Contact Information: edelgado@sarecycling.com Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to https://cersbusiness2.calepa.ca.gov to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change.
Eval Division:	Los Angeles City Fire Department
Eval Program:	HMRRP
Eval Source:	CERS

Eval General Type:	Other/Unknown
Eval Date:	05-08-2019
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Royce and I on site by accident. Wrong address. Once on site it was determined that site had been inspected earlier this year by Inspector Beltran. After walking their two sites with general manager, Toghrul Valizada it was recommended to add a couple of chemicals and change volume welding gases on the other.

Case Worker:	RV
Local Agency:	Not reported
RB Case Number:	1290
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Contaminated Surface / Structure, Soil, Soil Vapor
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Trichloroethylene (TCE), Chromium, Chromium VI
Site History:	Plating operations started in the mid-1910s in the southwestern portion of the Site until 2005. Ace Plating owned and conducted plating related operations on the 11 contiguous parcels, specifically electrochemical coating of metal parts. Numerous assessments conducted at the site indicate that the soil is impacted with VOCs and metals. The soil vapor has been sampled throughout the Site with tetrachloroethene (PCE) concentrations at 5 feet below ground surface (bgs) ranging from 7.9 micrograms per liter (a%g/L) to 87 a%g/L. The soil vapor data is limited at depths greater than 30 feet bgs. At 60 feet bgs and below, PCE concentrations range from 39 a%g/L below the Assembly Room to 127 a%g/L offsite on Crocker Street. The lateral extent of shallow PCE greater than 12 a%g/L is only defined on the east side. The source of the PCE is unknown but slightly higher concentrations exist in the central portions of the Plating Rooms. Chromium concentrations ranged from 1.5 mg/kg to 4,300 mg/kg for total chromium and from 0.92 to 840 mg/kg for hexavalent chromium. The maximum concentrations were both collected from SSVW-2 at 1 foot bgs located in the alley between the Crocker Street and Towne Avenue buildings and is adjacent to the location of the former chromium tanks. Outside of the area impacted by the former chromium tanks, the maximum chromium concentration is 4200 mg/kg for total chromium and 94 mg/kg for hexavalent chromium at MW-1. Degreasers that contained PCE were utilized in Plating Rooms 1 and 2 from 1993 to 2001. The maximum PCE concentration is 0.150 mg/kg and was sampled 4 feet deep in the vicinity of the former nickel dip tank in Plating Room 2. Two groundwater monitoring wells have been installed. Hexavalent chromium was not detected above the laboratory detection limits in any of the groundwater samples collected. Tetrachloroethylene (PCE) and

ACE PLATING CO., INC. (Continued) **S105632824**

1,1-dichloroethene are the only VOC detected in groundwater, with the maximum concentration detected in MW-3 at a concentration of 33 ug/L and 2.7 ug/L, respectively.

Alternate Address:	2435 E. WASHINGTON BLVD.
Alternate City,St,Zip:	LOS ANGELES, CA 90021
Background Info:	The historic usage of the site is a railroad maintenance yard. Chlorinated solvents TCE and PCE have been identified in the soil along the border of the site with 2425 E. Washington Blvd. Possible pathways for contamination migration are soil and groundwater. Possible receptors are on-site workers and the population which may drink contaminated drinking water extracted from nearby drinking wells. Some shallow soil gas sampling has been performed on-site in 1995. This survey was concentrated along the border of 2455 E. Washington Blvd. Results showed decreasing contaminant concentrations with increasing distance from 2425 E. Washington Blvd. property boundry. No source was identified at the Amtrak property.
	Not reported
	An approximately 50-acres site located in an industrial/ commerical area of Los Angeles, one-half mile south of the Santa Monica freeway. The site is also known as the Redondo Junction Facility. Various buildings are located on the property for support and maintenance of trains. Rail Spurs run throughout the property in a general north-south direction. The Los Angeles river is located directly to the east. Previous owner of the property from 1885 to 1976 was Atchison, Topeka, and Sante Fe Railroad Corporation.
	Not reported
	Investigation of this site is key to determining the extent of soil gas and groundwater contamination found on the adjacent property 2425 E. Washington Boulevard, known as State Surplus Parcel (SSL-497). A draft VCA was prepared by DTSC for recovery of oversight costs. A limited subsurface soil gas survey is proposed as a first step to determine extent of chlorinated solvent contamination and also to identify any contributing sources.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Comments:	DTSC completed a PEA and recommended further action at the site. This included further remedial activities, public participation and PRP search.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	10/30/1992
Comments:	While excavating the eastern area and demolishing all existing buildings, other areas were discovered to be contaminated with lead and VOCs (April'94). As a result the total volume of material excavated and removed prior to legislative cancellation of the prison project (Sept'92) was about 40,000 tons. Stabilization measures were also taken, including the implementation of dust control, fensing and posting, and site security. Further investigation and remediation was stopped due to lack of funds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Local Lists of Registered Storage Tanks

SWEEPS UST: SWEEPS UST Listing

Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

Date of Government Version: 06/01/1994
Date Data Arrived at EDR: 07/07/2005

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing
A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/14/2019

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Northwest Map:	5630741 HOLLYWOOD, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

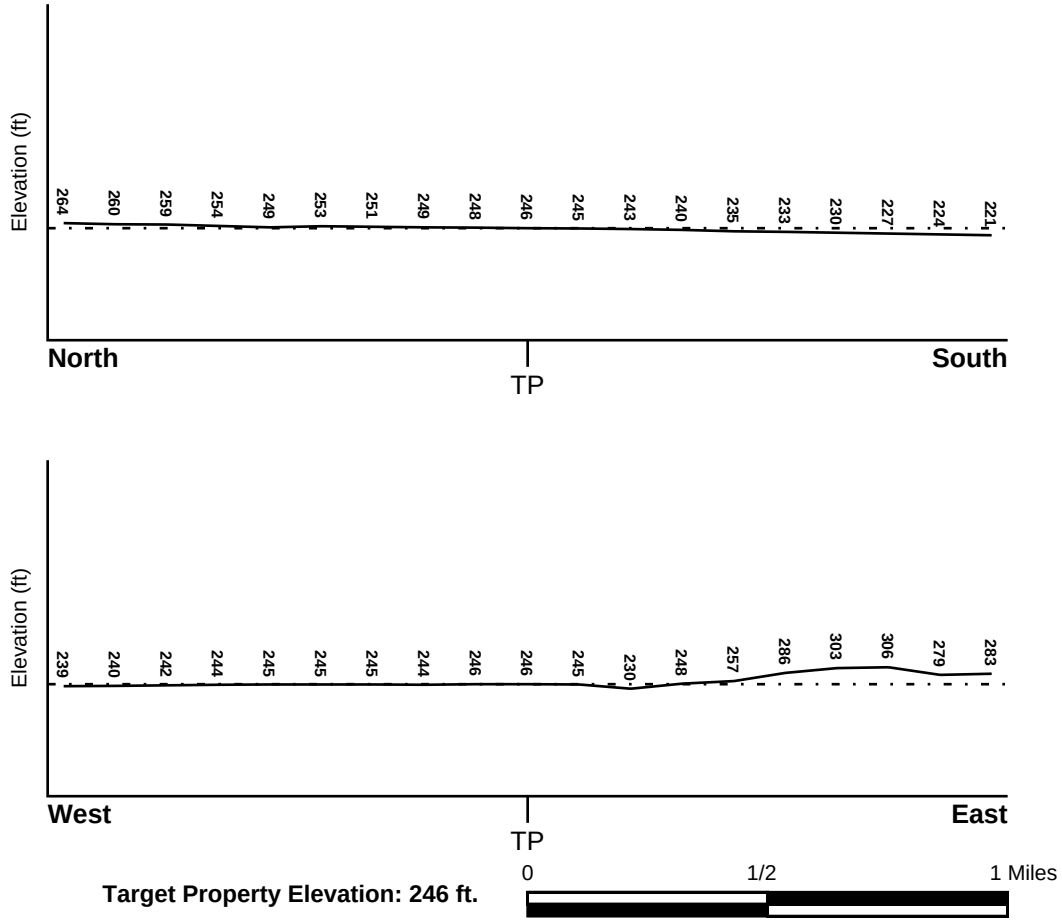
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1636F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1637F	FEMA FIRM Flood data
06037C1638F	FEMA FIRM Flood data
06037C1639F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
LOS ANGELES	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	1/4 - 1/2 Mile South	Not Reported
2	1/2 - 1 Mile NE	SW
1G	1/2 - 1 Mile NE	SW
2G	1/4 - 1/2 Mile South	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Ramboll were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Inquiry # 5987350.3	Contact: Rita Vincent

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ramboll were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

APPENDIX D
PREVIOUS ENVIRONMENTAL REPORTS

RAMBOLL

ENVIRONMENT
& HEALTH

Mr. Ted Hart
Hines
444 South Flower Street, Suite 2100
Los Angeles, California 90071

**PEER REVIEW OF ENVIRONMENTAL DOCUMENTS AND
RESULTS OF SOIL VAPOR SURVEY
2020 AND 2040 EAST 7TH PLACE AND 2045 VIOLET STREET
LOS ANGELES, CALIFORNIA**

March 18, 2020

Ramboll
350 S Grand Avenue
Suite 2800
Los Angeles, CA 90071
USA

T +1 213 943 6300
F +1 213 943 6301
www.ramboll.com

Dear Mr. Hart:

Ramboll US Corporation (Ramboll) was retained by Hines ("client") to perform a review of environmental documents pertaining to the properties located at 2020 East 7th Place, Los Angeles, California (2020 East 7th Place Site), 2040 East 7th Place (2040 East 7th Place Site) and 2045 Violet Street, Los Angeles, California (Violet Street Site), collectively referred to as the "Subject Site". It is our understanding that Hines is considering purchasing the Subject Site and would like to gain an understanding of the existing environmental conditions.

As a result of the peer review, Ramboll recommended and subsequently performed a soil vapor survey to the adjacent east and north of the Subject Site. The results of Ramboll's peer review and soil vapor survey are summarized herein.

PEER REVIEW OF ENVIRONMENTAL DOCUMENTS

The objective of the peer review was to opine on whether Ramboll agrees with the conclusions of the prior reports prepared for the Subject Site. As part of this task, Ramboll completed a review of the following environmental documents:

- Phase I Environmental Site Assessment, 2020 East 7th Place, Los Angeles, California, prepared by AEI Consultants, dated September 17, 2018 (the "2020 7th Place Phase I ESA").
- Phase I Environmental Site Assessment, 2040 East 7th Place, Los Angeles, California, prepared by AEI Consultants, dated April 2, 2019 (the "2040 7th Place Phase I ESA").
- Phase I Environmental Site Assessment, 2045 Violet Street, Los Angeles, California, prepared by AEI Consultants, dated September 17, 2018 (the "Violet Street Phase I ESA").
- Geophysical Survey, 2045 Violet Street, Los Angeles, California, prepared by AEI Consultants, dated October 26, 2018 (the "October 2018 Geophysical Survey").
- Limited Subsurface Investigation, 2045 Violet Street, Los Angeles, California, prepared by AEI Consultants, dated November 12, 2018 (the "November 2018 Limited Subsurface Investigation").

In addition, Ramboll reviewed the following report prepared for the adjacent Ford Factory property but includes the 2040 East 7th Place address (see 2040 East 7th Place section for report summary):

- Phase I Environmental Site Assessment Report, Ford Factory, 777 and 821 South Santa Fe Avenue; 2060 East 7th Street; 2030 and 2040 East 7th Place, Los Angeles, California, 90021, prepared by Partner Assessment Corporation (Partner), dated June 14, 2017 (the "Partner Phase I ESA").

Summary of Environmental Documents

2020 East 7th Place September 2018 Phase I ESA

Site Summary

According to AEI, the 2020 East 7th Place Site is approximately one acre improved with a single on-site building used for warehousing and shipping of agricultural produce. The Los Angeles County Tax Assessor lists the 2020 East 7th Place Site with APN No. 5166014012. The site was developed for commercial uses starting in the early 1920s. From 1950 until 2002, the site was an auto/truck repair shop and truck parking. Following building reconstruction in 2002, the site has been used for warehousing and shipping of agricultural produce; no manufacturing is conducted on-site. Two underground storage tanks (USTs) with an associated fuel pump and dispenser are currently present at the site.

First-encountered groundwater beneath the site is expected at approximately 95 feet below ground surface (bgs) with a southwest groundwater flow direction. The nearest body of water, the Los Angeles River, is approximately 1,150 feet east of the site.

Findings

AEI did not identify any Recognized Environmental Concerns (RECs)[1] in the 2020 East 7th Place Phase I ESA and no further investigation was recommended.

AEI listed the following as "Other Environmental Considerations (OECs)":

- The 2020 East 7th Place Site houses a 10,000-gallon diesel UST and a 10,000-gallon gasoline UST for truck fueling. The tanks were installed in 1998, prior to redevelopment of the site with the current building in 2002. The tanks are currently permitted. The Los Angeles Fire Department (LAFD) conducted an inspection and provided integrity tightness test results from June 2018, which indicated the USTs and fueling lines were in full compliance. AEI recommended the tanks be properly maintained and monitored for integrity.
- LAFD records indicated five petroleum USTs were historically located on-site and were originally installed in the 1960s (one 10,000-gallon and two 1,000-gallon gasoline USTs, and two 1,000-gallon waste oil USTs). The USTs were removed in 1993 under LAFD oversight. Based on results of soil sampling conducted at the time of UST removal, the former USTs were not considered a REC. All soil samples reported non-detect concentrations of total petroleum hydrocarbons as gasoline (TPHg), TPH as diesel (TPHd), benzene, toluene, ethylbenzene, xylenes (BTEX), and lead. AEI recommended no further investigation but advised if future construction at the site was conducted, impacted soils may be encountered and should be properly managed.
- AEI observed possible asbestos containing material on-site during the site visit in September 2018, but in good condition. AEI stated the likelihood that certain building materials may contain asbestos material should not be discarded. AEI recommended an asbestos survey be conducted prior to demolition or building upgrades.

[1] In accordance with the ASTM 1523-13 Standard.

2040 East 7th Place April 2019 Phase I ESA

Site Summary

According to AEI, the 2040 East 7th Place Site is currently an asphalt paved parking lot of approximately 0.35 acres. The Los Angeles County Tax Assessor lists the site with APN No. 5166-014-001. The 2040 East 7th Place Site remained vacant prior to 1906, was used as a storage yard from 1923 until 1948, and was developed into a motor freight depot and loading docks from 1950 until approximately 2005. From 2009 to 2014, the site was once again used as a storage yard and parking lot. From 2018 to the present, the site has remained a parking lot.

Findings

Records from LAFD indicate two petroleum hydrocarbon USTs, one 6,500-gallon UST and one 1,000-gallon UST, were previously located at the 2040 East 7th Place Site and were removed from the site in 1994 under LAFD oversight. Soil samples collected at the time of UST removal reported that TPHg, TPHd, and BTEX were not detected in the soil samples, with the exception of toluene and xylenes, which were reported at maximum concentrations of 0.068 mg/kg and 0.042 mg/kg, respectively. Lead was reported at a maximum concentration of 127 mg/kg.

As part of the Phase I ESA, AEI reviewed the Partner Phase I ESA prepared for the adjacent Ford Factory property. The Ford Factory property included various addresses that included the 2040 East 7th Place Site: 777 and 821 South Santa Fe Avenue, 2060 East 7th Street, and 2030 and 2040 East 7th Place, Los Angeles, California. Long term industrial use was identified at the Ford Factory property which included the following activities at various times over the period of approximately 1924 to 1985: vehicle manufacturing and repair, printing, metal plating, chemical warehousing, machining operations, and parking for truck and freight operations. According to the Partner Phase I ESA, the 2040 East 7th Place Site was used as a parking lot for truck and freight tenants from approximately 1958 to 1971; other operations of interest include metal plating that was conducted at the southwest corner of the Ford Factory building, across the alley from the Violet Street Site, and the chemical warehousing operations that occurred in the northwest portion of the Ford Factory property, across East 7th Place from the 2040 East 7th Place Site.

According to the Partner Phase I, a geophysical survey was performed by AMEC in 2014 at the 2040 East 7th Place Site in connection with the Ford Factory property, and the presence of USTs was not identified. Additionally, a subsurface investigation was performed by AMEC in 2015 at the Ford Factory property to evaluate impacts from historical industrial site uses. Six soil samples were collected at unknown depths from borings advanced to 15 feet bgs: three samples were reportedly collected on the 2040 East 7th Place Site on the northeast corner of the site, and three samples were collected on the adjacent property to the north. The soil samples were analyzed for TPH-cc, metals, VOCs, and semi-volatile organic compounds (SVOCs). None of the samples contained detectable concentrations of the constituents of concern with the exception of typical background concentrations of metals. AMEC concluded that no further investigation would be warranted for the Ford Factory property.

Partner concluded in their Phase I ESA that, "*Based on the duration of use and likely storage and generation of large quantities of hazardous materials, the historical use of the subject property represents a recognized environmental condition and vapor encroachment cannot be ruled out at this time*." Partner recommended further assessment be performed at the Ford Factory property to evaluate subsurface impacts from constituents of concern including TPH, VOCs, and heavy metals. To Ramboll's knowledge, this subsurface assessment has not been performed.

AEI did not identify any RECs in the 2040 East 7th Place Phase I ESA. AEI listed the following as an OEC:

- According to AEI, the property was developed with a motor freight depot from 1950 until approximately 1970. Review of UST records with the LAFD indicated two petroleum hydrocarbon USTs, one 6,500-gallon UST and one 1,000-gallon UST, were abandoned and removed from the property in 1994. Contaminated soil and groundwater were not reported during the UST removal activities. Subsequent environmental investigations in 2015 did not detect petroleum or related constituents at the site. Various USTs were located on the adjacent properties to the east and south, and active petroleum USTs are located on the adjacent property to the west. AEI concluded that low levels of petroleum constituents could be present at the property from the historical and current USTs in the vicinity, but according to AEI, this issue is not considered to represent a REC.

Violet Street September 2018 Phase I ESA

Site Summary

According to AEI, the Violet Street Site is approximately 0.5 acres and improved with a single on-site building, which was constructed in 1941 and renovated in 2015. The Los Angeles County Tax Assessor lists the Violet Street Site with APN No. 5166014003. The site remained vacant prior to 1906, was a city playground from approximately 1906 to 1923, and residential until approximately 1929, when the site was redeveloped for commercial use. Early commercial use included a grocery and liquor store. Based on city directories, the site has been used for various commercial purposes including a fleet maintenance and truck rental company in 1951 and a manufacturer of plastics from 1958 to 1962. Current operations include commercial businesses, a freight line facility, box manufacturer, market, and produce company.

Findings

Records from LAFD indicated various USTs and aboveground storage tanks (ASTs) have been historically present on-site. Two ASTs contained propane are were not considered to be an environmental concern by AEI. Two diesel fuel USTs, one 6,000-gallon and one 7,500-gallon, on the north side of the building were removed in 1998 under LAFD oversight.

A review of the July 1998 UST Removal Report, included as an appendix to the Violet Street September 2018 Phase I ESA, provided additional details with respect to removal of the 6,000-gallon and 7,500-gallon diesel USTs in 1998 mentioned above. The USTs were reportedly in good condition at the time of removal. Under the direction of the LAFD, two samples were collected from the bottom of each excavation at approximately 3 feet below each UST (approximately 12-15 feet bgs) and analyzed for metals, TPHg, TPHd, BTEX, and methyl tert-butyl ether (MTBE). Lead concentrations ranged from 0.89 to 28 milligrams per kilogram (mg/kg) and TPHd concentrations ranged from non-detect to 63 mg/kg. TPHg, BTEX, and MTBE were not reported in the soil samples. No additional investigation was recommended by Targhee.

Additional LAFD records reported a single UST that was abandoned in place in 1960 and filled with sand (size is unknown). According to records, "*the tank was reportedly 20 feet from the southside of the building, and 15 feet from the west side of the building.*" Potential releases of the UST were unknown and therefore, AEI recommended additional investigation.

The California Department of Toxic Substances Control (DTSC) hazardous waste database listed oil/water separation sludge generation at the site in 1998 and 2005. A new clarifier was reportedly installed in 2014, possibly replacing an older clarifier used in the 1990s and 2000s. During the site visit conducted by AEI in 2018 for the Phase I ESA, the clarifier was not in use, and no staining was observed. According to AEI, a permit for the clarifier was cleared by Public Works for discharge into the public sewer system; however, there is not a record for a permit to operate issued by the Los Angeles Building and Safety Department. AEI did not consider the clarifier to represent an environmental concern.

In summary, the Violet Street Phase I ESA revealed the following REC in connection with the Violet Street Site:

- Based on a review of LAFD records, it was discovered that a UST was abandoned in place in 1960. AEI recommended a geophysical survey and subsurface investigation to evaluate the presence of the UST.

AEI listed the following as OECs:

- Records from LAFD indicated several ASTs and USTs were previously located on the property. Two ASTs contained propane, and USTs on the north side of the building contained diesel fuel and were removed in 1998 under LAFD oversight. Based on results of soil sampling conducted during UST removal, the two diesel USTs were not considered a REC according to AEI. AEI advised if future construction on the property was conducted, impacted soils may be encountered and should be properly managed.
- Although there were renovations on-site in 2014, there may be potential for lead and asbestos materials due to the age of the property.

October 2018 Geophysical Survey

To address the REC identified in the Violet Street Phase I ESA, AEI conducted a geophysical survey at the Violet Street Site in October 2018. The objective of the geophysical survey was to identify the presence of a UST, which may have been abandoned in place circa 1960 following possible use in the by former site occupants Southwestern Freight Lines and/or Apex Wholesale Produce.

A geophysical survey was conducted by AEI on October 19, 2018 on southwestern portion of the site, where the UST could have been located according to LAFD records. An anomaly was discovered on the "*southeastern edge of the parking lot, adjacent to a landscape area in the building*", according to the report, and although the anomaly did not confirm if in fact it was an abandoned UST, the size and shape of the anomaly resembled footprints of an abandoned UST. AEI recommended a Phase II subsurface investigation to evaluate any subsurface impacts in the area of the potential UST.

November 2018 Limited Subsurface Investigation

Based on the results of the geophysical survey described above, a limited subsurface investigation was conducted by AEI on November 5, 2018, to evaluate possible TPH or VOC impacts associated with the potential UST.

The investigation consisted of advancing two soil borings to 10 feet bgs, one along the southwestern corner of the geophysical anomaly and the other along the northwestern corner of the anomaly. Soil samples were collected at 5 and 10 feet bgs. Soil samples at 5 feet were placed on hold, while the 10-foot samples were analyzed for TPHd, TPHd, and TPH as oil (TPHo), collectively TPH-full carbon chain (TPH-cc), and VOCs. TPH-cc and VOCs were not reported in the soil samples collected at 10 feet bgs, and the five-foot soil samples were therefore not analyzed. Based on the results of the investigation, no further action was recommended by AEI. AEI advised that, while further evaluation of the anomaly is not mandatory at this time, the UST, if present, would need to be addressed prior to any site redevelopment, which would include engaging the LAFD.

RAMBOLL SOIL VAPOR SURVEY

Based on its peer review Ramboll considered the proximity of the Subject Site to the Ford Factory property, which had a long history of industrial use from approximately 1924 to 1985, to represent a potential environmental concern. Former operations at the Ford Factory property that could have contributed to subsurface impacts include but are not limited to metal plating, chemical warehousing, vehicle manufacturing and repair, printing, and machining operations. The Ford Factory property recently

underwent a $50-million renovation in the mid to late 2010s; however, there is no publicly available documentation for the property on the Geotracker or EnviroStor agency databases, and it is unclear whether property redevelopment included soil excavation. In addition, the Partner Phase I ESA prepared for the Ford Factory recommended a subsurface investigation be performed to evaluate potential impacts from former operations at the Ford Factory building, and stated vapor encroachment could not be ruled out. Operations at the Ford Factory building could have resulted in subsurface impacts beneath that building and, given the close proximity of the Ford Factory property to the Subject Site, VOCs in soil vapor could have migrated from beneath the Ford Factory property to beneath the Subject Site, resulting in a vapor encroachment condition at the Subject Site. Ramboll therefore recommended a soil vapor survey to evaluate the potential for vapor migration.

Given that access to the Subject Site was restricted to perform any intrusive investigations, a soil vapor survey was performed by Ramboll on February 21 and 24, 2020 in the alley immediately east of the Subject Site and along East 7th Place immediately north of the Subject Site. The objective of the soil vapor survey was to evaluate the potential for VOC vapor migration from the Ford Factory property to the Subject Site.

Scope of Work

The scope of work for the soil vapor survey included: (1) pre-field activities and permitting; and (2) soil and soil vapor sampling. Drilling and sampling activities were supervised by Ramboll field personnel working under the supervision of a California Registered Professional Engineer and Geologist.

Task 1: Pre-Field Activities and Permitting

Prior to initiation of drilling activities, Ramboll marked the planned investigation locations and contacted Underground Service Alert (USA) at least 48 hours prior to the start of drilling activities to mark the locations of all major utilities in the vicinity of the proposed boring locations. In addition to the services provided by USA, Ramboll contracted with Spectrum Geophysics (Spectrum) of Chatsworth, California, a private utility locating company, to conduct a geophysical survey in the immediate vicinity of the proposed vapor probe and monitoring well locations to identify subsurface structures or underground obstructions.

Ramboll obtained an excavation permit (Permit No. 2020000110) from the City of Los Angeles Bureau of Engineering to drill in the alley and on East 7th Place and coordinated with the appropriate City inspector. Ramboll also prepared a site-specific Health and Safety Plan (HASP) prior to the initiation of drilling activities. The HASP is designed to minimize exposure of Ramboll's field personnel to potentially hazardous materials. All field personnel involved in the project were required to implement the procedures presented in the HASP while conducting the planned field work. Ramboll also contracted out with the appropriate subcontractors for the planned fieldwork (utility locators, drillers, analytical laboratories, etc.).

Task 2: Soil and Soil Vapor Sampling

On February 21, 2020, BC2 Environmental of Orange, California, installed nine temporary soil vapor wells (designated as SV-1 through SV-9) at the locations in the alley and on East 7th Place depicted on Figure 1. The soil vapor probes were installed under the oversight of Ramboll, and were advanced by first coring through the asphalt with a coring machine, and then using a hand auger to advance the borings to a depth of approximately 5 feet bgs. A soil sample was then collected at each location using a slide hammer advanced from approximately 5 to 5.5 feet bgs.

Following soil sampling, a soil vapor probe was installed in each boring at an approximate depth of 5 feet. Each 6-inch stainless steel soil vapor probe was connected to Teflon® tubing and installed within at least one foot of sand pack with one foot of dry granular bentonite atop the sand pack. The remaining annular space was filled with hydrated bentonite to approximately 6 inches bgs, and the probes were completed with permanent well boxes secured with concrete and installed flush with ground surface. All non-dedicated

tools and equipment (hand auger, slide hammer, etc.) were decontaminated between boring locations using a triple-rinse system, or equivalent.

Soil vapor probe installation and sampling was performed in general accordance with the guidelines established jointly by the California Department of Toxic Substances Control (DTSC), the Los Angeles Regional Water Quality Control Board, and the San Francisco Regional Water Quality Control Board Advisory – Active Soil Gas Investigations, dated July 2015 (Advisory). Following the minimum equilibration period of 48 hours, soil vapor samples were collected on February 24, 2020 from each probe using a Tedlar bag and analyzed by Jones Environmental in their Santa Fe Springs, California state-certified laboratory by United States Environmental Protection Agency (USEPA) Method 8260B and within the 6-hour timeframe specified by the DTSC. As part of quality control, one duplicate sample was collected, a leak detection compound (a tracer gas mixture of n-pentane, n-hexane, and n-heptane) was applied prior to sampling, and both leak testing and shut-in testing was conducted.

In accordance with USEPA Method 5035, each soil sample was collected by extracting three five-gram aliquots from the designated sampling sleeve using a single-use Terra Core™ T-handle device. Each aliquot was placed in a sealable envelope, stored in a chilled cooler, and delivered to Eurofins TestAmerica in Irvine, California, a state-certified analytical laboratory, under chain of custody procedures. Soil samples were analyzed for VOCs by USEPA Method 8260B on an expedited 24-hour turnaround time.

During field activities, Ramboll field screened soil with a photoionization detector (PID) for organic vapors. Field-screening results did not indicate evidence of potential impacts at any of the boring locations. Stained or odorous soil was also not observed in the borings.

Data Evaluation

The soil and soil vapor samples collected during Ramboll's February 2020 investigation were compared to published regulatory guidance, where applicable, for a commercial/industrial land use scenario. DTSC recommends the use of default attenuation factors for preliminary screening evaluations in its Human and Ecological Risk Office (HERO) Note 4 (May 2019). The screening levels for soil vapor referenced below were calculated by dividing the USEPA Commercial/Industrial Regional Screening Levels (November 2019) and DTSC HERO Note 3 and 4 Commercial/Industrial Screening Levels (April and May 2019, respectively) for indoor air by the current default attenuation factor (AF) of 0.001. An AF of 0.03 was also used to calculate screening levels as a conservative measure. The 0.03 AF is a default USEPA standard that California regulatory agencies are in the process of adopting (currently a draft guidance open for public comment). These calculated screening levels provide an estimated exposure point concentration for possible vapor intrusion from soil vapor into a commercial/industrial building.

Soil

VOCs were not reported above respective laboratory reporting limits (RL) in any of the nine soil samples collected. The laboratory report is provided in Attachment A.

Soil Vapor

VOCs reported in soil vapor are summarized and compared to applicable screening levels in Table 1, and included in laboratory analytical reports in Attachment A. In summary:

- Tetrachloroethene (PCE) was reported in 3 of 9 primary soil vapor samples with a maximum concentration of 0.073 micrograms per liter (µg/L) reported in Sample SV-9. The maximum reported concentration was slightly above the USEPA/DTSC commercial screening level using an AF of 0.03, but below the screening level using an AF of 0.001 (2.0 µg/L). Other detections of PCE were below screening levels calculated under both AFs (0.001 and 0.03).

- Freon 11 was reported in 1 of 9 primary soil vapor samples at a concentration of 0.017 µg/L reported in Sample SV-4. This concentration is well below the USEPA/DTSC commercial screening levels using an AF of 0.03 or 0.001.
- Other VOCs were not reported above their respective laboratory RLs in the soil vapor samples.

CONCLUSIONS AND RECOMMENDATIONS

Based on its peer review of existing reports and the subsequent soil vapor, Ramboll presents the following conclusions and recommendations:

- Ramboll considered the proximity of the Subject Site to the Ford Factory property, which had a long history of industrial use from approximately 1924 to 1985, to represent a potential environmental concern. Former operations at the Ford Factory property that could have contributed to subsurface impacts include but are not limited to: metal plating, chemical warehousing, vehicle manufacturing and repair, printing, and machining operations. The Partner Phase I ESA prepared for the Ford Factory property recommended a subsurface investigation be performed to evaluate potential impacts from former operations at the Ford Factory building and stated vapor encroachment could not be ruled out. To evaluate the potential for vapor migration from the Ford Factory property onto the Subject Site, Ramboll performed a soil vapor survey in the public right of way between the two properties. Based on the results of the soil vapor survey, as described above, it does not appear that VOC release(s), if any, from the adjacent Ford Factory property have migrated toward the Subject Site in a manner that would result in an adverse soil vapor condition at the Subject Site. Further, the VOC concentrations reported in soil vapor would be considered to fall within the low end of the regulatory agency-acceptable risk management range for commercial/industrial land uses.
- AEI did not identify any RECs in connection with the 2020 and 2040 East 7th Place Sites but identified the possible abandoned UST at the Violet Street Site as a REC. A geophysical survey and limited subsurface investigation were subsequently conducted to evaluate subsurface impacts related to the potential UST. TPH-cc and VOCs were not reported in the two soil samples analyzed during the investigation. Based on results, no further investigation was recommended by AEI. Based on the review of documents provided, Ramboll agrees with AEI's conclusions that there are no RECs identified for the 2020 and 2040 East 7th Place Sites. Given the results of the geophysical survey and subsurface investigation conducted at the Violet Street Site, Ramboll also did not identify any significant issues of environmental concern on that portion of the Subject Site.
- Several USTs and ASTs were formerly present at various locations across the Subject Site, resulting in residual soil impacts. While the concentrations reported in soil samples collected to date are low and do not represent a significant environmental concern, it would be prudent to perform a soil characterization prior to conducting any earthwork activities, as it's possible some of the excavated soil would require additional handling/disposal considerations. Further, Ramboll recommends that a soil management plan (SMP) be prepared and followed during earthwork activities.
- The UST on the Violet Street Site, if present, would require removal and appropriate permitting. If the clarifier at the Violet Street Site is in use, any discharges should be permitted and reported to the appropriate regulatory agency. If features such as USTs and clarifiers are discovered during earthwork activities, they can be addressed as part of implementation of the SMP.

LIMITATIONS

It should be noted that the scope of work for this project was not that of a Phase I ESA. This peer review did not include tasks that are typically performed as part of an ASTM-compliant Phase I ESA (e.g., visits to regulatory agencies, review regulatory agency files). This assessment has been prepared exclusively for use by Hines and its successors and assigns and may not be relied upon by any other person or entity without Ramboll's express written permission. Any successor or assign that relies on this report agrees to the existing business terms and conditions between Ramboll and Hines and agrees that Ramboll's total exposure and liability in connection with the report to both our client, Hines, and all other parties to whom reliance has been granted to do not exceed the limitations of liability in the referenced existing business terms and conditions for this assignment.

The conclusions presented in this report represent Ramboll's professional judgment based on the information available to us during the course of this assignment and is true and correct to the best of Ramboll's knowledge as of the date of the assessment. Nevertheless, this report is accurate and complete only to the extent that information provided to Ramboll was itself accurate and complete.

CLOSING

Ramboll appreciates the opportunity to be of service to Hines. Please do not hesitate to contact us if you have questions.

Very truly yours,

Notes:

Only compounds reported above the laboratory reporting limit are shown.

µg/L - micrograms per Liter

AF - Attenuation Factor

DTSC - Department of Toxic Substances Control

USEPA - United States Environmental Protection Agency

<X - Not reported above laboratory reporting limit

Replicate samples are italicized

Highlighted values exceed the commercial/industrial screening level (AF = 0.03)

Soil vapor samples were analyzed for volatile organic compounds (VOCs) by USEPA Method 8260B.

Soil vapor screening levels were the ratio of the DTSC-Modified RSLs (Cal/EPA 2019) or USEPA RSLs (USEPA 2019) for indoor air to the corresponding default attenuation factors as recommended by Cal/EPA (2011) for commercial/industrial building scenario (AF = 0.001) (see reference below) and EPA (2015) (AF = 0.03). Most stringent of DTSC or USEPA screening level used.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Accreditation/Certification Summary

Client: Ramboll US Corporation
Project/Site: Hines Art District-1690016225

Job ID: 440-261409-1
SDG: Los Angeles, CA

Laboratory: Eurofins Calscience Irvine

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
California	State	2706	06-30-20

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
8260B	5035	Solid	Dichlorodifluoromethane

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	N/A	Not present
Sample custody seals, if present, are intact.	N/A	Not Present
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Company	Date: Time:	Company	Date: Time:		

Client signature on this Chain of Custody form constitutes acknowledgement that the above analyses have been reqested, and the information provided herein is correct and accurate.

Ramboll reviewed two (2) laboratory reports, one dated February 25, 2020 by Jones Environmental Laboratory (Jones) and one dated February 26, 2020 (Revision 1) by Eurofins Calscience, for the 1690016225 project. The reports contain analytical data for soil, soil gas, and field quality control (QC) samples collected on February 21 and 24, 2020. All samples were analyzed for Volatile Organic Compounds (VOCs) by United States Environmental Protection Agency (USEPA) Method 8260B.

Ramboll's review was based on procedures published by the USEPA Contract Laboratory Program in their National Functional Guidelines for organic data (USEPA, 2017). The guidelines provide the criteria to review laboratory and field QC information and attach the appropriate data qualifiers to the laboratory data. The QC information checked by Ramboll included chain-of-custody (COC) forms, holding times, reporting limits, laboratory control sample/laboratory control sample duplicate (LCS/LCSD) analysis, surrogate recoveries, duplicates, and blanks.

Ramboll noted the following findings based on our review:

- For the February 21, 2020 sampling date, two of the samples on the COC were crossed out and initialed by the sampler. No data qualification is necessary.
- For the February 24, 2020 sampling date, the time on the COC was not filled out by the sampler. This was likely due to human error. The samples were collected and immediately transferred to the laboratory. No data qualification is necessary.

Subject: **Phase I Environmental Site Assessment**
2040 East 7th Place
Los Angeles, California 90021
AEI Project No. 402547

Dear Mr. Sonnenborn:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (301) 337-9249 or mwolf@aeiconsultants.com.

Sincerely,

Michael J. Wolf
National Client Manager
AEI Consultants

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by Access Industries, Inc. to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 2040 East 7th Place, Los Angeles, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

PROPERTY INFORMATION	
Site Address(es)	2040 East 7th Place, Los Angeles, Los Angeles County, California 90021
Property ID (APN or Block/Lot)	5166-014-001
Location	South side of East 7th Place, north of Violet Street
Property Type	Parking Lot
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	0.35 Acre/Client
Number of Buildings	N/A
On-site Occupant(s)	None identified
Current On-site Operations/Use	Asphalt-paved parking lot
Current Use of Hazardous Substances	None identified
REGULATORY INFORMATION	
Regulatory Database Listing(s)	SWEEPS UST, CA FID UST

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Use (Historical Addresses)	Source(s)
1900-1906	Vacant land	Sanborn maps
1923-1948	The subject property is vacant land and/or a storage yard (2040 Atlantic)	Sanborn maps, Aerial photographs
1950-1970	The subject property is occupied by a motor freight depot, loading dock, and associated gasoline tanks (2040 East 7th Place)	Sanborn maps, Previous Reports, Agency Records
1972-2005	The subject property appears developed with the motor freight building and associated yard (2040 East 7th Place)	Aerial photographs, Previous Reports, Agency Records
2009-2014	The subject property appears developed with a storage yard/ parking lot (2040 East 7th Place)	Aerial photographs
2018-Present	The subject property appears developed with a parking lot (2040 East 7th Place)	Aerial photographs, city directories, site observation

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	East 7th Place followed by: Ford Factory Parking Garage (777 S. Santa Fe Avenue)	SWEEPS UST, CA FID UST, NPDES, CIWQS
East	East 7th Place followed by: Ford Factory (777 S. Santa Fe Avenue) (Note, formerly a Ford manufacturing plant int eh 1920s, currently a multi-tenant office building).	SWEEPS UST, CA FID UST, NPDES, CIWQS
South	Splits 59 (2045 Violet Street)	UST, SWEEPS UST, CA FID UST
West	Better Life Organics (2020 E. 7th Place)	UST

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- AEI did not identify evidence of RECs during the course of this assessment.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

- According to a review of historical sources, the subject property was developed with a motor freight depot circa 1950-1970. Review of UST records on file with the LAFD indicate that two petroleum hydrocarbon USTs were abandoned and removed from the subject property in 1994. The tanks were identified to consist of one 6,500-gallon

UST and one 1,000-gallon UST. No contaminated soil or groundwater were reported during the tank removal activities. Subsequent environmental investigations in 2015 did not detect the presence of petroleum or related constituents at the subject property. Currently, the subject property is developed with an asphalt-paved parking lot with no structures present and is planned for redevelopment with the adjacent Ford Factory (a Ford manufacturing plant in the 1920s, currently a multi-tenant office building). Multiple USTs were located on the adjacent properties to the east and south, and active petroleum USTs are located on the adjacent property to the west. Low level subsurface impacts could be present at the subject property from the former and current tanks in the vicinity, but this issue is not considered to represent a REC.

CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 2040 East 7th Place, Los Angeles, Los Angeles County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the subject property during the course of this assessment. However, AEI understands that the subject property, south adjacent property, and west adjacent property are planned for redevelopment in connection with the wast adjacent Ford Factor building. Should any impacted soil and/or groundwater be encountered during site redevelopment activities, proper documentation and removal of the materials should be completed in compliance with local, state, and federal regulations.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 2040 East 7th Place, Los Angeles, Los Angeles County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 ADDITIONAL SERVICES

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

1.5 LIMITING CONDITIONS/DEVIATIONS

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- On March 19, 2019, Los Angeles County Fire Department Health and Hazardous Materials Division (LACFDHHMD) was contacted for information on the subject property in order to identify historical tenants, property use and/or hazardous materials handling. Due to the time frame of this assessment, records at the LACFDHHMD were not available for review. However, based on the quality of information obtained from other sources, this limitation is not expected to significantly alter the findings of this assessment.
- The subject property owner was not interviewed during this assessment. Based on information obtained from other sources, including regulatory agencies, this limiting condition is not expected to alter the overall findings of this assessment.

1.6 DATA FAILURE AND DATA GAPS

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 DATA FAILURE

AEI did not identify evidence of data failure during the course of this assessment.

1.6.2 SIGNIFICANT DATA GAPS

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 RELIANCE

All reports, both verbal and written, are for the benefit of Access Industries, Inc.. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery

whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by Access Industries, Inc. on March 13, 2019. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

2.0 SITE AND VICINITY DESCRIPTION

2.1 SITE LOCATION AND DESCRIPTION

PROPERTY INFORMATION	
Site Address(es)	2040 East 7th Place, Los Angeles, Los Angeles County, California 90021
Property ID (APN or Block/Lot)	5166-014-001
Location	South side of East 7th Place, north of Violet Street
Property Type	Parking Lot
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	0.35 Acre/Client
Number of Buildings	N/A
On-site Occupant(s)	None identified
Current On-site Operations/Use	Asphalt-paved parking lot
Current Use of Hazardous Substances	None identified
REGULATORY INFORMATION	
Regulatory Database Listing(s)	SWEEPS UST, CA FID UST

2.2 ON-SITE UTILITIES

The property is currently a parking lot with no active utilities; the following utilities are available"

Utility	Source/System Information
Heating System	N/A
Cooling System	N/A
Potable Water	LADWP
Sewage Disposal/Treatment	LADWP

Utility source/system information listed in the table above is provided by City of Los Angeles.

2.3 SITE AND VICINITY CHARACTERISTICS

The subject property is located in an industrial/light manufacturing area of Los Angeles, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	East 7th Place followed by: Ford Factory Parking Garage (777 S. Santa Fe Avenue)	SWEEPS UST, CA FID UST, NPDES, CIWQS
East	East 7th Place followed by: Ford Factory (777 S. Santa Fe Avenue) (Note, formerly a Ford manufacturing plant int eh 1920s, currently a multi-tenant office building).	SWEEPS UST, CA FID UST, NPDES, CIWQS
South	Splits 59 (2045 Violet Street)	UST, SWEEPS UST, CA FID UST
West	Better Life Organics (2020 E. 7th Place)	UST

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

2.4 PHYSICAL SETTING

Geologic Unit: Description/Source	Marine And Nonmarine (Continental) Sedimentary Rocks from the Pleistocene-Holocene age. Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast. /USGS and United States Department of the Interior
Soil Series: Description/Source	Based on a review of the USDA Soil Survey for the area of the subject property, the soils in the vicinity of the subject property are classified as Urban Land. The Urban Land designation indicates that more than 85 percent of the original soils have been disturbed or covered by paved surfaces, buildings or other structures. Due to the variability of the soil material, on-site investigation would be required to determine the specific soil composition at the subject property. /USDA Soil Survey
Groundwater Flow Direction/Source	Southwest /Topographic map interpretation
Estimated Depth to Groundwater/ Source	Approximately 95 feet bgs /GeoTracker website based on former Exxon site located approximately 0.25 mile to the northwest (1614 East 7th Street, Los Angeles)
Surface waters on the subject property or adjacent sites	None identified
Additional notes	Off-site Water Bodies: Los Angeles River (approximately 0.2 mile east)

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Use (Historical Addresses)	Source(s)
1900-1906	Vacant land	Sanborn maps
1923-1948	The subject property is vacant land and/or a storage yard (2040 Atlantic)	Sanborn maps, Aerial photographs
1950-1970	The subject property is occupied by a motor freight depot, loading dock, and associated gasoline tanks (2040 East 7th Place)	Sanborn maps, Previous Reports, Agency Records
1972-2005	The subject property appears developed with the motor freight building and associated yard (2040 East 7th Place)	Aerial photographs, Previous Reports, Agency Records
2009-2014	The subject property appears developed with a storage yard/ parking lot (2040 East 7th Place)	Aerial photographs
2018-Present	The subject property appears developed with a parking lot (2040 East 7th Place)	Aerial photographs, city directories, site observation

According to a review of historical sources, the subject property was undeveloped in 1900. The property appeared to be vacant land and/or a storage yard from approximately 1923-1948. The subject property was developed with a motor freight depot and loading dock from 1950-1970, per Sanborn maps. One gasoline UST was depicted on the northeast corner of the subject property on Sanborn maps (other records confirm a second UST was installed, and both were removed in 1994). Aerial photographs depict the freight depot and loading dock building in the center of the subject property until 2005. By 2009, the building was no longer present and the subject property served as a storage yard and parking lot. Currently, the subject property is developed with an asphalt-paved parking lot with no structures.

Environmental concerns associated with the use of the subject property as a motor freight depot and and associated USTs are discussed in detail in Sections 4.2, 5.1 and 6.3.

Copies of historical sources are provided in the report appendices.

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjacent Site Descriptions
1923	The subject property appears to be vacant land with possible vehicles parked on the eastern portion of the parcel	NORTH: Street followed by a building EAST: Alley followed by what appears to be a parking lot SOUTH: Vacant land followed by a building WEST: Vacant land
1928 1938	The subject property appears to be vacant land	NORTH: No significant changes EAST: The current building appears developed SOUTH: No significant changes WEST: No significant changes
1948	The subject property appears developed with a storage yard and vehicles	NORTH: No significant changes EAST: No significant changes SOUTH: The current building appears developed WEST: What appears to be a storage yard
1952 1964 1972 1977 1979 1983 1989 1994 2002 2005	The subject property appears developed with a building and vehicles	NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: What appears to be a storage yard and a building
2009 2010 2012 2014* 2018*	The building appears removed and the vehicles remain	NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: No significant changes

Refer to Section 3.0 for discussion of environmental concerns associated with the use of the subject property as a motor freight depot and loading dock.

*Due to copyright restrictions, copies of the aerial photographs reviewed are not included in the appendices, but can be viewed online at historicaerials.com and through Google Earth.

3.2 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

The following maps were reviewed:

Year(s)	Subject Property Description (Listed Address)	Adjacent Site Descriptions
1900	The subject property is shown as three vacant parcels, no addresses on street labeled Atlantic	NORTH: Street followed by vacant land EAST: Alley followed by vacant land SOUTH: Alley followed by vacant land WEST: Vacant land
1906	Undeveloped/unaddressed portion of City Playgrounds, street is still labeled Atlantic	NORTH: Street followed by a dwelling EAST: Alley followed by a dwelling and vacant land SOUTH: Vacant land WEST: A playground is depicted
1950 1953 1954 1959 1960 1967 1970	The subject property is developed with a motor freight depot and loading dock including a gas tank depicted on the northeast corner (addressed as 2040 Atlantic in 1950 and 2040 East 7th Place in subsequent maps)	NORTH: Street followed by a chemical warehouse EAST: Railroad tracks followed by an industrial building SOUTH: A motor freight depot building appears developed WEST: Vacant land and an auto repair building appear developed

Refer to Section 3.0 for discussion of environmental concerns associated with the use of the subject property as a motor freight depot.

3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. Directories were reviewed in approximate five-year increments from 1920 to 2014. Although known to be developed since 1950, the first and only listing for the subject property appeared in 2010.

Year(s)	Address - Occupant Listed
2010	2040 East 7th Place - M. Co. Produce Inc.

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the city directory review.

3.4 HISTORICAL TOPOGRAPHIC MAPS

Based on the quality of information obtained from other sources, historical topographic maps were not reviewed as a part of this assessment.

3.5 CHAIN OF TITLE

A chain of title search was not performed as part of this assessment.

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Angeles County Fire Department Health and Hazardous Materials Division (LACFDHHMD)	March 19, 2019	Email	N/A	Response pending, refer to Section 1.5; however, records obtained from LA City Fire Department are discussed below.

4.2 FIRE DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Angeles Fire Department (LAFD)	March 14, 2019	Email	N/A	Records discussed below

Records Summary

Date	Occupant	Document Type	Document Notes/Violations
1950	S&M Transfer	Fire Department Permit	Install 6,500-gal UST near existing 1,000-gallon UST
1962	S&M Transfer and Storage	Fire Department Permit	Install industrial processing equipment
1962	S&M Transfer and Storage	Plot Plan	Installation of new piping and relocation of pump island on west adjacent property, apparently occupied by same company as subject property. Plot plan shows one 10,000-gallon UST and two 1,000-gallon USTs approx. 100 feet west of subject property
1994	Mr. Fred Kort	Hazardous Waste Manifest	Dispose of 200-gallons of Non-RCRA hazardous waste liquid from UST(s)
1994	Mr. Fred Kort	Fire Department Permit	Abandon two tanks from property including UST decommissioning sampling report

According to LAFD records, two USTs were removed from the subject property in 1994. Permits for the abandonment and removal of one 6,500-gallon UST and one 1,000-gallon UST are included in the appendices of this report. The tanks were listed to contain gasoline or diesel fuel. A tank decommissioning report was included in the records which indicated that approximately 200-gallons of fuel and water were removed from the tanks prior to their removal. The report also indicates that TPH and BTEX were not detected in two samples collected from the UST areas. Lead was detected at 127 ppb.

Additionally, a plot plan depicting a portion of the west adjacent property was on file with the LAFD. According to the plot plan, a fuel pump and piping were moved at the west adjacent property in 1962. The USTs and associated fuel island appeared connected to three USTs located next to a garage building on the west adjacent property, 2017 East Violet Place.

Refer to Sections 5.1 and 6.3 for further details.

4.3 BUILDING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Angeles Department of Building & Safety (LADBS)	March 19, 2019	Website	N/A	Records discussed below

Records Summary

Year(s)	Owner/Applicant	Description of Permit and Building Use
1951	S&M Transfer	Construct a loading dock
1962	S&M Freight Lines	Repair fire damage (15%)
1970	Earnerst Ford Trucking	Repair fire damage (10%)
1978	Thomas Fischer	Certificate of occupancy to change use from trucking terminal to produce distribution

Evidence indicating current or prior use or storage of hazardous substances was not on file for the subject property with the LADBS.

4.4 PLANNING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Angles Planning Department (LAPD)	March 19, 2019	Website	N/A	No evidence indicating the existence of AULs on file for the subject property

4.5 ASSESSOR'S OFFICE

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Angeles County Assessor's Office	March 14, 2019	Website	N/A	Information obtained is discussed below

Records Summary

APN	5166-014-001
Acreage	0.35 Acre
Construction Date	Not provided
Building Square Footage	N/A
Current Owner	SRI Ten Santa Fe LLC per Lien Search (Section 6.4)

4.6 Other Agencies Searched

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA State Water Resources Control Board (SWRCB) GeoTracker	March 28, 2019	Website	N/A	No records on file
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	March 28, 2019	Website	N/A	No records on file
CA DTSC Envirostor	March 28, 2019	Website	N/A	No records on file

4.7 Oil and Gas Wells

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
Division of Oil, Gas and Geothermal Resources (CA DOGGR)	March 19, 2019	CA DOGGR Map	No

4.8 Oil and Gas Pipelines

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	March 19, 2019	NPMS Public Map Viewer	No

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjacent site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Listings Within Search Distance	Subject Property	Adjacent Site(s)	Other Nearby Sites of Concern
NPL	1.0	0			
DELISTED NPL	0.5	0			
SEMS/CERCLIS	0.5	0			
SEMS-ARCHIVE/CERCLIS NFRAP	0.5	3	✔		
RCRA CORRACTS	1.0	1	✔

STATE/TRIBAL VCP	0.5	5			
STATE/TRIBAL BROWNFIELD	0.5	0			
ORPHAN	N/A	4			
ADDITIONAL ENVIRONMENTAL RECORD SOURCES	SP/ADJ	2		✔	

Facility Name	Green Acres Incorporated
Address	2040 East 7th Place
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	SWEEPS UST, CA FID UST
Comments	According to the regulatory database, the subject property is identified with two UST listings (SWEEPS UST Comp. #4575/CA FID UST #19054354). Information indicates that the tanks are inactive at this time. AEI contacted the Los Angeles Fire Department (LAFD), State Water Resources Control Board (SWRCB), or California Department of Toxic Substances Control (DTSC) for records associated with the USTs. According to the LAFD, two USTs were historically present at the subject property from approximately 1950-1994. LAFD records (discussed in Section 4.2) indicate that the tanks have been removed. No records of USTs, hazardous substances, or environmental investigations were on file with the SWRCB or DTSC. Previous environmental investigations performed at the subject property are discussed in Section 6.3.

Facility Name	Fred Kort
Address	2040 and 2060 East 7th Street (aka 777 South Santa Fe Avenue)
Distance & Direction	Adjacent to the east
Hydrologic Position	Up to cross-gradient
Databases Listed	UST (listed twice), SWEEPS UST
Comments	According to a review of historical sources and the EDR database, the adjacent site to the east has been used for industrial purposes from approximately 1923 to present. This site was listed as a current and former UST site. The adjacent property has historically been occupied by the Ford Factory (formerly a Ford manufacturing plant, currently a multi-tenant office building). AEI understands that the subject property is planned for redevelopment in connection with this adjacent property. Therefore, should any contaminated soil and/or groundwater be encountered during site redevelopment activities, proper documentation and removal of the materials should be completed in compliance with local, state, and federal regulations. Refer to Section 6.3 for further discussion of previous environmental investigations performed at the subject and adjacent properties.

Facility Name	MIKA Corp.
Address	2030 East 7th Street
Distance & Direction	Adjacent to the north beyond East 7th Place
Hydrologic Position	Cross to up-gradient
Databases Listed	SWEEPS UST, CA FID UST, NPDES, CIWQS
Comments	According to the regulatory database, the north adjacent property beyond East 7th Place is associated with USTs. Review of historical sources including Sanborn maps indicate that the property was developed with a chemical warehouse beginning in 1950. The site is currently developed with a multi-level aboveground parking garage associated with the Ford Factory.AEI understands that the subject property is planned for redevelopment in connection with this adjacent property. Therefore, should any contaminated soil and/or groundwater be encountered during site redevelopment activities, proper documentation and removal of the materials should be completed in compliance with local, state, and federal regulations. Refer to Section 6.3 for further discussion of previous environmental investigations performed at the subject and adjacent properties.

Facility Name	Better Life Organics, Hollywood Delivery Service, Inc., West Central Produce, Inc.
Address	2020 East 7th Place, 2017 East Violet Street, 2017 Violet Street
Distance & Direction	Adjacent to the west/southwest
Hydrologic Position	Cross to down-gradient
Databases Listed	UST (listed twice), CA FID UST, SWEEPS UST
Comments	According to the regulatory database, this site is registered and permitted by the LAFD for USTs. The UST details are not provided in the database but other sources indicate there is one 10,000-gallon petroleum tank and two 1,000-gallon petroleum tanks are at the site. No releases have been reported in association with the USTs. The age and construction of these tanks is not reported in the database; however, based on other resources the tanks were installed in 1998, are currently permitted, of double-walled construction, and passed tightness tests in 2018. The USTs are located approximately 50 feet southwest of the subject property and the fuel dispenser is located adjacent to the southwest corner of the subject property. Based on the inferred direction of groundwater flow and regulatory status of the UST, their presence is not expected to represent a significant environmental concern to the subject property. AEI understands that the subject property is planned for redevelopment in connection with this adjacent property. Therefore, should any contaminated soil and/or groundwater be encountered during site redevelopment activities, proper documentation and removal of the materials should be completed in compliance with local, state, and federal regulations. Refer to Section 6.3 for further discussion of previous environmental investigations performed at the subject and adjacent properties.

Facility Name	West Central Produce, Inc
Address	2045 Violet Street
Distance & Direction	Adjacent to the south
Hydrologic Position	Down to cross-gradient
Databases Listed	UST, CA FID UST, SWEEPS UST
Comments	According to the regulatory database, the adjacent property is equipped with an active UST. No other information is reported on the UST. The adjacent property is also listed on the SWEEPS UST database without any further information. No releases have been reported in association with the listed USTs. Based on documents obtained from the LAFD, there are no active tanks at this property. A 7,500-gallon and a 6,000-gallon UST were located on the north side of the building, near the southern boundary of the subject property, and were removed in July 1998. The installation date was not reported but likely dated from the 1950s or 1960s, and both tanks contained diesel fuel. The LAFD inspected the removal and reported the steel tanks to be in good condition. Soil sampling did not identify impacts of concern. AEI understands that the subject property is planned for redevelopment in connection with this adjacent property. Therefore, should any contaminated soil and/or groundwater be encountered during site redevelopment activities, proper documentation and removal of the materials should be completed in compliance with local, state, and federal regulations. Refer to Section 6.3 for further discussion of previous environmental investigations performed at the subject and adjacent properties.

5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

Based on a review of available resources as documented in this report, AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	SRI Ten Santa Fe LLC	N/A	N/A	N/A	Not interviewed; refer to Section 1.5
Key Site Manager	N/A	N/A	N/A	N/A	No Key Site Manager identified

Interview Summary

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/ Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	N/A	N/A
Do you have any knowledge of previous environmental investigations conducted on site?	N/A	N/A
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	N/A	N/A
Are you aware of any known plans for site redevelopment or change in site use?	N/A	N/A
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?	N/A	N/A
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?	N/A	N/A
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	N/A	N/A
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	N/A	N/A

6.1.2 PAST OWNERS, OPERATORS, AND OCCUPANTS

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

6.1.3 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	Information not provided
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	Information not provided
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Information not provided
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Information not provided

Question	Response/ Comment
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	Information not provided
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	Information not provided

6.3 PREVIOUS REPORTS AND OTHER PROVIDED DOCUMENTATION

Documentation was provided to AEI by the Client during this assessment. A summary of this information follows:

Phase I Environmental Site Assessment - Ford Factory (777 and 821 South Santa Fe Avenue; 2060 East 7th Street; 2030 and 2040 East 7th Place, Los Angeles, California 90021), prepared by Partner (June 14, 2017)

Partner performed a Phase I ESA for the Ford Factory property, designated as Los Angeles County Assessor parcel numbers 5166-013-010 and 5166-014-001. Several addresses were associated with the property, and the subject property was included in the assessment. Partner identified long term industrial use of the subject property and the adjacent buildings, including Ford vehicle manufacturing (1924-1929), printing (1933-1954), metal plating (1940s-1950), chemical warehousing (1951-1958), auto repair (1953-1959), sheet metal manufacturing (1958), trucking and freight (1958-1971), and machining operations (1962-1985). The subject property parking lot was used by trucking and freight tenants from approximately 1958-1971.

Partner identified at least one gasoline tank to be associated with the subject property based on a review of Sanborn fire insurance maps. The gasoline tank was depicted on the northeast corner of the subject property from 1950-1970. Buildings associated with the subject property were reportedly demolished in the 1990s and 2000s. Partner requested records of USTs and hazardous substances from the Los Angeles Fire Department (LAFD), however a response to the request had not been received at the issuance of the report. Additionally, no records of USTs were on file with the Regional Water Quality Control Board (RWQCB) and Department of Toxic Substances Control (DTSC) online databases.

According to Partner, a geophysical survey of the subject property performed by AMEC in 2014 did not identify the presence of USTs at the subject property. Additionally, a subsurface investigation of the subject property was performed by AMEC in 2015 to assess the potential impacts from historical industrial uses. A summary of the assessment performed in 2015 was provided by Partner. However, copies of the previous reports prepared by AMEC were not included in the appendices of the Partner report. According to Partner's summary, six subsurface soil samples were collected from the property. Three samples were collected on the northeast corner of the property in the area of the gasoline tank depicted on Sanborn maps. Three additional samples were collected in an area where a garage was being proposed for construction (apparently on the adjacent property to the north). All six borings were advanced to 15 feet bgs. Groundwater was reportedly not encountered in any of the borings. The samples collected were analyzed for diesel, motor oil, gasoline, CAM 17 metals, VOCs, and SVOCs. None of the samples contained detectable concentrations of the constituents of concern with the exception of typical background concentrations of metals. AMEC concluded that no further investigation would be warranted for the site.

Based on the long-term industrial use of the subject property and surrounding properties, Partner recommended a further assessment be performed to assess subsurface impacts from constituents of concern including TPH, VOCs, and heavy metals in 2017.

A copy of the report is included in the appendices.

As discussed in Section 4.2, LAFD records indicate that two USTs were removed from the subject property in 1994. Permits for the abandonment and removal of one 6,500-gallon UST and one 1,000-gallon UST are included in the appendices of this report. The tanks were listed to contain gasoline or diesel fuel. The report also indicates that TPH and BTEX were not detected in two samples collected from the UST locations.

6.4 ENVIRONMENTAL LIEN SEARCH

In accordance with our approved scope of services, AEI contracted AFX Reliable Property Research (AFX) to perform an environmental lien search for the subject property. AFX).

According to AFX, environmental liens were not identified during the review of historical ownership documentation. The owner of the property is identified as SRI Ten Santa Fe LLC, which acquired the property in April 2014. A copy of the AFX report is provided in the appendices.

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	March 25, 2019
AEI Site Assessor(s)	Derrick Haynes
Property Escort(s)/ Relationship(s) to Property	Not escorted
Units/Areas Observed	100 percent of subject property
Area(s) not accessed and reason(s)	None
Other Physical Constraints	None

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjacent Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use		
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)		
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids		✔
Interior Stains or Corrosion		
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers		
Pits, Ponds, and Lagoons		
Stained Soil or Pavement		
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		
Wells		
Septic Systems		
Biomedical Wastes		
Other		

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI did not observe any of the items listed in the above Reconnaissance Findings Summary table.

7.2 ADJACENT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR, Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing". Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Several pole-mounted transformers were observed on the adjacent sites during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

The subject property currently lacks structures. Consequently, no building components containing suspect asbestos containing materials were identified during the site inspection.

8.2 LEAD-BASED PAINT

The subject property currently lacks structures. Consequently, AEI did not observe building components likely to contain suspect LBP during the site reconnaissance.

8.3 RADON

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The United States EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three radon zones, with Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

According to the US EPA, the radon zone level for the area is Zone 2, which has a predicted average indoor screening level between 2 pCi/L and 4 pCi/L, equal to or below the action level of 4 pCi/L set forth by the US EPA.

8.4 MOLD

The subject property currently lacks structures. Consequently, mold was not addressed as part of this assessment.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no

further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/13/2018 has revealed that there are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are

12 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/28/2019 has revealed that there are 34 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 2 SWF/LF sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste.

EXECUTIVE SUMMARY

Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

FINDS:

Registry ID: 110002758766

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CA BOND EXP. PLAN:

Reponsible Party:	COST RECOVERY/OPERATION AND MAINTENANCE SITE
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	DHS has utilized Bond funds to complete the remedial action. DHS is currently undertaking appropriate cost recovery actions.
Site Description:	This site was previously used to scrap electrical transformers.
Hazardous Waste Desc:	Polychlorinated biphenyls (PCBs) were detected in the soil.
Threat To Public Health & Env:	The remedial action has been completed. Soil contaminated with PCBs was excavated and redisposed of in a licensed landfill. There is no threat to public health and the environment.
Site Activity Status:	In August, 1985, the RP, Mr. Rodney Dean, pled no contest to three felony counts of illegal storage, transportation and disposal of hazardous wastes. Mr. Dean's probation required that the cleanup of the site be completed and reported to the court. The RP retained a contractor for the cleanup and began the remedial actions. The contractors removed much of the contaminated soil. DHS completed the cleanup after the RP exhausted his financial resources. DHS

DEAN AND ASSOCIATES (Continued) **S100833562**

is currently in the cost recovery stage.

FINDS:

Registry ID: 110002634533

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treater, storer or disposer of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil refiner: No
- Used oil fuel marketer to burner: No
- Used oil Specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

Violation Status: No violations found

FINDS:

Registry ID: 110002828272

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

FINDS:

Registry ID: 110002636942

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:

Registry ID: 110002893824

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Completed Date:	09/04/1996
Comments:	DTSC reviewed a Preliminary Endangerment Assessment for the site under a Voluntary Cleanup Agreement. Based on the information and data presented, DTSC determined that the hazardous constituents remaining at the site do not constitute a threat to human health or the environment.
Completed Area Name:	PROJECT WIDE

SANTA FE/W.A. GRANT (Continued) **S102860873**

Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 09/13/1995
Comments: The Department received a Non-Emergency Hazardous Substance Release Report dated January 31, 1995. Review of the document indicates that the site is contaminated with elevated levels of heavy metals such as lead, copper and zinc. Foundry operations existed at the site from at least 1906 until 1990, operated by W.G. Grant & Co. Santa Fe Railway is the current owner of the site. RP removed USTs from the site without any regulatory agency oversight. Due to evidence of a release, DTSC is recommending that a PEA be conducted to evaluate the site. On September 13, 1995, DTSC notified the RP thereof.

Manufactured Gas Plants:

Site located at 725 Chemming Street, Los Angeles, California, approximately 2.5 acres. From 1887 util 1906 an oil gas plant was operated at site. MGP may have been converted to a natural gas storage site in approximately 1906. Records indicate that MMGP equipment may have been removed by 1930. Site is currently used as a Greyhound Bus parking lot.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 05/20/1993
Comments: The Department completed review of the PEA. A Manufactured Gas Plant (MGP) was operated at the site in the late 1800s and early 1900s. Gas was produced from crude oil for distribution in the site area. Several companies operated at the site. In 1909, the site was owned by the Los Angeles Gas and Electric Corp., which merged with the Southern Calfornia Gas Company in 1937. SoCalGas owned the property until 1976, and sold to the current owners. The MGP was dismantled sometime before 1906. The byproducts from the manufactured gas operation were tars, oils, sludges, and lampblack. Elevated levels of polycyclic aromatic hydro- carbons (PAH), heavy metals such as lead and arsenic and cyanides were found at the site. The PEA concluded that there was contamination at the site above screening values. Therefore, the Department recommended that further investigation or assessment at the site was necessary.

Background Info:	The site is located at 590 South Santa Fe Avenue, Los Angeles, California. The site consists of two land parcels totaling approximately 2.68 actes of land and is located witin an indus- industrial portion of the City of Los Angeles. Historically the site has been used for chemeical or paint manufacturing. Not reported The site was formerly under the oversight of the California Regional Water Quality Control Board (CRWQCB). (CRWQCB) has overseen the site investiation and remediation since approximately 1986. Not reported Previous sampling activities have confirmed both soil and groundwater contamination. Contaminants of concern identified in the groundwater and soil include benzene, ethyl benzene, 1,1-dichlorethane, 1,1-dichloroethene, 4-methyl-2-pentanone (MIBK), toluene, and total xylene. The toluene, and xylene appear to be primarily located within the groundwater beneath the northern portion of the site whereas MIBK has been identified in the groundwater along the southwest corner of the site and may extend beyond the site boundary.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D018
. Waste name: BENZENE

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Date:	10/10/2006
Comments:	Removal Action included placement of an asphalt cover in the property area and removal of 97 tons of soil contaminated with lead and arsenic.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Workplan
Completed Date:	10/21/2004
Comments:	The RAW proposes to address the lead & arsenic contaminated soil by

WESTERN LEAD AND METAL CO (INTERNATIONAL LEAD CO.) (Continued) **1001115052**

placing a four-inch asphalt cap on the property area (15,000 sq.ft.) and removing soil from nine impacted areas at the Site boundary. Implementation is scheduled for end of January 2005.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 04/15/2003
Comments: The Remedial Investigation is approved. The RI involved sampling of lead and other metals, and volatile organic compounds, particularly tetrachlorethene and 1,1,1-trichloroethane.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 06/30/1998
Comments: Completed a Preliminary Assessment (PA) with sampling of the site under contract with U.S. EPA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 11/18/1997
Comments: Soil removal (excavation) of lead-contaminated soils. The Implementation Report for completion of the Emergency Removal Action by Quemetco at Area 3 (Coast Produce Warehouse) and Area 4 (Residential property at 2151 E. 14th Street) was approved. An estimated 120 tons of contaminated lead was excavated and disposed of off-site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 07/18/1997
Comments: UPRR: A removal action workplan (RAW-UPRR) was approved for Union Pacific Railroad track areas along Lemon Street (between 10th & 14th Streets). These areas are designated as Areas 1 & 2. A Notice of Exemption was also filed with the OPR as required by the CEQA laws and guidelines. The RAW-UPRR included excavation, treatment and disposal of contaminated soils in the neighboring railroad right-of-way (track) areas of the International Lead Company site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 06/25/1998
Comments: Excavation, treatment and disposal of 2,500 tons of metal contaminated soil from the UPRR rail track areas. The Implementation Report of Emergency Removal Action by Dames & Moore for Areas 1 and 2 was approved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 07/18/1997
Comments: A removal action workplan (RAW-QUEMETCO) which proposed excavation and disposal of contaminated soils, was approved for Areas 3 and 4

WESTERN LEAD AND METAL CO (INTERNATIONAL LEAD CO.) (Continued) **1001115052**

(perimeter of Property and residential property). A Notice of exemption was also filed with the OPR as required by the CEQA laws and guidelines.

Alternate Address:	2182 EAST 11TH STREET
Alternate City,St,Zip:	LOS ANGELES, CA 90021
Background Info:	The Site is also known as the Western Lead and Metal Company Site. The Site is located in an industrial area near downtown Los Angeles and is surrounded by warehouses, food distributors, light manufacturing, and scrap metal recyclers. The Site is roughly bounded by 11th Street (Property), to the north, the Union Pacific Railroad right-of-way to the east, 14th Street, to the south, and Wilson Street to the west. The Site includes the property at 2182 East 11th Street, which was occupied by several different companies as a lead smelter from 1946 to 1965. The Western Lead Products Company operated a lead smelter on the Property from 1954 to 1960 under the name of Western Lead and Metal Company. After 1965, the Property was used for die-cast manufacturing operations. The Property is approximately 110 feet by 140 feet and is currently devoid of any buildings, and is secured by fencing. The other areas of the Site include: portions of the Union Pacific Railroad right-of-way, between 14th and 10th Streets; a narrow strip of the property occupied by Coast Produce; and a residencial property at the corner of Wilson and 14th Streets. Since 1991, several site assessments have been conducted. These assessments involved mostly surface soil sampling and analyses for metals including lead, antimony, and arsenic. In 1996, the Property was paved with three inches of asphalt to prevent exposure of the public to contaminated soil. In addition, DTSC collected several surface soil samples

WESTERN LEAD AND METAL CO (INTERNATIONAL LEAD CO.) (Continued) **1001115052**

in the areas surrounding the Property. Extremely high levels of lead (up to 574,000 ppm), antimony (up to 14,000 ppm), and arsenic (up to 920 ppm) were detected in the narrow strip along the southern and western boundaries of the Property; high levels of lead, copper, and zinc were detected along the railroad right-of-way; and elevated levels of lead (up to 1,450 ppm) were detected on the residential property. A Consent Order (Imminent and Substantial Endangerment) was entered into with Quemetco Inc., (an RSR Subsidiary) and Union Pacific Railroad Company. As required by the Order, in 1977, Quemetco completed an Emergency Removal Action at Areas 3 and 4 which are located at the perimeter of the Property and the residential property. Union Pacific has also conducted an Emergency Removal Action at Areas 1 and 2 (railroad right-of-wau). The Remedial Investigation found the extent of metal contamination. Currently, the Draft RAW, which proposes to place a 4-inch asphalt cover on the Property area and excavate soil, from the Site boundary, has been approved. The 30 day Public Comment Period starts on August 23 and ends September 22, 2004.

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	06/13/2003
Comments:	DTSC approves PEA Report. The PEA investigative activities conducted at the former smelting site identified arsenic (3410 mg/kg), and lead (25,700 mg/kg). DTSC concluded that the current conditions (building and pavement intact, no exposed soil) at the Site does not pose a potential threat to industrial workers. Due to elevated levels of the

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Background Info:	The Southern California Gas (SCG), Olympic Base Site was once a gas manufacturing plant where oil was converted into gas for lighting, heating, and cooking. Residues from the gasification process, mainly consisting of a material "lamp black", were were discovered at the site. "Lamp Black" contains varying amounts of a family of compounds called polynuclear or polycyclic aromatic hydrocarbons (PNAs or PAHs). The plant was built in the period 1907-1908 by the City Gas Company. In 1908, the Domestic Gas Company purchased and took over the operations of City Gas. In 1910, SCG was incorporated and became the successor of Domestic Gas. SCG operated the plant until 1927, when the service for 100% natural gas started. The plant operated on a standby basis until 1952, when all gas manufacturing operations ceased and the plant was dismantled. SCG has administrative facilities on other portions of the facility. A Consent Order was signed in December 1986, which addressed the work needed to complete the Remedial Investigation/-Feasibility Study (RI/FS) process. The RI report was approved by the Department on September 17, 1987. The RI found that soil from about 2 to 12 feet below ground surface is contaminated. The contaminants are not readily vaporized, nor do they enter aqueous phase solution. Groundwater aquifers beneath the site are unsaturated to a depth of 90 feet. Air monitoring at the site does not indicate that the contaminants are emitting vapors to the air. SCG then submitted a FS report in May 1988. DHS has reviewed the FS report and requested a full Health Risk Assessment (HRA) based on appropriate biological receptors and

OLYMPIC BASE (Continued) **S105689611**

exposure pathways on October 20, 1988. The HRA was approved by the Department on June 4, 1990. The FS was revised by SCG and the report approved on July 19, 1990.
The RP submitted a draft RAP on August 20, 1990, as requested by the Department. The Department has published a fact sheet on the findings of the RI/FS. The RAP meeting with the community was held on November 17, 1990 and the RAP was subsequently approved in January of 1991.
The RAP proposed an asphalt cap on the site, groundwater monitoring, and a deed restriction. Groundwater monitoring is necessary as the region the site is located in is currently experiencing a drought; however, if this should change the groundwater table will rise, possibly impacting the conclusions of the RI. The deed restriction, protected the integrity of the cap by limiting land use and excavation of the waste.
The Department directed the RP to prepare a Remedial Design and Implementation (RD&I) plan. The plan included engineering specifications for the asphalt cap, permits, and a schedule for completion of the cap. The cap will be repaired as necessary; necessary; it is expected to require replacement every ten years. This operation and maintenance program will last for 20 years.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	Southern California Gas has entered into a consent order with DHS for oversight/monitoring of its cleanup efforts. DHS has budgeted $50,000 for direct costs related to the project. DHS will recover 100 percent of direct

SOUTHERN CALIFORNIA GAS COMPANY, OLYMPIC BASE SITE (Continued) **S100833289**

costs plus staff costs and overhead related to the project. The responsible parties will pay all costs associated with site cleanup.

Site Description: The Olympic Base facility, currently owned by Southern California Gas Company, is the site of a former oil gasification "towne gas" plant.

Hazardous Waste Desc: The wastes are generally characterized as polynuclear or polycyclic aromatic hydrocarbons (PNAs or PAHs). Other constituents of concern are cyanide, lead, and semivolatile organics. Soil contamination is present at the site from the surface to a depth of 10 to 15 feet in both the northern and southern portions of the site.

Threat To Public Health & Env: The primary concern is potential contamination of ground water. Usable ground water lies approximately 200 feet below the ground surface and the water table may rise to only 100 feet below the site. Ground water contamination has not been verified. Surface soil contamination may migrate offsite due to airborne particulates.

Site Activity Status: The Southern California Gas Company has completed a remedial investigation/feasibility study.

Completed Document Type: * Final Remedial Action
Completed Date: 12/16/1991
Comments: The Final Remedial Action consisted of placing an asphalt cap on the unpaved portions of the Olympic Base Site which would be maintained according to the requirements set forth in the RAP. A deed restriction was recorded on the property. The design of the cap was prepared and included in the RAP workplan.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Manufactured Gas Plants:

The Southern California Gas (SCG), Olympic Base Site was once a gas manufacturing plant where oil was converted into gas for lighting, heating, and cooking. Residues from the gasification process, mainly consisting of a material "lamp black", were weere discovered at the site. "Lamp Black" contains varying amounts of a family of compounds called polynuclear or polycyclic aromatic hydrocarbons (PNAs or PAHs). The plant was built in the period 1907-1908 by the City Gas Company. In 1908, the Domesttic Gas Company purchased and took over the operations of City Gas. In 1910, SCG was incorporated and became the successor of Domestic Gas. SCG operated the plant until 1927, when the service for 100% natural gas started. The plant operated on a stanndby basis until 1952, when all gas manufacturing operations ceased and the plant was dismantled. SCG has administrative facilities on other portions of the facility

Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order

MID CITY IRON/METAL CORP (Continued) **S101584674**

should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

RB Case Number:	1290
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Contaminated Surface / Structure, Soil, Soil Vapor
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Trichloroethylene (TCE), Chromium, Chromium VI
Site History:	Plating operations started in the mid-1910s in the southwestern portion of the Site until 2005. Ace Plating owned and conducted plating related operations on the 11 contiguous parcels, specifically electrochemical coating of metal parts. Numerous assessments conducted at the site indicate that the soil is impacted with VOCs and metals. The soil vapor has been sampled throughout the Site with tetrachloroethene (PCE) concentrations at 5 feet below ground surface (bgs) ranging from 7.9 micrograms per liter (a%g/L) to 87 a%g/L. The soil vapor data is limited at depths greater than 30 feet bgs. At 60 feet bgs and below, PCE concentrations range from 39 a%g/L below the Assembly Room to 127 a%g/L offsite on Crocker Street. The lateral extent of shallow PCE greater than 12 a%g/L is only defined on the east side. The source of the PCE is unknown but slightly higher concentrations exist in the central portions of the Plating Rooms. Chromium concentrations ranged from 1.5 mg/kg to 4,300 mg/kg for total chromium and from 0.92 to 840 mg/kg for hexavalent chromium. The maximum concentrations were both collected from SSVW-2 at 1 foot bgs located in the alley between the Crocker Street and Towne Avenue buildings and is adjacent to the location of the former chromium tanks. Outside of the area impacted by the former chromium tanks, the maximum chromium concentration is 4200 mg/kg for total chromium and 94 mg/kg for hexavalent chromium at MW-1. Degreasers that contained PCE were utilized in Plating Rooms 1 and 2 from 1993 to 2001. The maximum PCE concentration is 0.150 mg/kg and was sampled 4 feet deep in the vicinity of the former nickel dip tank in Plating Room 2. Two groundwater monitoring wells have been installed. Hexavalent chromium was not detected above the laboratory detection limits in any of the groundwater samples collected. Tetrachloroethylene (PCE) and 1,1-dichloroethene are the only VOC detected in groundwater, with the maximum concentration detected in MW-3 at a concentration of 33 ug/L and 2.7 ug/L, respectively.

Alternate Address:	2435 E. WASHINGTON BLVD.
Alternate City,St,Zip:	LOS ANGELES, CA 90021
Background Info:	The historic usage of the site is a railroad maintenance yard. Chlorinated solvents TCE and PCE have been identified in the soil along the border of the site with 2425 E. Washington Blvd. Possible pathways for contamination migration are soil and groundwater. Possible receptors are on-site workers and the population which may drink contaminated drinking water extracted from nearby drinking wells. Some shallow soil gas sampling has been performed on-site in 1995. This survey was concentrated along the border of 2455 E. Washington Blvd. Results showed decreasing contaminant concentrations with increasing distance from 2425 E. Washington Blvd. property boundry. No source was identified at the Amtrak property. Not reported An approximately 50-acres site located in an industrial/ commerical area of Los Angeles, one-half mile south of the Santa Monica freeway. The site is also known as the Redondo Junction Facility. Various buildings are located on the property for support and maintenance of trains. Rail Spurs run throughout the property in a general north-south direction. The Los Angeles river is located directly to the east. Previous owner of the property from 1885 to 1976 was Atchison, Topeka, and Sante Fe Railroad Corporation.

AMTRAK (Continued) **S101586462**

Not reported
Investigation of this site is key to determining the extent of soil gas and groundwater contamination found on the adjacent property 2425 E. Washington Boulevard, known as State Surplus Parcel (SSL-497). A draft VCA was prepared by DTSC for recovery of oversight costs. A limited subsurface soil gas survey is proposed as a first step to determine extent of chlorinated solvent contamination and also to identify any contributing sources.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Document Type: Public Participation Plan / Community Relations Plan
Completed Date: 04/27/1995
Comments: DTSC prepared a Public Participation Plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 10/30/1994
Comments: DTSC completed a PEA and recommended further action at the site. This included further remedial activities, public participation and PRP search.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 10/30/1992
Comments: While excavating the eastern area and demolishing all existing buildings, other areas were discovered to be contaminated with lead and VOCs (April'94). As a result the total volume of material excavated and removed prior to legislative cancellation of the prison project (Sept'92) was about 40,000 tons. Stabilization measures were also taken, including the implementation of dust control, fensing and posting, and site security. Further investigation and remediation was stopped due to lack of funds.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 03/04/1992
Comments: Bid Package 1B-Hazardous Waste Remedial Action (RAP) completed by K/J/C. The RAP was developed for the shallow soil excavation in the eastern area of the site with a cleanup level of 10 ppm.

Comments: Former name of this site was "California Reception Center - LAC". This 20+ acre site is being broken into two irregularly-shaped parcels, with no identifiable addresses. The establishment of 2 parcels will facilitate addressing future activities. This site will now be known as Los Angeles CRA - Sale Parcel "497A" and represents one of the parcels. The other Parcel is Alameda Corridor-Sale Parcel "497B". CalSites # 19400011. Parcel "497A" will be the project of the Los Angeles Community Redevelopment Agency (CRA). CRA, in their "Brownfields Program" will complete an RI/FS on the 497A Parcel, obtain a purchase option from the State of California, and solicit foster redevelopment of the site. Parcel "497B" will be the project of the Alameda Corridor Transportation Authority (ACTA). Please see CalSites #19400011 for further information on Parcel "497B".

Comments:	Remedial Action Plan and Remedial Design completed for Operable Unit No. 1. Remedial Action commenced on 06/26/99 to remove surface soils contaminated with lead, arsenic, and PCBs.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation / Feasibility Study
Completed Date:	04/23/1999
Comments:	Remedial Investigation for Operable Unit 1 and Operable Unit 2 completed.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Voluntary Cleanup Agreement
Completed Date:	02/05/1998
Comments:	DTSC and the Alameda Corridor Transportation Authority executed a Voluntary Cleanup Agreement (VCA) for the site, which is a 4.4-acre parcel of the former California Reception Center site (aka State Surplus Sale Parcel 497). DTSC will oversee completion of a Remedial Investigation/Feasibility Study (RI/FS), remediation of the site.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Prospective Purchaser Agreement
Completed Date:	12/22/1998
Comments:	Alameda Corridor Transportation Authority signed a Prospective Purchaser Agreement for the acquisition of State Sale Parcel 497-B.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/12/2018

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/12/2018

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

STATE OF CALIFORNIA
STATE WATER RESOURCES CONTROL BOARD

UNDERGROUND STORAGE TANK PERMIT APPLICATION - FORM A

COMPLETE THIS FORM FOR EACH FACILITY/SITE

MARK ONLY ONE ITEM: ☐ 1 NEW PERMIT ☐ 2 INTERIM PERMIT ☐ 3 RENEWAL PERMIT ☐ 4 AMENDED PERMIT ☐ 5 CHANGE OF INFORMATION ☑ 7 PERMANENTLY CLOSED SITE ☐ 6 TEMPORARY SITE CLOSURE

I. FACILITY/SITE INFORMATION & ADDRESS - (MUST BE COMPLETED)

DBA OR FACILITY NAME	NAME OF OPERATOR	
Fred Kort	Fred Kort	
ADDRESS: 2040 E. 7th Place	NEAREST CROSS STREET: 7th	PARCEL # (OPTIONAL): 5166-014-001
CITY NAME: Los Angeles	STATE: CA / ZIP CODE: 90021	SITE PHONE # WITH AREA CODE: —

✓ BOX TO INDICATE: ☐ CORPORATION ☑ INDIVIDUAL ☐ PARTNERSHIP ☐ LOCAL-AGENCY DISTRICTS ☐ COUNTY-AGENCY ☐ STATE-AGENCY ☐ FEDERAL-AGENCY

TYPE OF BUSINESS	✓ IF INDIAN RESERVATION OR TRUST LANDS	# OF TANKS AT SITE	E. P. A. I. D. # (optional)
☐ 1 GAS STATION ☐ 2 DISTRIBUTOR ☐ 3 FARM ☑ 4 PROCESSOR ☐ 5 OTHER	☐	2	CAC000950600

EMERGENCY CONTACT PERSON (PRIMARY)	EMERGENCY CONTACT PERSON (SECONDARY) - optional
DAYS: NAME (LAST, FIRST): Helm, Robert — PHONE # WITH AREA CODE: 909-596-0057	DAYS: NAME (LAST, FIRST): — PHONE # WITH AREA CODE:
NIGHTS: NAME (LAST, FIRST): Helm, Robert — PHONE # WITH AREA CODE: 909-596-0057	NIGHTS: NAME (LAST, FIRST): — PHONE # WITH AREA CODE:

II. PROPERTY OWNER INFORMATION - (MUST BE COMPLETED)

NAME	CARE OF ADDRESS INFORMATION		
Fred Kort	Same		
MAILING OR STREET ADDRESS: 2060 E. 7th St	✓ box to indicate: ☑ INDIVIDUAL ☐ LOCAL-AGENCY ☐ STATE-AGENCY ☐ CORPORATION ☐ PARTNERSHIP ☐ COUNTY-AGENCY ☐ FEDERAL-AGENCY		
CITY NAME: Los Angeles	STATE: Ca	ZIP CODE: 90021	PHONE # WITH AREA CODE: 213-489-2100

III. TANK OWNER INFORMATION - (MUST BE COMPLETED)

NAME OF OWNER	CARE OF ADDRESS INFORMATION		
Same	Same		
MAILING OR STREET ADDRESS: Same	✓ box to indicate: ☐ INDIVIDUAL ☐ LOCAL-AGENCY ☐ STATE-AGENCY ☐ CORPORATION ☐ PARTNERSHIP ☐ COUNTY-AGENCY ☐ FEDERAL-AGENCY		
CITY NAME: Same	STATE	ZIP CODE	PHONE # WITH AREA CODE

IV. BOARD OF EQUALIZATION UST STORAGE FEE ACCOUNT NUMBER - Call (916) 323-9555 if questions arise.

TY (TK) HQ 44-063421

V. PETROLEUM UST FINANCIAL RESPONSIBILITY - (MUST BE COMPLETED) – IDENTIFY THE METHOD(S) USED

✓ box to indicate: ☑ 1 SELF-INSURED ☐ 2 GUARANTEE ☐ 3 INSURANCE ☐ 4 SURETY BOND ☐ 5 LETTER OF CREDIT ☐ 6 EXEMPTION ☐ 99 OTHER

VI. LEGAL NOTIFICATION AND BILLING ADDRESS

Legal notification and billing will be sent to the tank owner unless box I or II is checked.

CHECK ONE BOX INDICATING WHICH ABOVE ADDRESS SHOULD BE USED FOR LEGAL NOTIFICATIONS AND BILLING: I. ☐ II. ☑ III. ☐

THIS FORM HAS BEEN COMPLETED UNDER PENALTY OF PERJURY, AND TO THE BEST OF MY KNOWLEDGE, IS TRUE AND CORRECT

APPLICANT'S NAME (PRINTED & SIGNATURE)	APPLICANT'S TITLE	DATE MONTH/DAY/YEAR
Robert Helm Robert Helm	Contractor	1-14-94

LOCAL AGENCY USE ONLY

COUNTY #	JURISDICTION #	FACILITY #
19	050	

LOCATION CODE - *OPTIONAL*	CENSUS TRACT # - *OPTIONAL*	SUPVISOR - DISTRICT CODE - *OPTIONAL*

THIS FORM MUST BE ACCOMPANIED BY AT LEAST (1) OR MORE PERMIT APPLICATION - FORM B, UNLESS THIS IS A CHANGE OF SITE INFORMATION ONLY.

INSTRUCTIONS FOR COMPLETING FORM "A"

GENERAL INSTRUCTIONS:

1. One FORM "A" shall be completed for all **NEW PERMITS, PERMIT CHANGES** or any **FACILITY/SITE INFORMATION CHANGES.**
2. **SUBMIT ONLY ONE (1) FORM "A"** for a Facility/Site, regardless of the number of tanks located at the site
3. This form should be completed by either the **PERMIT APPLICANT** or the **LOCAL AGENCY UNDERGROUND TANK INSPECTOR.**
4. Please type or print clearly all requested information
5. Use a hard point writing instrument, you are making 3 copies.

TOP OF FORM: "MARK ONLY ONE ITEM"

Mark an (X) in the box next to the item that best describes the reason the form is being completed.

I. FACILITY/SITE INFORMATION & ADDRESS (MUST BE COMPLETED)

1. Record name and address (physical location) of the underground tank(s).
   NOTE: Address MUST have a valid physical location including city, state, and zip code.
   P.O. BOX NUMBERS ARE NOT ACCEPTABLE.
   Include nearest cross street and name of the operator.
2. Phone number must have an area code. If the night number is the same, write "SAME" in proper location.
3. Check the appropriate box for TYPE OF BUSINESS OWNERSHIP (ex CORPORATION, INDIVIDUAL, etc)
4. Check the appropriate box for TYPE OF BUSINESS.
5. If Facility/Site is located within an Indian reservation or other Indian trust lands, check the box marked "YES".
6. Indicate the NUMBER of TANKS at this SITE.
7. Record the E.P.A. ID # or write "NONE" in the space provided.

II. PROPERTY OWNER INFORMATION & ADDRESS (MUST BE COMPLETED)

Complete all items in this section, unless all items are the same as SECTION 1; if the same, write **"SAME AS SITE"** across this section. Be sure to check PROPERTY OWNERSHIP TYPE box

III. TANK OWNER INFORMATION & ADDRESS (MUST BE COMPLETED)

Complete all items in this section, unless all items are the same as SECTION 1; If the same, write **"SAME AS SITE"** across this section. Be sure to check **TANK OWNERSHIP TYPE** box.

IV. BOARD OF EQUALIZATION UST STORAGE FEE ACCOUNT NUMBER (MUST BE COMPLETED)

Enter your Board of Equalization (BOE) UST storage fee account number which is required before your permit application can be processed. Registration with the BOE will ensure that you will receive a quarterly storage fee return in reporting the $0.006 (6 mills) per gallon fee due on the number of gallons placed in your USTs. The BOE will code persons exempt from paying the storage fee so returns will not be sent. If you do not have an account number with the BOE or if you have any questions regarding the fee or exemptions, please call the BOE at 916-323-9555 or write to the BOE at the following address. Board of Equalization, Environmental Fees Unit, P.O. Box 942879, Sacramento, CA 94279-0001.

V. PETROLEUM UST FINANCIAL RESPONSIBILITY (MUST BE COMPLETED)

Identify the method(s) used by the owner and/or operator in meeting the Federal and State financial responsibility requirements. USTs owned by any Federal or State agency are exempt from this requirement

VI. LEGAL NOTIFICATION AND BILLING ADDRESS

Check ONE BOX for the address that will be used for **BOTH LEGAL AND BILLING NOTIFICATIONS.**

APPLICANT MUST SIGN AND DATE THE FORM AS INDICATED.

INSTRUCTION FOR THE LOCAL AGENCIES

The county and jurisdiction numbers are predetermined and can be obtained by calling the State Board (916)739-2421. The facility number may be assigned by the local agency; however, this number must be numerical and cannot contain any alphabetical. If the local agency prefers the State Board to assign the facility number, please leave it blank.

IT IS THE RESPONSIBILITY OF THE LOCAL AGENCY THAT INSPECTS THE FACILITY TO VERIFY THE ACCURACY OF THE INFORMATION. THIS APPLICATION CANNOT BE PROCESSED IF THE BOE ACCOUNT NUMBER IS NOT FILLED IN. THE LOCAL AGENCY IS RESPONSIBLE FOR THE COMPLETION OF THE "LOCAL AGENCY USE ONLY" INFORMATION BOX AND FOR FORWARDING ONE FORM "A" AND ASSOCIATED FORM "B"(s) TO THE FOLLOWING ADDRESS.

UNDERGROUND STORAGE TANK CLOSURE AND SOIL SAMPLING TRAINING

Julio Silva

has completed classroom and field training for closure of underground storage tanks in accordance with the California Code of Regulation (CCR) Title 22 and Title 23; Los Angeles City Fire Prevention Bureau Division 5, Requirement No. 41 and Health and Safety code 29 CFR 1910. This individual has also completed training for soil sampling emphasizing the following areas: Type of sample containers and decontamination requirements; Proper method for obtaining samples including the use of hand augers, hammer samplers, and split-spoon samplers; Field supervision and logging of drilling operations; Sample handling procedures; Holding times and preservation requirements; Proper transportation procedures; and Proper chain-of-custody protocol. Unitech Engineering, Inc. has conducted this training for underground storage tank closure and soil sampling by a California Registered Geologist. This individual is qualified to perform the following:

__X__ Underground Storage Tank Closure Monitoring

__X__ Underground Storage Tank Closure Sampling

__X__ Underground Storage Tank Safety Monitoring

__X__ Site Investigation Soil Sampling

Re: Installation of New Product Piping and Relocation of Pump Island for
S & M Transfer & Storage
2040 East 7th Street

Gentlemen:

Enclosed is an approved copy of your plan for the above subject and Permit #3245 which authorizes this installation.

This approval is subject to field inspection and written approval from a Fire Department representative before the installation is placed in operation.

Please contact Captain R. Seems of our Central Industrial Unit, telephone MA 8-6161, to make necessary arrangements for inspection.

Very truly yours,

WILLIAM L. MILLER, CHIEF ENGINEER

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

In the event of any physical or atmospheric adversely affecting the STANDARD SAFETY DESIGNATIONS assigned to any of the above spaces, or if any doubt, immediately stop all work and contact the undersigned Marine Chemist.

QUALIFICATIONS: Transfer of ballast or manipulation of valves or closure equipment tending to alter conditions in pipe lines, tanks or compartments subject to gas accumulation, unless specifically approved in this Certificate, requires inspection and endorsement or reissue of Certificate for the spaces so affected. All lines, vents, heating coils, valves, and similarly enclosed appurtenances shall be considered "not safe" unless otherwise specifically designated.

STANDARD SAFETY DESIGNATIONS (partial list, paraphrased from NFPA 306 Subsections 2-3.1 through 2-3.5, and Subsection 6-3.2)

SAFE FOR WORKERS: Means that in the compartment of space so designated: (a) the oxygen content of the atmosphere is at least 19.5 percent by volume; and that, (b) toxic materials in the atmosphere are within permissible concentrations; and that, (c) the residues are not capable of producing toxic materials under existing atmospheric conditions while maintained as directed on the Marine Chemist's Certificate.

NOT SAFE FOR WORKERS: Means that in the compartment of space so designated, the requirements of Safe for Workers have not been met.

ENTER WITH RESTRICTIONS: Means that in any compartment or space so designated, entry for work may be made only if conditions of proper protective equipment, clothing, and time are specified.

SAFE FOR HOT WORK: Means that in any compartment designated (a) oxygen content of the atmosphere is at least 19.5 percent by volume, with the exception of inerted spaces or where external hot work is to be performed; and that, (b) the concentration of flammable materials in the atmosphere is below 10 percent of the lower flammable limit, and that, (c) the residues are not capable of producing a higher concentration than permitted by (b) above under existing atmospheric conditions in the presence of fire, and while maintained as directed on the Marine Chemist's Certificate; and further, that, (d) all adjacent spaces containing or having contained flammable or combustible materials have been cleaned sufficiently to prevent the spread of fire, or are satisfactorily inerted, or, in the case of fuel tanks or lube oil tanks, or engine room or fire room bilges, have been treated in accordance with the Marine Chemist's requirements.

NOT SAFE FOR HOT WORK: Means that in the compartment so designated, the requirements of Safe for Hot Work have not been met.

CHEMIST'S ENDORSEMENT. This is to certify that I have personally determined that all spaces in the foregoing list are in accordance with NFPA 306 Control of Gas Hazards on Vessels and have found the condition of each to be in accordance with its assigned designation.

"The undersigned acknowledges receipt of this Certificate under Section 2-6 of NFPA 306 and understands conditions and limitations under which it was issued."

This Certificate is based on conditions existing at the time the inspection herein set forth was completed and is issued subject to compliance with all qualifications and instructions.

TARGHEE, INC.
ENVIRONMENTAL CONSULTING

Introduction

In conjunction with Moine Brothers of Wilmington, California (Contractor's License No. 343468), Targhee, Incorporated performed a soil sampling program following removal of two underground diesel fuel storage tanks from West Central Produce, Incorporated located at 2045 Violet Street, Los Angeles, California 90021 (Local Area Map - Attachment A). The tanks were removed on July 21, 1998 under Los Angeles City Fire Department ("LAFD") Permit No. 6719.

Both tanks had recently stored diesel fuel, but reportedly had previously stored gasoline at one time. One dispenser island was located on the south side of the excavation adjacent to the warehouse. The location of the tanks and the tank excavation is shown on the Soil Sample Location Map in Attachment B.

Inspector Alexander of the Los Angeles City Fire Department was on site to direct the soil sampling. All samples obtained during the sampling program were entered onto a Chain-of-Custody document and delivered to a state-certified laboratory for analysis.

Hydrogeology

According to the report entitled "Planned Utilization of the Ground Water Basins of the Coastal Plain of Los Angeles County, Appendix A Ground Water Geology", which was published by the California Department of Water Resources ("CDWR") as Bulletin No. 104 in June 1961 and reprinted in May 1990, the subject site is located in the Los Angeles Forebay area of the Central Basin. The site is directly underlain by alluvial clays, silts, and sands of Recent age which form a cover on sediments of the Lakewood Formation of Upper Pleistocene age.

Cross sections contained in CDWR Bulletin 104 indicate that the uppermost aquifer in this area is the Gaspur Aquifer. The Gaspur Aquifer is shown to be very close to the surface in the vicinity of the subject site. The Gaspur Aquifer is flowing in a general southerly direction in the area.

Natural sediments were observed along the walls of the tank excavation and in the bottom of the excavation. The natural soils beneath the 6,000-gallon diesel tank consist of a light brownish gray, fine-to coarse-grained sand with trace gravel. The natural soils beneath the 7,500-gallon diesel tank consist of grayish brown sand with silt.

Groundwater was not encountered during the tank removal activities.

Tank Removal

One 6,000-gallon underground diesel storage tank and one 7,500-gallon underground diesel storage tank were removed from the subject site on July 21, 1998 using a crane and backhoe. The tanks were removed from an excavation immediately north of a warehouse building on the subject property located at 2045 Violet Street, Los Angeles, California.

Both of the tanks were of single-walled steel construction. The tanks appeared to be in good condition. No holes were observed in either of the tanks, although each tank showed some corrosion. The tanks' installation dates are unknown.

Sampling Procedures

At the direction of Inspector Alexander of the LAFD, two soil samples were obtained from beneath each tank (6K-E, 6K-W, 7500-E, and 7500-W). Three spoils pile samples and one background sample (SP-1 through SP-3 and BACK) were required by Inspector Alexander.

Soil samples from the dispenser area were not obtained because the dispenser was located over the excavation area.

The soil samples from the excavation were collected from the natural soils at a depth of approximately three feet below each tank.

The samples were collected in four- and nine-ounce glass jars with Teflon-lined lids and submitted for analysis to a laboratory certified by the California Department of Health Services. The soil samples were analyzed using EPA Methods 8015 for Total Petroleum Hydrocarbons ("TPH") as both diesel and gasoline, 8020 for benzene, toluene, ethylbenzene, total xylenes and methyl-tert-butyl ether ("BTEX" and "MTBE", respectively), and EPA Method 6010 for Total Lead per LAFD's direction. The background sample was obtained from a grassy area next to the street and was analyzed only for total lead.

Standard sample handling procedures and standard Chain-of-Custody procedures were utilized for sample transportation and submittal. Chain-of-Custody documentation is contained in Attachment C.

Analytical Results

The soil samples collected during the tank removal operations at the subject site were analyzed by Advanced Scientific Laboratories of Los Angeles, California. The analytical results are contained in Attachment D.

The results indicate that total lead is present beneath the two tanks and from the overburden in concentrations ranging from 0.89 to 10.2 mg/kg. The background lead sample contained 28 mg/kg total lead. One of the soil samples (7500-E) from the bottom of the tanks showed TPH as diesel fuel with a concentration of 63 mg/kg. Other samples from beneath the tanks did not have detectable concentrations of diesel fuel. The spoils pile samples showed no detectable concentrations of TPH-diesel. TPH as gasoline and BTEX/MTBE were not detectable in soil samples from beneath the tanks or the spoils pile. Analysis for TPH was not required for the background sample.

Discussion

The May 1996 Interim Site Assessment & Cleanup Guidebook, written by the California Regional Water Quality Control Board - Los Angeles and Ventura Counties, Table 4-1 for Maximum Soil Screening Levels (mg/kg) for TPH and BTEX above Drinking Water Aquifers was used to assess the site.

The distance from the soil sample obtained in the excavation at approximately 12-15 feet below ground surface ("bgs") and groundwater is estimated at 10-20 feet. Based on Table 4-1, the carbon range for diesel fuels is C13-C22. If the distance above groundwater from the last sample is less than 20 feet, the concentration of TPH that may remain in the ground is 100 mg/kg. This action level is greater than the 63 mg/kg present beneath the east side of the former 7,500-gallon tank.

Based on the analytical results, Targhee recommends that no additional investigations be performed.

In the event of any physical or atmospheric adversely affecting the STANDARD SAFETY DESIGNATIONS assigned to any of the above spaces, or if any doubt, immediately stop all work and contact the undersigned Marine Chemist.

QUALIFICATIONS: Transfer of ballast of manipulation of valves or closure equipment tending to alter conditions in pipe lines, tanks or compartments subject to gas accumulation, unless specifically approved in this Certificate, requires inspection and endorsement or reissue of Certificate for the spaces so affected. All lines, vents, heating coils, valves, and similarly enclosed appurtenances shall be considered "not safe" unless otherwise specifically designated.

STANDARD SAFETY DESIGNATIONS (partial list, paraphrased from NFPA 306 Subsections 2-3.1 through 2-3.5, and Subsection 6-3.2)

SAFE FOR WORKERS Means that in the compartment of space so designated: (a) the oxygen content of the atmosphere is at least 19.5 percent by volume; and that, (b) toxic materials in the atmosphere are within permissible concentrations; and that, (c) the residues are not capable of producing toxic materials under existing atmospheric conditions while maintained as directed on the Marine Chemist's Certificate

NOT SAFE FOR WORKERS Means that in the compartment of space so designated, the requirements of Safe for Workers have not been met.

ENTER WITH RESTRICTIONS Means that in any compartment or space so designated, entry for work may be made only if conditions of proper protective equipment, clothing, and time are specified.

SAFE FOR HOT WORK Means that in any compartment designated (a) oxygen content of the atmosphere is at least 19.5 percent by volume, with the exception of inerted spaces or where external hot work is to be performed, and that, (b) the concentration of flammable materials in the atmosphere is below 10 percent of the lower flammable limit; and that, (c) the residues are not capable of producing a higher concentration than permitted by (b) above under existing atmospheric conditions in the presence of fire, and while maintained as directed on the Marine Chemist's Certificate, and further, that, (d) all adjacent spaces containing or having contained flammable or combustible materials have been cleaned sufficiently to prevent the spread of fire, or are satisfactorily inerted, or, in the case of fuel tanks or lube oil tanks, or engine room or fire room bilges, have been treated in accordance with the Marine Chemist's requirements

NOT SAFE FOR HOT WORK Means that in the compartment so designated, the requirements of Safe for Hot Work have not been met.

CHEMIST'S ENDORSEMENT. This is to certify that I have personally determined that all spaces in the foregoing list are in accordance with NFPA 306 Control of Gas Hazards on Vessels and have found the condition of each to be in accordance with its assigned designation

"The undersigned acknowledges receipt of this Certificate under Section 2-6 of NFPA 306 and understands conditions and limitations under which it was issued"

Signed Ray Bayona (Name) Moine Bros (Company) 7-21-98 (Date)

This Certificate is based on conditions existing at the time the inspection herein set forth was completed and is issued subject to compliance with all qualifications and instructions.

Signed [signature] (Marine Chemist) 59X (Certificate No.)

16. **GENERATOR'S CERTIFICATION:** I hereby declare that the contents of this consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and national government regulations.

If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment OR, if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

AFX Reference # 79-97050-47

Our Environmental Lien and AUL report provides a summary of recorded information on a specific property from the time the current owner purchased the property, to present time. The report is intended to assist in the search for environmental liens filed in land title records. The report will verify property ownership and provide information on recorded environmental liens and/or Activity and Use Limitations that have been recorded from the time the current owner purchased the property, forward.

Our professional network of trained researchers follow established industry protocols and use client-supplied property information to complete this Environmental Lien and AUL report. The research is conducted at all appropriate government offices based on the location of the subject property. This would include city, county, state, federal and tribal offices as needed. The report includes:

- Current deed information (i.e. grantor, grantee, recording dates)
- Legal Description
- Environmental Lien information
- Activity and Use Limitation information
- Copies of any Environmental Liens and/or documents referencing AULs that are listed within our summary report

-Disclaimer-

This report was prepared for the use of AFX Research, LLC (AFX) exclusively. This report is not a guarantee of title, nor a commitment to insure, nor a policy of title insurance. No warranty, expressed or implied, is made whatsoever in connection with this report. AFX specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular use or purpose. The information contained in this report is retrieved as it is recorded from the various agencies that make it available. The total liability is limited to the fee paid for this report.

CALIFORNIA - EPA Map of Radon Zones

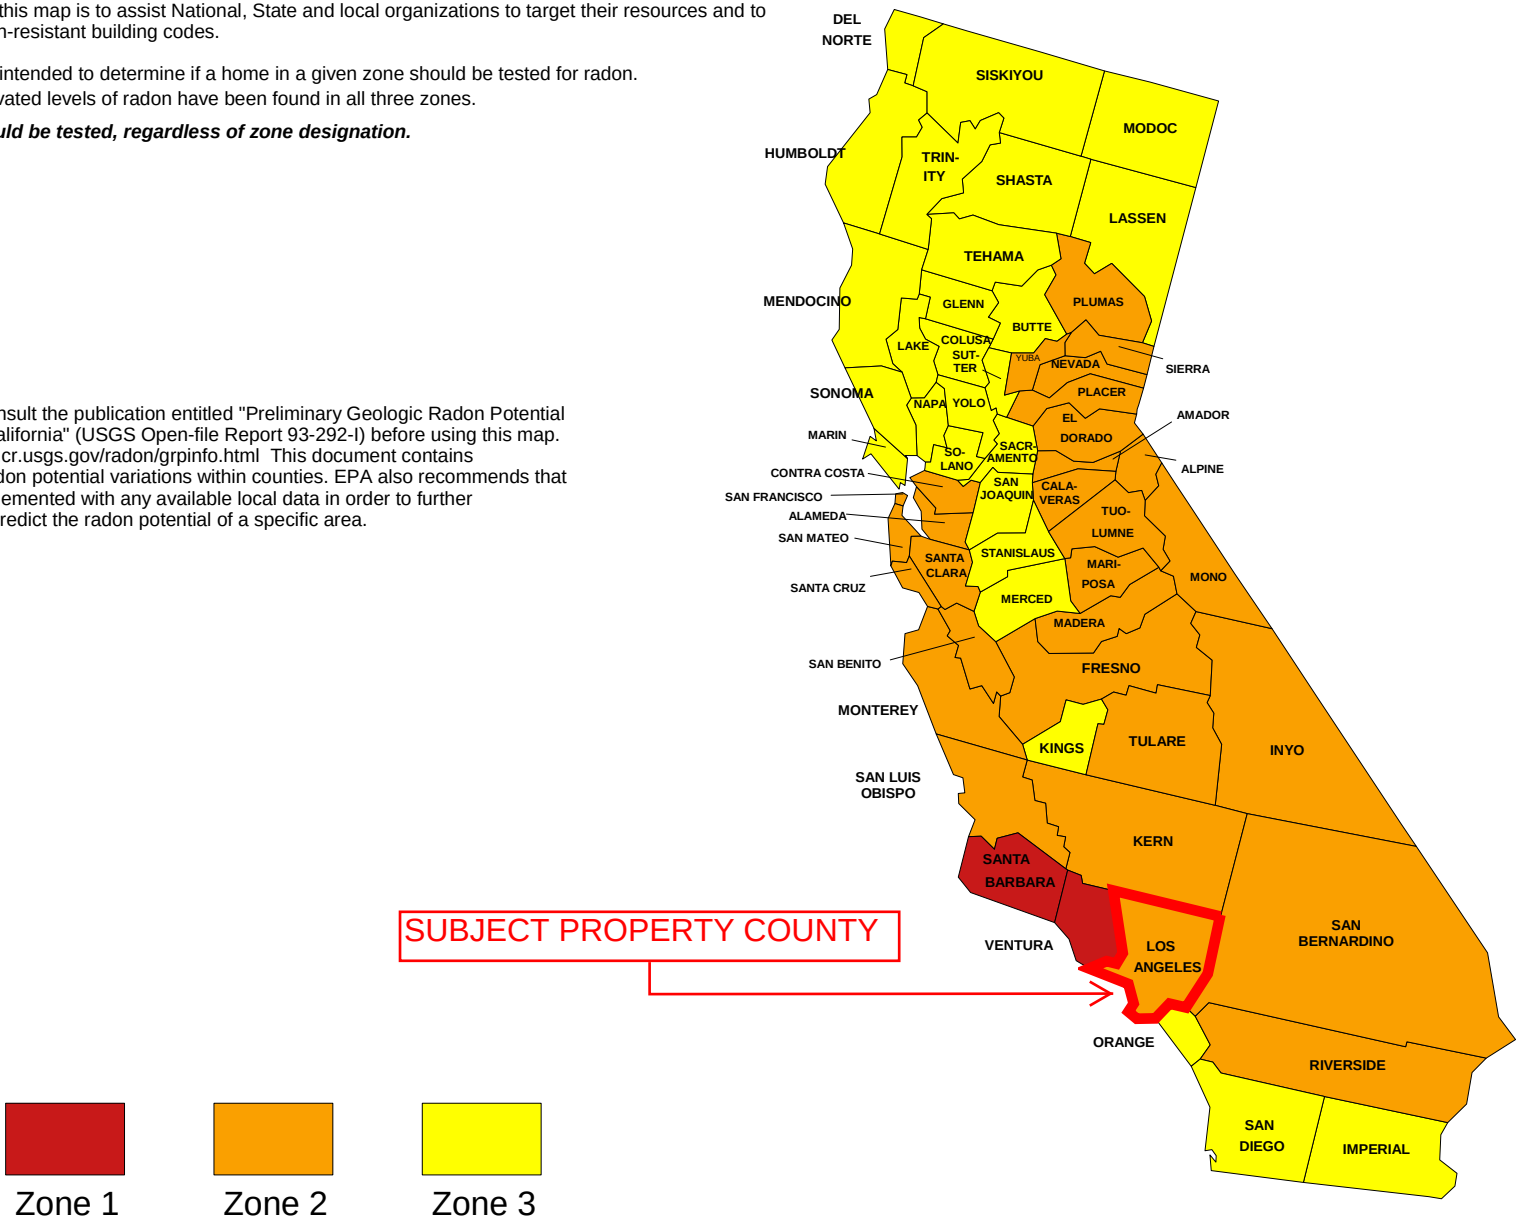
http://www.epa.gov/radon/zonemap.html

The purpose of this map is to assist National, State and local organizations to target their resources and to implement radon-resistant building codes.

This map is not intended to determine if a home in a given zone should be tested for radon. Homes with elevated levels of radon have been found in all three zones.

All homes should be tested, regardless of zone designation.

IMPORTANT: Consult the publication entitled "Preliminary Geologic Radon Potential Assessment of California" (USGS Open-file Report 93-292-I) before using this map. See http://energy.cr.usgs.gov/radon/grpinfo.html This document contains information on radon potential variations within counties. EPA also recommends that this map be supplemented with any available local data in order to further understand and predict the radon potential of a specific area.



APPENDIX H

QUALIFICATIONS

Spencer Faraday – Project Manager, Due Diligence Services

BS – Environmental Science, University of Oregon

Mr. Faraday provides project management to ensure compliance of ASTM regulations and satisfaction of client requirements for Phase I Environmental Site Assessments, Environmental Transaction Screens, Regulatory Database Reviews, and Historical Records Reviews.

Project experience for Mr. Faraday includes:

- Phase I Environmental Site Assessments (PHI ESA)
- Environmental Transaction Screens (ETS)
- Regulatory Database Review
- Historical Records Review

In addition, prior to joining the environmental consulting industry, Mr. Faraday spent four years in studying a diverse range of environmental disciplines including: marine biology, coastal ecology, sustainable agriculture, geology, watershed science and policy, conservation biology, and environmental policy.

Derrick Haynes – Project Manager

B.S. – Mathematics, Morehouse College

Mr. Haynes has more than five years of experience in the environmental consulting and facility management industries. Mr. Haynes has spent his career as a Project Engineer and Project Manager for several companies, specializing in construction monitoring and management in the civil/structural engineering field, and in conducting property condition and needs assessments, property condition evaluations, property reserve needs assessments, and environmental assessments. Mr. Haynes has served as a building assessor, project manager, and author on over a thousand real estate transactions.

Project experience for Mr. Haynes includes:

- Phase 1 Environmental Site Assessments (Phase 1 ESA)
- Property Condition Assessments (PCA)
- Environmental Transaction Screens (ETS)
- Environmental Transaction Analyses (ETA)
- Records Search with Risk Assessment (RSRA)
- Regulatory Database Reviews
- Historical Records Reviews
- Project Coordination and Setup
- Construction Monitoring and Draw Inspections

Mr. Haynes has experience as a project manager in the building sciences/construction field. His background in building assessments allows him to provided complete and thorough assessments and evaluations to serve a client's specific needs. In addition to providing consulting services, Mr. Haynes has conducted report reviewing and employee training tin the construction monitoring field.

Mr. Haynes is familiar with all standards of Due Diligence Property Assessments and the needs and requirements of a varied number of reporting standards, including the Property Condition Assessment ASTM E2018, Fannie Mae, Freddie Mac, Property Insurable Value Evaluation and customized client formats or scopes. He has also authored Property Condition Assessments, Property Condition Evaluations, HUD Project Capital needs Assessments, and Environmental Site Assessments.

Michael J. Wolf – National Client Manager

Pennsylvania State University
B.S., Earth Science, May 1982

ASTM Environmental Assessment Standards Committee, Various Task Groups
OSHA 29 CFR 1910.120 40-Hour HAZWOPER and Supervisor Training and Annual 8-Hour Refreshers

Mr. Wolf has over 25 years of professional experience as an environmental consultant, with expertise in commercial client business development and technical project management. Primary clients include developers, real estate advisory firms, attorneys, lenders, foreign investors, and REITs. Mr. Wolf manages and conducts environmental due diligence projects across the U.S. and overseas, including portfolio projects. He is experienced in providing firm-wide operational support including project scoping, proposal preparation, project execution, and report reviews. Mr. Wolf's specific competencies include management of Phase I and II ESAs, PCAs, and third party/peer reviews of environmental reports, with a particular focus on the hospitality industry; Voluntary Cleanup and Voluntary Remediation Program investigations and remediation; vapor intrusion investigations and mitigation; petroleum tank removals/investigations; multimedia regulatory compliance audits; and other environmental studies.

As a Task Group member on the ASTM Environmental Assessment Standards Committee, Mr. Wolf actively participated in the development of the current Phase I ESA Standard (E1527-13) and provided multiple briefings and training sessions following publication. Since 2008, he has served as a Public Member on the Maryland Controlled Hazardous Substances (CHS) Advisory Council, appointed by the Governor, and has served as the Council Chair since 2012.

Project experience for Mr. Wolf includes:

- Phase I Environmental Site Assessments - Project manager for thousands of Phase I environmental assessments at commercial, residential, industrial, and undeveloped properties undergoing transfer, foreclosure, or financing. Significant experience with portfolio projects and hospitality properties. Activities include proposal preparation, organization of inspection teams, and report review and preparation.

- Phase II Site Investigations – Project Manager for soil, groundwater, and soil vapor investigations at a variety of commercial properties. Experienced in selection of subcontractors and development of subcontracts, design of sampling plans, management of field activities, data interpretation, and report review and preparation.

- Third Party/Peer Reviews – Provide technical reviews of due diligence reports prepared by other consultants to confirm adherence to ASTM standards, typical industry practices, and client expectations. Often combine these services with

desktop reviews and other research to fill in data gaps or provide preliminary findings to clients prior to full due diligence efforts.

- Voluntary Cleanup Program/Voluntary Remediation Programs – Project Manager for multi-phase and multi-media investigations and remediation projects in accordance with State VCP/VRP requirements, successfully obtaining No Further Action or Certificates of Completion letters on behalf of property owners.

- Regulatory Compliance Audits - Completion and management of multi-media environmental compliance audits ranging from limited reviews as part of Phase I ESAs to comprehensive compliance audits of operating industrial plants.

- Asbestos, Lead Paint and Mold Surveys and Abatement - Management of industrial hygiene services ranging from limited surveys as part of Phase I ESAs to comprehensive pre-renovation surveys, development of abatement specifications, and abatement monitoring.

- Remediation – Management of impacted soil excavation projects during property redevelopment; groundwater treatment activities; installation and monitoring of vapor intrusion mitigation systems; radon mitigation systems, and petroleum tank removal/remediation.

- Regulatory Compliance – Development of Stormwater Pollution Prevention Plans (SWPPPs); Spill Control and Countermeasure Plans (SPCCs); Assistance with UST and AST registrations; Completion of RCRA generator notifications; and other regulatory notifications and reports.

Subject: **Phase I Environmental Site Assessment**
2020 East 7th Place
Los Angeles, California 90021
AEI Project No. 394042

Dear Mr. Sonnenborn:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (301) 337-9249 or mwolf@aeiconsultants.com.

Sincerely,

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by Access Industries, Inc. to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 2020 East 7th Place, Los Angeles, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

PROPERTY INFORMATION	
Site Address(es)	2020 East 7th Place, Los Angeles, Los Angeles County, California 90021
Property ID (APN or Block/Lot)	5166014012
Location	Approximately 160 feet east of the intersection of Matero Street and E 7th Place.
Property Type	Industrial/Manufacturing
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	1.0/Los Angeles County Assessor
Number of Buildings	One
Building Construction Date(s)	2002
Building Square Footage (SF)/Source	32,548/Los Angeles County Assessor
Number of Floors/Stories	One plus mezzanine
Basement or Subgrade Area(s)	None identified
Number of Units	One
Additional Improvements	Concrete-paved parking areas. Gated iron fencing around property perimeter. Two USTs and a 2-nozzle fuel pump/ dispenser.
On-site Occupant(s)	Better Life Organics
Current On-site Operations/Use	Warehousing and shipping of organic agricultural produce. No manufacturing or industrial operations.
Current Use of Hazardous Substances	Yes; refer to Section 7.1
REGULATORY INFORMATION	
Regulatory Database Listing(s)	UST, FINDS

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Use (Historical Addresses)	Source(s)
1900 - 1905	Residential use	Sanborn maps
1906	Multiple uses: gymnasium on the north, playground to the east, and a dwelling to the south	Sanborn maps
1907 - 1923	Unknown use/Data failure; refer to Section 1.6.1	Sanborn maps, aerial photographs, city directories
1923 - 1949	Commercial use	Aerial photographs

DRAFT

Date Range	Subject Property Description and Use (Historical Addresses)	Source(s)
1950 - 1954	Commercial/ industrial use: auto / truck repair shop, and truck parking with gas and oil storage to north	Sanborn maps, aerial photographs, city directories
1954 - 2002	Commercial/ industrial use: truck repair shop, and truck parking with gas and oil storage to north of the property, and motor freight depot to the south.	Sanborn maps, aerial photographs, city directories, building records
2002 - Present	Current building constructed for office and warehouse use with cold storage	Aerial photographs, city directories, site observation, building records

Based on the Sanborn maps and city directories reviewed, the subject property was commericaly developed by the 1920s, and operated as a truck rental and fleet maintenance business with gas and oil services, from at least 1950 to 1970. The southern portion of the property formerly included the address of 2017 Violet. This former operation was not listed on the regulatory database, but this truck/ auto repair business did operate at a time that pre-dates regulatory oversight of hazardous materials and petroleum products. Six petroleum USTs were documented as having been used at the property during this time period, and were removed in 1993. These former tanks are discussed in Section 4.3.

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Parking structure (2027 E 7th Place), Commercial bldg. (726 Mateo St.)	None identified
East	Splits59 / Commercial (2045 Violet Street)	CA FID UST, HAZNET, UST, SWEEPS UST
South	LA Vegetable Inc. / Commercial (2022 Violet Street)	None identified
West	Alley followed by multiple commercial use: Seventh/Place (800, 802 S Mateo Street and 2010 E 7th Place), More Media (806 S Mateo Street), Redraw (810 S Mateo Street), Cherish International (812 S Mateo Street), Perfect Parking (818, 822, 826 S Mateo Street)	826 S Mateo Street: RCRA-SQG, UST, SWEEPS UST, HIST UST, CA FID UST, HIST Auto

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

DRAFT

- AEI did not identify evidence of RECs during the course of this assessment.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

- The property utilizes a 10,000-gallon diesel UST and 10,000-gallon gasoline UST for truck fueling. The tanks were installed in 1998, prior to redevelopment of the property with the current building. The tanks are currently permitted, are of fiberglass construction, and are equipped with an automatic monitoring system. The LAFD provided an inspection report and tightness test results from June 2018, which indicated the tanks and lines passed and were in full compliance. Based on their age of 20 years, the USTs are considered a business environmental risk, and the tanks should be properly maintained and tested to monitor their integrity.

- Review of information on file for the subject property at the LAFD indicated six petroleum USTs were historically located on the property, dating from the 1960s. The LAFD conducted oversight during the 1993 removal and based on soil sampling conducted at that time, the former tanks are not considered a REC. However, if future construction on the property is conducted, impacted soils may be encountered and should be properly managed. No further investigation is recommended at this time.

- Although the cutoff date of 1981 referenced in the OSHA regulations is generally accepted for estimating the likelihood that certain building materials may contain asbestos, building materials manufactured after 1981, while not expected to, may still contain asbestos. Typical materials that are known to be manufactured with asbestos include but are not limited to: asphalt roofing products and building caulking materials and adhesives. In the event that building renovation or demolition activities are planned,

DRAFT

a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.

CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 2020 East 7th Place, Los Angeles, Los Angeles County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the subject property during the course of this assessment. AEI recommends no further investigation for the subject property at this time.

DRAFT

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I ESA performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 2020 East 7th Place, Los Angeles, Los Angeles County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 ADDITIONAL SERVICES

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

DRAFT

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I ESA is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

DRAFT

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 Limiting Conditions/Deviations

The performance of this Phase I ESA was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this Phase I ESA. Please refer to Section 6.3 for a summary of a previous report provided to AEI during this assessment.

1.6 Data Failure and Data Gaps

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 Data Failure

AEI identified evidence of data failure during the course of this assessment. See discussion in the table below.

Data Failure	Historical sources were not obtained at five-year intervals dating between 1907 and 1923. AEI was not able to track the history of the subject property between the years 1907 and 1923 as none of the historical sources utilized as part of this assessment covered this time period. In the 1906 Sanborn Map, the subject property appears to be developed with a small gymnasium. In the 1923 Aerial Photographs and City Directory listings the subject property appears to be in residential use. Thus, it is assumed that during this time period the subject property would have been vacant land, if not residential. Therefore, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	City directories, Sanborn fire insurance maps, aerial photographs, agency records, previous reports

DRAFT

1.6.2 DATA GAPS

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 RELIANCE

All reports, both verbal and written, are for the benefit of Access Industries, Inc. (and/or any other parties requesting reliance). This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors, or assigns. Reliance is provided in accordance with AEI's contract and Standard Terms and Conditions executed by Access Industries, Inc. on August 27, 2018. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

DRAFT

2.0 SITE AND VICINITY DESCRIPTION

2.1 Site Location and Description

PROPERTY INFORMATION	
Site Address(es)	2020 East 7th Place, Los Angeles, Los Angeles County, California 90021
Property ID (APN or Block/Lot)	5166014012
Location	Approximately 160 feet east of the intersection of Matero Street and E 7th Place.
Property Type	Industrial/Manufacturing
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	1.0/Los Angeles County Assessor
Number of Buildings	One
Building Construction Date(s)	2002
Building Square Footage (SF)/Source	32,548/Los Angeles County Assessor
Number of Floors/Stories	One plus mezzanine
Basement or Subgrade Area(s)	None identified
Number of Units	One
Additional Improvements	Concrete-paved parking areas. Gated iron fencing around property perimeter. Two USTs and a 2-nozzle fuel pump/ dispenser.
On-site Occupant(s)	Better Life Organics
Current On-site Operations/Use	Warehousing and shipping of organic agricultural produce. No manufacturing or industrial operations.
Current Use of Hazardous Substances	Yes; refer to Section 7.1
REGULATORY INFORMATION	
Regulatory Database Listing(s)	UST, FINDS

2.2 On-Site Utilities

Utility	Source/System Information
Heating System	Electricity
Cooling System	Electricity
Potable Water	LADWP
Sewage Disposal/Treatment	LADWP

Utility source/system information listed in the table above is provided by City of Los Angeles.

2.3 Site and Vicinity Characteristics

The subject property is located in a light industrial/manufacturing area of Los Angeles, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Parking structure (2027 E 7th Place), Commercial bldg. (726 Mateo St.)	None identified

DRAFT

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
East	Splits59 / Commercial (2045 Violet Street)	CA FID UST, HAZNET, UST, SWEEPS UST
South	LA Vegetable Inc. / Commercial (2022 Violet Street)	None identified
West	Alley followed by multiple commercial use: Seventh/Place (800, 802 S Mateo Street and 2010 E 7th Place), More Media (806 S Mateo Street), Redraw (810 S Mateo Street), Cherish International (812 S Mateo Street), Perfect Parking (818, 822, 826 S Mateo Street)	826 S Mateo Street: RCRA-SQG, UST, SWEEPS UST, HIST UST, CA FID UST, HIST Auto

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

2.4 PHYSICAL SETTING

Geologic Unit: Description/Source	Marine And Nonmarine (Continental) Sedimentary Rocks from the Pleistocene-Holocene age. Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast. /USGS and United States Department of the Interior.
Soil Series: Description/Source	Based on a review of the USDA Soil Survey for the area of the subject property, the soils in the vicinity of the subject property are classified as Urban Land. The Urban Land designation indicates that more than 85 percent of the original soils have been disturbed or covered by paved surfaces, buildings or other structures. Due to the variability of the soil material, on-site investigation would be required to determine the specific soil composition at the subject property. /USDA Soil Survey
Groundwater Flow Direction/Source	Southwest /Topographic map interpretation
Estimated Depth to Groundwater/ Source	Approximately 95 feet bgs /GeoTracker website based on former Exxon site located approximately 0.25 mile to the northwest (1614 East 7th Street, Los Angeles).
Surface waters on the subject property or adjacent sites	None identified
Additional notes	Off-site Water Bodies: Los Angeles River (approximately 1,150 feet east.

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

DRAFT

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Use (Historical Addresses)	Source(s)
1900 - 1905	Residential use	Sanborn maps
1906	Multiple uses: gymnasium on the north, playground to the east, and a dwelling to the south	Sanborn maps
1907 - 1923	Unknown use/Data failure; refer to Section 1.6.1	Sanborn maps, aerial photographs, city directories
1923 - 1949	Commercial use	Aerial photographs
1950 - 1954	Commercial/ industrial use: auto / truck repair shop, and truck parking with gas and oil storage to north	Sanborn maps, aerial photographs, city directories
1954 - 2002	Commercial/ industrial use: truck repair shop, and truck parking with gas and oil storage to north of the property, and motor freight depot to the south.	Sanborn maps, aerial photographs, city directories, building records
2002 - Present	Current building constructed for office and warehouse use with cold storage	Aerial photographs, city directories, site observation, building records

DRAFT

Based on the Sanborn maps and city directories reviewed, the subject property was commericaly developed by the 1920s, and operated as a truck rental and fleet maintenance business with gas and oil services, from at least 1950 to 1970. The southern portion of the property formerly included the address of 2017 Violet. This former operation was not listed on the regulatory database, but this truck/ auto repair business did operate at a time that pre-dates regulatory oversight of hazardous materials and petroleum products. Six petroleum USTs were documented as having been used at the property during this time period, and were removed in 1993. These former tanks are discussed in Section 4.3.

Copies of historical sources are provided in the report appendices.

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjacent Site Descriptions
1923	Structures depicted to the far west of the property	NORTH: Roadway followed by dwelling units, apartment EAST: Commercial use SOUTH: Roadway followed by commercial / industrial use WEST: Commercial use, residences
1928 1938	Small structures depicted to the far west of the property	NORTH: Roadway followed by dwelling units, apartment EAST: Commercial use SOUTH: Roadway followed by commercial / industrial use WEST: Commercial use, residences
1948	Commercial structures depicted to the west of the property	NORTH: Roadway followed by dwelling units, apartment EAST: Commercial use SOUTH: Commercial use WEST: Commercial use, residences
1952	Commercial structure depicted across the middle of the property	NORTH: Roadway followed by dwelling units, apartment EAST: Commercial use SOUTH: Roadway followed by commercial / industrial use WEST: Commercial use
1964 1972 1977 1979	Commercial structure depicted in the north and south portions of the property	NORTH: Roadway followed by what appears to be a parking lot EAST: Commercial use SOUTH: Roadway followed by commercial / industrial use WEST: Commercial use, parking lot
1983 1989 1994	Commercial structure depicted in the north and south portions of the property	NORTH: Roadway followed by what appears to be a parking lot EAST: Commercial use SOUTH: Roadway followed by commercial / industrial use WEST: Commercial use, parking lot
2002 2005 2009 2010 2012	Large new commercial / industrial structure similar to current configuration depicted	NORTH: Roadway followed by commercial / industrial use EAST: Commercial / industrial use SOUTH: Roadway followed by commercial / industrial use WEST: Commercial use

The subject property was commericaly developed by the 1920s, and operated as a truck rental and fleet maintenance business with gas and oil services, from at least 1950 to 1970. The southern portion of the property formerly included the address of 2017 Violet. This former

DRAFT

operation was not listed on the regulatory database, but this truck/ auto repair business did operate at a time that pre-dates regulatory oversight of hazardous materials and petroleum products.

3.2 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

Year(s)	Subject Property Description (Listed Address)	Adjacent Site Descriptions
1900	Dwellings on northern and western portion of the property	NORTH: Vacant lots EAST: Vacant lots SOUTH: Roadway followed by vacant lots WEST: Dwellings and a vacant lot
1906	Dwelling to the southwest with gymnasium on the north and City Playground to the east.	NORTH: Dwellings EAST: Vacant land SOUTH: Roadway followed by vacant land WEST: Dwellings
1950 1953	Auto Repair shop and truck parking with gas and oil storage in north/central portion of the property (addressed as 2020 Atlantic, historical name of East 7th Place), and parking on the south.	NORTH: Tenement, apartments then vacant lots EAST: Two motor freight depots with a tank on the northern most property SOUTH: Roadway followed by Paper baling and woodwork company WEST: Vacant lot, dwelling, residences, parking lot and auto repair
1954 1959 1960	Auto Repair shop and truck parking with gas and oil storage in north/central portion of the property (still addressed as 2020 but now East 7th Place), and motor freight depot on the south (2017 Violet).	NORTH: Vacant lots EAST: Two motor freight depots with a tank on the northern most property SOUTH: Roadway followed by paper baling and woodwork company WEST: Vacant lot, dwelling, residences, parking lot and auto repair
1967 1970	New building still labeled as truck repair shop with gas and oil storage on north portion, and motor freight depot to the south (2017 Violet).	NORTH: Vacant lots EAST: Two motor freight depots with a tank on the northern most property SOUTH: Roadway followed by produce warehouse WEST: Small industrial, woodworking, residences, parking lot and auto repair

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the Sanborn map review. A UST is identified on the east adjacent property, 2040 E 7th Place, from 1950 through 1970. This north adjacent property located at is further discussed under Section 5.1.

3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR.

DRAFT

The following table summarizes the prior tenants based on AEI's review of the historical city directories.

DRAFT

Year(s)	Address - Occupant Listed
1951	E 7th Place - Westway Fleet Maintenance
1958	Alto Plastics Mfg Corp
1967	Susan Girdles
2006	Produce Co Inc., West Central

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the city directory review, with the exception of the fleet maintenance previously identified.

3.4 HISTORICAL TOPOGRAPHIC MAPS

Based on the quality of information obtained from other sources, historical topographic maps were not reviewed as a part of this assessment.

3.5 CHAIN OF TITLE

A chain of title search was not performed as part of this assessment.

DRAFT

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

The Los Angeles Fire Department (LAFD) is the oversight agency (CUPA) for the handling of hazardous substances. See Section 4.2 below.

4.2 FIRE DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Angeles Fire Department (LAFD)	September 7, 2018	Fax	Clerk	Records discussed below

Records Summary

Date	Occupant	Document Type	Document Notes/Violations
August 2017	Better Life Organics	Consolidated Unified Permit	Permit to operate two USTs and to have a HAZMAT inventory of 4 to 7 chemicals. Permit valid through September 2018.
May 1998	West Central Produce	UST Installation Documents	Installation of 10,000-gallon USTs for diesel and gasoline, in central portion of property (these are the existing tanks currently in use).
October 1993	West Central Produce	UST Removal Documents	In 1993 one 10,000-gallon and two 1,000-gallon gasoline tanks were removed from the central portion of the property, and two 1,000-gallon waste oil USTs were removed from the northern portion of the property adjacent to East 7th Place. These tanks apparently were installed in the 1960s when the property was occupied by a truck maintenance facility. The documents are filed under the address 2017 Violet, which apparently was the main property address at that time but included the entire subject property now addressed as 2020 East 7th Place.

Review of information on file for the subject property at the LAFD indicated six petroleum USTs were historically located on the property, dating from the 1960s. The removal was overseen

DRAFT

by the LAFD and soil sampling did not identify significant impacts. Therefore, the former tanks are not considered a REC. However, if future construction on the property is conducted, impacted soils may be encountered and should be properly managed. No further investigation is recommended at this time.

4.3 BUILDING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Angeles Department of Building and Safety (LADBS)	September 7, 2018	Website	Not applicable	Records discussed below

Records Summary

Year(s)	Owner/Applicant	Description of Permit and Building Use
2002	C E G Construction	Permit: Building New - Warehouse / Office, Pre-cast tilt-up concrete panel with wood.
2002	C E G Construction	Change soil engineer; revise plan due to location of existing UST.

Evidence indicating current or prior use or storage of hazardous substances was not on file for the subject property with the LADBS, except that the 2002 building permit shows that the current USTs predate the construction of the building in 2012.

4.4 PLANNING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Angeles Planning Department (LAPD)	September 7, 2018	Telephone	Clerk	No evidence indicating the existence of AULs on file for the subject property

4.5 ASSESSOR'S OFFICE

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Angeles County Assessor's Office	September 7, 2018	Website	N/A	Information obtained is discussed below

Records Summary

APN	5166014012
Acreage	1.0 acre
Construction Date	2002
Building Square Footage	25,798 square feet
Current Owner	DCM LLC
Additional Information	None identified

DRAFT

4.6 OTHER AGENCIES SEARCHED

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA State Water Resources Control Board (SWRCB) GeoTracker	September 7, 2018	Website	N/A	No records on file
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	September 7, 2018	Website	None reported	Records discussed below
CA DTSC Envirostor	September 7, 2018	Website	N/A	No records on file

California DTSC HWTS Database Summary

Occupant	Year(s)	Hazardous Waste Generated	Amount (Tons)
Better Life Organics	2015	No Records Found	Not applicable
West Central Produce Inc	1998	Tank bottom waste	1.459
West Central Produce Inc	2005	Oil / water separation sludge	0.521

Better Life Organics is reported as Status 'Inactive' in 2015 and is not reported as a generator of waste. The company currently occupies the subject property as its sole tenant.

West Central Produce historically occupied the subject property and the adjacent property to the east, located at 2045 Violet Street. It appears the administrative office, or the address used by the Company for administrative purposes, was the address of the adjacent property (2045 E Violet Street). The USTs are physically located on the subject property. See Section 7.1.1 for further discussion.

There is currently no oil/water separator on the subject property, according to site representatives, and none was observed. There is a grease interceptor on the 2045 Violet Street property which was formerly the main address for the tenant which previously occupied the subject property. This structure was installed in 2014 and currently is not in service. This is not considered an environmental concern for the subject property.

4.7 OIL AND GAS WELLS

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
California Division of Oil, Gas and Geothermal Resources (CA DOGGR)	September 7, 2018	CA DOGGR Map	No

4.8 OIL AND GAS PIPELINES

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	September 10, 2018	NPMS Public Map Viewer	Information obtained is discussed below

DRAFT

According to information obtained from the NPMS Public Map Viewer, an underground natural gas pipeline is located approximately 450 feet to the east; see map in appendices. The pipeline, identified as a natural gas pipeline, is reportedly abandoned. Based on this information, the pipeline does not appear to represent a significant environmental concern to the subject property at this time.

DRAFT

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjacent site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Listings Within Search Distance	Subject Property	Adjacent Site(s)	Other Nearby Sites of Concern
NPL	1.0	0			
DELISTED NPL	0.5	0

Database	Search Distance (Miles)	Listings Within Search Distance	Subject Property	Adjacent Site(s)	Other Nearby Sites of Concern
STATE/TRIBAL EC and IC	SP	0			
STATE/TRIBAL VCP	0.5	6			
STATE/TRIBAL BROWNFIELD	0.5	0			
ORPHAN	N/A	5			
ADDITIONAL ENVIRONMENTAL RECORD SOURCES	SP/ADJ	0			✔

Facility Name	Better Life Organics
Address	2020 E 7th Place
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	UST, FINDS Additional listings related but listed under 2020 Violet Street: CA FID UST, HAZNET, UST, SWEEPS US
Comments	According to the regulatory database, the Subject Property is equipped with an active UST. No other information is reported on the UST. The subject property is also listed on the SWEEPS UST database without any further information. No releases have been reported in association with the listed USTs. This property is listed as a FINDS database and is associated with a HAZNET listing for the site. No violations or enforcement actions were identified and the listing appears to be administrative. Based on the nature of this listing and lack of violations, it is not expected to represent a significant environmental concern. One 10,000-gallon gasoline UST and one 10,000-gallon diesel UST, and a 2-nozzle fuel dispenser to fuel the delivery trucks, are located on the east side of the subject property approximately midway between the north and the south property line, within the loading dock area. The age and construction of these tanks is not reported in the database; however, based on other resources the tanks were installed in 1998 (prior to the current building construction in 2002). The tanks are currently permitted with the LAFD, and are of fiberglass construction. The LAFD provided tightness test results from June 2018, which indicated the tanks and lines passed. Based on the current age of 20 years, the USTs are considered a business environmental risk, and the tanks should be properly maintained and tested in conformance with LAFD requirements to monitor their integrity.

DRAFT

Facility Name	West Central Produce
Address	2045 Violet Street
Distance & Direction	Adjacent to the east
Hydrologic Position	Cross-gradient
Databases Listed	CA FID UST, HAZNET, UST, SWEEPS UST
Comments	According to the regulatory database, this site is equipped with an active UST. No other information is reported on the UST. The site is also listed on the SWEEPS UST database without any further information. No releases have been reported in association with the listed USTs. Based on conditions observed during the site visit, interviews with site representatives, and other research, the USTs are actually associated with the subject property, and not this adjacent site. West Central Produce historically occupied this adjacent property and the subject property and apparently used this adjacent property for administrative purposes. Therefore the USTs are linked to this adjacent property, address 2045 Violet Street, rather than the subject property address, where the tanks are physically located. The USTs are discussed further in Section 7.1.

Facility Name	Green Acres, Incorporated
Address	2040 E 7 Place
Distance & Direction	Adjacent to the east
Hydrologic Position	Cross-gradient
Databases Listed	SWEEPS UST, CA FID UST

DRAFT

Comments	According to the regulatory database, this site is has a status of "not reported" on the SWEEP UST list with the number of tanks reported as zero. On the CA FID UST database the site is reported as "inactive". This adjacent property is listed on the Inactive Underground Storage Tank Inventory List maintained by the Los Angeles Fire Department (LAFD) and is identified as facility ID FA0034091. The property does not appear on the LAPD Active CUPA Regulated Facilities Underground Storage Tank list. A review of the historical Sanborn Maps shows a gas tank at the former building on that parcel circa 1950-1970, approximately 50 feet east of the subject property. At that time the property was occupied by Freight Transport Co. Historical photographs indicate the building was razed by July 2008 and the property has been a paved parking lot since then. Documents obtained from the LAFD indicate that a 6,500-gallon gasoline UST and a 1,000-gallon gasoline UST were installed in 1950 on the northern side of the property, adjacent to 7th Place. In 1994 the tanks, then identified as containing diesel, were removed with an LAFD permit. Soil sampling did not indicate significant impacts. Based on the non-release nature of the listing, the inactive status of the former USTs, the removal of the tanks in 1994 and the intervening 25 years, these former tanks are not considered to represent an environmental concern to the subject property.

Facility Name	American Produce Company
Address	826 Mateo St
Distance & Direction	Adjacent to the west southwest
Hydrologic Position	Cross-gradient
Databases Listed	RCRA-SQG, UST, SWEEPS UST, HIST UST, HIST UST, CA FID UST, HIST AUTO
Comments	According to these databases, two USTs are registered at this property. The tanks are 10,000 and 12,000 gallons in size and contain gasoline and diesel fuel. No violations, leaks, releases, or spills are reported at this facility. This adjacent property is located to the west southwest of the subject property. The inferred groundwater flow direction in the vicinity of the subject property is to the southwest. Based on the lack of documented release of hazardous substances or petroleum hydrocarbons at the subject property, and the inferred groundwater flow direction and the relative proximity to the subject property, this listing is not considered to represent a recognized environmental condition.

5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

DRAFT

Based on a review of available resources as documented in this report, AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

DRAFT

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Site contact / site escort	Mr. Butch Nielson	September 5, 2018	In Person	Unknown	Interviewed; see Interview Summary table below

Interview Summary

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/ Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	No	Yes (see Section 7.1)
Do you have any knowledge of previous environmental investigations conducted on site?	No	No
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	No	No
Are you aware of any known plans for site redevelopment or change in site use?	No	No
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?	No	No
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?	No	No
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	No	No
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	No	No

6.1.2 PAST OWNERS, OPERATORS, AND OCCUPANTS

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

6.1.3 INTERVIEW WITH OTHERS

Information obtained during interviews with local government officials is incorporated into the

DRAFT

appropriate segments of this report.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User Questionnaire was completed by Mr. Jacob Himmelrich, Vice President, Access Industries, prospective owner of the Property. The following table represents information contained therein.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	No
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	No
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	No
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Yes

DRAFT

Question	Response/ Comment
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	No
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	No

6.3 Previous Reports and Other Provided Documentation

Documentation was provided to AEI during this assessment. A summary of this information follows:

Phase I Environmental Site Assessment (2020 E 7th Street and 2045 Violet Street, Los Angeles), prepared by Professional Service Industry (June 11, 2014).

The subject property was identified as two adjoining commercial properties: 2020 E. 7th Place and 2045 Violet Street, both occupied by West Central Produce, Inc., a local wholesale food distributor.

Historical resources indicate the subject property was vacant in 1900 and developed as a city playground with a gym in 1906. By 1923 the south half of the property was developed for residential use and the north half remained vacant. The 2045 property was developed with the present day commercial building by 1948 and the property at 2020 was developed with the present day commercial building by 2005. The subject property was occupied by West Central Produce by 1976.

Hazardous materials reported at the site were limited to small quantities of automotive/truck fluids (coolant and oils), paints, and two underground storage tanks (USTs). PSI observed two USTs located at the 2020 E. 7th place property, containing gasoline and diesel fuel. According to the site manager, the tanks had tightness testing performed on a regular basis, although the results were not included in the report. Based on PSI's site observation and the tightness test results (pass),the report concluded that the USTs did not represent a recognized environmental condition.

According to the databases reviewed by PSI, 1.4 tons of tank bottom waste was disposed of 1998 and 0.52 tons of oil/water sludge was disposed of in 2005. No violations, leaks, spills, or releases were reported. PSI did not discuss the source of these wastes, but concluded that based on the

DRAFT

lack of evidence suggesting a release of hazardous substances or petroleum hydrocarbons, this was not considered to represent a recognized environmental condition.

The ESA concluded that there was no evidence of recognized environmental conditions (RECs) in connection with the subject property, and PSI did not recommend any further assessment.

A copy of the report is included in the appendices.

6.4 Environmental Lien Search

In accordance with our approved scope of services, AEI contracted AFX Research, LLC (AFX) to perform an environmental lien search for the subject property.

According to AFX, environmental liens were not identified during the review of historical ownership documentation. A copy of the AFX report is provided in the appendices.

DRAFT

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	September 5, 2018
AEI Site Assessor(s)	Courtney Dumas
Property Escort(s)/ Relationship(s) to Property	Mr. Butch Nielson, Property Management
Units/Areas Observed	Building interior including warehouse and mezzanine area, and exterior including roof
Area(s) not accessed and reason(s)	Not applicable
Other Physical Constraints	None identified

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjacent Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use		
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)	✔

DRAFT

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.1.1 Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

USTs

	UST #1	UST #2
Tank Capacity (Gallons)	10,000	10,000
Tank Contents	Gasoline	Diesel
Tank Installation Date	1998	1998
Tank Material	Fiberglass	Fiberglass
Tank Construction	Double Wall	Double Wall
Tank Leak Detection Method	Veeder Root and periodic tank testing	Veeder Root and periodic tank testing
Piping Installation Date	Unknown	Unknown
Piping Material	Fiberglass	Fiberglass
Piping Construction	Unknown	Unknown
Spill/Overfill Protection Present	Yes	No
Line Leak Detection Method	Pressure Test	Pressure Test
Date of Last Test	June 2018	June 2018
Test Results Passed	Yes	Yes
Permitting Agency	Los Angeles Fire Department	Los Angeles Fire Department
Permit/ Registration Confirmed	Yes	Yes
Permit Expiration Date	9/30/2018	9/30/2018

DRAFT

These tanks were installed in 1998, prior to construction of the current building in 2002. The tanks are currently permitted, are of fiberglass construction, and are equipped with a Veeder Root automatic monitoring system. The LAFD provided an inspection report and tightness test results from June 2018, which indicated the tanks and lines passed and were in full compliance.

Based on their age of 20 years, the USTs are considered a business environmental risk, and the tanks should be properly maintained and tested to monitor their integrity.

7.1.2 Electrical or Mechanical Equipment Likely to Contain Fluids

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing". Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a

totally enclosed manner was prohibited after January 1, 1977.

Transformers

Type	Quantity	Owner	Presumed Date of Installation	Spills or Stains Observed (Yes/No)	Non-PCB Label (Yes/ No)
Pad-Mounted	1	SCE	2002	No	No

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Transformers installed prior to 1977 may be PCB containing while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.

AEI did not observe evidence of spills, staining, or leaks on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

7.1.3 Drains, Sumps, and Clarifiers

Several storm drains were observed in the parking area of the subject property, by the rear gate. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

7.2 Adjacent Property Reconnaissance Findings

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 Drains, Sumps, and Clarifiers

A grease interceptor is located on the adjacent property to the east located at 2045 Violet Street. According to records reviewed with the Los Angeles Building and Safety Department (LABSD), a new 2,000-gallon grease interceptor was installed in October 2014. The building is occupied by a sportswear design and retail company and at the time of the site visit the grease interceptor did not appear to be in use. It is assumed the interceptor was installed in the event a food processing tenant occupied the property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the interceptor. The presence of the grease interceptor is not expected to represent a significant environmental concern.

DRAFT

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900's and peaked in the period between 1940 and into the 1970's. Common ACMs include pipe-covering, insulating cement, insulating block, refactory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the USEPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980's. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Although the cutoff date of 1981 referenced in the OSHA regulations is generally accepted for estimating the likelihood that certain building materials may contain asbestos, building materials manufactured after 1981, while not expected to, may still contain asbestos. Typical materials that are known to still be manufactured with asbestos include but are not limited to: asphalt roofing products and building caulking materials and adhesives. A limited list of typical suspect ACMs is included in the following table:

Material Type	Location
Plaster (acoustical and smooth)	Walls and ceilings
Ceiling tile	Ceiling systems
Thermal systems insulations, packings, and gaskets	Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment
Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)	Floors
Vinyl sheet flooring and adhesives	Floors
Cove base and associated mastics	Walls
Ceramic tile adhesives and grouts	Walls, floors, and ceilings
All adhesives	Mirrors, wall coverings, construction, etc.
Grout and caulking	Windows and doors
Gypsum board, tape, and joint compound	Wall and ceiling systems
Insulation materials	Walls, ceilings, and attic spaces
Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations)	Roof and parapet wall systems
Brick and block, mortars	Walls

The observed suspect ACMs were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. In the event that building renovation or demolition activities are planned, a thorough asbestos survey is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb ACMs.

8.2 Lead-Based Paint

LBP is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X", defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard", although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, LCP is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

DRAFT

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property building, it is unlikely that LBP is present; however, LCP may be present.

8.3 RADON

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The United States EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three radon zones, with Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this assessment. According to the United States EPA, the radon zone level for the area is Zone 1, which has a predicted average indoor screening level above the action level of 4 pCi/L set forth by the EPA.

However, the subject property site is used for commercial/industrial purposes and the building in which employees work is above grade and not occupied for extended periods of time. Based on these facts, it is AEI's opinion that potentially high radon levels on the subject property are not expected to represent a significant health concern to the occupants working on the subject property. However, sampling would be necessary to determine site-specific radon conditions.

8.4 MOLD/INDOOR AIR QUALITY ISSUES

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this

DRAFT

inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

AEI observed interior areas of the subject property building to identify the potential presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. As such, no bulk sampling of suspect surfaces was conducted as part of this assessment and no additional action with respect to suspect mold appears to be warranted at this time.

DRAFT

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

DRAFT

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 05/18/2018 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

DRAFT

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 13 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/30/2018 has revealed that there are 32 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 4 SWF/LF sites within

approximately 0.5 miles of the target property.

CA FID UST: The Facility Inventory Database contains active and inactive underground storage tank locations. The source is the State Water Resource Control Board.

A review of the CA FID UST list, as provided by EDR, and dated 10/31/1994 has revealed that there are 17 CA FID UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste.

DRAFT

EXECUTIVE SUMMARY

Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

SO CAL GAS/OLYMPIC B	2424 E OLYMPIC BLVD	SE 1/2 - 1 (0.649 mi.)	Y111	281

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 8 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.
