Environmental Interest/Information System

DRAFT

AMERICIAN PRODUCE (Continued) **1000361044**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:

Registry ID: 110002668809

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CA BOND EXP. PLAN:

Reponsible Party:	COST RECOVERY/OPERATION AND MAINTENANCE SITE
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	DHS has utilized Bond funds to complete the remedial action. DHS is currently undertaking appropriate cost recovery actions.
Site Description:	This site was previously used to scrap electrical transformers.
Hazardous Waste Desc:	Polychlorinated biphenyls (PCBs) were detected in the soil.
Threat To Public Health & Env:	The remedial action has been completed. Soil contaminated with PCBs was excavated and redisposed of in a licensed landfill. There is no threat to public health and the environment.
Site Activity Status:	In August, 1985, the RP, Mr. Rodney Dean, pled no contest to three felony counts of illegal storage, transportation and disposal of hazardous wastes. Mr. Dean's probation required that the cleanup of the site be completed and reported to the court. The RP retained a contractor for the cleanup and began the remedial actions. The contractors removed much of the contaminated soil. DHS completed the cleanup after the RP exhausted his financial resources. DHS is currently in the cost recovery stage.

FINDS:

Registry ID: 110002801549

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

FINDS:

Registry ID: 110002634533

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order

DRAFT

APEX WHOLESALE PRODUCE INC (Continued) **S101617226**

should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

SANTA FE/W.A. GRANT (Continued) **S102860873**

Comments: DTSC reviewed a Preliminary Endangerment Assessment for the site under a Voluntary Cleanup Agreement. Based on the information and data presented, DTSC determined that the hazardous constituents remaining at the site do not constitute a threat to human health or the environment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 09/13/1995
Comments: The Department received a Non-Emergency Hazardous Substance Release Report dated January 31, 1995. Review of the document indicates that the site is contaminated with elevated levels of heavy metals such as lead, copper and zinc. Foundry operations existed at the site from at least 1906 until 1990, operated by W.G. Grant & Co. Santa Fe Railway is the current owner of the site. RP removed USTs from the site without any regulatory agency oversight. Due to evidence of a release, DTSC is recommending that a PEA be conducted to evaluate the site. On September 13, 1995, DTSC notified the RP thereof.

Manufactured Gas Plants:

Site located at 725 Chemming Street, Los Angeles, California, approximately 2.5 acres. From 1887 util 1906 an oil gas plant was operated at site. MGP may have been converted to a natural gas storage site in approximately 1906. Records indicate that MMGP equipment may have been removed by 1930. Site is currently used as a Greyhound Bus parking lot.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Initial Study/ Neg. Declaration
Completed Date: 03/18/2003
Comments: Special Initial Study, Negative Declaration, and De Minimis Impact Finding were prepared and made available for public review. No verbal or written comments were received. DTSC approved the CEQA documents on 3/18/2003. DTSC approved RAW on 3/18/03. Proposed removal activities consists of removing approximately 615 cubic yards of contaminated soil. Chemicals of potential concern previously identified in the soil include the following: Lampslack, PAH's, and BTEX. Removal Activities are anticipated to last approximately 30 days.

Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 12/31/2002
Comments: DTSC approved site characterization activities in December 2002. Contaminants of concern included PAH's & BTEX. A RAW involving excavation will be implemented for the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 05/20/1993
Comments: The Department completed review of the PEA. A Manufactured Gas Plant (MGP) was operated at the site in the late 1800s and early 1900s. Gas was produced from crude oil for distribution in the site area. Several companies operated at the site. In 1909, the site was owned by the Los Angeles Gas and Electric Corp., which merged with the Southern California Gas Company in 1937. SoCalGas owned the property until 1976, and sold to the current owners. The MGP was dismantled sometime before 1906. The byproducts from the manufactured gas

DRAFT

FARMERS PRODUCE PROJECT INC (Continued) **S101584054**

operation were tars, oils, sludges, and lampblack. Elevated levels of polycyclic aromatic hydro- carbons (PAH), heavy metals such as lead and arsenic and cyanides were found at the site. The PEA concluded that there was contamination at the site above screening values. Therefore, the Department recommended that further investigation or assessment at the site was necessary.

Completed Document Type: Fieldwork
Completed Date: 09/23/2016
Comments: Site visit by DTSC geologist, JNaginis.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/12/2017
Comments: DTSC site visit. Meeting with MTA and Arcadis regarding current and upcoming activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 01/25/2017
Comments: Investigation Report describes additional delineation of the Site's contamination. DTSC approved the Report.

Completed Area Name: Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Well Decommissioning Report
Completed Date: 01/25/2017
Comments: The Report documents destruction of three groundwater monitoring wells and two vapor extraction wells.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Pilot Study/Treatability Workplan
Completed Date: 12/24/2004
Comments: Plan proposed data gap investigation, air sparging and soil vapor extraction.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

DRAFT

UNITED TECHNOLOGIES INMONT COR (Continued) **S101617157**

Completed Document Type: Pilot/Treatability Study Report
Completed Date: 12/24/2004
Comments: Addendum includes response to DTSC comments and additional data from pilot study.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Letter - Demand
Completed Date: 09/28/2008
Comments: DTSC sent first demand letter to RP to recover the CLEAN Loan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Clean Loan Agreement
Completed Date: 02/04/2002
Comments: Response Action Agreement (RAA) approved and signed by proponent and DTSC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 11/01/2016
Comments: DTSC projected cost estimate for remediation activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 01/23/2014
Comments: Updated Cost Estimate completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Responsible Agency Review
Completed Date: 10/30/2015
Comments: Addendum to MTA's EIS/EIR prepared to evaluate activities in the Removal Action Workplan. The activities in the RAW do not significantly alter the findings or conclusions reached in the previously certified EIS/EIR.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Pilot/Treatability Study Report
Completed Date: 02/27/2006
Comments: DTSC sent letter in reponse to Soil Vapor Extraction (SVE) Report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 03/30/2005
Comments: Meeting scheduled to discuss the cost for the additional assessment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 02/27/2006
Comments: Letter and comments sent to RP.

DRAFT

Completed Date: 06/26/2008
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 08/01/2008
Comments: OK

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 12/02/2013
Comments: Workplan approved to conduct sampling for data gaps.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 06/30/2014
Comments: Based on the elevated concentrations in the groundwater, DTSC requires submittal of a pilot study workplan that would evaluate potential remedies.

Completed Area Name: Shallow Soil
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 03/22/2016
Comments: The Completion Report summarizes the removal of underground storage tanks and shallow soil excavation. DTSC approved Report. Soil contamination at greater depth and groundwater contamination needs to be completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 11/17/2013
Comments: Sampling activities have begun to delineate contamination.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Community Profile
Completed Date: 03/30/2016
Comments: Profile details Site information and community involvement activities. Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fact Sheets
Completed Date: 09/02/2015
Comments: The Factsheet will be distributed to the community informing them of the public comment period for the Draft Removal Action Workplan (RAW). Public comment period will occur from September 7 to October 7, 2015. The RAW describes cleanup options for the Site soil and a pilot study to test options for the deeper soil and groundwater.

Alternate Address:	590 SOUTH SANTA FE AVENUE
Alternate City,St,Zip:	LOS ANGELES, CA 90013
Background Info:	The site is located at 590 South Santa Fe Avenue, Los Angeles, California. The site consists of two land parcels totaling approximately 2.68 actes of land and is located witin an indus- industrial portion of the City of Los Angeles. Historically the site has been used for chemeical or paint manufacturing.
	Not reported
	The site was formerly under the oversight of the California Regional Water Quality Control Board (CRWQCB). (CRWQCB) has overseen the site investiation and remediation since approximately 1986.
	Not reported
	Previous sampling activities have confirmed both soil and groundwater contamination. Contaminants of concern identified in the groundwater and soil include benzene, ethyl benzene, 1,1-dichlorethane, 1,1-dichloroethene, 4-methyl-2-pentanone (MIBK), toluene, and total xylene. The toluene, and xylene appear to be primarily located within the groundwater beneath the northern portion of the site whereas MIBK has been identified in the groundwater along the southwest corner of the site and may extend beyond the site boundary.

Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D018
. Waste name: BENZENE

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

DRAFT

WESTERN LEAD AND METAL CO (INTERNATIONAL LEAD CO.) (Continued) **1001115052**

Completed Document Type: Consent Order
Completed Date: 04/28/1997
Comments: Execution of Imminent and Substantial Endangerment Determination and Consent Order for investigation at the Western Lead and Metal Company site which includes both the International Lead Co. Site (Site Code 300591) and the Union Pacific Railroad Company track areas (Site Code 300628).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 10/10/2006
Comments: Removal Action included placement of an asphalt cover in the property area and removal of 97 tons of soil contaminated with lead and arsenic.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 10/21/2004
Comments: The RAW proposes to address the lead & arsenic contaminated soil by placing a four-inch asphalt cap on the property area (15,000 sq.ft.) and removing soil from nine impacted areas at the Site boundary. Implementation is scheduled for end of January 2005.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 04/15/2003
Comments: The Remedial Investigation is approved. The RI involved sampling of lead and other metals, and volatile organic compounds, particularly tetrachlorethene and 1,1,1-trichloroethane.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 06/30/1998
Comments: Completed a Preliminary Assessment (PA) with sampling of the site under contract with U.S. EPA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 11/18/1997
Comments: Soil removal (excavation) of lead-contaminated soils. The Implementation Report for completion of the Emergency Removal Action by Quemetco at Area 3 (Coast Produce Warehouse) and Area 4 (Residential property at 2151 E. 14th Street) was approved. An estimated 120 tons of contaminated lead was excavated and disposed of off-site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 07/18/1997
Comments: UPRR: A removal action workplan (RAW-UPRR) was approved for Union Pacific Railroad track areas along Lemon Street (between 10th & 14th

DRAFT

WESTERN LEAD AND METAL CO (INTERNATIONAL LEAD CO.) (Continued) **1001115052**

Streets). These areas are designated as Areas 1 & 2. A Notice of Exemption was also filed with the OPR as required by the CEQA laws and guidelines. The RAW-UPRR included excavation, treatment and disposal of contaminated soils in the neighboring railroad right-of-way (track) areas of the International Lead Company site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 06/25/1998
Comments: Excavation, treatment and disposal of 2,500 tons of metal contaminated soil from the UPRR rail track areas. The Implementation Report of Emergency Removal Action by Dames & Moore for Areas 1 and 2 was approved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 07/18/1997
Comments: A removal action workplan (RAW-QUEMETCO) which proposed excavation and disposal of contaminated soils, was approved for Areas 3 and 4 (perimeter of Property and residential property). A Notice of exemption was also filed with the OPR as required by the CEQA laws and guidelines.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 11/07/1994
Comments: DTSC received an information letter for 3 possible hazardous substance release sites allegedly associated with Quemetco/ RSR Corporation, a lead smelting company.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 02/10/2006
Comments: Workplan for additional removal of soil is approved.

DRAFT

WESTERN LEAD AND METAL CO (INTERNATIONAL LEAD CO.) (Continued) **1001115052**

Completed Sub Area Name: Not reported
Completed Document Type: Consent Order
Completed Date: 04/28/1997
Comments: Execution of Imminent and Substantial Endangerment Determination and Consent Order for investigation at the Western Lead and Metal Company site which includes both the International Lead Co. Site (Site Code 300591) and the Union Pacific Railroad Company track areas (Site Code 300628).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 10/10/2006
Comments: Removal Action included placement of an asphalt cover in the property area and removal of 97 tons of soil contaminated with lead and arsenic.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 10/21/2004
Comments: The RAW proposes to address the lead & arsenic contaminated soil by placing a four-inch asphalt cap on the property area (15,000 sq.ft.) and removing soil from nine impacted areas at the Site boundary. Implementation is scheduled for end of January 2005.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 04/15/2003
Comments: The Remedial Investigation is approved. The RI involved sampling of lead and other metals, and volatile organic compounds, particularly tetrachlorethene and 1,1,1-trichloroethane.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 06/30/1998
Comments: Completed a Preliminary Assessment (PA) with sampling of the site under contract with U.S. EPA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 11/18/1997
Comments: Soil removal (excavation) of lead-contaminated soils. The Implementation Report for completion of the Emergency Removal Action by Quemetco at Area 3 (Coast Produce Warehouse) and Area 4 (Residential property at 2151 E. 14th Street) was approved. An estimated 120 tons of contaminated lead was excavated and disposed of off-site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 07/18/1997
Comments: UPRR: A removal action workplan (RAW-UPRR) was approved for Union

DRAFT

Alternate Address:	2182 EAST 11TH STREET
Alternate City,St,Zip:	LOS ANGELES, CA 90021
Background Info:	The Site is also known as the Western Lead and Metal Company Site. The Site is located in an industrial area near downtown Los Angeles and is surrounded by warehouses, food distributors, light manufacturing, and scrap metal recyclers. The Site is roughly bounded by 11th Street (Property), to the north, the Union Pacific Railroad right-of-way to the east, 14th Street, to the south, and Wilson Street to the west. The Site includes the property at 2182 East 11th Street, which was occupied by several different companies as a lead smelter from 1946 to 1965. The Western Lead Products Company operated a lead smelter on the Property from 1954 to 1960 under the name of Western Lead and Metal Company. After 1965, the Property was used for die-cast manufacturing operations. The Property is approximately 110 feet by 140 feet and is currently devoid of any buildings, and is secured by fencing. The other areas of the Site include: portions of the Union Pacific Railroad right-of-way, between 14th and 10th Streets; a narrow strip of the property occupied by Coast Produce; and a residencial property at the corner of

DRAFT

WESTERN LEAD AND METAL CO (INTERNATIONAL LEAD CO.) (Continued) **1001115052**

Wilson and 14th Streets. Since 1991, several site assessments have been conducted. These assessments involved mostly surface soil sampling and analyses for metals including lead, antimony, and arsenic. In 1996, the Property was paved with three inches of asphalt to prevent exposure of the public to contaminated soil. In addition, DTSC collected several surface soil samples in the areas surrounding the Property. Extremely high levels of lead (up to 574,000 ppm), antimony (up to 14,000 ppm), and arsenic (up to 920 ppm) were detected in the narrow strip along the southern and western boundaries of the Property; high levels of lead, copper, and zinc were detected along the railroad right-of-way; and elevated levels of lead (up to 1,450 ppm) were detected on the residential property. A Consent Order (Imminent and Substantial Endangerment) was entered into with Quemetco Inc., (an RSR Subsidiary) and Union Pacific Railroad Company. As required by the Order, in 1977, Quemetco completed an Emergency Removal Action at Areas 3 and 4 which are located at the perimeter of the Property and the residential property. Union Pacific has also conducted an Emergency Removal Action at Areas 1 and 2 (railroad right-of-wau). The Remedial Investigation found the extent of metal contamination. Currently, the Draft RAW, which proposes to place a 4-inch asphalt cover on the Property area and excavate soil, from the Site boundary, has been approved. The 30 day Public Comment Period starts on August 23 and ends September 22, 2004.

CA BOND EXP. PLAN:

Reponsible Party:	RESPONSIBLE PARTY-LEAD SITE CLEANUP WORKPLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	Southern California Gas has entered into a consent order with DHS for oversight/monitoring of its cleanup efforts. DHS has budgeted $50,000 for direct costs related to the project. DHS will recover 100 percent of direct costs plus staff costs and overhead related to the project. The responsible parties will pay all costs associated with site cleanup.
Site Description:	The Olympic Base facility, currently owned by Southern California Gas Company, is the site of a former oil gasification "towne gas" plant.
Hazardous Waste Desc:	The wastes are generally characterized as polynuclear or polycyclic aromatic hydrocarbons (PNAs or PAHs). Other constituents of concern are cyanide, lead, and semivolatile organics. Soil contamination is present at the site from the surface to a depth of 10 to 15 feet in both the northern and southern portions of the site.
Threat To Public Health & Env:	The primary concern is potential contamination of ground water. Usable ground water lies approximately 200 feet below the ground surface and the water table may rise to only 100 feet below the site. Ground water contamination has not been verified. Surface soil contamination may migrate offsite due to airborne particulates.
Site Activity Status:	The Southern California Gas Company has completed a remedial investigation/feasibility study.

Manufactured Gas Plants:

The Southern California Gas (SCG), Olympic Base Site was once a gas manufacturing plant where oil was converted into gas for lighting, heating, and cooking. Residues from the gasification process, mainly consisting of a material "lamp black", were weere discovered at the site. "Lamp Black" contains varying amounts of a family of compounds called polynuclear or polycyclic aromatic hydrocarbons (PNAs or PAHs). The plant was built in the period 1907-1908 by the City Gas Company. In 1908, the Domesttic Gas Company purchased and took over the operations of City Gas. In 1910, SCG was incorporated and became the successor of Domestic Gas. SCG operated the plant until 1927, when the service for 100% natural gas started. The plant operated on a stanndby basis until 1952, when all gas manufacturing operations ceased and the plant was dismantled. SCG has administrative facilities on other portions of the facility

Background Info:

The Southern California Gas (SCG), Olympic Base Site was once a gas manufacturing plant where oil was converted into gas for lighting, heating, and cooking. Residues from the gasification process, mainly consisting of a material "lamp black", were were discovered at the site. "Lamp Black" contains varying amounts of a family of compounds called polynuclear or polycyclic aromatic hydrocarbons (PNAs or PAHs).
The plant was built in the period 1907-1908 by the City Gas Company. In 1908, the Domestic Gas Company purchased and took over the operations of City Gas. In 1910, SCG was incorporated and became the successor of Domestic Gas. SCG operated the plant until 1927, when the service for 100% natural gas started. The plant operated on a standby basis until 1952, when all gas manufacturing operations ceased and the plant was dismantled. SCG has administrative facilities on other portions of the facility.
A Consent Order was signed in December 1986, which addressed the work needed to complete the Remedial Investigation/-Feasibility Study (RI/FS) process. The RI report was approved by the Department on September 17, 1987. The RI found that soil from about 2 to 12 feet below ground surface is contaminated. The contaminants are not readily vaporized, nor do they enter aqueous phase solution. Groundwater aquifers beneath the site are unsaturated to a depth of 90 feet. Air monitoring at the site does not indicate that the contaminants are emitting vapors to the air. SCG then submitted a FS report in May 1988. DHS has reviewed the FS report and requested a full Health Risk Assessment (HRA) based on appropriate biological receptors and exposure pathways on October 20, 1988. The HRA was approved by the Department on June 4, 1990. The FS was revised by SCG and the report approved on July 19, 1990.
The RP submitted a draft RAP on August 20, 1990, as requested by the Department. The Department has published a fact sheet on the findings of the RI/FS. The RAP meeting with the community was held on November 17, 1990 and the RAP was subsequently approved in January of 1991.
The RAP proposed an asphalt cap on the site, groundwater monitoring, and a deed restriction. Groundwater monitoring is necessary as the region the site is located in is currently

OLYMPIC BASE (Continued) **S105689611**

experiencing a drought; however, if this should change the groundwater table will rise, possibly impacting the conclusions of the RI. The deed restriction, protected the integrity of the cap by limiting land use and excavation of the waste. The Department directed the RP to prepare a Remedial Design and Implementation (RD&I) plan. The plan included engineering specifications for the asphalt cap, permits, and a schedule for completion of the cap. The cap will be repaired as necessary; necessary; it is expected to require replacement every ten years. This operation and maintenance program will last for 20 years.

LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

DRAFT

MID CITY IRON/METAL CORP (Continued) **S101584674**

Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

CPS-SLIC:
Region: STATE
Facility Status: **Open - Site Assessment**
Status Date: 06/06/2013
Global Id: T10000004814
Lead Agency: LOS ANGELES RWQCB (REGION 4)
Lead Agency Case Number: Not reported
Latitude: 34.0392409
Longitude: -118.245909
Case Type: Cleanup Program Site
Case Worker: RV
Local Agency: Not reported
RB Case Number: 1290
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Contaminated Surface / Structure, Soil, Soil Vapor
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE), Chromium, Chromium VI
Site History: Plating operations started in the mid-1910s in the southwestern portion of the Site until 2005. Ace Plating owned and conducted plating related operations on the 11 contiguous parcels, specifically electrochemical coating of metal parts. Numerous assessments conducted at the site indicate that the soil is impacted with VOCs and metals. The soil vapor has been sampled throughout the Site with tetrachloroethene (PCE) concentrations at 5 feet below ground surface (bgs) ranging from 7.9 micrograms per liter (a%g/L) to 87 a%g/L. The soil vapor data is limited at depths greater than 30 feet bgs. At 60 feet bgs and below, PCE concentrations range from 39 a%g/L below the Assembly Room to 127 a%g/L offsite on Crocker Street. The lateral extent of shallow PCE greater than 12 a%g/L is only defined on the east side. The source of the PCE is unknown but slightly higher concentrations exist in the central portions of the Plating Rooms. Chromium concentrations ranged from 1.5 mg/kg to 4,300 mg/kg for total chromium and from 0.92 to 840 mg/kg for hexavalent chromium. The maximum concentrations were both collected from SSVW-2 at 1 foot bgs located in the alley between the Crocker Street and Towne Avenue buildings and is adjacent to the location of the former chromium

DRAFT

ACE PLATING CO., INC. (Continued) **S105632824**

tanks. Outside of the area impacted by the former chromium tanks, the maximum chromium concentration is 4200 mg/kg for total chromium and 94 mg/kg for hexavalent chromium at MW-1. Degreasers that contained PCE were utilized in Plating Rooms 1 and 2 from 1993 to 2001. The maximum PCE concentration is 0.150 mg/kg and was sampled 4 feet deep in the vicinity of the former nickel dip tank in Plating Room 2. Two groundwater monitoring wells have been installed. Hexavalent chromium was not detected above the laboratory detection limits in any of the groundwater samples collected. Tetrachloroethylene (PCE) and 1,1-dichloroethene are the only VOC detected in groundwater, with the maximum concentration detected in MW-3 at a concentration of 33 ug/L and 2.7 ug/L, respectively.

Alternate Address: 2435 E. WASHINGTON BLVD.
Alternate City,St,Zip: LOS ANGELES, CA 90021
Background Info: The historic usage of the site is a railroad maintenance yard. Chlorinated solvents TCE and PCE have been identified in the soil along the border of the site with 2425 E. Washington Blvd. Possible pathways for contamination migration are soil and groundwater. Possible receptors are on-site workers and the

DRAFT

population which may drink contaminated drinking water extracted from nearby drinking wells. Some shallow soil gas sampling has been performed on-site in 1995. This survey was concentrated along the border of 2455 E. Washington Blvd. Results showed decreasing contaminant concentrations with increasing distance from 2425 E. Washington Blvd. property boundry. No source was identified at the Amtrak property.
Not reported
An approximately 50-acres site located in an industrial/ commerical area of Los Angeles, one-half mile south of the Santa Monica freeway. The site is also known as the Redondo Junction Facility. Various buildings are located on the property for support and maintenance of trains. Rail Spurs run throughout the property in a general north-south direction. The Los Angeles river is located directly to the east. Previous owner of the property from 1885 to 1976 was Atchison, Topeka, and Sante Fe Railroad Corporation.
Not reported
Investigation of this site is key to determining the extent of soil gas and groundwater contamination found on the adjacent property 2425 E. Washington Boulevard, known as State Surplus Parcel (SSL-497). A draft VCA was prepared by DTSC for recovery of oversight costs. A limited subsurface soil gas survey is proposed as a first step to determine extent of chlorinated solvent contamination and also to identify any contributing sources.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 03/25/1998
Comments: Former name of this site was "California Reception Center - LAC". This 20+ acre site is being broken into two irregularly-shaped parcels, with no identifiable addresses. The establishment of 2 parcels will facilitate addressing future activities. This site will now be known as Los Angeles CRA - Sale Parcel "497A" and represents one of the parcels. The other Parcel is Alameda Corridor-Sale Parcel "497B". CalSites # 19400011. Parcel "497A" will be the project of the Los Angeles Community Redevelopment Agency (CRA). CRA, in their "Brownfields Program" will complete an RI/FS on the 497A Parcel, obtain a purchase option from the State of California, and solicit foster redevelopment of the site. Parcel "497B" will be the project of the Alameda Corridor Transportation Authority (ACTA). Please see CalSites #19400011 for further information on Parcel "497B".

DRAFT

CROWN COACH (Continued) **S106568222**

Completed Date: 10/30/1994
Comments: DTSC completed a PEA and recommended further action at the site. This included further remedial activities, public participation and PRP search.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 10/30/1992
Comments: While excavating the eastern area and demolishing all existing buildings, other areas were discovered to be contaminated with lead and VOCs (April'94). As a result the total volume of material excavated and removed prior to legislative cancellation of the prison project (Sept'92) was about 40,000 tons. Stabilization measures were also taken, including the implementation of dust control, fensing and posting, and site security. Further investigation and remediation was stopped due to lack of funds.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 03/04/1992
Comments: Bid Package 1B-Hazardous Waste Remedial Action (RAP) completed by K/J/C. The RAP was developed for the shallow soil excavation in the eastern area of the site with a cleanup level of 10 ppm.

Completed Sub Area Name: Not reported
Completed Document Type: Public Participation Plan / Community Relations Plan
Completed Date: 04/27/1995
Comments: DTSC prepared a Public Participation Plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 10/30/1994
Comments: DTSC completed a PEA and recommended further action at the site. This included further remedial activities, public participation and PRP search.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 10/30/1992
Comments: While excavating the eastern area and demolishing all existing buildings, other areas were discovered to be contaminated with lead and VOCs (April'94). As a result the total volume of material excavated and removed prior to legislative cancellation of the prison project (Sept'92) was about 40,000 tons. Stabilization measures were also taken, including the implementation of dust control, fensing and posting, and site security. Further investigation and remediation was stopped due to lack of funds.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 03/04/1992
Comments: Bid Package 1B-Hazardous Waste Remedial Action (RAP) completed by K/J/C. The RAP was developed for the shallow soil excavation in the

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

DRAFT

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

DRAFT

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

DRAFT

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

UST System Observations

Line Leak Detector

44 LLD installed on pressurized piping system.
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

46 LLD on press piping monitors at least hourly, detects a 3.0 gph leak, and restricts/shuts off flow
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

Secondary Containment

48 Secondary containment intalled after July 1, 2003 is free of water
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

49 Secondarily contained piping allows liquid to flow into the sump in the event of a leak.
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

50 Secondary containment maintained tight and has been confirmed by testing.
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

51 Spill bucket installed, liquid tight, w/5 gal cap & woking drain or other, & is corrosion resistant
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

Overfill

52 UST system is operated to prevent unauthorized release, including spills and overfills
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

53 Overfill prevention system has not been overridden and meets overfill requirements.
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

On Site Records

Certifications

54 Submitted/maintained current Cert of Financial Responsibility/mechanism of financial assurance.

Overall Inspection Comments

LAFD Christopher Young on site 06/04/2018 to conduct routine inspection of underground storage tank facility. Monitoring System components were observed and verified this date. Consent to enter, inspect and take photographs was given on this date by CEO BILL McCOY.

Monitoring system certification was conducted at this time. Monitoring certification was performed by JOHN KNEISEL WITH PTT. Monitoring System components were observed and verified on this date. SB989 also done on this date performed by JOHN KNEISEL as well. I am waiting for the results.

DRAFT

BUSINESS:	FACILITY ID:	NOTICE#:	INSPECTION DATE:
BETTER LIFE ORGANICS	FA0012453	DAWZXT98H	06/04/2018

Tester provided the following certifications:
John Kneisel
ICC: 5252941 exp: 02/05/20120
VR: #B33233 exp: 05/01/2020
VMI:#2511 exp: 03/15/2020
Franklin Fueling Systems DC400: 01/30/2019

The UST monitoring panel showed all functions normal. Current monitoring setup and alarm history WERE available for review. The sumps WERE available for inspection and the sensors WERE observed positioned to detect a leak at the earliest opportunity. The spill buckets WERE also visually inspected. The Monitoring Plan WAS compared to the equipment on site. The operation of the UST system WAS compared to the conditions of the operating permit.

Tank Operator: Better Life Organics
Tank Owner: Lion WCP LLC
Property Owner: Lion WCP LLC

Designated Operator: JOHN KNEISEL ICC # 5252941 D.O EXP: 02-05-2020

Ensure submittal of monitor certification test results within 30 days using one of the following options in preferred order:
1. Upload results in California Environmental Reporting System (CERS) https://cersbusiness.calepa.ca.gov using the 'Miscellaneous State- Required Documents' link.
2. Email results to lafd.usttestnotify@lacity.org or via
3. Mail results via certified mail to: Los Angeles City Fire Department, CUPA Section, 200 N. Main St, Los Angeles, CA 90012

The following documents were available for review:

1. Business Activities Form and Business Owner / Operator Identification form
2. UST Facility Operating Permit Application
3. UST Tank Information forms
4. UST Monitoring Plan
5. UST Monitoring Site Plan
6. Owner Statement of Designated UST Operator Compliance
7. Designated UST Operator Monthly Reports
8. Alarm history reports and maintenance records
9. Employee training records: 06-04-2019
10. UST Response Plan

DRAFT

BUSINESS:	FACILITY ID:	NOTICE#:	INSPECTION DATE:
BETTER LIFE ORGANICS	FA0012453	DAWZXT98H	06/04/2018

11. Letter from Chief Financial Officer: N/A
12. Certificate of Financial Responsibility: INSURANCE EXP: 02-20-2019
13. Valid Consolidated Permit was available onsite
14. SB989 test results dated: 06-04-2018, 06-03-2015 PTT
15. Monitor Cert test results dated 06-05-2017, 06-06-2016, 06-03-2015 PTT
16. Spill bucket testing results date 06-05-2017, 06-06-2016, 06-03-2015 PTT

Document review in CERS on this date 06-04-2018. OBSERVED FACILITY HAD NOT SUBMITTED A CURRENT SUBMITTAL TO CERS FOR 2018

OBSERVATION: Owner/Operator did not maintain a list of employees trained by the DO. CORRECTED ONSITE: DO completed employee training during monitor cert.

OBSERVATION: Owner/Operator failed to have at least one employee present during operating hours that has been trained in the proper operation and maintenance of the UST system by a designated operator (DO). CORRECTED ONSITE: DO completed employee training during monitor cert.

OTHER OBSERVATION:

UNDER TANK INFORMATION IN CERS

1) IN SECTION TANK CONSTRUCTION FOR OVERFILL PROTECTION IT SHOWS "YES" FOR AUDIBLE & VISUAL ALARMS. CORRECTION CHANGE TO "NO"

UNDER TANK MONITORING PERFORMED

2) "YES" WAS SELECTED FOR CONTINUOUS ELECTRONIC MONITORING. CORRECTION THIS FACILITY'S ILS 350 DOES NOT PERFORM TANK MONITORING. SELECT "YES" TO WEEKLY MANUAL TANK GAUGE AS METHOD FOR TANK MONITORING.

NOTE:
To legally operate an underground storage tank (UST) in the City of Los Angeles you must be in possession of a valid Consolidated Permit issued by Los Angeles Fire Department CUPA. To receive a Consolidated Permit you must satisfy the following requirement:
1. The UST must be inspected by LAFD CUPA Inspectors and there must not be any open violations at the time when permits are issued on October 1st;
2. All required UST testing must be completed by the mandated due date and by approved testers;
3. All UST owners and/or operators must electronically submit in the California Environmental Reporting System (CERS) a complete UST package between each permitting cycle or any changes to the UST system.
4. The Consolidated Permit fees must be paid in full prior to the issuing of the Consolidated Permit.

REPORT IS EMAILED TO CEO BILL McCOY BETERLIFE@AOL.COM

This report shall serve as a “NOTICE TO COMPLY” for Minor Violations, and a “NOTICE OF VIOLATION” for Major violations. Formal enforcement and/or penalty assessment may be initiated for any violations noted, and for those not corrected in a timely manner. You are, hereby, ordered by the Fire Chief to correct the above noted violations **WITHIN 30 DAYS, OR FORTHWITH IF INDICATED IN THE CORRECTION SUMMARIES PROVIDED.**

UST Onsite Documentation

Testing Results

17 Owner/Operator has tested and certified leak detection equipment annually
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

18 Spill buckets have been tested annually as required
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

19 Secondary containment testing conducted every 36 months in accordance with requirements
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

Designated Operator Reports

20 Designated operator properly conducted the monthly inspection and the reports are complete
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

21 Copies of DO inspections for last 12 months and list of trained employees maintainted
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

23 DO employee training performed, current for at least one employee on site, and a log kept
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

Release Recording/Reporting

24 Suspected or actual unauthorized release reported in appropriate time frame
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

25 Leak detection alarm logs, maintenance and records of appropriate follow-up actions maintained
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

Maintenance - Repairs - Upgrades

26 Monitoring, maintenance, repairs, linings, and upgrade records maintained for the proper time period
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

False Statements

27 Owner/Operator has not made false statements or representation on any required document
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

UST System - Visual Inspection

Construction - Installation - Repair

28 UST system is made of or lined with materials that are compatible with the substance stored
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

29 Positive statement of compatibility for UST system components submitted and maintained on site
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

30 Striker plate installed and positioned correctly
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

Monitoring System

33 System constructed with a monitoring system capable of detecting entry into secondary containment
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

34 System constructed with a monitoring system capable of detecting entry into secondary containment
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

UST System - Visual Inspection

35 Leak detection equipment properly programmed or properly operated
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

36 Leak detection system maintains continuous monitoring that activates an audible and visual alarm
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

37 Facility is in compliance with not tampering with or disabling leak detection devices or alarms
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

38 Tag/sticker on affixed monitoring equipment being certified, repaired, or replaced
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

Spill Bucket

39 Spill bucket is installed and has a functional drain valve or other means to remove liquid
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

Overfill

42 UST system is operated to prevent unauthorized release, including spills and overfills
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

43 Overfill prevention system has not been overridden and meets overfill requirements
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

Sensor

44 Sensor located in the proper position/location
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

45 Turbine sump monitor activates an audible and visual alarm or stops the flow of at the dispenser
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

46 The annular space of the tank, piping and sumps are continously monitored and activates the alarm
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

Line Leak Detector

48 Line leak detector installed on pressurized piping system
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

49 Pressurized piping able to detect a 3.0 gph leak within an hour, and restricts the flow or alarms
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

Secondary Containment

51 UDC, sumps, and/or other secondary containment in good condition and/or are free of debris/liquid
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

52 Secondary containment maintained tight and has been confirmed by testing
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

53 Secondarily contained piping maintained to allow liquid to drain into sump
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

54 Product piping outside the UDC is fail-safe and shuts down the pump or restricts flow
■ NVO ☐ OUT ☐ NA ☐ UD ☐ COS ☐ RPT

MONITORING SYSTEM CERTIFICATION

For Use By All Jurisdictions Within the State of California
Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

A. General Information

Facility Name: **Better Life Organics** Bldg. No.:

Site Address: **2020 E. Seventh Pl.** City: **Los Angeles** Zip: **90021**

Facility Contact Person: **Bryan Frieders** Contact Phone No.: **(213) 623-0640**

Make/Model of Monitoring System: **Veeder Root ILS-350** Date of Testing/Servicing: **6/4/2018**

B. Inventory of Equipment Tested/Certified

Check the appropriate boxes to indicate specific equipment inspected/serviced:

Tank ID: **T1: 87**

- ☐ In-Tank Gauging Probe. Model:

DRAFT

D. Results of Testing/Servicing

Software Version Installed: **329753-002-A**

Complete the following checklist:

☒ Yes	☐ No*	Is the audible alarm operational?
☒ Yes	☐ No*	Is the visual alarm operational?
☒ Yes	☐ No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
☒ Yes	☐ No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
☐ Yes	☐ No* ☒ N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g., modem) operational?
☒ Yes	☐ No* ☐ N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes: which sensors initiate positive shut-down? *(Check all that apply)* ☒ Sump/Trench Sensors; ☒ Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failure/disconnection? ☒ Yes; ☐ No.
☐ Yes	☐ No* ☒ N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e., no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? %
☐ Yes*	☒ No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
☐ Yes*	☒ No	Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* ☐ Product; ☐ Water. If yes, describe causes in Section E, below.
☒ Yes	☐ No*	Was monitoring system set-up reviewed to ensure proper settings? Attach set up reports, if applicable
☒ Yes	☐ No*	Is all monitoring equipment operational per manufacturer's specifications?

*** In Section E below, describe how and when these deficiencies were or will be corrected.**

E. Comments: Veeder Root ILS-350 Does not have a printer.

T2: Diesel has a remote fill sump with a VR-208 sensor

-Sensor was tested and confirmed positive shutdown/passed.

DRAFT

F. In-Tank Gauging / SIR Equipment:

☐ Check this box if tank gauging is used only for inventory control.
☒ Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

☐ Yes	☐ No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
☐ Yes	☐ No*	Were all tank gauging probes visually inspected for damage and residue buildup?
☐ Yes	☐ No*	Was accuracy of system product level readings tested?
☐ Yes	☐ No*	Was accuracy of system water level readings tested?
☐ Yes	☐ No*	Were all probes reinstalled properly?
☐ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

G. Line Leak Detectors (LLD):

☐ Check this box if LLDs are not installed.

Complete the following checklist:

☒ Yes	☐ No* ☐ N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: ☒ 3 g.p.h.; ☐ 0.1 g.p.h ; ☐ 0.2 g.p.h.
☒ Yes	☐ No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
☒ Yes	☐ No*	Was the testing apparatus properly calibrated?
☒ Yes	☐ No* ☐ N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
☐ Yes	☐ No* ☒ N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
☐ Yes	☐ No* ☒ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☐ Yes	☐ No* ☒ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☐ Yes	☐ No* ☒ N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
☒ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

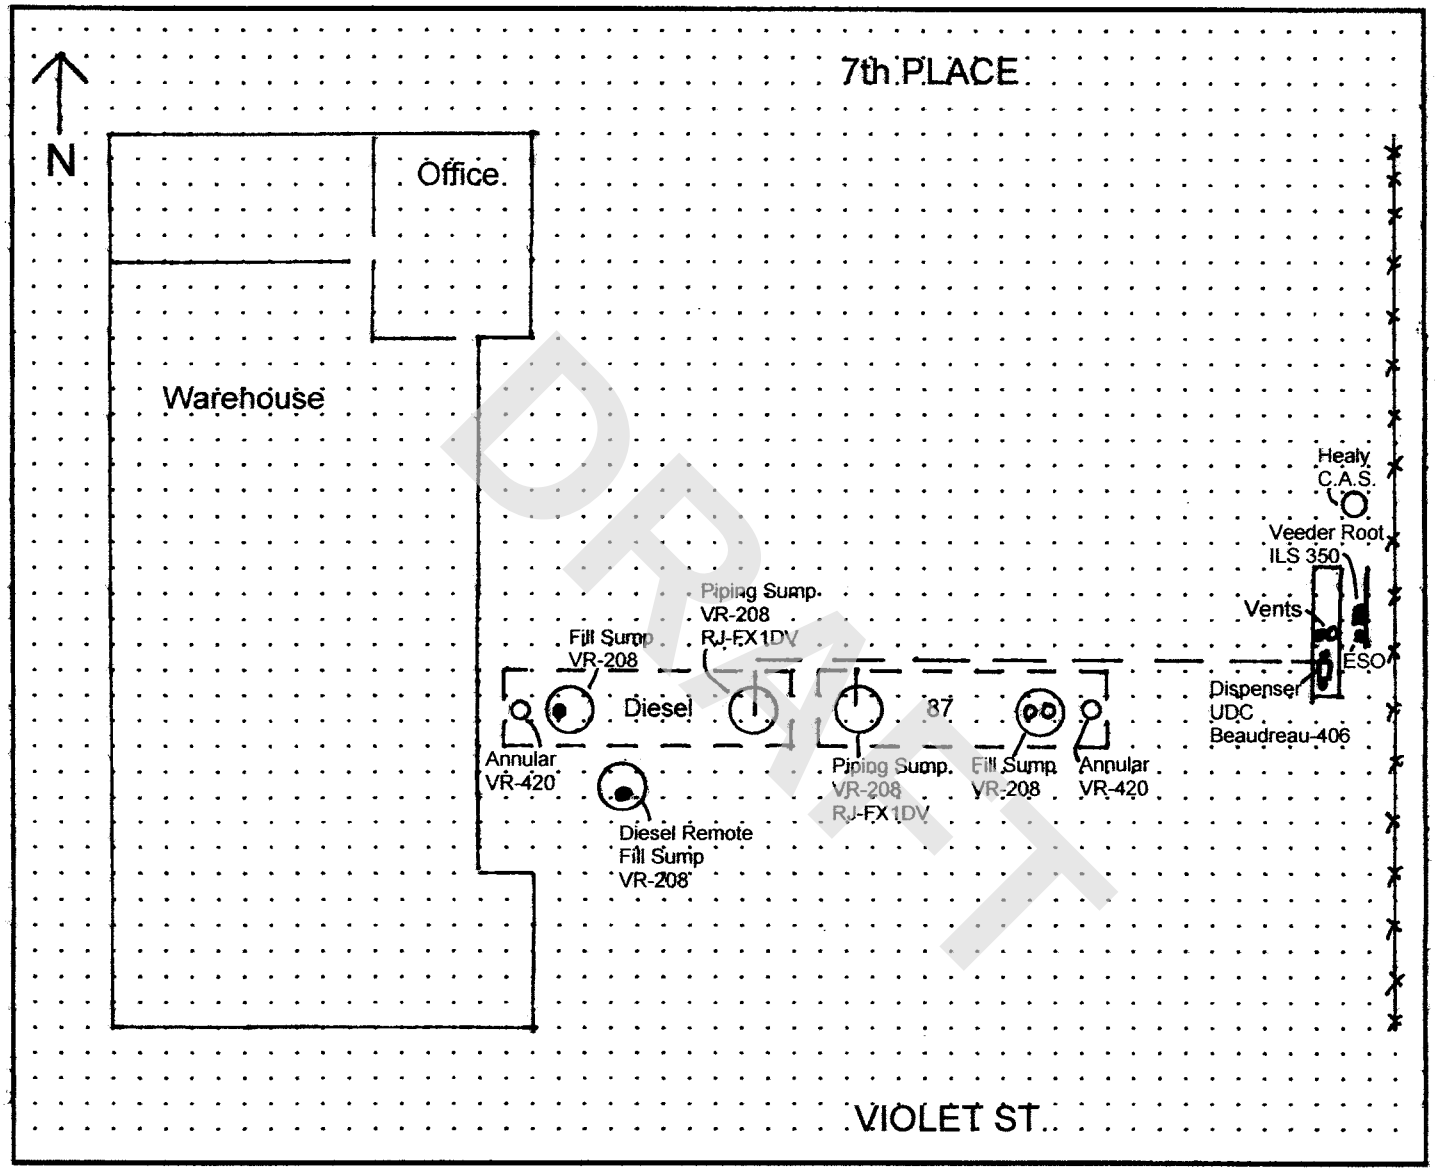
UST Monitoring Site Plan

Site Address: Better Life Organics 2020 E. 7th Place Los Angeles, Ca. 90021



DRAFT

Date map was drawn: 6 / 4 / 18 .

Instructions

If you already have a diagram that shows all required information, you may include it, rather than this page, with your Monitoring System Certification. On your site plan, show the general layout of tanks and piping. Clearly identify locations of the following equipment, if installed: monitoring system control panels; sensors monitoring tank annular spaces, sumps, dispenser pans, spill containers, or other secondary containment areas; mechanical or electronic line leak detectors; and in-tank liquid level probes (if used for leak detection). In the space provided, note the date this Site Plan was prepared.

MONITORING SYSTEM CERTIFICATION

For Use By All Jurisdictions Within the State of California
Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

A. General Information

Facility Name: **Better Life Organics** Bldg. No.: _____

Site Address: **2020 E. Seventh Pl.** City: **Los Angeles** Zip: **90021**

Facility Contact Person: **Bryan Frieders** Contact Phone No.: **(213) 623-0640**

Make/Model of Monitoring System: **Veeder Root ILS-350** Date of Testing/Servicing: **6/6/2016**

B. Inventory of Equipment Tested/Certified

Check the appropriate boxes to indicate specific equipment inspected/serviced:

Tank ID: T1: 87

- ☐ In-Tank Gauging Probe. Model: _____
- ☒ Annular Space or Vault Sensor. Model: **VR-420**
- ☒ Piping Sump / Trench Sensor(s). Model: **VR-208**
- ☒ Fill Sump Sensor(s). Model: **VR-208**
- ☒ Mechanical Line Leak Detector. Model: **Red Jacket FX1V**
- ☐ Electronic Line Leak Detector. Model: _____
- ☐ Tank Overfill / High-Level Sensor. Model: _____
- ☐ Other (specify equipment type and model in Section E on Page 2).

Tank ID: T2: Diesel

- ☐ In-Tank Gauging Probe. Model: _____
- ☒ Annular Space or Vault Sensor. Model: **VR-420**
- ☒ Piping Sump / Trench Sensor(s). Model: **VR-208**
- ☒ Fill Sump Sensor(s). Model: **VR-208**
- ☒ Mechanical Line Leak Detector. Model: **Red Jacket FX1DV**
- ☐ Electronic Line Leak Detector. Model: _____
- ☐ Tank Overfill / High-Level Sensor. Model: _____
- ☒ Other (specify equipment type and model in Section E on Page 2).

Tank ID: _____

- ☐ In-Tank Gauging Probe. Model: _____
- ☐ Annular Space or Vault Sensor. Model: _____
- ☐ Piping Sump / Trench Sensor(s). Model: _____
- ☐ Fill Sump Sensor(s). Model: _____
- ☐ Mechanical Line Leak Detector. Model: _____
- ☐ Electronic Line Leak Detector. Model: _____
- ☐ Tank Overfill / High-Level Sensor. Model: _____
- ☐ Other (specify equipment type and model in Section E on Page 2).

Tank ID: _____

- ☐ In-Tank Gauging Probe. Model: _____
- ☐ Annular Space or Vault Sensor. Model: _____
- ☐ Piping Sump / Trench Sensor(s). Model: _____
- ☐ Fill Sump Sensor(s). Model: _____

D. Results of Testing/Servicing

Software Version Installed: **329753-002-A**

Complete the following checklist:

☒ Yes	☐ No*	Is the audible alarm operational?
☒ Yes	☐ No*	Is the visual alarm operational?
☒ Yes	☐ No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
☒ Yes	☐ No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
☐ Yes	☐ No* ☒ N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g., modem) operational?
☒ Yes	☐ No* ☐ N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes: which sensors initiate positive shut-down? *(Check all that apply)* ☒ Sump/Trench Sensors; ☒ Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failure/disconnection? ☒ Yes; ☐ No.
☐ Yes	☐ No* ☒ N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e., no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? %
☐ Yes*	☒ No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
☐ Yes*	☒ No	Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* ☐ Product; ☐ Water. If yes, describe causes in Section E, below.
☒ Yes	☐ No*	Was monitoring system set-up reviewed to ensure proper settings? Attach set up reports, if applicable
☒ Yes	☐ No*	Is all monitoring equipment operational per manufacturer's specifications?

*** In Section E below, describe how and when these deficiencies were or will be corrected.**

E. Comments: Veeder Root ILS-350 Does not have a printer.

T2: Diesel has a remote fill sump with a VR-208 sensor. Sensor was tested and confirmed positive shutdown/passed.

DRAFT

F. In-Tank Gauging / SIR Equipment:

☐ Check this box if tank gauging is used only for inventory control.
☒ Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

☐ Yes	☐ No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
☐ Yes	☐ No*	Were all tank gauging probes visually inspected for damage and residue buildup?
☐ Yes	☐ No*	Was accuracy of system product level readings tested?
☐ Yes	☐ No*	Was accuracy of system water level readings tested?
☐ Yes	☐ No*	Were all probes reinstalled properly?
☐ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In the Section H, below, describe how and when these deficiencies were or will be corrected.**

G. Line Leak Detectors (LLD):

☐ Check this box if LLDs are not installed.

Complete the following checklist:

☒ Yes	☐ No* ☐ N/A	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: ☒ 3 g.p.h.; ☐ 0.1 g.p.h ; ☐ 0.2 g.p.h.
☒ Yes	☐ No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
☒ Yes	☐ No*	Was the testing apparatus properly calibrated?
☒ Yes	☐ No* ☐ N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
☐ Yes	☐ No* ☒ N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
☐ Yes	☐ No* ☒ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☐ Yes	☐ No* ☒ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☐ Yes	☐ No* ☒ N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
☒ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

6. PIPING SUMP TESTING

Test Method Developed By:	☐ Sump Manufacturer ☐ Other *(Specify)*	☒ Industry Standard	☐ Professional Engineer
Test Method Used:	☐ Pressure ☐ Other *(Specify)*	☐ Vacuum	☒ Hydrostatic
Test Equipment Used**: INCON**		Equipment Resolution: **0.0001**	

	Sump #1 87	**Sump #2** DSL		
Sump Diameter:	42"	42"		
Sump Depth:	40"	40"		
Sump Material:	Fiberglass	Fiberglass		
Height from Tank Top to Top of Highest Piping Penetration:	20"	29"		
Height from Tank Top to Lowest Electrical Penetration:	17"	19"		
Condition of sump prior to testing:	Clean / Dry	Clean / Dry		
Portion of Sump Tested[1]	4" above high pen.	4" above high pen.		
Does turbine shut down when sump sensor detects liquid (both product and water)?*	☒Yes ☐No ☐NA	☒Yes ☐No ☐NA		
Turbine shutdown response time	5 sec.	5 sec.		
Is system programmed for fail-safe shutdown?*	☒Yes ☐No ☐NA	☒Yes ☐No ☐NA		
Was fail-safe verified to be operational?*	☒Yes ☐No ☐NA	☒Yes ☐No ☐NA		
Wait time between applying pressure/vacuum/water and starting test:	15 Min.	15 Min.		
Test Start Time:	10:00	10:34		
Initial Reading (R_I):	6.1948	5.7688		
Test End Time:	10:15	10:49		
Final Reading (R_F):	6.1961	5.7698		
Test Duration:	15 Min.	15 Min.		
Change in Reading (R_F-R_I):	+0.0013	+0.0010		
Pass/Fail Threshold or Criteria:	+/-**0.002**	+/-**0.002**		
Test Result:	☒**Pass** ☐**Fail**	☒**Pass** ☐**Fail**		
Was sensor removed for testing?	☒Yes ☐No ☐NA	☒Yes ☐No ☐NA		
Was sensor properly replaced and verified functional after testing?	☒Yes ☐No ☐NA	☒Yes ☐No ☐NA		

DRAFT

Comments – *(include information on repairs made prior to testing, and recommended follow-up for failed tests)*

[1] If the entire depth of the sump is not tested, specify how much was tested. If the answer to any of the questions indicated with an asterisk (*) is "NO" or "NA", the entire sump must be tested. (See SWRCB LG-160)

7. UNDER-DISPENSER CONTAINMENT (UDC) TESTING

Test Method Developed By:	☐ UDC Manufacturer ☐ Other *(Specify)*	☒ Industry Standard	☐ Professional Engineer
Test Method Used:	☐ Pressure ☐ Other *(Specify)*	☐ Vacuum	☒ Hydrostatic
Test Equipment Used: Gauge Stick		Equipment Resolution: +/- 1/16"	

	UDC #1 1/2			
UDC Manufacturer:	Bravo (Deep)			
UDC Material:	Fiberglass			
UDC Depth:	28"			
Height from UDC Bottom to Top of Highest Piping Penetration:	14"			
Height from UDC Bottom to Lowest Electrical Penetration:	15"			
Condition of UDC prior to testing:	Clean/Dry			
Portion of UDC Tested[1]	4" above high pen.			
Does turbine shut down when UDC sensor detects liquid (both product and water)?*	☒Yes ☐No ☐NA			
Turbine shutdown response time	5 Sec.			
Is system programmed for fail-safe shutdown?*	☒Yes ☐No ☐NA			
Was fail-safe verified to be operational?*	☒Yes ☐No ☐NA			
Wait time between applying pressure/vacuum/water and starting test	30 Min.			
Test Start Time:	8:00			
Initial Reading (R_I):	12"			
Test End Time:	9:00			
Final Reading (R_F):	12"			
Test Duration:	60 Min.			
Change in Reading (R_F-R_I):	0.0"			
Pass/Fail Threshold or Criteria:	+/- 1/8"			
Test Result:	☒ **Pass** ☐ **Fail**			
Was sensor removed for testing?	☒Yes ☐No ☐NA			
Was sensor properly replaced and verified functional after testing?	☒Yes ☐No ☐NA			

DRAFT

Comments – *(include information on repairs made prior to testing, and recommended follow-up for failed tests)*

[1] If the entire depth of the UDC is not tested, specify how much was tested. If the answer to any of the questions indicated with an asterisk (*) is "NO" or "NA", the entire UDC must be tested. (See SWRCB LG-160)

8. FILL RISER CONTAINMENT SUMP TESTING

Facility is Not Equipped With Fill Riser Containment Sumps ☐				
Fill Riser Containment Sumps are Present, but were Not Tested ☐				
Test Method Developed By:	☐ Sump Manufacturer ☐ Other *(Specify)*	**X Industry Standard**	☐ Professional Engineer	
Test Method Used:	☐ Pressure ☐ Other *(Specify)*	☐ Vacuum	**X Hydrostatic**	
Test Equipment Used: **INCON**			Equipment Resolution: **0.0001**	

	Fill Sump #1 87	**Fill Sump #2 Diesel**	**Fill Sump #3 Remote**	
Sump Diameter:	42"	42"	42"	
Sump Depth:	42"	42"	42"	
Height from Tank Top to Top of Highest Piping Penetration:	27"	29"	30"	
Height from Tank Top to Lowest Electrical Penetration:	21"	29"	32"	
Condition of sump prior to testing:	Clean/Dry	Clean/Dry	Clean/Dry	
Portion of Sump Tested	4" above high pen.	4" above high pen.	4" above high pen.	
Sump Material:	Fiberglass	Fiberglass	Fiberglass	
Wait time between applying pressure/vacuum/water and starting test:	30 Min.	30 Min.	30 Min.	
Test Start Time:	9:26	11:10	11:43	
Initial Reading (R_I):	6.2427	5.6972	6.7342	
Test End Time:	9:41	11:25	11:58	
Final Reading (R_F):	6.2424	5.6982	6.7345	
Test Duration:	15 Min.	15 Min.	15 Min.	
Change in Reading (R_F-R_I):	-0.0003	+0.0010	+0.0003	
Pass/Fail Threshold or Criteria:	+/- 0.002	+/- 0.002	+/- 0.002	
Test Result:	☒ **Pass** ☐ **Fail**	☒ **Pass** ☐ **Fail**	☒ **Pass** ☐ **Fail**	
Is there a sensor in the sump?	☒Yes ☐No ☐NA	☒Yes ☐No ☐NA	☒Yes ☐No ☐NA	
Does the sensor alarm when either product or water is detected?	☒Yes ☐No ☐NA	☒Yes ☐No ☐NA	☒Yes ☐No ☐NA	
Was sensor removed for testing?	☒Yes ☐No ☐NA	☒Yes ☐No ☐NA	☒Yes ☐No ☐NA	
Was sensor properly replaced and verified functional after testing?	☒Yes ☐No ☐NA	☒Yes ☐No ☐NA	☒Yes ☐No ☐NA

CONSTRUCTION NOTES

1. INSTALL (2) TRUSCO-10,000 GALLON DOUBLE WALL U.S.T.'S. ('SUPERTANKS')
2. U.S.T.'S WILL BE PLACED ON A 12" PEA GRAVEL BED AND BACKFILLED WITH SAME.
3. PIPING CONNECTIONS WILL HAVE U.L. LISTED FLEX CONNECTORS ~~OR SWING JOINTS~~
4. VENT PIPE WILL TERMINATE A MINIMUM 12' ABOVE GRADE AND 18" ABOVE ANY ROOF LINE WITHIN 15'.
5. ALL UNDERGROUND PIPING WILL BE A.O. SMITH "RED THREAD II" FIBERGLASS.
6. DISPENSER WILL HAVE "BRAVO" CONTAINMENT PAN WITH SHEAR VALVE.
7. TURBINES WILL HAVE POSITIVE SHUT DOWN VIA THE LEAK MONITOR.
8. 6" RE-INFORCED SLAB 1' BEYOND TANK PERIMETERS.
9. ALL MANHOLES ARE SECUREABLE AND TRAFFIC RATED AND WILL BE SET A MINIMUM 1½" ABOVE GRADE.
10. DISPENSING HOSES WILL HAVE BREAKAWAY COUPLINGS.
11. EMERGENCY SHUT-OFF SWITCH BETWEEN 25'-75' FROM DISPENSER.
12. PER L.A. COUNTY HYDRO-GEOLOGICAL RECORDS GROUND WATER IS AT 144'. WELL # 2837B, TESTED 10-1-97, LOCATED AT WHITTIER AND MCBRIDE.

LOS ANGELES	CA	90021	(213) 485-1633

IV. BOARD OF EQUALIZATION UST STORAGE FEE ACCOUNT NUMBER - Call (916) 323-9555 if questions arise.

TY (TK) HQ 44-035459

V. PETROLEUM UST FINANCIAL RESPONSIBILITY - (MUST BE COMPLETED) – IDENTIFY THE METHOD(S) USED

✓ box to indicate: ☑ 1 SELF-INSURED ☐ 2 GUARANTEE ☐ 3 INSURANCE ☐ 4 SURETY BOND ☐ 5 LETTER OF CREDIT ☐ 6 EXEMPTION ☐ 99 OTHER

VI. LEGAL NOTIFICATION AND BILLING ADDRESS

Legal notification and billing will be sent to the tank owner unless box I or II is checked.

CHECK ONE BOX INDICATING WHICH ABOVE ADDRESS SHOULD BE USED FOR LEGAL NOTIFICATIONS AND BILLING: I ☐ II. ☐ III ☑

THIS FORM HAS BEEN COMPLETED UNDER PENALTY OF PERJURY, AND TO THE BEST OF MY KNOWLEDGE, IS TRUE AND CORRECT

APPLICANT'S NAME (PRINTED & SIGNATURE)	APPLICANT'S TITLE	DATE MONTH/DAY/YEAR
CHARLES MOINE	CONTRACTOR	9/24/93

LOCAL AGENCY USE ONLY

COUNTY #	JURISDICTION #	FACILITY #
19	050	004006

LOCATION CODE - *OPTIONAL*	CENSUS TRACT # - *OPTIONAL*	SUPVISOR - DISTRICT CODE - *OPTIONAL*

THIS FORM MUST BE ACCOMPANIED BY AT LEAST (1) OR MORE PERMIT APPLICATION - FORM B, UNLESS THIS IS A CHANGE OF SITE INFORMATION ONLY.

DRAFT

INSTRUCTIONS FOR COMPLETING FORM "A"

GENERAL INSTRUCTIONS:

1. ONE FORM "A" shall be completed for all NEW PERMITS, PERMIT CHANGES or any FACILITY/SITE INFORMATION CHANGES.
2. SUBMIT ONLY ONE (1) FORM "A" for a Facility/Site, regardless of the number of tanks located at the site
3. Shall be completed by either the PERMIT APPLICANT or the LOCAL AGENCY UNDERGROUND TANK INSPECTOR.
4. Please type or print clearly all requested information.
5. Use a hard point writing instrument, you are making 3 copies.

TOP OF FORM: "MARK ONLY ONE ITEM".

Mark an (X) in the box next to the item that best describes the reason the form is being completed.

I. FACILITY/SITE INFORMATION & ADDRESS (MUST BE COMPLETED)

1. Record name and address (physical location) of the underground tank(s).
   NOTE: Address MUST have a valid physical location including city, state, and zip code.
   P.O. BOX NUMBERS ARE NOT ACCEPTABLE.
   Include nearest cross street and name of the operator
2. Phone number must have an area code. If the night number is the same, write "SAME" in proper location.
3. Check the appropriate box for TYPE OF BUSINESS OWNERSHIP (ex. CORPORATION, INDIVIDUAL, etc.)
4. Check the appropriate box for TYPE OF BUSINESS.
5. If Facility/Site is located within an Indian reservation or other Indian trust lands, check the box marked "YES"
6. Indicate the NUMBER of TANKS at this SITE.
7. Record the E.P.A. ID # or write "NONE" in the space provided.

II. PROPERTY OWNER INFORMATION & ADDRESS (MUST BE COMPLETED)

Complete all items in this section, unless all items are the same as SECTION 1; if the same, write **"SAME AS SITE"** across this section. Be sure to check PROPERTY OWNERSHIP TYPE box.

III. TANK OWNER INFORMATION & ADDRESS (MUST BE COMPLETED)

Complete all items in this section, unless all items are the same as SECTION 1; If the same, write **"SAME AS SITE"** across this section. Be sure to check **TANK OWNERSHIP TYPE** box.

IV. BOARD OF EQUALIZATION UST STORAGE FEE ACCOUNT NUMBER (MUST BE COMPLETED)

Enter your Board of Equalization (BOE) UST storage fee account number which is required before your permit application can be processed. Registration with the BOE will ensure that you will receive a quarterly storage fee return in reporting the $0.006 (6 mils) per gallon fee due on the number of gallons placed in your USTs. The BOE will code persons exempt from paying the storage fee so returns will not be sent. If you do not have an account number with the BOE or if you have any questions regarding the fee or exemptions, please call the BOE at 916-323-9555 or write to the BOE at the following address Board of Equalization, Environmental Fees Unit, P.O. Box 942879, Sacramento, CA 94279-0001.

V. PETROLEUM UST FINANCIAL RESPONSIBILITY (MUST BE COMPLETED)

Identify the method(s) used by the owner and/or operator in meeting the Federal and State financial responsibility requirements. USTs owned by any Federal or State agency are exempt from this requirement.

VI. LEGAL NOTIFICATION AND BILLING ADDRESS

Check ONE BOX for the address that will be used for BOTH LEGAL AND BILLING NOTIFICATIONS.

APPLICANT MUST SIGN AND DATE THE FORM AS INDICATED.

INSTRUCTION FOR THE LOCAL AGENCIES

The county and jurisdiction numbers are predetermined and can be obtained by calling the State Board (916)739-2421. The facility number may be assigned by the local agency: however, this number must be numerical and cannot contain any alphabetical. If the local agency prefers the State Board to assign the facility number, please leave it blank.

IT IS THE RESPONSIBILITY OF THE LOCAL AGENCY THAT INSPECTS THE FACILITY TO VERIFY THE ACCURACY OF THE INFORMATION. THIS APPLICATION CANNOT BE PROCESSED IF THE BOE ACCOUNT NUMBER IS NOT FILLED IN. THE LOCAL AGENCY IS RESPONSIBLE FOR THE COMPLETION OF THE "LOCAL AGENCY USE ONLY" INFORMATION BOX AND FOR FORWARDING ONE FORM "A" AND ASSOCIATED FORM "B"(s) TO THE FOLLOWING ADDRESS.

FOR SPECIFIC TOXICS.

DRAFT

In the event of any physical or atmospheric changes adversely affecting the STANDARD SAFETY DESIGNATIONS assigned to any of the above spaces, or if in any doubt, immediately stop all work and contact the undersigned Marine Chemist.

QUALIFICATIONS: Transfer of ballast or manipulation of valves or closure equipment tending to alter conditions in pipe lines, tanks or compartments subject to gas accumulation, unless specifically approved in this Certificate, requires inspection and endorsement or reissue of Certificate for the spaces so affected. All lines, vents, heating coils, valves, and similarly enclosed appurtenances shall be considered "not safe" unless otherwise specifically designated.

STANDARD SAFETY DESIGNATIONS (partial list, paraphrased from NFPA 306 Subsections 2-3.1 through 2-3.5, and Subsection 6-3.2)

SAFE FOR WORKERS: Means that in the compartment or space so designated: (a) the oxygen content of the atmosphere is at least 19.5 percent by volume; and that, (b) toxic materials in the atmosphere are within permissible concentrations; and that, (c) the residues are not capable of producing toxic materials under existing atmospheric conditions while maintained as directed on the Marine Chemist's Certificate.

NOT SAFE FOR WORKERS. Means that in the compartment or space so designated, the requirements of Safe for Workers have not been met.

ENTER WITH RESTRICTIONS: Means that in any compartment or space so designated, entry for work may be made only if conditions of proper protective equipment, clothing, and time are as specified.

SAFE FOR HOT WORK: Means that in the compartment so designated: (a) oxygen content of the atmosphere is at least 19.5 percent by volume, with the exception of inerted spaces or where external hot work is to be performed; and that, (b) the concentration of flammable materials in the atmosphere is below 10 percent of the lower flammable limit; and that, (c) the residues are not capable of producing a higher concentration than permitted by (b) above under existing atmospheric conditions in the presence of fire, and while maintained as directed on the Marine Chemist's Certificate, and further, that, (d) all adjacent spaces containing or having contained flammable or combustible materials have been cleaned sufficiently to prevent the spread of fire, or are satisfactorily inerted, or, in the case of fuel tanks or lube oil tanks, or engine room or fire room bilges, have been treated in accordance with the Marine Chemist's requirements.

NOT SAFE FOR HOT WORK. Means that in the compartment so designated, the requirements of Safe for Hot Work have not been met.

CHEMIST'S ENDORSEMENT. This is to certify that I have personally determined that all spaces in the foregoing list are in accordance with NFPA 306 Control of Gas Hazards on Vessels and have found the condition of each to be in accordance with its assigned designation.

"The undersigned acknowledges receipt of this Certificate under Section 2-6 of NFPA 306 and understands conditions and limitations under which it was issued."

This Certificate is based on conditions existing at the time the inspection herein set forth was completed and is issued subject to compliance with all qualifications and instructions.

Re: Permit #6720
West Central Produce
2017 Violet St., Los Angeles

Dear Inspector Alexander:

On 6/12/98, we installed (2) TRUSCO 10,000-gal. underground storage tanks. Both tanks have (2) 4" collars.

A Holiday test was performed prior to installation.

The tanks were placed on a 12" bed of pea gravel and backfilled with same.

Tank U.L. Nos.: M588037, M588038.

Sincerely,

George Lawson
Construction Manager

ENVIRONMENTAL CONSULTING

Introduction

In conjunction with Moine Brothers of Wilmington, California (Contractor's License No. 343468), Targhee, Incorporated performed a soil sampling program following removal of five underground storage tanks from the subject property at 2017 Violet Street, Los Angeles, California 90021 (Attachment A). The tank was removed on October 5, 1993 under Los Angeles City Fire Department Permit No. 3283.

One 10,000-gallon underground gasoline storage tank and two 1,000-gallon gasoline storage tanks were removed from the area immediately north of the southwestern building at the subject site. Two 1,000-gallon waste oil tanks were removed from the area east of the elongated shed in the northwestern part of the subject site. The waste oil tanks were originally permitted as 550-gallon tanks; however, excavation of this area revealed that each of these tanks was of a 1,000-gallon capacity. The locations of the tank excavations are shown on the Soil Sample Location Map in Attachment B.

All samples obtained during the sampling program were entered onto a Chain-of-Custody document and delivered to a state-certified laboratory for analysis.

Inspector John E. Sparks, a representative of the Los Angeles City Fire Department, was on site to observe the tank removal and direct the soil sampling.

Geology

According to the California Department of Water Resources (CDWR) Bulletin No. 104, which was published in June 1961, the subject property is located in the Los Angeles Forebay area of the Central Basin. The site is directly underlain by alluvial sediments of Recent age.

The sediments on the subject property in the vicinity of the underground storage tanks consist of thinly bedded sands and silty sands. Several sedimentary horizons were observed on the walls of the 10,000-gallon tank excavation. Bedding was observed in some of the sand horizons indicating that the excavation extended into the natural sediments. The sequence of sediments from the ground surface downward in this excavation is as follows:

DRAFT

0'-3': massive, brown sandy silt; probably fill.

3'-4': massive, dark brown silt; probably fill.

4'-6': medium-to-coarse grained, thin-bedded, light brown sand; natural.

6'-7': massive, dark brown silt.

7'-9': thin-bedded, light brown sand and silty sand.

9'-11': massive, brown sandy silt.

11'-13': thin-bedded, brown sand; becomes coarser grained toward south.

DRAFT

Tank Removal

One 10,000-gallon underground gasoline storage tank, two 1,000-gallon underground gasoline storage tanks, and two 1,000-gallon waste-oil tanks were removed from the subject site on October 5, 1993. The gasoline tanks were removed from two excavations north of the northwestern corner of the southwestern building at the site. The waste oil tanks were removed from an excavation east of the elongated shed in the northwestern corner of the site. The tanks were numbered as follows:

- 6174.1 - 10,000-gallon gasoline tank
- 6174.2 - 1,000-gallon gasoline tank (northern tank)
- 6174.3 - 1,000-gallon gasoline tank (southern tank)
- 6174.4 - 1,000-gallon waste oil tank (southern tank)
- 6174.5 - 1,000-gallon waste oil tank (northern tank)

All of the tanks consisted of single-wall steel construction. Tank 6174.5 contained some small holes in western part of the bottom of the tank. No holes were noted in any of the other tanks. The tanks were in fair-to-good condition and showed some surficial moisture and rust.

Sampling Procedures

At the request of Inspector John E. Sparks of the Los Angeles City Fire Department, soil samples were collected from the tank excavation spoils piles and from beneath each of the former tanks. In addition, a background sample was collected for lead analyses. The locations of all of the soil samples are shown in Attachment B.

Soil samples were collected from the natural soils at a depth of approximately three feet below the tanks as follows:

Tank No.	Sample No.	Comments
6174.1	T1-1	13' below ground surface (bgs); dark brown sandy silt; no odor.
	T1-2	13' bgs; fine-grained, brown sand; no odor.
	T1-3	13' bgs; coarse-grained, brown sand; no odor.
6174.2	T2-1	9' bgs; coarse-grained, light brown sand; no odor.
6174.3	T3-1	9' bgs; coarse-grained, light brown sand; no odor.
6174.4	T4-1	8' bgs; coarse-grained, light brown sand; no odor.
6174.5	T5-1	8' bgs; coarse-grained, light brown sand; no odor.

Six soil sampled were collected from the spoils piles. All samples were collected from a depth of about two feet below the surface of the piles. Samples S1, S2, S3, and S4 were collected at 20-foot intervals from the large spoils pile east of the gasoline tanks. Samples S5 and S6 were collected from the spoils piles at the waste oil tanks. Sample S6 contained a faint oily odor. The remaining samples from the spoils piles did not appear to be impacted by hydrocarbons.

Sample BG was collected to provide a background level for lead concentrations in the area. This sample was collected from the grassy boulevard area in front of the southwestern building at the site. The sample was collected with a hand auger from a depth of approximately 4½ feet below ground surface.

All samples were collected in 8-oz. glass jars with Teflon®-lined lids and submitted to a state-certified laboratory for analyses. All samples collected from the gasoline tank excavations and the gasoline tank spoils pile were analyzed for gasoline using EPA Method 8015 modified for gasoline, BTEX compounds (benzene, toluene, ethylbenzene, and xylenes) using EPA Method 8020, and lead using EPA Method 7420. All samples collected from the waste oil tank excavation and the waste oil tank spoils piles were analyzed

DRAFT

for Total Recoverable Petroleum Hydrocarbons (TRPH) using EPA Method 418.1 and for BTEX compounds using EPA Method 8020. Sample BG was analyzed for lead using EPA Method 7420. All analyses were requested by Inspector Sparks of the Los Angeles City Fire Department. Standard sample handling procedures and standard Chain-of-Custody procedures were utilized for sample transportation and submittal and are contained in Attachment C.

Analytical Results

The soil samples collected during the tank removal at the subject site were analyzed by Geochem Environmental Laboratory in Irvine, California. The analytical results, which are tabulated in parts per million (ppm), are contained in Attachment D.

None of the soil samples which were analyzed for gasoline, BTEX compounds, or lead contained these compounds in concentrations above their detection limits. The background value obtained for lead in the area from sample BG was also below detection limits. Soil samples collected from the waste oil tanks contained detectable quantities of TRPH. Soil sample S6, which was obtained from the spoils pile at tank No. 6714.5, contained 284 ppm TRPH. The remainder of the soil samples from the waste oil tank excavation contained less that 13 ppm TRPH.

Gentlemen: Re: Installation of one atmospheric tank.

We are returning herewith one copy of your drawing indicating the installation as per above subject with our Engineering Approval #1398, which authorizes you to make the installation as per attached Permit #103.

This installation is subject to field inspection and approval by a Fire Department representative prior to covering of tank and piping. In addition, final approval in writing shall be obtained from field inspector before installation may be placed in operation.

Section 57.04.03 requires that all fueling stations have a permit, which shall be secured from the City Clerk's Office, Room 1, City Hall.

Please contact Capt. R. Seems of our Central Unit, telephone MAdison 8-6161, to make necessary arrangements for inspection.

Very truly yours,

WILLIAM L. MILLER, CHIEF ENGINEER

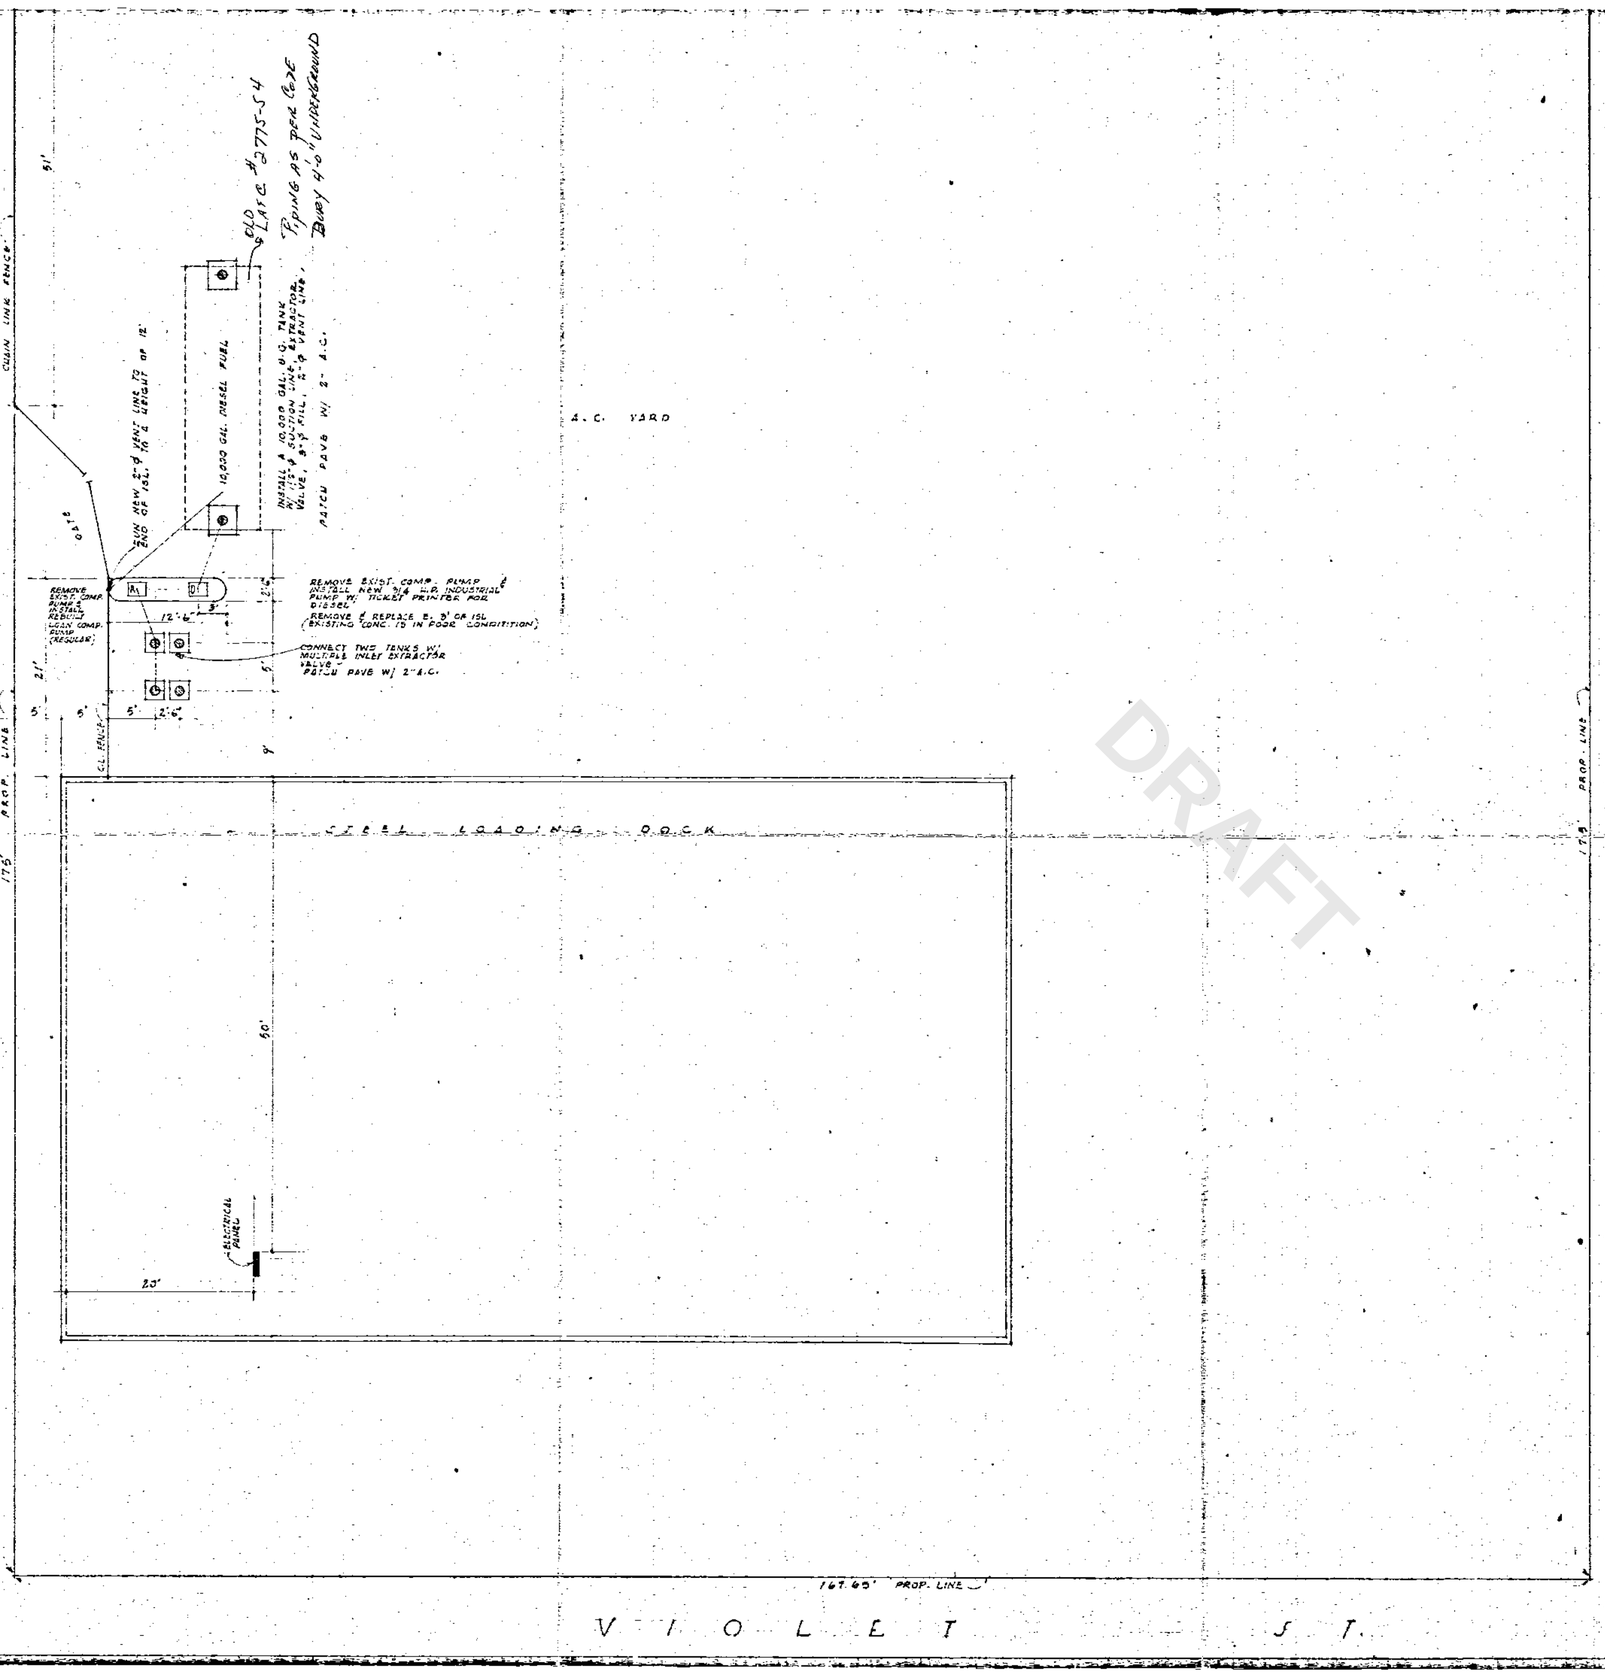
B. W. Bradford



SCOPE OF WORK

1. Install one 10,000 gal. U.G. Tank, 12' section, extractor valve, 8' fill, 2" vent. (For diesel fuel)
2. Remove two existing computer pumps - leave on property.
3. Connect two exist. 1,000 gal. U.G. tanks together using "Multiple Inlet Angle Check Valve-Extractor type". These two tanks will be for Mobilgas Regular.
4. Remove broken section of concrete island - and replace with new section 3' x 2'-6"
5. Install on island: (Run new vent at island)
   a. New Industrial 3/4 H.P. pump w/Keen Start Ticket Printer, Automatic nozzle. (Diesel)
   b. On Loan Equipment, one used Computer Pump with automatic nozzle.
6. Hookup pumps to existing electrical system.
7. Patch pave with A.C.
8. This job must be scheduled for a three day construction period.

DRAFT

Our Environmental Lien and AUL report provides a summary of recorded information on a specific property from the time the current owner purchased the property, to present time. The report is intended to assist in the search for environmental liens filed in land title records. The report will verify property ownership and provide information on recorded environmental liens and/or Activity and Use Limitations that have been recorded from the time the current owner purchased the property, forward.

Our professional network of trained researchers follow established industry protocols and use client-supplied property information to complete this Environmental Lien and AUL report. The research is conducted at all appropriate government offices based on the location of the subject property. This would include city, county, state, federal and tribal offices as needed. The report includes:

- Current deed information (i.e. grantor, grantee, recording dates)
- Legal Description
- Environmental Lien information
- Activity and Use Limitation information
- Copies of any Environmental Liens and/or documents referencing AULs that are listed within our summary report

-Disclaimer-

This report was prepared for the use of **AFX Research LLC** (AFX), exclusively. This report is neither a guarantee of title, a commitment to insure, nor a policy of title insurance. **NO WARRANTY, EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT.** AFX specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular use or purpose. The information contained in this report is retrieved as it is recorded from the various agencies that make it available. The total liability is limited to the fee paid for this report.

APPENDIX G

ASTM USER QUESTIONNAIRE

DRAFT

AEI Consultants

ASTM E 1527-13 USER QUESTIONNAIRE

To qualify for the protection offered under the EPA All Appropriate Inquiry (AAI) Standard, the User (entities seeking to use the ASTM E1527-13 Practice to complete an environmental site assessment of the property; i.e. Lenders and/or Borrowers) must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that AAI is not complete. This information should be the collective knowledge of the entities relying on the Phase I. **Please note that you are not being asked to evaluate the property, but rather to provide your knowledge of information on the property.**

Phone/Email:	(917) 543-4690 (mobile) (work phone above)
Past Owner (Name/Title/Company)	C/O: Mory Barak, Lion Real Estate, owner name is D.C.M., LLC
Phone/Email:	T: (310) 526-3103 x 201, mory.barak@lionreg.com

1. Environmental cleanup liens that are filed or recorded against the property (40 CFR 312.25).
Did a search of recorded land title records (or judicial records where appropriate, see NOTE 1 below) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?

NOTE 1: In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

☐ Yes ☐ No If yes, please include an explanation in the space provided below:

2. Activity and land use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi).
Did a search of recorded land title records (or judicial records where appropriate, see NOTE 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

Engineering Controls are defined as physical modifications to a site or facility to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property). Institutional Controls are defined as a legal or administrative restriction on the use of, or access to, a site or facility to 1) reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property, or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.

☐ Yes ☐ No If yes, please include an explanation in the space provided below:

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).
Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

☐ Yes ☐ No If yes, please include an explanation in the space provided below:

DRAFT

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).
Does the purchase price being paid for this property reasonably reflect the fair market value of the property?

☐ Yes ☐ No

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

☐ Yes ☐ No

Comments:

N/A

5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).
Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:

a. Do you know the past uses of the property?
☐ Yes ☐ No

b. Do you know of specific chemicals that are present or once were present at the property?
☐ Yes ☐ No

c. Do you know of spills or other chemical releases that have taken place at the property?
☐ Yes ☐ No

d. Do you know of any environmental cleanups that have taken place at the property?
☐ Yes ☐ No

If yes for questions above, please include an explanation in the space provided below:

DRAFT

6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).
Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

☐ Yes ☐ No If yes, please include an explanation in the space provided below:

Eric Fraske

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 312.10 of this part. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Lloyd Guss

CONTINUED VIABLITY/EXPIRY

ASTM E1527-13 provides that a conforming environmental site assessment completed less than 180 days prior to the date of the intended transaction is presumed to be valid.

Additionally, an environmental assessment for which the information was collected or updated within one year prior to the transaction may be used provided that the following components were conducted or updated within 180 days of the date of the transaction:

- interviews with owners, operators, and occupants;
- searches for recorded environmental cleanup liens;
- reviews of federal, tribal, state, and local government records;
- visual inspections of the subject property and of adjoining properties; and
- the declaration by the environmental professional responsible for the assessment or update.

Standard Guide E2600 for Vapor Encroachment Screening (VES), referenced in ASTME1527-13 provides that the VES is subject to the same expiry schedule as those in the Practice.

DRAFT

1 FINDINGS AND CONCLUSIONS

Professional Service Industries, Inc. (PSI) performed a Phase I Environmental Site Assessment (Phase I ESA) of the properties located at 2020 E. 7th Street and 2045 Violet Street in Los Angeles, California (subject property).

PSI performed the Phase I ESA in general conformance with ASTM E1527-13 (the Practice). Limitations, exceptions and deviations from this protocol are discussed in Section 3. Our ESA services also conform to the prior version of the Practice, ASTM E1527-05.

PSI performed our services to comply with the contract between our client and PSI. The report should be read in its entirety to obtain a more complete understanding of the information provided and to aid in any decisions made or actions taken based on this information.

DRAFT

1.1 PHASE I ESA

The subject property is developed with two adjoining commercial properties: 2020 E. 7th Place and 2045 Violet Street, which are currently occupied by West Central Produce, Inc.; each property is developed with one building. West Central Produce is a local wholesale food distributor. Hazardous materials observed at the site are limited to small quantities of automotive/truck fluids (coolant and oils), paints, and two underground storage tanks (USTs) containing gasoline and diesel fuel.

Historical resources indicate the subject property was vacant in 1900 and developed as a city playground with a gym in 1906. By 1923 the south half of the property was developed for residential use and the north half remained vacant. The 2045 property was developed with the present day commercial building by 1948 and the property at 2020 was developed with the present day commercial building by 2005. The subject property was occupied by West Central Produce by 1976.

1.1.1 SIGNIFICANT DATA GAPS

The Practice defines a Significant Data Gap as a gap that affects the ability to identify recognized environmental conditions. Findings and conclusions are subject to the limitations imposed by Significant Data Gaps.

PSI's assessment did not identify Significant Data Gaps.

1.1.2 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

This assessment has revealed no evidence of historical recognized environmental conditions (HRECs) in connection with the subject property.

1.1.3 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

This assessment has revealed no evidence of controlled recognized environmental conditions (CRECs) in connection with the subject property.

1.1.4 RECOGNIZED ENVIRONMENTAL CONDITIONS

This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the subject property.

1.2 RECOMMENDATIONS

PSI does not recommend any further assessment at this time.

DRAFT

2 INTRODUCTION

2.1 CONTRACT

The contract between PSI and our client, including the proposal number/contract reference and the authorization date, was summarized on the General Information section of this report.

2.2 THE USER

The Practice defines the "User" of the Phase I Assessment as:

> "… the party seeking to use ASTM E1527 to complete an environmental site assessment of the property. A user may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager. The user has specific obligations for completing a successful application of this practice ..."

PSI considers our direct client to be the User of this report.

2.3 PURPOSE OF SERVICES

The purpose of our services was to generally conform with the Practice. The goal of the processes established by the Practice is:

> "...to identify Recognized Environmental Conditions (RECs) in connection with the property."

The purpose of the Practice:

> "…is to define good commercial and customary practice in the United States of America for conducting an environmental site assessment (ESA) of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and petroleum products.
>
> As such, the Practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability (hereinafter, the landowner liability protections, or LLPs): that is, the practice that constitutes all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial and customary practice as defined at 42 U.S.C."

DRAFT

The Environmental Protection Agency amended the "All Appropriate Inquiries Rule" at 40 CFR Part 312 to reference the Practice and make clear that persons conducting all appropriate inquiries may use the procedures included in the Practice to comply with the All Appropriate Inquiries Rule.

2.4 STANDARD OF CARE AND WARRANTIES

Our assessment is based on limited information collected under time and cost constraints, in general conformance with the Practice. Findings and conclusions derived from the methodologies described in the Practice contain all of the inherent limitations in the methodologies that are referred to in the Practice, including:

- No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with the property.
- Our services were not intended to be technically exhaustive. There is a possibility that with the proper application of methodologies, conditions may exist on the property that could not be identified within the scope of the assessment(s) or that were not reasonably identifiable from the available information.
- PSI did not independently verify the information we obtained from records or interviews, and PSI treated the information as reliable.
- Not every property warrants the same level of assessment.
- Subsequent ESAs should not be considered valid standards to judge the appropriateness of a prior assessment. The observations and recommendations presented in this report are time dependent, and conditions will change. This report speaks only as of its date.

PSI did not perform any exploratory probing or discovery, perform tests, operate any specific equipment, or take measurements or samples to perform the ESA scope. The ESA was not a building code, safety, regulatory or environmental compliance inspection. The ESA is not intended to reduce the risk of the presence of mold and physical deficiencies conducive to mold nor the risk that mold or physical deficiencies conducive to mold may pose to the buildings and building occupants.

PSI has performed the services in a manner consistent with that level of care and skill ordinarily exercised by other members of our profession currently practicing in the same locality and under similar conditions, within the limitations of the Practice. No other warranties are implied or expressed.

2.5 RELIANCE

PSI's client, The Borman Group, may rely on this report.

DRAFT

2.6 USE BY OTHER PARTIES

This report was prepared pursuant to a contract between PSI and our client. That contractual relationship included an exchange of information about the property and the purpose of our work that was unique and serves as the basis upon which this report was prepared. Because of the importance of these understandings, our assessment may not be appropriate or sufficient for the intended purposes of another party.

Reliance or any use of this report by anyone other than those parties identified above for which it was prepared, except with express written permission, is prohibited and therefore not foreseeable to PSI. Any unauthorized reliance on or use of this report, including any of the information or conclusions contained herein, will be at such third party's risk. No warranties or representations expressed or implied in this report are made to any such third party.

Third party reliance letters may be issued:

- upon timely request,
- subject to the permission by our original client, and
- payment of the then-current fee for such letters.

All third parties relying on our report, by such reliance, agree that such reliance is limited by our proposal and/or General Conditions, as applicable.

DRAFT

3 SCOPE AND METHODOLOGY

PSI performed a Phase I ESA of the subject property. The scope of our services and general methodology is presented below.

The information sources that PSI used, including published material, material obtained from commercial and other sources, is listed below and cited as it is presented in the report. The information, or excerpts thereof, is appended.

3.1 PHASE I ESA

This assessment included four components:

- Records review;
- Reconnaissance;
- Interviews; and
- Preparation of this report, including our evaluation.

The assessment was also intended to satisfy our client's requirements, described in:

- PSI Proposal 559-124681, dated May 23, 2014.

3.1.1 RECORDS REVIEW

Physical Setting Sources

The sources that PSI reviewed to assist with the physical setting of the site to assist with the interpretation of subsurface water movement are tabulated below.

Summary of Physical Setting Sources	
Source Name	**Year Published/Issued**
USGS 60 Minute Topo Map	Southern CA Sheet 1: 1901
USGS 15 Minute Topo Map	Pasadena: 1896 and 1900 Los Angeles: 1900
USGS 7.5 Minute Topo Map	Los Angeles: 1953, 1966, 1972, 1981, and 1994
USGS 6 Minute Topo Map	Los Angeles: 1928
EDR GeoCheck Report	2014

DRAFT

Summary of Physical Setting Sources	
Source Name	**Year Published/Issued**
State of California GeoTracker http://geotracker.waterboards.ca.gov/	2014

Environmental Regulatory Information

PSI retained Environmental Data Resources, Inc. (EDR) to provide environmental information attributed to the subject property and its surroundings. EDR obtains environmental records published by local, state, tribal, and federal agencies and maps the information for electronic searches.

The search was performed to Approximate Minimum Search Distances (AMSD) listed in ASTM E 1527-13.

Unmappable (orphan) sites (if any were listed) having insufficient address information to be mapped were evaluated for potential location within the AMSD. Those that could be determined to be within the AMSD are discussed in Environmental Records Review section of the report.

Freedom of Information (FOIA) Requests

PSI often submits requests under the Freedom of Information Act (FOIA) or its state or local equivalent. In some cases, PSI does not submit such requests since the information is available through informal information requests, interviews, or other methods.

The FOIA reviews that we submitted and the outcomes are tabulated and discussed below.

FOIA Request	
Agency	**Response**
City of Los Angeles Fire Department UST Unit and Hazardous Materials Unit	No

Regulatory Agency File and Record Reviews

The Practice provides that if the subject property or any adjoining properties are identified on one or more of the standard environmental record sources in 8.2.1, pertinent regulatory files and/or records associated with the listing should be reviewed,

DRAFT

subject to the discretion of the EP. PSI did not consider such file review necessary to assess the property.

Historical Use Information

PSI used USGS Topo maps to provide information about the history of the subject property and its surroundings. PSI also reviewed other historical resources. The resources PSI reviewed are tabulated below.

Historical Resources		
Source Type	**Years Reviewed**	**Source**
USGS Topo Maps	See Section 3.1.1	USGS
Aerial Photograph(s)	1923, 1928, 1938, 1948, 1952, 1964, 1972, 1981, 1989, 1994, 2005, 2009, 2010, 2012	EDR
Fire Insurance Maps	1900, 1906, 1950, 1953, 1954, 1959, 1960, 1967, 1970	EDR
Street Directories	1920 to 2013 (at approximate five-year intervals)	EDR

DRAFT

Recorded Land Title Records

PSI did not review land title records to obtain information about the current and past owners of the subject property and past uses and tenancies.

User-Provided Information: Liens, AULs and Other Information

The Practice requires that the User provide information about Environmental Liens and Activity and Use Limitations (AULs) currently recorded against the property. The Practice indicates that the User should engage a title company to conduct the review or negotiate such engagement as an addition to the environmental professional's (EP) services. In addition, the Practice suggests that the User provide the EP with certain other information about the property and the reason for the Phase I ESA.

PSI obtained information about environmental cleanup liens and AULs recorded against the subject property at the request of our client. PSI retained EDR, Inc., a firm specializing in real estate record searches, to perform the search.

Helpful Documents and Proceedings

The Practice requires that the environmental professional ask the property owner, the key site manager (if any is identified), and the User for certain helpful documents about the property and certain legal proceedings involving hazardous substances and the subject property.

The responses documenting the persons we contacted and relevant information obtained are appended where practical. If such documentation was too large to append, it is available at the PSI office that prepared this report.

Reconnaissance

Mr. Mark Borman arranged for PSI's access to the subject property. Our assessor was unescorted during the site reconnaissance.

The ground reconnaissance consisted of observing the periphery of the subject property and viewing the subject property from accessible adjacent public access areas. PSI systematically toured the interior portions of the subject property to provide an overlapping field of view. The peripheries of surface features and/or structures, where present on the subject property, were observed along with accessible interior common areas. PSI photo-documented selected features that we encountered during our reconnaissance.

Reconnaissance of adjoining properties was limited to areas and facilities that were readily observable from the subject property or from public access areas.

Interviews

PSI made reasonable attempts to interview selected persons having knowledge of the uses and conditions of the subject property, past and present. A list of the persons that PSI interviewed and attempted to interview, along with our interpretations is presented in the Interview section of this report.

Vapor Encroachment Screening

Vapor encroachment is an evolving matter associated with the potential for chemicals of concern (COC) to migrate as vapors onto a property as a result of contaminated soil and groundwater on or near the property. The Practice requires the EP to evaluate:

> the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.

The term "hazardous substance" used in CERCLA is not limited to solids and liquids and USEPA has taken the view that the vapor phase of volatile hazardous substances

DRAFT

shall be considered and addressed under CERCLA. Additionally, humans may be subjected to subsurface vapor if subsurface volatile chemicals migrate into occupied buildings through cracks and penetrations in the building floor.

Use of Standard Guide E2600-10

ASTM developed E2600-10 "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (E2600). The purpose of the guide is to:

> Provide practical guidance and a useful process for conducting a vapor encroachment screen (VES) on a property parcel involved in a real estate transaction in the United States of America with respect to chemicals of concern (COC) that may migrate as vapors onto a property as a result of contaminated soil and groundwater on or near the property.
>
> The goal of this VES is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of COC vapors in the sub-surface of the target property (TP) caused by the release of vapors from contaminated soil or groundwater, either on or near the property, as identified by certain procedures.

The Practice references E2600, but does not endorse its use, nor any other process for the assessment of soil vapor. PSI considers the goal described in E2600 to be consistent with the goal of the Practice. Based on our experience, we consider the processes in E2600 to be customary practice for conducting a VES for a commercial property transaction. Therefore, PSI's assessment of soil vapor is based on the processes described in E2600.

Methodology

E2600 VES uses information collected as a normal part of the Practice. PSI proposes to:

- establish a nominal Area of Concern (AoC) using E2600 Approximate Minimum Search Distances (AMSD)
- reduce or expand the distances based on known or inferred groundwater flow directions and other information regarding the subsurface conditions in the area
- identify potential vapor source sites within the AoC using:
  - environmental records,
  - historical records, and
  - other provided information.

PSI will evaluate the identified potential sources and determine for each if:

- A VEC exists or likely exists,

DRAFT

- A VEC cannot be ruled out, or
- A VEC can be ruled out, because a VEC does not or is not likely to exist.

For those sites where PSI determines that a VEC exists or likely exists, PSI will determine whether or not the condition represents a REC. PSI will discuss its evaluation of VECs in the section of this report where the potential source condition is first encountered.

3.2 LIMITATIONS, EXCEPTIONS, DEVIATIONS AND DATA GAP

Limitations, exceptions, and deviations from the Practice manifest as a lack of or inability to obtain information required by the Practice. This represents the definition of the 'data gap' contained in the Practice.

PSI listed the component objectives of the Practice on the appended Data Gap Worksheet and tracked the information obtained against the objectives. Therefore, the limitations, exceptions, and deviations are identified in the Worksheet.

In general, when required information was incomplete, not provided, otherwise not obtained, or indicated a need for additional information, PSI attempted to use information from other sources to meet the Practice's performance objectives. When the data gaps affected the Environmental Professional's ability to identify RECs, PSI considered the data gap(s) to be significant. PSI identified significant data gaps (if any) on the Data Gap Worksheet and reported them in Section 1.

3.3 SIGNIFICANT ASSUMPTIONS

PSI made the following assumptions in developing our Phase I ESA findings and conclusions:

- Regulatory Records and Information - PSI considers all information provided by our environmental information subcontractor(s) and by regulatory agencies regarding regulatory status of facilities to be complete, accurate, and current.
- Title, Lien and AUL Information - PSI considers all information provided by real estate title record review firms regarding property use or ownership, encumbrances or other limitations, if provided, to be complete, accurate and current.
- Interviews - PSI considers all information provided through interviews to be complete, unbiased and provided in good faith.
- PSI interpreted and inferred the direction of the shallow groundwater movement based on the information we obtained and our experience. Actual groundwater flow may be locally influenced by many factors beyond the scope of this assessment. Subsurface investigation would be necessary to determine site-specific groundwater flow direction.

DRAFT

4 USER-PROVIDED INFORMATION

4.1 USER'S RESPONSIBILITIES

4.1.1 ENVIRONMENTAL LIENS

Our client returned PSI's questionnaire indicating 'NO' to the question: "Are you aware of any environmental cleanup liens against the property that are filed under federal, tribal, state of local law?"

4.1.2 ACTIVITY AND USE LIMITATIONS

Our client returned PSI's questionnaire indicating 'NO' to the question: "Are you aware of any activity and land use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state, or local law?"

4.2 SUGGESTED INFORMATION

Our client provided PSI with the following suggested information described by the Practice.

- The reason for performing the Phase I ESA.
- The type of property and type of property transaction.
- The complete and correct address for the property.
- The scope of services desired for the Phase I ESA.
- Identification of all parties who will rely on the Phase I ESA report.
- Identification of the site contact and how the contact can be reached.

4.3 HELPFUL DOCUMENTS

The client provided PSI with copies of the tank testing results from 2005 through 2014 for the subject property. In addition, PSI was provided with copies of Los Angeles City Fire Department records for adjacent properties that had underground storage tanks.

The tank testing reports indicated that the tanks and associated dispensing equipment passed the integrity testing during each testing period. No evidence of a leak or release was identified. Copies of the tank testing reports are provided in the appendix.

Permit documentation regarding USTs previously located at the northeastern adjoining property (2040 E. 7th Place) indicate that in 1994, a 1,000-gallon and 6,500-gallon UST were removed from the property under the supervision of the Los Angeles City Fire Department. Laboratory testing did not identify evidence of a substantial release.

DRAFT

PSI also reviewed cost proposals for UST previously located on the northern adjoining property (currently a vacant lot). In 1993, bids were acquired for the removal of two 1,000-gallon diesel USTs, two 500-gallon waste oil USTS, and one 1,000-gallon gasoline UST that were located on the northern adjoining property. No records of violations, leaks, spills, or releases at the adjoining property address were identified on the regulatory databases reviewed as part of this assessment. According to site interviews, these tanks were subsequently removed sometime around 1993. PSI has submitted a FOIA request to the City of Los Angeles Fire Department to review records pertaining to the removal of the tanks, but at this time has not received a response.

4.4 PROCEEDINGS

PSI was not provided with information about legal proceedings or litigation involving the subject property. This is a limitation and evaluated on the appended Data Gap Worksheet.

DRAFT

5 PHYSICAL SETTING

Based on our interpretation of the physical setting sources and our experience, PSI infers that the shallowest groundwater:

- Is inferred to flow towards the southwest, and
- Occurs at a depth of approximately 25 to 36 feet below the ground surface.

Other information about the physical setting of the subject property is tabulated below.

Physical Setting	
Nominal Elevations, (ft, above MSL)	Approximately 246
Surface Topo Characteristics	The property grades moderately to the southwest.
General Soil Type, Slopes	Urban Land. Characterized as being variable.
Does EDR Map a Floodplain On-Site?	No
On-Site Water Bodies	None
Off-Site Water Bodies	Los Angeles River (approximately 1,100 ft east).

DRAFT

6 ENVIRONMENTAL RECORDS REVIEW

6.1 DATABASE FINDINGS

The distribution of listed sites with respect to the subject property is tabulated and mapped in EDR's Radius Map Report, which is appended. The reader is referred to the table, which can be found near the front of EDR's report.

6.1.1 SUBJECT PROPERTY

EDR's report identified the subject property address, as further discussed below.

Facility Name & Address	West Central Produce, Inc. 2045 Violet Street Los Angeles, CA 90021	**Subject Property**
Database(s) Listed: UST, SWEEPS UST, HAZNET, CA FID UST		
According to the UST, SWEEPS UST, and CA FID UST database, the subject property is a registered location of USTs. No information regarding the USTs was reported on either database. According to the HAZNET database, 1.4 tons of tank bottom waste was disposed of 1998 and 0.52 tons of oil/water sludge was disposed of in 2005. No violations, leaks, spills, or releases were reported. Based on the lack of evidence suggesting a latent release of hazardous substances or petroleum hydrocarbons has occurred at the subject property, this listing is not considered to represent a recognized environmental condition.		

6.1.2 ADJOINING PROPERTIES

EDR's report did identify sites adjoining the subject property, as further discussed below.

Facility Name & Address	American Produce 826 S. Mateo Los Angeles, CA	**Western Adjoining Property**
Database(s) Listed: CA FID UST, UST, HIST UST, and SWEEPS UST		
According to these databases, two (2) USTs are registered at the property address. The tanks are 10,000 and 12,000 gallons in size and are used to store gasoline and diesel fuel. No violations, leaks, releases, or spills are reported at this facility. Based on the lack of evidence suggesting a latent release of hazardous substances or petroleum hydrocarbons has occurred at the subject property, this listing is not considered to represent a recognized environmental condition.		

6.1.3 SURROUNDING PROPERTIES

EDR's report identified sites surrounding the subject property. PSI considered all of the listed sites unlikely to impact the subject site, based upon factors including (but not limited to):

- The nature of the listing

DRAFT

- The use of the site
- When the site was listed and its current listed status
- The developmental density of the setting
- The distance between the listed and subject sites as related to the distance that releases are likely to migrate based on local surface and subsurface drainage conditions
- The presence of intervening drainage divides
- The inferred groundwater movement

6.2 OTHER REGULATORY INFORMATION

6.2.1 FOIA RESPONSES

PSI submitted a FOIA request to the City of Los Angeles Fire Department (UST and HAZMAT Divisions). At the time of this report, no correspondence from either agency had been received. If further pertinent correspondence is received that changes the findings or conclusions of this report, an addendum will be prepared and forwarded on for inclusion in this report.

6.2.2 REGULATORY AGENCY-MAINTAINED WEBSITES

PSI reviewed groundwater information published on the State of California GeoTracker website to determine local groundwater depth and flow direction information. Additionally PSI searched for the GeoTracker website for any listings related to the subject property address. No listings were identified.

6.2.3 OTHER REGULATORY AGENCY INFORMATION REVIEWED

No other regulatory agency information was reviewed during this assessment as such a review was determined not to be warranted since the information in the EDR Radius Map Report was sufficient for PSI to determine if a REC, HREC, and/or CREC related to a regulatory database listing exists in connection with the subject property.

DRAFT

7 SITE RECONNAISSANCE

The location and approximate boundaries of the property are illustrated on the appended figures. The legal description of the property, if provided to PSI, is appended.

Site Reconnaissance	
Project Name	West Central Produce, Inc.
Property Addresses **Property Address (Alternate)**	2020 E. 7th Place 2045 Violet Street
City, County, State, ZIP Code	Los Angeles, Los Angeles County, California
No. Buildings/Units/Stories	Two/One/One and Two
Area (sf)	Approximately 25,798 (2020 7th Pl) and 9,940 (2045 Violet St)
Occupied Subgrade Spaces?	NA
Year(s), First Developed for Current Use	2002 (2020 7th Pl) and 1941/1961 (2045 Violet St)
Year(s), Additional Phases	Unknown
Year Significant Renovations	Unknown

DRAFT

7.1 DESCRIPTION AND CURRENT USES

The subject property is developed with two adjoining commercial properties currently occupied by West Central Produce, each property is developed with one building. West Central Produce is a local wholesale food distributor. Hazardous materials observed at the site are limited to small quantities of automotive/truck fluids (coolant and oils), paints, and two USTs containing gasoline and diesel fuel.

7.1.1 INTERIOR AND EXTERIOR OBSERVATIONS

A summary of the subject property uses and conditions is tabulated below. Detailed information is discussed following the summary for any “yes” answers, along with an opinion about the significance of the listing.

Interior and Exterior Observations	
Yes/No	**Category**
YES	Hazardous Materials
YES	Petroleum Products
YES	Aboveground or Underground Storage Tanks (ASTs/USTs)
YES	Drums
NO	Suspect Containers
NO	Electrical or Mechanical Equip. Suspected to Contain PCBs
NO	Interior Stains or Corrosion
NO	Drains or Sumps
NO	Wastewater Discharges
NO	Septic or Sewage Tanks
NO	Pits, Ponds or Lagoons
NO	Pools of Liquid or Standing Water
NO	Solid Waste Dumping/Landfills/Suspect Fill Material
NO	Stained Soil or Pavement
NO	Stressed Vegetation
NO	Drinking Water Wells
NO	Irrigation Wells
NO	Monitoring Wells
NO	Odors
NO	Other Uses or Conditions of Concern

DRAFT

Hazardous Materials and Drums

PSI observed several 55-gallon drums (waste oils and coolants) and other small containers (less than 5-gallons in size) of automotive fluids and paint. The containers and drums appeared to be in good condition with no evidence of past spills or leaks. According to the property manager, waste drums are picked up by a licensed commercial waste hauler on an as-needed basis. Based on site observations, the presence of these materials is not considered to represent a recognized environmental condition.

Petroleum Products and Underground Storage Tanks (USTs)

PSI observed two USTs located at the 2020 E. 7th place property. The USTs contain gasoline and diesel fuel. According to the site manager, the tanks have tightness testing performed on a regular basis (previously discussed). Based on site observations and

the tightness test results (pass), the presence of the USTs is not considered to represent a recognized environmental condition at this time.

7.2 PAST USES

Our interpretation of the past uses of the property, based on the historical data sources listed in Section 3.1 of this report, is tabulated below.

Past Uses	
Year(s)	**Interpreted Property Use**
1900	A Sanborn map depicts the property to be developed with two residential homes and the remaining property is vacant.
1906	A Sanborn map depicts the property to be developed with a city playground, gym, and residential home.
1923 to 1938	Aerial photographs depict the northern portion of the subject property to be developed for residential use and the remainder to be vacant.
1948 to 1994	Aerial photographs and Sanborn maps depict the property to be developed for commercial use with present day building at 2045 Violet Street constructed and two commercial building at 2020 7th Place. Historical city directories identified the tenants as: **2045 Violet Street** • West Central Produce (1976 to 2014) • Apex Wholesale Produce(1958 to 1967) **2020 E. 7th Place** • West Central Produce (2006 to 2014) • Megibow-Kohn Co Auctioneers (1981 to 1990) • Susan of California (1967 to 1971) • Alto Plastics Corp (1958 to 1962) • Westway Truck Rental (1951) • Coast Carpets (1942)
2005 to 2012	Aerial photographs depict the property to be developed for commercial use with present day building at 2020 7th Place constructed and one commercial building at 2045 Violet Street.
2014	Site reconnaissance revealed the property to be developed with two commercial buildings, which are occupied by West Central Produce.

Historical resources indicate the subject property was vacant in 1900 and developed as a city playground with a gym in 1906. By 1923 the south half of the property was developed for residential use and the north half remained vacant. The 2045 property was developed with the present day commercial building by 1948 and the property at 2020 was developed with the present day commercial building by 2005. The subject property was occupied by West Central Produce by 1976.

The past and current uses of the subject property are not considered to represent a recognized environmental condition.

DRAFT

8 ADJOINING PROPERTY RECONNAISSANCE

8.1 DESCRIPTION AND CURRENT USES

Our interpretation of the uses of the adjoining and surrounding property is tabulated below and detailed in the subsequent sections.

Adjoining Current Use	
Direction	**Interpreted Property Use**
North	East 7th Place followed by a commercial building with a parking lot.
South	Violet Street followed by a commercial building.
East	A parking lot and an alley followed by a commercial building.
West	An alley followed by several commercial buildings.

8.1.1 INTERIOR AND EXTERIOR OBSERVATIONS

A summary of our interpretation of the current and past uses and conditions of adjoining and surrounding property based on historical records and observations is provided below.

Interior and Exterior Observations	
Yes/No	**Category**
No	Hazardous Substances
No	Petroleum Products
No	Aboveground or Underground Storage Tanks (ASTs/USTs)
No	Drums
No	Suspect Containers
Yes	Electrical or Mechanical Equip. Suspected to Contain PCBs
No	Interior Stains or Corrosion
No	Drains or Sumps
No	Wastewater Discharges
No	Septic or Sewage Tanks
No	Pits, Ponds or Lagoons

DRAFT

Interior and Exterior Observations	
Yes/No	**Category**
No	Pools of Liquid or Standing Water
No	Solid Waste Dumping/Landfills/Suspect Fill Material
No	Stained Soil or Pavement
No	Stressed Vegetation
No	Drinking Water Wells
No	Irrigation Wells
No	Monitoring Wells
No	Odors
No	Other Uses or Conditions of Concern

Electrical or Mechanical Equip. Suspected to Contain PCBs
PSI observed several pole-mounted electrical transformers located to the southwest, southeast, and northeast of the subject property. The transformers are likely owned by the power company and were observed to be in good condition with no evidence of leaks or staining. The presence of the transformer is not considered to represent a recognized environmental condition.

8.2 PAST USES

Our interpretation of the past uses of the adjoining properties is tabulated below.

Past Site Uses, North	
Year(s)	**Interpreted Property Use**
1900 to 1906	Sanborn maps depict the property to be vacant.
1923 to 1952	Aerial photographs and Sanborn maps depict the property to be developed with several buildings, which appear to be residential and commercial.
1964 to 1989	Aerial photographs and Sanborn maps depict the property to be developed with commercial buildings.
1994	An aerial photograph depicts the property to be a vacant graded lot.
2005 to 2012	Aerial photographs depict the property to be developed with the present day commercial building.
2014	Site reconnaissance revealed the property to be developed with a commercial building, which is partially used by West Central Produce.

DRAFT

Past Site Uses, East	
Year(s)	**Interpreted Property Use**
1900 to 1906	Sanborn maps depict the property to be partially developed with what appear to be residential homes.
1923 to 1986	Aerial photographs and Sanborn maps depict the property to be developed with commercial buildings. Historical city directories identified the tenants as: • Kort Fred Co (1981 to 1986) • Imperial Toy Co (1981 to 1986) • Stacy Adams Co (1967 to 1971) • Ford Motor Company (1924 to 1929)
1989 to 2012	Aerial photographs depict the property to be developed with what appears to be a single commercial building. Historical city directories identified the tenants as: • Imperial Toy Co (1989 to 2006) • Kort Fred Co (1989 to 2000)
2014	Site reconnaissance revealed the property to be developed with a large commercial building, which is appears to be vacant.

Past Site Uses, South	
Year(s)	**Interpreted Property Use**
1900 to 1906	Sanborn maps depict the property to be undeveloped vacant land.
1923 to 1952	Aerial photographs depict the property to be developed some small commercial buildings.
1964	Aerial photographs depict the property to be vacant graded land.
1972 to 1989	Aerial photographs and Sanborn maps depict the property to be developed with a commercial building.
1994 to 2012	Aerial photographs depict the property to be developed with the present day commercial building. Historical city directories identified the tenants of the property as: • Fresh Quality Produce LA Vegetable Inc (2013) • Brand Connections Inc (2008) • Boley Corp (2000) • Corsaro Produce Co (1967)
2014	Site reconnaissance revealed the property to be developed with a commercial building, which appears to be vacant.

DRAFT

Past Site Uses, West	
Year(s)	**Interpreted Property Use**
1900 to 1906	Sanborn maps depict the properties to be either vacant or developed with residential homes.
1923 to 1950	Aerial photographs and a Sanborn map depict the properties to be developed with either commercial buildings or residential homes.
1952 to 2012	Aerial photographs and Sanborn maps depict the properties to be developed with commercial buildings.
2014	Site reconnaissance revealed the properties to be developed with commercial buildings, two appear vacant, but the others are occupied by various businesses.

The subject property is located within an area primarily developed for commercial and light industrial use. The past and current uses of the adjoining properties are not considered to represent a recognized environmental condition in connection with the subject property.

DRAFT

9 INTERVIEWS

PSI interviewed parties potentially having information about current and/or former conditions at the subject property. The parties and their affiliation are tabulated below.

Interviews		
Name	**Affiliation**	**Role**
Mr. Mark Borman	The Borman Group	Client/User
Mr. Chester	West Central Produce, Inc.	Key Site Manager

Pertinent information collected during the abovementioned interview has been incorporated into the previous sections of this report where appropriate. No evidence of a recognized environmental condition was identified during the interviews.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

DRAFT

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there are 2 CERC-NFRAP sites within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
BAILEY AND SCHMITZ CO	2101 E 7TH ST	NNE 1/8 - 1/4 (0.135 mi.)	J40	45
EXLEY EXPRESS	634 S MATEO ST	NNW 1/4 - 1/2 (0.303 mi.)	76	95

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/11/2014 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

SOUTHERN CALIF GAS OLYMPIC BAS	***2424 E OLYMPIC BLVD***	***SE 1/2 - 1 (0.666 mi.)***	***AA105***	***192***

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/11/2014 has revealed that there are 13 RCRA-SQG sites within approximately 0.25 miles of the target property.

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, and dated 05/05/2014 has revealed that there are 4 RESPONSE sites within approximately 1 mile of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 05/05/2014 has revealed that there are 23 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, and dated 05/19/2014 has revealed that there are 6 SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 03/17/2014 has revealed that there are 7 UST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 16 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 3 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA BOND EXP. PLAN:

Reponsible Party:	COST RECOVERY/OPERATION AND MAINTENANCE SITE
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	DHS has utilized Bond funds to complete the remedial action. DHS is currently undertaking appropriate cost recovery actions.
Site Description:	This site was previously used to scrap electrical transformers.
Hazardous Waste Desc:	Polychlorinated biphenyls (PCBs) were detected in the soil.
Threat To Public Health & Env:	The remedial action has been completed. Soil contaminated with PCBs was excavated and redisposed of in a licensed landfill. There is no threat to public health and the environment.
Site Activity Status:	In August, 1985, the RP, Mr. Rodney Dean, pled no contest to three felony counts of illegal storage, transportation and disposal of hazardous wastes. Mr. Dean's probation required that the cleanup of the site be completed and reported to the court. The RP retained a contractor for the cleanup and began the remedial actions. The contractors removed much of the contaminated soil. DHS completed the cleanup after the RP exhausted his financial resources. DHS is currently in the cost recovery stage.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 09/04/1996
Comments: DTSC reviewed a Preliminary Endangerment Assessment for the site under a Voluntary Cleanup Agreement. Based on the information and data presented, DTSC determined that the hazardous constituents remaining at the site do not constitute a threat to human health or the environment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 09/13/1995
Comments: The Department received a Non-Emergency Hazardous Substance Release Report dated January 31, 1995. Review of the document indicates that the site is contaminated with elevated levels of heavy metals such as lead, copper and zinc. Foundry operations existed at the site from at least 1906 until 1990, operated by W.G. Grant & Co. Santa Fe Railway is the current owner of the site. RP removed USTs from the site without any regulatory agency oversight. Due to evidence of a release, DTSC is recommending that a PEA be conducted to evaluate the site. On September 13, 1995, DTSC notified the RP thereof.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Violation Status:	No violations found

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Date: 05/20/1993
Comments: The Department completed review of the PEA. A Manufactured Gas Plant (MGP) was operated at the site in the late 1800s and early 1900s. Gas was produced from crude oil for distribution in the site area. Several companies operated at the site. In 1909, the site was owned by the Los Angeles Gas and Electric Corp., which merged with the

DRAFT

ALAMEDA MANUFACTURED GAS PLANT (Continued) **S101584054**

Southern Calfornia Gas Company in 1937. SoCalGas owned the property until 1976, and sold to the current owners. The MGP was dismantled sometime before 1906. The byproducts from the manufactured gas operation were tars, oils, sludges, and lampblack. Elevated levels of polycyclic aromatic hydro- carbons (PAH), heavy metals such as lead and arsenic and cyanides were found at the site. The PEA concluded that there was contamination at the site above screening values. Therefore, the Department recommended that further investigation or assessment at the site was necessary.

Manufactured Gas Plants:

Site located at 725 Chemming Street, Los Angeles, California, approximately 2.5 acres. From 1887 util 1906 an oil gas plant was operated at site. MGP may have been converted to a natural gas storage site in approximately 1906. Records indicate that MMGP equipment may have been removed by 1930. Site is currently used as a Greyhound Bus parking lot.

Alternate Address: 590 SOUTH SANTA FE AVENUE
Alternate City,St,Zip: LOS ANGELES, CA 90013
Background Info: The site is located at 590 South Santa Fe Avenue, Los Angeles, California. The site consists of two land parcels totaling approximately 2.68 actes of land and is located witin an indus-industrial portion of the City of Los Angeles. Historically the site has been used for chemeical or paint manufacturing.
Not reported
The site was formerly under the oversight of the California Regional Water Quality Control Board (CRWQCB). (CRWQCB) has overseen the site investiation and remediation since approximately 1986.
Not reported
Previous sampling activities have confirmed both soil and groundwater contamination. Contaminants of concern identified in the groundwater and soil include benzene, ethyl benzene, 1,1-dichlorethane, 1,1-dichloroethene, 4-methyl-2-pentanone (MIBK), toluene, and total xylene. The toluene, and xylene appear to be primarily located within the groundwater beneath the northern portion of the site whereas MIBK has been identified in the groundwater along the southwest corner of the site and may extend beyond the site boundary.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Background Info: The Site is also known as the Western Lead and Metal Company Site. The Site is located in an industrial area near downtown Los Angeles and is surrounded by warehouses, food distributors, light manufacturing, and scrap metal recyclers. The Site is roughly bounded by 11th Street (Property), to the north, the Union Pacific Railroad right-of-way to the east, 14th Street, to the south, and Wilson Street to the west. The Site includes the property at 2182 East 11th Street, which was occupied by several different companies as a lead smelter from 1946 to 1965. The Western Lead Products Company operated a lead smelter on the Property from 1954 to 1960 under the name of Western Lead and Metal Company. After 1965, the Property was used for die-cast manufacturing operations. The Property is approximately 110 feet by 140 feet and is currently devoid of any buildings, and is secured by fencing. The other areas of the Site include: portions of the Union Pacific Railroad right-of-way, between 14th and 10th Streets; a narrow strip of the property occupied by Coast Produce; and a residencial property at the corner of Wilson and 14th Streets. Since 1991, several site assessments have been conducted. These assessments involved mostly surface soil sampling and analyses for metals including lead, antimony, and arsenic. In 1996, the Property was paved with three inches of asphalt to prevent exposure of the public to contaminated soil. In addition, DTSC collected several surface soil samples in the areas surrounding the Property. Extremely high levels of lead (up to 574,000 ppm), antimony (up to 14,000 ppm), and arsenic (up to 920 ppm) were detected in the narrow strip along the southern and western boundaries of the Property; high levels of lead, copper, and zinc were detected along the railroad right-of-way; and elevated levels of lead (up to 1,450 ppm) were detected on the residential property. A Consent Order (Imminent and Substantial Endangerment) was entered into with Quemetco Inc., (an RSR Subsidiary) and Union Pacific Railroad Company. As required by the Order, in 1977, Quemetco completed an Emergency Removal Action at Areas 3 and 4 which are located at the perimeter of the Property and the residential property. Union Pacific has also conducted an Emergency Removal Action at Areas 1 and 2 (railroad right-of-wau). The Remedial Investigation found the extent of metal contamination. Currently, the Draft RAW, which proposes to place a 4-inch asphalt cover on the Property area and excavate soil, from the Site boundary, has been approved. The 30 day Public Comment

Draft

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

CA BOND EXP. PLAN:

Reponsible Party:	RESPONSIBLE PARTY-LEAD SITE CLEANUP WORKPLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	Southern California Gas has entered into a consent order with DHS for oversight/monitoring of its cleanup efforts. DHS has budgeted $50,000 for direct costs related to the project. DHS will recover 100 percent of direct costs plus staff costs and overhead related to the project. The responsible parties will pay all costs associated with site cleanup.
Site Description:	The Olympic Base facility, currently owned by Southern California Gas Company, is the site of a former oil gasification "towne gas" plant.
Hazardous Waste Desc:	The wastes are generally characterized as polynuclear or polycyclic aromatic hydrocarbons (PNAs or PAHs). Other constituents of concern are cyanide, lead, and semivolatile organics. Soil contamination is present at the site from the surface to a depth of 10 to 15 feet in both the northern and southern portions of the site.
Threat To Public Health & Env:	The primary concern is potential contamination of ground water. Usable ground water lies approximately 200 feet below the ground surface and the water table may rise to only 100 feet below the site. Ground water contamination has not been verified. Surface soil contamination may migrate offsite due to airborne particulates.

DRAFT

SOUTHERN CALIF GAS OLYMPIC BAS (Continued) **1000166039**

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Corrective Action Summary:

Event date: 06/30/1995
Event: RFA Completed

Event date: 06/30/1997
Event: Stabilization Measures Evaluation,This facility is not amenable to stabilization activity at the present time for reasons other than 1- it appears to be technically infeasible or inappropriate (NF) or 2- there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.

Event date: 06/30/1997
Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Event date: 07/09/2010
Event: CA550RC

Event date: 07/09/2010
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Event date: 07/09/2010
Event: Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Event date: 09/30/2011
Event: Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been

Manufactured Gas Plants:

The Southern California Gas (SCG), Olympic Base Site was once a gas manufacturing plant where oil was converted into gas for lighting, heating, and cooking. Residues from the gasification process, mainly consisting of a material "lamp black", were weere discovered at the site. "Lamp Black" contains varying amounts of a family of compounds called polynuclear or polycyclic aromatic hydrocarbons (PNAs or PAHs). The plant was built in the period 1907-1908 by the City Gas Company. In 1908, the Domesttic Gas Company purchased and took over the operations of City Gas. In 1910, SCG was incorporated and became the successor of Domestic Gas. SCG operated the plant until 1927, when the service for 100% natural gas started. The plant operated on a stanndby basis until 1952, when all gas manufacturing operations ceased and the plant was dismantled. SCG has administrative facilities on other portions of the facility

Background Info: The Southern California Gas (SCG), Olympic Base Site was once a gas manufacturing plant where oil was converted into gas for lighting, heating, and cooking. Residues from the gasification process, mainly consisting of a material "lamp black", were were discovered at the site. "Lamp Black" contains varying amounts of a family of compounds called polynuclear or polycyclic aromatic hydrocarbons (PNAs or PAHs).
The plant was built in the period 1907-1908 by the City Gas Company. In 1908, the Domestic Gas Company purchased and took over the operations of City Gas. In 1910, SCG was incorporated and became the successor of Domestic Gas. SCG operated the plant until 1927, when the service for 100% natural gas started. The plant operated on a standby basis until 1952, when all gas manufacturing operations ceased and the plant was dismantled. SCG has administrative facilities on other portions of the facility.
A Consent Order was signed in December 1986, which addressed the work needed to complete the Remedial Investigation/-Feasibility Study (RI/FS) process. The RI report was approved by the Department on September 17, 1987. The RI found that soil from about 2 to 12 feet below ground surface is contaminated. The contaminants are not readily vaporized, nor do they enter aqueous phase solution. Groundwater aquifers beneath the site are unsaturated to a depth of 90 feet. Air monitoring at the site does not indicate that the contaminants are emitting vapors to the air. SCG then submitted a FS report in May 1988. DHS has reviewed the FS report and requested a full Health Risk Assessment (HRA) based on appropriate biological receptors and exposure pathways on October 20, 1988. The HRA was approved by the Department on June 4, 1990. The FS was revised by SCG and the report approved on July 19, 1990.
The RP submitted a draft RAP on August 20, 1990, as requested by the Department. The Department has published a fact sheet on the findings of the RI/FS. The RAP meeting with the community was held on November 17, 1990 and the RAP was subsequently approved in January of 1991.
The RAP proposed an asphalt cap on the site, groundwater monitoring, and a deed restriction. Groundwater monitoring is necessary as the region the site is located in is currently experiencing a drought; however, if this should change the groundwater table will rise, possibly impacting the conclusions of the RI. The deed restriction, protected the integrity of the cap by limiting land use and excavation of the waste.
The Department directed the RP to prepare a Remedial Design and Implementation (RD&I) plan. The plan included engineering specifications for the asphalt cap, permits, and a schedule for completion of the cap. The cap will be repaired as necessary; necessary; it is expected to require replacement every ten years. This operation and maintenance program will last for 20 years.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 05/12/2003
Comments: Potential release as a result of Preliminary Assessment (PA). Further Action recommended.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 06/06/2000
Comments: 06/06/2000: Based on review of the PEA, DTSC determines that "Further Action is necessary. In addition, DTSC provides comments to be incorporated in subsequent investigation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 04/04/1997
Comments: The site has been occupied by metal plating companies since 1943. Site soil and possibly groundwater is contaminated with heavy metals and cyanides. Also, there are four under- ground abandoned storage tanks at the site. The tanks were closed without proper regulatory involvement. site, staff recommends a PEA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 03/25/1998
Comments: Former name of this site was "California Reception Center - LAC". This 20+ acre site is being broken into two irregularly-shaped parcels, with no identifiable addresses. The establishment of 2 parcels will facilitate addressing future activities. This site will now be known as Los Angeles CRA - Sale Parcel "497A" and represents one of the parcels. The other Parcel is Alameda Corridor-Sale Parcel "497B". CalSites # 19400011. Parcel "497A" will be the project of the Los Angeles Community Redevelopment Agency (CRA). CRA, in their "Brownfields Program" will complete an RI/FS on the 497A Parcel, obtain a purchase option from the State of California, and solicit foster redevelopment of the site. Parcel "497B" will be the project of the Alameda Corridor Transportation Authority (ACTA). Please see CalSites #19400011 for further information on Parcel "497B".

Completed Area Name: PROJECT WIDE

DRAFT

CROWN COACH (Continued) **S106568222**

Completed Document Type: Public Participation Plan / Community Relations Plan
Completed Date: 04/27/1995
Comments: DTSC prepared a Public Participation Plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 10/30/1994
Comments: DTSC completed a PEA and recommended further action at the site. This included further remedial activities, public participation and PRP search.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 10/30/1992
Comments: While excavating the eastern area and demolishing all existing buildings, other areas were discovered to be contaminated with lead and VOCs (April'94). As a result the total volume of material excavated and removed prior to legislative cancellation of the prison project (Sept'92) was about 40,000 tons. Stabilization measures were also taken, including the implementation of dust control, fensing and posting, and site security. Further investigation and remediation was stopped due to lack of funds.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 03/04/1992
Comments: Bid Package 1B-Hazardous Waste Remedial Action (RAP) completed by K/J/C. The RAP was developed for the shallow soil excavation in the eastern area of the site with a cleanup level of 10 ppm.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Report
Completed Date: 05/31/1988
Comments: Kennedy/Jenks/Chilton completed the Site Assessment and Investigation report under contract by the CDC.

Alternate Address:	2435 E. WASHINGTON BLVD.
Alternate City,St,Zip:	LOS ANGELES, CA 90021
Background Info:	The historic usage of the site is a railroad maintenance yard. Chlorinated solvents TCE and PCE have been identified in the soil along the border of the site with 2425 E. Washington Blvd. Possible pathways for contamination migration are soil and groundwater. Possible receptors are on-site workers and the population which may drink contaminated drinking water extracted from nearby drinking wells. Some shallow soil gas sampling has been performed on-site in 1995. This survey was concentrated along the border of 2455 E. Washington Blvd. Results showed decreasing contaminant concentrations with increasing distance from 2425 E. Washington Blvd. property boundry. No source was identified at the Amtrak property. Not reported An approximately 50-acres site located in an industrial/ commerical area of Los Angeles, one-half mile south of the Santa Monica freeway. The site is also known as the Redondo Junction Facility. Various buildings are located on the property for support and maintenance of trains. Rail Spurs run throughout the property in a general north-south direction. The Los Angeles river is located directly to the east. Previous owner of the property from 1885 to 1976 was Atchison, Topeka, and Sante Fe Railroad Corporation. Not reported Investigation of this site is key to determining the extent of soil gas and groundwater contamination found on the adjacent property 2425 E. Washington Boulevard, known as State Surplus Parcel (SSL-497). A draft VCA was prepared by DTSC for recovery of oversight costs. A limited subsurface soil gas survey is proposed as a first step to determine extent of chlorinated solvent contamination and also to identify any contributing sources.

DRAFT

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2013

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

DRAFT

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/25/2013

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DRAFT

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/04/2013
Date Data Arrived at EDR: 12/10/2013

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

DRAFT

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List
The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR US Hist Cleaners: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Elevation:	246 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	34118-A2 LOS ANGELES, CA
Most Recent Revision:	1994

DRAFT

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

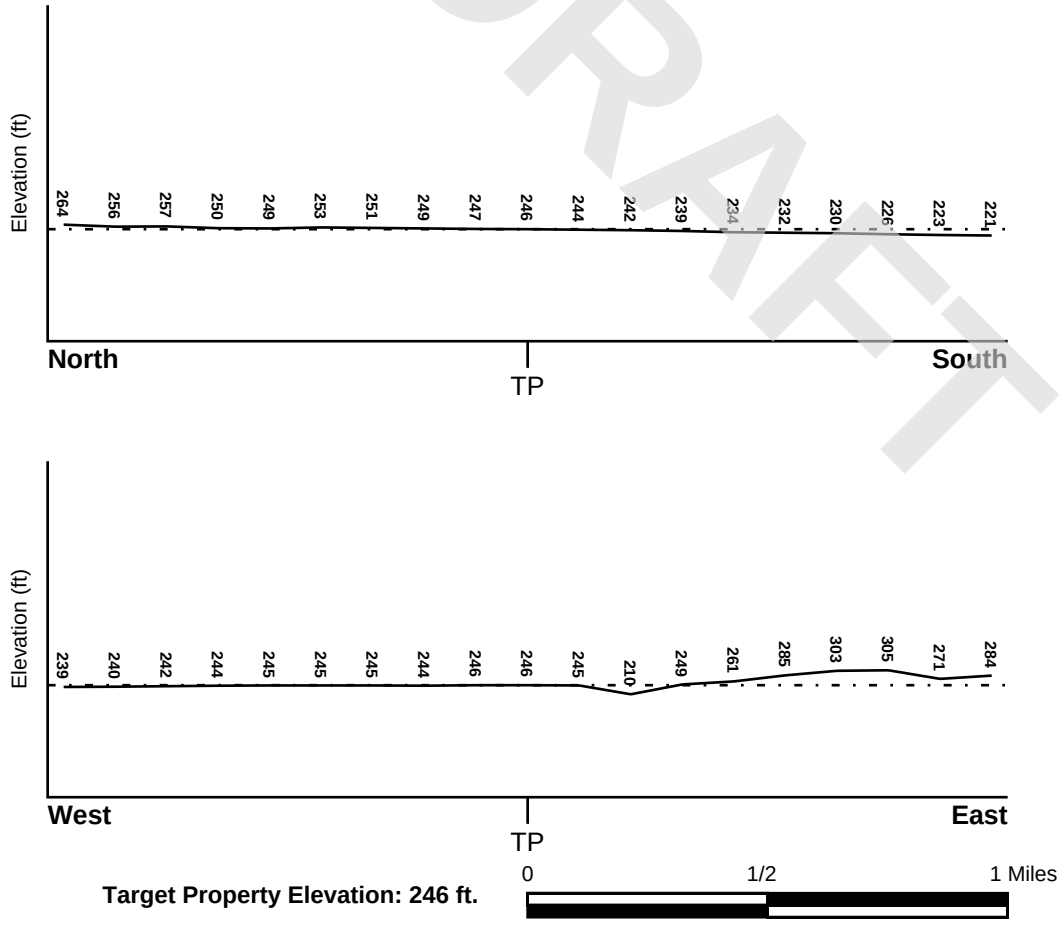
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

DRAFT

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 246 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
LOS ANGELES, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06037C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
LOS ANGELES	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	1/4 - 1/2 Mile South	Not Reported
2	1/2 - 1 Mile NE	SW

For additional site information, refer to Physical Setting Source Map Findings.

DRAFT

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	URBAN LAND
Soil Surface Texture:	variable
Hydrologic Group:	Not reported
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 10 inches
Depth to Bedrock Max:	> 10 inches

DRAFT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Shallow Soil Types:
fine sandy loam
gravelly - loam
sandy clay
sandy clay loam

silty clay
sand

Deeper Soil Types:
gravelly - sandy loam
sandy loam
very gravelly - sandy loam
stratified
very fine sandy loam
weathered bedrock
sand
gravelly - fine sandy loam
silty clay loam
clay loam

DRAFT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

EDR Inquiry # 3957955.3

Contact: Elias Aparicio

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by PSI, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Interview Documentation

DRAFT

USER QUESTIONNAIRE 1 OF 2

Pursuant to ASTM E 1527-13, in order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments), the user must provide the following information (if available) to the environmental professional. Failure to provide the information could result in a determination that "all appropriate inquiry" is not complete. This form represents a type of interview and as such, the user has an obligation to answer all questions in good faith, to the extent of his or her actual knowledge.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?
☒ No ☐ Yes If yes, please explain.

2. Are you aware of any activity and land use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?
☒ No ☐ Yes If yes, please explain.

3. As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
☒ No ☐ Yes If yes, please explain.

4. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?
☐ No ☒ Yes If yes, please explain.
YES ONLY ON QUESTION #1
NO ON QUESTION #2

5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user: (a) Do you know of the past uses of the property?; (b) Do you know of specific chemicals that are present or were once present at the property?; (c) Do you know of spills or other chemical releases that have taken place at the property?; (d) Do you know of any environmental cleanups that have taken place at the property?
☐ No ☒ Yes If yes, please explain. VARIOUS TANKS ON PROPERTY AND NEIGHBORING PROPERTY

6. As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?
☒ No ☐ Yes If yes, please explain.

DRAFT

USER QUESTIONNAIRE 2 OF 2

Proceedings Involving the Property

Pursuant to ASTM E 1527-13, as the user of this ESA do you know of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?

☒ No ☐ Yes If yes, please explain.

Helpful Documents Checklist

Pursuant to ASTM E 1527-13, do you know whether any of the following documents exist related to the subject property, and if so, whether copies can and will be provided to PSI for review? Check all that apply.

- ☐ Environmental site assessment reports
- ☐ Environmental compliance audit reports
- ☐ Environmental permits (for example solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits, underground injection permits)
- ☐ Registrations for above or underground storage tanks
- ☐ Registration for underground injection systems
- ☐ Material safety data sheets
- ☐ Community right-to-know plan
- ☐ Risk assessments
- ☐ Safety plans; preparedness and prevention plans; spill prevention, countermeasure and control (SPCC) plans; etc.
- ☐ Reports regarding hydrogeologic conditions on the property or surrounding area
- ☐ Notices or other correspondence from any governmental agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property
- ☐ Hazardous waste generation notices or reports
- ☐ Geotechnical studies
- ☐ Recorded activity and land use limitations (AULs)

Personnel Qualifications

DRAFT

RESUME

Eric C. Fraske, PE

Geotechnical and Environmental Department Manager, Cypress, California

Education

Bachelor of Science: Major-Civil Engineering
Michigan State University: May 2004

Certifications/Registrations/Technical Training

State of California Registered Civil Engineer (PE #76976)
Nevada Certified Environmental Manager (CEM # 2134)
40 Hour HAZWOPER

Professional Experience

Mr. Fraske is the department manager for the geotechnical and environmental group of the Cypress, California office of PSI. As department manager, Mr. Fraske oversees all environmental and geotechnical projects. His responsibilities include coordinating personnel and equipment resources to ensure client satisfaction. Mr. Fraske is closely involved with clients, potential clients, and projects in order to form strong alliances and long lasting working relationships. His work involves extensive client contact, program quality assurance/quality control (QA/QC), and liaison with federal, state, and local regulatory agencies.

Prior to joining PSI, Mr. Fraske worked as a field technician for an air quality firm from 2002 to 2004. As a field technician, his work experience included ambient air sampling, gas emissions testing, pollution modeling, compliance demonstrations, TRIS, report development, and industrial air permitting.

Project Experience

Mr. Fraske has conducted many Phase I ESAs for commercial lenders, local and nationwide banks, and real-estate developers. Transactions included mergers and acquisitions, and refinancing.

Representative Phase I Environmental Site Assessments Project Experience

- Over 50 Proposed CVS Locations Throughout Southern California
- Proposed NFL Stadium Locations, Southern California
- Sony Pictures Studios, Culver City, California
- Kodak Theater and Hollywood and Highland Retail Complex, Hollywood, California
- Proposed Extra Space Self Storage Facilities, Throughout Southern California
- FDIC Portfolio Locations, Throughout Arizona
- Pacific Gateway Industrial Center, Torrance, California
- 60,000 Acres of Timberland in South Georgia
- 6,000 Acre Former Cattle Farm, Bleckley County, Georgia
- Five Volvo Equipment Dealerships, Savannah, Macon, Marietta, Atlanta, and Augusta, Georgia
- Various Fiber Optic Cable Sites, Marietta, Georgia
- Multiple Burger King Restaurants, New York, New York

DRAFT

RESUME

Mr. Fraske has performed Phase II Subsurface Investigations and a variety of subsurface investigations for commercial lenders, state environmental protection agencies, and private individuals at several commercial and industrial real estate properties.

Representative Phase II Environmental Site Assessments and Site Investigation Project Experience

- Mira Mar Naval Air Station, San Diego, California
- Former Gasoline Station, Compton, California
- Active Sugar Mill, Clewiston, Florida
- 300 Square Mile Agricultural Land Acquisition, South Florida
- Plating Facility, West Hollywood, California
- Former Western Brass Manufacturing Facility, Los Angeles, California
- Former Dry Cleaner, Garden Grove, California
- Former Auto Dealership, Manhattan Beach, California
- Former Nike Missile Site, Rancho Palos Verdes, California
- Former Wastewater Treatment Plant, Fort Oglethorpe, Georgia
- 6,000 Acre Former Cattle Farm, Bleckley County, Georgia
- Three former gasoline stations, Savannah, Georgia

Mr. Fraske has conducted soil excavations, groundwater sampling, operations and maintenance of total fluids free product recovery systems and soil vapor extraction systems, well surveys, well development, groundwater sampling and effluent sampling of treated groundwater on several impacted properties.

Representative Remediation Project Experience

- Former Gasoline Station, Culver City California
- Former Dry Cleaner, Garden Grove, California
- Former Dry Cleaner, Montclair, California
- Former Plating Facility, West Hollywood, California
- Former Technicolor Studio, Hollywood, California
- Oil Spill, Fontana, California
- Former Auto Dealership, Manhattan Beach, California
- 6,000 Acre Former Cattle Farm, Bleckley County, Georgia
- Former Wastewater Treatment Plant, Fort Oglethorpe, Georgia
- Emory Northlake Medical Center, Tucker, Georgia,
- Peachtree Mitsubishi, Doraville, Georgia

Years experience with other firms: 2
Year started with PSI: 2004

DRAFT

Lloyd D. Guss, PG

Senior Geologist, Long Beach, California

Years with PSI: 5½ **Years experience with other firms: 13½**

Education

B.Sc. in Geology, California State University, Long Beach, 1992

Certifications/Registrations/Technical Training

California Registered Professional Geologist (No. 7034)
Colorado State Environmental Scientist registration (No. 5618)
Phase II Environmental Site Assessment Workshop, PSI (1999)
Professional Certificate in UST Leak Detection Standards and Systems,
University of California, Riverside (1994)
OSHA 29 CFR 1910.120 HAZWOPER, worker

Professional Experience

For about nineteen years, Mr. Guss has been involved with all aspects of quality project work for environmental and hazardous waste site investigations, risk management, and remediation activities. His responsibilities have included: project management, technical project oversight, project administration and budgeting, upholding company safety standards, regulatory agency liaison, managing and training personnel, data evaluation, and reporting.

California Department of Transportation (Caltrans) Project Experience

Mr. Guss has over eight years of experience providing services to Caltrans under various environmental related contracts. Services have included emergency response, UST removals, hazardous waste management, soil and groundwater assessments, and aerial deposited lead investigations throughout California. Projects have included property acquisition investigations, lead studies of bridge paint and right-of-way soil, and high profile drinking water assessments. Mr. Guss maintains a good working relationship with numerous contract managers at several Caltrans district offices throughout California.

Petroleum Hydrocarbon Project Experience

As Team Leader and Project Manager for environmental work at two major Los Angeles refineries, Mr. Guss was responsible for: a high profile groundwater investigation of Los Angeles aquifers (Gage, Lynwood, and Silverado), an LNAPL recovery optimization program to expand product recovery systems, oversight of air sparge and vapor extraction systems, remedial excavation of approximately 1,000 tons of California Hazardous Waste and reporting to the DTSC, and submitting routine deliverables to the CRWQCB and AQMD.

Landfill Project Experience

Mr. Guss managed a biologically sensitive military landfill remediation/restoration project, which involved the excavation of over 30,000 tons of dioxins, furans, and lead impacted soil. In addition, his team was responsible for initiating a re-profiling program so that soil could be separated and transported to the appropriate waste disposal facility, which resulted in a substantial cost saving for the client. Not only was the project completed under budget, but it was also completed on schedule.

Chlorinated Solvent Project Experience

Mr. Guss has managed a number of chlorinated solvent projects ranging from small dry cleaning facilities to a large chemical company tank farm located in the Port of Los Angeles.

APPENDIX J

QUALIFICATIONS

DRAFT

Courtney Dumas, PMP – Associate Consultant

Education:
Master of Real Estate Development, University of Southern California, 2003
BS Management Information Systems, University of Tulsa, 1993

Licenses/Registrations:
Certified Project Management Professional, Project Management Institute, 2013

Summary of Professional Experience:
Mr. Dumas has been involved in the real estate industry since 2003. His experience since 2007 includes managing environmental and real estate due diligence services for an international environmental engineering firm. He has managed and performed over 200 Phase I Environmental Assessments, and over 25 Property Condition Assessments, including lead-based paint, radon, asbestos and mold sampling assessments. Site types include industrial, multi-family, commercial, gas station, retail, adult-care facility, etc.

Additionally, Mr. Dumas' experience expands into real estate development and government contracting. In real estate development he developed single family homes, and represented clients in the entitlement /government approval process for the redevelopment of urban infill properties. As a Program Manager, he managed government contracts with federal agencies such as HUD and NASA, performing single family REO special property inspections, appraisal reviews, and deferred maintenance reporting.

Select project experience for Mr. Dumas includes:

- Apartments, Camarillo, CA, a 150-unit multifamily apartment complex, built in 1963, containing seven two-story buildings. This project was being financed under a Fannie Mae scope. Mr. Dumas conducted the environmental site assessment with no evidence of on-site RECs during the course of the assessment.
- Adult Care Facility, Los Angeles, CA, this 100 room Adult Care Facility included independent and assisted living, a pharmacy, a doctor's office, with recreational and rehabilitation facilities. Mr. Dumas conducted the environmental site assessment.
- Apartment, San Francisco, CA, a 5-story, 15-unit multifamily apartment building, built 1918. Mr. Dumas conducted the environmental, the property condition assessment and the PML site investigation. Site investigation revealed significant sub-structure and super-structure damages to the building which is located in an active seismic location. Recommendations include investigation and report by a structural engineer, and the completion of the report recommended repairs.

As a certified project manager professional, Mr. Dumas works directly with project stakeholders ensuring deliverables meet end-users' quality requirements. Mr. Dumas' background in due diligence, real estate development, and project management allows him to provide thorough assessments and evaluations thereby adding unparalleled value to the end product and the client's experience.

DRAFT

Michael J. Wolf – National Client Manager

Pennsylvania State University
B.S., Earth Science, May 1982

ASTM Environmental Assessment Standards Committee, Various Task Groups
OSHA 29 CFR 1910.120 40-Hour HAZWOPER and Supervisor Training and Annual 8-Hour Refreshers

Mr. Wolf has over 25 years of professional experience as an environmental consultant, with expertise in commercial client business development and technical project management. Primary clients include developers, real estate advisory firms, attorneys, lenders, foreign investors, and REITs. Mr. Wolf manages and conducts environmental due diligence projects across the U.S. and overseas, including portfolio projects. He is experienced in providing firm-wide operational support including project scoping, proposal preparation, project execution, and report reviews. Mr. Wolf's specific competencies include management of Phase I and II ESAs, PCAs, and third party/peer reviews of environmental reports, with a particular focus on the hospitality industry; Voluntary Cleanup and Voluntary Remediation Program investigations and remediation; vapor intrusion investigations and mitigation; petroleum tank removals/investigations; multimedia regulatory compliance audits; and other environmental studies.

As a Task Group member on the ASTM Environmental Assessment Standards Committee, Mr. Wolf actively participated in the development of the current Phase I ESA Standard (E1527-13) and provided multiple briefings and training sessions following publication. Since 2008, he has served as a Public Member on the Maryland Controlled Hazardous Substances (CHS) Advisory Council, appointed by the Governor, and has served as the Council Chair since 2012.

Project experience for Mr. Wolf includes:

- Phase I Environmental Site Assessments - Project manager for thousands of Phase I environmental assessments at commercial, residential, industrial, and undeveloped properties undergoing transfer, foreclosure, or financing. Significant experience with portfolio projects and hospitality properties. Activities include proposal preparation, organization of inspection teams, and report review and preparation.

- Phase II Site Investigations – Project Manager for soil, groundwater, and soil vapor investigations at a variety of commercial properties. Experienced in selection of subcontractors and development of subcontracts, design of sampling plans, management of field activities, data interpretation, and report review and preparation.

- Third Party/Peer Reviews – Provide technical reviews of due diligence reports prepared by other consultants to confirm adherence to ASTM standards, typical industry practices, and client expectations. Often combine these services with

DRAFT

desktop reviews and other research to fill in data gaps or provide preliminary findings to clients prior to full due diligence efforts.

- Voluntary Cleanup Program/Voluntary Remediation Programs – Project Manager for multi-phase and multi-media investigations and remediation projects in accordance with State VCP/VRP requirements, successfully obtaining No Further Action or Certificates of Completion letters on behalf of property owners.

- Regulatory Compliance Audits - Completion and management of multi-media environmental compliance audits ranging from limited reviews as part of Phase I ESAs to comprehensive compliance audits of operating industrial plants.

- Asbestos, Lead Paint and Mold Surveys and Abatement - Management of industrial hygiene services ranging from limited surveys as part of Phase I ESAs to comprehensive pre-renovation surveys, development of abatement specifications, and abatement monitoring.

- Remediation – Management of impacted soil excavation projects during property redevelopment; groundwater treatment activities; installation and monitoring of vapor intrusion mitigation systems; radon mitigation systems, and petroleum tank removal/remediation.

- Regulatory Compliance – Development of Stormwater Pollution Prevention Plans (SWPPPs); Spill Control and Countermeasure Plans (SPCCs); Assistance with UST and AST registrations; Completion of RCRA generator notifications; and other regulatory notifications and reports.

East	Ford Factory (777 S Santa Fe Ave) - former Ford manufacturing, now offices	None identified
South	LA Vegetable Inc. (2022 Violet Street)	None identified
West	Better Life Organics (2020 E 7th Place)	UST, FINDS

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- A tank of unknown size and contents was reportedly abandoned in place in 1960; the specific location of this tank is not known but according to LAFD records it was on the south side of the property. In 1960, there were no regulations for the closure of USTs and therefore the condition of the tank in 1960, or potential releases from this tank, are unknown. This former reported UST is considered a REC.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.
