieve Analysis, Free Swell Analysis, and Unconfined Strength Testing. Mr. Clifton is also experienced in performing duties involving construction materials testing, soil density gauge testing, soil moisture/density relationships, concrete sampling and testing, and pier inspection.

Phase I and II Environmental Site Assessments

Performed over 2,000 environmental site assessments nationwide since 2003 that include but not limited to gas stations, dry cleaners, heavy manufacturing sites, multi-tract residential apartments and housing. Mr. Clifton is experienced in handling government FDIC work and portfolio work involving dual-scope or multi-scopes of Phase I Environmental Site Assessment, Property Condition Assessments, and/or asbestos and lead testing.

Jeff is also experienced with handling aspects of Non-CERCLA items and soil vapour intrusion related to ASTM Standards.

Jeff's Phase II experience involves dry cleaners, gas stations, and major industrial facilities.

Client Management

Mr. Clifton currently assists with client relationship and management through attending quarterly meetings, and educating clients on environmental issues.

Education

Bachelors of Science in Environmental Soil and Water Science, University of Alabama, 2001

Certifications

- Texas Department of State Health Services Certified Asbestos Inspector
- Oklahoma Department of Labor Licensed Asbestos Inspector

Computer Skills

- PARCEL Platform
- GIS, GPS, VISIO, and AUTOCAD

Languages

- English, native speaker

Ian Culp
Environmental Assessor
Bay Area Region Offices
ian@frenviro.com
(925) 200-2230

Ian is an associate environmental assessor that specializes in conducting field assessment work and Phase I Environmental Site Assessments.

Ian is experienced with the following tasks:

- Phase I Environmental Site Assessments
- Soil and groundwater sampling
- Air monitoring

Key Experience/Key Projects -

Master Phase I Environmental Site Assessment of Industrial Facility (Richmond, California)

- Conducted a master Phase I Environmental Site Assessment of a 10 acre, multi-tenant industrial facility. The facility contained a UST, and multiple hazardous materials

Phase I Environmental Site Assessment Report of Industrial Facility (Oakland, California)

- Former City of Oakland Firehouse, built in the early 1960's and had been vacant for several years. Responsibilities included identification of asbestos building materials, extensive water damage, pest damage, a large amount of pesticide/herbicide being stored, and a large gasoline AST.

Phase II Environmental Site Assessment of Retail Commercial Facility (Sea Ranch, California)

- Responsible for obtaining groundwater permits, and choosing groundwater sample locations with Senior Geologist. Also responsible for collecting groundwater sampling and setting temporary wells

Phase I and Phase II Environmental Site Assessment of Gas Station (Dunnigan, California)

- Responsibility included assisting in the preparation of a Phase II Proposal and obtaining proper files for Phase I and Phase II Assessment

Education

B.A.-Archaeology-California State University-East Bay

Caitlin D. Culp
Environmental Professional and Project Manager
Santa Clara/South Bay Offices
caitlin@frenviro.com
(925) 200-7032

Caitlin is an Environmental Professional and Client Manager within Fulcrum Resources Environmental. Caitlin has managed multiple clients and Phase I/II Reports throughout greater Northern California.

Caitlin is experienced with the following tasks:

- Phase I Environmental Site Assessments
- UST Compliance
- Subsurface Investigations
- Project Management
- Health Risk Assessments
- Asbestos and Lead Sampling
- Soil and groundwater sampling
- Air monitoring

Key Experience/Key Projects -

Subsurface Investigation of Former UST Site (Gilroy, California)

- Conducted a geophysical investigation via ground-penetrating radar and found location of former UST. Continued to assess the area of the former tank with soil vapour, soil, and groundwater sampling. Completed health risk assessment with vapour data

Phase I Environmental Site Assessment Report of Industrial Facility (Freemont, California)

- Conducted a Phase I Environmental Site Assessment of former SLIC Site within area of multiple open SLIC cases with the waterboard. Was able to consult with client and agency to obtain clearance letter from SFRWQCB.

Phase I Environmental Site Assessment & Asbestos and Lead Sampling of Industrial Facility (San Jose, California)

- Assisted with collecting asbestos and lead sampling while also conducting a Phase I Environmental Site Assessment of warehouse portion of industrial facility to be renovated.

Portfolio of Phase I Environmental Site Assessments for ground floor commercial and residential apartments (Oakland and San Francisco, California)

- Conducted 15 site walks of multi-story commercial and residential apartment buildings throughout greater San Francisco and Oakland area, and managed client demands. Some of the structures had issues with former tanks onsite, or dry cleaners where a indoor air monitoring and a health risk assessment was necessary. One of the apartments had a dry cleaner operation.

Subsurface Investigation of Former Manufacturing Facility and Machine Shop (Sunnyvale, California)

- Assisted Senior Geologist with proposed locations to drill at manufacturing facility. The investigation consisted of collecting groundwater, soil, and soil vapor samples, in which a J&E Model was conducted.

Education

B.S. Biology-University of California-San Diego
M.S. Environmental Management-University of San Francisco

Andrew J. Dziedzic, REPA
Regional Project Manager
Philadelphia, Pennsylvania Office
(215) 534 4155

Andrew Dziedzic is a Regional Project Manager within Fulcrum Resources Environmental.

Andrew specializes in helping clients with the following:

- Transaction Screen Assessment
- Phase I and II environmental site assessment
- Site investigation and assessment
- Technical site review
- Asbestos and lead-based paint
- Remediation
- Business Development

Key Experience/Key Projects:

Phase I, II, and III Environmental Site Assessments

- Extensive expertise on many portfolio and debt and equity transactions throughout the United States and Mexico.

- Proven track record of providing timely and accurate technical information and professional opinions regarding potential issues to assist clientele in environmental liabilities and tasks.

- Performed thousands of environmental investigations of all property types including commercial, residential, multi-family, and industrial properties. These investigations have been in accordance with Freddie Man, Fannie Mae, and ASTM Guidelines.

- Extensive knowledge of state and federal regulations with over 20 years of experience.

- Expertise in asbestos and lead-based paint, subsurface investigations, and remediation.

Previous Employment Experience

Land America Commercial Services, Brinkerhoff Environmental Services, Raritan Enviro Sciences, & GA Environmental Services 1994-2004

- Managed and supervised the performance of multiple Phase I and II Environmental Assessments, Site Investigations, and Remedial Investigations for private equity groups, commercial mortgage and construction lenders, real estate investment trusts, and commercial mortgage backed securities, including preparation and review of expert reports.
- Managed and performed UST removal, subsurface evaluation and soil and groundwater investigations.

- Performed ISRA Preliminary Assessments for commercial/industrial properties governed under the New Jersey Industrial Site Recovery Act including historical site characteristics, area of concern identification, and soil and groundwater sampling and report preparation.

Advantage Environmental Consultants and Property Solutions, Inc. 2006-2009

- Developed bid packages and won Phase I & II, soil & groundwater remediation and UST projects including Brownfields redevelopment investigation, Asbestos abatement projects, New Jersey ISRA compliance projects and mercury contaminated soil removals.
- Responsible for client management and business development for the Philadelphia Regional Office, scheduling of personnel and direction of resources, financial tracking, coordination of daily business and office activities, as well as perform and manage all aspects of Phase I and Phase II Environmental Site Assessments, Site Investigations and UST closures on projects throughout the Pennsylvania/New Jersey region.
  Technical Manager and Regional Manager of the Irvine, California office, responsible for managing the environmental operations and staff of the Western Region.

Education

Bachelors of Art, Earth and Environmental Sciences with Minor in Business, Wilkes University, 1993

Certification

- 40-hour OSHA HAZWOPER Training
- 8-hour OSHA HAZWOPER Supervisor Training
- Licensed Subsurface Evaluator/UST Closure, NJDEP No. 18809
- EPA/AHERA Asbestos Building Inspector

Anthony Ligutom
Geologist
North Dakota Office
ajligutom@gmail.com
(701) 202-9179

Anthony Ligutom is a Geologist at Fulcrum Resources Environmental.

Anthony specializes in assisting clients with the following:

- Phase I Site Assessment
- Phase II Site Remediation
- Monitoring and production well installation
- Soil and groundwater sampling
- Technical report writing
- Site investigation and assessment
- Health and safety audits and documentation
- State and federal environmental regulation knowledge for North Dakota.
- Environmental Research

KEY EXPERIENCE/PROJECTS -

Project Management

- Project proposal writing, budgeting and field preparation with respect to the clients and regulations. Consistent and reliable communication with all stakeholders regarding progress of the project. Post field work report writing.
- These projects were in the North Dakota Bakken oil fields. Some were for emergency response to spills and leaks in adverse weather and remote locations.

Health and Safety

- Developed and prepared job safety and project safety specific programs. I was part of risk management teams that were used to not only determine the scope of work but how to best mitigate potential hazards. Trained new staff with respect to behaviour-based safety and ensured they were properly equipped to work in adverse weather conditions.

Phase I and II Environmental Site Assessments

- Performed fieldwork, project management, budgeting, client management, and completion of report for clients throughout North Dakota. Performed environmental site assessments for properties such as commercial and industrial buildings. Environmental investigations to determine the nature and extent of soil, sediment, and groundwater impacts.

Field Work

- Experienced in installing monitoring and production wells. Soils logging using the USCS. Groundwater and soil sampling conducted in many states through various methods. Contractor oversite for emergency response, drilling, well installations, UST removals and for remediation system installations. Operations and maintenance for remediations systems.

Education

Bachelor of Science in Geology, California State University of Los Angeles, 2005

Certifications

- 40-hour OSHA HAZWOPER
- OSHA 10 Hour

Steffany Goetz
Southeast Operations and Client Manager
Orlando, Florida Office
steffany@frenviro.com
(321) 312-8342

Steffany is an environmental professional and also manages the South-eastern division for Fulcrum…

Steffany specializes in helping clients with the following:

- • Phase I and II Environmental Site Assessments
- • Soil and groundwater sampling
- • Site Closure
- • Technical site review
- • Health and Safety
- • Well Abandonment
- • Hazardous Materials Management

Key Experience

LUST closure-Wyndham Bay Point Resort Golf Course (Panama City, Florida)

Ms. Goetz was the point person and onsite field technician in conducting well installations, scheduling and coordinated of staff, well sampling, and client and agency correspondence for an open LUST case for two former USTs located within the maintenance yard portion of a golf course located at the Wyndham Bay Resort. Ms. Goetz's experience proved beneficial in assisting the client in obtaining a low-threat closure, and saving time and money.

Phase I Restaurant Portfolio in Counties of Brevard and Orange, Florida

Ms. Goetz scheduled and oversaw the management of eleven Phase I reports for Dennys and IHOP restaurants within Brevard and Orange County, Florida. Ms. Goetz was also the key point of contact in communicated with client as several of the restaurants were former gas stations that required additional due-diligence.

Statewide Florida Gas Station Portfolio Acquisition Involving Phase I & II Site Assessments

Ms. Goetz was personally in charge is coordinating and visiting a total of 25 gas stations throughout the state of Florida. Ms. Goetz oversaw compliance issues, and also addressed all RECs at the gas stations where further subsurface investigation and initiating of groundwater monitoring under the Florida Department of Environmental Protection was needed.

ARCO Gas Station (Ocala, Florida)

Ms. Goetz conducted the Phase I investigation of a two generation gas station in Ocala, Florida that also required additional due-diligence. Ms. Goetz was also responsible for coordinating with the client the need for additional assessment, and was also the field technician involved with the geophysical survey and subsurface investigation.

Car Wash (Key Largo, Florida)

Ms. Goetz had conducted a cursory review of a car wash that was a former auto repair site, and that had impacted groundwater. The other consultant recommended additional remediation, where Ms. Goetz disagreed and was able to get a closure status through the Florida Department of Environmental Protection based on low levels of BTEX in groundwater. Ms. Goetz was able to save the client nearly 100k in remediation efforts.

Drycleaner Investigation (Daytona Beach, Florida)

Ms. Goetz conducted a Phase I of a commercial-retail plaza that consisted of five parcels, which also led to the discovery of a former drycleaner operation between the 1960s-1980s that the former consultant missed. Ms. Goetz organized the subsurface investigation, consisting of installation five shallow groundwater wells. Low levels of vinyl chloride and PCE were discovered, but after several monitoring events, Ms. Goetz was able to show it was contributing to an offsite source. The Florida Department of Environmental Protection was able to issue closure.

CRAIN & ASSOCIATES

Transportation Planning / Traffic Engineering

June 18, 2019

Mr. Wes Pringle
Transportation Engineer
Metro Development Review Division
Department of Transportation
100 S. Main Street, 9th Floor
Los Angeles, CA 90012

RE: Avenue 34 & Pasadena Mixed-Use Project Traffic Impact Analysis Update

Dear Mr. Pringle,

Crain & Associates has been requested to provide an update to the approved *Traffic Impact Report for Avenue 34 & Pasadena Mixed-Use Project*, January 2016 ("2016 Traffic Study"). Since the approval of the 2016 Traffic Study, the project team has decided to refine the project components which results in a reduction of the peak periods traffic generation. This technical memorandum has been prepared to address the refined project description and its potential impacts.

Background

The proposed project analyzed in the 2016 Traffic Study, which was approved by LADOT per the January 28, 2016 assessment letter, included the construction of 410 apartment units, 10,000 square feet of shopping center and 30,000 square feet of office spaces. The traffic study analyzed existing (2016) and future (2020) traffic conditions at ten study intersections located in the vicinity of the project. That study concluded the project would result in significant traffic impacts at the following intersections:

1. Figueroa Street and Avenue 26
2. Pasadena Avenue/Avenue 26 and Daly Street

To mitigate the project's significant traffic impacts at the above two intersections, the project proposed to implement Transportation Demand Management (TDM) Program and

300 Corporate Pointe
Suite 470
Culver City, CA 90230
310 473 6508 (main)
310 444 9771 (fax)

www.crainandassociates.com

Transportation Systems Management (TSM) Improvements. With the implementation of the mitigation measures, the project's significant traffic impacts at the above two intersections would be mitigated to a less than significant level.

As noted earlier, the project has recently been refined. The current proposed project would include up to 421 market rate apartment units, 47 affordable units and 16,444 square feet of shopping center uses. Therefore, while the amount of total units has increased, the total square footage of commercial space has been reduced.

Project Trip Generation Update

To be conservative, the project trip generation update has implemented the same trip generation rates and assumptions as the 2016 Traffic Study for the same land use types. For the affordable residential component, the LADOT affordable housing survey trip generation rates provided in Appendix A were used to determine the daily, AM and PM peak-hour trips generated by the proposed affordable residential uses. The refined project would generate less peak hour trips due to the refined project components. As shown in Table 1 and Attachment B, compared to the project trip generations included in the 2016 Traffic Study, it is estimated that the refined project will generate approximately 78 more daily trips and 4 less AM peak-hour trips and 4 less PM peak-hour trips.

Table 1
Project Trip Generation Comparison

	Daily	AM Peak Hour	PM Peak Hour
2016 Traffic Study	2128	161	199
Refined Project	2206	157	195
Net Difference	**78**	**-4**	**-4**

Findings/Conclusions

This analysis concludes that the refinements to the proposed project will not introduce any new peak hour project traffic. The project access locations will remain the same as in the 2016 Traffic Study. As Table 1 shows, compared to the trip generation for the proposed project in the 2016 Traffic Study, the trip generation values from the refined project will be 78 trips higher for daily trips, but 4 trips lower during the AM peak hour and 4 trips lower during the PM peak hour. Therefore, the project refinements will generate less peak hour trips and would not adversely change the previous traffic impact conclusions.

Sincerely,

Helen Shi, PE
Senior Transportation Engineer

From: Wes Pringle, Transportation Engineer
Department of Transportation

Subject: **SUPPLEMENTAL TRAFFIC IMPACT ASSESSMENT FOR THE PROPOSED MIXED-USE DEVELOPMENT AT 167 WEST AVENUE 34/3401-3437 NORTH PASADENA AVENUE**

A traffic impact study for a proposed mixed use development project was submitted to the Department of Transportation (DOT) by Crain & Associates, Inc. on December 2015, and a corresponding DOT assessment report was issued to the Department of City Planning (DCP) on January, 2016. Since then, the project scope has been modified to include up to 421 apartment units, 47 affordable units and 16,444 square feet of shopping center. The following is a comparison of the original and modified projects:

2015			2019	
Apartment Units	410		Apartment Units	421
Shopping Center (Sq. Ft.)	10,000		Affordable Units	47
Office Space (Sq. Ft.)	30,000		Shopping Center (Sq. Ft.)	16,444

The original project was estimated to generate 2,128 net new daily trips, 161 net new trips in the a.m. peak hour, and 199 net new trips in the p.m. peak hour. The revised project is expected to generate 2,206 net new daily trips, 157 net new trips in the a.m. peak hour, and 195 net new trips in the p.m. peak hour. The previous traffic analysis determined that two (2) of the ten (10) analyzed intersections would be significantly impacted by project related traffic. DOT concurs with the findings of the updated analysis that the revised project would also result in the same significant traffic impacts. The modified trip generation table is summarized in attachment 1. All of the project requirements that are identified in DOT's January 2016 letter (included in attachment 2) shall remain in effect.

If you have any questions, please contact Russell Hasan of my staff at (213) 972-8628.

FORM GEN. 160A (Rev. 1/82)

CITY OF LOS ANGELES

INTER-DEPARTMENTAL CORRESPONDENCE

167 W Ave 34 / 3401 N Pasadena Ave
DOT Case No. CEN 15 – 43306

Date: January 28, 2016

To: Nicholas Hendricks, Senior City Planner
Department of City Planning

From: Wes Pringle, Transportation Engineer
Department of Transportation

Subject: **TRAFFIC IMPACT ASSESSMENT FOR THE PROPOSED DEVELOPMENT AT 167 WEST AVENUE 34 / 3401-3437 NORTH PASADENA AVENUE**

The Department of Transportation (DOT) has reviewed the traffic analysis prepared by Crain & Associates, Inc., dated December 2015 for the proposed mixed-use project located at 167 West Avenue 34 / 3401-3437 North Pasadena Avenue. In order to evaluate the effects of the project's traffic on the available transportation infrastructure, the significance of the project's traffic impacts is measured in terms of change to the volume-to-capacity (V/C) ratio between the "future no project" and the "future with project" scenarios. This change in the V/C ratio is compared to DOT's established threshold standards to assess the project-related traffic impacts. Based on DOT's traffic impact criteria[1], the proposed project is expected to create significant traffic impacts at two of ten study intersections that were identified for detailed analysis. The results of the traffic impact analysis, which accounted for other known development projects in evaluating potential cumulative impacts and adequately evaluated the project's traffic impacts on the surrounding community, are summarized in **Attachment 1**.

DISCUSSION AND FINDINGS

A. Project Description

The project proposes to demolish an existing site that contains approximately 90,233 square feet of warehousing and 28,051 square feet of light industrial space. After demolition, the project will construct a mixed-use site with 410 apartment units, 10,000 square feet of shopping center and 30,000 square feet of office spaces. Vehicular access for the on-site subterranean parking will be provided via two two-way driveways along Avenue 34. Additionally, a two-way driveway on Pasadena Avenue will provide access to the commercial loading dock and short-term retail surface parking. The project is expected to be completed by 2020.

B. Trip Generation

The project is estimated to generate a net increase of approximately 2,128 daily trips, a net increase of 161 trips in the a.m. peak hour and a net increase of 199 trips in the

[1] Per the DOT Traffic Study Policies and Procedures, a significant impact is identified as an increase in the Critical Movement Analysis (CMA) value, due to project related traffic, of 0.01 or more when the final ("with project") Level of Service (LOS) is LOS E or F; an increase of 0.020 or more when the final LOS is LOS D; or an increase of 0.040 or more when the final LOS is LOS C.

p.m. peak hour. A copy of the trip generation can be found in **Attachment 2**. The trip generation estimates are based on formulas published by the Institute of Transportation Engineers (ITE) Trip Generation, 9th Edition, 2012.

C. Significant traffic impact

In order to evaluate the effects of the project traffic on the available transportation infrastructure, the significance of the project's traffic impacts is measured in terms of change to the volume-to-capacity (V/C) ratio between the "future no project" and the "future with project" scenarios. This change in the V/C ratio is compared to DOT's established threshold standards to assess the project-related traffic impacts. The traffic study estimates that the project would result in a significant traffic impacts at the following intersections:

1. Figueroa Street and Avenue 26
2. Pasadena Avenue/Avenue 26 and Daly Street

To off-set this significant traffic impact, the traffic study proposed a transportation mitigation programs designed to fully mitigate this impact (discussed in the "Project Requirements" section).

D. Freeway Analysis

The traffic study included a freeway impact analysis that was prepared in accordance with the State-mandated Congestion Management Program (CMP) administered by the Los Angeles County Metropolitan Transportation Authority (MTA). According to this analysis, the project would not result in significant traffic impacts on any of the evaluated freeway mainline segments. To comply with the Freeway Analysis Agreement executed between Caltrans and DOT in October 2013, the study also included a screening analysis to determine if additional evaluation of freeway mainline and ramp segments was necessary beyond the CMP requirements. Exceeding one of the four screening criteria would require the applicant to work directly with Caltrans to prepare more detailed freeway analyses. The project did not meet or exceed any of the thresholds defined in the agreement; therefore, no additional analysis was required by Caltrans.

PROJECT REQUIREMENTS

A. Transportation Demand Management Plan & Trip Monitoring Program

Consistent with City policies on sustainability and smart growth and with DOT's trip reduction and multi-modal transportation goals, the project's mitigation program first focuses on developing a trip reduction program and on solutions that promote other modes of travel. The traffic mitigation program includes the following improvements:

1. **Transportation Demand Management (TDM) Program**

   The purpose of a TDM plan is to reduce the use of single occupant vehicles (SOV) by increasing the number of trips by walking, bicycle, carpool, vanpool and transit. A TDM plan should include design features, transportation services, education, and incentives intended to reduce the amount of SOV during commute hours. Through strategic building design and orientation, this project can facilitate access to transit, can provide a pedestrian-friendly environment,

can promote non-automobile travel and can support the goals of a trip-reduction program.

A preliminary TDM program shall be prepared and provided for DOT review prior to the issuance of the first building permit for this project and a final TDM program approved by DOT is required prior to the issuance of the first certificate of occupancy for the project. The TDM program should include, but not be limited to, the following strategies:

- Provide an internal Transportation Management Coordination Program with an on-site transportation coordinator;
- Design the project to ensure a bicycle, transit, and pedestrian friendly environment;
- Provide unbundled parking that separates the cost of obtaining assigned parking spaces from the cost of purchasing or renting residential units;
- Accommodate flexible/alternative work schedules and telecommuting programs;
- A provision requiring compliance with the State Parking Cash-out Law in all leases;
- Coordinate with DOT to determine if the project location is eligible for a future Integrated Mobility Hub (which can include space for a bike share kiosk, and/or parking spaces on-site for car-share vehicles);
- Provide on-site transit routing and schedule information;
- Provide a program to discount transit passes for residents/employees possibly through negotiated bulk purchasing of passes with transit providers;
- Provide rideshare matching services;
- Preferential rideshare loading/unloading or parking location;
- Contribute a one-time fixed fee contribution of **$75,000** to be deposited into the City's Bicycle Plan Trust Fund to implement bicycle improvements in the vicinity of the project.

In addition to these TDM measures, DOT also recommends that the applicant explore the implementation of an on-demand van, shuttle or tram service that connects the project employees to off-site transit stops based on the transportation needs of the project's employees. Such a service can be included as an additional measure in the TDM program if it is deemed feasible and effective by the applicant.

In order to mitigate projected traffic impacts to a less than significant level, the applicant shall implement a TDM/TMP to reduce the project trip generation by 15%. Specifically, the project shall not exceed a **driveway trip volume count of 179 trips during the a.m. peak hour and 222 trips during the p.m. peak hour, at full occupancy**. To achieve this peak hour driveway trip volume requirement through implementation of an on-site Transportation Demand Management (TDM) Plan the project shall implement a Trip Monitoring Program (TMP).

The applicant shall record a covenant and agreement to annually monitor and submit reports on the progress of the driveway trip reduction plan to DOT. Annual reports shall include a report on the observed trip generation and on the

project's mode share. The detailed goals, objectives, terms and strategies of the TDM plan and reporting requirements shall be determined during the preparation of the final the TDM plan is due prior to the issuance of any temporary or final certificate of occupancy permit for the project. The plan should also identify any appropriate penalties, should the project not achieve compliance with the targeted number of driveway trips within a year of exceeding the limits. The TMP shall continue until such time that the project has shown, for five (5) consecutive years, at a minimum of 85% occupancy, accomplishment of the peak hour driveway trip volume requirement as listed.

2. **Transportation Systems Management (TSM) Improvements**
LADOT's ATSAC Section has identified the need to update the existing traffic signal system. Specifically, install one CCTV camera, a new type 2070 controller, and the necessary infrastructure (including, but not limited to, fiber optic and interconnect) to activate the new installation, at the Pasadena Avenue/Avenue 26 and Daly Street intersection.

The upgrades shall be implemented by the applicant through the B-Permit process. The video fiber/fiber optic improvements must be guaranteed prior to the issuance of any building permit and completed prior to the issuance of any certificate of occupancy. Temporary certificates of occupancy may be granted in the events of any delay through no fault of the applicant, provided that, in each case, the applicant has demonstrated reasonable efforts and due diligence to the satisfaction of DOT.

B. Highway Dedication and Street Widening Requirements

On August 11, 2015, the City Council adopted the Mobility Plan 2035 which is the new Mobility Element of the General Plan. A key feature of the updated plan is to revise street standards in an effort to provide a more enhanced balance between traffic flow and other important street functions including transit routes and stops, pedestrian environments, bicycle routes, building design and site access, etc. The applicant should check with BOE's Land Development Group to determine the specific highway dedication, street widening and/or sidewalk requirements for this project. In general, per the new Mobility Element:

Pasadena Avenue has been designated a Modified Avenue II (Secondary Highway), and would require a 26-foot half-width roadway within a 38-foot half-width right-of-way.

Avenue 34 has been designated a Modified Local Street and would require an 20-foot half-width roadway within a 30-foot half-width right-of-way.

C. Construction Impacts

DOT recommends that a construction work site traffic control plan be submitted to DOT for review and approval prior to the start of any construction work. The plan should show the location of any roadway or sidewalk closures, traffic detours, haul routes, hours of operation, protective devices, warning signs and access to abutting properties. DOT also recommends that all construction related traffic be restricted to off-peak hours.

D. Parking Requirements

The traffic study indicated that the project would provide sufficient vehicle parking spaces to meet the requirements of the City of Los Angeles Municipal Code. The applicant should check with the Department of Building and Safety on the number of Code-required parking spaces needed for the project.

E. Driveway Access and Circulation

The conceptual site plan (**Attachment 3**) is acceptable to DOT. However, the review of this study does not constitute approval of the driveway dimensions, access and circulation scheme. Those require separate review and approval and should be coordinated with DOT's Citywide Planning Coordination Section (201 N. Figueroa Street, 4th Floor, Station 3, at 213-482-7024). In order to minimize and prevent last minute building design changes, the applicant should contact DOT for driveway width and internal circulation requirements so that such traffic flow considerations are designed and incorporated early into the building and parking layout plans. All driveways should be Case 2 driveways and 30 feet wide for two-way operations. Any security gates should be a minimum of 20 feet from the property line or to the satisfaction of DOT.

F. Development Review Fees

An ordinance adding Section 19.15 to the Los Angeles Municipal Code relative to application fees paid to DOT for permit issuance activities was adopted by the Los Angeles City Council in 2009 and updated in 2014. This ordinance identifies specific fees for traffic study review, condition clearance, and permit issuance. The applicant shall comply with any applicable fees per this ordinance.

If you have any questions, please contact me at (213) 972-8482.

The results of the analysis of future traffic conditions at the study intersections are summarized in Table 10. As shown in this table, although the addition of Project traffic will increase the CMA value at all of the study intersections during both peak hours, the incremental Project traffic additions will not result in a change in level of service at any study intersections. For the Future (2020) With Project condition, with or without the addition of Project traffic, it is estimated that 8 of the study intersections will continue to have acceptable levels of service (LOS A through LOS D) during both peak hours. The remaining 2 study intersections are expected to operate at LOS E or F during one or both peak hours with or without the Project.

CITY OF LOS ANGELES

INTER-DEPARTMENTAL CORRESPONDENCE

167 W. Avenue 34/3401 N. Pasadena Av
DOT Case No. CEN19-48477
Old DOT Case No. CEN15-43306

Date: August 7, 2019

To: Heather Bleemers, Senior City Planner
Department of City Planning

From: Wes Pringle, Transportation Engineer
Department of Transportation

Subject: **SUPPLEMENTAL TRAFFIC IMPACT ASSESSMENT FOR THE PROPOSED MIXED-USE DEVELOPMENT AT 167 WEST AVENUE 34/3401-3437 NORTH PASADENA AVENUE**

A traffic impact study for a proposed mixed use development project was submitted to the Department of Transportation (DOT) by Crain & Associates, Inc. on December 2015, and a corresponding DOT assessment report was issued to the Department of City Planning (DCP) on January, 2016. Since then, the project scope has been modified to include up to 421 apartment units, 47 affordable units and 16,444 square feet of shopping center. The following is a comparison of the original and modified projects:

2015			2019	
Apartment Units	410		Apartment Units	421
Shopping Center (Sq. Ft.)	10,000		Affordable Units	47
Office Space (Sq. Ft.)	30,000		Shopping Center (Sq. Ft.)	16,444

The original project was estimated to generate 2,128 net new daily trips, 161 net new trips in the a.m. peak hour, and 199 net new trips in the p.m. peak hour. The revised project is expected to generate 2,206 net new daily trips, 157 net new trips in the a.m. peak hour, and 195 net new trips in the p.m. peak hour. The previous traffic analysis determined that two (2) of the ten (10) analyzed intersections would be significantly impacted by project related traffic. DOT concurs with the findings of the updated analysis that the revised project would also result in the same significant traffic impacts. The modified trip generation table is summarized in Attachment 1. All of the project requirements that are identified in DOT's January 2016 letter (included in Attachment 2) shall remain in effect.

If you have any questions, please contact Russell Hasan of my staff at (213) 972-8628.

HCIDLA

Determination Letter

Los Angeles
HOUSING+COMMUNITY
Investment Department

Eric Garcetti, Mayor
Rushmore D. Cervantes, General Manager

DATE: August 30, 2019

TO: ED 1125, LLC, a California limited liability company, Owner

FROM: Marites Cunanan, Senior Management Analyst I
Los Angeles Housing and Community Investment Department

SUBJECT: **AB 2556 (TOC) Determination for**
3401-3433 Pasadena Avenue, Los Angeles, CA 90031
141-153 W Avenue 34, Los Angeles, CA 90031

Based on the Affordable Unit Determination Application submitted by Jay Stark (Owner Representative) on behalf of ED 1125, LLC, a California limited liability company (Owner), the Los Angeles Housing + Community Investment Department (HCIDLA) has determined that no units are subject to replacement under AB 2556 (formerly AB 2222).

Information about the existing property for the five years prior to the date of the application is required in order to make a determination. HCIDLA received the Affordable Unit Determination on or about August 23, 2019, so HCIDLA must collect data from August 2014 to August 2019.

ED 1125, LLC, a California limited liability company (Owner) acquired the property commonly known as:
3401 Pasadena Ave under APN # 5205-004-003, Lot 3 on January 10, 2006 per Grant Deed.
153 W Ave 34 under APN # 5205-004-005, Lot 61 on July 31, 2000 per Grant Deed.
3433 Pasadena Ave under APN # 5205-004-007, Lot B, 2, & 3 on January 10, 2006 per Grant Deed.
141 W Ave 34 under APN # 5205-004-011, Lot A, 62, 64, & 65 on July 17, 2000 per Grant Deed.

Google Earth images and Internet Search show that the property commonly known as 3401 Pasadena Ave is a manufacturing building.

Per Department of City Planning (ZIMAS), County Assessor Parcel Information (LUPAMS), First American Data Tree, Billing Information Management System (BIMS) database, Code, Compliance and Rent Information System (CRIS) database, Internet Search, and the Rent Stabilization Ordinance Unit (RSO), the property commonly known as 3401 Pasadena Ave has a use code of "3100-Light Manufacturing/Printing".

Google Earth images and Internet Search show that the property commonly known as 153 W Ave 34 is a manufacturing building.

Per Department of City Planning (ZIMAS), County Assessor Parcel Information (LUPAMS), First American Data Tree, Billing Information Management System (BIMS) database, Code, Compliance and Rent Information System (CRIS) database, Internet Search, and the Rent Stabilization Ordinance Unit (RSO), the property commonly known as 153 W Ave 34 has a use code of "3100-Light Manufacturing/Printing".

Google Earth images and Internet Search show that the property commonly known as 3433 Pasadena Ave is a manufacturing building.

Per Department of City Planning (ZIMAS), County Assessor Parcel Information (LUPAMS), First American Data Tree, Billing Information Management System (BIMS) database, Code, Compliance and Rent Information System (CRIS) database, Internet Search, and the Rent Stabilization Ordinance Unit (RSO), the property commonly known as 3433 Pasadena Ave has a use code of "3100-Light Manufacturing/Printing".

Google Earth images and Internet Search show that the property commonly known as 141 W Ave 34 is a warehouse.

Per Department of City Planning (ZIMAS), County Assessor Parcel Information (LUPAMS), First American Data Tree, Billing Information Management System (BIMS) database, Code, Compliance and Rent Information System (CRIS) database, Internet Search, and the Rent Stabilization Ordinance Unit (RSO), the property commonly known as 141 W Ave 34 has a use code of "3300-Warehouse".

The Los Angeles Department of Building and Safety database indicates that the Owner has not applied for a Building Permit or Demolition Permit for the project.

Per statement received by HCIDLA on August 23, 2019, the Owner plans to construct a four hundred sixty eight (468) unit residential apartment development, pursuant to Transit Oriented Communities (TOC) guidelines.

HCIDLA has determined that there were no residential units built and demolished on the property, which currently has three manufacturing buildings and one warehouse within the last five years. Therefore, no AB 2556 replacement affordable units are required. **Please note that this AB 2556 determination will also apply if the proposed project is Density Bonus (DB).**

This determination is provisional and subject to verification by the RSO Section.

****WARNING****
LOT TIES AND EXISTING PRE-1978 SINGLE FAMILY DWELLING ON ONE LOT

ISSUE:	Is a **LOT TIE** required for the **NEW** project?
IF NO:	Owner's existing Rent Stabilization (RSO) replacement obligation, if any, remains the **SAME** as above.
IF YES:	Owner's existing RSO replacement obligation, if any, will **INCREASE** by one and the new project will also be subject to the RSO, unless the existing single family dwelling is demolished before the lots are tied.

Letter Addressing Community Outreach Issues

Dear Ms. Carter and Mr. Netburn:

We are writing on behalf of the project applicant to ensure that the record is clear regarding the public outreach efforts we have taken with the Lincoln Heights community regarding the 141 Avenue 34 Project (the "Project"). In particular, we understand a small group of certain community members who live near and expressed opposition to the Project have stated to City of Los Angeles ("City") staff and officials that they have not had an opportunity for engagement with the applicant Project Team to express their concerns regarding the Project. Such claims are simply inaccurate. The Project Team has in fact engaged in extensive attempts at community engagement with these very individuals, including the individual who filed an appeal of the Project Director's Determination Approval to the City Planning Commission, as documented in this letter.

By way of providing some background information on the Project, it is located at 141 Avenue 34 ("Property") in the Lincoln Heights planning area of the City. It is located on a CM (Commercial Manufacturing) zoned site and General Plan area, and is surrounded by similarly zoned sites. The Project fronts Pasadena Avenue to the east, Avenue 34 to the south, and the Arroyo Seco and 110 Freeway to the west and north. It consists of 468 residential units (including 66 Very Low Income affordable units) and approximately 14,000 square feet of ground floor commercial uses along Pasadena Avenue. These uses are located within three 4 and 5 story buildings on an approximately five acre site that currently contains only commercial uses (no residents would be displaced as a result of the Project). The proposed Floor Area Ratio of the Project is 2.51:1 (a 3:1 base FAR is allowed by code). The Project provides approximately 1.5 acres of public open space along Pasadena Avenue and is a 5-minute walk from the Heritage Square Gold Line Station.

It is also critical to note that the proposed Project is a revised version of a mixed-use project—already approved by the City–at the Property. This approved project ("Approved Project") was larger and taller than the Project, and included 372 residential units, 14,000 square feet of commercial uses, and 30,000 square feet of office uses. It also only included 31 proposed affordable units at the Very Low Income level—less than half of the affordable housing units proposed by the Project. The Approved Project was

not appealed at the time it was approved, and could be built on the Property today without the need for any additional discretionary City process.

As confirmed by the City's CEQA analysis for the Project, the Project is a smaller and less environmentally impactful version of the Approved Project. Thus, the currently proposed Project is not necessary to fully redevelop the Property with a mixed-use development—it would merely allow a smaller development with more residential units and over double the amount of affordable housing as allowed by the currently entitled project.

Before filing for the Project entitlements, the City and the District 1 Council Office asked the Project Team to engage in community outreach with neighbors living near the Project site, and also asked that we present the Project at the Lincoln Heights Neighborhood Council to get feedback from the community. At every step of the process, the City has urged the Project Team to continue to engage in outreach.

As set forth in detail below, in response, the Project Team has and continues to engage in extensive community outreach. This has included numerous discussions with neighboring property owners and the local BID, presenting the Project at the Lincoln Heights Neighborhood Council, and numerous calls and emails with community members and the Council Office. A chronology identifying some of the Project Team's efforts is set out below, which have included English/Spanish bilingual communications, though we note this chronology does not cover each and every conversation and focuses primarily on our ongoing outreach efforts with the individuals and businesses on and around Avenue 34. We also note that we have made ourselves available to present at Lincoln Heights Neighborhood Council Land Use Committee meetings in the last few months, which have unfortunately been put on hold due to the COVID-19 crisis.

Based on our conversations with community members, Neighborhood Council leadership, and the Council Office, we learned one of the primary concerns in the area surrounding the Project site is pedestrian safety. In response, the Project Team *voluntarily* took on numerous off-site efforts to address pedestrian safety concerns, including adding crosswalks, lighting, signage and also adding new safety signage at Avenue 33 and Artesian Street at a Metro Gold Line street crossing, which we developed in partnership with Metro. These conditions are reflected in the Project's conditions of approval.

As indicated, the Project Team has also repeatedly reached out to the local group of individuals who live on Avenue 34, whom we first met at the Lincoln Heights Neighborhood Council Land Use Committee meeting in February of 2020 (one of whom is the appellant who filed the appeal of the Project to CPC). The Project Team has made numerous efforts to schedule calls and meetings with these individuals. However, as set forth below, they repeatedly denied our invitations to hold virtual meetings and/or conference calls for many months since February, only agreeing to meet with us in the last week (they have still not responded to our email setting forth a range of potential meeting dates).

We understand these same people have complained that they have been denied the ability to engage and have their voices heard regarding the Project. Nothing could be further from the truth. As listed in detail below, the Project Team has made numerous attempts to engage with these individuals, which attempts had been repeatedly rejected by the very people who are claiming that they have been silenced.

Based on the contact we have had with the neighbors living on Avenue 34, the primary concern we have heard from them repeatedly is that they are concerned that the Project would result in a loss of their street parking on Avenue 34 for their guests and customers. The Project Team informed these community members that their request that we add substantial parking to the Project was contrary to City Planning Commission policy and that the Project was already parked in excess of code requirements. The Project is of course obligated to strike a balance between the community's desire for more on-site parking in the Project with a goal of ensuring no impacts on street parking, and City policies regarding limiting the amount of such parking in key transit priority area sites such as the Property.

As an alternative, the Project Team offered to work with the Avenue 34 residents regarding finding other solutions to address their street parking concerns including property management controls, and working with them and the City to set up street parking restrictions on Avenue 34, or setting up a preferential parking district. We informed the residents we would help them and work with them and the City to pursue whatever options they prefer. As detailed below, the community members living on and near Avenue 34 including the appellant to whom we reached out ignored and denied our offers to work with them to find such solutions for many months. The Project Team, however, remains willing to work with the community members on identifying and implementing solutions to their street parking concerns. As of last week, the community members with whom we had been engaged since February finally agreed to meet with us. We are currently planning a community meeting we have offered to be held before the appeal hearing, which is currently scheduled for August 13, 2020.

When we met with the community at the Lincoln Heights Neighborhood Council Land Use Committee meeting in February, community members at the meeting also asked whether the Project could have the vehicle ingress and egress point for the Project come in off the major street, Pasadena Avenue, rather than off the smaller street Avenue 34, as currently designed. We also understand certain community members posed the same question to LADOT. Both the Project Team and, as we understand it, LADOT informed them that bringing in cars off a major street when access via a smaller street is available would be contrary to City policy, as it would create traffic and safety impacts City policies are designed to avoid.

Not having all your demands met is not the same thing as being ignored. In this case, the neighbors who live near the Project have not been ignored. Rather, their concerns have been heard and responded to by the Project Team through voluntary conditions of approval for off-site improvements and a standing offer to work with them to address their concerns regarding street parking on Avenue 34. We want the record to be clear that the claims of certain community members that their voices have not been heard are simply inaccurate. To the contrary, we have repeatedly offered to meet with the Project stakeholders and discuss their concerns. For months on end they ignored repeated invitations for calls or meetings.

Here is a timeline of events related to community outreach and Project revisions in response to such outreach - note the timeline below is not exhaustive, and excludes numerous interactions with immediately adjacent property owners, including MTA and the owner of 3500 Pasadena Avenue:

- November 1, 2019 – Robb De Forest on the Project Team e-mailed Hank Shaeffer (attorney for the Self-Realization Fellowship), neighbor, property owner and boardmember of the Lincoln Heights Business Improvement District (BID), to introduce himself, and to offer to come and meet with Mr. Shaeffer at his convenience (Mr. De Forest requested that Mr. Shaeffer propose some convenient times). Mr. Shaeffer did not reply.

- November 4, 2019 – Mr. De Forest met with neighbor, property owner and boardmember of the Lincoln Heights Business Improvement District (BID), Joe Lepore, to introduce himself, to explain that the team was in the process of amending the previously approved site plan, to hear concerns, and to get recommendations of others to contact.
- November 13, 2019 – Mr. De Forest met with Tom & Peter Gertmenian, neighbors, property owners, and BID board members to introduce himself, to explain that the team was in the process of amending the previously approved site plan, to hear concerns, and to get recommendations of others to contact. The Gertmenians expressed some disappointment with losing the views of the distant mountains from their office, and also expressed some concerns about increased traffic on Artesian Street. Mr. De Forest explained that while there is little that the Project Team can do to preserve their views, that they took issues of traffic and safety on Artesian seriously and would explore mitigation measures.
- December 18, 2019 – Mr. De Forest was introduced to neighbor and property owner, Larry Gillins. The two exchanged text messages and Mr. De Forest offered to come and meet Mr. Gillins at his convenience to explain that the team was in the process of amending the previously approved site plan, to hear concerns, and to get recommendations of others to contact. Mr. Gillins did not follow-up.
- February 3, 2020 – Mr. De Forest e-mailed Mr. Shaeffer (Self-Realization Fellowship) to follow up on his prior e-mail and offer to meet to introduce himself and to discuss the Project and identify any potential concerns. Mr. Shaeffer did not respond.
- February 10, 2020 – Mr. De Forest and Kevin Ratner (also of the Project Team) had a follow-up meeting with the Gertmenians to discuss the project, listen to concerns and to brainstorm potential traffic mitigation measures.
- February 13, 2020 – The Project Team presented the Project at the Lincoln Heights Neighborhood Council Land Use Committee meeting. The Committee tabled the item. We discussed the Project outside of the meeting with several neighbors who were present and got emails from the 5 people who came to the meeting and said they lived on Avenue 34. Of note, Avenue 34 only has a few residences–most of the street is made up of commercial uses (this location is CM – Commercial Manufacturing zoned). In hearing the neighbors' concerns about street parking in particular, the Project Team offered to help them set up a preferential parking district and to not let any of the residents of the Project use it.
- February 21, 2020 – Robb De Forest emailed all of the people the Project Team met at the Neighborhood Council meeting and requested a meeting with them.
- February 27, 2020 – Patty Camacho, one of the people who identified as living on Avenue 34, who the Project Team spoke to at the Neighborhood Council meeting and emailed, emailed Mr. De Forest back and said she would circulate his email and follow up with the Project Team.
- February 27, 2020 – Robb De Forest responded to Ms. Camacho, saying we look forward to hearing back. We did not get any follow up email from Ms. Camacho.
- March 11, 2020 – The Lincoln Heights Neighborhood Council Land Use Committee put our Project on the agenda without informing the Project Team. We understand a number of people showed up to discuss the Project. We did not request to be put back on the agenda and were not informed that the Lincoln Heights Neighborhood Council Land Use Committee had a practice of automatically putting tabled items onto the next agenda rather than tabling the item until the project applicant comes back and requests to be put back on the active agenda.
- April 23, 2020 – Mr. Joe Lepore left a voicemail for Mr. De Forest and requested a return phone call. Mr. De Forest sent an e-mail to Mr. Lepore to notify him that his voicemail had been received

and that Mr. De Forest would return his call the following day. Mr. Lepore responded to thank Mr. De Forest.

- April 24, 2020 – Mr. De Forest called Mr. Lepore. Mr. Lepore and Mr. De Forest discussed the local real estate market, and Mr. Lepore notified Mr. De Forest of some neighborhood nuisances that had recently popped up. Mr. De Forest expressed a sincere desire to be helpful to both the BID and to the neighborhood as a whole. Toward the end of the call, Mr. Lepore expressed some concerns about the Project creating a burden on street parking along Avenue 34. Mr. De Forest expressed a desire to work creatively and collaboratively with the neighbors to devise solutions to mitigate this impact. Mr. De Forest also requested Mr. Lepore's assistance with connecting the Project Team to other concerned neighbors and his advice for how best to advance these discussions. Mr. Lepore agreed to give it some thought.
- May 2, 2020 – After not hearing back from the neighbors the Project Team talked to after the last Neighborhood Council Meeting, Robb De Forest of the Project Team sent a follow-up email to the same email addresses to which the prior emails were sent. In this email Mr. De Forest requested a discussion with the neighbors.
- May 3, 2020 – Michael Hayden, who was on the list of the people who identified as living on Avenue 34 (whom we met at the Neighborhood Council meeting on 2/13), responded and said he never got the prior email (all the emails from our team were sent to the same email addresses). He said he wanted us to come to the next Neighborhood Council meeting, and listed some concerns about the Project, including certain factually incorrect statements.
- May 4, 2020 – Mr. De Forest responded to Mr. Hayden's email (and copied Patty Camacho, the Appellant), clarifying a number of the misconceptions about the Project stated in Mr. Hayden's email – including the concerns about all cars from the Project using Artesian St. (Ave 34 is the main access point for the project) and addressing the concerns about hazardous materials off of our Project site. Mr. De Forest also repeated the willingness of the Project Team to help them set up a preferential parking district or implement other parking restrictions to address their parking concerns. Again, Mr. De Forest requested to meet with the neighbors on Ave 34 to discuss their concerns.
- May 6, 2020 – Mr. Hayden responded to Mr. De Forest's e-mail (with a copy to Patty Camacho) thanking him for his reply and informing Mr. De Forest that he would forward Mr. De Forest's e-mail to the "rest of the neighbors" to ask them how they wished to proceed. Mr. De Forest then replied to Mr. Hayden's e-mail (with a copy to Patty Camacho) to thank him.
- May 11, 2020 – Mr. Hayden wrote back said he talked to the neighbors and said that they do not want to meet with us, but only want to discuss our project only at a Neighborhood Council meeting – which were by this time not being held due to the COVID-19 pandemic. He also mentioned the belief that the Project would include a vehicle turnaround on Ave 34 (this is not true). He also thanked Mr. De Forest for listening to their concerns.
- May 11, 2020 – Mr. De Forest wrote Mr. Hayden back (with a copy to Patty Camacho), clarified that there would be no vehicle turnaround on Ave 34 and again offered to meet with the neighbors to discuss their concerns. Mr. Hayden did not respond to this email.
- May 25, 2020 – Richard Larsen emailed Project representative Andrew Brady to indicate they were trying to set up a Lincoln Heights Neighborhood Council Land Use Committee meeting on June 3, 2020, assuming they would be able to set up virtual meetings. Mr. Brady wrote back that same day and said he'd reach out to the Project Team and see if we were available that day.

- May 27, 2020 – Richard Larsen emailed Mr. Brady to inform him the June 3, 2020 Lincoln Heights Neighborhood Council Land Use Committee meeting was cancelled. He mentioned that they would attempt to hold a follow-up meeting on June 10, 2020.
- May 28, 2020 – Mr. Brady emailed Mr. Larson letting him know the Project Team would be there on June 10th, ready to present the changes to the Project the Project Team had implemented to address community concerns.
- May 29, 2020 – Mr. De Forest of the Project Team wrote to Mr. Hayden, and Ms. Camacho to let them know the team would be coming to the June 10, 2020 Neighborhood Council Land Use Committee meeting, and requested that they spread the word to "any and all interested stakeholders."
- June 4, 2020 – Richard Larsen emailed Mr. Brady to inform him the June 10, 2020 Lincoln Heights Neighborhood Council Land Use Committee meeting was cancelled due to ongoing issues related to holding virtual meetings. Mr. Larsen was not sure when the next meeting would be able to be scheduled. Mr. Brady wrote Mr. Larsen back, saying the Project Team would present at the next available meeting, and sent Mr. Larsen an information sheet about the Project with Frequently Asked Questions (FAQ) addressing community issues provided in English and Spanish that could be provided to community members.
- June 5, 2020 – Mr. De Forest of the Project Team wrote to Ave 34 residents Mr. Hayden and Ms. Camacho to let them know that he was informed that the June 10, 2020 Neighborhood Council Land Use Committee meeting was cancelled. Both Ms. Camacho and Mr. Hayden responded to Mr. De Forest to thank him for the update. Mr. De Forest replied to both Ms. Camacho and Mr. Hayden to inform them that he would let them know about a rescheduled meeting date and time once he became aware.
- June 12, 2020 – The Letter of Determination approving the Project was issued by the Planning Department. Mr. De Forest wrote to Ave 34 residents Mr. Hayden, Ms. Camacho, Mr. Lepore, Mr. Wagner, and Ms. Trefry to: inform the neighbors that the LOD had been issued; and, (2) providing another invitation to address any concerns directly and (given the difficulty the Neighborhood Council Land Use Committee was having in hosting meetings) to host a call or videoconference (with translation services offered as well as accommodations made for people with insufficient internet connectivity) to discuss the Project and any concerns.
- June 14, 2020 – Mr. De Forest of the Project Team wrote to Ave 34 residents Mr. Hayden, Ms. Camacho, Mr. Lepore, Mr. Wagner, and Ms. Trefry to: (1) circulate the Project FAQ document to specifically address some of the concerns and project misconceptions of which the Project Team had been made aware (the FAQ document addresses community concerns, particularly noting that, as we had stated to community members, we would work with them on setting up parking restrictions on Avenue 34 to ensure that the current parking is maintained.); (2) to reassure neighbors that just because the LOD was issued, the Project Team still hoped to meet with them to discuss how their concerns could be addressed; and (3) reiterate the invitation to host a call or videoconference (with translation services offered as well as accommodations made for people with insufficient internet connectivity) to discuss the Project and any concerns.
- June 15, 2020 – Mr. Hayden (indicating that he was "BCC-ing our neighbors") wrote Mr. De Forest an email stating frustration with the City process, and stating that he would discuss the issue with community members and be back in touch with us soon. Mr. Hayden expressed his appreciation to Mr. De Forest for reaching out to the community. Mr. De Forest replied to Mr. Hayden thanking him for his leadership and stating that he was looking forward to hearing

back from Mr. Hayden and the neighbors. Mr. De Forest also expressed his sincere interest in working together to find common ground, and asked that Mr. Hayden relay those sentiments.

- June 15, 2020 – A person saying they are an Ave 34 resident named Jon Ruley wrote his neighbor Mr. Hayden an email copying Mr. De Forest of the Project Team stating that any loss of parking on Avenue 34 would destroy his business. We note that we told the neighbors repeatedly, including in the FAQs we prepared and circulated, that we would work with them on the parking issues. Mr. Hayden replied to the e-mail to notify Mr. De Forest that Mr. Ruley operates a sound studio near the Project site. Mr. De Forest replied to Mr. Hayden thanking him for the context and asking for Mr. Hayden's advice on how best to engage Mr. Ruley (offering to reach out to him separately, rather than waiting for a larger meeting to be scheduled). Mr. Hayden did not respond.
- June 19, 2020 – Mr. De Forest wrote to Ave 34 resident Mr. Hayden to check in as stated and to reiterate the Project Team's desire and willingness to help facilitate a phone/video meeting with the concerned neighbors. We received no response to this email.
- June 22, 2020 – Patricia Camacho, one of the Ave 34 residents, filed an appeal challenging all Project entitlements.
- June 25, 2020 – Members of the Project Team, including Mr. De Forest and Mr. Ratner were invited to attend the next BID meeting (scheduled for July 2, 2020), as new property owners (and were placed on the agenda as such). A series of side e-mails ensued, exchanging pleasantries, etc.
- June 30, 2020 – Mr. Hayden, one of the Ave 34 residents, wrote an email to Mr. De Forest of the Project Team indicating he looked forward to having a direct dialogue with the Project Team. He indicated a number of people in the community have concerns about the Project, and listed various names and attached some of their letters that were addressed to the City. He mentioned that the neighbors were still discussing the best time and format for a discussion with the Project Team.
- June 30, 2020 – Mr. De Forest replied to Mr. Hayden, once again providing the English and Spanish FAQs, informing him that the Project Team would be at the next Neighborhood Council meeting whenever it is held—and again offering to host a Zoom meeting with a phone call-in while the Neighborhood Council Land Use Committee Meetings are on hold (the Neighborhood Council Land Use Committee is also attempting to schedule its meetings via Zoom). No response to this email has been received.
- July 2, 2020 – Mr. De Forest attended the Lincoln Heights Industrial Zone BID meeting with Mr. Ratner. The two were appointed to serve on the board in the place of the seat vacated by Eric Ortiz, the former property owner who sold his property to the Project Team. Several community members were in attendance, including Joe Lepore, Peter Gertmenian, Hank Shaeffer, Seth Pollen, and Marco Limandri. At the conclusion of the meeting, Mr. De Forest and Mr. Ratner offered to: 1) Schedule virtual meetings with BID members interested in learning more about the Project; 2) Update them on the mitigation measures agreed to with MTA/DOT; and 3) Spearhead the process of exploring the feasibility and implementation of a preferential parking district as a means to address concerns related to the potential loss of availability of street parking for residents and businesses resulting from the Project.
- July 9, 2020 – Mr. Hayden left a voicemail for Mr. De Forest stating he had a few questions about the Project, and requested a return phone call.
- July 11, 2020 – Mr. De Forest returned Mr. Hayden's phone call. Mr. Hayden indicated that the neighbors were now interested in having a virtual Zoom meeting with the Project Team to discuss the Project. Mr. De Forest agreed to poll his team members and to respond to Mr. Hayden with

any scheduling conflicts. Mr. De Forest also again offered to provide Spanish-language translation services and accommodations for people who may have insufficient internet connectivity. Mr. Hayden also expressed a desire for the Project Team to consider either preserving some of the mature pine and olive trees on the property along Avenue 34. Mr. De Forest said that he would look into the feasibility of this and would also revisit the overall plan for greenery and tree planting along Avenue 34. Mr. De Forest also expressed a willingness to lead a community effort to explore the implementation of a preferential parking district, or similar mechanism, to minimize the loss of street parking for current residents and business owners on Avenue 34. Mr. Hayden indicated that the community would be in favor of such an initiative. Mr. Hayden also notified Mr. De Forest that the neighbors would likely want to discuss construction period logistics (dust mitigation, truck routes, etc.) during the proposed meeting. The two thanked each other and Mr. De Forest followed up with an e-mail to Mr. Hayden summarizing their conversation.

- July 14, 2020 – Mr. De Forest sent Mr. Hayden a follow-up e-mail with his team's availability for a virtual meeting. Mr. Hayden responded, informing Mr. De Forest that he would coordinate scheduling with the neighbors and respond once confirmed. He also sent photos of some of the trees that he had referenced in their phone call. Mr. De Forest replied thanking him and notifying Mr. Hayden that the Project Team was exploring the trees/greenery along Avenue 34. As of the date of this letter, the Project Team is still awaiting Mr. Hayden's response.

The Project Team has maintained a close working relationship with the City to make sure community issues have been addressed, and relied on members of the Neighborhood Council Land Use Committee for feedback on community safety concerns which have been addressed in voluntary off-site safety conditions accepted by the Project Team.

In addition to what is identified on the list, as mentioned, the Project Team has had several meetings and calls with the City Council District 1 office, and with Mr. Richard Larsen, Chair of the Lincoln Heights Neighborhood Council Land Use Committee, the BID and other landowners and community members. The guidance and feedback from these stakeholders has been essential to our outreach efforts, and in assisting us with understanding the concerns of the community. We also want to be clear that the Project Team remains willing to work with the community, including the appellants, to address their concerns. We have made a standing offer for them to reach out to us, and we will continue to try to reach out to them and engage them.

Sincerely yours,

Andrew Brady

141 W Avenue 34 Proposed Project

Michael Henry Hayden <michaelhenryhayden@gmail.com> Wed, Jun 24, 2020 at 8:29 AM
To: nick.hendricks@lacity.org, Patty Camacho <machocamacho73@yahoo.com>, Michael Henry Hayden <michaelhenryhayden@gmail.com>, Michelle Carter <michelle.carter@lacity.org>, oliver.netburn@lacity.org

Dear Nicholas Hendricks,

I am a resident on W Avenue 34, in Lincoln Heights. I recently received a "Director's Determination" for DIR-2019-6048-TOC-SPR-WDI. Your name was listed as the Director, but the document was not signed by you. Can you please clarify why this would be the case? Everything regarding this project has been highly irregular, and this final flair of irregularity is just the icing on the cake.

We have submitted a Letter of Appeal for DIR-2019-6048-TOC-SPR-WDI on behalf of our neighborhood, whose names are appended to the end of this email. We want to know, who will be reviewing the appeal? All of our community's letters addressed to Michelle Carter have been ignored, or answered with copy-and-paste responses that ignore the substance of our concerns. We request that somebody else review the Appeal, and to take seriously our very real health and safety concerns regarding this, the largest construction project in the history of Lincoln Heights.

We want to emphasize that we are not opposed to new housing in our neighborhood. We especially appreciate the addition of affordable units. However, we are deeply troubled by City Planning's continued dismissal of our concerns for our health and safety associated with this project. The developers of this project are motivated to maximize their profits, and it is not your job as a public servant to only facilitate all the proponent's requests, but also to protect the people of this city from the proponent's overreach.

City Planning has avoided our calls for public review, neglected to inform other relevant city agencies about crucial design problems, misled us about their inaction to inform those agencies, superseded Neighborhood and City Councils, and selectively attached outdated Environmental Reviews prepared long in the past that approve completely different uses of this site.

Our community also wants clarification when you say that it was the "Director's determination" to avoid a hearing. Who is the Director? Was it your own determination personally to avoid the public hearing we repeatedly asked for? Or has one of your superiors instructed you to evade and ignore public concerns regarding this project? I'm sure it's not a coincidence that the approval was made in the afternoon after the morning we sent our last and most direct of multiple community calls for a public hearing. This decision ignores the health and safety of children, families, and small businesses on our block. Their lives will be drastically impacted by three years of construction on a polluted site, with an outdated and non-applicable environmental review, to construct a poorly planned and bloated development on a small block with an egress onto a one way street at a railroad crossing, all across the street from an elementary school.

Every email from you has evaded the substance of our questions: What are the pollutants that make the adjoining property on this block so dangerous that it has gone unoccupied for decades? How can our families and the elementary school across the street be protected from the pollutants that will be unearthed by the excavation? Where will the current residents, business owners, and their clients park their cars? Where will the potentially 1,000 new residents and possibly many more commercial clients park their cars, with only 311 parking spaces offered by the developer? How can the city approve so much new traffic on small and admittedly underbuilt streets? Citing a sequence of city planning policies and procedures is NOT an answer to our concerns.

If any city planner takes their job seriously, they will make a trip to this part of the city, and see this block with their own eyes, and talk to the people who live here and who know how this block functions. This project may tick all the appropriate boxes on a list of ideals on paper, but the current design is far from feasible, especially for this site specifically. This new building's residents would be ill-served by this design at this location. This project assumes that more than half the building's tenants won't have cars. That is unrealistic in Los Angeles, and especially in this neighborhood. The only thing close to basic services within walking distance of this development are a corner liquor store and an illegal marijuana dispensary. If one of the commercial spaces in this new building were to be a grocery store, there would be no parking for its customers. Any city planner who could claim responsibility for this project is inviting disaster.

This will be the largest residential development in the history of Lincoln Heights, one of the oldest neighborhoods in Los Angeles. Adding 1,000 people to a single block with minimal infrastructure will have a generational impact that can hardly be comprehended. It's unthinkable that a project this massive would not be brought to the community for review. It's outrageous that the Neighborhood Council was railroaded and completely ignored. We went to the last in-person meeting hoping to voice our concerns, and the developers did not even demonstrate the good faith to show up.

Our concerns have so far been ignored, and so we will be forwarding copies of our Letter of Appeal to as many people as possible who can comprehend the gravity of this project, its many shortcomings, and the city's negligence thus far in its treatment of our community's health and safety.

I'm attaching a list of people who live or work on the block adjoining this property, and are giving their support to this appeal.

Sincerely,
Michael Hayden

Aggrieved Residents and Businesses who live or work on the block adjacent to the property and support this Appeal:

- Patricia Camacho, 118 W Avenue 34, Los Angeles, CA 90031
- Joshua Camacho-Snyder, 118 W Avenue 34, Los Angeles, CA 90031

141 W Avenue 34 Proposed Project

Michael Henry Hayden <michaelhenryhayden@gmail.com> Tue, Jun 23, 2020 at 2:06 PM
To: Michelle Carter <michelle.carter@lacity.org>, Phillip Bazan <phillip.bazan@lacity.org>, jose.a.rodriguez@lacity.org, nicole.sanchez@lacity.org, gilbert.cedillo@lacity.org, wes.pringle@lacity.org, brenda.kahinju@lacity.org, gerald.gubatan@lacity.org, oliver.netburn@lacity.org

Dear Michelle Carter and Department of City Planning,

We have submitted a Letter of Appeal for DIR-2019-6048-TOC-SPR-WDI on behalf of our neighborhood, whose names are appended to the end of this email. We want to know, who will be reviewing the appeal? All of our community's letters addressed to you have been ignored, or answered with copy-and-paste responses that ignore the substance of our concerns. We request that somebody else review the Appeal, and to take seriously our very real health and safety concerns regarding this, the largest construction project in the history of Lincoln Heights.

We want to emphasize that we are not opposed to new housing in our neighborhood. We especially appreciate the addition of affordable units. However, we are deeply troubled by City Planning's continued dismissal of our concerns for our health and safety associated with this project. The developers of this project are motivated to maximize their profits, and it is not your job as a public servant to only facilitate all the proponent's requests, but also to protect the people of this city from the proponent's overreach.

City Planning has avoided our calls for public review, neglected to inform other relevant city agencies about crucial design problems, misled us about their inaction to inform those agencies, superseded Neighborhood and City Councils, and selectively attached outdated Environmental Reviews prepared long in the past that approve completely different uses of this site.

Our community also wants clarification when you say that it was the "Director's determination" to avoid a hearing. Who is the Director? Was it your own determination personally to avoid the public hearing we repeatedly asked for? Or has one of your superiors instructed you to evade and ignore public concerns regarding this project? I'm sure it's not a coincidence that the approval was made in the afternoon after the morning I sent my last of multiple community calls for a public hearing. This decision ignores the health and safety of children, families, and small businesses on our block. Their lives will be drastically impacted by three years of construction on a polluted site, with an outdated and non-applicable environmental review, to construct a poorly planned and bloated development on a small block with an egress onto a one way street at a railroad crossing, all across the street from an elementary school.

Every email from you has evaded the substance of our questions: What are the pollutants that make the adjoining property on this block so dangerous that it has gone unoccupied for decades? How can our families and the elementary school across the street be protected from the pollutants that will be unearthed by the excavation? Where will the current residents, business owners, and their clients park their cars? Where will the potentially 1,000 new residents and possibly many more commercial clients park their cars, with only 311 parking spaces offered by the developer? How can the city approve so much new traffic on small and admittedly underbuilt streets? Citing a sequence of city planning policies and procedures is NOT an answer to our concerns.

If any city planner takes their job seriously, they will make a trip to this part of the city, and see this block with their own eyes, and talk to the people who live here and who know how this block functions. This project may tick all the appropriate boxes on a list of ideals on paper, but the current design is far from feasible, especially for this site specifically. This new building's residents would be ill-served by this design at this location. This project assumes that more than half the building's tenants won't have cars. That is unrealistic in Los Angeles, and especially in this neighborhood. The only thing close to basic services within walking distance of this development are a corner liquor store and an illegal marijuana dispensary. If one of the commercial spaces in this new building were to be a grocery store, there would be no parking for its customers. Any city planner who could claim responsibility for this project is inviting disaster.

This will be the largest residential development in the history of Lincoln Heights, one of the oldest neighborhoods in Los Angeles. Adding 1,000 people to a single block with minimal infrastructure will have a generational impact that can hardly be comprehended. It's unthinkable that a project this massive would not be brought to the community for review. It's outrageous that the Neighborhood Council was railroaded and completely ignored. We went to the last in-person meeting hoping to voice our concerns, and the developers did not even demonstrate the good faith to show up.

Our concerns have so far been ignored, and so we will be forwarding copies of our Letter of Appeal to as many people as possible who can comprehend the gravity of this project, its many shortcomings, and the city's negligence thus far in its treatment of our community's health and safety.

I'm attaching a list of people who live or work on the block adjoining this property, and are giving their support to this appeal.

Sincerely,
Michael Hayden

Aggrieved Residents and Businesses who live or work on the block adjacent to the property and support this Appeal:

> I apologize if it came across as though your concerns were being dismissed. That is not the case, as it is important for the community to be involved in this process.
>
> There are legal limitations as to what can be imposed on a project to ensure that a housing development project does not become infeasible or decrease the proposed affordable units. In my response to your email that you sent on April 28, I stated that a public hearing was not required for this type of case per the LAMC. The document that you attached to your follow up email was the previously approved determination letter. That case was under the purview of a different decision maker – the Zoning Administrator (ZA). ZA cases require a public hearing unless the Chief Zoning Administrator waives the hearing by determining that the application (1) will not have a significant effect on adjoining properties or on the immediate neighborhood; or (2) is not likely to evoke public controversy. That is not the case for a Director's determination (DIR) case.
>
> All communications received from the community were reviewed and considered. Conditions of approval that are related to (1) the requested entitlement and (2) within the Department's legal purview were included in the determination. Additionally, all conditions that you highlighted from the previously approved entitlement was included in the determination that was issued for the DIR case along with additional pedestrian safety conditions.
>
> Your request on June 12th for a public hearing was received after the determination was finalized. Additionally, all communications received from you will be included in the case file.

> Hello Michelle,

I just received a package in the mail from your office containing the approval of the project on W Avenue 34 (DIR-2019-6048-TOC-WDI). I am really surprised that I still haven't heard a reply from you to my last email requesting a hearing, sent before this project was approved. I would like to know, by what reasoning have you justified ignoring the community's calls for a public hearing on this project, and also ignored this project's own stated criteria for avoiding a public hearing? Those criteria are that there be no controversy about the project (and there clearly is), and that the project does not have a significant effect on the immediate neighborhood. This would be the largest development project in the history of Lincoln Heights, and it would clearly have a huge impact on residents and local businesses, as evidenced by the multitude of letters you have received from residents and business owners for the past several months. This must be recognized. Everyone in this community is frustrated by your office's dismissal of our shared concerns for our health and safety. Also, please confirm that all of my correspondences with you, including my emailed request for a public hearing sent at 10 am on Friday June 12, this email, and my eagerly anticipated response from you, are included as part of the public documents regarding this proposed project.
Sincerely
Michael Hayden

> Dear Michelle Carter,
>
> There continues to be growing controversy in our neighborhood of Lincoln Heights regarding the proposed project at 141 W Avenue 34 (DIR-2019-6048-TOC-SPR-WDI). Our concerns center on the safety problems raised by the plan's traffic flow, the negative effect on street parking caused by the project's lack of adequate parking for its tenants, and the environmental hazards of the underground soil and water pollution this construction will release, endangering residents and schoolchildren nearby. We are also concerned by the murky reuse of a MND prepared for another project years earlier that doesn't address the specific proposals of this new project. (ENV-2016-273-MND-REC1)
>
> We are calling for a public hearing on this project, as required of any project that causes controversy in the neighborhood it impacts. I'm attaching the Zoning Administrators Adjustment, which waives a hearing for this project, unless it will "have a significant effect on adjoining properties or the immediate neighborhood" or is "likely to evoke public controversy" (page 15, attached below). As I'm sure you must agree from the outcry from the immediate neighborhood, the conditions for avoiding a public hearing have not been met.

> Hi Michelle,
>
> Thanks for getting back to me. I hope you're doing well and staying safe. I do have some questions, and it seems you're the person in charge of determining an approval for this project, so perhaps you have some answers.
>
> Many of us in the community had been attending Neighborhood Council meetings hoping to learn more about this project and to raise our concerns. At the last scheduled meeting, the developer didn't even show up, and we were told the Council would have to schedule another meeting with the developer, as there were many unresolved concerns. Now under the state's stay-at-home orders, we haven't been able to assemble. I now hear that this project has nevertheless been slated for "expedited processing" without a public hearing. Some of my neighbors are concerned that their voices aren't being heard, and that this moment of public health emergency is allowing the developers to bypass engagement with the community regarding their valid health and safety concerns.
>
> Some questions I have are:
>
> - Will there be a public hearing regarding this project?
> - I understand that the environmental review that is being used for this project is ENV-2016-273-MND-REC1. Was that created for a different proposal in 2016? Will a new environmental review be conducted to take into account the very different use of the space as outlined in this new proposal?
> - Does the city plan to change any of the surrounding infrastructure (street lights, stop lights, crosswalks, sidewalks, etc.) in conjunction with this development?
> - Has the city considered approving an entrance/exit on Pasadena Ave? That is a much wider street than W Avenue 34, and it seems that it could reduce many of the problems that many of my neighbors have identified.
> - As others have pointed out, there will likely be many hundreds more cars using this site than there will be available parking spots, with a deficit in numbers far exceeding the available street parking. What measures does the city plan to accommodate this deficit? Is the city planning new public parking areas in conjunction with this construction? Will residents be given street-parking passes so that they don't have to compete with the patrons of the new commercial businesses at this site for the very limited parking on their own street? The developer indicated that only 25 spaces in their parking lot would be earmarked for 12 commercial business, with the remaining 286 spaces intended to accommodate 468 residences.
> - What safeguards are being planned to prevent ground contamination from escaping during underground excavation? The adjoining lot, previously owned by Welch dry cleaning and AmeriPride Inc., (APN 5205-004-010) is affected by continued soil and groundwater pollution with petroleum and volatile organic compounds. It's reasonable to assume these pollutants in the soil and groundwater will be unearthed by this construction. It should also be noted that these properties directly border the Arroyo Seco river, making the release of pollutants especially worrisome. My understanding is that this polluted site is also set to be a staging area for the construction. There are children who live on our block and a middle school directly across the street from this site. The developers gave no solid answer to our questions regarding the groundwater pollution at the neighborhood council meeting. I

found an LA City Planning document online which ranks potentially polluted sites in my neighborhood. It ranks the empty lot next door as a 1, indicating continued known pollution. It ranks the proposed site for this building project as a 2, indicating possible ongoing pollution, and requiring further review. https://planning.lacity.org/EIR/CornfieldArroyo/texts/CASP_AppendixFinal_Oct.pdf The relevant information is on page 7 of section A-2. Has this review been conducted, and if so, what are the findings?

- What consideration does this proposal make for minimizing dust and noise pollution from the construction, especially as they may impact the school and residents?
- What are the plans for the trees currently on this site? There are many well-established pines and olives that face W. Ave 34 on the edge of this property. They don't interfere with the developer's footprint for the buildings. These provide the main greenery on our block, and act as a barrier mitigating air pollution from the 110 Highway, which is directly across from this lot, much more than newly-planted saplings could provide.

If I think of other questions, I'll let you know. Thank you so much for your time and energy in helping us with this case.

All my best,
Michael Hayden

> >
> > I understand that this project is supposed to have 486 residential units, but only 311 parking spots, and many of those spots would be reserved for additional commercial units in the building. This is a short block, bordered on one side by Pasadena Avenue, where parking is restricted, on another side by the metro tracks, and on another by a vacant lot. That means that if this project were to include the number of units they are proposing, our street and all the surrounding streets would be overwhelmed by the tenants of these new buildings. It's conceivable that as many as 700 cars would be entering and exiting this building every day.
> >
> > There is only one point of access to this entire project, and it is on my street. W Avenue 34 is a narrow street, with a one-way only outlet on Artesian St, which is an unusually narrow street, with a blind

corner, and no sidewalks, right next to a railroad crossing. This seems to be inviting an uncomfortable level of danger to this block. I'm attaching a photo of this street below.

There are other concerns we have as well. The lot directly next to this proposed project has been vacant for years due to dangerous ground contamination. This developer plans to dig a multistory underground parking lot right next to this site. I asked about the environmental risks and impact at the meeting, but the developer couldn't articulate anything regarding this, which leaves me very disturbed, as I live directly across the street from this proposed construction.

Will there be further opportunities for the community to voice their concerns about this project before it is approved? It seems to need a lot of reconsideration before it can proceed in a way that won't invite environmental harm, increase traffic dangers, and contribute to congestion on the streets.

Thank you for listening to my concerns.
Sincerely,
Michael Hayden

Hello,

As a member of the community and assistant principal of the neighborhood school, I am concerned with the construction project that is being proposed. There are many factors that will impact our neighborhood.

Thank you

Dear José, Michelle, et al:

I am a stakeholder in the Avenue 34/Pasadena Ave/Artesian St. community as well as a 17+ year resident and property owner in the 90031 zip code. I was recently made aware of the massive development proposed across the street from where I recently established my business and signed a long-term lease.

My multiple concerns include the following:

- The amount of parking is out of alignment with the number of residential units in the complex.

- The amount of parking is out of alignment with number of office and retail units in the complex.

- I understand the diminished parking ratios because of the adjacency to transit - but given our current global situation, does it make sense to design a parking-deficient project if public transportation ceases to be a viable option in the future?

- Avenue 34 is a one-block long virtual cul-de-sac, which transitions onto Artesian, a very narrow one-way street close to my building. As is, this an extremely dangerous condition, with cars from Avenue 33 frequently entering Artesian in the wrong direction to sneak onto Avenue 34; what will happen when the traffic is multiplied a hundred-fold because all access to and from this project occurs off of Avenue 34?

- I am deeply, deeply concerned about the vacant lot where the proposed and pitifully inadequate underground parking is to occur. It is well known in the community that these lots are an environmental wasteland. I have seen nothing in the project documents that would suggest there is an update to the previous Environmental Impact

Report, nor any mention of CEQA. Have those requirements been waived without proper scrutiny, or even a survey of the occupants of the surrounding properties? I know I would not want to expose myself, nor the multiple people in my workplace, to any potentially harmful chemicals or airborne toxic particulates triggered by the excavation of this land that such studies would uncover.

I hope that, should the project make it to construction, the people of Avenue 34 will not be inundated with noise, potentially toxic dust, and construction-related road closures that would interfere with our ability to do business. I further hope that elected officials will listen and work closely with city staff in the planning and building departments to implement and enforce the legitimate concerns voiced by us, the community stakeholders, and not default to tired lip service masking an inappropriate and suspicious alliance with the developers.

I look forward to attending the next (zoom) community meeting and being able to voice these concerns in person, publicly, and on the record.

Please include my email in any community correspondence related to this proposed development.

Thank you

Pae White

The Planning Department has not notified us of any updates on this project including if and when a public hearing will be scheduled in the near future.

Lets keep in touch as we move forward through this crisis and process.

> I'm writing you with my serious concerns regarding Pinyon's proposed project on W Avenue 34 in Lincoln Heights. Both my family and myself are deeply embedded in the Lincoln Heights community, and specifically the block directly next to this proposed project. My grandfather worked at sewing factories in Lincoln Heights in the 1960's, and then opened his own swimwear factory at Pasadena Ave and W Avenue 33 in the '70's. My father took over the family business in the '90's, and now I operate a business on Ave. 34 directly across the street from the proposed project. My family's history with the neighborhood gives me specific insight into how this proposed project would affect our community.
>
> I fully support adding affordable housing units in our neighborhood, and know that there is a real need for more housing in Los Angeles. However, we need the help of our city to ensure that developers respect the health and safety of our community.
>
> I have two main concerns about this project. The first one has two elements, that when combined will create a dangerous situation on Ave 34, 33, and Artesian. The project proposes 311 parking spaces for shared by nearly 500 residential units and 16,000 sq. ft. of retail. We have been attending Neighborhood Council meetings and trying to communicate with Pinyon. The one time that they showed up to a meeting, our first question was for them to explain the shortfall in parking, and how they thought the neighborhood could support it. Their quick answer was that this project is close to the Metro, and they expect the majority of their tenants in these luxury apartments would not have cars. We've heard that the building's one-bedroom apartments will go for $3200/month. It is unlikely that people who can afford this kind of rent will not also own cars in Los Angeles, with couples probably owning 2 cars. At a minimum, this will flood our already crowded streets with hundreds of cars looking for parking spaces. They are alotting 25 parking spaces for the commercial businesses, leaving 286 spots for residents.
>
> On W Avenue 34 alone, there are three businesses and four residences that already do not have full driveways or adequate parking, and rely on street parking both for themselves and their clients. These businesses and families would be drastically affected by the parking spaces that this project would take from the community. Pinyon proposed at the Council meeting that they might work to get parking passes for the neighborhood. This does not address the overcrowding on the streets, or that clients of these neiborhood businesses will also need to park on the street.
>
> The second part, and perhaps more dangerous aspect of this project is the proposed main entrance/exit. Pinyon has designed the only access to the parking lot on W Avenue 34 at Artesian St. If you live on W Avenue 34, the quickest way to get to the I-5, the 110 Freeway, the 2, San Fernando St, or local businesses like Home Depot, is to take Artesian St, and this is the street onto which this building's parking lot empties out. Artesian is a one-lane, one-way 14 foot wide street with no sidewalks or space to add pedestrian access. There is insufficient lighting, there is a blind corner, and there is a railroad crossing at the end of it. There are also several established fixtures in the community that bottleneck

traffic on this route. The film production on Lacy St often shuts down street traffic, the large warehouse on Artesian at W Avenue 33 has large trucks constantly coming in and out during the day, and the taco stands on Artesian draw nightly crowds of parked cars and hundreds of pedestrians. All of these things make a major egress for hundreds of additional cars highly problematic and dangerous for pedestrians. The developers might suggest that tenants can make a left on Pasadena Avenue and drive across the 110 north to Figueroa, and then make a left and drive back down to Avenue 26 to access these points, but we all know that people will want to take the most direct route, especially if their parking lot exits in that direction. To reinforce this point, apps like Google Maps and Waze always direct us to travel down Artesian Street towards Lacy Street, even though we live closer to Pasadena Avenue. If anyone thinks that people will avoid the street their driveway lets out onto, and the one their maps program tells them to use, they are mistaken.

This proposal invites significant danger to pedestrians. There is a middle school directly across the street from this proposed project. There is also an elementary school which is accessed from our side of the 110 by a pedestrian walkway at the corner of Artesian and Ave 33, right at the railroad crossing. Furthermore, the developer suggests that most of the building's tenants won't have cars, and will be attracted to the property based on its proximity to the Metro. Supposing this is true, hundreds of tenants would share Artesian St with cars to walk down this same small 14-ft wide one-way street which has no sidewalk, and no room for a sidewalk, in order to access the Lincoln/Cypress Metro station. This is a huge oversight on the part of the planners, and really it boggles my mind that this proposal has even been made. It puts us and our neighbors, existing businesses, and remarkably this project's tenants at risk.

This project raises other concerns, also. I know that there is long-standing documented soil and groundwater pollution of petroleum and VOC's on the property sandwiched between this proposed project and the Arroyo Secco River. Obviously, there is no underground fence to prevent polluted groundwater from moving across property lines. This project proposes excavating a two-story underground parking lot. Pinyon proposes using the polluted site as a staging ground for this construction. There is a middle school 50 feet away from this project. The representatives for Pinyon displayed no knowledge of this pollution at the Council meeting, and offered no concrete ways to show that this wouldn't pose a harm to the neighborhood or hundreds of schoolchildren across the street. Isn't it our shared responsibility to protect the health of hundreds of children who will spend eight hours a day across the street from this project?

I've looked at the environmental review for this project, and it was conducted for a different proposal entirely several years ago. That review was for far fewer residential units, with more parking spaces than units, putting less strain on surrounding infrastructure. It calls for a different layout of the buildings. It calls for a one-story underground parking lot, not a two-story one. It calls for preserving a historical brick building on the property. It also makes no specific reference to the ground pollution. It's important that a new environmental review be conducted that looks at this developer's new proposed use of the site, and that considers the health and safety concerns that the surrounding neighbors have been unanimous in voicing.

I understand that this project has been slated for expedited review, and that a public hearing is not scheduled. However, I'm also aware that a public review is required if the proposal raises controversy in the community. This proposal has raised significant controversy. There is a growing frustration, and many neighbors have expressed their anger that City Planning is not listening to us, and taking into account our basic health and safety concerns. Local businesses have expressed worry that Pinyon is dumping this major project in our neighborhood without providing the infrastructure to support concievably as many as 800 new residents. I hope our city will represent our desire for new projects to integrate an understanding of their site and neighborhood into the way they’re designed, and to make the community's health and safety a top priority. I’m asking you to delay approval of this project until those concerns are met.

I really appreciate you taking the time to hear our concerns. Please let us know how we can facilitate a public hearing. Thank you for your time and attention to this matter.

Sincerely,
Anthony Lepore

141 W Avenue 34 Proposed Project RE: DIR-2019-6048-TOC-SPR-WDI

Wes Pringle <wes.pringle@lacity.org> Mon, May 4, 2020 at 5:28 PM
To: Violeta Martinez <vmartinez4599@gmail.com>

Hi Violeta,

Thank you for expressing your concerns about the Mixed-Use project at 141 West Avenue 34. I have received many comments from you and your neighbors. As I am sure you are aware, there are many factors that go into the approval of a project such as the one that is being proposed here. Not every project requires a review by the City of Los Angeles Department of Transportation (LADOT), however, when required, every project receives a very detailed and thorough review by our department. I will attempt to describe LADOT's part of the development review process for you and your neighbors in the following email.

LADOT's role in development projects is in determining and reviewing the state mandated environmental analysis of a project and not "approving" projects. As such, we determined a study was required for this project, received the transportation study in December 2015 and issued a recommendation letter on January 28, 2016. The project was modified and submitted an addendum to the study. LADOT reviewed that addendum and issued another letter on July 11, 2019. When a project is required to submit a transportation analysis to LADOT the first step is to submit for approval a memorandum of understanding (MOU) that signifies the parameters the study must follow. All studies must follow the latest LADOT guidelines. The goal of the study is to assess the potential impacts the project may have on the surrounding transportation system at the time the project is open.

This particular project on Avenue 34 was required to do an analysis of 10 intersections. The study found that there were 2 significant impacts. It should be noted that the number of trips that this project is expected to produce is not based on the parking spaces. Therefore, the fact that they are asking to reduce the parking did not influence the outcome of the study. As indicated by our letters, LADOT found that each study followed the guidelines and was done correctly.

To mitigate the impacts identified in the study, the project has proposed to implement a transportation demand management (TDM) plan and implement traffic signal system improvements at a nearby intersection. A TDM plan lays out strategies to reduce single occupant vehicle trips. This plan will be submitted to and reviewed by LADOT. The plan will include methods and incentives to encourage and subsidize transit use, provide amenities to support biking, encourage car pools and van pools, and other types of assistance as well as providing detailed information on alternatives to transportation by car. In addition, this project will be required to provide yearly reports documenting that the number of trips generated by the project have been reduced by these TDM goals. The traffic signal system improvements will help the existing signal system operate more efficiently.

Apart from the review of a required transportation study, in most cases our only other role is to approve of driveway placement and design. Per LADOT guidelines (and City Planning), driveways for

residential buildings are preferred to be put on alleys or Local Streets. It is less disruptive and safer to put driveways on streets with lower speeds and volumes. A copy of our driveway guidelines can be found here: http://ladot.lacity.org/businesses/development-review#driveway-circulation-review.

Pasadena Avenue has been classified a Modified Avenue II and Avenue 34 a Local Street per the City of Los Angeles' Mobility Plan 2035. Avenue 34 has an existing right-of-way of 50 feet (25 feet half-width) and a roadway width of 34 feet (half-width 17 feet). At the time the project was submitted, the Local Street standards required a 20 foot half-width roadway and a 30-foot half-width right-of-way. The street standards are enforced by the Bureau of Engineering's (BOE) Land Development Group. They conditioned the project to widen the road by 3 feet and dedicate 5 feet (on their side of the street). Under the new Mobility Plan 2035, the Local Street standards are an 18 foot half-width roadway and a 30 foot half-width right-of-way. Although it may seem like this project is taking access off a narrow street, it is not inconsistent with other projects of similar size that have been conditioned to take access off of a Local Street or 20 foot wide alley.

Regarding the parking supplied by the project, the number of parking spaces required by any project is determined by the Zoning Code. This is enforced by the Department of Building and Safety. To modify the required parking a project must go through procedures dictated by City Planning. Although it may seem counterintuitive, LADOT has very little influence over parking supply.

LADOT does not review any type of soil analysis. I am afraid I am not able to offer very many details as to this part of the project. I believe all projects are required to submit a soils report to BOE.

At this point I believe that continuing to work with City Planning, the Council Office, and the developer is the most constructive way to proceed. Ultimately LADOT does not play an integral part of the final approval of the project and is not in a position to hold hearings for a project.

>
> As a parent, we are even more concerned with the safety of the children traveling to and from the local Elementary schools located less than a mile from the proposed site. I will have 2 of my children walking to and from school on a daily basis and we are very worried for the overall pedestrian and student safety with the increase of vehicles, construction supplies and workers. The noise factor alone is annoying to local homeowners and often distract children at school. Increased dirt and dust pose a health issue for children and homeowners.

In summary, we strongly feel that such a large complex will overtake the current neighborhood. To share our small neighborhood with almost 500 new residents will create unwanted concerns with traffic, noise, health and safety issues for us and children.

Sincerely,

The Martinez Family

141 W Avenue 34 Proposed Project

Anthony Lepore <lepore123@gmail.com> Mon, May 4, 2020 at 8:51 AM
To: michelle.carter@lacity.org

Hello Michelle,

I'm writing you with my serious concerns regarding Pinyon's proposed project on W Avenue 34 in Lincoln Heights. Both my family and myself are deeply embedded in the Lincoln Heights community, and specifically the block directly next to this proposed project. My grandfather worked at sewing factories in Lincoln Heights in the 1960's, and then opened his own swimwear factory at Pasadena Ave and W Avenue 33 in the '70's. My father took over the family business in the '90's, and now I operate a business on Ave. 34 directly across the street from the proposed project. My family's history with the neighborhood gives me specific insight into how this proposed project would affect our community.

I fully support adding affordable housing units in our neighborhood, and know that there is a real need for more housing in Los Angeles. However, we need the help of our city to ensure that developers respect the health and safety of our community.

I have two main concerns about this project. The first one has two elements, that when combined will create a dangerous situation on Ave 34, 33, and Artesian. The project proposes 311 parking spaces for shared by nearly 500 residential units and 16,000 sq. ft. of retail. We have been attending Neighborhood Council meetings and trying to communicate with Pinyon. The one time that they showed up to a meeting, our first question was for them to explain the shortfall in parking, and how they thought the neighborhood could support it. Their quick answer was that this project is close to the Metro, and they expect the majority of their tenants in these luxury apartments would not have cars. We've heard that the building's one-bedroom apartments will go for $3200/month. It is unlikely that people who can afford this kind of rent will not also own cars in Los Angeles, with couples probably owning 2 cars. At a minimum, this will flood our already crowded streets with hundreds of cars looking for parking spaces. They are alotting 25 parking spaces for the commercial businesses, leaving 286 spots for residents.

On W Avenue 34 alone, there are three businesses and four residences that already do not have full driveways or adequate parking, and rely on street parking both for themselves and their clients. These businesses and families would be drastically affected by the parking spaces that this project would take from the community. Pinyon proposed at the Council meeting that they might work to get parking passes for the neighborhood. This does not address the overcrowding on the streets, or that clients of these neiborhood businesses will also need to park on the street.

The second part, and perhaps more dangerous aspect of this project is the proposed main entrance/exit. Pinyon has designed the only access to the parking lot on W Avenue 34 at Artesian St. If you live on W Avenue 34, the quickest way to get to the I-5, the 110 Freeway, the 2, San Fernando St, or local businesses like Home Depot, is to take Artesian St, and this is the street onto which this building's parking lot empties out. Artesian is a one-lane, one-way 14 foot wide street with no sidewalks or space to add pedestrian access. There is insufficient lighting, there is a blind corner, and there is a railroad crossing at the end of it. There are also several established fixtures in the community that bottleneck traffic on this route. The film production on Lacy St often shuts down street traffic, the large warehouse on Artesian at W Avenue 33 has large trucks constantly coming in and out during the day, and the taco stands on Artesian draw nightly crowds of parked cars and hundreds of pedestrians. All of these things make a major egress for hundreds of additional cars highly problematic and dangerous for pedestrians. The developers might suggest that tenants can make a left on Pasadena Avenue and drive across the 110 north to Figueroa, and then make a left and drive back down to Avenue 26 to access these points, but we all know that people will want to take the most direct route, especially if their parking lot exits in that direction. To reinforce this point, apps like Google Maps and Waze always direct us to travel down Artesian Street towards Lacy Street, even though we live closer to Pasadena Avenue. If anyone thinks that people will avoid the street their driveway lets out onto, and the one their maps program tells them to use, they are mistaken.

This proposal invites significant danger to pedestrians. There is a middle school directly across the street from this proposed project. There is also an elementary school which is accessed from our side of the 110 by a pedestrian walkway at the corner of Artesian and Ave 33, right at the railroad crossing. Furthermore, the developer suggests that most of the building's tenants won't have cars, and will be attracted to the property based on its proximity to the Metro.

Supposing this is true, hundreds of tenants would share Artesian St with cars to walk down this same small 14-ft wide one-way street which has no sidewalk, and no room for a sidewalk, in order to access the Lincoln/Cypress Metro station. This is a huge oversight on the part of the planners, and really it boggles my mind that this proposal has even been made. It puts us and our neighbors, existing businesses, and remarkably this project's tenants at risk.

This project raises other concerns, also. I know that there is long-standing documented soil and groundwater pollution of petroleum and VOC's on the property sandwiched between this proposed project and the Arroyo Secco River. Obviously, there is no underground fence to prevent polluted groundwater from moving across property lines. This project proposes excavating a two-story underground parking lot. Pinyon proposes using the polluted site as a staging ground for this construction. There is a middle school 50 feet away from this project. The representatives for Pinyon displayed no knowledge of this pollution at the Council meeting, and offered no concrete ways to show that this wouldn't pose a harm to the neighborhood or hundreds of schoolchildren across the street. Isn't it our shared responsibility to protect the health of hundreds of children who will spend eight hours a day across the street from this project?

I've looked at the environmental review for this project, and it was conducted for a different proposal entirely several years ago. That review was for far fewer residential units, with more parking spaces than units, putting less strain on surrounding infrastructure. It calls for a different layout of the buildings. It calls for a one-story underground parking lot, not a two-story one. It calls for preserving a historical brick building on the property. It also makes no specific reference to the ground pollution. It's important that a new environmental review be conducted that looks at this developer's new proposed use of the site, and that considers the health and safety concerns that the surrounding neighbors have been unanimous in voicing.

I understand that this project has been slated for expedited review, and that a public hearing is not scheduled. However, I'm also aware that a public review is required if the proposal raises controversy in the community. This proposal has raised significant controversy. There is a growing frustration, and many neighbors have expressed their anger that City Planning is not listening to us, and taking into account our basic health and safety concerns. Local businesses have expressed worry that Pinyon is dumping this major project in our neighborhood without providing the infrastructure to support concievably as many as 800 new residents. Luxury Apartments Ave 34

1 message

Jack Ruley <jack@bigbadsoundla.com> Wed, Apr 29, 2020 at 1:13 PM
To: michelle.carter@lacity.org

Dear Ms. Carter,

As a business and property owner in the Lincoln Heights community, I am writing to express my concern regarding a proposed luxury apartment development on W Avenue 34.

As the project was proposed, the insufficient parking would be solved by new residents taking the nearby metro. In reality, the number of people taking the metro is dramatically fewer than what would have any impact on the massive parking shortage this development would create. There are currently residents and commercial businesses using the 217 total parking spaces within a half mile radius. In those currently available parking spaces street cleaning occurs two times per week on all streets, which significantly affects the availability of these spots. As metro ridership continues to decrease there is absolutely no explanation for the detriment this proposed development would have on the surrounding community, which includes both residential properties as well as commercial properties. Local businesses rely on having available parking for clients and customers — decreasing the amount of available parking would severely debilitate our businesses and end up completely driving us out of our own community. The suggestion that this building will be one of the most successful attempt at increasing Metro ridership without even having a usable sidewalk is preposterous.

Street cleaning occurs twice a week meaning: two nights a week there are only half of the 217 parking spots available, greatly increasing the need to park further away, and leading pedestrians with no sidewalks to use safely to get back home. For instance, parking is already so difficult on Ave 33, one of our neighbors has to park his car in the driveway of another neighbor because there are no spots available to him on the street. Even if this is the most successful attempt at increasing Metro ridership in Los Angeles, the building will take every single one of the spots that are currently being used. These 217 parking spots are not available, they are already being used.

The project's proposed entrance on W Avenue 34 and Artesian Street is dangerous and irresponsible because Artesian Street is a narrow, one-way street with no sidewalks. There are already drivers constantly driving the wrong way and pedestrians with no sidewalks to use safely on Artesian St. Additionally, there is no traffic light on Avenue 34 and Pasadena Avenue, making left turns difficult and causing traffic congestion in that area — especially during rush hour, morning and evening commutes.)

There are two elementary schools in the area: Hillside Elementary and Loreto Elementary. The community is concerned this construction will have a negative impact on the young students' health and their ability to learn. Between the disruptive noise, dust, debris, and increased traffic it is objectively clear this project would do a disservice to the children of our community. They deserve a safe, healthy, environment to learn in just as much as the children in any school in the LA Unified School District.

Overall the community is concerned about the proposed project. Unfortunately, most luxury apartments are built and end up with very few affordable units. A structure like this does not fit with the existing, established homes and buildings in this neighborhood. It would be a, rightfully, unwelcome addition to a neighborhood.

141 W Avenue 34 Proposed Project RE: DIR-2019-6048-TOC-SPR-WDI

Violeta Martinez <vmartinez4599@gmail.com> Mon, Apr 27, 2020 at 9:22 AM
To: michelle.carter@lacity.org, phillip.bazan@lacity.org, jose.a.rodriguez@lacity.org, gilbert.cedillo@lacity.org, nicole.sanchez@lacity.org, wes.pringle@lacity.org
Cc: Patty Camacho <Machocamacho73@yahoo.com>, "to: Adam Moskowitz" <a@moskowitzbayse.com>, Anthony Lepore <lepore123@gmail.com>, David Barrios <davidzorro9999@gmail.com>, Erin Trefry <eetrefry@hotmail.com>, Amanda Ross-Ho <amanda@amandarossho.com>, Michael Hayden <michaelhenryhayden@gmail.com>, Phil Wagner <philwagner@gmail.com>, Erik Frydenborg <efrydenborg@gmail.com>, 100bisbolero@gmail.com, rwlarsen.lhnc@gmail.com

Good Morning,

As nearby property owners, we have multiple concerns regarding the above proposed Residential Complex. It is a common fact that construction of any type increases traffic flow, noise levels, dust, dirt and general safety issues.

Our current parking situation meets the needs of surrounding homeowners but as you can imagine that will change if we have to accommodate large construction vehicles such as: bull dozers, dump trucks, backhoes and workers personal vehicles. There is no overnight parking and twice a week the street cleaning makes parking difficult. A lengthy construction project creates unwanted inconveniences of those living close by.

It is pretty obvious that this residential complex will NOT have ample parking to accommodate so many residents. With only a little over 300 parking spaces and almost 500 new units, there is no question, it will create more parking issues for us.

Another concern of ours is this crazy idea to have a proposed entrance to this large complex on W. Avenue 34. Traffic traveling down Artesian Street (one-way) and towards Pasadena Ave. (no traffic light) will create a traffic nightmare for those making a left-hand turn onto Pasadena.

As a parent, we are even more concerned with the safety of the children traveling to and from the local Elementary schools located less than a mile from the proposed site. I will have 2 of my children walking to and from school on a daily basis and we are very worried for the overall pedestrian and student safety with the increase of vehicles, construction supplies and workers. The noise factor alone is annoying to local homeowners and often distract children at school. Increased dirt and dust pose a health issue for children and homeowners.

In summary, we strongly feel that such a large complex will overtake the current neighborhood. To share our small neighborhood with almost 500 new residents will create unwanted concerns with traffic, noise, health and safety issues for us and children.

Sincerely,

The Martinez Family

151 Av 34 TOC and Lincoln Heights

Richard Larsen <rwlarsen.lhnc@gmail.com> Mon, Apr 27, 2020 at 1:28 PM
To: Michelle Carter <michelle.carter@lacity.org>

Hello Michelle,

Thank you for responding. Yes, I realize that is a different site plan, that was my hoped-for point, that the MND was created on the basis of a previous project, not the one currently being reviewed. So the objective I am looking for is a new MND based on the current project, not a vaguely delineated one from three years ago. The MND for that previous project does not take into consideration the size and scope of the current project as shown on the drawings dated October 2, 2019. Are these the current drawings you are reviewing or is there a newer submission

Some of the solutions I am looking for are:

This project does not comply with the Framework or the TOC Guidelines submitted by our Councilman and the Addendum approved by the City Council, May 22nd of last year. Please see attached document and the highlights indicated.

While the project will provide 66 needed ELI units, it fails to achieve safety objectives that are objectively overlooked where this project intersects our residential community. I'm referring to the egress point on Av 34, it's likely outlet at Av 33, and Artesian Street is problematic. This road is really an alley, it does not qualify as a Mobility Plan element. Furthermore, it has no sidewalk or street lighting. Artesian is not a TOC-rated amenity.

This project is 16' from the Gold Line, and as such doesn't meet the safety standard for the traffic load this project will place on that intersection. Some of these obstacles are a close-by grade level rail crossing, truck docks, a very busy LA Tow yard, hundreds of school kids traverse there during normal school days, and several other TOC concerns that are clearly not included with this project.

Please review the attached Routes to School pdf from LADOT which shows the adjacent schools and the proximity to this TOC. If we ignore the detriment this egress plan will have on the safety of our school children, I'm afraid everyone associated with this project will be responsible.

It must be considered, we have to review and introduce a coordinated traffic control system which will include embedded sensors and traffic lights on Av 34, Av 33, Pasadena Avenue (both sides), Lacy Street, and at the Gold Line crossing. While it may be outside of your jurisdiction, the City Planning review will be subject to these mitigating LADOT and Metro controls. It's my understanding they were not consulted.

Pedestrian walkways and street lighting must be provided along Artesian, which has none now. We should consider camera surveillance along the freeway overpass walkway as well as coordinated safety features at the tow yard. The tow yard continues to allows recklessly speeding fully laden tow trucks down Lacy Street and Av 33. These add to the traffic load of this TOC and cannot be ignored.

Also the Friday Car Auction at this tow yard should be brought into consideration for unregulated crowds and reported increase in local crime. There should be a widened intersection at the Gold Line to mitigate the risk to pedestrian safety as well.

Restrictions must one put in place along Lacy Street as filming continues at a regular pace with Buck Design at 2630 Lacy Street. The majority of the street is often blocked off and egress to Av 33 is severely impaired to the point that some days the only local access is at Av 26 and Humboldt. Lacy Street is closed off on such occasions, and that will impact this TOC, creating excessive local traffic.

Local Businesses that have truck docks on Artesian will be negatively affected as well as the open air market that has been improvised at Av 26 Tacos. On any given early evening there are at least 200 cars on Artesian with 400 people. It is

currently unregulated yet us a traffic nightmare all it's own. It's hard to imagine LAFD access to any building around there should they be needed.

If these recommendations are not implemented, the local government bodies will find the project non-conforming and a significant danger to our community.

Some questions on the documents from the developer, the design calls for excavating 16 to 22 feet below grade, are there any soil borings or toxicology reports that you are aware of? The adjacent site is owned by Cyril W. Welchs and shows a public utility easement quitclaimed on February 2, 1979. APN 5205-004-010. The site plan appears to have an underground pipe trench containing 4 pipes traversing the site north to south. This trench will be affected according to the plan. Is there any information on that? Are there any SCAQMD documents that have been presented or reviewed by City Planning? The site was used by an industrial cleaner. Should there be a local hearing on this excavation issue?

I applaud the developer for making changes to the prior plan, the project footprint was reduced, however the .5 parking space per unit impacts the local community severely. I have received many complaints from my community that this TOC, while providing affordable units, will be a impediment to parking locally.

I trust you will get back to me on these questions and let's see what we can do to make this a better project. It is among the first of many TOC's that will create new and challenging issues to my community. I'd like to give them an opportunity to weigh in. A public hearing on this project should be part of that process. Otherwise it looks like these approvals happen behind closed doors and ignore those who are affected the most.

best regards,

Richard W Larsen
Lincoln Heights Neighborhood Council

Please hold on before approving this TOC as there are a few issues we discussed that City Planning should consider. I've also been working with Martin Reyes of LA County. There is a lot going on right now that you may be aware of.
>
> While you are reviewing the City aspect and requirements, I reached out to Nicole Sanchez regarding the Framework. We have somethings to discuss. This is also not a County concern per se, but locally we only need to go a half block and encounter a transportation issue as well as commercial and job opportunities that may be missed. Do you know if or when the Framework will be updated?
>
> The original project claimed to be mixed use, but if you look at the ground plane, the site plan below, there was no way for that project to actually work. The interior vehicular access was sketchy in my opinion. There was not a complete picture, there were many omissions and flaws to it. In fact I believe their egress plan was to use the SCAQMD lot next door. The MND should be reassessed for this project, there is little to compare with this new TOC, even the designation mixed-use is not appropriate for the original project, in my opinion.
>
> I am meeting shortly with Russell Hasan, Eduardo Hermosa, and Nader Asmar to get their input on the new TOC. I thought Jacqui Swartz and her team did a great job on Figueroa, and am continuing the conversation, so please hold off before we have a chance to weigh in on this. There are several issues that endanger our community, issues that can be addressed and solutions sought for. But if City Planning green lights this project there will be no opportunity for our community to resolve the transportation and safety issues that are clearly evident with this project.
>
> Have you heard anything from Phillip Bazan? I want to say how much I appreciate your work on this project, it could be a very good one for Lincoln Heights if was can work out these transportation and safety issues. Please keep me posted on any process that would allow this project to be approved without input from our Council.

Subject: 141 W Avenue 34 Proposed Project

Good afternoon Michelle,

As a Lincoln Heights community member and a property owner across the street from the proposed project at 141 W. Avenue 34, I would like to express my concerns regarding the multitude of safety and environmental complications for the community in which this development is proposed.

Re:

- DIR-2019-6048-TOC-SPR-WDI
- ENV-2016-273-MND-REC1

The project has several addresses in 90031:

- 141 W Avenue 34
- 151 W Avenue 34
- 3401 Pasadena Avenue

Attachments:

- **Parking Study** for Surrounding area of proposed project
- **Northeast Community Plan Monitoring** (pages II-5 and II-6) which states “The Plan has been prepared to depict appropriate long term land uses on the basis of information and policies at the time of adoption. The Plan takes cognizance of the 2010 SCAG population, unemployment, and housing forecasts. However, the Plan depicts residential densities and commercial and industrial intensities designed to limit development because of existing shortfalls in needed infrastructure and services and in anticipated delays in providing them.

Parking:

- 313 total parking spaces for 468 units (233) and 40,000 sq ft (80) of creative office/commercial space
- Within a half mile radius of the project, there are a total of 211 parking spaces. I walked each street and counted spaces based on average vehicles parked correctly:
    - W Avenue 34 = 33
    - W. Avenue 33 = 35
    - E. Avenue 33 = 28
    - Pasadena Ave (between Ave. 35 and Ave. 33) = 61
    - Pasadena Ave (between Ave. 31 and Ave. 33) = 27
    - E. Avenue 35 = 27
- Street cleaning on every street listed above, twice a week
- No overnight parking on nearby Humboldt and Artesian Streets
- Local businesses will also be affected by lack of parking

Traffic:

- Vehicles entering and exiting the only point of access to the entire development on W Ave. 34/ Artesian St.
    - Artesian St. is a one-way, narrow (14ft) street with no sidewalks and poor lighting
- No street light on Pasadena Ave and Ave. 34 making a left turn on/off Pasadena Ave extremely challenging, especially during peak traffic hours

Loreto Elementary and Hillside Elementary Schools:

- Pedestrian safety concerns along school walking routes with increased traffic
- Impact of construction on student health (dust and debris) and student learning (noise)

Environmental:

- Adjacent lot: former site of Welch's, an industrial cleaning facility where industrial uniforms were dry cleaned. If proposed development is providing subterranean parking, excavation may disturb the organic chemicals that were dumped on the site for years

We ask that you keep the community informed of any updates to this project and prioritize the voice and concerns of those who will be severely impacted by such an over-development to this area.

Thank you for your time and consideration.

Patricia Camacho

Dear Michelle,

I write in solidarity with our neighbors and the larger Lincoln Heights community to express my deep concern regarding the proposed plan for 141 Avenue 34. We run a small business on Pasadena Avenue and Ave 34 (with our main entrance on Avenue 34), which has already been impacted by the economically crushing events of Covid-19 in the last two months.

In reviewing the proposal, I am compelled to voice my strong concerns about the insufficient plans for a singular point of egress on Avenue 34 and Artesian avenue, which is already narrow and limited. This plan as devised proves to create both a potentially dangerous and overwhelming traffic scenario within the narrow confines of a residential street. I am also deeply concerned about the impact on street parking that this project proposes, with almost 500 units being serviced by just over 300 parking spots. The obvious overflow this would create stands to dramatically disenfranchise surrounding businesses and residents from reasonable access to their long time homes.

Finally, I have very serious concern about the environmental issues associated with the site slated for the parking structure for the development. This is an issue that requires due diligence and rigorous attention. Proceeding with approval of this project without conducting a thorough investigation, soil tests, and exploratory research about the potential dangers and long term impacts on the environment and health of surrounding residents would be reckless, willfully negligent, and to my mind, unlawful.

I am invested in Lincoln Heights as one of Los Angeles' most precious, vital and historically relevant neighborhoods. Its residents have already suffered a significant blow by the events of this current pandemic, and this project stands to endanger their livelihoods and daily experience even further. The site of the proposal is flanked by generations of long time residents, small businesses, schools, and a vibrant community of residents. It is a moral and ethical responsibility to consider the welfare and best interest of the community. Please allow a forum for the community's concerns to be heard, and investigate and disclose the results of this research prior to approval.

Thank you for your time and consideration.

To: michelle.carter@lacity.org

Hi Michelle,

I am a building owner on Avenue 34 and concerned about the parking and traffic problems that will arise with the project. There is only 311 parking spaces for 468 units and 12 retail stores. Also the entrance to the building is a narrow one way street for all the cars. Please let me know if there are any updates about the project.

Thank You,
Joe Lepore

Hello Michelle,

I hope that you're staying healthy during this difficult period. I'm writing to voice my concern regarding a proposed project adjacent to our small business, located at Avenue 34 and Pasadena Ave in Lincoln Heights. Members of our community are struggling for economic survival during the pandemic crisis, and we fear that there are numerous inevitable complications of this project that would further impact the safety and security of neighborhood residents and workers.

In particular, I am deeply troubled by the potential environmental hazards that this project will entail. Longstanding issues with ground contamination on the adjoining property have resulted in that lot's longtime vacancy; in my understanding, the development of an underground parking structure here would result in extensive excavation of this dangerously compromised soil. Thorough environmental testing and further studies of the potential health impacts of this construction are absolutely critical, and mitigating danger to surrounding occupants must be considered.

Further, the proposed plan provides insufficient solutions for the dramatic increase in traffic that would result from the singular point of access to the development at Avenue 34 and Artesian Avenue. As proposed, nearly 500 new units would be serviced by just over 300 parking spaces, meaning that the surrounding streets will likely be inundated with an overflow of vehicles that will create complications for existing residents in regards to parking and access to their homes and businesses.

Our commitment to our neighbors and our community requires that we more carefully and meaningfully account for the needs and concerns of its most hardworking and vulnerable members. Please help us honor this position via an open and transparent process that elevates the voices of our current residents, and with a more exhaustive examination of the potentially disruptive aspects of the project. Thank you for your time.

141 W Avenue 34 Proposed Project

1 message

Phil Wagner <philmwagner@gmail.com> Thu, Apr 23, 2020 at 2:16 PM
To: michelle.carter@lacity.org

Dear Ms. Carter,

As a small business owner and operator on West Avenue 34, I am adamantly opposed to the current proposal for construction and development at 141 West Avenue 34.

The plan threatens the infrastructure of the neighborhood from a socio-economic perspective and contradicts the outlined intentions to accommodate metro riders. The number of housing units in the plan far exceed the number of reasonable parking opportunities and will compromise day to day business.

A shortage of underground parking units will cause massive overflow and will jeopardize our neighborhood and businesses.

Thank you,
Phil Wagner

141 W Avenue 34 Proposed Project

1 message

Michael Henry Hayden <michaelhenryhayden@gmail.com> Thu, Apr 23, 2020 at 9:19 AM
To: michelle.carter@lacity.org

Hello Michelle,

I'm writing to express my concern at a proposed project in my neighborhood. I recently went to a meeting of the Lincoln Heights neighborhood council, where a developer presented a proposal for a massive new development on W Avenue 34.

I understand that this project is supposed to have 486 residential units, but only 311 parking spots, and many of those spots would be reserved for additional commercial units in the building. This is a short block, bordered on one side by Pasadena Avenue, where parking is restricted, on another side by the metro tracks, and on another by a vacant lot. That means that if this project were to include the number of units they are proposing, our street and all the surrounding streets would be overwhelmed by the tenants of these new buildings. It's conceivable that as many as 700 cars would be entering and exiting this building every day.

There is only one point of access to this entire project, and it is on my street. W Avenue 34 is a narrow street, with a one-way only outlet on Artesian St, which is an unusually narrow street, with a blind corner, and no sidewalks, right next to a railroad crossing. This seems to be inviting an uncomfortable level of danger to this block. I'm attaching a photo of this street below.

There are other concerns we have as well. The lot directly next to this proposed project has been vacant for years due to dangerous ground contamination. This developer plans to dig a multistory underground parking lot right next to this site. I asked about the environmental risks and impact at the meeting, but the developer couldn't articulate anything regarding this, which leaves me very disturbed, as I live directly across the street from this proposed construction.

Will there be further opportunities for the community to voice their concerns about this project before it is approved? It seems to need a lot of reconsideration before it can proceed in a way that won't invite environmental harm, increase traffic dangers, and contribute to congestion on the streets.

Thank you for listening to my concerns.
Sincerely,
Michael Hayden

151 Av 34 TOC and Lincoln Heights

Richard Larsen <rwlarsen.lhnc@gmail.com> Tue, Apr 14, 2020 at 3:04 PM
To: michelle.carter@lacity.org, phillip.bazan@lacity.org

Hello Michelle and Phillip,

The local community is expressing concern with this project, DIR-2019-6048-TOC-SPR-WDI. I understand you are near completing the entitlement, and I wanted you to know I believe it deserves a deeper review.

The main issues with the project revolve around transportation and parking. The project brings 468 market rate units, including 66 need low income units. The project appears to have approximately 468 parking spaces, is that correct?

The project's main egress in on Ave 34 at Artesian, a small one way unlit no-sidewalk paved alley. Most of the occupants and businesses will use this alley as it is the most direct way to get to freeways a block away. It would all make sense if someone addressed the impact this project will have on my community.

I am not pro or anti development, as Chair of the Planning and Land Use committee, I have approved many large scale developments with minor changes. However this project is within 100 feet of a Gold Line crossing and adjacent to a SCAQMD site. The applicant is using a prior reviewed MD which was for a much different development, and frankly I don't see how that is policy when the scope has been changed to a TOC. This needs a new MD addressing the scope and scale of this project.

Finally I am reaching out to other agencies to see what we can do to mitigate the impact on transportation. The Framework has not been updated in years and I feel few at Planning are aware of the larger issues, like our adjoining neighborhood's density and height limits.

Site planning on this project needs special attention .Were ancillary structures, service areas, pedestrian walkways, vehicular paths, loading areas, drop-off and pick-up areas considered? I don't see it on the plan. How would the neighboring areas access this site plan?

Is there any adjacent commercial or industrial designations from public streets or parking areas addressed? These TOC's could be a wonderful opportunity to include pedestrian access, mitigated traffic at the nearby Gold Line station, and allow a community based commercial area to co-develop and provide needed jobs for our community.

Please delay approving any Entitlements until I can discuss this with you. I am having difficulty with many issues on this project, however I'd like to solve them with you soon.

best regards,

Richard W Larsen
Lincoln Heights Neighborhood Council

michael montes	90031	fast tracked approval without community input
Albert Salazar	90031	It will displace others in my community
Mitra Khayyam	90031	The nearby streets cannot handle the traffic from so many new units and residents.
Salar Rajabnik	90031	This project is totally blind to the needs & means of the community & seeks to alienate this who already live here & replace them enticed gentrifiers. There has not been transparency around the process, nor input from within
Christopher Morales	90031	Councilmember Cedillo has consistently failed to listen to and accept community input for his developmental projects, which is unethical and wrong.
Erika Gallo	90031	OPPOSE. You already destroyed our city, don't destroy Lincoln Heights!
Jorge Garcia	90032	No community input!
Paulina Pierce	90031	The city has been engaged in nefarious negotiations with developers and those investigations need to be complete before allowing large tracts of our community to be given away to developers to create luxury housing that w
Jon Price	90031	We deserve to have a fair opportunity to weigh in on this project!!! Please let me know what we can do to help.
Kim Henderson	90013	Need more information on both sides to decide
Naomi Gonzalez	91801	Unaffordable housing, more traffic and displacement of people as well as where will the displaced people afford to live?
CALEB lyons	90026	Community first!!! We need transparency and answers!
Hector Rodriguez	91802	Don't do it
Santos Vasquez	90012	Affordable Housing is the answer for Lincoln Heights - NO TO UNAFFORDABLE GENTRIFICATION!!!
Mariela	90031	We don't need more luxurious apartments we need low cost apartments
Ish Ness	90042	More traffic, not enough parking for tenants, and not affordable housing.
Zulibeth Inda-Lara	90031	I've been living in Lincoln Heights since 1979. Everything has disappeared, our Heritage, our people. Rent increases have spiked up tremendously due to new constructions by of Luxury buildings around our community. The
Amanda R Ross-Ho	90031	I am a small business owner near the corner of Pasadena and 34. This giant, bloated development is a threat to the historically vital and vibrant community of Lincoln Heights, and its long standing residents. The project has
Max Maslansky	90031	It will displace local residents and undermine working families.
Vanessa Carrasco	90031	
Matt R	90031	We don't need luxury condos in Lincoln Heights. It will drive up prices and make the neighborhood unaffordable for current residents and bring in people who don't respect this history of the neighborhood or the community.
Daphne Trr	90031	The neighborhood does not need luxury condos; this is going to negatively impact the community and cause the cost of living to increase. To pursue this sort of build without public input is a seedy move by Cedillo and the P
Celeste	90031	Will cause too much congestion and take away from the community
Kevin Break	90031	it's too large
Jherika Martin	90031	I oppose this project because there is already a heavy push to gentrify, which doesn't take into consideration the people and community already living there. Bringing in a new complex will create hardship on the already exist
Vanessa	90031	
Michael Nunez	90031	It will create parking worst for people who live in apartments.
Maria Delgadillo	90031	No community input or involvement. Poor planning regarding parking and actual needs of the community
Linda Wobbe	90031	Dangerous precedent not to hold hearings and respond to community input.
Emily chang	90031	
Angelina Nieto-Rod	90031	It will displace current residents
Melany Guzman	90031	It is unethical to create luxury apartments in a neighborhood where the majority of renter's only make a yearly income of around $30,5000.
Erika Gallo	90031	I oppose this project.
Adam Cooper	90031	Lincoln Heights is a historic neighborhood that has survived gentrification and real estate exploitation.
Rubi Gomez	90031	The type of gentrification Gio Cedillo insists on bringing into our neighborhoods will not be tolerated. Gil Cedillo, you have failed to provide affordable housing to your existing constituents and safe guard them against homele
Darla	90031	This does not help the citizens of Lincoln Heights. I along with 30,000 residents have been living here for over ten years. We have watched neighboring towns go through this same process and become gentrified, causes the
Lena	90031	Its unethical and all about greed. this isnt uplifting the community, its pushing out hardworking people. did you forget your background Cedillo. dont go against your people. we put you in this position and we can gladly remo
Elida	90031	we are demanding answers we do not need this luxury Appartments inflating rent and cost of living
leslie olmos	90031	We need low income housing, that is priority!
Sandra H.	90031	This many units in this historically residential neighborhood will transform our community into another hip urban wasteland where traffic, congestion, and the added density (468 units, meaning at least another 1,500 people fi
Sarah Esther Marie	90031	Luxury apartments shouldn't be made when our current renters are being forced out of their communities.
Pamela morales	90065	I oppose the project because it will not be affordable and will only displace many people from the community. I oppose the project because it will also add to the gentrification that has been going on with the hard working cla
Katharine Pinney	90031	Oversized, overpriced, will cause tremendous traffic, does not fit into the architecture of historic community, and bare minimum affordable units. We don't need architecturally lazy market rate apartments. We need affordable,
Andrea Pena	90031	I don't support displacing a community or people
Iris Lizeth Casarrub	90031	
Magali Hernandez	90031	I am against gentrification in our community.
Anahi	90023	
Catalina Bolivar	90042	It will displace many families and community members.
Juliet Matamoros	90042	As a POC I do not support this because in specific I have seen many minorities kicked out of low income neighborhoods. While others call it investing in a neighborhood, I call it gentrification. This is also causing numbers to
elix	90031	I personally think it would displace and destroy the current community.
Ric	90031	I don't want to see my neighbors displaced for more unaffordable housing.
Ric	90031	I don't want to see my neighbors displaced for more unaffordable housing.
Shannon	91205	Oppose
Sarah riojas	90031	Because it will change our city forever and cause a chain reaction kicking out the families of Lincoln Heights
Wilson Ho	90031	We are in the middle of a pandemic. Most of the residents in Lincoln Heights are not being employed due to HEALTH concerns due to our incompetent leadership running in this country. Some who are undocumented cannot
Maria A	90032	Our affordable housing stock will be seized by flippers and investors and lifelong residents will be permanenty displaced or houseless.
Alexis Meraz Garcia	90031	We need more affordable housing in the area and housing/business that serve and can be afforded by the community.
Salar Rajabnik	90031	This project threatens the wellbeing of the working class families & individuals who make up Lincoln Heights. Our well being & shelter must not be sacrificed for another predatory gentrification project.

Brody Albert	90031	Does not consider the historic Lincoln Heights community. Will eventually displace economically vulnerable tenants. No gentrification! We need low income housing.
Danielle Salazar	90031	it promotes gentrification and the removal of current low income residents. It does not benefit the community, only the councilman.
Frank Prieto	90042	Quality of life. Adding units will undoubtedly add to traffic. Along with market rates that will only turn the community into a business rather than social construct built around families and pillars of American ideals and principle
Vicki Aguilar	90032	Because low income families were evicted for overpriced housing that is marketed towards affluent people not from this neighborhood. We need more affordable housing for families that are long time residents of Los Angele
Iris Casarrubias	90031	
Robert Nichols	90027	I support low income and public housing in Los Angeles.
Khalilah	90031	We need to protect and preserve the community of Lincoln heights
Andrea Villanueva	90031	The people and families of Lincoln Heights deserve transparency about gentrification that is happening in our neighborhoods. We have the right to voice our concerns and fight back. We have a voice
Alexis Meraz garcia	90031	We need more affordable and secure housing for Lincoln Heights. Luxury apartments and developments threaten the livelihood of long time residents who are struggling to remain in the area. I firmly say no to the gentrificatio
Brenda Albarran	90031	Because we are all a community and we should empower one another!!
Mandy Almendra	90031	Not needed for Lincoln Heights due to the already overcrowded neighborhood
Matthew Cardoza	90031	I have multiple reasons for opposing this project , but the one that sticks in my craw is this! What's with all the shiestyness that surrounds almost all of the current building project in this area. How come poeple (residents) are
Maria Delgadillo	90031	No community input
Jose Salazar	90031	Because there is no respect for the community's opinions or needs
Zulibeth Inda-Lara	90031	I'm a struggling single parent of 3 minors, whom resides 2 blocks from the new plan development. My rent will increase dramatically and most likely I will need to relocate and loose my home. Please reconsider
Hector and	91802	Because we don't need need them
veronica villa	90031	We already have to much people here don't need anymore and we want to keep our community at our at offerdable price we could offer with those luxuries appt. I bet the prices are gonna go up
Alina Infante	90031	Affordable housing is at stake
Dawn Montanez	91732	oppose GENTRIFICATION
Karina g	90031	We dont need more apartments or more ppl in the city ,so many ppl losing there jobs!! put something better that will benefit the city...
Patricia vidaurri	90031	it is too crowded no parking and it will probably be to expensive and low income housing
Allegra Padilla	90029	Lincoln Heights and LA need affordable housing not unaffordable luxury units. Stop gentirifying our amazing city especially as we face a pandemic.
Taily Pulido	90022	I moved out of Lincoln Heights because I could no longer afford to live there but my church is still there. The community is in need of affordable housing, not more luxury housing that will displace more people. This displacem
Brenda Valentin	90031	Our community needs more affordable housing for our residents. Not a luxury high rise apartment.
Eric Sunada	91801	This is gentrification at its worst
Mojica Martinez	90031	I've live in Lincoln heights for 40yrs , all my life. I don't want our community to change like that. Our people won't be able to afford those appartments and our rent will increase.
Francisco cortez	90031	It will affect low income families
Juliana Aguirre	90031	Community don't need luxury apartments
Pako	90031	Not benefiting the local population
Eduardo Castillo	90042	I will have to face increased traffic on my way to work. This will also fuel gentrification which will in turn fuel the homeless crisis in Los Angeles.
Cary cronenwett	90031	Itvis a threat to the community
Dania Gomez	90031	Higher prices in a low income neighborhood pushes natives out and gentrification
Anthony bin	90031	There is not enough parking in the area as it is.
Alejandro Mondrago	90031	Although i am all for diversity i feel this is a step in the wrong direction. If anything this wpuld be a detriment to the community and its cultural integrity.
Evelyn Rojas	90032	Gentrification is hurting our hoods, they need to be stopped asap!
Jennifer	90031	It would usher in an extremely violent displacement of low income, minority residents, not restricted to just those on the current property. Not only is this ethically immoral, it would contribute to a worsened public health crisis
Rosario Escoto	90031	Lincoln Heights is already over populated. There is no parking on the streets. The cost of living is so high multiple families are forced to live together in one small home or even apartment. This will just make the situation wors
Stephanie Martinez	90031	This is my community and I don't want to see gentrification take over and displace everyone here.
Irving Mendoza	90031	Projects like these are the reasons why Lincoln Heights is becoming gentrified. I doubt that the landlords and the city are going to care what the residents of Lincoln Heights have to say.
leslie olmos	90031	we need low income housing and affordable rents for residents not new townhouses or high end apartments
Danica Campos	90031	This development will run out the very people who built the community.
Hannya Ortiz	90031	I oppose this project because it has had zero community input, I think this is a crucial part of the planning process. It is crucial that they provide more affordable housing in this area, if not the homeless crisis will only worsen.
Juan M Castro	90065	This only helps a certain kind of people
Tom Marble	90031	Not enough parking and the vehicular entrance and exit should be on Pasadena Avenue with dedicated deceleration and acceleration lanes.
Shanine Jaimes	90042	I do not want developers deciding the future of our communities without our input
Dara	90018	If and when anyone builds housing in this city it needs to be on a liberatory basis - not further gentrification.
Dalesy Sarceño	90006	Community needs more AFFORDABLE housing not market rate developments that raise rent for everyone!
Diana lai	90031	
Cindy Perez	90031	I oppose this because gentrification of neighborhoods is modern day colonization. We have no where to go. This is our home. You cannot make us leave.
Cynthia White	90031	It is insensitive in scale, it will block the light for any building across the street from it. It is completely out of proportion to the neighborhood. It reeks of bribes and dirty dealing.
Edward	90021	For the detrimental effects it will cause to the community, of which I am a part of.
Vince Caldera	90065	As a native Angeleno, the residents in Lincoln Heights are my neighbors, to see that they even have to demand this dialogue is disgusting. This conversation is necessary. This will affect so many marginalized groups of peopl
Fabiana Paredes	91101	Because any big changes to a community must be done for and with the community
Brenda Contreras	90032	City Council needs to STOP this disaster of a project from moving forward. The residents of the historic neighborhood of Lincoln Heights have legal rights and their concerns MUST be addressed. The conditions under which
Melissa Alcala	90031	The homeless crisis is a nightmare. By continuously adding more unaffordable housing the homeless crisis will grow. This is not what is needed, we need affordable housing for families and elderly. I'm tired of seeing homeles
John Mejia	90031	We don't need luxury apartments. We need affordable housing. We need Recreation Centers for children with resources that can help better their future in education and creativity.
Armando Ruiz	90031	Because it will further displace my neighborhood. It will exacerbate the homelessness crisis.
Davi de la cruz	90031	I am a long time resident of south central Los Angeles. I have temporarily moved to Lincoln Heights as I work towards saving the funds and purchasing a home in the neighborhood I was born and raised. I have noticed that h Market rate housing and no promises to preserve rent controlled housing is a threat to this right to stay in this neighborhood. I oppose this because long time residents should not be illegally evicted, or pushed out by suppos
Sarah Choung	92833	We need to stop displacing those already in the community. The LA council/government needs to reform their zoning laws so that we can continue to provide affordable housing vs continue having the current rules and regula
Yesenia Varela	90031	It is a clear indication of what City Hall members want our community to look like and it's not at all what our community represents. This is the home of hundred of working class folk who everyday care for their homes and the
Lola Gonzalez	90042	Gentrification like this is violent to a community. Especially during a pandemic.
Erica Hwang	90027	Housing is a human right. This move would take us further from guaranteeing this right by snatching away affordable housing for luxury apartments in a pandemic that disproportionately impacts lower income folks. It is not ri
Evan Jourden	90942	Not right for the neighborhood
Pooja D	90029	It is wrong, predatory and exploitative to allow housing to be ripped away for a so called market from an already disenfranchised community rooted in the area. The social cost of this greatly outweighs any benefit this real est
Aurora García-Barre	92802	Gentrification is another form of discrimination and we have to stop it! Families are being displaced, and during the pandemic especially that is significantly harmful to the wellbeing of our communities. We must value people
Araceli Hernandez	91345-3	We need affordable housing and housing for the homeless. This will cause more displacement.
Michael Stoltz	90031	This project will dramatically affect my neighborhood displacing many long time residents and shifting the makeup of Lincoln Heights.
Jackie Rodriguez	92869	Because this is a threat to our health and well being, gentrification is violence!!
Bri	90031	I am against Gentrifying the area because will lead to pushing hardworking families who can't afford expensive rent. Gentrification is part of systematic racism. By building you will be pushing Latinos out of their community.
Eric	90033	Having this kind of development will be detrimental to the current long time residents of LINCOLN HEIGHTS and it's neighbors like myself. This will displace even more residents as it will add to the already growing gentrificat
Jamie	90031	Lincoln heights is being gentrified and the people who have lived there are being pushed out those communities and that's not fair to them.
Sarah Kim	90007	I don't want people to be displaced.
Saul Soto	90023	GENTRIFICATION IS VIOLENCE
Christine Martinez	90031	Because gentrification is genocide
Jenny Lin	90034	Why are we building more UNAFFORDABLE housing during a HOUSING CRISIS?!? But we all know the answer to that question... this development is about PROFIT, not PEOPLE, and this development's going to look good MAKE IT 100% TRULY AFFORDABLE OR GET OUT.
Maia Schall	90068	That is ugly as hell and does not meet the needs nor the aesthetic of the neighborhood.
Tiffanie Lanmon	90065	As a member of this community, I see everyday the people this would most disproportionately impact - this is NOT a good solution for affordable, inclusive housing. Our neighborhood and the people that built it deserve more
Jordan Kolesnik	90031	We need affordable housing, not luxury development in 90031, as well as rent control along commercial corridors to protect local small businesses. The condominium project will facilitate the erasure and displacement of the

Yenny		I'm opposing this project because families will be displaced who will inherently become homeless. Once these ugly buildings go up everyone forgets about the families who are struggling to pay rent in this pandemic and rais
Miguel Perez Guzma	90032	Fuck the rich. They cannot continue their systematic erasure of people ESPECIALLY during a pandemic. If it isn't beneficial to my neighbors and myself then it doesn't belong in my community.
Sonia garcia	90063	This development is a direct threat to the community and ushers in immediate displacement of POC and family's. Stay the fuck out of north east la and east la!
Rhys Ernst	90031	Lincoln Heights neighborhood council was bypassed and never approved the project.
Michael flores	90031	It will cause a lot of despair for low income families
Fernando	90031	
Eduardo Castillo	90042	Stop fast tracking luxury developments! Gentrification has lead to only suffering for those who are not profiting from it. We need low income housing more than ever, not luxury condos.
Guadalupe Garcia	90031	If the city continues to build expensive housing, we push out low-income individuals. This leads to homelessness among families, uprooting to search for affordable housing, and creates a classist divide. How can someone p
Jennifer Mendoza	91030	I was born & raised in Lincoln Heights. I worked in the area & seen first hand that this is not going to be an afforded living place for the people living in the area. People already can barely afford the cost of living as it is. This
Maria Mejia	90031	I oppose this project because it will further exacerbate the parking issues in the community by bringing in a large influx of people.
Jesus Becerra	90031	No Blue Collar job with decent pay would be able to afford housing in this area. MIDDLE CLASS are under attack and this Project proves it!
Julianna Avila	90031	We need to help our community grow not by luxury apartments but instead through helping our residents survive this pandemic. There are elder people being kicked out of their homes and are outside of grocery stores beggi
Brian Kupillas	90068	It lacks proper standards for cultural integration in addition to community outreach. It will not be for those living in Lincoln Heights, but for those wanting to replace the population with a new demographic.
Jose Munoz	90063	Unfair to the local community and the people that grew up there
Katharine Pinney	90031	Oversized (will bring more traffic and there is already a large amount to Pasadena Avenue), market rate units when rents here for working class already very hard to meet, predict bottom store front units will be empty just like
Ghazal Hashemi	90042	I support the working class community of Lincoln Heights & their right to fair and affordable housing. Community input is essential!
Sonia Rivera	90031	Too much traffic already, hard to find parking on the streets. we do not need another apartment complex this large especially with Covid 19 too many people to social distance.
Shervin Ravan	90039	Human decency
Andrew Zacarias	90031	I oppose this project cause it's going to affect the community with more trouble it's going to shut down our local businesses that have been here for years ! It's going to raise rents on people mostly hard working families that
Javier Garcia	90031	The community is overcrowded and if we are going to build something it should be affordable to the people of the exit community.
Anna Su	90042	I think this development displaced residents who have lived in the neighborhood for long term. The scale of the project is too large, disruptive and changes the face of the community in a negative way.
Rosa Castañeda	90031	This apartment complex will continue to hurt the people of LH and further displace families. This project will bring more affluent outsiders while it fails to address any substantial, serious concern or action that will help secure
Sara Flores	90031	I oppose the project because it does not benefit the community. Rent is expensive as is, and this project will only make low income families less likely to afford to stay in the area.
Tanya Bertone	90026	Luxury apartments will only raise the rent in a working class neighborhood like Lincoln Heights. These do nothing to benefit the community
Melissa C	90031	86% unaffordable. Whats the point? Were all a small low income community & your bringing a whole apartment complex that's unaffordable. Theres no point
Taylor Robinson	90027	These developments are ruining our communities. Not to mention it's a heinous monstrosity. Please, preserve don't destroy!
Dalia	91775	
Kristofer	910001	We need affordable housing NOT overpriced housing.
Elizabeth Bagasao	91030	It's affordable housing or nothing! Gentrification is war on the poor.
Blanca Velasco	90031	It will only push out families that are already having a hard time trying to make ends meet.
Janet Marshall	91030	In South Pasadena, we also have huge RHNA numbers to meet, but the only housing that's being built is luxury housing. Our Mission/Meridian Transit Village development built in 2005 received numerous breaks because of i
Veronica Ortega	90031	We need to conserve our community & keep it affordable to the people who already live here!!!
Israel Gutierrez	90031	Because they remove the opportunity for people who have lived there for generations to have the opportunity to own property and people who come to gentrify these neighborhoods don't usually participate and exclude the
Amy Jo	90068	This area does not need luxury housing, it does not cater to the population and will displace the people who have lived there for decades
Marcus m	90039	For the safety and well being of the Working class and black and brown communities
Yesenia Moreno		The people around this neighborhood can not afford to pay $2500 for a one bedroom.
Jaime Escamilla	90031	I oppose the wrongful eviction of tenants
Jaime Escamilla	90031	I oppose the wrongful eviction of tenants
Irene Farr	90031	The development does not work to support the community and works to displace it instead. Even if the structure includes low income units, the city is not advocating for the needs of local citizens. Instead, it's giving in to th
Darla Yan	90031	This project is going to displace thousands of residents that have lived in Lincoln Heights for years, some their whole lives. We have watched this happened to surrounding neighborhoods, we will not allow it to happen here.
Jeffrey Berger	90027	Community input and Transparency in transactions are the minimum requirements. I oppose the lack of Ethics.
Sarah Ramirez	90031	This housing will not benefit the people of Lincoln Heights. This is a low income community who is already suffering from the effects of gentrification. This will only serve to further oppress and displace its people. They will fac
Arthur Hale	90031	After considering the historical impact of such projects in low income areas in the past, one can reasonably assume that this project will do nothing but financially and culturally devastate the pre existing, long standing and cu
Anthony Pérez	90031	This project is of little effort to lift up the low income people in this neighborhood who are on the verge of becoming homeless, due to a surge in rent costs in the city of L.A. This project is unaffordable to almost 90% of the pe
Megan Plunkett	90026	Because I support efforts to not let LA become a playground for the rich and their developments. The City's history can't be erased any longer. LA is for the people
Darlene Olivarez	91802	Preserve Lincoln heights. Stop the removal of affordable housing.
Suani Garcia	90032	I don't support gentrification in my neighborhood.
Monica Alcantar	90031	NO TO GENTRIFICATION!!!!!
Jeselle Gomez	90032	Stop taking housing from low income communities! Invest that wealth in the community NOT GENTRIFICATION!
Marlen	90032	GENTRIFICATION
junior amezcua	90026	fuck gentrification
Josephine	90031	Our rent will be higher
Samuel	90004	No to luxury apartments on our neighborhoods
Maria De La Cruz	90003	I oppose this project because this is not for the community's these will be use to gentrify the community and slowly push away people that been living there and it is not ok .
Viviana	91042	Projects like these leave less homes for poverty stricken families, gentrify communities, and leave less room for POCs.
Belen	93309	
Nicole Corona	90031	Gentrification has impacted low income communities of color for far too long. This new development will cause a negative domino effect on our community; it will increase property values, thus rendering low income families
Kate Stewart	90042	We need affordable and green housing. Keep people in the homes they have. Lining the pockets of developers.
Carrie Cook	90031	Too many units and not enough dedicated affordable housing
Maria Alvarado	90026	STOP GENTRIFICATION!
Alexsa Durrans	90031	This will cause displacement and harm for so many families and people who have lived in the area for generations. A resident myself I have seen and also experienced the displacement first hand. It is terrible and must stop. T
Noelia	90031	It is not fair for the residents that have been living in this community for more than 20 years. Gentrification is real and it does not benefit the low income families. These luxury projects should be built in communities where mo
Noelia	90031	It is not fair for the residents that have been living in this community for more than 20 years. Gentrification is real and it does not benefit the low income families. These luxury projects should be built in communities where mo
devika wickremesin	90031	we dont need luxury development we need community support
Anahi olivo	90023	
Diego Trujillo	90031	This will displace more long life families away no low income housing what a shame
Celista Lopez	90031	The current residents of Lincoln Heights matter! If they get evicted families will be homeless!
William Jamaica		Because it is gonna skyrocket rent and kick the working class people out thier homes
Elliot Shaffer	90065	Please preserve one of the last truly diverse neighborhoods in LA by NOT APPROVING this project. Additionally the traffic congestion brought by this project will make this area and surrounding areas more dangerous and pro
Nicholas Lowe		It displaces people and brings in outsiders to a community and disrupts the neighborhood. Los Angeles needs more affordable housing and services for the community, not more luxury condos.
Marc garcia	91803	The incoming generation of Lincoln heights residents seeking housing as they move out of their parents homes should have reasonable and affordable access to housing in the neighborhoods. This project won't tend to the n
justine robles	90039	people will loose their homes. it wont help the community and the people that already live in the community. its not right
erni walker	90031	this is gentrification at its most obvious and dangerous. it will disproportionately affect POC in our neighborhood and un-house families
Blanca	90065	This will continue to disproportionately push out the people who already live in the area
Abby Janto	90027	Will lead to overcrowded parking. Does not serve neighborhood
Jessie Licon	90022	Because there was not enough community input, they are marginalizing us people of color
Benni quintero	90002	I don't want to see more Black and brown people displaced
Karla O Juarez	90031	It's erasing our culture, and community. Pushes for more gentrification and it's allowing for displacement of our people.

Ian Byers-Gamber	90041	High rents will promote furthered gentrification, while not enough parking in the structure will have a huge impact on an already impacted neighborhood street parking situation. Los Angeles needs affordable housing NOW not luxury developments.
Angel Alvarado	90038	I stand in solidarity with those living in Lincoln Heights. The violent gentrification going on especially right now during the COVID-19 pandemic and Black Lives Matter movement is especially heinous. The people of Lincoln H
Valerie McCann	90065	
Lisa Del Castillo	90026	As a Los Angeles Native, from North East LA it is exhausting to see ugly, unaffordable housing ruin neighborhoods and push out families who were living there first. The gentrification causes extreme displacement and ruins th
Rachel Jones	90032	Gentrification is violence against the poor and working class, and a meeting is the bare minimum these developers could do to act with accountability.
Jonathan Cowie	90041	This is not serving the community and will only end up taking money out of the neighborhood and contributing to the displacement of local residents.
Alexander Kujawski	90065	The city needs to stop supporting luxury housing and start supporting low income housing. We have an extreme housing crisis in Los Angeles. The city council needs to stop making it worse by allowing luxury development
Xiomara Castillo	90041	I don’t support gentrification
J. Pena	90723	If the city really wants to fix the issues in our communities you don’t do it by using developers to bring in the desired demographic and kick out people who have been here for generations and made LH what it is. Gentrificatio
Magali	90018	Because gentrification is wrong
Kestrel Valdez	90065	We need more housing in our communities not more projects that cater to white wealthy individuals!
Clio Wilde	90042	This is a colossal waste of time and space and money and will be a massive displacement to the community
Marissa Sanchez	90810	They don’t need it there
Luke Forsyth	90031	1. Ugly and 2. Unfair planning process
Brandy	90033	Money should be going directly into the communities already present in Lincoln heights. This building will contribute to the affordable housing crisis, displacing families and uprooting/disrespecting life and culture.
Sophie Brotman	91030	This project will hike rent up in the area and displace local people who have lived in the area for a long time. This is intentional gentrification and should be stopped IMMEDIATELY.
Melanie Bellomo	90031	This project is a threat to the residents of Lincoln Heights. These apartments will fast-track the gentrification of our neighborhood, displacing countless residents, many of whom have been here their entire lives. The fabric of
Olivia	90012	I oppose the displacement of long-term tenants
Liz	90065	This is not going to help our low income population nor is it in the best interest of the community. No more gentrification
Arian Armenta	90039	Land development should not be approved without beginning a conversation with the community. Not only would this result in high rent displacing current residents, it continues to showcase the systemic flaw and selfish age
Fatima Nieto	91387	THIS IS FURTHERING THE DISPLACEMENT OF WHAT HAS EXISTED HERE FOR A LONG TIME JUST TO GENTRIFY IT WITH “LUXURY APTS”! THIS IS NOT OKAY
Gustine Fudickar	90027	Worrisome for current residents
Kathryn Sauma	90027	I have lived in Lincoln Heights and have witnessed the tight knit community. It is one the most intact communities in LA and does not need it’s streets becoming overcrowded from a huge apartment building that cannot supp
James Arriaga	90031	It’s not good for the neighborhood
Melissa Alonso	90031	It is a way to push out the working class
Marissa Soto	90032	Gentrification is the erasure of black and brown communities, the erasure or our culture and most importantly it is the erasure of fellow Angelenos like myself who call this area our home. Gentrification needs to stop or else in
Samantha Shay	90026	This means the destruction of an already important space for our community.
Christopher Garcia	90034	New Luxury Apartments will displace those affected by Novel Coronavirus job loss
Janine Alburo	90033	fuk gentrification!
	90031	I don’t want anymore gentrifiers in Lincoln heights.
Jennifer Bobadilla	90255	I oppose evictions.
Natalie Saenz	90032	
Kloe Galindo	90032	468 new apts is unnecessary!!!
Richard Ramirez Jr	90032	
Miles Brenninkmeije	90031	The city of Los Angeles is facing a housing crisis as a direct outcome of developments such as these. WE DONT NEED LUXURY UNITS WE NEED AFFORDABLE HOUSING. This is disgusting that the city is run by money fro
Gabriel	90032	
Bianca argueta	90007	Gentrification!!!
Destinee	90031	It will displace people who live in the community, it will affect the community by bringing the rich class over here to an old community and taking over
Leticia Maria Muro	90065	Lack of affordable units and increase in surface street congestion.
Joyce	90031	No to gentrification
Annabelle Quezada	90302	The wrong kind of resource into the community
Danielle	92101	More affordable housing is the key to improving California communities, NOT luxury apartments.
Victoria Pierce	90034	
Breeann Rapan		This community needs to be heard.
Elizabeth Miller	90012	It will dismantle the creative, cultural identity of Lincoln Heights
Lucas fracher	90026	This is a politically corrupt development
Alexandrea Piraino	93535	I grew Up in north east LA and lived there 33 years of my life. Due to all the luxury apartments/condos and gentrification, I was Forced to move away from my own home town last year. I am Happy to have the town uplifted a
George jackson	91744	Grew up in Lincoln heights ave 21. It’s always been a area where low income families can raise their children in a safe relatively affordable environment and it’s why the community has been able to be self sustaining with little
Gen Dur	90031	More traffic. Changing community
Alin	90032	It’s a dumb project
Paulina Amador	90065	Why are we building a “luxury” complex when are people within the community are struggling to stay in their homes and not get illegally evicted!! There was also no sort of communication about this to the people living here!
Sam	90065	There must be community input on a project this large. What needs does it serve and does it serve them for the community of Lincoln heights or for gentrifiers and profit?
Rogelio Chavez	90031	No on gentrification
Safira Patel	90033	LA city planning should be working on concrete ways to promote growth and invest in the current population and community, rather than adding 500 new LUXURY units to the community.
Shirley Guzman	90032	This building will feed into gentrification and the displacement of Lincoln Heights community members!! The community did not ask for this and we don not want it!
Anastasia	90041	This will displace many from their home town. Not good for the hood.
ian	90032	no one in the community was consulted... pushing development forward in the midst of city hall’s pay to play scandal... displacing neighbors for LUXURY APARTMENTS???? they should be ashamed
Isabella D’Agnenica	90031	Born, raised, and currently living in Lincoln Heights, I want to ensure that my neighbors and my own family are able to continue to live safely and affordably in our beloved neighborhood.
William park	90033	Build affordable housing.
Brittany	90301	In much of LA you’ll find luxury apartments but you’ll also find a large population of homeless folk. I live in Inglewood and we are battling a transition of gentrification and resident displacement. I’m signing this petition to help
Creighton Baxter	90031	Lincoln Heights deserves better than ugly condos. We deserve accessible living spaces for the workin class communities already in Lincoln Heights.
David Amaya	91754	Poor communities always get the short end of the stick or nothing at all.
Niamh	90039	
Selena Ortega	90031	This project is not geared towards helping resents reside there and there has be ZERO community input or involvement
Téa	90065	
Sadie Spezzano	90042	Further erases communities that have been continually uprooted and pushed out due to gentrification, this apt complex will hurt the community
Annabel Shabestari	90717	The lack of community involvement in decision making is unacceptable. This will greatly impact the neighborhood and current residents must be consulted.
Ken	90033	I wish to see communities of color intact. Every housing development only serves the rich and the white and is directly harmful to communities which have existed in these places for years at this point. Communities of color
Mica	90027	This displaces residents.
Ashley Kron	90031	This project is a violent affront on the long-standing communities living in Lincoln Heights. Most people have lived here for 20-30 years. My neighbors grow fruit in their yards, have dogs, raise kids. A project like this would or
Sadie	90021	This 400+ units of luxury condos will displace residents while not serving the already existing community.
Janelle Reyes	90004	Large developments of luxury apartments further the process of gentrification and displacement of the neighborhood’s native community, in this case the Lincoln Heights area. This project does not serve the Lincoln Heights
Jasmine Kuo	90024	The project will displace vulnerable populations who have called Lincoln Heights home for their entire lives especially during the pandemic. The community should be involved in the decisions made about them
Rob Scharlach	90033	Fuck gentrification
Karin Nord	90031	No more gentrification! No more displacing people.
Nicole Martins-Boyt	90026	Do not build
Lucia hajek	90031	As a resident of Lincoln Heights, this “project” is extremely unsettling. Our community is not up for grabs in this scheme to displace minorities. This is our home. We’d like to preserve the community and put a halt to further g
Reyna Colt-Lacayo	94602	
stephanie loza	90279	no more gentrification

Marlon Mara-Lenob	90032	This new building with directly harm the community of Lincoln Heights, and must have a chance to be opposed.
sam s	90065	the gentrification of working class POC dominant neighborhoods, especially during a housing crisis, will only further harm the community and those who reside within in
Jenny	90026	
Amanda	90065	Keep Lincoln heights affordable!!
Andrea Mejia	91791	I oppose the gentrification of Lincoln heights and the community needs to be involved in this dialogue.
Kyle Canyon	90065	Luxury housing is not what this neighborhood needs. This project puts multi generational families at risk and threatens to eradicate this neighborhoods community.
Evelyn Beadle	91030	We do NOT need luxury apartments. Stop this gentrification and blatant disregard for the community that is already in place & opposes this construction.
Elizabeth Diaz	90042	If long time residents of Lincoln Heights can’t afford to live in the proposed project, what is the point? BIG NO to the project
Nour Iubeid	90065	Against the displacement and stripping of our community
cal kevany	90042	it doesn’t belong in the neighborhood, people never asked for this
Allynikoltchev	90065	To keep the community safe from gentrification
Paul Sperry-Fromm	90065	This will harm long term residents of the neighborhood and lead to more developments that displace residents and create an unaffordable environment
zoe	90031	no gentrification in Lincoln Heights. we don’t need luxury apartments here, especially in this pandemic. we need public assistance and services.
Amy	90031	Unfit environment for luxury apartments
Hannah Sullivan	90031	
Ethan	90031	A luxury modern eye sore of an apartment building is not what this historic neighborhood needs. Why not invest in the buildings and businesses that are already there?
Legier biederman	90031	!!!
Briana Olmos	90031	I live in this community and love it too much to let it become Just some place to visit. We deserve better than this .
Annie Brennen	90023	It displaces members of the community who are already there and won’t be able to survive or afford the gentrification.
Kevin Boog	90012	Resident of Lincoln heights that opposes any displacement of tenants/ whitewashing of the beautiful brown heritage that defines Lincoln heights.
Arrow de Wilde	90027	My family is born and raised in east la & this would completely ruin the neighborhood & a lot of families lives. Lincoln heights doesnt need a bunch of yuppies coming & ruining whats been there for so long & what many native
Valeria Garcia	91801	Gentrification anywhere is a threat to low income people. I am in opposition of this project because this building will displace low income people and will spike the rent and living prices to the point that it will become impossib
Nick Campbell	90004	Gentrification is evil
Andrea Romero	90012	We need affordable housing for vulnerable communities not luxury apartments that we cannot afford. The rich are ruining the city and ruining lives. This is violence.
NICO GARCINI	90068	it displaces low-income brown and black people and will destroy lincoln heights as we know it
Lesly palestino	90022	Because it’s wrong and gentrification will eventually push all our people away as long as we let this happen
Tyler haberkorn	90036	We don’t need more luxury condos that gentrify and kick out the people that have been living here for decades.
Solita	90004	This development will displace long time communities of Lincoln heights and was approved without the council of the community. It is blatant disregard for the people of Lincoln heights.
Delilah	90026	
Geno Sanchez	90020	Lincoln Heights needs more affordable/low income housing. Not luxury projects that will displace current residents.
Mallory Leisten	90012	Affordable housing is a human right, this development will displace many families who have lived in the neighborhood for generations. Ending gentrification begins with pausing these housing developments and asking 'Who
Karen Arechiga	91321	I do not support the community being pushed out of their own community to profit greedy investors and developers.
Brooke Robie	90031	Will further create gentrification
Lauren Crow	90031	Because it will push our families and erase history
Diana Parker	90031	Because the community was not involved in the decision and gentrification affects the health and well-being of the people in the community
Mary Salazar	90012	Leave our community alone
Sebastian schiff	90032	We need affordable housing. It housing for profit.
Claudia	90012	I oppose this new construction for its disregard for the community where it will reside. LA county is currently experiencing a crisis of AFFORDABLE housing. We do not need more luxury apartments that will sit empty or will fu
Cb	90032	Gentrification is bad.
Isabella manderson	90042	Ugly. Ruins the character of Lincoln heights
SHAY OGRADY	90041	Protect the community—housing should be affordable and for all.
Pascal Vieira	90008	Not what the community wants or needs
Lucia D'Agnenica	90031	I believe building this without the community's consent is wrong.
Germaine wimmer	90042	Ruins the character of li cool heights
Eden Fenwick	90042	Stop the gentrification of east/northeast LA. Luxury developments like this displace POC & BIPOC who have lived in the community for generations.
Ricky	90026	
Victoria Cuan	90023	Developments such as this push local communities out and increase gentrification, thus increasing cost of housing and living for working families who have lived in these neighborhoods all their lives!
Veronica munguia	90042	We need sustainable and affordable housing. This project will directly negatively impact local residents and increase displacement.
Krista H	90065	Because it’s the largest land development in Lincoln heights, and do they really need to destroy and displace another neighborhood? Are we trying to move more people to LA during a pandemic? The numbers here are so hi
Lisa Hoxter	90042	We need affordable housing not luxury condos.
Megan Rose	90031	This project will cause displacement and will further escalate the gentrification in Lincoln Heights.
Sophia boli	90004	This isn’t helping the community. I used to live in this part of town and I loved it bc it was u touched by gentrification and still felt like real LA
Guinevere Alcaraz	90012	Because the building of luxury apartments higher the cost of the neighborhood which in turn raises rent which pushes black and brown people out of their own homes. This perpetuates a system of capitalism and generationa
Jenny Sotelo	90031	A project of this magnitude will forcibly evict And displace an already vulnerable community, putting thousands at risk.
Khalilah	90031	We must protect and preserve our community. The project does not do this. It is ugly and will be affordable
Adam Green	90029	Gentrification kills and the community of Lincoln Heights clearly opposes this gaudy, supremacist new development.
audrey leshay	90027	this is gentrification at its worst, and by fast tracking it during COVID the city is taking advantage of its community members. no new developments unless they are low-income housing or housing for the unhoused, and no ne
Matthew Brush	90010	for the reasons listed. Los angeles does not need luxury housing—we need housing that is affordable and accessible to everyone who needs it.
Amelia DeFosset	90012	
Emily	90042	We are in a pandemic, the last thing we need is more unaffordable housing in a neighborhood that has already been rapidly changed
Vanessa Riegel	90029	No displacement!
Jane moseley	91352	Gentrification is an exploitative offense committed against communities of color.
Renee Ramirez	85338	I had to move out of my home in Boyle Heights and Highland Park due to gentrification and now to see this happening in Lincoln Heights is heartbreaking. Knowing the friends and family who live there will not be able to affor
Miller Robinson	90031	Luxury condo/apartment buildings like the one that is being planned with displace current and long standing residents of Lincoln Heights. These new complexes will drive rents up and absolutely do not service the community
Ahmed	92091	Disrupting the areas heritage and inhabitants for capita
Sage Sherlock	90031	We don’t need ugly gentrification condos going up, without care and style, just so some corrupt real estate developers can make easy money off of “an up and coming neighborhood.” It’s unethical and displaced people who
Cristobal Chimil	90033	It's a horrible thing for the community. Lincoln hights doesn't need it.
Marc Babcock	90027	This is a family neighborhood and one of the few affordable neighborhoods in the city. We must protect neighborhoods like this at all costs.
Brenda Llamas	90031	The project perpetuates gentrification and normalizes/ spreads the displacement of BIPOC
eden	90027	we don’t need more luxury apartments that are inaccessible for the community we don’t need more landlords intimidating and causing violence to the community this is NOT IT!!!!
Allyn Iwatsuru	90031	This will ruin a historically significant neighborhood for a multitude of reasons
Raul Vasquez	90031	I oppose the project because rents in the area are already out of control. People who have lived in the neighborhood for decades are being priced out by uncontrolled rent increases and heartless landlords and groups capital
Wesley tsai	91801	Gentrification
Ben Bruker	90029	The people don’t want it
Remy Smith	90020	This project will displace low income families.
Gwen Hollingsworth	91108	This project is another example of gentrification that will only harm and displace the majority minority and working class community of Lincoln Heights. It is highly unethical and violent and I oppose damaging this community.
Heaven Aguilar	90012	There are better options to utilize the vacancy than building luxury apartments and slowly eliminating the cultural diversity in Lincoln Heights.
Lauren	91602	
Laura Mulleavy	91106	We need to support and protect our neighborhoods from housing that does not benefit its current city residents.
Conor	91381	Because gentrification results in the displacement of our community members

Jesse Hoffman	90004	Because it harms an already struggling community and will further isolate long time residents from keeping housing.
Fátima Ramirez	90031	We need affordable housing not luxury apartments.
Yarden Erez	90019	
Simone	90026	This kind of development project is one of the most permanent / final stages of gentrification, pushing out the community that created the neighborhood you cruelly and carelessly erase and paint over with soulless whiteness
Esmeralda	90032	It is a threat to the preservation and culture of Lincoln Heights and citizens. Gentrification is pushing out residents that have lived here for over 20 years.
Crystal	90033	We like our community as it we just improvements to already existing problems, we do not need more gentrification
Claire Redman	90042	An extremely luxury development is antithetical to the community already residing in Lincoln Heights. To take away so much potential housing for the working families of 90031 is morally bankrupt and it is WRONG. More thar
Lucian Buscemi	90026	Housing in LA is becoming unaffordable for many residents and this will probably make it that much worse. Plus the building would be an ugly eyesore
Xia Jimenez	90039	Gentrification and the building of these complexes is an act of violence I have seen forced into my neighborhood and communities that I would not wish on others.
Zoë Lappin	91344	As a born and raised Angeleno, this kind of development threatens the way of life and wellbeing of my neighbors. To continue to build luxury complexes, that are exempt from rent control, is to ignore the reality of the people
Gracie gray	91320	Gentrification of this community is actively displacing those that were here first.
Snow Martin	90068	End the displacement of local non white los angeles residents for profit! this is wrong and has to stop!!!
Alexis	90033	Luxury apartments are not for the people of the community
Jackie	90033	Let’s not gentrify our neighborhoods.
Anaiah	90042	Gentrification is VIOLENCE
Katie Herrera	90042	Stop destroying our communities, take your “luxury apartments “ to the South Bay.
Nick Angelo	90041	Setting a continually destructive precedent for the erasure of historic neighborhoods and the continual displacement of longtime working class residents
Arlin Alger	90042	I oppose this project as it will displace many long standing community members in the near future.
Arlin Alger	90042	I oppose this project as it will displace many long standing community members in the near future.
Jesse Sappell	90042	
Kace Colwell		
Kace Colwell		
Ross Chait	90042	This is not in the interest of the community that brought this neighborhood up. This is in the interest of people who do not care about the community.
lena hindes	90041	gentrification, ugly, dont need it, need affordable housing and community led projects
Jasmin palacios	90032	I am tired of families and la natives being pushed out of their neighborhoods due to skyrocketing rent and irrelevant businesses. This neighborhood does not need coffee shops, little boutiques, or expensive ass apartments tl
Daniel Ray Bengsto	90031	
Nadia Gallardo		It is unnecessary construction and it is not keeping the community’s best interest in mind.
McKinley	90026	To Stop gentrification and illegal evictions
Gianni	91505	To prevent the further displacement of people in the area
Dinah	90031	I oppose the project because in the end many people are going to be displaced with the cost of rent going up.
Trevor Neuhoff	90211	These developments change the shapes of entire communities. If they are going to trey and put it in this neighborhood they must have a public discourse with members of the community at the very least. Especially during a
Robert	91206	I strongly disagree about this project. I feel it’s unfair for the local community and this will heavily affect the area’s rent control. Gentrification needs to be stopped. If this project continues, many more will come and many fami
Michael Keehan	90031	Nobody wants this shit building in the neighborhood
Paloma Maisonet	90068	I oppose the project because gentrifications commonly displaces communities of color, like the community in Lincoln Heights, and I don’t want to see that happening in a place where I formally lived.
Martin Tzonev	90065	Its evil
Catalina Bulgach	90029	GENTRIFICATION
Alexandria Gradillas	91801	Community displacement
Kelsey	90042	Not right!!! Gentrification!
Ariel		
Katia Amador	90032	I’m all for improving our communities but this project seems to be taking advantage of that, so for that, I oppose this project.
Karen Law	91030	It will not serve the needs of the community unless it’s 100% truly affordable meaning 100% of the units are rented at ELI (extremely low income) and if the property is restricted to an affordable housing covenant to keep it af
Steven Schaefer	90814	As the oldest neighborhood in Los Angeles, it is vital we keep its historic touch and keep the residents living here who’ve called this sector of LA home for numerous years. This is a pure example of profit over people. This de
Liana May	90065	It is ruining the peace of the neighborhood and causing pollution . And it is taking away from the community has been there forever.
Senia Iniguez	90042	It’s a threat to the community because it promotes gentrification
sara mcgrath	90027	
Stephanie Rodrigue	90042	This is NOT what the community needs or wants! It will only work to further gentrify north East LA.
Alessandro	90028	Because these luxury projects are agents of displacement that destroy communities and offer little in the way of meaningful affordable housing or servicing the actual needs of the community that lives there
Gracie	90026	for displacing locals and ignoring the demands and needs of those indigenous to the lincoln heights community
Jake Hjortland	91101	LA needs affordable housing now! The city needs to respect and preserve working class communities. Housing is a human right. LA does not need another hideous building full of vacant, luxury apartments towering over unh
Nataly	90031	We dont need luxury, we need affordability!!
Anna Ramsey	90068	
jack lutsky	90045	no to gentrification in lincoln heights and to the displacement of the working class latinx individuals and families!
Danielle Garciano	91107	Stop gentrification and keep affordable housing!
Kathrina Lorenzo	91311	These developments displace life long residents of the neighborhood all to profit and make housing UNAFFORDABLE. Enough is enough. No more gentrification.
Kimberly Figueroa	90042	It is an unnecessary project that will do more harm to our community
Eavan burke	90274	
Gissel Gonzalez	90042	The community doesn’t need it!!!!!
Bri Cee	91911	It will displace locals from their homes and strip them of their right to affordable housing.
Jacob	90028	I would like to move to LH and a development like this robs the neighborhood of what I find desirable
Aimee	90031	They didn’t ask me
Angelina	91502	No gentrification
Thorson Munoz	91722	This project is detrimental to the livelihood of the 30k of Lincoln Heights; the completion of this project will result in major displacement and homelessness for residents of Lincoln Heights, many who lack the financial means t
James Cherry	90019	its too expensive for this neighborhood its displacing life long residents who are mainly poc, so its removing the cultural significance of this area. This is actively going to increase the cost of living for the area and push out lo
Evan Burke	92104	This will push longtime residents out through gentrification.
Kim Cuevas	90011	Because Lincoln Heights has been one of my families many homes and, it would be a shame to see it disappear.
Samaria	91780	I don’t want families to be evicted from their homes during a pandemic, this is horrendous and evil.
Julie	90031	We’re aren’t getting a say in our neighborhood.
Shannon Sullivan		Moving forward with this project is essentially moving forward with contribution to LAs already large housing crisis.
Chris mathis	90042	It’s fucking horrid and would bring more gentrifier trash to the neighborhood
Mia Fernandez	91103	Even though I do not live in Lincoln Heights, I have lived in communities that have been gentrified—my dad is currently homeless due to forced eviction to build luxury homes. Gentrification is violence. For these communities
Van rosales	90004	Gentrification is genocide and this project will directly affect the Black and Brown community of Lincoln Heights
Daria Solovyeva	90019	Gentrification of lower income/ historic neighborhoods is incredibly detrimental to the lower class people and the already suffering communities that’s plummeted in evictions. The people of Lincoln heights are being illegally e
Benjamin Harper	90042	Enough gentrification! Let people keep their neighborhoods and communities instead of cramming personality-free, overpriced houses everywhere.
Bailee Cowperthwai	90026	Affordable housing
talin	91106	theyre erasing the culture
Jackson Crites	90031	This project will drive up the price of the neighborhood that consists mostly of renters, causing displacement. I oppose any and all luxury developments especially in working class neighborhoods.
Elizabeth Estrada	90640	it’s genocide to the community
Noah sharp	90066	I oppose the project because I have lived near Lincoln heights and have valued the authentic culture and found beauty without the need for luxury condos. It’s easily one of the last & best places in the city that isn’t so capital
Lizzie Rutkevich	90024	A gentrification project of this magnitude will do nothing but tear apart the Lincoln Heights community by displacing residents whose families have lived there for decades and established the local culture. The community of L
Aileen J	90032	I oppose this project because I believe that there is an over crowding in LA and this does not help. This also makes living in the area harder for people and families who have resided in this area for years, no one should be sul

Kimberly Rodarte	90011	This is a home to many and it shouldn't be gentrified. White people already have so many other places they could choose from. WHYYYY OUR STREETS?
Ivy	90032	Overpopulation
nikki houston	90031	lincoln heights is beautiful the way it is don't destroy it with harmful gentrification investments
adan	90042	North east la has undergone extreme gentrification starting on York, and expanding to Figueroa and even more areas. The disease of gentrification is what drives communities apart while actively driving out residents who've
Hayley Shore	90065	Gentrification / ruining the neighborhood
Corinne Dyson	91104	This project aims to displace the community, not serve it. I've been a resident of Lincoln Heights and believe the city's no. 1 priority should be investing IN the existing community of historically disenfranchised people.
Gabi Rudin	90029	Affordable housing needs to be built. We don't need more luxury apartments. LA has a homelessness/housing crisis
Valeria luna	90001	We need to end gentrification
Ariana Delawari	90031	Gentrification is hurting so many people
Paulette serrano	90006	
Nicholas Orenday	91803	my friends and family live there, and i want their neighborhood to be alright
Sasha Barron	91042	it's the gentrification of a highly culturally saturated city of families and citizens that are struggling to even make a living enough to live there. Projects like this and other possible future ones will eventually raise costs in the co
Samantha	90012	Communities need affordable housing not more gentrification
Jenna	90029	Luxury apartment complexes displace people of the community who have been there long before these projects are erected. They raise rents, force businesses to close, and eradicate neighborhoods. This will disproportionat
Arthur Cooke	90026	i have friends and family members who live in lincoln heights and despite my relationship to the area any and every community should be funded from the roots and grow organically and collectively. this project is gentrificati
Karina	90012	I live next to Lincoln Heights and this affects and displaces my community deeply as well. We must stop gentrification which is modern colonization by rich folks who don't care about community and working class people. W
Sterling Wells	90042	This development will displace long-time local residents and make people homeless.
Melissa Vega	90033	It's taking away potential for affordable housing in the community. It's an eye soar
Abigail valdez	91103	
Ted Davis	90042	There are enough gentrified parts of LA to build this complex in already. Don't turn Lincoln Heights into the next Echo Park. Preserve the affordability and heritage of a historic and diverse LA neighborhood.
Natalie	91730	Gentrification kills
Aram Vanerian	90031	Raising rent prices, pushing families out
Nicholas Santana	90004	Community don't need it
Migdalia	90031	no
Iran flores	90031	It will start raising up rent around and in Lincoln heights and that doesn't benefit that actual ppl who live in this small city
Tiffany Virgen	90201	Yes I oppose, no to gentrification
Isabella	91754	
Heather Harris	90026	Because building huge monstrous building is encroaching on a community that does not need this build a city park or something that helps the community not hurts it!!!!
Valentina	90032	It will create more displacements and illegal evictions
Daisy Galindo	90041	This project would dismantle the neighborhood for low income families. We've already seen what developers have done to surrounding neighborhoods like highland park. We must support low income communities now more
Benjamin Vinkovic	90041	Gentrifications, and rent cost. People should not be shoved out of there neighborhoods for apartments for the wealthy.
Ashley Sanchez	90065	Will kick out low income families
Ryan watts	90031	stop the gentrification and extermination of one of Los Angeles first neighborhoods, allow those who were born/grew up here remain and be able to use their rights and freedom to maintain/establish new businesses and con
Jasmine	90031	These luxury apartments will most likely be unaffordable to those who would typically be able to afford to live in Lincoln Heights. There's a chronic homelessness issue in Los Angeles. We should work on housing the homeles
Jasmine	90031	These luxury apartments will most likely be unaffordable to those who would typically be able to afford to live in Lincoln Heights. There's a chronic homelessness issue in Los Angeles. We should work on housing the homeles
Julia yerger	90031	The development will lead to gentrification, which will lead to displacement of long time residents. The community must be heard and their lives taken in to account.
Karina	90042	fuck these transplants
Joseph	90042	These landlords/tenants trying to get rid of people of color
Izzy	90032	There has been no conversation with the local residents
Martha Rayo Osuna	90640	I am against the displacement of black and brown communities. This should be turned into affordable housing instead.
Amanda Brown	90031	It's displacing Latino and black people!!!
rachel mcgovern	90026	genrefication
Janelle Snyder	90031	This project would completely destroy the integrity of our neighborhood and would displace many. Gentrification has no place in 90031, no resident wants this!!!
Yazmin Escamilla	90033	
Audrey Harrison	90012	I oppose the project because we need to protect our communities especially communities as diverse as Lincoln Heights. Gentrification displaces the people who made these neighborhoods great and takes away their home
Sarah Veyna	91107	There needs to be actual measures to protect the poor POC communities of Pasadena, not displace them.
Joanie aguilar	90065	It's taking from the community
Soleil	90291	No gentrification
Juan Carbajal	90065	I have grown up near Lincoln Heights my whole life. Watching it become overrun with new developments and businesses while simultaneously displacing countless community members is not right. This proposed project wo
Andrew Lane	90024	In the midst of a global pandemic that is devastating Los Angeles and disproportionately affecting our Black and Brown communities, is the worst possible time for us to gentrify Lincoln Heights and displace its BIPOC and w
Andrew Lane	90024	In the midst of a global pandemic that is devastating Los Angeles and disproportionately affecting our Black and Brown communities, is the worst possible time for us to gentrify Lincoln Heights and displace its BIPOC and w
Andrew Lane	90024	In the midst of a global pandemic that is devastating Los Angeles and disproportionately affecting our Black and Brown communities, is the worst possible time for us to gentrify Lincoln Heights and displace its BIPOC and w
Marley McMahon	10011	Protect the people
Lauren Kim	90027	The community could use a number of things before even thinking about building this. This also will send rent prices up for people who already are living paycheck to paycheck.
Sabrina Strausbaug	90005	I do not support illegal evictions or gentrification
Benjamin Kujawsko	90031	
a	90038	
Maya Abee	90032	The city of Lincoln Heights would not benefit from this development. It is not in the community's best interest and that needs to come first. I have grown up in El Sereno, in close proximity to Lincoln Heights and I have watche
Ted Gerike	90012	This development will tarnish the neighborhood. We need affordable housing, not luxury condos.
Sarah Veyna	91107	Correction: Because the displacement of low income POCs needs to stop in Los Angeles.
Cindy	92782	Development should not be a top-down decision making process. This project will affect those living there for the rest of their lives. Please do not impose another burden upon this community especially during these trying tir
Julia Garder	90065	We need affordable housing not luxury developments
Jenelle Smith	90017	it will push people out
Lauren Dunn	91104	
Maria-Elena Kaser	92649	I oppose all forms of gentrification and displacement of citizens who have no reason to be kicked out, especially when the only reason is greed.
Amanda Kwong	91770	
aaliyah	90032	it's that right
Dorrin	90024	Screw gentrification
Cole Prentice	90027	Gentrification
Adam Baldwin	90065	We do not need more high income housing in Los Angela's let alone on this side of town. These buildings are getting built all over the city. No one even moves in, and we're left with an empty eyesore that causes rents to rise
Jason torres	90601	Quit gentrifying our city.
Aaron Minardi	90042	The increasing number of new developments without rent control will continue to push people out of their neighborhoods. LA doesn't need more luxury apartments we need leaders/laws that care about our citizens!
Pablo Garcia	91801	Luxury condos and gentrification is not what the community needs. Not 400+ of them especially. Why is that the biggest project the community has gotten, and why has it been hidden/fastracked during covid?
Ryan moore	90031	It does not support the existing community, and would lead to further gent ification the the mixed class working neighborhood
Lawrence Luna Jr	90601	We must preserve and rejuvenate our Los Angeles neighborhoods rather than forfeit them to gentrifiers that displace families who have called this home for generations. Im disgusted and appalled that the city sped this proje
Leslie Zamora	91324	I oppose this project because gentrification rises prices for the people who have been living there. By building this department it is erasing the culture of the community.
Donajy Baez	90026	fuck gentrification
Crystal Gomez	90042	Because people within the community deserve affordable housing.
Sam Sweet	90031	Developers need to be checked by the people whose lives they affect. Residents of LH have a right to be heard and as a resident of Highland Park I'm ready to push back on their behalf.
Antonia Oliver	90019	These developments will drive up rent costs for surrounding residents who have lived in Lincoln Heights for a long time and deserve to have their voices and needs prioritized over profits for people who don't even live in the

Joanna Ewing	90065	Gentrification kills
Carlos	90041	
Mila Ryder	91604	This project poses a massive threat to neighborhood families and their housing!
Valerie Moreno	91709	
Ronda	91803	
Harmony tividad	90068	Protect lincoln heights
Chris Sirney	90039	Fuck rich people trying to fuck over local economies so they can make more money. Also the buildings will ruin the look of the city
Christina cooney	90029	These buildings are ugly and do not promote community. They do not blend in with the existing community.
Marijayne Cortez	90640	There's no need to raise rents and push people out.
Jenna	91106	The community should decide whether or not to have such a large "project" take place.
Rachêl Barocio	90022	Because it puts people who are at risk and marginalized in a compromising and displacing position. It’s unethical. Entirely unethical.
emylou	91791	I oppose the project because it will negatively impact the current residents lifestyle, culture, and neighborhood.
sierra	90042	gentrification is wrong!!!!
Sophia Negrini	91755	Because you will make everyone who lives in Lincoln heights become homeless
Veronica Martinez	90033	I do not support gentrification
Francesca L	91103	Preserve communities in Pasadena. Also the build plan looks ugly as fuck.
Kristi Stuart	91505	Gentrification kills
Andrea Regino	90032	Because people shouldn’t be kicked out of their homes to make room for people that can afford “luxury” apt. Stop gentrifying.
Charlie Powers	91702	Bullshit gentrification will ruin the community.
Amanda Straws	90031	Direct threat to our community
Julian garcia	90031	This project was never brought to the attention of the residents in lincoln heights. And as a resident of said community i feel disrespected and taken advantage of by such a huge project being started in the community with o
Aaron Sperske	90068	I oppose this project as it destroys the culture of Lincoln heights and displaces long-standing community members.
mach burgess	91001	Gentrification is violence.
Valeria	90255	This is will displace residence and cause risks to them.
Katherine montgom	90042	Project is out of scale with the neighborhood, also does not offer enough low income housing.
Marissa alanis	90033	We need to conserve our communities and do what’s best for the people not politicians.
Amber perez	90032	We dont need anymore complexes or housing units. Families are already struggling to make ends meet as it is.
Paige Arevalo	91106	Use that money to support the people and community who are and have been there!
Jennifer Gomez	90019	It directly impacts then cost of current low income housing as well as gentrifies a neighborhood rich with cultures . It is a direct attack of POC communities
Kelsey Reckling	90031	
Nick	91204	a 468 unit luxury apartment building will destroy the neighborhood of Lincoln Heights and will drive out life long residents of the neighborhood. There is too many empty ‘luxury’ buildings near by, its not necessary at all. Fill th
Zaira	90032	Why make people suffer ? I’m here to spread awareness of what’s going on.... we’re here to help the communities not separate and make people angry.
Fiona Baler	91786	It does not put the people of Lincoln heights first!
Phoebe O’Connell	90046	Although I am not from Lincoln heights I was born and raised in Los Angeles. In my lifetime I have seen rapid changes across the city, changes that cater towards modern poorly constructed buildings with retail on the first flo

Nicole Prokes	90031	
Bruna Gill	90065	It breaks my heart to see a place that's been my home my whole life get sold out for profit of people who aren't even from here.
Tania enriquez	90046	Decolonize LA
Chris Swainston	90012	It will be devastating to the community spiking rent, kicking out families, destroying the culture. Architecture of the building is horrible, it does not represent LA or Lincoln Heights history. This blatant gentrification of rich inv
scarlet	90026	last thing we need right now is more luxury buildings
Valerie Chavez	91103	Gentrifying this community has the power to displace many low income families that have lived there all their lives. This is not right and it is not what the people want.
Felix plunier	91711	Keep it og
Rachel Ritter	90020	Gentrification is violence! This project will be extremely damaging to the Lincoln Heights community.
Dan	90042	
Jack baker	90065	The project does not serve the existing community of Lincoln heights.
Cesar Vargas	90031	F*ck gentrification. This development project would not serve the interests of our community instead it would drive those already here out.
Anthony vu	90029	This will not help the community. This is the worst form of gentrification
Emily Deremo	90042	To keep Lincoln heights affordable for families and locals.
Cole	90066	Gentrification is violence
Jazmine	90031	The people of Lincoln heights don't need any more reason to increase rent that we already struggle to afford. This would bring eviction for people who are already struggling, pushing our people out even more. It's a commun
Ava Adler	90049	This is gentrification in all of its silent violence. Impacting the health and wellbeing of residents of Lincoln Heights.
Karina Garcia-Guille	90031	The construction of this building will disproportionately displace POC in Lincoln heights, which include senior citizens, the most vulnerable members of society. Lincoln heights has already undergone a wave of gentrification t
Chris Hess	90031	I'm in opposition to the displacement of local residents of Lincoln Heights.
Danielle	90065	we don't need overpriced buildings in an area that is struggling financially
Daniel	90031	This will not allow for those who need housing to afford these new uncontrolled rents.
Sofia Arreguin	90069	Gentrification ruins communities and livelihoods!
Aimee Myers	90026	

Agnes Artoonian	91307	Because it’s hurting the community.
Peter Silva	90042	Gentrification contributes to homelessness
Ana cortes	90063	Ruining history!!
maxine rhea	90042	
Kris Chau	90026	This displaced longtime residents and community centers, in a time when the wage gap and disparities are at their widest. We need more community and less exclusive luxury. The predatory real estate practices in Los Angel
Marilyn Medina	90042	GENTRIFICATION, no housing offered to people in the community, needs to be low income housing, All units should be for low income.
Samantha serrano	91776	It is taking away from residents who have lived there for many years. It is raising rent and moving natives out of their homes.
Stefany Mijangos	90031	This will not benefit the people of Lincoln Heights. This will allow for rent to have higher rates and will eventually end up pushing all of the working class out of neighborhood.
Christy Velez	90032	I oppose this project due to It being unaffordable housing in the community.
Luke Csehak	90042	The community should be in charge of deciding what new housing best suits its needs.
Jakob Quiles	90031	Not affordable to hound adults from the NELA area
sunday smith	92587	it will lead to gentrification
Cynthia Garcia	92701	
Jason Taylor-Pestel	90031	For a community that has several projects to meet the housing needs of those socio-economically less fortunate, this new building proposal seems contrary to its needs and dismissive of their voice. We should be actively inv
Dillon	90031	It seems as if it will skyrocket rent in the coming years for the surrounding area
Isis Frias	90255	Gentrification is something that drastically and negatively affects communities that have long been homes to people of color, immigrants, and low-income families, causing thousands and thousands of these people to move
Vanessa Klaus	91311	Stop gentrifying cities and start building affordable housing for the people that already live in that area
Tiffany Do	90012	Fuck gentrification
coleman moore	91103	the project needs to be considered carefully by the community at large
Lucy	90065	
Martha Velez	90031	I oppose the project due to the unaffordable housing it will bring to the community.
Andrea Jimenez	90032	I believe there are better things we could do rather than gentrify the community that is already present like making sure families stay together in their long time homes and also protect the land that's trying to be taken over by
Isaac escoto	90029	I believe it the building of this complex is made to attract people of higher wealth to avneighborhood thats homes a community of diverse and working class people who run small businesses. I believe that building complex’s
Janelle	91605	This community deserves a voice, affordable housing, families will be displaced for this. They deserve to be able to continue living in their OWN neighborhoods. The housing should reflect the incomes of the community.
Allie Ihm	90063	
Amy Demir	90032	We are tired of gentrification !!
Jasmine Velez	90031	I oppose the project due to the unaffordable housing it will bring to the community.
Henry Tull	91030	Stop Gentrification in historically Latino, architecturally significant neighborhood.
Mario Ruiz	90033	We need affordable housing not this !
Nicholas DeMarie	90039	It’s gentrification and displacement at its worst
Ezmeralda Landero	90031	These will not be affordable and only raise the rent for the area. Fuck gentrification
Jessica Lopez	90031	Illegal evicting of residents
Lee Landey	90012	
Berend Williges	91405	It further pushes out lower income families and gentrifies the community. It loses its soul and longtime community members just for some profit and it’s disgusting.
Karla	90937	This project is devastating to community members. Gentrification has already effected this community. If this project moves forward it will have a lasting impact on community members of this neighborhood.
Eli	90065	preserve the history of lincoln heights at all costs. it is real LA.
Emma Carpenter	91030	Let people live
Christina Rodriguez	90723	Displacing our community members and families
Diego Rojo	90031	
Cormac Pickering	90041	Stop displacing people who can’t afford your ridiculous rent rates.
Gabrielle Sigrist	90042	This will further gentrify Lincoln Heights and push out it’s historic residents who have lived there for generations - all during a pandemic where many of these folks are unemployed and unable to pay their rents, facing eviction
Perla rivera	90262	Our community is already being impacted by gentrification. We don’t need luxury apartments.
Delia Loez	90031	Illegal evicting of residents. Area will be over populated .
Emily Hogg	90039	I love Lincoln heights and the community who already resides there!
Grisel Garcia	90033	I oppose this project because it is against the people of Lincoln Heights, this is a community that had long standing residents and some of these residents, are now older and will be displaced form a place they call home. It
Justine	90042	Building this complex will put the people of Lincoln Heights in danger
Jesus Lopez	90031	Will increase illegal eviction. Area will be over populated
Jennifer Rodriguez	90031	Our community has hard working low income families, projects like this will greatly affect us & we will no longer be able to afford living in the area.
Rebeca	91605	
Jacob arias	90032	Not ethically correct
Nicole Livingston	91342	The last thing Lincoln Heights needs is a luxury condo project. The community must be engaged and meaningfully examine what must be done to fulfill current needs. The culture of Los Angeles has been destroyed by these
atzel martinez	90039	i am opposed to the incoming evictions of residents
Amanda schulz	90042	Corrupt developers kill
Nora quinn	90026	We do not want another luxury condo in Lincoln heights
Denisse	90031	I want my community to remain as it is. I was born and raised In Lincoln heights and to see how gentrification is affecting it, it saddens me. Don’t let the Lincoln heights neighborhood many of us knew and grew up in Vanish
Mira Sabety	91786	Gentrification leads to mass homelessness and stress on lower income families. This is the first step.
Jamie	90027	We don’t need any more apartments to ruin historic neighborhoods
J	90033	Gentrification is an act of colonialism.
Jessica Embick	90042	No more luxury housing! It does not help the community. We have enough luxury housing.
yesenia alvarado	90031	Not affordable housing; will displace people
Matthew De La Cruz	90026	Not right
Paulina Montano	90032	Because this is not the affordable housing that Lincoln heights needs. This is gentrification.
sara kleinbart	90042	
Nathan nera	90031	I dislike caucasians
Jason	90032	It is not fair to the community
Andrea Morales	91722	This is a demand that gentrification be stopped!
Genna BloomBecke	90065	This community matters and must be treated with respect. Not what we have now- disregard for any of our lives and indifference to our inevitable displacement.
Sarah	90813	
Alejandra Coronado	90815	Lincoln Heights is a family city not another high scape
Eliana Valcarcel	84105	Gentrification is a crime and needs to be stopped.
Adrian Rodriguez	91331	It impacts the community and families of the students I teach in this area negatively.
Gabriela Mogollon	90031	Gentrification
Michael DeMaio	90031	The statement accompanying this petition describes how I feel about this development on a personal level. Fuck luxury developments, fuck forced displacement, fuck developers & fuck the corrupt city council working for de
Edwin Moya	90004	I oppose this project because it is removing low incoming families from their households.
Lauren McClelland	91325	
Daisy	90031	
Briana Villareal	91321	This project is displacing those who live in the community, as well as over crowding our community.
Devin Bierman	90031	It will raise housing costs throughout the neighborhood and cause displacement of working class residents
Alexander Morales	90023	Expensive and luxury apartments are not the way in driving down housing costs in California. This will only lead to increasing displacement and the proliferation of gentrification in vulnerable communities.
Linda Tovar	90026	the community of Lincoln Heights does not want or need this development.

Joss	90044	because the people who live in that area don't need a gentrifier to come and destroy what they have left of their community.
Jairo Baez	90031	To stop gentrification
Jimena	90031	It is a threat to our community and life long members!
Tracy Argueta	90255	We must protect underprivileged neighborhoods from gentrification.
Molly Bounds	90065	I oppose the erasure and pricing out of the existing community. This development provides no resource to the existing community there, only for hypothetical outsiders. And it will surely displace people who were born there,
claire quilala	90026	Stop this development!
Paola Gonzalez		No gentrification
Pamela Holash	91205	STOP GENTRIFICATION AND KICKING OUT HISPANIC AND MINORITIES OUT OF THEIR HOMES!!! NO ONE WANTS THIS!! ENOUGH IS ENOUGH
Ginger Wilson	91030	Fuck gentrification
James Flores	90032	I support what they're doing.
Carlos Ramirez	90031	I love my community the way it is. I don't wanna see my community gentrified
Timothy Samayoa	90033	Because these apartment are ruining the beauty of this community
Christine Stormberg	90026	Destroying lives for profit
Alex	90404	I don't support expensive gentrification in communities that will no longer be able afford living there.
	90031	It's gentrification
Carrie	90005	
Ramond McCusker	90032	Save the latinx community! Revitalization not gentrification!
Stacy Le	91767	its such a diverse community and i dont want corporations coming in and pushing residents out
Amy phung	90032	I have concerns if this new development will cause a rise in rent for locals in the community. I am also concerned if this will contribute to gentrification within our neighborhood
Hayden	90031	The people of Lincoln Heights deserve to not be displaced!
Xira Doctor	90004	The building of this luxury property does nothing to help the community of Lincoln Heights who have resided in their neighborhood for decades. This luxury building is gentrification and serves to erase the rich history and cor
john burtle	90042	
Fatima Lopez	90660	I am opposed to the project because, for the majority of my life, I lived in Lincoln Heights. I will not stand for the gentrification of my beloved neighborhood. I still have family there and I definitely don't want them or the other r
Izaiah	90031	gentrification ain't okay we been living here for years no reason to start doing this now
Brian Martin	90032	
Michelle Garcia	90255	stop the gentrification of Lincoln Heights!!!!
Diana Martinez	90031	There is no need for luxury apartment. It is going to displace so many people and cause rent to go up .
Lucia Barranco	90031	There shouldn't be such big and abrupt changes to the neighborhood without the consent of the community— we must be well informed and taken into consideration, our lives depend on this place and many of these develo
Criscelle Vargas	90031	I am tired of money being allocated to the WRONG REASONS. Rent is constantly increasing for our community, thus forcing tenants out who have been living in this community for years. This project will only further escalate
Michael Weaver	90031	i don't want "luxury apartments" in my neighborhood
Nicolas	90031	A project of this magnitude will increase illegal evictions in Lincoln Heights and contribute to the Ellis acting of multi family properties. Our affordable housing stock will be seized by flippers and investors and lifelong residents
Ivyanne Sigerson	90065	we need to house our unhoused not influencers
Patricia Garcia	90031	It will further gentrify our community and displace many working class individuals.
Marilyn Gallegos	90031	Gentrification
Tifanny Cuevas	91030	I think it should be kept as is. We don't need anymore unnecessary gentrification.
Daniela		It will displace working class families as many will be forced to leave due to an increase in rent.
Andre Narvaez	90638	Lack of affordable housing
Edith Chacon	90031	this will create a tremendous traffic to our community.
Isa-Bella Blanc	90031	A project of this magnitude will increase illegal evictions in Lincoln Heights and contribute to the Ellis acting of multi family properties. Our affordable housing stock will be seized by flippers and investors and lifelong residents
Michelle Jarmon	90065	No.
Scarlett	90031	Gentrification
Amanda Chacon	90031	Mucho traffico
Kimberly Barajas	90031	This is gentrification , once luxary apartments are built the prices around my neighborhood increased as if it isn't already being gentrified. Save what's left of NELA
Griffin Fuller	60304	Because the development of these units will be the first in a line of dominoes to fall towards gentrification.
jazmin mendoza	90033	Gentrification. Displacement.
Marisol	90065	
Mary Berger	90031	. A project of this magnitude will increase illegal evictions in Lincoln Heights and contribute to the Ellis acting of multi family properties. Our affordable housing stock will be seized by flippers and investors and lifelong residen
Samuel briseno	90042	We've been losing whole communities to this and if it continues homelessness will soon follow unless we help fund the existing community instead of acting like nothings there and building right over it
Camm Harrison	90042	
Amy Uthenpong	91754	It is wrong to displace thousands of people who built the original culture of Los Angeles. Especially during a pandemic, this is utterly malevolent.
Faith	90031	I oppose the project because gentrification.
Vanessa hernandez	90012	I oppose this project because it will increase eviction and erase our community
Yvette Arreola	90031	The people of Lincoln Heights do not support gentrifictation. We will not be ran out of our neighborhood of 40+ years!
Vanessa	90031	Because this is just going yo tyun the neighborhood
Sofia Alieninova	90008	I oppose this project because it will displace more people. The people of Lincoln Heights need more affordable housing!!! Not luxury apartments way above their income and unattainable to them. Not to mention the business
Phoebe enriquez	90031	
David	90065	My family loves in Lincoln Heights. Developers are vampires. Developments like this suck the blood out of communities and displace current residents. They raise the cost of living beyond what current residents can afford.
Emily	90024	Developers area disease and do nothing but ruin the city I have grown up in my entire life and love
Juan Garcia	90031	468 unit Luxury development at ave 34/ Pasadena Ave is a threat to our health and well being. Gentrification is violence on Lincoln Height's working class (19%) Asian and (77%) Brown brothers and sisters. Lincoln Heights is We need people from Lincoln Heights to be part of the decision making. In Solidarity, JG
Anna Czosnyka	90041	This is not what the community wants or needs. For starters, the plans include 468 units but only 287 parking spaces, which would lead to massive overcrowding of the surrounding streets. This is just the tip of the iceberg ho We as a country are more aware than ever before of systematic racism and inequalities that are so insidious within our social and economic structures. It would be remiss not to point out that this absolutely classifies as white
Edwin Davila	90033	Fuck Gentrification and it's transients
Andrea ramirez	90031	Fuck gentrification and fuck cedillo for
Bryan Payton	90291	
Andrew Hall	90031	It will displace the locals and erase the history and culture of Los Angeles's oldest neighborhood. On top of that its really ugly and will just attract horrible people to live there.
Sara Gernsbacher	90032	The Lincoln heights community can not sustain a luxury building, it will drive people out of the community they've lived in for generations and are struggling more now due to Covid-19 it would be completely reprehensible to
Diana Guzman	90031	More of my people will be displaced and this is a historic neighborhood we do not need more gentrifications we need more funding for our people and local schools
Luis fierros	90031	
Karen Balbuena	90063	I oppose because me and my family were recently evicted from the same area that this is taking place due to gentrification. I do not wish for rent to increase making it hard for folks that have lived here for years to be displace
Henry Trejo	90041	Because My neighborhood has been gentrified and I'd like to ensure it doesn't happen in Lincoln Heights.
Marie Claire Macad	90020	I oppose this project because it will directly cause the displacement of people who have been in this neighborhood for many generations // Opuesto este proyecto porque va a directamente causar el desplazamiento de gent
Moises avila	90033	Because We as a community need to stand together For our people
Nancy Mendoza	90032	
Emily	90039	This doesn't follow the spirit of the neighborhood, and puts the current residents and small businesses at risk
Lucas Gorham	90031	I do not want the building here
Kate Morgan	90065	The only housing development this city should be investing in should be for the homeless and underprivileged.

Mia	90031	Will raise rent and force people to move away
Ruben gonzalez	90026	I oppose this project because family's businesses and business owners will be kicked out of there home and lose everything plus most of these familys and business owners depend on there business and use there money o
Ivy	90041	Gentrification
Marcella		It’s unethical and will be overly priced. Help the community FIRST
Rat Rathowen	91780	It’s an eyesore.
Josue	90032	Community displacement
Anel	90031	The Los Angeles districts have been changed due to gentrification and families are forced to move to the inflation!! No more, enough!!!
Danielle Trejo	91791	Gentrification is harmful to the people already there this will only displace many people and businesses
Julia Greenburger	90034	I am anti-capitalist
Nik H	90031	Grossly insufficient community outreach for a project of this scale. It should also include more affordable housing than the baseline TOC requirement. Many more affordable units need to be provided in this project, as it curr
Christian Gonzalez	90032	
Amy Hernandez	90037	Power to the People.
Vanessa Ramírez	90042	This project is gentrification which is violent towards people in the community.
Fiona Sassoon	90291	Gentrification is violence against people of color and low-income communities. The City of Los Angeles needs step up to support its locals and save more space for affordable housing.
Sandy	22211	Stop forcing people out ! What a heartless project this is.
Napawee Pakpoom	90039	
Uriel	90031	no gentrification
Libier Figueroa	90895	Because gentrification is always wrong
Pedro Morales	90031	We are a working class community with low income residents and people who live day by day. We don't want your luxurious apartment that will not contribute anything to our neighborhood. We need rent control and low incc
Eliana M	90031	We need more affordable housing in this neighborhood, not these luxury projects that are obviously outside the spending bracket of current residents.
Annie Guzman	90065	THIS NEIGHBORHOOD IS HOME TO SO MANY HARDWORKING PEOPLE WHO CANNOT AFFORD LUXURY HOMES
Adrian Morales	90031	I am strongly against the displacement of (traditionally lower-income and Latino/Asian) Community members that will ultimately happen with the development of this property. This community is not for sale and the members
Lainey Racah	90031	This development project will not enrich the lives of long term residents of Lincoln Heights- we need our representatives to support residents in making investments in the current community so that it can thrive.
Olivia Toledo	90042	Gentrification is violence!
Andrea Lopez	91342	Gentrification is killing our communities
Alexander Castillo	90031	People are having a tough time paying rent now, once this is completed, rent will go up higher in this area.
Willie	90031	I do not agree with this project because this project will cause rent to go up and families will be left homeless. It’s not right for this too happen to poor families.
Catherine Acosta	90031	
Clara Cohen	92592	This petition is not a request. It's a Demand by the 30,000 residents of Lincoln Heights for Gil Cedillo, Pinyon Group and LA City Planning to face the People who will be affected by this project for the rest of their lives. A 468
Noelle Wong	91754	
Gabriela Castaneda	90031	This is not what we need in the community right now. There are other things that should be fixed and looked at first.
Roberta Klug	90063	
Ineliz Ruiz	90031	This our community. Not only with gentrify and push LH natives out of our homes, but will cause disturbances to the peace hence construction and parking will be more impossible than already is. Rent will raise and will chan
Alfred	90032	The rent price is above the gross median of the community
Mario Alonso Felix	90033	It will lead to the displacement of low income community members. This can not happen during a pandemic it would be reckless and border on a human rights abuse.
Jose Guzman	90031	There is no need for luxury apartments in Lincoln Heights, especially when a majority of renters in the area make around $30,000 a year. What we do need is affordable housing and rent controlled apartments to help those th
Jenny Eav	90031	I think it is important to retain diversity and the cultural history of Lincoln Heights.
Daniel Schubert	90065	Eyesore
Noah Garcia	91732	Our money could be contributing to the community instead of this development
Francisco Vasquez	91201	Because gentrification is baaaad
Daniela	90042	I don't
Jocelyn	90220	Because I can
Alejandro Barrios	90031	FUCK GENTRIFIERS!!! Stop pushing out the low income families from my neighborhood out!
Emma Hirji-Johnsor	90405	Gentrification consistently affects communities of color negatively, and is never an adequate solution to any sort of community issue.
Jesus Figueroa	90031	Lincoln Heights will not be gentrified. I along with several other families have been evicted from our homes. The fact that this project was rushed without community input is shady and the neighborhood will not stand for this.
Shayna	90505	
Jacqueline Brown-C	90008	Gentrification is the devil’s work
Haily	90031	No to the project
Lily Baxter	90031	Disruptive to the neighborhood, gentrifying
Cyrus Esfandiary	90063	Yes I oppose the project, stop the gentrification of this community.
Samantha	90012	The possibly of displacing thousands of families in order to build a, “luxury” apartment complex is in-humane. People who live in the community have the right to reject this project, and should’ve given the option to be involv
Diane Tran	90031	WE NEED AFFORDABLE HOUSING NOT MORE LUXURY CONDOS.
Megan Maguire	90065	This project is a violent attack on working class long time residents of Lincoln Heights. Los Ángeles is nothing without its real residents.
Alex Craig	90031	This development is a threat to the community.
Kylen	90068	
Anne Ritschel	90026	Because it’s literally gentrification. It’s going to uproot the entire socioeconomic landscape of the area. Creating more wealth disparity in la. Which is the last thing we need. And also because it’s ugly and Lincoln heights is beautiful
Diego	90042	No new projects should be slated after the arrest of Huizar. He oversaw multiple real estate developments and essentially sold Northeast LA away. No new housing should be immediately slated. It undermines the sanctity of
Rene Camarillo	90031	This project will the change demographic of historic Lincoln Heights. This construction of this complex will allow wealthy residents which in response will force the community to cater to them as the community becomes gen
Juana Mariscal	90033	Gentrification
Sarah Castro	90640	Gentrification is wrong
Jackie		
Chris Thach	90031	Displacing historical cultural and low income families
Krista Sison	90026	Because the people refuse gentrification.
Vic Mendoza	90032	families are being forced out by gentrification. Their homes are being turned into spaces that aren't meant for them despite being part of the community for decades
Maya	90065	
Caterra Cornejo	90031	Lincoln heights doesn’t need luxury housing, it needs affordable housing and grocery stores.
Tracey Escobar	90031	gentrification will not help community
Ana Cecilia Alvarez	90031	We need community input ok development and affordable housing - NOT more luxury condos.
Amy	91105	Stop gentrifying my community
Stephanie Espina		I myself, along with my family have been directly affected by gentrification in Chinatown. If there is anything I can do to stop this from happening to other families I am all for it.
Sophie Roessler	90065	gentrification and rent raising will push out families of this historic neighborhood
Melisa Ulkumen	90004	Gentrification
Richard Ordonez	91745	Tryna kick us out
Alexus Anderson	90014	Gentrification of communities ruins lives, durning a pandemic it’s even worse
Carmelita Flores	90640	This will displace so the local residents. What’s wrong with these people? Jesus.
Joana De La Rosa	90022	Yes SHUT IT DOWN. these are the same ppl who try to keep us in the lower class trying to build places in our community that don't benefit our people. How many of us can actually afford living there? We need low income h
Jenny MCKeown		LA does not need another Luxury apt complex. It would be destroying a historic district.
Gabrielle	90032	It unfairly displaces families who have been living in the area for decades. I can’t imagine that these units will be affordable for the average LH resident who makes $30k or less per year.
Gabrielle L Hart	91501	Gentrification is violence.

Gabrielle L Hart	91501	Gentrification is violence.
Xiao Yumi	90034	shame on this project, for pointedly not including the voices it seeks to displace and erase；new infrastructure should support the existing community, not further disenfranchise them.
Albert Ontiveros	90042	It will displace long time residents and increase rent throughout the neighborhood
Meadow crosby	93023	This building is historical and should be protected
april canacho	90660	Displacing long term community members.
Francesca	90041	Yes
Bianca Kingwell	90068	The gentrification of lei colon heights will displace the folks who live there!
Emely Vasquez	90026	The project isn't in the best interest of the current residents in the area.
Ineliz Ruiz	90031	This our community. Not only with gentrify and push LH natives out of our homes, but will cause disturbances to the peace hence construction and parking will be more impossible than already is. Rent will raise and will chan
Elena	90031	This project further gentrifies the community and hurts its longtime residents.
Amber	90031	
Citlali	90032	This type of luxury living is unaffordable to the citizens of Lincoln Heights.
Angel Perez	90031	Trying to gentrify a community that doesn't want to be gentrified
Yalitza	90023	
Dana Barone	90031	Environmental review, full permit and local resident review and should be done. The corruption of Jose Huizar will not be tolerated even in the poorest of communities.
Jacqueline Aquino	90031	Gentrification and for profit is affecting our community and it's longtime residents negatively. Let the community be heard
Rebecca Ramos	90031	Gentrification is pushing out our local residents!!! Do not gentrify Lincoln Heights like Echo Park
Jaya Tengco	90031	This development is a direct threat to The Lincoln Heights community
Deserei	90032	It is wrong.
Emily Gramajo	90065	Gentrification
ana villapudua	90031	gentrification.
Conor Kinsman	90039	Lincoln heights community deserve to be heard and actually listened to.
Lidia Gutierrez	90042	Los Angeles desperately needs affordable housing. This project will not be affordable housing but will instead lead to the displacement of many, many people & families. This project does not fit the community's character w
Deborah Samano	90040	I grew up in North East LA and agree with all the statements made in this call for petition. No to Gentrification! Support and protect Historic neighborhoods.
Joanna	90032	Luxury apartments should be built around people who make minimum wage
Dulce	90031	Gentrification, rent
Guadalupe Mendoza	90031	
Nicolas Antonio Rey	91106	Neighborhoods need more affordable housing, not luxury apartments that will make everything in the area more expensive as well.
Raquel p	90042	No one can afford these over prices apts that are just going to sit empty taking up space or when they do occupy it'll just be with racist gentrification kicking out the community as always kicking out the community that will n
Sherrie Chavez	90031	Because current Lincoln heights residents And surrounding areas would not benefit from it or would be able to afford to live in them
Olga Diaz	90031	Gentrification access to affordable housing
Diana Ortiz	90032	I oppose this project because it doesn't benefit the community of Lincoln Heights. It is too expensive for them to afford , and it disrupts their already formed lives by pushing them out so wealthier people can live in the area.
Alexis Serrano	90023	
Gracie	47304	Lincoln Heights has been a historical landmark and safe place and home environment for the working class POC. It would be abuse and overall inhumane to strip this away from anyone, and especially taking it away from PO
Jessica Ichel	90033	Because I don't want anymore gentrification
Jorge Barreto	90031	I strongly oppose structures that are intended to gentrify my neighborhood. The community has many historic values that are at risk because of projects such as this one.
Andres Fuentes	90032	Not enough affordable housing.
Nanette Sullano	91602	Cultural and Residential Displacement
Sally Arias	90031	It will create further inequality in housing for a the current low income residents in the community and infrastructure such as this should be presented to the community before moving forward.
Evan	91202	It will take away homes from people in my community.
Mia	90063	I grew up in Lincoln Heights before moving to City Terrance and I can't sit back and allow my childhood neighborhood become a victim gentrification. Long time residents of this neighborhood should not be forced to relocate
MARIA RAMOS	90012	I oppose because it will put the people currently living in Lincoln heights at risk of losing their homes.
Gesselle	90063	I've grown up in these areas all my life and when you take over someone's community and theirs mo respect or overnight to the people in that area thats disrespectful the people should have a say weather these buildings fo
Lauren reed	92688	Because this project will push rent controlled individuals out of there homes in the middle of a pandemic.
Annie wilkes	90031	It's will cause people to be dis placed. Unless it is 50% affordable housing I don't see how this helps residents of Lincoln heights
Jorge Reyes	90065	Inflation and gentrification are hurting community health
Nicole	91030	this project displaces people who have lived here for generations and continues to perpetuate gentrification
Odalis	90062	NA
Josephine Gualpa	90026	I oppose this project because it would be detrimental to the community surrounding it and people would be unnecessarily evicted and that is not right.
Yasmeen	90008	My Lincoln Heights neighbors will be vulnerable to evictions etc and this is indeed a violent act to get them out of their own neighborhood. They must be involved in the project conversation.
Michelle alanis	90033	Gentrification has to stop. Pushing people out with no choice is WRONG
Samantha Mendoza	90031	This area is already seeing the effects of gentrification slowly trickling in. I've lived here a majority of my life and fear I won't be able to do so in the near future. This project will kill the community.
Joddie O	91801	This project leaves people on the streets. That's NOT cool.
Hermes Agustin Jr	90044	It will force families to move out and find no where to go and it's simply Gentrification
Kate lee	90032	
Jesus Rodriguez	90031	Then you guys start raising up rent on the community to kick all Latinos out
Marivel		
kelly luo	90031	bc fuck gentrification
Tony Jardines	90031	We should have a vote as to how this place is improved.
Alena	90031	WE DONT NEED ANY MORE BIG APARTMENT COMPLEXES!!!
Maria	90033	This city is my home. Home to a lot of people. Stop kicking us out.
Brendan lopez	90032	This will undermine small business
Mazacuauhtli Burro	91722	gentrification is warfare
Ashley Arreola	90031	This community is our home. The fact that they are trying to build bigger and HIGHLY EXPENSIVE rent complexes is just sad. They want to change our culture & push us out of this community.
Eric	90042	Because the rich come to kick out the working class for their own benefit. Not realizing they will put thousands of residents in the streets just for their benefits, for example look at highland park, echo park.
Brandy allen	90026	Against gentrification and development that effects traffic and original residents
Paola tapia	90031	This project is meant to push out the community members that currently reside in lhts. These buildings won't support our community members.
Roberto Soriano	90012	Because it's wrong.
Bernadette Arias	90031	I oppose this project because it's kicking out all of the residents in my lovely neighborhood including myself it makes it harder to live in an apartment where I can barely afford it and the same goes with my mother we've lived
Atziri Cervantes	90042	
Marissa	91605	Stop pushing locals out! Housing needs to be affordable and building luxury housing that middle or even lower class people can't afford IS NOT FAIR!
Bryan Vasquez	90023	Because no one is going be able go afford this ugly ass housing
Kristian Cardenas	90031	No community benefits and not enough affordable housing
Patrice	94546	
Jonathan Diaz	90033	Gentrification
Esther Ibarra	90063	Gentrification needs to stop.
Abraham garcia	90640	can't built without notifying the neighborhood residents
Sabrinna Bates		
Jasmine Alvarez	90031	The folks of Lincoln Heights will not survive this if this building is built. The people of Lincoln Heights—the REAL people, the working class people—can not afford these ridiculous luxury apartments and will be forced to leave
Sandy vuong	90031	We deserve to have a say in OUR community!!

Sabrinna Bates		
Kary	91801	THIS IS DISGUSTING. LA — ESPECIALLY NORTHEAST LA — DOES NOT NEED LUXURY APARTMENTS. THIS IS NOT WHAT AFFORDABLE HOUSING LOOKS LIKE. THIS IS A COMPLETE DISREGARD FOR COMMUNITY
Elaine Huynh	91732	Los Angeles and neighborhoods throughout America have a long history of gentrification, which is a product and function of systemic racism. I believe there is value, beyond the economic, in Lincoln Heights without luxury de
Lucy	90026	
Elizabeth Herrera	90031	This must include affordable housing options for low income families
Sandy Frias	90065	The fact that residents were not informed of structure. Low income community members will Not be able to afford to live here and be displaced in order to build structure. Community members will not have priority application access. This is not for the Community and it is not a structure that the community would be
Stephanie S	91331	The people of Lincoln Height should be prioritized rather than gentrifyers
Jamie patterson	90041	This goes directly what the neighborhood needs and the pricing is INSANE. Shady tatics to even get this project this far is a terrible sign of what's to come
Kaili Ward	91764	cultural gentrification
Barbara	90031	Opposed to gentrification
Jose	90031	Gentrifications
Scarlett	94122	It's cultural genocide! Fight gentrification at all costs!
Kasha	91423	it's destroying a community
erika dominick	90006	LA does not need more luxury housing, especially not the expense of working class people of color, and especially not without public comment.
Amanda	90033	It should stay for the community!
kora colasuonno	91607	toxic luxury housing is not what the people of lincoln heights want or need, and will only exacerbate the growing housing crisis for the entire region.
Justine zimbron	90026	Displacement of current residents
Alejandra Guzman	90063	The displacement of an entire community is never going to be okay. Communities are not for sale! During a pandemic, to build luxury apartments in a lower-income neighborhood where local residents can not afford to live in
Miranda Peraza	90031	Honestly seeing gentrification in the Lincoln Heights community is really sad. This is a community that has to help build each other up. Not a community that needs a big fancy corp. to drive out the history of the people.
Tracey Truong	90031	Yes
Anagabriel Castro	90032	
Edwin Coro	90031	Doesn't represent the people who live there and places it out of reach
Celeene	90280	Many residents in Lincoln Heights are already struggling to live in the city. There is no doubt this project will increase rent therefore making it more difficult for residents. These units are not affordable for many residents, which
Enzo Gonzalez	90023	This project will displace native residents through gentrification
Eric Hernandez	90032	People who've lived their lives in Lincoln Heights don't deserve to be forced out of their homes by gentrifiers.
Skylar fisher	90066	The construction of these luxury condos will further the displacement of families who have lived in Lincoln Heights for generations.
Cindy Davalos	91764	
Madeline Pena	91104	yes
Hailey Moreno	90042	No gentrification !
Adrienne mercado	90031	Pollution concerns
Kimberly Cortez	90003	Lincoln heights needs to keep its culture and not be exposed to gentrification like so much of Los Angeles!
Susan Mackin	90042	It will negatively affect the community and people living there
Jailene	90031	This project does not serve our community. Our community did not approve this. This project will end up pushing out long term residents of Lincoln Heights, it would be the start of a violent wave of gentrification.
Virginia Finney	90005	Because the gentrification of this city is a violation of human rights. And because this building is ugly as fuck.
Tawney Elayda		This is a threat to the Lincoln Heights community and would displace many.
Juliette Contreras	90005	It's bad for the community
Simon	90023	Lincoln heights has felt with a wave of gentrification for the past 10 years and enough is enough. All this would bring is higher rent for low income families like my self. Lincoln heights is one of the oldest community's in LA.
katherine torres	91706	
Michelle	91306	
Carl Cortez	90033	
Jenisse lara	90031	Gentrification Is doing more harm than good in our communities of color
Chris Cervantes	90031	I'm against this project because it will displace long time residents and only negatively affects those that will be able to stay in terms of raising their property taxes and erasing the community that made the neighborhood a pl
Jose duran	90031	It's not fair for the people that have been here for many years to be kick out of their homes that they work hard to get for some investors who already have lots of money to kick them out like nothing
Emely Ocampo	90031	I oppose this project because it displaces many immigrant families who have planted their roots in this community. This will just drive up the very apparent homeless problem in LA. These projects are toxic to communities of
Elisa Rosales	90280	This is not what the people in the community want or need. The community's needs as well as their opinion have to be taken into consideration. The people should matter more than profit!
Selenah Marti	90032	I want to uplift my community, not destroy it. Building these developments would further contribute to gentrification at the expense of our people.
Remi Riordan	90004	I'm against gentrifying developments that displace people.
Sixto pena	90031	It displaces low income renters!!
Nial morgan	90038	Fuck corrupt developers
Rebecca Rivera	90031	It displaces people from the community
America Sanchez	90031	Gentrification has already taken over too many neighborhoods and Lincoln heights should not be one of them. I've already had too many friends get kicked out due to this issue and it is not right.
Danny Bermudez	90033	
Melina piedra	90065	It would drive working class families out of the area and cause gentrification in the community
Brandy S	91106	
Kenneth Chip	90031	
Sebastian Meza	90032	This is not what the Lincoln Heights community needs, and is a blatant example of pushing gentrification and erasing the culture that has been set here for almost a hundred years. The Lincoln Heights Community does not a
Reynaldo	90280	Gentrification
Nicole Campos	90031	People are being wrongfully shoved out of their homes. They've spent years here and are losing their homes due to the selfishness and greed of local politicians. They have done absolutely nothing to help the community and
Emily leon	90042	This project will displace life long residents of Lincoln Heights. We do not need more luxury apartments in our neighborhoods.
juan leon	90031	It's erasing our community.
Rosette Simityan	91042	It threatens the cultural integrity of the local community
Liam forde	2472	There is never an excuse to take away housing. It is never defendable or acceptable
Raquel Rodriguez	90031	The last thing my neighborhood / LA needs is another luxury apartment complex. Four generations of family has/currently lives in this area.. we need more development for affordable and equitable housing to preserve the sp
Cinthia Carlos	90031	
Skyler conner	90042	It's horrible
Esmeralda Ordaz	91744	It is not affordable housing for the existing community
Diana	90031	This project isn't for people like the ones in Lincoln Heights. No, you want to import newer, richer people to "boost" this city/neighborhood. Where will we go? We'll see our neighborhood changed by people whom we've nev
Daniel Esquivel	90065	It's taking away from the community. The community is losing its roots. Terrible terrible idea.
Iiia Xochipilli	90007	I am indigenous
Michael Aldana	90031	Gentrification will kick out community members who cannot afford the rent and bring in those who don't understand the culture.
Lizette	91204	Taking away from the community.
Carol	90031	Gentrification has slowly started to take over our community leaving out on the street our most vulnerable, long-time residents and beloved members. This project is a perfect example of that.
Elizabeth Zamora	90032	This housing is not for OUR community and will only serve to displace us.
scarlett dennis	90032	gentrification is violence
Hugo Hernandez Jr.	90031	I Oppose This Project Because This Is Gentrification & Will Make Lincoln Heights Rent Sky Rocket Throughout The Neighborhood & N.E.L.A. And Will Forced Us To Get Kicked Out Of Our Neighborhood & Remove Our Cultur
Ashley Boyd	90031	Keep Lincoln Heights charming and true. This mega luxury building will further damage this neighborhood and displace locals. It's is truly an eye sore. Get out of here with your capitalism
Karla Coronado	90031	Lincoln Heights does not need any more gentrification. Gentrification will lead to families being pushed out of their homes. There is a rising increase of homelessness and gentrification is one major contributing factor leading
Carmen Flores		Instead of taking from the community invest that money for the betterment. These people are hardworking people who do many of the laborious jobs no one else wants in order to provide for their families in hopes of better o
Estefania Hernande	90019	Tired of these people coming in making rent unaffordable kicking the brown and black families that make this community

Rachel Weinstein	90027	End gentrification
Jeannette Hernande	90201	This could lead to an increase of rent for the surrounding properties leading to the displacement of many families.
Venice Malabanan	90011	Because gentrification kills the culture in the community and kicks hard working people out of their homes
Jazmine	90032	Lincoln Heights has always been a neighborhood that provides affordable housing for the lower income community. This project would force many families to relocate during a pandemic which is inhumane and cruel
Bailey Brown	90026	Not affordable/colonizing/unwelcoming design/not asked for by the community.
Camila Pernisco	91801	Lincoln Heights is a culturally significant neighborhood that deserves to be appreciated & lived in by its current inhabitants, never gentrifiers who'll displace those who have worked hard to achieve their American dream.
Diana	93304	"Lincoln Heights is the oldest most historically diverse neighborhood in LA and residents have had to endure generations of racial inequity." just more powerful white people taking from POC running them outta their home so
Jorge Hernandez	90023	There's no need to build something that isn't needed especially when it will effect many in the Lincoln community. There was never a hearing or even an attempt to ask those in the community if they agreed or opposed to this
Brazyl Thompson	95336	As someone who goes to school in Pasadena, and struggled and still struggled to find DECENT housing in a city so unnecessarily expensive even in terms of nearby food on all blocks, there really is no need to keep building
Amanda Rojas	90032	Lincoln Heights is a beautiful community that is being threatened by this project. It will erase the culture and hurt its members in so many ways.
Anthony Zavala	90042	The rapid pace of market rate and luxury housing developments threatens the sustainability of the community of Lincoln Heights, especially during such a critical time. No one is against the development of more housing in L
Grace Rosenman	91206	Let people continue to live lives in their homes please.
James Aguila	90032	lifelong residents will be permanenty displaced or homeless.
Julia Peters	91104	It's gentrification pure and simple. I have friends who grew up/still live in the community and I know developments like these negatively impact them.
Jacob kaiser	94133	Historical preservation. People won't want to visit the us when every prince of history is erased in the name of profits.
Michelle	90063	Gentrification is affecting our under serving communities!
Alvaro Parra	90031	This project will endanger the current residents renting in 90031 by setting a precedent towards unsustainable housing development and rent raising. We don't want luxury apartments to start a trend in Lincoln Heights of buil in this zip code can actually afford.
Juliana Barbera	90046	
Ashley	90002	
Michelle Chin	90065	Why do we need more ugly luxury housing? What's wrong with building affordable housing for people who are already in the neighborhood?
Tanya Alvidrez	90031	Displacement of the people of lincoln heights
Annie Hawkins	97703	
Augie Calabro	90026	it will negatively affect the community and displace a lot of people who have lived here for generations
Alyssa Flores	90032	I don't want to see this neighborhood become gentrified and replace my brown brothers and sisters along with all the other communities living within lincoln heights.
Ashley Moran	90032	I have friends whose familles have lived in Lincoln Heights all for generations. I myself frequently shop and eat at the restaurants there. This development is going to do nothing for the existing community, but push them out.
Melissa Zamora	90032	Gentrification is oppression . This project needs to be thoroughly reviewed given the recently uncovered corruption in our local government .
Yesenia	90033	We demand a meeting !!
Sky Avery	90065	This project will indeed be a direct threat to residents around the area who have not consented to this. I do not consent the building of this development in my community.
Cameron Kessler	93001	
Megan Carabine	90942	Gentrification issues and will create indirect financial hardships for the families who have lived there for decades
Annie Brennen	90023	It displaces members of the community who are already there and won't be able to survive or afford the gentrification.
Hellen Jo	90042	No one in Lincoln Heights asked for luxury development. All of NE Los Angeles is in dire need of *affordable* housing, not fast-tracked back room deals made to line developer and politician pockets, while expediting gentrific
Orlando Almader	90031	
Jenny P.	90031	I oppose the project because it's unlawful and there wasn't any consent from the community given.
Jason Lee	91206	Given the amount of corruption in city hall, with two councilmembers caught in pay for play scandals in the past few years, and given the crisis of affordable housing in this city, we cannot let developers continue to raze entir
Jorge Trujillo	90042	Luxury apartment units do not benefit the community of Lincoln Heights in any way whatsoever. The construction of this project will actually harm residents who have been living in this neighborhood for years and decades as
Alexa	90031	It's kicking people out of the community it raises prices and claim to better the community by getting rid of the low income people of the community
isabelle pinto	90032	fuck gentrification!
Tatiana	90031	This project erases the history and the community that's been there for years.
Diana Diaz	90011	Im myself am LA resident and undergoing through eviction due to gentrification and seeing culture being erased and natives being removed from their homes, is totally unfair. We need our voices to be heard.
Cheyanne	90032	I live close to this area and it seems as if it pushing out a lot of people who lived here for a long time.
Rita Franco	92801	If it isn't affordable housing then what's the point? Help the people not push them out. Why do we need to allow another out of state company take over and make property in a place it's not needed. I'm outraged, make it sto
John	90031	...
Juliana McCullen	90045	It will cause affordable housing to go out the window and displace an entire community of people. This is gentrification at its most blatant, and it's unacceptable and disgusting that developments like this still happen without
Jocelyn Andrade	90031	Our home deserves to stay a home!
Brendan Nafarrate	90065	This project will further displace residents of Lincoln Heights and continue gentrifying this Latinx working class neighborhood. At this time when the nation is facing an unprecedented amount of evictions and a housing crisis
Ilana KoZlov	90036	This will increase the amount of evictions in the neighborhood and I oppose that and will bring in gentrifying businesses that will hurt the micro economy of the neighborhood
Lila Funge	90039	
roger garciS	90031	Will displace many community members
Lesly Martinez	90031	
Eduardo Peralta	91773	
adriana	90015	Dtla has enough apartments. Go put them there stay away from our neighborhood
Jessica Campos	90250	
Dava	90043	there needs to be more low income housing, NOT LUXURY
Lee Atkinson	10573	it is malicious to insert high rent housing into a lower income area.
Christine Huang	90031	
Zitlali	94555	
Germain	90031	Going to attract more tourists and they will want to move here and that will raise the rent.
Chloe Alvarez	90012	These luxury apartments will increase gentrification in Lincoln Heights. It will harm businesses and has the chance to erase a historical community, that is Lincoln Heights.
Andrew Quintanilla	90033	The project will negatively impact the people of Lincoln Heights in many ways.
Sam perez	90042	It displaces people
Geronimo Flores	90031	Ugly too many buildings not enough affordable housing
Naui Munoz	90032	Because I do not agree with the construction of apartments that will benefit affluent and predominantly white people / displace and push out the working class perdominantly POC community that have resided in those areas
Alex Fofonoff	90031	I oppose this gentrification, the displacement of longtime residents, and the destruction of neighborhoods
Iris Valera	90031	I oppose of this project, because once they start building the "luxury" apartments, rent will go up, and the people who have been here they're whole lives, will have to be forced out of they're homes because they will no longe
Daniel Calderon	90042	I am against gentrification
Jennifer	90033	I oppose the project because it relocates people who have lived their for ages and makes fun for upper middle class which also happens to mainly white people.
Gladys Lopez	91731	I oppose this project because I believe that by building these apartments there could be a start of gentrification. This will lead to many Lincoln height natives to have no choice but to leave their home due to an rent inflation.
Elaine Chang	90031	
Lily Noyes	90036	The money spent making this new, extremely unnecessary development should be going torwards direct action to help the existing community. If Lincoln Heights gets gentrified, the existing community will face losing their ho
Vanessa	90041	Some people can't afford these condos it will only create a even more populated area. With more condos equals more traffic around us. The people who will afford to rent these condos will be people with money. These hard
Olivia Barrett	90028	It will lead to displacement and prioritizes corporate profit over housing justice
Kathy Osegueda	90031	I oppose the project because you'd be leaving my friends and neighbors without their homes. You'd be forcing them to relocate, when this has been their neighborhood forever. It's not fair.
Ivy Marks	90042	We don't need any more developments like this! Gentrification is violence!
Nuong Tran	90023	It will displace a lot of low income families
Julia	55343	This will hurt a community
Gabriela	90032	We don't need these developments that aren't affordable and push out lower income families
Thomas	90746	Gentrification
Jenny Lee	90026	I'm tired of low-income communities being affected by housing. We need rent control and affordable housing, not more housing for the rich or middle class.
Abbi	93405	

Liz Fieschko	90029	Community decisions must include the community that lives there!
Andrea Galan	90031	
Jasmyn Lemus	92011	Against Gentrification
Maya Rosado	90031	fuck gentrification
Corina Lash	91030	I am against gentrification
Adrian Contreras	90042	I don’t believe building this luxury apartment is the solution to affordable housing in Los Angeles. But most importantly to not displace it’s current residents, who would be affected by this decision to construct this project.
Cameron Masters	91506	It’s gentrification and is possibly funded and approved in a corrupt and untransparent manner
Michelle	90032	I can’t afford an apartment in the hood I grew up in. Gentrifiers need to stay out of our community. All they bring is a higher cost of living. LEAVE US ALONE.
Saul Munoz	91406	Save avenue 34
Joseph Waggoner	90026	Doesn’t provide affordable housing
Chloe ricks	90808	I oppose all projects that enforce the gentrification and displacement of members within the community.
Francisco	90033	Our community is united
Franco betancourt	90031	It remove a lot of the neighborhood history as well as living a lot of low income families with out a homes
Dakota Booher	91351	
Matthew	91103	gentrification is bad
Abraham Machuca	90031	It pushes my friends and neighbors out of their homes without any aid or input
Analuisa Alvarez	90031	
Areeba Zahid	90044	unsustainable, expensive, eyesore
Gianna Bermeo	90041	NO TO LUXURY APARTMENTS. INVEST IN LINCOLN HEIGHTS LOCALLY
Willow	91702	The building would displace a community that is already struggling
Danielle trejo	91331	It will raise the rent and put the community in jeopardy
Frances Freeman	90034	Because it puts the current community in danger.
Martha Sanchez	90063	Its unfair to the real and vulnerable surrounding communities!
Byron Arreola	90042	Gentrification is cultural erasure.
Amy Hoang	90031	It's nice to see the community change but, we want to be beautiful in our own way. Since there are many working-class, low-income families in our neighborhood, we are not ready to see Lincoln Heights take action without h
Rosie	90016	Because I care
Olivia	90027	
David Cruz Terrazas	90031	It could negatively impact the current residents of our neighborhood. Majority of the residents are low-working class. New housing projects are going to be priced at market value which many residents will not be able to affor
Paulina	90032	
Renata Rodriguez	91733	This project is harmful to the community as it will continue to spike the problems of gentrification
Esther Gomez	91342	It is unfair to force people out of their homes just to build a new model and raise up the rent This should be stopped and allow the people that already live in the building to stay where they call home and don’t have to look fo
Amoura Gonzalez	90004	Fuck gentrification
Jesse Gonzalez	91706	I am sick of the displacement of brown people within that community.
Aya Newman	94703	Gentrification is violence.
Isabella Juarez	90031	Will kick our current tenants raise prices of homes kick out culture we have in lincoln heights
Toni Gallardo	90005	He is corrupt! and 86% unaffordable this is not what the community is wants. he is corrupt and therefore those projects should be under investigation or on hold until the people can speak to city officials who are not biased c
Gadiel	90031	Gentrification
Annie Lin	90027	
Joy Yukumoto		
Pamela Garcia	90031	I oppose to this project because gentrification will come to place and this will hurt our community, it destroys the community history, and culture. LA living has become extremely expensive rent will skyrock and demand peop
Aketzachialli Lopez	90042	I oppose gentrification.
Amanda Flores	90660	Gentrification
Julian Izaguirre		
Fernando Hernande	90032	Accommodating affluent neighbors while forgetting the entire community seems like a major disconnect between community members and who actually resides in LH
Isabel Gallegos	90063	When hundreds are suffering due to the covid pandemic and already struggling to pay bills and rent why is another large apartment being built that will be inaccessible to the very people who live in that community? Hundred
Agustín McCord	90029	I visited a friend at ave 32 and Pasadena the other day at dusk. I admired the unity of the community, strength of relationships of neighbors who walked among each other familiar and greeted each other from their front yards
Gabriel Salvatierra	90029	Luxury developments should be outlawed entirely
Hope stutzman	90034	If you are elected as a representative of your community you must serve that community. There is no way luxury housing should be permitted when you have residents who are unhoused or housing insecure. It is our represe
Ashley Palma	90006	
Arom Choi	90032	Lincolm Heights is one of the oldest neighborhood in LA with diverse communities. Don't want this project to ruin any people's lives who's been keeping Lincoln Heights beautiful. People over profit. Always.
Lauren Lauer	91362	It will displace many low income renters that are already apart of the community.
Jorgie Tlāchia Inin I	90063	The displacement of Black and Brown people in historically POC neighborhoods (and traditionally Tongva unceded territories) by gentrification continues the cycle of uprooting said POC people, further removing and displaci
Harper McCallie	91030	
Arleth Tomas	90004	
Roxy Wills	90004	
phoebe		
Benjamin Phillips	90012	Out of scale and insensitive to cultural dynamics of historic community
Charlotte lethbridge	90026	It will destroy the community
joana chaichang azt	91104	bc we need affordable communally owned housing that meet our needs, not profit driven condos that lie predatory and vacant during a housing crisis and pandemic
Briana Lara	90032	Because it pushes out the current class that lives here
Jennifer Solares	90012	Gentrification is going to drive people of this community out. Families have been in this part of Los Angeles for generations and this is only going to drive up prices and drive families out of Lincoln Heights. Protect this comm
Antonio	90031	Yes
Gabby Espina	90033	
Brianna Cruz	91776	
Leah Clancy	90042	My neighbors deserve better. This building would destroy the community. It is shameful.
vesta javaheri	91030	
Matiana Parra	90031	We need affordable housing for the community that lives in Lincoln Heights and need to protect renters rights.
Bianca juarez	90031	this is going to gentrify the whole community. My family has been here since the 90s and this project will erase all the culture we have in this community!!! This will cause property value to raise causing more and more displac
Natalie Christine Sa	90032	Because I’m tired of seeing the places I’ve grown up going to and seeing being erased :(tired of the gentrification
Arthur G Lopez	90032	Cause I’m tired of seeing communities being gentrified...
Alison	90065	This is yet another act of violence against marginalized people. We do not need another gentrified, white-washed neighborhood in LA.
Mackenzie Ferro	91801	There kicking out the people who built the city there trying to get rid of the middle/lower class!!!
Lili Peper	90026	Because it is going to destroy the neighborhood.
sage perez	90033	it is bad for community. Fuck their fancy gentrifier apartments.
Karla Esquivel	90031	We should use the money to help the homeless and to build homes for the less fortunate.
Xochitl Anceno	94931	I don’t support gentrification
Ashley	90065	we didn’t ask for it!
Debie	90031	It will ultimately cause for rent to increase meaning many families won’t be able to keep up with the rent; therefore, they would lose their homes.
Brandon Bonilla	90004	It will displace working class people of color
Nelly Sepulveda	90031	We can’t afford more evictions

Melah	90018	It’s not okay to do something that will directly impact the community without first discussing it with the community.
Denisse Ojeda	90031	gentrification!!
Elora	91208	I grew up in cypress park on Isabel St and Maceo. I was forced to move out of the home my family had lived in for 3 generations because of gentrification like luxury apartments. Luxury apartments only hurt low income comr
Daniela	91343	No to gentrification !
Lisabeth collins	90029	Los angeles in the midst of a housing and eviction crisis does NOT need more luxury housing, the city is GLUTTONOUS w luxury housing
Joseph Rihn	90042	We need affordable housing NOT luxury housing.
Caitlin Wylde	90026	No more useless high cost ugly condos and housing units when low income housing is so desperately needed esp during COVID
Rita Del Cid	90004	Lincoln Heights is the first district in Los Angeles. We need to preserve the history of our city and stop gentrification. We need to protect our friends, families and our local businesses. Making new buildings that will raise rent
Michelle Schimek	90027	As residents of the community we DEMAND this not be built. NO ONE SHOULD BE DISPLACED for this.
Sam Torres	90255	Gentrification is violence ,the preservation of culture is important ,people shouldn’t be ripped of their homes
Malia	91605	
Brittany Pires	90038	No more big developments. No more gentrification. No more luxury apartments when we have a deadly housing issue. Stop pushing out families. Stop eliminating integral LA communities. Stop targeting BIPOC. Fuck your sk
Justine Bernacet	90042	We don’t need our people to be pushed out of their homes to make room for only those who can profit and make wealth off of the community we built.
Brandon Olmos	91732	Bc you didn’t ask.
Flynn Namala	90008	
Malik Gay-Bañuelos	90031	Gentrification threatens those who have lived in this community for generations. The rise in rent has forced many out of this place that we love so much. The community deserves to be heard regarding such a large communit
Mia Shlakman	90266	Gentrification is garbage!
Ava Balise-zsarko		
Dahma	90033	Luxury apts put low income and immigrant community members at risk of being displaced. This project is a step toward gentrification which hurts communities of color, and low income communities during the pandemic whe
Andrea Suarez	95403	I am opposed to the gentrification of a neighborhood that has been populated by people of color for years. This development would have devastating impacts on the community. They were never included in the conversation
Andrew Vasquez		This will facilitate displacement of viler able community members
Kelly Daugherty	92026	That’s a culture you shouldn’t take
Camille Derouin	90068	It’s bullshit
Marc	90746	This is so wrong and gentrification should be abolished. This is pure evil
Joshua Morales	90018	The current residents and communities will be dealt the short end of the stick.
Kris	90031	
Esmeralda	90032	Gentrification
Annie Pendergrast	90042	Gentrification
Gladys vaca	90031	We need housing for the hard working people of this community. Not housing for foreigners
Georgia	90041	gentrification further displaces marginalized groups in a city where extreme homelessness already booms. rich white folk do not need more luxury apartments. This city is already riddled with far too many fancy high rises to t
Diemmi	90012	This neighborhood is home to hundreds of low income residents. No one wants luxury apartments to raise the prices of the whole neighborhood and potential spike rents. Opposing gentrification.
Paul mccaffrey	90031	To Stop luxury housing, gentrification and displacement.
teri newman	90006	bc gentrification is bad and ppl’s homes are at stake
Blanca Moreno	90063	Over crowding and its home to many Latinos
Veronica Morataya	90031	
Tom Park	90020	Displacement of current occupants
Fernanda	90033	Corruption
cuahutemoc tapia	90018	communities should be left to the communities. gentrification is a crime and should be curbed at least and reversed at best.
Lisset Silva	90810	It’s not beneficial and will harm those in the community more.
Anna Flores	90063	This project will displace Latinos in the community by increasing rents and evicting people from their homes.
Natalie Ramirez	91342	This project will leave people the people have lived here in the streets.
Stella s	90068	It’s oppressive and ugly
Maxwell laurance	95062	
Olivia crawford	90031	Gentrification will push residents out of this beautiful city and destroy the community
Francesca		I want Lincoln heights to maintain it’s community. Building this new unit would jeopardize individuals in Lincoln Heights.
Liza	90031	
Ramona Gomez	90006	Gentrication/ Housing in affordability
Paula Peng	90034	We do not need ANY MORE LUXURY DEVELOPMENTS DISPLACING COMMUNITIES IN LA. The gentrification stops with US!
Gerardo Navarro	90063	I grew up in Lincoln Heights (209 S. Avenue 19), me and my family were practically forced out by the owner raising the price of the rent and we could no longer afford it. We ended up moving to the neighboring town, Boyle he
Andrew Rodriguez	90032	
Sasha Fuentes	90029	Gentrification is the worst!
Jazlyn	90012	Gentrification is the worst thing to happen to our diverse communities.
Becky Diep	90031	My community should not be gentrified.
Clarisse Lopez	90041	projects such as these price out the long-standing communities within the area
Rozzie	90745	Stop gentrifying neighborhoods
Jaylin Erath	90017	Gentrification ruins lives
Andrew B	90031	Gentrification has already taken parts of Highland Park, Boyle Heights and other Latino communities. The transplants who come here are mostly white invaders who have harassed my community by calling the police on us, t
Jose Luis Herrera	90031	Lincoln Heights is a low-income community with a homelessness problem that the city needs to put their attention to. Housing is already commodified, even though it should be an accessible human right to everyone, and lu
veda faust	11121	
Maryann Vasquez	90065	To Stop gentrification
Madeline Lough	90031	Lincoln heights is a beautiful community and it needs to be preserved! This development will only serve to displace the people that make the community what it is.
Meredith Hamilton	90042	It is disgusting that LA's city hall is actively participating in the displacement of lower income people by bypassing their community led councils. The endgame of which, is the erasure and replacement of culture, history, and
karsen	91506	blatant gentrification that will cause erosion of culture and people who live here.
Isabella Rios	91107	No to gentrification, no to displacement. Stand with residents and the community over corporate interests.
Alynda Garcia	90032	Don’t Gentrify Lincoln Heights
Diana		please no.
Vivi	90012	it would disturb the community and end up contributing to displacement and be an eyesore
Evelyn Vasquez		
Meaghan Mullaney	90042	It would ruin the integrity and charm of the neighborhood
Daniel Estrada	90032	It’s simply not right that families are getting pushed out of neighborhoods they’ve been in for years, to bring in people who don’t care about the displacement. Voices need to be heard
Daniela	93117	An existing community should not be pushed out of their neighborhood due to an increase in rent that clearly they cannot afford.
mirza	90022	Gentrification isn’t right. The working class can’t handle this, especially during this pandemic.
Paola Santos	90031	Noone in our community will be able to afford this. We do not want this to be like highland Park.!!!!
Minerva Camargo	90031	This will only serve in displacing me and my mother .
Carmen	90020	We cannot keep pushing out homeless / lower income housing. LA already has a massive homeless population and the demolishing of this building will only contribute to a problem that we have not yet even begun to solve.
Mike carillo	91201	
Adam Corona	90065	The fact that the community has no say in the matter, and the fact that the evictions and displacement is taking place at such a high rate is wrong. Let the people who live in the community have a voice.
Nikole Morales	90026	This project will and is the first of many to come that will continue to displace the people of Lincoln Heights. The median household income is below 30k, this project will invite those who are way above that income threshold
Brianna Henriquez	91204	Gentrification effects the community, families will have to move out due to rent increase, families will have to face homelessness which is already effecting families in neighborhoods that have been already gentrified, erasing c
Yahtil	90242	

Amelia	90065	
Scott Hodges		It would be bad for the community.
Keko Jackson	90033	Let the community talk and down with the development and displacement
Beatriz	90004	Because it's wrong
Carina amador	92104	
cynthia	90031	We have enough gentrification in our neighborhood. We should be focusing on what serves the community, not how it can be exploited for money.
Annette	90031	I don’t agree with displacement of families.
Gabriel Morales	90031	People in my community are being pushed out, and I grew up on this street.
Roger Hallaway	90019	The city of Los Angeles does not need more luxury housing. It needs more affordable housing for the everyday people who actually live and work within the city.
rebeca	95116	
kathleen c	91343	I am against gentrification.
Erick	90031	I am someone who has been displaced because of gentrification. My family went from paying $800/month in a house I lived in for 21 years in Lincoln Heights to paying more than double ($1,800) for a house in Lincoln heights
Arlene Rivera	90042	We need affordable housing for all. Not just for the rich.
Lizeth Ruiz	90031	This project will displace countless people and contribute to the problem of homelessness.
Isabel	90033	
Diana Choi	90020	get these fucking luxury developers out of LA, they’re gentrifying colonizers
Leslie	90031	I oppose this project because I live in lincoln heights & I know the struggle of paying bills like rent for families of poc. My own family struggles with our $1,000 rent. This project will most likely kick many families out of their ho
Jose Perez	90022	No to gentrification
Abrielle Stedman	90041	Let’s maintain the current culture in the neighborhood.
Vanessa	90031	I have lived here in Lincoln Heights since 1995! I want this neighborhood to stay affordable and not be dislocated.
Melinda Parker	90065	It’s nonsense!!! We do not need that big of a complex anywhere in this city...
Devin	91601	The input of the locals wasn’t considered. This construction is paving the way for more gentrification 🤦🏾‍♀️
Katarina Gleicher	90042	It does not reflect what the people want
Anthony Garcia	90031	Low income families losing their homes or ability to rent. Creating more homelessness in our city that is already enduring a health and financial pandemic.
Katherine Grace Wa	90042	This is gentrification, pushing out a cultural center in LA for characterless apartments that will only be affordable for the rich to move in.
Jessica Espinoza	90032	Fix the homeless problem in our communities before building new luxury structures
Frank Vasquez	90065	We don't need luxury. We need 100% affordable housing for low income resident that are already in Lincoln heights
Jackie Villaseñor	91790	I don’t want to see the neighborhood where I grew up, taken over by gentrification. We cannot let another city with so much culture be taken over with apartments that are not suitable for people that make up the working clas
Kai Schelly	90065	To protect the community
Brenda	90032	We love our community and diversity.
Matthew Padilla	87124	Yes
Morgan Purcell	90032	Gentrification is a direct threat to the working class and minorities in the community
Lupita Gonzalez	90031	Gentrification
Lizbeth Meza	90031	taking away community of lincoln heights
Samuel smith	90039	It’s gentrification at its finest.
Priscilla v	90065	Lincoln height didn’t approve this
Isabella Tong	92620	This directly negatively impacts residents and created illegal evictions, inflated prices, etc. It is a cultural genocide on the working class community of Lincoln Heights. Furthermore, the public was not informed of these develo
Ana	90031	I have lived here my whole life my mom grew up here I grew up here. I love Lincoln heights. The control rent is necessary for the Latin community here. Building this horrible building will bring outsiders to Lincoln heights drivir
Carolyn Fernandez	90031	I oppose this project for the sake of the community, the space being taken from residents whom have built lives in our neighborhood and making this neighborhood beautiful and full of its charming nature. This new developr
Lucia Lopez	90031	I oppose this project because this is a low income community and it needs more community resources not expensive housing.
Juan Nolasco	90065	
Nicole Ramirez	90065	There is no purpose for housing in this area.
joseph grasso	90005	i am a believer in the rights of humans to live where they were raised. where they feel they belong
Emelyne Camacho	90042	These apartment complexes do not provide help for the communities that live around it. It is counterproductive in the idea that low income communities need more resources (the city of LA loves to show off how much they a
luis leon	90032	Well for one rents will raise up making low income residents leave and all these business workers care about is money than other people's families. These families will have to move and make new friends, new jobs and for wh
Nathalie Zamora	91755	
Mallory	90032	Lincoln heights is a place of history and families, not for generification
Kristina Montecino	90042	Fuck Gentrification. Gil Cedillo’s dream is to gentrify the places we have left. I live in Highland Park. I know it too well.
Joel Montejo	90031	It unfairly displaces the Black/Latinx residents in Lincoln Heights who face the pressure of such projects through increased rent, discrimination, etc.
Cesar M Navarro	91107	Lincoln Heights is home to family and friends who have been a part of the community for decades.. this project along side with many like this displace my people; many of them who have contributed so much for their familie
Mitchell Valine	91001	I do not live in Lincoln Heights, but I don't like gentrification. This has to be stopped.
Jesse Marinero	90731	Gentrification is cultural erasure
Nathaly	92570	Its where my mom went to school
Nicole	90017	This project will not only raise rent, but it will not be affordable enough for the community that currently resides in Lincoln Park, thus erasing the community. Gentrification is direct violence to lower income families and familie
Gabrielle	90062	The people who are raised here and call it home deserve to keep their home
Valeria Villela	90031	
Minu jun	90042	LA needs more affordable housing and spaces for those affected by covid. Not apartments that’ll further gentrify Lincoln heights and cater only to the wealthy!
Natalie monge	90031	Gentrification
Zoe	96067	Because it will effect the people
Anonymous	N/a	This project should never be part of Lincoln Heights. This building may bring up tourists or luxurious people to bring in more of a unhealthy environment. Plus, most of us won’t be able to afford the pricing for a one night stay
Génesis Nam	90004	
Alexander Villaseno	90031	Lincoln Heights need affordable housing. Not luxury condos that the community cannot afford.
Crystal Gamboa	90031	
Zelideth Padilla	90670	Stop gentrifying our cities and displacing communities vulnerable to erasure.
Mia	95403	This is gentrification. You are displacing people from their homes and attacking those in the area by building LUXURY apartments in a middle to low class area without community input. Stop criminalizing the poor. This is OU
Aylin	90026	I oppose because displacement of people of color is not right. People deserve the place they have been living for in years. I live in Echo Park and have seen this happen. Do not let it spread more please.
Linda	90031	It increases cost of living!!!
Karla Vega	90042	Gentrification is forcing families to leave the cities they grew up in and it’s not okay. Their families built this city and shouldn’t be forced out bc LA is the new trendy hot spot, let those people stay in West Hollywood.
Rachel Rosales	92881	You’re taking away one of the greatest things that makes LA so unique and beautiful; which is it’s rich diversity of people of different backgrounds that are willing to welcome you with open arms.
Alfonso Meza	90032	Because this is a classic case of gentrification, rents in the area will skyrocket and will push out families that have lived their whole lives in the Lincoln heights community.
Mike T	90031	It will cause displacement of the people here
Justin W	90032	Gentrifying developments do not support or invest in communities.
Jocelyn	91306	Bad
Carlos C Tejeda	90031	I have serious concerns that the project may have been pushed due to corrupt back door deals and not due to the best interest of the residents of Lincoln Heights or Angelenos at large.
Connor Johnson	91207	Gentrification is wrong and evil.
Kristi case	90057	Stop Displacing Local communities and gentrifying for your profit and stripping our city of any culture
Celine Merino	90038	Gentrification has been tearing up LA communities for far too long. The people’s voices matter and when they stop, listen.
Nicole Ice	91206	
Sam	92651	For families’s homes
Sarah Ginsburg	90039	Lincoln Heights is one of the most special neighborhoods Los Angeles has and this is because it hasn't gentrified as fast as other neighborhoods like Echo Park and Silver Lake. But a development like this would change eve

Morgan Marshall	90002	We must keep our communities safe from. Building units like these raise rent and gentrify black communities.
Lex Darco	90027	Housing is a human right!
Emily	90650	It’s contributing to gentrification, which its impact can be extremely negative.
Margarita	90031	It doesn’t represent/benefit our community
Danielle Franco	90063	I hate gentrification.
Angelina	90026	I don’t like
damon	91205	It doesn't seem motivated by the community. It would be disturbing the peace; ironically becoming the eye sore because certain people want to monetize a view.
Jade Muslar	91104	I'm a resident of Pasadena and don't think it's a good move for the community. Many people here are also students and it's hard enough to find affordable housing close to campus
Matthew Ribarich	90031	There’s been no public accountability or input into this project, it threatens the lives and homes of everyone in Lincoln Heights, in a time when evictions are skyrocketing and everyone is out of work it’s unfathomable that we’
Alan ortiz	90031	I oppose this project because these Caucasian’s and Asians move in and think they big shot and start thinkin this they area now and they give the rules like no and we can’t do nun because if shi cracks they winning cause of
Juan	91732	I oppose this project because we as a community in the Northeast Los Angeles had no say in this projects construction and the people developing did not even have the enough respect for our community to even open up a
Brianna Doria	90032	Put a stop to gentrification.
Jonathan adame	90063	Fuck the city council members for allowing this gentrification to continue. Build something we need , not 400+ apartments we can’t fucking afford.
Matthew Rodriguez	90031	I want to help my community even more.
Talib Mudiwa	90019	Unethical
Joe Gamache	90039	I oppose this project because it will rip apart the social fabric of the Lincoln Heights. This is an act of violence against some of the most vulnerable members of the community by greedy developers, and the property-owning
Mercy Solorzano	91801	Gentrification is not ok. Driving out low income families mostly of color for profit shouldn’t be the answer. These communities have been the home for many POC specially Latinx and Asian Americans.
Javaun Crane-Bonn	90042	Gentrification with luxury apartments erases the history of the neighborhood and pushes lifetime residents out. It is the last thing that the community needs. There needs to be more affordable housing, not more exclusive ho
Melissa cortez	93550	Its Gentrification
Bianca	92804	This is a threat to the city and the community. Building luxury apartments in a neighborhood where people value community more than amenities wouldn’t add any value to the producer, consumer and the Lincoln heights nat
kimberly moulic	90041	because we don't need any more WHITE men moving into our land. disgusting. you could've funded something else like creating shelter for homeless but this??? wow.
Hannah Kang	53511	I condemn the gentrification and displacement of a POC neighborhood.
tom	10002	i’m sick of developers and greedy politicians displacing communities and ruining lives. community > capital.
Andrew Tulin	91801	
Andrew Patton	95112	Gentrification forces poverty. People can’t afford rent as is
Diego	90031	
Lucero Tolentino	90042	Despite the fact there is so much gentrification going on, the people who live near will get kicked out equals homelesness
Andrew Emard	90065	lincoln heights / LA doesn’t need more “luxury” apartments that can sit empty for months or years while thousands live on the brink of losing their housing / are forced onto the street bc of a developer manufactured housing
Jaqueline Espinosa	90065	I oppose this project because the city should be providing affordable housing and not luxury apartments for the upper class or drawing attention to upper class.
Maggie Wood	91302	
Matt Endler	90033	This housing does not serve the community that the are belongs to.
Leticia Llamas	90031	
Laura Shumate	90068	The residents of Lincoln Heights that have been there for years and decades won’t be able to afford the rents that will go up in the a) new building b) their current homes as landlords will raise the rents out of greed and possib
Alejandrina Anguian	91104	I oppose a project that’s clearly in favor of the displacement of people who are already struggling.
Iiia Xochipilli	90007	I’m indigenous
Paige McGhee	90032	We should start with appreciating Lincoln Heights for all it has, create a plan to renovate the spaces in the community for the community that already lives there...not for gentrifiers.
		It will only serve to displace low-income families
Gabriela Ruiz	90031	I’m afraid for my health and being pushed out of my home. Please don’t let the construction pass.
Annabell lee	1060	Gentrification is violence, do not displace people out of their homes
Daniela Encarnacion	90065	Lincoln Heights does not need luxury apartments. The area is already heavily populated and being so close to Chinatown and Downtown will only bring more people and more traffic. Luxury Apartments are usually rented by
Daniela Romero	91214	It will do more damage for community members than good.
Karina	90020	Gentrification is pushing people out of their communities. Overpriced housing is raising the cost of living in what used to be home to hard working families who are just trying to make it in this life and succeed. Gentrification p
Joshua Trujillo-Flore	90063	
Isela Cortez	46224	I used to live in Lincoln heights and even go to school in the area. Currently I live in Indiana, but I would hate to see that they build luxury apartments if people have to move out their homes and have no where to go, just for th
Celeste Barajas	90031	this project will only hurt the community in Lhts not help. They are building unaffordable units to push people out of their own community and replace them with white people that can afford them. You want to help then put m
Bridget Smith	7023	This project is part of a national pattern of gentrification and destruction of marginalized communities. The fact that this project was undertaken without any input from the community speaks to the fact that those involved in
Jared petrich	90057	I dislike those buildings a lot
Kenny flores	90012	
Joseph Gallucci	90031	This is a direct assault by the city and developers on the residents of Lincoln Heights, and a repulsive eyesore to boot. We need protections for renters against evictions and displacement, not tacky unaffordable luxury housir
Ashley Evangelista-	90031	I oppose this project because I was not aware of it until now. I do not approve the further displacement and erasure of the community living in Lincoln heights for many years. The community wants a public hearing for this pro
John	90031	It will change the neighborhood for the worst
Ellery Smoller	90036	It would cause too many evictions. We don’t need more housing developments
Dalton Lopez	90031	Gentrification / rise of rent
Briana	90065	
Karla contreras	90031	Because it will gentrify a community already dealing with high rent . People can not afford to live here and will be pushed out.
Reuben	92055	Fuck gentrification
Steve Lucero	90031	This project does not reflect or support the community. We will not tolerate these inflated development projects!
Emely	90031	Gentrification
Alyssa Julian	90026	Building luxury units in an otherwise very working class neighborhood will drive up rent costs and push out the neighbors that have built the community
Arthur Aguirre	90042	The community does NOT need luxury apartments that have an arbitrary price on them. I can’t even live in my old NELA neighborhoods anymore!
Robert Aguirre	90031	Gil Cedillo is a sellout. People over profits!
Gabriela Cervantes	90022	It will raise cost of living in Lincoln Heights and force life-long residents to relocate.
Alondra	90020	Oppose the project
Arasely sanchez	90602	Gentrification ruins our communities
Grecia C	91764	Going forward with this project will displace families who have been the heart and soul of this community for the sake of “development.”
Amanda Lanza	90031	It is not in consideration of the communities needs
Sabrina Lieu	91208	Gentrification displaces people and raises prices, none of which we need.
Eric Freeman	90004	Fuck Gentrification
Hannah Brown	90042	luxury housing hurts the community
Harley	90601	Destruction of the community
Jerry Garcia	90041	Because this housing development is just going to make it so it’s too expensive to live there and it will kick out people who have been living in Lincoln Heights for years.
Lilly Armstrong	91206	
Taylor Burch	90068	Please stop ruining this city with unaffordable housing please stop gentrification
Melody Morales	90022	the community was not asked for their input!! families who reside in lincoln heights for many years will be torn from their homes because they will no longer be able to afford housing. GENTRIFICATION IS THE ABSOLUTE WO
Ariel Aguilar	22153	NO MORE GENTRIFICATION!!!
Charlotte Zhang	90019	Because LA City Planning, city council, and the property developers they are in bed with care more about profit than the lives and well-being of working class people of color. These people are corporate grifters and deserve t
Isaac Valdez	90270	Against the project because it’s pushes gentrification
Maddie Johnson	90068	Gentrification is violence
Frances emm	90068	Because gentrification is the work of DEVILS. We can’t let any more gentrifiers and polluters into this neighborhood.
Ricardo Luna	91803	This project is going create more traffic and the term Luxury just states this is a prominent location for high salary residents which should be suspended as companies do not want to make affordable housing for those at mini

Jacqueline	93727	This is gentrification
Juliana Sorelli	90068	This Project is ridiculous and a scam, it's going on all over the city with every one of these horrid projects sitting empty.Also as this health crisis has proved it before, there is great danger to suddenly concentrate this amount
Emma home		I oppose it because it start to erase the history of the city. This city has culture and beauty in it with the current buildings it has.
Andrew Tam	90012	It's not what the community needs and is honestly an eyesore
Sophie Reiff	90065	Our neighborhood does not need more luxury condominiums. We need affordable public housing for our CURRENT residents - not expensive housing only attractive to new residents. We want to see our multi-generational c
Natalia MacAdams	90031	This is not consistent with what Lincoln Heights is about. Continuing to displace low-income residents and eliminate affordable housing is a scourge on our city. Our neighborhoods are being ruined by developers and we dor
Vanessa Munoz	91103	They should start that project on a empty parking lot
David	90032	Stop over developing our city for your own personal gain our community is not your personal bank!!!!!
Jette Kavanagh	90012	I oppose this project because we're losing culture and affordable housing for those who need it
Sabrina Bachelier	90019	¡Basta!
Courtney Rice	90032	
Isaac Diax	90033	Its a legal way of trying to kick out people out. FUCK that.
Anatalia Zavaleta	90023	We don't need overpriced apartments kicking out the local community. Especially with apartments like this that would rather be empty + overpriced than filled with people who are part of the community
Joey	90016	Do not plunder Lincoln Heights. This is pure evil. You cannot disrupt this neighborhood ever, but especially during this pandemic where brown folx are struggling to survive. Lincoln Heights does not need your bright, shiny bu
Andrew McLean	90012	It'll be terrible for a city like Lincoln Heights.
Grant cdebaca	90026	This kind of project doesn't belong ANYWHERE in East LA. Greedy out of touch developers like this who have no roots in or understanding of a community like Lincoln heights are a cancer on working class Los Angeles, the
Perla Perez	90032	This is unacceptable.
Simone Rein	91103	Large scale residence buildings such as these force out low income residences and gentrify the neighborhood beyond recognition. Please do not move forward with this project in respect to their people and culture that curre
Torianne Schiff	90032	Our community needs affordable housing, not high end development.
Brigette Plascencia	90031	We need more low income housing not high end housing
Giorgia Mannucci	90041	Gentrification is a violent practice that puts in danger always the most vulnerables. Protect the area and support the rich local community instead of building for the rich outsiders.
Pilar Duralde	90042	There is already a lack of affordable housing. Evictions have begun. The community of Lincoln heights has a cultural and communal history too precious to be ripped apart.
Daphne Quijada	90031	I live in the area almost my whole life and I don't want our community to get moved or changed for other people's privilege. It isn't right. We're already struggling in so many ways but we try to keep our community together ar
Sarah Shelby	90049	I want developers to engage with the communities that they are affecting, every action has effects and the ramifications are clear in this case. A public meeting or forum is the least any business owner can do, though they ar
Ariana Baez Romero	90031	No gentrificación
Francisco Rios	90031	No gentrificación
Sonja giordani	90065	
Ellena Rodriguez-Da	90031	To keep the integrity if the neighborhood and keep housing affordable for the people of the area
Ulises F Angeles	90022	The amount of effort and taxpayer's money wasted this project could be used for community enriching programs and improve overall quality of daily life. Cedillo obviously does have Lincoln Heights majority working class res
Lillie Wiszniewski	98499	
Jackie	90815	
Cynthia	90023	We don't need more gentrification in this city.
Emily	90026	
William Forgey	90027	It's not good for the community
yesenia Gonzalez	90255	Gentrification only displaces people jn out community who are already facing financial, mental, and health problems. The people were not included in this conversation and that is not fair.
Hugh Blunden	90017	I can't stand corporate greed especially from people who don't even take a moment to reflect actions or respect placed on an already suffering community. The fact that most of these projects are lead by vultures that don't e
Mariah Vaca	90031	This change, with which the neighborhood residents were not consulted on, will change their lives indeed by hiking up rent prices and forcing out families that have been here for decades. This isn't Echo Park and it's not abo
Ignacio Mejia	90018	City hall is planning to erase and displace the community of Lincoln Heights
Sydni Wilmore	90042	Because although I grew up in highland park, my whole family resides in Lincoln heights and I don't want to see my city gentrified even more than it is :/
Alicia	91106	
Jessica	90001	Gentrification is unnecessary
Adriana sanchezy	90031	Because gentrification causes so much suffering and displaces minorities and people who make less. It's not right to make housing so expensive that the people who have been living in those neighborhoods can't afford to s
Jane	91202	
Nico Moreta	90039	Lincoln Heights is a lower income neighborhood made up of primarily Latinx and Asian families. Huge development projects like this increase rent, whitewash, and push out these people from their own neighborhood (aka ge
Sergio Hermosillo	90230	we need more affordable housing
Chloe Gilinsky	90026	Lincoln Heights residents do not want to be displaced and have their community disrupted by shitty luxury housing when there is an affordable housing shortage in Los Angeles.
susan	90031	it will displace many families and hurt the local businesses around the area.
David Reyes	91103	Fuck gentrification. Preserve the POC & Latinx culture in these LA communities
Nicholas Mueller	90033	This development represents the dismantling of the community that has resided in Lincoln Heights much longer than any member of the Pinyon group. The sheer size of this development will ruin the community in the inevital
Roxanne De Ment	90065	We need more adorable housing in the area, not a luxury high rise.
Aya	90033	Tenants are people, not disposable property
isis mejia	90063	i'm against displacing people in the area/poc and rising rent/property value and making it inaccessible for people who had previously lived there
Jeremy yoshioka	90034	Lack of transparency is troubling.
Hannah Thorner	94707	
Patricia Orenday	91803	Increase illegal evictions and make rent in area unaffordable
Lauren Risha	95616	I oppose the project because it is not for the people of Lincoln Heights and is just further contributing to the displacement/ eviction of communities and the gentrification of the area.
Juliette	91803	Unaffordable housing for residents!
Sara parsley	90019	Enough gentrification! Protect POC
Anna	91324	I'm tired of these ugly and tasteless luxury apartments filling up every corner of LA. They tear down LA establishments, pieces of our history, our architecture, and displace the working class and people that have been here fo
Anna	91324	I'm tired of these ugly and tasteless luxury apartments filling up every corner of LA. They tear down LA establishments, pieces of our history, our architecture, and displace the working class and people that have been here fo
Stephany Del Cid	91204	It will not help the local community and it will promote gentrification & displacement.
Cassidy	11385	This project will displace many members of the community. It is negligent to put profit over the community.
Zoei Gigliotti	90041	The people of Lincoln Heights deserve to have a voice in this matter. This development could drastically change their lives- and not for the better. Luxury housing and developments are not catered to local angelenos (like my
Stephanie	90031	This project will affect all those living in Lincoln Heights. There are already people and small businesses who are getting pushed to move out. This housing is not for our community but for others who will displace us if rent inc
Victor Barraza	90020	Because Lincoln Heights has been a community and part of the history of L.A. County. These corporations just come in and take over everything which is not right and move out people so I support this petition thank you for
Cittlalli	90031	Displacement of long time residents. It will also create a rise in rent.
Allie	92831	
Nicole Aldrete	90031	Affordable housing
Samantha Garcia	90002	It's an injustice to the minority community. Gentrification will not be tolerated.
malissa	90004	it's unethical
Dominique Vargas	90031	I've lived in Lincoln heights my entire life. 2 weeks after I was born my parents moved from hillside village out of my paternal grandparents house and moved into my paternal great grandparents house located in Lincoln Heig
Reyna Rivera	90039	Displacement of current Lincoln Heights residents. And raised price of living in Lincoln Heights.
Violet Overn	90026	We don't need luxury condos we need affordable housing.
Textli Gallegos	90022	I grew up in Lincoln heights and I do not want to witness another wave of gentrification and erasure of yet another one of our LA communities.
Jeffrey Amado	90063	It's my community and to move families out just because y'all wanna do a damn project, AGAIN, dose t mean it's okay to just decide that.
Leola Sanchez	90405	I oppose the project because we should protect low income households and families and as well as historical areas.
Sophia Wessell	90036	It would destroy the character of Lincoln heights, as brand new huge modern apartment buildings tend to do to any neighborhood.
Alina Ponce	92880	Gentrifications occurring in our own cities have ripped apart families, small businesses, & dreams of young POC in this country for too long. Our parents were relocated & forgotten about but not us!
Alfredo Escalera	90031	I recently moved into the neighborhood. I'm aware the families that neighbor me have resided in Lincoln heights for their entire life and if this goes through those families will not be able to sustain a proper life style if property
Kimberly Berry	91001	I want to live in a city where my kids' teachers can live, where social workers and postal workers can live. Affordable housing is a right. We all own this land.

Mei Su	90031	Because this project won’t be good for the community
Colm Daly	91207	The displacement of the current community is wrong
charlie	92649	
Niomi Munoz	90031	The city needs to help the community, not drive out their residents who have lived there for years. Lincoln Heights is full of beautiful Latino and Asian families that just need support by the city to bring the neighborhoods back
Alejandro	90011	Gentrification of low income areas.
Valerie Lytle	90031	This prospect will encourage gentrification of the area, increase displacement, and increase the number of evictions in the area. It is violent and unnecessary
Ana Santos	90031	This is not being built to benefit or uplift the community.
Wendy Yao	90012	It doesn't serve the existing community's needs or include their input
Valerie	90029	All new building plans need to Invest in the current community. Build resources for them. Please hire from within the neighborhood on ANY new construction jobs.
Aaron marrufo	90031	It's not fit for the community and its erasing our community and gentrifying and kicking out the people who lived here for years
Sebastian Gonzalez	90063	Cedillo has always continually used my image in various projects and helping the community has always been a photo opportunity for him. I can’t sit idly by while the neighborhood is being gentrified.
Aaron marrufo	90031	It's not fit for the community and its erasing our community and gentrifying and kicking out the people who lived here for years
Stephanie	90031	Stop gentrification
Genaro Hernandez	90023	
Daniel Garcia	90640	To stop gentrification!
Jack Symes	91105	This is an obvious and blatant injustice and disservice to the resident of Lincoln Heights who may be displaced from their homes as a result of this project. Think about the consequences this decision would hold for so many
Belinda Rodriguez	90006	This project will ruin a community that has been residing there for years. Rents will be raised, slowly pushing out residents and eliminating culture. Save buildings like this for Santa Monica, a city already ruined by gentrificatio
Larry Molinar	91331	I'm against gentrification
Laura Oliden	90032	To persevere the neighborhood. This project is a direct threat to drive out all the people who have lived in Lincoln Heights their entire life.
Wessim BenSaid	90065	Because it affects various families and businesses. It is an attempt to separate us as a community and mess with the cultural identity of the community
Erica Almodovar	90023	This will displace the community of Lincoln heights.
esmeralda molina	90031	Lincoln Heights is a community enriched by people from such diverse backgrounds. We need to protect this from companies coming in, displacing families from their homes, to make profit off of what was NOT built nor nouri
Jessica Bley	90031	I oppose the building of large multi unit establishments to preserve the natural history of Lincoln Heights
Francine Yep	91107	
Ariana Robles	91016	To protect the community of Lincoln heights from greed!
Paloma Macias	90031	It is an infringement on the community.
Dasha cuevas	90022	This project feeds into gentrification and would hurt the lower/ middle class economy.
Joanna Sanchez	90501	I may not live there but I have friends and family that do. Immigrant families built Lincoln heights, echo park, highland park and East Los. This city is forgetting the History of racism and displacement. Remember white people
Lily Taggart	90065	It threatens to push out the community already living here and would not contribute anything to this neighborhood.
Ron Vargas	90031	When the project in Lincoln Heights was pushed through for the historic societee it ended up being very bad for the people who lived in the area not being able to change things on their house without a panel of people giving
Leilani Gonzalez	90201	its unfair
Anya	91030	I use to live in Lincoln Heights and I don’t want it to become something that is not. It is a beautiful historical neighborhood and this will just ruined it, plus it would suck for many families that live here now and would have to m
veronika syrop	90016	destroying our city
Hershel	90016	These large ugly apartment compounds are destroying LAs historic communities and displacing residents who have lived within these neighborhoods for decades.
marley	90027	i’m anti gentrification!!!!
Steve Zarazua	91706	Gentrification hurts our communities by displacing low income families out of their homes from the increased rent and general increased cost of living within the community. Fuck gentrification.
Kathryne dameron	90032	How in gods name are you going to push a project like this through; in the shadow of the gross political corruption marring The LA development infrastructure? This reeks of corruption and you better believe if it’s rushed into
Elizabeth Origel Gal	91020	My parents and family members reside in Cypress Park and have been part of the community for over 20 years. Developments like this don’t offer enough low income housing to the current residents in the area. Market rate
Anthony	90031	Threatening my livelihood
Crystal Santamaria	90033	
Ariana Perez	91723	Fuck gentrification
Michelle Guzman	90016	i have similar incidents happening in my neighborhood and i know the harms it brings to the people who have always lived there.
Christine Stephanie	91732	Family and friends live in this area.
Alberto L Duarte	91104	We need to preserve our cities heritage
Stefhani	90032	
Andrew Lawson	90026	Communities should be involved in decision making regarding new developments.
Nick Taggart	90065	This type of corruption and destruction of our beautiful city must stop!
Tara Castellano	91101	
Adrian Apana	91202	The inequity that it brings to the people of the community—to put money into the pockets of big spenders who place no value on the history of an area, nor seek to truly give help to the communities there, while it is within th
Bianca Mendez	90037	Because if it's not for the people, we don't want it!!
Mel Mendoza	90031	Gentrification hurts communities
Evan	90004	This project will harm the fabric of the community and displace people. No more gentrification.
Monica Farge	95123	Displacing the people of Lincoln heights without even having an open dialogue is unfair. Having luxury apartments open up, knowing it does not aid the community is also unfair.
Carlos Gonzalez	90031	I stand against gentrification and the construction of luxury apartments such as this one that will run out long time residents of Lincoln Heights.
Alvin	92832	This happened in my own community. I can no longer do anything about it in my own community, but i can help other communities prevent this. Stop gentrification
Kellen Harrison	90065	It’s two blocks from me and will drastically change the neighborhood
Julienne	95123	
Nai	77024	
Jacqueline li	91030	There is already an incredible lack of affordable housing available and too many luxury apartment buildings with vacancies. We don’t need more unaffordable housing/gentrification of neighborhoods. We need to address the
Jesus	90031	Will be kicking out people of low income who won’t be able to afford anything outside the rent control zone
Stevie Hammork	92691	The over priced eye sores that are “luxury” apartments take character and community away from Lincoln Heights. The money used to create these monstrosities would be better used to help the communities low income resi
Itla Tamayo	90031	
Paul Tamayo	90031	rent will go up and wont be able to afford current living lifestyle
Marissa Casillas	90042	It will dispose of families that have lived there for years and they will end up homeless or struggling to find somewhere affordable to live
Filibardo Mora	90260	Making City officials and Government transparent is key to making true change not only in communities like Lincoln Heights, but statewide.
Jenn	90004	No to gentrification
Amy Rodriguez	90033	YES. Erasure of culture, gentrifications, the fact that this project isnt made for the community its made to attract people from other cities and completely displaces members of the community.
Jennifer Moreno	90063	It does not serve the existing people in the community
Elias Pack	90065	The developers are preying on the economic powerlessness of the neighborhood. If the median income of the median current resident of the neighborhood could not permit that resident to afford the structure's median apart
Crystal Latonio	90026	Gentrification is Genocide
Alexis	90032	Will raise rent and destroy small business this isn’t a luxury neighborhood and there is already enough apartment why don’t they make shelters for homeless families instead of bringing in more people with money who don’t c
Aranza	90042	
Hunter Tidwell-Higg	91406	
Landon	98042	It sounds like gentrification of Lincoln heights.
Megan Waldau	91355	Gentrification is genocide.
Taylor	98107	Growing up in Los Angeles/Pasadena, and now living in Seattle, bearing witness to wave after wave of gentrification, I am standing up for my childhood home in the hopes that it remains socially, culturally, financially, and spi
John Salseda	91030	Gentrification
Adam Jerro	90031	No public housing option, no community involvement.
Alondra Romero	90031	To help make my community better for the residents already living in it.
Jamie Vivaldo	90031	Not what the community needs

Katya Zirulnik	90033	Luxury housing is not needed anywhere in LA and particular in this community. There is a lack of affordable housing that's crippling the security of hardworking families. People over profit.
Keven Acevedo	90031	The project will rise the average rent in Lincoln heights
Jina Rabinoff	90031	Lincoln Heights needs affordable housing! Not luxury apts.
Jen	90001	I'm opposed to gentrification and rent raising in predominantly latinx communities. This project will push out low income families who rely on communities like Lincoln heights for housing.
Nury Bolanos	90031	We were never advised of this new project . Gentrification Destroys communities, pushes out our diversity in our community .
Ismael Salazar	90031	Because it displaces working class people who already struggle to live in this community. Pushing this project forward will only displace more people.
Rory Hayes	90041	Gentrification is wrong
Diego Chiat	90039	Because it will displace families
Fabio Beltran	90027	I oppose the construction of any building that threatens the stability of the existing community. This construction will lead to consequences like raising the cost of living and diluting the diversity within the community. I strong
Rebekah Sanchez	90031	!!!
Gina Niekus	90041	It is a product of government corruption and gentrification.
Alexa Soto	77338	
Brian b	90031	Gentrification
Miranda	91706	It is gentrifying a very culturally inclusive area
Tristan neihart	90043	Luxury apartment raise rents to exorbitant prices that people who grew up and have families ties in these areas can not afford. These types of projects do not benefit the people who actually care about our city and the cultur
Jessica Garcia	92346	Because fuck gentrification
Liz Munoz	90706	Gentrification will lead to not only erasure of the culture but to eviction of low income families
Francisco Rodrigue	93505	I never asked for these to built
Jonathan	90717	Yes, I oppose this project. stop the modern colonization of p.o.c communities,
Cecilio	90057	I quote from the article above " . Lincoln Heights is the oldest most historically diverse neighborhood in LA and residents have had to endure generations of racial inequity". We are dealing with so much for people to start wo
Priscilla Hernandez	91732	Displacement of families is not cool
Victoria Rojas	90042	
Sam orlin	90042	The gentrification and displacement that comes from this project has no need in Lincoln heights
Gabriel Partida	90065	These development projects are hurting us who have lived here.
Vanessa	93421	Saving the community
Jacob	90032	I don't support gentrification and would rather invest in affordable housing for the existing community
Marco f	90006	I'm against the displacement of low income people to develop a luxury condo project
Leonel Hernandez	90066	It will raise rent on the minority community that lives there
Alyssa	90094	Stop gentrification
William hird	90005	Luxury apartments do not serve the people who live in those communities - instead they force longtime residents out and are a lightning rod of gentrification. The only reason these are being built are to service high income in
Emily Jacobo	90031	These new complex will just bring more economic hardship to the community and those surrounding it. The new apartments on griffin avenue by the la leadership primary have caused such a big change in the neighborhood
Katherine	90041	
Jennifer	90057	Gentrification pushes out our people. Our people get displaced from their homes! it's not fair to let rich folks do this to our people especially people of color.
Alfred	90027	This development will only continue to displace and erase the Lincoln Heights community.
Daniela	90031	We are tired of gentrification
Sergio Ramirez	90046	I was a Citizen of LH during my teens, and know in my heart that that building is not being made for the Generations of families who have lived there. It is all for Profit
Maggie SanFilippo	90026	It will force people out of their homes and raise rents
David Burrill	90031	This is another way to gentrify culturally diverse neighborhoods and to drive out P.O.C. who are low income while you drive up cost of living. Not in our neighborhood
Lindsay Barker	90042	Fuck gentrification! Building luxury condos will push out lower and middle class working families!
Erin Walsh	90035	Disrupting the Lincoln Heights community with this apartment complex is a blatant example of gentrification. Communities of color will be displaced by this project, and it is insulting that the Lincoln Heights community has h
Valentina Zapata	91754	Stop the gentrification. Stop the evictions.
Salma Rojas	90041	I refuse to sit idly by as rich people gentrify neighborhoods thus displacing low-income communities of color. This is not the type of investment in communities that we want!!!
Noa Rosenberg	90004	
Israel Hernandez-R	90640	The obvious gentrification of one of the most Historically Diverse communities in LA is absolutely repulsive.
Miguel Abriz	91406	Not fair to the low income community and minorities
Jessica Lara	90201	I strongly oppose this project because tenants will be illegally evicted. Displacing them from housing in a neighborhood that belongs to them. Lincoln Heights residents deserve to heard and should not be excluded from this
Claire Hunter	90031	I love my community and do not want further displacement
Jeremie Peters	91202	Gentrification is one of the most vile forms of racism/classism and must be stopped
Justin Aragon	91755	Gentrification is not for the people. The people of Lincoln heights do not want this in their neighborhood.
Jessica Takeda	94720	we need affordable housing, not luxury condos
Robert Pena	90033	We do not need almost 500 luxury apartments that will displace many families.
Nancy	90042	We need affordable housing not luxury condominiums which will only cause GENTRIFICATION
Samuel Ruvalcaba	90638	
Bridget	90026	Because I'm tired of them tearing down our buildings and gentrifying the area with apartment complexes. I'm tired of them building apartments where the people who have lived in the area for years are being kicked out and
Preston Mendell	90019	I used to live in Lincoln Heights a few years back and knew this day would come. I always try to draw a line between development, which is a sort of inevitability in urban life, and rampant gentrification. The idea of a building
Favio Espejo	90032	This will create a chain of events of people wanting to gentrify a low income neighborhood. This will encourage gentrification in our neighborhood and will displace many people who'll struggle to find somewhere else to live
alexiss palarea	90031	
Christian Diego Bae	90011	My People are being supressed by Genderfication and a lot of shade is happening behind this project
Brittany	90026	You're going to be moving on members of the community who have been there for generations.
Priscilla Rodriguez	90031	The proposed project will push locals out.
Samantha Avitia	90032	
Sierra Morris	90035	Stop gentrification
Ashley Del Cid	90026	New luxury apartments have been coming up for the past 10years one on every block in the neighborhood that i grew up in saw my entire neighborhood get torned down and the people living here for decades get pushed ou
Charles	90031	Doesn't seem right
Rafa Mendez	91744	The community never had a say on whether it should be built, and it will only lead a path to homelessness/displacement of the community
Mikel	90006	It seems dramatically out of step with the neighborhood. Also there's no way it will be affordable for the people that already live there. I used to live in Lincoln Heights, and appreciated it's architecture and history most of all.
Israel Lopez	90066	
Brenda Romero	90037	Because no one asked for it.
Devin Ratliff	90026	
Carissa Velasquez	91803	These apartments will not be affordable for the community who live there and will therefore be of no service to the people who have lived their for decades. Stop gentrification NOW
Mabel Rojas	90022	Lincoln heights is a brown Latinx community, I would hate to see this change!!
Joshua	90031	Development on poisonous toxic materials in ground
Xiana	90063	Fuck gentrification
Augusto Dabos	91101	gentrification is genocide
Sophia Lang	92028	This project will displace so many lower income families and individuals, maby of whom will struggle to find another living situation they can afford.
Nadia mendoza	90041	We don't need more luxury apartments when there's businesses and families who are going to get pushed out. This isn't any city for these people, it's their homes and where they have spent all their lives.
Nadia mendoza	90041	We don't need more luxury apartments when there's businesses and families who are going to get pushed out. This isn't any city for these people, it's their homes and where they have spent all their lives.
Thomasina Sanders	90039	Gentrification destroys communities
Adali Olivares	91770	With little to no public I put, no development of this size should be approved. Especially with the fact that it will affect current residence near the proposed site in regards to the negative effects of gentrification. This includes e
Andrew Orozco	93550	I am a former resident of the area and have family currently living there.

Cesar Hernandez	90019	I am advocating for equal housing rights for minorities. In such a historic location such as Lincoln Heights, La Raza will not be pushed out nor be gentrified
Cindy Balbuena	90063	I used to live in Lincoln Heights, but rent got too expensive. My family, and a lot of families lost their homes. This should not traumatizes the families already living in that area by making it unaffordable. This displacement hap
Alyssa Aldaz	90041	
Megan Miller	90042	I want the people who live there to be able to continue living there. I don’t want people to be pushed out because of a “luxury condo”
Charles Galin	90032	Bringing unnecessary spending instead of the necessary spending in the community
Stephanie Galindo	90032	Bringing unnecessary spending instead of the necessary spending in the community
Priscilla Galan	90031	Unaffordable Housing in a low income area only sends one message to the people who live there, that they are not wanted.
Lucila Caro	90065	To protect affordable housing in Lincoln Heights
Samantha	90022	I support the community not corporations.
Alex Emmons	90031	No more over priced ugly condos in East LA
Isabella Rodriguez	90032	It’s trying to erase and displace the community that already lives here.
Celeste Escobedo	90003	the culture of poc in la is in jeopardy as culture vultures that push gentrification into neighborhoods with Rich history
Maya Chen	90041	This project directly counters the needs and wants of the neighborhood and community. Los Angeles is already suffering from gentrification, and this will only further this crisis.
Jennifer	90023	The rent is making it unaffordable for many Black and Brown families to stay in that area.
Ashlianne Sharma	95747	Gentrification is bad
Dana	91321	Spend money on the people who already live in Lincoln heights; youth programs and community gardens would be a much larger benefit than an apartment that will make the poor poorer.
Orville	90042	It threatens to displace the current residents of the neighborhood.
Sharon Escalante	90033	Gentrification will ruin LA. It’s authenticity will diminish and the people living here will have to relocate and no longer have their homes where they have lived for years due to highly priced luxury apartments as such.
Daisy		Gentrification will ruin a community of Chicano citizens
Valerie Benavides	90033	This building will threaten people living in the community with evictions and could cause rent increases in the community.
Nicole Cavazos	91773	Stop the gentrification of Lincoln Heights to protect the lives of the members of the community
Alexandra Slusser-E	93720	
Destiny	90065	to protect our neighborhoods against gentrification
Cristina Carrillo-Dor	90063	it doesn't not support the community. It hurts it
Janelle Ketcher	90031	Development like this requires community input
Sylvia Ramirez	90031	This housing is not for our community and will only serve to displace us.
jasmine martin-part	90089	
Eireann O’Grady	90027	No community input
Carolina	90031	Because it’s my neighborhood and we should be ask if it’s ok to build something so big somewhere i was born and raised.
Steve	90031	No gentrification
Justine	90032	I believe that people should not be forced out of their neighborhoods by greedy developers!
Jazmin soto	90031	The cost of living will go up, and the middle class can’t afford.
Thalia	91107	Gentrification is violence
Ellie Butler	93953	
Olivia Caplow	90039	It’s just enough already. Not only does it displace human beings... it’s super ugly. “Ugly” doesn’t even suffice as to how much of an utterly oppressive eyesore this building is. Also are we this deeply incapable of reading the r
Monserrath Resend	90023	Gentrification leads to displacement of the community members. I oppose this project because it’ll harm the working class community of Lincoln Heights.
Rebecca Lopez	91801	It will displace the residents of Lincoln Heights and the new residence will not house current residents of Lincoln Heights due to it being unaffordable.
Anna Sanchez	92139	
Esmeralda Dimas-P	90033	I oppose to this project because I do not find it fair, that the council didn’t try to make it public.Also many people will be kicked out and lose their homes, all for money.We need to let their voices be heard and they will be.It is
Adam Verdugo	90029	Because the building threatens the lively hoods and businesses in Lincoln Heights
Anthony Johnson	90007	It’s gentrification and it is trying to erase the community
Emily Connor	90029	This is exploiting the neighborhood and pushing out a community that has been there for a very long time.
Gena Salorino	90031	We need affordable housing not luxury housing
Kristine Escobar	90065	The project threatens the families and communities that reside in the area. This leading to a domino effect whose ending has potential to be catastrophic for some.
Raul Cordova	90031	It displaces disenfranchised people in need of affordable housing
Emily Campos	90002	We need public housing in Los Angeles, not luxuries apartments. The culture of the community does not need to be changed.
Steve Abee	90032	It doesn’t fit the neighborhood in terms of needs and design. You need housing for the people. Not the wealthy.
Grace Gallagher	90020	Displacement is wrong. Everyone need the right to affordable housing in their neighborhood
Asya behram	90026	I love Lincoln heights we do not need another huge developer coming in.
Scott Williams	90031	This is not affordable housing. We have enough luxury housing.
Axel Hernandez	90031	It is not being built in correlation with the wants and needs of the neighborhood!
April	90023	We need AFFORDABLE living not expensive gentrifications apartments that the community can’t afford.
Nicole Y		
Kassy	91342	It is not fair to the people living in this community.
Vanessa M. Peralta	90032	I disagree with the displacement of minorities who have called Lincoln Heights their home for practically their whole lives. I would like to see change for the established community members currently living in the area instead
Marta G	90031	we dont need luxury apartments in our neighborhood, but more parks, other recreational stuff for the families already residing in LH
Emily Schkolnick	90064	Preserve the diversity and integrity of our neighborhoods. Fuck predatory landlords and developers who are only after a profit and are destroying the cultural fabric of our city, exacerbated even faster by the COVID disaster.
Olivia Giron	90042	i hate gentrification.
Vanessa M. Peralta	90032	I disagree with the displacement of minorities who have called Lincoln Heights their home for practically their whole lives. I would like to see change for the established community members currently living in the area instead
Diana murrieta	90023	Lincoln heights is not a place for luxury apartments that will only end up displacing the people who’ve raised their entire families in the community.
Jonathan Sandoval	90031	In my defense and experience living in Lincoln Heights, the volume of traffic will increase, given people commute towards downtown direction to avoid freeway traffic. Pasadena Ave is not wide enough to act as a commercia
Sammantha Rodrigu	90033	Lincoln Heights is a historic community. If the people who have lived here for YEARS can’t afford the rent then why build it ? Why up the pricing of housing that can be used for people who want to live close to their parents ?
Ava	90065	
X	92704	Building luxury apartments in a largely POC inhabited neighborhood in no way considers the context or the people living there. It will directly misplace hundreds of families in favor of creating more unaffordable luxury housing
Katherine Gutierrez	90033	People over profit ! Not profit over people ! Gentrification is a racist act !
Cassandra Gutierrez	90031	
Jazmín García	90031	Para proteger nuestra comunidad
Miles Kantner	19607	
Mikalia Rhodes	92058	Historical reasons and I don’t believe the current residents should become eventually homeless over some unnecessary building development. Let people be!?
Keith b3	90006	Displacement of low income people in our communities is not acceptable! Gentrification is the biggest disgrace to all our communities. We pay our taxes just like everybody else but when those taxes dollars finally start to ma
Jasmine Guerrero	90065	As a homeowner in this neighborhood, I am vehemently against the displacement of families of color in the name of profit for greedy developers.
Zach Fraser	91108	Value the integrity of current residents city.
Angelina cruz	90032	Gentrification will not be permitted!
Lukas E Medina	90631	Build affordable housing for the people that need it the most.. luxury apartments are destroying the communities and culture that makes LA beautiful... Invest into your people... Not rich yuppies that come from other states ar
Isabel Ortiz	92703	
Kharis O.	90031	Our community doesn’t need this, it pushes people out and erases the history of the neighborhood.
Mia pedroza	91706	Peoples homes
Emily	90031	Because gentrification has displaced a plethora of POC and is a huge problem in our community
Noemi G		Lincoln heights needs affordable housing
Kaylee Abad	90033	I think this project is unethical and corrupt.

Evan Main	90031	As a citizen of the Lincoln Heights area, I want to protect my community by keeping development projects away from the neighborhood. It’s a class warfare action out to displace working class people.
Zyanya Blad	90006	Because FUCK gentrification/ FUCK this stupid high end apartment, BUILD AFFORDABLE HIUSING FOR THE COMMUNITY
Karina Vargas	91342	we don't support gentrification in this house
Dylan Agra	90004	
Megan Spatz	90031	It is violent gentrification and will result in long term damage to Lincoln Heights residents. We need to keep the neighborhood affordable and accessible to the community that already lives there
Marcus	92806	Gentrification sucks
Diana Pena	90014	Because luxury apartments are not affordable to everyone and it causes a lot of gentrification and displaces so many people. Look at what happened in DTLA this should not happen again!
alyssa	90033	gentrification, nobody thinks about the people who have grew up here & know this as home.
Frank	90012	The idea that the development of a property this big and neighborhood-/city-altering could go forward without a forum for residents to voice their concerns, objections, and needs is absurd and a gross overstepping on the p
Andrea Gutierrez	90032	Most residents in the neighborhood will not be able to afford the increase of rent and will lead to more homelessness
Andrea Gutierrez	90032	Most residents in the neighborhood will not be able to afford the increase of rent and will lead to more homelessness
Christian Arcos	90032	
Leslie nova	90032	
Brennah	90042	This development will negatively impact local residents and communities.
Shaden Martinez		Creating this luxury building will add to the gentrification of the city of Los Angeles and slowly but surely push out those who live in poverty who can not afford to live there.
Cecilia González		I oppose this project because it is a direct representation of gentrification; those apartments are not being built to house residents of color in Lincoln Heights who are already housing-insecure. They are being built to serve wh
Kevin shiramizu	91001	As a former resident of Elysian Valley, I was priced out of my neighborhood luxury developments, along with many other residents. Our city needs affordable housing where people can live. Not investment properties for wealt
Camille	90065	
Daisy lara	90042	Not right
Crystal Quinden	90031	Lincoln Heights is home to many working class immigrant families that have been here for generations. A luxury condo would price out many of these families that have kept this neighborhood alive. Please protect the natural
Jorge Plascencia	90031	The community belongs to the people; not to the selected few.
Sarah McIntosh	90013	No more NIMBYS
Emily RUIZ-CAMAC	91744	Keep gentrification out of Lincoln Heights.
Daniela Lozada	91506	I grew up in Lincoln Heights, attended Lincoln HS and even though I lived a neighborhood away, (Cypress Park) this displacement and gentrification is enough! How many times will wealthy people profit off of hard working lo
Jenny		
Kerrie	90042	The community already living here deserves to decide whether or not something of this magnitude is allowed to forever change their neighborhood
Antonio Ramirez	90023	FUCK COLONIZATION
Jacob Solis	90065	This building is a threat to the community and is a physical manifestation of political corruption and greed.
eleanor	93105	anti gentrification. housing will be built and no one will move in because the original residents will not be able to afford it
Nico		This development isn’t for the residents that have BEEN living in Lincoln heights, it’s for the developers and gentrifiers that make coin from displacing those working class black and brown communities. This shit looks ugly. It
Asia	90043	Gentrification
Colleen Canles	90041	Stop displacing low income families with luxury apartments
Minh Lam	90031	If we can’t afford the apartment. It shouldn’t be built.
Esmeralda Guzman	90063	our community is being changed, the rent isn’t even affordable for the working class so why build these shits. This will affect our surroundings making shit even more populated
Mya	91030	
Marina Bermudez	91406	This is gentrifying our beautiful Lincoln Heights and causing high risks to the community itself.
shayda milani	90042	preserve the neighborhood stop gentrifying everything please for the love of god
Jenny	90031	I am opposed to gentrification and the displacement of families and individuals who have lived in Lincoln heights and have been part of the community their whole lives.
Darline Lopez	90031	I support low income housing and do not support gentrification.
Frida Gonzalez	90255	Gentrification is harmful towards working class communities.
Bora Lee	91030	Because gentrification is VIOLENCE
LAURA DE LA GARZ	90031	El public de Lincoln heights no quiere este proyecto. En estos momentos necesitamos proyectos que apoyen a las personas de ingresos bajos and a las personas mayores de edad
Sivan Silver-Swartz	90012	
Reymundo	90012	Because Gentrification is Genocide.
Jacob Gutierrez	90041	I do opposed the gentrifications of Los Angeles
Alexandra Gas	90031	Lincoln Heights is defined by it’s community and diversity. Keep Lincoln Heights a safe haven for them.
Nydia Garcia	90026	This isn’t gonna be an equal housing opportunity for the people in the community & homelessness is really high
Raquel Puerto	90031	Gentrifying continuously displaces people of color
Emma Bradford	90031	Stop displacing residents!!!
Jamie	90018	people cannot afford high rent
JENNIFFER Davila	90650	Don’t displace communities that have been there for ages. The fact that they did not inform any of you guys just shows they do not care about the middle class and below.
Aned Martinez	90033	Because my community is not ok with this and the community matters
Edson Escoto	90029	Because it will not benefit the community only drive out residents and erase the identity of the neighborhood.
Marisela Calvillo	90031	It’s pushing people out of homes
Alyss	91801	In a city where fair and affordable housing is hardly available, we don’t need more “luxury” apartment buildings. We need AFFORDABLE housing. We need to reject gentrification and allow low-income native angelenos live wh
rebeca g	90033	gentrification is violence against the people who reside & occupy lincoln heights.
Moises Duarte	90031	UNNECESSARY, LEAVE LINCOLN HEIGHTS THE WAY IT IS.
Carolina	90032	Building “luxury” buildings will bring in affluent folks, pushing out those who have been living in the community for years. It will ultimately add to the gentrification within Lincoln Heights, making the area financially difficult for
Sayah	90032	this project will displace low-income families already struggling to survive in their community.
Alyssa Dancel	91606	My neighborhood of North Hollywood (5minutes from the Arts district) has become significantly gentrified over the course of my 21 years growing up here and I would HATE for anyone to be displaced from their home areas t
Jazmin navarro	91765	It is Inhumane to displace residents that belong to the community. It’s important to cater to the existing community, making sure they are heard and their needs are met!
Robert Z	90004	I'll seen my neighbor get affect by this 'luxaruy' complexs that hard working, low social-economic class people can't afford. It is unfair that the rich can come and displace whenever they want. Enough is enough. Hard workir
Jennifer Ayon	90031	Protect our community
Bree Tomás	90026	Gentrification is modern colonialism. Stop displacing people for profit.
Lisa Chen	90024	Homelessness is one of the biggest problems in Los Angeles despite there being plenty of vacant units. With COVID-19 exasperating these problems, it is unethical to continue with this project and further gentrify Los Angele
Natalie	91502	Gentrification is a horrible and negatively impacting the citizens, rather than helping
Amy Ludwig	90042	This is luxury housing that will not serve the community. It should not have been fast-tracked.
Citlali	95117	We must fight back against gentrification always
Angie Soto	90031	I oppose to this project. Lincoln Heights is predominately a Latino, asian, and recently black community with low income families. Hard working families live in these areas for a sustainable living and we shouldn’t gentrify our
Andrew M	90022	I don’t support gentrification.
Justine Estrada	90031	
Theresa Lopez	91601	LA has way too much luxury housing not to mention our homelessness crisis! We need to stop gentrifying our communities by tearing them down and replacing them with complexes no one can afford or live in
Ian Vargas	90065	It will exacerbate the continued displacement of working class residents of Cypress Park and usher in gentrification pushing more of the neighborhood out of their homes.
allyson garcia	90022	i oppose gentrification
Jessica Herrera	90042	The people of North East LA deserve better than a man like Cedillo who is ready to kick us out onto the streets for profit. We demand better than this. This is our home.
Elvira Gil	90031	It's gentrification!!!!!
Tshering	90042	Because it very shading passed by someone who is not hearing the need of his citizens
Charlie Kanter	91302	Oppose illegal evictions and to stop gentrification in Lincoln Heights
janelle yanez	91605	because fuck gentrification
Alexander Fraser	90039	Gentrification and the development of LA has to slow down.

Fernando Diaz	91702	This petition is not a request. It's a Demand by the 30,000 residents of Lincoln Heights for Gil Cedillo, Pinyon Group and LA City Planning to face the People who will be affected by this project for the rest of their lives. A 468
Grace Haggerty	90042	We need affordable housing, not luxury developments that will increase housing prices and displace current Lincoln Heights residents.
Zoë Takaki	90291	Fuck gentrification
Leslie	90031	doesn’t serve our community any good, it’s not helping the community members in anyway
Kristian Cardenas	90031	Not enough affordable housing. No CBA
Gresia Fernandez	90033	This is the first step to gentrification
Clara Keane	90041	The people of Lincoln heights deserve to be and MUST be heard and taken seriously! Especially during the current pandemic, when millions of people have lost their jobs, fallen ill, or gotten illegally evicted, NEIGHBORHOOD
Rudy Hernandez	90033	Because gentrification is not okay. Those buildings are pushing out our community so that the middle class can move in. We already have enough gentrification going on with the USC Medical campus, so we don’t need anyr
Brandon Mensah	90025	It’s a lack of care and shows priority of expanding land for profit more than the lives of the current human beings currently residing in that area.
Terrence Robinson	90041	Stopping cultural genocide.
Khristine Camarena	90033	Because it erases the community.
Nancy Esparza	90023	what they're doing isn't right
Conor	93108	gentrification is destroying our communities
Carl Cortez	90033	
Abigail Vasquez	90706	FUCK GENTRIFICATION BITCH
Paulina Casas	90075	Creating new apartments for the rich will not benefit the community, if anything this will hurt and damage the community. Most cannot afford to live in the condos you are building and this condos will just increase the price of
Grace Miller	90042	this is not what is best for community
Samantha Ricci	92116	
Ernesto Lopez	90065	Gentrification
Ana Godoy	90280	Although I do not live in Lincoln Heights I work in the Eastside with high school students who attend Lincoln and Wilson High School and have heard from them first hand the struggles their family has endured to make ends r
Izzy	92805	This project will be taking away an opportunity to build affordable housing for those in need who cannot afford a luxury apartment. It is useless and won’t provide anything to our community. It will sit there unused while peopl
Katelyn Vasquaz	90640	
Stephanie Ramirez	90033	They are gentrifying my community and hurting the livelihood of hundreds of locals.
Jerylee	90033	Gentrification is classist, racist, and evil. I do not stand by letting rich white people modernly colonize the hood. It happened before but it won’t happen again.
Ruby	90029	
Oliver Bentley	90017	I oppose the gentrification and displacement of the community, especially for the sake of a luxury condo amidst a pandemic, recession, and housing crises.
Isaac Mendoza		The intentions of these buildings are not to support the community that resides there, but to drive them out.
Aimee Alvarenga	90026	These luxury apartments are not representative of community wants or needs. They do not represent the best interests of the community, which the apartment buildings will be inaccessible to.
Lucy CapittiFenton	91401	Displacement for the purpose of gentrification is horribly wrong and hurts the lincoln heights community that should be protected.
Katherine Salvación	90018	This neighborhood needs to remain preserved. Keep this gross building and the people that will come with it out.
Megan Purdome	90041	Development without communication with the community is inherently a threat to the community. While any such project is threatening, the very least the city can do is offer clear and direct communication and collaboration.
Peter	48104	
Loucin Chrikjian	91304	It will displace thousands of low income poc, mainly of the Latino community, whose existence in Lincoln Heights is crucial to Los Angeles and it’s vibrant culture
Abigail Perez	94066	Gentrification is evil and selfish. Low income families will only suffer more and I will not let that happen.
norma	91776	Gentrification is harmful to those already struggling to live there.
Christina Solis	90032	This project would become the reason low income families that have lived in Lincoln heights for generations to become displaced from their homes
Jonathan Casella	90021	If LH needs anything it’s affordable housing; the last thing it’s needs is this vulgar dormitory of greed and exploitation.
Kyla Langotsky	90024	This type of development should be illegal. Without discussing with the community, you expect to destroy them. Dialogue is a necessity, but also consider how wrong creating luxury housing in a Lincoln Heights would be —
Vanessa Casas	91801	
Chloe salem	91423	
Helen McColpin	91001	Luxury developments hurt the community. No gentrification!!!
Jordan Schmid	93534	The last thing anyone needs in California is unaffordable housing in a gentrified neighborhood full of rich and obnoxious frat boys/entitled elitists, to push out the poor&disenfranchised communities to other corralled ghettos
Romelyn Gutierrez	90004	I am against gentrification.
Donovan Ramirez	90039	It’s a form of neo colonialism that attempts to displace already struggling communities. Put more money into preserving the neighborhood instead of trying to replace it. These same gentrifiers speak down on us POC all the v
Sade Obi	91791	im sick of gentrification
Aurelio Barrientos	90032	Higher rent
reyna	90063	it’s not right!
Christina m	90023	It contributes to the displacement of marginalized people!
Joey Young	91106	It’s not considering the wants/needs of its community members
Cecy avila	90065	Leave our city alone! We don't need your shit.
Frances	90032	This building will add to our problems! It is not for our community, made up of THE WORKING CLASS. Unaffordable and will only encourage the rest of the community to be wiped out!!!!!
Adrianne S	90041	
Lizette	90032	Lincoln heights needs to remain affordable for those who have been living there!! No new homes!!
Jose	90032	Further displacing residents, will not help. Building a luxury complex, will not help. We need to take care of those within the community. This is not the way to beautify the community.
Sofie Armine Dreski	90041	Gentrification is violent! Los Angeles needs affordable housing and canceled rent not luxury condos.
Emily M	90031	Gentrification is wrong!
Lynn Rivera	90065	With homelessness being a rampant problem throughout Los Angeles this will only make this issue worse for our neighborhood and those who have built this community. It will create unnecessary congestion through the buil
Cristine Murillo	90031	As a local Lincoln Heights resident, I can attest that Lincoln Heights does not need luxury housing but rather more low income equal opportunity housing. I do not support the gentrification/uproot of the local community.
Tom Amsbry	91104	it will increase rent and the price of goods and services in the Lincoln Heights area, further gentrifying a neighborhood that is already seeing displacement of low income families.
Kyla	90068	threat to our health and well being
Tuliese Ioau		
Sam Horn	90005	Lincoln Heights, and Los Angeles in general does not need more luxury housing. We need affordable housing that does not break up our communities. I live next to a construction site for a luxury development and it saddens
Jeanette Martinez	90031	because middle class and lower wouldnt be able to afford this plus this doesn't fit into our community
Uriel	90031	We dont need it. This only raises rent for those who are already apart of this community. This will slowly kill our community over time.
Kimberly Lara	90042	I oppose this project because the community will be affected by this project for the rest of their lives. Building this development is a form of gentrification, which is a form of erasing our community and placing violence on us.
Christian Gutierrez	90280	
Oskie Mignon	90040	Keep large projects out of small communities. This will displace current residence (mostly of color) in favor of rich white folk and distort the current Latino culture that thrives on that area.
Natalie Mercado	90039	
Ashely	90032	Why take without asking
Adriana Soto	90031	We need more affordable housing for the people in our community; no to gentrification and the displacement of the people in our community.
Ashley Hernandez	90031	NOT GOOD FOR THE COMMUNITY
Andrew Lujan	90032	How about fixing the issues in our community first, before inviting others in. We have bigger issues at hand.
Johnny Hinojos	90031	Bad for the community
Alexandria Villarreal	90660	It’s detrimental to our neighborhood . build it in Beverly Hills
Gwyneth	91024	A 468 unit Luxury development at ave 34/ Pasadena Ave is a threat to our health and well being.
Gerard Mellini	90022	It was fast tracked during a corruption scandal. The community does not need to be gentrified and have renters displaced
Erin Espana	90002	
Lidia Bressoud	90032	This does not serve the working class BIPOC community that has been living and residing in Lincoln Heights. This “project” is meant to erase and displace the diverse working class community. Lincoln Heights says NO to ge
Carla Majano	91502	I have family that still live in Lincoln Heights. We need to support our community whether we still live there or not , we need to be the voice for those who cannot speak up.
Kimberly Delgado	90303	The project is spurring more gentrification and displacement. There is no room for displacement during the course of a pandemic. Furthermore, this will disrupt the low-income communities /residents of Lincoln Heights.

Brenda galan	90031	Because this is something that should be done to help Communities , make these for low class working not for wealthy people to come and take what we have worked for to keep as ours .
Justin Ruiz	90042	Because FUCK gentrification
Irma Sanchez	90031	It will bring increase cost to living and begin to push those who lived in the area for years out.
Kia raab	91024	
Isabella Granados	90022	This project would bring white folk to the hood raising the rent for the long standing residents eventually driving them out. Gentrification erases communities of color. Gentrification is genocide.
Helen Alonzo Hurta	90019	While I don't live In Lincoln Heights, I work in this neighborhood and I oppose this project because it will displace my students and their families. We do not need more luxury apartments, we need and demand affordable hou
Skylar Echard	91030	Stop displacing residents from their homes to build luxury apartments they destroy neighborhoods!!
Michael Caballero	90032	it will increase gentrification creating a dramatic increase in property values and create more property taxes for people who may not be prepared for that putting people out of homes and forcing renters to be displaced
Alicia Miyares	90065	ITS NOT EQUITABLE
Leticia white	90042	You are running out good restaurants and other people's homes! No need to do this! Leave the neighborhood alone
Iris Jill Aranda	90027	Because it'll hurt the community and it'll displace families.
Shirley	90031	The community will be affected so as my family.
Candelaria Morales	90004	You can't move the people
Marco Covarrubias	90065	Because this land must be used for affordable housing at minimum
Devin	91504	Gentrification is a horrible thing and we need to keep our Latin communities in tact so they can enjoy the place they've always called home in peace.
Vincent Acuña	90031	Because we don't need Gil's disrespectful neoliberal policies affecting our communities and opening the flood gates to displacement via gentrification. If he wants to represent well off whites, go run for a seat in West Hollywo
Donna Tran	90011	This is extremely harmful to a community of low income, working class folks who need affordable housing. Many of them have built a legacy spanning generations in this area. Building more apartments with NO rent control d
Joanna Ruiz	90022	Gentrification is not the answer.
Isa R	90716	This project will affect so many people living in Lincoln Heights. Gentrification ruins lives !
Majadi Patterson	90301	
Paulina curiel	90039	It will raise rents for the community and force people out. This "luxury" project is unaffordable to the existing community so why put it in their home? Go put it in a higher income area where its not a burden to people
Miguel Munguia	91331	Gentrification displaces people of color and this will negatively impact the people who reside in this neighborhood. We need more affordable housing in Los Angeles, not luxury condos.
Jessica brooke touc	32533	I used to live in LA. Regentrification is happening all over the US and while it may boost the economy temporarily it is a permanent issue on the citizens living in the area. We do not need high rise apartments for the masses b
David salazar	90026	For the preservation of the existing community and culture that resides in Lincoln heights, it must remain there as it is the way the people enjoy it
Alec Reyes	91016	
Allie Kiekhofer		I am a lifelong LA resident and have watched countless LA neighborhoods be consumed by gentrification by way of luxury housing, which destroys existing communities people en masse into homelessness. Lincoln Heights
Kristina niessner	90041	Gentrification
Kimberly	90005	Community members needs must be ensured over luxury development projects.
Edith	90875	We don't need luxury housing now, we need affordable housing now ESPECIALLY because of the pandemic. So many people are going to be evicted, this project lines greedy pockets and doesnt help the people.
Carlos Carmona	90031	It will skyrocket rent in the surrounding area, causing low income, hard working people too vacate because of high rent.
Andres Montesinos		I have suffered gentrification once before and I can say that it is no a fun ride
Victoria Trinh	90020	It's displacing folx who've been living there. It also isn't a project that was asked for by the people!
Darcy Bartoletti	90031	Because Los Angeles is unaffordable to live and it's getting worse.
Sara Horn	91403	
Stephanie Hernande	90017	No gentrificación!
Emily	90034	fuck gentrification!!!!
Rosa	90255	Gentrification affects the lower class community in a negative way.
Juan Lopez	90003	Gentrification
addie	10011	
Nat Tereshchenko	90004	This community needs affordable housing, infrastructure, and economic support NOT luxury developments that will further exacerbate the housing crisis. Developments like this are DESTROYING communities
Erica	91344	
Cristian Ramirez	91711	Because community matters
Lily James	90068	It promotes gentifrication in Lincoln Heights.
Kyla Gelev	90004	I am against the unlawful eviction of people and also gentrification for the benefit of white people and businesses that do not care about the communities they are destroying in the process of gaining wealth.
Jack flores	90065	We need more affordable housing projects for locals to move out on there own and the ability to stay within the North East Los Angles area.
Kevin Chu	90012	Gentrification displaces working class communities and encourages people who do not contribute to the local community to come through and wreck it bc it is "trendy".
Yvonne Gavriel	90042	Projects in communities are suppose to help and benefit the people who have been there. The establishment of this building will only affect the community in a negative way! The building will displace families and possibly lea
Jake Peters	91776	No gentrification
brandy alvarado	90065	This would be displacing so many people who have lived in this community for years. Lincoln Heights was my home for 8 years and I know it is a community for the middle class families. Do not take this from them. Stop disp
isabella jacobe	91203	
Briana Rosas	90042	There's a homeless crisis in LA county, and there are families that need affordable housing, seniors need affordable housing, immigrants need affordable housing, and college students. Stop building luxury housing for the wh
cyndy	90042	because it is gentrifying the neighborhood.
Danni Fry	90033	Yes do not build this monstrosity
Yajaira Villarreal	90031	Because I live here and I fear displacement
Lauren Garrett	90025	Because people shouldn't be displaced during a pandemic! Where will the residents go when the rent inevitably rises because a gigantic corporate housing unit has taken up abortion of the community.
Jay	90012	
Zion	90032	gentrification is 21st century colonialism
Sabrina Herrera	90031	We don't need more unaffordable housing in Lincoln heights
Angela	90031	
Enrico Cortes	90057	Longtime residents will be displaced from their homes. Rent increases to the area will result in a large amount of illegal evictions and many elderly residents will be forced on to the streets.
Leslie Santiago	93550	I am currently not living in Lincoln Heights, but I used to live in Cypress Park up until 2016. The reason I live in Palmdale now is because of gentrification efforts and building projects like this one. I know what it is like to be dis
Priscilla	90021	
Blanca Rodriguez	90031	I am a resident of lincoln heights and im scared of getting displaced
Belen	90032	
Claudia Guzman	90031	New project equals gentrification. The goal is for affordable housing for low income families.
Erbey Pineda	90031	As a low income person creating these luxury apartments will only kick low income families from the area. It is wrong that they Latinos, Hispanics, and African Americans as pieces of meat.
Luis Landeros	91342	Gentrification is violence
lyric	90057	there are enough luxury properties in los angeles - we need affordable housing with community in mind
Jaqueline	90031	
Hector Montano-Re	90031	It's gonna rise the price of rent among the people whom live in the neighborhood.
Conrado Huerta	60629	No gentrification no more oppression!
Diana Betancourt	90039	This project will only provide housing to the rich. It will cause a domino effect of further increased rent due to gentrification. No one in the community will benefit from the project.
Dalia gonzalez	91104	This will drive up the price of living in this neighborhood.
Andrew Miranda	90039	We can't stand to continually see the blatant racism towards working class minorities and their communities within these kinds of actions and its time they listen to us.
Shar	91208	I oppose the project because Los Angeles is built on history not luxury apartments.
Amairani	90033	I oppose because community members are not being included. The project is not for the community! In which will only serve to displace community members.
Ezekiel Stratton		This development hurts 90% of Lincoln heights residents. This development is a blatant and obvious attempt to displace a population in a largely rent controlled area and shift demographics away from the minority communit
faith	91302	the people of licoln hights are here and deserve to be heard
Amanda Sanchez	90022	minorities should have a say in what they want in their communities, especially when it comes to having housing that's actually affordable
Daneyda Garcia	90031	As it is homelessness has become a greater issue for families in the community there is need for affordable housing not the opposite

Naomi Clements Ge	90031	It is harmful to the Lincoln Heights community because it will displace the families that already live there
Oona Foley	91030	Fuck gentrification
Anahi	90031	The reason I oppose this project is because I will not stay here and watch my community disappear. A lot of things won't be the same. I say NO to these "luxury apartments"!!!!!!
Joel Martinez	90031	Bad
Vanessa López	91342	Gentrification only harms those who live in the area and either makes it harder for them to survive financially or drives them out of the homes.
Daneyda Garcia	90031	As it is homelessness has become a greater issue for families in the community there is need for affordable housing not the opposite
Briana Gonzales	90031	This will ruin the community!
Gabriel reyes	90031	Because this is are neighborhood there trying to push people out with high rents. I personally know people that got kick out of there homes or forced to move out cause there either scared no papers or don't know they right
Laura	91423	Very against gentrification
Jennifer Aparicio	90031	A "project" like such does not help the community. It only allows luxury to be seen at a wider range than before. If this was an attempt to help the Lincoln Heights neighborhood, developers would work on affordable units tha
Ahladini Veerina	90041	Displacement is not ok, the people of Lincoln Heights must be heard.
Jacqueline	90006	My family is from Lincoln Heights and I'm tired of rich white people colonizing every inch of my city, forcing natives out.
Diana J	90031	Gentrification and displacement are preventable, although the developers might have invested to create this project, it is not a project that is meant for the community that has lived in and created Lincoln Heights as we know
Diana J	90031	Gentrification and displacement are preventable, although the developers might have invested to create this project, it is not a project that is meant for the community that has lived in and created Lincoln Heights as we know
Diana J	90031	Gentrification and displacement are preventable, although the developers might have invested to create this project, it is not a project that is meant for the community that has lived in and created Lincoln Heights as we know
Penelope Uribe -Ab	90032	I work as a city employee at the Lincoln heights youth art center. This project effects the constituents we serve because it poses a threat to low income housing, we don't need a luxury development . Not to mention the traffi
Desiree Garcia	90640	I oppose the project because I have been a member of the Lincoln Heights community in Los Angeles since birth. I was raised in Lincoln Heights.
Daviona Moore		I oppose this project because this is gentrification at its finest.
Anna Gonzalez	90606	Because it's wrong and not helpful for the community of Lincoln heights
Jacqueline Mejia	91030	I oppose this project because I am in community with people in Lincoln Heights and their lives are not being regarded with this project, in fact their lives are being blatantly disregarded and treated as disposable. It's violent a
Christine Severin	90004	We don't need another big apartment pimples! Overcrowding, years of construction, no parking, tearing down trees, close to an elementary school... the reason goes on and on. Please don't allow this!
Abigail	90031	To stop the illegal evictions and prevent further gentrification to the community
Annie Woods	91103	It is not fair to change a historical neighborhood just to make expensive, generic "luxury" housing.
Isabella scaffidi	90015	
Yazmin	92701	I oppose the project because the community of Lincoln Heights deserves their elected officials to have their interest be a priority. That is not the case by building a luxury building that the most of the community cannot afford
Stephanie Morales	90032	I'm opposed to the project because I feel Lincoln heights don't need this luxury high end complex. We need affordable housing instead and help in the community.
JESSE sanes	90031	Bc it will destroy the fabric of the LH community and erase generations of culture
Kirsten	90065	To preserve the genuine charm of Lincoln heights
Jason Venzor	90007	I oppose further expansion of gentrification in beautiful Lincoln heights.
C. javier Rodríguez	90065	aside from there been homes and building already there. this will only increase the cost of rent, increase cop harassment of houseless folks and POC and contribute to gentrification of our communities.. ei. more stupid coffee
Lonnie	91755	Lived here when for years when younger/anti-gentrification
Jose Alvarez	90031	Working class family homes should not be preyed on by investments groups.
Jonathan Maghen	91602	Affordable housing is a human right
Julio	90031	Gentrification
Andy soto	90242	Prefer to keep my opinions to myself
Mariana Romero		It would take away a school so close to the Community . It would also bring non necessary bickering when we are happy the way things are there .
Victor Heras	90033	Completing this "project" is a form of gentrification and should not be displayed in a powerful, diverse working class neighborhood. The people must have a say in such a "major" development
Sharon	91344	Gentrification leads to impoverished people to homelessness with no care.
Johnny Langan	90027	This is a disservice to an established neighborhood. Not only is this project unnecessary, it is actively detrimental to the existing community (which has already had to navigate the negative impact of gentrification). This will fo
Michelle Jarmon	90065	Ask the community what it wants. No gentrification.
Martin M Gonzales	90031	we need apartments. Not luxury apartments the people who live here can't afford those .causing people who would live here leave ..we don't need rich generalized people here that will try to change our culture!
Jaime M Reyes	91104	This is the PEOPLES LAND! You're just pushing all the hardworking people who built and worked their whole lives here for people to enjoy hard work we've done to survive here and for them to know no history!
Krystal Diaz	90031	This will cause displacement to many low income people in our community.
yodit	2118	unfair to the people that live there
Jasmine		This will take away from the community more than it will provide.
Lillie Campos	90032	Gentrification has no place in Lincoln Heights. Build affordable housing for its residents instead of luxury housing for outsiders.
Aaron Elvis Jupin		It's displacing a community in a multitude of ways. We don't need any more of these high end apartments that are not only and eye sore but also don't provide any housing for the community it's moving into.
Elsa Teodocio	90005	Because it is not made to benefit the people who live there or of low income. These new homes will end up forcing people who live there to move because they need to make space for construction and later will cuase rent to
Corina Perez	90032	Community displacement
Amanda Lucido	90029	Because this housing development is erasing the culture of Lincoln Heights as well as the livelihoods and opportunities of individuals who have lived there for generations. It is an extreme example of negative gentrification ar
Molly Miller	90065	This building does not have the community at its interests
Stephen Sariñana-L	90031	Project scope & scale inconsistent with community's carrying capacity.
Jose Avila	90032	I do not want this long standing and beautiful community to be erased by pure greed.
Rachael Buley	90046	Buildings like this are ruining the city
Nicole	91786	I grew up around Lincoln Heights, there's a clear sense of culture and community, and building this would put a gaping hole in it.
Ellen Connaughton	90029	I don't want to see another LA generation get priced out of an east side neighborhood
Gisselle Mauricio	90065	It will cause gentrification and bring more trash to the river
Rich Thach	90031	It doesn't help the community already there.
Zoe Peretz	90019	Let people be able to afford their living spaces! Stop moving families out
Ariel Quist Sprawls	90031	We are in a CRISIS right now for renters and low income families. Please, do not put so much money toward luxury housing. Do not let wealthy people exploit the goodness of this area. Use the space for the people who nee
Elsie	91202	To build a building that will change the lives of MANY, the cities OCCUPANTS must have a say in these plans. We say NO to sneaky development projects that know damn well we don't want them. If they made affordable ho
Francisco Rodrigue	90032	Everything can have place in this city, but not in this working class neighborhood- where low income families living there will be pushed out to accommodate white rich people
Gabey	91740	i don't support gentrification
Jessica Noriega	91723	Absolutely disgusting.
Ian Betancourt	91201	Families who've lived and strived in THEIR city for generations will be removed for the selfish act of making profit off a building that does not belong in that neighborhood.
Samantha Williams	90033	This project has the potential to displace families who make this community, and inconvenience those who would continue to live here if the building does go up
Gisselle Ulloa	90023	I oppose the project because it is important to reserve as much community history as possible, gentrification is one of the biggest problems out there for low income communities that seem appealing to the more fortunate t
Maddie Velasco	91709	This is my hometown and we need to keep the gentrification out!
Arlene Alvarez	90006	gentrification will not be tolerated in our comunidad. Before they build multi million dollar condos. Fix the community and help the people!
Charlotte Umanoff	80210	I used to live near Lincoln Heights and spend time there and there's no way in hell that this project will do anything but harm the communities that have called LH home for so long. Projects of this scale should ALWAYS requi
Samantha Perez	90031	We need affordable housing and the ability to voice concerns
Marlene Deras	90031	Gentrification is harmful
Brianna	90504	
victor go	90014	investing in the communities as contributed, voted and approved by the folks who live there is absolutely necessary to keep gentrification from displacing folks who have built that community.
Lucia Borunda	90003	Because gentrification is a killer
Kristen tiscareno	90011	We need affordable housing for the already residing people of this state
Lavonne Ramirez	90065	We need affordable housing in Lincoln Heights.
Matthew Flores Figu	90042	It is destroying the culture of diversity that used to exist in LA
Catherine	91101	We need more AFFORDABLE HOUSING in LA, not this junk!!
Georgia	90042	Because of my demographic, I am complicit in gentrification. I want to do what I can to counteract the effects of my presence in NELA.

claire gianoli	91342	i do not believe this will benefit the residents of lincoln heights
Shelby Gogreve	90042	Gentrification and disrespect to community. Will harm families and businesses.
Tess Langseth-DeP	90042	This project will displace Lincoln Heights residents and is a violent act of gentrification.
Evelyn R. Cornejo	90039	I have family and friends that live in this community and the more "affordable" buildings they do the more expensive it will become and they will be forced to move
Evelyn R. Cornejo	90039	I have family and friends that live in this community and the more "affordable" buildings they do the more expensive it will become and they will be forced to move
Sophia Li	90063	To fast track a development that will drastically change and rapidly gentrify Lincoln Heights without involving the community at all is unethical and will only hurt the residents of Lincoln Heights.
Pedro Villaneda	90031	Gentrification without limitation or accountability is segregation, and stealing.
Karla Guardado	90031	I oppose the project because the majority of our community rents and rent is expensive enough as it is. This will only push out the people will no longer afford to live here. It will break out community apart.
Ciaran Brown	40204	This project will only hurt the people who have lived in Lincoln Heights, some for generations. The intent is not to invest in the community but to change the community.
Julia Driscoll	22207	It will harm the existing community
Madolyn Gianoli	90033	
Matea	90039	Because what is needed is more affordable housing. This development only further gentrifies an area that needs protection from gentrification.
Lua K	90024	
Barker Thompson	90039	Gentrification ruins communities.
Nellie farrow	90042	Gentrification and displacement
Stephanie Lopez	90031	These luxury apartments will not benefit the Lincoln Heights community. I have been living here for over 25 years and I have seen how neighboring communities have been affected by gentrification and even Lincoln heights.
Anahi Gildo	90031	The soil is toxic
Guthrie King	90036	Gentrification is violent action on the longtime residents of any neighborhood, but especially Lincoln Heights. I am vehemently opposed to “new development” that excludes the current economic make up of a neighborhood.
Sebastian Lara	91502	It is racist
Miriam Gabriel	90042	Projects like these do not contribute to the community in anyway.
Robbyn caudillo	90032	Keep gentry out of Lincoln heights
Samantha	90063	
Blair Windette	90018	Luxury apartments are not good for LA. How many empty units are around the city right now? Do better for the people
Danielle Groode	91401	Gentrification harms the people and the community
Karlin Eddo	90068	It will squeeze out more affordable housing. We need more affordable housing not more housing for only the wealthy. Plus it looks terrible!
Teresa Perez	90042	Stop pushing people out of their homes
Sakkara Payne	85020	From my what I have read and researched: no one in Lincoln Heights was given a heads up about this. This happening right under the communities nose, and that, is vile. As well as all to similar to The Berlin Conference of 18 I am against destroying The Culture that thrives in Lincoln Heights. The Culture that has always been there, that has been fought for, that has Roots; deep into the hearts of the People. I am not a resident of California, but I was, for 5 years. I’ve been to York Boulevard in Highland Park. Seen the vast difference of what is and what used to be. The Culture is hanging on by a thread and They have the scissors I am against Gentrification because it benefits ONLY white people, and their interest. It leaves POC and low-income families with absolutely nothing. For who? White people that ALREADY run this country? No. This is not 188
Frances	90272	We need affordable housing not gentrification!
Daniela Aviles	90031	I oppose this project because it is furthering the gentrification agenda in Lincoln Heights.
Luz Colunga	92570	The gentrification of the small communities of color must END NOW. These communities have had enough of being pushed out of their homes simply to satisfy powerful white people with money.
Denise Espinosa	90065	Unnecessary
Arianna Zamora	90063	Because if those homes are built no one will move into them and they'll keep trying to make lincoln heights into a wealthy area and the Lincoln heights we know will be erased
mae powell	94607	the neighborhood should be for the people! this gentrification needs to be stopped.
Xochi Maberry-Gaul	90039	It will price out residents who have been living in that area for generations.
Addison King	90041	The largest modern construction project in the city’s history should provide more transparency than is currently being given. Let the community speak!
Elena Grimaldi	11237	Gentrification at the sake of people’s homes and livelihoods is not cool!!! Invest in neighborhoods / areas don’t rip them apart for a “luxury” experience 🤮
Sabrina	91803	Gentrification
Barbara	90031	Overcrowding
Teagan langseth		
Thor Fienberg	90065	Unethical
Madeleine Giles		
Eren Vazquez	90031	I oppose this project because we need to keep Lincoln Heights in tact and they’re only doing this to wipe away our people who are only trying to survive.
Saya Maeda	90041	
Saya Maeda	90041	
Katherine Delgado	91801	This project does not have the community in mind and is only focused on the monetary gains created from this development. This will not help to create a healthy ecosystem in the community and will displace so many peopl
Eva Townsend	90039	I oppose development of Lincoln heights and the increasing cost of living for long time residents of the area
Grace muller	91104	
Mario Guardado	90004	This project will displace many low income and minority residents from their homes during a time of income loss and increased rent.
Gary lopez	90065	this project will be an eyesore that is an open invitation for the eradication of the culture of the people who made this neighborhood what it is.
Debbie Hernandez	90065	Itll enable increasing property costs of the surrounding areas in a neighborhood that is already in the middle of fighting gentrification
anythony	90063	i dont support the continued attempt to displace low income communities by building luxury apartments who will eventually raise the price of rent in the community
Martha Topete	90031	Lincoln heights has been my home since I was born and it cannot get gentrified
Cristabell Fierros	90031	Instead of building a condo, build affordable housing especially during economic travesties and pandemic turn out. Lincoln Heights has a high population of low income tenants and majority are elders. This also does not insu
Sofía	90031	This is one of the oldest neighborhoods in LA. I don’t care about flashy new condos. What we need is a community that supports all the businesses and families along Broadway. There have been a few “hipster” places openi
Marlene Arteaga	90033	
Miryam	90031	It does not benefit those living in LHts
Claire coudray	91786	I oppose gentrification of this area
Ariel Climer	90005	I have seen high rise developments go up around my neighborhood in Ktown and many low incomes families have lost places to rent. Just because minimum wage went up a little bit doesn’t mean people can afford rents $1(
Joshua Camacho	90031	THIS DEVELOPER AND THE CITY OF LOS ANGELES DO NOT CARE ABOUT ITS RESIDENTS!!! THIS MAN WILL PROFIT AT THE EXPENSE OF THE PEOPLE WHO HAVE LIVED HERE FOR YEARS. HOW DOES ANYONE TH
Madaline Nevarez	90032	
Jacqueline M Colinc	91405	gentrification is not ok.
Saul Narro	90042	It does not belong in Lincoln Heights
Naomi Rubalcava L	94707	I live in the Bay Area where gentrification is an ongoing issue that pushes working class communities out of entire cities and neighborhoods. I know that this is an issue that I have contributed to, and so those of us who have
Gabriel Gutierrez	90065	None of the affordable housing units have benefited residents along with the liquor licenses approved for incoming businesses that are not in support of the community. Adding this luxury development is antithetical the healt
Leigh Marks	90031	the rent is too damn high in this neighborhood already.
Yanet Lopez	90031	Because it’s not fair to cultural history.
Vanessa Duran	90042	I am against the gentrification with a 468 luxury apts to the city of Lincoln Heights, jeopardizing the community with majority of members being minority and unable to handle the gentrification ramifications to the city.
Bella Bilandzija	91001	Stop removing people from their homes. This will only create more division. Listen to your fellow people.
Dylan Sanders	90042	Corporate development destroys the historical culture of Lincoln Heights, leading to more homelessness & poverty of already marginalized communities
Daniela Hernández	90023	We must stop displacement of Lincoln Heights residents! Luxury apartments are not wanted or needed; we need more affordable housing to address the needs of our community.
Laila Jaffer	91106	Luxury apartment buildings have no place in East LA with the city’s current housing crisis. We absolutely have no capacity for this kind of development right now, especially with so many current residents in need of such diffe
Alana Bradley	90031	The economic recovery that lies ahead post-pandemic is long and fraught. This development will not pump money into our neighborhood, but into the pockets of investors, management companies, and developers outside th
salla	91104	
Alexandra Brown	90065	We need affordable housing for the community. No luxury high priced units at all should be built here!
Alessandra Okuma	90063	I'm against gentrifying our communities
Pedro Gonzalez	91770	Time and time again, new “developments” tag along with increased rents and erasure of culture and history. People will be forced to move out of their community and potentially into the street. By the time this project would
rudy f	90007	we need to protect local communities !!!

Kelsey Aloise	90042	We need affordable housing, not fast tracked luxury condos with zero community input!
Joell	91791	For the people that have been living there for years
Tommie Leon	90037	It’s going to damage the community that has been there.
Nicolas Gomez	92675	This luxury development project failed to properly inform, and include, the residents of Lincoln Heights. Any meaningful dialogue that may have authorized, or given consent to the project, bypassed the neighborhood city cou
Nicolas Gomez	92675	This luxury development project failed to properly inform, and include, the residents of Lincoln Heights. Any meaningful dialogue that may have authorized, or given consent to the project, bypassed the neighborhood city cou
Ireri	90033	We need affordable housing in Lincoln heights not luxury apartments. There is already a housing crisis here which has gotten worse as a result of Covid 19. This mass project will contribute to the displacement of working cla
Katherine Borkov	11209	
Julie	90012	No more gentrification!!!
Alejandra Colon	90042	It does not support the current low income families that live in that area.
Janice Santiago	90031	This will only mke it worse for existing rent controlled housing already at risk. Stop this gentrification in my neighborhood.
Lesly Monsalve	90033	Because Latinx and Asian American communities should not be displaced. Community before profit.
Joe Rodriguez	90031	It is another project that will displace moreresidents of our community of Lincoln Heights.It is also illegal and the community of LH was not taken into considertion
Addis Daniel	90016	We need more low income housing not luxury Apts
Jeffrey	90031	I don’t think it’s a good idea because it’s in a low income community and if it gets build it’s going to rise rent in other residential areas. I live in a rent control building and having affordable housing is important. I totally underst
Felicity Alexander	90031	Gentrification. Traffic. Noise. Disrupting the neighborhood. Neighborhood doesn’t need it.
Lisa Nicola	90042	Public health!!!
Rebecca Schroeder	90042	This is an awful addition to the community.
Alex Fernandez	90031	This is marginalization of underserved families and poses a danger to the cultural integrity and economic stability of the community.
Daniel Soto	90036	As a fellow resident of the city of Los Angeles who rents an apartment—and who relies on the city’s rent control ordinance in order to afford to live and work here—I stand in solidarity with the residents of Lincoln Heights who
Naomi Menezes	90004	The prevalence Luxury units being built in Los Angeles is detrimental to the health and community of the city in the long term
Naomi Menezes	90004	The prevalence Luxury units being built in Los Angeles is detrimental to the health and community of the city in the long term
John Lam	90031	All the dust and pollutants from demolition and building
Citlali	90022	I do not want to see another historic neighborhood get overruled by the wealthy. Fight it as much as we can.
Henry Perez	90031	Our community needs affordable housing. Luxury housing leads to displacement.
Joseph Lorge	90012	We do not need more unaffordable housing developments that displace members of the established Lincoln Heights community
Kasey Ventura	90032	We’re in a housing crises and witnessing folxs being displaced - during a pandemic we should house the most vulnerable not create luxury housing
Gabe Allanoff	90290	Gentrification is an act of violence, racism, and white supremacy, and we will not allow it.
rhiannon wilson	90004	
Charlette Gibbs	91604	because genification is apart of systematic racism, especially within larger cities.
Ashley Velasco	90017	I have witnessed hundreds of families go from a one bedroom apartment to their cars if they're even lucky to own a car. We need to stop and consider that not all families are making hundreds of thousands of dollars a month
Sydney	94112	So many citizens will be displaced. They will lose their homes just because a luxury condo will be built there. No one living in Lincoln heights can afford a luxury condo. Gentrification needs to stop.
Valerie vargas	90065	It will be pushing out current residents who are there and raise prices in the neighborhood forcing generations else where in a city that is already expensive
Frances	90039	The installation of new apartment buildings in areas primarily inhabited by POC is an act of violence! It’s a capitalist device to drive long-time residents out of their homes and allow white, upper-class intruders to move in.
Lucie		Displacing families is violence
Hilary Siegal	90004	We need to protect the surrounding community and their best interests, which this project goes against.
Arabelle Van Ranzo	91106	
Rafael Guzman	90065	No need for luxury apartments in this area. When the current residents and population in the area can't afford it, it is a problem.
Daisy	90032	
Michelle Reyes	91343	Gentrification sucks!!!
Audrey Harrison	90012	Fuck gentrification. They don’t even know the neighborhood they are in, says enough they don’t deserve to be there they are crooks.
Laura Recchi	90026	Unfair housing development practice
Carina Zamora	90031	This project will only pose a threat to our low income community and vanish it.
Sophie Yun	91107	
Adan Alonso	91801	We need more affordable housing, not luxury apartments. I respect everyone’s right to make a profit but not at the expense of people being able to afford a home, apartment, or be subjected to exorbitant rent increases base
Kevin Caballero	91780	Residents were not spoken to regarding the construction of the building. Encroaching gentrification. Unsafe building.
Rocio Vela	90031	The community would not benefit from the project one bit. First the rent would be so high that the community could not afford the rent. Then the additional traffic the project create. Lastly the wast it would create. Environmer
Angelica Loa Perez	90640	This development will further gentrify the Lincoln Heights community. Our current, largely immigrant and low-income residents should be prioritized over the interests of outside investors and developers. Lincoln Heights neec
Nicole Battaglia		86% unaffordable housing in a community with a median income of 30K amounts to forced displacemebt
Katherine M	90023	Gentrification has been at its high in Boyle Heights; Our rent has skyrocketed in the past several years due to the area being built for apartments that are beyond our cost.
Janette	90022	
Martha Vazquez	90065	Because it will bring price up of rental for people in low income community of LH. Also after what jose huizar did no project should be allowed of rebuilding apartments to gain profit.
Kaivalya	90024	Gentrification is parasitic. It displaces so many folks. Lincoln heights is a strong and beautiful community. Do not dismantle it.
Brian Ocaranza	90031	We don't need more people here. We are crowded. Are schools here are small. We dont want the whites and rich to move here. No no no. Why not build another school. Genterfication!!!
Lia Gamino	90031	We do not need this huge project in our small community. Also, no one ever asked the people of this community for our input.
Jose	90031	I oppose this project because it won’t benefit the community it’s just going to create hoax and a lot of traffic! This is a step to gentrification and that is what is planing to happen in Lincoln heights. We have to stop it before it l
Oscar Zaldana	90031	We don’t need luxury apartment in Lincoln Height. This project will increase illegal eviction. This project will hike up the rent in the neighborhood. The people in Lincoln Height didn’t get a say on this development.
Juliana Aguirre	90031	Because we have luxury apt and it will take away for what we stand for as cummunity
DEVIN	90031	
Bethsaida Brooks	90042	stop gentrification in our communities!
Steven Alatorre	90032	We the people affected by gentrification know all to well the affects and aftermath of such a project. The only ones who don’t seem to consider or care are the developers funding these projects and those that will live in those
Meg		Because the people do not want this and disrtbing nature
Sara Silva	90026	It is not fair to build luxury apartments in an area where the current people living there cannot afford. This will displace many families who have been living in the neighborhood for generations and invite more gentrifiers.
Tessa Williamson	90011	The ground is toxic, this is unhealthy
Antonio	90063	If the housing doesn't benefit the community or isn't community friendly then it can only damage he community
	90031	After knowing that Jose Huizar was paid off in order to approve developing plans why aren’t we putting a hold and reviewing all plans in Los Angeles County. How do we know that Gil Cedillo knows what he’s doing or that he
Stacy Dawson Stea	90039	1) With one member of City Council already under FBI investigation for development-related crime and corruption with others to follow - all projects that were passed through the gate without proper community input and dial
Lauren Bollinger	90042	Working people of Lincoln Heights deserve affordable housing! Not luxury developments that will only further displace them and lead to gentrification.
Teagan Jarvis	90041	It will impact too many negatively
Kiara	90031	It will displaced a ton of people and break the community we worked so hard to maintain.
Angel d	90031	Our community needs affordable housing, not luxury. Luxury housing will also bring forth gentrification and displacement of longtime residents.
jasmine figueroa	90201	people i care about are being affected
Victoria Urenia	90031	This project does not serve the needs of people in Lincoln Heights. This unaffordable luxury apartment project would lead to further displacement and gentrification of our community.
Emilia P	91208	I don’t believe renters should be evicted to make space for gentrification of their own community.
Andrea	89139	Anti-gentrification
Dominic Colangelo	90029	I oppose this project because it will further displace the citizens and split the community of Lincoln Heights. With its rich history embedded in Los Angeles culture, the project will be a divisive factor in the community for gene
Jay hernanez	91402	cultural values
Michael	90031	No public input ... density impacts
Kristen ann	91118	Stop gentrification. Stop greedy developers.
Lukas Jann	90039	Because it is a force of gentrification in a classically low income community. The methods being used to secure this space assume that no one will speak out for the people being pushed to the side, so we must speak out.
Ian H	90065	Putting luxury units in a place where homelessness is on the rise and people are struggling to keep their houses during a global pandemic is morally reprehensible.

Andrea Aguilar	90065	Oppose
Kenndra ayala	90063	I want to preserve my community I don’t want it to be gentrified like highland park is
Kimberly Menjivar	90031	low-income families need more opportunities and resources to escape their struggles and move forward to provide a better lifestyle for their children and themselves.
Nicholas Gehlken	92154	This project is for pure economic gain. Massive amounts of money generated from this project will go into the coffers of developers who do not know or live in the low income community of Lincoln Heights. The area is in cris
Sabrina Farooq	91007	Gentrification is evil!
Carlos Gomez	90011	Say no to gentrification!
Tiara Jackson	90026	I oppose these “luxury” units being built as this will only GENTRIFY Lincoln Heights thus displacing thousands of residents and families. It will do nothing but add to the housing/houseless crisis in LA. NO ONE WANTS THIS!
Nicolette Norgaard	90019	This is unnecessary, unaffordable housing that is negatively gentrifying Lincoln Heights
Celia Fonseca	90031	Son demasiados apartamentos para esta comunidad que ya de por si carecemos de recursos..el trafico seria un caos..aparte ya tenemos escuelas sobrepobladas..
Victoria	91780	
Alexander Propios	11221	It’s gentrification at its finest! Black and brown people will be forced out of this neighborhood that they’ve occupied for GENERATIONS! Stop this corruption!
Ian Nelson	91780	This project seems to clearly lead to the displacement of many Angelenos. It is unethical & greedy.
Victoria Urenia	90031	This project does not serve the needs of people in Lincoln Heights. This unaffordable luxury apartment project would lead to further displacement and gentrification of our community.
Vance Pfaucht	90041	Gil Cedillo is carrying on the elitist political culture that has plagued Los Angeles as a "major city" (and not a virtual city-state with it's own economic atmosphere, impoverished underclass and sizable homeless population) ar
Jessica Navarro	90034	People deserve affordable housing not luxury shit that no one can afford. Plus that building will make the area even more expensive, causing more people forced out from there homes. It time to demand affordable homes/apa
Jay Carlon	90042	The Pieter Performance Space has been home to many BIPOC and queer people for over a decade. Loosing this place, having just closed last month, has been tragic, and to see that it’s becoming luxury apartments is the ep
Juan Castro	90065	It doesn’t benefit the community of lhts
Margaux Hernandez	90270	The community needs affordable housing.
Natalia guerrero	91776	
Dafna erana	90042	Gentrification is violence; housing injustice is racial injustice
Jennifer wong	90031	We don’t need more unaffordable housing in Lincoln heights! Gentrifying developers need to get out of and stop trying to profit off of our communities. I am a homeowner here in Lincoln heights and I oppose this project.
Melissa Mateo		
Ruby	97217	I oppose gentrification of any neighborhood.
Lupe Davalos	90033	Just another project meant to run out low income residents. How can you make luxury apartments in a low income neighborhood like this? That's so unethical. People here are already struggling and as renters, they're susce
Brenda Zhang	90039	This project serves outside interests at the expense of Lincoln Heights communities. We don’t need more speculative development anywhere in Los Angeles or in this country. Power back to the people.
Leigh Adams	91001	I love this community for its life and culture. This proposed monstrosity has nothing to do with either of those things. It is more of an invasion than an improvement. Insufficient planning, where’s the parking? Yuck!
Ariadne Makridakis	91205	I don’t believe in the wrongful eviction and displacements of people and communities that have lived and sustained Lincoln Heights for years with zero transparency or community input.
Kelly Majewski	90026	It is an outrage that there has been no public outreach for this project. LA is a city in a pandemic, in a housing crisis, in a climate crisis. We should be looking at ways to help the community that already exists there and in the
Nickole Broom	90041	gentrification is detrimental to the ORIGINAL people who deserve to live there!!!! instead of throwing away the black & brown folx of your community, why not invest & better the ALREADY EXISTING communities & housing! c
Gabriella Sanchez	90014	This area needs more affordable housing. Not luxury apartments.
Amanda Medina Se	90041	I oppose this because of the impact it’ll have on further displacing residents. People over profit.
Nancy	91744	Gentrification disrupts the minority population negatively
Felisa Vasquez	92507	I oppose the project because being from South central LA, I know what it looks like when many people are displaced because they cannot afford to pay rent. As well because I know that if my family lived there, they would nc
Mia Miranda	90280	
Alyssa	90022	I do not want to ruin our neighborhood with this
Esmeralda	90023	There is a need for more affordable housing instead of luxury!
Blanca Martinez	90031	We need more affordable housing in our community not for profit/large business that will disrupt and displace people at risk in our community. These developers know nothing of the community and do not seek to enrich it. They seek to profit and they are not wanted here.
Yuzu	90041	It’s unacceptable to displace people especially in the midst of a global pandemic.
Ricardo Parada	90067	the community deserves to have a larger say in what is happening in Lincoln Heights, this is just furthering gentrification and forcing out longstanding families and resident
Isabel Norsten	99041	We need to support communities now rather than investing in development that harms communities by displacing them and leaving them out of pivotal dialogues. Gentrification is violence.
HBN	90031	Soul of the neighborhood cannot be regentrified -
Marilyn Hernandez	90022	We need affordable housing
Angel Jimenez Jr	90032	Is against preserving the cultural normality and stability of the current residence.
Skylar Cummings	90041	I oppose the development and the gentrification of the communities who live in Lincoln Heights
Joe Merrell	90027	We need affordable housing in the city! No more unaffordable luxury (and often vacant) apartment buildings!
Alexis Torres	89147	Luxury apartments like this make places less affordable for the minority communities.
Joe	90034	It’s accelerating gentrification, it’s environmentally hazardous, and it’s disrespectful to the community of Lincoln Heights as there is no genuine community outreach or engagement- it’s just “checking a box” something the Ci
Sophannarot Sam	90042	
TeaganKowitz	91321	
Ivy	90041	Because it is unethical and selfish to allow for gentrification that will increase illegal evictions in Lincoln Heights and contribute to many families and individuals being pushed out of their homes. There already is a lot of gentrif
Angelina Long	90031	This project is not favorable to our community and it’s going to put us at risk. Residents will be displaced and our community will be further gentrified.
Puja Titchkosky	91207	Because they are taking homes away from brown and Black people and families to make another building that LA does not need.
Magdalena Olivas	90032	I oppose it because it'll increase rent and people in this community will be forced out more than they already are. I oppose this because it is not for the people of Lincoln heights
Jose Olmos	90031	Opposition towards this project because this development will not address affordable and sustainable housing in the area
Pinkie Young	90031	I used to live around the corner, please protect this neighborhood from increasing gentrification! I saw many families get evicted from our block, and our neighborhood!!
Misty	90031	
Marvin	90031	Parking issues, land issues, home displacement, gentrification, the business of the street in mornings will cause for chaos to the neighboring school
Edith		
Jocelyne Sanchez	90032	I saw how luxury apartments accelerated gentrification in both of the neighborhoods I grew up in, South Central and East LA. They are violent and displace so many of our wonderful community members. We don’t need mo
Marissa Guangoren	90031	They are trying to run us out of our own community .
Paul Pescador	90031	
Adrian Chavarin	90031	I use to live in 1848 1/2 Workman street for 22 years. We where forced to move out and inky got offered about 10,700 but at the time money didn't matter. The problem was that my dad was go injured while moving out the ho
Anya silverman	90041	The project will displace people who have lived in Lincoln Heights for decades. We do not need it. Listen!
Rochele Gomez	90042	The only housing units that should be built right now are affordable housing units. This large development is for the rich and will make the area unaffordable for people who have been living there for generations. People are
Kate	90004	The cultural diversity of Lincoln Heights is at risk.
Kate	90004	The cultural diversity of Lincoln Heights is at risk.
Sanne Hamelink	6217 NN	
Cristina Garcia	90031	A low income neighborhood has no need for luxury apartments.
john burtle	90042	
Whitney Woodard	90019	There are already people living on the land. Don’t take it away from them. Serve the people not businesses.
Amara Higuera	90031	Developers are violent and this city allows for violence and pain to be inflicted on the people of LA everyday.
Aliza	90029	
Zac Flores	90033	People Over Profit! Community oversight over new development to ensure it’s equitable and combats displacement.
Nadia Franco	91205	
Sebastian Gil	90031	this project will kick out hundreds of poor renters out of the community and the community will become gentrified and thats not right. People who have been living here for 50+ years have developed a sense of community an
Danielle Torres	90033	Been removed from housing before due to gentrification and the retail selling of the property.
Lluvia Higuera	90031	Because it will contribute to more displacement.
sasha	91381	i oppose the displacement of members of lincoln heights community, these projects amplify gentrification, furthering racial inequality
Sergio Sanchez	90031	I can't fathom why this is even a question. But it's obviously the right thing to do.

Janet	90210	It’s gentrification and destroying what stood there before. This wealth could be used to aid the homeless and lower income areas but no, it’s going to be made into overpriced, prison-like apartments that demand renters mak
Janis	90031	Gentrification is violent, racist, and unnecessary. I implore these politicians to think about what truly serves the low-income POC population of Lincoln Heights. Instead of putting money into this market-rate project which will
Iris Licea	90002	Because things become more expensive for the community, they should invest in the community not take from it
Jennifer wong	90012	Stop gentrifying our rich and diverse LA city. We need to invest in people of color and not turn everything into a eden for Karen’s. We lose our identity and become every other corporate cut out city. When you travel across Ar
Maya Bon	90290	gentrification is an insidious scourge that eats away at communities, at neighborhoods. we need to reframe how we view the term "development" so that it is focused on the betterment of the people who live within a propose
Ruby Corona	90063	Unaffordable housing and gentrification
Marissa samayoa	90031	Preserve our community to what it actually is
olivia biera	90012	it is not affordable housing and lincoln heights is dense enough in population. plenty of units are already empty in dtla.
Isabel Muller	90042	
Carolyn A Hauk	90031	We need less gentrification in the rare few historically black and brown communities. Keep housing for all available. This will raise property value in the area and kick hundreds out from their homes due to rent rises. Also they'
miri hindes	90041	it is wrong for our community. out of scale. it does not serve long time residents. it is poorly planned. will change the area forever. greedy. out of touch.
Kyle Lydic	15963	
Sarah G	91803	DO NOT GENTRIFY LINCOLN HEIGHTS. I spent a large portion of my life here and my grandparents still live here, they are senior citizens, this would cause immeasurable damage to them and the community! PEOPLE BEFO
Jimena Iaso	90032	Because it promotes the displacement of wetlrking class families (gentrification)
Stephanie Guzman	91342	This housing is not for the community! Rise up and speak up against gentrification.
Jordyn aamot	91801	The project will kick out the current black and brown communities.
Brian	90038	By building projects like this and not including any local community leaders is wrong and bad for the feature of the community. Gentrification sucks !!!
Stephen Kamhi	90023	Need to involve the community when making decisions like this!
Kayla	90006	We need to preserve the neighborhood and the people in them. Big corporations do not need to move in and displace locals.
Chelsea Hughes	90004	Because we don’t need more expensive high rise buildings in LA
Adrian Martin	90031	Housing is expensive in LH already and this project will only increase our rents. This community is low income
Maya	92345	There’s probably no people of color that can afford this housing so it’s not right.
Gemma Lurie	90064	gentrification is war on low income communities and cultural genocide on poc. People over profit always. These city officials are in bed with landlords and developers and poc experience the direct impact of this greed and u
Nathan Lee	93063	Because FUCK these rich idiots and their stupid money. They think they’re so smart but they can’t even fathom the suffering of another human being. They’d sell their own family for more cash I swear. These type of people a FUCK YOU PINCUSHION GROUP U FUCKING LAMEOS
Promise K Williams	90242	gentrification hurts communities. It pushes out hard working people who worked hard to build their businesses.
Sophia Torres	90032	Having New apartments at higher cost for rent is a way to move black and brown communities out of their homes.
Marco Cervantes	90063	i don’t like gentrification.
Steven Garcia	90032	It will only cause suffering.
Isabella	90027	Developers are ruining peoples’ lives
Javier Alvarez	90031	Because I believe it will ruin the livelihood of Lincoln heights.
Tom Norris	90031	There is not enough affordable housing. We do not need luxury apartments with sky high rents!
Chloe Welmond	90019	People over profit !! Gentrification is violence
Mayra lopez Ramire	90031	I have lived in this community for 26 years. I went to the Elementary across the street from the property. This project will cause lots of problem in this area, traffic will be created. Making the school zone not safe for the studer
Natalia Guerra	90274	Because gentrifiers are displacing long-term residents & that’s impacting mostly poor brown people. People have strong relationships to their space and their neighborhood communities. Wealth & capitalism should not interr
Loki Blaque-Lee	90017	
elspeth	94102	stop gentrifying the last remaining affordable neighborhoods. money does not culture make, and building these would begin to erase the identity of those who live there, by catering to the gentrifiers and not putting this mone you can't cover up culture and silence a neighborhood for the sake of profit.
Olivia Onek	94110	It will push out communities of color and cause gentrification.
Radha	2466	
Maya Schubert	90031	This will displace and disrupt the community in Lincoln heights, for something they are not asking for and do not want.
Erica Barrios	90015	This is not serving the community it’s being built in. Luxury buildings are taking over this city without ever being fully rented out because NONE OF US CAN AFFORD THEM. Yet still more are being constructed. Stop destroyi
Wendy Lau	94704	Housing crisis in LA is getting worse every year. I've seen my hometown, HLP, getting gentrified through my high school years and it pains me to see my neighbors being forced to move out because they cannot afford rent. K
Diego Espino	90063	I went to High School in Lincoln heights (Bravo High School). Its my community, and I know that the apartments being built will not be affordable for the families in the community. This in turn will lead to wealthier individuals r
Tyler Le	90031	We dont need anymore evictions in our neighborhood. Prices for rentng have gone up throughout California, and now this luxury apartment that clearly no current Lincoln heights residents can't afford?!? No thank you. This p
Ariel Molina	91304	The Heights is an innercity that consist of individuals who are middle/ lower class, it doesn't seem right to make profit where it doesn't belong.
Camellia Aftahi	92025	
Mason Allport	90012	The last thing this neighborhood, and LA as a whole, needs is a luxury development. We need affordable and/or FREE housing now to keep families in their communities.
Jennifer Moreno	90031	
John Conant	90026	Affordable housing for all! Invest in communities! Stop gentrifying them! All neighborhood developments should be led by the neighborhood!
Jasmin Morales	92553	I’m oppose to this project because it will not serve the community and only harms the community.
Morgan Henshaw	91107	The community needs affordable housing options, not luxury living! Folks are being forced out on a weekly basis, families that have been Lincoln Heights residents for decades. This project spits in the face of the community.
Siobhan Furnary	90031	We should instead use the space for a community garden. Something to uplift and enrich the community. Thank you.
Ariel Bustos	91106	
Hannah O	90049	Gentrification harms the disenfranchised, the poor, those of color. It must be stopped
Natalie	90041	
Danny Palacios	90031	My neighborhood
Sophie Prettyman-B	90802	This project would displace even more low-income people who have lived in the community for generations. The entire nation is going to need a long economic recovery period due to the pandemic, and this will only create n
Joel Garsy	90065	Lincoln Heights is one of the last remaining neighborhoods of LA. I support its residents.
Kevin Fistanic	90066	End gentrification, protect our diverse cultures!
Jorge tapia	90031	I oppose gentrification.
Justine Juarez	90032	It will displace already suffering residents and increase the already increased homeless population. Lincoln Heights does not need luxury apartments it needs affordable housing.
Patricia	90026	Infiltrating local communities and removing locals from their homes due to increases in housing. These apartments are ugly and ruining all culture of Los Angeles
Angelina Nieto	90031	Gentrification is bad
Brooke Ely	91208	Current residents shouldn’t be evicted so rich people can move it
Stacey Perez	92521	I oppose this project because it’s destructing the Lincoln Heights community! We need more resources for our people not more luxury complexes.
Claudia Carrillo	90022	No
David Camacho	90031	Inefficient, unethical project
Maggie Quan	90031	This project is a threat to the community that makes Lincoln Heights what it is. For far too long our neighborhood council and powers that be have sold the community out, to USC Keck and other communities. What little ren
Sally b	90031	Endangering community and local businesses
Julia	90039	Do not absorb a section of this community and therefore push out opportunities for the local community to engage with this space.
Bhavini Patel	90047	It displaces thousands of family-owned businesses and will only widen the gap between the poor and the rich.
Leidy castillo	90031	This project will destroy Lincoln heights and it will leave many tenants without a home.
Daisy Elliott	90011	The community needs to be a part of this conversation. They need a seat at the table.
Nathaniel Carbajal	90031	Gentrification
Diana Subdiaz	9177”	I’m opposed gentrification. The residents of Lincoln heights would be negatively impacted by the project. Rise in homelessness.
Suzanne Nordberg	90031	I’m new to the neighborhood but if this project is being pushed through without the local community being able to voice their concerns then it is just wrong.
Luke Forsyth	90031	Not consistent with neighborhood
Michelle Suarez	90065	The Lincoln Heights community needs to have a say on housing developments. Housing developments change so much in a neighborhood, and the city needs to do its job to include the voices of the communities, especially
Eduardo Sanchez	90008	Against gentrification

rosemarie camacho	90063	this housing does not help the community and will help to displace many families as they are priced out.
Borrah Jackson	90001	
Marialicia Gonzalez	90031	It will hike up rent prices and further displace our current residents!! NO GENTRIFICATION.
Melissa Palacios	90031	
Wendy Chu	90031	My family has lived in Lincoln Heights since 1985. Our community needs affordable housing for immigrant families, not luxury condos!
Madison clark	90057	This project does not help the community, it hurts it. Luxury developments such as this one suppresses neighbors surrounding it and excludes the working class from reaching attainable housing. This is unacceptable.
Glafira Lopez	90605	This project will eventually lead to people being displaced because they will no longer be able to pay the cost of rent, and people in the area can't afford the cost of rent for this building.
Benjamin Whistler	97214	As a former Californian, projects such as this pushed me out of California; as a child of landlords, it's easy to spot a project detrimental to an entire neighborhood's character. As a grandchild to one of the 1990 ADA's archite
Nina Hadzi-Nesic	90041	Because it's unfair to displace lifelong residents and because this project would increase homelessness the city says it wants to solve. Because putting profit and luxury apartments before people (and before consulting with t
jessica meza	90001	i oppose the project because it is unfair to the people already living there. not only will the rent prices rise, but parking spaces will be hard to come by, and they'll be uprooted because they won't be able to stay in a new fanc
Gisell	90040	I do not support gentrification
Isabella Sanchez	90042	Inhuman
Andrea Kraybill	90042	No community input, displacement of local residents, favoring gentrification with no consideration of the local community and residents who will be affected for decades to come. Shameful behavior!
Jonas Mosesson	90026	Because gentrification needs to stay out of Lincoln Heights
lauren espinoza	90032	I don't want this in my community as it will negatively impact people like my grandmother and cousins who live there.
Chantal	90040	Gentrification is a threat to the well beings of local, situated residents.
Meesha Merat	90057	We must protect long time residents. This 'luxury' apt building is not what the people need or what - listen to the people. Understand the harms of gentrification
Alondrq	90018	Its a hazard
		its a hazardous threat to our communities health and well being!!!
David Foster	90255	Gentrification does no good to low-income communities. It just pushes people out instead of elevating them.
amber	90028	highly oppose
Sam F	90065	LA needs affordable housing
Crystal Carrera	90242	We need more low income housing not luxury apartments.
Vanessa Franco	91723	Not really they did this in highland Park and also in boyle heights this is not how it was in 1940s 1950s or 1960s this is 2020 kicking people out of houses or apartments that is really wrong to raise the rent up high people can
Jonathan P Douglas	90065	I stand with my neighbors as a member of the working class myself. We need affordable housing not more gentrification.
Katharine Pinney	90031	Oversized, will increase traffic (and traffic already backs up on Pasadena Ave), we don't need high end developments let alone ones that have to architectural thought to their "design" or the history of the neighborhood, the re
Vanessa Giannini	90031	1. It's too large on a two lane residential street. 2. It is an ugly box in the middle of beautiful historic homes. 3. Not enough parking for such a huge influx of residents. 4. You haven't listened to what the neighbors want. Los Angeles has deep history especially this arts area. This building and all of the new developments are hideous and will not age well. Developers deep pockets need to stay the hell out of NELA
Olivia	90012	
Jill D'Agnenica	90031	We have plenty of luxury housing in Los Angeles. We need more affordable housing. Especially in our working class neighborhood.
Brent Armendinger	90031	We need actually affordable, rent stabilized housing, not more luxury developments!
Kate MacQuarrie	91103	
Daryl Bergman	90004	
Ikee cosby	90032	
Kathryn Endler	90066	This project disrupts the community of Lincoln Heights by raising rent in the neighborhood, pushing people out of their homes, and threatens the cultural community by operating under the assumption that they have the right
Alejandro Tapia	90031	I want to keep my community affordable for its local members.
Kristen Rederscheid	90042	The economic fallout resulting from the current pandemic is about to exacerbate the ongoing housing crisis in Los Angeles. Not only is NELA and District 1 already experiencing record homelessness, but impending mass evi
Spenser Theberge	90065	We need to support community based developments NOT profit based developments!!
Ruby Martinez	90065	The community needs affordable housing or some type of resource center rather than a luxury complex that brings no community benefit. My neighborhood is experiencing an increasing problem with the homeless where the
Abdul Qutub	22182	Because I support working class people
Jaden Mckernon	90012	it will force people out of their homes and its unfair to the community living there
Jeff	90015	This is an egregious wrong. Plain and simple.
Jessica Burk	91006	
Sophie Richman	90065	Because it will disrupt so many of our neighbor's living situation and it has clearly not been planned out with any consideration of those who live nearby.
Lauren L	90012	This will raise rent in surrounding areas, drastically affecting the low income families that live in the community.
Sandra Guerrero	90031	It will hurt our community
Nic Yim		
Diego	91001	f gentrification
Pamela Cohen	90042	We need housing developments that are designated 100% for very low income tenants to stem the housing crisis and keep our same neighbors, not evict them.
Calvin	90032	There is no place for luxury apartments in Lincoln heights. La city council should work on developing affordable housing for tenants and their constituents, the People who voted for them in the first place.
Mateo Celada	90004	It's WRONG
Jhani Randhawa	91106	I do not live in Lincoln Heights though I stand in solidarity with my community there in their thriving. Developers such as Pinyon have taken advantage of the health and human services crises exacerbated by Covid-19, as wel
Ashley Ayala		Taking away affordable housing
Sylvia Osorio	90031	I was born and raised in this neighborhood. I went to sacred heart high school. Lincoln heights is my home and we have all Struggled together in this neighborhood. Now to have someone come in and destroy the neighborhood just so a big company can come make $ off of us the working class is ridiculous. These ppl have worked hard to have t
Jessica Ceballos Ca	90042	
Philip	91001	Because the building of these mostly luxury units exacerbates the housing crisis by inducing the gentrification of the neighborhood, which is historically made up of brown and asian people. There are environmental implicatio
Diane Bedrosian	92010	I spent time in the area at USC Keck School of Medicine. This project is much too density for the area. It will be a disaster and will displace people and leave people homeless.
Carolyn Krammer	90031	This is happening everywhere. Developers are trying to get rid of lower cost affordable housing. They come in and bulldoze communities and leave them without housing. Our neighborhood needs to be strong and do not si
dimei wu	90024	LA has a housing problem that disadvantages poorer people who are often minorities, and this apt doesn't fix the housing problem! More housing is not the answer, and a luxury multi unit apartment is definitely not the answe
Evan Perkins	90065	The income of the general population in Lincoln will not correlate to the price of rent here. The community doesn't want or need this building.
Alyssa Kahn	90031	This development will displace too many people
Clint Dodson	90031	
Melissa sisneros	90031	Stop taking away from our community !
Drew Fournier	90031	Free, prior, and informed consent coming from the lincoln heights community that cares deeply about their neighborhood and stands to be drastically affected by a project of this magnitude is absolutely necessary for this pro
Anh Montealvo	90031	Our streets and community resources cannot handle this influx of traffic.
Laura Stinger	90065	As a neighbor of this zip code I often come to Lincoln heights for community dance class, to eat at small locally owned restaurants and to enjoy the small scale diverse streets on walks around the area. I stand in solidarity wi
Gustine Fudickar	90027	Rent hikes ultimately driving residents out of the neighborhood
Fatima Austin	90065	Yes
Angie Town		
Kate O'Brien	90048	This is going to displace families from an historic neighborhood and they deserve to be heard. It's unethical. Stop letting developers with deep pockets be the only voice dictating how the city changes.
Janet Sarbanes	90065	Why does it always have to be luxury housing? Why not housing for regular people?
Max Himelhoch	90026	
Saul Narro	90042	It's not hearing the voice of the community and they should before any type of development
Clement Tsang	90031	Gentrification and profiteering.
Sheriden Smith	90042	Lack of affordable housing options for tenants, blatant gentrification, and a lack of community inclusion on planning.
Drew Fournier	90031	Free, prior, and informed consent coming from the lincoln heights community that cares deeply about their neighborhood and stands to be drastically affected by a project of this magnitude is absolutely necessary for this pro
Francis Nguyen	90042	This project will proportionately displace and marginalize the Latino/Lincoln Heights community even more. No more gentrification of long term residents by greedy developers. That housing project being proposed is not for t

Laura Bartczak	90039	
Alexis Diaz	90031	I live in this neighborhood and I don’t to be affected by those “luxury” apartments...
Jesse	91733	Gentrification is a horrible thing and it will raise the annual income of the region
Samantha Mazzola	91606	I oppose anything that will induce gentrification and displacement of marginalized communities
Liam	91030	It'll artificially raise the annual income of the region
Rita Kassak	90042	This will cause displacement and it is NOT affordable housing. We are sick of luxury housing that sits empty and has no regard for those who actually live in the community.
Juan Chantes	90031	This will start the gentrification of our community & will push the ones currently living in the area out. Who will live in these buildings? Upper middle class? Stop abusing our community.
Mary McGuire	91205	LA does not need any more displaced people. This would no doubt be the outcome of such a project.
RICHARD MCCART	90031	Not sufficient parking, height concerns, traffic, pollution and close to or on the site of former designated hazard material area.
Adriana Meza	90031	All this project will do is displace the people of our community and bring in people who’ll will gentrify it. This is unfair to everyone who lives her since it won’t provide enough affordable housing for our current residents.
Daneyda Garcia	90031	As it is homelessness has become a greater issue for families in the community there is need for affordable housing not the opposite
L. Campos	90042	I demand transparency from elected officials. The community deserves to be heard. This development will contribute to more displacement, traffic and pollution.
Ben Bekey	90042	Housing is a basic human necessity. LA doesn’t need more luxury housing, especially in Lincoln Heights where most residents are working-class renters. There’s corruption at every level of this project, from not consulting residents to fast tracking during a pandemic to planning a parking garage on a documented environmentally toxic site to the developer bribing non-residents
SHeffer Bruton	90065	This structure does not fit with the current or historical style of the neighborhood. It will block views and significantly change the value of the property surrounding it.
Viri Gamino	90031	I’m against the developments in place
Martin Cervantes	90031	I oppose this project because if it passes many more people will be displaced from their homes. We don't need more gentrification around here.
Liza Galvan	90031	The fact that there was no community input and the developers lack knowledge of the area and safety factors. There's is distrust and there seems to be a hidden agenda for this project. The potential displacement of resident
Haruka Sometani	90019	Small communities must be protected and not forced out by the developers.
Luz María tapia	90031	These buildings will ruin our community
Jaime Gamino	90031	I’m against gentrification. Protect the community.
Marilyn Gladle	90065	1) Parking, mixed use status should not apply, Density, Polluted soil open to environment, Streets can not handle the additional projected traffic, the small metro stop if used, will be impacted so that current users will not be a
Xavier Flores	91101	No more unaffordable luxury condos, if you want to build something build low income housing to house the record high homeless in LA
Albert Lopez	90039	I went to school just west of Lincoln Height, I know the neighborhood well and have many friends there. Such a development would shatter the social framework and sense of community in this predominantly Latino/Mexicar
Michelle Litchfield	90065	The vast majority of the people who purchase these units will own at least one car per unit, particularly in the era post-covid, when Metro is no longer safe and those who can afford to avoid it drive themselves instead. (And t
Samantha Garcia	90031	NO, there’s no need for it. No parking, more problems.
Emily Tetri	91207	This would destroy a neighborhood and culture and force people out of their homes.
Sandra Martinez	90031	
Rebekah Lasarow	90037	It doesn’t support or give anything to the community. There is not nearly enough low income housing in the planned apartments planned.
Jennifer	90031	This is not beneficial for our low income community
Olivia	90042	This is not what the people of Lincoln heights want. Respect the community! Don’t build this building!
Lilia Jimenez	90065	The building would negatively impact the community.
Justine	90031	I live in Lincoln Heights, this is a small diverse neighborhood with a lot of Ma & Pop shops around. You can just see & feel the history all over here. This type of project will only hurt the residents of Lincoln Heights and serve n
Kelly Rodriguez	92395	It’s gentrification of a city that doesn’t want it, nor do they need it.
Bianca juarez	90031	TO STOP WIDE SPREAD GENTRIFICATION IN LA!
Thomas Hallett	90031	That monstrosity belongs in a field where no one will see it, not ruining the place I call home. Strongly opposed to this so called project
Lucas Celler	90031	This building is a result of corruption and it should not exist
Claudia Acuna	90033	
Penelope Jones	90065	Too dense for an already crowded area; no high rises in our area; no affordable housing; adds to already bad traffic situation
Mia Huitzil	90031	The community of people residing here need to have a voice available for them and deserve to have a say in what is being put in our communities.
Cecilia	91606	
Phoebe Kobabe	91204	No more Luxury Apartments!! This is not that the community needs.
Wendy Gutschow	91030	Gentrification is wrong and unjust. Lincoln Heights has already suffered due racist systems being put in place. That have affected home ownership.
Ariel velasco	90031	With the current housing crisis in Los Angeles, it is disgusting to build luxury apartments anywhere. Stop gentrification.
Dario sanmiguel	90031	Prefer low income uncorrupted projects
Skarleth Herrera	90022	i oppose because our community needs to take care of its own community before they take care of the needs of outsiders
sam wentz	90039	because gentrification is violence
Veronica Rico	91331	Porque el proyecto va ha deslojar a mucha Gente de la comunidad y no va haber recursos suficientes para la gente que van a ser deslojadas. Entiendo que El nuevo establecimiento va a tener 'low income tenants' pero ya se
Layne zolninger	90031	It does not represent the community. It is ugly. The site is not safe due to toxic waste. It does not include anywhere near enough parking, and there is not sufficient space for 500 more cars to park in the neighborhood. This project is a perfect representation of the ugly face of gentrification in Los Angeles. The design is soulless. And it will only be rented by wealthy white people from outside of the neighborhood. It does not serve Lincoln He
Linette C Woron	90042	It looks like the City wants to turn Figueroa into Wilshire Blvd- there are many people who can’t afford the rising rents. I myself am disabled on a fixed income 1/2 what I used to make when working, just hanging on. And I ow
Dydia DeLyser	90031	A working-class community like Lincoln Heights cannot sustain over 400 luxury housing units.
Aren Zolninger	90031	This housing is not for our community and will only serve to displace our lifelong members.
Anita Martinez	90031	Out of scale with our historic community. We need housing for our working class community that is increasingly getting pushed out of homes in this area. Luxury rentals are going empty in other neighborhoods, namely Down
Alan	90031	Too many units, not enough parking, overall disruption and disrespect to the community including paid shills to pose as residents in support of the project. No one in the neighborhood that I know supports it.
Jocelyn Ortega	90063	lincoln heights doe not need luxury housing. it needs affordable housing instead, we need to keep the people in that community safe and not gentrify the area. Hear what the community has to say and listen to their needs!
Miguel Ayala	90032	I oppose this project because it is an attempt to erase the Black, Brown, Asian communities and we will not stand for this.
Miguel Ayala	90032	I oppose this project because it is an attempt to erase the Black, Brown, Asian communities and we will not stand for this.
Michael Shifflett	90031	Excavation will release harmful chemicals in the vicinity of a residential area and an elementary school. Proposed number of units per sqft is too dense. Lack of parking spaces will cause undue burden for existing residents to
Renee salazar	90031	We Need Low IncomeApts.To Help Familys Struggling !!!
Jeri Ruiz	90031	I’m signing because I oppose this giant project that brings nothing but congestion and more displacement of our longtime residents.
Christopher Richmo	90031	This project is to dense for the block, under-parked and there have been inadequate soil testing.
Joyce Fortune'	90031	No affordable housing assigned in the development. Size not suited for community.
Ian Endsley	90031	too high density , too expensive
Sky Spiegel	90031	I fear for the life and we’ll bring of myself and my family as funding and resources get poured into new plans that will leave us vulnerable to the affects of gentrification. I ask for a say and pray that you all will listen and we will
Michael Alvarado	90004	It’s wrong!!!
Michele Young	95666	It’s a great area. I used to live near by.
Melissa McNeely	90042	This development goes against the community of Lincoln heights in a staggering way. Neighborhoods are not just land to build expensive developments on, they are created by people, over time, that know each other and bu
Laura maxwell	90039	We need affordable housing, not overpriced luxury condos.
Noemi	90026	This project will displace people in need, those who diversify Lincoln Heights, those who make up this beautiful culture in LA.
Sammi spatz	90065	
Monica Jarquin	90302	I oppose this project because what we need right now is affordable housing, not luxury apartments!!
Anna Eisenman	90031	
Adam young	90004	This is going to create huge problems for the existing residents of Lincoln heights!!!
David Camacho	90031	Inefficient, unethical project
Mara Fisher	90031	This would be the largest housing development seen thus far in Lincoln Heights and does not represent the needs of the current residents of our neighborhood. This development would increase illegal evictions and fasttrack
Michael Navarro	90031	Not enough affordable housing units
Marcela Galeas	90033	This project was done without the consent or knowledge of the affected community. The people in this community are already in a difficult situation, going through with this project will only make their situations worse.
Zinzi Edmundson’s	90065	Cruel eviction of neighborhood businesses, ruthless greed, blithely (racistly) dismantling YET ANOTHER community... I could go on!
Oscar Flores	91754	A project of this magnitude will increase illegal evictions in Lincoln Heights and contribute to the Ellis acting of multi family properties.

Matthew velis	90015	Historic areas should be kept how they are. Lower income areas should be crept how they are with improved education and resources. Stop kicking family's out with no where to go
Samuel Bosson	90031	This does not do anything to help the community of Lincoln Heights.
Kevin Lessley	90027	This development does not benefit the people of the community. It's not what they need. It's another eyesore in our city.
Daneyda Garcia	90031	As it is homelessness has become a greater issue for families in the community there is need for affordable housing not the opposite
Caleb Lyons	90026	I demand an end to this huge development that was secretly slipped by the public in a pandemic. There must be a dialogue with the people in the community of Lincoln Heights before another unaffordable monstrosity ruins a
Bruce Harrison	90712	I grew up in that area and would be a shame to see this building go up.
David Camacho	90031	Inefficient, unethical project
Clementine creevy	90042	Terrible use of funds!!! Please nobody wants this!
Marianne Verrone	90026	
Xenia Holm	43202	
Flynn Nicholls	90042	
Edith Almader	90031	
Amanda Gomez	91011	468 Luxury apartments at ave 34/ Pasadena ave are a direct threat to our community
Joan Robles	90065	Because they're trying to force hard working Latinos outta our community, no one right now during a pandemic can afford luxury apartments. And now with people coming forward that they were being paid to be pro for the p
Patrick Albertolle	90041	It would completely destroy the neighborhood, the transplants will bring nothing new.
alexandra wuest	90065	This project doesn't serve the residents of this neighborhood and would exploit the neighborhood while displacing current residents.
Sandra Herwerth	90031	Size of proposed development out of scale for already densely populated Lincoln Heights. Lack of parking will result in tense situation for residents and will cause conflict. A suden population explosion of up to 2,000 new re
Jon Coplon	90042	We support including affordable housing in projects this size
Kae Whalen	90031	A lack of affordable housing in Los Angeles does not justify the violence of eviction and demolition of these homes— not to mention that the housing this project would eventually provide is almost certainly going to price out
Adam young	90004	This is going to create huge problems for the existing residents of Lincoln heights!!!
Christian Sanchez	90043	history of lincoln heights needs to be preserved
Steven	90031	I oppose the project because of the possible rise in rent.
Cynthia Cuprill	90031	impact to community members - need mixed income housing not luxury apartments
Dave Chapple	90065	This does not belong in this neighborhood and will be met with resistance through every turn! Measure JJJ and the TOC plans do not take into account "taking down" and neighborhood that has been here for generations. No
Ramon Lopez	90032	Gentrification
Leslye	90031	I'm oppose this project because it's gentrifying the community which means raise rent for renters who have lived there for several years destroy the culture in the neighborhood and erasing any sense of history we have left in
Derek Allison	91016	I work at a school one block from this site, and this development would greatly impact the community I serve
Gabriel Quiroz	90063	This project is accelerating the gentrification of this community we need affordable housing for the current residents,not luxury apartments. The people of Lincoln Heights can't afford these luxury apartment, aren't you suppo
Anya Kushwaha	76092	Preserve the historic area of Lincoln Heights!
Sheyla	90601	i was already gentrified. Lincoln heights was my home for 26 years, as soon as i was born, it was all i knew. 2670 sichel st #5 is where all my memories are. I lost it due to developers coming in and claiming it. Lincoln heights
Amber Ramirez	90031	I oppose this project because it is only going to hurt the people of Lincoln Heights. Buildings like these would bring more gentrifiers to our neighborhood and cause the displacement of low income POC.
miri day	90041	out of scale. the community doesn't want it.
D. Estrada	90042	This is not what the community needs
Valerie v	90029	Hurts communities. We need affordable housing!!!!
Stephanie Salinas	90046	I oppose all gentrification threats to longtime LA residents who are the backbone of this STATE and COUNTRY! Power to the people always.
Manuel M. Gutierrez	90025	Keep your gentrification out of communities who are already being oppressed from every direction, least we need is this hideous structure raising the rent on a low income community.
Amy Yao	90290	Housing should consider the economics of the current neighborhood and its citizens. There needs to be more affordable housing and not just more mega apartment condo complexes that are hardly affordable!!
George Gerst	90031	The project is way to big, and the developers have tried to get it passed without community involvement, and they have skirted the law if not broken it. We have evidence of bribery on TAPE!
Ansis Hoheisel	90026	Lincoln Heights needs affordable housing that fits in with the scale and character of the neighborhood! This monstrosity of a development will inevitably lead to the Gentrification band displacement of one of LA's most histori
Max Maslansky	90031	It will accelerate further development and displace working class families
nancy soto	90031	This project is dangerous to our community and will displace many people
Jeremy Hansen	90031	Raise housing prices to push out lower income families, lack of parking.
Hesper Dominguez	91770	It's distasteful and unnecessary.
OMAR BRIAN CERR	90262	Unaffordable housing
Vanessa S	90042	I oppose the project because of the displacement of families that the building of these condos will cause.
Anthony Lepore	90031	The construction site is adjacent to a lot that has been polluted for 68 years. This is an environmental hazard.
Angela Celestino	90032	This project targets my friends and family who've live in and love lincoln heights. This project isn't for the low income people of LA!!
Karla Orozco	90003	It is unfair to make a decision without the consent of those who reside in the area if you're going to build homing at least have the decency to make them affordable to the people (locals) who already reside in that area. I hate
Rogelio Perez	90011	As a former resident of Lincoln Heights it pains me to know that there's people being forced out of their homes due to rising prices. Not only do I believe that this sort of displacement is harmful and unethical, I also believe it's
Frank	90031	This project is not intended to benefit any of us living in the area.
Salvatore Franchino	N/A	I support the project! 66 low income units near a mass transit station sound amazing. It'll help welcome new neighbors to your neighborhood and help alleviate high housing costs.
Amara Leipzig	90026	I am a resident of Historic Filipinotown where I have watched the same process unfold and destroy this neighborhood. What I watched happened before a global pandemic and the extreme lack of assistance to renters and m
Anna Heeter	98075	This new housing will negatively affect communities of color and push low-income people and families out of the area. They absolutely rely on the prices of their houses remaining the same and may end up losing their housir
Myrka Santana	90063	Lincoln heights needs affordable housing for the community that cannot afford high paying rent.
Joey Forsyte	90031	There are already three huge projects with laughable or no affordable housing. We need to protect this community. We expect our representative to not just meet us, but fight for us.
Melissa Hernandez	90032	To keep our community at affordable rate.
Marco Villarreal	90031	I want Lincoln Heights to stay affordable to myself and all of its residents
Vic Mendoza	90032	
peggysue piedra	90062	stop gentrification everywhere!
Cassandra Renteria	90031	I grew up in Lincoln heights! My whole family still resides there!! I do nt want my childhood erased!!
Chuck miskevich	90031	Because gentrification is evil and we need to leave Lincoln heights to its tenants who have lived there for years. We're talking generations.
Kevin Perez	90063	I want to help save the tenants being oppressed in Lincoln Heights.
Marilyn Gallegos	90031	Why would I support a project that I didn't know was happening in my neighborhood? And I don't want this neighborhood to be become hipster . They keep taking over our community's !
Vanessa	90031	We need to stop gentrification. The people of this community can not afford to live in these new "luxurious" buildings. This is unfair!
Zach Callahan	90031	Lincoln Heights is a peaceful, working class neighborhood. This building will do nothing to serve the community, which is already reeling from the economic effects of coronavirus. Instead, it will displace people and make wa
Chloe	90069	Because there should not be luxury apartments here. It's ruining the neighborhood
Jennifer Islas	90031	Many low class families live in Lincoln heights, how are they expecting for them to pay for high cost rent in a pandemic? There's only so much that these "benefits" can provide for them, it isn't enough!
Jenny tchang	90031	
Karina G.	90031	This is capitalism at its worst...build luxury apartments in other locations unless you are willing to take short term losses for long term gain...by investing in the communities being gentrified and exploited with these huge and
Allison Miller	90032	I live 2.5 miles from this site and find the socio-economic and environmental risks of this development abhorrent. There is no defense for this other than greed. Now, of all times, is the most obscene time to consider building s
Britt Woods	90041	I do not want the excavation of polluted soil near schools. We need to protect our children.
Katelyn	91001	Damage to the community in many ways. Examples being unaffordable, toxic grounds, no parking
rachelle Sawatsky	91001	It will displace long-time renters and community members. I have huge concerns for the environmental degradation of the site and the danger to be had by excavating it.
Rochelle	90031	The residents of this neighborhood deserve housing that they can afford. No more gentrification!
Erin	90031	It is a huge heath and public safety risk to an entire community and will impact generations of people and their lives and livelihood
Phil	90031	Dangerous one way access and egress along with toxins in the groundwater make this a public heath and safety issue
Nancy C.	90031	I think that's this project will bring up the gentrification percentages up and it'll also cause other people to have to move out of their current home to something they can afford. This project will most certainly make this happe
Phil	90031	Dangerous one way access and egress along with toxins in the groundwater make this a public heath and safety issue
Matthew Johnson	90023	The development is on toxic land, it contains far too few low-income residences, and there are not enough parking spaces for the amount of units.
Math	90026	

Jordana Rodríguez	96818	Having family in the area of Lincoln Heights and talking to them about the problems just shows how little effort the people from the City Hall take towards situations, it's all about the money. Gentrification also, not only will pe
Minerva Flores	90031	I wasn't informed about this project at all and I am concerned about its impact on the residents of LHTs. I demand that a community meeting with the developers, city councilman and all involved in this project be scheduled s
Chloe	90022	My family grew up in Lincoln's heights and is seeking affordable housing but cannot afford luxury condos. Also it is an eye sore and will create more parking issues than there already is. This is not what the people who are ac
Aileen Jacquez	90032	I oppose this project because it will take a way from a lot of under privileged families who have lived in this part of LA county for years, to replace them with people who only want to live in this area because it is "trendy". Peo
Fatima	91387	This is pure erasure of history without any intention - just a bogus human with $ and no life or no culture. Keep this historic building as is and quit trying to erase others history!!!!!
Alex chaves	90063	
Hayden	90027	I don't agree with it.
Aseneth Flores	90031	There plenty of newly built luxury apartments. More are overkill. We need affordable apartments for working people.
Hayden	90027	I don't agree with it.
Sammy	90042	We need affordable housing, not luxury apartments
lindsay brant	91201	Because local residents should always have a voice in their future and because this development puts a whole community at risk of environmental toxicity and displacement
Hanneke Skerath	90048	
Karen	90032	Because Lincoln heights nor any side of NELA is for sale. Fuck gentrification and fuck anybody tryna displace the community.
Fyodor		They're uprooting innocent families and homes for capitalistic greed
miriam horton	82414	people who can't fight for themselves have been pushed around and kicked out of their own homes for far too long it needs to stop
Andy Seymour	90065	I oppose this development because it isn't wanted by or accessible to the Lincoln Heights community, and will lead to the displacement of the working class people of color who have lived in this neighborhood for generation
Emily Miller	48912	
Mena Kim	19066	Because I have basic human empathy and don't think luxury apartments are more important than human lives.
Jocelyn Litalien	3301	Putting 30000 bipoc out of a home for your own capitalistic greed is disgusting , especially now with the virus.
Gwen J		They have not considered how this project may harm or gotten the approval from the community
cj valdes	10001	
Maria	91506	Absolutely
Itzel	91340	
Hayat	99501	It's wrong
Micah prado	28205	because this is wrong
Rachel	11222	gentrification on this scale robs local families of their ability to continue living as they have where they have and inequitably impacts people and communities of color.
Astrid	90065	This community is filled with low income families. Adding luxury buildings will kick out many of the families that been there for more than 10+ years
Gabrielle Garcia	90031	I am against displacement of our low income communities, and against the possible environmental damage that will happen if a development of this scale is approved. I do not trust our city officials to run enough tests to det
Tye	77027	
Halia Reiter	55320	
Sam Mercer	10001	It's just wrong
sam	90039	we do not need luxury apartments, toxicity released via the building of this project, and gentrification kills.
Ringgo	90031	I believe we should preserve the history of this town.
london hayes	90048	
Kylie Potter	30263	this place already has homes for people no need to make more expensive ones
Liberty	78704	I oppose gentrification and injustice for poc
Kendall	75605	Because racism needs to end now. This is a revolution.
Isela	90033	What we need is low income apartments not luxury apartments. Luxury apartments will only rise up the rent and put more people on the streets
Jazmín Sandoval	91605	No to gentrification! This raises prices for low income people and families who have historically lived in these neighborhoods and now they want to put flashy expensive buildings driving out the minorities and creating more d
Alanna Holt	90039	I oppose the violent displacement of working class Latinx communities. I oppose the City intentionally neglecting poor communities and then using the conditions they created as an excuse to then displace those communitie
Rubi	90031	Fuck gentrification also if you build this you don't care about this community.
Anairis Morales	90037	Los Angeles Native should be able to afford rent but because of gentrification so many are being pushed away from their city!
Chloe Miri	91316	This is a blatant act of gentrification. In gentrifying the neighborhood, what is being done is essentially the rapid displacement of the community members. This causes greater homelessness in a city with one of the largest ho
Lorraine Orgaz	90031	This project will displase me and my family. We have live here all of my life and this development will only harm our community
Tim Gibbons	90065	you must request community response prior to change
Zoe Jones	87106	Its bad for the environment and gentrification hurts predominantly poorer communities of color
Matthew	90010	Bc we need affordable housing not more luxury high rises
Helen Luna	90011	
Jesse	90035	Development encourages real estate speculation which drives up rents and forces our long term communities
Liam	2472	Bc these luxury apartments are not needed.
Lilla McMillan	90065	The community needs to be included in the conversation, they deserve the chance to be heard and say no if they do not want this new development in their community. It will change the neighborhood and make it an unsusta
Cherith Zanghi	90012	These predatory projects drive up the cost of housing and displace the community. We demand affordable and equitable housing
Lindsay R	92648	
Mckenna harrell	71730	
Sabrina Torres	90032	We need to keep the health of the people safe by them staying home without the worry of having no home.
Mia Desiree	90032	housing is a human right and im tired of seeing predatory and opportunistic developers with the help of complicit politicians aiding in the displacement of local community members
Natalie Carrillo	90063	I cannot stand by and watch the displacement of my community.
Xinrui Chen	90032	I do not want my LA brothers and sisters to be displaced. I have grown up in this neighborhood and wish to keep communities intact.
Carolina Rendón	90031	Keep Lincoln Heights affordable for our residents of Lincoln Heights! Lincoln Heights is full of so much great history and due to gentrification, our neighborhood is now over priced! Lincoln Heights is our home!
Tracie Sánchez	90032	I oppose the project because of the environment impact the project May have on the surrounding community. Additionally I have concerns about gentrification and its potential affect on the livelihood and well-being of low inc
Audrey Densmore	91344	I oppose displacement of local residents
Elvira Gil	90031	It's Gentrification of the community!
Marlen	90032	This building does not serve the people of this community! This building will displace the people who have always lived here. Us brown and black people also deserve to stay and live in a community where we grew up. This i
Nelly Olivares	90031	I've been displaced before and I don't want others to suffer what I experienced
Lorena Garido	90042	Because affordable housing stock will be seized by flippers and investors. lifelong residents will be permanently displaced or homeless
Elizabeth Moroni	90042	This project won't protect the residents of Lincoln Heights, it's unethical
Germán Montealvo	90031	Contaminated soil and air quality risks to entire area, lack of lower income units for residents and traffic increase on such a narrow street across the street from a school.
Ivon	90723	No to gentrification
Melisa Lopez	90039	
Michael Rosales	90042	Parking and traffic are already bad
Paige Arevalo	91106	
Mazie preite	90041	We need affordable housing and common decency for families
Travis Read-Davids	90042	We need to prioritize communities when considering development projects. L.A. does not need more "luxury" housing, investment properties, or for profit housing corporations. We need truly affordable housing, and we nee
Michael Kaphahn	90031	Because the the community wasn't in the conversation. Gentrification and parking concerns
Abrielle Stedman	90041	The neighborhood doesn't need this.
Sterling Wells	90042	We need to protect our community from gentrification. We need affordable housing to end homelessness. City Hall is corrupt and allows developers to break laws and they need to be held accountable to the laws that our citi
Francesco	90042	Housing is a right. Tax incentives and subsidies are provided to flippers but not to long term residents of Lincoln Heights? Flipping is not a job. It's not hard work. It's exploitation and should be illegal. Invest in the community
Julian Hoeber	90041	This proposal has wildly inadequate parking and will lead to overcrowding of streets and terrible traffic. The increased density will not come with commensurate services or be easily navigated and will lead to blight. Above all
Aris Sevilla	90031	LA's housing and gentrification crises will only be exacerbated by more luxury housing
Ross Caliendo	90026	I am anti gentrification

James Krone	60607	Because it’s disgusting
Eden Lopez	90031	Protect the essence of what Lincoln heights is. The hard working people that make Lincoln Heights. Improve the heights for those of us that live here, not price people out to benefit rich individuals/developers.
Carolina Meza	90031	Because I live in the area and we live in a historical landmark and should be preserved as such
Rogelio Chavez	90031	No te gentrification
Lauren Esqueda	90022	I oppose this because the gentrification of Los Angeles is getting out of hand. Residents that have been here for many years should be able to reside in the communities that they love and are really all they know.
Ben Angelo	90031	It displaces historically marginalized groups who have called Lincoln Heights home for many decades. It was proposed and passed without the approval of the neighborhood. It will spell doom for the culture, businesses and
Francine Banda	93035	I oppose gentrification and the displacement of my people
Ashleigh Washingto	90031	Current and long term residents of Lincoln Heights deserve safe supportive housing, not to be displaced from their neighborhood with no offer of the housing being built to them.
Alyssa Jaquez	91746	Gentrification is not good for the community.
RICHARD CHAVEZ	90031	This project is not good for my community. It’s going to drive out the people who really love this city and bring in people who already destroyed downtown LA
Gautam jain	91364	People have the right to remain in their place of residence without threat of being forcibly removed. This is an overreach of power and a disgusting display of the continuing supremacy of ownership over basic human rights.
Christal Perez	91770	Moving out poc during a pandemic is wrong. Also traffic density problems and terrible urban planning.
Legier Biederman	90031	Illegal evictions! horrendous development
Irwing Ornelas	90012	Why do we need luxury apartments? Just build normal homes.
Annabel Shabestari	90717	Will not serve the existing community of Lincoln heights and may likely actually harm the quality of life for the entire neighborhood.
Isabel Layton	90031	I stand with my neighbors. Out of over 400 luxury apartments only 66 are available to low income residents? What a joke. I'm appalled that this large of a projected was approved without the community's consent. What an ey
Maria Herrera	90031	This housing is not serving our community
Paola Alvarado	90031	We must put an end to gentrification and support our community.
Marleen Munoz	90032	It will increase evictions and likely cause more gentrified to move to our Lincoln Heights and El Sereno communities
Samantha Mendoza	90031	The effects of gentrification on the demographic that resides in Lincoln heights will be catastrophic. People have lived here their whole lives, they do not deserve to be pushed out of the community they built to further capitali
Maria Herrera	90031	This housing is not serving our community
Gabriella Sanchez	90014	This development would threaten the rent and housing stability for people already living in the neighborhood.
Maria Herrera	90031	This housing is not serving our community
Stephanie Castillo	90031	I oppose this, it goes against this community , the research speaks for itself & during this time it is not what the community needs there are far more better improvements that should be brought to this area
Dorian Pinuellas	90031	School safety, more traffic
Yadira Cruz	90031	GENTRIFICATION IS CLASS WAR. IT IS AN ACT OF COLONIALISM. LINCOLN HEIGHTS BELONGS TO THE PEOPLE. IT BELONGS TO OUR WORKING CLASS COMMUNITY. It will be detrimental to our environment in the h
Jazmin Oceguera	90063	Gentrification
Lucius Nicholson	90031	Not beneficial to the neighborhood
Mark Llamas	90031	This project will make my neighborhood more difficult to afford for my low income family and neighbors. Stop This project
Christian Adams	90031	It’s the beginning of the end of my history and culture.
Janice	90031	The community is already suffering and this project brings illegal evictions and displaced residents. This isn't ethical!
Forrest Penny-Brow	90031	It is not in keeping with the spirit/culture/wishes of the community
Eden Lopez	90031	Do not see how it benefit the existing community. Perhaps the new community you want but what about the existing community. Traffic conditions, air quality conditions, wastewater conditions, parking conditions, changes th
Dydia DeLyser	90031	I oppose forced gentrification, inappropriate development, and environmental risk for the community
Camille Kolodziejsk	90031	Unsafe for Lincoln Heights health— stressful for our community in terms of mass gentrification
Jossef Virgen	90031	Environmental racism! We gotta protect the health of the neighborhood and avoid a huge wave of gentrification
Bella Fabiani	90041	To protect Lincoln Heights and the families that live there
Patrick Martinez	90041	Because this is a form of economic violence and will displace many of the existing residents in Lincoln Heights
Martina Risteska	90028	Because excavating the land will release toxic fumes into the air and the people of Lincoln Heights deserve better than that. Let’s help protect this space from big money that has no interest in what’s best for the community a
Zion		tired of seeing our community destroyed
David Vera	90031	Because it will affect people that I care about
Robin Voves	90031	Keep housing affordable in Lincoln Heights!
Valeria Hernandez	90031	I oppose this project because Lincoln heights has been my home since birth. I seen these streets change over the past year and remember the day gentrification slowly started happening here. First it was Lincoln mini mall be
Oscar Ortega	90031	it's gentrification. It does not benefit the neighborhood. Its an attack on the working class
Kurt Webster	90031	If you are building an apartment complex with 1,500 residents and only 286 parking that is a BIG problem! Parking in this area is already troublesome!
ADAn	90032	A 468 unit Luxury development at ave 34/ Pasadena Ave is a threat to our health and well being.
Suki Diaz	90031	
Daisy Frias	90065	Because our neighborhoods are becoming more and more gentrified
Maria Martin	90022	gentrification causes homelessness!
Michelle Suarez	90065	I oppose this project because it will displace an entire community, and cause irreparable harm to human beings. It must be stopped.
D. Sherwood	90039	Environmentally unsafe, potencially environmentally illegal, including environmental impact, environmentally and culturally unsound for community. All environmental impacts must be researched and any impact entirely reme
Jennifer Mendoza	91030	As someone who grew up in the community of Lincoln Heights this isn't an affordable project for the members of the community.
Tracie Sánchez	90031	I am afraid of the environmental impacts of the project, including the increased traffic, the potential affects on the river, the air quality, and the toxic waste located underground that may be exposed during construction. Additi
Matt Whitmire	90065	It is not a clean lot to develop on and there are FAR too few parking spaces. The underground garage should be double the size before proceeding.
Lisa Marie Hanson	90065	We need a market not another luxury building
Brian B	90031	It’s causes gentrification and will raise market value for all the residence
Maria Sanchez	90012	I live in the area. I strongly oppose gentifrication. I do not want the Latino and Asian community to be forced out of the Lincoln Heights neighborhoods. This project is unconsiderate to low income families. Even though it has
Sarah Hill	90031	Not only is it an environmental hazard for the people of Lincoln Heights, but it is an act of gentrification too and will force people out of their homes.
Sofia Ruiz	91502	Gentrified neighborhoods are a threat to small and local businesses!
Jack Foley	90031	It will displace people and ruin lives for the purpose of creating profit and pandering to the interests of the wealthy

Los Angeles, California 90071-2618

Re: 135-153 W. Avenue 34; DIR-2019-TPC-SPR-WDI
ENV-2016-273-MND-REC1

To The Project Applicant Team for the 141 Avenue 34 Project:

We are writing you to request a more comprehensive outreach strategy and urge you to postpone your hearing date to one that will ensure the full completion of such assessment.

The Council Office has long been a strong and vocal advocate for the production of housing stock, serving a range of income groups and creating a balanced housing supply that prevents people from falling into homelessness. Furthermore, as we are navigating our way through the global pandemic, the need to prioritize creating more housing has become even more paramount. However, this proposed project that introduces new density to the Lincoln Heights community must only move forward with not only the acknowledgment but also the resolutions to the concerns the community brings forth to your Team.

We appreciate your attention to this matter, and the Council Office wishes to direct that any appropriate actions be taken upon consideration of this Memo. The Council Office understands the severity behind the community concerns from the people who live and work in this neighborhood, and we strongly encourage you to join our Office in this effort to make this situation right.

Sincerely,

Gilbert Cedillo
Councilmember, First District

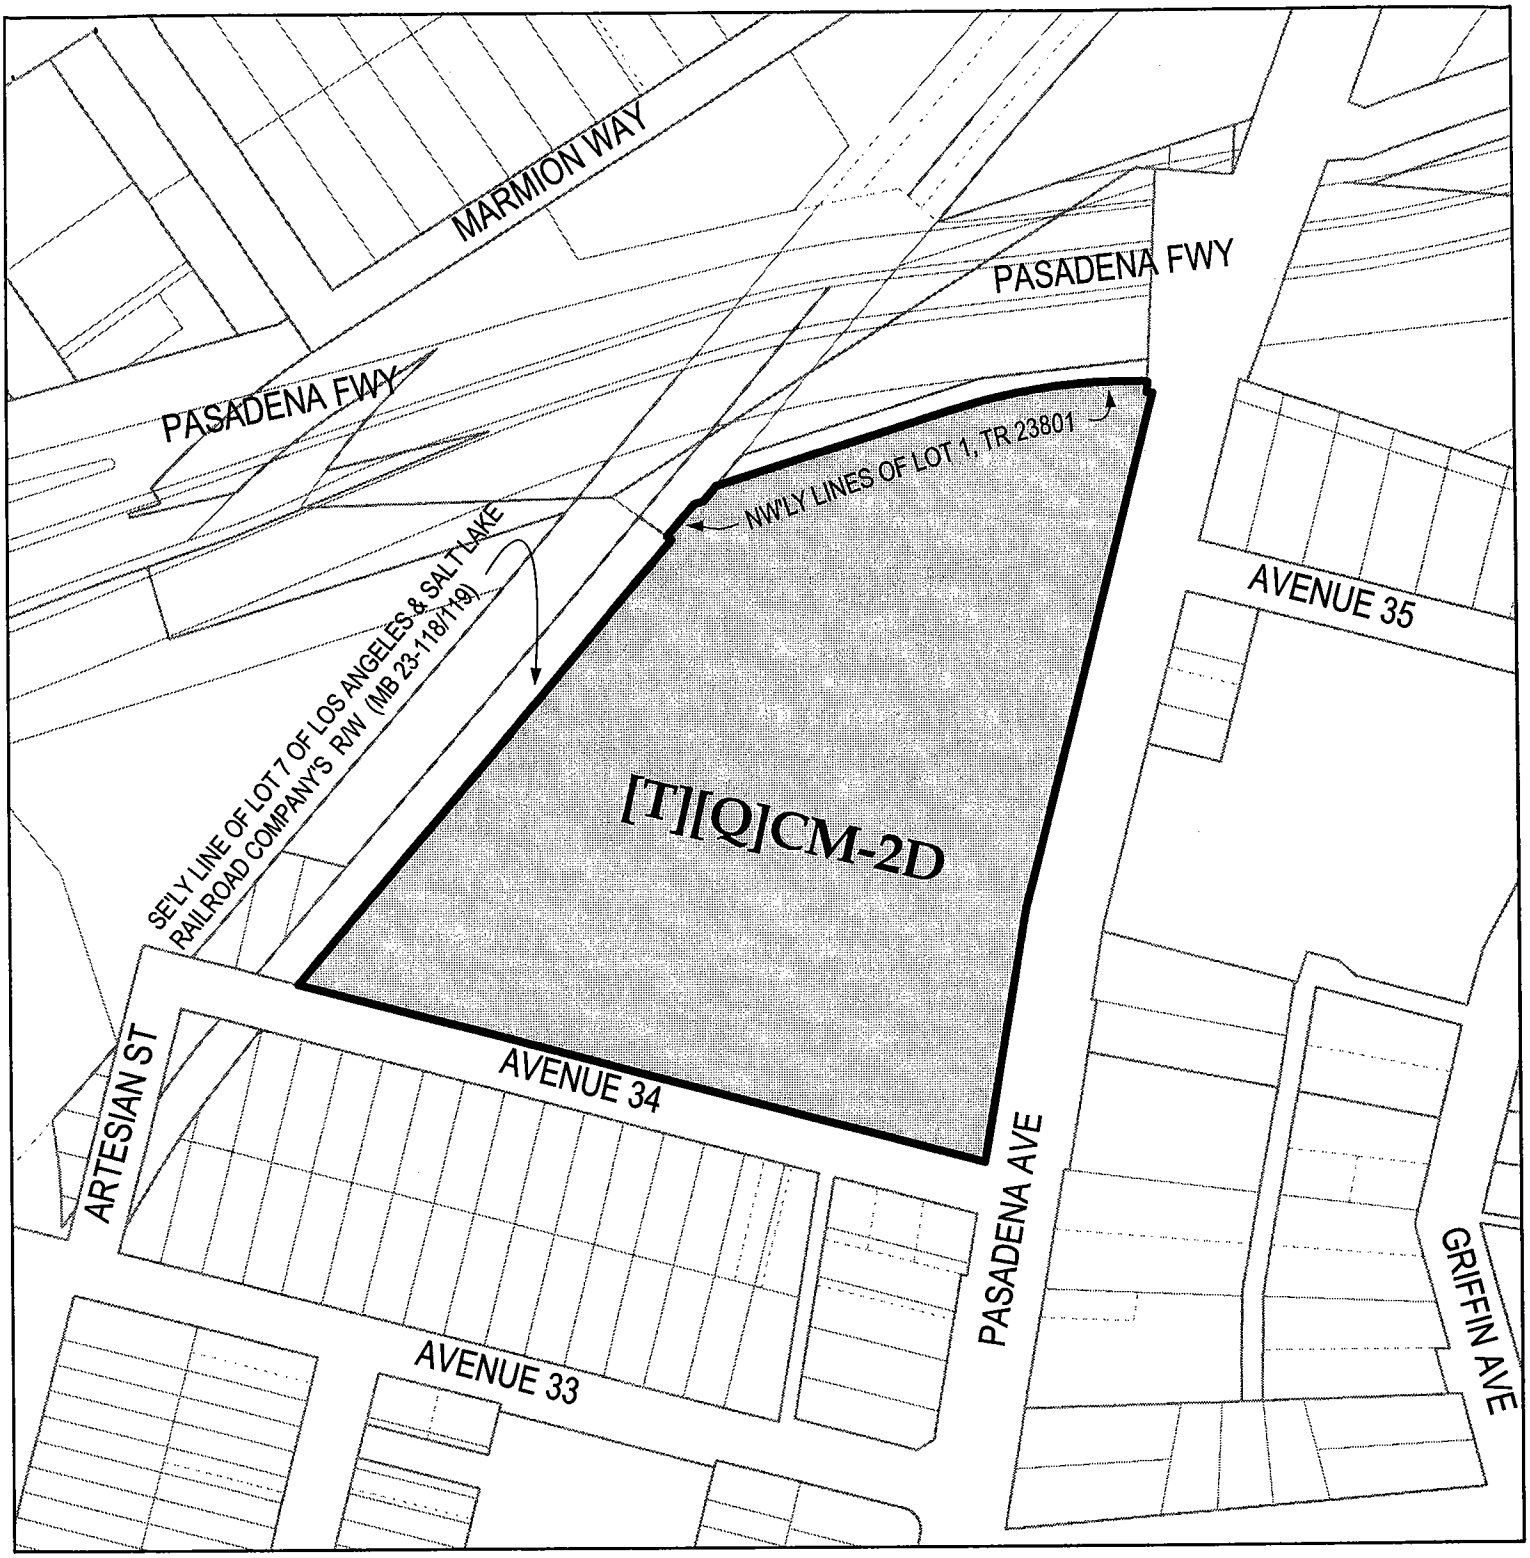
Q Conditions - Subarea 4

ORDINANCE NO. 179280

An ordinance amending Section 12.04 of the Los Angeles Municipal Code by amending the zoning map.

THE PEOPLE OF THE CITY OF LOS ANGELES DO ORDAIN AS FOLLOWS:

Section 1. Section 12.04 of the Los Angeles Municipal Code is hereby amended by changing the zones and zone boundaries shown upon portions of the zone map attached thereto and made a part of Article 2, Chapter 1, of the Los Angeles Municipal Code, so that such portions of the zoning map shall set forth the zones and height districts as shown on the attached Northeast Los Angeles Community Plan Ordinance Maps and the Table for Section 1 attached hereto and incorporated herein by this reference.



SUBAREA 4

[Q] QUALIFIED CONDITIONS OF APPROVAL

Pursuant to Section 12.32 G of the Municipal Code, the following limitations are hereby imposed upon the use of the subject property, subject to the "Q" Qualified classification.

A. General Conditions

1. Use Limitations

a. There shall be no 100% Commercial and/or Industrial projects allowed.

b. There shall be no 100% Residential projects allowed.

c. A minimum of 50% of the non-residential floor area shall be limited to Neighborhood Retail and Neighborhood Services as permitted by LAMC 13.07C.

d. The following uses shall be prohibited:

(i) Any drive-through facilities, such as those associated with restaurants, kiosk banks and drugstores;

(ii) Automobile dismantling and automobile salvage yards, and automobile storage yards;

(iii) Outdoor storage yards for junk and salvage items, machinery or construction materials that are not associated with a retail establishment or entertainment production facility;

(iv) Recycling Centers;

(v) Off-site alcoholic beverage sales.

e. Property owners shall satisfy any requirements from the State Department of Toxic Substances Control (DTSC) in relation to potential contamination on the subject site. Prior to the issuance of any clearances by the Department of City Planning (DCP), property owners shall provide to DCP a letter from DTSC that establishes DTSC's satisfaction that the subject site currently meets DTSC requirements for the proposed use or, alternatively, that establishes DTSC's satisfaction with the property owner's contamination testing plan for the proposed use.

2. Parking.

a. **Surface Parking**. Approval of plans by the Director of Planning shall be required for any project for which surface parking exceeds 20% of the total lot area.

b. **Surface and Below-Grade Parking.** Parking for commercial uses or guests may be located at grade, but shall not be adjacent to Pasadena Avenue; parking for residences shall be located below grade.

c. **Shared Parking**. Residential and mixed-use commercial/residential projects shall provide parking as required by the Los Angeles Municipal Code. Commercial parking shall be made available to residents and residential visitors during off-business hours. In the event that the project is developed under the regulations contained in Section 12.22 A 25 of the Municipal Code (Affordable Housing Incentives/Density Bonuses), parking may be provided as permitted by that Section for the length of time that the residential units remain as restricted affordable units.

(i) Tandem parking may be used only for the spaces which are assigned and designated for a single residential unit.

(ii) Signs shall be clearly posted at project entrances directing residential visitors to commercial parking during off-business hours. The signs

SUBAREA 4

shall be in large, easy-to-read lettering and shall indicate the general location of the parking. Sign wording shall be to the satisfaction of the Planning Department.

B. Design Conditions

1. Site Planning

a. Development fronting Figueroa Street or Pasadena Avenue shall designate Figueroa Street or Pasadena Avenue as the front yard.

b. All new buildings fronting Figueroa Street or Pasadena Avenue shall provide a pedestrian entrance for each business along Figueroa Street or Pasadena Avenue.

c. Ground floor commercial uses shall be built to the front lot line except where publicly accessible open spaces are provided, such as plazas and outdoor dining areas, and have been incorporated into the site design.

d. All projects shall be subject to approval of plans by the Director of Planning, to be conducted by the Community Planning Bureau.

e. A minimum A minimum of 30% of the Subarea shall be devoted to publicly accessible open space and pedestrian paths that shall be accessible beginning at dawn and ending at dusk or close of on-site businesses, whichever occurs later.

f. All new buildings that abut Pasadena Avenue shall provide a pedestrian entrance for each business along Pasadena Avenue.

g. For surface parking areas, the applicant shall provide drainage bioswales along any boundary abutting the Arroyo Seco, and shall design parking areas, landscaped areas and rooftops to direct drainage into the bioswales.

h. Courtyards.

(i) For buildings fronting Pasadena Avenue with over 150 linear feet in width or depth, a front courtyard shall be provided adjacent to the front yard setback at ground level, with a minimum width and depth of 20 linear feet, respectively, and a minimum total area of 700 square feet.

(ii) Required courtyards shall be open to the sky and not be located within 40 linear feet of a side property line.

(iii) Any courtyard fencing shall be predominantly open or transparent in design, shall not exceed 36 inches in height and shall be recessed a minimum of 5 feet.

(iv) Required courtyards shall be located no more than three (3) vertical feet from sidewalk grade.

(v) A minimum of 20 percent of each courtyard shall consist of planted ground cover, shrubs, trees, water features or permanent planter boxes.

(vi) Courtyards shall contain pedestrian amenities, such as shade trees, landscaped trellises, benches, trash bins, etc.

i. A minimum of 75 percent of all usable outdoor public space shall be located at ground level and shall be directly accessible to the general public from Pasadena Avenue and/or Avenue 34.

j. Ground floor frontage along Pasadena Avenue shall be designated for commercial or industrial uses. Ground floor uses shall be designed with a minimum depth of 25 feet.

SUBAREA 4

k. Non-residential uses fronting onto Pasadena Avenue shall maintain a presence and a secondary pedestrian entrance on the interior of the lot.

2. **Pedestrian Access**

Pedestrian paths shall divide Subarea 4 into a minimum of four sections.

a. There shall be an east/west and a north/south pedestrian path through Subarea 4.
b. The paths shall be aligned through the midpoint of Subarea 4 and cross each other at a perpendicular angle.
c. The required pedestrian paths shall be a minimum of 16 feet in width and may include up to 2 feet of landscaping on each side.
d. The required pedestrian paths shall be comprised of attractive hardscape materials or appropriate permeable alternatives. The use of asphalt is prohibited.
e. Developments on parcels that abut the required pedestrian paths shall contribute their proportional share of said paths.
f. Pedestrian paths shall be illuminated with pedestrian-scale lighting installed on either side of each pedestrian path at a minimum interval of one fixture every 20 linear feet.
g. These pedestrian paths shall be open and accessible to the public from dawn until dusk or the close of on-site businesses, whichever occurs later.
h. These pedestrian paths may count toward the Code-required open space.
i. These pedestrian paths may be included in the buildable area for the purposes of calculating the floor area ratio (FAR).

3. **Building Design**

a. A break in the building wall along Figueroa Street or Pasadena Avenue shall only be permitted when vehicular access cannot be obtained from side streets or private alleyways, as determined by LADOT. The break in the wall, when permitted, shall not exceed a distance of the linear feet required for driveways and other vehicular access. When vehicular access must be taken from the primary street, the driveway entry gate shall be recessed from the sidewalk by a minimum of 20 feet.
b. All ground floor storefronts in new buildings that are greater than 30 feet in length shall provide architectural features on the building façade that will help to create a pattern along the street frontage and avoid the presence of a monotonous façade through the use of vertical elements, such as columns, placed in a pattern, or recesses in the façade, at minimum intervals of 20 feet.
c. All facades on new buildings shall be designed with articulation that provides relief for every 20 horizontal feet and 15 vertical feet.
d. The front elevation of all new structures shall be stepped back a minimum of five (5) feet from the front property line at the third story and again at the fifth story.
e. Wall openings, such as windows and doors, shall occupy at least 70 percent of the ground floor street façade along Pasadena Avenue and Figueroa Street.
f. Storefront windows shall be a minimum of 18 vertical inches and a maximum of 36 vertical inches from sidewalk grade.

SUBAREA 4

4. **Architectural Details**
   a. Articulation and architectural detail shall be applied equally on all building elevations.
   b. All balconies shall be flush with the exterior wall and made of an opaque materials for the first four feet.
   c. All balconies shall be of a usable dimension, a minimum of six feet wide.
   d. Building entrances shall meet the following criteria:
      (i) All projects shall provide a prominent residential entry that is accessible from the public right-of-way abutting the front yard; and
      (ii) Each commercial premise shall provide a front door that is accessible from the public right-of-way abutting the front yard.
   e. All buildings shall provide security lighting for pedestrians on the ground floor of building facades fronting public rights-of-way.
   f. Windows shall allow a minimum of 90-percent light transmission. Non-reflective glass shall be used to allow maximum visibility from the sidewalk areas into the interior of all commercial uses.
   g. Storefront windows shall be recessed at least 3 inches from the front plane of the building.
   h. Where awnings and canopies are used on storefronts greater than 25 feet in length, one awning or canopy shall be provided for each structural bay where such bays exist.
   i. Awnings and canopies shall project a maximum of 36-inches into the sidewalk.
   j. Awnings and canopies shall be attached to the building, without support poles on the sidewalk.
   k. All rooflines that exceed 40 linear feet shall provide some kind of relief either through the application of a gable, dormer, change of material or other type of articulation.

5. **Walls and Fences:**
   a. Exterior walls shall be treated with graffiti resistant-surfaces. Such treatment may include specialized coatings and the installation of vegetation.
   b. All free-standing walls shall provide a break in plane, or a change in material, or an opening in the surface of the wall at minimum every 20 feet in horizontal length, or by an articulation or architectural detail such as a staggered wall, an indentation, patterned block or a symmetrical spacing of columns at minimum every 20 feet.
   c. Free-standing walls or fences shall not use barbed wire or razor wire to adorn the tops of walls within view of the public right-of-way.
   d. Walls or fences in the front yard shall not exceed 42 inches in height, as measured from the lowest adjacent grade, and shall be constructed of transparent decorative materials that are integrated into the design and architecture of the building.
   e. Where taller walls or fences, up to a maximum of 6 feet in height, are required for security reasons, the fence or wall shall be located inside the setback landscape buffer, integrated into the architecture of the building and screened by landscaping or otherwise designed to be obscured from view from the public way. This condition applies to walls or fences in side or rear yards only.

SUBAREA 4

f. Fences and walls exceeding 42 inches in side or rear yards may be located at the property line only when permitted portions of the required yard are used for private or common open space, as allowed by the Los Angeles Municipal Code. Otherwise these walls and fences shall be located within the landscaped setback, per Condition C-4(e).

6. Landscaping

a. Open space shall be provided per LAMC.

b. All open areas not used for buildings, driveways, surface parking areas, recreational facilities, pedestrian paths or walkways shall be attractively landscaped and include an automatic irrigation system, in accordance with a landscape plan prepared by a licensed landscape architect, licensed architect, or landscape contractor to the satisfaction of the Planning Department.

c. A minimum of five percent of the total surface area of a surface parking lot shall be landscaped with trees, shrubbery and ground cover.

d. A minimum of 50 percent of common usable open space, including plazas and courtyards, shall be planted in ground cover, shrubs or trees. Trees shall be planted at a ratio of one tree for every 1,000 square feet of lot area. Trees shall be at minimum 24-inch box trees, and shall be planted within open space areas. Landscaped areas located on top of a parking garage or deck shall include permanent planters at least 30 inches in depth (12 inches for lawn/ground cover) and be properly irrigated and drained to the satisfaction of the Planning Department.

e. Paved surfaces within usable public spaces shall be comprised of stamped concrete, tile or other decorative paving surfaces. Asphalt shall be prohibited as a paving surface within usable public spaces.

f. Any portion of a parking level which exceeds grade shall be screened from the view of the public right-of-way by landscape features including trees, shrubbery, planter boxes or berms, none of which shall be shorter than three (3) feet in height. Any planter box or berm shall not be considered in calculating additional height of a structure.

g. All surface parking areas shall include a pedestrian walkway from the primary structure served by the parking area up to a distance measuring 50 straight-line feet. The pedestrian walkway shall be paved with stamped concrete or another decorative surface in keeping with the architectural style of the surrounding structures.

h. Landscape setbacks, where required, shall include a 24-inch box tree for every 20 feet of street frontage. Trees installed shall have a minimum canopy diameter of 20 feet at the time of maturity.

i. Landscape setbacks, where required, shall include 90 percent ground covering through the use of turf, grass, flowering plants and shrubs.

j. Street trees shall be 24-inch box trees planted along the street frontage, spaced 20 feet on center with root collars to prevent uplifting of sidewalks. Street tree type shall match the prevailing street tree of the street provided that it is an acceptable tree species, to the satisfaction of the Bureau of Urban Forestry.

SUBAREA 4

7. **Mechanical, Security & Trash Equipment**
   a. All service areas and loading docks shall be located at the rear of structures.
   b. All exterior rooftop and ground level mechanical equipment, including HVAC equipment, exhaust fans and satellite dishes shall be screened from public view.
   c. All service areas shall be enclosed or completely screened from public view. Enclosures shall consist of fencing, walls, or landscaping.
   d. Exterior security grills or permanently affixed security bars shall be prohibited.
   e. Interior security grills shall be retractable and shall recess completely into pockets that completely conceal the grill when it is retracted. Such pockets shall be integrated into the design of the building.
   f. Roll-down security grills that conceal storefront windows shall be prohibited.

C. **Environmental Conditions**

1. **Aesthetics (Landscaping)**
   All open areas not used for buildings, driveways, parking areas, recreational facilities or walks shall be attractively landscaped and maintained in accordance with a landscape plan, including an automatic irrigation plan, prepared by a licensed landscape architect to the satisfaction of the Planning Department.

2. **Aesthetics (Surface Parking)**
   A minimum of one 24-inch box tree (minimum trunk diameter of two inches and a height of eight feet at the time of planting) shall be planted for every four new surface parking spaces. The trees shall be dispersed within the parking area so as to shade the surface parking area and shall be protected by a minimum 6-inch high curb and landscape. An automatic irrigation plan shall be approved by the City Planning Department.

3. **Aesthetics (Graffiti)**
   The owners shall maintain the subject property clean and free of debris and rubbish and to promptly remove any graffiti from the walls, pursuant to Municipal Code Sections 91.8101-F, 91.8904-1 and 91.1707-E. Exterior walls of new commercial and residential buildings of other than glass may be covered with clinging vines, screened by oleander trees or similar vegetation capable of covering or screening entire walls up to heights of at least 9-feet, excluding windows and signs or the walls may be covered with graffiti proof coatings.

4. **Aesthetics (Signage)**
   On-site signs are limited to the maximum allowable under the Municipal Code. Multiple temporary signs in the store windows and along the building walls shall be prohibited.

5. **Aesthetics (Light)**
   Outdoor lighting shall be designed and installed with shielding so that the light source cannot be seen from adjacent residential properties.

SUBAREA 4

6. **Aesthetics (Glare)**
The exterior of the proposed building shall be constructed of materials such as high-performance tinted non-reflective glass and pre-cast concrete or fabricated wall surfaces.

7. **Air Pollution (Stationary)**
RESIDENTIAL – The applicant shall install air filters capable of achieving a Minimum Efficiency Rating Value (MERV) of at least 8 or better in order to reduce the effects of diminished air quality on the occupants of the project.

COMMERCIAL/INSTITUTIONAL – The applicant shall install air filters capable of achieving a Minimum Efficiency Rating Value (MERV) of at least 11 or better in order to reduce the effects of diminished air quality on the occupants of the project.

8. **Air Quality (Objectionable Odors)**
The trash receptacle shall be relocated at least 50-feet away from the property line of adjacent residential properties or trash receptacles shall be located within the walls of a covered concrete block enclosure.

9. **Seismic**
The design and construction of the project shall conform to the Uniform Building Code seismic standards as approved by the Department of Building and Safety.

10. **Erosion/Grading/Short-Term Construction Impacts**

Air Quality

a. All unpaved demolition and construction areas shall be wetted at least twice daily during excavation and construction, and temporary dust covers shall be used to reduce dust emissions and meet SCAQMD District Rule 403.
b. The owner or contractor shall keep the construction area sufficiently dampened to control dust caused by construction and hauling, and at all times provide reasonable control of dust caused by wind.
c. All loads shall be secured by trimming, watering or other appropriate means to prevent spillage and dust.
d. All materials transported off-site shall be either sufficiently watered or securely covered to prevent the generation of excessive amounts of dust.
e. General contractors shall maintain and operate construction equipment so as to minimize exhaust emissions.

Noise

a. The project shall comply with the City of Los Angeles Noise Ordinance No. 144,331 and 161,574, and any subsequent ordinances, which prohibit the emission or creation of noise beyond certain levels at adjacent uses unless technically unfeasible.
b. Construction and demolition shall be restricted to the hours of 7:00 am to 6:00 pm Monday through Friday, and 8:00 am to 6:00 pm on Saturday.
c. Construction and demolition activities shall be scheduled so as to avoid operating several pieces of equipment simultaneously.

SUBAREA 4

d. The project contractor shall use power construction equipment with state-of-the art noise shielding and muffling devices.
e. The project sponsor shall comply with the Noise Insulation Standards of Title 24 of the California Code Regulations, which insure an acceptable interior noise environment.

General Construction

a. All waste shall be disposed of properly. Use appropriately labeled recycling bins to recycle construction materials including: solvents, water-based paints, vehicle fluids, broken asphalt and concrete, wood, and vegetation. Non-recyclable materials/wastes shall be taken to an appropriate landfill. Toxic wastes must be discarded at a licensed regulated disposal site.
b. Leaks, drips and spills shall be cleaned up immediately to prevent contaminated soil on paved surfaces that can be washed away into the storm drains.
c. Pavement shall not be hosed down at material spills. Dry cleanup methods shall be used whenever possible.
d. Dumpsters shall be covered and maintained. Uncovered dumpsters shall be placed under a roof or be covered with tarps or plastic sheeting.
e. Gravel approaches shall be used where truck traffic is frequent to reduce soil compaction and the tracking of sediment into streets shall be limited.
f. All vehicle/equipment maintenance, repair, and washing shall be conducted away from storm drains. All major repairs shall be conducted off-site. Drip pans or drop cloths shall be used to catch drips and spills.

11. Liquefaction

All projects shall comply with the Uniform Building Code Chapter 18. Division 1 Section 1804.5 Liquefaction Potential and Soil Strength Loss which requires the preparation of a geotechnical report. The geotechnical report shall assess potential consequences of any liquefaction and soil strength loss, estimation of settlement, lateral movement or reduction in foundation soil-bearing capacity, and discuss mitigation measures that may include building design consideration. Building design considerations shall include, but are not limited to: ground stabilization, selection of appropriate foundation type and depths, selection of appropriate structural systems to accommodate anticipated displacements or any combination of these measures.

12. Explosion/Release (Asbestos Containing Materials)

Prior to the issuance of any demolition permit, the applicant shall provide a letter to the Department of Building and Safety from a qualified asbestos abatement consultant that no ACM are present in the building. If ACM are found to be present, it will need to be abated in compliance with the South Coast Air Quality Management District's Rule 1403 as well as all other State and Federal Rules and regulation.

13. All Runoff (All Subareas)

a. Project applicants are required to implement stormwater BMPs to retain or treat the runoff from a storm event producing ¾ inch of rainfall in a 24 hour period. The design of structural BMPs shall be in accordance with the Development Best Management Practices Handbook Part B Planning

SUBAREA 4

Activities. A signed certificate from a California licensed civil engineer or licensed architect that the proposed BMPs meet this numerical threshold standard is required.

b. Post development peak stormwater runoff discharge rates shall not exceed the estimated pre-development rate for developments where the increase peak stormwater discharge rate will result in increased potential for downstream erosion.
c. Maximize trees and other vegetation at each site by planting additional vegetation, clustering tree areas, and promoting the use of native and/or drought tolerant plants.
d. Any connection to the sanitary sewer must have authorization from the Bureau of Sanitation.
e. Reduce impervious surface area by using permeable pavement materials where appropriate, including: pervious concrete/asphalt; unit pavers, i.e. turf block; and granular materials, i.e. crushed aggregates, cobbles.
f. Paint messages that prohibits the dumping of improper materials into the storm drain system adjacent to storm drain inlets (such as NO DUMPING – DRAINS TO OCEAN) and/or graphical icons. Prefabricated stencils can be obtained from the Department of Public Works, Stormwater Management Division.
g. Legibility of stencils and signs must be maintained.
h. Promote natural vegetation by using parking islands and other landscaped areas.
i. Materials with the potential to contaminate stormwater must be: (1) placed in an enclosure such as, but not limited to, a cabinet, shed, or similar stormwater conveyance system; or (2) protected by secondary containment structures such as berms, dikes, or curbs.
j. The storage area must be paved and sufficiently impervious to contain leaks and spills.
k. The storage area must have a roof or awning to minimize collection of stormwater within the secondary containment area.
l. The owner(s) of the property will prepare and execute a covenant and agreement (Planning Department General form CP-6770) satisfactory to the Planning Department binding the owners to post construction maintenance on the structural BMPs in accordance with the Standard Urban Stormwater Mitigation Plan and/or per manufacturer's instructions.

14. Stormwater Runoff 10+ Home Subdivision/Multi Family

a. Install Roof runoff systems where site is suitable for installation.
b. Surface parking lots constitute a significant portion of the impervious land coverage. To reduce the quantity of runoff, surface parking lots can be designed one of two ways;
   (i) Hybrid Lot – parking stalls utilize permeable materials, such as crushed aggregate, aisles are constructed of conventional materials such as asphalt.
   (ii) Parking Grove – is a variation on the permeable stall design, a grid of trees and bollards are added to delineate parking stalls. This design presents an attractive open space when cars are absent, and shade when cars are present.

SUBAREA 4

c. Design an efficient irrigation system to minimize runoff including: drip irrigation for shrubs to limit excessive spray; shutoff devices to prevent irrigation after significant precipitation; and flow reducers.

15. **Stormwater Runoff Commercial and Industrial Development (Lot Size 100,000 sf)**
   a. Cover loading dock areas or design drainage to minimize run-on and run-off stormwater.
   b. Direct connections to storm drains from depressed loading docks (truck wells) are prohibited.
   c. Repair/maintenance bays must be indoors or designed in such a way that doesn't allow stormwater run-on or contact with stormwater runoff.
   d. Design repair/maintenance bay drainage system to capture all washwater, leaks and spills. Connect drains to a standard sump for collection and disposal. Direct connection of the repair/maintenance bays to the storm drain system is prohibited. If required, obtain an Industrial Waste Discharge Permit.
   e. Vehicle/equipment wash areas must be self-contained and/or covered, equipped with a clarifier, or other pretreatment facility, and property connected to the sanitary sewer.
   f. The following activities are to be conducted under proper cover with drain routed to the sanitary sewer:
      (i) Storage of industrial wastes.
      (ii) Handling or storage of hazardous wastes.
      (iii) Metal fabrication or Pre-cast concrete fabrication.
      (iv) Welding, Cutting or Assembly.
      (v) Painting, Coating or Finishing.
   g. Store above ground liquid storage tanks (drums and dumpsters) in areas with impervious surfaces in order to contain leaks and spills. Install a secondary containment system such as berms, dikes, liners, vaults, and double-wall tanks. Where used oil or dangerous waste is stored, a dead- end sump should be installed in the drain.
   h. Toxic wastes must be discarded at a licensed regulated disposal site. Store trash dumpsters either under cover and with drains routed to the sanitary sewer or use non-leaking and water-tight dumpsters with lids. Use drip pans or absorbent materials whenever grease containers are emptied. Wash containers in an area with properly connected sanitary sewer.
   i. Reduce and recycle wastes, including: paper; glass; aluminum; oil; and grease.
   j. Reduce the use of hazardous materials and wastes by: using detergent-based or water-based cleaning systems; and avoid chlorinated compounds, petroleum distillates, phenols, and formaldehyde.
   k. Control or reduce or eliminate flow to natural drainage systems to the maximum extent practicable.
   l. Cleaning of vehicles and equipment to be performed within designated covered or bermed wash area paved with Portland concrete, sloped for wash water collection, and with a pretreatment facility for wash water before discharging to properly connected sanitary sewer with a CPI type oil/water separator. The separator unit must be: designed to handle the quantity of flows; removed for cleaning on a regular basis (at least twice a year) to

SUBAREA 4

remove any solids; and the oil absorbent pads must be replaced regularly, once in fall just before the wet season, and in accordance with manufacturer's specifications.

16. **Stormwater Runoff Food Service Industry (Restaurants, Bakeries, Food Processors)**
    a. Cleaning of oily vents and equipment to be performed within designated covered area, sloped for wash water collection, and with a pretreatment facility for wash water before discharging to properly connected sanitary sewer with a CPI type oil/water separator. The separator unit must be: designed to handle the quantity of flows; removed for cleaning on a regular basis to remove any solids; and the oil absorbent pads must be replaced regularly according to manufacturer's specifications.
    b. Store trash dumpsters either under cover and with drains routed to the sanitary sewer or use non-leaking and water tight dumpsters with lids. Wash containers in an area with properly connected sanitary sewer.
    c. Reduce and recycle wastes, including oil and grease.
    d. Store liquid storage tanks (drums and dumpsters) in designated paved areas with impervious surfaces in order to contain leaks and spills. Install a secondary containment system such as berms, curbs, or dikes. Use drip pans or absorbent materials whenever grease containers are emptied.
    e. Infiltrate runoff before it reaches the storm drain system.
    f. Runoff must be treated prior to release into the storm drain. Three types of treatments are available, (1) dynamic flow separator; (2) a filtration or (3) infiltration. Dynamic flow separator uses hydrodynamic force to remove debris, and oil and grease, and are located underground. Filtration involves catch basins with filter inserts. Filter inserts must be inspected every six months and after major storms, cleaned at least twice a year. Infiltration methods are typically constructed on-site and are determined by various factors such as soil types and groundwater table.

17. **Stormwater Runoff Surface Parking Lots with 25 or More Spaces or 5,000 Square-feet of Lot Area (Residential, Commercial, Industrial, Public Facility)**
    a. Trash container areas must have drainage from adjoining roofs and pavement diverted around the area(s).
    b. Trash container areas must be screened or walled to prevent off-site transport of trash.
    c. Reduce impervious land coverage of parking lot areas.
    d. Infiltrate runoff before it reaches the storm drain system.
    e. Runoff must be treated prior to release into the storm drain. Three types of treatments are available, (1) dynamic flow separator; (2) filtration or (3) infiltration. Dynamic flow separator uses hydrodynamic force to remove debris, and oil and grease, and are located underground. Filtration involves catch basins with filter inserts. Filter inserts must be inspected every six months and after major storms, and cleaned at least twice a year. Infiltration methods are typically constructed on-site and are determined by various factors such as soil type and groundwater table.

SUBAREA 4

18. **Increased Noise Levels (Parking Wall)**
A 6-foot-high solid decorative masonry wall, as measured from the lowest adjacent grade shall be constructed along any lot line that separates any surface parking area from an adjacent residential use.

19. **Increased Noise Levels (Retail Markets, Bars, Entertainment, etc.)**
No window openings shall be permitted along any side (excluding the front façade) of the building that is adjacent to a residential use.

20. **Severe Noise Levels (Residential Only)**
All exterior windows having a line of sight to the MTA Gold Line, Figueroa Street, Pasadena Avenue, and the I-110 (Pasadena) Freeway shall be constructed with double-pane glass and use exterior wall construction which provides a Sound Transmission Class of 50 or greater as defined in UBC No. 35-1, 1979 edition or any amendment thereto. The applicant, as an alternative, may retain an acoustical engineer to submit evidence, along with the application for a building permit, any alternative means of sound insulation sufficient to mitigate interior noise levels below a CNEL of 45 dBA in any habitable room.

21. **Public Services (Fire)**
The following recommendations of the Fire Department relative to fire safety shall be incorporated into the building plans, which includes the submittal of a plot plan for approval by the Fire Department either prior to the recordation of a final map or the approval of a building permit. The plot plan shall include the following minimum design features: fire lanes, where required, shall be a minimum of 20 feet in width; all structures must be within 300 feet of an approved fire hydrant, and entrances to any dwelling unit or guest room shall not be more than 150 feet in distance in horizontal travel from the edge of the roadway of an improved street or approved fire lane.

22. **Public Services (Schools)**
    a. The developer shall install appropriate traffic signs around the site to ensure pedestrian and vehicle safety.
    b. Haul route scheduling shall be sequenced to minimize conflicts with pedestrians, school buses and cars at arrival and dismissal times of the school day. Haul route trucks shall not be routed past the school during periods when students are arriving or departing from the campus.
    c. There shall be no staging or parking of construction vehicles, including vehicles to transport workers on any of the streets adjacent to any school.
    d. Due to noise impacts on the schools, no construction vehicles or haul trucks shall be staged or idled on these streets during school hours.
    e. Fences shall be constructed around the site to minimize trespassing, vandalism, short-cut attractions and attractive nuisances.
    f. The developer and contractors shall maintain ongoing contact with the administrator of Hillside Elementary School, Loreto Street Elementary School and Nightingale Middle School. The administrative offices shall be contacted when demolition, grading and construction activity begin on the project site so that students and their parents will know when such activities are to occur. The developer shall obtain school walk and bus routes to the schools from

either the administrators or from the LAUSD's Transportation Branch (323) 342-1400 and guarantee that safe and convenient pedestrian and bus routes to the school be maintained.

23. **Utilities (Solid Waste)**
Recycling bins shall be provided at appropriate locations to promote recycling of paper, metal, glass, and other recyclable material. The bins shall be picked up and recycled accordingly as a part of the project's regular solid waste removal program.

24. **Transportation and Air Quality**
Individual projects of more than 50 dwelling units or 11,000 square feet of commercial or industrial uses shall undergo Site Plan Review per LAMC Section 16.05. The Site Plan Review shall include an assessment of air quality impacts. Individual projects of more than 70 dwelling units or 11,000 square feet of commercial or industrial uses shall be reviewed by LADOT to determine if a traffic study will be required.

D. **Administrative Conditions**

1. **Approval, Verification and Submittals.** Copies of any approvals, guarantees or verification of consultations, review or approval, plans, etc., as may be required by the subject conditions, shall be provided to the Department of City Planning for placement in the subject file.

2. **Code Compliance.** Area, height and use regulations of the zone classification of the subject property shall be complied with, except where herein conditions may vary.

3. **Covenant**. Prior to the issuance of any permits relative to this matter, an agreement concerning all the information contained in these conditions shall be recorded in the County Recorder's Office. The agreement shall run with the land and shall be binding on any subsequent property owners, heirs or assigns. The agreement shall be submitted to the Department of City Planning for approval before being recorded. After recordation, a copy bearing the Recorder's number and date shall be provided to the Department of City Planning for attachment to the file.

4. **Definition.** Any agencies, public officials or legislation referenced in these conditions shall mean those agencies, public offices, legislation or their successors, designees or amendment to any legislation.

5. **Enforcement.** Compliance with these conditions and the intent of these conditions shall be to the satisfaction of the Department of City Planning and any designated agency, or the agency's successor and in accordance with any stated laws or regulations, or any amendments thereto.

6. **Building Plans.** Page 1 of the grant and all the conditions of approval shall be printed on the building plans submitted to the Department of City Planning and the Department of Building and Safety.

SUBAREA 4

7. **Corrective Conditions.** The authorized use shall be conducted at all times with due regard for the character of the surrounding district, and the right is reserved to the City Planning Commission, or the Director pursuant to Section 12.27.1 of the Municipal Code, to impose additional corrective conditions, if, in the Commission's or Director's opinion, such conditions are proven necessary for the protection of persons in the neighborhood or occupants of adjacent proper.

8. **Indemnification.** The applicant shall defend, indemnify and hold harmless the City, its agents, officers, or employees from any claim, action, or proceeding against the City or its agents, officers, or employees to attack, set aside, void or annul this approval which action is brought within the applicable limitation period. The City shall promptly notify the applicant of any claim, action, or proceeding and the City shall cooperate fully in the defense. If the City fails to promptly notify the applicant of any claim, action, or proceeding, or if the City fails to cooperate fully in the defense, the applicant shall not thereafter be responsible to defend, indemnify, or hold harmless the city.

Fulcrum Resources Environmental

517 South Ivy Avenue
Monrovia, California 91016
1-800-385-7105
www.frenviro.net

Fulcrum Resources Environmental (Fulcrum) has performed a Phase I Environmental Site Assessment of the property located at 135, 141 &153 West Avenue 34, and 3401 & 3433 Pasadena Avenue, Los Angeles County, Los Angeles, California 90031 in general conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed in this report.

Fulcrum declares that, to the best of our professional knowledge and belief, the undersigned meet the definition of *Environmental Professionals* as defined in §312.10 of this part [40 CFR Part 312], and have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. Fulcrum has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

· EXECUTIVE SUMMARY ·

Fulcrum Resources Environmental (FR) has conducted a Phase I Environmental Site Assessment in accordance with the American Society for Testing and Materials (**ASTM**) Standard Practice E1527-13 and U.S. Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the subject property addressed at **135, 141 &153 West Avenue 34, and 3401 & 3433 Pasadena Avenue, Los Angeles County, Los Angeles, California 90031** (subject property) per the request of MR Real Estate, LLC (Client). The work was authorized by written contract dated June 19, 2019.

Additional Addresses

The subject property was historically associated with the following addresses:

1906
On West Avenue 34: 119, 139, 141, 143, 145, 147, 149, 153, 157
On Pasadena Avenue: 3403, 3407, 3417, 3419, 3423, 3429, 3431, 3437

1920
On West Avenue 34: 119, 139, 141, 143, 145, 147, 149, 153, 157
On Pasadena Avenue: 3401, 3403, 3407, 3411, 3417, 3419, 3423, 3425, 3429, 3431, 3437, 3439, 3441

1951
On West Avenue 34: 119, 123, 129, 133, 139, 141, 145, 149, 153, 155, 169
On Pasadena Avenue: 3401, 3407, 3415, 3417, 3419, 3421, 3423, 3425, 3429, 3431, 3437

1970
On West Avenue 34: 141, 153, 155, 169
On Pasadena Avenue: 3401, 3415, 3417, 3419, 3433, 3437

The additional addresses were researched as part of the subject property address range for the purposes of this Phase I Environmental Site Assessment.

Summary of Property Description

The subject property, 135, 141 &153 West Avenue 34, and 3401 & 3433 Pasadena Avenue, Los Angeles County, Los Angeles, California 90031, is located on the north side of West Avenue 34 and the west side of Pasadena Avenue, between North Artesian Street (to the west), within a highly-developed light industrial/commercial area. According to the Los Angeles County Tax Assessor's Office, the subject property is assigned the following Assessor's Parcel Numbers (APNs):

Address	APN	Land, sq feet	Building(s), sq feet
135 and 141 West Avenue 34	5205-004-011	157,560	87,980
153 West Avenue 34	5205-004-005	4,800	3,520
3401 Pasadena Avenue	5205-004-003	28,794	4,040 and 9,600
3433 Pasadena Avenue	5205-004-007	28,145	14,315

The subject property consists of four lots as described in Section 2.1 comprising a total of approximately 219,299 square-foot commercial lot. The parcels are described below based on publicly available information from the Los Angeles County Assessor Portal and site observations.

135 and 141 West Avenue 34

The property at 135 and 141 West Avenue 34 is currently improved with an industrial-commercial building of concrete construction, built in 1977. The building is comprised of two units, each of which includes office and warehouse space. The units are currently occupied by Ortiz Bros. Moving and Storage and Atlas Van Lines, a moving company; Phil's Transfer & Storage, Inc. for storage space; and Studio 34, Inc. for art studio space. Separate entrances and loading bays for the building are located near the southwest corner of the structure, and customer entry is achieved near the southeast corner of the building. Stacked corrugated steel shipping containers are located outside of the building in the parking areas in the south and central areas of the lot. The property features perimeter fencing of variable design, and motorized gate entry to the south along West Avenue 34.

153 West Avenue 34

The property at 153 West Avenue 34 is currently improved with an industrial-commercial building of brick and corrugated steel construction, built in 1929. The building is currently occupied by Ortiz Bros. Moving and Storage. The structure features a front entrance with a garage door for vehicular access along the southern boundary of the site. All other areas are asphalt paved with landscaped areas near the front entrance. Stacked corrugated steel shipping containers are located outside of the building in the parking areas to the north and northwest of the building. The property shares perimeter fencing with 145 and 141 West Avenue 34.

3401 Pasadena Avenue

The property at 3401 Pasadena Avenue is currently improved with an industrial-commercial building of wood-frame, cinderblock, and brick-façade construction on the east side of the parcel, built in 1925. That building is currently occupied by LootCrate, a merchandise wholesaler of apparel, games, accessories, and other various novelty items and collectables; and Call Time Quenchers, a beverage distribution company. Operational areas within the structure are primarily unfinished warehouse space with concrete flooring, utilized for storage of products, finished office/administrative areas with tile flooring and suspended drop-grid ceilings. The office portion of the structure features a split-level design with the second-story utilized for storage.

In the southeast corner of the site is a second industrial-commercial building of corrugated steel construction, built in 1948. The building is currently utilized as a warehouse for dry-goods storage. The

exterior of the property is asphalt paved with employee parking. An entrance is located near the southeast corner of the structure. The property also features perimeter chain link fencing with barbed wire and a manual gate for vehicular access along Pasadena Avenue.

3433 Pasadena Avenue

The property at 3433 Pasadena Avenue is currently improved with an industrial-commercial building of wood-frame and cinderblock construction with reinforced steel support beams and a brick façade, built in 1967. The building is also occupied by LootCrate. The building is comprised of office and work area space. The work area is partially finished with concrete and carpet flooring, and the office areas feature tile floors with drop-grid ceilings. The property shares parking areas and perimeter chain link fence with the 3401 Pasadena Avenue property.

All four parcels are together enclosed with fencing of variable design. A railroad corridor with a northeast/southwest alignment is present, parallel and adjacent to the western boundary of the subject property.

The subject property is occupied by the following tenants:

Property Address	Business Name	Business Operation
135 and 141 West Avenue 34	Ortiz Bros. Moving and Storage and Atlas Van Lines Phil's Transfer & Storage, Inc	Moving Company and Commercial Storage Moving Company and Commercial Storage
153 West Avenue 34	Ortiz Bros. Moving and Storage and Atlas Van Lines	Moving Company and Commercial Storage
3401 Pasadena Avenue	LootCrate Quick Time Quenchers	Merchandise Wholesaler Beverage Distributor
3433 Pasadena Avenue	LootCrate	Merchandise Wholesaler

The subject property has been owned by Mr. Eric Ortiz of Ortiz Bros. Moving and Storage since 2000, and has occupied the property since 1993.

Summary of Property History

Based on a review of available historical records, the north, west, and central areas of the subject property were vacant, and the east and west areas were developed with private residential structures by as early as 1894. Most of these residential properties persisted until 1964 with few exceptions, including the subject property warehouse building addressed 153 West Avenue 34 (constructed in 1929) along the southern boundary of the site, and the subject property warehouse buildings addressed 3401 Pasadena Avenue (constructed in 1925) and 3433 Pasadena Avenue (constructed in 1967) along the eastern boundary of the site. A railroad corridor has been historically present along the western boundary since at least 1894, and is still currently in use. A bakery occupied the southeast corner of the property (original occupant of the 3401 Pasadena Avenue building) from 1919 until at least 1951, and was redeveloped as a machine and woodworking shop in 1970.

The historic industrial areas of the subject property have a more complicated history, and are discussed here as the "historic industrial areas". These areas include the north, west, and central parts of the site. The historic industrial areas were vacant and undeveloped in 1894 until at least 1906. By 1920, these areas were developed and occupied by the Los Angeles Sand & Gravel Company, which occupied the property until at least 1928, and terminated by 1938, at which time the historic industrial areas of the subject property consisted of vacant land. By 1948, these areas were redeveloped with six industrial structures, occupied by Steel Framing & Building Corporation in 1951, and ITT Cannon Electronics Inc. from at least 1964-1970. The historic industrial areas were demolished and consisted of vacant and graded land in the 1977 aerial photograph, and the subject property buildings addressed 135 and 141 West Avenue 34 were constructed in 1977 according to building department files and tax assessor records, and was occupied by American Caster Corp from 1977 until the property was purchased by the current owner, Mr. Eric Ortiz, in 1999. The subject property has been primarily occupied by Ortiz Brothers Moving & Storage, with a variety of tenants between 1999 and present. Refer to Section 4.1.

Summary of Regulatory Database Concerns

The subject property was not identified on any of the federal, state, or local regulatory records databases in the Environmental Data Resources, Inc. (EDR) Radius report.

Vapor Encroachment Condition (VEC)

A total of 8 sites were identified in the Radius Map Report and historical research within the "Area of Concern" that were considered to pose a potential VEC at the subject property based on the Tier 1 Evaluation. Tier 1 sites are:

- **3505 Pasadena Avenue** (Map ID B41-47) – this site was identified under the operator name Former Welch's Uniform Services and is located adjacent to and north of the subject property. The site is listed in the following databases from the report: UST (2), RCRA-LQG, ENVIROSTOR, LUST, CPS-SLIC (2), VCP, SWEEPS UST, HIST UST, CA FID UST, FINDS, ECHO, EMI, HIST CORTESE, CERS, DRYCLEANERS, HAZMAT, and EDR Hist Cleaner. Based on regulatory oversight and on-going SVE remediation with semi-annual groundwater monitoring, and the most recent (2016) analytical data available, this site does not represent a VEC to the subject property.

- **3500 Pasadena Avenue** (Map ID F61, 62) – this site was identified under the operator names Smith W P and Chuy Carburetors, and is located approximately 250 feet northeast of the subject property. The site is listed in the EDR Hist Cleaner and HAZMAT databases. Based on the available information, this site does not represent a VEC to the subject property.

- **3225 Lacy Street** (Map ID H67-73) – this site was identified under the operator names Heath & Co, and Maintenance and Operations New Maintenance Company for the Los Angeles Unified School District. The site is located approximately 350 feet southwest of the subject property, and is listed in the following databases from the report: HIST UST, UST, SWEEPS UST, CA FID UST,

RCRA-LQG, HAZMAT, LUST, FINDS, ECHO, HIST CORTESE, and CERS. Based on separation distance and site closure status, this site does not represent a VEC to the subject property.

- **3209 East Humboldt Street (**Map ID I74-78) – this property is located approximately 600 feet south of the subject property, and was identified under the operator ITT Cannon / Kennington. The site is listed in the following databases from the report: HAZMAT, UST, RCRA-SQG, FINDS, SEMS, ENVIROSTOR, VCP, SWEEPS UST, CA FID UST, DEED, HIST CORTESE, CPS-SLIC, LA Co. Mitigation, and CERS. Based on separation distance and regulatory oversight of cleanup activities with active groundwater monitoring, this site does not represent a VEC to the subject property.

- **3580 Pasadena Avenue** (Map ID J94-97) – this site was identified under the operator name Flavor Food Inc. and is located approximately 700 feet northeast of the subject property. The site is listed in the following databases from the report: SWEEPS UST, CA FID UST, LUST, HIST UST, HIST CORTESE, CERS, and UST. Based on separation distance and site closure status, this site does not represent a VEC to the subject property.

- **3101 Artesian Street** (Map ID N98-104) – this site was identified under the operator names Lincoln Heights District and P D D Construction MTNC. The site is located approximately 730 feet southwest of the subject property, and is listed in the following databases from the report: SWEEPS UST, CA FID UST, UST (2), LUST (2), RCRA-SQG, FINDS, ECHO, HAZMAT, CERS HAZ WASTE, HIST UST (2), CERS TANKS, HIST CORTESE, and CERS. Based on separation distance from the subject property, this site does not represent a VEC to the subject property.

- **301 West Avenue 26** (Map ID S127-128) – this property is located approximately 1,700 feet southwest of the subject property and was identified under the operator names Jaybee and Ajax Manufacturing. The site is listed in the ENVIROSTOR, VCP, EMI, and SEMS databases. Based on separation distance and regulatory oversight of cleanup activities with active groundwater monitoring, this site does not represent a VEC to the subject property.

- **400 West Avenue 26** (Map ID T129, 130, 133) – this site was identified under the operator name Lacy's Street Dump and is located approximately 1,700 feet southwest of the subject property. The site is listed in the WMUDS/SWAT, LDS, CERS (2), and SWF/LF (2) databases. Based on separation distance and regulatory closure status, this site does not represent a VEC to the subject property.

In our opinion, none of the other sites listed pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred but the medium affected was the soil only and the site is beyond the critical distance of 100 feet, or the site location and/or plume of contamination is in excess of the critical distance of 100 feet from the subject property. Thus, a VEC can be ruled out because a VEC does not or is not likely to exist at the subject property.

Data Gaps

No significant data gaps were identified.

Refer to Section 1.4 for a discussion of the limitations, data failures, and/or data gaps encountered during this assessment.

· FINDINGS ·

Recognized Environmental Conditions (RECs)

In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify recognized environmental conditions (RECs). The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the subject property or into the ground, ground water, or surface water of the subject property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions.

This assessment has revealed no evidence of RECs in connection with the subject property.

Historical Recognized Environmental Condition (HREC)

A Historical Recognized Environmental Condition (HREC) is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by regulatory authority, without subjecting the property to any required controls (e.g. property use restrictions, AULs, institutional controls, or engineering controls).

This assessment has revealed no evidence of HRECs in connection with the property.

Controlled Recognized Environmental Condition (CREC)

A Controlled Recognized Environmental Condition (CREC) is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (as evidenced by the issuance of a NFA letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (property use restrictions, AULs, institutional controls, or engineering controls).

This assessment has revealed no evidence of CRECs in connection with the subject property.

· CONCLUSIONS & RECOMMENDATIONS ·

FR has conducted a Phase I Environmental Site Assessment in accordance with the American Society for Testing and Materials (**ASTM**) Standard Practice E1527-13 and Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the subject property addressed at **135, 141 &153 West Avenue 34, and 3401 & 3433 Pasadena Avenue, Los Angeles County, Los Angeles, California 90031**. This assessment has revealed no evidence of Recognized Environmental Conditions (RECs) during the course of this assessment with the property.

FR recommends no further investigations for the subject property at this time.

· 1.0 INTRODUCTION ·

FR has conducted a Phase I Environmental Site Assessment in accordance with the American Society for Testing and Materials (**ASTM**) Standard Practice E1527-13 and Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the subject property addressed 135, 141 &153 West Avenue 34, and 3401 & 3433 Pasadena Avenue, Los Angeles County, Los Angeles, California 90031 (subject property) per the request of MR Real Estate, LLC. The work was authorized by written contract dated June 19, 2019.

1.1 Purpose

The purpose of a Phase I Environmental Site Assessment is to identify potential issues that may impact the subject property. The purpose of this practice is to define good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. 9601) and petroleum products. The investigation was conducted in accordance with the *Client's* Environmental Site Assessment scope of work for the use and benefit of the *Client* and the U.S. Small Business Administration (U.S. SBA) if financing is to be authorized by U.S. SBA. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability (hereinafter, the "landowner liability protections," or "LLPs"): that is, the practice that constitutes "all appropriate inquiry into the previous ownership and uses of the subject property consistent with good commercial or customary practice" as defined at 42 U.S.C. 9601(35)(B).

Controlled substances are not included within the scope of this standard. Persons conducting an environmental site assessment as part of an EPA Brownfields Assessment and Characterization Grant awarded under CERCLA 42 U.S.C. 9604(k)(2)(B) must include controlled substances as defined in the Controlled Substances Act (21 U.S.C. 802) within the scope of the assessment investigations to the extent directed in the terms and conditions of the specific grant or cooperative agreement. Additionally, an evaluation of business environmental risk associated with a parcel of commercial real estate may necessitate investigation beyond that identified in this practice.

The purpose of this report is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. This report is also not intended to serve as a compliance assessment of the subject property.

The ASTM E1527-13 practice DOES NOT address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provision of the LLPs. Per the ASTM Standard, Users are cautioned that federal, state, and local laws may impose environmental assessment obligations that are beyond the scope of this practice. Users should also be aware that there are likely to be other legal

obligations with regard to hazardous substances or petroleum products discovered on the subject property that are not addressed in the ASTM practice and that may pose risks of civil and/or criminal sanctions for non-compliance.

1.2 Scope of Work

This report has been prepared per the conditions presented in the agreed contract signed by the client. In accordance with ASTM guidelines, FR's scope of work included:

1. Requested user or one deemed most historically familiar with subject property to complete FR's environmental questionnaire.

2. Conducted visual reconnaissance of the subject property and adjoining properties, including site interviews with past or present owners, occupants, tenants, and/or operators if applicable.

3. Requested and researched historical documentation including but not limited to aerial photographs, city directories, topographic maps, interviews, public agency records, and fire insurance maps. Chain-of-title and environmental liens were reviewed if requested or provided by the client/user.

4. Reviewed federal, state, and local regulatory agency database information for the subject property and neighboring properties to identify potential concerns that could adversely affect the environmental condition of the subject property.

5. Prepared a technical Phase I Environmental Assessment report to document the findings regarding the current environmental condition of the subject property. If warranted, the report contains recommendations for further action. In addition to ASTM scope items, the following ASTM non-scope items were discussed and included in the report based upon a limited review: asbestos containing materials, radon, lead-based paint, lead in drinking water, potential wetlands, air emissions, and mold/water intrusion.

ASTM E1527-13 does not encompass analytical testing to evaluate Asbestos Containing Materials (ACM), radon, lead-based paint (LBP), drinking water quality, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, biological agents, mold, stored chemicals, debris, fill materials, surface water, or subsurface samples (soil and groundwater) as part of a Phase I ESA. Such additional information regarding non-ASTM E1527-13 issues may be provided merely for the *User's* convenience and cannot be used to bind this report as a whole to the compliance and conformance with ASTM guidelines. No disassembly of systems or building components or physical or invasive testing is to be performed unless Contract Engagement specifically calls for such testing as an additional scope of work. FR Environmental has performed this *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Practice E1527-13. This *Report* may not include all environmental conditions which can materially impact the Subject Property other than those defined as RECs, HRECs, and CRECs in ASTM E1527-13.

1.3 Significant Assumptions

The following assumptions are made by FR Environmental in this report. FR relied on information derived from secondary sources. FR Environmental has made no independent investigation as to the accuracy and completeness of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews and has assumed that such information is accurate and complete. FR Environmental assumes information provided by or obtained from governmental agencies including information obtained from government websites is accurate and complete.

Groundwater flow and depth to groundwater, unless otherwise specified by on-site well data, or well data from adjacent sites are assumed based on contours depicted on the United States Geological Survey topographic maps. FR Environmental assumes the subject property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

FR Environmental assumes that the Client, Client representatives, Client Legal Counsel, designated representatives of the Client, property contact, property owner, property owner representatives, and property brokers, used good faith in answering questions and in obtaining information for the subject property as defined in 10.8 of the ASTM E1527-13 practice. This would also include obtaining those helpful documents from previous owners, operators, tenants, brokers, financial institutions etc. FR Environmental also assumes the Client will designate appropriate and knowledgeable people for performance of the Phase I Environmental Assessment.

1.4 Limitations, Data Failures, and Data Gaps

It is important to note that property conditions, as well as federal, state, and local/tribal regulations can change over time. Therefore, the conclusions and information presented in this report apply strictly to regulations and property conditions existing at the time the report was completed. FR Environmental assumes that information provided by local agencies is true. FR Environmental cannot guarantee or warranty that information provided second-hand is accurate to its fullest extent. FR Environmental is not responsible for conditions found at or beneath the subject property or adjacent properties. Accordingly, portions of this report may be invalidated wholly or partially by the changes beyond our control.

The findings, conclusions, and recommendations presented herein are based solely on the scope of work previously described and information gathered. Incomplete or outstanding information identified throughout the body of this report including data gaps is considered a limitation to the assessment. Limitations to the assessment also include weather conditions, vegetation cover, parked cars, trucks, dumpsters, and anything limiting visual observation of or physical access to the subject property and neighboring properties. Vapor intrusion is not included in this scope of services and is considered an

ASTM Non-scope consideration. FR was not contracted to disassemble or perform testing of machinery on-site. This report and scope is not an environmental compliance audit.

Certain policies can differ from lenders or users. For CERCLA landowner liability protection, Phase I ESA reports are valid for 180 days, per ASTM E1527-13.

1.4.1 Limiting Conditions/Deviations

There were no limiting conditions or deviations in the performance of this Phase I ESA.

1.4.2 Data Failures

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

No data failures were identified during this assessment.

1.4.3 Data Gaps

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

No significant data gaps were identified.

1.5 Qualification Statement of Professional

Our investigation was performed using the degree of care and skill ordinarily exercised, under similar circumstances, by or under direct oversight of an environmental professional as defined by the ASTM. FR Environmental's environmental professional who prepared this assessment possesses the specific qualifications based upon education, training and experience to assess a property of the nature, history, and setting of the subject property. Neither FR Environmental, nor any staff member assigned to this investigation has any interest or contemplated interest, financial or otherwise, in the subject or surrounding properties, or in any entity which owns, leases, or occupies the subject or surrounding properties or which may be responsible for environmental issues identified during the course of this investigation, and has no personal bias with respect to the parties involved. FR Environmental has developed and performed the "*All Appropriate Inquiries*" in accordance with the standards and practices as defined in 40 CFR Part 312.

1.6 User Reliance

This investigation was conducted in accordance with the Client's Environmental Site Assessment scope of work for the use and benefit of the Client and assignees. It is based, in part, upon documents, writings, and information owned, possessed, or secured by the Client. Neither this Report, nor any information contained herein, shall be used or relied upon for any purpose by any other person or entity without the express written permission of the Client.

All reports (whether in paper, digital, electronic, or any other formats) are for the sole use and benefit of the Client. Either verbally or in writing, third parties may come into possession of this Report, whether all or part of the information generated. In the absence of a written agreement with Fulcrum granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Fulcrum. Unauthorized use of this Report shall constitute acceptance of and commitment to protect, hold and indemnify Fulcrum harmless from any and all claims, damages, losses, liabilities, and expenses (including reasonable attorney's fees) responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

· 2.0 SITE DESCRIPTION ·

2.1 Location and legal description

The subject property, 135, 141 &153 West Avenue 34, and 3401 & 3433 Pasadena Avenue, Los Angeles County, Los Angeles, California 90031, is located on the north side of West Avenue 34 and the west side of Pasadena Avenue, between North Artesian Street (to the west), within a highly-developed light industrial/commercial area. According to the Los Angeles County Tax Assessor's Office, the subject property is assigned the following Assessor's Parcel Numbers (APNs):

Address	APN	Land, sq feet	Building(s), sq feet
135 and 141 West Avenue 34	5205-004-011	157,560	87,980
153 West Avenue 34	5205-004-005	4,800	3,520
3401 Pasadena Avenue	5205-004-003	28,794	4,040 and 9,600
3433 Pasadena Avenue	5205-004-007	28,145	14,315

2.2 General characteristic

The subject property consists of four lots as described in Section 2.1 comprising a total of approximately 219,299 square-foot commercial lot. The parcels are described below based on publicly available information from the Los Angeles County Assessor Portal and site observations.

135 and 141 West Avenue 34

The property at 135 and 141 West Avenue 34 is currently improved with an industrial-commercial building of concrete construction, built in 1977. The building is comprised of two units, each of which includes office and warehouse space. The units are currently occupied by Ortiz Bros. Moving and Storage and Atlas Van Lines, a moving company; Phil's Transfer & Storage, Inc. for storage space; and Studio 34, Inc. for art studio space. Separate entrances and loading bays for the building are located near the southwest corner of the structure, and customer entry is achieved near the southeast corner of the building. Stacked corrugated steel shipping containers are located outside of the building in the parking areas in the south and central areas of the lot. The property features perimeter fencing of variable design, and motorized gate entry to the south along West Avenue 34.

153 West Avenue 34

The property at 153 West Avenue 34 is currently improved with an industrial-commercial building of brick and corrugated steel construction, built in 1929. The building is currently occupied by Ortiz Bros. Moving and Storage. The structure features a front entrance with a garage door for vehicular access along the southern boundary of the site. All other areas are asphalt paved with landscaped areas near the front entrance. Stacked corrugated steel shipping containers are located outside of the building in the parking areas to the north and northwest of the building. The property shares perimeter fencing with 145 and 141 West Avenue 34.

3401 Pasadena Avenue

The property at 3401 Pasadena Avenue is currently improved with an industrial-commercial building of wood-frame, cinderblock, and brick-façade construction on the east side of the parcel, built in 1925. That building is currently occupied by LootCrate, a merchandise wholesaler of apparel, games, accessories, and other various novelty items and collectables; and Call Time Quenchers, a beverage distribution company. Operational areas within the structure are primarily unfinished warehouse space with concrete flooring, utilized for storage of products, finished office/administrative areas with tile flooring and suspended drop-grid ceilings. The office portion of the structure features a split-level design with the second-story utilized for storage.

In the southeast corner of the site is a second industrial-commercial building of corrugated steel construction, built in 1948. The building is currently utilized as a warehouse for dry-goods storage. The exterior of the property is asphalt paved with employee parking. An entrance is located near the southeast corner of the structure. The property also features perimeter chain link fencing with barbed wire and a manual gate for vehicular access along Pasadena Avenue.

3433 Pasadena Avenue

The property at 3433 Pasadena Avenue is currently improved with an industrial-commercial building of wood-frame and cinderblock construction with reinforced steel support beams and a brick façade, built in 1967. The building is also occupied by LootCrate. The building is comprised of office and work area space. The work area is partially finished with concrete and carpet flooring, and the office areas feature tile floors with drop-grid ceilings. The property shares parking areas and perimeter chain link fence with the 3401 Pasadena Avenue property.

All four parcels are together enclosed with fencing of variable design. A railroad corridor with a northeast/southwest alignment is present, parallel and adjacent to the western boundary of the subject property.

2.3 Current property use

The subject property is occupied by the following tenants:

Property Address	Business Name	Business Operation
135 and 141 West Avenue 34	Ortiz Bros. Moving and Storage and Atlas Van Lines Phil's Transfer & Storage, Inc	Moving Company and Commercial Storage Moving Company and Commercial Storage
153 West Avenue 34	Ortiz Bros. Moving and Storage and Atlas Van Lines	Moving Company and Commercial Storage
3401 Pasadena Avenue	LootCrate Quick Time Quenchers	Merchandise Wholesaler Beverage Distributor
3433 Pasadena Avenue	LootCrate	Merchandise Wholesaler

The subject property has been owned by Mr. Eric Ortiz of Ortiz Bros. Moving and Storage since 2000, and has occupied the property since 1993.

2.4 Current adjoining properties description

The subject property is located in a highly-developed, industrial-commercial area of Los Angeles, California. The following land use was observed in the immediate vicinity of the property:

Direction	Property Address	Business Name	Business Operation
North	3505 Pasadena Avenue***	Vacant land, formerly Welch's Uniform Facility	N/A – Vacant Land
East	120 East Avenue 35*** 3412 Pasadena Avenue 3403 Smith Street	Hillside Elementary School N/A - Private Residences N/A – Private Residences	Los Angeles Public Schools N/A - Private Residences N/A - Private Residences
South	170 West Avenue 34 164-166 West Avenue 34 140 West Avenue 34 138 West Avenue 34 134 West Avenue 34 130 West Avenue 34 120 West Avenue 34 118 West Avenue 34 116 West Avenue 34 3305 Pasadena Avenue	N/A – Vacant Fabco Art Services N/A – Private Residence South Bay Catering ACW Apparel N/A – Private Residences Screen Printing & Embroidery N/A – Private Residences N/A – Private Residence Arpine Media Group	Vacant Warehouse Custom Design Company N/A – Private Residence Catering Company Clothing Warehouse N/A – Private Residences Commercial Printing N/A – Private Residences N/A – Private Residence Commercial Printing
West	403 West Avenue 33***	Viertel's Central Division, Los Angeles Police Department	Impoundent Lot & Police Garage

*** Address listed in the Regulatory Records Database (Refer to Section 6.0)

2.5 Municipal Services and Utilities

The provider of municipal services and utilities to the subject property is not known; however, the property was noted to be connected to public water and sewer services.

2.6 Physical Settings

2.6.1 Topography

The United States Geological Survey (USGS), [Los Angeles, California] 7.5 Minute Topographic Quadrangle map of the subject property and surrounding vicinity was reviewed. The elevation of the property is approximately 370 feet above mean sea level (MSL). Topography at the subject property is relatively flat and declines gently to the west towards the nearby Arroyo Seco, a seasonal and generally dry river.

A copy of the USGS 7.5 Minute Topographic Quadrangle Map of Los Angeles, California, is included in the appendices of the report.

2.6.2 Geology/Soil Conditions

The site is located in the Los Angeles basin, within the Downey Plain near the Arroyo Seco, which seasonally drains into the Los Angeles River to the southeast. Surface materials consist of alluvium and channel deposits with poorly graded sand, gravel, and cobbles to depths of to 75 feet below grade.

Based on a site assessment report prepared for Welch's Uniform Service at 3505 Pasadena Avenue, adjacent to and north of the subject property, the site is underlain by sand with trace gravel to 25 feet bgs, below which are sand and gravel mixtures to 55 feet below grade, which transitions to sand from around 55 feet below grade to 80 feet below grade. At approximately 80 feet below grade, the lithology changes to saturated gravel feet to 85 feet, below which is silt to approximately 96 feet below grade, the maximum depth explored (AmeriPride Service, November 2005).

2.6.3 Hydrogeology

The subject property is located within the Los Angeles Coastal Plain; approximately 175 feet west of the Arroyo Seco, and approximately 0.7 miles east of the Los Angeles River, which is a concrete lined storm channel that prevents infiltration of surface water and empties to the Pacific Ocean. Based on the groundwater report monitoring report prepared for the north adjacent property at 3505 Pasadena Avenue in 2005, depth to groundwater is 38-40 feet below grade (AmeriPride Service, November 2005).

Note that groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

· 3.0 PROPERTY RECONNAISANCE ·

3.1 Property Condition Observations

Mr. Eric Ortiz, the subject property Owner, provided full property access to the FR assessor, Mr. Steven Wong, on June 27, 2019. There were no limited property access conditions. The weather conditions were sunny at 72 degrees Fahrenheit. No weather conditions were limiting property observations.

Site characteristics observed by the FR site assessor are described in above Section 2.2.

Please refer to the table below for information on petroleum products, hazardous substances, and/or hazardous wastes observed on the subject property at the time of FR's site visit.

Hazardous Substances/Wastes Observed	Quantity	Location	Spills/Leaks Observed
Propane	8 x 33.5-lb tanks 4 x 20-lb tanks	Under outdoor canopy	No
Gasoline	3 x ~5-gallon jugs	Under outdoor canopy	No

No significant amounts of hazardous substances or processes that generate or handle hazardous wastes were observed on the subject property during FR's site reconnaissance. No Recognized Environmental Conditions (RECs) were observed during the site reconnaissance.

3.2 ASTM Reconnaissance Findings

Recognized Environmental Conditions (RECs) - In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify recognized environmental conditions. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the subject property or into the ground, ground water, or surface water of the subject property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions.

FR conducted a visual review and observation of the subject property and adjoining properties per ASTM Scope Considerations listed below.

Item	Identified
Hazardous Substances and Petroleum Products in Connection with Identified Uses	4 x 20-lb propane tanks; 8 x 33.5-lb propane tanks for forklift operation; and small amounts of gasoline for automotive operation. No leaks, spills, or staining were observed in relation to the petroleum products present on the subject property. No significant amounts of hazardous substances or petroleum products were observed to be used in connection with current business operations.
Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs / USTs)	None identified
Fueling systems	None identified
Pungent or Noxious Odors	None identified
Pools of Liquid	None identified
Drums or Other Containers of Hazardous Substances or Petroleum Products	None identified
Unidentified hazardous substances or petroleum products not in connection with property use	None identified
Unidentified substance containers	None identified
Machinery or equipment likely containing PCBs	None identified
Significant surface staining on interior or exterior portion of property	None identified
Heating/Cooling Equipment with Observed Fuel Sources	None identified
Drains and Sumps	Several floor drains were observed in the bathrooms of the subject property buildings in addition to one floor drain in the warehouse associated with the address 3401 Pasadena Avenue. Due to locality and lack of observed business operations and/or processes that generate or handle hazardous wastes or materials, the observed floor drains are not expected to represent significant point source features for groundwater contamination.

Item	Identified
Regulated or Unregulated Waste Water Discharge	A three-stage clarifier was observed in the southwest portion of the main subject building behind the canopy. According to Mr. Eric Ortiz, subject property Owner, the clarifier has been present on the property since purchase and has not been in use by current business operations. The clarifier appears to be dry and unused. Two former groundwater (GW) monitoring wells were recently closed that are located to the south of the southwest portion of the property on Avenue 34. Due to the lack of reported releases and/or observed business operations that generate or handle hazardous wastes or materials, the clarifier is not expected to represent a significant environmental concern. FR suggests that if there's no planned future uses of the clarifier; it should be properly removed from the subject property.
Pits, Ponds, or Lagoons	None identified
Stockpiled Soils with Visual Evidence of Contamination	None identified
Questionable Fill Material (unknown origin) or Visual Evidence of Buried Wastes	None identified
Septic Systems	None identified
Wells	None identified
Stressed Vegetation	None identified
Surficial Disturbance	None identified
Biohazardous Wastes	None identified
Herbicide or Pesticide Use	None identified
Dry-cleaning Operation	None identified
Other	None identified

3.3 ASTM Non-Scope Considerations

Unless authorized per the user's request, FR did not engage in conducting sampling or an assessment beyond a visual review of the ASTM Non-Scope Considerations. FR conducted a visual review of the following ASTM Non-Scope Considerations included in this assessment:

ASTM Non-Scope Item	Identified
Asbestos-Containing-Materials (ACMs)	Based on the construction date (1929-1977), asbestos-containing building materials could be present. An ACM survey was not included in the current scope of services.
Lead-based paint (LBP)	Based on the construction date (1929-1977), lead-based paints could be present. A LBP survey was not included in the current scope of services.
Radon	A review of the EPA's Map of Radon Zones indicates that Los Angeles County falls within Zone 2, a zone of moderate radon potential. Counties located within Zone 2 have a predicted average indoor radon screening level of between 2 and 4 picocuries per liter (pCi/L), equal to or below the EPA's radon action level of 4 pCi/L for residential structures. A radon survey was not included in the current scope of services.
PCB-oil in hydraulic equipment, ballasts, switcher, transformers, etc.	A caged pad-mounted transformer was observed in the southwest portion the subject property. There were no signs of oil leaks or staining at the base of this pad-mounted transformer that would present an immediate adverse impact to the environmental integrity of the subject site. Several pole-mounted transformers were observed on the subject property. Any transformers related to the power-pole are operated by the Southern California Edison. In the event of a release of dielectric fluid from one of its transformers, the utility company typically performs the cleanup. A PCB survey was not included in the current scope of services.
Lead in Drinking Water	A lead in drinking water survey was not included in the current scope of services.
Flood Zone	Based on a review of a flood zone map contained in the EDR Radius Map Report, the subject property is located within a 500-year flood zone.
Mold and Indoor Air Quality Issues	No obvious indications of water damage or mold growth were observed during FR's visual inspection.

Asbestos Containing Material

Asbestos-containing material (ACM) represents a concern when it is subject to damage that results in the release of fibers. Friable ACM, which can be crumbled by hand pressure and is therefore more susceptible to damage, is of particular concern. Non-friable ACM is a potential concern if it is damaged by maintenance work, demolition or other activities.

For buildings constructed prior to 1981, the Code of Federal Regulations (29 CFR 1926.1101 and 29 CFR 1910.1001) define presumed asbestos-containing material (PACM) as 1. Thermal System Insulation (TSI), e.g., boiler insulation, pipe lagging, fireproofing; and 2. Surfacing Materials, e.g., acoustical ceilings. Building owners/employers are responsible for locating the presence and quantity of PACM. Building Owners/employers can rebut installed material as PACM by either having an inspection in accordance with Asbestos Hazard Emergency Response Act (AHERA) (40 CFR Part 763, Subpart E) or hiring an accredited inspector to take bulk samples of the suspect material.

Typical materials not covered by the presumptive rule include but are not limited to: floor tiles and adhesives, wallboard systems, siding and roofing. Building materials such as wallboard systems may contain asbestos but unless a building owner/employer has specific knowledge or should have known through the exercise of due diligence that these other materials contain asbestos, the standard does not compel the building owner to sample these materials.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations pertaining to ACMs.

Due to the age of the subject buildings (1929-1977), there is a potential that presumed ACMs are present within the subject building. The table below describes the type of material, location, friability, and condition of the suspect ACMs found within the subject building. The table below is not comprehensive as to each and every building material but is intended to provide a general summary based on the limited site reconnaissance.

Material	Location	Friable	Condition
Drywall systems	3433 Pasadena Avenue 135/141 West Avenue 34	No	Good
Roofing Systems	Roof	No	Not inspected

An asbestos building materials inspection was not included in the scope of service agreement with FR. Accordingly; no samples of the suspect materials were taken. At the time of the inspection, all of the materials appeared to be intact and undisturbed (that is, they appeared to be in a non-friable and/or good condition) and, thus, do not pose an immediate environmental concern. Still, these materials may become hazardous if they in fact contain asbestos and are subsequently damaged or disturbed, as, for example, in the course of remodeling. Asbestos-containing materials are considered to be hazardous materials, and their eventual disposal and handling are subject to federal and state regulatory guidelines.

Currently, there are no regulations requiring the removal of ACM unless it will be disturbed during renovation, repairs, or demolition. The USEPA recommends that as long as the ACM does not pose an imminent health threat, the materials can be managed under an Operations and Maintenance (O&M) Plan.

4.1 Historical Aerial Photographs Review

FR reviewed historical aerial photographs supplied by EDR and dated 1923 through 2016. A summary of historical aerial photographs researched is listed below.

Dates	Description
1923	The north, west, and central portions of the site are developed with industrial structures and access roads. The eastern and southern portions of the property are developed with approximately 20 smaller structures on lots which appear residential. Beyond the subject property lies vacant land to the east, vacant land, and the Arroyo Seco, which has the geomorphology of a braided stream feature. Pasadena Avenue and private residences are present to the east and southeast. West Avenue 34 and private residences are present to the south. Adjacent to and west of the subject property is a railroad corridor, which runs parallel to the western boundary of the subject property with a northeast / southwest alignment. The northern adjacent property appears industrial with several large structures. The surrounding area is primarily residential, with industrial-commercial properties to the southeast and northwest.

Dates	Description
1928	The central portion of the subject property is cleared and vacant, with one remaining industrial structure within the west-central area of the site. Aside from a mid-sized industrial structure in the southwest area of the property, he west and south areas remain residential in use and generally unchanged from 1923. Beyond the subject property, the north and west adjacent properties appear further developed with large industrial structures, and the south and east adjacent properties appear residential in use and generally unchanged from 1923.
1938	The industrial structure the west-central area of the site is no longer present in 1938, and the north and west-central areas appear cleared and vacant. The south and east areas of the subject property remain residential, with the exception of an industrial structure near the southeast corner of the property. Beyond the subject property, there are further developments to the north and west adjacent property. Aside from the development of Hillside Elementary School to the east, the adjacent properties to the east and south remain residential and generally unchanged from 1923. Further to the north and west is the Arroyo Seco, which is a constructed canal in 1938, a stark contract to the natural braided stream geomorphological feature depicted in 1928.
1948, 1952	There are six additional industrial structures on the subject property in 1948 compared to 1938. The structures include five towards the north and central areas of the property, and one in the southeast corner. Beyond the subject property are new industrial structures to the north, and outdoor storage yards to the east. The remaining areas to the south and east, and vicinity of the subject property appear generally unchanged from 1923. Arroyo Seco
1964, 1970	The site is completely industrial-commercial in use in the 1964 aerial photograph with approximately 10 industrial structures. All residential structures previously described at the subject property are no longer present, and the remainder of the property appears paved with parking and exterior storage areas. Beyond the subject property, conditions in the surrounding areas appear generally consistent with conditions with those described in 1952.
1977	Most of the site appears vacant and graded in 1977 compared to the 1970 aerial photograph. The only remaining structures from those previously described include the structures along Pasadena Avenue in the western portion of the site (present-day 3401 & 3433 Pasadena Avenue), and a single industrial structure in the southwest corner of the site (present-day 153 West Avenue 34). The remaining areas are graded and vacant land, and the present-day structure addressed 135 and 141 West Avenue 34 is not present. Additional changes in areas beyond the subject property include industrial structures to the southwest and southeast; and the east adjacent property appears vacant graded land. There are no significant changes to adjacent properties north and west of the subject property.

Dates	Description
1983, 1989, 1994, 2002, 2005, 2009, 2012, 2016	The subject property is developed with its present-day structures and general configuration in 1983. There are few changes in the subsequent aerial photographs from 1989 through 2016 to the subject property, or to the properties to the east, and south. The north adjoining property is developed with large industrial structures in 1983 and 1989, which is no longer present in the 1994 aerial photograph. The west adjoining property appears to be a parking lot with no discernable structure until 2012 with the appearance of an industrial structure near the center and western portion of the property.

No environmental concerns were noted on the subject property or adjoining properties.

4.2 Historical Sanborn Map Coverage Review

Sanborn Map Company maps were created for insurance underwriters from 1867 to 1970, and often contain information regarding the uses of individual structures, and the locations of fuel and/or chemical storage tanks that may have been on a particular property. FR subcontracted with EDR to provide copies of Sanborn Map Company maps.

A summary of historical Sanborn map coverage researched is listed below.

Subject Property addresses include the following: On West Avenue 34: 119, 139, 141, 143, 145, 147, 149, 153, and 157 On Pasadena Avenue: 3403, 3407, 3417, 3419, 3423, 3429, 3431, and 3437		
Date	**Description**	
1906	**Subject Property**	The subject property is depicted with primarily residential properties along the eastern and southern boundaries of the property. The structures appear residential with the exception of a shop located at 3419 Pasadena Avenue. The remainder of the subject property appears vacant and undeveloped.
	Adjoining Properties	The parcels north of the subject property are primarily vacant, with one residence addressed 3441 Pasadena Avenue to the north of the subject property. The railroad spur along the western boundary of the subject property is developed and labeled Atchison Topeka & Santa Fe R.R. Main Line and San Pedro Los Angeles & Salt Lake City R.R. Main Line, beyond which is vacant land andthe Arroyo Seco. The adjoining properties south and east are depicted as developed with primarily residential structures, with the exception of a store located just south of the subject property at the corner of West Avenue 34 and Pasadena Avenue and addressed 3019 and 3021 Pasadena Avenue.

Subject Property addresses include the following: On West Avenue 34: 119, 139, 141, 143, 145, 147, 149, 153, and 157 On Pasadena Avenue: 3401 (3403), 3407, 3411, 3417, 3419, 3423, 3425, 3429, 3431, 3437, 3439, and 3441		
Date	**Description**	
1920	**Subject Property**	The subject property is depicted with primarily residential properties along the eastern and southern boundaries of the property, as described in 1912. The structures appear residential with the exception of a bakery located at 3419 Pasadena Avenue. Many of the residences have auto garages. The formerly vacant areas from 1912 are developed in 1920 with structures associated with Los Angeles Rock & Gravel Co at the address 3441 Pasadena Avenue, which extends north beyond the subject property boundaries to West Avenue 35. The structures include: an outhouse; an office addressed 3439 Pasadena Avenue; an auto garage with truck and loading ramp labeled "Tunnel Under Rock Pile; a large auto garage with an oil and grease house, tool shed, and a small unlabeled structure near the center of the subject property. There is an alley traversing the property between the industrial operations at the Los Angeles Rock & Gravel occupied area from the residential properties along Pasadena Avenue. The alley connects West Avenue 45 to West Avenue 34, and extends beyond the subject property between West Avenue 34 and West Avenue 33.
	Adjoining Properties	The north adjoining property is occupied by Los Angeles Rock & Gravel Co structures at the address 3441 Pasadena Avenue, which extend south into the subject property. The structures in the north adjoining property include a mixing house with rock storage; a rock crusher; an electrical utility shed; a chute for loading trucks; a well pumphouse; and additional rock crusher and chute with an electric utility shed. There are residential structures on the remaining adjoining parcels to the north along Pasadena Avenue and West Avenue 35. There are no significant changes to the south, east, and west adjoining property in 1920.

Subject Property addresses include the following: On West Avenue 34: 119, 123, 129, 133, 139, 141, 145, 149, 153, 155, and 169 On Pasadena Avenue: 3401, 3407, 3415, 3417, 3419, 3421, 3423, 3425, 3429, 3431, 3437		
Date	**Description**	
1951	**Subject Property**	The subject property is depicted with primarily residential properties along the eastern and southern boundaries of the property, as described in 1912 and 1920, with the following exceptions: there is a metal working & spinning shop at 153 West Avenue 34 (the present-day structure); the southwest corner of the subject property has been redeveloped from residential plots to an expansion of the bakery, which is comprised of 101 and 111 West Avenue 34, as well as 3401 (present-day structure), 3407, 3415, 3417, and 3419 Pasadena Avenue; and there is an office at the 3421 Pasadena Avenue address. The north, west, and central areas of the property which were occupied by Los Angeles Rock & Gravel Co. in 1920 are redeveloped with six structures different from those previously described, and are occupied by Steel Framing & Building Corporation in 1951 at the address 169 West Avenue 34. The structures include: four office buildings; a shop and warehouse; a steel storage yard; and a large workshop. In addition, a portion of one of the buildings associated with Welch's Overall & Uniform Cleaning extends into the subject property boundaries. The
	Adjoining Properties	The north adjoining property is redeveloped from the previous 1920 Sanborn Map and is occupied by Welch's Overall & Uniform Cleaning in 1951. The west adjoining property is developed with four structures labeled Alliance Lumber & Investment Co. The south and east adjoining properties are generally unchanged from 1920, with the exception of the development of Hillside School to the east of the subject property.

Subject Property addresses include the following: On West Avenue 34: 141, 153, 155, and 169 On Pasadena Avenue: 3401, 3415, 3417, 3419, 3433, 3437		
Date	**Description**	
1970	**Subject Property**	The subject property is redeveloped in 1970, with only one remaining residential structure at 155 West Avenue 34. The present-day structure at 153 West Avenue 34 is labeled General Manufacturing. There is a parking lot at 141 West Avenue 34. The present-day structure at 3401 Pasadena Avenue is labeled Sheet metal shop and woodworking (iron). The addresses 3415, 3417, and 3419 Pasadena Avenue are occupied by a structure comprised of a workshop, storage area, and machine shop. The present-day structure at 3433 Pasadena Avenue is depicted and labeled Metal Stamping. The 3437 Pasadena Avenue address is occupied by a parking lot. The six structures within the north, west, and central areas of the property addressed 169 West Avenue 34 are generally unchanged from 1951, but occupied by ITT Cannon Electronics Inc. in 1970, and the buildings are used for offices, electronics manufacturing, and manufacturing assembly plating & shipping. There remaining areas of the property are occupied by parking lots accessible by West Avenue 34 to the south, and the previously described alley traversing the property from north to south.
	Adjoining Properties	The north adjoining property is occupied by Welch's Overall & Uniform Cleaning in 1970, and has expanded to include the previously residential structures to the east along Pasadena Avenue. The west adjoining property is generally vacant in 1970, with two small structures labeled storage and vac. The south adjoining properties are partially redeveloped to accommodate a parking lot addressed 152 West Avenue 34. The other properties south of the subject property appear generally unchanged from 1951. The east adjoining properties are generally unchanged from 1951, with the exception of the expansion of Hillside School to the east of the subject property, which includes additional areas for classroom space south and west of the original building in 1970.

The north adjoining property addressed 3505 Pasadena Avenue was listed under Welch's Industrial Uniforms, a laundering business, for the years 1924 through 2010, and is further discussed in Section 6.0 of this report.

No other environmental concerns were noted on the subject property or surrounding sites.

4.3 Property Tax File

Based on a review of the Los Angeles County Tax Assessor's parcel information system, the subject property APNs and legal descriptions are summarized as follows:

Address	APN	No. of Buildings	Legal Description
135 and 141 West Avenue 34	5205-004-011	1	LOT COM AT MOST N COR OF LOT 2 TR NO 23801 TH SE ON NE LINE OF SD LOT 326.55 FT TH S 14¢21'15" W 140.01 FT TH S 9¢ 45'05" W 48.51 FT TH S AND FOLLOWING BDRY LINE OF SD LOT TO W LINE OF LOT 61 WHITTAKER RICHARDSON AND ERNEST SUB OF LOTS 2 AND 3 GRIFFIN TR TH S ON SD W LINE TO NE LINE OF AVE 34 TH NW THEREON TO SE LINE OF L A AND S L R R R/W TH NE THEREON TO BEG LOT 62 AND POR OF LOTS 64 AND 65 WHITTAKER RICHARD- SON AND ERNEST SUB OF LOTS 2 AND 3 GRIFFIN TR AND *POR OF LOT 2 TR NO 23801

The property is classified as *industrial* in nature.

4.4 Recorded Land Title Records

Title records were not provided to FR for review.

4.5 USGS 7.5 Minute Topographic Maps

FR reviewed historical USGS 7.5 Minute Topographic Maps supplied by EDR. A summary of historical USGS 7.5 Minute Topographic Maps researched is listed below.

Property Topographic Quadrangle: Los Angeles, California

Dates	Description
1894, 1896, 1900	The subject property is depicted as partially developed with small residential structures along the eastern and southern portions of the property. The central, north, and west areas of the subject property are undeveloped, and there is a small depression near the northeast boundary of the subject property. The present-day railroad corridor is depicted along the western boundary of the subject property, and is within the Arroyo Seco according to the map. Pasadena Avenue and West Avenue 34 are present, and the adjoining properties to the south and east are developed. Areas north of the subject property are undeveloped and labeled Arroyo Seco. The region is identified as East Los Angeles.
1926, 1928	There are new industrial structures depicted on the subject property, and a small closed depression is also depicted near the northeast boundary of the subject property, likely related to the sand and gravel company operations identified in the 1920 Sanborn Map. The east and south portions of the subject property appear developed with a mixture of residential and industrial/commercial structures. Beyond the subject property are new industrial structures to the north, and additional residential developments to the south, and the surrounding area appears further developed in 1926.
1953,1966, 1972, 1981, 1994, 2012	The subject property and adjoining properties are within red shaded areas indicating urban developed areas of Los Angeles. The Arroyo Seco is depicted as an engineered canal, and Pasadena Freeway (Route 66) is present further to the north/west of the subject property.

No environmental concerns were noted on the subject property or surrounding sites.

4.6 Historical City Directory Listings

FR reviewed historical city directory listings provided by EDR for the years 1920 to 2014 for the subject property.

Date Range	**Description**
1990	COVA IGNACIO AUTO REPRNG
2000	XXXX

The north adjoining property addressed 3505 Pasadena Avenue was listed under Welch's Industrial Uniforms, a laundering business, for the years 1924 through 2010, and is further discussed in Section 6.0 of this report.

No other environmental concerns were noted on the subject property or adjoining properties.

4.7 Building Department Records

FR visited the City of Los Angeles Building and Safety Department on June 27, 2019 and researched historical building records for the subject property. A summary of historical building department records is provided in the table below.

Subject Property Building Records, Pasadena Avenue Addresses		
Years	**Address**	**Description**
1905	3433 Pasadena Avenue APN 5205-004-007	Building Permit
1906	135 and 141 West Avenue 34 APN 5205-004-011	Building Permit – Bldg New (4)
1906	3433 Pasadena Avenue APN 5205-004-007	Building Permit – Bldg New
1910	3411 Pasadena Avenue	Application for Erection of Frame Building
1911	3433 Pasadena Avenue APN 5205-004-007	Building Permit – Bldg – Alter / Repair
1912	3433 Pasadena Avenue APN 5205-004-007	Building Permit – Bldg – Alter / Repair
1914	135 and 141 West Avenue 34 APN 5205-004-011	Building Permit – Bldg – Alter / Repair

Subject Property Building Records, Pasadena Avenue Addresses		
Years	**Address**	**Description**
1916	135 and 141 West Avenue 34 APN 5205-004-011	Building Permit – Bldg – Alter / Repair
1916	135 and 141 West Avenue 34 APN 5205-004-011	Building Permit – Bldg New
1925	135 and 141 West Avenue 34 APN 5205-004-011	Building Permit – Bldg New
1928	135 and 141 West Avenue 34 APN 5205-004-011	Building Permit
1929	135 and 141 West Avenue 34 APN 5205-004-011	Building Permit
1931	3419 Pasadena Avenue	Disclosure of Ownership of property since 1919 by Sophia Cubbison
1937	3433 Pasadena Avenue APN 5205-004-007	Building Permit – Bldg New
1951	3433 Pasadena Avenue APN 5205-004-007	Building Permit – Bldg – Alter / Repair
1953	135 and 141 West Avenue 34 APN 5205-004-011	Building Permit – Bldg – Alter / Repair
1953	135 and 141 West Avenue 34 APN 5205-004-011	Building Permit – Bldg New
1955	3411 Pasadena Avenue	Certificate of Occupancy, Cubbisons Bakery
1955	135 and 141 West Avenue 34 APN 5205-004-011	Building Permit – Bldg – Alter / Repair (2)
1956	3433 Pasadena Avenue APN 5205-004-007	Building Permit – Bldg – Alter / Repair
1956	135 and 141 West Avenue 34 APN 5205-004-011	Building Permit – Bldg – Alter / Repair (5)
1956	135 and 141 West Avenue 34 APN 5205-004-011	Building Permit – Bldg New
1957	135 and 141 West Avenue 34 APN 5205-004-011	Building Permit – Bldg – Alter / Repair
1961	135 and 141 West Avenue 34 APN 5205-004-011	Building Permit – Bldg – Alter / Repair
1967	3433 Pasadena Avenue APN 5205-004-007	Building Permit - Grading
1967	3433 Pasadena Avenue APN 5205-004-007	Building Permit – Grading – Bldg Addition
1967	3433 Pasadena Avenue APN 5205-004-007	Building Permit – New Construction
1967	3419 Pasadena Avenue	Termination of Covenant and Agreement because building code no longer requires an Exit Court Agreement
1967	3419 Pasadena Avenue	Termination of Covenant and Agreement because the property has been rezoned from C-3 to M-1 and loading space is not required

Subject Property Building Records, Pasadena Avenue Addresses		
Years	**Address**	**Description**
1967	3433 Pasadena Avenue APN 5205-004-007	Grading – Department Letter
1967	3433 Pasadena Avenue APN 5205-004-007	Grading – Compaction File (4)
1968	3433 Pasadena Avenue APN 5205-004-007	Certificate of Occupancy
1974	3433 Pasadena Avenue APN 5205-004-007	Building Permit – Bldg Addition
1974	3433 Pasadena Avenue APN 5205-004-007	Commission – BAAB Board File
1974	135 and 141 West Avenue 34 APN 5205-004-011	Affidavit – Oversized Building (3)
1974	135 and 141 West Avenue 34 APN 5205-004-011	Building Permit – Bldg Demolition (6)
1977	135 and 141 West Avenue 34 APN 5205-004-011	Building Permit – Grading (2)
1977	135 and 141 West Avenue 34 APN 5205-004-011	Building Permit – Bldg Demolition
1977	135 and 141 West Avenue 34 APN 5205-004-011	Building Permit – New Construction (2)
1977	135 and 141 West Avenue 34 APN 5205-004-011	Affidavit – Oversized Building (2)
1977	135 and 141 West Avenue 34 APN 5205-004-011	Plan Maintenance
1978	135 and 141 West Avenue 34 APN 5205-004-011	Certificate of Occupancy (2)
1978	135 and 141 West Avenue 34 APN 5205-004-011	Certificate of Occupancy - Temp
1978	135 and 141 West Avenue 34 APN 5205-004-011	Affidavit – Oversized Building
1979	135 and 141 West Avenue 34 APN 5205-004-011	Grading – Grading Certificate
1997	135 and 141 West Avenue 34 APN 5205-004-011	Building Permit – Alteration
1997	135 and 141 West Avenue 34 APN 5205-004-011	Building Permit – Bldg – Alter / Repair
2002	3433 Pasadena Avenue APN 5205-004-007	Range File – Miscellaneous
2003	3433 Pasadena Avenue APN 5205-004-007	Range File – Miscellaneous
2012	135 and 141 West Avenue 34 APN 5205-004-011	Building Permit – Bldg – Alter / Repair
2012	135 and 141 West Avenue 34 APN 5205-004-011	Mechanical Permit - HVAC

4.8 Zoning/Land Use Records

FR visited the City of Los Angeles Department of City Planning and researched additional zoning/land use records for the subject property addresses. Based on a review of the zoning map, the subject property is zoned for *commercial manufacturing* use.

4.9 Previous Reports

FR was provided with previous reports pertaining to the subject property (135, 141, and 153 West Avenue 34 and 3401 and 3433 Pasadena Avenue in Los Angeles, CA). The previous reports are summarized below:

Phase I Environmental Site Assessment – 135, 141 and 153 West Avenue 34 and 3401 and 3433 Pasadena Avenue, Los Angeles, California 90031, prepared by Orswell & Kasman, Inc, September 28, 2012.

A Phase I ESA was conducted at the subject property by Orswell & Kasman, Inc (OKI) at the request of Mr. Robert Gonzales in September 2012. The Phase I ESA consisted of public records and historical document review, regulatory agency research, site reconnaissance, and interviews. The report identified the following remarks:

1) *The subject property is occupied by multiple tenants. The 3433 Pasadena Avenue building is currently occupied by Warner Brothers Studios, a prop and set design business. The business stores and uses large quantities of water-based paint, and waste paint is generated by the*

business activities. The hazardous materials and hazardous wastes appear to be properly stored and managed and no significant spills or leaks were observed on the premises; and

2) *Eleven offsite locations have been identified as potential risks or threats to the subject property. According to the data, ten of the sites are not located in the near vicinity, and there is no indication that contaminants from these sites have migrated onto the subject property.*

   The former Welch's Uniform Facility site (#5 on map), 3505 Pasadena Avenue, is located on the adjacent property to the north, and the business is identified by State of California Environmental Protection Agency (CAL-EPA) Department of Toxic Substances Control (DTSC) as an active hazardous waste site. According to the DTSC CalSite database records, the site was previously occupied by Welch's Uniform and the property was used as a laundry and uniform rental facility over a 70 year period. Environmental studies indicate the soil and groundwater beneath the facility is contaminated with volatile organic compounds including trichloroethene (TCE). In addition, the former Welch's Uniform Rental site is identified by the State of California Regional Water Quality Control Board (RWQCB) as having two open RWQCB Cleanup Program sites. The first case was first opened in December 1987. According to the RWQCB records, the groundwater was contaminated with non-petroleum hydrocarbons, and the site is undergoing verification monitoring. The second case was opened in December 1998 and the site is undergoing an assessment.

   A review of the City of Los Angeles Fire Department (LAFD) records revealed Welch's Uniform applied for a permit to remove a 2,000-gallon underground diesel fuel tank in 1987. Soil sampling beneath the tank revealed significant Total Petroleum Hydrocarbon as gasoline (TPH-g) contamination (8,600 ppm). The groundwater beneath the site was determined to be about 35 feet below the ground surface, and the groundwater flows away from the subject property in a west-northwest direction. In February 1988, Welch's Uniform applied for a permit to abandon five underground ·storage tanks in-place, and in December 1988, Welch's Uniform applied for a permit to remove five additional underground storage tanks. In May 2004, Welch's Uniform applied for a permit to remove one additional 1,000-gallon underground storage tank. Soil sampling beneath the tank did not detect any contamination problems, and on October 26, 2004, the DPW/UGT issued a no further action letter for the closure of the 1,000-gallon underground tank. An inspection of the property revealed the site is currently a vacant lot, and remedial activities were being conducted on the site.

   Should it be determined the groundwater beneath the subject property has in fact been impacted by the Former Welch's Uniform Rental site, it is the policy of the State of California and the United States Environmental Protection Agency not to hold property owners responsible for costs to clean up contaminated groundwater beneath their property, unless the owners contributed to the problem. There is no indication from a review of the regulatory records and a site inspection that the subject property has had any problems concerning the storage, usage or disposal of hazardous materials, and it appears the former Welch's Uniform Rental site is in the process of addressing the contamination problem.

Our review of regulatory and historical records, a visual inspection of the site and surrounding area, and interviews with the property owner and the safety manager for Warner Brothers Studios has found no evidence of other recognized environmental conditions or historical recognized environmental conditions which are likely to impact the subject property. Although data failure occurred in the historical uses of the Property prior to 1906, it is unlikely the data failure will impact the ability to identify recognized environmental conditions. Based on the results of this assessment, no further environmental studies are recommended for the site.

Phase I Environmental Site Assessment – 135, 141 and 153 West Avenue 34 and 3401 and 3433 Pasadena Avenue, Los Angeles, California 90031, prepared by Orswell & Kasman, Inc, April 28, 2015.

A Phase I ESA Update Report was conducted at the subject property by OKI at the request of Mr. Andy Meyers in April 2015. The Phase I ESA consisted of S site reconnaissance, interviews, government records review, public records and historic document review, and summary of previous environmental report. The update report concludes that, *based on the results of this assessment, no further environmental studies are recommended for the site.*

4.10 Other Historical Records

No additional historical records were obtainable for the subject property.

4.11 Historical Summary

Based on a review of available historical records, the north, west, and central areas of the subject property were vacant, and the east and west areas were developed with private residential structures by as early as 1894. Most of these residential properties persisted until 1964 with few exceptions, including the subject property warehouse building addressed 153 West Avenue 34 (constructed in 1929) along the southern boundary of the site, and the subject property warehouse buildings addressed 3401 Pasadena Avenue (constructed in 1925) and 3433 Pasadena Avenue (constructed in 1967) along the eastern boundary of the site. A railroad corridor has been historically present along the western boundary since at least 1894, and is still currently in use. A bakery occupied the southeast corner of the property (original occupant of the 3401 Pasadena Avenue building) from 1919 until at least 1951, and was redeveloped as a machine and woodworking shop in 1970.

The historic industrial areas of the subject property have a more complicated history, and are discussed here as the “historic industrial areas”. These areas include the north, west, and central parts of the site. The historic industrial areas were vacant and undeveloped in 1894 until at least 1906. By 1920, these areas were developed and occupied by the Los Angeles Sand & Gravel Company, which occupied the property until at least 1928, and terminated by 1938, at which time the historic industrial areas of the subject property consisted of vacant land. By 1948, these areas were redeveloped with six industrial structures, occupied by Steel Framing & Building Corporation in 1951, and ITT Cannon Electronics Inc. from at 1964-1970. The historic industrial areas were demolished and consisted of vacant and graded land in the 1977 aerial photograph, and the subject property buildings addressed 135 and 141 West

Avenue 34 were constructed in 1977 according to building department files and tax assessor records, and was occupied by American Caster Corp from 1977 until the property was purchased by the current owner, Mr. Eric Ortiz, in 1999. Historic site operations by ITT Cannon Electronics are not considered an environmental concern due to the relatively short time-period of occupancy (6 years), and because the site was graded and reworked in association with the current on-site development, which would have dissipated potential concentrations of constituents of concern in soil potentially associated with the former site operations. The subject property has been primarily occupied by Ortiz Brothers Moving & Storage, with a variety of tenants between 1999 and present.

· 5.0 INTERVIEWS/USER INFORMATION ·

5.1 Interviews

Interviews were conducted and attempted with the following personnel listed below.

Personnel Interviewed	Brief Summary
User	Not interviewed
Property Owner	Mr. Eric Ortiz
Previous Owner	Not interviewed
Tenant/Occupant	Not interviewed
Manager	Not Interviewed
Buyer	Not interviewed
Adjoining Property Owner	Not interviewed
Broker	Not interviewed
Government Officials	Not interviewed

Mr. Eric Ortiz, the subject property owner, stated that he had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

5.2 User Information

5.2.1 Environmental liens and/or Activity and Use Limitations (AULs)

AULs include both legal (institutional) and physical (engineering) controls. Agencies, organizations, and jurisdictions may define or utilize these terms differently.

No AULs were identified during this investigation.

No environmental liens were identified during this investigation.

5.2.2 Specialized Knowledge

No knowledge of recognized environmental conditions or historical recognized environmental concerns was provided by the user.

5.2.3 Valuation Reduction for Environmental Issues

No information was provided by the user that indicated the subject property was being sold or valued lower due to outstanding environmental issues.

5.2.4 Commonly Known or *Reasonably Ascertainable* Information

The user has not provided or is unaware of any commonly known or reasonably ascertainable information for the subject property.

5.2.5 Other User Provided Information

No other user provided information was obtainable or provided.

· 6.0 GOVERNMENT DATABASE SECTION ·

6.1 Environmental Database Summary

As part of the Phase I Environmental Assessment, FR utilized Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut, as an information source for regulatory agency environmental database records. The environmental database report was dated June 24, 2019.

An attempt to locate listed Orphan Sites (facilities that could not be mapped or geocoded due to inadequate address information) within an area or radii of concern to the subject property was attempted by FR. These attempts consisted of a street review, a drive-by view of orphan site, and/or evaluating site type given information provided by government agencies.

A copy of the radius report is included in the appendices.

Proprietary Database Listings (Subject & Adjoining Properties)	
	Subject/Adjoining Properties
EDR Historical Auto Stations	Not listed
EDR Historical Cleaners	**1 Record**

The subject property addresses were identified in the EDR database report, summarized as follows:

- **135 West Avenue 34** (Map ID A5, 7, 10, 11, 13, 18, 19, 22, 23, 25, 27, 28, 31, 35) – this subject property address was identified in the HAZNET (12), RCRA NonGen/NLR, FINDS, and ECHO databases under the following operator names: Jardinero Productions, Birddog, Warner Bros., All About Steve Movie, Soul Productions LLC Ortiz Brothers Moving, Step Up 3D, Love & Basketball, Nurse Betty Productions, 20th Century Fox, and Olivers Arrow Movie.

  Ten of the HAZNET listings are associated with the disposal of wastes generated during film production, including very small quantities of various paints, latex gloves, fuel blends, and other organic solids (1999-2016); the remaining two HAZNET listings are associated with Ortiz Brothers Moving, including the disposal of waste oil and hydrocarbons (1997-1998).

The RCRA NonGen/NLR listing, FINDS, and ECHO listings refer to the All About Steve Movie Site (2007), a former generator of hazardous ignitable waste from photographic film. There are no reported spills, releases, or violations associated with the 135 West Avenue 34 address. Based on the available information, the listings do not represent a significant environmental concern.

- **141 West Avenue 34** (Map ID A2, 4, 6, 15, 24, 26, 29, 32, 36, 38) – this subject property address was identified in the HAZNET (8), RCRA-SQG, FINDS, ECHO, EMI, HAZMAT, and CERS databases. The listings are associate with the following operator names: Touchstone Pictures, American Caster Corp, Tomcats, Five Continent Imports LLC, Lie To Me, ABC Signatures Studio, Battle of the Sexes, and Dreamworks Productions.

  Seven of the HAZNET listings are associated with the disposal of wastes generated during film production, including very small quantities of various paints, latex gloves, fuel blends, and other organic solids (1997-2017); and the other HAZNET listing is associated with American Caster Corp for the disposal of other organic solids, hydrocarbons, oil-containing waste, and paint sludge (1987-1996).

  The RCRA-SQG refers to American Caster Corp operations on the property in 1987 (specific type of waste not specified). American Caster Corp was also identified under a historic address, 157 West Avenue 34, in the HAZMAT database.

  The ECHO, EMI, and CERS listings refer to regulated air emissions at American Caster Corp, and indicate that the property was classified as a hazardous air pollutant (major). The listed site operations include hardware manufacturing, other metal valve and pipe fitting manufacturing, and ball and roller bearing manufacturing. There are no reported spills, releases, or violations associated with the 141 West Avenue 34 address. Based on the available information, the listings do not represent a significant environmental concern.

- **153 West Avenue 34** (Map ID A1) – this subject property address was identified under the operator name William Pile Enterprises and was identified in the HAZMAT database with a listing dated January 2019. The HAZMAT database is a list of facility and manifest data compiled by DTSC. No further information was provided by the listing. There are no reported spills or violations associated with the 153 West Avenue 34 address. Based on the available information, the listings do not represent a significant environmental concern.

- **3401 Pasadena Avenue** (Map ID A3, 14, 21, 30) – this subject property address was identified in the HAZNET (3) and EMI databases under the operator names 20th Century Fox, E D 1125 Inc, Elastic Coatings Org, and Bob Baker Production.

  Two of the HAZNET listings are associated with the disposal of wastes generated during film production, including very small quantities of various paints, latex gloves, fuel blends, waste oil, and other organic solids (2006-2007); and the other HAZNET listing is related to Elastic Coatings Organization for the disposal of unspecified solvent mixtures, pesticides, and alkaline solution without metals pH > 12.5 (1993).

The EMI listing refers to air emissions (total organic hydrocarbons and reactive organic gases) associated with Bob Baker Productions, a film production company (1990). There are no reported spills, releases, or violations associated with the 3401 Pasadena Avenue address. Based on the available information, the listings do not represent a significant environmental concern.

- **3433 Pasadena Avenue** (Map ID A8, 9, 12, 16, 17, 20, 33, 34, 37) – this subject property address was identified in the HAZNET (8), FINDS, ECHO, and RCRA NonGen/NLR databases under the operator names Gone Girl, Moneyball, Informant Productions, End of Watch LLC, Warner Bros. Hangover 3, Hotel for Dogs, and Fox Gone Girl.

  All of the HAZNET listings are associated with the disposal of wastes generated during film production, including very small quantities of various paints, latex gloves, fuel blends, and other organic solids (2008-2014). The RCRA NonGen/NLR, FINDS, and ECHO listings refer to operations associated with filming the Warner Bros Hangover 3 movie (2010-2012), a former generator of the following hazardous waste: ignitable waste; methyl ethyl ketone; and non-halogenated solvents. There are no reported spills, releases, or violations associated with the 135 West Avenue 34 address. Based on the available information, the listings do not represent a significant environmental concern.

· SUMMARY OF LISTINGS ·

National Priorities List (NPL) Facilities

The NPL, also known as the Superfund List, is an EPA listing of the nation's worst uncontrolled or abandoned hazardous waste facilities. Designation as a Superfund Site is primarily based on a score that the facility receives from the EPA's Hazard Ranking System. These facilities are targeted for possible long-term remedial action. Such prioritized sites with significant risk to human health and the environment receive remedial funding under the Comprehensive Environmental Response Conservation and Liability Act (CERCLA). The NPL is compiled by EPA pursuant to CERCLA, 42 U.S.C.§9605(a)(8)(B). (*http://www.epa.gov/superfund/sites/npl/npl.htm*).

No NPL sites were identified within the specified radius from the subject property.

Federal Delisted NPL List

Federal Delisted NPL List consists of sites that no longer require further response actions as determined by the EPA.

No Federal Delisted NPL List sites were identified within the specified radius from the subject property.

SEMS (Superfund Enterprise Management System) List

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Two SEMS List sites were identified within the specified radius from the subject property.

- **3209 East Humboldt Street (**Map ID I74-78) – this property is located approximately 600 feet south of the subject property, and was identified under the operator ITT Cannon / Kennington. The site is listed in the following databases from the report: HAZMAT, UST, RCRA-SQG, FINDS, SEMS, ENVIROSTOR, VCP, SWEEPS UST, CA FID UST, DEED, HIST CORTESE, CPS-SLIC, LA Co. Mitigation, and CERS.

  The SEMS, ENVIROSTOR, VCP, HIST CORTESE, FINDS, CPS-SLIC, and LA Co. Mitigation listings indicate that the property is a Superfund site with environmental investigations dating back to 1990, due to battery and electronics manufacturing on the property, including lead, PCBs, tetrachloroethene (PCE), and trichloroethene (TCE). The site was enrolled in the Voluntary Cleanup Program (VCP) in 1993, and remedial activities to date have included the excavation of soil approximately 46 feet below ground surface with off-site disposal of 18,000 cubic yards of contaminated soil. The site is still being actively monitored by the DTSC Site Cleanup Program. The DEED listing refers to land-use restrictions imposed on the site as part of the VCP agreement.

  The RCRA-SQG and HAZMAT listings indicate the property is a small quantity generator of hazardous waste, including polychlorinated biphenyls (PCBs) and lead (1998-2006). Based on separation distance and regulatory oversight of cleanup activities with active groundwater monitoring, this site does not represent a significant environmental concern to the subject property.

- **301 West Avenue 26** (Map ID S127-128) – this property is located approximately 1,700 feet southwest of the subject property and was identified under the operator names Jaybee and Ajax Manufacturing. The site is listed in the ENVIROSTOR, VCP, EMI, and SEMS databases. The listings indicate the property was discovered as contaminated in 1994, with a discovery date of 2000. The site was listed as a Superfund site in 2002. The contaminants of concern include lead, PAHs, PCE, diesel fuel, TCE, and other volatile organic compounds associated with former manufacturing operations at the site, and the site is currently active in the VCP. Based on separation distance and regulatory oversight of cleanup activities with active groundwater monitoring, this site does not represent a significant environmental concern to the subject property.

SEMS-ARCHIVE List

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Two SEMS-ARCHIVE List sites were identified within the specified radius from the subject property.

- **3011 Humboldt Street** (Map ID N119) – this site was identified under the operator name NI West Incorporated and is located approximately 1,125 feet south of the subject property. The site is listed in the SEMS-ARCHIVE database. The listing indicates that the site was discovered in 1993 and investigated in 2003. The site was determined to not be included in the NPL with an archived date of 2005. Based on separation distance and the available information, this site does not represent a significant environmental concern to the subject property.

- **241 Avenue 26** (Map ID 136, 145) – this site was identified under the operator name Baron Manufacturing and is located approximately 1,800 feet southwest of the subject property. The site is listed in the ENVIROSTOR and SEMS ARCHIVE databases. The listings indicate the site was discovered in 1983 and investigated in 1984 and 1994 due to steel and sheet metal fabrication. The contaminants of concern include unspecified solvent mixtures. No further information was provided by the listings. Based on separation distance and regulatory oversight of cleanup activities with active groundwater monitoring, this site does not represent a significant environmental concern to the subject property. Based on separation distance and regulatory oversight, this site not represent a significant environmental concern to the subject property.

RCRA CORRACTS List

RCRA CORRACTS List is an EPA-maintained database of Resource Conservation and Recovery Act (RCRA) facilities undergoing "corrective action". A "corrective action order" is issued when there has been a release of hazardous waste or constituents into the environment from a RCRA facility. Corrective actions may be required beyond the facility's boundary and can be required regardless of when the release occurred, even if it predates RCRA.

No RCRA CORRACTS List sites were identified within the specified radius from the subject property. .

RCRA TSDF List

RCRA TSDF List are sites that generate, transport, store, treat, and/or dispose of hazardous waste and are required to register their hazardous waste activity under the Resource Conservation and Recovery Act (RCRA). The list includes small- and large-quantity operators and handler violations.

No RCRA TSDF List sites were identified within the specified radius from the subject property.

RCRA Generators List (Small Quantity and Large Quantity)

RCRA hazardous waste generators are identified as Large Quantity Generators (LQGs), Small Quantity Generators (SQGs), or Conditionally Exempt Small Quantity Generators (CESQGs). RCRA LQGs are identified as those facilities, which generate at least 1,000 kilograms (2,200 pounds) of non-acutely hazardous waste (or 1 kilogram of acutely hazardous waste) in any calendar month. RCRA SQGs are identified as those facilities that generate less than 1,000 kilograms of non-acutely hazardous waste in any calendar month.

The subject property address, 141 West Avenue 34, was identified on the RCRA Generator database

- **141 West Avenue 34** (Map ID A2, 4, 6, 15, 24, 26, 29, 32, 36, 38) – this subject property address was identified in the HAZNET (8), RCRA-SQG, FINDS, ECHO, EMI, HAZMAT, and CERS databases. The listings are associate with the following operator names: Touchstone Pictures, American Caster Corp, Tomcats, Five Continent Imports LLC, Lie To Me, ABC Signatures Studio, Battle of the Sexes, and Dreamworks Productions.

  Seven of the HAZNET listings are associated with the disposal of wastes generated during film production, including very small quantities of various paints, latex gloves, fuel blends, and other organic solids (1997-2017); and the other HAZNET listing is associated with American Caster Corp for the disposal of other organic solids, hydrocarbons, oil-containing waste, and paint sludge (1987-1996).

  The RCRA-SQG refers to American Caster Corp operations on the property in 1987 (specific type of waste not specified). American Caster Corp was also identified under a historic address, 157 West Avenue 34, in the HAZMAT database.

  The ECHO, EMI, and CERS listings refer to regulated air emissions at American Caster Corp, and indicate that the property was classified as a hazardous air pollutant (major). The listed site operations include hardware manufacturing, other metal valve and pipe fitting manufacturing, and ball and roller bearing manufacturing. There are no reported spills, releases, or violations associated with the 141 West Avenue 34 address. Based on the available information, the listings do not represent a significant environmental concern to the subject property.

Two of the neighboring or adjoining properties were identified on the RCRA Generator database.

- **3505 Pasadena Avenue** (Map ID B41-47) – this site was identified under the operator name Former Welch's Uniform Services and is located adjacent to and north of the subject property. The site is listed in the following databases from the report: UST (2), RCRA-LQG, ENVIROSTOR, LUST, CPS-SLIC (2), VCP, SWEEPS UST, HIST UST, CA FID UST, FINDS, ECHO, EMI, HIST CORTESE, CERS, DRYCLEANERS, HAZMAT, and EDR Hist Cleaner.

  The ENVIROSTOR, VCP, and CPS-SLIC (2) listings indicate the site was enrolled in the VCP in 2007 after being transferred to DTSC in 2006. Groundwater beneath the property is being actively monitored, and, according to a 2016 groundwater monitoring report, groundwater concentrations of the contaminants of concern are highest near the center of the site, and the plume appears to be migrating west and then south along the railroad corridor ROW along the western boundary of the subject property. The site is being actively remediated via soil vapor extraction and under the supervision of DTSC. The most recent (2016) groundwater monitoring report indicates that groundwater concentrations have approached cleanup levels at the subject property boundary. It is expected that the concentrations have continued to decline in the last 3 years since the most recent report as remedial activities continue.

  The UST (2), HIST UST, CA FID UST, SWEEPS UST, CERS, and LUST listings indicate that there were former historic USTs containing diesel fuel, gasoline, waste oil, and "product unknown on the site, but none are currently active. The LUST listing refers to a release reported in 1987 (product not specified). The EMI listing refers to South coast Air Quality Management District (SCAQMD) air emissions regulation at the property, including total organic hydrocarbon gases and reactive organic gases. The RCRA-LQG, HAZMAT, and EDR Hist Cleaners listings indicate that the facility was a drycleaner and a historical large-quantity generator of hazardous waste, specifically chlorinate solvents (1924-1987).

  Based on regulatory oversight and on-going SVE remediation with semi-annual groundwater monitoring, and the most recent (2016) analytical data available, this site does not represent a significant environmental concern to the subject property.

- **120 East Avenue 35** (Map ID F65-66) – this site was identified under the operator name Hillside Elementary and is located adjacent to and east of the subject property. The site is listed in the HAZMAT, RCRA-SQG, FINDS, and ECHO databases. The listings indicate that the property is a small-quantity generator of hazardous waste. There are no reported spills, releases, or violations associated with the property. No further information is provided by the listings. Based on the available information, this site does not represent a significant concern to the subject property.

US Engineering Controls

This is a listing of sites with engineering controls in place to control on-site contamination. Engineering controls may include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

The subject property was not identified on the US Engineering Control sites database.

US Institutional Controls

This is a listing of sites with institutional controls in place to control on-site contamination. Institutional controls may include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

The subject property was not identified on the US Institutional Control sites database.

Emergency Response Notification System (ERNS)

ERNS is a national database used to collect information on reported releases of petroleum products or hazardous substances. The database contains information from spill reports made to federal authorities including the EPA, the U.S. Coast Guard, the National Response Center and the U.S. Department of Transportation. The program is a cooperative effort of the EPA, the Department of Transportation Research and Special Program Administration's National Transportation System Center, and the National Response Center. There are five primary Federal statutes that require release reporting: CERCLA Section 103; the Superfund Amendments and Reauthorization Act (SARA) Title III Section 304; the Clean Water Act of 1972 (CWA) Section 311(b) (3); and the Hazardous Material Transportation Act of 1974 (HMTA) Section 1808 (b).

The subject property was not identified on the ERNS database.

State/Tribal NPL (Response)

Response sites identify confirmed release sites where the California Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

No State/Tribal NPL sites were identified within the specified radius from the subject property.

State/Tribal CERCLIS (Envirostor and Historical Cal-Sites)

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) Envirostor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response (RESPONSE), including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. Envirostor provides similar information to the information that was available in Cal-Sites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land

uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Ten-Nine State/Tribal CERCLIS sites were identified within the specified radius from the subject property. Due to the volume of sites, only the three sites within 1,000 feet of the subject property are further discussed.

- **3505 Pasadena Avenue** (Map ID B41-47) – this site was identified under the operator name Former Welch's Uniform Services and is located adjacent to and north of the subject property. The site is listed in the following databases from the report: UST (2), RCRA-LQG, ENVIROSTOR, LUST, CPS-SLIC (2), VCP, SWEEPS UST, HIST UST, CA FID UST, FINDS, ECHO, EMI, HIST CORTESE, CERS, DRYCLEANERS, HAZMAT, and EDR Hist Cleaner. The site was previously described in the RCRA generators sub-section above. Based on regulatory oversight and on-going SVE remediation with semi-annual groundwater monitoring, and the most recent (2016) analytical data available, this site does not represent a significant concern to the subject property.

- **3408 Arroyo Seco Avenue** (Map ID K83-86) – this site was identified under the operator name Los Angeles USD Loreto Elem School and is located approximately 415 feet northwest of the subject property. The site is listed in the RCRA-SQG, FINDS, ECHO, ENVIROSTOR, SCH, UST, and HAZMAT databases. The listings indicate the facility was a small-quantity generator of hazardous waste. The ENVIROSTOR listing refers to an investigation conducted in 2006 and the status is listed as closed and withdrawn with no contaminants found. There are no reported spills, releases, or violations associated with the property. No further information is provided by the listings. Based on the available information, this site does not represent a significant concern to the subject property.

- **3209 East Humboldt Street (**Map ID I74-78) – this property is located approximately 600 feet south of the subject property, and was identified under the operator ITT Cannon / Kennington. The site is listed in the following databases from the report: HAZMAT, UST, RCRA-SQG, FINDS, SEMS, ENVIROSTOR, VCP, SWEEPS UST, CA FID UST, DEED, HIST CORTESE, CPS-SLIC, LA Co. Mitigation, and CERS. The site was previously discussed in the SEMS database review section. Based on separation distance and regulatory oversight of cleanup activities with active groundwater monitoring, this site does not represent a significant environmental concern to the subject property.

Based on the relative distance from the subject property, down-gradient to cross-gradient hydraulic position, continued regulatory oversight, soil-only media impacted, lack of reported violations or releases, and/or current case-closed/NFA status, none of the listed sites are anticipated to represent a significant environmental concern to the subject property.

State/Tribal SWF/LF

State/Tribal Solid Waste Landfills (SWLF) typically contains an inventory of solid waste disposal facilities or landfills in a particular State. Depending on the State, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

One State/Tribal SWF/LF site with two listings was identified within the specified radius from the subject property.

- **400 West Avenue 26** (Map ID T129, 130, 133) – this site was identified under the operator name Lacy's Street Dump and is located approximately 1,700 feet southwest of the subject property. The site is listed in the WMUDS/SWAT, LDS, CERS (2), and SWF/LF (2) databases. The listings indicate that the property operated as a landfill in 1975 and is listed as currently closed. The site achieved regulatory closure status with DTSC in 2016. Based on separation distance and regulatory closure status, this site does not represent a significant environmental concern to the subject property.

State/Tribal LUST and CPS-SLIC

LUST Sites

Leaking Underground Storage Tanks (LUST) sites are a database of sites with confirmed or unconfirmed leaking underground storage tanks.

Seven LUST sites comprised of thirteen listings were identified within the specified radius from the subject property. Due to the volume of listings, only the four sites within 1,000 feet of the subject property are further discussed.

3505 Pasadena Avenue (Map ID B41-47) – this site was identified under the operator name Former Welch's Uniform Services and is located adjacent to and north of the subject property. The site is listed in the following databases from the report: UST (2), RCRA-LQG, ENVIROSTOR, LUST, CPS-SLIC (2), VCP, SWEEPS UST, HIST UST, CA FID UST, FINDS, ECHO, EMI, HIST CORTESE, CERS, DRYCLEANERS, HAZMAT, and EDR Hist Cleaner. The site was previously described in the RCRA generators sub-section above. Based on regulatory oversight and on-going SVE remediation with semi-annual groundwater monitoring, and the most recent (2016) analytical data available, this site does not represent a significant environmental concern to the subject property.

- **3225 Lacy Street** (Map ID H67-73) – this site was identified under the operator names Heath & Co, and Maintenance and Operations New Maintenance Company for the Los Angeles Unified School District. The site is located approximately 350 feet southwest of the subject property, and is listed in the following databases from the report: HIST UST, UST, SWEEPS UST, CA FID UST, RCRA-LQG, HAZMAT, LUST, FINDS, ECHO, HIST CORTESE, and CERS.

The UST, SWEEPS UST, CA FID UST, and LUST listings refer to a 7,500-gallon diesel fuel UST installed in 1964, and a 12,000-gallon gasoline UST installed in 1973. The tanks are listed as active in a 1993 SWEEPS UST listing. The LUST listing refers to a gasoline release reported in July 1995 during tank removal. The site achieved regulatory closure status in November 1995.

The RCRA-LQG, HAZMAT, FINDS, ECHO, HIST CORTESE, and CERS listings indicate the facility is a large-quantity generator of the following hazardous wastes: ignitable waste, corrosive waste, lead, and mercury. There are no reported violations associated with the property. Based on separation distance and site closure status, this site does not represent a significant environmental concern to the subject property.

- **3580 Pasadena Avenue** (Map ID J94-97) – this site was identified under the operator name Flavor Food Inc. and is located approximately 700 feet northeast of the subject property. The site is listed in the following databases from the report: SWEEPS UST, CA FID UST, LUST, HIST UST, HIST CORTESE, CERS, and UST.

  The UST listings refer to three 9,000-gallon gasoline USTs installed in and removed in 1986. The LUST listing refers to a gasoline release reported in October1986 during tank removal with regulatory closure status in November 1986. There are no reported violations associated with the property. Based on separation distance and site closure status, this site does not represent a significant environmental concern to the subject property.

- **3101 Artesian Street** (Map ID N98-104) – this site was identified under the operator names Lincoln Heights District and P D D Construction MTNC. The site is located approximately 730 feet southwest of the subject property, and is listed in the following databases from the report: SWEEPS UST, CA FID UST, UST (2), LUST (2), RCRA-SQG, FINDS, ECHO, HAZMAT, CERS HAZ WASTE, HIST UST (2), CERS TANKS, HIST CORTESE, and CERS.

  The UST listings refer to four active 5,000-gallon diesel fuel USTs on the property. The LUST listings refer to petroleum releases reported in 1991 with regulatory closure status in 1997.

  The CERS HAZWASTE and ECHO listings refer to the following violations: violations reported in 2016 due to failure to comply with one or more of the following, failure to property label hazardous waste accumulation containers, and a violation for failure to maintain uniform hazardous waste manifests for three years; : failure to install a spill bucket, have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and/or be resistant to galvanic corrosion; violations reported in 2018 due to failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit, and a violation for failure to submit or maintain a current facility plot plan; a violation reported in 2017 due to the failure to maintain records of repairs, lining, and upgrades on site; and a violation in 2013 for failure to obtain and/or maintain an active hazardous waste generator permit. Refer to the database report for more information.

The RCRA-SQG, FINDS, HAZMAT, and CERS listings indicate the facility is a small-quantity generator of hazardous waste (1996). Based on separation distance from the subject property, this site does not represent a significant environmental concern to the subject property.

Based on the relative distance from the subject property, down-gradient to cross-gradient hydraulic position, continued regulatory oversight, soil-only media impacted, lack of reported violations or releases, and/or current case-closed/NFA status, none of the listed sites are anticipated to represent a significant environmental concern to the subject property.

CPS-SLIC Sites

Three CPS-SLIC sites comprised of four listings were identified within the specified radius from the subject property.

- **3505 Pasadena Avenue** (Map ID B41-47) – this site was identified under the operator name Former Welch's Uniform Services and is located adjacent to and north of the subject property. The site is listed in the following databases from the report: UST (2), RCRA-LQG, ENVIROSTOR, LUST, CPS-SLIC (2), VCP, SWEEPS UST, HIST UST, CA FID UST, FINDS, ECHO, EMI, HIST CORTESE, CERS, DRYCLEANERS, HAZMAT, and EDR Hist Cleaner. The site was previously described in the RCRA generators sub-section above. Based on regulatory oversight and on-going SVE remediation with semi-annual groundwater monitoring, and the most recent (2016) analytical data available, this site not represent a significant environmental concern to the subject property.

- **3209 East Humboldt Street (**Map ID I74-78) – this property is located approximately 600 feet south of the subject property, and was identified under the operator ITT Cannon / Kennington. The site is listed in the following databases from the report: HAZMAT, UST, RCRA-SQG, FINDS, SEMS, ENVIROSTOR, VCP, SWEEPS UST, CA FID UST, DEED, HIST CORTESE, CPS-SLIC, LA Co. Mitigation, and CERS. The site was previously discussed in the SEMS database review section. Based on separation distance and regulatory oversight of cleanup activities with active groundwater monitoring, this site does not represent a significant environmental concern to the subject property.

- **306-360 Avenue 26** (Map ID W137) – this property is located approximately 1,775 feet southwest of the subject property and was identified under the operator name The E B Malone Corp. The site is listed in the CPS-SLIC and CERS databases. There is also an orphan listing for the site in the CPS-SLIC database. The listings indicate that the site was enrolled in the DTSC Cleanup Program and was investigated for VOCs and chromium, and has achieved regulatory closure status as of April 2006. Based on the available information and separation distance, this site does not represent a significant environmental concern to the subject property.

Based on the relative distance from the subject property, down-gradient to cross-gradient hydraulic position, continued regulatory oversight, soil-only media impacted, lack of reported violations or

releases, and/or current case-closed/NFA status, none of the listed sites are anticipated to represent a significant environmental concern to the subject property.

State/Tribal UST (also AST, HIST UST, SWEEPS UST, and CA FID UST list)

State/Tribal Underground Storage Tanks (UST): This is a list of state registered underground storage tanks for the site area. Sites appearing on the UST list have not necessarily released hazardous substances into the environment nor do they necessarily pose environmental threat to surrounding properties. Since Federal and State UST regulations require periodic monitoring for UST leakage and immediate reporting of evidence of UST leakage, only those sites appearing on the Leaking Underground Storage Tanks (LUST) list are considered to have significant potential of environmental impact for the purposes of this Phase I.

The subject property was not identified on the Registered UST/AST database.

One of the adjoining properties was identified on the Registered UST/AST database.

- **3505 Pasadena Avenue** (Map ID B41-47) – this site was identified under the operator name Former Welch's Uniform Services and is located adjacent to and north of the subject property. The site is listed in the following databases from the report: UST (2), RCRA-LQG, ENVIROSTOR, LUST, CPS-SLIC (2), VCP, SWEEPS UST, HIST UST, CA FID UST, FINDS, ECHO, EMI, HIST CORTESE, CERS, DRYCLEANERS, HAZMAT, and EDR Hist Cleaner. The site was previously described in the RCRA generators sub-section above. Based on regulatory oversight and on-going SVE remediation with semi-annual groundwater monitoring, and the most recent (2016) analytical data available, this site does not represent a significant concern to the subject property.

SWEEPS UST: Statewide Environmental Evaluation and Planning System: This is an inactive underground storage tank database. It identifies underground storage tanks and was maintained by a contractor for the State Water Resources Control Board in the early 1980s. The listing is no longer updated or maintained.

The subject property was not identified on the SWEEPS UST database.

One of the adjoining properties was identified on the SWEEPS UST database.

- **3505 Pasadena Avenue** (Map ID B41-47) – this site was identified under the operator name Former Welch's Uniform Services and is located adjacent to and north of the subject property. The site is listed in the following databases from the report: UST (2), RCRA-LQG, ENVIROSTOR, LUST, CPS-SLIC (2), VCP, SWEEPS UST, HIST UST, CA FID UST, FINDS, ECHO, EMI, HIST CORTESE, CERS, DRYCLEANERS, HAZMAT, and EDR Hist Cleaner. The site was previously described in the RCRA generators sub-section above. Based on regulatory oversight and on-going SVE remediation with semi-annual groundwater monitoring, and the most recent (2016) analytical data available, this site does not represent a significant environmental concern to the subject property.

HIST UST: Historical Underground Storage Tank Registered Database: This is a listing of underground storage tanks that have been registered but have been removed or are no longer in service. Data on the HIST UST list was supplied by the State Water Resources Control Board.

The subject property was not identified on the Historical UST database.

One of the adjoining properties was identified on the Historical UST database.

- **3505 Pasadena Avenue** (Map ID B41-47) – this site was identified under the operator name Former Welch's Uniform Services and is located adjacent to and north of the subject property. The site is listed in the following databases from the report: UST (2), RCRA-LQG, ENVIROSTOR, LUST, CPS-SLIC (2), VCP, SWEEPS UST, HIST UST, CA FID UST, FINDS, ECHO, EMI, HIST CORTESE, CERS, DRYCLEANERS, HAZMAT, and EDR Hist Cleaner. The site was previously described in the RCRA generators sub-section above. Based on regulatory oversight and on-going SVE remediation with semi-annual groundwater monitoring, and the most recent (2016) analytical data available, this site does not represent a significant environmental concern to the subject property.

CA Facility Inventory Database (CA FID): This is a list of active and inactive underground storage tank sites. The database is maintained by the California Water Resources Control Board.

The subject property was not identified on the CA FID UST database.

One of the adjoining properties was identified on the CA FID UST database.

- **3505 Pasadena Avenue** (Map ID B41-47) – this site was identified under the operator name Former Welch's Uniform Services and is located adjacent to and north of the subject property. The site is listed in the following databases from the report: UST (2), RCRA-LQG, ENVIROSTOR, LUST, CPS-SLIC (2), VCP, SWEEPS UST, HIST UST, CA FID UST, FINDS, ECHO, EMI, HIST CORTESE, CERS, DRYCLEANERS, HAZMAT, and EDR Hist Cleaner. The site was previously described in the RCRA generators sub-section above. Based on regulatory oversight and on-going SVE remediation with semi-annual groundwater monitoring, and the most recent (2016) analytical data available, this site does not represent a significant environmental concern to the subject property.

State/Tribal VCP

The State Voluntary Cleanup Program list addresses the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

Three State/Tribal VCP sites were identified within the specified radius from the subject property.

- **3505 Pasadena Avenue** (Map ID B41-47) – this site was identified under the operator name Former Welch's Uniform Services and is located adjacent to and north of the subject property. The site is listed in the following databases from the report: UST (2), RCRA-LQG, ENVIROSTOR, LUST, CPS-SLIC (2), VCP, SWEEPS UST, HIST UST, CA FID UST, FINDS, ECHO, EMI, HIST CORTESE, CERS, DRYCLEANERS, HAZMAT, and EDR Hist Cleaner. The site was previously described in the RCRA generators sub-section above. Based on regulatory oversight and on-going SVE remediation with semi-annual groundwater monitoring, and the most recent (2016) analytical data available, this site does not represent a significant environmental concern to the subject property.

- **3209 East Humboldt Street (**Map ID I74-78) – this property is located approximately 600 feet south of the subject property, and was identified under the operator ITT Cannon / Kennington. The site is listed in the following databases from the report: HAZMAT, UST, RCRA-SQG, FINDS, SEMS, ENVIROSTOR, VCP, SWEEPS UST, CA FID UST, DEED, HIST CORTESE, CPS-SLIC, LA Co. Mitigation, and CERS. The site was previously discussed in the SEMS database review section. Based on separation distance and regulatory oversight of cleanup activities with active groundwater monitoring, this site does not represent a significant environmental concern to the subject property.

- **301 West Avenue 26** (Map ID S127-128) – this property is located approximately 1,700 feet southwest of the subject property and was identified under the operator names Jaybee and Ajax Manufacturing. The site is listed in the ENVIROSTOR, VCP, EMI, and SEMS databases. The listings indicate the property was discovered as contaminated in 1994, with a discovery date of 2000. The site was listed as a Superfund site in 2002. The contaminants of concern include lead, PAHs, PCE, diesel fuel, TCE, and other volatile organic compounds associated with former manufacturing operations at the site, and the site is currently active in the VCP. Based on separation distance and regulatory oversight of cleanup activities with active groundwater monitoring, this site does not represent a significant environmental concern to the subject property.

State/Tribal Brownfield Sites

No State/Tribal Brownfield Sites were identified within the specified radius from the subject property.

State/Tribal Institutional Control and Engineering Control

The State/Tribal Institutional Control and Engineering Control list consists of deed-restricted sites with environmental remediation associated with engineering or institutional controls.

The subject property was not listed on the State/Tribal Institutional Control and Engineering Control sites database.

Local Ascertainable Records in Database

The subject property addresses were identified in several of the local ascertainable records databases, summarized as follows:

- **135 West Avenue 34** (Map ID A5, 7, 10, 11, 13, 18, 19, 22, 23, 25, 27, 28, 31, 35) – this subject property address was identified in the HAZNET (12), RCRA NonGen/NLR, FINDS, and ECHO databases under the following operator names: Jardinero Productions, Birddog, Warner Bros., All About Steve Movie, Soul Productions LLC Ortiz Brothers Moving, Step Up 3D, Love & Basketball, Nurse Betty Productions, 20th Century Fox, and Olivers Arrow Movie.

  Ten of the HAZNET listings are associated with the disposal of wastes generated during film production, including very small quantities of various paints, latex gloves, fuel blends, and other organic solids (1999-2016); the remaining two HAZNET listings are associated with Ortiz Brothers Moving, including the disposal of waste oil and hydrocarbons (1997-1998).

  The RCRA NonGen/NLR listing, FINDS, and ECHO listings refer to the All About Steve Movie Site (2007), a former generator of hazardous ignitable waste from photographic film. There are no reported spills, releases, or violations associated with the 135 West Avenue 34 address. Based on the available information, the listings do not represent a significant environmental concern.

- **141 West Avenue 34** (Map ID A2, 4, 6, 15, 24, 26, 29, 32, 36, 38) – this subject property address was identified in the HAZNET (8), RCRA-SQG, FINDS, ECHO, EMI, HAZMAT, and CERS databases. The listings are associate with the following operator names: Touchstone Pictures, American Caster Corp, Tomcats, Five Continent Imports LLC, Lie To Me, ABC Signatures Studio, Battle of the Sexes, and Dreamworks Productions.

  Seven of the HAZNET listings are associated with the disposal of wastes generated during film production, including very small quantities of various paints, latex gloves, fuel blends, and other organic solids (1997-2017); and the other HAZNET listing is associated with American Caster Corp for the disposal of other organic solids, hydrocarbons, oil-containing waste, and paint sludge (1987-1996).

  The RCRA-SQG refers to American Caster Corp operations on the property in 1987 (specific type of waste not specified). American Caster Corp was also identified under a historic address, 157 West Avenue 34, in the HAZMAT database.

  The ECHO, EMI, and CERS listings refer to regulated air emissions at American Caster Corp, and indicate that the property was classified as a hazardous air pollutant (major). The listed site operations include hardware manufacturing, other metal valve and pipe fitting manufacturing, and ball and roller bearing manufacturing. There are no reported spills, releases, or violations associated with the 141 West Avenue 34 address. Based on the available information, the listings do not represent a significant environmental concern.

- **153 West Avenue 34** (Map ID A1) – this subject property address was identified under the operator name William Pile Enterprises and was identified in the HAZMAT database with a listing dated January 2019. The HAZMAT database is a list of facility and manifest data compiled by DTSC. No further information was provided by the listing. There are no reported spills or violations associated with the 153 West Avenue 34 address. Based on the available information, the listings do not represent a significant environmental concern.

- **3401 Pasadena Avenue** (Map ID A3, 14, 21, 30) – this subject property address was identified in the HAZNET (3) and EMI databases under the operator names 20th Century Fox, E D 1125 Inc, Elastic Coatings Org, and Bob Baker Production.

  Two of the HAZNET listings are associated with the disposal of wastes generated during film production, including very small quantities of various paints, latex gloves, fuel blends, waste oil, and other organic solids (2006-2007); and the other HAZNET listing is related to Elastic Coatings Organization for the disposal of unspecified solvent mixtures, pesticides, and alkaline solution without metals pH > 12.5 (1993).

  The EMI listing refers to air emissions (total organic hydrocarbons and reactive organic gases) associated with Bob Baker Productions, a film production company (1990). There are no reported spills, releases, or violations associated with the 3401 Pasadena Avenue address. Based on the available information, the listings do not represent a significant environmental concern.

- **3433 Pasadena Avenue** (Map ID A8, 9, 12, 16, 17, 20, 33, 34, 37) – this subject property address was identified in the HAZNET (8), FINDS, ECHO, and RCRA NonGen/NLR databases under the operator names Gone Girl, Moneyball, Informant Productions, End of Watch LLC, Warner Bros. Hangover 3, Hotel for Dogs, and Fox Gone Girl.

  All of the HAZNET listings are associated with the disposal of wastes generated during film production, including very small quantities of various paints, latex gloves, fuel blends, and other organic solids (2008-2014). The RCRA NonGen/NLR, FINDS, and ECHO listings refer to operations associated with filming the Warner Bros Hangover 3 movie (2010-2012), a former generator of the following hazardous waste: ignitable waste; methyl ethyl ketone; and non-halogenated solvents. There are no reported spills, releases, or violations associated with the 135 West Avenue 34 address. Based on the available information, the listings do not represent a significant environmental concern.

Orphan Listings

Orphan listing consists of sites that are provided in the regulatory database; however, due to poor or inadequate address information were not mapped.

The subject property or other sites in immediate vicinity were not listed in orphan summary. Therefore, the listed sites are not expected to represent a significant environmental concern.

6.2 Proprietary Database Listings

The subject property was not identified on the EDR proprietary records databases.

6.3 Vapor Encroachment Condition

ASTM E2600-10 Standard Guide for Vapor Encroachment Screening (VES) on Property Involved in Real Estate Transactions was used as guidance for conducting a VES for the subject property. The purpose of the screening is to determine whether a Vapor Encroachment Condition (VEC) exists from chemicals of concern (COC*)* that may migrate as vapors onto a property as a result of contaminated soil and groundwater on or near the subject property. Current or past uses such as gas stations (using petroleum hydrocarbons), dry cleaning establishments (using chlorinated volatile organic compounds), former manufactured gas plant sites (using volatile and semi-volatile organic compounds), and former industrial sites such as those that had vapor degreasing or other parts-cleaning operations (using chlorinated volatile organic compounds) are of particular concern. COC vapors are capable of migrating great distances omni-directionally along subsurface conduits such as utility lines, pipelines, sewer and storm water lines, and building fountains which may represent a potential VEC in connection with the subject property. There are two levels of screening for VECs:

<u>Tier 1 Vapor Encroachment Screen</u>
Tier 1 screening is an investigation of known or suspected contaminated properties within a given radius, government records, investigation, historical research, etc. The research radius varies based on the COC at the contaminated site due to chemicals having different migration properties. For sites with petroleum hydrocarbon COC, the search distance is 528 feet (1/10 mile). For contaminated sites with non-petroleum hydrocarbon (other volatile compounds) COC, the search radius is 1,760 feet (1/3 mile) from the contaminated site to the boundary of the subject property.

A total of eight sites were identified in the Radius Map Report and historical research within the "Area of Concern" that were considered to pose a potential VEC at the subject property based on the Tier 1 Evaluation. Tier 1 sites are:

- **3505 Pasadena Avenue** (Map ID B41-47) – this site was identified under the operator name Former Welch's Uniform Services and is located adjacent to and north of the subject property. The site is listed in the following databases from the report: UST (2), RCRA-LQG, ENVIROSTOR, LUST, CPS-SLIC (2), VCP, SWEEPS UST, HIST UST, CA FID UST, FINDS, ECHO, EMI, HIST CORTESE, CERS, DRYCLEANERS, HAZMAT, and EDR Hist Cleaner. The site was previously described in the RCRA generators sub-section above. Based on regulatory oversight and on-going SVE remediation with semi-annual groundwater monitoring, and the most recent (2016) analytical data available, this site does not represent a VEC to the subject property.

- **3500 Pasadena Avenue** (Map ID F61, 62) – this site was identified under the operator names Smith W P and Chuy Carburetors, and is located approximately 250 feet northeast of the subject property. The site is listed in the EDR Hist Cleaner and HAZMAT databases. The EDR Hist Cleaner

database is dated 1924, and the HAZMAT listing is currently active. There are no reported spills, releases, or violations associated with the site. Based on the available information, this site does not represent a VEC to the subject property.

- **3225 Lacy Street** (Map ID H67-73) – this site was identified under the operator names Heath & Co, and Maintenance and Operations New Maintenance Company for the Los Angeles Unified School District. The site is located approximately 350 feet southwest of the subject property, and is listed in the following databases from the report: HIST UST, UST, SWEEPS UST, CA FID UST, RCRA-LQG, HAZMAT, LUST, FINDS, ECHO, HIST CORTESE, and CERS.

  The RCRA-LQG, HAZMAT, FINDS, ECHO, HIST CORTESE, and CERS listings indicate the facility is a large-quantity generator of the following hazardous wastes: ignitable waste, corrosive waste, lead, and mercury. There are no reported violations associated with the property. Based on separation distance and site closure status, this site does not represent a VEC to the subject property.

- **3209 East Humboldt Street (**Map ID I74-78) – this property is located approximately 600 feet south of the subject property, and was identified under the operator ITT Cannon / Kennington. The site is listed in the following databases from the report: HAZMAT, UST, RCRA-SQG, FINDS, SEMS, ENVIROSTOR, VCP, SWEEPS UST, CA FID UST, DEED, HIST CORTESE, CPS-SLIC, LA Co. Mitigation, and CERS.

  The SEMS, ENVIROSTOR, VCP, HIST CORTESE, FINDS, CPS-SLIC, and LA Co. Mitigation listings indicate that the property is a Superfund site with environmental investigations dating back to 1990, due to battery and electronics manufacturing on the property, including lead, PCBs, tetrachloroethene (PCE), and trichloroethene (TCE). The site was enrolled in the Voluntary Cleanup Program (VCP) in 1993, and remedial activities to date have included the excavation of soil approximately 46 feet below ground surface with off-site disposal of 18,000 cubic yards of contaminated soil. The site is still being actively monitored by the DTSC Site Cleanup Program. The DEED listing refers to land-use restrictions imposed on the site as part of the VCP agreement.

  The RCRA-SQG and HAZMAT listings indicate the property is a small quantity generator of hazardous waste, including polychlorinated biphenyls (PCBs) and lead (1998-2006). Based on separation distance and regulatory oversight of cleanup activities with active groundwater monitoring, this site does not represent a VEC to the subject property.

- **3580 Pasadena Avenue** (Map ID J94-97) – this site was identified under the operator name Flavor Food Inc. and is located approximately 700 feet northeast of the subject property. The site is listed in the following databases from the report: SWEEPS UST, CA FID UST, LUST, HIST UST, HIST CORTESE, CERS, and UST.

  The UST listings refer to three 9,000-gallon gasoline USTs installed in and removed in 1986. The LUST listing refers to a gasoline release reported in October1986 during tank removal with

regulatory closure status in November 1986. There are no reported violations associated with the property. Based on separation distance and site closure status, this site does not represent a VEC to the subject property.

- **3101 Artesian Street** (Map ID N98-104) – this site was identified under the operator names Lincoln Heights District and P D D Construction MTNC. The site is located approximately 730 feet southwest of the subject property, and is listed in the following databases from the report: SWEEPS UST, CA FID UST, UST (2), LUST (2), RCRA-SQG, FINDS, ECHO, HAZMAT, CERS HAZ WASTE, HIST UST (2), CERS TANKS, HIST CORTESE, and CERS.

  The UST listings refer to four active 5,000-gallon diesel fuel USTs on the property. The LUST listings refer to petroleum releases reported in 1991 with regulatory closure status in 1997.

  The CERS HAZWASTE and ECHO listings refer to the following violations: violations reported in 2016 due to failure to comply with one or more of the following, failure to property label hazardous waste accumulation containers, and a violation for failure to maintain uniform hazardous waste manifests for three years; : failure to install a spill bucket, have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and/or be resistant to galvanic corrosion; violations reported in 2018 due to failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit, and a violation for failure to submit or maintain a current facility plot plan; a violation reported in 2017 due to the failure to maintain records of repairs, lining, and upgrades on site; and a violation in 2013 for failure to obtain and/or maintain an active hazardous waste generator permit. Refer to the database report for more information.

  The RCRA-SQG, FINDS, HAZMAT, and CERS listings indicate the facility is a small-quantity generator of hazardous waste (1996). Based on separation distance from the subject property, this site does not represent a VEC to the subject property.

- **301 West Avenue 26** (Map ID S127-128) – this property is located approximately 1,700 feet southwest of the subject property and was identified under the operator names Jaybee and Ajax Manufacturing. The site is listed in the ENVIROSTOR, VCP, EMI, and SEMS databases. The listings indicate the property was discovered as contaminated in 1994, with a discovery date of 2000. The site was listed as a Superfund site in 2002. The contaminants of concern include lead, PAHs, PCE, diesel fuel, TCE, and other volatile organic compounds associated with former manufacturing operations at the site, and the site is currently active in the VCP. Based on separation distance and regulatory oversight of cleanup activities with active groundwater monitoring, this site does not represent a VEC to the subject property.

- **400 West Avenue 26** (Map ID T129, 130, 133) – this site was identified under the operator name Lacy's Street Dump and is located approximately 1,700 feet southwest of the subject property. The site is listed in the WMUDS/SWAT, LDS, CERS (2), and SWF/LF (2) databases. The listings indicate that the property operated as a landfill in 1975 and is listed as currently closed. The site

achieved regulatory closure status with DTSC in 2016. Based on separation distance and regulatory closure status, this site does not represent a VEC to the subject property.

In our opinion, none of the other sites listed pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred but the medium affected was the soil only and the site is beyond the critical distance of 100 feet, or the site location and/or plume of contamination is in excess of the critical distance of 100 feet from the subject property. Thus, a VEC can be ruled out because a VEC does not or is not likely to exist at the subject property.

6.4 Agency Records

The following state and local agencies were contacted in reference to the subject property:

- Los Angeles County Fire Department (LACoFD)
- Los Angeles County Department of Public Works (LADPW)
- Department of Toxic Substances Control/ Envirostor (DTSC)
- State Water Resources Control Board (SWRCB)
- South Coast Air Quality Management District (SCAQMD)
- California Department of Conservation – Department of Oil and Geothermal Gas (CA-DOGG)

No records were found for the subject property from the above agencies.

· 7.0 CONCLUSIONS & RECOMMENDATIONS ·

FR has conducted a Phase I Environmental Site Assessment in accordance with the American Society for Testing and Materials (**ASTM**) Standard Practice E1527-13 and Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the subject property addressed at **135, 141 & 153 West Avenue 34, and 3401 & 3433 Pasadena Avenue, Los Angeles, Los Angeles County, California 90031**. This assessment has revealed no evidence of Recognized Environmental Conditions (RECs) during the course of this assessment with the property except for those previously identified in the *Findings* section.

FR recommends no further investigations for the subject property at this time.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

SUPPLEMENTAL SITE ASSESSMENT REPORT AND SITE CONCEPTUAL MODEL UPDATE, FORMER WELCH'S UNIFORM FACILITY, 3505 PASADENA AVENUE, LOS ANGELES, CALIFORNIA

Dear Mr. Otter:

The Department of Toxic Substances Control (DTSC) has reviewed the Supplemental Site Assessment Report and Site Conceptual Model Update (SSAR/SCMU) dated September 2007 for the subject site.

Enclosed are the comments of the DTSC toxicologist and geologist on the SSAR/SCMU. The comments identified deficiencies in the SSAR/SCMUEA that require additional site characterization. Please submit Additional Site Characterization/Baseline Health Risk Assessment Workplan to DTSC by January 15, 2008.

If you have any questions, please contact Mr. Alberto Valmidiano, Project Manager, at (818) 551-2870 or me, at (818) 551-2980.

Sincerely,

for

Juli Oborne
Unit Chief

MEMORANDUM

TO : Alberto Valmidiano
Project Manager
Site Mitigation Program

FROM : John A. Naginis, PG
Senior Engineering Geologist
Geological Services Unit

CONCUR : Craig Christmann, PG
Senior Engineering Geologist
Geological Services Unit

DATE : November 28, 2007

SUBJECT: Geologic Services Unit (GSU) review of Supplemental Site Assessment Report and Site Conceptual Model Update, Former Welch's Uniform Facility, 3505 Pasadena Avenue, Los Angeles, California, Dated September, 2007

PCA 12020 Site Code 301314-11 Log No.: 73050 Zip Code: 90031

As requested, GSU staff have reviewed the above referenced Site Assessment Report (Report) prepared by ENSR Corporation for AmeriPride Services Inc. The document reviewed contains summaries of investigations performed at a former uniform dry cleaning facility. This site has a long history of dry cleaning operations dating back to about 1920. The Report contains summaries of previous investigations and underground storage tank (UST) removals that were performed at the site beginning in 1987. The most recent investigation was performed during 2006.

GSU staff reviewed the Report for conformance with DTSC guidance and for internal consistency. This memorandum contains general comments regarding overall Report contents as well as detailed comments regarding specific portions of the Report.

Questions regarding this memo should be directed to John Naginis at (818) 551-2194.

General Comments

1. Nature and Extent of Contamination

While four areas of concern (AOC) have been identified on the site, the nature and extent of contamination is not well documented in the Report, and it appears that additional investigation is required to fully characterize the site. The 2001 soil gas survey collected data from a single depth, and results of the soil gas survey did not correlate well with vadose zone contamination. For example, soil gas sampling points 40 and 42 were located on the southern and northern sides of the Area 2 vadose zone perchloroethylene (PCE) plume, and neither soil gas point detected PCE. GSU staff recommend installing multi-depth soil gas probes to fully characterize the areas of concern and to evaluate areas of the site where analytical data is not available. Once analytical data from the multi-depth soil gas survey is evaluated, the need for any additional soil matrix sampling and volatile organic compound (VOC) analytical testing can be determined.

2. Area of Concern #1 – Investigation Summary

Based on the condition of the UST removed from this area, observed soil staining, and the presence of non-aqueous phase liquids (NAPL) in this area, it is apparent that a release has occurred. The Report does not provide data to support the conclusion that this release has been characterized and remediated. A summary of investigation and remediation data that describe subsurface conditions in AOC #1 should be included in a future report or investigation workplan. The summary should be of sufficient detail to evaluate whether additional investigation or cleanup is needed.

3. Area of Concern #2 – Vertical Extent of Contamination and Remediation

A release beneath the former PCE tanks has been documented and the lateral extent of contamination has been well delineated in the vadose zone. However the vertical extent of the contamination has not been delineated. Soil sampling was conducted down to the water table, but the investigation did not extend below the water table. Due to the high concentrations of PCE and trichloroethylene (TCE) detected in soil at the water table, and the dense nature of these contaminants, the vertical extent of contamination below the water table requires delineation.

PCE and TCE contamination in Area of Concern #2 presents an ongoing source of groundwater contamination, consequently, the extent of contamination should be fully delineated and active remediation implemented.

4. Area of Concern #3 – Source of VOCs in MW-16

Well cluster MW-16, consisting of wells MW-16A, MW-16B and MW-16C, is located in AOC #3. Groundwater samples from Well MW-16A contain high concentrations of cis-1,2-Dichloroethylene (c-DCE). Soil gas and soil matrix sampling and analytical testing should be performed at AOC #3 to determine the extent of the vadose zone VOC source in this area and collect data necessary to implement an effective remedial effort.

5. Area of Concern #4 – Confirmation of Soil Gas Contamination

PCE was detected in the southwest corner of the former Welch's Uniform facility in soil gas during the 2001 soil gas survey, and also in soil matrix at boring SB-35. Multi-depth soil gas probes should be installed in AOC #4 to delineate the nature and extent of contamination within soil gas. Once analytical data from the multi-depth soil gas survey is evaluated, the need for any additional soil matrix sampling and VOC analysis can be determined.

6. GSU Conclusions

The current submittal does not fully address the nature and extent of contaminants detected at the site. An investigation workplan should be submitted that addresses the comments in this memo, and includes a proposed scope of work to delineate the lateral and vertical extent of contaminants in soil and groundwater.

The Report states that AmeriPride, the current property owner, is seeking a soil closure from DTSC to facilitate property development, and monitored natural attenuation (MNA) is proposed as the sole remedial alternative. While MNA will most likely be utilized as part of the remediation effort, based on VOC and total petroleum hydrocarbon (TPH) concentrations detected in soil and groundwater, active remediation of the vadose zone and groundwater at the Former Welch's Uniform site is warranted and should be implemented.

Detailed Comments

Section 2.9 – Current Status

This section states that three wells MW-4, MW-11 and MW-12 are listed as being out of service due to well boxes and well heads being destroyed by Los Angeles City Street services personnel removing trash and vegetation from the site. The Report should be revised to state if these wells have been properly destroyed. If not, plans should be submitted to DTSC to locate the well heads, properly destroy the wells and evaluate whether the wells need to be replaced.

Section 4.3 Soil Assessment Results

Environmental screening levels (ESLs) were developed for various exposure pathways using Regional Water Quality Control Board, San Francisco Region (San Francisco Water Board), criteria. The ESLs are not appropriate for this site because ESLs were developed by the San Francisco Water Board, for sites in the San Francisco area. The site is located in Los Angeles, and should be evaluated based on criteria developed by the Regional Water Quality Control Board, Los Angeles Region (LA Water Board). Maximum Soil Screening Levels calculated using the methodology developed by the LA Water Board should be used to evaluate TPH and VOC concentrations in vadose zone soil. Maximum soil screening levels can be calculated using Chapters 4 and 5 of the LA Water Board publication Remediation Guidance for Petroleum and VOC Impacted Sites, Section II, dated May, 1996.

Figure 16 – Cross Section E-E'; Variation in Groundwater Elevation

As shown in Figure 16, the groundwater elevation drops by about 30 feet in a distance of about 50 feet, between boring SB-6 and monitoring well MW-1, then rises about 30 feet within a distance of 10 feet between MW-1 and boring CB-5. This change in groundwater level over such a short distance implies that there are two distinct aquifers in the northern section of the site, and there is a strong downward vertical gradient between the two aquifers. Strong vertical gradients between depth intervals, as observed at MW-1, usually indicate some type of relatively low permeability structure separating different portions of an aquifer, or separating two different aquifers.

The strong vertical gradient shown on Figure 16 does not appear to correlate with groundwater data collected from wells in the MW-16 well cluster, MW-16A, MW16B, and MW-16C. Groundwater elevation data from the MW-16 well cluster show a slight variation in groundwater elevations at different depths with a much weaker upward vertical gradient.

Monitoring wells MW-2 and MW-3 have relatively long screen intervals that extend from the water table to the depth of the bottom of MW-1. If there is some low permeability structure causing the vertical gradient shown on Figure 16, then these two wells are providing a hydraulic connection between two distinct portions of the aquifer, and may be causing contamination to spread vertically through the aquifer. Investigation regarding the nature of aquifer is required to evaluate if there is a low permeability unit separating different portions of the aquifer. If a low permeability unit is present, then any wells with screens that cross this unit need to be properly destroyed and replaced with wells that have screens located above and below the low permeability unit.

SUBJECT: Review of Supplemental Site Assessment Report and Site Conceptual Model Update, Former Welch's Uniform Facility, Los Angeles, California.

PCA: 12020 Site Code: 301314-11

The Human and Ecological Risk Division (HERD) reviewed the "Supplemental Site Assessment Report and Site Conceptual Model Update" for the Former Welch's Uniform Facility located at 3505 Pasadena Avenue in Los Angeles, California. The report was prepared by ENSR Corporation on behalf of AmeriPride Services Inc. Comments on the report are described below.

Background

The subject site is a 2.6 acre property located in a low-density, mixed residential and industrial area, approximately 3.5 miles northeast of downtown Los Angeles. It was formerly a uniform laundry service facility established in 1924, which operated until approximately 1988. At least 12 underground storage tanks (USTs) were in service at the site; they were removed or filled in-place between 1987 and 2004. All buildings associated with previous operations were removed in 1993 and the site is now a vacant lot with a chain link fence and locking gate. The current site owner AmeriPride is seeking a soil closure to facilitate development of the property, and is considering building a 30,000 ft^2 Apparel Center on the property.

The principal chemicals of concern at the site are chlorinated solvents (PCE, TCE, and cis-1,2-DCE) and petroleum hydrocarbons, which are associated with previous dry cleaning, boiler, and vehicle fueling activities. This Report describes supplemental site assessment activities completed in 2006, and presents an updated site conceptual model based on the assessment findings. The site assessment activities were

conducted under the oversight of the Los Angeles Regional Water Quality Control Board (LARWQCB), and site oversight responsibilities were transferred to DTSC on December 27, 2006.

Document Reviewed

HERD reviewed, "Supplemental Site Assessment Report and Site Conceptual Model Update, Former Welch's Uniform Facility, 3505 Pasadena Avenue, Los Angeles, California." prepared by ENSR Corporation, dated September 2007. It was received by HERD on October 2, 2007.

Scope of Review

HERD's review of the above documents was focused on the adequacy of current data to support a reliable health risk evaluation for determining what further actions are needed. HERD didin't review previous investigation reports to verify the quality and accuracy of the data and other site-related information presented in the current report. Minor grammatical or typographical errors that do not affect the review have not been noted.

General Comments

Overall, HERD found that the work performed to date provides useful information on the nature and extent of the chemical impacts at most of the site. However, the current report does not contain adequate information to demonstrate that certain areas have been adequately characterized, and additional sampling is recommended to complete characterization in these areas. HERD also identified several apparent deficiencies that could introduce significant uncertainties in the risk evaluation results and should be addressed in future work. Once sufficient data are gathered for the site, HERD recommends performing a health risk assessment to support a decision on site cleanup. Below are some general comments for the report:

1) HERD recommends summarizing all relevant soil data (i.e., data collected after the free-product removal and soil vapor extraction) of key chemicals by presenting them in data-box figures to show their areal extents. Some of this information is presented in Section 5, but is limited to only the 2006 data for PCE in the solvent area. Such information is needed for other chemicals and areas to facilitate HERD's understanding on the contaminant distributions at the site. In addition, HERD could not find several soil boring locations referenced in these sections (e.g., SB-1, SB-26, CB-3, and CB-4) on any of the figures. Depending on the review of these figures and additional information on the AOCs (see Specific Comments 2, 6, 7, and 8), collection of additional samples may be necessary to adequately characterize the extents of the contamination laterally and vertically.

2) HERD does not recommend estimating the residual mass of COPCs for use in risk calculations for the following reasons: a) the current report does not show that lateral and vertical delineation has been completed in each of the source areas (including the mass that may be trapped in the smear zone near water table); and b) the estimated residual mass cannot be verified since information regarding the approximate total mass of chemical releases is not available. If the above information becomes available and this approach is to be proposed in the future, HERD requests that the chemical mass calculations and supporting information be submitted to DTSC for review prior to its use in risk calculations.

3) HERD recommends collecting soil gas data within each area of concern (AOC) to verify the previous soil gas sampling results and for use in health risk assessment. HERD notes that the 2001 soil gas survey was conducted on a site-wide basis and the placement of the probes was not necessarily biased toward known or suspected sources. Further, all samples were collected from a single depth (10 ft bgs or less) only. Therefore, HERD recommends installing multi-depth soil vapor probes in each area of concern (AOC) and collecting samples for VOC analysis in accordance with the Advisory – Active Soil Gas Investigations (DTSC/LARWQCB 2003).

4) HERD recommends that all detected organic compounds be retained as chemicals of potential concern (COPCs) for the purpose of health risk assessment. Metal concentrations detected above the background levels should also be retained as COPCs and included in the risk assessment. In addition, HERD recommends analyzing for organic lead (e.g., tetramethyl lead and tetraethyllead) in the vehicle fuel-impacted areas since leaded gasoline was used in the U.S. until 1990's.

   HERD notes that total petroleum hydrocarbons (TPH) are considered as COPCs for the site. HERD recommends following the Interim Guidance for Evaluating Total Petroleum Hydrocarbons at School Sites when evaluating TPH in the risk assessment. Please check with the HERD staff for information on the TPH guidance.

5) HERD does not accept the comparison of site data with the Environmental Screening Levels (ESLs) for sites in southern California. Instead, HERD advises using California Human Health Screening Levels (CHHSLs) and USEPA Region 9 Preliminary Remediation Goals (PRGs) (for chemicals without the CHHSLs) for the purpose of health-based risk screening. It should be noted that HERD does not recommend using generic risk-based criteria in risk assessment, and recommends evaluating the cumulative cancer risks and noncancer hazards for all COPCs using appropriate exposure parameters and toxicity values. All relevant data collected from the source and general site areas should be included in the risk evaluation for determination on risk-based closure.

6) HERD notes that groundwater concentrations of several chemicals are higher than the California MCLs for drinking water. As a result, groundwater cleanup may be required if the shallow aquifer beneath the site is designated for beneficial uses by the Regional Water Quality Control Board. HERD has not reviewed the information regarding groundwater designation and defers to the Program regarding groundwater designation in the area and the need for groundwater cleanup.

Specific Comments

1) Section 2.8.4: HERD recommends including available information on underground utilities at and near the site as these utility corridors may act as soil vapor migration pathways.

2) Section 2.8.5: HERD recommends presenting available information regarding the two aboveground storage tanks located on the west side of the former South Building. If information gaps exist, additional data should be collected to complete the understanding of this area.

3) Section 3.0: Please specify the type(s) of free product (e.g., LNAPL or DNAPL) found in wells K-1, K-2, MW-1, and MW-3 through MW-7 during the previous investigations, and provide a figure showing the extraction well locations and treatment areas of the soil vapor extraction systems operated in the early 1990's.

4) Section 4.3.1: Please provide a figure showing the proposed grid design for soil sampling in the source and general site areas.

5) Section 4.4.3: HERD recommends including concentrations of daughter products (e.g., cis-1,2-DCE and vinyl chloride) in the graphs to illustrate the occurrence of degradation. The table numbers cited in the last paragraph are incorrect, and should be corrected.

6) Section 5.1.1: HERD recommends identifying the vehicle maintenance area on Figure 3 and summarizing the data that are relevant to this area. If data gaps exist, additional investigation should be performed to complete the understanding of this area.

7) Section 5.1.4: HERD recommends additional investigation at AOC 4 regarding the elevated PCE concentrations in soil gas encountered during the 2001 sampling. HERD refers to the GSU for recommendations on specific sampling needs in this area.

8) Section 5.3.2: The PCE iso-concentration plots (Figures 10 through 13) indicate that two separate sources may exist in AOC 2, one in the former UST 5A to 9A

area, and the other in the former UST 5B to 9B area. Additional information is needed to illustrate and understand the extent of PCE impacts in this area.

9) Section 5.4.1: HERD does not recommend calculating health risks using the finite mass approach at this point (see General Comment 1). In addition, HERD does not agree with the input parameters for soil properties used in the vapor intrusion modeling calculations, and recommends using default soil properties that correspond to the predominant soil type at the site (see Specific Comment 16). Finally, HERD does not concur with the elimination of AOC 4 from the relevant exposure pathways since this area has not been fully characterized (see Specific Comment 6), and recommends retaining in the screening risk evaluation.

10) Section 5.4.2: HERD recommends using default soil properties that correspond to the predominant vadose zone soil type near the site in the screening level risk evaluations (see Specific Comment 16).

11) Section 5.4.3: HERD recommends evaluating potential exposures of outdoor workers via contact to soil using soil sampling results down to 10 feet below the surface. The site conceptual model should be revised accordingly. Alternatively, a soil management plan can be implemented as part of site control to prohibit excavation and reuse of the shallow soil at the site.

12) Section 5.4.4: HERD recommends evaluating potential exposures of construction workers via contact to soil and/or groundwater using sampling results down to the possible maximum depth of subsurface excavation. Depending on the results of this evaluation, proper health and safety procedures should be followed during construction activities.

13) Section 5.4.5: See the comments on onsite indoor workers (Specific Comment 9) and onsite outdoor workers (Specific Comment 11).

14) Section 5.4.6: HERD recommends using default soil properties that correspond to the predominant vadose zone soil type near the site in the screening level risk evaluations (see Specific Comment 16).

15) Section 6.0: HERD recommends revising the summary and conclusions to reflect changes to be made based on the above comments. HERD notes three proposed offsite monitoring wells were not installed due to constraints cited in the report. HERD refers to the Program and the GSU regarding the need for installing new monitoring wells at alternate offsite locations.

16) Appendix L: HERD recommends using default soil properties (i.e., bulk density, total and water-filled porosities, and soil vapor permeability) corresponding to the predominant soil type at the site in the screening evaluation. HERD notes that only

one soil sample was collected from the boring SB-35 at 15 ft bgs and analyzed for soil geophysical properties, which were used in the Johnson and Ettinger Model for calculating health risks associated with vapor intrusion. Further, the testing results for this sample (Appendix J) do not appear to match general soil characteristics for the shallow soil at the site, i.e., gravelly sand or sandy gravel with low moisture content (based on the information presented in Figures 5 and 6, Table 9, and Appendix F). As a result, the calculated health risks would be higher if the soil geophysical properties representative of the site soil type were used instead. A site-specific evaluation will be considered only if sufficient samples are collected to obtain representative soil geophysical properties for the site.

Conclusions and Recommendations

While HERD found that the work performed to date useful in understanding the nature and extent of the chemical impacts at the site, the current report does not include sufficient information to support a soil-only closure for the site. Additional activities are required to further characterize certain areas and to reduce the uncertainties associated with the risk evaluation. Following completion of these additional activities, HERD recommends an updated health risk evaluation to support a decision on site cleanup.

HERD notes that the recommendations made in this memorandum are site specific and should not be construed as a policy decision applicable to other sites. If you have additional questions please feel free to contact me at (714) 484-5359 or cjeng@dtsc.ca.gov.

This Workplan was prepared by ENSR on behalf of AmeriPride Services Inc. for additional site characterization and a baseline health risk assessment at the former Welch's Uniform Facility located at 3505 Pasadena Avenue in Los Angeles, California. In performing our professional services, ENSR has attempted to apply present engineering and scientific judgment and use a level of effort consistent with the standard of practice for such work performed under a Voluntary Cleanup Agreement. This Workplan was prepared under the technical direction of the undersigned.

VOCs	Volatile Organic Compounds

1.0 Introduction

This Workplan has been prepared by ENSR Corporation on behalf of AmeriPride Services Inc (AmeriPride) in response to comments and recommendations made by the California Environmental Protection Agency Department of Toxic Substances Control (Cal EPA/DTSC) following its review of the *Supplemental Site Assessment Report and Site Conceptual Model Update* (SSAR/SCMU, ENSR 2007a) for the Former Welch's Uniform Facility (the "site"). The DTSC issued its comments in correspondence dated November 2007 (**Appendix A**) in accordance with the terms of a Voluntary Cleanup Agreement entered into between the DTSC and AmeriPride on 17 June 2006, which authorized the DTSC to oversee characterization and cleanup of the site.

After reviewing the DTSC's correspondence, a meeting was scheduled between the DTSC, AmeriPride and ENSR on February 6, 2008 at the Chatsworth office to discuss issues related to sample location, frequency, and risk assessment completeness.

1.1 Site Description

The Site is a 2.6 acre property located at 3505 Pasadena Avenue in Los Angeles, California as shown in **Figure 1**. Currently, the property is a vacant lot owned by AmeriPride. Previously, the property was owned and occupied by Welch's Uniform Rental Company, which operated a commercial uniform laundry and rental service facility from approximately 1920 until 1988. Results of past environmental site assessments conducted at the site indicate that soil and groundwater are affected with volatile organic compounds (VOCs), including perchloroethylene (PCE), trichloroethylene (TCE), cis-1,2-dichloroethylene (cDCE), and petroleum hydrocarbons associated with the dry cleaning solvents, boiler fuel, and motor vehicle fuels once stored and used in the laundering operations conducted at the former facility. At least twelve underground storage tanks (USTs) were in service at the site, which were removed or filled in-place between 1987 and 2004. All buildings associated with the previous operation were removed in 1993. AmeriPride is seeking a soil closure to facilitate development of the property, and is considering constructing a 30,000 square foot Apparel Center on the site within two years.

1.2 Purpose

In its review of the SSAR/SCMU, the Geological Services Unit (GSU) and Human and Ecological Risk Division (HERD) staff at the DTSC recommended that additional site characterization be completed to reduce the uncertainties associated with a health risk evaluation and evaluate whether additional site cleanup is warranted. Additional characterization was noted to be needed to more fully characterize the nature and extent of chemical impacts in each of four identified areas of concern (AOC) and at other areas of the site where analytical data is not available.

This Workplan describes the scope of investigation activities and methodology for conducting additional site characterization, and outlines the assumptions and approach for updating an evaluation of health risk associated with chemical impacts at the site to support decision-making regarding site cleanup.

1.3 Project Organization and Responsibilities

The overall organization of the project includes the following individuals and agencies:

- The California Environmental Protection Agency – Department of Toxic Substances Control is the regulatory agency responsible for approving or disapproving the Workplan for the subject site.

  - Ms. Sayareh Amir, Chief, Southern California Cleanup Operations, Chatsworth
  - Ms. Juli Oborne, Unit Chief, Southern California Cleanup Operations, Chatsworth
  - Mr. Alberto Valmidiano, Project Manager, Site Mitigation Program, Chatsworth
  - Mr. John Naginis, PG, Senior Engineering Geologist, Geological Services Unit, Chatsworth
  - Mr. Chawn Y. (CY) Jeng, Ph.D., Staff Toxicologist, Human and Ecological Risk Division, Cypress

- Property Owner and Voluntary Cleanup Agreement Proponent – AmeriPride Services Inc.
  - Mr. Joseph Peter, Environmental Manager

- ENSR is AmeriPride's environmental consultant
  - Mr. Jeffrey Otter, P.E., Program Manager (PM)
  - Mr. William Glenn, P.G., Site Investigation (SI) Project Manager
  - Ms. Ishrat Chaudhuri, Ph.D., DABT, Senior Toxicologist
  - Ms. Susan Milcan, Project Quality Assurance Officer
  - Mr. Joseph Sanders, C.I.H., Health and Safety Officer

- Drilling, vapor probe installation, well completion, and well development will be performed by one of the following drilling contractors as directed by ENSR:
  - BC2 Environmental, Fullerton, CA (hollow-stem auger)
  - ABC Liovin, Signal Hill, CA (hollow-stem auger)
  - TestAmerica, Anaheim, CA (hollow-stem auger and air rotary)

- Analysis of soil, groundwater, and soil gas samples will be performed by one of the following laboratories as directed by ENSR:
  - Calscience Environmental Laboratories, Inc., Garden Grove, CA (soil and groundwater) – NELAP Certification #03220CA
  - American Scientific Laboratories, Inc., Los Angeles, CA (soil and groundwater) – ELAP #2200
  - AirTechnology Laboratories, Inc., City of Industry, CA (soil gas) – NELAP Certification #E87847

The implementation of the Workplan is the responsibility of the ENSR project team, which includes the PM, the SI Project Manager, field personnel, and subcontractor personnel. The PM reports to the AmeriPride Environmental Manager and is the individual who has the primary responsibility for implementing the Workplan. ENSR's office and field personnel supporting the project report to the PM. Drilling and analytical services will be subcontracted by ENSR. Depending on contract negotiations, availability and schedule, ENSR may elect to use other subcontractors as site-specific circumstances dictate.

The PM's responsibilities include:

- Ensuring office and field personnel have reviewed and understand the Workplan;
- Selecting subcontractors and approving their respective work agreements;
- Reviewing the field and laboratory data to determine if the objectives were met; and taking corrective action if necessary.

The responsibilities of the SI Manager include:

- Notifying the laboratory regarding site specific data quality requirements;
- Collecting and compiling the daily field logs and documentation generated by field personnel;
- Checking chain-of-custody forms and field logs to verify completeness of sample collection;
- Reviewing the field and laboratory data to determine if the objectives were met;
- Preparing a summary of quality assurance/quality control data; and
- Conducting audits and taking corrective action as necessary.

The responsibilities of the office and field personnel include:

- Reviewing and implementing the Workplan;
- Field calibration of measurement and test equipment, as needed;
- Maintaining required documentation of activities;
- Collection, labeling, handling, storage, shipping and filling out Chain of Custody forms for environmental samples collected;
- Maintaining control of samples until they are appropriately released; and
- Notifying the PM of deviations from or problems in implementing the Workplan.

The responsibilities of the laboratory subcontractor include:

- Provide appropriate sample containers, preservatives and coolers to ENSR;
- Advise the PM of delays experienced in analyzing the samples;
- Advise the PM upon receipt of samples if there are questions regarding the analysis requested or if there are quality or sample integrity issues that need to be addressed;
- Perform the requested analyses under EPA SW-846 and/or state approved protocol;
- Conduct the required instrument calibration and QA/QC protocols specified in the laboratory's internal quality assurance plans.

The responsibilities of the drilling subcontractor include:

- Provide appropriate drilling equipment and trained personnel as specified in the subcontract agreements.

1.4 Scope and Schedule

Project implementation milestones include the following:

- Submit final ASC/BHRA Workplan within 2 weeks of receipt of DTSC comments on draft Workplan;
- Allow 2 weeks to receive DTSC approval of final ASC/BHRA Workplan;
- Allow 3 weeks to arrange resources and procure permits prior to start of fieldwork;
- Notify DTSC of start of fieldwork a minimum of 1 week prior to starting fieldwork;
- Mark boring locations and notify Dig Alert a minimum of 2 work days prior to start of fieldwork;
- Begin field work approximately 21 days after DTSC approval of final ASC/BHRA Workplan;
- Allow 5 days to complete soil sampling and installation of soil vapor probe nests;
- Allow 5 days to arrange topographic survey to map boring locations and locate wells MW-4, MW-11, and MW-12 for proper abandonment;
- Allow 2 days to complete soil gas sampling (based on 24 soil gas samples to be collected from 8 probes);
- Allow 2 weeks after sample submittal to receive final analytical reports;
- Allow 2 days to locate and abandon wells MW-4, MW-11, and MW-12;
- Allow 4 weeks following sampling and well abandonment for IDW disposal;
- Allow 6 weeks after receipt of final analytical reports to submit draft ASC/BHRA Report to DTSC;
- Allow 8 weeks for DTSC review and comment on draft ASC/BHRA Report; and
- Respond to DTSC comments and submit final ASC/BHRA Report within 2 weeks.

The schedule for completing the above listed activities is dependent upon final approval of this plan; however, based on the above estimates, the full scope of the ASC/BHRA may take a total of six months to complete.

2.0 Background

General information regarding the site ownership, location, and contact names are given in part **2.1** of this section. The regulatory status, environmental setting, facility operational history, and current status of the property are described in parts **2.2** through **2.6**. Part **2.7** provides a summary of prior tank removals, site assessments, and remedial actions at the site.

2.1 Site Information

- Site name and location:
  Former Welch's Uniform Facility
  3505 N. Pasadena Avenue
  Los Angeles, California 90031
- Property owner and Responsible Party:
  AmeriPride Services Inc.
  10801 Wayzata Boulevard
  Minnetonka, Minnesota 55305
- Designated contact person:
  Mr. Joseph E. Peter
  Environmental Manager
  AmeriPride Services Inc
  Phone: (952) 738-6661
  Email: joe.peter@ameripride.org
- Assessors Parcel Number: 5205-004-010
- USGS Quadrangle: 4118-A2 Los Angeles, CA
- Latitude and Longitude: 34° 5' 9" N (34.0859° N) and 118° 12' 48" W (118.2131° W)
- TRS Location Data: San Bernardino Meridian, Township 1S, Range 13W, Section 14
- Thomas Brothers Map Grid: 595-A6
- EPA ID Number: CAD075309740
- California State Accounting and Reporting System (CalStars) Site Code: 301314

2.2 Regulatory Status

The site is identified in several databases that provide information regarding sites with known or suspected subsurface releases, including the California Leaking Underground Storage Tank (LUST) list, the CORTESE list, and the California list of Brownfields properties (EnviroStor). The site is also identified in databases relative to hazardous materials storage and waste generation operations by Welch's Uniform and American Linen Supply, such as hazardous waste generator, State UST, Historical UST and California Facility Inventory Database (CA FID).

Regulatory oversight is being provided by the Southern California Cleanup Operations Branch of the Cal EPA/DTSC Site Mitigation and Brownfields Reuse Program located in Chatsworth, California. Oversight is being provided in accordance with a Voluntary Cleanup Agreement executed between the DTSC and AmeriPride on June 17, 2007 (Docket No. HSA-VCA 06/07-204). Prior to December 27, 2006 the Los Angeles Regional Water Quality Control Board (LARWQCB) had oversight responsibility for environmental activities at the property under SLIC-2 Case No. 833.

In 2006, ENSR conducted a supplemental site assessment on behalf of AmeriPride under the oversight of the LARWQCB. A Supplemental Site Assessment Report and Site Conceptual Model Update (SSAR/SCMU) documenting the findings from the investigation was submitted to the DTSC in September 2007. The DTSC reviewed the SSAR/SCMU, identified data gaps that required further investigation, and provided comments on November 29, 2007 in which it requested the submittal of an Additional Site Characterization/Baseline Health Risk Assessment Workplan (DTSC 2007).

2.3 Physical Setting

The subject site is a relatively flat, 2.6 acre, vacant property located in a relatively low-density, mixed residential and industrial area of Los Angeles, CA, approximately 3.5 miles northeast of downtown Los Angeles, California. The site is located approximately 366 feet above mean sea level near the confluence of the Los Angeles River and Arroyo Seco Channel (USGS 1994). The Arroyo Seco Channel borders the northwest property boundary, and at that location it consists of a concrete lined drainage channel with an invert elevation approximately 30 feet below the grade elevation of the site. The site location and general vicinity are shown on **Figure 2**.

2.4 Geology and Hydrogeology

The site is underlain by approximately 50 to 100 feet of Recent age alluvial and stream channel deposits consisting of coarse grained sand, gravel, and cobbles, which contain the Gaspur aquifer. In the area of the site, the Gaspur aquifer is approximately 60 feet thick, generally unconfined, characterized by transmissivities on the order of 250,000-gallons per day per foot, and reportedly is underlain by non-water bearing sedimentary rocks (CDWR, 1961).

The site is included in the northern portion of the Central Basin Hydrogeologic Area. Regional groundwater information (CDWR, 1961) and previous subsurface investigations (Kleinfelder, 1987) indicate that the first water bearing zone beneath the site is the Gaspur aquifer at about 35 to 50 feet bgs. Groundwater in the Gaspur aquifer in the vicinity of the site is not used as a water supply source (LADWP, 1988).

The regional groundwater gradient in the Gaspur aquifer, as reported by the Los Angeles County Flood Control District (LACFCD, 1986), is south-southeast; although, the local groundwater gradient at the site has consistently been to the southwest. Groundwater has been measured during the Third Quarter of 2007 at depths ranging from 35.11 to 41.97 fbs (ENSR, 2007b).

2.5 Operational History

The property was formerly the site of a work apparel and linen rental service business established in 1924, which operated until approximately 1988. Business activities associated with the facility included receiving, sorting, aqueous cleaning, dry cleaning, tailoring, pressing, and shipping of work uniforms, linens, and towels to industrial and commercial businesses, schools, and hospitals.

Hazardous materials stored and handled at the facility included petroleum hydrocarbon based dry cleaning solvents (Stoddard, methyl ethyl ketone), chlorinated dry cleaning solvents (PCE), gasoline and diesel for motor vehicle fleet fueling, and fuel oil for boiler operation. The site is listed on the HAZNET database (as the American Linen Supply Company at 3505 Pasadena Avenue) for the generation of aqueous solutions containing oxygenated solvents (acetone, methyl ethyl ketone, ethyl acetate, etc.).

Approximately 11 fuel and solvent USTs and several sumps were utilized in the operations at the facility, which were removed or abandoned in-place in 1987 and 1988. Two 6,000-gallon aboveground storage tanks (identified on facility plans as ‘wooden M.U. Tanks’) were located on the west side of the South Building

Complex. Buildings and surface structures were demolished and removed in 1993. A twelfth solvent UST was removed in 2004.

Features that remain at the site include a chain-link fence around the perimeter, a 10-foot high retaining wall along the northeast property boundary, four pole-mounted electrical transformers in the center of the property, gas and water metering equipment near the east gate, and a 6,000 square foot area of asphalt pavement in the southeast portion of the property. **Figure 3** shows the locations of current site features, existing and abandoned groundwater monitoring wells, and former building and tank locations. The approximate locations of three sumps, a water softener brine pit, and a boiler blowdown pit / wastewater clarifier that were reportedly removed or filled in-place at the facility are also shown; although the historic maps and sketches of the facility contain conflicting information regarding location, size, and status of these structures.

Five additional USTs are shown on **Figure 3** (identified UST Nos. 5B through 9B); although records are not available to confirm whether UST Nos. 5B through 9B actually existed and were removed. These tanks were shown on site plans that were drafted and provided with tank removal permits and notifications prepared for UST Nos. 5A through 9A (LAFD 1988c, 1989), the locations of which were drawn by freehand onto the plans. The freehand features identified as UST Nos. 5A through 9A may have been intended to represent the actual locations of UST Nos. 5B through 9B, and there may never have been a second set of tanks.

2.6 Current Status

The property is currently vacant and secured behind a chain link fence with locking gate. Periodically the Los Angeles City Bureau of Street Services Lot Cleaning Division enters the property and grades the site to remove vegetation, trash and debris. Occasionally this activity has damaged or destroyed monitoring well boxes and well heads, which has resulted in the loss of three wells to date (MW-4, -11, and -12).

AmeriPride is considering retaining ownership and constructing a 30,000 square foot apparel service center on the site within approximately two years. The apparel center would be used in the management and rental of linens and uniforms. Activities at the proposed facility might include receiving, sorting, tailoring, pressing, and distribution of linens and apparel; however, no wet washing or dry cleaning activities are anticipated or proposed.

2.7 Prior Environmental Activities

Several phases of investigation and remediation activities have been previously completed at the site. These prior activities have included tank removals, soil investigations, soil gas investigations, groundwater monitoring programs, free-product recovery, remediation by soil vapor extraction, facility demolition, and confirmation sampling. The prior activities have typically focused on three localized areas of concern (AOC): AOC #1 – a motor vehicle fueling area in the east-central portion of the site; AOC #2 – a dry-cleaning and solvent handling area in the northeast portion of the site; and AOC #3 – a driveway area between the north and south building complex. These areas are distinguished from one another by the types of activities they supported when the facility was in operation, the chemicals handled or stored as part of those activities, and the proximity of USTs or sumps within the areas. A fourth area located at the southwest corner of the property, AOC #4, was identified for further investigation during the 2006 site assessment as a result of elevated VOC concentrations reported in a soil gas sample collected during the 2001 site-wide soil gas survey. In addition, site investigations have also included screening of the overall property for pesticide, PCB, and metals from non-specific sources.

Prior site assessment sample locations are shown on **Figure 4**. The following is a chronology of environmental activities that have taken place at the site.

1987 Initial site characterization (Kleinfelder, 1987)

In 1987, J.H. Kleinfelder & Associates (Kleinfelder) conducted a limited site characterization at the site at the locations of two motor vehicle USTs located adjacent to Bldg. No. 19. One of the tanks, a 2,000-gallon diesel fuel UST, had been removed in early 1987 under Los Angeles City Fire Department (LAFD) Permit No. 55660 (LAFD, 1987) prior to Kleinfelder's site assessment activities (several holes were noted along the sides and bottom of the tank on removal). Kleinfelder completed four soil borings, B-1 through B-4, and three groundwater monitoring wells, MW-1 through MW-3 (now known as K-1 through K-3), near the locations of the two USTs. Wells K-1 and K-2 were installed in the vicinity of the former diesel UST. TPHg and total petroleum hydrocarbons as diesel (TPHd) were reported in all the soil samples collected. A maximum TPH concentration of 8,600 milligrams per kilogram (mg/kg) was detected in boring B1 at 20 feet bgs. The only other analyte detected was xylene at a maximum concentration of 39 mg/kg in boring B1 at 20 feet bgs (Kleinfelder, 1987).

1988 UST removal and closure investigation (Thorne, 1989)

In 1988, Thorne Environmental, Inc. (Thorne) reportedly closed approximately ten USTs and three sumps at the site under LAFD Permit Nos. 58783 (identified on **Figure 3** as UST Nos. 2, 3, 4, 11 and 12) and 61763 (identified on **Figure 3** as UST Nos. 5A, 6A, 7A, 8A, and 9A). The former USTs had previously contained products such as gasoline, diesel fuel, and PCE. The documentation for LAFD Permit No. 61763 also shows five additional solvent USTs located on the south side of Bldg. #8 ranging between 700 and 1,500 gallons in capacity (identified on **Figure 3** as UST Nos. 5B, 6B, 7B, 8B, and 9B), and notes that these had been previously removed; although, records are not available to confirm that was the case. It is suspected that UST Nos. 5A through 9A, which were drawn in by freehand, represent the actual locations of UST Nos. 5B through 9B, and that the figures were never updated to remove the original features from the as-built plans.

Analytical results of soil samples collected from beneath the former USTs and sumps indicated that gasoline, diesel fuel, and benzene, toluene, ethylbenzene, and total xylenes (collectively BTEX), and organic solvents were present in the soil beneath a majority of the USTs and sumps. The following maximum concentrations were detected: 3,800 mg/kg TPHd (SB-7-29); 5,900 mg/kg TPHg (SB-1-35); 52 mg/kg TCE (SB-26-30), and 33,000 mg/kg PCE (SB-19-29).

1989 Supplementary site investigation and well installation (Thorne, 1989)

From 1988 to 1989, Thorne advanced 28 soil borings and installed 16 vapor extraction wells (VEWs) and 12 groundwater monitoring wells (MW-1 through MW-8, MW-9A, MW-9B, MW-10A, and MW-10B). Analytical results of the groundwater samples collected from the 12 monitoring wells indicated that gasoline, diesel fuel, BTEX, and halogenated organic compounds were present.

1990 Free-product removal (Thorne, 1989 & 1990)

Free product was observed in wells K-1, K-2, MW-1, and MW-3 through MW-7 during previous investigations at apparent thicknesses of 0.1 to 9.5 inches. Thorne subsequently bailed 160 gallons of free product from the wells before initiating a vapor extraction remediation program in June 1990.

1990 Soil vapor extraction (Thorne)

In June 1990, Thorne installed and began operation of a soil vapor extraction (SVE) system at the site. The SVE consisted of three separate extraction units connected to VEWs in three areas of impacted soil. The extracted vapor was treated with activated carbon before being released to the atmosphere. SVE Unit 1 was connected to VEWs SB-1 through SB-5 in the vicinity of the former fuel USTs in AOC #1. SVE Unit 2 was connected to wells MW-1 and MW-4, and VEWs SB-6 and SB-7 in AOC #3. SVE Unit 3 was connected to VEWs SB-10, SB-11, SB-12, SB-14, SB-15, SB-16, SB-18, and SB-19 in AOC #2. By September 1991, the total hydrocarbon concentrations entering the SVE treatment units decreased approximately 97.5 percent from an initial 9,400 parts per million (ppm) to 230 ppm at shutoff. Based on SVE monitoring data, CAPE estimated

that approximately 11,940 pounds of volatile organic compounds (VOCs) were removed during the period June 1990 to August 1991.

1991 Supplementary soils investigation (CET, 1998)

In June and August, 1991, CAPE, as CET Environmental Services, Inc. (CET) drilled three soil borings (SB-28 through SB-30), and converted SB-29 into a vadose zone monitoring well. Boring SB-28 was drilled near the two former fuel USTs (2,000 and 10,000-gallon) and had a maximum concentration of TPHd of 400 mg/kg in the 20 and 25 foot bgs soil samples; boring SB-29 was drilled near a former clarifier between the North and South buildings (maximum TPHd of 11 mg/kg in the 30 foot bgs soil sample), and boring SB-30 was drilled in the vicinity of the former USTs containing PCE, and near former borings SB-15 and SB-16. A maximum PCE concentration of 0.23 mg/kg was detected in the 5 foot bgs soil sample. In summary, minor concentrations of TPHd were detected in boring SB-28 adjacent to the former 2,000-gallon diesel UST, minor concentrations of TPHd and TPHmo were detected in boring SB-29, and minor concentrations of PCE were detected in boring SB-30.

1993 Facility demolition and groundwater monitoring (CET, 1998)

In 1993, the site structures and buildings were removed. No site assessment or remediation activities were performed from September 1991 to July 1998. In July 1998, CET redeveloped 11 of the groundwater monitoring wells, repaired several of the monitoring well box lids, and performed Third Quarter 1998 groundwater monitoring and sampling at the site.

2000 Confirmatory soil investigation and well installation (CAPE, 2000)

During August 2000, CAPE drilled and sampled six soil borings (CB-1 through CB-6) at the site to collect confirmatory soil samples from areas previously remediated using SVE. In September 2000, CAPE installed five additional monitoring wells (MW-8A, MW-11, MW-12, MW-13A, and MW-13B) to assess the lateral and upgradient extent of the dissolved-phase hydrocarbon plume. The results of the confirmatory soil sampling and the additional well installation activities indicated that VOCs were still present in the capillary fringe and in the dissolved-phase.

2001 Soil gas survey (CAPE, 2001)

In November 2001, CAPE conducted a soil gas survey consisting of 44 vapor sampling points (SV-1 through SV-44) in the vicinity of the former USTs, pump islands, buildings, sumps, and a vehicle maintenance shop. Most of the vapor sampling points with detectable levels of VOCs were located in the north-central area of the site (SV-25, SV-26, SV-27, SV-29 through SV-37, and SV-39). This was the area where known solvent releases occurred and SVE was performed in the past. Elevated concentrations of PCE (260 micrograms per liter [ug/L]) and TCE (10.3 ug/L) were also detected in the extreme southwest corner of the property in sampling point SV-10-10'. Two additional points, SV-43-7.5', and SV-44-10', were installed approximately 35 feet east and 30 feet north of SV-10 to further assess the lateral extent of PCE and TCE. PCE was detected at a concentration of 8.8 ug/L in the northern probe, and nothing was detected in the eastern probe; indicating that the extent of the impacted soil vapor is limited. No known storage or past release of VOCs in the southwest corner of the property has been identified.

2002 Geophysical survey (UltraSystems)

In July 2002, UltraSystems Environmental, Inc. conducted a geophysical survey at the site, which resulted in location of a UST in the dry cleaning area north of the former North Building Complex (CAPE, 2004).

2002 Well installation (Cape, 2002)

In September 2002, CAPE installed two additional groundwater monitoring wells (MW-14 and MW-15) along Avenue 33 near Lacy Street, to further assess the downgradient portion of the dissolved-phase plume. VOCs were not detected in the soil samples collected during well installation. Analytical results of the groundwater samples collected from both of these downgradient wells indicated that the dissolved-phase plume extends to these wells.

2004 UST removal (Cape, 2004)

In July 2004, CAPE oversaw the removal of a single, 1,000-gallon steel UST, of unknown contents. The UST was discovered by geophysical means by UltraSystems Environmental in July 2002. Based on the location of the UST relative to well MW-6 and boring SB-15 as shown on the Site Plan in the UST closure report, the UST was located in the same location as five USTs (two 250-gallon, one 550-gallon, and two 1,250-gallon) that were documented as being removed in 1989. A single soil sample (UST-EX Bottom) was collected from beneath the UST, and laboratory analysis indicated that TPHg, VOCs (including BTEX), ethanol, and methanol were not detected.

2006 Supplementary site assessment (ENSR, 2007)

In February, March and April 2006, ENSR conducted supplementary assessment of chemical impacts to soil and groundwater in two areas -- the former dry cleaning and solvent storage area north of the North Building Complex (AOC #2), and the area at the southwest corner of the site where elevated VOC concentrations were detected in the 2002 soil gas survey (AOC #4). Soil samples were collected and analyzed from 13 soil borings, and a cluster of three newly installed groundwater monitoring wells screened across different depth intervals.

Based on the assessment findings, approximately 7.7 kilograms (kg) of PCE, 1.9 kg of TCE, and 0.25 kg of cDCE are estimated to remain in soil at the site. Over 75 percent of the chemical mass occurs in soil within 10 feet of the water table in a 2,800-square-foot area centered beneath the area of the former solvent tanks. The maximum concentrations of key indicator compounds detected in soil during the 2006 assessment activities are as follows:

VOC	Sample Location	Concentration (ug/kg)
PCE	SB-38 at 35 fbs	32,000
TCE	SB-39 at 35 fbs	1,900
cDCE	SB-43 at 45 fbs	730

Results of soil sampling from boring SB-35 at the southwest corner showed no significant impacts by VOCs. A Hydropunch™ sample collected from boring SB-35 contained PCE, TCE, and cDCE at concentrations similar to those detected in nearby upgradient well MW-10A. Based on the absence of elevated VOC concentrations in the soil samples and the similarity of the dissolved-phase constituents detected in the groundwater, it is believed there is no separate source area in the southwest corner where elevated PCE concentrations had been reportedly measured at soil vapor sampling point SV-10 in 2001 (Cape 2002).

Quarterly groundwater monitoring of dissolved VOC concentrations in the on-site well cluster installed to assess the vertical concentration gradient shows that concentrations in the top ten feet of groundwater (35 to 45 fbs) are 5 to 100 times greater than in groundwater at 80 to 95 fbs (ENSR, 2007a).

3.0 Field Sampling Plan

In general, the additional site investigation will include collection of 58 samples of soil from near-surface and the vadose zone, 18 samples of soil and 6 samples of groundwater from the saturated zone, and 24 samples of soil gas samples from multiple depths in the vadose zone. The overall sampling and analysis program is summarized in **Table 1**, and the proposed sampling locations are shown in **Figures 5, 6, and 7**. The objectives, strategy and rationale for sampling each matrix are discussed in part **3.1** of this section. The sample collection activities and methodologies are described in part **3.2** of this section. The analytical methods and criteria for selecting samples for analysis are discussed in part **3.3**.

3.1 Data Quality Objectives

The specific objectives of the additional site investigation are:

1) Assess soil gas concentrations at multiple depths in each of the four AOCs and in areas of the site where analytical data is currently not available to determine the need for additional soil matrix sampling and volatile organic compound (VOC) testing;
2) Provide additional site characterization data of VOCs and petroleum fuel impacts in AOC #1 to evaluate whether any additional cleanup of this area is needed;
3) Delineate the vertical extent of VOC impacts in the soil matrix below the water table in AOC #2 to evaluate the need for whether any additional remediation is needed;
4) Assess VOC concentrations in soil and soil gas in AOC #3 to determine if there is a vadose zone source of VOCs (specifically cDCE) in this area and evaluate the need for whether any additional remediation is needed;
5) Assess the nature and extent of VOC impacts in soil gas in AOC #4 to evaluate the need for whether any additional characterization is required; and
6) Complete near-surface soil sampling to support risk-based site closure.

3.1..1 Near-Surface Soil Sampling and Analysis Program

The purpose for conducting the planned near-surface soil sampling and analysis is to complete the sampling program initiated when the 2006 site investigation activities were being overseen by the LARWQCB. The LARWQCB had requested that near-surface soil samples be collected from across the site and analyzed for general, non-source specific hazardous chemical impacts to support risk-based closure decision-making for the site. It had been agreed with the LARWQCB that near-surface soil samples would be collected from depths of 0.5 fbs, 5 fbs, and 10 fbs, and analyzed as follows:

- Soil samples collected from 0.5 fbs and 5 fbs are to be analyzed for the following parameters[1]:
  - 17 California Assessment Manual (CAM-17) metals by EPA Methods 6010C and 7471B,
  - Organo-chlorine pesticides by EPA Method 8081B, and
  - Polychlorinated biphenyls (PCBs) by EPA Method 8082A.

[1] Analysis of TVPH, TEPH, VOCs, and SVOCs was not specified for samples collected at 0.5 fbs because a release from buried piping was presumed to be the most likely source of these chemicals, and TVPH and VOCs were not considered a concern at such a shallow depth because they would be quickly volatilized.

- Soil samples collected from 5 fbs and 10 fbs are to be analyzed for the following parameters[2]:
  - o Total volatile petroleum hydrocarbons using a gasoline standard (TVPH) by modified EPA Methods 8015 or 8260B,
  - o Volatile organic compounds (VOCs) by EPA Method 8260B,
  - o Total extractable petroleum hydrocarbons (TEPH) with carbon-chain identification and using a diesel standard by modified EPA Method 8015, and
  - o Semivolatile organic compounds (SVOCs) by EPA Method 8270D

It had also been agreed with the LARWQCB that one set of near-surface soil samples would be collected for every 3,600 square feet in possible source areas, i.e. in each AOC, and for every 14,400 square feet in the remaining areas of the site. During the 2006 site investigation, near-surface soil samples were collected at depths of 0.5 fbs, 5 fbs, and 10 fbs from six borings located in the following areas as indicated in **Figure 7**:

- Samples were collected from AOC #2 at locations SB-31, -36, -37 and -41,
- Samples were collected from AOC #4 at location SB-35, and
- Samples were collected from the general site area at locations SB-33 and -34.

The sampling and analysis plan for the remaining portion of the near-surface soil sampling program is indicated in **Table 1** and **Figure 7**. Based on comments by the DTSC, the near-surface soil sampling program will be modified as follows:

- Analysis of organic lead by California Method 939-M will be done for near-surface samples that are also being evaluated for fuel hydrocarbons, i.e., the samples collected at 0.5', 5' or 10' fbs;
- Two soil samples will be collected from the specified near-surface boring locations instead of three, and the samples will be collected at 0.5 fbs and 10 fbs at borings located near a former UST or sump feature, otherwise they will be collected at 0.5 fbs and 5 fbs; and
- Soil samples collected at 0.5 fbs in the general site area (i.e., at the proposed locations of VP-8, SB-45, and SB-47) will also be evaluated for TEPH and SVOCs.

A sufficient number of near-surface soil samples have been collected from AOC #2 and #4 during the 2006 site investigation. To complete the near-surface soil sampling program, additional near-surface soil samples will be collected from the nine proposed boring locations indicated in **Figure 7**. Five of the proposed boring locations will be completed as soil vapor probe nests and are identified as VP-2, -3, -5, -6 and -8. The other four are identified as proposed soil borings SB-44, -45, -46 and -47. The rationale for each proposed near-surface boring and the respective sampling depths are as follows:

Near-Surface Soil Sampling Location Rationale

Boring ID	Sample Depths	Area Assessed	Presumed Source
VP-2	0.5 fbs, 10 fbs	AOC #3	800-gal sump & clarifier
VP-3	0.5 fbs, 10 fbs	AOC #3	1,700-gal solvent sump
VP-5	0.5 fbs, 10 fbs	AOC #3	1,000-gal gasoline UST & piping
VP-6	0.5 fbs, 10 fbs	AOC #1	10,000-gal gasoline UST & piping
VP-8	0.5 fbs, 5 fbs	General Site	Vehicle garage / maintenance
SB-44	0.5 fbs, 10 fbs	AOC #3	Pole-mounted Transformers + 1,000-gal fuel oil UST
SB-45	0.5 fbs, 5 fbs	General Site	Aboveground, wooden, M.U. tanks
SB-46	0.5 fbs, 10 fbs	AOC #1	2,000-gal diesel UST & piping
SB-47	0.5 fbs, 5 fbs	General Site	Aboveground operations in South Buildings

[2] Analysis of pesticides and PCBs was not specified for samples collected at 10 fbs because an above grade release or application of materials at ground surface was presumed to be the most likely source for these chemicals.

3.1..2 Subsurface Soil Sampling and Analysis Program

Soil samples will be collected during drilling of eight auger boreholes that will be used for the completion of multi-depth soil vapor probes. In addition to any near-surface soil samples discussed in the previous section, soil samples will be collected from various depths for analysis to achieve the following objectives:

- Samples of vadose soil will be collected at 5, 20 and 30 fbs at each boring and analyzed for VOCs (including TVPH) to characterize the soil conditions at the specified soil gas probe depths;
- Soil samples will be collected from VP-1 at 5 foot intervals between depths of 10 and 35 fbs and used to compare to 2006 assessment findings at borings SB-38 and -39. However, if results from VP-1 do not show a similar level (same order of magnitude) of chemical impact to samples collected from the capillary fringe of SB-38 and SB-39, then deeper saturated soil samples may not be representative of the impacts in saturated soil in the immediate area;
- Soil samples will be collected from VP-1 at 5 foot intervals between depths of 40 and 70 fbs, and used to evaluate the vertical extent of chemical impacts in saturated soil in the area previously found to be most affected with chlorinated VOCs;
- Soil samples will be collected from VP-2, -3, -4, -5 and -6 at 35 and 40 fbs, and used to determine whether chemical impacts extend significantly into saturated soil in the source areas; and

Subsurface Soil Sampling Rationale

Boring ID	Location	Sample Depths	Objective
VP-1	AOC #2	10 to 35 fbs @ 5' 5, 20, 30 fbs 35 to 70 fbs @ 5'	Compare to 2006 findings Soil conditions at vapor probes Extent of VOC in saturated zone
VP-2	AOC #3	10 to 35 fbs @ 5' 5, 20, 30 fbs 35 and 40 fbs	Assess impacts to vadose soil Soil conditions at vapor probes Extent of VOC in saturated zone
VP-3	AOC #3	10 to 35 fbs @ 5' 5, 20, 30 fbs 35 and 40 fbs	Assess impacts to vadose soil Soil conditions at vapor probes Extent of VOC in saturated zone
VP-4	AOC #2	10 to 35 fbs @ 5' 5, 20, 30 fbs 35 and 40 fbs	Assess impacts to vadose soil Soil conditions at vapor probes Extent of VOC in saturated zone
VP-5	AOC #3	10 to 35 fbs @ 5' 5, 20, 30 fbs 35 and 40 fbs	Assess impacts to vadose soil Soil conditions at vapor probes Extent of VOC in saturated zone
VP-6	AOC #1	10 to 35 fbs @ 5' 5, 20, 30 fbs 35 and 40 fbs	Assess impacts to vadose soil Soil conditions at vapor probes Extent of VOC in saturated zone
VP-7	AOC #4	10 to 30 fbs @ 5' 5, 20, 30 fbs	Assess impacts to vadose soil Soil conditions at vapor probes
VP-8	Vehicle Garage	10 to 30 fbs @ 5' 5, 20, 30 fbs	Assess impacts to vadose soil Soil conditions at vapor probes

Groundwater samples will also be collected from the shallowest observed depth during advancement of borings VP-1, -2, -3, -4, -5 and -6 to evaluate chemical impacts in the saturated soil in the source areas. A groundwater sample was collected from boring SB-35 in AOC #4 in 2006, so no additional groundwater sampling will be done at that location.

3.1..3 Soil Gas Sampling and Analysis Program

The sampling and analysis plan for the soil gas sampling program is summarized in **Table 1**. Soil gas samples will be collected from eight, semi-permanent, nested, multi-depth, soil vapor probes that will be completed in auger boreholes drilled as part of the proposed site investigation. The soil lithology and targeted depth of completion preclude the installation of temporary vapor probes by direct-push methods.

Each vapor probe nest will consist of four probes installed at 5, 10, 20 and 30 fbs. Analytical results of soil gas samples collected from the probes set at 5 fbs will be utilized in indoor air vapor intrusion risk screening calculations. Analytical results of soil gas samples collected from the deeper probes will be used to evaluate the extent and mass of VOCs in the soil gas plume and evaluate relationships to the distribution of VOCs in the soil matrix. TVPH will be included in the set of analytes reported by EPA Method TO-15. Chemical mass calculations and supporting documentation shall first be submitted to the DTSC for approval if the finite mass of VOCs is to be a factor in risk calculations.

The approximate locations of the soil vapor probes are shown on **Figure 6** (adjustments to specific probe locations may be made to accommodate subsurface obstructions). The rationale for the location of each vapor probe nest is as follows:

Soil Vapor Probe Sampling Rationale

Probe ID	Location	Objectives
VP-1	AOC #2	Verify or update 2001 findings at SV-42 (ND<1 ug/L PCE in soil gas at 4.5 fbs) Evaluate extent of VOCs in soil gas plume to north at 5, 20 & 30 fbs Compare concentrations in soil gas plume to 2006 soil plume concentrations
VP-2	AOC #3	Verify or update 2001 findings at SV-34 (5.4 ug/L PCE in soil gas at 10 fbs) Evaluate extent of soil gas plume to east at 5, 20 & 30 fbs Screen west side of AOC #3 for VOC sources (esp. cDCE) in vadose soil
VP-3	AOC #3	Verify or update 2001 findings at SV-37 (19 ug/L PCE in soil gas at 6 fbs) Screen east side of AOC #3 for VOC sources (esp. cDCE) in vadose soil
VP-4	AOC #2	Verify or update 2001 findings at SV-39 (22 ug/L PCE in soil gas at 5.5 fbs) Evaluate extent of VOCs in soil gas plume to east at 5, 20 & 30 fbs Compare concentrations in soil gas plume to 2006 soil plume concentrations
VP-5	AOC #3	Evaluate extent of VOCs in soil gas plume to east at 5, 20 & 30 fbs Screen south side of AOC #3 for VOC sources in vadose soil
VP-6	AOC #1	Evaluate VOCs remaining in soil and soil gas at AOC #1
VP-7	AOC #4	Verify or update 2001 findings at SV-10 (260 ug/L PCE in soil gas at 10 fbs) Screen southwest portion of site for VOC sources in vadose soil
VP-8	Vehicle Garage	Verify 2001 findings at SV-1, -2, -3 (ND< 1 ug/L PCE in soil gas at 10 fbs) Screen southeast portion of site for VOC sources in vadose soil

3.2 Sample Collection

3.2..1 Permits

Soil borings completed into groundwater require a well permit from the County of Los Angeles Department of Public Health Environmental Health Division. Permits are not required for borings that are inadvertently drilled into groundwater as long as no groundwater samples are collected. Permits are not required for vapor wells or vapor probes. However, under the proposed scope of work, permits will be required for soil borings drilled for soil vapor probe nests VP-01 through VP-06 since these are planned to be advanced into the saturated zone with collection of groundwater samples from the borings.

3.2..2 Health and Safety

A site-specific health and safety plan (HASP) has been prepared to help ensure protection of the site assessment team and site visitors during field activities. The HASP contains information concerning the potential hazards expected at the site, procedures for proper handling of potential hazardous materials/waste or conditions at the site, personal protective equipment, and monitoring instrumentation, and action levels. It has been prepared in accordance with the Code of Federal Regulations (CFR), 29 CFR 1910.120, and the California Code of Regulations (CCR), 8 CCR 5192. Copies of the HASP will be kept with the field assessment team. Each member of the field assessment team, including subcontracted personnel and site visitors will be required to read and sign the HASP. A copy the HASP is included in **Appendix B**.

Prior to beginning the field program, a comprehensive kick-off meeting will be conducted to discuss the scope of work, and health and safety issues. In addition, tailgate safety meetings will be held prior to beginning each day of field work to discuss specific hazards associated with the activities planned to be completed that day.

3.2..3 Pre-Drilling Clearance

Underground Service Alert of Southern California (DigAlert) will be notified at least 48 hours prior to performing the field work for the member companies to mark utilities that may conflict with the proposed boring locations. In addition to the DigAlert clearance, each boring will be advanced to a depth of at least five feet bgs using a manually operated hand auger as a precautionary measure to avoid possible subsurface obstructions or utilities. There is a 40-foot wide sewer easement that runs along the driveway, and although no borings are planned to be located within that area, if borings are relocated into that area they should be cleared to 10 feet bgs because of the deep burial typical for sewer lines. If no subsurface obstructions or utilities are encountered, drilling will be continued using mechanically-driven drilling rigs. If a subsurface obstruction is encountered, the location of the boring will be moved.

3.2..4 Soil Sampling

Soil samples will be collected at five-foot depth intervals to the terminal depth in each boring. Samples from 5 fbs will be collected by hand auger drilling methods during borehole clearance. In soil borings advanced using hollow stem auger methods, soil samples will be collected using a split-spoon sampler equipped with 6-inch brass or stainless steel sample sleeves. In soil borings drilled using a hand auger; samples will be collected using a hand-driven stainless steel sampling device fitted with brass or stainless steel sampling liners.

Collected soil samples will be will be examined for soil classification and lithologic description at each sampling depth and classified according to the Unified Soil Classification System. Soil samples will be field screened for volatile organic vapors using a photoionization detector (PID) equipped with a 10.6 electron volt lamp, and observed for visual and olfactory evidence of impacted soil. The results of the field screening and a description of the vertical variations in lithology, water-content, odor, color, and texture of the soil will be recorded in field boring logs.

Soil samples, in stainless steel or brass sample sleeves, will be sealed with Teflon®, capped, labeled, and placed on ice awaiting transport to a state-certified laboratory for analysis. Samples collected for analysis of volatile organic compounds (VOCs) and volatile total petroleum hydrocarbons will be preserved in the field in accordance with U.S. EPA Method 5035 protocol.

The sample containers will be labeled, packaged, placed in a chilled ice chest, and transported with a completed chain-of-custody document to a State-certified laboratory for analyses within twenty four hours after sampling.

3.2..5 Groundwater Sampling from Soil Borings

Groundwater samples will be collected from selected borings using a discrete, single-interval, groundwater sampling device such as a Hydro-Punch®, or equivalent. Samples will be collected by first drilling to a targeted depth using an auger drill rig, and then assembling the sampling device within the hollow stem augers according to the manufacturer's instructions, and driving it approximately 2 feet below the bottom of the borehole (or about 3.5 feet below the bottom of the augers when collection of soil samples are allowed for). A fine mesh filter screen with a disposable tip is typically attached to the end of the sampling device, and after driving it into the soil ahead of the augers, the rods will be retracted to expose the filter screen and allow groundwater infiltration.

Groundwater flowing into the screened portion of the sampling device will be extracted using a small-diameter disposable bailer, which will be lowered into the boring and allowed to completely fill with water. The bailer will then be raised and a disposable sampling spigot will be fitted into the bottom of the bailer so that a slow, steady stream of water is released directly into three 40-mL glass vials at an angle to avoid aeration.

The 40-ml glass vials will contain a hydrochloric acid preservative. The sample containers will be labeled, packaged, placed in a chilled ice chest, and transported to a State-certified laboratory for analyses within twenty four hours after sampling.

3.2..6 Borehole Backfill and Surface Repair

Upon completion of soil sampling, boreholes not being converted to wells or vapor probe nests will be backfilled with bentonite chips and hydrated sufficiently to ensure a proper seal. Pavement will be restored with like construction flush with the surrounding grade.

3.2..7 Groundwater Monitoring Well Abandonment

Attempts will be made to locate groundwater monitoring wells MW-4, -11 and -12, which were lost and destroyed during site grading activities by the City of Los Angeles. The well locations identified based on records of surveyed locations, and limited exploratory excavation will be conducted in the identified locations to attempt to find any remains of well boxes, well casing, or grout. Once the wells are located, they will be abandoned in accordance with standard monitoring well decommissioning protocol. A California-certified well driller will first re-drill the annular space around the well to its full depth, then the open hole will be backfilled to the surface with an impermeable, high-solid bentonite-grout.

3.2..8 Installation of Nested, Multi-Depth, Soil Vapor Probes

Semi-permanent, multi-depth soil vapor probes will be constructed as indicated in **Figure 8**. Probes will be placed within a common borehole after the drill rod has been removed at depths of 5, 20 and 30 fbs. Each soil vapor probe will consist of a ¼-inch diameter flexible polyethylene tubing attached to a screened probe constructed of a 3/8-inch diameter by six-inch long mesh (stainless steel, poly-vinyl chloride, or ceramic). Probes will be emplaced midway within 1-foot thick sand packs intervals consisting of #3 Monterey sand. Approximately 1 foot of dry bentonite will be placed above the sand pack before adding hydrated bentonite grout or concrete grout to two feet below ground surface. The ground surface end of the tubing will be outfitted with a self-closing quick-connect fitting. Each probe nest will be contained in an aboveground steel well monument with hinged, locking lid. The end of each tubing will be labeled with the probe identification and depth; i.e., VP-1-5, VP-1-20, and VP-1-30).

Once installed, the semi-permanent wells will be allowed to equilibrate for approximately 48 hours before sampling.

3.2..9 Soil Gas Sample Purge Volume Determination

A purge volume test will be conducted for each probe that has a different soil type (i.e. sand, silt, clay, etc.). The purge volume test will be conducted utilizing a State-certified mobile laboratory equipped to analyze soil gas by EPA Method 8260. Purging will be accomplished using a sample pump at a rate of approximately 200 milliliters per minute. At least 48 hours of equilibration time will be allowed following well completion before commencing purge volume tests.

A purge volume is equivalent to the volume of the probe, tubing, and the pore space of the filter pack surrounding the probe. For a probe installed in an 8-inch diameter boring with 12 inches of filter pack, the volume of the probe and pore space of the filter pack will be approximately 3.5 liters, and the volume of the connecting ¼-inch OD tubing will be approximately 0.3 liters per 100 feet. Therefore, at a purge rate of 200 milliliters per minute, 18 minutes will need to be allowed to extract each purge volume.

A soil gas sample will be collected using a glass syringe after one, three, and seven purge volumes have been extracted for a total of three representative purge volume samples. Isopropyl alcohol will be utilized to test leaks into the boring around the well head. The purge volume associated with the highest VOC measurement will become the standard purge volume for that probe as well as any others with similar soil type.

3.2..10 Soil Gas Sample Collection

Fieldwork procedures for soil gas sample collection and analysis will be performed in accordance with the Los Angeles Water Quality Control Board (LARWQCB) and DTSC Advisory for Active Soil Gas Investigations dated January 28, 2003. After the derived purge volume is extracted (at approximately 200 milliliters per minute) from each probe, a sample of soil gas will be collected using a glass syringe for immediate analysis via modified EPA 8260 at an on-site, State-certified, mobile laboratory.

Prior to sample collection, towels saturated with isopropyl alcohol or a shroud containing 1,1-difluoroethane gas will be placed around the probes at the well head and at fittings to provide a leak tracing agent during sampling. Detections of the leak tracing compound in excess of 10 µg/L will be the criterion used for rejection of the sample result.

3.2..11 Decontamination

Prior to sampling and between samples, all reusable sampling equipment will be decontaminated by washing in a phosphate-free detergent and water solution, followed by a double-rinse with water. After sample collection, the disposable sampling supplies such as bailer, spigot, nylon cord, and nitrile gloves will be disposed of, and reusable sampling supplies will be decontaminated prior to reuse at each well.

Drilling and sampling equipment, sample liners, and soil sampling tools that come in contact with soil will be cleaned after completing each boring using a steam cleaner. Decontamination water will be contained in DOT-approved drums and temporarily stored on site.

3.2..12 Management of Investigation Derived Wastes

All waste materials generated during soil, soil-gas, and groundwater assessment will be temporarily stored on site in new, 55-gallon, DOT-17H steel drums with removable heads. A label will be affixed to each drum stating ‘This Container on Hold Pending Analysis’ and will include the date of accumulation, contents (soil, groundwater, decon water, sampling materials, etc), the origin (boring or well identification number and depth interval at which the waste was generated), site address, and contact name and phone number.

After receipt of analytical results, the drums will be relabeled as either hazardous waste or non-hazardous waste depending on the results of analysis of samples collected from the nearest depth interval to that contained in the drum.

Hazardous waste and non-hazardous waste soil and hazardous wastewater will be transported under manifest to the Clean Harbors Class I disposal facility in Buttonwillow, California.

Non-hazardous water will be transported to Siemens Water Technology in Los Angeles for recycling under waste profile BESI#144111.

3.2..13 Survey of Well and Boring Locations

The longitude, latitude, and elevations of borings and wells will be surveyed by a State licensed land surveyor to a City or County benchmark. Elevations of wells will include elevations to the top of the well casing, and to the top of the grade ring for well boxes, or to the top and base of aboveground well monuments.

3.3 Sample Analysis

The subsurface assessment will evaluate soil, groundwater, and soil gas samples for the presence of TVPH, TEPH, VOCs, SVOCs, PCBs, pesticides, organic lead, and CAM 17 metals. Not all of the samples submitted to the analytical laboratory will be analyzed for all of the test methods to be employed site-wide. The sample-specific analytical program for each sample is summarized in the sampling and analytical program listed in **Table 1**.

3.3..1 Soil Analyses

The overall planned soil sample analytical program is shown below:

- TVPH – EPA Method 8015 Modified;
- TEPH – EPA Method 8015 Modified;
- VOCs – EPA Method 8260B/5035;
- SVOCs – EPA Method 8270D
- Organo-chlorine pesticides – EPA Method 8081B
- PCBs – EPA Method 8082A
- 17 CAM Metals - EPA Methods 6010B/7471C (ICP/AA); and
- Organic Lead – California Method 939-M.

Samples will initially be selected for analysis in accordance with the sampling program outlined in **Table 1**, which specifies the sample depth, analytical tests, and samples to be held for analysis at each boring location. Soil samples from alternate depth intervals in the borings may be analyzed for VOC using EPA Method 8260B, and the remaining samples placed on hold with the laboratory for future analyses pending initial results. Generally, samples on hold will be released for analysis when adjacent samples have detectable VOC concentrations.

3.3..2 Groundwater Analyses

Six groundwater samples will be collected from borings VP-1 through VP-6 and submitted for VOC analysis by EPA Method 8260B. The detection limits for the analysis will be at least equal to the respective California Maximum Contaminant Levels (MCLs) for drinking water.

3.3..3 Soil Gas Analyses

A State-certified, on-site, mobile laboratory will be utilized to analyze soil gas samples for VOCs using United States Environmental Protection Agency (U.S. EPA) Method 8260 modified for soil gas analysis. The analytical suite will include PCE, TCE, c-DCE, vinyl chloride, benzene, toluene, ethylbenzene, total xylenes, and total volatile petroleum hydrocarbons). With the exception of vinyl chloride, the detection limits for the EPA Method 8260 analytes will at least equal the shallow soil gas human health screening levels for vapor

intrusion available in the *Use of California Human Health Screening Levels in Evaluation of Contaminated Properties*[3].

Soil gas samples will also be collected in 6-L Summa canisters from up to four locations for the purpose of measuring vinyl chloride. Preference will be given to collecting the Summa samples at the 5-foot depth in source areas to support health risk evaluations associated with indoor vapor intrusion. The Summa canisters will be analyzed at a fixed laboratory by EPA Method TO-15 with a detection limit of 0.5 µg/m^3 for vinyl chloride.

A list of VOC compounds and detection limits is provided in **Appendix C**.

3.4 Quality Assurance / Quality Control

This project will incorporate certain specified protocols to document the quality of the data collected during this site investigation. Soil and groundwater samples will be collected in compliance with EPA SW-846, and soil gas samples will be collected in compliance with the *Advisory – Active Soil Gas Investigations* (DTSC 2003). Sample analyses will be performed by laboratories certified by the National Environmental Laboratory Accreditation Program (NELAP) for the analyses requested.

An integral part of the sampling and analysis plan is a quality assurance/quality control program to ensure the reliability and compatibility of all data generated during the site investigation. The Quality Assurance Project Plan (QAPP) (**Appendix C**) provides specific descriptions of the field and laboratory procedures to be employed for verifying and maintaining performance quality for collection of environmental samples and subsequent chemical analysis. The QAPP sets forth the policies, procedures and activities for identifying, evaluating and documenting data quality.

The laboratory detection limits used will be below the EPA Region 9 Preliminary Remediation Goals (PRGs) for direct contact with soil in a residential exposure scenario, the PRGs listed soil screening levels for groundwater protection with a dilution attenuation factor of 1, and the California Human Health Screening Levels (CHHSLs), when applicable. Required detection limits are listed in **Appendix C**.

Field duplicates will be collected for QC samples at a rate of 5% of the primary samples and analyzed for the same constituents. Other aspects of the laboratory QA/QC program include calibration checks, matrix spike/matrix spike duplicates (MS/MSD) and laboratory control check samples (LCS).

One equipment blank will be obtained for analysis each day that non-disposable sampling equipment is utilized that comes into contact with the samples. The equipment blank is a vial of distilled water that is circulated through sampling equipment after decontamination, and is used to provide an indication of contamination introduced as a result of contamination resulting from sampling, equipment decontamination, or shipping procedures.

A trip blank will be analyzed for each day that liquids containing VOCs are sampled and a field blank or equipment blank is not being analyzed. The trip blank is a vial of distilled water included in the thermally-insulated ice chest during sampling and shipping. The trip blank will reside in the cooler with the samples and will be analyzed for VOCs by EPA Method 8260C. It is used to provide an indication of contamination introduced as a consequence of the sample shipping and handling activities.

[3] Use of California Human Health Screening Levels (CHHSLs) in Evaluation of Contaminated Properties, California Environmental Protection Agency, January 2005.

4.0 Baseline Health Risk Assessment Plan

Following the completion of the field activities and receipt of the analytical results, a baseline health risk assessment (BHRA) will be conducted. The purpose of the BHRA will be to estimate potential risks to human health from exposure to soil, soil gas, and groundwater at the site. The results of the BHRA will be used to evaluate whether further site characterization, additional risk assessment, or remedial action is necessary.

The BHRA will be conducted using the following four steps, as identified by the United States Environmental Protection Agency (USEPA, 1989):

- Data Evaluation
- Dose-Response Assessment
- Exposure Assessment
- Risk Characterization

USEPA guidance for baseline risk assessments will be followed, rather than California EPA's Preliminary Endangerment Assessment (PEA) Guidance Manual (CalEPA, 1994); because the PEA provides screening risk equations that only evaluate residential exposure. At this site, on-site worker and construction worker exposures are also possible. The default exposure parameters in the CalEPA Human Health Risk Assessment (HHRA) Note No. 1 (http://www.dtsc.ca.gov/AssessingRisk/upload/HHRA Note1.pdf) will be utilized to calculate reasonable maximum exposure (RME) estimates for residential, industrial, and construction worker receptors in the health risk assessment.

4.1 Data Evaluation

The purpose of the Data Evaluation is to compile the data collected at the site and summarize it for the purposes of the BHRA. The database will consist of data generated during the 2001 soil gas survey by CAPE, during the 2006 supplemental site investigation by ENSR, and during the subject additional site characterization. Data are available for soil, soil gas and groundwater; however, at this time it is uncertain what protocol was utilized during the 2001 soil gas survey. If the 2001 soil gas survey data are material to the health risk assessment, the protocol used in collecting and analyzing the samples will be discovered and attached to the ASC/BHRA report to facilitate evaluation.

For each medium, the data will be compiled into summary statistics. For each chemical, the statistics include the minimum and maximum detected concentrations, frequency of detection, and arithmetic mean concentrations. The Risk Assessment Guidance for Superfund: Volume I – Human Health Evaluation Manual, Part A (USEPA, 1989) will be used to develop the summary statistics.

Maximum soil gas and groundwater concentrations will be used to develop exposure point concentrations in accordance with the Interim Final Guidance for the Evaluation and Mitigation of Subsurface Vapor Intrusion to Indoor Air (DTSC, 2005).

In accordance with comments provide by the Department of Toxic Substances Control (DTSC; letter dated November 29, 2007), chemicals will not be initially screened using generic screening criteria. Instead, all detected organic chemicals will be retained as chemicals of potential concern (COPCs). Inorganic chemicals will be screened against relevant background levels, and any metals detected above background will also be retained as COPCs.

4.2 Dose-Response Assessment

The dose-response assessment involves identifying the types of adverse health effects a chemical may potentially cause, and to define the relationship between the dose of a chemical and the likelihood or magnitude of an adverse effect (response) (USEPA, 1989). Adverse effects are classified by USEPA as potentially carcinogenic or noncarcinogenic (i.e., potential effects other than cancer). Oral and inhalation dose-response values will be selected from primarily from California EPA's Office of Environmental Health Hazard Assessment (CalEPA) (2005a and b). USEPA sources will be consulted for any chemicals that do not have dose-response values listed by CalEPA. These sources include USEPA's Integrated Risk Information System (IRIS, USEPA, 2008) and USEPA's National Center for Environmental Assessment (NCEA). Combining the results of the dose-response assessment with information on the magnitude of potential human exposure provides an estimate of potential risk.

4.3 Exposure Assessment

The exposure assessment involves identifying receptors and exposure pathways. Although the site is currently industrial, a future on-site residential scenario will be evaluated to determine whether the site could pose unacceptable risks to potential future residents. Potential off-site receptors will also be evaluated. Based on potential land uses, the following receptors and exposure pathways will be evaluated:

On-site indoor worker – It will be assumed that an on-site indoor worker could be exposed through inhaling volatilized chemicals that have migrated from soil or groundwater to indoor air. The indoor air inhalation pathway will be modeled using CalEPA's version of the Johnson and Ettinger indoor air model (CalEPA, 2005b). Soil gas data will be used for the modeling effort.

On-site outdoor worker – It will be assumed that an on-site outdoor worker could be exposed to chemicals through incidental ingestion and dermal contact with affected soil, and through inhalation of vapors and particulates in outdoor air. Soil sampling results down to a depth of 10 feet will be used for these calculations, in accordance with DTSC's recommendation in its letter dated November 29, 2007.

On-site resident – A hypothetical future on-site resident will be evaluated. Both a child and adult resident will be evaluated. It will be assumed that an on-site resident could be exposed to chemicals through inhaling volatilized chemicals that have migrated from soil or groundwater to indoor air. Soil gas data will be used for the modeling effort. It will also be assumed that an on-site resident could be exposed to chemicals through incidental ingestion and dermal contact with affected surface soil, and through inhalation of vapors and particulates in outdoor air.

On-site construction worker – It will be assumed that an on-site construction worker could be exposed to chemicals through incidental ingestion and dermal contact with affected soil and groundwater, and through inhalation of vapors and particulates in outdoor air during an excavation activity.

Off-site resident – It will be assumed that an off-site resident located downgradient could be exposed through inhaling volatilized chemicals that could migrate from downgradient groundwater to indoor air. The indoor air inhalation pathway will be modeled using CalEPA's version of the Johnson and Ettinger indoor air model (CalEPA, 2005b). For the off-site resident pathway, downgradient groundwater data will be used for the modeling effort.

Off-site indoor worker – It will be assumed that an off-site worker located downgradient could be exposed through inhaling volatilized chemicals that could migrate from downgradient groundwater to indoor air. For the off-site worker pathway, downgradient groundwater data will be used for the modeling effort.

Appropriate exposure assumptions will be developed for each of the receptors and exposures will be calculated using equations provided in USEPA (1989), and the default exposure parameters in the CalEPA Human Health Risk Assessment (HHRA) Note No. 1.

4.4 Risk Characterization

The risk characterization is the process in which the dose-response information is integrated with quantitative estimates of human exposure derived in the exposure assessment. The result is a quantitative estimate of the likelihood that humans will experience any adverse health effects given the exposure assumptions made. Two general types of health risk are characterized for each potential exposure pathway considered: potential carcinogenic risk and potential noncarcinogenic risk.

The purpose of carcinogenic risk characterization is to estimate the upper-bound likelihood, over and above the background cancer rate, that a hypothetical receptor will develop cancer in his or her lifetime as a result of exposure to environmental chemicals. The total potential cancer risk is compared to USEPA's target cancer risk range of 10^{-4} to 10^{-6} (one in ten thousand to one in one million).

Noncarcinogenic risk is expressed as a Hazard Index (HI), which is a ratio of the estimated dose of a chemical at a site over a threshold dose. When the HI is less than 1, the target has not been exceeded, and no adverse noncarcinogenic effects are expected. If the HI is greater than 1, there may be a potential for adverse noncarcinogenic health effects to occur; however, the magnitude of the HI cannot be directly equated to a probability or effect level. Where the total site HI is greater than 1 for any receptor, a more detailed evaluation of potential noncarcinogenic effects based on specific health or target endpoints (e.g., liver effects, neurotoxicity) is performed (USEPA, 1989). The target HI is 1 on a per target endpoint basis.

The final health risk assessment will present the uncertainties on the risk estimates. This discussion will include major uncertainties associated with the various steps of the risk assessment, and possible effects on risk estimates for the site.

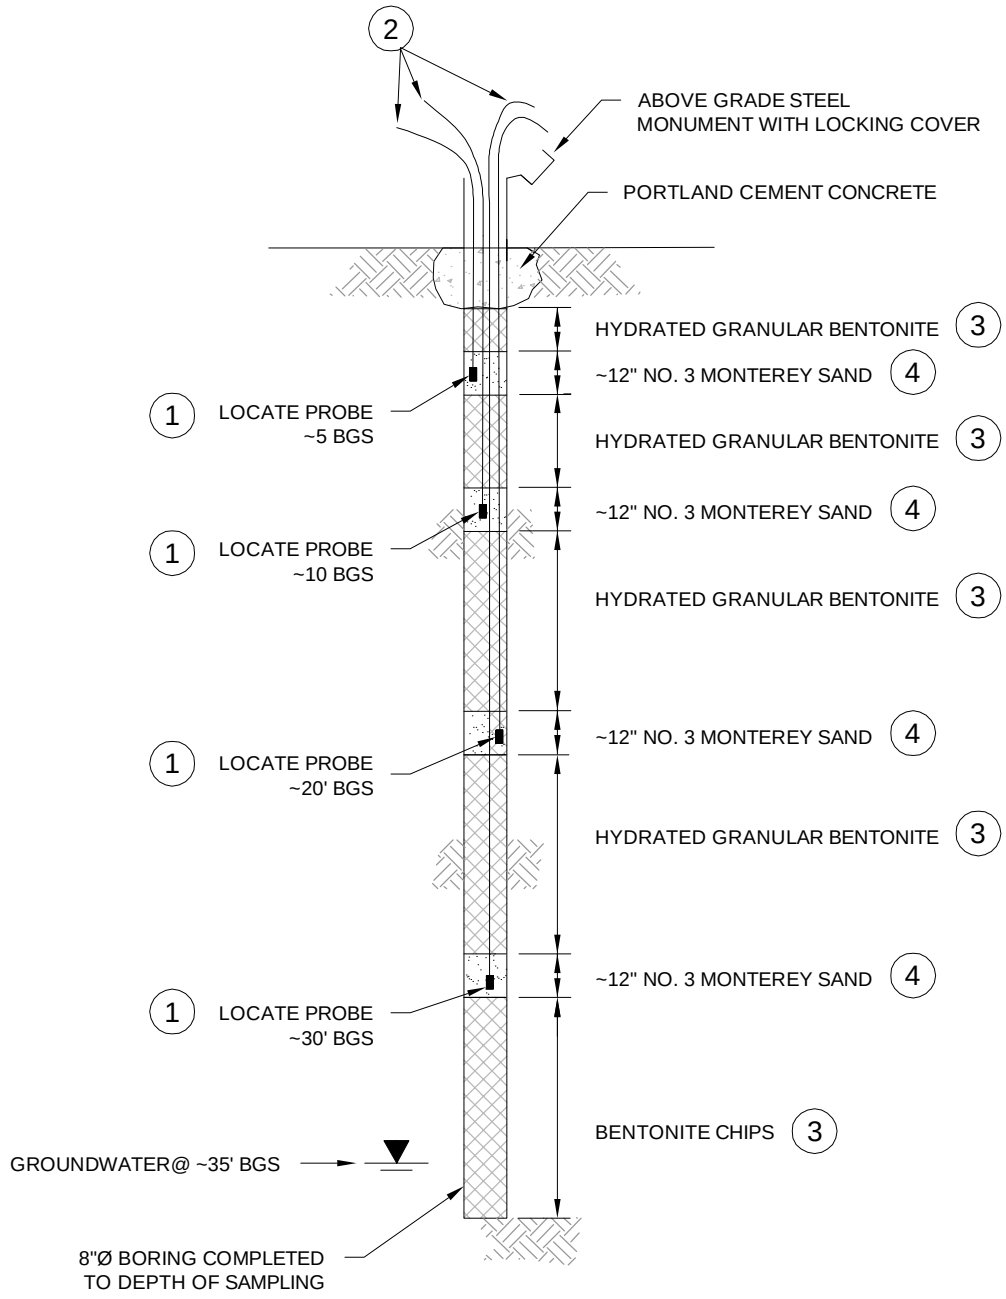
NEAR-SURFACE SOIL SAMPLE LOCATIONS

Former Welch's Uniform Facility
3505 Pasadena Avenue
Los Angeles, California

SCALE: 1" = 80'
DATE: 06/08/07
PROJECT NUMBER: 10770-003-500

FIGURE NUMBER: 7

FILENAME: 1077000350



NOTES:

1. 3/8"Ø X 6" LNG S.S. MESH PROBES
2. 1/4" O.D. NYLON TUBING WITH AUTO-CLOSING QUICK DISCONNECTS
3. TREMMIE AND HYDRATE BENTONITE IN 6" LIFTS
4. INCLUDE APPROX. 2" OF #2/12 - #2/16 FINE SAND AT TOP AND BOTTOM OF EACH 12" SAND INTERVAL TO HELP PREVENT BENTONITE FROM PLUGGING FILTER PACK AROUND PROBE. MINIMIZE HYDRATION IN FIRST LIFT OF BENTONITE ABOVE SAND INTERVAL.

NOT TO SCALE

SUPPLEMENTAL SITE ASSESSMENT REPORT AND SITE CONCEPTUAL MODEL UPDATE, FORMER WELCH'S UNIFORM FACILITY, 3505 PASADENA AVENUE, LOS ANGELES, CALIFORNIA

Dear Mr. Otter:

The Department of Toxic Substances Control (DTSC) has reviewed the Supplemental Site Assessment Report and Site Conceptual Model Update (SSAR/SCMU) dated September 2007 for the subject site.

Enclosed are the comments of the DTSC toxicologist and geologist on the SSAR/SCMU. The comments identified deficiencies in the SSAR/SCMUEA that require additional site characterization. Please submit Additional Site Characterization/Baseline Health Risk Assessment Workplan to DTSC by January 15, 2008.

If you have any questions, please contact Mr. Alberto Valmidiano, Project Manager, at (818) 551-2870 or me, at (818) 551-2980.

Sincerely,

Juli Oborne
Unit Chief
Southern California Cleanup Operations Branch – Glendale Office

MEMORANDUM

TO : Alberto Valmidiano
Project Manager
Site Mitigation Program

FROM : John A. Naginis, PG
Senior Engineering Geologist
Geological Services Unit

CONCUR : Craig Christmann, PG
Senior Engineering Geologist
Geological Services Unit

DATE : November 28, 2007

SUBJECT: Geologic Services Unit (GSU) review of Supplemental Site Assessment Report and Site Conceptual Model Update, Former Welch's Uniform Facility, 3505 Pasadena Avenue, Los Angeles, California, Dated September, 2007

PCA 12020 Site Code 301314-11 Log No.: 73050 Zip Code: 90031

As requested, GSU staff have reviewed the above referenced Site Assessment Report (Report) prepared by ENSR Corporation for AmeriPride Services Inc. The document reviewed contains summaries of investigations performed at a former uniform dry cleaning facility. This site has a long history of dry cleaning operations dating back to about 1920. The Report contains summaries of previous investigations and underground storage tank (UST) removals that were performed at the site beginning in 1987. The most recent investigation was performed during 2006.

GSU staff reviewed the Report for conformance with DTSC guidance and for internal consistency. This memorandum contains general comments regarding overall Report contents as well as detailed comments regarding specific portions of the Report.

Questions regarding this memo should be directed to John Naginis at (818) 551-2194.

General Comments

1. Nature and Extent of Contamination

While four areas of concern (AOC) have been identified on the site, the nature and extent of contamination is not well documented in the Report, and it appears that additional investigation is required to fully characterize the site. The 2001 soil gas survey collected data from a single depth, and results of the soil gas survey did not correlate well with vadose zone contamination. For example, soil gas sampling points 40 and 42 were located on the southern and northern sides of the Area 2 vadose zone perchloroethylene (PCE) plume, and neither soil gas point detected PCE. GSU staff recommend installing multi-depth soil gas probes to fully characterize the areas of concern and to evaluate areas of the site where analytical data is not available. Once analytical data from the multi-depth soil gas survey is evaluated, the need for any additional soil matrix sampling and volatile organic compound (VOC) analytical testing can be determined.

2. Area of Concern #1 – Investigation Summary

Based on the condition of the UST removed from this area, observed soil staining, and the presence of non-aqueous phase liquids (NAPL) in this area, it is apparent that a release has occurred. The Report does not provide data to support the conclusion that this release has been characterized and remediated. A summary of investigation and remediation data that describe subsurface conditions in AOC #1 should be included in a future report or investigation workplan. The summary should be of sufficient detail to evaluate whether additional investigation or cleanup is needed.

3. Area of Concern #2 – Vertical Extent of Contamination and Remediation

A release beneath the former PCE tanks has been documented and the lateral extent of contamination has been well delineated in the vadose zone. However the vertical extent of the contamination has not been delineated. Soil sampling was conducted down to the water table, but the investigation did not extend below the water table. Due to the high concentrations of PCE and trichloroethylene (TCE) detected in soil at the water table, and the dense nature of these contaminants, the vertical extent of contamination below the water table requires delineation.

PCE and TCE contamination in Area of Concern #2 presents an ongoing source of groundwater contamination, consequently, the extent of contamination should be fully delineated and active remediation implemented.

4. Area of Concern #3 – Source of VOCs in MW-16

Well cluster MW-16, consisting of wells MW-16A, MW-16B and MW-16C, is located in AOC #3. Groundwater samples from Well MW-16A contain high concentrations of cis-1,2-Dichloroethylene (c-DCE). Soil gas and soil matrix sampling and analytical testing should be performed at AOC #3 to determine the extent of the vadose zone VOC source in this area and collect data necessary to implement an effective remedial effort.

5. Area of Concern #4 – Confirmation of Soil Gas Contamination

PCE was detected in the southwest corner of the former Welch's Uniform facility in soil gas during the 2001 soil gas survey, and also in soil matrix at boring SB-35. Multi-depth soil gas probes should be installed in AOC #4 to delineate the nature and extent of contamination within soil gas. Once analytical data from the multi-depth soil gas survey is evaluated, the need for any additional soil matrix sampling and VOC analysis can be determined.

6. GSU Conclusions

The current submittal does not fully address the nature and extent of contaminants detected at the site. An investigation workplan should be submitted that addresses the comments in this memo, and includes a proposed scope of work to delineate the lateral and vertical extent of contaminants in soil and groundwater.

The Report states that AmeriPride, the current property owner, is seeking a soil closure from DTSC to facilitate property development, and monitored natural attenuation (MNA) is proposed as the sole remedial alternative. While MNA will most likely be utilized as part of the remediation effort, based on VOC and total petroleum hydrocarbon (TPH) concentrations detected in soil and groundwater, active remediation of the vadose zone and groundwater at the Former Welch's Uniform site is warranted and should be implemented.

Detailed Comments

Section 2.9 – Current Status

This section states that three wells MW-4, MW-11 and MW-12 are listed as being out of service due to well boxes and well heads being destroyed by Los Angeles City Street services personnel removing trash and vegetation from the site. The Report should be revised to state if these wells have been properly destroyed. If not, plans should be submitted to DTSC to locate the well heads, properly destroy the wells and evaluate whether the wells need to be replaced.

Section 4.3 Soil Assessment Results

Environmental screening levels (ESLs) were developed for various exposure pathways using Regional Water Quality Control Board, San Francisco Region (San Francisco Water Board), criteria. The ESLs are not appropriate for this site because ESLs were developed by the San Francisco Water Board, for sites in the San Francisco area. The site is located in Los Angeles, and should be evaluated based on criteria developed by the Regional Water Quality Control Board, Los Angeles Region (LA Water Board). Maximum Soil Screening Levels calculated using the methodology developed by the LA Water Board should be used to evaluate TPH and VOC concentrations in vadose zone soil. Maximum soil screening levels can be calculated using Chapters 4 and 5 of the LA Water Board publication Remediation Guidance for Petroleum and VOC Impacted Sites, Section II, dated May, 1996.

Figure 16 – Cross Section E-E'; Variation in Groundwater Elevation

As shown in Figure 16, the groundwater elevation drops by about 30 feet in a distance of about 50 feet, between boring SB-6 and monitoring well MW-1, then rises about 30 feet within a distance of 10 feet between MW-1 and boring CB-5. This change in groundwater level over such a short distance implies that there are two distinct aquifers in the northern section of the site, and there is a strong downward vertical gradient between the two aquifers. Strong vertical gradients between depth intervals, as observed at MW-1, usually indicate some type of relatively low permeability structure separating different portions of an aquifer, or separating two different aquifers.

The strong vertical gradient shown on Figure 16 does not appear to correlate with groundwater data collected from wells in the MW-16 well cluster, MW-16A, MW16B, and MW-16C. Groundwater elevation data from the MW-16 well cluster show a slight variation in groundwater elevations at different depths with a much weaker upward vertical gradient.

Monitoring wells MW-2 and MW-3 have relatively long screen intervals that extend from the water table to the depth of the bottom of MW-1. If there is some low permeability structure causing the vertical gradient shown on Figure 16, then these two wells are providing a hydraulic connection between two distinct portions of the aquifer, and may be causing contamination to spread vertically through the aquifer. Investigation regarding the nature of aquifer is required to evaluate if there is a low permeability unit separating different portions of the aquifer. If a low permeability unit is present, then any wells with screens that cross this unit need to be properly destroyed and replaced with wells that have screens located above and below the low permeability unit.

SUBJECT: Review of Supplemental Site Assessment Report and Site Conceptual Model Update, Former Welch's Uniform Facility, Los Angeles, California.

PCA: 12020 Site Code: 301314-11

The Human and Ecological Risk Division (HERD) reviewed the "Supplemental Site Assessment Report and Site Conceptual Model Update" for the Former Welch's Uniform Facility located at 3505 Pasadena Avenue in Los Angeles, California. The report was prepared by ENSR Corporation on behalf of AmeriPride Services Inc. Comments on the report are described below.

Background

The subject site is a 2.6 acre property located in a low-density, mixed residential and industrial area, approximately 3.5 miles northeast of downtown Los Angeles. It was formerly a uniform laundry service facility established in 1924, which operated until approximately 1988. At least 12 underground storage tanks (USTs) were in service at the site; they were removed or filled in-place between 1987 and 2004. All buildings associated with previous operations were removed in 1993 and the site is now a vacant lot with a chain link fence and locking gate. The current site owner AmeriPride is seeking a soil closure to facilitate development of the property, and is considering building a 30,000 ft^2 Apparel Center on the property.

The principal chemicals of concern at the site are chlorinated solvents (PCE, TCE, and cis-1,2-DCE) and petroleum hydrocarbons, which are associated with previous dry cleaning, boiler, and vehicle fueling activities. This Report describes supplemental site assessment activities completed in 2006, and presents an updated site conceptual model based on the assessment findings. The site assessment activities were

conducted under the oversight of the Los Angeles Regional Water Quality Control Board (LARWQCB), and site oversight responsibilities were transferred to DTSC on December 27, 2006.

Document Reviewed

HERD reviewed, "Supplemental Site Assessment Report and Site Conceptual Model Update, Former Welch's Uniform Facility, 3505 Pasadena Avenue, Los Angeles, California." prepared by ENSR Corporation, dated September 2007. It was received by HERD on October 2, 2007.

Scope of Review

HERD's review of the above documents was focused on the adequacy of current data to support a reliable health risk evaluation for determining what further actions are needed. HERD didin't review previous investigation reports to verify the quality and accuracy of the data and other site-related information presented in the current report. Minor grammatical or typographical errors that do not affect the review have not been noted.

General Comments

Overall, HERD found that the work performed to date provides useful information on the nature and extent of the chemical impacts at most of the site. However, the current report does not contain adequate information to demonstrate that certain areas have been adequately characterized, and additional sampling is recommended to complete characterization in these areas. HERD also identified several apparent deficiencies that could introduce significant uncertainties in the risk evaluation results and should be addressed in future work. Once sufficient data are gathered for the site, HERD recommends performing a health risk assessment to support a decision on site cleanup. Below are some general comments for the report:

1) HERD recommends summarizing all relevant soil data (i.e., data collected after the free-product removal and soil vapor extraction) of key chemicals by presenting them in data-box figures to show their areal extents. Some of this information is presented in Section 5, but is limited to only the 2006 data for PCE in the solvent area. Such information is needed for other chemicals and areas to facilitate HERD's understanding on the contaminant distributions at the site. In addition, HERD could not find several soil boring locations referenced in these sections (e.g., SB-1, SB-26, CB-3, and CB-4) on any of the figures. Depending on the review of these figures and additional information on the AOCs (see Specific Comments 2, 6, 7, and 8), collection of additional samples may be necessary to adequately characterize the extents of the contamination laterally and vertically.

2) HERD does not recommend estimating the residual mass of COPCs for use in risk calculations for the following reasons: a) the current report does not show that lateral and vertical delineation has been completed in each of the source areas (including the mass that may be trapped in the smear zone near water table); and b) the estimated residual mass cannot be verified since information regarding the approximate total mass of chemical releases is not available. If the above information becomes available and this approach is to be proposed in the future, HERD requests that the chemical mass calculations and supporting information be submitted to DTSC for review prior to its use in risk calculations.

3) HERD recommends collecting soil gas data within each area of concern (AOC) to verify the previous soil gas sampling results and for use in health risk assessment. HERD notes that the 2001 soil gas survey was conducted on a site-wide basis and the placement of the probes was not necessarily biased toward known or suspected sources. Further, all samples were collected from a single depth (10 ft bgs or less) only. Therefore, HERD recommends installing multi-depth soil vapor probes in each area of concern (AOC) and collecting samples for VOC analysis in accordance with the Advisory – Active Soil Gas Investigations (DTSC/LARWQCB 2003).

4) HERD recommends that all detected organic compounds be retained as chemicals of potential concern (COPCs) for the purpose of health risk assessment. Metal concentrations detected above the background levels should also be retained as COPCs and included in the risk assessment. In addition, HERD recommends analyzing for organic lead (e.g., tetramethyl lead and tetraethyllead) in the vehicle fuel-impacted areas since leaded gasoline was used in the U.S. until 1990's.

   HERD notes that total petroleum hydrocarbons (TPH) are considered as COPCs for the site. HERD recommends following the Interim Guidance for Evaluating Total Petroleum Hydrocarbons at School Sites when evaluating TPH in the risk assessment. Please check with the HERD staff for information on the TPH guidance.

5) HERD does not accept the comparison of site data with the Environmental Screening Levels (ESLs) for sites in southern California. Instead, HERD advises using California Human Health Screening Levels (CHHSLs) and USEPA Region 9 Preliminary Remediation Goals (PRGs) (for chemicals without the CHHSLs) for the purpose of health-based risk screening. It should be noted that HERD does not recommend using generic risk-based criteria in risk assessment, and recommends evaluating the cumulative cancer risks and noncancer hazards for all COPCs using appropriate exposure parameters and toxicity values. All relevant data collected from the source and general site areas should be included in the risk evaluation for determination on risk-based closure.

6) HERD notes that groundwater concentrations of several chemicals are higher than the California MCLs for drinking water. As a result, groundwater cleanup may be required if the shallow aquifer beneath the site is designated for beneficial uses by the Regional Water Quality Control Board. HERD has not reviewed the information regarding groundwater designation and defers to the Program regarding groundwater designation in the area and the need for groundwater cleanup.

Specific Comments

1) Section 2.8.4: HERD recommends including available information on underground utilities at and near the site as these utility corridors may act as soil vapor migration pathways.

2) Section 2.8.5: HERD recommends presenting available information regarding the two aboveground storage tanks located on the west side of the former South Building. If information gaps exist, additional data should be collected to complete the understanding of this area.

3) Section 3.0: Please specify the type(s) of free product (e.g., LNAPL or DNAPL) found in wells K-1, K-2, MW-1, and MW-3 through MW-7 during the previous investigations, and provide a figure showing the extraction well locations and treatment areas of the soil vapor extraction systems operated in the early 1990's.

4) Section 4.3.1: Please provide a figure showing the proposed grid design for soil sampling in the source and general site areas.

5) Section 4.4.3: HERD recommends including concentrations of daughter products (e.g., cis-1,2-DCE and vinyl chloride) in the graphs to illustrate the occurrence of degradation. The table numbers cited in the last paragraph are incorrect, and should be corrected.

6) Section 5.1.1: HERD recommends identifying the vehicle maintenance area on Figure 3 and summarizing the data that are relevant to this area. If data gaps exist, additional investigation should be performed to complete the understanding of this area.

7) Section 5.1.4: HERD recommends additional investigation at AOC 4 regarding the elevated PCE concentrations in soil gas encountered during the 2001 sampling. HERD refers to the GSU for recommendations on specific sampling needs in this area.

8) Section 5.3.2: The PCE iso-concentration plots (Figures 10 through 13) indicate that two separate sources may exist in AOC 2, one in the former UST 5A to 9A

area, and the other in the former UST 5B to 9B area. Additional information is needed to illustrate and understand the extent of PCE impacts in this area.

9) Section 5.4.1: HERD does not recommend calculating health risks using the finite mass approach at this point (see General Comment 1). In addition, HERD does not agree with the input parameters for soil properties used in the vapor intrusion modeling calculations, and recommends using default soil properties that correspond to the predominant soil type at the site (see Specific Comment 16). Finally, HERD does not concur with the elimination of AOC 4 from the relevant exposure pathways since this area has not been fully characterized (see Specific Comment 6), and recommends retaining in the screening risk evaluation.

10) Section 5.4.2: HERD recommends using default soil properties that correspond to the predominant vadose zone soil type near the site in the screening level risk evaluations (see Specific Comment 16).

11) Section 5.4.3: HERD recommends evaluating potential exposures of outdoor workers via contact to soil using soil sampling results down to 10 feet below the surface. The site conceptual model should be revised accordingly. Alternatively, a soil management plan can be implemented as part of site control to prohibit excavation and reuse of the shallow soil at the site.

12) Section 5.4.4: HERD recommends evaluating potential exposures of construction workers via contact to soil and/or groundwater using sampling results down to the possible maximum depth of subsurface excavation. Depending on the results of this evaluation, proper health and safety procedures should be followed during construction activities.

13) Section 5.4.5: See the comments on onsite indoor workers (Specific Comment 9) and onsite outdoor workers (Specific Comment 11).

14) Section 5.4.6: HERD recommends using default soil properties that correspond to the predominant vadose zone soil type near the site in the screening level risk evaluations (see Specific Comment 16).

15) Section 6.0: HERD recommends revising the summary and conclusions to reflect changes to be made based on the above comments. HERD notes three proposed offsite monitoring wells were not installed due to constraints cited in the report. HERD refers to the Program and the GSU regarding the need for installing new monitoring wells at alternate offsite locations.

16) Appendix L: HERD recommends using default soil properties (i.e., bulk density, total and water-filled porosities, and soil vapor permeability) corresponding to the predominant soil type at the site in the screening evaluation. HERD notes that only

one soil sample was collected from the boring SB-35 at 15 ft bgs and analyzed for soil geophysical properties, which were used in the Johnson and Ettinger Model for calculating health risks associated with vapor intrusion. Further, the testing results for this sample (Appendix J) do not appear to match general soil characteristics for the shallow soil at the site, i.e., gravelly sand or sandy gravel with low moisture content (based on the information presented in Figures 5 and 6, Table 9, and Appendix F). As a result, the calculated health risks would be higher if the soil geophysical properties representative of the site soil type were used instead. A site-specific evaluation will be considered only if sufficient samples are collected to obtain representative soil geophysical properties for the site.

Conclusions and Recommendations

While HERD found that the work performed to date useful in understanding the nature and extent of the chemical impacts at the site, the current report does not include sufficient information to support a soil-only closure for the site. Additional activities are required to further characterize certain areas and to reduce the uncertainties associated with the risk evaluation. Following completion of these additional activities, HERD recommends an updated health risk evaluation to support a decision on site cleanup.

HERD notes that the recommendations made in this memorandum are site specific and should not be construed as a policy decision applicable to other sites. If you have additional questions please feel free to contact me at (714) 484-5359 or cjeng@dtsc.ca.gov.

1. INTRODUCTION

1.1. ENSR Safety Policy

ENSR Corporation is committed to providing our employees with a safe and healthy work environment. It is not only our obligation to each other, but also a sound business practice to do so. Work related injuries and illnesses cause needless pain and suffering, cost money, and adversely affect our reputation with our clients. It is our firm belief that all work related injuries and illnesses are preventable, and it is therefore our goal to have a workplace that is free from occupational injuries and illnesses. Every attempt shall be made to eliminate the possibility of injuries and illnesses. No aspect of the company's activities, including expediency and cost, shall take precedence over the health and safety of our employees.

1.2. Purpose

This Health and Safety Plan (HASP) has been developed by ENSR Corporation (ENSR). The purpose of this plan is to minimize potential risk to personnel implementing general site activities at the former Welch's Uniform site located in Los Angeles, California. The provisions of this HASP apply to ENSR personnel who will be potentially exposed to safety and/or health hazards associated with the investigative tasks outlined in Section 3.0 of this HASP.

This HASP has been written to comply with OSHA's Hazardous Waste Operations and Emergency Response Standard (29 CFR 1910.120), and the CalOSHA equivalent. All activities covered by this HASP must be conducted in complete compliance with all applicable federal, state and local health and safety regulations. Personnel covered by this HASP who cannot or will not comply with these requirements will be excluded from site activities

1.3. Modifications

Every effort has been made to address the hazards associated with the types of chemical contamination that may be encountered at the site being investigated by ENSR. Similarly, this document also discusses the physical hazards associated with the typical types of activities that may be performed by ENSR employees or subcontractors during an environmental investigation. Unanticipated site-specific conditions or situations may occur during the implementation of the proposed environmental investigations that are not addressed in this document. As such, this HASP must be considered a working document that is subject to change to meet the needs of each site investigation.

This HASP does not apply to the removal of underground storage tank (UST) systems or to the installation, operation, maintenance and monitoring of remediation systems.

Prior to working at site, the Project Manager, Jeff Otter (PM) or Field Technician will review with the Regional Health and Safety Manager (RHSM), the scope of work and the expected nature and

extent of contamination at the site. If unique site hazards are present or different investigative tasks are proposed that have not been addressed in this HASP, it will be necessary to modify this HASP. All proposed modifications to this HASP must be reviewed and approved by the RHSM before such modifications are implemented in the field. Modifications to the HASP will be incorporated into the document as addenda.

1.4. Approval and Dissemination

All ENSR personnel and subcontractor personnel covered by this HASP must read a copy of it and return the HASP signoff sheet (Attachment B) to the ENSR Site Safety Officer (SSO) prior to the start of on-site activities. This HASP will be submitted to the Department of Toxic Substances Control (DTSC) for approval.

1.5. Regulatory Compliance

All work performed at the site will be in compliance with the regulatory requirements imposed by the DTSC. Alberto Valmidiano from the DTSC is the case officer assigned to the site.

Department of Toxic Substances Control (DTSC)
c/o Alberto Valmidiano
9211 Oakdale Avenue
Chatsworth, California
818-717-6500

1.6. Permitting

Soil Boring/Well permits will be obtained from the County of Los Angeles – Department of Public Health prior to subsurface drilling for collection of hydropunch samples and vapor well installation. All appropriate permits will be brought to the site.

1.7. Responsibilities

The implementation of health and safety at this project location will be the shared responsibility of the ENSR Project Manager (PM), the ENSR Regional Health and Safety Manager (RHSM), the ENSR Project Site Safety Officer (SSO) and all other ENSR personnel.

1.7.1. Project Manager

The ENSR PM (Jeff Otter) is responsible for ensuring that the requirements of this HASP are implemented at this project location. Some of the PM's specific responsibilities include:

- Assuring that all personnel to whom this HASP applies have received a copy of it;

- Providing the RHSM with updated information regarding environmental conditions at the site and the scope of site work;

- Providing adequate authority and resources to the on-site SSO to allow for the successful implementation of all necessary safety procedures;

- Supporting the decisions made by the SSO and RHSM;

- Maintaining regular communications with the SSO and, if necessary, the RHSM; and,

- Providing project scheduling and planning activities.

- Reviewing subcontractor HASP prior to commencement of field activities.

1.7.2. Regional Health and Safety Manager

The ENSR RHSM (Joe Sanders) is the individual responsible for the preparation, interpretation and modification of this HASP. Modifications to this HASP which may result in less stringent precautions cannot be undertaken by the PM or the SSO without the approval of the RHSM. Specific duties of the RHSM include:

- Writing, approving and amending the HASP for this project;

- Advising the PM and SSOs on matters relating to health and safety;

- Recommending appropriate personal protective equipment (PPE) and air monitoring instrumentation; and

- Maintaining regular contact with the PM and SSO to evaluate the conditions at the property and new information which might require modifications to the HASP.

1.7.3. Site Safety Officer

All ENSR field technicians are responsible for implementing the safety requirements specified in this HASP. However, one field technician will serve as the SSO during each investigation event, who will be appointed by the PM. S/he will be on-site during all activities covered by this HASP. The SSO is responsible for enforcing the requirements of this HASP once work begins. The SSO has the authority, and the responsibility, to immediately correct all situations where noncompliance with this HASP is noted and to immediately stop work in cases where an immediate danger is perceived. Some of the SSO's specific responsibilities include:

- Assuring that all personnel to whom this HASP applies have submitted a completed copy of the HASP sign-off form;

- Assuring that all personnel to whom this HASP applies have attended a pre-entry briefing prior to entering a restricted area;
- Maintaining a high level of health and safety consciousness among employees at the work site;
- Procuring and distributing the PPE needed for this project for ENSR employees;
- Procuring the air monitoring instrumentation required and performing air monitoring for ENSR activities;
- Verifying that all PPE and health and safety equipment used by ENSR employees is in good working order;
- Setting up and maintaining the cleanup zone within the restricted areas and assuring proper cleanup of all site personnel;
- Notifying the PM of all noncompliance situations and stopping work in the event, when safe to do so, a potentially dangerous situation is perceived;
- Monitoring and controlling the safety performance of all personnel within the established restricted areas to ensure that required safety and health procedures are being followed and correcting any deficiencies;
- Conducting accident/incident investigations and preparing accident/incident investigation reports;
- Conducting the pre-entry briefing as required by Section 9.3 of the HASP; and,
- Initiating emergency response in accordance with Section 10.0 of this HASP.
- Reviewing subcontractor HASP prior to commencement of field activities.

1.7.4. Field Personnel

All ENSR personnel are responsible for following the health and safety procedures specified in this HASP and for performing their work in a safe and responsible manner. Some of the specific responsibilities of the field personnel are as follows:

- Reading the HASP in its entirety prior to the start of on-site work;
- Submitting a completed HASP Acceptance Form and documentation of medical surveillance and training to the SSO prior to the start of work;
- Attending the pre-entry briefing prior to beginning on-site work;
- Bringing forth any questions or concerns regarding the content of the HASP to the PM or the SSO prior to the start of work;
- Stopping work when unsafe conditions occur;
- Reporting all accidents, injuries and illnesses, regardless of their severity, to the ENSR SSO; and,
- Complying with the requirements of this HASP and the requests of the SSO.

1.7.5. Short Service Employee

A Short Service Employee (SSE) is an employee with fewer than six months experience working supervised on field projects or an employee who has not completed required training or received required certifications.

Short Service Employees will not be assigned to this project unless they are supervised on site by a qualified person.

Short Service Employees will be identified in the field by an orange hard hat or orange ballcap should hard hats not be required for a specific phase of work.

Field crews with less than five workers shall have no more than one SSE.

Field crews with five or more workers shall not have more than 20% SSE personnel

1.7.6. Subcontractors

Subcontractors on this site are responsible for:

- Designating a SSO to work in conjunction with ENSR's SSO;
- Complying with the requirements of this HASP and the directions of the SSO;
- Preparing their own HASP, which meets or exceeds the requirements of the site HASP;
- Ensuring, via daily inspections, that their equipment is in good working order;
- Immediately reporting to ENSR, any accidents, injuries, or near misses;
- Operating their equipment in a safe manner;
- Providing ENSR with copies of material safety data sheets (MSDS) for all hazardous materials brought on-site; and,
- Providing all the required PPE for their employees.

2. SITE HISTORY / DESCRIPTION

The property was formerly a commercial dry-cleaning facility established c.1920, which operated until approximately 1988. At least twelve underground storage tanks (USTs) were in service at the site, which were removed or filled in-place between 1987 and 2004. All buildings associated with the previous operation were removed in 1993 and the site is now a vacant lot. Currently the property is owned by AmeriPride Services Inc. AmeriPride is seeking a soil closure to facilitate development of the property, and is considering building a 30,000 square foot Apparel Center on the site within two years.

The principal chemicals of concern at the site are perchloroethylene (PCE), trichloroethylene (TCE), cis-1,2-dichloroethylene (cDCE), and petroleum hydrocarbons, which are associated with the dry cleaning solvents, boiler fuel, and motor vehicle fuels stored and used in the laundering and dry cleaning operations that were formerly conducted at the site.

3. SCOPE OF WORK

3.1. Soil Gas Assessment

Multi-depth soil gas sampling may occur at the site to assess subsurface vertical and lateral extents of VOCs. This assessment phase may involve:

- Establishing site controls to protect workers and public;
- Utility marking and clearance activities utilizing hand auger or air-knife rig;
- Use of hollow-stem auger rig for installation of permanent soil gas probes for onsite soil gas analysis, and
- Collection of soil gas samples from permanent soil gas probes.

3.2. Soil Assessment Activities

Installation of additional soil borings for vertical and lateral assessment will be conducted. Work activities will include the use of hollow-stem auger (HSA) drill rigs. Work activities associated with this task will include:

- Establishing site controls to protect workers and public;
- Utility marking and clearance activities utilizing an air-knife rig;
- HSA drilling for soil sample collection, collection of groundwater grab samples from select borings;
- Collection of near surface soil samples to 10 feet bgs using manual drilling;
- Placement of drum for soil disposal;
- Movement of drums of soil and decontamination water from the boring locations to a centralized site;
- Backfilling of boreholes, and replacement of pavement to match existing grade;

3.3. Groundwater Monitoring

Routine, on-going groundwater monitoring involves periodically opening well heads, purging the well, and collecting samples via bailer of pump for submission to a laboratory for chemical analysis. This task involves potential exposure, via direct contact or inhalation, to the contaminants of concern in the groundwater. Also, purging the wells (via pumping) and physically collecting the samples involves potential ergonomic hazards. Wells located in any offsite locations may involve the use of traffic control and involve traffic hazards.

4. HAZARD ASSESSMENT

The following chemical and physical hazard assessment applies only to the proposed tasks as described in Section 3.0.

4.1. Chemical Hazards

Volatile Organic Compounds (VOCs) associated with former site operations including tetrachloroethene (PCE), trichloroethene (TCE), cis-1,2-dichloroethene (c-DCE), trans-1,2-dichloroethene (t-DCE), vinyl chloride (VC), TPH, and benzene are constituents of concern at this site. Based on previous soil and groundwater assessments PCE, TCE, and c-DCE are likely to be encountered at elevated concentrations during the investigation.

4.1.1. Recent Concentrations of Contaminants of Concern

Well ID	PCE *(ug/L)*	TCE *(ug/L)*	c-DCE *(ug/L)*	t-DCE *(ug/L)*	VC *(ug/L)*	TPH *(ug/L)*	Benzene *(ug/L)*

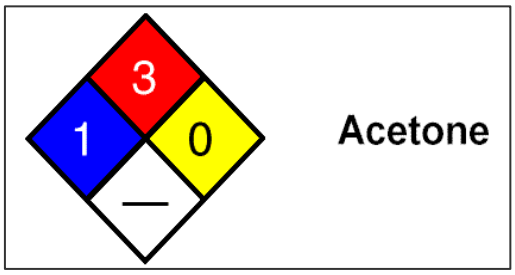
Information from NIOSH Website (viewed 01/29/2008)

4.1.3. Hazardous Substances Brought On-Site by ENSR or Subcontractor

In compliance with OSHA's Hazard Communication Standard (29 CFR 1910.1200), a material safety data sheet (MSDS) must be available for each hazardous substance that ENSR or subcontractor brings onto the site, and site workers must be aware of the hazards of these substances.. This includes solutions/chemicals that will be used to decontaminate sampling equipment. For this program, Alconox soap is the only solution being used to decontaminate sampling equipment.

In addition, all containers of hazardous materials must be labeled in accordance with OSHA's Hazard Communication Standard. Either the original manufacturer's label or an NFPA 704M label specific for the material (as shown at the right) is considered to be an acceptable label.



4.2. Hazard Potential / Control

4.2.1. Hazard Potential

The potential routes of exposure based on the proposed activities include:

- Dermal contact with potentially contaminated soil and groundwater during sampling activities, and
- Inhalation of contaminant vapors or contaminated dust during drilling and sampling activities.

4.2.2. Hazard Control

To reduce the potential for contact with contaminated soil and groundwater, personal protective equipment (PPE), as described in Section 7.1 of this HASP, will be worn.

5. PHYSICAL HAZARDS

5.1. Driving Safety

Drivers must be licensed to drive the class of vehicle they are operating and trained in defensive driving. Only ENSR personnel may drive ENSR vehicles or vehicles rented for ENSR business; client, subcontractor, or other work-related personnel may ride. Drivers and passengers must comply with all traffic laws and posted signs, and will not operate a vehicle if under the influence of impairing medication, alcohol, or any other substance.

5.1.1. Planning / Preparation

- Prior to departure, check traffic reports, weather conditions, road construction, and road closures. If necessary, develop an alternate route and a new, approved Journey Management Plan (JMP).
- Prior to entering the vehicle, inspect the vehicle (see Attachment, *Safe Driving*).
- Leave early to allow for contingencies.
- See Section 5, *Traffic Hazards*, regarding the need for a Traffic Control Plan (TCP).

5.1.2. DOT

If you are to operate a vehicle exceeding 10,000 pounds (or vehicle and trailer with a combined weight over 10,000 pounds), or you are to transport hazardous materials, you MUST comply with Department of Transportation (DOT) regulations. These are NOT addressed in this HASP; contact the H&S Department if this applies.

5.1.3. Distractions

You must NOT operate a vehicle while talking on your cell phone, regardless of "hands free" or not. Cell phones must be turned off while the vehicle is running. If you want to make a call, pull over and park before dialing. Do NOT allow other distractions to interfere with your safe operation of the vehicle.

5.1.4. Secure Packing

Do not move your vehicle unless all equipment and supplies are secured. Items and material which may roll, slide, or move about in your vehicle while traveling are a major hazard. **Secure the load!**

(See the Safe Driving Attachment for additional information.)

5.2. Traffic

When working in traffic areas, the following precautions should be implemented.

- Wear a Class II safety vest. If work is being performed at dawn, dusk or evening the vests must have additional reflective tape and sleeves.
- Use delineated cross walks when walking to and from wells located across the street.
- Set up traffic cones, barricades, or "Men at Work" signs in front of the work area.
- Areas for pedestrian and vehicle traffic on site must be designated.
- No work shall be done in public right of way at dawn or dusk without discussing need for additional precaution with PM, such as Class I safety vests, barricades with additional lighting, etc.

If activities may occur along or in a public roadway or right-of-way, the PM must develop and implement a TCP.

5.3. Underground Utilities

If any subsurface work is needed to maintain the DPE system or wells, California requires a utility clearance to be performed prior to initiation of such work. ENSR will contact the utility clearance organization to request a mark-out of natural gas, electric, telephone, cable television, water and sewer lines in the proposed boring or excavation locations. Work will not begin until the required utility clearances have been performed. Public utility clearance organizations typically do not mark-out underground utility lines that are located on private property. ENSR will exercise due diligence and try to identify the location of any private utilities, as well as dispensing lines, on the properties being investigated. ENSR will fulfill this requirement in several ways, including:

- Obtaining as-built drawings for the areas being investigated from the property owner;
- Visually reviewing each excavation location with the property owner or knowledgeable site representative;
- Performing a geophysical survey to locate utilities or hiring a private line locating firm to determine the location of utility lines that are suspected to be present at the property;
- Identifying a no-dig zone (positive location of known utilities); or
- Hand digging or air-knifing to 8', in the proposed excavation locations if insufficient data is available to accurately determine the location of the utility lines.

5.4. Overhead Utilities

Be particularly aware of overhead power lines in the work area. Any vehicle or equipment capable of having parts of its structure elevated (drill rig, crane etc.) near energized overhead lines shall be operated so that a clearance of at least 10 feet is maintained. If the voltage is higher than 50KV, the clearance shall be increased 4 inches for every 10KV over that voltage.

5.5. Hand Digging

Hand digging involves the potential ergonomic injuries of strains and sprains. Care must be exercised to avoid these by stretching, not over-exerting, and use of gloves and other appropriate PPE.

5.6. Air Knifing-Geophysical

Air-knifing / vacuum excavation may be used to "clear" boring locations prior to actual drilling. This operation will be used to locate potential utilities (and cobble) down to 8', and to avoid drilling through utilities with the drill rig. Air-knifing / vacuum excavation produces a lot of noise and requires the use of hearing protection. Airborne dust and projectiles are also potential hazards during this process, though the vacuum should collect small dust particles. Goggles or a face shield should be worn to protect against dust and projectiles. Ear plugs will be worn for hearing protection, and a respirator may be necessary if excessive dust (normally controlled) is created and not captured.

5.7. Soil Boring (Auger) and Well Installation

Subsurface activities **will require a permit** if groundwater is sampled. Use of a drill rig to advance soil borings and install monitoring wells will require all personnel in the vicinity of the operating rig to wear steel-toed boots, traffic vests, hardhats, hearing protection and safety eyewear. Personnel shall not remain in the vicinity of operating equipment unless it is required for their work responsibilities. Additionally, the following safety requirements must be adhered to:

- All drill rigs and other machinery with exposed moving parts must be equipped with an operational emergency stop device. Drillers and geologists must be aware of the location of this device. This device must be tested prior to job initiation and periodically thereafter. The driller and helper shall not simultaneously handle augers unless there is a standby person to activate the emergency stop.
- The driller must never leave the controls while the tools are rotating unless all personnel are kept clear of rotating equipment.
- A long-handled shovel or equivalent must be used to clear drill cuttings away from the hole and from rotating tools. Hands and/or feet are not to be used for this purpose.
- A remote sampling device must be used to sample drill cuttings if the tools are rotating or if the tools are readily capable of rotating. Samplers must not reach into or near the rotating equipment. If personnel must work near any tools which could rotate, the driller must shut down the rig prior to initiating such work.

- Drillers, helpers and geologists must secure all loose clothing when in the vicinity of drilling operations.
- Only equipment which has been approved by the manufacturer may be used in conjunction with site equipment and specifically to attach sections of drilling tools together. Pins that protrude excessively from augers shall not be allowed
- No person shall climb the drill mast while tools are rotating.
- No person shall climb the drill mast without the use of ANSI-approved fall protection (approved belts, lanyards and a fall protection slide rail) or portable ladder which meets the requirements of OSHA standards.

5.8. Hazards from Chipping Asphalt and Concrete

An increased eye hazard exists during the cutting or chipping of asphalt and/or concrete surfaces if required to facilitate soil boring activities. Employees must wear safety glasses with attached side-shields to protect them from flying debris. Employees may also choose to wear a face-shield over their glasses if impact from the debris is excessive. This activity also poses potential respiratory (dust) and noise hazards, requiring a respirator and hearing protection.

5.9. Groundwater and Soil Gas Monitoring

Bailing wells requires proper gloves, eye protection, and possibly protective coveralls to prevent splashing. Back and lifting precautions outlined in Section 5.12 shall be used to avoid ergonomic injuries. Chemical protective PPE, including respirators, must be used when bailing free-product or highly contaminated wells. Precautions must be exercised during soil gas monitoring to avoid airborne exposure and wear respirators when necessary.

5.10. Hand Safety

5.10.1. Glove Selection

To protect onsite workers from hand injuries, the following gloves will be used for when performing a specific duty:

DUTY/HAZARD	TYPE OF GLOVE MATERIAL
Light Duty Abrasions/loss of grip/adsorption	Cotton, Leather, Rubber Coated or Kevlar separately or in combination with nylon/ nitrile /Teflon®
Medium Duty Laceration/adsorption	Leather or Kevlar separately or in combination with nylon / nitrile / Teflon®
Heavy Duty Laceration/puncture	Kevlar (exposure to sharp or jagged metal, glass, box cutters, etc), stainless core (stainless steel woven into material), HexArmor™ (see New Products Section below)
High Temperature	Kevlar / Nomex / Fiberglass
Low Temperature	Insulating Gloves

Puncture	Aramid, HexArmorTM (see New Products Section below)

While on site, extra gloves will be stored in the workers safety vests for easy retrieval.

Pinch points are found between a moving object and a stationary object, or between two continuously moving objects. Yellow hand stickers will be placed on equipment to remind workers of pinch points.

5.10.2. Hand Tools

Rules for the safe use of hand tools:

- Select the right size tool for the job. Don't use "cheaters" and avoid pulling old tools from the waste stream. There's a reason why they were thrown away!
- Always inspect tools before use and replace or repair worn or damaged tools.
- Always keep the cutting edges sharp and never test a cutting edge with your finger.
- When working on an elevated surface (ladder, truck, scaffold), ensure your tools are secure. Falling tools can cause serious injury.
- Always carry your tools correctly and never put sharp or pointed tools in your pocket.
- When carrying hand tools, always point the cutting edge to the ground.
- Always keep your tools in a dry place to prevent rust.

Please use the following types of tools while working on site:

Screwdrivers:
Most screwdrivers are not designed to be used on electrical equipment. Use an insulated screwdriver for electrical work.

Do not hold an object in the palm of one hand and press a screwdriver into it; place the object on a bench or table. Never hammer with a screwdriver. Never use a screwdriver with a broken handle, bent or burred blade, etc.

Pliers:
Do not use pliers as a substitute for hammers, wrenches, pry bars, etc. Use insulated pliers when doing electrical work. Inspect the pliers frequently to make certain that they are free of breaks or cracks.

Use the right type of pliers for the specific task – adjustable, locking (Vise Grip®), standard, bolt size fit, pipe wrench.

Hammers:
Use the correct hammer for the specific type of striking work (task) to be done. Always wear safety glasses when using a hammer to strike an object. Always use the claw portion of a hammer to remove

nails and not as a pick or awl. Have an unobstructed view and swing when using a hammer. Watch for overhead interference on back and forward swing. Use a good grip and use something other then your hand to hold a nail when starting hammering. Check for defects on the handle and head before using. If the hammer head shows signs of mushrooming, replace it immediately.

Handles may be wood, tubular/solid steel or fiberglass. Replace any hammer with a loose handle before the head flies off and causes injury to you or someone else. Tighten loose handles with the proper wedges; never use nails or staples for wedges. If a steel or fiberglass handle is loose replace it, since it is more difficult to repair than a wooden one. Some fiberglass handles can be tightened with the aid of a repair kit with epoxy materials.

5.11. Noise

Use of heavy machinery may expose employees to excessive amounts of noise. Exposure to noise can result in the following:

- Temporary hearing losses where normal hearing returns after a rest period;
- Interference with speech communication and the perception of auditory signals;
- Interference with the performance of complicated tasks; and,
- Permanent hearing loss due to repeated exposure resulting in nerve destruction in the hearing organ.

Since personal noise monitoring will not be conducted during the proposed activities, employees must follow this general rule of thumb:

If the noise levels are so loud that you must shout at someone who is 5 feet away from you, you need to be wearing hearing protection. ENSR employees can wear either disposable earplugs or earmuffs but all hearing protection must have a minimum noise reduction rating (NRR) of 27 decibels (db).

5.12. Back Safety

Using the proper techniques to lift and move heavy pieces of equipment, such as generators or drums of investigation-derived wastes, is important to reduce the potential for back injury. The following precautions should be implemented when lifting or moving heavy objects.

- Use mechanical devices to move objects, such as drums of investigation derived wastes or generators, that are too heavy to be moved manually;
- If mechanical devices are not available, ask another person to assist you;

- Bend at the knees, not the waist; Let your legs do the lifting;
- Do not twist while lifting;
- Bring the load as close to you as possible before lifting;
- Be sure the path you are taking while carrying a heavy object is free of obstructions and slip, trip and fall hazards.

5.13. Electrical Hazards

If using portable tools that are electrically powered, follow the safety precautions listed below:

- Check to see that electrical outlets used to supply power during field operations are of the three wire grounding type;
- Extension cords used for field operations should be of the three and four wire grounding type and designed for hard or extra-hard usage; This type of cord uses insulated wires within an inner insulated sleeve and will be marked S, ST, STO, SJ, SJO or SJTO;
- NEVER remove the ground plug blade to accommodate ungrounded outlets;
- Do not use extension cords as a substitute for fixed or permanent wiring; Do not run extension cords through openings in walls, ceilings or floors;
- Protect the cord from becoming damaged if the cord is run through doorways, windows or across pinch points;
- Examine extension and equipment cords and plugs prior to each use; Damaged cords with frayed insulation or exposed wiring and damaged plugs with missing ground blades MUST BE REMOVED from service immediately;
- All portable or temporary wiring which is used outdoors or in other potentially wet or damp locations must be connected to a circuit which is protected by a ground fault circuit interrupter (GFCI); GFCI's are available as permanently installed outlets, as plug-in adapters and as extension cord outlet boxes. DO NOT CONTINUE TO USE A PIECE OF EQUIPMENT OR EXTENSION CORD WHICH CAUSES A GFCI TO TRIP.
- When working in flammable atmospheres, be sure that the electrical equipment being used is approved for use in Class I, Division I atmospheres;

Do not touch a victim who is still in contact with current; Separate the victim from the source using a dry, nonmetallic item such as a broom stick or cardboard box; Be sure your hands are dry and you

are standing on a dry surface; Turn off the main electrical power switch and then begin rescue efforts.

5.14. Thermal Stress

Investigations may be performed during any month of the year. As such, the hazards associated with heat and cold stress are addressed in this HASP.

5.14.1. Cold Stress

Types of Cold Stress

Cold injury is classified as either localized, as in frostbite, frostnip or chilblain; or generalized, as in hypothermia. The main factors contributing to cold injury are exposure to humidity and high winds, contact with wetness and inadequate clothing.

The likelihood of developing frostbite occurs when the face or extremities are exposed to a cold wind in addition to cold temperatures. The freezing point of the skin is about 30^{o} F. The fluids around the cells of the body tissue freeze, causing the skin to turn white. This freezing is due to exposure to extremely low temperatures. As wind velocity increases, heat loss is greater and frostbite will occur more rapidly.

Symptoms of Cold Stress

The first symptom of frostbite is usually an uncomfortable sensation of coldness, followed by numbness. There may be a tingling, stinging or aching feeling in the effected area. The most vulnerable parts of the body are the nose, cheeks, ears, fingers and toes.

Symptoms of hypothermia, a condition of abnormally low body temperature, include uncontrollable shivering and sensations of cold. The heartbeat slows and may become irregular, the pulse weakens and the blood pressure changes. Pain in the extremities and severe shivering can be the first warning of dangerous exposure to cold.

Maximum severe shivering develops when the body temperature has fallen to 95^{o} F. This must be taken as a sign of danger and exposure to cold must be immediately terminated. Productive physical and mental work is limited when severe shivering occurs.

Methods to Prevent Cold Stress

When the ambient temperature, or a wind chill equivalent, falls to below 40^{o} F (American Conference of Governmental Industrial Hygienists recommendation), site personnel who must remain outdoors should wear insulated coveralls, insulated boot liners, hard hat helmet liners and insulated hand protection. Wool mittens are more efficient insulators than gloves. Keeping the head covered is very important, since 40% of body heat can be lost when the head is exposed. If it is not necessary to wear a hard hat, a wool knit cap provides the best head protection. A face mask may also be worn.

Persons should dress in several layers rather than one single heavy outer garment. The outer piece of clothing should ideally be wind and waterproof. Clothing made of thin cotton fabric or synthetic fabrics such as polypropylene is ideal since it helps to evaporate sweat. Polypropylene is best at wicking away moisture while still retaining its insulating properties. Loosely fitting clothing also aids in sweat evaporation. Denim is not a good protective fabric. It is loosely woven which allows moisture to penetrate. Socks with high wool content are best. If two pairs of socks are worn, the inner sock should be smaller and made of cotton, polypropylene or a similar type of synthetic material that wicks away moisture. If clothing becomes wet, it should be taken off immediately and a dry set of clothing put on.

If wind conditions become severe, it may become necessary to shield the work area temporarily. The SSO and the PM will determine if this type of action is necessary. Heated break trailers or a designated area that is heated should be available if work is performed continuously in the cold at temperatures, or equivalent wind chill temperatures, of 20^{o} F.

Dehydration occurs in the cold environment and may increase the susceptibility of the worker to cold injury due to significant change in blood flow to the extremities. Drink plenty of fluids, but limit the intake of caffeine.

5.14.2. Heat Stress

Types of Heat Stress

Heat related problems include **heat rash, fainting, heat cramps, heat exhaustion and heat stroke**. **Heat rash** can occur when sweat isn't allowed to evaporate, leaving the skin wet most of the time and making it subject to irritation. **Fainting** may occur when blood pools to lower parts of the body and as a result, does not return to the heart to be pumped to the brain. Heat related fainting often occurs during activities which require standing erect and immobile in the heat for long periods of time. **Heat cramps** are painful spasms of the muscles due to excessive salt loss associated with profuse sweating. **Heat exhaustion** occurs as a result from the loss of large amounts of fluid and excessive loss of salt from profuse sweating. The skin will be clammy and moist and the affected individual may exhibit giddiness, nausea and headache. **Heat stroke** occurs when the body's temperature regulatory system has failed. The skin is hot, dry, red and spotted. The affected person may be mentally confused and delirious. Convulsions could occur. EARLY RECOGNITION AND TREATMENT OF HEAT STROKE ARE THE ONLY MEANS OF PREVENTING BRAIN DAMAGE OR DEATH. A person exhibiting signs of heat stroke should be removed from the work area to a shaded area. The person should be soaked with water to promote evaporation. Fan the person's body to increase cooling. Increased body temperature and physical discomfort also promote irritability and a decreased attention to the performance of hazardous tasks.

Early Symptoms of Heat-Related Health Problems:

- Decline in task performance
- Reduced vigilance

- Lack of coordination
- Decline in alertness
- Unsteady walk
- Excessive fatigue
- Muscle cramps
- Dizziness

Susceptibility to Heat Stress Increases Due To:

- Lack of physical fitness
- Lack of acclimation
- Increased age
- Dehydration
- Obesity
- Drug or alcohol use
- Sunburn
- Infection

People unaccustomed to heat are particularly susceptible to heat fatigue. First timers in PPE need to gradually adjust to the heat.

The Effect of Personal Protective Equipment

Sweating normally cools the body as moisture is removed from the skin by evaporation. However, the wearing of certain PPE, particularly chemical protective coveralls (e.g., Tyvek), reduces the body's ability to evaporate sweat and thereby regulate heat buildup. The body's efforts to maintain an acceptable temperature can therefore become significantly impaired by the wearing of PPE.

Measures to Avoid Heat Stress:

The following guidelines should be adhered to when working in hot environments:

- Establish work-rest cycles (short and frequent are more beneficial than long and seldom);
- Identify a shaded, cool rest area;
- Rotate personnel, alternative job functions;
- Water intake should be equal to the sweat produced. Most workers exposed to hot conditions drink less fluids than needed because of an insufficient thirst; DO NOT DEPEND ON THIRST TO SIGNAL WHEN AND HOW MUCH TO DRINK. For an 8-hour workday, 50 ounces of fluids should be drunk;
- Eat lightly salted foods or drink salted drinks such as Gatorade to replace lost salt;
- Save most strenuous tasks for non-peak heat hours such as the early morning or at night;
- Avoid alcohol or caffeine during prolonged periods of heat; Alcohol and caffeine cause additional dehydration;
- Avoid double shifts and/or overtime.

The implementation and enforcement of the above mentioned measures will be the joint responsibility of the PM, on-site field coordinator, and SSO. Potable water and fruit juices should be made available each day for the field team.

Heat Stress Monitoring Techniques

Site personnel should regularly monitor their heart rate as an indicator of heat strain by the following method:

Check radial pulse rates by using fore-and middle fingers and applying light pressure to the pulse in the wrist for one minute at the beginning of each rest cycle. If the pulse rate exceeds 110 beats/minute, shorten the next work cycle by one-third and keep the rest period the same. If, after the next rest period, the pulse rate still exceeds 110 beats/minute, shorten the work cycle again by one-third.

5.15. Handling of Compressed Gases

Compressed gases may be used to inflate bladder pumps used during low-flow groundwater sampling, for calibration of air-monitoring equipment, or to assess leaks during soil gas sampling. Follow the compressed gas handling procedures as outlined below:

- Inspect all cylinders upon delivery and verify that they are properly labeled;
- Do not store cylinders in direct sunlight (increase in temperature will increase pressure);
- Use a cylinder dolly to move the cylinders;
- Keep cylinder valves closed at all times (except when in use);
- Open valves slowly and away from people;
- Close the valve and relieve the pressure before removing the regulator;
- Always keep the valve cap over the valve assembly when not in use (break in valve will cause cylinder to become a projectile);
- Cylinders must be stored in the upright position and must be secured by a chain or rope;
- Segregate empty cylinders from full cylinders.

5.16. Poisonous Plants / Insects

When working at sites that are heavily vegetated or located near wetlands, employees should be aware of the possible presence of poisonous plants and insects.

Poison oak occurs primarily in the southeast and western United States. The poison oak of the southeastern United States, Rhus quercifolia, has its leaves divided into three leaflets; the leaflets are densely haired and generally have three to seven distinct lobes. The white, berry-like fruits are also somewhat hairy. The poison oak of the U.S. Pacific coast, R. diversiloba, is a shrubby or sometimes climbing plant that grows to 2.4 m (8 ft) high; its three-leaflet leaves are toothed or lobed and are hairless

The leaves, roots, stems and fruit of poison oak contain an oil called urushiol. Contact with the irritating oil causes an intensely itching skin rash and characteristic blister-like lesions. The oil can be transmitted on soot particles when burned and may be carried on the fur of animals, equipment and apparel.

Proper identification of these plants is the key to preventing contact and subsequent dermatitis. Wear long sleeves and pants when working in wooded areas. In areas of known infestation, wear Tyvek coveralls and gloves. Oils are easily transferred from one surface to another. Wash all contaminated clothing and equipment promptly.

If you come in contact with these poisonous plants, wash all exposed areas immediately with cool water to remove the oils. Some commercial products such as Tecnu's Poison Oak-n-Ivy Cleanser claim to further help with the removal of oils.

Ticks are bloodsuckers, attaching themselves to warm-blooded vertebrates to feed. Deer ticks are the most common carriers of Lyme disease, a bacterial infection that is transmitted to humans through the bite of the tick.

Personnel should carefully inspect themselves each day for the presence of ticks or any rashes. This is important since prompt removal of the tick can prevent disease transmission. Female deer ticks are about one-quarter inch in length and are black and brick red in color. Males are smaller and all black.

Removal of the tick is important in that the tick should not be crushed and care must be taken so that the head is also removed. If the head is not completely removed or if the tick is allowed to remain for days feeding on human blood, a condition known as **tick paralysis** can develop, which is due to a neurotoxin which the tick apparently injects while engorging. This neurotoxin acts upon the spinal cord causing loss of coordination, weakness and paralysis.

One characteristic symptom of Lyme Disease is a bulls-eye rash that develops around the bite site. The rash appears in about 60-80% of all Lyme disease cases. Contact your RHSM immediately if you develop such a rash.

Tick season lasts from May through October; peak season is May through July. Wear light-colored clothing (easier to spot ticks) with long sleeves and make sure that shirts are tucked into pants and pants are tucked into socks or boots. Ticks have a tendency to crawl upwards. These procedures will make it more difficult for a tick to reach your skin.

Studies have determined that repellants containing DEET as a main ingredient are most effective against mosquitoes and ticks. DEET can be directly applied to the exposed skin of adults and/or clothing. Permanone® is another repellent however; it can only be directly applied to clothing.

Spiders may be present in the well boxes or in the vegetation located onsite. The two species of spiders to keep a lookout for are the brown recluse spider and the black widow. The brown recluse spider has a violin shaped body, and is approximately the size of a quarter. It's venom is necrotizing, meaning that flesh affected by the venom will die and dissolve away. The black widow is also approximately the size of a quarter with a glossy black body, and on females, a red hourglass design on the underbelly. Its venom is a neurotoxin.

Brown recluse

Black Widow

If bitten by a spider, the victim should try to remain calm, place ice on the bite if available, and keep the bite area low relative to the heart. The victim should be taken to the nearest hospital, along with the spider, if it can be captured safely.

6. AIR MONITORING AND ACTION LEVELS

6.1. General

Prior to initiation of fieldwork, a general air quality survey will be conducted to determine ambient air quality at the Site. Results of this survey will be used to designate locations of decontamination and support zones and determine initial personal protective equipment requirements and monitoring frequencies. Based on previous sampling on site, respiratory protection is not expected to be necessary.

During field activities at the Site air monitoring utilizing equipment described below will be conducted to determine employee exposure to the vapors of the contaminants of concern. If additional chemical hazards are encountered during the course of the project, other types of instruments may be required.

6.2. Direct Reading Instrumentation

Instrument I: Photo-ionization detector (PID)
A PID, such as a RaeSystems MiniRae 2000® equipped with a 10.6 eV (or higher) lamp and calibrated to isobutylene (100 ppm standard), will be used to screen the breathing zone of on-site personnel at every 15 minutes during field activities that may expose employees to contaminated soil and/or groundwater during the site activities. The action levels are presented in the table below based on a 10.6 eV lamp, and the TLV-STEL for TCE.

Instrument II: Combustible Gas Monitor (CGI, or LEL Meter)
If high levels of contamination (free product, etc.) are associated with the site, or if high PID readings are encountered, a CGI must be used to quantify the reading for explosive gases or vapors. The action levels are presented in the table below.

Instrument III: Oxygen (O2) Meter
If work is being performed in areas where the potential for oxygen deficiency exists (e.g., confined spaces) an oxygen meter must be used to monitor the space prior to and during entry. The action levels are presented in the table below.

Instrument III: Carbon Monoxide (CO) Meter
If work is being performed indoors or in poorly ventilated areas and internal combustion powered equipment is being used for excavation or combustion equipment is used for heating or other purposes, a carbon monoxide meter will be available to monitor the work area. The action levels are presented in the table below.

Instrument IV: Dust Monitor

A real-time dust monitor will be used to monitor the breathing zone of personnel during operations. When the dust monitor indicates breathing zone dust concentrations in excess of the action limits respiratory protection is required. The action levels are presented in the table below.

Monitoring Frequency

As discussed above, screening of worker breathing zones will be conducted, using real-time instruments, initially and when changes occur to site operations. Results will be recorded in the field notebook. If screening results are below the PEL's, monitoring does not need to be repeated unless activities or conditions change, strong odors are encountered, or other evidence suggests a need to confirm exposure measurements. In the event that respirators become necessary, monitoring will be performed periodically throughout the work day, until exposure levels are established, and when changes occur thereafter.

Task	Action Limit	Respiratory Protection
All tasks involving potential exposure to contaminated soil. PID measurements taken every 15 minutes in breathing zone.	PID measurements from 0 to 25 ppm above background in the breathing zone for a sustained 15-minute period.	Level D – PPE
	26 to 260 ppm above background in the breathing zone for a sustained 15-minute period.	Stop Work and contact PM. Level C PPE- Half/full facepiece air purifying respirator with organic vapor and acid gas (OVA) cartridges need to be donned.
	> 260 ppm above background in the breathing zone for a sustained 15-minute period.	Stop Work and leave the area immediately. A re-evaluation on work scope and drilling method with engineering controls will need to be adopted. Contact HSH and PM.
When possibility of exposure to CO exists (e.g. utilization of internal combustion engine powered devices in interior of buildings).	CO Meter > 25 ppm	Investigate source. Check, correct and control. Contact PM and HSM
	> 50 ppm	Shut down equipment. Evacuate and determine mitigation procedures. Contact PM and HSM.
When possibility of exposure to flammable vapors exists.	LEL (lower explosive limit) Meter <10% LEL	Continue with caution
	LEL (lower explosive limit) Meter >10% LEL	Stop work. Evacuate the area. Ventilate Site until LEL = 0

Task	Action Limit	Respiratory Protection
When possibility of oxygen deficiency exists or before and during entry into a confined space	Oxygen Level Meter 20.9% < 20.9% < 19.5 %	 Normal Level Investigate. Check, correct and control. Contact PM and HSM Stop Work and evacuate the area. If still <19.5% acquire Level B. Contact PM and HSM.
All tasks involving potential exposure to contaminated dust.	Real time dust monitor (e.g., MIE DataRAM) 0 – 2 mg/m^3 2.-10 mg/m^3 > 10 mg/m^3	Initiate actions to reduce dust levels. Level D PPE Level C PPE; Initiate actions to reduce dust levels. Stop work. Evacuate the area. Contact PM and HSM. Revisit and acquire Level B PPE.

Respiratory protection should also be donned if:

- Visible dust is generated during excavation activities and wetting of the soil is not sufficient to control the generation of dust;
- Odors become objectionable at any time; or,
- Respiratory tract irritation is noticed.

All employees who are expected to wear respiratory protection must have successfully passed a quantitative or qualitative fit-test within the past twelve months.

6.3. Calibration and Recordkeeping

The PID will be calibrated on a daily basis in accordance with Standard Operating Procedure (SOP) and manufacturer's instructions. All instrument calibrations must be recorded in the field notebook. All PID readings will be recorded in the field notebook or on dedicated air monitoring result sheets.

All instruments will be calibrated by the manufacturer or rental agency prior to its being used at the site. A calibration check will be performed prior to use with test gas of a known concentration (e.g., % LEL for CGI meter). The results of the test must be within 5% of the test gas concentration for the instrument to be acceptable for use. Results of all tests will be recorded in the field notebook.

6.4. Personal Exposure Monitoring

Personal exposure monitoring will not be conducted; however breathing zone screening will be done using RaeSystems MiniRae 2000 ™ PID. More than instantaneous exceedances of PELs will require personal exposure monitoring.

6.5. Calibration and Recordkeeping

The PID will be calibrated on a daily basis in accordance with ENSR's Standard Operating Procedure and manufacturer's instructions. All PID readings will be recorded in the field notebook or on dedicated air monitoring result sheets. In addition, all calibrations must be recorded. The carbon monoxide meter will be calibrated by the manufacturer or rental agency prior to its being used at the site.

7. PERSONAL PROTECTIVE EQUIPMENT

To protect site workers from the hazards discussed above, the following protective equipment will be used:

7.1. Protective Clothing

To protect against the hazards discussed above, the following protective equipment / clothing requirements will be followed:

PPE Item	General Work Involving marking of utilities, subsurface surveys, non-drilling	Soil Boring or Air Knife	GW or soil gas Sampling
Hard hat	√	√	√
Safety glasses	√	√	√
Face-shield			4
Steel-toed boots	√	√	√
Gloves, Inner Nitrile		1	√
Gloves, Outer Nitrile		1	√
Gloves, Kevlar / Leather		1	
Hearing Protection (2)		√	
Traffic Vest	√	√	√
Lockout/Tag-out (3)			

1. Wear work gloves when handling pipe or sharp-edged equipment; impervious gloves for chemical exposure.
2. Wear hearing protection in areas where noise levels exceed 85 dBA (or speech becomes difficult)
3. Lockout/Tag-out is required when working on energized equipment.
4. Goggles or a face shield are required where contaminant may be splashed or is under pressure.

7.2. Respiratory Protection

Respiratory protection is not expected to be necessary, based on earlier monitoring. However, air monitoring will be performed to verify that exposure to air contaminants is not exceeding the established action level. If the action level of 25 ppm total VOCs (as indicated by the PID, see section 6.2) is exceeded for more than a 15-minute period within the breathing zone of employees, stop work, inform the PM and don Level C respiratory protection as a precaution.

Task	Action Limit	Respiratory Protection
All tasks involving potential exposure to contaminated soils and/or groundwater.	25 ppm as isobutylene above background on the PID for sustained 15 minute period.	Half mask air purifying respirator with combination organic vapor/HEPA cartridges

Respiratory protection should also be donned if:

- Visible dust is generated during drilling and excavation activities and wetting of the soil is not sufficient to control the generation of dust;
- Odors become objectionable at any time; or
- Respiratory tract irritation is noticed.

All employees who are expected to wear respiratory protection must have successfully passed a quantitative or qualitative fit-test within the past year.

Level C offers no protection against the hazards associated with exposure to carbon monoxide. If traditional drilling techniques (i.e., internal combustion engine) are used to install borings or wells inside a building, a carbon monoxide meter must be used to monitor the build up of exhaust gas in the building. The unit will be set to alarm at 25 ppm. If the alarm sounds, work will cease and all employees will leave the building. If carbon monoxide concentrations can not be reduced, mechanical ventilation may be required.

7.3. Other Safety Equipment

The following additional safety equipment will be brought to the site:

- Portable eye wash
- First Aid Kit
- Portable phones
- Type A-B-C fire extinguisher (it is sufficient to have an extinguisher located in the field truck);

8. SITE CONTROL

To prevent both exposures to unprotected personnel and migration of contamination due to tracking by personnel or equipment, work areas along with personal protective equipment requirements will be clearly defined.

8.1. Designation of Zones

- Exclusion or "hot" Zone
- Contamination Reduction Zone (CRZ)
- Support Zone

8.2. Exclusion Zone

A restricted zone will be established around the entire property while investigation activities are taking place to prevent access by the general public.

8.3. Contamination Reduction Zone

A mini-contamination reduction zone will be established (during monitoring well sampling, this is typically immediately adjacent to each well location) based on the location of work. This is where personnel will begin the sequential decontamination process (see Section 9.0) when exiting the exclusion zone. To prevent cross contamination and for accountability purposes, all personnel will enter and leave the exclusion zone through the contamination reduction zone.

8.4. Support/Restricted Zone

The restricted zone will be outlined with a fence and openings will be provided with traffic cones or "Caution Tape" to prohibit entry by the general public. To protect ENSR employees from the hazards associated with collecting samples in roadways, ENSR will hire a traffic control firm to provide appropriate and sufficient barriers, signs and flaggers as necessary.

The support zone will consist of those areas around the exclusion zone where equipment is staged. Eating, drinking and smoking will be limited to this area.

8.5. Safety Measures/Precautions

The following measures are designed to augment the specific health and safety guidelines provided in this plan.

- ENSR personnel should avoid working alone on remote sites. On most sites, client, subcontractor, or public personnel are generally nearby in case of an emergency or accident. ENSR personnel, through coordination, can rely upon these personnel for assistance in an

emergency. If no one else is nearby, scheduled call-ins on a cell phone may be used to assure personal safety.

- Avoidance of contamination is of the utmost importance. Whenever possible, avoid contact with contaminated (or potentially contaminated) surfaces or materials. Walk around (not through) puddles and discolored surfaces. Do not kneel on the ground or set equipment on the ground. Protect air monitoring equipment from water by bagging.

- Eating, drinking, chewing gum or tobacco, smoking or any practice that increases the probability of hand-to-mouth transfer and ingestion of materials is prohibited in the immediate work area and the decontamination zone.

- Hands and face must be thoroughly washed upon leaving the work area and before eating, drinking or any other activities.

- Beards or other facial hair that interfere with respirator fit are prohibited.

- The use of alcohol or illicit drugs is prohibited during the conduct of field operations.

- All equipment must be decontaminated or properly discarded before leaving the site in accordance with the project work plan.

- Safety equipment described in Section 6.0 will be required for all field personnel unless otherwise approved by the RHSM.

9. DECONTAMINATION

Proper decontamination is required of all personnel before leaving the site. The extent of personnel decontamination will depend on the amount of contamination encountered. Personnel decontamination will be accomplished by following a systematic procedure of cleaning (when necessary) and removing personal protective clothing (PPE)

For this program, disposable PPE, such as gloves, will be disposed of as general refuse.

Regardless of the type of decontamination system required, if washing facilities are unavailable, a container of potable water and liquid soap or clean wipes must be made available so employees can wash their hands and face before leaving the site for lunch or for the day.

10. MEDICAL / TRAINING REQUIREMENTS

10.1. Medical Surveillance

All personnel performing activities covered by this HASP must be active participants in a medical monitoring program which complies with 29 CFR 1910.120 (f). Each individual must have completed an annual surveillance examination and/or an initial baseline examination within the last year prior to performing any work on this site covered by this HASP.

10.1.1. Drug and Alcohol Testing

No plan currently exists for this particular client. However, all of ENSR employee's performing field-work covered by this HASP comply with random drug and alcohol testing requirements for other Retail Petroleum clients.

10.2. Training

All personnel performing activities covered by this HASP must have completed the appropriate training requirements specified in 29 CFR 1910.120 (e). Each individual must have completed an annual 8-hour refresher training course and/or initial 40-hour training course within the last year prior to performing any work on this site covered by this HASP.

Site-specific or equipment-specific training will have been received by those performing tasks requiring additional training (experienced equipment operators may rely on experience rather than formal training in some cases). In addition, each project location must have at least one staff member present on site at all times who is currently trained in First Aid and CPR (Cardio Pulmonary Resuscitation).

10.3. Site Safety Meetings

Prior to the commencement of investigative activities at each project location, a site safety meeting will be conducted by the SSO to review the specific requirements of this HASP. Attendance at this pre-entry briefing is mandatory and will be documented (see Attachment B).

Daily tailgate safety meetings will be conducted and documented throughout the duration of the project.

11. AUDITS AND INSPECTIONS

Safety audits must be conducted and documented for each project location on a monthly basis. In order to meet this requirement, typically these inspections will have to be conducted by the ENSR field team leader and/or project manager.

For short duration jobs (i.e., one week or less), the safety inspection should be conducted shortly after the work has commenced. For longer duration jobs, the inspection should be conducted shortly after commencement and monthly thereafter.

Audits should be documented on the ENSR PM Audit Checklist. To reduce the overall length of this HASP, a copy of the audit checklist is embedded below. Access the checklist by clicking on the icon below. ENSR PMs should print out a copy of the checklist before leaving for the job site, unless a computer and printer will be available at the site.

"Audit Inspection Checklist.xls"

12. INCIDENT RESPONSE

12.1. Emergencies

According to ENSR policy, ENSR personnel shall not participate in any emergency response where there are potential safety or health hazards (i.e., fire, explosion, or chemical exposure). ENSR response actions will be limited to evacuation and medical/first aid as described within this section below. As such, this section of the HASP has been written to comply with 29 CFR 1910.38 (a).

The basic elements of an emergency evacuation plan include employee training, alarm systems, escape routes, escape procedures, critical operations or equipment, rescue and medical duty assignments, designation of responsible parties, emergency reporting procedures and methods to account for all employees after evacuation.

Employee Training: Employees must be instructed in the specific aspects of emergency evacuation applicable to the site as part of the pre-entry briefing prior to the commencement of all on-site activities. On-site refresher or update training is required anytime escape routes or procedures are modified or personnel assignments are changed.

Alarm Systems/Emergency Signals: An emergency communication system must be in effect at all sites. The most simple and effective emergency communication system in many situations will be **direct verbal communications**.

Due to the size of the site, direct communications may be sufficient to warn all employees of a site-related emergency. If direct verbal communications are not a reasonable method of relating an emergency, the field vehicle horn will be used. The former facility is vacant, so telephone service is not available to ENSR. Therefore, ENSR must bring cellular phones with them to summon emergency responders, if necessary.

Drills, Escape Routes and Procedures: The escape route from the work location will be verified by the SSO upon arrival to the site. This will be indicated on the Site Map. The route will be reviewed with all employees during the pre-entry briefing. For this small site, emergency drills may be done as a table-top or verbal exercise; these should be done any time new persons are on site, changed conditions occur, or on a monthly basis.

Escape Routes and Procedures: The escape route from the work location will be verified by the SSO upon arrival to the site. The route will be reviewed with all employees during the pre-entry briefing.

Critical Operations and Equipment: All equipment and operations are required to cease in the event of site evacuation. The only exception will be related to health and safety. The PM or SSO must determine at the time of an emergency if health and safety will be jeopardized by immediate stoppage of any particular piece of equipment or personal activities. If such a determination is

made, personnel involved in critical duties must be minimized and special instructions must be established.

Rescue and Medical Duty Assignments: Prior to initiating work at the site, an ENSR field team member, usually the SSO, shall be appointed to activate emergency response actions. In the event an injury or illness requires more than first aid treatment, that individual will accompany the injured person to the medical facility and will remain with the person until release or admittance is determined. The escort will relay all appropriate medical information to the on-site project manager and the RHSM.

If the injured employee can be moved from the accident area, he or she will be brought to the CRZ where their PPE will be removed. If the person is suffering from a back or neck injury the person will not be moved and the requirements for decontamination do not apply. The SSO must familiarize the responding emergency personnel about the nature of the site and the injury. If the responder feels that the PPE can be cut away from the injured person's body, this will be done on-site. If this not feasible, decontamination will be performed after the injured person has been stabilized.

Designation of Responsible Parties: The SSO is responsible for initiating emergency response. In the event the SSO can not fulfill this duty, the alternate SSO will take charge. All personnel onsite are responsible for knowing the escape route from the site.

Employee Accounting Method: The on-site project manager or SSO is responsible for identifying all ENSR and subcontractor personnel on-site at all times. On small, short duration jobs this can be done informally as long as accurate accounting, via a head-count, is possible.

12.2. Incident Reporting/Investigation

12.2.1. ENSR Requirements

All work-related injuries and illnesses, regardless of severity, must be reported to the ENSR field team leader and/or project manager immediately. The field team leader and/or project manager must report the incident to the ENSR RHSM as soon as possible. Utilize the RHSMs voice mail or e-mail if the incident occurs after hours.

In addition, all near miss incidents must be reported to the ENSR RHSM as soon as possible.

An ENSR Supervisor's Accident Investigation Report form (Attachment D) must be completed by the ENSR field team leader and/or project manager in accordance with the instructions provided by the RHSM and submitted to the RHSM within 24 hours of occurrence of the incident.

If a subcontractor is injured, he/she should report to their supervisor immediately, who in turn, must report the injury to the ENSR SSO.

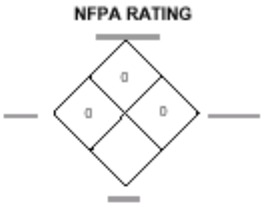
Material Safety Data Sheets

MATERIAL SAFETY DATA SHEET

Prepared to U.S. OSHA, CMA, ANSI and Canadian WHMIS Standards



PART I *What is the material and what do I need to know in an emergency?*

1. PRODUCT IDENTIFICATION

CHEMICAL NAME; CLASS:	**NON-FLAMMABLE GAS MIXTURE**
	Document Number: 002103
PRODUCT USE:	For general analytical/synthetic chemical uses.
SUPPLIER/MANUFACTURER'S NAME:	AIRGAS INC.
ADDRESS:	259 North Radnor-Chester Road Suite 100 Radnor, PA 19087-5283
BUSINESS PHONE:	1-610-687-5253
EMERGENCY PHONE:	1-800-949-7937 International: 1-423-479-0293
DATE OF PREPARATION:	April 22, 2001

2. COMPOSITION and INFORMATION ON INGREDIENTS

CHEMICAL NAME	CAS #	mole %	EXPOSURE LIMITS IN AIR					
			ACGIH		OSHA		NIOSH	OTHER
			TLV ppm	STEL ppm	PEL ppm	STEL ppm	IDLH ppm	ppm
Isobutylene	115-11-7	1 ppm - 1.7%	There are no specific exposure limits for Isobutylene. Isobutylene is a simple asphyxiant (SA). Oxygen levels should be maintained above 19.5%.					
Air	25635-88-5	Balance	There are no specific exposure limits applicable to Air.					
Air is a mixture of gases. The primary components of air, and the approximate concentration of each component, are listed below.								
Nitrogen	7727-37-9	79%	There are no specific exposure limits for Nitrogen. Nitrogen is a simple asphyxiant (SA). Oxygen levels should be maintained above 19.5%.					
Oxygen	7782-44-7	21%	There are no specific exposure limits for Oxygen.					

NE = Not Established. See Section 16 for Definitions of Terms Used.

NOTE (1): ALL WHMIS required information is included in appropriate sections based on the ANSI Z400.1-1998 format. This product has been classified in accordance with the hazard criteria of the CPR and the MSDS contains all the information required by the CPR.

3. HAZARD IDENTIFICATION

EMERGENCY OVERVIEW: This product is a colorless, odorless, non-flammable gas. The main health hazards associated with releases of this gas are related to the high pressure within the cylinder. Air, the main component of this product, is generally considered non-flammable, however, Air will support combustion. The flammable component of this gas mixture is below the LEL. A cylinder rupture hazard exists when this product, which is under pressure, is subjected to heat or flames. Emergency responders must wear personal protective equipment appropriate for the situation to which they are responding.

3. HAZARD IDENTIFICATION (Continued)

SYMPTOMS OF OVER-EXPOSURE BY ROUTE OF EXPOSURE: The most significant route of over-exposure for air is by inhalation at elevated or reduced pressure.

INHALATION: This product is non-toxic. Air, the main component of this product, is necessary for life.

OTHER POTENTIAL HEALTH EFFECTS: Contact with rapidly expanding gases (which are released under high pressure) may cause frostbite. Symptoms of frostbite include change in skin color to white or grayish-yellow. The pain after contact with liquid can quickly subside.

HEALTH EFFECTS OR RISKS FROM EXPOSURE: An Explanation in **Lay Terms**. Over-exposure to this product may cause the following health effects:

ACUTE: The most significant hazards associated with compressed air is the pressure hazard. Contact with rapidly expanding gases (which are released under high pressure) may cause frostbite. Symptoms of frostbite include change in skin color to white or grayish-yellow. The pain after contact with liquid can quickly subside.

CHRONIC: There are currently no known adverse health effects associated with chronic exposure to this gas.

TARGET ORGANS: ACUTE: Respiratory system under ambient low pressure conditions. Central nervous system under ambient high pressure conditions. CHRONIC: None expected.

	See Section 8		See-Section 8

For routine industrial applications

See Section 16 for Definition of Ratings

PART II *What should I do if a hazardous situation occurs?*

4. FIRST-AID MEASURES

RESCUERS SHOULD NOT ATTEMPT TO RETRIEVE VICTIMS OF EXPOSURE TO THIS PRODUCT WITHOUT ADEQUATE PERSONAL PROTECTIVE EQUIPMENT. At a minimum, Self-Contained Breathing Apparatus equipment should be worn.

Victim(s) must be taken for medical attention. Rescuers should be taken for medical attention, if necessary. Take copy of label and MSDS to physician or other health professional with victim(s). Remove victim(s) to fresh air, as quickly as possible. In case of eye contact which leads to irritation, immediately flush eyes with copious amounts of water for at least 15 minutes. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Only trained personnel should administer supplemental oxygen.

In case of frostbite, place the frostbitten part in warm water. DO NOT USE HOT WATER. If warm water is not available, or is impractical to use, wrap the affected parts gently in blankets. Alternatively, if the fingers or hands are frostbitten, place the affected area in the armpit. Encourage victim to gently exercise the affected part while being warmed. Seek immediate medical attention.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Acute or chronic respiratory conditions, as well as disorders involving the "Target Organs", as listed in Section 3 (Hazard Information), may be aggravated by overexposure to the components of this product.

RECOMMENDATIONS TO PHYSICIANS: Administer oxygen as soon as possible, following exposure.

5. FIRE-FIGHTING MEASURES

FLASH POINT: Not applicable.
AUTOIGNITION TEMPERATURE: Not applicable.
FLAMMABLE LIMITS (in air by volume, %):
Lower (LEL): Not applicable.
Upper (UEL): Not applicable.

5. FIRE-FIGHTING MEASURES (Continued)

FIRE EXTINGUISHING MATERIALS: Non-flammable gas. Use extinguishing media appropriate for surrounding fire.

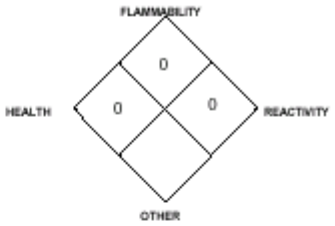
UNUSUAL FIRE AND EXPLOSION HAZARDS: When involved in a fire, this material may decompose and produce toxic gases including carbon monoxide and carbon dioxide. Additionally, when involved in fire, the cylinders may rupture.

Explosion Sensitivity to Mechanical Impact: Not Sensitive.

Explosion Sensitivity to Static Discharge: Not Sensitive.

SPECIAL FIRE-FIGHTING PROCEDURES: Structural fire-fighters must wear Self-Contained Breathing Apparatus and full protective equipment. Move fire-exposed cylinders from area, if it can be done without risk to fire-fighters. Withdraw immediately in case of rising sounds from venting pressure relief devices or any discoloration of tanks or cylinders due to a fire.

NFPA RATING



See Section 16 for Definition of Ratings

6. ACCIDENTAL RELEASE MEASURES

SPILL AND LEAK RESPONSE: Uncontrolled releases should be responded to by trained personnel using pre-planned procedures. Proper protective equipment should be used. In case of a release, clear the affected area, protect people, and respond with trained personnel. Minimum Personal Protective Equipment should be **Level D: safety glasses, and mechanically-resistant gloves. Level B, which includes the use of Self-Contained Breathing Apparatus, should be worn when oxygen levels are below 19.5% or are unknown.** Locate and seal the source of the leaking gas. If this does not stop the release (or if it is not possible to reach the valve), allow the gas to release in place or remove it to a safe area and allow the gas to be released there.

PART III *How can I prevent hazardous situations from occurring?*

7. HANDLING and STORAGE

WORK PRACTICES AND HYGIENE PRACTICES: Do not eat or drink while handling chemicals.

STORAGE AND HANDLING PRACTICES: Cylinders should be stored in dry, well-ventilated areas away from sources of heat. Compressed gases can present significant safety hazards. Store containers away from heavily trafficked areas and emergency exits.

SPECIAL PRECAUTIONS FOR HANDLING GAS CYLINDERS: Protect cylinders against physical damage. Store in cool, dry, well-ventilated, fireproof area, away from flammable or combustible materials and corrosive atmospheres. Store away from heat and ignition sources and out of direct sunlight. Do not store near elevators, corridors or loading docks. Do not allow area where cylinders are stored to exceed 52°C (125°F). Isolate from incompatible materials including flammable materials (see Section 10, Stability and Reactivity), which can burn violently. Use only storage containers and equipment (pipes, valves, fittings to relieve pressure, etc.) designed for the storage of Air. Do not store containers where they can come into contact with moisture. Cylinders should be stored upright and be firmly secured to prevent falling or being knocked over. Cylinders can be stored in the open, but in such cases, should be protected against extremes of weather and from the dampness of the ground to prevent rusting. Never tamper with pressure relief devices in valves and cylinders. The following rules are applicable to situations in which cylinders are being used:

Before Use: Move cylinders with a suitable hand-truck. Do not drag, slide or roll cylinders. Do not drop cylinders or permit them to strike each other. Secure cylinders firmly. Leave the valve protection cap in-place until cylinder is ready for use.

During Use: Use designated CGA fittings and other support equipment. Do not use adapters. Do not heat cylinder by any means to increase the discharge rate of the product from the cylinder. Use check valve or trap in discharge line to prevent hazardous backflow into the cylinder. Do not use oils or grease on gas-handling fittings or equipment.

After Use: Close main cylinder valve. Replace valve protection cap. Mark empty cylinders "EMPTY".

NOTE: Use only DOT or ASME code containers. Earth-ground and bond all lines and equipment associated with this product. Close valve after each use and when empty. Cylinders must not be recharged except by or with the consent of owner. For additional information refer to the Compressed Gas Association Pamphlet P-1, *Safe Handling of Compressed Gases in Containers*. Additionally, refer to CGA Bulletin SB-2 "*Oxygen Deficient Atmospheres*".

7. HANDLING and STORAGE (Continued)

PROTECTIVE PRACTICES DURING MAINTENANCE OF CONTAMINATED EQUIPMENT: Follow practices indicated in Section 6 (Accidental Release Measures). Make certain application equipment is locked and tagged-out safely. Purge gas handling equipment with inert gas (i.e. nitrogen) before attempting repairs. Always use product in areas where adequate ventilation is provided.

8. EXPOSURE CONTROLS - PERSONAL PROTECTION

VENTILATION AND ENGINEERING CONTROLS: Use with adequate ventilation.

RESPIRATORY PROTECTION: Maintain Oxygen levels above 19.5% in the workplace. If respiratory protection is needed, use only protection authorized in the U.S. Federal OSHA Standard (29 CFR 1910.134), applicable U.S. State regulations, or the Canadian CSA Standard Z94.4-93 and applicable standards of Canadian Provinces. Oxygen levels below 19.5% are considered IDLH by OSHA. In such atmospheres, use of a full-facepiece pressure/demand SCBA or a full facepiece, supplied air respirator with auxiliary self-contained air supply is required under OSHA's Respiratory Protection Standard (1910.134-1998).

EYE PROTECTION: Splash goggles, face-shields or safety glasses. If necessary, refer to U.S. OSHA 29 CFR 1910.133, or Canadian Standards.

HAND PROTECTION: Wear mechanically-resistant gloves when handling cylinders of this product. If necessary, refer to U.S. OSHA 29 CFR 1910.138 or appropriate Standards of Canada.

BODY PROTECTION: Use body protection appropriate for task. If a hazard of injury to the feet exists due to falling objects, rolling objects, where objects may pierce the soles of the feet or where employee's feet may be exposed to electrical hazards, use foot protection, as described in U.S. OSHA 29 CFR.

9. PHYSICAL and CHEMICAL PROPERTIES

The following information is for **Air**, the main component of this product , unless otherwise stated:

RELATIVE VAPOR DENSITY: 1
SPECIFIC GRAVITY: Not applicable.
SOLUBILITY IN WATER: 1.49% (v/v)
VAPOR PRESSURE, mmHg @ 20°C: Gas, ambient.
EXPANSION RATIO: Not applicable.
SPECIFIC VOLUME: 13.3 ft^3/lb; (0.833 m^3/kg)
EVAPORATION RATE (nBuAc = 1): Not applicable.
FREEZING POINT: -216.2°C (-357.2°F)
BOILING POINT @ 1 atmos: -194.3°C(-317.8°F)
pH: Not applicable.
VAPOR PRESSURE: Not applicable.
ODOR THRESHOLD: Not applicable.
COEFFICIENT WATER/OIL DISTRIBUTION: Not applicable.

The following information is pertinent to this gas mixture:

APPEARANCE, ODOR AND COLOR: This product is a colorless, odorless gas.

HOW TO DETECT THIS SUBSTANCE (warning properties): There are no distinctive properties to this product. In terms of leak detection, fittings and joints can be painted with a soap solution to detect leaks, which will be indicated by a bubble formation.

10. STABILITY and REACTIVITY

STABILITY: Normally stable.

DECOMPOSITION PRODUCTS: None known.

MATERIALS WITH WHICH SUBSTANCE IS INCOMPATIBLE: Air (the main component of this product) is not compatible with fuels, in that air will support combustion. The Isobutylene component of this mixture is incompatible with Strong oxidizers (e.g., chlorine, bromine pentafluoride, oxygen, oxygen difluoride, and nitrogen trifluoride).

HAZARDOUS POLYMERIZATION: Will not occur.

CONDITIONS TO AVOID: Contact with incompatible materials and exposure to heat, sparks and other sources of ignition. Cylinders exposed to high temperatures or direct flame can rupture or burst.

PART III *How can I prevent hazardous situations from occurring?*

11. TOXICOLOGICAL INFORMATION

TOXICITY DATA: The following toxicology data are for the components of this gas mixture present at a level greater than 1 mole %:

ISOBUTYLENE:
LC_{50} (Inhalation-Rat) 620 gm/m^3/4 hours

ISOBUTYLENE (continued):
LC_{50} (Inhalation-Mouse) 415 gm/m^3/2 hours

SUSPECTED CANCER AGENT: No component of this gas mixture is found on the following lists: FEDERAL OSHA Z LIST, NTP, CAL/OSHA, IARC, and therefore is not considered to be, nor suspected to be, cancer-causing agents by these agencies.

11. TOXICOLOGICAL INFORMATION (Continued)

IRRITANCY OF PRODUCT: Contact with rapidly expanding gases can cause frostbite and damage to exposed skin and eyes.

SENSITIZATION OF PRODUCT: No component of this product is a skin or respiratory sensitizer.

REPRODUCTIVE TOXICITY INFORMATION: Listed below is information concerning the effects of this product and its components on the human reproductive system.

Mutagenicity: This product is not reported to cause mutagenic effects in humans.
Embryotoxicity: This product is not reported to cause embryotoxic effects in humans.
Teratogenicity: This product is not reported to cause teratogenic effects in humans.
Reproductive Toxicity: This product is not reported to cause adverse reproductive effects in humans.

A mutagen is a chemical which causes permanent changes to genetic material (DNA) such that the changes will propagate through generation lines. An embryotoxin is a chemical which causes damage to a developing embryo (i.e. within the first eight weeks of pregnancy in humans), but the damage does not propagate across generational lines. A teratogen is a chemical which causes damage to a developing fetus, but the damage does not propagate across generational lines. A reproductive toxin is any substance which interferes in any way with the reproductive process.

BIOLOGICAL EXPOSURE INDICES: Biological Exposure Indices (BEIs) have been determined for the components of this product are as follows:

12. ECOLOGICAL INFORMATION

ENVIRONMENTAL STABILITY: This gas will be dissipated rapidly in well-ventilated areas.

EFFECT OF MATERIAL ON PLANTS or ANIMALS: No adverse effect is anticipated to occur to plant-life, except for frost produced in the presence of rapidly expanding gases.

EFFECT OF CHEMICAL ON AQUATIC LIFE: No evidence of an adverse effect of this product on aquatic life is currently available.

13. DISPOSAL CONSIDERATIONS

PREPARING WASTES FOR DISPOSAL: Product removed from cylinder must be disposed of in accordance with appropriate U.S. Federal, State and local regulations or with regulations of Canada and its Provinces. Return cylinders with residual product to Airgas, Inc. Do not dispose of locally.

14. TRANSPORTATION INFORMATION

THIS GAS MIXTURE IS HAZARDOUS AS DEFINED BY 49 CFR 172.101 BY THE U.S. DEPARTMENT OF TRANSPORTATION.

PROPER SHIPPING NAME:	Compressed gases, n.o.s. (Air, Isobutylene)
HAZARD CLASS NUMBER and DESCRIPTION:	2.2 (Compressed Gas)
UN IDENTIFICATION NUMBER:	UN 1956
PACKING GROUP:	Not Applicable
DOT LABEL(S) REQUIRED:	Compressed Gas

NORTH AMERICAN EMERGENCY RESPONSE GUIDEBOOK NUMBER (2000): 126

TRANSPORT CANADA, TRANSPORTATION OF DANGEROUS GOODS REGULATIONS: This gas mixture is considered as dangerous goods, per regulations of Transport Canada. Use the above information for the preparation of Canadian Shipments.

15. REGULATORY INFORMATION

ADDITIONAL U.S. REGULATIONS:

U.S. SARA REPORTING REQUIREMENTS: The components of this gas mixture are not subject to the reporting requirements of Sections 302, 304 and 313 of Title III of the Superfund Amendments and Reauthorization Act.

U.S. SARA THRESHOLD PLANNING QUANTITY: There are no specific Threshold Planning Quantities for this material. The default Federal MSDS submission and inventory requirement filing threshold of 10,000 lb (4,540 kg) may apply, per 40 CFR 370.20.

U.S. CERCLA REPORTABLE QUANTITY (RQ): Not applicable.

U.S. TSCA INVENTORY STATUS: The components of this product are listed on the TSCA Inventory.

OTHER U.S. FEDERAL REGULATIONS: Not applicable.

15. REGULATORY INFORMATION (Continued)

ADDITIONAL U.S. REGULATIONS (continued):

U.S. STATE REGULATORY INFORMATION: The components of this gas mixture are covered under specific State regulations, as denoted below:

Alaska - Designated Toxic and Hazardous Substances: None.
California - Permissible Exposure Limits for Chemical Contaminants: None.
Florida - Substance List: Isobutylene.
Illinois - Toxic Substance List: None.
Kansas - Section 302/313 List: None.
Minnesota - List of Hazardous Substances: Isobutylene.
Massachusetts - Substance List: None.
Missouri - Employer Information/Toxic Substance List: None.
New Jersey - Right to Know Hazardous Substance List: Isobutylene.
North Dakota - List of Hazardous Chemicals, Reportable Quantities: None.
Pennsylvania - Hazardous Substance List: Isobutylene.
Rhode Island - Hazardous Substance List: None.
Texas - Hazardous Substance List: None.
West Virginia - Hazardous Substance List: None.
Wisconsin - Toxic and Hazardous Substances: None.

CALIFORNIA SAFE DRINKING WATER AND TOXIC ENFORCEMENT ACT (PROPOSITION 65): No component of this product is on the California Proposition 65 Lists.

LABELING: **CAUTION:** HIGH PRESSURE GAS.
MAY ACCELERATE COMBUSTION.

Keep oil and grease away.
Use equipment rated for cylinder pressure.
Close valve after each use and when empty.
Use in accordance with the Material Safety Data Sheet.

FIRST-AID: **IF INHALED**, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Call a physician.

IN CASE OF FROSTBITE, obtain immediate medial attention.
DO NOT REMOVE THIS PRODUCT LABEL.

ADDITIONAL CANADIAN REGULATIONS:

CANADIAN DSL INVENTORY: The components of this product are listed on the DSL Inventory.

OTHER CANADIAN REGULATIONS: Not applicable.

CANADIAN ENVIRONMENTAL PROTECTION ACT (CEPA) PRIORITIES SUBSTANCES LISTS: The components of this product are not on the CEPA Priorities Substances Lists.

CANADIAN WHMIS SYMBOLS: **Class A:** Compressed Gases

16. OTHER INFORMATION

PREPARED BY: CHEMICAL SAFETY ASSOCIATES, Inc.
9163 Chesapeake Drive, San Diego, CA 92123-1002
858/565-0302

16. OTHER INFORMATION (Continued)

The information contained herein is based on data considered accurate. However, no warranty is expressed or implied regarding the accuracy of these data or the results to be obtained from the use thereof. AirGas, Inc. assumes no responsibility for injury to the vendee or third persons proximately caused by the material if reasonable safety procedures are not adhered to as stipulated in the data sheet. Additionally, AirGas, Inc. assumes no responsibility for injury to vendee or third persons proximately caused by abnormal use of the material even if reasonable safety procedures are followed. Furthermore, vendee assumes the risk in his use of the material.

DEFINITIONS OF TERMS

A large number of abbreviations and acronyms appear on a MSDS. Some of these which are commonly used include the following:

CAS #: This is the Chemical Abstract Service Number which uniquely identifies each constituent.

EXPOSURE LIMITS IN AIR:
ACGIH - American Conference of Governmental Industrial Hygienists, a professional association which establishes exposure limits. **TLV** - Threshold Limit Value - an airborne concentration of a substance which represents conditions under which it is generally believed that nearly all workers may be repeatedly exposed without adverse effect. The duration must be considered, including the 8-hour Time Weighted Average **(TWA)**, the 15-minute Short Term Exposure Limit, and the instantaneous Ceiling Level **(C)**. Skin absorption effects must also be considered.

OSHA - U.S. Occupational Safety and Health Administration.
PEL - Permissible Exposure Limit - This exposure value means exactly the same as a TLV, except that it is enforceable by OSHA. The OSHA Permissible Exposure Limits are based in the 1989 PELs and the June, 1993 Air Contaminants Rule (Federal Register: 58: 35338-35351 and 58: 40191). Both the current PELs and the vacated PELs are indicated. The phrase, "Vacated 1989 PEL," is placed next to the PEL which was vacated by Court Order.

IDLH - Immediately Dangerous to Life and Health - This level represents a concentration from which one can escape within 30-minutes without suffering escape-preventing or permanent injury. **The DFG - MAK** is the Republic of Germany's Maximum Exposure Level, similar to the U.S. PEL. **NIOSH** is the National Institute of Occupational Safety and Health, which is the research arm of the U.S. **O**ccupational **S**afety and **H**ealth **A**dministration (**OSHA**). NIOSH issues exposure guidelines called **R**ecommended **E**xposure Levels (**RELs**). When no exposure guidelines are established, an entry of **NE** is made for reference.

HAZARD RATINGS:
HAZARDOUS MATERIALS IDENTIFICATION SYSTEM: Health Hazard: **0** (minimal acute or chronic exposure hazard); **1** (slight acute or chronic exposure hazard); **2** (moderate acute or significant chronic exposure hazard); **3** (severe acute exposure hazard; onetime overexposure can result in permanent injury and may be fatal); **4** (extreme acute exposure hazard; onetime overexposure can be fatal). Flammability Hazard: **0** (minimal hazard); **1** (materials that require substantial pre-heating before burning); **2** (combustible liquid or solids; liquids with a flash point of 38-93°C [100-200°F]); **3** (Class IB and IC flammable liquids with flash points below 38°C [100°F]); **4** (Class IA flammable liquids with flash points below 23°C [73°F] and boiling points below 38°C [100°F]. Reactivity Hazard: **0** (normally stable); 1 (material that can become unstable at elevated temperatures or which can react slightly with water); **2** (materials that are unstable but do not detonate or which can react violently with water); **3** (materials that can detonate when initiated or which can react explosively with water); **4** (materials that can detonate at normal temperatures or pressures). **PERSONAL PROTECTIVE EQUIPMENT CODES: B:** Gloves and goggles; **C:** Gloves, goggles, rubber apron (appropriate body protection); **D:** Gloves, goggles, faceshield; rubber apron (appropriate body protection);. **X:** Special attention should be given to PPE Selection.

NATIONAL FIRE PROTECTION ASSOCIATION: Health Hazard: **0** (material that on exposure under fire conditions would offer no hazard beyond that of ordinary combustible materials); **1** (materials that on exposure under fire conditions could cause irritation or minor residual injury); **2** (materials that on intense or continued exposure under fire conditions could cause temporary incapacitation or possible residual injury); **3** (materials that can on short exposure could cause serious temporary or residual injury); **4** (materials that under very short exposure could cause death or major residual injury). Flammability Hazard and Reactivity Hazard: Refer to definitions for "Hazardous Materials Identification System".

FLAMMABILITY LIMITS IN AIR:
Much of the information related to fire and explosion is derived from the National Fire Protection Association (**NFPA**). Flash Point - Minimum temperature at which a liquid gives off sufficient vapors to form an ignitable mixture with air. Autoignition Temperature: The minimum temperature required to initiate combustion in air with no other source of ignition. LEL - the lowest percent of vapor in air, by volume, that will explode or ignite in the presence of an ignition source. UEL - the highest percent of vapor in air, by volume, that will explode or ignite in the presence of an ignition source.

TOXICOLOGICAL INFORMATION:
Possible health hazards as derived from human data, animal studies, or from the results of studies with similar compounds are presented. Definitions of some terms used in this section are: $\mathbf{LD_{50}}$ - Lethal Dose (solids & liquids) which kills 50% of the exposed animals; $\mathbf{LC_{50}}$ - Lethal Concentration (gases) which kills 50% of the exposed animals; **ppm** concentration expressed in parts of material per million parts of air or water; **mg/m³** concentration expressed in weight of substance per volume of air; **mg/kg** quantity of material, by weight, administered to a test subject, based on their body weight in kg. Data from several sources are used to evaluate the cancer-causing potential of the material. The sources are: **IARC** - the International Agency for Research on Cancer; **NTP** - the National Toxicology Program, **RTECS** - the Registry of Toxic Effects of Chemical Substances, **OSHA** and **CAL/OSHA**. IARC and NTP rate chemicals on a scale of decreasing potential to cause human cancer with rankings from 1 to 4. Subrankings (2A, 2B, etc.) are also used. Other measures of toxicity include **TDLo**, the lowest dose to cause a symptom and **TCLo** the lowest concentration to cause a symptom; **TDo**, **LDLo**, and **LDo**, or **TC**, **TCo**, **LCLo**, and **LCo**, the lowest dose (or concentration) to cause lethal or toxic effects. **BEI** - Biological Exposure Indices, represent the levels of determinants which are most likely to be observed in specimens collected from a healthy worker who has been exposed to chemicals to the same extent as a worker with inhalation exposure to the TLV. Ecological Information: EC is the effect concentration in water.

REGULATORY INFORMATION:
This section explains the impact of various laws and regulations on the material. **EPA** is the U.S. Environmental Protection Agency. **WHMIS** is the Canadian Workplace Hazardous Materials Information System. **DOT** and **TC** are the U.S. Department of Transportation and the Transport Canada, respectively. Superfund Amendments and Reauthorization Act **(SARA)**; the Canadian Domestic/Non-Domestic Substances List **(DSL/NDSL)**; the U.S. Toxic Substance Control Act **(TSCA)**; Marine Pollutant status according to the **DOT**; the Comprehensive Environmental Response, Compensation, and Liability Act **(CERCLA or Superfund)**; and various state regulations.

ALCONOX

MATERIAL SAFETY DATA SHEET

Section 1 – PRODUCT AND COMPANY IDENTIFICATION

PRODUCT NAME: ALCONOX

GENERAL USE: Detergent Cleaner
PRODUCT DESCRIPTION: White granular powder mixture, practically odorless

MANUFACTURERS NAME: Alconox, Inc	DATE PREPARED: October 8, 2003	Page 1 of 4
STREET ADDRESS: 30 Glenn St. Suite 309	TELEPHONE NUMBER FOR INFORMATION ++914-948-4040	
CITY, STATE, ZIP, COUNTRY White Plains, NY 10603 USA	EMERGENCY TELEPHONE NUMBER CHEM-TEL (800) 255-3924 Outside USA ++813-248-0573	
DISTRIBUTOR NAME: same unless filled in		
STREET ADDRESS:	TELEPHONE NUMBER FOR INFORMATION	
CITY, STATE, ZIP, COUNTRY	EMERGENCY TELEPHONE NUMBER	

SECTION 2 – HAZARDOUS INGREDIENTS

HAZARDOUS COMPONENTS	CAS #	% By Wt	OSHA PEL		ACGIH TWA		SARA TITLE III	RQ LBS.
			ppm	mg/m³	ppm	mg/m³		
Sodium phosphate, tribasic (a)	7758-29-40	10-30	N/E					5000
Sodium carbonate (nuisance dust)	497-19-8	7-13		15				
Sodium dodecylbenzene sulfonate (a)	25155-30-0	10-30	N/E					1000
Tetrasodium phosphate	7722-88-5	10-30		5				
(a) see Section 15			N/E not established					

SECTION 3 – HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

Granular powder, airborne dust particles are harmful and irritating to respiratory tract. Contact with eyes and skin may cause irritation. Hazard symbols for this product Xl,XN.

POTENTIAL HEALTH EFFECTS

INHALATION: Breathing airborne particles or dust from mixing, spraying, sanding, grinding, etc., may cause irritation to the respiratory tract

SKIN: : None expected, however, prolonged contact may cause irritation

EYES: Contact with eyes may cause irritation

INGESTION: May cause gastric distress, stomach pains, vomiting and diarrhea

CARCINOGENICITY NTP? No IARC (MONOGRAPHS)? No OSHA REGULATED? No

Document Name	MSDSAX.doc	Effective date: 10/15/2003
Issued By	Malcolm McLaughlin	Issue Date: 10/08/03
Author	Malcolm McLaughlin	Supercedes: AXeumsds112502

ALCONOX

MATERIAL SAFETY DATA SHEET

PRODUCT NAME: ALCONOX
October 8, 2003

SECTION 4 – FIRST AID MEASURES

INHALATION: Remove affected person to fresh air; if symptoms persist seek medical attention

SKIN: Remove contaminated clothing; wash affected area with soap and water; launder contaminated clothing before reuse; if irritation persists seek medical attention

EYES: Remove contact lenses. Flush eyes with clear running water for 15 minutes while holding eyelids open; if irritation persists, seek medical attention

INGESTION: Give two glasses of water for dilution; DO NOT induce vomiting

SECTION 5 – FIRE FIGHTING MEASURES

FLASH POINT (METHOD USED)	FLAMMABLE LIMITS LEL: NOT APPLICABLE UEL: NOT APPLICABLE	
Non-flammable	AUTOIGNITION TEMPERATURE: Not Determined	NFPA CLASS: none

GENERAL HAZARDS: Product is not considered flammable or combustible. Products of combustion include compounds of carbon, hydrogen and oxygen, including carbon monoxide.

EXTINGUISHING MEDIA: Carbon dioxide, water, water fog, dry chemical, chemical foam

FIRE FIGHTING PROCEDURES: NONE

UNUSUAL FIRE AND EXPLOSION HAZARDS; NONE

HAZARDOUS COMBUSTION PRODUCTS: Smoke, fumes, oxides of carbon

SECTION 6 – ENVIRONMENTAL RELEASE MEASURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Confine and segregate product for reuse; place material into approved containers for disposal; for spills in excess of allowable limits (RQ) notify the National Response Center @ (800) 424-8802; refer to CERCLA 40 CFT 302 for detailed instructions

SECTION 7 – HANDLING AND STORAGE

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE:
Keep container closed when not in use; protect containers from abuse; store containers in cool, dry area. Keep this and other chemicals out of reach of children.

SECTION 8 – EXPOSURE CONTROLS / PERSONAL PROTECTION

ENGINEERING CONTROLS

The use of local exhaust ventilation and airborne particle collection is recommended. No other special controls are indicated.

PERSONAL PROTECTION

RESPIRATORY PROTECTION (SPECIFY TYPE): NIOSH approved respirator designed to remove airborne particulate present in excess of maximum allowable concentrations due to operations such as mixing, spraying, sanding, buffing, etc. Refer to 29 CFR 1910 134 or European Standard EN 149 for regulations.

PROTECTIVE GLOVES: Neoprene or rubber gloves

EYE PROTECTION: Safety goggles with side shields

OTHER PROTECTIVE CLOTHING OR EQUIPMENT: Safety eyebath nearby

WORK/HYGENIC PRACTICES: Practice safe workplace habits. Minimize body contact with this, as well as all chemicals in general

Document Name	MSDSAX.doc	Effective date: 10/15/2003
Issued By	Malcolm McLaughlin	Issue Date: 10/08/03
Author	Malcolm McLaughlin	Supercedes: AXeumsds112502

ALCONOX

MATERIAL SAFETY DATA SHEET

PRODUCT NAME: ALCONOX

SECTION 9 – PHYSICAL AND CHEMICAL PROPERTIES

VAPOR PRESSURE (MM Hg) Not Applicable	VAPOR DENSITY (AIR = 1) Not Applicable
SPECIFIC GRAVITY (WATER = 1) 0.85-1.10	EVAPORATION RATE (WATER = 1) Not Applicable
SOLUBILITY IN WATER Complete to > 10% w/w	FREEZING POINT Not Applicable
pH: 9.5 (1% aqueous solution)	PHYSICAL STATE: Granular Powder
BOILING POINT Not Applicable	APPEARANCE AND ODOR White granular powder, practically odorless
VISCOSITY Not Applicable	VOLATILE ORGANIC COMPOUNDS (VOC) None

SECTION 10 – STABILITY AND REACTIVITY

STABILITY UNSTABLE STABLE XXX	CONDITIONS TO AVOID Store in a cool dry area

INCOMPATABILITY (Materials to Avoid)
Strong oxidizers, strong acids

HAZARDOUS DECOMPOSITION OR BYPRODUCTS: Decomposition will no occur if handled and stored properly. In case of fire, oxides of carbon, hydrocarbons, fumes, and smoke may be produced.

HAZARDOUS POLYMERIZATION MAY OCCUR WILL NOT OCCUR XXX	CONDITIONS TO AVOID None

SECTION 11 – TOXICOLOGICAL INFORMATION

Hazardous Ingredients	%	CAS #	LD50 of Ingredient (Species and Route)	LC50 of Ingredient (Species and Route)
Sodium phosphate, tribasic (a)	10-30	7758-29-4	3100 mg/kg oral –rat	Not established
Sodium carbonate (Nuisance Dust)	7-13	497-19-8	4020 mg/kg	1200 mg/m3/2H
Sodium dodecylbenzene sulfonate (a)	10-30	25155-30-0	Not Established	Not Established
Tetrasodium phosphate	10-30	7722-88-5	Not Established	Not established
Mixture as a whole	100%	various	>5.0 g/kg oral-rat	

SECTION 12 – ECOLOGICAL INFORMATION

No data are available on the adverse effects of this material on the environment. Neither COD nor BOD data are available. Based on the chemical composition of their product it is assumed that the mixture can be treated in an acclimatized biological waste treatment plant system in limited quantities. However treatment should be evaluated and approved for each specific biological system. None of the ingredients in this mixture are classified as a Marine Pollutant.

SECTION 13 – DISPOSAL CONSIDERATIONS

WASTE DISPOSAL METHODS: Dispose of in accordance with Local, State , and Federal regulations. Do not flush to waterway. Refer to "40 CFR Protection of Environment Parts 260 – 299" for disposal regulations in the US. Consult your Local, State, and Federal Environmental Protection Agency before disposing of any chemicals.

SECTION 14 – TRANSPORT INFORMATION

PROPER SHIPPING NAME: Not Regulated	IATA HAZARD CLASS / Pack Group: None
HAZARD CLASS / Pack Group: None / None	IMDG HAZARD CLASS: None
REFERENCE: Not Applicable	RID/ADR Dangerous Goods Code: None
IDENTIFICATION NUMBER: None	Canadian TDG Class / Division: None
LABEL: None Required	HAZARD SYMBOLS: None

Note: Transportation information provided is for reference only. Client is urged to consult CFR 49 parts 100 – 177, IMDG, IATA, EC, Canadian TDG, and United Nations TDG information manuals for detailed regulations and exceptions covering specific container sizes, packaging and materials and methods of shipping.

REVISION SUMMARY — This MSDS has been revised in the following sections:
No revisions available

MSDS prepared by manufacturer

The information contained herein is believed to be accurate but is not warranted to be so. Users are advised to confirm in advance of need that information is current, applicable and suited to the circumstances of use. Vendor assumes no responsibility for injury to vendee or third persons proximately caused by the material if reasonable safety procedures are not adhered to as stipulated in the data sheet. Furthermore, vendor assumes no responsibility for injury caused by abnormal use of this material even if reasonable safety procedures are followed.

Black Hills Lignite, LLC
MATERIAL SAFETY AND TRANSPORTATION DATA SHEET

SECTION 1 **PRODUCT IDENTIFICATION**

MANUFACTURERS NAME
Black Hills Bentonite, a Limited Liability Company
Trade Name: Granular Bentonite

TELEPHONE NO.
(307) 265-3740

ADDRESS
P.O. Box 9, Mills, WY 82644

CHEMICAL NAME AND SYNONYMS
Hydrous Silicate of Alumina / Wyoming Sodium Bentonite/Sodium Montmorillonite CAS No. 1302-78-9

SECTION 2 **HAZARDOUS INGREDIENTS**

CAS #	Component	Percentage	Exposure Limit
14808-60-7	Crystalline Silica in the form of Quartz	>1%	PEL - See Below TLV - 0.05 mg/m^3 TWA (respirable fraction) MSHA - See Below

OSHA PEL and MSHA Exposure Limit for Crystaline Silica Quartz:

$$\text{(Respirable)} \quad \frac{10\text{mg/m}^3}{\%\ \text{Silica} + 2}$$

National Institute for Occupational Safety and Health (NIOSH) has recommended that the permissible exposure limit be changes to 50 micrograms respirable free silica per cubic meter of air (0.05 mg/m^3) as determined by a full shift sample up to 10 hour working day, 40 hours per week. The 1974 NIOSH Criteria for recommended Standard for Occupational Exposure to Crystalline Silica should be consulted for more detailed information.

PEL means OSHA Permissible Exposure Limit.
TLV means American Conference of Governmental Industrial Hygienists (ACGIH) Threshold Limit Value.
MSHA means Mine Safety and Health Administration Exposure Limit.
TWA means 8 hour time weighted average.

Note: The Permissible Exposure Limits (PEL) reported above are the pre- 1989 limits that were reinstated by OSHA June 30, 1993 following a decision by the 11th Circuit Court of Appeals. Thes PELs are now being enforced by Federal OSHA. Be aware that more restrictive exposure limits may be enforced by some states, agencies or other authorities.

SECTION 3 **PHYSICAL DATA**

BOILING POINT (°F) Not Applicable	SPECIFIC GRAVITY (H_2O = 1) 2.6
VAPOR PRESSURE (mm Hg) Not Applicable	VAPOR DENSITY (AIR = 1) Not Applicable
EVAPORATION RATE Not Applicable	SOLUBILITY IN WATER Negligible
APPEARANCE AND ODOR Yellow, Blue, Brown granules or powder. Earthy odor.	DENSITY @ 20° C: UNCOMPACTED: 68 lbs/cubic foot

SECTION 5 HEALTH HAZARD DATA

CARCINOGENICITY - SEE ROUTES OF EXPOSURE AND EFFECTS (BELOW)

ACUTE ORAL LD_{50}	ACUTE DERMAL LD_{50}	AQUATIC TOXICITY (LC_{50})
ND	ND	10,000 mg/l

Inhalation: Breathing prolonged and excessive amounts of Bentonite dust may not cause noticeable injury or illness even though permanent lung damage may be occurring. Inhalation of dust may have the following serious chronic health effects:

Pneumoconiosis: Excessive inhalation of respirable dust may cause pneumonoconiosis, a respiratory disease, which can result in delayed, progressive, disabling and sometimes fatal lung injury. Symptoms include cough, shortness of breath, wheezing, non-specific chest illness and reduced pulmonary function. This disease is exacerbated by smoking. Individuals with pneumoconiosis are predisposed to develop tuberculosis.

Cancer Status: The International Agency for Research on Cancer has determined that crystalline silica inhaled in the form of quartz or cristobalite from occupational sources is carcinogenic to humans (Group 1 - carcinogenic to humans). Refer to IARC Monograph 68, Silica, Some Silicates and Organic Fibres (published in June 1997) in conjunction with the use of these materials. The National Toxicology Program classifies respirable crystalline silica as "known to be a human carcinogen". Refer to the 9th Report on Carcinogens (2000). The American Conference of Governmental Industrial Hygienists (ACGIH) classifies crystalline silica, quartz, as a suspected human carcinogen (A2).

Other Data with Possible Relevance to Human Health:

There is some evidence that breathing respirable crystalline silica or the disease silicosis is associated with an increased incidence of significant

disease endpoints such as scleroderma (an immune system disorder manifested by fibrosis of the lungs, skin and other internal organs) and kidney disease.

For further information consult "Adverse Effects of Crystalline Silica Exposure" published by the American Thoracic Society Medical Section of the American Lung Association, American Journal of Respiratory and Critical Care Medicine Volume 155, pages 761-768, 1997.

SKIN Potential irritant.	EYE Potential irritant.	INHALATION Irritation to lungs, nose, and throat.
EMERGENCY FIRST AID PROCEDURES		
EYES: Flush with water.	SKIN: Wash with soap and water.	
If inhaled and effects occur, move to fresh air. If breathing is irregular, administer oxygen		

SECTION 6 REACTIVITY DATA

CONDITIONS CONTRIBUTING TO INSTABILITY Stable	INCOMPATIBILITY None
HAZARDOUS DECOMPOSITION PRODUCTS None	HAZARDOUS POLYMERIZATION Will not occur.

SECTION 7 SPILL OR LEAK PROCEDURES

STEPS TO TAKE IF MATERIAL IS RELEASED OR SPILLED
If uncontaminated, sweep up or collect, and reuse product. Product becomes slippery when wet.

WASTE DISPOSAL METHOD
Dispose of in accordance with all Federal, State and Local regulations.

NEUTRALIZING CHEMICALS
Not Applicable

SECTION 8 SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION
Use NIOSH approved mechanical filter respirator for nontoxic dusts if dust concentration exceeds $10mg/m^3$

VENTILATION
Sufficient to keep dust levels below the TLV for crystalline silica.

PROTECTIVE GLOVES
General duty work gloves.

EYE PROTECTION
If high dust conditions exist, tight fitting goggles are recommended.

OTHER PROTECTIVE EQUIPMENT
Eyewash

SECTION 9 SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING
Store out of the weather. Product becomes slippery when wet. Avoid contact water in walk areas.

OTHER PRECAUTIONS

http://www.bhbentonite.com/msd-granularbentonite.html 11/1/2004

PROPER SHIPPING NAME	PLACARDS	HAZARD CLASS
Not Regulated	None	Not Nazardous

National Fire Protection Association Hazard Rating Codes			HEALTH CODE	FIRE CODE	REACTIVITY CODE
Least - 0	Slight - 1				
Moderate - 2	High - 3	Extreme - 4	0	2	0

II. SUMMARY OF HAZARDS

CAUTION! COMBUSTIBLE LIQUID AND VAPOR. HARMFUL IF INHALED AND MAY CAUSE DELAYED LUNG INJURY. CAN CAUSE NERVOUS SYSTEM DEPRESSION. ASPIRATION HAZARD IF SWALLOWED - CAN ENTER LUNGS AND CAUSE DAMAGE. Keep away from heat and flame. Avoid breathing vapor. Use ventilation adequate to keep vapor below recommended exposure limits. Avoid contact with eyes, skin and clothing. Wash thoroughly after handling.

NIOSH, EPA, & current literature have indicated that breathing whole diesel exhaust over a working lifetime may cause cancer in humans. Animals exposed to whole diesel exhaust over a lifetime have developed lung tumors (cancer). Diesel exhaust may cause eye irritation, headache, light-headedness, nausea, vomiting, heartburn, weakness, numbness, tingling in the extremities, chest tightness and wheezing. Cough and labored breathing have been reported in garage workers without adequate ventilation (air circulation) in the garage.

IV. HEALTH INFORMATION

EXPOSURE BY ROUTE OF ENTRY		EXPOSURE CHARACTERISTICS AND FIRST AID
INHALATION	EFFECTS	Acute: Headache, nasal and respiratory irritation, nausea, drowsiness, breathlessness, fatigue, central nervous system depression, convulsions, and loss of consciousness.
	FIRST AID	Move exposed person to fresh air. If breathing has stopped, perform artificial respiration. Get medical attention as soon as possible.
SKIN	EFFECTS	Acute: irritation Chronic: dermatitis
	FIRST AID	If clothing soaked, immediately remove clothing and wash skin with soap and water. Launder clothing before wearing. Get medical attention promptly.
EYES	EFFECTS	Acute: irritation
	FIRST AID	Immediately flush eyes with water for a minimum of 15 minutes, occasionally lifting the lower and upper lids. Get medical attention promptly.
SWALLOWING INGESTION	EFFECTS	Acute: aspiration hazard, headache, nausea, drowsiness, fatigue, pneumonitis, pulmonary edema, central nervous system depression, convulsions and loss of consciousness.
	FIRST AID	Call a physician immediately, ONLY induce vomiting at the instruction of a physician. Never give anything by mouth to an unconscious person
Medical conditions Generally Agravated by Exposure		N/AV

V. EMPLOYEE PROTECTION

RESPIRATORY PROTECTION (NIOSH APPROVED RESPIRATORS SEE OSHA STD. 1910.134)

Up to 4000 ppm, half-mask organic vapor respirator. Up to 20,000 ppm, full-face organic vapor respirator or full-face supplied air respirator. Greater than 20,000 ppm, fire fighting, or unknown concentration, self-contained breathing apparatus with positive pressure.

EYE	Safety glasses, chemical goggles or face shield as appropriate.
SKIN	Gloves: Nitrile, neoprene or other material resistant to distillate.

VENTILATION

Maintain local or dilution ventilation to keep air concentration below 400 ppm. Loading, unloading, tank gauging, etc., remain upwind. Request assistance of safety and industrial hygiene personnel to determine air concentrations.

VI. FIRE PROTECTION INFORMATION

FLASH POINT AND METHOD	AUTOIGNITION TEMPERATURE ESTIMATED	FLAMMABLE LIMITS % VOLUME IN AIR ESTIMATED	LOWER	UPPER
Tag Closed Cup 130 'F	490 'F		0.7	6

EXTINGUISHING MEDIA

Carbon dioxide, dry chemical, or foam. Water stream may spread fire, use water spray only to cool containers exposed to fire. If leak or spill has not ignited, use water spray to disperse the vapors.

HAZARDOUS DECOMPOSITION PRODUCTS

Incomplete combustion can yield carbon monoxide and various hydrocarbons.

FIRE AND EXPLOSION HAZARDS

Can form combustible mixtures with air when heated.

STORAGE

Do not store with strong oxidizers. Store as OSHA Class II combustible liquid.

Chemical Formula: HCl in water
Product Codes:
J.T. Baker: 0325, 0335, 0336, 4655, 5612, 5616, 5620, 5622
Mallinckrodt: 6388, H162, H163, H959, V028, V043

2. Composition/Information on Ingredients

Ingredient	CAS No	Percent	Hazardous
Hydrogen Chloride	7647-01-0	0.7 - 8%	Yes
Water	7732-18-5	92 - 99%	No

3. Hazards Identification

Emergency Overview

DANGER! CORROSIVE. LIQUID AND MIST CAUSE SEVERE BURNS TO ALL BODY TISSUE. MAY BE FATAL IF SWALLOWED OR INHALED.

J.T. Baker SAF-T-DATA(tm) Ratings (Provided here for your convenience)

Health Rating: 3 - Severe (Poison)
Flammability Rating: 0 - None
Reactivity Rating: 2 - Moderate
Contact Rating: 3 - Severe (Corrosive)
Lab Protective Equip: GOGGLES & SHIELD; LAB COAT & APRON; VENT HOOD; PROPER GLOVES
Storage Color Code: White (Corrosive)

Potential Health Effects

Health hazards given on this data sheet apply to concentrated solutions of hydrochloric acid. Hazards of dilute solutions may be reduced, depending upon the concentration. Degree of hazard for these reduced concentrations is not currently addressed in the available literature.

Inhalation:
Corrosive! Inhalation of vapors can cause coughing, choking, inflammation of the nose, throat, and upper respiratory tract, and in severe cases, pulmonary edema, circulatory failure, and death.
Ingestion:
Corrosive! Swallowing hydrochloric acid can cause immediate pain and burns of the mouth, throat, esophagus and gastrointestinal tract. May cause nausea, vomiting, and diarrhea, and in severe cases, death.
Skin Contact:
Corrosive! Can cause redness, pain, and severe skin burns. Concentrated solutions cause deep ulcers and discolor skin.
Eye Contact:
Corrosive! Vapors are irritating and may cause damage to the eyes. Contact may cause severe burns and permanent eye damage.
Chronic Exposure:
Long-term exposure to concentrated vapors may cause erosion of teeth. Long term exposures seldom occur due to the corrosive properties of the acid.
Aggravation of Pre-existing Conditions:
Persons with pre-existing skin disorders or eye problems or impaired respiratory function may be more susceptible to the effects of the substance.

---

4. First Aid Measures

First aid procedures given apply to concentrated solutions. Exposures to dilute solutions may not require these extensive first aid procedures.
Inhalation:
Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.

Ingestion:
If swallowed, DO NOT INDUCE VOMITING. Give large quantities of water. Never give anything by mouth to an unconscious person. Get medical attention immediately.
Skin Contact:
Immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention immediately. Wash clothing before reuse. Thoroughly clean shoes before reuse.
Eye Contact:
Immediately flush eyes with plenty of water for at least 15 minutes, lifting lower and upper eyelids occasionally. Get medical attention immediately.

---

5. Fire Fighting Measures

Fire:
Not considered to be a fire hazard. May react with metals or heat to release flammable hydrogen gas.
Explosion:
Not considered to be an explosion hazard.
Fire Extinguishing Media:
Water or water spray. Neutralize with soda ash or slaked lime.
Special Information:
In the event of a fire, wear full protective clothing and NIOSH-approved self-contained breathing apparatus with full facepiece operated in the pressure demand or other positive pressure mode. Structural firefighter's protective clothing is ineffective for fires involving hydrochloric acid. Stay away from ends of tanks. Cool tanks with water spray until well after fire is out.

---

6. Accidental Release Measures

Ventilate area of leak or spill. Wear appropriate personal protective equipment as specified in Section 8. Isolate hazard area. Keep unnecessary and unprotected personnel from entering. Contain and recover liquid when possible. Neutralize with alkaline material (soda ash, lime), then absorb with an inert material (e. g., vermiculite, dry sand, earth), and place in a chemical waste container. Do not use combustible materials, such as saw dust. Do not flush to sewer! US Regulations (CERCLA) require reporting spills and releases to soil, water and air in excess of reportable quantities. The toll free number for the US Coast Guard National Response Center is (800) 424-8802.

J. T. Baker NEUTRASORB® or TEAM® 'Low Na+' acid neutralizers are recommended for spills of this product.

---

7. Handling and Storage

Store in a cool, dry, ventilated storage area with acid resistant floors and good drainage.

Protect from physical damage. Keep out of direct sunlight and away from heat and incompatible materials. Do not wash out container and use it for other purposes. When diluting, always add the acid to water; never add water to the acid. When opening metal containers, use non-sparking tools because of the possibility of hydrogen gas being present. Protect from freezing. Containers of this material may be hazardous when empty since they retain product residues (vapors, liquid); observe all warnings and precautions listed for the product.

---

8. Exposure Controls/Personal Protection

Airborne Exposure Limits:
For Hydrochloric acid:
- OSHA Permissible Exposure Limit (PEL):
5 ppm (Ceiling)
- ACGIH Threshold Limit Value (TLV):
2 ppm (Ceiling), A4 Not classifiable as a human carcinogen

Ventilation System:
A system of local and/or general exhaust is recommended to keep employee exposures below the Airborne Exposure Limits. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at its source, preventing dispersion of it into the general work area. Please refer to the ACGIH document, *Industrial Ventilation, A Manual of Recommended Practices*, most recent edition, for details.

Personal Respirators (NIOSH Approved):
If the exposure limit is exceeded and engineering controls are not feasible, a full facepiece respirator with an acid gas cartridge may be worn up to 50 times the exposure limit or the maximum use concentration specified by the appropriate regulatory agency or respirator supplier, whichever is lowest. For emergencies or instances where the exposure levels are not known, use a full-facepiece positive-pressure, air-supplied respirator. WARNING: Air purifying respirators do not protect workers in oxygen-deficient atmospheres.

Skin Protection:
Rubber or neoprene gloves and additional protection including impervious boots, apron, or coveralls, as needed in areas of unusual exposure to prevent skin contact.

Eye Protection:
Use chemical safety goggles and/or a full face shield where splashing is possible. Maintain eye wash fountain and quick-drench facilities in work area.

---

9. Physical and Chemical Properties

Appearance:
Clear, colorless solution.

Odor:
Pungent, hydrochloric acid.

Solubility:
Infinitely soluble.

Specific Gravity:
ca. 1

pH:

For HCL solutions: 0.1 (1.0 N), 1.1 (0.1 N), 2.02 (0.01 N)
% Volatiles by volume @ 21C (70F):
100 (as water and acid)
Boiling Point:
ca. 100C (ca. 212F)
Melting Point:
ca. 0C (ca. 32F)
Vapor Density (Air=1):
Essentially the same as water.
Vapor Pressure (mm Hg):
Essentially the same as water.
Evaporation Rate (BuAc=1):
Essentially the same as water.

---

10. Stability and Reactivity

Stability:
Stable under ordinary conditions of use and storage.
Hazardous Decomposition Products:
When heated to decomposition, emits toxic hydrogen chloride fumes and will react with water or steam to produce heat and toxic and corrosive fumes. Thermal oxidative decomposition produces toxic chlorine fumes and explosive hydrogen gas.
Hazardous Polymerization:
Will not occur.
Incompatibilities:
A strong mineral acid, concentrated hydrochloric acid is highly reactive with strong bases, metals, metal oxides, hydroxides, amines, carbonates and other alkaline materials. Incompatible with materials such as cyanides, sulfides, sulfites, and formaldehyde.
Conditions to Avoid:
Heat, direct sunlight, incompatibles.

---

11. Toxicological Information

Hydrochloric acid: Inhalation rat LC50: 3124 ppm/1H; Oral rabbit LD50: 900 mg/kg. Investigated as a tumorigen, mutagen, reproductive effector.

--------\Cancer Lists\----------

Ingredient	---NTP Carcinogen--- Known	Anticipated	IARC Category
Hydrogen Chloride (7647-01-0)	No	No	3
Water (7732-18-5)	No	No	None

---

12. Ecological Information

http://www.jtbaker.com/msds/englishhtml/h3883.htm 9/28/2004

Environmental Fate:
For Hydrochloric Acid (Concentrated Solutions):
When released into the soil, this material is not expected to biodegrade. When released into the soil, this material may leach into groundwater.
Environmental Toxicity:
For Hydrochloric Acid (Concentrated Solutions):
This material may be toxic to aquatic life. LC50 Shrimp: 100-300 ppm/48-hr/salt water; LC100 trout: 10 mg/l/24-hr; TLm mosquito fish: 282 ppm/96-hr.

---

13. Disposal Considerations

Whatever cannot be saved for recovery or recycling should be handled as hazardous waste and sent to a RCRA approved waste facility. Processing, use or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations. Dispose of container and unused contents in accordance with federal, state and local requirements.

16. Other Information

NFPA Ratings: Health: **3** Flammability: **0** Reactivity: **0**
Label Hazard Warning:
DANGER! CORROSIVE. LIQUID AND MIST CAUSE SEVERE BURNS TO ALL BODY TISSUE. MAY BE FATAL IF SWALLOWED OR INHALED.
Label Precautions:
Do not get in eyes, on skin, or on clothing.
Do not breathe vapor or mist.
Keep container closed.
Use only with adequate ventilation.
Wash thoroughly after handling.
Label First Aid:
In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. If swallowed, DO NOT INDUCE VOMITING. Give large quantities of water. Never give anything by mouth to an unconscious person. In all cases get medical attention immediately.
Product Use:
Laboratory Reagent.

LIQUI-NOX

MATERIAL SAFETY DATA SHEET

Section 1 – PRODUCT AND COMPANY IDENTIFICATION

PRODUCT NAME: LIQUI-NOX
GENERAL USE: Detergent Cleaner
PRODUCT DESCRIPTION: pale yellow liquid, odorless

MANUFACTURERS NAME: Alconox, Inc	DATE PREPARED: October 23, 2003	Page 1 of 4
STREET ADDRESS: 30 Glenn St. Suite 309	TELEPHONE NUMBER FOR INFORMATION ++914-948-4040	
CITY, STATE, ZIP, COUNTRY White Plains, NY 10603 USA	EMERGENCY TELEPHONE NUMBER CHEM-TEL (800) 255-3924 Outside USA ++813-248-0573	
DISTRIBUTOR NAME: same unless filled in		
STREET ADDRESS:	TELEPHONE NUMBER FOR INFORMATION	
CITY, STATE, ZIP, COUNTRY	EMERGENCY TELEPHONE NUMBER	

SECTION 2 – HAZARDOUS INGREDIENTS

HAZARDOUS COMPONENTS	CAS #	% By Wt	OSHA PEL		ACGIH TWA		SARA TITLE III	RQ LBS.
			ppm	mg/m³	ppm	mg/m³		
Sodium dodecylbenzene sulfonate (a)	25155-30-0	10-30	N/E	N/E	N/E	N/E		1000
(a) see Section 15			not est = not established					

SECTION 3 – HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW

Mild liquid, prolonged contact may cause skin & eye irritation. Ingestion may cause gastric distress

POTENTIAL HEALTH EFFECTS

INHALATION: None expected, however, certain individuals may be sensitized and experience minor nausea or headaches.

SKIN: None expected, however, prolonged contact may cause irritation

EYES: Contact with eyes may cause irritation.

INGESTION: May cause gastric distress, vomiting and diarrhea.

CARCINOGENICITY NTP? No IARC (MONOGRAPHS)? No OSHA REGULATED? No

Document Name	MSDSLQ.doc	Effective date: 10/31/2003
Issued By	Malcolm McLaughlin	Issue Date: 10/23/03
Author	Malcolm McLaughlin	Supercedes: LQeumsds112202

MATERIAL SAFETY DATA SHEET

PRODUCT NAME: LIQUI-NOX
October 23, 2003

SECTION 4 – FIRST AID MEASURES

INHALATION: Remove affected person to fresh air; if symptoms persist seek medical attention.

SKIN: Remove contaminated clothing; wash affected area with soap and water; launder contaminated clothing before reuse; if irritation persists seek medical attention.

EYES: Remove contact lenses. Flush eyes with water for 15 minutes; if irritation persists, seek medical attention

INGESTION: Give two glasses of water for dilution; DO NOT induce vomiting; see medical attention

SECTION 5 – FIRE FIGHTING MEASURES

FLASH POINT (METHOD USED)	FLAMMABLE LIMITS LEL: NOT APPLICABLE UEL: NOT APPLICABLE	
Non-flammable	AUTOIGNITION TEMPERATURE: Not Determined	NFPA CLASS: none

GENERAL HAZARDS: Product is not considered flammable or combustible. Products of combustion include compounds of carbon, hydrogen and oxygen, including carbon monoxide.

EXTINGUISHING MEDIA: Carbon dioxide, water, water fog, dry chemical, chemical foam,

FIRE FIGHTING PROCEDURES: Keep containers coll with water spray to prevent container rupture due to steam bulidup; floor will become slippery if material is released.

UNUSUAL FIRE AND EXPLOSION HAZARDS; None

HAZARDOUS COMBUSTION PRODUCTS: Smoke, fumes, oxides of carbon

SECTION 6 – ENVIRONMENTAL RELEASE MEASURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Small spills – wash to sanitary sewer with plenty of water. Large spills - confine spill, soak up with approved absorbent, shovel product into approved container for disposal. For spills in excess of allowable limits (RQ) notify the National Response Center (800) 424-8802; refer to CERCLA 40 CFR 302 for complete regulations concerning reporting requirements.

SECTION 7 – HANDLING AND STORAGE

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE: Keep container closed when not in use; protect containers from abuse; protect from extreme temperatures. Keep this and other chemicals out of reach of children.

SECTION 8 – EXPOSURE CONTROLS / PERSONAL PROTECTION

ENGINEERING CONTROLS

The use of local exhaust ventilation is recommended. No other special controls are indicated.

PERSONAL PROTECTION

RESPIRATORY PROTECTION (SPECIFY TYPE): None Required

PROTECTIVE GLOVES: Recommended for general protection.

EYE PROTECTION: Recommended for general protection

OTHER PROTECTIVE CLOTHING OR EQUIPMENT: Safety eyebath nearby.

WORK/HYGENIC PRACTICES: Practice safe workplace habits. Minimize body contact with this, as well as all chemicals in general.

SECTION 9 – PHYSICAL AND CHEMICAL PROPERTIES

VAPOR PRESSURE (MM Hg) 17 mm Hg @ 20° C	VAPOR DENSITY (AIR = 1) >1
SPECIFIC GRAVITY (WATER = 1) 1.083	EVAPORATION RATE (WATER = 1) <1
SOLUBILITY IN WATER Complete	FREEZING POINT Not Determined
BOILING POINT 212°F (100°C)	APPEARANCE AND ODOR Pale yellow liquid, odorless
pH: 8.5	PHYSICAL STATE: Liquid
VISCOSITY Not Determined	VOLATILE ORGANIC COMPOUNDS (VOC) None

SECTION 10 – STABILITY AND REACTIVITY

STABILITY UNSTABLE STABLE XXX	CONDITIONS TO AVOID Extreme temperatures

INCOMPATABILITY (Materials to Avoid)
Strong oxidizers, strong acids

HAZARDOUS DECOMPOSITION OR BYPRODUCTS: Decomposition will no occur if handled and stored properly. In case of fire, oxides of carbon, hydrocarbons, fumes, and smoke may be produced.

HAZARDOUS POLYMERIZATION MAY OCCUR WILL NOT OCCUR XXX	CONDITIONS TO AVOID None

SECTION 11 – TOXICOLOGICAL INFORMATION

Hazardous Ingredients	%	CAS #	LD50 of Ingredient (Species and Route)	LC50 of Ingredient (Species and Route)
Sodium dodecylbenzene sulfonate (a)	10-30	25155-30-0	Not established	Not established
Mixture of all ingredients	100%	N/A	>5 g/kg oral rat	

SECTION 12 – ECOLOGICAL INFORMATION

No data are available on the adverse effects of this material on the environment. Neither COD nor BOD data are available. Based on the chemical composition of their product it is assumed that the mixture can be treated in an acclimatized biological waste treatment plant system in limited quantities. However should treatment should be evaluated and approved for each specific biological system. None of the ingredients in this mixture are classified as a Marine Pollutant.

SECTION 13 – DISPOSAL CONSIDERATIONS

WASTE DISPOSAL METHODS: Dispose of in accordance with Local, State, and Federal regulations. Products classified as non-hazardous may become hazardous waste upon contact with other products. Refer to "40 CFR Protection of Environment Parts 260-299" for complete waste disposal regulations. Consult your local, state, or Federal Environmental Protection Agency before disposing of any chemicals.

SECTION 14 – TRANSPORT INFORMATION

PROPER SHIPPING NAME: Not Regulated
HAZARD CLASS / Pack Group: None / None
REFERENCE: Not Applicable
IDENTIFICATION NUMBER: None
LABEL: None Required

IATA HAZARD CLASS / Pack Group: None
IMDG HAZARD CLASS: None
RID/ADR Dangerous Goods Code: None
Canadian TDG Class / Division: None
HAZARD SYMBOLS: None

Note: Transportation information provided is for reference only. Client is urged to consult CFR 49 parts 100 – 177, IMDG, IATA, EC, Canadian TDG, and United Nations TDG information manuals for detailed regulations and exceptions covering specific container sizes, packaging and materials and methods of shipping.

LEHIGH PORTLAND CEMENT COMPANY

MATERIAL SAFETY DATA SHEET

FOR

PORTLAND CEMENT

MSDS NUMBER:

EFFECTIVE DATE: OCTOBER 1997

1. PRODUCT/COMPANY IDENTIFICATION

Manufacturer's Name & Address:

Lehigh Portland Cement Company
7660 Imperial Way
Allentown, PA 18195

Chemical Family:

Calcium Compounds

Chemical Name and Synonyms:

Portland Cement (CAS # 65997-15-1), Hydraulic Cement

Telephone Number for Information:

800-523-5488

Trade Name and Synonyms:

Lehigh Portland Cement Types I, II, III, V
Lehigh White Cement Types I, III, V
Lehigh Colored Portland Cement
Lehigh Portland/Lime Cement Types N, S

2. EMERGENCY AND FIRST AID

EMERGENCY INFORMATION:

Portland cement is a light gray or white powder. When in contact with moisture in eyes or on skin, or when mixed with water, portland cement becomes highly caustic (pH > 12) and will damage or burn (as severely as third-degree)

Major compounds are:

$3CaO•SiO_2$	Tricalcium Silicate	CAS #12168-85-3
$2CaO•SiO_2$	Dicalcium Silicate	CAS #10034-77-2
$3CaO•Al_2O_3$	Tricalcium Aluminate	CAS #12042-78-3
$4CaO•Al_2O_3•Fe_2O_3$	Tetracalcium aluminoferrite	CAS #12068-35-8
$CaSO_4•2H_2O$	Calcium Sulfate dihydrate (Gypsum)	CAS #7778-18-9 (CAS #13397-24-5)

4. HAZARDOUS INGREDIENTS

COMPONENT	OSHA PEL (8-Hour TWA)	ACGIH TLV-TWA (1995-1996)	NIOSH REL (8-Hour TWA)
Portland Cement (CAS #65997-15-1) 50 to 95% by weight	5 mg respirable dust/m^3 15 mg total dust/m^3	10 mg total dust/m^3	
Calcium sulfate (CAS #7778-18-9) [Gypsum (CAS #13397-24-5)] 0 to 10% by weight	5 mg respirable dust/m^3 15 mg total dust/m^3	10 mg total dust/m^3	
Iron oxide (CAS #1309-37-1) 0 to 15% by weight	10 mg/m^3	5 mg/m^3	
Calcium carbonate (CAS #1317-65-3) 0 to 5% by weight	5 mg respirable dust/m^3 15 mg total dust/m^3	10 mg total dust/m^3	

Magnesium oxide (CAS #1309-48-4) 0 to 5% by weight	15 mg total dust/m^3	10 mg total dust/m^3	
Calcium oxide (CAS #1306-78-8) 0 to 5% by weight	5 mg/m^3	2 mg/m^3	
Crystalline silica (CAS #14808-60-7) 0 to 0.1% by weight	10 mg of respirable dust/m^3 % SiO_2 + 2	0.10 mg respirable quartz/m^3	0.05 mg respirable quartz dust/m^3
	30 mg of total dust/m^3 % SiO_2 + 2		
	250 million particles/ft^3 % SiO_2 + 5		

TRACE INGREDIENTS:

Due to the use of substances mined from the earth's crust, trace amounts of naturally occurring, potentially harmful constituents may be detected during chemical analysis. Portland cement may contain up to 0.75% insoluble residue. A small amount of this residue includes free crystalline silica. Portland cement also may contain trace (<0.05%) amounts of chromium salts or compounds (including hexavalent chromium) or other metals (including nickel compounds) found to be hazardous or toxic in some chemical forms. These metals are present mostly as trace substitutions within the principal minerals. Other trace constituents may include potassium and sodium sulfate compounds.

5. HAZARD IDENTIFICATION

POTENTIAL HEALTH EFFECTS:

NOTE: Potential health effects may vary depending upon the duration and degree of exposure. To reduce or eliminate health hazards associated with this product, use exposure controls or personal protection methods as described in Section 10.

EYE CONTACT:

(Acute/Chronic) Exposure to airborne dust may cause immediate or delayed irritation or inflammation of the cornea. Eye contact by larger amounts of dry powder or splashes of wet portland cement may cause effects ranging from moderate eye irritation to chemical burns and blindness.

SKIN CONTACT:

(Acute) Exposure to dry portland cement may cause drying of the skin with consequent mild irritation or more significant effects attributable to aggravation of other conditions. Discomfort or pain cannot be relied upon to alert a person to a hazardous skin exposure.

(Chronic) Dry portland cement coming in contact with wet skin or exposure to wet portland cement may cause more severe skin effects, including thickening, cracking or fissuring of the skin. Prolonged exposure can cause severe skin damage in the form of chemical (caustic) burns.

(Acute/Chronic) Some individuals may exhibit an allergic response upon exposure to portland cement. The response may appear in a variety of forms ranging from a mild rash to severe skin ulcers.

INHALATION:

(Acute) Exposure to portland cement may cause irritation to the moist mucous membranes of the nose, throat and upper respiratory system. Pre-existing upper respiratory and lung diseases may be aggravated by inhalation of portland cement.

(Chronic) Inhalation exposure to free crystalline silica may cause delayed lung injury including silicosis, a disabling

	and potentially fatal lung disease, and/or cause or aggravate other lung diseases or conditions.
INGESTION:	(Acute/Chronic) Internal discomfort or ill effects are possible if large quantities are swallowed.
CARCINOGENIC POTENTIAL:	Portland cement is not recognized as a carcinogen by NTP, OSHA, or IARC. However, it may contain trace amounts of heavy metals recognized as carcinogens by these organizations. In addition, IARC classifies crystalline silica, a trace constituent, as a known human carcinogen (Group I). NTP has characterized respirable silica as "reasonably anticipated to be a carcinogen." (See also Section 13.)

6. PHYSICAL/CHEMICAL DATA

APPEARANCE/ODOR:	Gray, white or colored powder, odorless	PHYSICAL STATE:	Solid (Powder)
BOILING POINT:	> 1000ƒC	MELTING POINT:	Not applicable
VAPOR PRESSURE:	Not applicable	VAPOR DENSITY:	Not applicable
pH (IN WATER) (ASTM D 1293-95)	12 to 13	SOLUBILITY IN WATER:	Slightly soluble (0.1% to 1.0%)
SPECIFIC GRAVITY (H_2O = 1.0):	3.15	EVAPORATION RATE:	Not applicable

7. FIRE AND EXPLOSION

FLASH POINT:	None	LOWER EXPLOSIVE LIMIT:	None

AUTO IGNITION TEMPERATURE:	Not combustible	UPPER EXPLOSIVE LIMIT:	None
FLAMMABLE LIMITS	Not applicable	SPECIAL FIRE FIGHTING PROCEDURES:	None
EXTINGUISHING MEDIA:	Not combustible	UNUSUAL FIRE AND EXPLOSION HAZARDS:	None
HAZARDOUS COMBUSTION PRODUCTS:	None		

8. STABILITY AND REACTIVITY DATA

STABILITY:	Product is stable. Keep dry until used.
CONDITIONS TO AVOID:	Unintentional contact with water. Contact with water will result in hydration and produces (caustic) calcium hydroxide.
INCOMPATIBILITY:	Wet portland cement is alkaline. As such, it is incompatible with acids, ammonium salts and aluminum metal.
HAZARDOUS DECOMPOSITION:	Will not occur.
HAZARDOUS POLYMERIZATION:	Will not occur.

9. PRECAUTIONS FOR HANDLING, STORAGE AND DISPOSAL

SKIN PROTECTION:	Wear impervious abrasion- and alkali-resistant gloves, boots, long-sleeved shirt, long pants or other protective clothing to prevent skin contact. Promptly remove clothing dusty with dry portland cement or clothing dampened with moisture mixed with portland cement, and launder before re-use. If contact occurs, wash areas contacted by material with pH neutral soap and water.

11. TRANSPORTATION DATA

Portland cement is not hazardous under U.S. DOT or TDG regulations.

12. TOXICOLOGICAL AND ECOLOGICAL INFORMATION

For a description of available, more detailed toxicological and ecological information, contact Lehigh Portland Cement Company.

13. OTHER REGULATORY INFORMATION

Status under US OSHA Hazard Communication Rule 29 CFR 1910.1200:	Portland cement is considered a hazardous chemical under this regulation and should be included in the employer's hazard communication program.
Status under CERCLA/Superfund, 40 CFR 117 and 302:	Not listed.
Hazard Category under SARA (Title III), Sections 311 and 312:	Portland cement qualifies as a hazardous substance with delayed health effects.
Status under SARA (Title III), Section 313:	Not subject to reporting requirements under Section 313.
Status under TSCA (as of May 1997):	Some substances in portland cement are on the TSCA

	inventory list.
Status under the Federal Hazardous Substances Act:	Portland cement is a hazardous substance subject to statutes promulgated under the subject act.
Status under California Proposition 65:	This product contains crystalline silica, a substance known to the State of California to cause cancer. This product also may contain trace amounts of heavy metals known to the State of California to cause cancer, birth defects or other reproductive harm.
Status under Canadian Environmental Protection Act:	Not listed.
Status under Canadian WHMIS:	Portland cement is considered to be a hazardous material under the Hazardous Products Act as defined by the Controlled Products Regulations (Class D2A, E - Corrosive Material) and subject to the requirements of WHMIS.

14. OTHER INFORMATION

This MSDS provides information on various types of portland cement products. A particular product's composition may vary from sample to sample. The information provided herein is believed by Lehigh Portland Cement Company to be accurate at the time of preparation or prepared from sources believed to be reliable. Health and safety precautions in this data sheet may not be adequate for all individuals or situations. Users have the responsibility to comply with all laws and procedures applicable to the safe handling and use of the product, to determine the suitability of the product for its intended use, and to understand possible hazards associated with mixing portland cement with other materials. SELLER MAKES NO WARRANTY, EXPRESS OR IMPLIED, CONCERNING THE PRODUCT OR THE MERCHANTABILITY OR FITNESS THEREOF FOR ANY PURPOSE OR CONCERNING THE ACCURACY OF ANY INFORMATION PROVIDED BY LEHIGH PORTLAND CEMENT COMPANY.

5975 Falbourne Street, Unit 2
Mississauga, Ontario L5R 3W6
TELEPHONE NUMBER: (905) 501-1700
24-HOUR EMERGENCY TELEPHONE NUMBER: CHEMTREC (800) 424-9300
24-HOUR EMERGENCY TELEPHONE NUMBER: (905) 501-0802
EMERGENCY RESPONSE PLAN NO: 2-0101
PRODUCT NAME: HELIUM, GAS
CHEMICAL NAME: Helium
COMMON NAMES/SYNONYMS: Helium; Helium, compressed; Helium-4
TDG (Canada) CLASSIFICATION: 2.2
WHMIS CLASSIFICATION: A
PREPARED BY: Loss Control (908)464-8100/(905)501-1700
PREPARATION DATE: 6/1/95
REVIEW DATES: 06/18/04

2. Composition, Information on Ingredients
EXPOSURE LIMITS[1]:
INGREDIENT % VOLUME PEL-OSHA[2] TLV-ACGIH[3] LD50 or LC50 Route/Species
Helium
FORMULA: He
CAS: 7440-59-7
RTECS #: MH6520000
99.995 to
99.9999
None Established Simple Asphyxiant Not Available
1 Refer to individual state or provincial regulations, as applicable, for limits which may be more stringent than those listed here.
2 As stated in 29 CFR 1910, Subpart Z (revised July 1, 1993)
3 As stated in the ACGIH 2004 Threshold Limit Values for Chemical Substances and Physical Agents.
OSHA Regulatory Status: This material is classified as hazardous under OSHA regulations.

3. Hazards Identification

EMERGENCY OVERVIEW
Odorless, colorless, non-flammable gas. Simple Asphyxiant - This product does not contain oxygen and may cause asphyxia if released in a confined area. Intentional misuse of this product can cause serious lung damage or death. Maintain oxygen levels above 19.5%. Contents under pressure. Use and store below 125 °F.
ROUTE OF ENTRY:
Skin Contact: No
Skin Absorption: No
Eye Contact: No
Inhalation: Yes
Ingestion: No
HEALTH EFFECTS:
Exposure Limits: No
Irritant: No
Sensitization: No
Teratogen: No
Reproductive Hazard: No
Mutagen: No
Synergistic Effects: None reported
Carcinogenicity: -- NTP: No IARC: No OSHA: No
EYE EFFECTS: Contact with rapidly expanding gas near the point of release may cause frostbite.
SKIN EFFECTS: Contact with rapidly expanding gas near the point of release may cause frostbite with redness, skin color change to gray or white, and blistering.
INGESTION EFFECTS: No adverse effects anticipated.
INHALATION EFFECTS: Product is a simple asphyxiant. Effects of oxygen deficiency resulting from simple asphyxiants may include: rapid breathing, diminished mental alertness, impaired muscular coordination, faulty judgement, depression of all sensations, emotional instability, and fatigue. As asphyxiation progresses, nausea, vomiting, prostration, and loss of consciousness may result, eventually leading to convulsions, coma, and death. Intentional inhalation of helium balloon gas can cause asphyxiation, lung damage, and death.
Oxygen deficiency during pregnancy has produced developmental abnormalities in humans and experimental animals.
MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: None known.
POTENTIAL ENVIRONMENTAL EFFECTS: Not expected to be toxic to fish and wildlife.

4. First Aid Measures
EYES: None required for gas. If frostbite is suspected, flush eyes with cool water for 15 minutes and obtain immediate medical attention.
SKIN: None required for gas. For frostbite, immerse skin in lukewarm water. DO NOT USE HOT WATER. Obtain medical attention.
INGESTION: Ingestion is not anticipated.
INHALATION: PROMPT MEDICAL ATTENTION IS MANDATORY IN ALL CASES OF OVEREXPOSURE. RESCUE PERSONNEL SHOULD BE EQUIPPED WITH SELF-CONTAINED
BREATHING APPARATUS. Victims should be assisted to an uncontaminated area and inhale fresh air.

Quick removal from the contaminated area is most important. Unconscious persons should be moved to an uncontaminated area, and if breathing has stopped, administer artificial resuscitation and supplemental oxygen. Further treatment should be symptomatic and supportive.

5. Fire Fighting Measures
Conditions of Flammability: Nonflammable
Flash point: None
Method: Not Applicable
Autoignition Temperature: None
LEL(%): None UEL(%): None
Hazardous combustion products: None
Sensitivity to mechanical shock: None
Sensitivity to static discharge: None
FIRE AND EXPLOSION HAZARDS:
Nonflammable. Cylinder may rupture violently or vent rapidly from pressure when involved in a fire situation.
EXTINGUISHING MEDIA:
None required. Use as appropriate for surrounding materials.
FIRE FIGHTING INSTRUCTIONS: Firefighters should wear respiratory protection (SCBA) and full turnout or Bunker gear. Continue to cool fire-exposed containers until well after flames are extinguished.

6. Accidental Release Measures
Evacuate all personnel from affected area. Use appropriate protective equipment (See Section 8). Stop the flow of gas or remove cylinder to outdoor location if this can be done without risk. Ventilate enclosed areas. If leak is in container or container valve, contact the appropriate emergency telephone number listed in Section 1 or call your closest BOC location.

7. Handling and Storage
Electrical classification: Non-hazardous.
This gas mixture is noncorrosive and may be used with all common structural materials. Use only in well-ventilated areas. Valve protection caps must remain in place unless container is secured with valve protection outlet piped to use point. Do not drag, slide or roll cylinders. Use a suitable hand truck for cylinder movement. Use a pressure reducing regulator when connecting cylinder to lower pressure piping or systems. Do not heat cylinder by any means to increase the discharge rate of product from the cylinder. Use a check valve or trap in the discharge line to prevent hazardous back flow into the cylinder. Do not insert any object (i.e.: screwdriver) into valve cap openings as this can damage the valve causing leakage.
Protect cylinders from physical damage. Store in cool, dry, well-ventilated area of non-combustible construction away from heavily trafficked areas and emergency exits. Do not allow the temperature where cylinders are stored to exceed 125 oF (52 oC). Cylinders should be stored upright and firmly secured to prevent falling or being knocked over. Use a "first in-first out" inventory system to prevent full cylinders being stored for excessive periods of time.

Proper handling, storage and operation of regulating equipment and cylinders is required to safely fill helium balloons. DO NOT ALLOW CHILDREN or unqualified people to operate balloon filling equipment.
INTENTIONAL INHALATION OF HELIUM CAN CAUSE SERIOUS LUNG DAMAGE OR DEATH. A balloon filling helium regulator must be attached to the valve before it is opened. Close cylinder valve after each use and when empty. Do not use in poorly ventilated area or attempt to remove stuck or jammed protective caps. Check for leaks and do not use leaky equipment. Do not use helium unless cylinder is properly labeled. Do not attempt to transfer helium from cylinder into any other container. Do not substitute hydrogen (a highly flammable gas) for helium.
For additional recommendations, consult Compressed Gas Association Pamphlets P-1, P-9, P-9.1, P-18, SB-14, and Safety Bulletin SB-2.
Never carry a compressed gas cylinder or a container of a gas in cryogenic liquid form in an enclosed space such as a car trunk, van or station wagon. A leak can result in a fire, explosion, asphyxiation or a toxic exposure.

8. Exposure Controls, Personal Protection
ENGINEERING CONTROLS: Use local exhaust in combination with general ventilation as necessary to prevent accumulation of high concentrations and maintain air oxygen levels at or above 19.5%.
EYE/FACE PROTECTION: Safety goggles or glasses.
SKIN PROTECTION: Protective gloves of suitable material.
RESPIRATORY PROTECTION: For emergency release use a positive pressure NIOSH approved air supplying respirator systems (SCBA or airline/escape bottle) using at a minimum Grade D air.
OTHER/GENERAL PROTECTION: Safety shoes, emergency eyewash station

9. Physical and Chemical Properties
PARAMETER VALUE UNITS
Physical state (gas, liquid, solid) : Gas
Vapor pressure : Not Available
Vapor density (Air = 1) : 0.14 (Gas)
Evaporation point : Not Available
Boiling point : -452.1 F: -268.9C
Freezing point : Not Available: Not Available
PH : Not Applicable
Specific gravity : Not Available
Oil/water partition coefficient : Not Available
Solubility (H20 @ 32 °F; 0 °C) : 0.0094 (vol./vol.)
Odor threshold : Not Applicable
Odor and appearance : Colorless, odorless gas

10. Stability and Reactivity
STABILITY: Stable.
INCOMPATIBLE MATERIALS/CONDITIONS: None.
HAZARDOUS DECOMPOSITION PRODUCTS: None.
HAZARDOUS POLYMERIZATION: Does not occur.

11. Toxicological Information
SKIN AND EYE: Not expected to cause skin or eye irritation.
INHALATION: Product is a simple asphyxiant. Maintain atmospheric oxygen at or above 19.5%.
OTHER: Oxygen deficiency during pregnancy has produced developmental abnormalities in humans and
experimental animals.

12. Ecological Information
Product does not contain Class I or Class II ozone depleting substances. Not toxic. Will not bioconcentrate.

13. Disposal Considerations
Do not attempt to dispose of residual waste or unused quantities. Return in the shipping container PROPERLY LABELED, WITH ANY VALVE OUTLET PLUGS OR CAPS SECURED AND VALVE PROTECTION CAP IN PLACE to BOC Gases or authorized distributor for proper disposal.

14. Transport Information
PARAMETER United States DOT Canada TDG
PROPER SHIPPING NAME: Helium, compressed Helium, compressed
HAZARD CLASS: 2.2 2.2
IDENTIFICATION NUMBER: UN 1046 UN 1046
SHIPPING LABEL: NONFLAMMABLE GAS NONFLAMMABLE GAS

15. Regulatory Information
SARA TITLE III NOTIFICATIONS AND INFORMATION
SARA TITLE III - SECTION 313 SUPPLIER NOTIFICATION:
This product does not contain toxic chemicals subject to reporting requirements of section 313 of the Emergency Planning and Community Right-To-Know Act (EPCRA) of 1986 and of 40 CFR 372.
SARA TITLE III - HAZARD CLASSES:
Sudden Release of Pressure Hazard
U.S. TSCA/Canadian DSL: All ingredients are listed on the U.S. Toxic Substances Control Act (TSCA)
inventory or exempt from listing and on the Canadian Domestic Substance List (DSL).
California Proposition 65: This product does not contain ingredient(s) known to the State of California to cause cancer or reproductive toxicity.

Canadian Controlled Products Regulations (CPR): This product has been classified in accordance with the hazard criteria of the CPR and the MSDS contains all the information required by the CPR.

For non-emergency assistance, call: 1-281-441-4400

Section 2: Composition and Information on Ingredients
Composition:
Name CAS # % by Weight
Feldspars (Ca, K, Na) Alluminum Silicates
Quartz (Crystalline Silica) 14808-60-7
Toxicological Data on Ingredients: Sand LD50: Not available. LC50: Not available. Quartz: LCL (Human) - Route:
Inhalation; Dose: 300 ug/m3/10Y.

Section 3: Hazards Identification
Potential Acute Health Effects: Slightly hazardous in case of skin contact (irritant), of eye contact (irritant), of ingestion, of inhalation.
Potential Chronic Health Effects:
CARCINOGENIC EFFECTS: Classified 1 (Proven for human.) by IARC. Classified A2 (Suspected for human.) by ACGIH.
MUTAGENIC EFFECTS: Not available.
TERATOGENIC EFFECTS: Not available.
DEVELOPMENTAL TOXICITY: Not available.
The substance may be toxic to lungs, upper respiratory tract.
Repeated or prolonged exposure to the substance can produce target organs damage.

Section 4: First Aid Measures

Eye Contact:

Check for and remove any contact lenses. In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention if irritation occurs.

Skin Contact: Wash with soap and water. Cover the irritated skin with an emollient. Get medical attention if irritation develops.

Serious Skin Contact: Not available.

Inhalation:

If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

Serious Inhalation: Not available.

Ingestion:

Do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. If large quantities of this material are swallowed, call a physician immediately. Loosen tight clothing such as a collar, tie, belt or waistband.

Serious Ingestion: Not available.

Section 5: Fire and Explosion Data

Flammability of the Product: Non-flammable.

Auto-Ignition Temperature: Not applicable.

Flash Points: Not applicable.

Flammable Limits: Not applicable.

Products of Combustion: Not available.

Fire Hazards in Presence of Various Substances: Not applicable.

Explosion Hazards in Presence of Various Substances:

Risks of explosion of the product in presence of mechanical impact: Not available.

Risks of explosion of the product in presence of static discharge: Not available.

Fire Fighting Media and Instructions: Not applicable.

Special Remarks on Fire Hazards: Keep container tightly closed.

Special Remarks on Explosion Hazards: Not available.

Section 6: Accidental Release Measures

Small Spill:

Use appropriate tools to put the spilled solid in a convenient waste disposal container. Finish cleaning by spreading water on the contaminated surface and dispose of according to local and regional authority requirements.

Large Spill:

Use a shovel to put the material into a convenient waste disposal container. Finish cleaning by spreading water on the contaminated surface and allow to evacuate through the sanitary system. Be careful that the product is not present at a concentration level above TLV. Check TLV on the MSDS and with local authorities.

Section 7: Handling and Storage

Precautions:

Keep locked up.. Do not breathe dust. Wear suitable protective clothing. If you feel unwell, seek medical attention and show the label when possible. Keep away from incompatibles such as oxidizing agents, alkalis.

Storage: Keep container tightly closed. Keep container in a cool, well-ventilated area. Do not store above 24°C (75.2°F).

Section 8: Exposure Controls/Personal Protection

Engineering Controls:

Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. If user operations generate dust, fume or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit.

Personal Protection: Safety glasses. Lab coat. Dust respirator. Be sure to use an approved/certified respirator or equivalent. Gloves.

Personal Protection in Case of a Large Spill:

Splash goggles. Full suit. Dust respirator. Boots. Gloves. A self contained breathing apparatus should be used to avoid inhalation of the product. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

Exposure Limits:

TWA: 0.05 (mg/m3) from ACGIH (TLV) [United States] Respirable [Quartz or Crystalline Silica]
TWA: 0.05 (mg/m3) from NIOSH Respirable. [Quartz or Crystalline Silica]Consult local authorities for acceptable exposure limits.

Section 9: Physical and Chemical Properties

Physical state and appearance: Solid. (Granular solid.)
Odor: Odorless.
Taste: Tasteless.
Molecular Weight: Not available.
Color: Amber. Grey.
pH (1% soln/water): Not applicable.
Boiling Point: Not available.
Melting Point: Not available.
Critical Temperature: Not available.
Specific Gravity: 1.8 to 2.5+ (depending on mineral composition) (Water = 1)
Vapor Pressure: Not applicable.
Vapor Density: Not available.
Volatility: Not available.
Odor Threshold: Not available.
Water/Oil Dist. Coeff.: Not available.
Ionicity (in Water): Not available.
Dispersion Properties: Not available.
Solubility: Insoluble in cold water, hot water, methanol, diethyl ether, n-octanol.

Section 10: Stability and Reactivity Data

Stability: The product is stable.
Instability Temperature: Not available.
Conditions of Instability: Incompatibles
Incompatibility with various substances: Reactive with oxidizing agents, alkalis.
Corrosivity: Not available.
Special Remarks on Reactivity:

Incompatible with oxidizing agents such as fluorine, chlorine trifluoride, manganese trioxide, oxygen difluroide.
When exposed to high temperature quartz can change crystalline structure to form tridymite (above 870 C) or crystobalite (above 1470 C).
Soluble in hydrofluoric acid and produces a corrosive gas - silicon tetrafluoride.
Quartz is attacked by strong alkalis and hydrofluoric acid.

Special Remarks on Corrosivity: Not available.
Polymerization: Will not occur.

Section 11: Toxicological Information

Routes of Entry: Inhalation. Ingestion.
Toxicity to Animals:
LD50: Not available.
LC50: Not available.
Chronic Effects on Humans:
CARCINOGENIC EFFECTS: Classified 1 (Proven for human.) by IARC. Classified A2 (Suspected for human.) by ACGIH.
May cause damage to the following organs: lungs, upper respiratory tract.
Other Toxic Effects on Humans: Slightly hazardous in case of skin contact (irritant), of ingestion, of inhalation.
Special Remarks on Toxicity to Animals: Not available.
Special Remarks on Chronic Effects on Humans:
May contain more than 1% quartz and may cause cancer (tumorigenic). Quartz has been identified by IARC as a class 1 carcinogen.
Special Remarks on other Toxic Effects on Humans:
Acute Potential Health Effects: Skin: No adverse health effects expected.
Eyes: May cause eye irritation.
Ingestion: No adverse health effects expected.
Inhalation: Affects respiration and irritates respiratory tract. Acute pneumoconiosis from overwhelming exposure to silica dust has occurred. Coughing and irritation of throat are early symptoms.
Inhalation of quartz is classified as a human carcinogen. Risk of cancer depends upon duration and level of exposure. May also affect liver.
Chronic exposure can also cause silicosis, a form of lung scaring that can cause shortness of breath, reduced lung function. May also affect blood.
Aggravation of Pre-existing Conditions: Inhalation may increase the progression of tuberculosis; susceptibility is apparently not increased. Persons with impaired respiratory function may be more susceptible to the effects of this substance. Smoking can increase the risk of lung injury.
Material is irritating to mucous membranes and upper respiratory tract.

Section 12: Ecological Information

Ecotoxicity: Not available.
BOD5 and COD: Not available.
Products of Biodegradation:
Possibly hazardous short term degradation products are not likely. However, long term degradation products may
arise.
Toxicity of the Products of Biodegradation: The product itself and its products of degradation are not toxic.
Special Remarks on the Products of Biodegradation: Not available.

Section 13: Disposal Considerations

Waste Disposal:
Waste must be disposed of in accordance with federal, state and local environmental control regulations.

Section 14: Transport Information

DOT Classification: Not a DOT controlled material (United States).
Identification: Not applicable.
Special Provisions for Transport: Not applicable.

Section 15: Other Regulatory Information

Federal and State Regulations:
California prop. 65: This product contains the following ingredients for which the State of California has found to cause cancer, birth defects or other reproductive harm, which would require a warning under the statute: Quartz California prop. 65: This product contains the following ingredients for which the State of California has found to cause cancer which would require a warning under the statute: Quartz
TSCA 8(b) inventory: Quartz
Other Regulations: OSHA: Hazardous by definition of Hazard Communication Standard (29 CFR 1910.1200).
Other Classifications:
WHMIS (Canada): Not controlled under WHMIS (Canada).
DSCL (EEC):
R45- May cause cancer.
S2- Keep out of the reach of children.
S53- Avoid exposure - obtain special instructions before use.
HMIS (U.S.A.):
Health Hazard: 1
Fire Hazard: 0
Reactivity: 0
Personal Protection: E
National Fire Protection Association (U.S.A.):
Health: 1
Flammability: 0
Reactivity: 0
Specific hazard:
Protective Equipment:
Gloves.
Lab coat.
Dust respirator. Be sure to use an approved/certified respirator or equivalent.
Safety glasses.

ATTACHMENT F

Safe Driving

Emergency Procedures:

Always move out of traffic if possible; stopping on an active highway, even if those in front of you have stopped, may precipitate being hit from the rear. If you must stop on an active roadway, leave at least one car length in front of you, and watch the rear mirror, so you can ease up if someone behind can't stop. Keep your flashers on in this situation. If you are the only driver coming to a stop on an active roadway, leave the flashers on and when safe to do so, exit the car and get to a safe location.

If you must stop due to vehicle failure, etc. try to coast out of traffic. Put on your flashers, and tie a white handkerchief, etc. on the driver's side door or mirror. If you remain in the vehicle, lock the doors. Use your cell phone to summon help.

In the event of a fire in your vehicle, do not endanger yourself by trying to fight it, even if you have an extinguisher, unless you are trained and can safely do so. Do NOT fight a gasoline fire which may spread or explode.

If stranded in snow or a remote location, stay with the vehicle, where you are more likely to be found. Conserve food, water, and heat as possible, and call for help.

Emergency Supplies (As Appropriate and Seasonal)

.

- Jumper cables to restart engine
- Cat litter or sand for tire traction on snow and ice
- Shovel to scrape snow away from tires
- Ice scraper to clear windshield (and extra washer fluid in bad weather)
- Warm clothes, gloves, a hat, sturdy boots, warm jacket, change of clothes
- Blankets to keep warm inside the vehicle
- Flashlights and extra batteries
- First aid kit; medications incase you are stuck on the road
- Food: items containing protein, such as nuts and energy bars
- Water: bring enough for each person in your car:
- AM/FM radio to listen to traffic reports and emergency messages
- Bring a cell phone and a list of emergency numbers; do NOT use while driving.

Vehicle Inspection (minimal)

Inspect ALL vehicles (personal, private, and rental) prior to driving them.
Minimally, check that tires appear fully aired, and required external equipment is in place
Check for a spare and jack
Check the lights and mirrors

If going into remote areas or in bad weather, check washer (and other) fluid.
Make sure ice scrapers, etc. are on hand, as appropriate for the season.
Adjust mirrors to make sure they are functional and cover the “dead space”
Don the seatbelt, assure that all doors are locked.
Turn on the ignition and see if all gauges read correctly.
Adjust all equipment for your driving BEFORE you start.
Use the ENSR Vehicle Inspection form for detailed inspection.

Vehicle Operation

- For ENSR, private, and rental vehicles, adjust all controls (mirrors, lights, radio, etc.) PRIOR to leaving the parking space.
- Adjust your outside mirrors to cover the “dead space” ---not the same area covered by the inside mirror---so as to avoid the danger of collision during lane changes.
- NO cell phone use by driver, including hands-free.
- Everyone in the vehicle must wear safety belts while moving
- Abide by speed limits and generally move with traffic---not too slow or fast.
- Driving with headlights on is mandatory in rain, dark, fog (no brights).
- Except for parking, avoid backing situations. If backing with an obstructed view, the passenger will serve as spotter.
- Use pull through parking when available to avoid backing up when leaving.
- Listen to the radio, or have passenger call 511 for traffic and road condition updates.
- Do not drive when fatigued or tired. Be aware of increased hazards of driving in the dark, or into the sun.
- Use appropriate eyewear: sunglasses, RX
- No headphones

Equipment

- Tie down all tarps, canopies, secure all equipment and supplies
- Pack equipment to minimize obstruction of the driver’s view
- Secure materials INSIDE the passenger compartment too!

Personal Safety

- Plan your route prior to leaving to avoid dubious areas (do a JMP)
- Keep your vehicle locked
- Do not stop for strangers or hitchhikers
- Notify someone of your route before departure, expected arrival time, cell phone number (and notify them upon arrival).
- Do not respond to or participate in road rage. Call 911 if necessary.

- Have the keys in your hand when exiting the vehicle to avoid being locked out; never put them down in the trunk. (be aware that some vehicles lock automatically.

Winter Driving

Know current road conditions, as part of your JMP:

call 511 - for traveler information

view weather and traffic - information at www.wsdot.wa.gov

check local news for weather and traffic reports

watch electronic highway signs for information

Clear snow and ice from all windows, mirrors, and lights - even the hood and roof - before driving.

Slow Down! Drive according to road and weather conditions. Remember, the posted speed limits are for dry pavement.

Leave plenty of room for stopping, and brake early. It takes more time to stop when roads are wet or icy.

Leave room for maintenance vehicles and plows - stay at least 15 car lengths (200 feet) back and don't pass them on the right.

Watch for icy surfaces on bridges, even when the rest of the road seems to be in good condition. Bridge decks will ice up first.

If you start to skid, do NOT brake or accelerate: steer in the direction you want to go.

Look farther ahead in traffic. Actions by other drivers will alert you to problems and give you extra seconds to react.

Trucks take longer to stop, so don't cut in front of them.

Don't use your cruise control or overdrive when it's freezing (or colder). Even roads that appear clear can have isolated slippery spots and the short touch of your brakes to deactivate cruise control can cause you to lose control of your vehicle. With overdrive, as you encounter a hill your vehicle automatically accelerates or downshifts, which can cause loss of traction.

Don't be overconfident with four-wheel drive. Four-wheel drive helps you get going quicker but it won't help you stop any faster.

Don't pump anti-lock brakes. The right way is to "stomp and steer."

Know your vehicle. Look at the Owners Manual if uncertain about some features.

Adjust to Road Conditions. The faster your vehicle is going, the more distance it will take to turn, slow, or stop.

Slow down at the first sign of rain, snow, or sleet. When the road is slippery, the vehicle's tires do not grip as well as they do on a dry road.

Allow extra time. Give yourself extra time to reach your destination when roads may be slick. Consider delaying your trip.

Drive with your headlights on.

If at all possible, do not drive when the roads are icy.

Health and Safety Plan Quiz

HASP Quiz

Name _____ **Date** _____

Employer _____ **Job#** _____

Date of HASP _____

1. What tasks will you be performing? _____

2. Who is the ENSR Project Manager? _____

   Site Safety Officer? _____

   Client Project Manager? _____

3. Who are the subcontractors on this site? _____

4. Where is the emergency medical facility? _____

5. What chemical hazards are present on this site? _____

6. What physical hazards are present on this site?

7. What minimum PPE is required?

   a. _____ b. _____ c. _____

   d. _____ e. _____ f. _____

8. How would you respond to an incident / accident? _____

9. Which tool / document could best help you do your SPSA? _____

10. What should you do if you suspect a task may be unsafe? _____

Development Team	Position/Title	Reviewed By	Position/Title	Date
Jeff Otter	Project Manger			
William Glenn	Project Geologist			

❶ Job Steps	❷ Potential Hazard	❸ Critical Actions
1 Mobilizing/Demobilizing equipment/supplies at each location	Traffic	- Visually inspect vehicle before driving (tires, lights, etc) – Adjust mirrors (views for left, right and rear). – Fasten seatbelts before engaging vehicle. – Cell phone usage is prohibited while driving a vehicle. Obey posted speed limits and traffic laws. Place traffic cones behind vehicles as needed to alert vehicular traffic. When possible, park sampling vehicle facing into traffic for protection. Remove keys from ignition and engage parking brake when out of the car.
2 Perform SPSA; Site Safety Orientation	NLIs, Near Misses	- Perform Safe Performance Self Assessment. - Assess potential Hazards. Analyze how to reduce risk. Act to ensure sampling is performed safely. - Site safety officer conduct tailgate safety meeting by reviewing - Health and Safety Plan [HASP] - Vehicle Safety - Job Safety Analysis [JSA] - Evacuation Plan. - Make site-specific changes to JSA, as necessary. - Sign compliance agreement to comply with HASP/JSA. - Identify nearest hospital, location of health and safety equipment (first aid kit/eye/fire extinguisher).

3 Personal health and safety	Heat stress and Heat stroke	- Drink plenty of fluids and have plenty of fluids available (water and sports drinks are recommended; coffee and soda may actually cause further dehydration). - Wear loose, non-restrictive clothing and hat/cap. - Stay in shade as much as possible to keep cool (use vehicle and air-conditioning if necessary). - Use sunscreen to prevent sunburn and lip balm to prevent chapped lips. - Be aware of faintness, dizziness, unconsciousness, paleness, and profuse sweating in Site personnel (contact PM or if severe, contact emergency personnel). - Redness to the face, high body temperature, and lack of sweating may indicate heat stroke (contact emergency personnel immediately).
4 Access monitoring wells/well covers	Strain/sprains from opening well covers/heavy lifting/hand tools; Puncture hazards from hidden boards with nails or hidden nails on the ground; biological	- Use proper lifting posture when opening/closing all well covers. - Wear leather gloves and safety glasses when opening and closing well covers and caps, tapping bolts. - Check for poisonous spiders, insects, etc. - Stand upwind of well when removing cover. - Ensure well is securely closed after sampling.
5 Calibrate and check over all equipment	Equipment malfunction, inaccurate data recovery	- Calibrate water level/ water quality meter(s) and check over to ensure they are working properly.
6 Measuring water levels	Dermal contact and inhalation of potential constituents	- Perform careful triple-rinse decontamination of sounder or interface meter. - Wear Nitrile gloves when handling water. Be careful not to splash or spill large amounts of water on clothing or on the Site.
7 Well purge and sample	Pinch points; Cross-contamination of wells; Spills/leaks/slips/trips; Chemical exposure	- Keep hands clear of well opening when inserting bailer or pump tubing. - Replace peristaltic pump silicon and polyethylene tubing with new at each well location. - Inspect integrity of liquid containers prior to and during use. - Carefully pour liquids when transferring between containers. - Avoid spills when filling sample bottles, and handle with care to avoid breakage. - Ensure bottles are labeled accurately. - Maintain good housekeeping. - Have trash bag at Site and clean as work is conducted.
8 Place samples in cooler with ice and padding materials	Bottle breakage, back strain	- Wear proper PPE and pack bottles carefully (bubble wrap bags are helpful). - Ensure cooler is thoroughly iced to maintain samples at proper temperature (4 degrees Celsius).
9 Load Equipment and supplies into vehicle	Back injury, equipment damage	- Use proper lifting techniques when loading/lifting coolers and equipment into vehicle. - Ensure equipment and supplies are loaded correctly and do not shift during driving.
10 Site cleanup	Debris or equipment left on-Site or unsecured can cause tripping hazard	- Make careful visual sweep of Site. - Check for tools, debris or dirt left on-Site. - Remove free standing water by sweeping or with absorbent material.

Job Safety Analysis - Observing Vacuum Truck Operations

❶ Job Steps	❷ Potential Hazard	❸ Critical Actions
Arrival at job site.	Unknown hazards may exist.	Always conduct a self performance safety assessment (SPSA) prior to start. Assess the risk, what is the worst that could happen? Review HASP, JSA's and conduct Safety Tailgate Meeting.
Site Set Up	Unknown hazards	Based on SPSA and review of safety protocol, establish work areas, exclusion zones.
Entering the work area	Exposure to hazardous liquids, vapors or waste.	Wear proper PPE. High visibility vest required in vehicle areas.
Secure the equipment	Rolling hazard. Could be struck by.	Set parking brakes, chock wheels.
Prepare safe work zone	Slipping, tripping, back strain, traffic hazards, struck by vehicles.	Set up traffic cones, signage and barriers as outlined in established traffic plan(s). Remove, cover or flag any potential slippery area, holes or uneven ground.
Ensure fire protection	Fire, exposure to hazardous vapors	Place fire extinguisher in the vicinity. Ground vacuum truck with ground cabling equipment. Install vent exhaust pipe (gasoline).
Perform truck pump inspection	Pump failure causing fire, explosion or spill.	Ensure proper pump case oil level and that pump is operating per manufacturers specifications.
Install leak protection.	Product leaks, fire, explosion, chemical exposure.	Install drip pans and/or spill containment, pads at hose connections.
Set up product hoses	Back injury/sprains. Product leaks at hose connections	Use proper lifting techniques. Wire, tape or strap cam-lock hose fittings securely.
PTO Activation	Vehicle transmission damage.	`Slowly activate PTO for vacuum pump use.
Start vacuum pump	Exposure to hazardous liquids, vapors/waste	Follow required manufactures procedures for operating pump recovery equipment.
Monitor transfer	Product leaks, fire, explosion, chemical exposure.	Periodically check tank level, gauges and hose connections for abnormal conditions. Attend to the vac truck at ALL times during the transfer operations.

Transfer completion	Product leaks, fire, explosion, chemical exposure.	Ensure clear shutdown communication is established with any other parties involved in operating the vac hoses. Standby vac truck shut-off controls last 15 minutes of the transfer. Check fittings and hook up sumps before disconnecting.
Product hose disconnection	Product leaks, fire, explosion, chemical exposure.	Check fittings and hook up sumps before disconnecting. Clear all product lines before disconnection.
Secure vacuum tank valves.	Product leaks, fire, explosion, chemical exposure.	Cap and plug all product hoses before storing in the hose cradle. Close vacuum tank valve.
Turn off vacuum pump	Exposure to hazardous liquids, vapors and waste.	Turn off vacuum pump. De-activate PTO for pump.
Remove leak protection equipment	Product leaks, exposure.	Clean, inspect and stow leak protection equipment.
Site Departure.	Slipping, tripping, back strain, traffic hazards.	Remove traffic cones, signage and barriers. Use proper lifting techniques. Use spotters for backing and moving of equipment. Use of traffic safety vests mandatory.

Task . The following table addresses the concerns of Cone Penetration Testing (CPT)/Hydraulic Push sampling.

Field staff must review job-specific work plan and coordinate with project manager to verify that all up-front logistics are completed prior to starting work including, but not limited to, permitting, access agreements, and notification to required contacts (e.g. site managers, inspectors, clients, subcontractors, etc.). A tailgate safety meeting must be performed and documented at the beginning of each workday. Safe Performance Self Assessment (SPSA) procedures must be used throughout the project. Weather conditions (heat, cold, rain, and lightning) must also be considered.

❶ Job Steps	❷ Personal Protective Equipment	❸ Potential Hazard	❹ Critical Actions
Clear drilling locations.	Wear reflective vest for traffic, steel toed and shank shoes, hardhat, safety glasses with side shields, and leather gloves as necessary.	Traffic hazards, overhead and underground installations, product releases, property damage, dealer inconvenience.	• Reference Utility Clearance Review form (**Attachment 4**). • Coordinate with Site Manger (or designee) to minimize potential conflicts. • Review proposed locations against available construction drawings and known utilities, tanks, product lines, etc. • Mark out the proposed borehole locations. • Call underground utility locating service for public line location clearance and get list of utilities being contacted. If necessary, coordinate private line locator for private property. • Develop a traffic control plan with the client and local agencies as applicable. Plan may include use of cones, barrier tape, jersey barriers, etc. *(Refer to* **Attachment 2***).* • **It is the responsibility of the SHSO to annotate the Site Plan with the Traffic Control configuration if a "formally developed" Traffic Control Plan is not available.**
Obtain sub-contractor equipment maintenance records prior to commencing work.		Improper equipment maintenance, which can cause equipment failure and possible personal injury.	• Verify maintenance records in possession are for equipment on site. • Verify maintenance is current.
Mobilize with proper equipment/supplies for drilling.	Gather necessary PPE. Reflective vest for traffic, steel toed and shank shoes, hardhat, safety glasses with side shields, ear plugs/muffs, and leather gloves for the non-chemical aspects of work as necessary; Wear an appropriate air purifying respirator with combination organic vapor/HEPA P-100 cartridges, and	Vehicle accident. Lifting hazards. Delay or improper performance of work due to improper equipment onsite.	• Start project with Production Safety Meeting (**Attachment 6**). • Follow safe driving procedures. • Employ safe lifting procedures.

Field staff must review job-specific work plan and coordinate with project manager to verify that all up-front logistics are completed prior to starting work including, but not limited to, permitting, access agreements, and notification to required contacts (e.g. site managers, inspectors, clients, subcontractors, etc.). A tailgate safety meeting must be performed and documented at the beginning of each workday. Safe Performance Self Assessment (SPSA) procedures must be used throughout the project. Weather conditions (heat, cold, rain, and lightning) must also be considered.

❶ Job Steps	❷ Personal Protective Equipment	❸ Potential Hazard	❹ Critical Actions
	other PPE as needed. (*Use a North 7600 series full face respirator or its equivalent. Best brand nitrile gloves or their equivalent. Howard Leight Max foam earplugs with an NRR of 33or their equivalent. Tyvek, poly coated chemical resistant suit or its equivalent).*		• Make sure sub-contractors are aware of their responsibilities for labor, equipment and supplies. • Review permit conditions.
Visually clear proposed drilling locations.	Wear reflective vest for traffic, steel toed and shank shoes, hardhat, safety glasses with side shields, and leather gloves as necessary.	Underground and overhead installations.	• Complete Pre-Mobilization section of Utility Clearance Review form (**Attachment 4**) and adjust drilling locations as necessary.
Set up necessary traffic control. See **Attachment 2** for detailed plan.	Wear reflective vest for traffic, steel toed and shank shoes, hardhat, safety glasses with side shields, and leather gloves as necessary.	Struck by vehicle during placement. Vehicle accident as a result of improper traffic control equipment placement.	• Use buddy system for placing traffic control. Implement traffic control plan such as setting out cones and tape defining safety area. • It is the responsibility of the SHSO to annotate the Site Plan with the Traffic Control configuration if a separate diagram is not available. • Adhere to approved Traffic Control Plans (see **Attachment 2**) when working in roadways. • **It is the responsibility of the SHSO to annotate the Site Plan with the Traffic Control configuration if a "formally developed" Traffic Control Plan is not available.**
Assist with set up of rig.	Wear reflective vest for traffic, steel toed and shank shoes, hardhat, safety glasses with side shields, and leather gloves as necessary.	Vehicle accident during rig movement. Damage caused by rig while accessing set-up location. Contact with overhead installations. Soft terrain. Rig movement.	• All staff should know where the kill switch is for the drilling rig (incorporate into Production Safety Meeting (See **Attachment 6**)). • Verify clear pathway to drilling location and clearance for raising mast. • Provide as-needed hand signals and guidance to driver to place rig. • Visually inspect rig (fire extinguisher on board, no oil or other fluid leaks, cabling and associated equipment in good condition, pressurized hoses secured with whip-checks or adequate substitute, jacks in good condition?).

Field staff must review job-specific work plan and coordinate with project manager to verify that all up-front logistics are completed prior to starting work including, but not limited to, permitting, access agreements, and notification to required contacts (e.g. site managers, inspectors, clients, subcontractors, etc.). A tailgate safety meeting must be performed and documented at the beginning of each workday. Safe Performance Self Assessment (SPSA) procedures must be used throughout the project. Weather conditions (heat, cold, rain, and lightning) must also be considered.

❶ Job Steps	❷ Personal Protective Equipment	❸ Potential Hazard	❹ Critical Actions
			• If necessary, use wooden blocks under jacks to spread load. Chock wheels.
Set up exclusion zone(s) and workstations (Hydropunch/Geoprobe and logging/sample collection).	Wear reflective vest for traffic, steel toed and shank shoes, hardhat, safety glasses with side shields, and leather gloves as necessary.	Struck by vehicle during set up. Slip/fall hazards.	• Implement exclusion zone set up. • **It is the responsibility of the SHSO to annotate the Site Plan with the exclusion zone configuration.** • Set up workstations with clear walking paths to and from rig. Use safety tape and cones.
Clear upper five feet of Hydropunch/Geoprobe location using post-hole digger or hand auger.	Don required PPE as appropriate for this step: steel toed and shank shoes, hard hat, safety glasses with side shields, hearing protection, reflective safety vest, and leather gloves for the non-chemical aspects of work as necessary Wear chemical resistant gloves during handling of soil. Wear an air-purifying respirator with combination organic vapor/HEPA P-100 cartridges if necessary. (*Use a North 7600 series full face respirator or its equivalent. Best brand nitrile gloves or their equivalent. Howard Leight Max foam earplugs with an NRR of 33 or their equivalent. Tyvek poly coated chemical resistant suit or its equivalent).*	Back strain, exposure to chemical hazards, hitting an underground utility, repetitive motion.	• Stand upwind to avoid exposure whenever possible. • Initiate air quality monitoring in accordance with **Section 12**. • Use the organic vapor monitor aggressively to track the airborne concentration of contaminants close to potential sources such as the core as it is being raised from the hole, the core is opened, etc. • Have appropriate respirator with combination organic vapor/HEPA P-100 cartridges within 3-5 feet of work area, readily available. • Evaluate any soil samples inside a Ziploc bag at arm's length. DO NOT EVALUATE THE SAMPLE WITH THE BAG OPEN. THIS WILL AVOID UNNECESSARY EXPOSURE. • Use proper lifting techniques and tools. • Complete the Pre-Drilling section of the Borehole Clearance Review form. • Avoid twisting back during the operation; Decontaminate equipment after use. Decontamination will be accomplished by an Alconox wash with tap water rinse followed by a second distilled or de-ionized water rinse. Collect

Field staff must review job-specific work plan and coordinate with project manager to verify that all up-front logistics are completed prior to starting work including, but not limited to, permitting, access agreements, and notification to required contacts (e.g. site managers, inspectors, clients, subcontractors, etc.). A tailgate safety meeting must be performed and documented at the beginning of each workday. Safe Performance Self Assessment (SPSA) procedures must be used throughout the project. Weather conditions (heat, cold, rain, and lightning) must also be considered.

❶ Job Steps	❷ Personal Protective Equipment	❸ Potential Hazard	❹ Critical Actions
			rinse water in 5 gallon buckets and transfer to 55-gallon drums and stage drums *at an agreed upon location between the Store Manager and ENSR SHSO.*
Commence Geoprobe/Hydropunch operation.	Steel toed and shank shoes, hardhat, safety glasses with side shields, hearing protection, reflective safety vest, and leather gloves for the non-chemical aspects of work as necessary. Wear appropriate air purifying respirator with combination organic vapor/HEPA P-100 cartridges if needed.	Cross-contamination from previous hole. Back strain, heat or cold, eye injury, noise, exposure to chemical hazards, hitting an underground utility, trip and fall, equipment failure	● Decontaminate sampling equipment after collecting a sample. Decontaminate equipment after use. Decontamination will be accomplished by an Alconox wash with tap water rinse followed by a second distilled or de-ionized water rinse. Collect rinse water in 5 gallon buckets and transfer to 55-gallon drums and stage drums *at an agreed upon location between the Store Manager and ENSR SHSO.* ● Decontaminate Geoprobe/Hydropunch equipment after each evolution. Decontamination will be accomplished using a pressure washer and then air-dried. Decon water will be collected in 55-gallon drums and staged *at an agreed upon location between the Store Manager and ENSR SHSO.* ● Use proper lifting techniques. ● Monitor air quality in accordance with **Section 12**. ● Have appropriate respirator with combination organic vapor/HEPA P-100 cartridges within 3-5 feet of work area, readily available. ● Monitor CPT/Geoprobe/Hydraulic Push progress. ● Keep work area clear of tripping or slipping hazards. ● Perform periodic visual inspections of CPT/Geoprobe/Hydraulic Push rig.
Collect samples in accordance with sampling plan.	Steel toed and shank shoes, hardhat, safety glasses with side shields, hearing protection, reflective safety	Cross-contamination. Back strain, inhalation or dermal exposure to chemical hazards,	● Perform air monitoring in accordance with **Section 12**.

Field staff must review job-specific work plan and coordinate with project manager to verify that all up-front logistics are completed prior to starting work including, but not limited to, permitting, access agreements, and notification to required contacts (e.g. site managers, inspectors, clients, subcontractors, etc.). A tailgate safety meeting must be performed and documented at the beginning of each workday. Safe Performance Self Assessment (SPSA) procedures must be used throughout the project. Weather conditions (heat, cold, rain, and lightning) must also be considered.

❶ Job Steps	❷ Personal Protective Equipment	❸ Potential Hazard	❹ Critical Actions
	vest, and chemical resistant gloves as necessary. Wear appropriate air purifying respirator with combination organic vapor/HEPA P-100 cartridges as needed.	slip and fall. Improper labeling or storage, injury from broken sample bottle (cuts or acid burn).	• Have appropriate respirator with combination organic vapor/HEPA P-100 cartridges within 3-5 feet of work area, readily available. • Decontaminate sampling equipment between each well (unless disposable). If the equipment is reusable, then wash in an Alconox wash, rinsed with tap water, then rinsed with distilled or de-ionized water. Decontamination water will be transferred to 55-gallon drums and staged *at an agreed upon location between the Store Manager and ENSR SHSO.* • Use proper lifting techniques. • Label samples in accordance with sampling plan. • Keep samples stored in proper containers, at correct temperature, and away from work area. Handle bottles carefully.
Cuttings will be picked up by shovel and placed directly in 55-gallon drums.	Steel toed and shank shoes, hardhat, safety glasses with side shields, hearing protection, reflective safety vest, and leather gloves for the non-chemical aspects of work as necessary. If you suspect that equipment is contaminated, wear chemical resistant gloves.	Exposure to public. Traffic hazard or obstruction/inconvenience to station operation. Improper storage or disposal. Back strain.	• Have proper storage containment and labeling available onsite. • Place materials in isolated location away from traffic and other site functions. *(See next section for Waste Description).* • Use appropriate drum handling practices. Do not attempt to lift, push or move drums without the proper tools and equipment.
Backfill borehole.	Steel toed and shank shoes, hardhat, safety glasses with side shields, hearing protection, reflective safety vest, and leather gloves for the non-chemical aspects of work as necessary.	Improper grouting can lead to future vertical conduit for contaminant migration. Back strain, trip hazards, and eye injury from splashing or release of pressurized grout. Unauthorized backfilling causes extra work.	• Mix grout to specification and completely fill the hole. • Use proper lifting techniques. • Keep work area clear of tripping hazards.
Dispose or store purge water (if any) onsite.	Steel toed and shank shoes, hardhat, safety glasses with side shields,	Back strain. Exposure to contaminants. If disposing	• Use appropriate drum

Field staff must review job-specific work plan and coordinate with project manager to verify that all up-front logistics are completed prior to starting work including, but not limited to, permitting, access agreements, and notification to required contacts (e.g. site managers, inspectors, clients, subcontractors, etc.). A tailgate safety meeting must be performed and documented at the beginning of each workday. Safe Performance Self Assessment (SPSA) procedures must be used throughout the project. Weather conditions (heat, cold, rain, and lightning) must also be considered.

❶ Job Steps	❷ Personal Protective Equipment	❸ Potential Hazard	❹ Critical Actions
	hearing protection, reflective safety vest, and chemical resistant gloves as necessary. Wear appropriate air purifying respirator with combination organic vapor/HEPA P-100 cartridges as needed.	through onsite treatment system, damage or injury from improper use of equipment. Improper storage or disposal.	handling practices. ● Use proper equipment to transport water (pumps, drum dollies, etc.). ● Monitor air quality in accordance with **Section 12**. ● Have appropriate respirator with combination organic vapor/HEPA cartridges within 3-5 feet of working location, readily available. ● Label storage containers properly, and locate in isolated area away from traffic and other site functions. ● Coordinate offsite disposal (where applicable). ● Do not attempt to lift, push or move drums without the proper tools or equipment.
Supervisor/HSC must confirm all boreholes are closed, filled in and/or capped.		Possible injuries and damage to property due to stepping into or driving over the well.	● Visually inspect each and every borehole.
Clean site/demobilize.	Steel toed and shank shoes, hardhat, safety glasses with side shields, hearing protection, reflective safety vest, and leather gloves for the non-chemical aspects of work as necessary.	Traffic. Safety hazard left on site. Lifting hazards.	● Use buddy system as necessary to remove traffic control. ● Leave site clean of refuse and debris. ● Clearly mark/barricade any borings that need later topping off or curing. ● Notify site personnel of departure, final well locations and any cuttings/purge water left onsite. ● Use proper lifting techniques
Package and deliver samples to lab.		Bottle breakage, back strain.	● Handle and pack bottle carefully (bubble wrap bags are helpful). Use proper lifting techniques.

Job Safety Analysis – Well Installation/Development

Field staff must review job-specific work plan and coordinate with project manager to verify that all up-front logistics are completed prior to starting work including, but not limited to, permitting, success agreements and notification to required contacts (e.g., site managers, inspectors, clients, subcontractors, etc.). Additionally, a tailgate safety meeting must be performed and documented at the beginning of each work day. Safe Performance Self Assessment (SPSA) procedures must be used during field activities. Also consider weather conditions (heat, cold, rain, and lightning).

Date:	3/20/06
JSA Type:	Assessment
Work Type:	Well Installation/Development
Work Site:	3505 Pasadena Ave, Los Angeles, CA
Organization:	ENSR

Development Team	Position/Title	PC	Reviewed By	Position/Title	Date
Anthony Lizzi	Project Manager	☑			
William Glenn	Geologist				

Personal Protective Equipment (PPE) needed:
Hard hat; safety glasses; steel toe protective boots; hearing protection; air monitoring equipment (PID, combination meter); Safety vest
Chemical resistant gloves; leather gloves; respirator (per HASP); protective coveralls (tyvek, poly-per HASP);
Traffic control equipment (signs, barricades, cones, etc.)

No	Job Steps	Potential Hazard(s)	Critical Action(s)
1	Clear location of well to be installed	Traffic hazards, obstructions, overhead and underground installations, potential for releases, site owner inconvenience	Obtain location of privately installed lines from site owner. Review locations against construction drawings and known utilities, prior well logs, field notes from former well installation, USTs, product lines, etc.; identify conflicts with Site and Project Manager; mark well installation locations on the site then contact State utility locating service for public utility clearance and obtain list of utilities contacted/ responses to notice; conduct private utility locating if warranted; develop a Traffic Control Plan with Site Owner and agency, if required. - If drilling at a UST site, determine if USTs have cathodic protection, and locate shallow lines. - Wear high visibility traffic vest, and do not turn back to traffic.
2	Mobilization/inspection	Travel/traffic hazards, vehicle or physical property damage, vehicle accident, equipment failure, injury	Employ safe driving procedures, as outlined in the HASP; employ a spotter when parking or backing rig and/or trailer; do not use mobile phones while driving. Before startup, inspect rig for leaking hoses or fittings, loose connections, functional controls, proper drive head operation and travel, functional emergency shutoff, damaged augers or rods, etc.
3	Visually clear well locations	Contact with overhead utilities and underground/at-grade utilities or structures (equipment damage, personal injury)	Cross-check plans, well logs, drawings and utility mark-outs with proposed well location and visible site features; confirm utility locations with Site Owner/Manager; visually confirm height of overhead utilities at/near boring locations.
4	Establish work/exclusion zone and traffic controls	Traffic/pedestrian hazards, vehicle accident, property damage, physical injury	Place traffic control equipment per HASP or Traffic Control Plan (use buddy system); place cones, construction fencing or caution tape to isolate the boring location.

No	Job Steps	Potential Hazard(s)	Critical Action(s)
5	Clear upper 8 feet of boring with auger or air knife.	Flying debris, sprains or strains, contact with underground or overhead utilities, property damage; slip-trip-fall.	Use Air-knife rig to clear diameter larger than proposed auger diameter for well installation or advance three borings in triangular pattern around proposed well location. Employ a spotter to stage air knife equipment; do not use excessive force to twist or advance hand auger; follow air knife JSA; keep alert for pipeline backfill; employ respirators and other PPE per HASP and site conditions; stage and cover cuttings to prevent physical contact, slips/trips, or loss to environment.
6	Position drill rig and set up	Impact with parked vehicles or physical property; physical injury; pinch-points on drill rig; crushing injury; contact with overhead/ underground lines.	Employ a spotter(s) to stage drill rig over the cleared well location; replace cones, fencing, etc., used to maintain exclusion/work zone; keep hands and feet clear of rig when raising mast and adjusting drive table; position rig and ancillary equipment such that there are 2 escape routes for the drill crew. **- Do not move drilling rig with mast raised**.
7	Soil Sample Collection	Lifting Injury, cuts	Use caution handling split spoon and observe sleeves and split spoon for possible edges that could cause a serration. Do not use a knife to cut sleeves. Use buddy system when lifting coolers/core boxes.
8	Heavy Equipment operation/soil containerization	Impact with parked vehicles or physical property, physical injury, trip hazards, traffic hazards	Soil cuttings are generally containerized in 55-gal drums or a covered roll-off bin. Operation of heavy equipment for dumping into a roll-off bin should be conducted by personnel qualified in heavy equipment use. Use spotter when backing up in high traffic areas. Place roll-off bin on hard, flat surface; preferably away from parked cars or buildings. When approaching work area where shoveling soil cuttings into bucket or into drums, make sure to make eye contact with staff operating shovel. Practice good housekeeping, and pick up tools (shovels and brooms), that are not in use.
9	Well Construction/Surge Sand Pack	Lifting Hazards, line-of-fire, crushing hazards, cable line failure	Well casing will be lifted using cable wench, watch for cable as casing is being lifted into hollow stem auger. Inspect cable line for fraying. Once well emplaced, construct sand pack, use wheel barrel or buddy system to move bags of sand and bentonite to well. Surge sand pack after construction – Use caution not to damage casing by dropping surge block to bottom of well. Avoid putting hands near well during surging.
10	Well Box construction	Traffic hazards, bending lifting, cuts	Use caution when trimming casing with saw or grinder. Cut notch into north side of well casing for measuring point. Have well box set no higher than ½ inch above grade, make concrete sloped so as to avoid lips or protruding edges. Due to low profile while constructing box, have spotter direct traffic, or set up working space with cones and barricades. Leave up barricades while concrete dries to avoid trip hazards/ruining of concrete apron around well box.
11	Debris and waste management	Back and body strains/sprains, pinching or crushing injuries, regulatory constraints.	Clear the site of any trip/fall hazards. Use buddy system, dolly, and/or hand truck when moving heavy containers; label drums/roll-off bin in accordance with Work Plan and state/Federal regulations; stage containers in a safe/secure location per Site Owner, Client, and/or Project Manager directions. Secure cover of roll-off bin at the end of each work day.
12	Demobilization	Traffic hazards, sprains/strains.	Use buddy system when removing traffic control equipment and exclusion/work zone controls; confirm that debris, cuttings and wastewater are properly contained; employ safe driving procedures, as outlined in the HASP.
13	Well Development	Impact with parked vehicles or physical property; line-of-fire; physical injury; pinch-points on smeal rig; crushing injury; contact with overhead lines	Hazards associated with development are essentially identical to setting up a drill rig. Refer to steps 2, 4, 8, 11, and 12 when developing a well

Job Safety Analysis – Geoprobe Soil Gas Sampling

Field staff must review job-specific work plan and coordinate with project manager to verify that all up-front logistics are completed prior to starting work including, but not limited to, permitting, access agreements and notification to required contacts (e.g., site managers, inspectors, clients, subcontractors, etc.). Additionally, a tailgate safety meeting must be performed and documented at the beginning of each work day. Safe Performance Self Assessment (SPSA) procedures must be used during field activities. Also consider weather conditions (heat, cold, rain, lightning).

Personal Protective Equipment (PPE) needed:
Hardhat; safety glasses; safety boots; hearing protection; air monitoring equipment (PID, combination meter); chemical resistant gloves; leather gloves; respirator (per HASP); protective coverall (tyvek, poly; per HASP)

No	Job Steps	Potential Hazard(s)	Critical Action(s)
1	Select and Mark boring locations	Traffic hazards, obstructions, overhead and underground installations, potential releases, dealer inconvenience	Review locations against construction drawings and known utilities, USTs, product lines, etc.; identify conflicts with Site and Project Manager; mark out boring locations on the site then contact State utility locating service for public utility clearance and obtain list of utilities contacted/responses to notice; conduct private utility locating if warranted; conduct a geophysical survey to identify subsurface obstructions if warranted; develop a Traffic Control Plan with Site Owner and agency, if required.
2	Mobilization/Inspection	Travel/traffic hazards, vehicle or physical property damage, vehicle accident, equipment failure	Employ safe driving procedures; review and employ Journey Management Plan (JMP); employ a spotter when parking or backing rig and/or trailer; do not use mobile phones while driving. Before startup, inspect rig for leaking hoses or fittings, loose connections, functional controls, proper hammer operation and travel, functional emergency shutoff, rod or sampler damage, etc.
3	Establish work/exclusion zone and traffic controls	Traffic/pedestrian hazards, vehicle accident, property damage, physical injury	Place traffic control equipment per HASP or Traffic Control Plan (use buddy system); place cones, construction fencing or caution tape to isolate the boring location.

No	Job Steps	Potential Hazard(s)	Critical Action(s)
4	Visually clear boring locations	Contact with overhead utilities and underground/at-grade utilities or structures (equipment damage, personal injury)	Cross-check plans, drawings and utility mark-outs with boring location and visible site features; confirm locations with Site Owner/Manager; visually confirm height of overhead utilities at/near boring locations.
5	Clear upper eight feet of boring with hand auger or air knife	Flying debris, sprains or strains, contact with underground or overhead utilities, property damage; slip-trip-fall, noise.	Employ a spotter to stage air knife equipment; do not use excessive force to twist or advance hand auger; follow air knife JSA; keep alert for pipeline backfill; employ respirators and other PPE per HASP and site conditions; stage and cover cuttings to prevent physical contact, slips/trips, or loss to environment.
6	Position Geoprobe and set up	Impact with parked vehicles or physical property; physical injury; pinch-points on Geoprobe; crushing injury.	Employ a spotter(s) to stage Geoprobe over boring location; replace cones, fencing, etc., used to maintain exclusion/work zone; keep hands and feet clear of rig when adjusting and raising hammer assembly.
7	Advance boring	Pinching/crushing injury, noise; repetitive motion; organic vapor exposure; nuisance dust generation; slip-trip-fall.	Inspect rods and sampler during operation-remove damaged equipment from use; keep clear of drive caps, thread connections, and sampler shoe when assembling/disassembling the tool string, advancing and withdrawing the sampler; store rods and other equipment to keep work area clear of trip hazards.
8	Construct Soil Gas Sampling probe. Ensure that tubing is perforated, and that a sand pack is emplaced surrounding the perforations. A hydrated bentonite seal should be emplaced above the sand pack. Test for surface influence using a tracer chemical (ie. helium)	Physical injury (cuts, strains, pinch-points), slip-trip-fall.	Use proper cutting tools and cut tubing away from body and any bystanders; do not use excessive force when cutting the tubing; keep work area clear of obstacles and trip hazards. Use buddy system or hand truck if moving bags of sand or bentonite around site.
9	Conduct purge volume test using 3, 7, and 10 purge volumes. Upon completion of test and calculation of optimal purge volume, collect soil gas sample at other locations using optimal purge volume.	Pinching/crushing/piercing injury; Traffic, electrical.	Soil gas samples are typically collected using syringes and a purge pump. Make sure power source to pump is adequate, and inspect power cord for frays and proper grounding. Do not run power cord through water or other liquids. Use caution in drawing soil gas sample with a syringe to avoid piercing injuries. When collecting sample, staff may be low profile, have a spotter or safety cones set up around sample collector to avoid being hit by traffic.
10	Backfill borehole	Back strain; chemical and dust exposure.	Use buddy system and proper lifting techniques (HASP) when handling containers of sealants; keep face away from top of borehole during sealant application. Use a respirator if necessary.

No	Job Steps	Potential Hazard(s)	Critical Action(s)
11	Cuttings, debris and waste water management	Back and body strains/sprains, pinching or crushing injuries, regulatory constraints.	Use buddy system, dolly, and/or hand truck when moving heavy containers; label drums in accordance with Work Plan and state/Federal regulations; stage containers in a safe/secure location per Site Owner, Client, and/or Project Manager directions.
12	Demobilization	Traffic hazards, sprains/strains	Use buddy system when removing traffic control equipment and exclusion/work zone controls; confirm that debris, cuttings and wastewater are properly contained; review and employ JMP; employ safe driving procedures.

Job Safety Analysis –

Field staff must review job-specific work plan and coordinate with project manager to verify that all up-front logistics are completed prior to starting work including, but not limited to, permitting, success agreements and notification to required contacts (e.g., site managers, inspectors, clients, subcontractors, etc.). Additionally, a tailgate safety meeting must be performed and documented at the beginning of each work day. Safe Performance Self Assessment (SPSA) procedures must be used during field activities. Also consider weather conditions (heat, cold, rain, lightning).

Date:	2/18/08
JSA Type:	R&T Operations
Work Type:	Hand Auger / Soil Sampling
Work Site:	Ameripride
Organization:	ENSR

Development Team	Position/Title	PC	Reviewed By	Position/Title	Date
William Glenn	Geologist			HS	
				AM	
Williams, Bruce	HS				

Personal Protective Equipment (PPE) needed:
Air Monitoring Equipment
Decontamination Equipment
Hard Hat
Proper Safety Vest
Protective Gloves – leather, nitrile
Safety Shoes
Safety Glasses

No	Job Steps	Potential Hazard(s)	Critical Action(s)
1	Load truck.	Lifting hazards and vehicle accident.	Utilize proper lifting techniques. Drive defensively, obtain necessary clearance, use buddy system and have communication (cell phone) readily available. Do not use cell phone while driving. Review JSA and Journey Management Plan.
2	Visual inspection of site. Look for utility mark-outs. Mark boring locations.	Slips, trips and falls. Biologic hazards due to poison ivy and insects. Damage to underground utilities.	Contact state utility agency at least 3 days prior to work. Hire private locating service for areas where state agency will not mark. Observe site and site vicinity for underground and overhead utilities. Check boring locations for potential hazards such as poison ivy, evidence of underground piping, rubble, rebar or old foundations. Mark boring locations as necessary based on potential hazards and utility locations. Positively locate known utilities coming into the site.
3	Set up work station/stations	Slip, fall and lifting hazards. Vehicle traffic hazards.	Set up work station or stations with clear walking paths to and from augering locations, use proper lifting techniques. Set up an exclusion zone with proper traffic control and barricades.

No	Job Steps	Potential Hazard(s)	Critical Action(s)
4	Begin hand augering. Place soil in buckets.	Explosion, electrocution, injury, death, and property damage. Rain, lightning, snow / ice (slip hazard), heat and cold stress. Blisters, back strain and repetitive motion hazard. Exposure to chemical hazards. Damage to or release from an underground utility.	Check local weather forecast, have a weather radio for remote sites, observe and communicate among field team members. Stop work and take shelter at first sign of lightning or thunder. Stretch before hand augering. Begin air quality monitoring in accordance with the HASP. Stand upwind to avoid exposure whenever possible. Use proper tools for hand augering and use proper lifting techniques. Proceed slowly and use caution. For clearing well locations, hand auger borings should be at least 8 feet deep. The diameter of the boring should be equal to or greater than the diameter of drill augers or geoprobe rods.
5	Clear obstructions. If boring is obstructed due to debris, use a post hole digger to remove pieces of debris.	Personal injury due to impact, vibration or repetitive motion. Exposure to chemical hazards. Damage to or release from an underground utility.	Avoid twisting and straining with hand auger. Use posthole digger to pull and remove debris that can not be removed with the hand auger. Proceed slowly and use caution. An offset handle (outward closing) style posthole digger should be used. If post hole digger does not work, use a steel spud bar to pry and dislodge debris. Do not attempt to remove objects or debris that are too large to recover with a post hole digger. If you suspect you have encountered a buried metallic object, stop work immediately and notify the site manager.
6	Complete hand augering.	Same hazards as Step 4.	Same critical actions as Step 4.
7	Remove auger flights from hole	Contact with overhead power lines.	ONLY remove the auger flights one at a time, as they were put on; do NOT pull the entire auger out of the hole at once.
8	Remove soil from hand auger bucket.	Personal injury due to misuse of tools. Exposure to contaminated soil and vapors.	Use proper tools to remove soil from hand auger bucket. DO NOT USE a KNIFE.
9	Decontaminate hand auger bucket and rods between each boring.	Exposure to contaminated soil and vapors. Cross-contamination of borings and soil samples.	Decontaminate hand auger bucket and rods between each boring with three decon buckets.
10	Transfer soil from buckets into drum. Dispose of soil cuttings in properly labeled and sealed 55-gallon drums.	Personal injury due to improper lifting technique or misuse of tools. Contact and vapor exposure to contaminants. Spillage of soils onto ground or in vehicle.	Wear impervious gloves for contact with contaminants. Use proper lifting technique when transferring soil from buckets to drums. Label drums with appropriate labels to ensure proper handling. Use a drum wrench or appropriate socket wrench and leather gloves to remove/seal drums. Following placement of soil cuttings in drum, be sure to replace container lids using leather gloves and proper tools. Use a drum dolly whenever moving drums.
11	Personal decontamination	Contaminant contact	Rinse off excess soil and contaminant from boots, then gloves. If wearing Tyvek, roll it inside out. Then remove and bag outer gloves. Wash hands with soap and water. Follow with hand and face wipes if necessary.
12	Demobilize and return to office	Lifting hazards, traffic, driving.	Proper lifting techniques. Secure all equipment in vehicle. Follow the driving JSA and JMP. Use “4 second rule.”

Job Safety Analysis – Site Removal of Unauthorized Personnel

Field staff must review job-specific work plan and coordinate with project manager to verify that all up-front logistics are completed prior to starting work including, but not limited to, permitting, access agreements and notification to required contacts (e.g., site managers, inspectors, clients, subcontractors, etc.). Additionally, a tailgate safety meeting must be performed and documented at the beginning of each work day. Safe Performance Self Assessment (SPSA) procedures must be used during field activities. Also consider weather conditions (heat, cold, rain, lightning).

William Glenn	Geologist	☑	Sanders, Joe	HS	
Jeff Otter	Project manager	☑			

Personal Protective Equipment (PPE) needed:
Work Boots - Steel toe/ leather
Orange Safety Vest
Safety Glasses

No	Job Steps	Potential Hazard(s)	Critical Action(s)
1	Arrive on site	• Traffic	o Park onsite away from traffic flow o Perform tailgate meeting and review hospital location from HASP
2	Site evaluation/ walk around	• Slips, Trips, and Falls • Sidewalk/ Street Traffic • Vagabonds/Homeless	o Wear traffic vest for visibility o Watch for trip hazards (piping, dirt holes, etc.) and hidden debris (glass bottles, metal objects, etc,) o Watch for street traffic, use cross walks and make eye contact whenever performing work around vehicles. If work is in heavy traffic, utilize a traffic control company to isolate work area and reroute traffic to create a safe buffer around work zone. o Unless otherwise required, stay in low flow/ no flow traffic area to minimize exposure to vehicle traffic. o Scan the site for signs of occupation by homeless or vagabonds such as tent like structures, sheds, hanging clothing, shopping carts with items. o If Homeless personnel or vagabonds are identified residing in the site or at locations where work is to take place, take stock of how many may be present and the general mood of the individual(s). If aggressive, or an uncomfortable situation, notify authorities to assist in removal. Otherwise, inform them that, "**We are going to be performing work in this area, and your presence here will interfere in our work schedule. Can you please vacate the area promptly or the authorities will be notified to remove you from this private property**." o Depending on response from individual(s), the authorities should be contacted if they are taking too long to vacate or become belligerent. o At no time should you try to remove the individuals yourself or engage in arguing.

No	Job Steps	Potential Hazard(s)	Critical Action(s)
3	Officer Notification	•	o If the authorities are notified, relay that you are a subcontractor working on the behalf of the site owner and have noticed that several homeless have taken up residence in the area you need to access and do not feel comfortable asking them to leave on your own. o Take note of how many homeless, their approximate age, gender, and appearance may be onsite. o Give the officer your site address information, phone number and site owner contact information in case they need it. o Let the authorities know what vehicle you may be driving and where you can meet. o When the officer arrives, escort them to the area that the homeless were last seen.
4	Perform job tasks	• See individual JSA	o Once homeless have left or been escorted out, perform job tasks. o Be vigilant for homeless that may want to return. Never leave vehicle unlocked in unsecured areas! o If gate has lock, use the chain and lock to secure site to prevent unauthorized entry.
5	Leave from site	• Site Security	o Secure gate and close locks at end of day

Job Safety Analysis –Soil Vapor Probe Sampling

Field staff must review job-specific work plan and coordinate with project manager to verify that all up-front logistics are completed prior to starting work including, but not limited to, permitting, access agreements and notification to required contacts (e.g., site managers, inspectors, clients, subcontractors, etc.). Additionally, a tailgate safety meeting must be performed and documented at the beginning of each work day. Safe Performance Self Assessment (SPSA) procedures must be used during field activities. Also consider weather conditions (heat, cold, rain, lightning).

Personal Protective Equipment (PPE) needed:
Hardhat; safety glasses; steel-toe boots; air monitoring equipment (PID, combination meter); chemical resistant gloves; leather gloves; respirator (per HASP); protective coverall (tyvek, poly; per HASP)

No	Job Steps	Potential Hazard(s)	Critical Action(s)
1	Mobilization/Inspection	Travel/traffic hazards, vehicle or physical property damage, vehicle accident, equipment failure	- Before startup, inspect rig/vehicle for defects - Review and employ Journey Management Plan (JMP) - Employ safe driving procedures - Employ a spotter when parking or backing rig and/or trailer - Do not use mobile phones while driving - Chock wheels of trailers, rig, and vehicles per HASP - Inspect all meters and check to make sure they are charged and have all necessary components (calibration gas, etc.) - Review equipment checklist to ensure all sampling related equipment is loaded into vehicle and secured (such as coolers, bottle ware, PPE, traffic control devices, etc.)
2	Establish work/exclusion zone and traffic controls	Traffic/pedestrian hazards, vehicle accident, property damage, physical injury	- Place traffic control equipment per HASP or Traffic Control Plan (use buddy system) - Place cones, construction (snow) fencing, or caution tape around work zones and sampling locations. - Chock wheels when using vehicle battery for power through a converter

3	Visually clear sampling locations	Potential vapor releases, slips/trips/falls, pinch-points, contact with soil vapors.	- Review locations against site plan - Identify setup location of field equipment - Identify hazards using cones, delineators, spray paint or other method (i.e. rebar, sharp objects, etc.) - Calibrate photo-ionization detector and monitor for breathing space. - Hand safety per HASP
No	**Job Steps**	**Potential Hazard(s)**	**Critical Action(s)**
4	Setup field equipment	Pinch-points, slips/trips/falls, strains and sprains, equipment failure, lacerations	- Proceed to setup field equipment per step 3 - Follow Work Plan procedures. - Maintain a clear travel path from sampling location to exit. - Be sure all electrical equipment is shut off before plugging into outlets or vehicle battery. - If possible, obtain a downwind location a fair distance from combustion sources (such as running vehicles or portable generators) to sample location.
5	Conduct purge volume test using 1, 3, and 7 purge volumes. Upon completion of test and calculation of optimal purge volume	Pinching, crushing, piercing injury, Traffic, electrical.	- Collect sample using syringes and purge pump. - Check adequacy of power source to pump, inspect condition of power cord - Do not run power cord through water or other liquids. - Use caution in drawing soil gas sample with a syringe to avoid piercing injuries. - Be aware of hand placement (crushing hazard) and use buddy system when placing helium containment vessel for leak gas testing. Secure helium tank to avoid puncture or damage to tank. - Collecting sample, visibility issues, have a spotter or safety cones around work zones.
6	Collecting Soil Vapor Sample at optimal purge volume	Pinch-points, lacerations (over tightening valves), strains and sprains, equipment failure (ie. exploding Tedlar bags), potential vapor release	- Monitor breathing space with FID/PID - Setup tedlar bag or Summa Canister with tubing and connect orifices to vacuum pump. **Never leave the sampling equipment unattended to avoid overfilling tedlar bags or completely filling summa canisters** (summa should always retain a small amount of vacuum). - Plug electrical equipment into power source, and check all connections before turning on power - Shut off all electrical power once sample is collected - Log collection times and ending vacuums in field book. - Collect FID/PID Readings
7	Demobilization	Traffic hazards, sprains/strains	- Use buddy system when removing traffic control equipment and exclusion/work zone controls; confirm that debris, cuttings and wastewater are properly contained. Secure equip. on truck. - Review and employ JMP; employ safe driving procedures for return trip.

1.0 Introduction

The purpose of this Quality Assurance Project Plan (QAPP) is to enumerate the quality assurance and quality control objectives, and the organizational and functional activities associated with the procedures for sample collection and analysis at the Former Welch's Uniform Facility (Ameripride) located at 3505 Pasadena Avenue in Los Angeles, California.

Section 1: Introduction

The Quality Assurance Project Plan (QAPP) outlines quality assurance (QA) and quality control (QC) procedures for field activities, laboratory analytical testing and data management, and the Field Sampling Plan (FSP) describes field activities, including specific sample handling procedures. The SSA Workplan (ENSR 2008) addresses sample collection procedures and sample handling protocol. The QAPP was prepared in accordance with the following United States Environmental Protection Agency (USEPA) guidance for developing QAPPs: USEPA Requirements for Quality Assurance Project Plans (EPA QA/R-5) (EPA 240/B-01/003) (USEPA, 2001) and EPA Guidance for Quality Assurance Project Plans (EPA QA/G-5) (EPA 240/R-02/009) (USEPA, 2002). Also included in this section is a site description, a summary of the site history, a summary of the potential environmental issues associated with the site, and a description of the tasks to be completed.

Section 2: Project Management Elements

Documents that the project has a defined goal and that participants in site activities understand the goal and the approach to be used. Section 2 includes the following subsections:

Project Organization and Responsibilities

Identifies key project personnel and responsibilities and establishes the project organization.

Quality Assurance (QA) Objectives for Measurement

Identifies the purposes for which the data will be used, and discusses data quality objectives in terms of precision, accuracy, representativeness, and completeness.

Section 3: Data Generation and Acquisition

Addresses aspects of data generation and acquisition to ensure that appropriate methods for sampling, measurement and analysis, data collection or generation, data handling, and quality control (QC) activities are employed and documented. Section 3 includes the following subsections:

Sampling Procedures

Describes the numbers and types of samples required to achieve the project goals, identifies sampling locations and frequencies, and lists sample matrices and measurement parameters of interest. Presents field sampling methods, including brief descriptions of sample collection and equipment decontamination procedures. Identifies sample containers, volumes, and preservation requirements and maximum holding times to sample extraction and/or analysis.

Sample Custody

Establishes procedures for maintaining sample custody in the field, during transport, and at the laboratory. Provides examples of sample labels and sample custody logs.

Calibration Procedures

Provides information regarding the calibration of field and laboratory equipment.

Analytical Procedures

Identifies the laboratory analytical methods to be used for laboratory analysis of soil and groundwater samples.

Internal Quality Control

Enumerates the types of quality control samples (e.g., blanks, duplicates, spikes) that will be used to evaluate laboratory data.

Performance and Systems Audits

Establishes procedures for conducting audits of field sampling procedures, and the frequency with which the audits will be conducted.

Preventive Maintenance

Describes a schedule for the preventive maintenance tasks to be performed to minimize downtime of field and laboratory equipment, and references the relevant owner's manuals for field equipment.

Section 4: Assessments and Oversight

This section defines the procedures that will be used to ensure that the QAPP has been implemented as prescribed.

Specific Routine Procedures Used to Assess Data

Establishes random field audits and audits of data quality. Evaluates whether the data collected are meeting project Data Quality Objectives (DQOs).

Corrective Actions

Lists corrective actions that may be taken (e.g., resampling, reanalyzing, etc.) to rectify data that do not meet QA specifications, based on audit results.

Reports to Management

Identifies a system for relaying information from field personnel to appropriate QA decision makers (field forms or logbook notes, etc)

Section 5: Data Validation and Usability

Describes the procedures to be followed after the data collection phase is completed. Section 5 includes the following subsections:

Data Management

States the criteria used to review and validate (accept, reject, or qualify) data in an objective and consistent manner. Identifies laboratory qualifiers.

Quality Assurance Reports (Reconciliation with User Requirements)

Presents the general format for laboratory data reports. Identifies the method to be used to report the performance of laboratory measurement systems and data quality. Describes how limitations on the use of the data will be reported to decision makers.

This document has been prepared in accordance with QAPP guidance found in the following U.S. EPA publications:

- *EPA Quality Manual for Environmental Programs,* EPA Order 5360, May 2001;
- *EPA Guidance for Quality Assurance Project Plans*, EPA QA/G-5, 1998; and,
- *EPA Requirements for Quality Assurance Project Plans*, EPA QA/R-5, March 2001.

1.1 Site Description

The Site is a 2.6 acre property located at 3505 Pasadena Avenue in Los Angeles, California. Currently, the property is a vacant lot owned by AmeriPride. Previously, the property was owned and occupied by Welch's Uniform Rental Company, which operated a commercial uniform laundry and rental service facility from approximately 1920 until 1988. Business activities associated with the facility included receiving, sorting, aqueous cleaning, dry cleaning, tailoring, pressing, and shipping of work uniforms, linens, and towels to industrial and commercial businesses, schools, and hospitals. Hazardous materials stored and handled at the facility included petroleum hydrocarbon based dry cleaning solvents (Stoddard, methyl ethyl ketone), chlorinated dry cleaning solvents (PCE), gasoline and diesel for motor vehicle fleet fueling, and fuel oil for boiler operation. The site is listed on the HAZNET database (as the American Linen Supply Company at 3505 Pasadena Avenue) for the generation of aqueous solutions containing oxygenated solvents (acetone, methyl ethyl ketone, ethyl acetate, etc.).

Results of past environmental site assessments conducted at the site indicate that soil and groundwater are affected with volatile organic compounds (VOCs), including perchloroethylene (PCE), trichloroethylene (TCE), cis-1,2-dichloroethylene (cDCE), and petroleum hydrocarbons associated with the dry cleaning solvents, boiler fuel, and motor vehicle fuels once stored and used in the laundering operations conducted at the former facility.

2.0 Project Management Elements

2.1 Project Organization and Responsibilities

The ENSR project team was selected to provide the specific technical and management capabilities and qualifications required by the project. The ENSR Project Manager is Jeff Otter, The Project QA Officer is Susan Milcan, the Project Health and Safety Officer is Joe Sanders, and the Project Field Operations Manager is William Glenn.

2.2 Quality Assurance Objectives for Measurement

Data from the Workplan Investigation will be used to characterize subsurface geochemistry. The characterization will in turn aid in the selection of appropriate remedial alternatives should the need arise. The goal of this section is to lay the framework by which all work will be evaluated by:

- Precision
- Accuracy
- Representativeness
- Completeness

The following specifies the data quality objectives (DQOs) for each of these parameters. Precision is a measure of the reproducibility of analyses under a given set of conditions. For field work conducted by ENSR, sample precision in field activities is monitored by adherence to procedures delineated in sampling plans and supported by the analytical results of field duplicates.

Accuracy is a measure of the bias in a measurement system. Accuracy is primarily measured by laboratory analysis. Accuracy is measured as a function of analytical activities using matrix spike/matrix spike duplicate samples, laboratory control samples, and surrogate spikes. The accuracy required for this project is typical of site investigation projects. Thus, the standard laboratory acceptance limits used during the time-frame of the previous investigations were set for measurements of accuracy for this project.

Representativeness is the degree to which sampling data accurately and precisely represents site characteristics. For field work conducted by ENSR, representativeness is incorporated into the rationale for sample locations and the methodology for sample collection. Sample numbers and locations are selected with regard to historic activities, potential chemical impact, known chemical impact, and environmental characteristics.

Completeness is a measure of the amount of valid data obtained from a measurement system compared to the amount that could be expected to be obtained under “normal” conditions. The proposed sampling plan was prepared with completeness on the first mobilization being the primary objective. Should the data gained from the first mobilization be determined incomplete, a remobilization will be proposed in manner that will impact the agreed project schedule the least.

2.2.1 Data Quality Objectives

The DQO process involves seven steps, and development of DQOs is an iterative process.

State the Problem. The DQO process begins with a concise statement of the problem that requires environmental data to evaluate. All soil and soil gas data as part of the Workplan will be validated as part of this effort as requested by DTSC.

Identify the Decision. The second step in the DQO process is to define the decisions to be made using the data generated. The data collected and validated under this project will be used to support a health risk assessment and a request for a no further action decision.

Identify the Inputs to the Decision. The third step in the DQO process is to identify the informational inputs or criteria that will be required to resolve the decision statement, and which inputs require environmental measurements. The data to be collected, i.e., TPH, VOC, SVOC, metals and OCPs are required to assess the subsurface soils, and to ensure that soils are tested for all contaminants of potential concern (COPCs) which are associated with historical and current activities at the Site. In addition, a soil gas investigation will be performed in various Areas of Concern as detailed in the Workplan document.

Define Boundaries of the Study. The fourth step in the DQO process specifies the spatial and temporal considerations that affect the decision. For this project the Site boundaries as shown in the Workplan define the spatial boundaries.

Develop a Decision Rule. The fifth step in the DQO process integrates outputs from the previous steps to create a single statement that describes the logical basis for choosing alternative actions. Validated data from the proposed WORKPLAN investigation will be used to calculate the heath risk and hazards at the Site. If the results of the SSA risk assessment provide data to support a request for no further action, this resolution will be made.

Specify Limits on Decision Errors. The sixth step in the DQO process specifies acceptable limits for decision errors used to establish appropriate performance goals for limiting uncertainty in the data. Except for the soil gas data, a judgmental approach rather than a statistical approach to selecting sampling points will be used. Analytical data of known quality will be produced in accordance with the requirements in this QAPP.

Optimize the Design for Obtaining Data. The overall goal of the DQO process is to define the data needs of the data user. The Workplan prepared by ENSR dated February 2008 provides a detailed discussion of the data needs and uses for all the sampling locations at the site. The current project has been designed to provide all the data needed for a final decision.

2.2.2 Analytical Data Quality Levels

In the Data Quality Objectives Process for Superfund (EPA/540/R-93/071) (USEPA, 1993), USEPA identified screening level data and definitive level data. These data categories are associated with the type of site, the level of precision and accuracy required, and the intended use of the data; that is, the type of data to be generated depends on the qualitative and quantitative DQOs developed for the project. The two levels of analytical data are described as follows:

Screening Data

Screening data are generated by rapid, less precise methods of analysis with less rigorous sample preparation. Screening data provide analyte identification and quantification, although the quantification may be approximate. Screening methods are conducted using field equipment such as thermometers; flame ionization detectors (FIDs); and photo-ionization detectors (PIDs). Screening data are used during site assessment, and other field projects to provide real time data concerning the site conditions. Examples of supporting data include:

- Evaluation of VOC concentrations in the soil gas using PID or FID.

Screening data may be confirmed using analytical methods and QA/QC procedures associated with definitive data. Screening data without associated confirmation data are not considered to be data of known quality.

Definitive Data

Definitive data are generated using analytical methods, such as approved USEPA reference methods. Definitive data are analyte-specific, with confirmation of analyte identity and concentration. Methods produce tangible raw data (e.g., chromatograms, spectra, and digital values) in the form of paper printouts or computer-generated electronic files. For data to be definitive, either analytical or total measurement error must be determined.

Valid data are defined as results generated when the instrument and quality controls are within the designated limits. Data validation procedures are designed to identify valid data and to assign qualifiers that indicate limited usability of the data or other data.

The usability of data collected during a site investigation depends on data quality. A number of factors relate to the quality of data. Sample collection methods are as important as the methods used for sample analysis. Following standard operating procedures (SOPs) for both sample collection and analysis reduces sampling and analytical error. Completion of CoC records and adherence to required sample preservation techniques, holding times, and proper shipment methods ensure sample integrity. Obtaining valid and comparable data also requires adequate QA/QC procedures and documentation, as well as established detection and control limits.

2.2.3 Definition of Criteria

Quality criteria address the following data characteristics: accuracy, precision, completeness, representativeness, and comparability.

Accuracy

Accuracy is the level of agreement of a measurement or average of measurements with an accepted reference or "true" value, and represents a measure of bias in the analytical system. Accuracy includes components of random error (variability due to imprecision) and systematic error. Accuracy of the data will be assessed and controlled with the analysis of matrix spike (MS), laboratory control sample (LCS), and surrogate spikes. Spike recoveries will be calculated and compared to pre established acceptance limits.

For surrogate compounds and LCSs, a database of percent recovery is collected. The calculation formula for percent recovery is:

$$\%R = \frac{(C_a - C_s)}{C_c} \times 100$$

Where: $\%R$ = Percent Recovery
C_a = Measured concentration of added spiked aliquot
C_s = Measured concentration of unspiked aliquot
C_c = Actual concentration of spike added

Each laboratory has developed their acceptance limits. Recoveries outside the established limits indicate some assignable cause, other than normal measurement error, and possible need for corrective action. This may include reanalysis of the QC sample, recalibration of the instrument, reanalysis of the samples in the batch, or qualifying the data set as suspect, if the anomaly cannot be resolved.

For matrix spikes the assignable cause for recoveries outside acceptable limits may be, and often is, due to matrix interferences. Acceptable analytical system performance will be demonstrated by analysis of an LCS. If a matrix effect is confirmed by acceptable performance on the LCS, the MS/MSD data will be flagged.

Blanks make up another group of QC checks that address measurement bias. Instead of assessing and controlling overall accuracy, field and laboratory blanks will be used to control bias due to sample contamination and to assess the extent to which this source of bias impacts the results. Since sample contamination generally occurs at relatively low levels, the effects of contamination are most pronounced in terms of relative error for low concentration samples.

Method blanks will be used to check for contamination introduced during sample preparation and analysis. Blanks are typically considered acceptable when the results are less than the reporting limit (RL) for the constituent.

Field blanks will be used primarily to assess the overall magnitude and extent of cross contamination. Cross contamination introduced during sample collection may be estimated from the difference between field and laboratory blank results. Some types of field blanks, such as equipment blanks, will be used primarily in a qualitative role.

Precision

Precision is a measure of mutual agreement among individual measurements of the same property under prescribed similar conditions.

Precision will be based upon replicate analyses (replication), control sample analyses (repeatability), and results of duplicate field samples (sampling replication). Discretely sampled field duplicates are useful in determining sampling variability. Field sample duplicates shall be used as a quality control measure to monitor precision relative to sample collection activities. Analytical precision shall be evaluated by using LCS and LCS duplicates, or by using matrix spike or matrix duplicate samples.

Precision is expressed as Relative Percent Difference (RPD). RPDs must be compared to the pre established limits. Precision of duplicates or replicates may be influenced by the sample heterogeneity. High RPDs (i.e., imprecision) are expected as sample and duplicate concentrations approach the RL.

Quality control procedures represent the primary mechanism for evaluating measurement data variability or precision. Replicate analyses will be used to define analytical replicability, while results from replicate samples may be used to define the total variability of the sampling/analytical system.

Control limits for control sample analyses, acceptability limits for replicate analyses, and response factor agreement criteria are based upon precision in terms of the relative standard deviation (RSD) or RPD. The standard deviation is a measure of the average value of individual observations from the mean. It is usually denoted “s” and defined as:

The RPD between the matrix spike and matrix spike duplicate, or sample and sample duplicate in the case of some of the inorganic parameters, and field duplicate pair is calculated to compare to precision objectives (Section A.7.2 of this QAPP). The RPD will be calculated according to the following formula.

$$RPD = \frac{(Amount\ in\ Sample\ 1 - Amount\ in\ Sample\ 2)}{0.5\,(Amount\ in\ Sample\ 1 + Amount\ in\ Sample\ 2)}\,x\,100$$

Failure to achieve precision objectives may result in the associated data be qualified and limitations placed upon its use.

Completeness

Completeness is a measure of the amount of valid data obtained from a measurement system compared to the amount expected to be obtained under normal conditions. Completeness is a measure of the amount of valid data obtained from a measurement system compared to the amount that was expected to be obtained under normal conditions. "Normal conditions" are defined as the conditions expected if the sampling plan was implemented as planned. Field completeness is a measure of the amount of valid samples obtained during all sampling for the project. The field completeness objective is 90 percent.

Completeness is the ratio of the number of valid sample results to the total number of samples analyzed with a specific matrix and/or analysis. Following completion of the analytical testing, the percent completeness will be calculated by the following equation:

$$Completeness = \frac{(number\ of\ valid\ measurements)}{(number\ of\ measurements\ planned)} x 100$$

Failure to meet the completeness objective will require an assessment to determine if the missing or invalid data are critical to achieving the project objectives. Corrective actions may include resampling or re-analysis, depending on the type of problem, logistical constraints, etc.

For analyses to be valid, the sample must arrive at the laboratory intact, properly preserved, in sufficient quantity to perform the requested analyses, and accompanied by a completed chain of custody. Furthermore, the sample must be analyzed within the specified holding time and in such a manner that analytical QC acceptance criteria are met.

Completeness involves field and laboratory documentation, whether all samples and analyses specified in the Statement of Work were processed, and whether the procedures specified in the QAPP and laboratory SOPs were implemented.

Representativeness

Representativeness is a term used to express the degree to which data accurately and precisely portray a characteristic of a population, parameter variations at a sampling point, a process condition, or an environmental condition. Representativeness is a function of sampling strategy; therefore, the sampling scheme should be designed to maximize representativeness.

Comparability

Comparability represents the confidence that a data set can be compared to another data set measuring the same sample property. Comparability is provided through the use of established and approved sample collection techniques and analytical methods, consistency on the basis of analysis (e.g., wet weight, and volume), consistency in reporting units, and analysis of standard reference materials (SRMs).

Data comparability will be achieved by using standard units of measure such as micrograms per kilogram (µg/kg) in soil samples, and parts per billion volume/volume (ppb v/v) in vapor samples.

The use of standard, published methods to analyze samples (e.g., USEPA Methods), along with instruments calibrated using SRMs that are traceable to National Institute for Standards and Technology (NIST), USEPA, or other standards, and also provides for comparability.

Sensitivity

Sensitivity of analytical data is demonstrated by the laboratory reporting limits. The target reporting limits for the constituents to be analyzed are presented in Tables 2 and 3. The list of recovery limits and relative percent difference limits are presented in Tables 4, 5, and 6. These tables also contain the Project Action Levels (PALs). The reporting limit is either derived from the low standard in the calibration curve or from the laboratory's most recent detection limit study results to report analytical results.

Alternative analytical methods will be evaluated if the need arises, and the QAPP will be amended, if necessary.

3.0 Data Generation and Acquisition

Outlined in this section are the procedures for sample preservation and storage and for documentation of sampling actions, which will be followed to assure data quality.

3.1 Sampling Procedures

3.1.1 Sampling Methods

During confirmation sampling process, soil samples will be collected. Sample collection will be conducted in a manner to minimize the risk of cross-contamination of samples and to preserve the integrity of samples. All samples will be collected using dedicated equipment. A brief summary of sampling techniques is presented below. Soil sampling procedures are presented in the Workplan.

The frequency of soil sampling will be as specified in the Workplan. Field personnel will wear disposable gloves (clean gloves for each sample) and will pack an appropriate volume of soil into each container (**Table 1**). Proposed sampling locations are provided in the Workplan Table 1.

3.1.2 Sample Preservation and Holding Times

Soil samples will be stored in an ice-filled, insulated container chilled to approximately 4º C until they can be delivered by person or courier to the laboratory for analysis. Sample container, preservative, and holding times for each analyte are presented in **Table 1**.

3.1.3 Sample Labeling

Samples will be labeled prior to collection at the sampling location. Sample labels will indicate the well or boring name and number, sample depth (for soil samples only), the requested analysis, the date and time of collection, and any pertinent comments, such as the type of preservative used for the samples, etc. After labeling, the samples will be logged on the chain-of-custody forms.

Laboratory-prepared VOA vials containing methanol and sodium bisulfate preservation/extraction solutions will be utilized for EPA Method 5035 collection of VOC and TPH-g containing soils. The laboratory will document the tare weight of each VOA with extraction solution prior to shipment and use to enable it to determine the net weight of the collected sample upon receipt at the lab.

3.1.4 Decontamination Procedures

If non-dedicated sampling equipment is used (not recommended or proposed) it will be decontaminated prior to use on site and in between sampling locations using the following procedures:

- Wash with a low alkaline, low trisodium phosphate (TSP) detergent solution
- Tap water rinse
- Distilled water rinse

Personnel decontamination is specified in the Health and Safety Plan (HASP).

3.1.5 Field Documentation

All sampling activities will be documented on ENSR Field Note Sheets to be submitted at the end of each field assignment to the project manager. The following information will be included in the daily documentation:

- Date of Field Activities
- Starting Time
- Meteorological Conditions
- Field Personnel Present
- Level of Personal Protection
- Site Identification
- Field Observations/Parameters (observations of soil should be written on soil boring logs)
- Sample Identification Numbers
- Location and Description of Sampling Points
- Number of Samples Collected
- Time of Sample Collection
- Observation of Sample Characteristics
- Photo Log
- Deviations from the Workplan

3.1.6 Corrections to Documentation

Original data recorded in field sheets, chain-of-custody records, and other forms will be written in waterproof ink and on Write in the Rain® Paper. None of these documents will be altered, destroyed, or discarded, even if they are illegible or contain inaccuracies that require a replacement document. If an error is made on a document compiled by one individual, that individual will make the correction by crossing a line through the error, entering the correct information, and initialing and dating the change. The erroneous information will not be removed or obliterated. Any subsequent error(s) discovered on a document will be corrected by the person discovering the error. All corrections will be initialed and dated. As an example for field notes:

- SB-1 boring completed depth to sand is 35 bgs.

3.2 Sample Custody

Sample custody procedures are designed to comply with U.S. EPA requirements for sample control. Stringent chain-of-custody procedures will be followed to maintain and document sample possession, beginning at the time of sampling and continuing through transport, sample receipt, preparation, analysis and storage, data generation and reporting, and sample disposal.

3.2.1 Field Custody Procedures

Samples collected during a site investigation are the responsibility of identified persons from the time they were collected until they or their derived data are incorporated into the final report. Custody is maintained if the samples are:

- In the possession of the custodian
- Within plain view of the custodian after being in possession
- Inside an insulated container or other appropriate container within plain view of the custodian after being in possession
- Inside any locked space, such as a locker, car, truck, or storage room, to which the custodian has the only immediately-available key(s)
- In a designated secure area

3.2.2 Chain-of-Custody Forms

Chain-of-custody (COC) forms will be used to document sample possession, and will be completed to the fullest extent possible prior to sample shipment. COCs will include the following information:

- Unique sample identification
- Date and time of sample collection
- Source of sample (including type of sample and site identification)
- Requested analyses and preservatives
- Numbers/ types of containers
- Sampler name(s)
- Custody transfer signatures and dates and times of sample transfer from the field to transporters and to the laboratory
- Any key factors that may affect the sample quality
- Name and address of the receiving laboratory

The forms will be filled out in a legible manner using waterproof ink and will be signed by the sampler. Samples will always be accompanied by a chain-of-custody record. When transferring samples, the individuals relinquishing and receiving them will sign, date and note the time on the record. A separate custody record will accompany each sample container. A copy of the custody record will be retained by the field sampler and filed either at the end of the sampler's shift or the beginning of his/her next shift if he/she couriered the samples to the lab.

Samples will be logged onto COC forms before the samples are placed in iced insulated containers. COCs will be checked for completeness by the Project Manager. Under no circumstances will anyone other then the sampler and Project Manager be permitted to open an insulated container that is not assigned to him/her without requesting approval from the ENSR field person first. From the moment each sample is collected until it is submitted to the laboratory it remains the responsibility of the ENSR field person assigned to collect it. If any employee is scheduled to a short shift all samples in his/her possession must be signed over to either the Project Manager or another ENSR field person before they can leave the site, at which time either the Project manager or another ENSR field person verifies all documentation is complete and assumes responsibility of the samples.

Samples will be transported to the laboratory by either ENSR personnel or laboratory personnel. Upon receipt of the samples at the laboratory, the laboratory will inventory the samples, note any discrepancies, complete the custody form, and if appropriate/necessary, contact the ENSR Project Manager.

3.2.3 Custody Seals

Custody Seals will not be used due to the level of control imposed upon sample collection.

3.2.4 Laboratory Custody Procedures

Procedures ensuring internal laboratory custody will be implemented and documented by the laboratory. While in the laboratory, samples will be stored in limited-access, temperature-controlled areas.

3.3 Calibration Procedures

3.3.1 Field Equipment

Field equipment will be calibrated and operated in accordance with manufacturers' instructions. Calibration will occur prior to use in the field (at least once daily). The specific field equipment to be used and operational procedures are presented in the Workplan.

3.3.2 Laboratory Equipment

Laboratory calibrations will be performed as specified in the individual Quality Assurance Manual and Standard Operating Procedures (SOPs) developed by the laboratory. Precision and accuracy data will be regularly examined for trends and excursion beyond control limits to determine evidence of instrument malfunction. Maintenance will be performed when an instrument begins to change, as indicated by the degradation of peak resolution, a shift in the calibration curves, a decrease in sensitivity, or failure to meet any one of the quality control criteria.

3.4 Analytical Procedures

A California Department of Health Services Environmental Laboratory Accreditation Program (DHS ELAP)-certified laboratory will conduct the analyses using SW 846 Methods, as specified in Table 1. Chemical analysis methods were selected on the basis of reporting limits and the analytical quality necessary to meet quality objectives and intended data uses. See Tables 2 and 3 for a list of analytes and their respective mean detection and reporting limits for soil, soil gas and water. Selected analytical methods include the following:

- TVPH by modified EPA Method 8015B or 8260B
- TEPH by modified EPA Method 8015B
- VOCs by EPA Method 8260B
- Polychlorinated biphenyls by EPA Method 8082A
- SVOCs by EPA Method 8270C
- California Assessment Manual Title 22 Metals by EPA Method 6010B/7000
- OCPs by EPA Method 8081A
- Organic Lead by California Hazardous Materials Laboratory Method 939-M

3.5 Internal Quality Control

The following subsections define and explain the field blanks and duplicate soil samples. The numbering system will follow the general numbering scheme outlined above and include project and area identifier, plus TB for trip blanks, and EB for equipment blanks, followed by a sequential number incremented throughout the project, e.g., TB 01. All duplicate samples will be labeled as normal field samples so laboratory personnel cannot identify them as QA/QC samples. In addition, a temperature blank of a 40 ml VOA vial containing deionized water prepared by the laboratory will be placed in each cooler

Equipment Blanks

Equipment blanks are defined as samples collected by pouring distilled water through or over the sampling equipment, and then transferring the water into a sample bottle. These blanks are handled as samples and transported to the laboratory for analysis. The sampling crew will collect one set of equipment blanks for each day of sampling. The equipment blank samples will be analyzed for OCPs, metals, hexavalent chromium, SVOCs, TPH and VOCs.

Trip Blanks

Trip blanks are defined as 40-ml VOA bottles filled in the laboratory with reagent grade water and transported to the sampling site. A trip blank is returned to the laboratory with samples submitted for VOCs. One trip blank will accompany each cooler containing liquid samples to be analyzed for VOCs. The trip blank will be analyzed for the same VOC compounds as the associated samples. However, analysis of the trip blank will not be required if an equipment blank will be analyzed for the same batch.

Duplicates

Field duplicates are defined as co-located samples or split samples of soil, soil gas, or groundwater submitted for analysis. A duplicate will be collected after the primary sample and before sampling at the next location and collected at a frequency of one per day. In general, field duplicates will number 5% of the total number of samples. These samples will be labeled for the location of origin plus a “D” to designate the sample i.e. SB-1D.

MS/MSDs

One Matrix Spike/Matrix Spike Duplicate sample (MS/MSD) is analyzed by the laboratory per every batch of 20 samples to evaluate data accuracy. As this procedure may not result in samples from the project site being selected for MS/MSD analysis, a representative number of samples from the subject site will be specified for MS/MSD analysis.

The MS/MSD samples will be collected in a separate set of sample jars in the same manner as the original sample from a specified location/interval. The MS/MSD samples will be analyzed for the same parameters as the original sample, with the exception of VOCs, for which a representative VOC list is analyzed.

Method Blanks

Laboratory method blanks will be run per laboratory QA guidelines to assess laboratory contamination.

3.5.1 Performance and Systems Audits

Field audits may be conducted to evaluate the performance of both field and laboratory personnel. Field audits will be conducted by the ENSR Site Investigation Project Manager. Performance will be checked against the procedures defined in the ENSR QAPP and Workplan.

3.6 Preventive Maintenance

The laboratory Project Manager will be responsible for ensuring that proper care and maintenance procedures are instituted for laboratory equipment. Preventative maintenance in the laboratory will be the responsibility of the laboratory personnel and analysts and will be performed as outlined in the laboratory's Quality Systems Manual for Calscience Labs. The maintenance includes routine care and cleaning of the instruments and inspection and monitoring of carrier gases, solvents, and glassware used in analyses.

Field equipment will be inspected daily for damage or wear. Work practice controls (such as maintaining an organized and neat work space) will be instituted to prevent damage to field equipment (*e.g.*, to prevent water from splashing on the laptop computer). Detailed maintenance procedures are presented in equipment operating manuals. Operating manuals will be maintained on site.

4.0 Corrective Procedures and Reporting

4.1 Corrective Procedures

If quality control actions/audits result in the detection of unacceptable conditions or data, the Project Manager will be responsible for developing and directing implementation of corrective actions. Corrective actions may include:

- Identifying the source of the unacceptable conditions.
- Resampling, if field records indicate the proper field procedures were not followed.
- Resampling, if holding times were exceeded.
- Evaluating and amending sampling and analytical procedures.
- Flagging data to indicate the level of uncertainty associated with failure to meet the specified quality control performance criteria

4.2 Reports to Management

A draft and final Additional Site Characterization and Baseline Health Risk Assessment Report will be prepared.

5.0 Data Validation and Usability

5.1 Data Review, Verification, and Validation

All data generated through field activities or through the analytical program, will be reduced and verified prior to reporting. No data will be disseminated by ENSR or its subcontractors until it has been subjected to the procedures summarized below.

5.2 Field Data

Field data will be reviewed daily by the ENSR Field Manager to ensure that the records are complete, accurate, and legible and to verify that the sampling procedures are in accordance with the protocols specified in the Workplan and QAPP.

5.3 Internal Laboratory Review

Prior to the release of any data from the laboratory, the data will be reviewed and approved by laboratory personnel. The review will consist of a tiered approach that will include reviews by the person performing the work, by a qualified peer, and by supervisory and/or QA personnel.

5.4 Validation of Analytical Data

Validation of the laboratory deliverables will be performed by ENSR. All received data will undergo an ENSR Data Assessment Level II or data verification procedure. The laboratory will initially complete an internal data review as detailed in Section 5.5.2 to ensure that all internal QC requirements (i.e., calibrations, performance checks) were met as directed in the analytical methods performed. Once data has been released by the laboratory, an ENSR Data Assessment Level II verification will be performed. This level of independent data review provides a definitive assessment of analytical precision, accuracy, method compliance, sensitivity, and completeness. The minimum analytical documentation that will be provided by the laboratory for an ENSR Level II data package must include::

- Case narratives,
- Detection limits,
- Percent moisture results for soil samples,
- Dilution factors,
- Method blank results,
- Surrogate spike recoveries,
- MS/MSD recoveries and relative percent differences (RPDs),
- LCS/LCSD recoveries and RPDs,
- Laboratory duplicate results and RPDs,
- Extraction and analysis dates, and
- Chain of Custody forms.

Sample summary forms must include the sample ID, the laboratory sample ID, date sampled, matrix, method reference, units of measurement, and initial and final sample volumes. QC summary forms must include a means to cross reference laboratory QC with the associated samples.

5.5 Verification and Validation Methods

5.5.1 Field Data Verification

Field records will be reviewed by the ENSR Field Manager to ensure that:

- Logbooks and standardized forms have been filled out completely and that the information recorded accurately reflects the activities that were performed.
- Records are legible and in accordance with good recordkeeping practices, i.e., entries are signed and dated, data are not obliterated, changes are initialed, dated, and explained.
- Sample collection, handling, preservation, and storage procedures were conducted in accordance with the protocols described in the QAPP, and that any deviations were documented and approved by the appropriate personnel.

5.5.2 Laboratory Data Verification

Prior to being released as final, laboratory data will proceed through a tiered review process. Data review starts with the analyst who performs a 100 percent review of the data to ensure the work was done correctly the first time. The data reduction and initial review process must ensure that:

- Sample preparation and analysis information is correct and complete,
- Analytical results are correct and complete,
- The appropriate SOPs have been followed and are identified in the project records,
- Proper documentation procedures have been followed, and
- All nonconformances have been documented.

Following the completion of the initial review by the analyst performing the data reduction, a systematic check of the data will be performed by an experienced peer or supervisor. This check will be performed to ensure that initial review has been completed correctly and thoroughly and will include a review of:

- Adherence to the requested analytical method SOP,
- Correct interpretation of chromatograms, mass spectra, etc.,
- Correctness of numerical input when computer programs are used (checked randomly),
- Correct identification and quantitation of constituents with appropriate qualifiers,
- Numerical correctness of calculations and formulas (checked randomly)
- Acceptability of QC data,
- Documentation that instruments were operating according to method specifications (calibrations, performance checks, etc.),
- Documentation of dilution factors, standard concentrations, etc.,
- Sample holding time assessment.

A third-level review will be performed by the QA Department and/or Laboratory Project Manager before results are submitted to clients. This review serves to verify the completeness of the data report and to ensure that project requirements are met for the analyses performed. A narrative will accompany the final report.

5.5.3 Validation of Analytical Deliverables

Once data has been released by the laboratory, an ENSR Data Assessment Level II verification will be performed. Verification will be performed using the U.S. EPA's *Data Validation Standard Operating Procedures for Contract Laboratory Program Routine Analytical Services* in conjunction with the U.S. EPA's *Contract Laboratory Program, National Functional Guidelines for Organic Data Review*, and *Contract Laboratory Program, National Functional Guidelines for Inorganic Data Review*. The criteria in the SW-846 analytical methodologies will be used in conjunction with the project-specific acceptance criteria defined in this QAPP to accept, reject, or qualify data.

Upon completion of the verification, a report will be prepared. This report will summarize the samples reviewed, elements reviewed, any nonconformances with the established criteria, and validation actions (including application of data qualifiers). Data qualifiers will be consistent with the U.S EPA guidelines.

5.5.4 Verification During Data Management

Manually entered data (e.g., field data) will be proofed against the original. Electronic data will be checked after loading against laboratory data sheets for completeness and accuracy.

5.6 Quality Assurance Reports

Effective QA management of project field operations and the project laboratory analytical effort requires timely review of and feedback on field and laboratory activities.

Reports typically discuss activities performed such as: audits, surveillance, or inspections; training conducted; procedures or project deliverables reviewed/revised; and any significant quality issues that are being evaluated, corrected, or closed out after verification of adequacy and completeness have been performed.

The Project Manager and Field Operations Manager will be responsible for ensuring that all documentation generated in the field (daily field logbooks and field data forms) are gathered daily, reviewed for completeness, and that copies are retained in the field office files. Original field documentation is to be transmitted weekly to the Project Files. ENSR's Data Coordinator will be responsible for retaining all analytical documentation from the project laboratory and filing this documentation by lot or batch number. All other ENSR personnel will be responsible for providing any documents received that are required per the Project File Index to the records coordinator for entry into the Project Files.

[1] Laboratory control limits are periodically updated. The latest control limits will be utilized at the time of sample analysis. The allowable lower control limit will not be less than 10%.

[2]Blank (field, trip, method) criteria apply to all target compounds analyzed and reported for a particular method, with the exception of the common laboratory contaminants specified in the laboratory SOP.

[3]Field duplicate criteria apply to all target analytes analyzed and reported for a particular method.

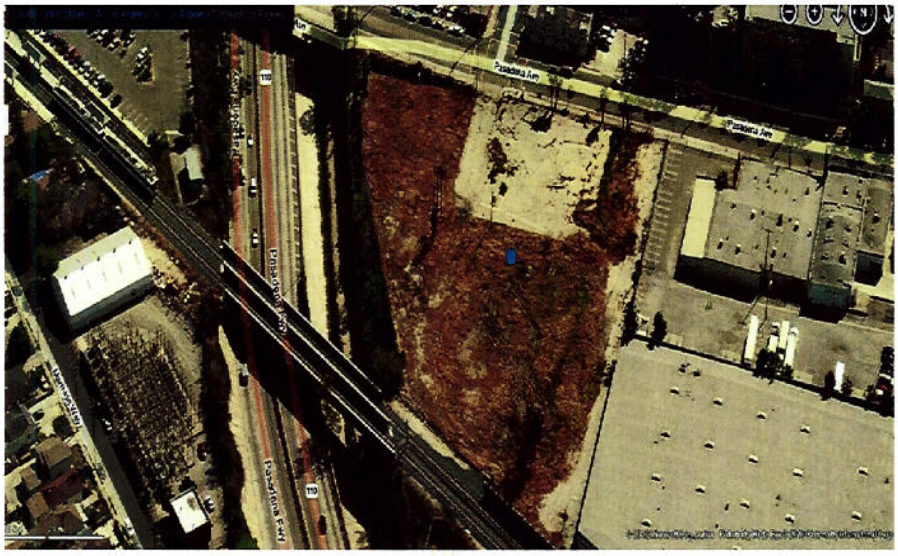
Welch's Public Notice 2012

COMMUNITY Notice

The mission of DTSC is to protect California's people and environment from harmful effects of toxic substances through the restoration of contaminated resources, enforcement, regulation and pollution prevention.

Former Welch's Uniform Facility Removal Action Workplan Available for Review and Comment

The State of California Department of Toxic Substances Control (DTSC) invites the community to review and comment on a Removal Action Workplan (RAW) to cleanup contamination beneath the Former Welch's Uniform Facility (Site) located at 3505 Pasadena Avenue, Los Angeles, California. The objective of the RAW is to reduce the potential risk to human health and the environment and address any contamination.



This **Fact Sheet provides Information on:**

- Site Background and History
- Environmental Investigations
- Why Cleanup is Necessary
- Proposed Clean Up Plan
- California Environmental Quality Act (CEQA)
- Next Steps
- Where to Find Site Documents
- Who to Contact at DTSC for More Information

Public Comment Period
Sept. 6, to Oct. 7, 2012

The draft RAW and other related documents for this site are available for public review and comment at the locations listed on page 3. (DTSC) will make a final decision after all public comments have been reviewed and considered. Please submit written comments postmarked or recieved by email by October 7, 2012 to:

Alberto Valmidiano
Project Manager
9211 Oakdale Avenue
Chatsworth, CA 91311

Si desea informacion en espanol, comuniquese con Jeanne Garcia al (818) 717-6573

Site Background and History

AmeriPride Services Inc., the current owner of the property at 3505 Pasadena Avenue, Los Angeles, California (Site), proposes to install a soil vapor extraction (SVE) and treatment system to address soil vapor contamination associated with dry cleaning solvent wastes at the former Welch's Uniform Facility.

The Site consists of an approximate 2.6 acre vacant parcel located in a mixed residential and industrial area of Los Angeles, California. The Site is bordered on the north by the Arroyo Seco Channel and the Pasadena Freeway (110); on the west by a railroad right-of-way; on the east by Pasadena Avenue; and on the south by commercial properties.

The Site is currently vacant and no buildings exist on the property. A chain-link fence is located around the perimeter of the Site with a 10-foot high retaining wall along the northeast Site boundary. Four pole-mounted electrical transformers are located in the center of the Site. Gas and water metering equipment are located near the east gate, and a 6,000 square foot area of asphalt pavement is located in the southeast portion of the Site. The Site was formerly a commercial linen and apparel laundering and delivery service facility that was established circa 1920 and operated until approximately 1988. All buildings associated with the previous operation were removed in 1993.

There are no current redevelopment plans for the property, but future uses may include commercial or industrial projects.

Environmental Investigations

Tetrachloroethene (PCE) was first detected in 1988 when soil boring and vapor extraction wells were completed at the Site. Follow up investigation efforts have included collecting soil and soil vapor samples from numerous locations around the Site, as well as installing and monitoring 14 active monitoring wells located on-site and off-site and 7 active soil vapor monitoring points on-site. The monitoring wells and soil vapor points are sampled and analyzed on a semi-annual basis. Since 2007, the California Department of Toxic Substances Control (DTSC) has been overseeing the site investigation, monitoring and cleanup efforts at the Site.

In 2007, the owner of the Site, AmeriPride Services Inc., entered into a voluntary agreement with DTSC to clean up the Site and to submit planning and monitoring documents to DTSC for review and approval.

Why Clean Up is Necessary

The Site is located in a mixed residential and industrial area of Los Angeles, California. It is bordered on the north by the Arroyo-Seco Channel and the Pasadena (110) freeway; on the west by a railroad right of way; on the east by Pasadena Avenue and on the south by commercial properties.

Historical records indicate that hazardous materials stored and handled at the facility included petroleum hydrocarbon based cleaning solvents used in the dry cleaning process. Previous investigations revealed the presence of PCE and trichloroethene (TCE) beneath the Site. PCE naturally degrades to TCE in the environment; the TCE present is likely a breakdown product from PCE. Exposure to high levels of PCE and TCE in indoor air may result in an increased risk of cancer when breathed continuously for an extended amount of time (generally more than 20 years). Environmental cleanup activities at the Site are necessary to protect public and environmental health.

Proposed Clean Up Plan

Soil vapor extraction (SVE) is the proposed approach to clean up the PCE and TCE detected in the soil and soil gas beneath the Site. SVE is a proven technology for treating volatile contamination. The SVE will be accomplished by the installation of a soil vapor extraction system (SVES). The SVES includes the installation of soil vapor extraction wells. The extracted vapor will be treated with granular activated carbon, before the gas will be released to the atmosphere. The SVES will be monitored to insure gas release into the atmosphere is treated successfully and meets the South Coast Air Quality Management District (SCAQMD) standards and regulations. With DTSC oversight, Ameripride proposes to install an SVE system to clean up the Site.

The SVE system will likely operate until the cleanup goals are achieved. Approximately 12 to 24 months of operation time is the initial estimate to treat the contamination. The system will operate until levels are reached that do not pose a significant risk.

California Environmental Quality Act

Under the California Environmental Quality Act (CEQA), DTSC must evaluate whether the proposed actions may have any significant impact to human health and the environment.

As part of this evaluation, DTSC has proposed a Notice of Exemption (NOE) which states that the Removal Action Workplan will not result in a significant negative effect on human health and the environment.

Next Steps

At the close of the Public Comment Period, DTSC will review and consider any public comments and make a final decision on the Removal Action Workplan. A Response to Comments document will be mailed to everyone who makes a comment and provides their name and address. A copy of the Response to Comments document will be placed in the Information Repositories listed in this fact sheet.

Once the Plan is approved the system will be built and work will likely begin in Fall 2012

Where to Find Project Documents

The RAW and other site related documents are available for public review at the information repositories listed below. The entire Administrative Record is available at the DTSC Chatsworth Office.

Lincoln Heights Branch
Los Ángeles Public Library
2530 Workmen Street
Los Angeles, California 90031
Phone: (323) 226-1692

Department of Toxic Substances Control
Regional Records Room
9211 Oakdale Avenue
Chatsworth, California 91311
Phone: (818) 717-6521

Copies of key technical reports, fact sheets and other site-related information are also available online at DTSC's website: *www.envirostor.dtsc.ca.gov/public*

All documents made available to the public by DTSC can be made available in an alternate format (i.e. Braille, large print, etc.) or in another language as appropriate, in accordance with state and federal law. Please contact Zenzi Poindexter for assistance.

Who to Contact for More Information

For more information about the draft Cleanup Plan or to be added to the site mailing list please contact the following DTSC representatives:

Alberto Valmidiano, DTSC Project Manager
9211 Oakdale Avenue
Chatsworth, California 91311
Phone: (818) 717-6550
alberto.valmidiano@dtsc.ca.gov

Zenzi Poindexter, DTSC Public Participation Specialist
9211 Oakdale Avenue
Chatsworth, California 90630
Phone: (818) 717-6567
Toll-Free: (866) 495-5651 (press 3 then 4)
uzenzile.poindexter@dtsc.ca.gov

For media related inquiries, please contact:
Jeanne Garcia, DTSC Public Information Officer

AVISO Comunitario

La mision del DTSC es de proteger a los residentes de California y al medio ambiente de los efectos nocivos de substancias toxicas atravez de la restauracion de recursos contaminados, la aplicacion de regulaciones, y la prevencion de la contaminacion.

Plan de Trabajo para las Acciones de Remoción de lo que era la Instalación de

El Departamento de Control de Sustancias Tóxicas de California (DTSC, por sus siglas en inglés) invita a la comunidad a revisar y comentar sobre un Plan de Trabajo para las Acciones de Remoción (RAW, por sus siglas en inglés) para limpiar la contaminación que se encuentra por debajo de la que era anteriormente la Instalación de Uniformes Welch (Sitio) ubicada en el 3505 Pasadena Avenue, Los Ángeles, California. El objetivo del RAW es reducir el riesgo potencial a la salud humana y al medio ambiente y al mismo tiempo abordar la contaminación.

Esta Boleto Informativo proporciona Información sobre:

- Historia y Antecedentes del Sitio
- Por qué la Limpieza es Necesaria
- Plan Propuesto de Limpieza
- Investigaciones Ambientales
- Ley de Calidad del Medio-Ambiental de California (CEQA, por sus siglas en inglés)
- Próximos Pasos

Public Comment Period

El 6 de Septiembre a el 7 de Octubre 2012

Los comentarios por escrito deberán tener el sello postal del 7 de Octubre a más tardar y deberán enviarse a:
Alberto Valmidiano
DTSC
9211 Oakdale Avenue
Chatsworth, California 91311
alberto.valmidiano@dtsc.ca.gov

DTSC

Historial y Antecedentes del Sitio

El dueño actual de la propiedad ubicada en el 3505 Pasadena Avenue, Los Angeles, California (el Sitio), AmeriPride Services Inc., está proponiendo instalar un sistema de extracción de vapor de suelo (SVE, por sus siglas en inglés) para abordar la contaminación de vapor de suelo asociada con los residuos del solvente usado para el lavado en seco en la anterior Instalación de Uniformes Welch.

El consta de un lote baldío ubicado en un área mixta residencial e industrial de Los Angeles, California. . El Sitio tiene linderos al norte con el Canal Arroyo Seco y el Pasadena Freeway (101); al oeste con un derecho de vía ferroviaria; al este con Pasadena Avenue; y al sur con propiedades comerciales.

Actualmente, el Sitio está baldío y no hay edificios en la propiedad. Alrededor del perímetro del Sitio hay una cerca metálica eslabonada y hay un muro de contención de 10 pies de altura a lo largo del lindero noreste del Sitio. Cuatro transformadores eléctricos montados en postes se encuentran en el centro del Sitio. El equipo de medición del gas y agua se encuentra cerca del portón este, y hay un área pavimentada con asfalto de 6,000 pies cuadrados en la porción sureste del Sitio.

El Sitio fue antiguamente una lavenderia comercial del lino y de ropa y servicio de entregas que se estableció alrededor de 1920 y estuvo en operaciones hasta aproximadamente 1988. En 1993, se removieron todos los edificios asociados con la función anterior.

No existen, actualmente, planes de reurbanización para esta propiedad, pero los usos en el futuro pueden incluir proyectos comerciales o industriales.

Investigaciones Ambientales

Se detectó por primera vez el tetracloroeteno (PCE, por sus siglas en ingles) en 1988, cuando concluyeron las perforaciones del suelo y los pozos de extracción de vapor en el Sitio. Esfuerzos subsiguientes de investigación han incluido la recolección de muestras de suelo y de vapor de suelo de numerosas ubicaciones alrededor del sitio, así como la instalación y monitoreo de 14 pozos de monitoreo activos ubicados dentro y fuero del Sitio y 7 puntos de monitoreo de vapor activos en el Sitio. Los pozos de monitoreo y los puntos de vapor de suelo se muestrean y analizan semi-anualmente. Desde el 2007, el Departamento de Control de Sustancias Tóxicas de California ha estado supervisando la investigación, el monitoreo y los esfuerzos de la investigación,el monitoreo y la limpieza del Sitio.

En el 2007, el propietario del Sitio, AmeriPride Services Inc., celebró un acuerdo voluntario con el DTSC para sanear el Sitio y para presentar documentos de planeación y monitoreo al DTSC para su revisión y aprobación.

Por que la Limpieza es Necesaria

El Sitio se encuentra ubicado en un área mixta residencial e industrial de Los Angeles, California. . El Sitio tiene linderos al norte con el Canal Arroyo Seco y el Pasadena Freeway (101); al oeste con un derecho de vía ferroviaria; al este con Pasadena Avenue; y al sur con propiedades comerciales.

Los registros históricos indican que se almacenaron y manejaron en esta instalación, materiales peligrosos, incluyendo solventes para limpieza basados en los hidrocarburos de petróleo, que se usan en el proceso de lavado en seco. Investigaciones previas revelaron la presencia de PCE y de tricloroeteno (TCE) por debajo del Sitio. El PCE se degrada de forma natural en el medio ambiente a TCE; por lo tanto, el TCE que se encuentra presente es probablemente un producto de la degradación del PCE. La exposición a altos niveles de PCE y TCE en el aire en interiores, puede tener como resultado un aumento en el riesgo de cáncer cuando éstos se respiran continuamente por periodos largos de tiempo (generalmente más de 20 años). Las actividades

de limpieza ambiental en el Sitio son necesarias para proteger la salud del público y del medio ambiente.

Plan Propuesto de Limpieza

La extracción de vapor de suelo (SVE, por sus siglas en ingles) es el método propuesto para limpiar el PCE y TCE que se han detectado en los suelos y el gas de suelo por debajo del Sitio. La SVE es una tecnología probada para tratar la contaminación por compuestos volátiles. La SVE se logrará con la instalación de un sistema de extracción de vapor (SVES, por sus siglas en ingles). El SVES incluye la instalación de pozos de extracción del vapor de suelo, el vapor extraído será tratado con carbono activado granular, antes de liberar el gas a la atmósfera. Se monitoreará el SVES para asegurar que el gas que sea liberado a la atmósfera sea tratado exitosamente y que cumpla con las normas y los estándares del Distrito de Manejo de la Calidad de Aire de la Costa Sur. (SCAQMD, por sus siglas en inglés). Bajo la supervisión del DTSC, Ameripride Services Inc. propone instalar un sistema SVE para limpiar el Sitio.

Es probable que el sistema SVE esté en operaciones hasta que se cumplan con las metas de limpieza. El cálculo inicial de tiempo para tratar la contaminación es de aproximadamente 12 a 24 meses. El sistema estará operando hasta que se logren niveles que ya no representen un riesgo significativo.

Ley de Calidad Ambiental de California

De conformidad con la Ley de Calidad Ambiental de California, (CEQA, por sus siglas en inglés), el DTSC deberá evaluar si las acciones propuestas pueden tener algún impacto significativo en la salud humana y en el medio ambiente.

Como parte de la evaluación, el DTSC ha propuesto un Aviso de Exención, el cual indica que el Plan de Trabajo para las Acciones de Remoción no tendrá como resultado un efecto negativo significativo en la salud humana ni en el medio ambiente.

Próximos Pasos

Al concluir el Período para Comentarios del Público, el DTSC revisará y tomará en cuenta todo comentario del público y tomará una decisión final en torno al Plan de Trabajo para las Acciones de Remoción. Se enviará por correo una Respuesta a los Comentarios a toda persona que haya hecho algún comentario y que proporcione su nombre y dirección. Se guardará en los Depósitos de Información enlistados en esta hoja de datos una copia de la Respuesta a los Comentarios.

Una vez que se apruebe el Plan, se construirá el sistema y es probable que empiece el trabajo en el otoño del 2012.

Dónde Encontrar Documentos Sobre el Proyecto

El RAW y otros documentos relacionados están disponibles para revisión por parte del público en los depósitos de información que se enlistan a continuación. El Registro Administrativo está disponible en su totalidad en la Oficina del DTSC de Chatsworth.

Sucursal Lincoln Heights de la
Biblioteca Pública de Los Ángeles
2530 Workmen Street
Los Angeles, California 90031
Teléfono: (323) 226-1692

Departamento de Control de Sustancias Tóxicas
Oficina de Registros Regionales
9211 Oakdale Avenue
Chatsworth, California 91311
Teléfono: (818) 717-6521

Las copias de los reportes técnicos clave, las hojas de datos y otra información relacionada al Sitio también están disponibles en línea en el portal de internet del DTSC: www.envirostor.dtsc.ca.gov/public

Todos los documentos que el DTSC ha puesto a disposición del público pueden estar también disponibles en un formato alterno (i.e. Braille, letra grande, etc.) o en otro idioma, según sea apropiado, de conformidad con las leyes estatales y federales. Favor de comunicarse con Zenzi Poindexter para recibir ayuda.

Con Quien Comunicarse para Recibir Mayor Informacion
Para mayor información sobre el borrador del Plan de Limpieza o para que se le agregue a la lista de correo, favor de comunicarse con alguno de los siguientes representantes del DTSC:

Alberto Valmidiano
Gerente del Proyecto del DTSC
9211 Oakdale Avenue
Chatsworth, California 91311
Teléfono: (818) 717-6611

1.0 INTRODUCTION

1.1 PURPOSE

Burns & McDonnell Engineering Company, Inc. (Burns & McDonnell), on behalf of AmeriPride Services Inc. (AmeriPride), has prepared this *First Semi-Annual 2016 Groundwater and Soil Vapor Monitoring Report* (Report). This Report summarizes the groundwater and soil vapor monitoring activities conducted in association with the Former Welch's Uniform Facility located at 3505 Pasadena Avenue, Los Angeles, California (Site). The Site is associated with the Department of Toxic Substances Control (DTSC) CalStars Site Code 301314.

The soil vapor extraction (SVE) system at the Site was installed as part of the implementation of the Removal Action Work Plan (RAW) approved in correspondence by the California DTSC on October 18, 2012. The RAW was prepared in accordance with a Voluntary Cleanup Agreement executed between the DTSC and AmeriPride on June 17, 2007 (Docket No. HSA-VCA 06/07-204). The SVE system, which extracted contaminant vapors from eleven SVE wells at the Site, was in operation from December 6, 2013, until July 17, 2015. The extracted vapors were treated and discharged to the atmosphere under South Coast Air Quality Management District (SCAQMD) Permit No. G27490 dated October 1, 2013.

1.2 REPORT STRUCTURE

This Report includes a discussion of 2016 semi-annual groundwater and soil vapor sampling activities. Specific components include:

- **Section 1.0 Introduction** provides an overview and description of the purpose and scope of the Report.
- **Section 2.0 Background** includes a brief Site description and a presentation of physical characteristics of the Site.
- **Section 3.0 Summary of Field Activities** includes a discussion of sampling activities and summarizes the SVE system operation history.
- **Section 4.0 Monitoring Results** presents analytical results from the semi-annual groundwater monitoring and vapor sampling.
- **Section 5.0 Natural Attenuation** includes a discussion of the analytical results and evaluation of natural attenuation.
- **Section 6.0 Recommendations and Conclusions** presents recommendations for future actions and a summary of key actions for the Site.

2.0 BACKGROUND

2.1 SITE DESCRIPTION

The Site is located at 3505 Pasadena Avenue, Los Angeles, California at latitude and longitude coordinates 34º5'9" North and 118º12'48" West, respectively (**Figure 1**).

The Site consists of an approximate 2.6-acre vacant parcel located in a mixed residential and industrial area of Los Angeles, California. The Site is bordered on the north by the Arroyo Seco Channel and the Pasadena Freeway (Interstate-110); on the west by a railroad right-of-way; on the east by Pasadena Avenue; and on the south by commercial properties. The Site is surrounded by a chain-link fence around the perimeter, with a retaining wall in the northeast corner of the Site boundary. Four pole-mounted electrical transformers are located in the center of the Site. Gas and water metering equipment are located near the east gate, and a 6,000 square foot area of asphalt pavement is located in the southeast portion of the Site. The SVE system and associated equipment are located within a 1,400 square foot fenced area in the northeast portion of the Site. The Site contains eleven SVE wells, fourteen operable groundwater monitoring wells, and eight soil vapor monitoring points (SVP) (each nested with sampling points at four discreet depths). Additionally, there are four operable groundwater monitoring wells located off-site. Site features, including the SVE system and well locations, are depicted on **Figure 2**.

There are four designated Areas-of-Concern (AOC) at the Site which relate to former site building locations and facility operations, described as follows:

- **AOC#1**: AOC#1 is a former motor vehicle fueling area, located in the east-central portion of the Site.
- **AOC#2**: AOC#2 is a former dry cleaning area and cleaning solvent storage area located on the northeast portion of the Site.
- **AOC#3**: AOC#3 is a former driveway area located on the northwest portion of the Site and west of AOC#2.
- **AOC#4**: AOC#4 is located in the southwest corner of the Site.

The AOCs at the Site are shown on **Figures 2, 3, 4, 6 and 7**. As discussed in the *Removal Action Work Plan* dated October 8, 2012, active remediation was necessary only in AOC#2.

2.2 GEOLOGY AND HYDROGEOLOGY

The elevation of the Site is approximately 366 feet above mean sea level. Topography of the site is relatively level with a slight slope to the west.

The Site is located at the west end of the Repetto Hills near the confluence of the Arroyo Seco Channel and the Los Angeles River. The sediments that underlie the Site have been identified at Quaternary alluvial stream channel deposits consisting of unconsolidated silts, sands, and gravels. Soils encountered in borings and excavations associated with the Site consist of gravels and fine to coarse-grained sand. Coarse gravel and cobbles have been encountered during excavation in the upper two feet of soils in the northeast portion of the Site. The sedimentary bedrock that underlies the Site is Puente Formation sandstone and is present at approximately 83 feet below ground surface (bgs).

Previous subsurface investigations at the Site indicate that the water table is present at approximately 35 feet bgs. The local groundwater gradient at the Site has consistently been to the southwest as depicted on **Figure 3**.

* * * * *

3.0 SUMMARY OF FIELD ACTIVITIES

3.1 GROUNDWATER SAMPLING

There are eighteen groundwater monitoring wells associated with the Site (**Table 1A**). The groundwater monitoring wells are generally completed at two horizons. The groundwater monitoring wells screened in the shallow horizon are completed at depths ranging from 45 to 70 feet bgs. The groundwater monitoring wells screened in the deep groundwater horizon are completed at depths ranging from 89 to 93 feet bgs.

The First Semi-Annual 2016 groundwater sampling activities were completed on March 15 and 16, 2016. Groundwater elevations (**Table 2**) were measured in 17 monitoring wells and groundwater samples (**Table 3**) were collected from 15 monitoring wells. The groundwater elevation was unable to be measured at MW-8A due to the well being covered by asphalt. The monitoring wells were purged using a 2-inch submersible Grundfos pump using dedicated tubing. Groundwater samples were collected after water quality parameters stabilized and a minimum of three well volumes were purged. Field parameters are summarized in **Table 4**. After purging, groundwater samples were collected with new disposable bailers and transferred to laboratory-supplied sampling vessels. All groundwater samples were analyzed for volatile organic compounds (VOCs) by United States Environmental Protection Agency (US EPA) Method 8260B by Eurofins Calscience, Inc. (Eurofins), a California State Certified laboratory. Groundwater analytical results are summarized in **Table 5** and historical Natural Attenuation parameters are summarized in **Table 6**. Analytical Reports and are provided in **Appendix A**. Groundwater field logs are provided in **Appendix B.**

Purge water from groundwater monitoring wells and decontamination fluids were temporarily stored in two polyethylene tanks located in the secured parking area of the Site; pending off-site disposal at Inviro-Tech Disposal located in Lincoln, California (**Appendix C**).

3.2 SOIL VAPOR POINT SAMPLING

There are eight SVP clusters at the Site, with screens set at depths of 5, 10, 20, and 30 feet bgs at each point (**Table 1B**). Five of the soil vapor monitoring points are associated with the SVE system's rebound testing: VP-1, VP-3, VP-4R, VP-5 and VP-6. These five SVP's were sampled on January 18 and 19, 2016, as part of the six month after SVE shutdown rebound testing at the Site. Refer to **Sections 3.4, 4.2, and 6.0** for additional information regarding the SVE rebound testing events. The SVP clusters were purged, sampled, and analyzed on-Site for VOCs by US EPA Method TO-15. Soil vapor analytical results are listed in **Table 7**. The SVPs were purged at least five volumes of the SVP tubing prior to sample collection. Analytical Reports are provided in **Appendix A**. Soil vapor results in the analytical

reports are documented in micrograms per Liter (µg/L) while this report discusses soil vapor results in micrograms per cubic meter (µg/m^3).

3.3 SOIL VAPOR EXTRACTION WELL SAMPLING

There are eleven SVE wells at the Site. Each SVE well contains a 10-foot screen set between approximately 20 and 30 feet bgs (**Table 1B**). The eleven SVE wells are connected to the SVE system via underground polyvinylchloride (PVC) piping, and SVE well sampling is conducted at the SVE system's manifold using ¼ -inch Teflon tubing, Swagelok fittings and vacuum canisters. Sampling of the SVE wells (SVE-1 through SVE-11) was not conducted during the First Semi-Annual 2016 sampling event due to the SVE system being shut down since July 2015 for rebound testing. Additional details regarding the shutdown and rebound testing are included in **Sections 3.4, 4.2, and 6.0**. Historical soil vapor analytical results are presented in **Table 7**.

3.4 SVE SYSTEM OPERATIONS AND SAMPLING

The SVE system was installed during November and December 2013 and began continuous operation on December 6, 2013. The SVE system extracts contaminant vapors from eleven SVE wells at the Site using a 20-horsepower positive displacement blower. The eleven wells are connected to the system via 3-inch PVC piping. The extracted vapors from each point are combined at the system's intake manifold prior to passing through a vapor liquid separator to recover condensate entrained in the vapor stream. SVE emissions are treated using two 3,000 pound vapor-phase granular activated carbon (GAC) adsorbers, operated in series, prior to discharge to the atmosphere via a 15-foot exhaust stack. The vapor extracted from the SVE system is treated and discharged to the atmosphere under SCAQMD Permit to Construct/Operate No. G27490, dated October 1, 2013. A process and instrumentation diagram of the SVE system is included as **Figure 5**.

Due to the significant decrease in SVE mass removal rates and soil gas concentrations at the Site, the SVE system was shut down to conduct rebound testing. The testing is being conducted to assess soil gas concentrations in the soil vapor monitoring points without the SVE system operating in order to monitor potential rebound and evaluate the SVE system for permanent shutdown. As outlined in the *Calculation of Site-Specific Soil Gas Cleanup Goals* letter, and per phone conversation with the DTSC on July 16, 2015, the SVE system was shut down for rebound testing on July 17, 2015. Additional details regarding the shutdown and rebound testing are discussed in **Sections 4.2 and 6.0**.

While the system was in operation, photoionization detector (PID) readings were taken from each of the eleven extraction points in order to provide an indication of the relative concentration of contaminants in the vapor being extracted from each point. The flow rates at the eleven extraction points were set to maximize air flow from the SVE wells with the highest concentrations in order to maximize mass removal. Historical operational data collected from the SVE system, including vacuum readings at the manifold and wellheads, PID readings, temperatures, and flow rates, is summarized in **Table 8**. **Table 9** summarizes the operational history of the SVE system.

Prior to the SVE system shut down on July 17, 2015 for rebound testing, soil vapor samples were collected from three locations within the SVE system in order to obtain emissions data to calculate contaminant mass removal and to maintain compliance with the SCAQMD Permit to Construct/Operate. While in operation, soil vapor samples were collected on a monthly basis from the SVE system's combined influent, between the GAC adsorbers, and at the SVE system's stack effluent (**Figure 5**). Historical analytical data from these three sample locations are shown on **Table 10, Table 11, and Table 12,** respectively.

*** * * * ***

4.0 MONITORING RESULTS

4.1 GROUNDWATER SAMPLING RESULTS

As described previously in **Section 2.2**, there are four designated AOCs at the Site (**Figure 2**) which relate to former site building locations and facility operations. The AOCs are defined as follows: AOC#1 – Former Motor Vehicle Fueling Area; AOC#2 – Former Dry Cleaning Area; AOC#3 – Former Driveway Area: and AOC#4 – Southwest Corner of Site. The sections below discuss detections in groundwater by AOC.

Groundwater elevations, water quality parameters, and analytical results are summarized in **Tables 2, 4, and 5**, respectively. March 2016 groundwater contours are depicted on **Figure 3**, and VOC concentrations from the March 2016 sampling event are shown on **Figure 4.** Groundwater concentration trend graphs/hydrographs are provided in **Appendix D**. A summary of the March 2016 groundwater elevations and groundwater analytical results is provided below:

Summary of Groundwater Elevations and Analytical Results

Groundwater depths ranged from:	36.27 ft. (MW-16C) to 42.91 ft. (MW-13B) below top of well casing
Groundwater elevations ranged from:	329.12 ft. (MW-3) to 314.34 ft. (MW-15) above mean sea level
Groundwater Direction and Gradient	Southwest, 0.01
Highest PCE concentration (observed in):	12 micrograms per liter (µg/L) (MW-16A)
Highest TCE concentration (observed in):	4.3 µg/L (MW-16A)
Highest cis-1,2-DCE concentration (observed in):	13 µg/L (MW-10A)
Highest trans-1,2-DCE concentration (observed in):	All samples below the laboratory detection limits

PCE = tetrachloroethene

TCE = trichloroethene

cis-1,2-DCE = cis-1,2-dichloroethene

trans-1,2-DCE = trans-1,2-dichloroethene

4.1.1 Groundwater Sampling Results in AOC#1

The one groundwater well located within AOC#1 (K-1) was sampled in March 2016. K-1 is screened in the shallow groundwater horizon. In March 2016, no VOCs were detected above the laboratory method detection limits (MDLs) at K-1 with the exception of PCE with a concentration of 1.1 µg/L. The PCE

concentration has generally decreased in monitoring well K-1; from 187 µg/L in 1998 to below the California EPA maximum contaminant level (MCL) of <5.0 µg/L since March 2013.

4.1.2 Groundwater Sampling Results in AOC#2

The one groundwater well located within AOC#2 (MW-3) was sampled in March 2016. MW-3 is screened in the shallow groundwater horizon. At MW-3, PCE was detected at 7.4 µg/L in March 2016. The PCE concentration at MW-3 has decreased from a historical high of 5,100 µg/L in 2005. TCE, which had a historical high concentration of 180 µg/L in 2001, has been below the MDL of <1.0 µg/L for the past five consecutive sampling events. The cis-1,2-DCE and trans-1,2-DCE concentrations at MW-3 have also been below the MDL of <1.0 µg/L for the past five consecutive sampling events.

4.1.3 Groundwater Sampling Results in AOC#3

The four groundwater wells located within AOC#3 (MW-11, MW-16A, MW-16B, and MW-16C) were sampled in March 2016. In addition, MW-12, located approximately 30 feet west of AOC#3, was sampled in March 2016. Wells MW-11, MW-16A, MW-16B and MW-12 are screened in the shallow groundwater horizon, while MW-16C is screened in the deeper groundwater horizon.

Overall VOC concentrations in the wells of AOC#3 are trending downward. At MW-11, the PCE concentration was 9.3 µg/L in March 2016. The maximum historical PCE concentration at MW-11 was 130 µg/L in 2001. TCE, cis-1,2-DCE, and trans-1,2-DCE concentrations have been below the MDL of <1.0 µg/L at MW-11 since March 2014.

At MW-16A, the PCE concentration was 12 µg/L during both the March 2015 and March 2016 sampling events. The TCE and cis-1,2-DCE concentrations at MW-16A in March 2016 decreased compared to the March 2015 concentrations. At MW-16B, PCE was detected with a concentration of 2.5 µg/L and TCE was detected with a concentrations of 1.5 µg/L, which were both below the California EPA MCLs of 5.0 µg/L. The cis-1,2-DCE concentration at MW-16B has been below the MDL of <1.0 µg/L for the past two sampling events. No VOCs were detected at MW-16C in March 2016. VOCs have been below the MDL of <1.0 µg/L since March 2013.

At MW-12, the PCE and TCE concentrations in March 2016 were 7.8 µg/L and 4.2 µg/L, respectively, which is an overall decrease compared to a historical high PCE concentration of 610 µg/L and a TCE concentration of 1,900 µg/L in 2005. The cis-1,2-DCE concentration at MW-12 in March 2016 was 2.0

µg/L, which is the lowest detection at that well to date. The trans-1,2-DCE concentration at MW-12 was below the MDL of <1.0 µg/L for the fourth consecutive sampling event.

4.1.4 Groundwater Sampling Results in AOC#4

AOC#4 is located in the southwest corner of the property and is down-gradient of the source area. The source area is the location of the former underground storage tanks in the vicinity of AOC#1, AOC#2 and AOC#3. Groundwater wells MW-10A and MW-10B are located to the east of AOC#4, and were sampled in March 2016. MW-10A is screened in the shallow groundwater horizon, and MW-10B is screened in the deeper groundwater horizon.

PCE has decreased in MW-10A from 306 µg/L in 1998 to 3.5 µg/L in the March 2016 sampling event. The PCE concentration at MW-10A has been below the California EPA MCLs of 5.0 µg/L for the past four consecutive sampling events. TCE has decreased in MW-10A from 463 µg/L in 1998 to 2.9 µg/L in March 2016. Cis-1,2-DCE has decreased in MW-10A from 1,680 µg/L in 1998 to 13 µg/L in March 2016. PCE has decreased in MW-10B from 70 µg/L in 1998 to below the MDL of <1.0 µg/L in March 2016. The PCE concentration has been below the MDL of <1.0 µg/L at MW-10B since November 2013. TCE has decreased from 47 µg/L in 1999 to below the MDL of <1.0 µg/L in March 2016, which is the lowest detection of TCE in MW-10B to date.

4.2 SOIL VAPOR POINT SAMPLING RESULTS

In March 2015, the *Calculation of Site-Specific Soil Gas Cleanup Goals* letter was submitted to the DTSC. In the letter, soil gas cleanup goals for the SVE system were proposed that would result in concentrations with no unacceptable risk from long term exposure. The site-specific cleanup goals were calculated in general accordance with the DTSC's *Final Guidance for the Evaluation and Mitigation of Subsurface Vapor Intrusion to Indoor Air,* dated October 2011, and the DTSC's March 2014 *Screening-Level Model for Soil Gas Contamination.* The site-specific soil gas cleanup goals for PCE, TCE, cis-1,2-DCE, and vinyl chloride were calculated for each of the monitoring depths of 5, 10, 20, and 30 feet bgs, and are presented as follows:

Summary of Acceptable Risk-Based Soil Gas Concentrations

	5 feet bgs	10 feet bgs	20 feet bgs	30 feet bgs
PCE	42,000 µg/m³	70,000 µg/m³	125,000 µg/m³	180,000 µg/m³
TCE	15,000 µg/m³	23,000 µg/m³	40,000 µg/m³	57,000 µg/m³

Cis-1,2-DCE	47,000 µg/m³	70,000 µg/m³	116,000 µg/m³	163,000 µg/m³
Vinyl Chloride	2,200 µg/m³	3,200 µg/m³	5,100 µg/m³	7,100 µg/m³

The soil gas cleanup goal concentrations were conservatively calculated using California-specific toxicity values, as well as conservative default model parameters for soil type, building dimensions, and exposure scenarios. Prior to operation of the SVE system, PCE was detected at concentrations ranging up to 3,000,000 µg/m^3 in VP-1-30 in 2011. However, since operation of the SVE began in December 2013, VOC concentrations have remained below the proposed risk-based soil gas concentrations presented above. The historical soil vapor analytical data for the Site compared to the proposed soil gas cleanup goals are presented in **Table 7**.

As outlined in the *Calculation of Site-Specific Soil Gas Cleanup Goals* letter, and per phone conversation with the DTSC on July 16, 2015, the SVE system was shut down for rebound testing on July 17, 2015. In September 2015, the *SVE System Rebound Testing Work Plan* letter was submitted to the DTSC in order to provide additional details regarding the soil vapor rebound testing at the Site. Shutting down the system for rebound testing is intended to assess soil gas concentrations in the soil vapor monitoring points without the SVE system operating in order to monitor potential rebound and evaluate the SVE system for permanent shutdown. The five soil vapor monitoring points associated with the SVE system's rebound testing are VP-1, VP-3, VP-4R, VP-5, and VP-6.

The first soil gas rebound test occurred in October 2015 (three months after the SVE system's shutdown) to coincide with the Site's Second Semi-Annual 2015 sampling event, and the second soil gas rebound test occurred on January 18 and 19, 2016, six months after the SVE system was shut down. All soil gas concentrations observed during the rebound testing period were below the soil gas cleanup goals, with little to no rebound in concentration. Therefore, since the proposed target cleanup goals were still being met six months after shutdown, the remaining cumulative cancer risk and hazard index risk for the chemicals of potential concern (COPCs) were evaluated and determined to be below the target cancer risk and noncancer hazard limits. For additional information regarding this evaluation and request for SVE decommissioning and Site closure, refer to the *Request for NFA of the SVE System and Site Closure*, dated April 20, 2016.

The sections below discuss detections in soil vapor by AOC (which are described in **Section 2.2**) for the six month after shutdown rebound testing event that occurred in January 2016 at VP-1, VP-3, VP-4R, VP-5, and VP-6. The analytical results for VOCs in soil vapor at 5 feet, 10 feet, 20 feet and 30 feet are

summarized in **Table 7** and **Figure 6**. Soil vapor concentration trend graphs are provided in **Appendix E**. A summary of the January 2016 soil vapor analytical results is provided below:

Summary of Soil Vapor Sampling Results

Highest PCE concentration (observed in):	47,000 µg/m^3 (VP-1-30)
Highest TCE concentration (observed in):	6,200 µg/m^3 (VP-3-30)
Highest cis-1,2-DCE concentration (observed in):	70,000 µg/m^3 (VP-3-30)
Highest trans-1,2-DCE concentration (observed in):	All samples below the laboratory detection limits

Note: The Vapor Point naming convention includes the depth in feet. Example: "VP-1-30 (Vapor Point One at Thirty Feet)"

4.2.1 Soil Vapor Point Sampling Results in AOC#1

There is one SVP well cluster (VP-6) located within AOC#1 with wells screened at 5, 10, 20, and 30 feet bgs. In January 2016, PCE was detected at all depths in VP-6 with concentrations ranging from 270 µg/m^3 in VP-6-5 to 2,200 µg/m^3 in VP-6-20. PCE concentrations decreased at the 5, 10, and 30 foot depths compared to the October 2015 sampling event when concentrations at VP-6 ranged from 510 µg/m^3 at VP-6-5 to 2,200 µg/m^3 at VP-6-30. Prior to the operation of the SVE system, the highest historical detection of PCE in VP-6 was 91,000 µg/m^3 in VP-6-30 in 2008. The highest historical detection of TCE at VP-6 was 9,200 µg/m^3 in VP-6-30 in 2008. In January 2016, TCE was detected at the 20 and 30 foot depths with concentrations of 150 µg/m^3 and 160 µg/m^3, respectively. The TCE concentration at VP-6-5 was below the MDL of <80 µg/m^3 for the fifth consecutive sampling event.

4.2.2 Soil Vapor Point Sampling Results in AOC#2

SVP well clusters VP-1, VP-3, VP-4R are located in AOC#2, with wells screened at 5, 10, 20, and 30 feet bgs at each point. Historically, the highest PCE soil vapor concentrations at the Site have been observed at VP-1. Prior to operation of the SVE system, the highest historical detection of PCE in VP-1 was 3,000,000 µg/m^3 in VP-1-30 in 2011. In January 2016, PCE was detected at all depths in VP-1 with concentrations ranging from 5,300 µg/m^3 in VP-1-5 to 47,000 µg/m^3 in VP-1-30. Although PCE concentrations increased slightly at the 5, 10, and 30 foot depths in January 2016 compared to the October 2015 sampling event, the concentrations at VP-1 were still well below the soil gas cleanup goals. In January 2016, TCE was detected at all depths in VP-1 with concentrations ranging from 80 µg/m^3 in VP-1-5 to 410 µg/m^3 in VP-1-30. The highest historical detection of TCE in VP-1 was 110,000 µg/m^3 in VP-1-30 in 2008.

In January 2016, PCE was detected at all depths in VP-3 with concentrations ranging from 280 µg/m^3 at VP-3-5 to 16,000 µg/m^3 at VP-3-30. Although PCE concentrations increased slightly at each depth in January 2016 compared to the October 2015 sampling event, the concentrations at VP-3 were still well below the soil gas cleanup goals. Prior to the operation of the SVE system, the highest historical detection of PCE in VP-3 was 170,000 µg/m^3 in VP-3-20 in 2011. In January 2016, TCE was detected at the 10, 20, and 30 foot depths with concentrations of 160 µg/m^3, 1,800 µg/m^3, and 6,200 µg/m^3, respectively. The highest historical detection of TCE in VP-3 was 60,000 µg/m^3 in VP-3-30 in 2011. Cis-1,2-DCE was detected at VP-3-20 with a concentration of 670 µg/m^3, and also at VP-3-30 with a concentration of 70,000 µg/m^3, which was the highest cis-1,2-DCE concentration detected during the January 2016 sampling event (although still well below the soil gas cleanup goal).

When VP-4R was installed in October 2013, PCE concentrations ranged from 41,000 µg/m^3 in VP-4R-5 to 280,000 µg/m^3 in VP-4R-30, and TCE concentrations ranged from 1,400 µg/m^3 in VP-4R-5 to 38,000 µg/m^3 in VP-4R-30. In January 2016, PCE concentrations ranged from 490 µg/m^3 in VP-4R-5 to 7,100 µg/m^3 in VP-4R-30. TCE concentrations were observed at VP-4R-20 and VP-4R-30 in January 2016 with concentrations of 190 µg/m^3 and 170 µg/m^3, respectively.

4.2.3 Soil Vapor Point Sampling Results in AOC#3

SVP well clusters VP-2 and VP-5 are located in AOC#3 with wells intervals at 5, 10, 20, and 30 feet bgs. VP-5 was sampled in January 2016 as part of the soil gas rebound testing event. PCE was detected at all depths in VP-5 with concentrations ranging from 320 µg/m^3 in VP-5-5 to 1,500 µg/m^3 in VP-5-30. PCE concentrations decreased at the 5 and 20 foot depths compared to the October 2015 sampling event when concentrations ranged from 400 µg/m^3 in VP-5-5 to 1,300 µg/m^3 in VP-5-20. Prior to the operation of the SVE system, the highest historical detection of PCE at VP-5 was 36,000 µg/m^3 in VP-5-20 in 2011. In January 2016, TCE was detected at the 20 and 30 foot depths with concentrations of 250 µg/m^3 and 290 µg/m^3, respectively. Prior to operation of the SVE system, the highest historical detection of TCE in VP-5 was 35,000 µg/m^3 in VP-5-20 in 2011.

4.2.4 Soil Vapor Point Sampling Results in AOC#4

SVP well cluster VP-7, the only SVP within AOC#4, has wells screened at 5, 10, 20, and 30 feet bgs. VP-7 was not sampled in January 2016 as part of the soil gas rebound testing event. In October 2015, PCE concentrations at VP-7 ranged from 2,600 µg/m^3 in VP-7-10 to 3,400 µg/m^3 in VP-7-30.

4.3 SOIL VAPOR EXTRACTION WELL SAMPLING RESULTS

SVE-1 through SVE-11 were installed in October 2013 as part of the SVE system installation. Each extraction well contains 10-foot screens set between approximately 20 and 30 feet bgs. SVE-1 through SVE-7 are located within the general area of AOC#2, SVE-8 and SVE-10 are located within the general area of AOC#1, and SVE-9 and SVE-11 are located within the general area of AOC#3. As discussed previously in **Section 3.3**, the eleven SVE wells were not sampled due to the SVE system being shut down since July 2015 for rebound testing. Historical analytical results for VOCs in soil vapor are summarized in **Table 7**.

4.4 SVE SYSTEM OPERATIONAL AND SAMPLING RESULTS

Since startup of the SVE system in December 2013, concentrations observed at several of the SVE wells have decreased significantly. While the SVE system was operating, the flow rates at the extraction points were set to maximize air flow from the SVE points with the highest concentrations in order to maximize mass removal. Prior to shut down for rebound testing on July 17, 2015, the SVE system had been operating by monthly cycling of the SVE points between two separate sets of SVE points since November 2014 in order to further optimize the system's operations and mass removal. Historical operational data from the SVE system is summarized in **Table 8**. **Table 9** summarizes the operational history of the SVE system from startup through the system's shutdown in July 2015.

Prior to shutting down the system for rebound testing, soil vapor samples were collected from the SVE system's combined influent, between the GAC adsorbers, and the SVE systems' stack effluent. Historical analytical data from the SVE system's combined influent, between the two GAC treatment vessels, and the SVE system's stack effluent are summarized in **Tables 10, 11, and 12**, respectively.

The mass of VOCs removed from the subsurface were calculated using the combined influent concentrations, average flow rate, and hours of operation. When the SVE system was initially started for equipment testing procedures in December 2013, the PCE mass removal was approximately 9 to 13 pounds of PCE per day. Prior to shutting down the system for rebound testing, the PCE mass removal rate ranged from approximately 0.16 to 0.23 pounds of PCE per day (**Table 10** and **Figure 8**). Through July 17, 2015, the SVE system removed approximately 195 pounds of PCE and approximately 254 pounds of total VOCs from the subsurface (**Table 10** and **Figure 9**).

*** * * * ***

5.0 NATURAL ATTENUATION

5.1 GROUNDWATER

The water quality parameters, including oxygen reduction potential (ORP) and dissolved oxygen (DO), are summarized in **Table 4**. The historical natural attenuation parameters nitrate, sulfate, ferrous iron and methane are presented in **Table 6**.

The groundwater concentration trend graphs presented in **Appendix D** show a decreasing trend of PCE, TCE, and cis-1,2-DCE concentrations over time in all the monitoring wells with detectable VOC concentrations. This indicates the residual VOC plume in attenuating over time. Biodegradation of PCE can occur under anaerobic conditions via reductive dechlorination sequentially to TCE, cis-1,2-DCE, trans-1,2-DCE, vinyl chloride and finally ethene. Water quality parameters, the concentrations of daughter products, and the ratio of the sum of daughter product concentrations to the concentrations of PCE were used to evaluate biodegradation in the groundwater plume. The DO concentrations measured at onsite wells near the source area, located in the northeast portion of the Site, were generally above 1 mg/L and might indicate that conditions are aerobic and not conducive to reductive dechlorination. However, indications of reductive dechlorination of the PCE plume have been observed down gradient of the source area including low DO concentrations, low or negative ORP readings and elevated daughter product to parent ratios. Historically, MW-9A has exhibited the strongest indications of reductive dechlorination with a DO concentration of 0.77 mg/L and a daughter product to parent ratio of 7.63 when last sampled in March 2016. At MW-9A, the ORP measurement was 33 millivolts (mV) in March 2016, but the historical ORP measurements have been negative. In addition, elevated daughter product to parent ratios have been observed at wells MW-7, MW-10A, MW-12, and MW-16A.

* * * * *

6.0 RECOMMENDATIONS AND CONCLUSIONS

Based on the performance of the soil vapor extraction system and the sampling results to date, the following is recommended or has occurred at the Site:

- As presented in the *Request for NFA of the SVE system and Site Closure* letter dated April 20, 2016, the cumulative COPC cancer risk for all depths was below the target cancer risk of less than or equal to 1 x 10^{-5}, and the cumulative COPC noncancer hazard (hazard index) for all sampling depths is below the target noncancer hazard (hazard index) of less than or equal to 1.0. Therefore, since the remedial action has been met, permanent shutdown and no further action (NFA) of the SVE system was requested, in addition to well decommissioning and Site closure. On June 21, 2016, Burns & McDonnell met with DTSC personnel regarding the NFA and Site Closure request. During the meeting, it was agreed upon that the remedial objective presented in the RAW had been met for commercial/industrial land use and that no further active remediation was needed. It was also agreed that the SVE system could be decommissioned as long as a land use covenant (LUC) is prepared, limiting Site land use to commercial/industrial. The DTSC indicated that they will prepare a letter stating that the SVE system can be decommissioned, provide Burns & McDonnell an example LUC letter, and provide suggestions for future groundwater monitoring at the Site that could be incorporated into a future agreement.
- As discussed above, the DTSC indicated that they are currently preparing a letter stating NFA for the SVE system and that the SVE system can be decommissioned. It is anticipated that the SVE system will be decommissioned and removed from the Site and the soil vapor points abandoned by the end of 2016.
- As stated in previous monitoring reports, it was recommended to abandon and seal MW-2, MW-8A, and MW-9B based on VOC concentrations below the California EPA MCLs for several years. The wells have been removed from the annual monitoring plan, and upon DTSC approval, we will schedule the abandonment. Additional monitoring wells to be abandoned will be discussed depending on the DTSC suggestions regarding the future groundwater monitoring schedule at the Site, and will likely be abandoned during the SVE decommissioning event by the end of 2016. The Second Semi-Annual 2016 groundwater monitoring event is tentatively scheduled for September 2016; however, groundwater monitoring may be changed to an annual basis only, and therefore would not occur until March 2017. The sampling schedule will depend upon the DTSC suggestions regarding the continued groundwater monitoring at the Site.

Notes:

ft msl Feet as referenced to mean sea level

ft bgs Feet below ground surface

Damaged = MW-4 has been lost/destroyed; attempts to relocate the well in 7/08 were unsuccessful.

?? Data Unavailable = K-1 through K-3 were installed by Kleinfelder in 1987 as wells MW-1 through MW-3. A partial report was available for review.

Notes:
E_h = standard reduction potential (calculated from ORP using method recommended by instrument manufacturer)
mV = millivolts
mg/L = milligrams per liter
NTU = nephelometric turbidity units
NM = Not Monitored
NR = No Purge Record
ORP = field measured oxidation-reduction potential (various reference electrodes)
S/M = siemens per meter
ug/cm = Beginning March 2011
Water quality parameters taken inside well with a Horiba U-22 except MW-13A, MW-13B, MW-14, MW-15, K-1 and K-2
* = Dissolved oxygen likely elevated because of air lift techniques
† = Specific conductivity instrument showing an error message
**=Turbidity meter not functioning properly

ABBREVIATIONS / LEGEND:

B: Potential bias error, analyte detected in quality control blank
EPA: Environmental Protection Agency
J: Estimated value
µg/L: Micrograms per liter
MCL: California EPA Maximum Contaminant Level for drinking water August 2015
---: Not analyzed, not available, well lost, destroyed, or abandoned
U: Non-detect at or above method detection limit
VOCs: Volatile organic compounds
BOLD Indicates concentrations at or above listed screening levels
[1]: A Compilation of Water Quality Goals (August 2003 and updates), CalEPA RWQCB - Central Valley
[2]: California Office of Environmental Health Hazard Assessment Public Health Goal
[3]: Well K-3 not purged on 6/29/00 due to low walter level.
[4]: Chloroform, 2013 Tier 1 ESL = 80 ug/L

CF Chloroform
1,1-DCE: 1,1-dichloroethene
c-DCE: cis-1,2-dichloroethene
t-DCE: trans-1,2-dichloroethene
MTBE: Methyl tertiary butyl ether
1,1,1,2-PCA: 1,1,1,2-tetrachloroethane
1,1,2,2-PCA: 1,1,2,2-tetrachloroethane
PCE: Tetrachloroethene
TCE: Trichloroethene
TEPH: Total extractable petroleum hydrocarbons expressed as diesel

Screening Levels for Other VOCs (µg/L)

Methylene chloride = 5 ug/L (MCL)
Vinyl Chloride = 0.5 ug/L (MCL)
1,2-Dichlorobenzene = 600 ug/L (MCL)
1,2,4-Trichlorobenzene = 5 ug/L (MCL)
1,1,1,2-tetrachloroethane = 1.0 ug/L (MCL)

Notes:
DO = Dissolved oxygen
mg/L = milligrams per liter
ORP = Oxidation-reduction potential in millivolts
NA = Not applicable
U = Not detected at or above method detection limit
--- = Not sampled
NR = No Purge Record
Daughter to Parent Ratio = (CF+VC+cisDCE+trans-1,2-DCE+TCE)/(PCE)

1. Nitrate, reported as nitrogen
2. Nitrite, reported as nitrogen
3. ORP and DO were measured in field after purging wells using down hole instrumentation or flow cell

Concentrations in bold print are above the proposed risk-based soil gas cleanup goals.
(Refer to *Calculation of Site-Specific Soil Gas Cleanup Goals* letter, dated February 26, 2015)

Notes:

*	Elevated vacumm encountered during sampling.
µg/m^3:	Micrograms per cubic meter
---:	Well not sampled due to damage or vacuum
U:	Non-detect at or below method detection limit for samples
E:	The concentration indicated for this anlayte is an estimated value above the calibration range of the instrument.
ft bgs:	Feet below ground surface
NE:	Not Established
R	Replacement vapor point
Concentration Units:	Laboratory analytical results were published in units of µg/L. Values on Table 4 have been converted to units of µg/m3.

Notes:

Cycle 1 of SVE Points Operating

Cycle 2 of SVE Points Operating

°F - degrees Fahrenheit

"H_2O - inches of water column

"Hg - inches of mercury

scfm - standard cubic feet per minute

Likely erroneous value

Field Tech indicated that moisture filter was getting older and these results may have been due to moisture

PID reading after primary vessel greater than 13.4 ppmv (as hexane) and efficiency less than 90%.

Samples were collected and system was shut down immediately pending GAC changeout.

TABLE 9
SVE SYSTEM: OPERATIONS LOG
AmeriPride Services Inc.
3505 N. Pasadena Ave., Los Angeles, CA
Burns & McDonnell Project No. 89698

Date	Pacific Time	SVE System Operations and Notes	SVE Points in Operation	SVE System Total Hours of Operation
12/6/2013	1:15 PM	The SVE system begins continous operation after completion of various system equipment testing.	SVE-1 through SVE-11	0
12/12/2013	6:30 PM	Grab samples collected from the Combined Influent, Between GAC Adsorbers, and Stack Effluent. Vapor samples submitted for laboratory analysis of EPA Method TO-3 and TO-15.	SVE-1 through SVE-11	143
12/12/2013 to 12/20/2013	---	The SVE system was shutdown for maintenance.	SVE-1 through SVE-11	193
12/24/2013 to 12/31/2013	---	The SVE system was shutdown for maintenance.	SVE-1 through SVE-11	298
1/10/2014	2:45 PM	Grab samples collected from the Combined Influent, Between GAC Adsorbers, and Stack Effluent. Vapor samples submitted for laboratory analysis of EPA Method TO-3 and TO-15.	SVE-1 through SVE-11	535
2/7/2014	1:10 PM	Grab samples collected from the Combined Influent, Between GAC Adsorbers, and Stack Effluent. Vapor samples submitted for laboratory analysis of EPA Method TO-3 and TO-15.	SVE-1 through SVE-11	1202
2/14/2014 to 2/27/2014	---	The SVE system was shutdown pending a GAC changeout on the primary GAC adsorber. A GAC changeout was completed on Vessel A on February 27, 2014.	SVE-1 through SVE-11	1364
3/10/2014	5:30 PM	Grab samples collected from the Combined Influent, Between GAC Adsorbers, and Stack Effluent. Vapor samples submitted for laboratory analysis of EPA Method TO-3 and TO-15. Grab samples also collected from the individual SVE points (SVE-1 through 11) at the manifold and submitted for laboratory analysis of EPA Method TO-15.	SVE-1 through SVE-11	1630
4/1/2014	7:34 PM	Grab samples collected from the Combined Influent, Between GAC Adsorbers, and Stack Effluent. Vapor samples submitted for laboratory analysis of EPA Method TO-3 and TO-15.	SVE-1 through SVE-11	2159
4/2/2014 to 4/11/2014	---	The SVE system was shutdown for maintenance.	SVE-1 through SVE-11	2178
4/24/2014 to 5/9/2014	---	The SVE system was shutdown for maintenance (replacement of fuses and TVSS).	SVE-1 through SVE-11	2477
5/9/2014	12:10 PM	Grab samples collected from the Combined Influent, Between GAC Adsorbers, and Stack Effluent. Vapor samples submitted for laboratory analysis of EPA Method TO-3 and TO-15.	SVE-1 through SVE-11	2477
5/24/2014 to 5/27/2014	---	The SVE system shutdown due to a power outage.	SVE-1 through SVE-11	2836
6/4/2014	12:00 PM	SVE-1, SVE-2, SVE-5, and SVE-7 were closed at the manifold due to wellheads being either damaged or covered when the Site was cleared of grass/weeds by the City of Los Angeles.	SVE-3, SVE-4, SVE-6, and SVE-8 through SVE-11	3098
6/11/2014	2:24 PM	SVE-2, SVE-5, and SVE-7 were either found or repaired and opened back up at the manifold to operate with the SVE system. Grab samples collected from the Combined Influent, Between GAC Adsorbers, and Stack Effluent. Vapor samples submitted for laboratory analysis of EPA Method TO-3 and TO-15.	SVE-2 through SVE-11	3189
6/22/2014 to 7/3/2014	---	The SVE system was shutdown pending a GAC changeout on the primary GAC adsorber. A GAC changeout was completed on Vessel B on July 3, 2014.	SVE-2 through SVE-11	3441
7/3/2014	10:40 PM	SVE-1 was repaired and opened back up at the manifold to operate with the SVE system. Grab samples collected from the Combined Influent, Between GAC Adsorbers, and Stack Effluent. Vapor samples submitted for laboratory analysis of EPA Method TO-3 and TO-15.	SVE-1 through SVE-11	3445
8/1/2014	3:00 PM	Grab samples collected from the Combined Influent, Between GAC Adsorbers, and Stack Effluent. Vapor samples submitted for laboratory analysis of EPA Method TO-3 and TO-15.	SVE-1 through SVE-11	4131
9/10/2014	4:32 PM	Grab samples collected from the Combined Influent, Between GAC Adsorbers, and Stack Effluent. Vapor samples submitted for laboratory analysis of EPA Method TO-3 and TO-15. Grab samples also collected from the individual SVE points (SVE-1 through 11) at the manifold and submitted for laboratory analysis of EPA Method TO-15.	SVE-1 through SVE-11	5093
9/23/2014 to 9/30/2014	---	The SVE system was shutdown pending a GAC changeout on the primary GAC adsorber. A GAC changeout was completed on Vessel A on September 30, 2014.	SVE-1 through SVE-11	5344
10/13/2014	6:30 PM	Grab samples collected from the Combined Influent, Between GAC Adsorbers, and Stack Effluent. Vapor samples submitted for laboratory analysis of EPA Method TO-3 and TO-15.	SVE-1 through SVE-11	5691
11/5/2014	4:10 PM	Grab samples collected from the Combined Influent, Between GAC Adsorbers, and Stack Effluent. Vapor samples submitted for laboratory analysis of EPA Method TO-3 and TO-15. Monthly cycling of the SVE points begins, and the SVE system is set to operate with Set 1 of the SVE points (Set 1: SVE-2, SVE-3, SVE-4, SVE-7, SVE-8, SVE-9, and SVE-11 in operation).	SVE-2, SVE-3, SVE-4, SVE-7, SVE-8, SVE-9, SVE-11	6239

TABLE 9
SVE SYSTEM: OPERATIONS LOG
AmeriPride Services Inc.
3505 N. Pasadena Ave., Los Angeles, CA
Burns & McDonnell Project No. 89698

Date	Pacific Time	SVE System Operations and Notes	SVE Points in Operation	SVE System Total Hours of Operation
12/8/2014	1:40 PM	Grab samples collected from the Combined Influent, Between GAC Adsorbers, and Stack Effluent. Vapor samples submitted for laboratory analysis of EPA Method TO-3 and TO-15. SVE system is set to operate with Set 2 of the SVE points (Set 2: SVE-1, SVE-4, SVE-5, SVE-6, SVE-7, SVE-9, and SVE-10 in operation).	SVE-1, SVE-4, SVE-5, SVE-6, SVE-7, SVE-9, SVE-10	7010
12/17/2014 to 1/6/2015	---	The SVE system was shutdown pending a GAC changeout on the primary GAC adsorber. A GAC changeout was completed on Vessel B on January 6, 2015.	SVE-1, SVE-4, SVE-5, SVE-6, SVE-7, SVE-9, SVE-10	7229
1/6/2015	3:15 PM	Grab samples collected from the Combined Influent, Between GAC Adsorbers, and Stack Effluent. Vapor samples submitted for laboratory analysis of EPA Method TO-3 and TO-15.	SVE-1, SVE-4, SVE-5, SVE-6, SVE-7, SVE-9, SVE-10	7232
2/1/2015 to 2/4/2015	---	SVE system was shutdown for maintenance (drainage of VLS tank).	SVE-1, SVE-4, SVE-5, SVE-6, SVE-7, SVE-9, SVE-10	7666
2/4/2015	12:50 PM	Grab samples collected from the Combined Influent, Between GAC Adsorbers, and Stack Effluent. Vapor samples submitted for laboratory analysis of EPA Method TO-3 and TO-15. SVE system is set to operate with Set 1 of the SVE points.	SVE-2, SVE-3, SVE-4, SVE-7, SVE-8, SVE-9, SVE-11	7668
2/25/2015 to 2/27/2015	---	SVE system was shutdown for maintenance (drainage of VLS tank).	SVE-2, SVE-3, SVE-4, SVE-7, SVE-8, SVE-9, SVE-11	8162
3/4/2015	11:54 AM	Grab samples collected from the Combined Influent, Between GAC Adsorbers, and Stack Effluent. Vapor samples submitted for laboratory analysis of EPA Method TO-3 and TO-15. Grab samples also collected from the individual SVE points (SVE-1 through 11) at the manifold and submitted for laboratory analysis of EPA Method TO-15. SVE system is set to operate with Set 2 of the SVE points.	SVE-1, SVE-4, SVE-5, SVE-6, SVE-7, SVE-9, SVE-10	8277
4/1/2015	3:34 PM	Grab samples collected from the Combined Influent, Between GAC Adsorbers, and Stack Effluent. Vapor samples submitted for laboratory analysis of EPA Method TO-3 and TO-15. SVE system is set to operate with Set 1 of the SVE points.	SVE-2, SVE-3, SVE-4, SVE-7, SVE-8, SVE-9, SVE-11	8949
4/25/2015 to 5/1/2015	---	The SVE system shutdown due to a power outage.	SVE-2, SVE-3, SVE-4, SVE-7, SVE-8, SVE-9, SVE-11	9502
5/6/2015	2:30 PM	Grab samples collected from the Combined Influent, Between GAC Adsorbers, and Stack Effluent. Vapor samples submitted for laboratory analysis of EPA Method TO-3 and TO-15. Since PID reading after primary vessel was greater than 13.4 ppmv (as hexane) and efficiency was less than 90%, the SVE system was shutdown after collecting monthly samples pending a GAC changeout.	SVE-2, SVE-3, SVE-4, SVE-7, SVE-8, SVE-9, SVE-11	9634
5/6/2015 to 5/19/2015	---	The SVE system was shutdown pending a GAC changeout on the primary GAC adsorber. A GAC changeout was completed on Vessel A on May 19, 2015. SVE system is set to operate with Set 2 of the SVE points.	SVE-1, SVE-4, SVE-5, SVE-6, SVE-7, SVE-9, SVE-10	9636
6/1/2015	11:48 AM	Grab samples collected from the Combined Influent, Between GAC Adsorbers, and Stack Effluent. Vapor samples submitted for laboratory analysis of EPA Method TO-3 and TO-15. SVE system is set to operate with Set 1 of the SVE points.	SVE-2, SVE-3, SVE-4, SVE-7, SVE-8, SVE-9, SVE-11	9946
6/19/2015 to 6/25/2015	---	The SVE system shutdown due to a power outage.	SVE-2, SVE-3, SVE-4, SVE-7, SVE-8, SVE-9, SVE-11	10382
7/7/2015	1:29 PM	Grab samples collected from the Combined Influent, Between GAC Adsorbers, and Stack Effluent. Vapor samples submitted for laboratory analysis of EPA Method TO-3 and TO-15. SVE system is set to operate with Set 2 of the SVE points.	SVE-1, SVE-4, SVE-5, SVE-6, SVE-7, SVE-9, SVE-10	10673
7/17/2015	7:27 AM	Per conversation with DTSC, the SVE system was shutdown to begin rebound testing.	SVE-1, SVE-4, SVE-5, SVE-6, SVE-7, SVE-9, SVE-10	11003

TABLE 10
SVE SYSTEM: COMBINED INFLUENT ANALYTICAL RESULTS
AmeriPride Services Inc.
3505 N. Pasadena Ave., Los Angeles, CA
Burns & McDonnell Project No. 89698

APPENDIX A

ANALYTICAL REPORTS

Mobile Geochemistry Inc.

25 January 2016

Mr. Erik Brenegan
Burns and McDonnell - Bloomington
8201 Norma Center Dr.
Bloomington, MN 55437

H&P Project: BM011816-SB2
Client Project: 65805 / 3505 Pasadena Ave

Dear Mr. Erik Brenegan:

Enclosed is the analytical report for the above referenced project. The data herein applies to samples as received by H&P Mobile Geochemistry, Inc. on 1/18/2016 -1/19/2016 which were analyzed in accordance with the attached Chain of Custody record(s).

The results for all sample analyses and required QA/QC analyses are presented in the following sections and summarized in the documents:

- Sample Summary
- Case Narrative (if applicable)
- Sample Results
- Quality Control Summary
- Notes and Definitions / Appendix
- Chain of Custody
- Sampling Logs (if applicable)

Unless otherwise noted, I certify that all analyses were performed and reviewed in compliance with our Quality Systems Manual and Standard Operating Procedures. This report shall not be reproduced, except in full, without the written approval of H&P Mobile Geochemistry, Inc.

We at H&P Mobile Geochemistry, Inc. sincerely appreciate the opportunity to provide analytical services to you on this project. If you have any questions or concerns regarding this analytical report, please contact me at your convenience at 760-804-9678.

Sincerely,

Janis Villarreal

Janis Villarreal
Laboratory Director

H&P Mobile Geochemistry, Inc. is certified under the California ELAP, the National Environmental Laboratory Accreditation Conference (NELAC) and the Department of Defense Accreditation Programs.

Notes and Definitions

LCC	Leak Check Compound
ND	Analyte NOT DETECTED at or above the reporting limit
MDL	Method Detection Limit
%REC	Percent Recovery
RPD	Relative Percent Difference

Appendix

H&P Mobile Geochemistry, Inc. is approved as an Environmental Testing Laboratory and Mobile Laboratory in accordance with the DoD-ELAP and the ISO 17025 programs, certification number L11-175.

H&P is approved by the State of Arizona as an Environmental Testing Laboratory and Mobile Laboratory, certification numbers AZM758 and AZ0779.

H&P is approved by the State of California as an Environmental Laboratory and Mobile Laboratory in conformance with the Environmental Laboratory Accreditation Program (ELAP) for the category of Volatile and Semi-Volatile Organic Chemistry of Hazardous Waste, certification numbers 2740, 2741, 2743, 2744, 2745, 2754 & 2930.

H&P is approved by the State of Florida Department of Health under the National Environmental Laboratory Accreditation Conference (NELAC) certification number E871100.

The complete list of stationary and mobile laboratory certifications along with the fields of testing (FOTs) and analyte lists are available at www.handpmg.com/about/certifications.

Eurofins Calscience, Inc. (Calscience) certifies that the test results provided in this report meet all NELAC requirements for parameters for which accreditation is required or available. Any exceptions to NELAC requirements are noted in the case narrative. The original report of subcontracted analyses, if any, is attached to this report. The results in this report are limited to the sample(s) tested and any reproduction thereof must be made in its entirety. The client or recipient of this report is specifically prohibited from making material changes to said report and, to the extent that such changes are made, Calscience is not responsible, legally or otherwise. The client or recipient agrees to indemnify Calscience for any defense to any litigation which may arise.

Work Order Narrative

Work Order: 16-03-1400 Page 1 of 1

Condition Upon Receipt:

Samples were received under Chain-of-Custody (COC) on 03/17/16. They were assigned to Work Order 16-03-1400.

Unless otherwise noted on the Sample Receiving forms all samples were received in good condition and within the recommended EPA temperature criteria for the methods noted on the COC. The COC and Sample Receiving Documents are integral elements of the analytical report and are presented at the back of the report.

Holding Times:

All samples were analyzed within prescribed holding times (HT) and/or in accordance with the Calscience Sample Acceptance Policy unless otherwise noted in the analytical report and/or comprehensive case narrative, if required.

Any parameter identified in 40CFR Part 136.3 Table II that is designated as "analyze immediately" with a holding time of <= 15 minutes (40CFR-136.3 Table II, footnote 4), is considered a "field" test and the reported results will be qualified as being received outside of the stated holding time unless received at the laboratory within 15 minutes of the collection time.

Quality Control:

All quality control parameters (QC) were within established control limits except where noted in the QC summary forms or described further within this report.

Subcontractor Information:

Unless otherwise noted below (or on the subcontract form), no samples were subcontracted.

Additional Comments:

Air - Sorbent-extracted air methods (EPA TO-4A, EPA TO-10, EPA TO-13A, EPA TO-17): Analytical results are converted from mass/sample basis to mass/volume basis using client-supplied air volumes.

Solid - Unless otherwise indicated, solid sample data is reported on a wet weight basis, not corrected for % moisture. All QC results are always reported on a wet weight basis.
