

Los Angeles Department of City Planning

RECOMMENDATION REPORT

CULTURAL HERITAGE COMMISSION

CASE NO.: CHC-2023-4227-HCM
ENV-2023-4228-CE

HEARING DATE: July 20, 2023
TIME: 10:00 AM
PLACE: City Hall, Room 1010
200 North Spring Street
Los Angeles, CA 90012
and via Teleconference (see
agenda for login information)

Location: 682 S. Irolo Street
Council District: 10 – Hutt
Community Plan Area: Wilshire
Land Use Designation: Regional Center
Commercial

Zoning: R5-2
Area Planning Commission: Central
Neighborhood Council: Wilshire Center-
Koreatown

Legal Description: Wilshire Harvard Heights
Tract, Arb 1 of Lot FR 93,
Arbs 1 and 2 of Lot 92, and
Arb 2 of Lot FR 91

EXPIRATION DATE: July 22, 2023

PROJECT: Historic-Cultural Monument Application for the
PICCADILLY APARTMENTS

REQUEST: Declare the property an Historic-Cultural Monument

OWNER: 682 Irolo LLC
1 Towne Square #1913
Southfield, MI 48076

APPLICANT: James Dastoli
P.O. Box 1843
Los Angeles, CA 90028

RECOMMENDATION That the Cultural Heritage Commission:

1. **Take the property under consideration** as an Historic-Cultural Monument per Los Angeles Administrative Code Chapter 9, Division 22, Article 1, Section 22.171.10 because the application and accompanying photo documentation suggest the submittal warrants further investigation.
2. **Adopt** the report findings.

Attachment: Historic-Cultural Monument Application

SUMMARY

The Piccadilly Apartments is a six- and seven-story multi-family residential building located on the east side of S. Irolo Street between Wilshire Boulevard and 7th Street in the Wilshire Center neighborhood of Los Angeles. Constructed in 1929, it was designed in the Chateausque architectural style by local architect Milton M. Friedman (1882-1933) for owner Francis J. Murphy as an apartment building.

The Wilshire Center neighborhood saw its most intense development from the late 1910s through the 1920s, greatly encouraged by the growing streetcar system. Large single-family residences lined the main thoroughfare, with both single-family and multi-family buildings appearing on and near other major streets. The neighborhood also began to see large, luxurious apartment buildings, multi-story edifices, and hotels, particularly along Wilshire Boulevard. The Los Angeles Railway ran lines into and through the area along West Sixth Street, West Eighth Street, Ninth Street, West Third Street, Tenth Street (later Olympic Boulevard), Pico Boulevard, Larchmont Boulevard, Vermont Avenue and Western Avenue.

H-shaped in plan with deep light wells on the north- and south-facing facades, the subject property is of reinforced concrete and steel construction. The primary, west-facing façade is symmetrically composed and features a central, seven-story projecting volume that has a pyramidal roof with two dormers, turrets, balconies, quoins and a recessed, tripartite arched entry. The central main entrance consists of a decorative metal and glass door with an arched divided-lite transom flanked by multi-lite casement windows with arched divided-lite transoms. At the top of the pyramidal roof of the central volume is a sign that reads, "P." On either side of the projecting volume are six-story, two-bay volumes with mansard roofs and full-width balconies with corbels at the sixth floor. At the ground level, the side volumes are fronted by two arches that are flush with the front of the central projecting volume. The arches fronting the southern volume have two doors and an open archway with a ramp leading to the basement; the northern volume arches have one door and a smaller arched opening with a pierced screen in one archway and another small arched opening with a pierced screen in the second. The hyphen of the H-shaped plan has a flat roof and the east wing has a barrel roof and a rooftop neon sign that reads, "Piccadilly." Fenestration consists of groupings of two multi-lite wood casement windows with multi-lite transoms; tripartite, multi-lite wood casement windows; and single, wood multi-lite casement windows. Interior features include hardwood floors, courtyards with tiled walls and water features, tudor archways, and box beam ceilings in the entry hall.

Milton Maxwell Friedman was born in California in 1882 and studied at the Mark Hopkins Art Institute in San Francisco from 1898 to 1899. He later went on to become a draftsman working in San Francisco in 1910 and by 1919 he was an architect in Chicago, Illinois. Friedman worked as an architect in Los Angeles between 1926 and 1932, and passed away on April 30, 1933. Over the course of his career, Friedman designed a number of other buildings in Los Angeles that include the Hotel Chancellor (1924); an apartment building at 216 S. Mansfield (1926); the Valentino Arms (1928); the Chalfonte (1929); and the New Administration Building or "Lubitsch Annex" on the Paramount Pictures lot (1930).

Based on permit records, the subject property has experienced only minor alterations that consist of the reconstruction of a broken flue 10-feet above the roof line due to earthquake damage in 1935 and corrections to the parapet and chimney in 1958. Other alterations include the remodeling of kitchens and bathrooms in some of the units, the addition of security bars to a few windows, and the replacement of the flooring in at least one unit.

The subject property was identified as individually eligible for listing under the federal designation program as representative of the themes of Period Revival Styles, 1910-1940 and Apartment Streetcar Suburbs, 1906-1945 in the March 2009 Historic Resources Survey of the Wilshire Center/Koreatown Recovery Redevelopment Project Area prepared for the Community Redevelopment Agency by PCR Services Corporation in collaboration with Chattel Architecture and LSA Associates, Inc.

CRITERIA

The criterion is the Cultural Heritage Ordinance which defines a historical or cultural monument as any site (including significant trees or other plant life located thereon), building or structure of particular historic or cultural significance to the City of Los Angeles if it meets at least one of the following criteria:

1. Is identified with important events of national, state, or local history, or exemplifies significant contributions to the broad cultural, economic or social history of the nation, state, city or community;
2. Is associated with the lives of historic personages important to national, state, city, or local history; or
3. Embodies the distinctive characteristics of a style, type, period, or method of construction; or represents a notable work of a master designer, builder, or architect whose individual genius influenced his or her age.

FINDINGS

Based on the facts set forth in the summary and application, the Commission determines that the application is complete and that the property may be significant enough to warrant further investigation as a potential Historic-Cultural Monument.

BACKGROUND

On June 22, 2023, the Director of Planning determined that the application for the proposed designation of the subject property as an Historic-Cultural Monument was complete.

HISTORIC-CULTURAL MONUMENT NOMINATION FORM

1. PROPERTY IDENTIFICATION

Proposed Monument Name:					
Other Associated Names:					
Street Address:				Zip:	Council District:
Range of Addresses on Property:				Community Name:	
Assessor Parcel Number:	Tract:			Block:	Lot:
Identification cont'd:					
Proposed Monument Property Type:	Building	Structure	Object	Site/Open Space	Natural Feature
Describe any additional resources located on the property to be included in the nomination, here:					

2. CONSTRUCTION HISTORY & CURRENT STATUS

Year built:	Factual	Estimated	Threatened?
Architect/Designer:			Contractor:
Original Use:			Present Use:
Is the Proposed Monument on its Original Site?		Yes	No (explain in section 7) Unknown (explain in section 7)

3. STYLE & MATERIALS

Architectural Style:		Stories:	Plan Shape:
<i>FEATURE</i>	<i>PRIMARY</i>	<i>SECONDARY</i>	
CONSTRUCTION	Type:	Type:	
CLADDING	Material:	Material:	
ROOF	Type:	Type:	
	Material:	Material:	
WINDOWS	Type:	Type:	
	Material:	Material:	
ENTRY	Style:	Style:	
DOOR	Type:	Type:	

HISTORIC-CULTURAL MONUMENT NOMINATION FORM

4. ALTERATION HISTORY

List date and write a brief description of any major alterations or additions. This section may also be completed on a separate document. Include copies of permits in the nomination packet. Make sure to list any major alterations for which there are no permits, as well.

5. EXISTING HISTORIC RESOURCE IDENTIFICATION (if known)

Listed in the National Register of Historic Places	
Listed in the California Register of Historical Resources	
Formally determined eligible for the National and/or California Registers	
Located in an Historic Preservation Overlay Zone (HPOZ)	Contributing feature Non-contributing feature
Determined eligible for national, state, or local landmark status by an historic resources survey(s)	Survey Name(s):
Other historical or cultural resource designations:	

6. APPLICABLE HISTORIC-CULTURAL MONUMENT CRITERIA

The proposed monument exemplifies the following Cultural Heritage Ordinance Criteria (Section 22.171.7):

1. Is identified with important events of national, state, or local history, or exemplifies significant contributions to the broad cultural, economic or social history of the nation, state, city or community.
2. Is associated with the lives of historic personages important to national, state, city, or local history.
3. Embodies the distinctive characteristics of a style, type, period, or method of construction; or represents a notable work of a master designer, builder, or architect whose individual genius influenced his or her age.

HISTORIC-CULTURAL MONUMENT NOMINATION FORM

7. WRITTEN STATEMENTS

This section allows you to discuss at length the significance of the proposed monument and why it should be designated an Historic-Cultural Monument. Type your response on separate documents and attach them to this form.

A. Proposed Monument Description - Describe the proposed monument's physical characteristics and relationship to its surrounding environment. Expand on sections 2 and 3 with a more detailed description of the site. Expand on section 4 and discuss the construction/alteration history in detail if that is necessary to explain the proposed monument's current form. Identify and describe any character-defining elements, structures, interior spaces, or landscape features.

B. Statement of Significance - Address the proposed monument's historic, cultural, and/or architectural significance by discussing how it satisfies the HCM criteria you selected in Section 6. You must support your argument with substantial evidence and analysis. The Statement of Significance is your main argument for designation so it is important to substantiate any claims you make with supporting documentation and research.

8. CONTACT INFORMATION

Applicant

Name:		Company:	
Street Address:		City:	State:
Zip:	Phone Number:	Email:	

Property Owner

Is the owner in support of the nomination?

Yes

No

Unknown

Name:		Company:	
Street Address:		City:	State:
Zip:	Phone Number:	Email:	

Nomination Preparer/Applicant's Representative

HISTORIC-CULTURAL MONUMENT NOMINATION FORM

9. SUBMITTAL

When you have completed preparing your nomination, compile all materials in the order specified below. Although the entire packet must not exceed 100 pages, you may send additional material on a CD or flash drive.

APPLICATION CHECKLIST

- | | |
|---|---|
| 1. ✓ Nomination Form | 5. ✓ Copies of Primary/Secondary Documentation |
| 2. ✓ Written Statements A and B | 6. ✓ Copies of Building Permits for Major Alterations
(include first construction permits) |
| 3. ✓ Bibliography | 7. ✓ Additional, Contemporary Photos |
| 4. ✓ Two Primary Photos of Exterior/Main Facade
(8x10, the main photo of the proposed monument. Also
email a digital copy of the main photo to:
planning.ohr@lacity.org) | 8. ✓ Historical Photos |
| | 9. ✓ Zimas Parcel Report for all Nominated Parcels
(including map) |

10. RELEASE

Please read each statement and check the corresponding boxes to indicate that you agree with the statement, then sign below in the provided space. Either the applicant or preparer may sign.

☒	I acknowledge that all documents submitted will become public records under the California Public Records Act, and understand that the documents will be made available upon request to members of the public for inspection and copying.
☒	I acknowledge that all photographs and images submitted as part of this application will become the property of the City of Los Angeles, and understand that permission is granted for use of the photographs and images by the City without any expectation of compensation.
☒	I acknowledge that I have the right to submit or have obtained the appropriate permission to submit all information contained in this application.

Piccadilly Apartments

Historic-Cultural Monument Nomination Continuation Sheet

A. Property Description

Site

Constructed in 1929, the Piccadilly Apartments are located at 682 S. Irolo St., on the east side of the street, fronted by a sidewalk on Irolo. The building takes up most of its rectangular parcel. The property abuts the 7th & Irolo Shopping Center to the south. A driveway separates the building from the offices of Central Plaza to the north. To the east of the parcel is parking for Central Plaza.

Exterior

Designed in the Chateausque style by Milton M. Friedman, the building is roughly H-shaped in plan, and rises to eight stories in height. It is constructed of concrete and steel, with board-formed markings visible on parts of the side elevations. The primary west-facing facade can be broken up into three mostly symmetrical volumes. A three-bay wide central section projects forward, with narrower two-bay wide sections flanking it. A fire escape runs down the center of the primary elevation over the recessed entryway. The landings appear as large corbelled balconies, with one of them spanning the width of the building. Quoins run up the corners to meet two tall thin cylindrical turrets. Side elevations are mostly bare, with regularly spaced windows only in the deep lightwells. The central volume has a pyramidal roof that is topped with a sign that reads, "P." Wall dormers break through the roofline on three sides. The flanking sections have mansard roofs. The east wing of the H-shaped plan has a barrel roof, and a rooftop sign that reads "Picadilly." Typical windows are wood multi-lite casements with transoms above them. Some are mullioned, and others are arched. Small wood double hung 4-over-1 windows are also present on side elevations. Three arched openings that feature gothic columns lead to a recessed entry patio on the main elevation. The main entry door is topped with an arched transom. The rest of the first floor is heavily ornamented, featuring four-centered arched windows, hoodmoulds, quatrefoils, pierced screens, and helical columns.

Interior

Rental listings show images of an elaborately tiled courtyard with fountain, Tudor arches and Gothic tracery in the lobby, original kitchen tile, and built-in bookcases.

Alterations

The Picadilly Apartments has not had any significant alterations since the time of construction. Existing permits are related to maintenance.

B. Statement of Significance

Summary

The Piccadilly Apartments meet the following criteria for designation as a Los Angeles Historic-Cultural Monument:

It is identified with important events of national, state, or local history, or exemplifies significant contributions to the broad cultural, economic or social history of the nation, state, city, or community.

It embodies the distinctive characteristics of a style, type, period, or method of construction; or represents a notable work of a master designer, builder, or architect whose individual genius influenced his or her age.

Built in 1929, the property is the work of architect Milton M. Freidman. It meets criterion 3 by being an excellent example of the Chateausque style, with its roofline, materials, fenestration, and ornamentation all being typical of the style's characteristics. It meets criterion 1 because the building is representative of early patterns of development in the Wilshire area that were influenced by streetcar suburbanization., being located very close to the Los Angeles Railway line on 6th St. It also serves as an excellent example of an early 20th century apartment house, which is an important sub-type of multi-family residential development in Los Angeles.

In 2009, the Wilshire Center and Koreatown Recovery Redevelopment Area: Historic Resources Survey Report identified the Piccadilly Apartments as individually eligible for the National Register.

Streetcar Suburbanization¹

Los Angeles came of age with the perfection of the streetcar and electric Interurban. The city's population grew from 11,183 at the beginning of the streetcar era to 576,673 in 1920. At the peak the Los Angeles Railway alone operated some 83 route miles of line just inside the city limits. When Henry E. Huntington established the Pacific Electric Railway Company in 1901, it was as much a real estate concern as a transportation corporation. Within ten years, its fleet of hundreds of cars and aggressive real estate activities helped propel the city's expansion. The dovetailing of land subdivision, sales, transportation infrastructure, and economic development made Huntington among the wealthiest Los Angeles area residents. Rail lines were used to promote and sell tracts of land, though the latter eventually wound up subsidizing the former. Huntington's system also included the preexisting Los Angeles Railway Company (the "Big Yellow Cars"), which were incorporated into the vast interurban system of P.E.'s "Big Red Cars." The first wave of suburbanization close to downtown was over by the 1920s, and then with hundreds of millions of dollars to invest came a second wave of fast interurban electric cars, often running in multiple car trains and making commute distances of ten, twenty and thirty miles feasible. Ridership peaked in the mid-1920s, and the system began its slow, inexorable decline in the 1930s.

Railway lines are significant for their influence on the development and growth of early Los Angeles. Wilshire area residents enjoyed considerable urban connectivity. Railway lines along West Sixth Street, West Eighth Street, Ninth Street, Western Avenue, and Vermont Avenue initiated the construction of

¹ Excerpted and adapted from PCR Services Corporation. "Wilshire Center and Koreatown Recovery Redevelopment Area: Historic Resources Survey Report," prepared for CRA/LA, 2009.

apartment buildings in the Wilshire area between 1906 and 1945.

The R Line

The “R” Line was formed by merging the Stephenson Avenue Line and the West 6th Street Line, with service beginning in 1920 and ending in 1947. The route went from Eastern Avenue and Whittier Boulevard, west on Whittier to Boyle Avenue, south on Boyle to E. 7th Street, west on 7th to Alvarado Street, north on Alvarado to W. 6th Street, west on 6th to right-of-way near Gramercy Place, north on right-of-way to W. 3rd Street, west on 3rd to Larchmont Boulevard, north on Larchmont to Melrose Avenue. In 1931, the line was rerouted to travel west on Whittier to Boyle Avenue, south on Boyle to E. 7th Street, west on 7th to Vermont Avenue, north on Vermont to W. 3rd Street, west on 3rd to La Brea Avenue.²

Multi-family Residential Development in Los Angeles³

The reasons for the proliferation of multi-family housing in early twentieth century Los Angeles are manifold. Primary among them was simple demand. Multi-family residences played a critical role in meeting the widespread need for housing created by the city’s exponential population growth during this time. In 1900, the city had barely a hundred thousand residents; by 1930 that number had exploded to over 1.2 million. In the 1920s alone, the city’s population doubled as Los Angeles went from the nation’s tenth largest city to the fifth largest.

For many Angelenos a multi-family dwelling was a more desirable living situation than a detached single family house. Multi-family living was generally more affordable and located “further in” – close to urban amenities such as employment centers and shopping districts. By contrast, potential homeowners often had to be “courted and coaxed out to the urban edge, where they might or might not find paved streets or sewer connections, but where often-steep mortgage payments would be waiting regardless.” Unlike in other American cities, where apartment housing was associated with overcrowding and unhealthful living conditions for the urban poor, Los Angeles’ varied stock of rental units accommodated Angelenos with a wide range of economic means, from working-class fourplexes, to middle-class bungalow courts, to high-rent luxury apartment towers.

Apartment living also met the requirements of new Angelenos seeking readily available housing. Bungalow courts and courtyard apartments offered shared landscapes which “helped create community out of discrete dwellings, providing a spatial expression of common identity for residents recently arrived from elsewhere.” Apartment buildings with distinctive architectural detailing, perhaps with an illuminated rooftop sign declaring the building name, offered “instant community to a newly arriving population.” Individual units might come fully furnished and equipped with hundreds of household items, from towels and linens to kitchenware. In more luxurious buildings, rental fees might include daily bed making and cleaning, as well as laundry and linen services.

3 Excerpted and adapted from City of Los Angeles. “Los Angeles Citywide Historic Context Statement Context: Residential Development and Suburbanization, 1880-1980 Theme: Multi-Family Residential Development, 1895-1970,” ed. Department of City Planning, Office of Historic Resources, SurveyLA, 2018.

As the city's population rose in the early twentieth century, and the demand for affordable rental units kept pace, there were plenty of entrepreneurs happy to add to the supply of multi-family housing. Development of multi-family dwellings provided investment opportunities up and down the socioeconomic scale, "from lower middle-class white and minority single-lot owners on up to real estate tycoons and everywhere in between." Small-scale buildings were the earliest examples of this kind of income-producing residential development, due to the relative ease with which they could be constructed and with minimal up-front capital. Larger buildings did not appear in substantial numbers until the 1920s, when a combination of even more rapid population growth, a burgeoning tourism industry, and widespread availability of investment capital "drove an apartment construction boom in Los Angeles that dramatically altered parts of the city." Smaller buildings would then give way to larger apartment houses, towers, and ultimately expansive complexes which could offer a greater return on investment.

Apartment Houses⁴

Apartment houses represent an important building type that proliferated throughout the city during most of the twentieth century and reflect trends in urban planning to accommodate a wide range of full and part time residents as well as tourists and other visitors. Many examples are also significant in the area of architecture as excellent examples of their respective architectural styles. Apartment houses range from modest duplexes, triplexes, and fourplexes to mid- and high-rise apartment buildings. Due to their versatility, apartment houses are among the most common multi-family residential building types in Los Angeles, with examples constructed in nearly every part of the city. Early examples are becoming increasingly rare.

The apartment house can best be defined in contrast to the bungalow court and other forms of courtyard housing that were being constructed in the early twentieth century. Unlike courtyard housing, the apartment house is designed to maximize lot coverage, with little or no lot area land dedicated to useable open space. And unlike courtyard housing, which is typically oriented onto a central common space, apartment houses are oriented toward the street, with architectural detailing concentrated on the street-facing façade. Apartment houses vary widely in terms of density, from one-story duplexes to high-rise luxury apartment towers. They can accommodate a variety of architectural styles, and therefore often reflect the dominant residential styles of the period in which they were constructed. Due to their versatility, apartment houses were built throughout the twentieth century and in nearly every part of Los Angeles.

Larger apartment houses from this early period could range anywhere from two to six stories in height, with four or more units. Early examples constructed during the 1910s were mostly modest vernacular structures constructed of brick or wood frame, while into the 1920s they began to take on more decorative, even fanciful, stylistic elements. Their comparative affordability and the ability to pack as many units onto a lot as possible made the two-story apartment building a particularly attractive investment for both novice and seasoned developers. As many as a dozen or more two- and three room

⁴ Excerpted and adapted from City of Los Angeles. "Los Angeles Citywide Historic Context Statement Context: Residential Development and Suburbanization, 1880-1980 Theme: Multi-Family Residential Development, 1895-1970," ed. Department of City Planning, Office of Historic Resources, SurveyLA, 2018.

units could be fit into this simple type, greatly increasing the potential rate of return relative to outlay for construction.

Piccadilly Apartments

Original permits for the construction of the 170 room apartment building were filed in 1928. Owner Francis Murphy had previously been mentioned in a *Los Angeles Times* article as completing a four-story apartment building near Western Ave and Santa Monica Blvd.⁵ 1930 permits indicate that the original roof sign had to be removed during reconstruction of the roof, and a replacement was constructed with shorter legs. A 1934 Classified ad in the paper highlights the 24-hour switchboard and garage service available at the Piccadilly. Another ad from 1964 still mentions the switchboard and garage, but also points out the maid service.

The *Los Angeles Times* kept tabs on the building, reporting its sale to Louis Rosenberg in 1950.⁶ Other names of owners that appear on permits are the Western Loan and Building Company (1935), Sequoia Invest. Co. (1959), David Schein Realty Co. (1985), and Howard Rubenstein (1985).

It was included on a list of fallout shelters available in the Wilshire District by the city's director of civil defense in 1962.⁷

In 1976 the building was purchased by Mark Finfer, a retired Chicago architect. Along with property managers Moss & Co., he guided the building through a sensitive refurbishment.⁸

The rooftop sign of the Piccadilly was one of four neon signs that were restored by the Community Redevelopment Agency in Wilshire Center in 1995.⁹

Chateausque Style¹⁰

The Chateausque style of architecture was a Period Revival style loosely based on the monumental architecture of sixteenth century French chateaux in the Loire Valley. The original country estate homes of French aristocrats combined elements of Gothic and Renaissance architecture in heavy masonry construction. As reimaged by architects in the late nineteenth century, Chateausque involved massive masonry construction and elaborate, expensive detailing. The style became a standard for the mansions of the East Coast elite; the grand, impressive homes signified wealth, sophistication, and legitimacy. With the exception of isolated early examples, the style was not widespread in Southern California until the 1920s. Following World War I, Chateausque was revived and reimaged in Los Angeles as a style for luxury apartment buildings and large single-family residences. Little stucco

10 Excerpted and adapted from City of Los Angeles. "Los Angeles Citywide Historic Context Statement Context: Architecture and Engineering, 1850-1980 Theme: Period Revival, 1919-1950," ed. Department of City Planning, Office of Historic Resources, SurveyLA, 2016.

castles sprang up all over the city. Earlier versions of the style were materially faithful to the original French châteaux and required massive and expensive masonry construction. This was financially infeasible for most multi-family and residential tract developers to imitate. The Chateausque style flourished in the 1920s as advances in veneer cladding techniques, growing acceptance of substitute materials such as concrete and cast stone, and First World War veterans' first-hand experience in Europe created a desire for the style and a financially viable way to achieve it.

Designing apartment towers in the Chateausque style was a social statement and creative architectural solution. The style allowed a freedom in the arrangement of windows and rooms that made the style particularly popular for apartment houses with multiple sizes of apartments arranged over several floors. Lofty spires accentuated the height of a building, creating advertising opportunities and identity in the horizontal city. As a social statement, Chateausque buildings in Los Angeles from the 1920s through 1940s were part of the fantasy image created of Los Angeles. The exclusive, castle-like buildings with crenellated parapets making visual references to fortresses were vertical luxury residential districts. Many of the most prominent and visually impressive apartment towers were associated with the entertainment industry, as residents and owners. This created an impression of affluent and famous people living together in a castle, referencing the living arrangements of aristocrats in eighteenth century Versailles. The exclusive residential buildings had names like Le Trianon (LAHCM #616) and Château Élysée (LAHCM #329) advertised on neon rooftop signs, contrasting historic French buildings forms and names and with modern signage technology. Despite their exclusivity, these buildings were rental apartment hotels and had a glamour that appeared more attainable and less rigid than the Fifth Avenue Chateausque mansions of Victorian New York City.

Chateausque style buildings of the Period Revival theme are characterized by an eclectic combination of design motifs from medieval, Gothic, and Renaissance era French architecture. In Los Angeles, these designs are realized in materials distressed or treated to look like a more expensive material; for example, stucco was painted to appear like stone. Buildings of this style have steeply pitched hipped (and sometimes gabled) complex roof lines with abundant detailing. Vertical elements along the roof include spires, pinnacles, turrets, gables, and shaped chimneys. Large entry doors are often highlighted by round or gothic arches. Balconies feature Gothic inspired quatrefoil or arched tracery patterns. Architectural elements are framed with quoins, intended to look like cut stone. Corner turrets mark intersecting planes of the exterior elevations. The overall effect creates an imposingly elongated building with decorative follies in every view. Notable other examples of Chateausque buildings in the City of Los Angeles include the Chateau Marmont (1925, LAHCM #151), Hollywood Tower (1929), and Chateau Colline (1935, LAHCM #703). Dramatic and complex, the style fell out of favor as austerity and modernism were popularized during World War II.

The Piccadilly Apartments can be identified as an excellent example of the Chateausque style by looking at how it combines French Gothic and Renaissance elements to achieve a sense of monumentality. A key feature is the complex roofline, which is adorned with castle-like follies. Other details on the building that are typical of the style are: gothic arches, tracery, turrets, quoins, and quatrefoils.

Milton M. Friedman

No biographical information about architect Milton M. Friedman is available, and his name does not appear in the American Institute of Architects Historical Directory. There is a Milton M. Friedman listed in the Los Angeles City Directory. His name appears in 1926, 1927, 1929, and 1932 with offices at the addresses 412 W. 6th St., 6001 Santa Monica Blvd., and 112 W. 9th St.¹¹

He is best known for his use of Beaux-Arts design on the Hotel Chancellor at 3191 W. 7th St. He also designed the Chalfonte Apartments at 720 S. Normandie Ave in the French Renaissance style, as well as an Italian Revival duplex at 216 S. Mansfield Ave.¹²

Early History of the Wilshire Area¹³

The Tongva people are the original inhabitants of the land that later included most of Los Angeles, including the central Los Angeles area later known as Mid-City/Mid-Wilshire. They resided in villages connected by foot trails, part of a larger network that also led to known resources like the La Brea tar pits. The mission system established under Spanish rule slowly disintegrated after Mexico obtained its independence in 1821, and former mission lands were granted to individuals in favor as ranchos. Rancho La Brea was granted in 1828 by Los Angeles mayor José Antonio Carrillo to Antonio José Rocha and named for the well-known tar pits within. The La Brea Road/El Camino Viejo served as the dividing line between Rancho La Brea on the north and Francisco Avila's Rancho Las Cienegas on the south. It later became Wilshire Boulevard, the backbone of the area and one of the most iconic and influential commercial corridors in the nation.

Wilshire Center Development¹⁴

Henry Gaylord Wilshire, an entrepreneur, socialist, real estate speculator, and all around gadfly from Cincinnati, Ohio, arrived in Los Angeles in 1886. Promising cheap land and endless sunshine, boosters lured easterners like Wilshire to purchase vast tracts of unsettled farmland and oil fields west of downtown. To garner attention and fanfare for a new subdivision, Wilshire created a 120-foot wide graveled road stretching four blocks between his parcel, Sunset Park (Lafayette Park) and Westlake Park (MacArthur Park). The wide road, bordered with concrete sidewalks, created an appealing streetscape, and Wilshire's fledgling tract was successful as one of the city's first elite enclaves. The construction of the Hotel Hershey Arms interrupted the original intent of the Wilshire Boulevard Tract as a single-family residential area. The rambling hostelry was the first indication of the Wilshire Boulevard's future as the address for some of the city's most sumptuous apartment-hotels erected between the World Wars. In fact, beginning as early as the late 1910s, the tract's success attracted speculators who eventually purchased many of the tract's original single-family residences. In most cases, grand multi-level apartment houses replaced the original residences. Wilshire Boulevard addresses were prominent in society columns of the period.

The Southern California population boom of the 1920s ushered in a new era for Wilshire Boulevard, particularly between Hoover Street and Western Avenue. The area's dramatic evolution during this period was the result of many factors, including the relaxation of single-family residential building restrictions, commercial expansion, the establishment of numerous houses of worship along Wilshire Boulevard, and the impact of the automobile on urban form. As the city continued expanding to the west, Wilshire Boulevard was the beneficiary of over a decade of explosive growth. During the 1920s, commercial real estate values in the survey area soared and Wilshire Boulevard gained its moniker, "Fifth Avenue of the West." An array of newly built commercial buildings and their associated neon signs began to visually define the survey area from its surroundings. In 1921, the Ambassador Hotel was opened on an enormous 23-acre parcel of land between Wilshire Boulevard and 8th Street. Designed by renowned local architect Myron Hunt and immediately hailed as one of the west's grandest resorts, the recently demolished Ambassador became the site of some of the region's most momentous events. Tourists and locals alike flocked to experience the high-end area's numerous multi-story apartment buildings and emerging shopping district that emulated the glamour of New York's Fifth Avenue high rises—specifically, the Asbury, the Langham (1928), the Talmadge (1922), and the Windsor (1927). Urban beautification efforts during this period included a 1927 plan by the Wilshire District Chamber of Commerce, which sought to distinguish Wilshire Boulevard as "one of the most unique commercial thoroughfares in the world." The ambitious landscape design consisted of a combination of trees, ornamental gratings and guards, and decorative sidewalk tiles.

While the commercial decentralization out of downtown Los Angeles began in the early 1920s, it wasn't until the late 1920s and 1930s that commercial centers west of downtown, like Wilshire Boulevard, became true retail destinations. With the increased use of the automobile and a growing residential population near Wilshire, developers touted Wilshire Boulevard's diverse selection of department stores and wide, auto-oriented streetscape. By the 1920s, architecture in Los Angeles at every scale – from the grandiose to the mundane – drew from European precedents and only eventually acquired unique nuances based on myriad influences. Hollywood's most famous export created a permissive, open-minded, and pioneering atmosphere in the built environment of the city at-large. In addition to Spanish and Mediterranean Revival styles, the French Renaissance, Tudor, and Chateausque styles became an additional source of aesthetic inspiration in production design and architecture. Furthermore, the names given to apartment buildings, such as the St. Germaine and Chalfonte, evoked legitimacy, along with allusions to European aristocracy and quaint village life. The illuminated neon signs that became signature features of buildings in the survey area helped make such monikers more visible, and thus furthered the cultural and social aspirations of their inhabitants.

Period of Significance

The period of significance for The Piccadilly is defined as 1929 for its significance as a notable example of the Chateausque style by architect Milton M. Friedman.

Integrity

The Piccadilly Apartments retains a high degree of integrity, and is mostly unaltered.

Location: The subject property is in its original location and therefore retains this aspect of integrity.

Design: The subject property retains most of its character-defining features from its period of construction, including its complex roofline, castle-like follies, gothic arches, tracery, turrets, quoins, and quatrefoils, and therefore is able to convey its historic significance as a Chateausque residential building. The building's overall massing, configuration, and character-defining decorative elements remain. Therefore, the building retains integrity of design.

Setting: The property is located in Wilshire Center. Although it is now mostly surrounded by modernism, the prominence of the building, and its rooftop sign are still obvious from Wilshire Blvd. Furthermore, the color and texture palette of Central Plaza is complimentary to The Piccadilly, and the coexistence of modernism with period revival is essential to an understanding of Wilshire Center. The building retains integrity of setting.

Materials: The property retains the majority of its materials from its initial construction, therefore this element of integrity remains intact.

Workmanship: The building's original workmanship is still evident through its overall construction methods and materials. The building retains this element of integrity.

Feeling: The original character-defining features still remain, presenting the same basic appearance from the street as when it was built. No major alterations have occurred. The building retains integrity of feeling.

Association: The property has been continuously used as a multi-family residence since its construction in 1929. It is just as recognizable today as a 1920s residential building that is directly linked with this period of development in Wilshire Center. Therefore, it retains integrity of association.

B10. Statement of Significance (continued): legitimacy, along with allusions to European aristocracy and quaint village life. The illuminated neon signs that became signature features of buildings in the Wilshire Corridor area helped make such monikers more visible, and thus further these cultural and social aspirations. The best examples of this style are located in the Pellissier Square Tract area, and can be seen in a variety of forms and types.

While architects and designers in Los Angeles during the first decades of the twentieth century borrowed heavily from established European traditions, non-European and "exotic" places also captured the public imagination. An architecture of fantasy then emerged from eclectic sources, and Los Angeles proved to be fertile ground for testing these experiments.

Despite the widespread popularity of period revival and exotic styles, detractors dismissed the entire city as a back lot simulacrum. Modernist architect Richard Neutra "blamed" the motion picture industry for the proliferation of period revival architecture. Carey McWilliams offered a more generous explanation: "Lacking socially prominent first families or deeply rooted social traditions, Los Angeles quickly adopted the motion-picture elite as its arbiters of taste and style. Although the movie elite moved in a world of their own, this world was all the more conspicuous for having the spotlight riveted on its isolated, stage-like gyrations. Hence the movies came to set the tone of opinion in style and taste, manner of living, and attitudes. In other words, Los Angeles imitated Hollywood."

Theme: Apartment Streetcar Suburbs, 1906-1945

When Henry E. Huntington established the Pacific Electric Railway Company in 1901, it was as much a real estate concern as a transportation corporation. Within ten years, its fleet of hundreds of cars and aggressive real estate activities helped propel the city's expansion. The dovetailing of land subdivision, sales, transportation infrastructure, and economic development made Huntington among the wealthiest Los Angeles area residents. Rail lines were used to promote and sell tracts of land, though the latter eventually wound up subsidizing the former. Huntington's system also included the preexisting Los Angeles Railway Company (the "Big Yellow Cars"), which were incorporated into the vast interurban system of P.E.'s "Big Red Cars." The P.E. merged with the Southern Pacific Railroad upon Huntington's sale of his company and retirement. Ridership peaked in the mid-1920s, and the system began its slow, inexorable decline in the 1930s. Railway lines along West Sixth Street, West Eighth Street, Ninth Street, Western Avenue, and Vermont Avenue serviced the survey area.

Agency Takes a Shine to Neon Sign Project

The memory of Los Angeles' days of urban glory will glow a little more brightly with the Community Redevelopment Agency's funding of the restoration of four old neon signs in the **Wilshire Center**.

The historic rooftop signs with such grand names as the Piccadilly Apartments and the Gaylord Apartments will be restored in time for a planned neighborhood New Year's Eve celebration. The CRA's approval last week of the \$95,000 project is part of a city effort to restore 12 neon signs in the area.

Business owners, apartment owners and residents in the Wilshire Center and Koreatown area are working with the CRA to revitalize the neighborhood and hope the city will approve the creation of a redevelopment zone later this year. The neon signs will help create "a distinctive character and an attractive place for businesses to locate," said Cooke Sunoo, a CRA project manager

...

NEW HOPE: On the site of a print shop destroyed during the 1992 riots, a non-profit developer is constructing a 46-unit housing complex, slated to be completed by the fall of 1996.

"Every family has the same desire for suitable housing for themselves and their children," said Bishop Ralph Leon, chairman of the Interdenominational Community Development Corp.

The corporation has coordinated the \$6.9-million development deal to provide housing and services in the **South-Central** area, said Chris Steins, the acting executive director of the organization.

Funding will come from a variety of public and private sources, including tax credits and banks.

The Adams Congress Apartments will provide affordable housing at sliding-scale rates for units ranging in size from one to four bedrooms.

Unlike larger housing projects, the complex will be run by a tenants association, Leon said.

LANDMARK -The Picadilly Apartments, a Los Angeles fixture since 1930, has just been refurbished by Mark Finfer, a retired Chicago architect who purchased the building last year.

Renewal Preserves Picadilly's Charm

The Picadilly Apartments, a Los Angeles residential landmark since it was completed in 1930, has been completely refurbished by owner Mark Finfer and Moss & Co., property managers for the 74-unit building.

The seven-story structure is located at 682 Irolo St., a block west of the Ambassador. Finfer, a retired Chicago architect who lives in Los Angeles, said that some of the residents have lived in the building since it was built. There is only one vacancy, he said.

Despite the renovation, which included a new security system, central sprinklers and painting, Finfer said that rents for the apartments have been kept down. They range from \$110 to \$320 a month for the efficiency, one- and two-bedroom apartments, he added.

The tenant mix is completely different from that of the garden apartments that the Moss firm manages, according to Ron Tamkin, president of the property management division. He attributes this to the location and character of the Picadilly.

Future plans call for turning the building's basement dining room—unused since the Picadilly stopped serving meals to its tenants—into an art gallery or photography studio, Finfer said. He even has plans to build a penthouse suite where the dusty and cluttered attic now is.

"I have a dream to turn the building into the special kind of place it used to be, but updating it to work with today's life-styles," he said.

BUILDING PACE MARKS AVENUE

*District on Western Reports
\$1,500,000 Activity*

*Apartments and Store Units
Comprise Projects*

*Property Along Thorough-
fare Also Changes Hands*

Western avenue, throughout its Hollywood area, shows increasing building activity, according to a survey recently made by the Hollywood branch, Los Angeles Realty Board.

Hotels, apartments and store buildings recently completed or in process of erection on Western avenue or in the immediate vicinity, total more than \$1,500,000. El Paula Holding Company is building a four-story, 203-room store and apartment at 1660-70 North Western avenue, costing \$600,000. Francis Murphy recently completed a four-story, ninety-six-room apartment at 5426 Virginia avenue, on which the investment is said to be \$200,000. Fox studios have made many improvements, with a new front on Western avenue.

J. E. Green is just completing a \$150,000 brick hotel building at 5638-42 Santa Monica Boulevard. This hotel has been leased to Horn & Gilbert, who own and operate four other hotels in the city. Mr. Green has also leased the store at 5634 Santa Monica Boulevard to Morrison & Co.

Western and Santa Monica Boulevard is a busy traffic center. A recent count was made showing that 3782 automobiles pass that intersection each hour during the day.

The Bank of Italy is remodeling its new home at the northeast corner of Western and Santa Monica Boulevard and will soon join the Pacific Southwest and Security banks at this strategic point. P. A. BeHannesey recently acquired a ninety-nine-year lease on the southeast corner of Virginia and Western. With an enlarged stock to meet increasing demand for handsome furnishings, Mr. BeHannesey is now occupying the entire building and plans to improve the site with at least an eight-story building at a later date.

The northwest corner of Western and Melrose avenues has changed hands twice recently. The southwest corner of Western and Clinton avenue also recently changed ownership. On Melrose, near Western, Riesenbergs & Lentzner are completing a brick hotel. Joseph H. Miller is building a four-story brick hotel and apartment building at 5128 Marathon avenue.

DEPARTMENT OF BUILDING AND SAFETY

Application for the Erection of Buildings

CLASS "B" "Fdn Only"

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

CITY OF LOS ANGELES
DEPARTMENT OF BUILDING AND SAFETY
BUILDING DIVISION

Application to Alter, Repair or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

CITY OF LOS ANGELES
DEPARTMENT OF BUILDING AND SAFETY
BUILDING DIVISION

Application to Alter, Repair, Move or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the descriptions and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the granting of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

DECLARATIONS AND CERTIFICATIONS

LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date 12/24/85 Lic. Class C-10 Lic. Number 436126 Contractor David Rastegari (Signature)

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).☐ I am exempt under Sec. _____, B. & P. C. for this reason _____

Date _____ Owner's Signature _____

WORKERS' COMPENSATION DECLARATION

18. I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.).

Policy No. 1029224 Insurance Company STATE FARM

☐ Certified copy is hereby furnished.☐ Certified copy is filed with the Los Angeles City Dept. of Bldg. & Safety.

Date 12/24/85 Applicant's Signature David Rastegari

Applicant's Mailing Address _____

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

19. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

Date _____ Applicant's Signature _____

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

20. I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____ Lender's Address _____

21. I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

I realize that this permit is an application for inspection, that it does not approve or authorize the work specified herein, that it does not authorize or permit any violation or failure to comply with any applicable law, that neither the city of Los Angeles nor any board, department, officer or employee thereof make any warranty or shall be responsible for the performance or results of any work described herein or the condition of the property or soil upon which such work is performed. (See Sec. 91.0202 LAMC)
