GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/27/2021	Source: EPA
Date Data Arrived at EDR: 05/03/2021	Telephone: N/A
Date Made Active in Reports: 05/19/2021	Last EDR Contact: 06/29/2021
Number of Days to Update: 16	Next Scheduled EDR Contact: 10/11/2021
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2021	Source: EPA
Date Data Arrived at EDR: 05/03/2021	Telephone: N/A
Date Made Active in Reports: 05/19/2021	Last EDR Contact: 06/29/2021
Number of Days to Update: 16	Next Scheduled EDR Contact: 10/11/2021
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/27/2021

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 04/27/2021	Source: EPA
Date Data Arrived at EDR: 05/03/2021	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Number of Days to Update: 79	Next Scheduled EDR Contact: 10/04/2021
	Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Elevation:	201 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5630741 HOLLYWOOD, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06037C1620F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06037C1605F	FEMA FIRM Flood data

06037C1615F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
HOLLYWOOD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
J150	1/2 - 1 Mile NNW	Not Reported
152	1/2 - 1 Mile ENE	SW
169	1/2 - 1 Mile South	Not Reported
1G	1/2 - 1 Mile NNW	Not Reported
2G	1/2 - 1 Mile ENE	SW
3G	1/2 - 1 Mile South	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: sandy loam
 gravelly - sandy loam
 silt loam
 clay
 fine sand
 gravelly - sand
 sand
 fine sandy loam

Surficial Soil Types: sandy loam
 gravelly - sandy loam
 silt loam
 clay
 fine sand
 gravelly - sand
 sand
 fine sandy loam

Shallow Soil Types: fine sandy loam
 gravelly - loam
 sandy clay
 sandy clay loam
 clay
 silty clay
 sand

Deeper Soil Types: gravelly - sandy loam
 sandy loam
 very gravelly - sandy loam
 stratified
 very fine sandy loam
 weathered bedrock
 sand
 gravelly - fine sandy loam
 silty clay loam
 clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Subject: Phase II, Supplemental Environmental Site Assessment
Address: 3355 W. Olympic Boulevard &
991 St. Andrew Place
Los Angeles, CA 90019

Dear **Mr. Amy Lee**,

On behalf of **Bandus Holdings** (the client), Environ Phase Consulting Co. (EPC) completed a Phase II, Supplemental Environmental Site Investigation (ESI) at the above referenced site property in accordance with the scope of work presented in July 6, 2021 Phase II ESI proposal.

We appreciate the opportunity to assist you with this project. If you should have any questions or concerns regarding this report, or if we can be of any further service to you in the future, please do not hesitate to contact Jeff Lee at 213-250-0411.

Best Regards,

Allen Shim, P.E.

EXECUTIVE SUMMARY

The subject site is located at the northwest corner of Olympic Boulevard and St. Andrews Place in city of Los Angeles, California. The subject site consists of parcel number 5081-033-010 and 581-033-009 totaling approximately 0.37 acres (approx. 16,117 square feet). Auto repair shop known as Joy Auto Center occupied at the southern portion (3355 W. Olympic Bl) and Wiz Island Nursery School occupied at the northern portion (989 S. St. Andrews Place) of the site.

The purpose of the Phase II Supplemental Environmental Site Assessment (ESA) activities was to investigate the potential for contaminants is impact to the subject site from recognized environmental conditions (RECs) identified in a Phase I Environmental Site Assessment (ESA) Report prepared for the subject site by EPC.

Review of the soil, subsurface soil vapor, and indoor/ambient air sample analytical results throughout the site indicated that there is no significant hazardous contamination at the subject site therefore; the site is “no further action” from environmental engineering is merit for the subject site as following reasons:

- Former USTs: Based on the historical sources of the previous environmental site assessments, in 1968, all USTs were removed from the subject site. Based on lack of the former USTs closure records, a geophysical survey was performed at the site by Socal Locators. Geophysical survey using GPR is available to characterize the shallow subsurface conditions of soil excavation, UST, and associated piping locations. In this report, EPC summarized the result of the geophysical survey conducted on July 28, 2021 by Socal Locators. The geophysical survey did **not** find evidences of remaining USTs at the building and parking lot of the site (see [Appendix-1](#)).
- Previous Site Assessments:
 - A Phase II Environmental Site Assessment (ESA) was performed by WEECO in 2006. Reportedly, soil samples were collected at the existing parking lot at 3355 W. Olympic Boulevard. Based on the analytical results of the previous Phase II, the previous gasoline station was considered a historical recognized environmental condition (HREC). No recognized environmental condition (REC) or environmental issues were found in connection with the subject site. Therefore, WEECO recommended no further investigation of the subject site.
 - On September 25, 2020, an *Indoor Air and Soil Vapor Assessment report* was prepared by EBI Consulting (EBI) for the property located at 989 South St. Andrews Place. EBI was requested to conduct an indoor air and soil vapor assessment to evaluate the potential impact to the subject site from auto repair activities involving the use of solvents and petroleum products since 1968. PCE was detected in the three of the five samples at concentrations up to 13 µg/m³. Based on the findings, EBI concluded that significant subsurface impacts related to the historical use of chlorinated solvents at the former auto repair facility were not identified beneath the subject site of 989 S. St. Andrews Place. Additionally, PCE was not identified in the sub-slab soil vapor beneath the site at concentrations that pose an unacceptable vapor intrusion

threat to indoor air at the site and chlorinated solvents were not identified in the indoor air at the site. Therefore, EBI conclude that no further action was recommended.

- Supplemental ESA by EPC: A total of eighteen (18) soil samples collected from five (5) soil borings were selected to assess the REC previously identified during this supplemental ESA. Then, soil samples were analyzed for TPH-g/d/o, oxygenated/chlorinated VOCs, total lead, and PCBs. Positive Lab reported the soil analytical results as shown in Appendix-3. Analytical lab results are summarized in Table-1 and Figure-3 along with comparisons to Environmental Screening Levels (ESLs). Based on the soil analytical results of the subject site, EPC concludes that no further investigation is warranted at this time. Review of the soil analytical results indicates the following:

- The maximum concentrations of TPH-g, TPH-d, and TPH-o were revealed at B2-10 which had a concentration of 6.03 mg/kg (TPH-g), 1,870 mg/kg (TPH-d), and 23,200 mg/kg (TPH-o), respectively. The maximum concentrations of fuel VOCs were revealed at 22.7 µg/kg (benzene), 497 µg/kg (toluene), 547 µg/kg (ethylbenzene), and 4,080 µg/kg (total xylene). Except for TPH-d/o, the detected concentrations of TPH-g and fuel VOCs did not exceed the LARWQCB Table 4-1 Maximum Soil Screening Levels for UST Closure Criteria with clayey silt soil and distance above groundwater between 20' and 150' below ground surface (bgs).

Continuously, non-detectable levels of TPH-g/d/o and fuel VOCs were indicated in B1 and B2 at depths of 20 and 30 feet bgs. Thus, the detected concentrations of TPH-d/o and VOCs at the B1-10 and B2-10 are de minimis condition. Furthermore, the subject site is deemed to meet the criteria outlined in the Low-Threat Closure Policy (State WRCB, effective August 17, 2012).

- A total of five (5) soil samples (B1-5, B2-5, B3-5, B4-5, and B5-5) collected at 5 feet bgs of the each borehole were tested for total lead (pb). Analytical laboratory results of total lead were detected ranging from 4.66 to 23.31 mg/kg. The detected lead concentrations did not exceed its Tier 1 ESL (32mg/kg).
 - In addition, five (5) soil samples collected near the inactive in-ground hydraulic hoists were tested for polychlorinated phenyls (PCBs) via USEPA Analysis Method 8082. Non-detectable levels of polychlorinated phenyls (PCBs) were indicated in soil samples.
 - The soils beneath the subject site consist of silty sand and clayey silt to a maximum depth investigated 30 feet bgs during this supplemental ESA. No groundwater was encountered during our soil borings. No wells such as producing, monitoring, vapor treatment wells are known to exist in the subject site. Depth to groundwater is expected below 50~60 feet bgs at the subject site.
- Soil Vapor Assessment by EPC: On July 28, 2021, three (3) soil vapor sampling was performed by hydraulically pushing soil gas probes (AMS) to a depth of 5 feet bgs.

Soil vapor samples (SV1-5, SV2-5, and SV3-5) were immediately delivered to Positive Laboratory (i.e., certified lab by Environmental Laboratory Accreditation Program). Then, the soil vapor samples were analyzed with a 6-hour sample holding time. Concentrations of oxygenated/chlorinated VOCs were not detected above laboratory method detection limits (MDLs) via USEPA method 8260B.

- Re-evaluation: Based on the Indoor Air and Soil Vapor Assessment (see Appendix-4) previously performed by EBI in September 2020, Sub-slab and indoor air samples were collected at 989 South St. Andrews Place. Reportedly, a maximum concentration of PCE was detected at $13 \mu\text{g}/\text{m}^3$ collected from sub-slab soil vapor sample SSV-2. The detected concentration of PCE did not exceed its ESL Tier 1.
- Re-evaluation: Maximum incremental lifetime carcinogenic risk and noncancer hazard quotient levels collected from a maximum gas phase PCE analytical result (**$13 \mu\text{g}/\text{m}^3$**) obtained from the previous assessment report (EBI, 2020) were calculated at $5.31\text{E-}10$ and $2.22\text{E-}04$, respectively. The carcinogenic risk of PCE is evaluated below the residential risk threshold of $1.0\text{E-}06$ and commercial/industrial risk threshold of $1.0\text{E-}05$.
- Low levels of petroleum hydrocarbons generated from the former UST operation were identified within the limited boring location B1 and B2 at a depth of 10~15 feet bgs during this supplemental investigation. If conversion of the subject site to a more sensitive land use (i.e., residential use) or underground parking structure construction is planned, the hydrocarbon contaminated soils should be removed to a certified recycling facility to protect construction workers during soil grading and excavation.

1.0 BACKGROUND

1.1 Geographic Setting

The subject site is located at 3355-3365 West Olympic Blvd. and 989 South St. Andrews Place in city of Los Angeles, California. The subject site's physical location is found employing a United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle (Quad) Map relevant to the subject property. The USGS 7.5 Minute Quad Map has an approximate scale of 1 inch to 2,000 feet, and shows physical features with environmental significances such as wetlands, water bodies, roadways, mines, and buildings. The subject site is located within 34.05294 north latitude and 118.31138 west longitude. Topographic map is presented in **Figure-1**.

1.2 Subject Site Description

The subject site is located at the northwest corner of Olympic Boulevard and St. Andrews Place in city of Los Angeles, California. The subject site consists of parcel number 5081-033-010 and 581-033-009 totaling approximately 0.37 acres (approx. 16,117 square feet). Auto repair shop known as Joy Auto Center occupied at the southern portion (3355 W. Olympic Bl) and Wiz Island Nursery School occupied at the northern portion (989 S. St. Andrews Place) of the site.

The northern half of the subject site, addressed as 989 South St. Andrews Place, is occupied by a preschool under the name Wiz Island. The 3,422 square-foot, two-story with basement, preschool building is developed at the central portion of the northern half of the subject site. A recreation room is developed at the northwest corner of the subject site. Adjacent to west and south of the preschool building is improved with a backyard playground. Adjacent to north and east of the preschool building is a driveway, walkway, and front lawn.

The southern half of the subject site, addressed as 3355 West Olympic Boulevard, is occupied by an auto repair shop and tire shop under the names Joy Auto Center and CA Tire, respectively. The 2,760 square-foot, one-story, automotive commercial building is developed at the northern portion of the southern half of the subject site. The commercial building consists of six (6) auto bays and three (3) aboveground hydraulic hoists. Additionally, five (5) inactive underground hydraulic lifts (hoists) were observed within the auto repair shop. Adjacent to west auto bays is a vacant storage room, previously used as a tire storage room. Adjacent to east of the auto bays is an office space. The remaining portions of the southern half of the subject site consists of a asphalt paved lot. See **Figure-2** for site configuration.

The immediately surrounding properties consist of St Andrews Place to the east followed by Kim's Smog Test Shop; residential apartment to the north; vacant building (former restaurant) to the west; and Olympic Boulevard to the south followed by Woori America Bank.

1.3 Historic Uses

According to historical sources (e.g., building permit records, historical aerial photographs, historical fire insurance maps, historical tenant search, and etc.), the northern half of the subject site was undeveloped from as early as 1907 to 1921. In 1923, the northern half was developed with present-day buildings. At that time, the present-day buildings were occupied as a residence and garage. In 1988, the residence was converted to present-day daycare and preschool. In 2011, the garage was converted to present-day recreation room.

The southern half of the subject site was undeveloped in 1907. From 1913 to 1940, a residential dwelling and garage were developed. In 1940, the buildings were demolished and the southern half of the subject site was redeveloped with a gasoline station in 1940. In 1968, the gasoline station was demolished and three underground storage tanks (USTs), including two 1,000-gal and one 1,500-gal gasoline, were removed from the subject site. In 1968, the site was redeveloped with present-day automotive commercial building. In 2016, the present-day storage room, adjacent to west of the commercial building, was developed. From 1968 to present-day, the site has operated mainly for automotive purposes including auto repair shop, auto body shop including auto painting, and tire shop.

1.4 Previous Environmental Assessments

EPC has performed a Phase I Environmental Site Assessment (EPC, 2021) in conformance with the scope and limitations of ASTM Practice E1527-13 of the subject site on August 4, 2021. The subject site was likely recognized environmental conditions (RECs) as following reasons:

- Five (5) inactive subsurface hydraulic hoists were observed within the auto repair shop. It is unknown when the hydraulic hoists were installed and may have been installed in 1968 when the auto repair shop building was first developed in 1968. Based on the potential age of the hydraulic hoists (53 years), EPC is unable to rule out the potential that a release to the subsurface of the subject site has occurred from the inactive hydraulic hoists. The hydraulic hoists are considered RECs.
- Significant oil stains indicative of a spill or leak was observed within the auto repair shop. The stains could be associated with small spills and leaks that have accumulated throughout the duration of the auto repair shop operation at the subject site since 1968. It is unknown whether the oil stains observed may have impacted the subsurface of the subject site; therefore, the oil stains are considered a recognized environmental condition (REC).
- On May 8, 2018, a *Phase I ESA* was prepared by WEECO for the property located at 3355-3365 West Olympic Boulevard and 991 St. Andrews Place. At that time, the subject site's commercial building was occupied by auto and motor repair tenants included CA Tire, Joy Auto Center, and Pro Dent Away. A previous Phase II ESA (see **Appendix-4**) performed by WEECO in 2006 was found in the Phase I ESA report. However, attachments such as soil boring log, soil boring location map, and laboratory report were not found in the Phase I report. Based on the analytical results of the previous Phase II ESA, the previous gasoline station was considered a historical recognized environmental

condition (HREC). No recognized environmental condition (REC) or environmental issues were found in connection with the subject site. Therefore, WEECO recommended no further investigation of the subject site.

EPC's Analysis of WEECO's Phase II Environmental Site Assessment:

Based on the report, soil samples were collected at the existing parking lot at 3355 W. Olympic Boulevard. However, based on a site drawing found within a building permit record from June of 1968, the USTs that were removed in 1968 were located within the interior of the western portion of the auto repair shop. Therefore, EPC recommends a supplemental environmental site investigation at the location of the former USTs.

- On September 25, 2020, an Indoor Air and Soil Vapor Assessment report was prepared by EBI Consulting (EBI) for the property located at 3355 West Olympic Boulevard and 989 South St. Andrews Place. EBI was requested to conduct an indoor air and soil vapor assessment to evaluate the potential impact to the subject site from auto repair activities involving the use of solvents and petroleum products since 1968.

EBI installed three (3) interior sub-slab vapor probes (SV-1 through SV-3) in the basement of the daycare facility building and two (2) interior sub-slab vapor probes (SV-4 and SV-5) in the floor of the smaller classroom building at 989 S. St. Andrews Place. One soil vapor sample was collected from each vapor probe location and analyzed for Volatile Organic Compounds (VOCs) and the liquid tracer 1,1-DFA by EPA Method TO-15. Additionally, five indoor air samples (IA-1 through IA-5) and one ambient air sample (AA-1) were collected at the site and also analyzed for VOCs by EPA Method To-15. Soil vapor sampling locations are illustrated in **Figure-4**.

The results of the analyses of the sub-slab soil vapor samples indicated that no VOCs were detected at concentrations exceeding the laboratory method detection limits except tetrachloroethene (PCE). PCE was detected in the three of the five samples at concentrations up to 13 micrograms per cubic meter $\mu\text{g}/\text{m}^3$. The maximum concentration found for PCE, at 13 $\mu\text{g}/\text{m}^3$, was below the Department of Toxic Substances Control's Screening Levels (DTSC-SLs) for PCE in residential and commercial soil vapor at 15 and 67 $\mu\text{g}/\text{m}^3$, respectively. The indoor air sample results of analyses indicated that no VOCs were detected at concentrations exceeding the laboratory method detection limit.

Based on the findings, EBI concluded that significant subsurface impacts related to the historical use of chlorinated solvents at the former auto repair facility were not identified beneath the subject site of 989 S. St. Andrews Place. Additionally, PCE was not identified in the sub-slab soil vapor beneath the site at concentrations that pose an unacceptable vapor intrusion threat to indoor air at the site and chlorinated solvents were not identified in the indoor air at the site. Therefore, EBI conclude that no further action was recommended.

EPC's Analysis of EBI's Indoor Air and Soil Vapor Assessment:

Based on the report, soil vapor samples were collected only at the present-day daycare facility at 989 S. St. Andrews Place. No soil vapor samples were collected at the auto

repair shop at 3355 W. Olympic Boulevard. EPC recommends a supplemental subsurface site investigation at the auto repair shop to assess whether historical and current auto repair activities, such as the use of chlorinated solvents, petroleum products, spray paint booths, have significantly impacted the subsurface of the subject site.

- EPC did **not** identify controlled recognized environmental conditions during the course of this assessment.

2.0 SCOPE OF THE SUBSURFACE INVESTIGATION

The purpose of the Phase II, Supplemental Environmental Site Assessment (ESA) activities was to investigate the potential for contaminants {i.e., chemicals of concern (COC) are petroleum hydrocarbons, oxygenated/chlorinated solvent associated VOCs, total lead, and PCBs} is impact to the subject site from the *recognized environmental conditions* (RECs) identified in August 4, 2021 Phase I Environmental Site Assessment (ESA) Report prepared for the subject site by EPC.

In summary, this Phase II ESA included the following elements:

- Dig Alert Notification
- Geophysical Survey
- Advancement of soil borings and the collection of soil samples.
- Laboratory chemical analysis of soil gas samples.
- Comparison of soil analytical results to ESL Tables {San Francisco Bay Regional Water Quality Control Board, 2019 (Rev. 2)}

2.1 Site-Specific Health & Safety Plan

A site specific health and safety plan was notified and reviewed by all persons involved with this subsurface investigation prior to the commencement of boring and sampling activities conducted at the subject site.

2.2 Pre-drilling Activities

- Site-specific Health and Safety Plan, Boring Plan, and Work-Schedule were prepared under the supervision of Mr. Allen Shim (Registered Civil Engineer).
- On July 28, 2021, Socal Locators, who was hired as a subcontractor by EPC, conducted a geophysical survey using GSSI Utility Scan Ground Penetrating Radar (GPR) and Electro-Magnetic Transmitter & Receiver at the site. Also, all soil boring locations were confirmed using GPR survey prior to machine boring to protect underground utility lines. Per a geophysical survey by Socal Locators, the survey did **not** find evidences of remaining USTs at the building and parking lot of the site (see [Appendix-1](#)).

2.3 Field Investigation

Prior to advancing the borings, the property Owner/User, where drilling would be performed, was notified of the work schedule. A site-specific Health and Safety Plan was prepared and field safety meeting was held among field personnel and drilling crew prior to the start of drilling.

2.3.1 Soil Sampling Methodology

Soil samples were handled, visually inspected, screened, and preserved for laboratory analysis in accordance with industry standard practices as follows:

- On July 28, 2021, West End Environmental Sampling Company was attained by EPC to advance six soil borings to a maximum depth of 30 feet bgs using a direct push rig (Geo Probe). Then, soil samples were collected at 5-foot intervals beginning at 5 feet bgs. Geo Probe rigs will be driven extensions to insert a steel soil probe tip to the desired sampling depth. 5-foot interval soil samples collected from 3/4" diameter by 24" long plastic liners will be cut approximately 7~8 inch long. Then, both ends of the sample liners will be immediately sealed by Teflon film and capped. The first part was processed for laboratory analysis. The second part was placed into a plastic, sealable container for field headspace screening using a photoionization detector (PID). Based on PID readings, soil samples were analyzed for Total Petroleum Hydrocarbons as gas, diesel, and oil (TPH-g/d/o) by USEPA method 8015B and oxygenated/chlorinated Volatile Organic Compounds (VOCs) by USEPA method 8260B. Prior to sample screening, the PID was field-calibrated with a 100 parts per million isobutylene standard according to the manufacturer's specifications. Soil boring locations are illustrated in Figure-2. A summary of the soil boring procedure is as follows:

Boring No.	Max. Depth to Boring	Location	Analysis Method	Sample Analysis Intervals
B1	30 ft	near inactive underground hoist	TPH-g/d/o by USEPA 8015B; VOCs by USEPA 8260B; total lead by USEPA 6010B; & PCBs by USEPA 8082	Soil Sampling: soil samples collected at 5 foot intervals. Analysis: 5 samples (B1-5, B1-10, B1-15, B1-20, & B1-30)
B2	30 ft	near inactive underground hoist	TPH-g/d/o by USEPA 8015B; VOCs by USEPA 8260B; total lead by USEPA 6010B; & PCBs by USEPA 8082	Soil Sampling: soil samples collected at 5 foot intervals. Analysis: 4 samples (B2-5, B2-10, B2-15, & B2-30)
B3	20 ft	former USTs and inactive underground hoist	TPH-g/d/o by USEPA 8015B; VOCs by USEPA 8260B; total lead by USEPA 6010B; & PCBs by USEPA 8082	Soil Sampling: soil samples collected at 5 foot intervals. Analysis: 3 samples (B3-5, B3-10, & B3-20)
B4	20 ft	former USTs and inactive underground hoist	TPH-g/d/o by USEPA 8015B; VOCs by USEPA 8260B; total lead by USEPA 6010B; & PCBs by USEPA 8082	Soil Sampling: soil samples collected at 5 foot intervals. Analysis: 3 samples (B4-5, B4-10, & B4-20)
B5	20 ft	former USTs	TPH-g/d/o by USEPA 8015B; VOCs by USEPA 8260B; total lead by USEPA 6010B; & PCBs by USEPA 8082	Soil Sampling: soil samples collected at 5 foot intervals. Analysis: 3 samples (B5-5, B5-10, & B5-20)

- Following infield preservation, all soil samples were visually inspected in the field by an EPC engineer and classified according to color, texture, and relative moisture content.

Visual evidences of staining and/or distinct odors were also noted if present. Results of the visual odorous examination were recorded on standard boring logs ([Appendix-2](#)).

- Samples were collected in accordance with ASTM D 6286 methodology. Sample tooling was decontaminated with an Alconox® detergent wash and tap water rinse before initiating investigative activities and prior to each sample interval. All samples were handled with minimum contact and gloved hands. New, disposable, vinyl gloves were used to handle each sample.
- Soil samples were immediately sealed, labeled, and placed into an insulated ice chest pending submission under chain-of-custody documentation to Positive Laboratory [i.e., certified lab by Environmental Laboratory Accreditation Program (ELAB)] for chemical analyses.

2.3.2 Grab Groundwater Sampling Methodology

Groundwater was not encountered at a maximum depth of 30 feet bgs. Thus, no groundwater sample was collected during this assessment.

2.3.3 Soil Vapor Probe Installation and Sampling

On July 28, 2021, three (3) soil vapor sampling was performed by hydraulically pushing soil gas probes (AMS) to a depth of 5 feet bgs. An electric rotary hammer drill was used to drill a 3/8-inch diameter hole to allow soil vapor probe placement when required. Each soil vapor probes were allowed to equilibrate for minimum 2 hours after installation prior to soil vapor sampling. Purging and sampling was performed using a pump set to draw 100~200 ml/min of soil vapor at a maximum vacuum of 100-inch of water. The air pump was attached to the vapor probe with tubing and the soil vapor was drawn into a brand-new Tedlar bag. New tubing and Tedlar bag were used at each probe to prevent cross contamination. Soil vapor samples (SV1-5, SV2-5, and SV3-5) were immediately delivered to Chemtek Environmental Laboratory (i.e., certified lab by Environmental Laboratory Accreditation Program). Then, the soil vapor samples were analyzed with a 6-hour Tedlar bag sample holding time.

All sample probes produced adequate flow. The leak compound was not detected above the reporting limit in all soil vapor samples. Representative soil vapor samples were collected under the three air volume purging, tracer test, and shut-in test by EPC. Leak tests were performed using 1, 1-Difluoroethane at each sample probe to determine if any leaks existed in the vapor probe. The presence of 1, 1-Difluoroethane at or above 0.150ug/l was reported in compliance with the Active Soil Gas Investigation Advisory, July 2015.

A summary of the installation procedure is as follows:

Soil Vapor #	Probe Depth (ft)	Matrix	Method	Sample Analysis Intervals
SV1-5 SV2-5 SV3-5	5	air	VOCs by USEPA 8260B	Three samples collected from three vapor probes were analyzed.

2.3.4 Methane Gas Survey

The subject site lies within the non-methane zone as defined by the City of Los Angeles Department of Building and Safety (LADBS). Thus, methane gas survey did not proceed at the site.

2.3.5 Decontamination

Gloves were changed after each sample, and all sampling equipments were washed in a non-phosphate detergent (Liquinox solution) and triple rinsed to prevent cross contamination of the soil vapor samples. Cutting soil was not generated during our soil borings and sampling.

2.3.6 Backfill and Plug

Upon soil vapor sampling, all boreholes were grouted to the surface with 5% bentonite and cement grout in accordance with minimum standards for borehole abandonment (DWR, 1990). Thereafter, the surfaces of the borings were patched with asphalt/concrete pavement.

3.0 GEOLOGY & HYDROLOGY INFORMATION

The site is located within the Coastal Plain of Los Angeles Groundwater Basin, Central Subbasin. The Los Angeles Basin is an alluviated, coastal lowland plain bordered on the north, northeast, east, and southeast by mountains and hills, and transacted by numerous faults (Yerkes et al., 1965; Norris and Webb, 1976).

The site is located at an elevation of 198 feet above MSL, and the local topography slopes toward the southwest (Figure-1). Surface waters in the site vicinity drain as part of the watershed of 8th Street. No bodies of surface water are located within 1 mile of the site (Figure-1).

Soil in the site vicinity consists of Recent alluvium and Upper Pleistocene deposits of the Lakewood Formation to an estimated 150 feet below ground. The upper portion of the Lakewood Formation contains the regional Exposition Aquifer (CDWR, 1961).

Source:

California Department of Water Resources (DWR), 1961, Planned Utilization of the Ground Water Basins of the Coastal Plain of Los Angeles County Bulletin No. 104

Geology of California, 1975, Robert M. Norris and Robert W. Webb

Groundwater Information within 1-mile Radius Vicinity Area:

The nearest surface water in the vicinity of the subject property is the Los Angeles River located approximately 4.6 miles east of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

Based on the Geo Tracker GAMA of the State Water Resources Control Board database, a LUST site known as Mobil Service Station is found at approximately 700 feet east of the subject site. According to an environmental database at the Mobile Service Station, depths to groundwater measurements in perched zone monitoring wells ranged from 52.05 to 65.68 feet below top of well casings (Geo Tracker).

Subject Site:

Soil: The shallow subsurface stratigraphy of the site consisted of silty sand and sand interlayer from approximately 6 inches below of paving to 20 feet bgs of boring locations.

Groundwater: No wells such as producing, monitoring, vapor treatment wells are known to exist in the subject site. Depth to groundwater is expected below 50~60 feet bgs at the subject site. Groundwater was not encountered at a maximum boring depth of 20 feet bgs during this subsurface borings.

4.0 ANALYTICAL RESULTS & DATA ANALYSIS

4.1 Analytical Results of Soil Samples

A total of eighteen (18) soil samples collected from five (5) soil borings were selected to assess the REC previously identified. Then, soil samples were analyzed for TPH-g/d/o, oxygenated/chlorinated VOCs, total lead, and PCBs. Positive Lab reported the soil analytical results as shown in Appendix-3. Analytical lab results are summarized in Table-1 and Figure-3 along with comparisons to Environmental Screening Levels (ESLs). Based on the soil analytical results of the subject site, EPC concludes that no further investigation is warranted at this time.

Review of the soil analytical results indicates the following:

- The maximum concentrations of TPH-g, TPH-d, and TPH-o were revealed at B2-10 which had a concentration of 6.03 mg/kg (TPH-g), 1,870 mg/kg (TPH-d), and 23,200 mg/kg (TPH-o), respectively. The maximum concentrations of fuel VOCs were revealed at B2-10' depth, at 22.7 µg/kg (benzene), 497 µg/kg (toluene), 547 µg/kg (ethylbenzene), and 4,080 µg/kg (total xylene).

4.1.1 Data Analysis via MCLG

Reference: Soil screening level of Los Angeles County area: Interim Site Assessment & Cleanup Guidebook Section 4.0 Maximum Soil Screening Levels, 1996, California State Regional Water Quality Control Board (RWQCB) Region 4
-----Rev. Sept 2006.

- Maximum Contaminant Level Goal (MCLG) can be evaluated in accordance with Maximum Soil Screening Levels (MSSL; LA-RWQCB 1996), soil lithology, and distance above groundwater. The MSSL levels for TPH-g/d/o with distance above groundwater being 20-150 feet bgs are 500, mg/kg, 1,000 mg/kg, and 10,000 mg/kg. TPH-o, respectively.

Based on the analytical results, the detected maximum concentrations of TPH-d/o at a depth of 10 feet bgs were higher than the LARWQCB Table 4-1 Maximum Soil Screening Levels for UST Closure Criteria with clayey silt soil and distance above groundwater between 20' and 150' below ground surface (bgs).

- The detected maximum concentrations of BTEX at a depth of 10 feet bgs did not exceed the LARWQCB Table 4-1 Maximum Soil Screening Levels for UST Closure Criteria with clayey silt soil and distance above groundwater between 20' and 150' below ground surface (bgs). The MSSL levels for BTEX with distance above groundwater being 20-150 feet bgs are 29 µg/kg (benzene), 1,600 µg/kg (toluene), 6,300 µg/kg, and 16,900 µg/kg (total xylene), respectively.

4.1.2 Data Analysis via ESLs

Analytical lab results of soil samples are summarized in Table-1 and Figure-3 along with comparisons to Environmental Screening Levels (Environmental Screen Levels, San Francisco Bay Regional Water Quality Control Board, 2019, Rev. 2).

- The detected concentrations of TPH-g did not exceed its respective ESL Tier 1.
- Maximum concentrations of TPH-d and TPH-o were revealed at 1,870 mg/kg and 23,200 mg/kg in B2-10'. These detected concentrations of TPH-d/o evaluated above their respective ESL Tier 1.
- A total of five (5) soil samples (B1-5, B2-5, B3-5, B4-5, and B5-5) collected at 5 feet bgs of the each borehole were tested for total lead (pb). Analytical laboratory results of total lead were detected ranging from 4.66 to 23.31 mg/kg. The detected concentrations did not exceed its ESL Tier 1.
- A total of five (5) soil samples (B1-15, B2-15, B3-10, B4-10, and B5-10) collected at 5 feet bgs of the each borehole were tested for PCBs. Concentrations of PCBs were not detected above laboratory method detection limits (MDLs) in the soil samples via USEPA method 8082.

4.2 Analytical Results of Soil Vapor Samples

A total of three soil vapor samples collected from temporary soil vapor wells were analyzed for oxygenated/chlorinated VOCs via USEPA method 8260B by a state certified ELAP (see Appendix-3). A summary of soil vapor sample analytical results is presented in Table-2 and Figure-4, along with comparisons to the San Francisco Bay Regional Water Quality Control Board (SFB-RWQCB) Environmental Screening Levels (ESLs) for Tier 1 and Commercial Soil Gas.

Review of the soil gas analytical results indicates the following:

- Concentrations of oxygenated/chlorinated VOCs were not detected above laboratory method detection limits (MDLs) in our soil vapor samples via USEPA method 8260B.
- On September 25, 2020, an Indoor Air and Soil Vapor Assessment (see Appendix-4) was prepared by EBI Consulting (EBI) for the property located at 989 South St. Andrews Place. Based on the previous soil vapor and indoor air analytical results, a maximum concentration of PCE was detected at 11 $\mu\text{g}/\text{m}^3$ collected from sub-slab soil vapor sample SSV-3. The detected concentration of PCE did not exceed its ESL Tier 1.

4.3 Soil Vapor Intrusion Risk Assessment

Source: Cal/EPA DTSC & Cal Water Resources Control Boards, Supplemental Guidance, Screening & Evaluating Vapor Intrusion, Feb 2020

The California Environmental Protection Agency (Cal/EPA) Department of Toxic Substances Control (DTSC), the San Francisco Bay Regional Water Quality Control Board (SFB Regional Water Board), and the State Water Resources Control Board (State Water Board) developed this Supplemental Guidance to promote state-wide standard practice and consistency for screening buildings for vapor intrusion and to establish appropriate sampling to protect building occupants from vapors off-gassing from contaminated sources. Addressing vapor intrusion is critical to protect people from exposures that may pose a risk of adverse health effects. A workgroup, consisting of members from the agencies listed above under the guidance of the Cal/EPA, prepared this document as a supplement to existing information, not a standalone document. The urgency to protect building occupants from the short-term exposure effects of trichloroethylene (TCE) at relatively low concentrations was part of the impetus that led to the formation of the Cal/EPA Workgroup. The Supplemental Guidance recommends a consistent approach to be used by practitioners and regulators when screening buildings for subsurface vapor risk to building occupants. It does not provide guidance on the sampling required for all media (soil, vapor, and groundwater) to determine the nature and extent of contamination in development of a conceptual site model. This Supplemental Guidance describes a framework for deciding when cleanup and/or mitigation is needed.

This Supplemental Guidance addresses assessment of VI risk from vapor forming chemicals (VFCs) but does not constitute complete guidance for the overall evaluation and management of VI. Practitioners should use this Supplemental Guidance in conjunction with existing California guidance (DTSC Vapor Intrusion Guidance [2011a], the DTSC Vapor Intrusion Mitigation Advisory [2011b], and the SF Bay Regional Water Board Interim Framework [2014]). Where there is conflict with the above-mentioned guidance documents, this Supplemental Guidance is recommended.

Attenuation Factor:

This Supplemental Guidance recommends the use of USEPA empirically-derived attenuation factors (AFs) (USEPA, 2015a) for the screening of sites in California. These AFs (i.e., vapor intrusion to indoor air) are protective of public health under most building occupancy scenarios and should be used for the initial screening of sites. Attenuation factors of soil gas and sub-slab soil gas are 0.03 as shown below summary Table.

Medium- Specific Attenuation Factor for VI to Indoor Air

Medium	Attenuation Factor
Crawl Space Gas	1
Sub-slab Soil Gas	0.03
Soil Gas	0.03
Groundwater	0.001

Vapor attenuation refers to the reduction in VFC concentrations that occurs during vapor migration in the subsurface, coupled with the dilution that can occur when the vapors enter a building and mix with indoor air (Johnson and Ettinger, 1991). The attenuation factor (AF) is a unitless number defined as the ratio between the indoor air concentration (C_{IA}) for a given VFC and its subsurface concentration as follows, using soil gas concentrations (C_{SG}) as an example: $AF = C_{IA} \div C_{SG}$

Equation-1)

$$C_{IA} = AF \times C_{SG}$$

Estimate Human Health Risk from Vapor Intrusion:

The incremental cancer risk and noncancer hazard associated with indoor air exposure to chemicals of potential concern through the VI pathway should be estimated from soil gas concentration data. Risk should be evaluated as follows:

- Estimate Potential Indoor Air Concentration: Estimate the potential indoor air concentration [C_{IA} in micrograms per cubic meter ($\mu\text{g}/\text{m}^3$)] using the maximum soil gas concentration (C_{SG} in $\mu\text{g}/\text{m}^3$) detected in samples located close to the building (or in areas where there is a potential for future buildings), using Equation-1. The default AF of 0.03 should be used to screen all buildings (see Attenuation Factor).
- Calculate the cancer risk and noncancer hazard quotient using the estimated C_{IA} from Equation-1. Select either the standard (Equations -2 and -3) or the simplified equations (Equations -4 and -5) as follows:
 - Standard Equations – Input the most current chemical-specific toxicity criteria consistent with the regulation “Toxicity Criteria for Human Health Risk Assessment” (California Code of Regulations, Title 22, Division 4.5, sections 68400.5, 69020-69022) and default receptor-specific exposure factors (DTSC Human Health Risk Assessment (HHRA) Note 1, 2019 or current SF Bay Regional Water Board’s ESLs). For a listing of both required and recommended toxicity criteria see the most current DTSC HHRA Note 10.

Equation-2)

$$\text{Cancer risk} = [C_{IA} \times IUR \times ET \times EF \times ED] \div [AT_c \times 365 \text{ d/y} \times 24\text{h/d}]$$

Equation-2 should be modified when appropriate to take into account increased sensitivity during childhood (USEPA, 2018; OEHHA, 2009).

Equation-3)

$$\text{Hazard Quotient} = [C_{IA} \times ET \times EF \times ED] \div [Rf_c \times AT_{nc} \times 365 \text{ d/y} \times 24\text{h/d}]$$

IUR = Inhalation Unit Risk [cubic meter per microgram ($\text{m}^3/\mu\text{g}$)]

RfC = Reference Concentration ($\mu\text{g}/\text{m}^3$)

ET = Exposure Time (hours per day)

EF = Exposure Frequency (days per year)

ED = Exposure Duration (years)

AT_c = Averaging Time for Carcinogens (years)

AT_{nc} = Averaging Time for Noncancer Toxic Effects (years), equal to ED

- Simplified Equations – Use indoor air (IA) screening levels (SLs) that are consistent with the site’s conceptual site model and exposure scenario. The appropriate cancer and noncancer IA SLs recommended by the oversight agency should be

used (DTSC HHRA Notes 3 through 5: 2018, 2016, 2014 or updates and the current SF Bay Regional Water Board ESLs). The CIA and IA SL inputs should have the same units (e.g., $\mu\text{g}/\text{m}^3$).

Equation-4)

$$\text{Cancer risk} = [\text{CIA} \times (1 \times 10^{-6})] \div [\text{IA Cancer SL}]$$

Equation-5)

$$\text{Hazard Quotient} = [\text{CIA} \times 1] \div [\text{IA Noncancer SL}]$$

Vapor Intrusion Risk Evaluation:

Residential land use scenarios

According to the USEPA, when evaluating estimated cancer risks or Incremental Lifetime Carcinogenic Risk (ILCR) associated with exposure to target contaminants in indoor space from subsurface vapor intrusion for decision-making purposes, an acceptable excess cancer risk is equal to or less than one-in-one million ($1.0\text{E}-06$) for unrestricted land use. This threshold is recognized as acceptable by the USEPA and represents a probability of one-in-one million that an individual could develop cancer from exposure to a carcinogen (or group of carcinogens) under various exposure assumptions. A calculated excess cancer risk falling between $1.0\text{E}-06$ and one-in-ten thousand ($1.0\text{E}-04$) is considered by the United States EPA to be a risk management range and where risk management decisions are made on a site-specific basis.

Commercial/industrial land use scenario

A one-in-one hundred thousand ($1.0\text{E}-05$) excess cancer risk is typically recognized by Federal and State agencies as acceptable in commercial/industrial scenarios. If risk exceeds one-in-ten thousand ($1.0\text{E}-04$), it is assumed to pose an adverse risk to human health, and source remediation and/or vapor intrusion mitigation may be considered warranted. In California, under the Proposition 65 program, the “no significant risk level” represents the daily intake level calculated to result in a cancer risk not exceeding one excess case of cancer in 100,000 individuals ($1\text{E}-05$) exposed over a 70-year period to warn the public of potential carcinogens in everyday products (Cal-EPA, 2013c). The results of this HHRA are interpreted within the context of the regulatory and public health perspective of acceptable cancer risks and non-cancer hazards from controllable sources of exposure.

When evaluating the hazard potential posed by chemicals for non-carcinogenic effects, a HI (or HQ for a single compound) less than 1.0 (unitless) is considered unlikely to pose significant non-carcinogenic adverse health effects to individuals under the exposure conditions, and a no further action response is supported. When the HI exceeds 1.0, further evaluation of the source and/or response action to mitigate the source and vapor intrusion may be needed.

According to DTSC, if risks are less than 1×10^{-6} and the hazard index is less than or equal to one, no further action is required. For risks greater than 1×10^{-4} or hazard indices greater than 1, response actions (i.e., mitigation and remediation) are needed. For risks between 1×10^{-6} and 1×10^{-4} , or a hazard index greater than 1, the need for actions (i.e., none,

institutional controls, additional investigation, monitoring, refine risk assessment, and mitigation, remediation) is evaluated.

Comparison of soil vapor (gas) analytical results to human health risk level:

- Based on the standard equations (i.e., cancer risk equations 1, 2, and 3) as shown in above, maximum incremental lifetime carcinogenic risk and noncancer hazard quotient levels collected from a maximum gas phase PCE analytical result ($11 \mu\text{g}/\text{m}^3$) were calculated at $1.65\text{E-}07$ and $1.83\text{E-}03$, respectively. The carcinogenic risk of PCE is evaluated below the residential risk threshold of $1.0\text{E-}06$ and commercial/industrial risk threshold of $1.0\text{E-}05$.

5.0 CONCLUSIONS & RECOMMENDATION

Review of the soil, subsurface soil vapor, and indoor/ambient air sample analytical results throughout the site indicated that there is no significant hazardous contamination at the subject site therefore; the site is “no further action” from environmental engineering is merit for the subject site as following reasons:

- Former USTs: Based on the historical sources of the previous environmental site assessments, in 1968, all USTs were removed from the subject site. Based on lack of the former USTs closure records, a geophysical survey was performed at the site by Socal Locators. Geophysical survey using GPR is available to characterize the shallow subsurface conditions of soil excavation, UST, and associated piping locations. In this report, EPC summarized the result of the geophysical survey conducted on July 28, 2021 by Socal Locators. The geophysical survey did **not** find evidences of remaining USTs at the building and parking lot of the site (see [Appendix-1](#)).
- Previous Site Assessments:
 - A Phase II Environmental Site Assessment (ESA) was performed by WEECO in 2006. Reportedly, soil samples were collected at the existing parking lot at 3355 W. Olympic Boulevard. Based on the analytical results of the previous Phase II, the previous gasoline station was considered a historical recognized environmental condition (HREC). No recognized environmental condition (REC) or environmental issues were found in connection with the subject site. Therefore, WEECO recommended no further investigation of the subject site.
 - On September 25, 2020, an *Indoor Air and Soil Vapor Assessment report* was prepared by EBI Consulting (EBI) for the property located at 989 South St. Andrews Place. EBI was requested to conduct an indoor air and soil vapor assessment to evaluate the potential impact to the subject site from auto repair activities involving the use of solvents and petroleum products since 1968. PCE was detected in the three of the five samples at concentrations up to 13 $\mu\text{g}/\text{m}^3$. Based on the findings, EBI concluded that significant subsurface impacts related to the historical use of chlorinated solvents at the former auto repair facility were not identified beneath the subject site of 989 S. St. Andrews Place. Additionally, PCE was not identified in the sub-slab soil vapor beneath the site at concentrations that pose an unacceptable vapor intrusion threat to indoor air at the site and chlorinated solvents were not identified in the indoor air at the site. Therefore, EBI conclude that no further action was recommended.
- Supplemental ESA by EPC: A total of eighteen (18) soil samples collected from five (5) soil borings were selected to assess the REC previously identified during this supplemental ESA. Then, soil samples were analyzed for TPH-g/d/o, oxygenated/chlorinated VOCs, total lead, and PCBs. Positive Lab reported the soil analytical results as shown in Appendix-3. Analytical lab results are summarized in Table-1 and Figure-3 along with comparisons to Environmental Screening Levels

(ESLs). Based on the soil analytical results of the subject site, EPC concludes that no further investigation is warranted at this time. Review of the soil analytical results indicates the following:

- The maximum concentrations of TPH-g, TPH-d, and TPH-o were revealed at B2-10 which had a concentration of 6.03 mg/kg (TPH-g), 1,870 mg/kg (TPH-d), and 23,200 mg/kg (TPH-o), respectively. The maximum concentrations of fuel VOCs were revealed at 22.7 µg/kg (benzene), 497 µg/kg (toluene), 547 µg/kg (ethylbenzene), and 4,080 µg/kg (total xylene). Except for TPH-d/o, the detected concentrations of TPH-g and fuel VOCs did not exceed the LARWQCB Table 4-1 Maximum Soil Screening Levels for UST Closure Criteria with clayey silt soil and distance above groundwater between 20' and 150' below ground surface (bgs).

Continuously, non-detectable levels of TPH-g/d/o and fuel VOCs were indicated in B1 and B2 at depths of 20 and 30 feet bgs. Thus, the detected concentrations of TPH-d/o and VOCs at the B1-10 and B2-10 are de minimis condition. Furthermore, the subject site is deemed to meet the criteria outlined in the Low-Threat Closure Policy (State WRCB, effective August 17, 2012).

- A total of five (5) soil samples (B1-5, B2-5, B3-5, B4-5, and B5-5) collected at 5 feet bgs of the each borehole were tested for total lead (pb). Analytical laboratory results of total lead were detected ranging from 4.66 to 23.31 mg/kg. The detected lead concentrations did not exceed its Tier 1 ESL (32mg/kg).
- In addition, five (5) soil samples collected near the inactive in-ground hydraulic hoists were tested for polychlorinated phenyls (PCBs) via USEPA Analysis Method 8082. Non-detectable levels of polychlorinated phenyls (PCBs) were indicated in soil samples.
- The soils beneath the subject site consist of silty sand and clayey silt to a maximum depth investigated 30 feet bgs during this supplemental ESA. No groundwater was encountered during our soil borings. No wells such as producing, monitoring, vapor treatment wells are known to exist in the subject site. Depth to groundwater is expected below 50~60 feet bgs at the subject site.
- Soil Vapor Assessment: On July 28, 2021, three (3) soil vapor sampling was performed by hydraulically pushing soil gas probes (AMS) to a depth of 5 feet bgs. Soil vapor samples (SV1-5, SV2-5, and SV3-5) were immediately delivered to Positive Laboratory (i.e., certified lab by Environmental Laboratory Accreditation Program). Then, the soil vapor samples were analyzed with a 6-hour sample holding time. Concentrations of oxygenated/chlorinated VOCs were not detected above laboratory method detection limits (MDLs) via USEPA method 8260B.
- Re-evaluation: Based on the Indoor Air and Soil Vapor Assessment (see Appendix-4) previously performed by EBI in September 2020, Sub-slab and indoor air samples were collected at 989 South St. Andrews Place. Reportedly, a maximum concentration of

PCE was detected at $13 \mu\text{g}/\text{m}^3$ collected from sub-slab soil vapor sample SSV-2. The detected concentration of PCE did not exceed its ESL Tier 1.

- Re-evaluation: Maximum incremental lifetime carcinogenic risk and noncancer hazard quotient levels collected from a maximum gas phase PCE analytical result (**$13 \mu\text{g}/\text{m}^3$**) obtained from the previous assessment report (EBI, 2020) were calculated at $5.31\text{E-}10$ and $2.22\text{E-}04$, respectively. The carcinogenic risk of PCE is evaluated below the residential risk threshold of $1.0\text{E-}06$ and commercial/industrial risk threshold of $1.0\text{E-}05$.
- Low levels of petroleum hydrocarbons generated from the former UST operation were identified within the limited boring location B1 and B2 at a depth of 10~15 feet bgs during this supplemental investigation. If conversion of the subject site to a more sensitive land use (i.e., residential use) or underground parking structure construction is planned, the hydrocarbon contaminated soils should be removed to a certified recycling facility to protect construction workers during soil grading and excavation.

6.0 CERTIFICATION, LIMITATION, & STATEMENT OF INDEPENDENCE

Our investigation was performed using the degree of care and skill ordinarily exercised, under similar circumstances, by reputable geologist's and civil engineer's practicing or similar localities. No other warranty, expressed or implied, is made as to the conclusions and professional advice included in this report.

The samples taken and used for testing and the observations made are believed representative of the study area; however, soil gas samples can vary significantly between borings, test pits, and/or test sample locations.

The interpretations and conclusions contained in this report are based on the results of laboratory test and analyses intended to detect the presence and concentration of certain chemical constituents in samples taken from the subject property. An independent laboratory, which is certified by the State of Michigan to conduct such test analysis, has conducted such testing and analysis and which used methodologies mandated by the federal Environmental Protection Agency (EPA), State of Michigan Department of Environmental, Great Lakes, and Energy (EGLE), or the State of California EPA DTSC in the performance of such test and analysis. EPC has no involvement in, or control over, such testing and analysis and has non-laboratory means of confirming the accuracy of such laboratory results. Consultant, therefore, disclaims any responsibility for any inaccuracy in such laboratory results.

- Other Recommendations regarding Non-CERCLA:
 - Based on the building built year in 1967, asbestos survey and lead based paint assessment reports are recommended prior to the subject building demolition.
 - Based on our visual site inspection, mold was found at the subject building. A safety and health plan should be prepared to protect construction workers during construction activities.

Subject: SUBSURFACE INVESTIGATION
Commercial Property
3355 W. Olympic Blvd.
Los Angeles, CA 90019

Dear Mr. Morales,

With your request and authorization, SoCal Locators has prepared this "Subsurface Investigation Report" for the commercial property, located at 3377 W. Olympic Blvd., in the city of Los Angeles, California 90019. The enclosed report presents our findings, and conclusions regarding the utility locations.

Thank you for allowing "SCL" the opportunity to assist you with this project. Please do not hesitate to contact me at (909) 900-6504, should you have any questions or need additional information.

Best regards,

Rick Huerta
SoCal Locators

1. SITE LOCATION AND DESCRIPTION

The subject site located at 3355 W. Olympic Blvd., on the North-West corner of Olympic Blvd. and St. Andrews Place, located in the city of Los Angeles, CA. The property is surrounded by commercial buildings.

Figure 1. Subject Site

14050 Cherry Ave., Suite R-172
Fontana, California 92337
Phone: (909) 900-6504
rick@socallocators.com

2. PURPOSE AND SCOPE

SoCal Locators to perform a "Subsurface Investigation", using electromagnetic and ground penetrating radar (GPR) equipment to located all known utilities in the provided project area(s) for 5 proposed boring locations and in an attempt to an "Underground Storage Tank (UST)". All found utilities and anomalies will be delineated using APWA color coded paint.

rick@socallocators.com

3. THE PROCESS

Our process began with the "Electro-Magnetic" locating equipment to identify pipes or utilities throughout the work scoped areas. We swept all areas with the RD receiver to detect live power or radio frequency signals followed by connecting to any visible riser(s) or tracer wire(s) that may be in the area(s) provided that there is an exposed metallic surface(s). Locations are then marked and delineated with APWA marking paints and or flags on the surface. Depths cannot always be provided or accurate due to various types of soils.

Initial "Ground Penetrating Radar (GRP)" scans were then collected, data was evaluated and equipment was calibrated to ensure findings were confirmed and accurate. Based on these findings, a scanning strategy is formed, typically consisting of scanning the entire area in a grid with 5' - 10' scan spacings to locate any potential utilities and "Underground Storage Tanks (UST's)" that were not found with the pipe locator. The GPR data is interpreted in real time and anomalies in the data are located and marked on the surface using spray paint, flags, etc.,. Depths are dependent on the dielectric of the materials being scanned so depth accuracy can vary throughout a site.

4. EQUIPMENT

The GSSI UtilityScan SIR 3000 Ground Penetrating Radar unit with 400MHz antenna sends a dielectric signal into the earth, which registers with the density of the soil that it is penetrating. Any other material of varied density will either speed up the signal creating an inverted hyperbola or slow it down leaving a hyperbola trail. This is similar to a rock in a creek. The water bends around the rock leaving a tail wake. The GPR signal is not bending; however, it is sending back a continuous signal of the curvature of the anomaly or buried feature it encounters.

14050 Cherry Ave., Suite R-172
Fontana, California 92337
Phone: (909) 900-6504
rick@socallocators.com

GPR findings are not always accurate due to certain site conditions such as soil lithology, moisture, and soil make-up. These can limit the depth to which the GPR antenna can penetrate to locate buried features.

The RD8100 Electro-Magnetic Transmitter & Receiver has Inductive & Conductive capability to locate buried conductive underground utilities, such as copper, steel and galvanized metal water pipes, electrical lines, power lines, tele-

communication lines, metal and steel gas lines, and metal and steel pipelines. The RD8100 features include multiple active frequencies to delineate actively the depth and location of the target utility or pipe. The RD8100 receiver has a peak and null gain feature that pinpoints the target utility or pipe in congested areas.

The audible signal to noise feature makes it easy for the locating technician to determine accurately the location of a directly connected utility or pipe by sound.

According to Radio Detection, the specifications of the RD8100 include...

Sensitivity: 6E-15 Tesla 5 μ A at 1 meter (33kHz)

Dynamic range: 140dB rms/ \sqrt Hz

Selectivity: 120dB/Hz

Depth measurement precision: \pm 3%

Locate accuracy: \pm 5% of depth

The Jameson Duct Hunter 300 Traceable Rodder uses the RD8100 transmitter to energize the rod which is pushed into underground pipe to emit signal that is picked up by the RD8100 receiver above ground. This allows an entire buried utility pipe to be traced and marked continuously from above ground by one man without digging. The rod's ferrule attaches to a 512 MHz sonde, roller guide, or pulling eye. 5/16" diameter rod has 6" bend radius and is recommended for 2"- 4" conduit.

14050 Cherry Ave., Suite R-172
Fontana, California 92337
Phone: (909) 900-6504
rick@socallocators.com

The Schonstedt GA-52Cx Magnetic Locator detects iron and steel objects underground, such as USTs, buried oil wells and buried metal monitoring well lids. The Schonstedt GA-52Cx Magnetometer provides audio detection signals with frequencies that vary with gradient field intensity. The signals peak in frequency when the locator tip is held directly over the target.

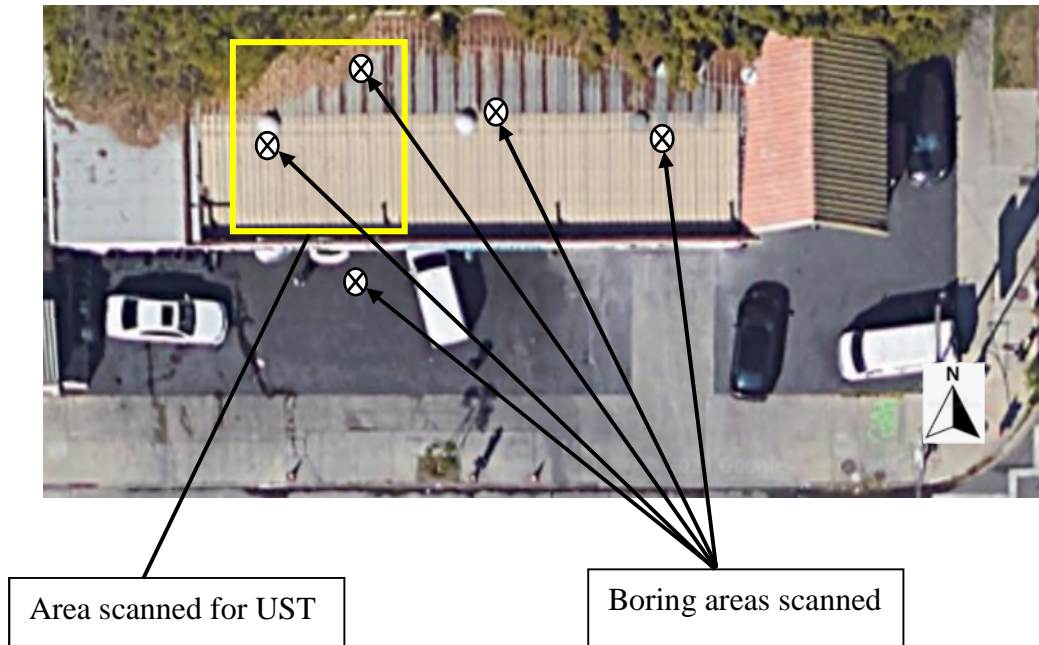

5. LIMITATIONS

Please keep in mind that there are limitations to any subsurface investigation. The equipment may not achieve maximum effectiveness due to soil conditions, above ground obstructions, reinforced concrete, and a variety of other factors. No subsurface investigation or equipment can provide a complete image of what lies below. Our results should always be used in conjunction with as many methods as possible including consulting existing plans and drawings, exploratory excavation or potholing, visual inspection of above ground features, and utilization of services as One Call/811.

6. FINDINGS

Our technician performed a "Subsurface Investigation", using electromagnetic and ground penetrating radar (GPR) equipment to located all known utilities in the provided project area for 5 proposed boring locations and in an attempt to locate an "Underground Storage Tank". All utilities found were delineated using APWA color coded marking paint. All identified anomalies using GPR were delineated using APWA color coded paint. No evidence of an underground storage tank (UST) was found onsite using ground penetrating radar.

Report No.: 2107235
Project Name: 3355 W. Olympic Blvd., L.A.

Dear Mr. Jeff Lee,

This report contains the analytical results for the sample(s) received under chain of custody(s) by Positive Lab Service on July 28, 2021.

The test results in this report are performed in compliance with ELAP accreditation requirements for the certified parameters. The laboratory report may not be produced, except in full, without the written approval of the laboratory.

The issuance of the final Certificate of Analysis takes precedence over any previous Preliminary Report. Preliminary data should not be used for regulatory purposes. Authorized signature(s) is provided on final report only.

If you have any questions in reference to this report, please contact your Positive Lab Service coordinator.

1.0 INTRODUCTION

This report presents the results of the Phase II Environmental Site Assessment of the property located at 3355 West Olympic Boulevard, Los Angeles, California (see Figure 1), conducted by Western Environmental Engineers Company (WEECO) on October 26, 2006. This site investigation was completed at the request of Grace Partnership Inc.

The purpose of this site investigation was to gather detailed information about the contaminants in the previous gasoline station area of the site, and to determine the contaminants existing on site and to approximate the volume of the contaminants' plumes, as necessary. From this information, a remediation strategy as well as a preliminary cost estimate to remediate this site, if necessary, could be provided to the owner. This Environmental Site Assessment report contains a brief history of the existing site characteristics, sample collection procedures, analytical results and other supporting data, as well as conclusions and recommendations.

2.0 BACKGROUND

The property was used as an auto fueling station facility and stored underground storage tanks in the past. The property is currently used as an auto repair shop. The subject site is located on the northwest corner of Olympic Boulevard and St. Andrew Place.

According to the Phase I Environmental Site Assessment performed by JMK dated January 20, 2006, the subject site was an auto filling station in the past. In June 1940, Richfield Oil Corp. installed two 1,000-gallon and one 550-gallon gasoline tanks, and one 120-gallon waste oil tank. Mr. Kim, the subject business's owner was interviewed. Mr. Kim Stated the business at this property was purchased in 1996. Mr. Kim indicated that the auto repair and service businesses have operated at this location since approximately 1945. Currently, there are 5 hydraulic oil hoist/lifts, but one is not in use and one 110-gallon waste oil tank. Based on historical information/records, the subject property on Olympic Boulevard was originally a vacant land from as early as 1907. As early as 1921, the subject site was improved with a dwelling building and an auto garage. The existing dwelling and auto garage were demolished by 1940 and subject site was improved with a gasoline service station. The service station operated from 1940 to as late as 1960s. The Olympic Blvd. property was again a vacant land before the present auto service and repair facility were constructed in 1968. The subject site has operated as such since 1968. However, JMK could not find Tank Closure Report from the Los Angeles City Fire Department.

3.0 GEOLOGY AND HYDROGEOLOGY

The soil material encountered throughout the borings was generally a combination of silty sand and sand. The color of the soil ranged from light brown to brown; the consistency of the soil was moist.

The subject property lies within the Los Angeles Forebay Area, located in the northern part of the Central Basin. In general, it is a free groundwater area; however, in the course of this investigation it became evident that the Bellflower aquiclude extends into the southerly portion of the forebay area. The aquiclude extends in this area and contains a high percentage of sand, and vertical percolation of water is apparently more rapid here than in other portions of the basin covered by it. Where the Bellflower aquiclude is missing within the forebay area, the aquifers are in direct hydraulic continuity with the surface.

The Los Angeles Forebay Area is overlain by parts of the La Brea, Los Angeles and Montebello Plains. The known water-bearing sediments extend to a depth of 1600 feet (1440 feet below sea level) and include recent alluvium, the Lakewood formation and the San Pedro formation. Some fresh water also may be present in the Pliocene and Miocene rocks underlying these formations in this area.

Recent alluvium in the Los Angeles Forebay Area is found on the Los Angeles Plain and in the Los Angeles Narrows. It attains a maximum thickness of 160 feet, and includes the western arm of Gaspur aquifer and the parts of the Semiperched aquifer and Bellflower aquiclude lying west and south of the Los Angeles River.

The Semiperched aquifer is defined, as the area where deposit of sand and gravel overlying the Bellflower aquiclude is more than 20 feet in thickness. This semiperched aquifer is also present in the Lakewood formation just south of the Repetto Hill. Although the aquifer can be defined in well logs, water levels in wells indicate that it contains little or no water.

Based on the records of the County of Los Angeles Department of Public Works (LACDPW) Hydrologic Records Department, the nearest monitoring well is #2626P, located at the intersection of Sentney Avenue and Olympic Boulevard, Los Angeles. The last groundwater measurement was obtained on April 25, 2006, and depth to groundwater on that date was 68 feet below ground surface (bgs), and the ground surface elevation of well #2626P is 88 feet above mean sea level (MSL).

4.0 SUBSURFACE EXPLORATION

4.1 RATIONALE FOR THE SAMPLING LOCATIONS

On October 26, 2006, four (4) borings (labeled B-1 through B-4) were drilled from the ground surface to twenty (20) feet bgs in the existing parking lot area, as indicated on the Facility Map (Figure 2). The tube samples were taken at every 5-foot interval below ground surface (bgs). Boring locations were selected in order to further define the vertical and horizontal extent of the subsurface contamination.

4.2 DRILLING AND SAMPLING METHOD

On October 26, 2006, WEECO contracted with Vironex Environmental Services to drill and sample the four (4) investigative soil borings using 5410 GeoProbe Rig. A total of sixteen (16) soil samples were collected from the four borings (labeled B-1 through B-4). The soil samples were collected in acetate tubes using a **GeoProbe**. Maximum depth of boring was 20 feet below ground surface (bgs). Groundwater was not encountered at the time of drilling. Tube soil samples were taken at, B-1-5, B-1-10, B-1-15, B-1-20, B-2-5, B-2-10, B-2-15, B-2-20, B-3-5, B-3-10, B-3-15, B-3-20, B-4-5, B-4-10, B-4-15 and B-4-20 feet below ground surface (bgs).

Tube soil samples were obtained from the borings using a direct push sampler which contained 1.3/8-inch ID by 18-inch long acetate sampling tubes. All soil samples were completely driven and filled; no head space nor hand-packing was allowed. The soil samples were retained in the acetate sampler, which were sealed at both ends with Teflon sheeting and tight-fitting plastic caps. Each sample was labeled (with the sample number, sample depth and time), placed in a bag, stored in an ice chest, and cooled using ice and refrigerated blue ice packets. Chain-of-custody forms were filed to document the handling, transport, and delivery of samples to a California State Certified Laboratory (See Attachment C).

Vapor readings were obtained at five (5) foot intervals from the bulk samples collected. The soil was collected in plastic ZIPLOC™ bags and placed in a warm area to allow for the volatilization of hydrocarbons. After volatilization, a Photoionization Detector (PID) was calibrated for 50 ppm hexane.

All sampling equipment and sampling tubes were decontaminated prior to each sampling by repeated washing using a brush and Liquinox solution, a tap water rinse, and finally a deionized water rinse. The sampler and sampling tubes were either air-dried or dried with a clean towel. Clean augers were used for each boring.

5.0 LABORATORY ANALYSES

All soil samples were delivered to CHEMTEK Inc. Environmental Laboratories, a California State-certified laboratory whose certification by California Department of Health Services is found in Attachment C. The following laboratory analyses were performed on the soil samples:

- Total Petroleum Hydrocarbons (TPH) for Gasoline by EPA Method 8015 (m)
- EPA Method 8021B (BTEX & MTBE)

These laboratory analyses were performed in accordance with the California Regional Water Quality Control Board, Los Angeles Region site assessment requirements. Certificates of Analysis for soil samples during this portion of the site assessment are found in Attachment C. A summary of all laboratory results is shown in Table 1.

TABLE 1: Summary of Laboratory Results

Sample ID	(unit: mg/kg)					
	8015(m) for Gasoline	MTBE	Benzene	Toluene	Ethyl- benzene	Total Xylenes
B-1-5	ND	ND	ND	ND	ND	ND
B-1-10	ND	ND	ND	ND	ND	ND
B-1-15	ND	ND	ND	ND	ND	ND
B-1-20	ND	ND	ND	ND	ND	ND
B-2-5	ND	ND	ND	ND	ND	ND
B-2-10	ND	ND	ND	ND	0.006	0.027
B-2-15	ND	ND	ND	ND	ND	ND
B-2-20	1.1	ND	ND	0.013	0.07	0.351
B-3-5	ND	ND	ND	ND	ND	0.012
B-3-10	ND	ND	ND	ND	ND	ND
B-3-15	ND	ND	ND	ND	0.007	0.032
B-3-20	ND	ND	ND	ND	ND	ND
B-4-5	ND	ND	ND	ND	ND	ND
B-4-10	ND	ND	ND	ND	ND	ND
B-4-15	ND	ND	ND	ND	ND	ND
B-4-20	ND	ND	ND	ND	ND	ND

ND = Not detected above specified detection limits.

ppm = Parts per million (mg/kg).

6.0 CONCLUSIONS and RECOMMENDATIONS

The laboratory analytical results were compared to the maximum allowable levels as defined by the California State Water Resources Control Board, "Maximum Soil Screening Levels for TPH and BTEX above Drinking Water Aquifers & Average Attenuation Factor for Different Distance above Groundwater, Table 4-1, and Drinking Water Standards & Health Advisories Table.

WECCO used the charts (Tables 4-1) of the California Regional Water Quality Control Board, Los Angeles Region for Petroleum Impacted sites (April 1966 report) in order to estimate the attenuation factors for this site.

Thus, the attenuation factors for each material are found from the Tables (4-1) of the California Regional Water Quality Control Board, Los Angeles Region report as follows: *depth to groundwater of the subject site is approximately 68 feet.*

TABLE 2: Maximum Soil Screening Levels for TPH, BTEX, and MTBE above Drinking Water Aquifers

Depth from the Surface (feet)	Soil Material	Maximum Soil Screening Level for Gasoline and BTEX (ppm)
5	Silty Sand	Gasoline = 500 B/T/E/X = 0.04/2.26/8.27/22.5
10	Sand	Gasoline = 500 B/T/E/X = 0.025/1.38/4.69/13.31
15	Sand	Gasoline = 500 B/T/E/X = 0.023/1.24/4.17/11.79
20	Silty Sand	Gasoline = 500 B/T/E/X = 0.03/1.6/5.86/15.88

Calculations of MSSL for BTEX:

- At 5 feet level (63 feet above groundwater):

Silt

$$\text{Benzene MSSL}_{63} = [(63-20) / (80-20)] \times (0.066-0.011) + 0.011 = 0.05 \text{ ppm}$$

$$\text{Toluene MSSL}_{63} = [(63-20) / (80-20)] \times (4-0.45) + 0.45 = 2.99 \text{ ppm}$$

$$\text{Ethylbenzene MSSL}_{63} = [(63-20) / (80-20)] \times (15-2) + 2 = 11.32 \text{ ppm}$$

$$\text{Xylenes MSSL}_{63} = [(63-20) / (80-20)] \times (40-5.3) + 5.3 = 30.17 \text{ ppm}$$

Sand

$$\text{Benzene MSSL}_{63} = [(63-20) / (80-20)] \times (0.033-0.011) + 0.011 = 0.03 \text{ ppm}$$

$$\text{Toluene MSSL}_{63} = [(63-20) / (80-20)] \times (2-0.3) + 0.3 = 1.52 \text{ ppm}$$

$$\text{Ethylbenzene MSSL}_{63} = [(63-20) / (80-20)] \times (7-0.7) + 0.7 = 5.22 \text{ ppm}$$

$$\text{Xylenes MSSL}_{63} = [(63-20) / (80-20)] \times (20-1.75) + 1.75 = 14.83 \text{ ppm}$$

Assume the site lithological composition of 50 % silt and 50% sand,

$$\text{Benzene MSSL}_{63} = (0.05 + 0.03) \div 2 = 0.04 \text{ ppm}$$

$$\text{Toluene MSSL}_{63} = (2.99 + 1.52) \div 2 = 2.26 \text{ ppm}$$

$$\text{Ethylbenzene MSSL}_{63} = (11.32 + 5.22) \div 2 = 8.27 \text{ ppm}$$

$$\text{Xylenes MSSL}_{63} = (30.17 + 14.83) \div 2 = 22.5 \text{ ppm}$$

- At 10 feet level (58 feet above groundwater):

Sand

$$\text{Benzene MSSL}_{58} = [(58-20) / (80-20)] \times (0.033-0.011) + 0.011 = 0.025 \text{ ppm}$$

$$\text{Toluene MSSL}_{58} = [(58-20) / (80-20)] \times (2-0.3) + 0.3 = 1.38 \text{ ppm}$$

$$\text{Ethylbenzene MSSL}_{58} = [(58-20) / (80-20)] \times (7-0.7) + 0.7 = 4.69 \text{ ppm}$$

$$\text{Xylenes MSSL}_{58} = [(58-20) / (80-20)] \times (20-1.75) + 1.75 = 13.31 \text{ ppm}$$

- At 15 feet level (53 feet above groundwater):

Sand

$$\text{Benzene MSSL}_{53} = [(53-20) / (80-20)] \times (0.033-0.011) + 0.011 = 0.023 \text{ ppm}$$

$$\text{Toluene MSSL}_{53} = [(53-20) / (80-20)] \times (2-0.3) + 0.3 = 1.24 \text{ ppm}$$

$$\text{Ethylbenzene MSSL}_{53} = [(53-20) / (80-20)] \times (7-0.7) + 0.7 = 4.17 \text{ ppm}$$

$$\text{Xylenes MSSL}_{53} = [(53-20) / (80-20)] \times (20-1.75) + 1.75 = 11.79 \text{ ppm}$$

- At 20 feet level (48 feet above groundwater):

Silt

$$\text{Benzene MSSL}_{48} = [(48-20) / (80-20)] \times (0.066-0.011) + 0.011 = 0.04 \text{ ppm}$$

$$\text{Toluene MSSL}_{48} = [(48-20) / (80-20)] \times (4-0.45) + 0.45 = 2.11 \text{ ppm}$$

$$\text{Ethylbenzene MSSL}_{48} = [(48-20) / (80-20)] \times (15-2) + 2 = 8.07 \text{ ppm}$$

$$\text{Xylenes MSSL}_{48} = [(48-20) / (80-20)] \times (40-5.3) + 5.3 = 21.49 \text{ ppm}$$

Sand

$$\text{Benzene MSSL}_{48} = [(48-20) / (80-20)] \times (0.033-0.011) + 0.011 = 0.02 \text{ ppm}$$

$$\text{Toluene MSSL}_{48} = [(48-20) / (80-20)] \times (2-0.3) + 0.3 = 1.09 \text{ ppm}$$

$$\text{Ethylbenzene MSSL}_{48} = [(48-20) / (80-20)] \times (7-0.7) + 0.7 = 3.64 \text{ ppm}$$

$$\text{Xylenes MSSL}_{48} = [(48-20) / (80-20)] \times (20-1.75) + 1.75 = 10.27 \text{ ppm}$$

Assume the site lithological composition of 50 % silt and 50% sand,

$$\text{Benzene MSSL}_{48} = (0.04 + 0.02) \div 2 = 0.03 \text{ ppm}$$

$$\text{Toluene MSSL}_{48} = (2.11 + 1.09) \div 2 = 1.6 \text{ ppm}$$

$$\text{Ethylbenzene MSSL}_{48} = (8.07 + 3.64) \div 2 = 5.86 \text{ ppm}$$

$$\text{Xylenes MSSL}_{48} = (21.49 + 10.27) \div 2 = 15.88 \text{ ppm}$$

The measured concentrations were found to be extremely low and well within the maximum soil screening levels (MSSL) for all constituents. These concentrations can, therefore, be considered as reasonably clean, based on the State of California Water Resources Control Board "Maximum Soil Screening Levels (mg/kg) for TPH and BTEX above Drinking Water Aquifers." Although not confirmed during this site characterization, groundwater contamination beneath the subject site appears extremely unlikely.

Based on these analytical results, WEECO concludes that no further subsurface investigation is necessary at this time based on the conditions revealed by the four borings. WEECO does not recommend any further action regarding the soil contaminant concentrations based on the results of the four on-site borings.

However, if underground storage tanks (USTs) are still existing beneath the subject site, property owner/business owner must remove the USTs.

7.0 LIMITATIONS

The opinions expressed herein are based on the information collected during our study, our present understanding of the site conditions and our professional judgment in light of such information at time of preparation of this report. The report reflects our professional opinion based on the results of this investigation, and no warranty is either expressed, implied or made as to the conclusions, advice and recommendations offered in this report.

Our investigation was performed using the degree of care and skill ordinarily exercised, under similar circumstances, by reputable Environmental and Civil Engineers practicing in this or similar localities.

The findings, conclusions and recommendations in this report are considered valid as of the present date. However, changes in the conditions of property can occur with the passage of time, due to natural process or the works of man on this or adjacent properties. In addition, changes in applicable or appropriate standards may occur. WEECO is not responsible for conditions found at or beneath the subject property or adjacent properties. Accordingly, portions of this report may be invalidated wholly or partially by the changes beyond our control.

This report is prepared for the exclusive use of **Grace Partnership Inc.** and opinions/recommendations contained in this report apply only to conditions existing when services were performed and the intended only for the client, purposes, locations, time frames, and project parameters indicated.

Subject: Indoor Air and Soil Vapor Assessment
3355 Enterprise LLC
3355 West Olympic Boulevard and 989 South St. Andrews Place
Los Angeles, California
EBI Project No. 1220000223

Dear Ms. Nelson:

In accordance with the Proposal and Standard Conditions for Engagement approved by yourself on January 2, 2019, EnviroBusiness, Inc. (dba EBI Consulting, hereinafter "EBI") is pleased to submit this Indoor Air and Soil Vapor Assessment for the above-referenced property (herein referred to as the Subject Property).

This Report is addressed to *Bank of Hope*. This Report is for the use and benefit of, and may be relied upon by, *Bank of Hope*; initial and subsequent holders from time to time of any debt and/or debt securities secured, directly or indirectly, any participation interest in such debt; any indenture trustee, servicer, or other agent acting on behalf of such holders of such debt and/or debt securities; rating agencies; and the institutional provider(s) from time to time of any liquidity facility or credit support for such financings, and their respective successors and assigns.

The information contained in this report has received appropriate technical review and approval. The conclusions represent professional judgments and are founded upon the findings of the investigations identified in the report and the interpretation of such data based on our experience and expertise according to the existing standard of care. No other warranty or limitation exists, either express or implied.

The conclusions of this Report are based on indoor air and soil vapor analytical data prepared by H&P Mobile Geochemistry, Inc. and field observations recorded by EBI personnel.

There are no intended or unintended third party beneficiaries to this Report, except as expressly stated herein.

EBI is an independent contractor, not an employee of either the issuer or the borrower, and its compensation was not based on the findings or recommendations made in the Report or on the closing of any business transaction.

Thank you for the opportunity to prepare this Report, and assist you with this project. Please call us if you have any questions or if we may be of further assistance.

Respectfully submitted,
EBI CONSULTING

The Environmental Professionals listed above performed this Indoor Air and Soil Vapor Assessment in general conformance with the ASTM E1903-11 Standard Practice for Indoor Air and Soil Vapor Assessments. The listed individuals meet the qualifications for individuals completing or overseeing all appropriate inquiries, and possess sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding the existence of environmental conditions on the property. Any work completed on this Indoor Air and Soil Vapor Assessment by an individual who is not considered an environmental professional was completed under the supervision or responsible charge of the environmental professional.

I.0 INTRODUCTION

In accordance with our Proposal and Standard Conditions for Engagement, EnviroBusiness, Inc. (dba EBI Consulting, hereinafter "EBI") is pleased to submit our *Indoor Air and Soil Vapor Assessment Report* on the property located at 3355 West Olympic Boulevard and 989 South St. Andrews Place, Los Angeles, California (the Subject Property). Mr. Chad Bechtel of EBI conducted the investigation at the Subject Property on September 17, 2020.

I.1 BACKGROUND

EBI was requested to conduct an indoor air and soil vapor assessment to evaluate the potential impact to the Subject Property from the following recognized environmental conditions (RECs) identified in AEI Consultants (AEI) (August 28, 2020) Phase I ESA report:

- *The subject property has been utilized as an automobile service and body facility since circa 1968. Auto repair facilities typically store and utilize solvents and petroleum products on site. Records pertaining to historical solvent usage were not available prior to the implementation of regulatory oversight of hazardous substances. A spray paint booth was formerly utilized at the subject property. A violation was issued in 2019 ordering the property tenant to remove the "non-compliant cleaning solvents exceeding 25 g/L volatile organic compounds (VOC)" from the subject property. Chlorinated solvents were often used in parts washers and spray gun cleaning operations. These solvents, even when properly stored and handled, can readily migrate into the subsurface as a result of small releases associated with on-site operations. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil and soil gas, and migrate to groundwater beneath a facility. Based on the previous subsurface investigation at the subject property further discussed in Section 6.3, it does not appear that soil samples were analyzed for chlorinated solvents. As such, AEI is unable to rule out the potential that the subsurface has been impacted by former solvent use. The northern portion of the subject property is currently utilized as a daycare facility. There is a potential that the historical operations and potential chlorinated solvent use at the auto repair facility represent a significant vapor migration concern to the current daycare facility.*

I.2 STATEMENT OF OBJECTIVES

The primary objective of this Indoor Air and Soil Vapor Assessment was to evaluate potential impact to the Subject Property from the RECs identified in the Phase I ESA prepared by AEI (August 28, 2020) for the purpose of providing sufficient information regarding the nature and extent of contamination to assist in making informed business decisions about the Subject Property; and where applicable, providing the level of knowledge necessary to satisfy the innocent purchaser defense under CERCLA. The investigation focused on interior locations throughout the basement and bottom floors of the Subject Property buildings.

In order to achieve the objectives of this investigation, EBI performed the following tasks:

- Installed three interior sub-slab vapor probes (SV-1 through SV-3) in the basement of the main Subject Property building and two interior sub-slab vapor probes (SV-4 and SV-5) in the floor of the smaller classroom building on the Subject Property.
- Collected one soil vapor sample from each sub-slab vapor probe location. The samples were submitted under chain-of-custody documentation to a California-certified independent laboratory (H&P Mobile Geochemistry of Carlsbad, California) for analysis of VOCs (i.e., chlorinated solvents)

and the liquid tracer 1,1-difluoroethane (1,1-DFA) via United States Environmental Protection Agency (EPA) Method Toxic Organic (TO)-15.

- Collected five indoor air samples (IA-1 through IA-5) and one ambient air sample (AA-1) at the Subject Property. The samples were submitted under chain-of-custody documentation to a California-certified independent laboratory (H&P Mobile Geochemistry), for analysis of VOCs (i.e., chlorinated solvents) via EPA Method TO-15.
- Prepared this summary of pertinent information obtained during this investigation including accompanying illustrations and appendices, along with EBI's findings and preliminary conclusions regarding the presence or absence of contamination in soils beneath the Subject Property in the areas investigated.

A detailed description of investigation methods is provided in Section 3.0 of this report. A crawl space was discovered beneath most of the main building. A small basement area was observed under the western portion of the main Subject Property building. Due to the access constraints of the large crawl space area, the three sub-slab soil vapor samples proposed to be collected throughout the building were instead collected from the small basement.

1.3 LIMITATIONS AND ASSUMPTIONS

This *Report* was prepared for the use of *Bank of Hope*. It was performed in accordance with ASTM E1903-11, accepted practices of other consultants undertaking similar studies at the same time and in the same locale under like circumstances. The conclusions provided by EBI are based solely on the information obtained during the subsurface investigation. EBI renders no opinion as to the presence of potential contamination in the areas not investigated. The observations in this *Report* are valid on the date of the investigation. Any additional information that becomes available concerning the Subject Property should be provided to EBI so that our conclusions may be revised and modified, if necessary. This *Report* has been prepared in accordance with the proposal approved by *Bank of Hope* and with the limitations and assumptions described below, all of which are integral parts of this *Report*. No other warranty, express or implied, is made.

Limitations

1. The observations described in this *Report* were made under the conditions stated herein. The conclusions presented are based solely upon the services described, and not on scientific tasks or procedures beyond the scope of described services or the time and budgetary constraints imposed by Client. The work described in this *Report* was carried out in accordance with terms and conditions in our Authorization Letter and Agreement for Environmental Services regarding the Site, which are incorporated herein by references.
2. In preparing this *Report*, EBI has relied on certain information provided by state and other referenced parties, and on information contained in the files of federal, state and/or local agencies available to EBI at the time of the assessment. Although there may have been some degree of overlap in the information provided by these various sources, EBI did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of these Environmental Services.
3. Observations were made of the Site and of structures on the Site as indicated within the *Report*. Where access to portions of the Site or to structures on the Site was unavailable or limited, EBI renders no opinion as to the presence of oil or hazardous materials (OHM) in that portion of the Site

or structure. In addition, EBI renders no opinion as to the presence of OHM or the presence of indirect evidence relating to OHM where direct observation of the interior walls, floor, or ceiling of a structure on a Site was obstructed by objects or coverings on or over these surfaces. No representations concerning insulating material is express or implied.

4. EBI did not perform testing or analyses to determine the presence or concentration of asbestos, radon, or lead at the Site unless specifically stated otherwise in the Report. Similarly, no investigation of dust or air quality was conducted unless specifically stated otherwise in the Report.
5. The purpose of this Report is to assess the physical characteristics of the Site with respect to the presence of OHM in the environment. No specific attempt was made to determine the compliance of present or past owners or operators of the Site with federal, state, or local laws or regulations (environmental or otherwise).
6. Except as noted in the Report, no quantitative laboratory testing was performed as part of the assessment. Where such analyses have been conducted by an outside laboratory, EBI has relied upon the data provided, and has not conducted an independent evaluation of the reliability of this data.
7. Any qualitative or quantitative information regarding the Site, which was not available to EBI at the time of this assessment may result in a modification of the representations made herein.
8. It is acknowledged that EBI judgments shall not be based on scientific or technical test or procedures beyond the scope of the Services or beyond the time and budgetary constraints imposed by Client. It is acknowledged further that EBI conclusions shall not rest on pure science but on such considerations as economic feasibility and available alternatives. Client also acknowledges that, because geologic and soil formations are inherently random, variable, and indeterminate in nature, the Services and opinions provided under this Agreement with respect to such Services, are not guaranteed to be a representation of actual conditions on the Site, which are also subject to change with time as a result of natural or man-made processes, including water permeation. In performing the Services, EBI shall use that degree of care and skill ordinarily exercised by environmental consultants or engineers performing similar services in the same or similar locality. The standard of care shall be determined solely at the time the Services are rendered and not according to standards utilized at a later date. The Services shall be rendered without any other warranty, express or implied, including, without limitation, the warranty of merchant ability and the warranty of fitness for a particular purpose.
9. Client and EBI agree that to the fullest extent permitted by law, EBI shall not be liable to Client for any special, indirect or consequential damages whatsoever, whether caused by EBI's negligence, errors, omissions, strict liability, breach of contract, breach of warranty or other cause of causes whatsoever.

Assumptions

1. This Indoor Air and Soil Vapor Assessment does not address the evaluation of business environmental risks in light of data collected through the Indoor Air and Soil Vapor Assessment process. Such evaluation is a function of site and transaction-specific variables, and of the user's objectives and risk tolerance. This practice contemplates that the Indoor Air and Soil Vapor Assessment process was planned and conducted with such variables in mind, and that the user will evaluate legal, business and environmental risks in light of known data relating to the particular site and transaction, and in consultation with legal and business advisors as well as the Vapor Assessor.
2. The ASTM E1903-II does not define the threshold levels at which target analytes pose a concern of significance to the user. Users may apply this practice not only in light of applicable regulatory criteria and relevant liability principles, but also to meet self-defined objectives.

3. The scope of work for this Indoor Air and Soil Vapor Assessment is site-specific and context-specific. The assessment process defined by ASTM E1903-11 is intended to generate sound, objective, and defensible information sufficient to satisfy diverse user objectives.
4. No Indoor Air and Soil Vapor Assessment can eliminate all uncertainty. Furthermore, any sample, either surface or subsurface, taken for chemical testing may or may not be representative of a larger population. Professional judgment and interpretation are inherent in the process, and even when exercised in accordance with objective scientific principles, uncertainty is inevitable. Additional assessment beyond that which was reasonably undertaken may reduce the uncertainty.
5. Even when Indoor Air and Soil Vapor Assessment work is executed competently and in accordance with ASTM E1903-11, it must be recognized that certain conditions present especially difficult target analyte detection problems. Such conditions may include, but are not limited to, complex geological settings, unusual or generally poorly understood behavior and fate characteristics of certain substances, complex, discontinuous, random, or spotty distributions of existing target analytes, physical impediments to investigation imposed by the location of utilities and other man-made objects, and the inherent limitations of assessment technologies.
6. The Indoor Air and Soil Vapor Assessment is intended to develop and present sound, scientifically valid data concerning actual site conditions. It shall not be the role of the Vapor Assessor to provide legal or business advice.

1.4 SPECIAL TERMS AND CONDITIONS

This Indoor Air and Soil Vapor Assessment (the report) has been prepared to assist *Bank of Hope* in its underwriting of a proposed mortgage loan on the Subject Property. This report can be relied upon by only the parties stated in the transmittal letter at the front of this report. EBI's liability to a purchaser wishing to use this report is limited to the cost of the report. Amendments to EBI's limitations as stated herein that may occur after issuance of the report are considered to be included in this report. Payment for the report is made by, and EBI's contract and report extends to *Bank of Hope* only, in accordance with our Standard Conditions for Engagement and, Authorization Letter and Agreement for Environmental Services.

2.0 SUBJECT PROPERTY BACKGROUND

2.1 SUBJECT PROPERTY DESCRIPTION AND FEATURES

Information regarding the Subject Property description, improvements, and operations is summarized below:

PROPERTY DESCRIPTION, IMPROVEMENTS, AND OPERATIONS	
Address	3355 West Olympic Boulevard and 989 South St. Andrews Place, Los Angeles, California
Location	Northwest quadrant of the intersection of West Olympic Boulevard and South St. Andrews Place
Property Owner	Unknown
Number of Parcels	Two – 5081-033-010, 581-033-009
Total Land Area	0.37 acre
Number/Type of Buildings	Three/Auto Repair and Day Care
Number of Stories	One and two story buildings
Date of Construction	1922 - 1968
Area (SF)	Unknown
Basement	One under the day care building
Operations	Auto repair and day care
Site Characteristics	At the time of inspection, the Subject Property is occupied by Joy Auto Center (3355 West Olympic Boulevard) and Wiz Island nursery school (989 South St. Andrews Place).

2.2 PHYSICAL SETTING

Information regarding the physical settings at the Subject Property and immediate vicinity is summarized below:

PHYSICAL SETTING DESCRIPTIONS	
Regional Geology	Information concerning the geology of the Subject Property was obtained from the USGS Ground Water Atlas of the United States, California region (1995). The Subject Property is located within the Pacific Border physiographic province, which is characterized by steep rolling hills and mountains and consists of severely folded, faulted, commonly metamorphosed marine and continental sediments.
Depth to Bedrock	No bedrock outcroppings were noted at the Subject Property. Depth to bedrock is unknown.
Surficial Features	Surface drainage on the Subject Property occurs over land to the surrounding streets primarily to the south and east. No indication of cross-lot runoff, swales, drainage flows, or active rills or gullies were observed on the Subject Property.
Surficial Soils	According to the Natural Resources Conservation Service (NRCS) Web Soil Survey (WSS) website (http://websoilsurvey.nrcs.usda.gov/app/), the dominant soil composition in the vicinity of the Subject Property is classified as Urban land-Montebello complex, 0 to 5 percent slopes (Map Unit 1238).
Soil Stratigraphy Encountered during the Investigation	Soil stratigraphy was not encountered during the investigation.

PHYSICAL SETTING DESCRIPTIONS	
Estimated Direction of Groundwater Flow	Local groundwater gradient is expected to follow surface topography; therefore, groundwater flow near the Subject Property is expected to flow to the south-southeast. Groundwater depths and flow gradients are best evaluated by a subsurface investigation involving the installation of at least three groundwater monitoring wells and precise measurements of hydrostatic pressure. Monitoring wells were not observed on the Subject Property.
Depth to Groundwater (encountered during the investigation)	Shallow groundwater was not encountered during the investigation.

2.3 SITE HISTORY AND LAND USE

According to the Phase I ESA prepared by AEI (August 28, 2020), the site history and land use is summarized in the following table:

Period	Site History And Land Use
At least 1907-1921	Agricultural land
1922-Present	Current commercial building with residence/nursery school occupancy (989-991 South St. Andrews Place).
1922-1940	Former building constructed for residential occupancy (3355-3363 West 10th Street/West Olympic Boulevard).
1940-1968	Former building constructed for service station occupancy (3361 West Olympic Boulevard).
1968 to Present	Current commercial building constructed for automobile repair occupancy (3355-3363 West Olympic Boulevard).

2.4 ADJACENT PROPERTY LAND USE

Property use in the vicinity of the Subject Property is primarily characterized by residential and retail/commercial development.

ADJOINING PROPERTIES	
North	The Subject Property is bound to the north by a multi-family residence (981 South St. Andrews Place).
South	The Subject Property is bound to the south by West Olympic Boulevard followed by Woori America Bank (3360 West Olympic Boulevard).
East	The Subject Property is bound to the east by South St Andrews Place followed by a residence (986 South St Andrews Place) and Kim's Smog Test Only (3345 West Olympic Boulevard).
West	The Subject Property is bound to the west by the former Ilcha Korean BBQ (3377 West Olympic Boulevard).

2.5 SUMMARY OF PREVIOUS ENVIRONMENTAL ASSESSMENTS

EBI was requested to conduct an Indoor Air and Soil Vapor Assessment to evaluate the potential impact to the Subject Property based on the following RECs identified in AEI's (August 28, 2020) Phase I ESA report:

- *The subject property has been utilized as an automobile service and body facility since circa 1968. Auto repair facilities typically store and utilize solvents and petroleum products on site. Records pertaining to historical solvent usage were not available prior to the implementation of regulatory oversight of hazardous substances. A spray paint booth was formerly utilized at the subject property. A violation was issued in 2019 ordering the property tenant to remove the "non-compliant cleaning solvents exceeding 25 g/L VOC" from the subject property. Chlorinated solvents were often used in parts washers and spray gun cleaning operations. These solvents, even when properly stored and handled, can readily migrate into the subsurface as a result of small releases associated with on-site operations. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil and soil gas, and migrate to groundwater beneath a facility. Based on the previous subsurface investigation at the subject property further discussed in Section 6.3, it does not appear that soil samples were analyzed for chlorinated solvents. As such, AEI is unable to rule out the potential that the subsurface has been impacted by former solvent use. The northern portion of the subject property is currently utilized as a daycare facility. There is a potential that the historical operations and potential chlorinated solvent use at the auto repair facility represent a significant vapor migration concern to the current daycare facility.*

3.0 RATIONALE AND WORK PERFORMED

3.1 RATIONALE

3.1.1 Conceptual Model

The Conceptual Model is a representation of hypothesized current site conditions, which describes the physical setting characteristics of a site and the likely distribution of target contaminants (in soil, air, ground water, surface water and/or sediments) that might have resulted from a known or likely release and the risk they pose to human and/or ecological receptors. This Conceptual Model takes into consideration the potential distributions of contaminants with respect to the properties, behaviors and fate and transport characteristics of the contaminant in a setting such as that being assessed. The sampling plan was designed to provide for the collection of potentially contaminated environmental media, if they occur, at locations and depths where the highest concentrations are likely to occur.

Site Environmental Concerns		Site Physical Characteristics		Onsite Environmental Receptors	
RECs	COC's	Primary Release Media	Fate & Transport	Potential Exposure Route(s)	Potential Human Exposure
Auto repair	VOCs	Soil Groundwater Indoor Air	Soil Soil Vapor Groundwater Indoor Air	Ingestion Inhalation Dermal (direct Contact)	Tenants Site workers Construction workers

COC = contaminants of concern

Assumptions:

1. Assumes the Subject Property retains existing use (Commercial)
2. Construction Worker exposure is limited due to short exposure duration

3.1.2 Rationale for Indoor Air and Soil Vapor Probe Placement

The rationale for the placement of the indoor air and soil vapor probes was based on the 1) the *Likely Release Areas* that target analytes were first introduced into environmental media as a result of a release; and 2) the likely vertical and horizontal migration of the release.

3.1.3 Chemical Testing Plan

The chemical testing plan was designed to detect the target analytes that are present in, or have been released or potentially have been released to, environmental media at the site, and which are of interest in the context of the particular Indoor Air and Soil Vapor Assessment and its objectives, the presence of which will be sought and concentrations of which will be quantified through chemical testing.

3.1.4 Deviations from the Proposed Scope of Work

A crawl space was discovered beneath most the main building. A small basement area was observed under the western portion of the main Subject Property building. Due to the large crawl space area the three sub-slab soil vapor samples proposed to be collected throughout the building were instead collected

from the small basement. Additionally, a portion of the basement slab had a square cut exposing the bare soil in the basement area. There were no other deviations to the proposed scope of work.

3.2 EXPLORATION, SAMPLING, AND TEST SCREENING METHODS

3.2.1 Pre-Drilling Activities

Personal health and safety precautions were followed in accordance with applicable federal and state law or local equivalents and any requirements imposed by the owner, occupant, or field personnel. EBI prepared a site-specific health and safety plan (HASP) and conducted a health and safety meeting with the onsite personnel prior to the drilling activities. No additional pre-drilling activities were performed as part of this investigation.

3.2.2 Soil Vapor Monitoring Points

A total of five vapor probes (SV-1 through SV-5) were installed at the Subject Property. The vapor probes were installed by drilling 5/8" diameter holes in the concrete floor slab with a rotary hammer drill to access the soil vapor immediately beneath the concrete.

**TABLE 3.2.2
 SUMMARY OF SOIL VAPOR SAMPLE DETAILS**

Vapor Sample ID#	Location	Termination Depth/Reason (feet bgs)	Depth to Groundwater (feet)	Sample ID #/ Depths	Target Analytes/ EPA Method
SV-1	Interior location, east end of primary Subject Property building basement	Sub-slab (termination per SOW)	Not encountered	SV-1 (SS)	VOCs / TO-15
SV-2	Interior location, center of primary Subject Property building basement	Sub-slab (termination per SOW)	Not encountered	SV-2 (SS)	VOCs / TO-15
SV-3	Interior location, west end of primary Subject Property building basement	Sub-slab (termination per SOW)	Not encountered	SV-3 (SS)	VOCs / TO-15
SV-4	Interior location, northwest corner of smaller classroom building	Sub-slab (termination per SOW)	Not encountered	SV-4 (SS)	VOCs / TO-15
SV-5	Interior location, southeast corner of smaller classroom building	Sub-slab (termination per SOW)	Not encountered	SV-5 (SS)	VOCs / TO-15
Notes: VOCs – Volatile organic compounds (VOCs) – via EPA Method Toxic Organic (TO)-15 for soil vapor SV = Soil vapor sample (#) – Depth below grade sample collected					

Soil Vapor sample locations are illustrated on Figure 3, Sampling Location Map.

3.2.3 Soil Vapor Sampling and Analysis

Soil vapor sampling points were installed by drilling 5/8" diameter holes through the concrete floor slab with a rotary hammer drill to access the soil vapor approximately 5 to 6 inches beneath the concrete slab. Following the drilling of access holes, temporary soil vapor sampling points were installed at each location. The vapor sampling points were constructed by placing a small quantity of sand in the bottom of the boring, followed by placement of the vapor probe, which consisted of a two-inch plastic vapor probe attached to Nylaflo tubing that extended to approximately two feet above the ground level. Additional sand was placed into the boring to cover the vapor probe with approximately 2 inches of sand. Dry granular bentonite was used to fill the borehole annular space to above the base of the concrete foundation. Hydrated bentonite was then placed above the dry granular bentonite and hydrated at the surface to ensure proper sealing. Each vapor probe location was allowed to equilibrate for a minimum of two hours prior to purging and sampling activities.

The soil vapor samples were collected in laboratory certified clean 1-liter summa canisters. The canisters were delivered with a 30" Hg vacuum. The sampling train was attached and a shut in test was performed to verify that no leaks were present. A purge syringe was connected and three well volumes of soil vapor was purged from each sampling point prior to sample collection. The soil vapor sampling canisters were then connected and allowed to collect soil vapor until the vacuum pressure gauge on the sampling train showed a remaining vacuum pressure of approximately 5" Hg, which took approximately 2 minutes. In addition, a rag sprayed with the liquid tracer 1,1-DFA was placed in a zip lock bag on the ground immediately adjacent to the sampling train in order to assess the potential leakage of ambient air into the soil vapor sample. The samples were labeled/logged onto a chain-of-custody form. After collection, the samples were submitted to an independent qualified laboratory (H&P Mobile Geochemistry) for analyses. The samples were analyzed for the target analytes noted in Table 3.2.2

3.2.4 Indoor Air Sampling

A total of five indoor air samples were collected at the Subject Property. One ambient air sample was collected from an exterior location, upwind of the building to provide data regarding ambient background conditions. The samples were collected in six liter Summa passivated stainless steel canisters and were collected over an approximately 8 hour period. The indoor air samples were collected within the breathing zone (approximately five feet above the floor level). The ambient air sample was collected at least six feet from the ground.

Prior to collection, EBI utilized a photoionization detector (PID) to screen indoor air for the presence of ionizable VOCs. The PID was calibrated with an isobutylene standard to measure total VOCs as isobutylene equivalents. No elevated PID readings above background were observed at any of the indoor air sampling locations. In addition, EBI did not note any oils or other chemicals stored within 50 feet of the indoor air sampling locations.

The samples were labeled/logged onto a chain-of-custody form and submitted to an independent qualified laboratory (H&P Mobile Geochemistry) for analyses of VOCs by EPA Method TO-15.

TABLE 3.2.4
SUMMARY OF INDOOR AIR SAMPLING DETAILS

Boring ID#	Location	Sample ID #	Target Analytes/ EPA Method
AA-1	In playground between main Subject Property building and smaller classroom building.	AA-1	VOCs (chlorinated solvents)/TO-15
IA-1	Eastern classroom of the main Subject Property building.	IA-1	VOCs (chlorinated solvents)/To-15
IA-2	Front desk of the main Subject Property building.	IA-2	VOCs (chlorinated solvents)/TO-15
IA-3	Southwestern classroom of the main Subject Property building.	IA-3	VOCs (chlorinated solvents)/TO-15
IA-4	Northwest corner of smaller classroom building.	IA-4	VOCs(chlorinated solvents)/TO-15
IA-5	Southeast corner of smaller classroom building.	IA-5	VOCs (chlorinated solvents)/TO-15
Notes: VOCs -Volatile organic compounds via EPA Method TO-15 AA – Ambient Air IA – Indoor Air			

Indoor air sampling locations are illustrated on Figure 3, Sampling Location Map.

3.2.5 Abandonment of Soil Vapor Points

Upon completion of the soil vapor sampling activities, each borehole in the concrete floor slab was filled with concrete patch.

4.0 PRESENTATION OF EVALUATION AND RESULTS

4.1 SUB-SLAB SOIL VAPOR ANALYSIS RESULTS

4.1.1 Results of Analyses

The sub-slab soil vapor samples were analyzed for the target analytes noted in Table 3.2.2. The following table presents only the contaminants identified above the laboratory method detection limits.

Table 4.1		Sub-Slab Soil Vapor Results							
Results flagged as "Exceed" if any of the selected criteria exceeded (most stringent).							Legend:	Hit	Exceed
Client Sample ID:		SV-1 (SS)	SV-2 (SS)	SV-3 (SS)	SV-4 (SS)	SV-5 (SS)	DTSC-SL Res / Com		
Lab Sample ID:		E009063-01	E009063-02	E009063-03	E009063-04	E009063-05			
Date Sampled:		9/17/2020	9/17/2020	9/17/2020	9/17/2020	9/17/2020			
Matrix:		Soil Vapor	Soil Vapor	Soil Vapor	Soil Vapor	Soil Vapor			
Volatile Organic Compounds (VOCs)									
I,1-DFA Leak Check Compound	µg/m ³	11,000	190	190	400	34	----		
Tetrachloroethene (PCE)	µg/m ³	7.2	13	11	ND (<6.9)	ND (ND (<6.9))	15 / 67

Vinyl chloride	µg/m ³	ND (<2.6)	ND (<2.6)	ND (<2.6)	ND (<2.6)	ND (<2.6)	0.32 / 5.2		

Notes: All results are shown in micrograms-per-cubic meter (µg/m³)

ND = Non-detect

DTSC SL – California Department of Toxic Substances HERO HHRA Note Number 3, issued June 2018, Table 3 DTSC Screening Level for Residential and Commercial/Industrial Air Calculated using RSL Calculator with an Existing Building sub-slab attenuation factor of 0.03 for Residential and Commercial/Industrial Air. Please note that the San Francisco Bay Regional Water Quality Control Board's Environmental Screening level (ESL) (2019, Rev. 2) for subslab/soil gas is shown if a DTSC-SL has not been developed for a particular constituent.

The results of analyses of the sub-slab soil vapor samples indicate that no VOCs were detected at concentrations exceeding the laboratory method detection limits except tetrachloroethene (PCE). PCE was detected in the three of the five samples at concentrations up to 13 micrograms per cubic meter (µg/m³). As shown above, the corresponding DTSC-SLs for PCE in residential and commercial soil vapor are 15 and 67 µg/m³.

4.1.2 Quality Control Assessment of Chemical Data

As noted in Section 3.2.3, leak testing was performed, which consisted of introducing a I,1-DFA tracer liquid onto a rag in the vicinity of the sampling apparatus. The soil vapor analytical results indicated that I,1-DFA was detected in each of the samples submitted for analysis.

While the concentrations of the leak check compound are relatively low for four of the five samples, they may be interpreted as unacceptable per the DTSC guidance, as written. The DTSC threshold for liquid leak tolerance is 10 times the reporting limit, and it is suggested that the reporting limit of the leak check compound be similar to the reporting limit of the target VOCs. For the EPA TO-15 method, these vary, but are generally in the 3 to 10 µg/m³ range with I-1-DFA itself at 5.5 µg/m³. Reporting limits will vary for each laboratory depending on calibration, increase with sample concentrations, and dilutions, etc. Therefore, the DTSC threshold for liquid leak checks is a value that is open to interpretation and change.

According to H&P Mobile Geochemistry (H&P), the California certified laboratory that was used to analyze the samples, internal studies conducted by H&P indicate that the average starting surface concentration for a leak check compound is approximately 1,000,000 µg/m³. Based on this information, using a conservatively value of 500,000 µg/m³ as an estimated starting surface concentration for a leak check compound, the percentage of leak in each of the sub-slab soil vapor samples collected by EBI ranged from <0.05 percent leak in samples SV-2 and SV-3 to a 2.2 percent leak in sample SV-1 (11,000 of 500,000 µg/m³; please note that leaks of up to 10,000 µg/m³ are generally considered acceptable in most other states and a value of 1,000 µg/m³ is considered a one percent leak). Based on this information and considering that the DTSC allows a five percent leak when using helium, it could be argued that, while communication occurred, it resulted in minimal impact on the evaluation of the results for all points except the sample collected from SV-1, which showed a more significant detection. Based on this information, the integrity of the samples do not appear to have been compromised during sampling. Please note that a large hole was observed in the concrete floor of the basement approximately three feet from sample location SV-1 where the highest I-I-DFA concentration was detected.

Laboratory soil vapor analytical results and complete laboratory data sheets and chain-of-custody documentation are presented in Appendix B.

4.2 INDOOR AIR ANALYSIS RESULTS

The indoor air samples were analyzed for the target analytes noted in Table 3.2.4. The following table presents the results of analysis of both the indoor air samples (IA-1 through IA-5) and the ambient air sample (AA-1).

Table 4.2		Indoor Air Results							
Results flagged as "Exceed" if any of the selected criteria exceeded (most stringent).							Legend:	Hit	Exceed
Client Sample ID:		IA-1	IA-2	IA-3	IA-4	IA-5	AA-1	DTSC-SL Res / Com	
Lab Sample ID:		E009063-06	E009063-07	E009063-08	E009063-09	E009063-10	E009063-11		
Date Sampled:		9/17/2020	9/17/2020	9/17/2020	9/17/2020	9/17/2020	9/17/2020		
Matrix:		Indoor Air	Indoor Air	Indoor Air	Indoor Air	Indoor Air	Ambient Air

Notes: All results are shown in micrograms-per-cubic meter (µg/m³)
 ND = Non-detect
 DTSC SL – California Department of Toxic Substances HERO HHRA Note Number 3, issued June 2020, Table 3 DTSC Screening Level for Residential and Commercial/Industrial Air. Please note that the San Francisco Bay Regional Water Quality Control Board's (RWQCB's) Environmental Screening level (ESL) (2019, Rev. 2) for Indoor Air is shown if a DTSC-SL has not been developed for a particular constituent.

The indoor air sample results of analyses indicate that no VOCs were detected at concentrations exceeding the laboratory method detection limit.

Laboratory indoor air analytical results and complete laboratory data sheets and chain-of-custody documentation are presented in Appendix B.

5.0 FINDINGS & CONCLUSIONS

We have performed an Indoor Air and Soil Vapor Assessment at the property located at 3355 West Olympic Boulevard and 989 South St. Andrews Place, Los Angeles, California, in general conformance with the scope and limitations of ASTM E1903-11 and for the following objectives:

- The primary objective of this Indoor Air and Soil Vapor Assessment was to evaluate potential impact to the Subject Property from the RECs identified in the Phase I ESA prepared by EBI (August 28, 2020) for the purpose of providing sufficient information regarding the nature and extent of contamination to assist in making informed business decisions about the property; and where applicable, providing the level of knowledge necessary to satisfy the innocent purchaser defense under CERCLA. The investigation focused on interior locations throughout the basement and bottom floors of the Subject Property buildings.

The Indoor Air and Soil Vapor Assessment scope of work conducted by EBI including the following:

- 1) Installed three interior sub-slab vapor probes (SV-1 through SV-3) in the basement of the main Subject Property building and two interior sub-slab vapor probes (SV-4 and SV-5) in the floor of the smaller classroom building on the Subject Property.
- 2) Collected one soil vapor sample from each sub-slab vapor probe location. The samples were submitted under chain-of-custody documentation to a California-certified independent laboratory (H&P), for analysis of VOCs (i.e., chlorinated solvents) and the liquid tracer 1,1-DFA via EPA Method TO-15.
- 3) Collected five indoor air samples (IA-1 through IA-5) and one ambient air sample (AA-1) at the Subject Property. The samples were submitted under chain-of-custody documentation to a California-certified independent laboratory (H&P) for analysis of VOCs (i.e., chlorinated solvents) via EPA Method TO-15.

Validation of the Conceptual Model

It is EBI's opinion that the findings and results of this Indoor Air and Soil Vapor Assessment investigation are consistent with and support the assumptions of the Conceptual Model presented in Section 3.1.1. Sufficient investigation has been demonstrated to support sound conclusions regarding the presence of the target analytes.

Findings

The findings of the investigation indicated the following:

- 1) The results of analyses of the sub-slab soil vapor samples indicate that no VOCs were detected at concentrations exceeding the laboratory method detection limits except tetrachloroethene (PCE). PCE was detected in the three of the five samples at concentrations up to 13 micrograms per cubic meter ($\mu\text{g}/\text{m}^3$). As shown above, the corresponding DTSC-SLs for PCE in residential and commercial soil vapor are 15 and 67 $\mu\text{g}/\text{m}^3$.
- 2) The indoor air sample results of analyses indicate that no VOCs were detected at concentrations exceeding the laboratory method detection limit.

Conclusions

Based on the findings of this Indoor Air and Soil Vapor Assessment, EBI concludes the following:

- 1) Significant subsurface impacts related to the historical use of chlorinated solvents at the former auto repair facility were not identified beneath the Subject Property.
- 2) PCE was not identified in the sub-slab soil vapor beneath the Subject Property at concentrations that pose an unacceptable vapor intrusion threat to indoor air at the Subject Property.
- 3) Chlorinated solvents were not identified in the indoor air at the Subject Property.

6.0 RECOMMENDATIONS

Based on the findings and conclusions of this Phase II ESA, no further action is recommended.

Burlington, MA 01803

H&P Project: EBI091820-11 Rev
Client Project: 1220000223 / Los Angeles

Dear Chad Bechtel:

Enclosed is the analytical report for the above referenced project. The data herein applies to samples as received by H&P Mobile Geochemistry, Inc. on 18-Sep-20 which were analyzed in accordance with the attached Chain of Custody record(s).

The results for all sample analyses and required QA/QC analyses are presented in the following sections and summarized in the documents:

- Sample Summary
- Case Narrative (if applicable)
- Sample Results
- Quality Control Summary
- Notes and Definitions / Appendix
- Chain of Custody
- Sampling Logs (if applicable)

Unless otherwise noted, I certify that all analyses were performed and reviewed in compliance with our Quality Systems Manual and Standard Operating Procedures. This report shall not be reproduced, except in full, without the written approval of H&P Mobile Geochemistry, Inc.

We at H&P Mobile Geochemistry, Inc. sincerely appreciate the opportunity to provide analytical services to you on this project. If you have any questions or concerns regarding this analytical report, please contact me at your convenience at 760-804-9678.

Sincerely,

Lisa Eminhizer
Laboratory Director

H&P Mobile Geochemistry, Inc. is certified under the California ELAP and the National Environmental Laboratory Accreditation Conference (NELAC) for the fields of proficiency and analytes listed on those certificates. H&P is approved as an Environmental Testing Laboratory in accordance with the DoD-ELAP Program and ISO/IEC 17025:2005 programs for the fields of proficiency and analytes included in the certification process and to the extent offered by the accreditation agency. Unless otherwise noted, accreditation certificate numbers, expiration of certificates, and scope of accreditation can be found at: www.handpmg.com/about/certifications. Fields of services and analytes contained in this report that are not listed on the certificates should be considered uncertified or unavailable for certification.

Notes and Definitions

- E The concentration indicated for this analyte is an estimated value above the calibration range of the instrument. This value is considered an estimate (CLP E-flag).
- LCC Leak Check Compound
- ND Analyte NOT DETECTED at or above the reporting limit
- MDL Method Detection Limit
- %REC Percent Recovery
- RPD Relative Percent Difference

All soil results are reported in wet weight.

Appendix

H&P Mobile Geochemistry, Inc. is approved as an Environmental Testing Laboratory and Mobile Laboratory in accordance with the DoD-ELAP Program and ISO/IEC 17025:2005 programs through PJLA, accreditation number 69070 for EPA Method TO-15, EPA Method 8260B and H&P 8260SV.

H&P is approved by the State of California as an Environmental Laboratory and Mobile Laboratory in conformance with the Environmental Laboratory Accreditation Program (ELAP) for the category of Volatile and Semi-Volatile Organic Chemistry of Hazardous Waste, certification numbers 2740, 2741, 2743 & 2745.

H&P is approved by the State of Louisiana Department of Environmental Quality under the National Environmental Laboratory Accreditation Conference (NELAC) certification number 04138

The complete list of stationary and mobile laboratory certifications along with the fields of testing (FOTs) and analyte lists are available at www.handpmg.com/about/certifications.

APPENDIX C

PROFESSIONAL QUALIFICATIONS

SUMMARY OF EXPERIENCE

Chad Bechtel is an EBI Project Scientist. He has worked in the environmental field since 2005. His experience includes conducting environmental site assessments, asbestos surveys, lead-based paint surveys, limited indoor air quality evaluations, visual mold inspections, hazardous materials inspections, abatement/remediation project oversight and monitoring, and clearance inspections and sampling, as well as preparing reports and project documents and submitting documents for regulatory compliance. He has been assigned to projects involving remedial investigations with tasks including groundwater, soil and soil vapor sampling, monitoring well installations and development of wells and regulatory oversight of underground storage tank removals.

RELEVANT PROJECT EXPERIENCE

ASTM PHASE I ENVIRONMENTAL SITE ASSESSMENTS (ESAs): Conducted various Phase I Environmental Assessments for both private sector and municipal clients on properties throughout the western United States. Included visual inspections of properties, comprehensive photographic logs, interviews, review of historical records, and comprehensive written reports. The ESAs were performed in accordance with the American Society of Testing and Materials (ASTM) Standard Practices for Environmental Site Assessment requirements, and Mr. Bechtel meets the ASTM requirements of an Environmental Professional (EP).

PHASE II ENVIRONMENTAL SITE ASSESSMENTS: Conducted various Phase II Site Assessment projects to evaluate potential soil and/or groundwater contamination. Performed numerous field activities which included collection of soil, soil vapor, and groundwater samples, measurement of water levels, submittal of samples for laboratory analysis submittal under proper chain of custody, and prepared reports of the findings.

PHASE III ENVIRONMENTAL REMEDIATION OVERSIGHT: Provided regulatory oversight for the removal of contaminated groundwater and soil at various facilities including gasoline stations, shooting ranges and industrial facilities. Collected soil and groundwater samples for remediation progress reports and completion confirmation and prepared reports of the findings.

RADON SAMPLING: Followed strict guidelines for the placement and collection of radon samples in order to test for the presence of radon gas in indoor air at various apartment complexes and prepared reports of the findings.

LIMITED/COMPREHENSIVE ASBESTOS SURVEYS: Performed both Limited and Comprehensive inspections on buildings for asbestos containing materials (ACM) for planned renovations and/or demolitions. Assessed the condition of suspect ACM, either friable or non-friable, on interior and exterior portions of a facility and prepared reports of the findings.

ASBESTOS ABATEMENT OVERSIGHT: Performed regulatory oversight of asbestos abatement activities. Inspected worker training and fit test documents, containment construction and performed final visual clearance after abatement was completed. In addition, collected ambient air samples during abatement activities and clearance air samples following abatement activities and prepared reports of the findings.

NEPA ASSESSMENTS: Prepared numerous NEPA consultation reports, compliance audits, biological assessments and other various environmental assessments for telecommunications sites. Has helped various clients facilitate the Section 106 / environmental review process to ensure compliance with Federal Communications Commission (FCC) requirements under the National Environmental Policy Act (NEPA).

EDUCATION

B.S. in Geology, Arizona State University

PROFESSIONAL REGISTRATIONS

State of Arizona Registered Geologist

OSHA 40-Hour Hazardous Materials Training

EPA AHERA Certified Building Inspector/Management Planner/Contractor Supervisor

SUMMARY OF EXPERIENCE

Stephanie Clorey, Project Manager Site Investigation and Remediation Group has extensive experience in environmental geology since 1999. Mrs. Clorey has completed site investigations and remedial actions including Phase I Environmental Site Assessments, Phase II subsurface investigations, Site Characterizations, UST removals, and landfill compliance sampling and monitoring, sewer outfall sampling, health and safety construction/demolition monitoring, remediation system observation and maintenance, drinking water sampling, and radon surveys.

Mrs. Clorey has conducted multiple site assessments and regulatory site closures for a wide range of properties throughout the United States, Canada and Aruba. These assessments have been performed to evaluate site conditions, potential off-site liabilities, environmental control systems, and site remediation costs in order to advise prospective buyers, current operators, and owners of potential and existing environmental concerns.

RELEVANT PROJECT EXPERIENCE

Conducted ASTM Phase I Environmental Site Assessments, Environmental Site Screenings, soil, groundwater, and leachate sampling, landfill gas monitoring and construction oversight for landfill caps. Completed subsurface investigation at property types ranging from commercial to residential. Task manager for multiple gasoline refineries and terminals for conducting or general oversight of the weekly, monthly, and quarterly gauging, bailing, sampling and observation and maintenance of remediation systems. In charge of the sewer outfall sampling for one of the petroleum refineries. I also completed subsurface investigation at various gasoline service stations across Maryland, Pennsylvania and Virginia. Task manager for multiple gasoline service stations for conducting or general oversight of the weekly, monthly, and quarterly gauging, bailing, sampling and observation and maintenance of remediation systems. Completed oversight of the UST removals at over 12 gasoline service stations across Maryland and Virginia.

Completed subsurface investigation at property types such as industrial, commercial, landfills, refineries and residential. The subsurface investigations included direct-push sampling, hollow stem auger and mud rotary drilling for the installation of monitoring wells and soil vapor points. Completed subsurface investigations and oversight of the UST removals at various properties across Maryland, Virginia, Pennsylvania, and West Virginia. Assisted in processing several commercial and former industrial properties through state's Voluntary Clean Up/Brownfield Programs and Pennsylvania's Act 2 Program. Completed construction oversight air monitoring and was the site health and safety officer during the monitoring events.

SUMMARY OF EXPERIENCE

Mr. Bardsley has over 19 years of experience in soil, soil gas, surface water, stormwater, and groundwater investigations and remediation; and hazardous and solid waste management. He has experience as a project manager and/or project geologist on numerous environmental site assessments including real estate transfer, refinancing, and re-use and re-purposing assessments.

Activities have included all aspects of preliminary site assessments and subsequent site investigations on properties with environmental contamination, hazardous waste investigations, industrial facility closures, and underground storage tanks (USTs) / aboveground storage tanks (ASTs), and remediation projects. Mr. Bardsley has also negotiated with and obtained closure from various regulatory agencies.

Mr. Bardsley has worked with corporate environmental officers, Wall Street lending institutions, legal counsels, investment companies, petroleum related clients and real estate brokers to develop strategies for managing environmental due diligence investigation for property acquisition and financing. Mr. Bardsley has also provided litigation support for different environmental projects; and on-call environmental compliance inspections on several Washington State Department of Transportation (WSDOT) roadway construction projects. He has participated in a variety of projects throughout the United States, but more specically in the western United States including Alaska, Arizona, California, Colorado, Idaho, Montana, New Mexico, Nevada, Oregon, Texas, Utah, and Washington.

RELEVANT PROJECT EXPERIENCE

- Managed, conducted, and provided technical oversight for numerous phase I Environmental Site Assessments (ESAs) for sites throughout the western United States, as well as initial site assessments (ISAs) and hazardous substance liability assessments (HSLAs) for sites in California, in accordance with ASTM E 1527.
- Designed and conducted/managed numerous subsequent Phase II assessments. Examples include former and existing dry cleaning facilities, aerospace engineering facilities, electrical manufacturing facilities, former and current automobile dealerships and/or repair shops, former and current aggregate mining sites, former shooting ranges, former and current hot mix plants (asphalt concrete), former burn dumps, and former hospitals (including the former Sutter Memorial Hospital in Sacramento, California, which was repurposed for residential land uses).
- Managed, conducted, and provided technical oversight for the following:
 - Numerous petroleum-related facilities including retail gasoline service stations, bulk fuel facilities, pipeline projects, and automotive dealerships throughout the western United States.
 - A former coal mine that was backfilled with cement kiln dust (CKD) near Ravensdale, Washington.
 - Several “Rails to Trails” projects in California.
 - Various remediation and compliance projects including the following California sites: Port of Richmond, Marina Bay, North Hollywood Operable Unit (NHO) Superfund Site, and the Pacific Gas and Electric’s (PG&E’s) Topock and Hinkley Compressor Station sites. Some of the remediation and/or mitigation technologies have included large scale soil remediation projects, dual phase extraction (DPE) systems, air sparge (AS)/soil vapor extraction (SVE) systems, in-situ chemical oxidation (ISCO), and sub-slab depressurization (SSD) systems.

- Several Brownfields projects.
- Various solid waste facilities including active and former landfills including former burn dumps.
- Operated and maintained soil, soil gas, and groundwater remediation systems.
- Designed and conducted groundwater monitoring programs.
- Provided geologist services for both environmental and geotechnical subsurface investigations.

EDUCATION

- Bachelor of Arts in Geography (1995), University of Utah, Salt Lake City, Utah
- Bachelor of Arts in Geology (2000), University of Colorado, Boulder, Colorado

PROFESSIONAL REGISTRATIONS

- Professional Geologist, California #9170
- Professional Geologist, Oregon #G2167
- Professional Geologist, Washington #2623
- OSHA 29 CFR 1910.120 40 Hour HAZWOPER

PROFESSIONAL DEVELOPMENT COURSES

- *The Vapor Intrusion Risk Pathway: A Practical Guide* presented on May 8 and 9, 2018, in Santa Fe, New Mexico, by Hartman Environmental Geoscience (HEG) Training. Instructor was Dr. Blayne Hartman with HEG. Equivalent to 13.0 professional development hours.
- *Advances in Assessment the Vapor Intrusion Pathway* presented on December 4, 2018, by Air & Waste Management Association in Phoenix, Arizona. Instructors were Mr. Robert Ettinger, Senior Principal Environmental Scientist, Geosyntec; and Dr. Loren Lund, Vapor Intrusion/Risk Assessment Leader, Jacobs. Equivalent to 3.5 professional development hours.
- *Vapor Intrusion, Remediation, and Site Closure* presented on December 5 and 6, 2018, by Air & Waste Management Association in Phoenix, Arizona. Equivalent to 10.0 professional development hours.

Subject: Phase I, Environmental Site Assessment
Address: 3377 Wilshire Boulevard
974-998 South Gramercy Drive
Los Angeles, CA 90019

Dear **Mr. Amy Lee**,

On behalf of **Bandus Holdings** (the client), Environ Phase Consulting Company (EPC) is pleased to submit this "Environmental Site Assessment (Phase I)" at the described subject site. I declare that, to the best of our professional knowledge and belief, I meet the definition of Environmental Professional as defined in ASTM 1527-13 and 312.10 of this part (40 CFR Part 312). I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EPC initiated visual site inspection for this report in accordance with the Phase I service agreement dated on July 6, 2021. To the best of our professional ability, EPC warrants that users of the report may rely upon it as on accurate reflection of the environmental condition of the property at the time it was evaluated. This report is the property of the client for whom it was prepared. Its distribution to others is at client's discretion. If you have any questions, please feel free to contact Jeff Lee at (213) 250-0411.

Best Regards,

Jeff Lee
Environmental Assessor

EXECUTIVE SUMMARY

A staff consultant of Environ Phase Consulting Company visited the subject site on July 8, 2021 to inspect the current site conditions. **EPC recommends a supplemental environmental site investigation based on the below conclusions of this assessment:**

Subject Site:	The subject site is addressed as 3377 West Olympic Boulevard and 974-998 South Gramercy Drive in the City of Los Angeles, California. Additional addresses include 972 South Gramercy Drive and 974-986 Gramercy Place. Prior to 1913, South Gramercy Drive was known as Gramercy Place. The subject site is located at the northeast corner of the intersection of West Olympic Boulevard and South Gramercy Drive. The subject site consists of three rectangular-shaped parcel lots (APNs: 5081-033-011, -014, & -022) totaling approximately 34,967 square-feet and is developed with a vacant commercial building and parking lot. The 6,625 square-foot commercial building is developed at the southern portion of the subject site. The interior of the commercial building appears to have been a former restaurant which appears to be have been abandoned with significant damages including fire damage. The remaining portions of the subject site lot consists of an asphalt-paved parking lot and landscaping. See Figure 1 in Appendix 2 for site configuration.
Historical Usage:	According to historical sources (e.g., building permit records, historical aerial photographs, historical fire insurance maps, historical tenant search, and etc.), from as early as 1907, the subject site was undeveloped. From 1909 to 1997, the northern portion of the subject site, addressed as 972 & 974 S. Gramercy Drive, was developed with a residential dwelling. Thereafter, the northern portion of the subject site was utilized as a parking lot. From 1908 to 1963, the central portion of the subject site, addressed as 980-986 S. Gramercy Drive, was developed with two residential dwellings. Thereafter, the central portion of the subject site was utilized as a parking lot. From 1921 to 1940, the southern portion of the subject site, addressed as 994-998 S. Gramercy Drive & 3377 W. Olympic Boulevard, was developed with a residential dwelling. Thereafter, from 1942 to 1966, the southern portion of the subject site was redeveloped with a service station. In 1967, the present-day commercial building was developed at the subject site and mostly occupied by various restaurants. Currently, the commercial building is unoccupied and vacant.
Subject Site Reconnaissance:	EPC did not reveal significant evidences of UST, AST, PCB, distressed vegetation, stockpile soils, solid waste disposals, visual indications of chemical pits, ponds, lagoons, biological hazardous wastes, and other chemicals at the subject site based on our visual site inspection.
Recognized Environmental Condition (REC) Search:	<p>Historical RECs Study:</p> <p>A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).</p> <ul style="list-style-type: none"> ○ Historical REC was not found at the subject site.

RECs Study:

The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment.

- On July 22, 2014, a *Phase I Environmental Site Assessment* was prepared by Xarax Environmental & Engineering Solutions, Inc. (Appendix 7). At that time, the subject site's commercial building was occupied by a restaurant under the name U2 Korean BBQ. The remaining portions of the subject site was improved with concrete-paved walkways and an asphalt-paved parking lot.

One historical recognized environmental condition (HREC) was identified for the subject property as follows: The subject property was utilized as a gas station from approximately 1948 to 1966. Xarax reviewed a *Preliminary Site Characterization Report* prepared by Western Environmental Engineers Company (WEECO) dated December 24, 1996. Based on the report, six (6) soil borings were advanced in the area of the former gas station and eighteen (18) soil samples were collected and analyzed for Total Petroleum Hydrocarbons (TPH), Volatile Organic Compounds (VOCs), Benzene, Toluene, Ethylbenzene, Xylenes (BTEX), and Methyl Tertiary Butyl Ether (MTBE). Based on analytical results of the soil samples, all soil samples were determined to be none detected (ND) for any of the constituents tested. Based on the analytical results, the site was considered clean, in accordance with the California Water Resources Control Board "Maximum Soil Screening Levels for TPH and BTEX above Drinking Water Aquifers." The report concluded "based on these analytical results, no further subsurface investigation is necessary for the site."

No Recognized Environmental Condition (REC), de minimis environmental conditions, Business Environmental Risks (BERs), or Vapor Intrusion Conditions (VICs) were found.

Based on investigation of the property for evidence of recognized environmental conditions and other environmental issues, Xarax recommended no further environmental investigations at that time.

EPC's Analysis of Xarax's Phase I Environmental Site Assessment:

Based on the report and attached documents, the full *Preliminary Site Characterization Report* prepared by WEECO on December 24, 1996 was not able to be found within the appendices of the Xarax's Phase I Environmental Site Assessment report. Therefore, EPC could not accurately assess the previous subsurface investigation conducted at the subject site. Information regarding the soil sampling location and depths are unknown. Therefore, EPC considers the former gasoline station at the subject site a recognized environmental condition (REC). Additionally, the east neighboring property, addressed as 3355 West Olympic Boulevard, was a former gasoline station from approximately 1942 to 1966 (~24 years) and an auto repair shop from 1970 to present-day (~51 years). Based on the close proximity to the subject site, a potential vapor encroachment

	<p>condition (pVEC) exists at the subject site due to the former gasoline station and auto repair shop activities from the east neighboring property.</p> <p>EPC recommends a supplemental subsurface investigation be conducted at the subject site to verify the analytical results of the previous <i>Preliminary Site Characterization Report</i> prepared by WEECO in 1996 and to assess any subsurface impacts to the subject site from the former gasoline station and auto repair shop activities from the east neighboring property.</p> <p>Controlled RECs Study: A recognized environmental condition which involves a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority and that is subject to activity and use limitations.</p> <ul style="list-style-type: none"> ○ Controlled REC was not found at the subject site.
Other Recommendations regarding Non-CERCLA:	<ul style="list-style-type: none"> ○ According to the Los Angeles City Department of City Planning's property information online website (ZIMAS), the subject site, addressed as 3377 West Olympic Boulevard, is located within the <i>Methane Buffer Zone</i>. EPC recommends a methane survey at the subject site prior to any construction. ○ Based on the building built year in 1967, asbestos survey and lead based paint assessment reports are recommended prior to the subject building demolition. ○ Based on our visual site inspection, mold was found at the subject building. A safety and health plan should be prepared to protect construction workers during construction activities.
Lien Search:	No environmental lien was found in the Preliminary Title Report.
Immediate Adjacent Neighboring Properties:	EPC <i>did</i> reveal evidences of human harmful activity or <i>significant</i> pollutant emission to pose immediate environmental concern into the subject site from the neighboring properties during this environmental assessment. See REC section above.
Environmental Database Research Result:	<p>Environmental effects from the neighboring sites are evaluated at minimal risk level in accordance with the reported remedial actions, distance between the subject site and reference sites, and limited contamination of the reference sites. Thus, government agencies' listings of the subject site vicinity area are not expected to represent a significant environmental concern on the subject site.</p> <ul style="list-style-type: none"> ○ Based on the information found in the regulatory database report (EDR Radius Map Report), the subject site was, addressed as 3377 West Olympic Boulevard, was listed in the UST database. See REC section above for more information. ○ According to the EDR Radius Map Report, twenty-one (21) other listings were found within a specified radius of the subject site. Due to findings of USTs and auto repair activities at the east neighboring site, EPC recommends a supplemental environmental site investigation (Phase II)

	(Section 6-2).
Data Gaps:	No significant data gaps of historical tenant records, local environmental agency records, weather, and on-site reconnaissance were indicated during this assessment.
Deviations & Deletions:	<p>This Phase I report was conducted to meet or exceed the practices as All Appropriate Inquiries Rule (ASTM 1527-13 and 312.10 of this part [40 CFR Part 312]). No significant deviations, deletions, or client imposed constraints were made from this Phase I practice.).</p> <ul style="list-style-type: none"> • EPC is an independent consulting firm with no interest in the subject site at the subject site. • EPC has no special contractual conditions.
Report Preparation:	<p>Environ Phase Consulting Co. (EPC) Jeff Lee, REA I Allen Shim, Registered Civil Engineer (PE)</p>

EPC Summary Table since 1993

REC: Recognized Environmental Condition

1. INTRODUCTION

1-1. Purpose

This site assessment report was conducted to evaluate environmental risk for current lending requirements. This report was performed to identify recognized environmental concerns associated with the property due to its location and former and current property use.

1-2. Scope of Work & Involved Parties

This Environmental Site Assessment (Phase I) was performed to meet the AAI Rule (40 CFR Section 312.21-Results of Inquiry by an Environmental Professional and 312.31-Standards and Practices) following due diligences.

- On site visual inspection;
- Visual inspection surrounding the subject site;
- Review local environmental agencies' records;
- Review previous environmental report;
- Review available historical tenant records;
- Research hydrogeology;
- Review historical usages using building dept record and Sanborn Map;
- Interview with the property Owner/User;
- Review environmental government records using database; and
- Recommendation/Conclusion

This report also addressed potential environmental risk under a 1-mile radius of the subject site. The information adduced in this Phase I report was furnished in good faith. An environmental data research report with reliable environmental site auditing was provided from the database supporting company, Environmental Record Search (i.e., an environmental information and computer data retrieval company).

Environmental check list was summarized including involved parties for Phase I Preparation (Table 1):

Table (1) Phase I, Environmental Check List

Content	Check List	
Site Reconnaissance:	Site Photos	Yes
	On-Site inspection	Yes
	Immediate neighboring properties inspection	Yes
Review of Historical Uses & Sources of Information:	Building Dept Record	Yes
	Historical Tenant Search	Yes
	Sanborn Fire Insurance Maps Review	Yes
	Historical Aerial Photographs	Yes
Hydrogeology Information	USGS Topography Map	Yes

	Contour Data Search	Yes
Previous Environmental Assessment provided by the owner:	Environmental site assessment previously conducted by others was provided by the property owner.	No
	Environmental site assessment previously conducted by others was provided by other agency.	Yes
Review of Federal and State Records	Standard Environmental Regulatory Records NPL, Delisted NPL, CERCLIS, CERCLIS NFRAP, RCRA CORRACTS, RCRA non-CORRACTS TSD, RCRA Generators, Institutional Controls/engineering controls, ERNS, landfill and/or solid waste disposal sites, LUST, UST, VCP, Brownfield, and etc.	Yes
Review of Local Government Agencies' Records:	Environmental related local agencies: City of Los Angeles Fire Department	Yes
	SCAQMD	Yes
	LUST/UST file search using SWRCB web site	Yes
Owner's Information: Environmental Questionnaire	Property Profile	Yes
	Preliminary Title Report & Deed for Lien Search	Yes
	County Tax Assessor record review	Yes
	Interview	No
Data Gaps:	Weather	No
	A lack of or inability to obtain information.	No
	Unknown site usage during certain time periods.	No
	Inability to interview the current owner	Yes
Report Preparation	Qualification and Signature of the Environmental Professional: 40 CFR Part 312 Jeff Lee, REA I Allen Shim, Registered Civil Engineer (PE)	Yes
Executive Summary	It generally consists of the reconnaissance summary, site information, decision regarding environmental concerns.	

2. SUBJECT PROPERTY INFORMATION

2-1. Geographic Setting

The subject site is located at 3377 West Olympic Boulevard and 974-998 South Gramercy Drive, Los Angeles, California. Plot plan is presented in Appendix 2. The subject site's physical location is found employing a United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle (Quad) Map relevant to the subject property. The USGS 7.5 Minute Quad Map has an approximate scale of 1 inch to 2,000 feet, and shows physical features with environmental significances such as wetlands, water bodies, roadways, mines, and buildings. The subject site is located within 34° 3' 11.27" north latitude and 118° 18' 42.76" west longitude. The site is located within the Coastal Plain of Los Angeles Groundwater Basin, Central Subbasin at an elevation of approximately 201 feet above mean sea level (MSL). According to information obtained from the SWRCB's GeoTracker online database for a nearby Leaking Underground Storage Tank (LUST) site (Mobil #18-LLR (Global ID# T0603700620) at 989 West Western Avenue, depth to groundwater is approximately 53 to 66 feet below ground surface and groundwater flow direction was to the southeast (URS, 2021).

2-2. Subject Site Description

A staff consultant of Environ Phase Consulting Company (EPC) visited the subject site on July 8, 2021 to observe the current site conditions (See Section 3 in this report and Site Photos as shown in Appendix 2): The subject site is addressed as 3377 West Olympic Boulevard and 974-998 South Gramercy Drive in the City of Los Angeles, California. Additional addresses include 972 South Gramercy Drive and 974-986 Gramercy Place. Prior to 1913, South Gramercy Drive was known as Gramercy Place. The subject site is located at the northeast corner of the intersection of West Olympic Boulevard and South Gramercy Drive. The subject site consists of three rectangular-shaped parcel lots (APNs: 5081-033-011, -014, & -022) totaling approximately 34,967 square-feet and is developed with a vacant commercial building and parking lot. The 6,625 square-foot commercial building is developed at the southern portion of the subject site. The interior of the commercial building appears to have been a former restaurant which appears to be have been abandoned with significant damages including fire damage. The remaining portions of the subject site lot consists of an asphalt-paved parking lot and landscaping. See Figure 1 in Appendix 2 for site configuration.

2-3. Historical Property Use Search

According to historical sources (e.g., building permit records, historical aerial photographs, historical fire insurance maps, historical tenant search, and etc.), from as early as 1907, the subject site was undeveloped. From 1909 to 1997, the northern portion of the subject site, addressed as 972 & 974 S. Gramercy Drive, was developed with a residential dwelling. Thereafter, the northern portion of the subject site was utilized as a parking lot. From 1908 to 1963, the central portion of the subject site, addressed as 980-986 S. Gramercy Drive, was developed with two residential dwellings. Thereafter, the central portion of the subject site was utilized as a parking lot. From 1921 to 1940, the southern portion of the subject site, addressed as 994-998 S. Gramercy Drive & 3377 W. Olympic Boulevard, was developed with a residential

dwelling. Thereafter, from 1942 to 1966, the southern portion of the subject site was redeveloped with a service station. In 1967, the present-day commercial building was developed at the subject site and mostly occupied by various restaurants. Currently, the commercial building is unoccupied and vacant.

2-3-1. Property Profile

Table (2) Summary of Property Profile

Representative Address:	3377 West Olympic Boulevard 975-998 South Gramercy Drive Los Angeles, CA 90019
Additional Addresses:	972 South Gramercy Drive 974-986 Gramercy Place (Prior to 1913)
APN:	5081-033-011: 3377 W. Olympic Blvd. & 996-998 S. Gramercy Dr. 5081-033-014: 974 S. Gramercy Dr. 5081-033-022: 980-986 S. Gramercy Dr.
Jurisdiction:	City of Los Angeles
Primary Owner:	David A Macleod (Co-Tr) Urban Commons Gramercy LLC
Property Type:	Commercial
Property Size:	5081-033-011: 6,803.5 square-feet 5081-033-014: 9,382.3 square-feet 5081-033-022: 18,781.6 square-feet
No. of Building:	One
Building Size:	6,625 square-feet
Built Year:	1967
Natural Hazard:	Methane Buffer Zone (LA City ZIMAS)

EPC Table Form 020 since 1993

Chicago Property Profile, Los Angeles Parcel Profile Report, & LA City Building Permits

2-3-2. Fire Insurance Map Review (Sanborn Map)

EPC requested Sanborn maps to Environmental Data Resources (an environmental information and computer data retrieval company for EPC). Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were found as follows (Appendix 3):

Table (3) Summary of Fire Insurance Maps

Year	Subject Site Description	Neighboring Property Description
1907	The subject site is undeveloped.	<p>North: Undeveloped.</p> <p>South: Roadway followed by undeveloped lots.</p> <p>East: Undeveloped lots and residential dwelling.</p> <p>West: Roadway followed by undeveloped lots.</p> <p>Southwest: Intersection followed by undeveloped lots.</p>
1921	The subject site is addressed as 3381 West 10 th Street & 974, 980, & 986 Gramercy Drive. The subject site is developed with three residential dwellings with detached garages at the northern and central portion of the subject site. The southern portion of the subject site is undeveloped.	<p>North: Residential dwellings with detached garage.</p> <p>South: Roadway followed by undeveloped lots.</p> <p>East: Undeveloped lots and residential dwellings.</p> <p>West: Roadway followed by residential dwellings and undeveloped lot.</p> <p>Southwest: Intersection followed by residential dwellings.</p>
1950	The subject site is addressed as 3377 West Olympic Boulevard & 974, 980, & 986 Gramercy Drive. The three residential dwellings with detached garages remain at the northern and central portion of the subject site. The southern portion of the subject site is developed with a gasoline station and auto repair shop building.	<p>North: Residential dwellings with detached garage.</p> <p>South: Roadway followed by residential dwellings.</p> <p>Southeast: Roadway followed by gasoline station.</p> <p>East: Residential dwellings and gasoline station.</p> <p>West: Roadway followed by residential dwellings.</p> <p>Southwest: Intersection followed by store building and residential dwellings.</p>
1954	No significant change from the previous fire insurance map.	<p>No significant changes from the previous fire insurance map except for southeast neighboring property.</p> <p>Southeast: Roadway followed by parking lot.</p>
1960 1961 1962	No significant change from the previous fire insurance map.	<p>North: Residential dwellings with detached garage.</p> <p>South: Roadway followed by residential dwellings.</p>

		<p>Southeast: Roadway followed by store building.</p> <p>East: Residential dwellings and gasoline station.</p> <p>West: Roadway followed by residential dwellings and gasoline station.</p> <p>Southwest: Intersection followed by store building and residential dwellings.</p>
1966	The subject site is addressed as 3377 West Olympic Boulevard and 974 & 980 Gramercy Drive. One residential dwelling and gasoline station with auto repair shop remain at the northern and southern portions of the subject site, respectively. The central portion of the subject site appears to have removed the former two residential dwellings and is undeveloped.	No significant changes from the previous fire insurance map.
1968 1970	The subject site is addressed as 3377 West Olympic Boulevard and 974 & 980 Gramercy Drive. The residential dwelling at the northern portion of the subject site remains. The central portion of the subject site remains as undeveloped. The southern portion of the subject site has been redeveloped with present-day store building.	<p>North: Residential dwellings with detached garage.</p> <p>South: Roadway followed by residential dwellings.</p> <p>Southeast: Roadway followed by store building.</p> <p>East: Residential dwellings and undeveloped lot.</p> <p>West: Roadway followed by residential dwellings and gasoline station.</p> <p>Southwest: Intersection followed by store building and residential dwellings.</p>
1970	No significant change from the previous fire insurance map.	<p>No significant changes from the previous fire insurance map except for east neighboring property.</p> <p>Southeast: Residential dwellings and commercial building.</p>

EPC Table Form 030 since 1993

- Based on the fire insurance map review, RECs were identified at the subject site and neighboring properties. See Section 4-3 for more information.

Fire insurance maps are large-scale maps that depict the commercial, industrial and residential sections of some twelve thousand cities and towns in the United States. These specialized maps were first prepared for the exclusive use of fire insurance companies and underwriters to provide accurate, current and detailed information about the buildings they were insuring. Information relied upon in place of personal examinations of property. Fire insurance maps show the size, shape and construction of dwellings, commercial buildings and factories, as well as indicate widths and names of streets, property boundaries, and house and block numbers. The primary benefit of reviewing fire insurance maps is to

analyze historical land use of a subject property and its immediate area. In this review, special emphasis is given to the existence and location of fuel storage tanks, flammable or other potentially hazardous substances, as well as the nature of businesses located on site.

2-3-3. Aerial Photograph

EPC requested historical aerial photographs to Environmental Data Resources (an environmental information and computer data retrieval company for EPC) to examine the building location at the subject site as shown in Appendix 3. The summary of the aerial photos is shown in Table (4).

Table (4) Summary of Aerial Photographs

Year	Subject Site Description	Neighboring Property Description
1928 1938	The subject site is developed with four residential dwellings with detached garages.	North: Residential dwellings. South: Roadway followed by residential dwelling. Southeast: Roadway followed by undeveloped lot. East: Residential dwellings. West: Roadway followed by residential dwellings. Southwest: Intersection followed by residential dwellings.
1948	Three residential dwellings with detached garages remain at the northern and central portion of the subject site. The southern portion of the subject site is developed with a service station and auto repair shop building as seen in the 1950 fire insurance map (Section 2-3-2).	North: Residential dwellings. South: Roadway followed by residential dwelling. Southeast: Roadway followed by service station. East: Residential dwellings and service station. West: Roadway followed by residential dwellings. Southwest: Intersection followed by commercial building and residential dwellings.
1952 1954	No significant changes from the previous aerial photograph.	No significant changes from previous aerial photograph except southeast neighboring property. Southeast: Roadway followed by undeveloped lot.
1964	The northern and southern portion of the subject site remains with a residential dwelling and service station with auto repair shop, respectively. The two residential dwellings at the central portion of the subject site are no longer present. The central portion of the subject site is undeveloped and vacant.	North: Residential dwellings. South: Roadway followed by residential dwelling. Southeast: Roadway followed by commercial building. East: Residential dwellings and service station. West: Roadway followed by residential

		<p>dwelling and service station.</p> <p>Southwest: Intersection followed by commercial building and residential dwellings.</p>
1977 1979 1983	<p>The northern portion of the subject site remains with a residential dwelling. The central portion of the subject site is a parking lot. The southern portion of the subject site has been redeveloped with portion of present-day commercial building.</p>	<p>No significant changes from the previous aerial photograph except east neighboring property.</p> <p>East: Residential dwellings and present-day commercial/auto repair shop building.</p>
1989 1994 2002 2005 2009	<p>No significant changes from the previous aerial photograph.</p>	<p>North: Residential dwellings.</p> <p>South: Roadway followed by parking lot.</p> <p>Southeast: Roadway followed by commercial building.</p> <p>East: Residential dwellings and commercial/auto repair shop building.</p> <p>West: Roadway followed by residential dwellings and commercial building/hotel.</p> <p>Southwest: Intersection followed by commercial building and residential dwellings.</p>
2002 2005 2009 2012 2016	<p>The residential dwelling at the northern portion of the subject site no longer appears and has been redeveloped with present-day parking lot. The central portion of the subject site remains as a parking lot. The southern portion of the subject site is developed with present-day commercial building.</p>	<p>No significant changes to the site from previous aerial photograph except western neighboring property.</p>

EPC Table Form 040 since 1993

- o Based on the aerial photographs, RECs were identified at the subject site and neighboring properties. See Section 4-3 for more information.

2-3-4. Historical Tenants Search

EPC requested city directory records to EDR (an environmental information and computer data retrieval company for EPC). Based on the target property address, the following historical tenants were found (Appendix 4):

Table (5) Summary of Historical Tenants Search

Northern Portion of Subject Site		
Year	Address	Tenants
1924	974 S. Gramercy	Various residential tenants
1929	974 S. Gramercy	Various residential tenants

EPC Table Form 050 since 1993

- o Based on the city directory records, RECs were identified at the subject site. See Section 4-3 for more information.

2-3-5. Building Department Records

The records provided limited information about building construction date, past owner, and building use. The City of Los Angeles Department of Building & Safety permit record is able to use directly or indirectly to determine historical occupancies, property usages, and construction records of the subject site as summarized as follows (Appendix 5):

Table (6) Summary of Building Permit Records

Northern Portion of Subject Site			
Year	Address	Owner	Description
1909	974 Gramercy Pl.	Illegible	New 10 room residence.
1914	974 Gramercy Dr.	L.E. Lay	Plumbing permit for construction of sewer for residence.
1953	972-974 Gramercy Dr.	Wayne M. Harris & Anne D. Harris	Alteration to one-family dwelling to convert to four family dwelling.
1956	972-974 Gramercy Dr.	Wayne M. Harris & Anne D. Harris	Certificate of Occupancy for 2-story alterations to convert existing dwelling to an apartment house.
1997	974 Gramercy Dr.	Chong Jin Lee	Demolish 2-story dwelling and detached garage.
Central Portion of Subject Site			
1908	986 Gramercy Pl.	Mary H. McCoy	New 10 room residence.
1909	980 Gramercy Pl.	N. Siegal	New 10 room residence.
1913	986 Gramercy Dr.	Mrs. McCoy	New garage.
1919	986 Gramercy Dr.	Mrs. Emily Naber	Alteration to dwelling.
1938	980 Gramercy Dr.	Mrs. M. Russell	Alteration to residence.
1944	986 Gramercy Dr.	Matbelle Kessler	Alteration to residence.
1963	980-984 Gramercy Dr.	Irene C. Salter	Demolish one-family dwelling.
1963	986 Gramercy Dr.	Irene C. Salter	Demolish one-family dwelling.
Southern Portion of Subject Site			
Year	Address	Owner	Description
1921	994 - 996 Gramercy	Mrs. Abbye Walker	New 12 room two-family residence.
1921	994 - 996 Gramercy	Mrs. Abbye Walker	New private garage.

1940	996 Gramercy	J. H. Wolfrom	Relocate double garage from 996 Gramercy Drive to 1179 Fairfax Avenue.
1940	994 - 996 Gramercy	J. H. Wolfrom	Relocate residence from 994-996 Gramercy Drive to 932 Carondelet Street.
1942	3377 W. Olympic	McCoy Oil Co.	Relocate service station from 1040 Figueroa Street to 3377 W. Olympic Boulevard.
1945	3377 W. Olympic	J W McCoy	New 34'x40' automotive repair building.
1947	3377 W. Olympic	Pacific Outdoor Advertising	Erect double poster.
1961	3377 W. Olympic	Foster & Kleiser	Roof sign.
1966	3377 W. Olympic	McCoy Oil Co.	Demolish service station.
1967	3377 W. Olympic	Earl Hardage	New 2,200 sq. ft. restaurant/coffee shop building and parking lot.
1967	3377 W. Olympic	Earl Hardage	Move building back to 11 feet from Olympic (south) property line.
1970	3377 W. Olympic	Earl Hardage	Certificate of Occupancy for coffee shop and parking.
1972	3377 W. Olympic	S. Skiktrenic S. Hardage	Addition of storage room at rear of restaurant.
1974	3377 W. Olympic	S. Shik	Certificate of Occupancy for one story 16' x 25' storage room addition to an existing 92' x 25' restaurant.
1992	3377 W. Olympic	Richard Kim	Convert restaurant to recording music rooms.
1993	3377 W. Olympic	Richard Kim	Certificate of Occupancy for change of use from restaurant to retail and private music room.
1996	3377 W. Olympic	Richard Kim	Convert to existing music rooms into commercial kitchen and add shaft for commercial hood.
1997	3377 W. Olympic	Chong Chin Lee	Install a non-bearing partition in existing restaurant.
1997	3377 W. Olympic	Jung Wan Kim	Add interior partitions to remodel existing handicap bathrooms and add partition between dining areas.
1997	3377 W. Olympic	Jung Wan Kim	Install 3-openings in exterior.
1998	3377 W. Olympic	Richard Kim	Certificate of Occupancy to convert two existing music rooms to commercial kitchen.
1998	3377 W. Olympic	Choung Chin Lee	Certificate of Occupancy to reduce the occupant load of an existing restaurant dining rooms from 99 occupants to 88 occupants.
1998	3377 W. Olympic	Chong C Lee	No work to be done. To permit outside dining seating 44 seats.
1999	3377 W. Olympic	Chong C Lee	Permit for new trellis.
2003	3377 W. Olympic	Lee, Jong K and Chong C	Remodel kitchen, dining area, and restroom. Add new non-bearing partitions. Create storage area and dining room.

2004	3377 W. Olympic	Lee, Jong K and Chong C	6' fence wall along south property line.
2004	3377 W. Olympic	Lee, Jong K and Chong C	Convert existing dining area into prep area and walk-in cooler.
2005	3377 W. Olympic	Lee, Chong C	Provide additional seating under patio.
2006	3377 W. Olympic	Lee, Chong C	Add 11' x 115' trellis at front for outdoor dining.
2006	3377 W. Olympic	Lee, Chong C	Certificate of Occupancy to add 11' x 115' trellis at front.
2006	3377 W. Olympic	Lee, Chong C	Certificate of Occupancy to provide additional seating under patio.
2012	3377 W. Olympic	Lee, Jong K and Chong C	New dining enclosure, addition for existing restaurant, BBQ hood addition at dining area, and handicap ramp addition.
2012	3377 W. Olympic	Lee, Jong K and Chong C	Revise location of DAS path of travel and create new entry door. Revise front entrance back to original stairs, and relocate trash enclosure on plot plan.
2012	3377 W. Olympic	Lee, Jong K and Chong C	Capture existing trellis area on approved plans and correct floor area.
2014	3377 W. Olympic	Lee, Jong K and Chong C	Certificate of Occupancy for dining enclosure, addition for exiting restaurant, and BBQ hood addition at dining area.

EPC Table Form 060 since 1993

- o Based on the building permit records, RECs were identified at the subject site. See Section 4-3 for more information.

2-4. Records Review for Hazardous Substance Usages

EPC field engineer visited or contacted the following public agencies to find any records of operation permits, licenses, and registration of underground fuel storage tank (UST) or any other hazardous substances on the subject site.

2-4-1. State Water Resources Control Board

A review of the Geo Tracker UST record using website (<http://geotracker.waterboards.ca.gov/>) dated on July 6, 2021. **The subject site did not appear as an Underground Storage Tank (UST)/Leaking Underground Storage Tank (LUST) site** (Appendix 6).

2-4-2. LAFD-UGT Unit and Hazardous Material Unit

On July 6, 2021, EPC reviewed the LAFD's listings of Active Hazardous Materials, Inactive Hazardous Materials, Active Underground Storage Tanks, Inactive Underground Storage Tanks, and Historical Underground Storage Tanks for the subject site. Based on the review of the aforementioned listings, the subject site did appear in the LAFD's Historical Underground Storage Tanks listing under the address of 3377 West Olympic Boulevard. Therefore, EPC requested the records to the LAFD. On July 23, 2021, the following records were provided to EPC (Appendix 6):

- Based on records reviewed, in 1942, an original permit was issued for the subject site, addressed as 3377 West Olympic Boulevard, for an auto filling station. The auto filling station contained two 2,000-gal and two 1,000-gal gasoline underground storage tanks (USTs) and four fuel dispensing units. The owner was listed as Mc Coy Oil Co. The auto service station was originally located at 1050 North Figueroa Street and moved to the subject site.
- In 1944 and 1945, a fire permit was issued for an automobile filling station with four USTs which totaled 6,000-gallons. The fire permit was issued to A. L. Kugelman.
- In 1961, a fire permit was issued to Vielman's Auto Body Shop for an auto fueling station. The owner was listed as Roberto Salazar.
- In 1962, a fire permit was issued to Seaside Service Station for an auto fueling station. The owner was listed as Adolfo Santiago.
- In 1966, a permit was issued to Rocket Service Station to abandon four gasoline USTs.

2-4-3. South Coast Air Quality Management District (SCAQMD)

Based on the SCAQMD information using the agency' databases (<https://xappprod.aqmd.gov/find>) on July 6, 2021, the subject site did not appear in the SCAQMD database during this assessment (Appendix 6).

2-4-4. Cal/EPA DTSC

Hazardous generator record of the subject site did not appear in California State EPA Dept. of Toxic Substances Control's (DTSCs) Hazardous Waste Tracking System (HWTS) online database (https://hwts.dtsc.ca.gov/report_search.cfm?id=5) (Appendix 6).

3. SUBJECT SITE RECONNAISSANCE

EPC performed the field inspection survey of the subject site and adjacent properties on July 8, 2021 including visual inspection of ACMs, PCB chemical, UST, AST, fuel island, hydraulic hoist unit, hazardous material, well, lagoons, and visual indication of spill using an **Environmental Questionnaire** Form of the ASTM E1528-13 (Appendix 7). The field inspection was summarized in Table (7): EPC **did** reveal evidences of human harmful activity or *significant* pollutant emission enough to pose immediate environmental concern in the subject site.

Table (7) Subject Site Reconnaissance Summary

No	Inspection Categories	Risk Evaluation				Records / Description
		High	Med	Low	Unk	
3-1	Vapor Intrusion/Encroachment	x				Yes
3-2	Asbestos-Containing Material				x	Built Year: 1967
3-3	Lead Based Paint				x	Built Year: 1967
3-4	Methane				x	Methane Buffer Zone
3-5	Polychlorinated Biphenyl			x		No
3-6	Underground Storage Tank, Piping, and/or Dispenser			x		No
3-7	Aboveground Storage Tank (AST)			x		No fuel AST
3-8	Hydraulic Hoist Unit			x		No
3-9	RCRA Hazardous Materials			x		No
3-10	Non-RCRA Wastes, Other Chemicals Containers			x		No
3-11	Hazardous Waste TSD			x		No
3-12	Distressed Vegetation			x		No
3-13	Stockpile, Soil Staining			x		No
3-14	Waste Treatment Unit			x		No
3-15	Solid Waste Disposals			x		No
3-16	Wells			x		No
3-17	Utilities			x		LADWP
3-18	Visual Indications of Spills, Leakage			x		No
3-19	Pits, Ponds, & Lagoons			x		No
3-20	Urea Formaldehyde			x		No
3-21	Herbicide & Pesticides			x		No
3-22	Biological Hazardous Wastes			x		No
3-23	Radon			x		LA County area 2-4 pCi/L

EPC Table Form 070 since 1993

Radon Estimate: The area radon concentrations were reported by U.S. Radon Map

3-1. Vapor Intrusion/Vapor Encroachment Condition

The subject building is a possible Vapor Intrusion Condition (pVIC) and possible Vapor Encroachment Condition (pVEC) due to former fueling station operations at the subject site and former fueling station and auto repair shop activities at the east adjacent neighboring property. **EPC recommends a supplemental environmental site investigation (Phase II).** See Section 4-3 for more information.

3-2. Asbestos-Containing Building Materials (ACMs)

Result of Visual Inspection: Based on such historical information of the subject site, the building was constructed **before** the year when Federal Government banned asbestos for commercial use in 1978. If renovation or demolition of the subject building is planned, asbestos containing material survey should be performed due to erected the building year. Actual sampling and analysis (polarized light microscopy with dispersion staining method and/or count point) is beyond the contracted scope of this assessment work, thus not included in this report.

Information: U.S Federal Government banned asbestos for commercial use in 1978. Based on above historic information of the site, the on-site building at the site appears to be of the age and construction that suggests the possibility the construction material may contain asbestos fibers. Potential locations for the presence of asbestos containing materials (ACMs) in the on-site building are floor tiles, wall insulation, pipe insulation, roof sealant, and etc.

3-3. Lead-Based Paint

Actual sampling and analysis is beyond the contracted scope of this assessment work, thus not included in this report. If renovation or demolition of the subject building is planned, lead based paint inspection can be tested on interior and exterior walls using non-destructive analysis device (e.g., Nitron XLp 300A or others). The lead based paint inspection should be performed to meet the inspection protocol in Chapter 7 of HUD Guidelines (United State Department of Housing and Urban Development 2012 Edition).

General Information: Title X of the Housing and Community Development Act of 1992 referred to as the "Residential Lead Based Paint Hazard Reduction Act" was signed on October 28, 1992. And the interim final rule 29 CFR 1926.62 for the occupational Safety and Health Administration (OSHA) regulated lead exposure standard in construction in June 3, 1993 requires disclosure of the presence of lead-based paint hazards before the sale or lease of pre-1978 housing or commercial building. This rule (lead exposure standard) will become effective in October 1995. This provision of the OSHA lead in construction standard-29 CFR 1926.62 applies to all construction work in which lead is present. The employer must ensure that no employee is exposed to concentration of lead in excess of the permissible exposure level (PEL) for lead, which is an eight-hour time weighted average (TWA) exposure of 50-ug/cubic meter. Testing and monitoring must be continually conducted as the project unfolds. Dust wipe clearance testing must be done at the completion of the project to demonstrate that the project activities did not leave any lead hazard on site at the end of the project.

SBA SOP 50 106, Subpart B- Section H: Special Use Facilities Prudent lending practices dictate that specific additional environmental assessments be performed for certain special use facilities. For example, Property constructed prior to 1980 that will be used for daycare or child care centers or nursery schools or residential care facilities occupied by children must undergo a lead risk assessment (for lead based paint) and testing for lead in drinking water, and the results of these assessments must be submitted to the SBA. Disbursement will not be authorized unless the risk of lead exposure to infants and small children has been sufficiently minimized".

3-4. Methane

According to the Los Angeles City Department of City Planning's property information online website (ZIMAS), the subject site, addressed as 3377 West Olympic Boulevard, is located within the Methane Buffer Zone. EPC recommends methane testing at the subject site prior to any construction.

3-5. Polychlorinated Biphenyl (PCB's)

- No PCB-containing hydraulic fluid trash compactor or PCB-containing transformer was discovered at the site.
- PCB chemical was not observed at the subject site during our inspection.

General Information: Prior to 1978, PCBs was commonly used in dielectric fluids in transformers, capacitors, and light ballast's due to their desirable thermal characteristics and hydraulic fluid compactor. Due to their demonstrated toxicity and persistence in the environment, PCB manufacturing in the United State was discontinued. No PCB-containing light ballasts were inspected, which operate fluorescent light fixtures. Separate survey of PCB's on existing light ballasts can only determine the content, unless such ballasts contained in the fluorescent light fixtures are labeled with "no PCB". Prior to construction or any disturbances to the existing light fixtures, PCB-ballasts survey has to be performed, and identified PCB-ballasts shall properly be disposed of by incineration or recycled within authorized facilities.

3-6. Underground Fuel Storage Tank (UST), Associated Piping, & Fuel Island

No USTs and features (e.g., vent pipe, island form, service canopy, tank manhole, and etc.) were observed at the subject site.

3-7. Aboveground Fuel Storage Tank (AST)

No fuel ASTs were observed on the property.

3-8. Hydraulic Hoist Unit

No hydraulic hoist unit was observed at the subject site.

3-9. RCRA-Hazardous Substances

No RCRA hazardous substances were observed at the subject site during our site inspection.

Definition

RCRA is the Resource Conservation and Recovery Act, which was enacted by Congress in 1976. RCRA's primary goals are to protect human health and the environment from the potential hazards of waste disposal, to conserve energy and natural resources, to reduce the amount of waste generated, and to ensure that wastes are managed in an environmentally sound manner. RCRA regulates the management of solid waste (e.g., garbage), hazardous waste, and underground storage tanks holding petroleum products or certain chemicals.

3-10. Other Chemical Containers

No other chemical containers were observed at the subject site during our site inspection.

3-11. Hazardous Waste Treatments, Storage, and Disposal (TSD)

No TSD of hazardous waste, other than described in the preceding sections, was found during the site investigation.

3-12. Distressed Vegetation

No evidence of distressed vegetation at the subject site.

3-13. Stockpile & Soil Staining

No stockpile and soil staining were observed at the subject site.

3-14. Wastewater Treatment Unit/Clarifier

No wastewater treatment unit/clarifier was observed at the subject site.

3-15. Solid Waste Disposals

No improper activities of treatment or disposal of hazardous, medical, or toxic wastes were performed on the subject site.

3-16. Wells

No monitoring well covers were observed at the subject site.

3-17. Utilities

Utility	Utility Company	Observation
Any industrial boiler used of petroleum fuel oil	Individual Co.	No oil boiler, might be contained asbestos insulator, was observed at the subject site.
Water	LADWP	Active
Electricity	LADWP	Active
Septic Tank	Individual Co.	None
Sewer	City	Active
Telephone	AT & T	Active
Municipal gas	SoCal Gas	Active

EPC Utility Table since 1993

3-18. Visual Indications of Spills or Leaks

No evidences of oils spill or chemicals leak were observed at the site.

3-19. Pits, Ponds, and Lagoons

No visible evidence of wetlands such as pits, ponds, lagoons, or any other water bodies were observed within the property's boundary line.

3-20. Urea Formaldehyde

No evidence of UF foam insulation was observed during the subject site reconnaissance. The potential for UF on the site presumed low. EPC is not contracted to perform the testing of formaldehyde level on the building. Thus, the delineation of its level is beyond the scope of the service included in this report: Formaldehyde, by itself, or in combination with other chemicals, serves a number of purposes in manufactured products. It had been widely used to add permanent press qualities to clothing and draperies, as a component of glues and adhesives, and as a preservative in some paints and coating products. In commercial buildings, the most significant sources of formaldehyde are pressed wood products made using adhesive that contain urea-formaldehyde (UF) resins, such as particleboard, hardwood plywood paneling, and medium density fiberboard. As a colorless, pungent-smelling gas, formaldehyde can cause sensations in the mucous membrane and difficulty in breathing which could lead to asthmatic attack. Newly installed UF foam insulation often releases the gas-phase UF for six to twelve months. Such volatilized gases can concentrate in the internal air of a building.

3-21. Herbicides & Pesticides

No evidence of herbicides or pesticides use on the site was observed during the inspection.

3-22. Biological Hazardous Wastes

No biological hazardous wastes were observed during the inspection.

General Information: Any Substance of a human or animal origin, other than food waste, which is to be disposed of and could harbor to transmit pathogenic organisms including but not limited to pathological specimens such as tissues, blood elements, excreta, secretion, bandages, and related substances. Increasing interest in the hazards from pathogens in bio-solid waste or sludge has required more intensive interest in determining their levels in bio-solid waste and in the effect of processing techniques on them. Methods, which are merely extensions of methods used for wastewater, are well developed for the usual indicators of bacterial pollution (e.g., coliform, fecal coliform) and common pathogens such as Salmonella species. Very little is known about the levels of parasites such as protozoa and helminthes in solid wastes in the United States. Determination of virus concentrations in solid wastes is complicated by the fact that viruses are strongly adsorbed by the various solids types. The recovery from such solids is highly variable, which makes it difficult to establish levels and effects of processing. The National Science Foundation, ERDA, and EPA have been supporting work related to transport of viruses from solid wastes to the environment and to destruction of viruses in solid wastes by ionizing radiation or incineration.

3-23. Radioactivity (Radon)

The subject site was *not likely* to be exposed by harmful level of radon with following reasons:

- Radon concentrations in the Los Angeles County were assessed using information supplied by the EPA Map of Radon Zones. Los Angeles County is located in Zone 2. Average indoor radon levels may be between 2-4 picocuries of radon per liter of air

(pCi/L). The USEPA action level for radon is 4.0 pCi/L. Therefore, the levels of radon at the subject site did not appear to present an environmental concern.

General Information: The purpose of the EPA map is to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. This map is not intended to be used to determine if a home in a given zone should be tested for radon.

4. OWNER/USER PROVIDED INFORMATION

4-1. Interview with the Current Property User

- Owner's questionnaire was not provided to EPC at the time of this assessment. However, the lack of the questionnaire is not likely to affect the conclusion of this assessment.
- David A Macleod (Co-Tr); Urban Commons Gramercy LLC appeared as the listing owners for the property (Chicago Title Company).

4-2. User Provided Information

The United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) and ASTM 1527-13 Phase I Standards require that the Report User conduct independent research and consider certain information before purchasing a property.

4-2-1. Lien Search

The property user/owner is required to obtain a recent (less than 180 days old) title report prepared for the subject property. The report should be reviewed to obtain information regarding environmental clean-up liens or activity and use limitations with regard to the subject property. If environmental cleanup liens or activity and use limitations encumbering the subject property or in connection with the subject property are identified, the User should provide that information to the Environmental Professional (Environ Phase Consulting Company). If the User has actual knowledge of environmental cleanup liens or activity and use limitations encumbering the subject property or in connection with the subject property, the User should provide that information to the Environmental Professional (i.e., Environ Phase Consulting Company).

- No environmental lien was found in Preliminary Title Report provided by lender.

4-2-2. Specialized Knowledge

The property user/owner should provide the Environmental Professional (Environ Phase Consulting Company) with any specialized knowledge the User has with regard to recognized environmental conditions in connection with the property.

- The Owner/User is not aware of any specialized knowledge about the subject property with respect to recognized environmental conditions.

4-2-3. Commonly Known or Reasonably Ascertainable Information

If the property user/owner is aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions, the property user/owner should provide the information to the Environmental Professional (Environ Phase Consulting Company).

- The Owner/User is not aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions.

4-2-4. Property Valuation

If this Phase I was prepared as due diligence for a property transaction, it is the responsibility of the User to consider the relationship of the purchase price to the fair market value of the property. If the purchase price is significantly lower than the fair market value, the User should identify the alternate reason for the low purchase price if the lower purchase price is not related to the property being affected by hazardous substances or petroleum products.

- o No significant evidences of valuation reduction were found for the subject site regarding environmental issues during this assessment.

4-3. Previous Reports

- o On July 22, 2014, a *Phase I Environmental Site Assessment* was prepared by Xarax Environmental & Engineering Solutions, Inc. (Appendix 7). At that time, the subject site's commercial building was occupied by a restaurant under the name U2 Korean BBQ. The remaining portions of the subject site was improved with concrete-paved walkways and an asphalt-paved parking lot.

Historically, from as early as 1921, the subject property was partially occupied by three (3) residential dwellings and three (3) detached garages at the northern and central portion of the subject property (974, 980, and 986 South Gramercy Drive). The subject property at 3377 West Olympic Boulevard dated back to 1948, when it was occupied by a gas station. In 1966, the gas station was demolished and four (4) underground storage tanks (USTs) were removed. The current improvements on the subject property were constructed in 1967. Since then, the subject property has been occupied for retail/restaurant purposes.

One historical recognized environmental condition (HREC) was identified for the subject property as follows: The subject property was utilized as a gas station from approximately 1948 to 1966. Xarax reviewed a *Preliminary Site Characterization Report* prepared by Western Environmental Engineers Company (WEECO) dated December 24, 1996. Based on the report, six (6) soil borings were advanced in the area of the former gas station and eighteen (18) soil samples were collected and analyzed for Total Petroleum Hydrocarbons (TPH), Volatile Organic Compounds (VOCs), Benzene, Toluene, Ethylbenzene, Xylenes (BTEX), and Methyl Tertiary Butyl Ether (MTBE). Based on analytical results of the soil samples, all soil samples were determined to be none detected (ND) for any of the constituents tested. Based on the analytical results, the site was considered clean, in accordance with the California Water Resources Control Board "Maximum Soil Screening Levels for TPH and BTEX above Drinking Water Aquifers." The report concluded "based on these analytical results, no further subsurface investigation is necessary for the site."

No Recognized Environmental Condition (REC), de minimis environmental conditions, Business Environmental Risks (BERs), or Vapor Intrusion Conditions (VICs) were found.

Based on investigation of the property for evidence of recognized environmental conditions and other environmental issues, Xarax recommended no further environmental investigations at that time.

EPC's Analysis of Xarax's Phase I Environmental Site Assessment:

Based on the report and attached documents, the full *Preliminary Site Characterization Report* prepared by WEECO on December 24, 1996 was not able to be found within the appendices of the Xarax's Phase I Environmental Site Assessment report. Therefore, EPC could not accurately assess the previous subsurface investigation conducted at the subject site. Information regarding the soil sampling location and depths are unknown. Therefore, EPC considers the former gasoline station at the subject site a recognized environmental condition (REC). Additionally, the east neighboring property, addressed as 3355 West Olympic Boulevard, was a former gasoline station from approximately 1942 to 1966 (~24 years) and an auto repair shop from 1970 to present-day (~51 years). Based on the close proximity to the subject site, a potential vapor encroachment condition (pVEC) exists at the subject site due to the former gasoline station and auto repair shop activities from the east neighboring property.

EPC recommends a Phase II subsurface investigation be conducted at the subject site to verify the analytical results of the previous *Preliminary Site Characterization Report* prepared by WEECO in 1996 and to assess any subsurface impacts to the subject site from the former gasoline station and auto repair shop activities from the east neighboring property.

5. VISUAL INSPECTION OF NEIGHBORING PROPERTIES

Result of Visual Inspection: Our site inspection did reveal evidences of human harmful activity or significant pollutant emission enough to pose immediate environmental concern into the subject site. Neighboring properties were summarized as shown in Table (8).

Table (8) Summary of Adjacent Properties

Site	Address	Visual Inspection/Notes
North	Residential Apartments	No signs of hazardous materials and wastes were observed.
South	Immediate: West Olympic Boulevard Across Roadway: Commercial Office/Bank Building and Parking Lot 3371 West Olympic Boulevard	No signs of hazardous materials and wastes were observed.
East	Residential Apartments Preschool 989 South St. Andrews Place Joy Auto Center 3355 West Olympic Boulevard	Based on historical records, the site located at 3355 West Olympic Boulevard was a former service station from at least 1942 to 1966 (~24 years) and an auto repair shop from 1970 to present-day (~51 years). Based on the close proximity to the subject site, a potential vapor encroachment condition (pVEC) exists at the subject site due to the former gasoline station and auto repair shop activities from the east neighboring property.
West	Immediate: South Gramercy Drive Across Roadway: Residential Dwellings The Rotex Hotel & Condo 3411 West Olympic Boulevard	The site located at 3411 West Olympic Boulevard was a former service station. According to the SWRCB's GeoTracker online database, the site is listed as <i>Completed-Case Closed</i> as of May 22, 1996. Based on the regulatory status of the site, the site is not of significant environmental concern to the subject site.
Southwest	Immediate: W. Olympic Bl. & S. Gramercy Dr. Across Intersection: Multi-Tenant Commercial/Office Building 3400 West Olympic Boulevard	No signs of hazardous materials and wastes were observed.

Photos: See Appendix 2
EPC Table Form 080 sine 1993

6. ENVIRONMENTAL GOVERNMENT RECORD SEARCH

In order to determine reported areas of possible environmental impairment on or within a 1-mile radius of the site, an environmental database research report was obtained from the database company, EDR. The conducted government record search was performed to aid. In compliance with AAI, the environmental agencies' records are summarized as follows: Identification of facilities, location within a one-mile or half mile radius of the subject site, which might pose a potential threat to the subsurface environment at the subject site; and identification of any environmental violation notices associated with activities conducted at the subject site itself. The following lists were reviewed for sites within a one-mile of the site (Appendix 8).

Environmental effects from the neighboring sites are evaluated at *minimal risk level* in accordance with the reported remedial actions, distance between the subject site and reference sites, and limited contamination of the reference sites.

Standard Federal, State, and Tribal Environmental Record Sources		
Database Searched	Distance Searched (Miles)	Sites Found
Federal NPL	1	0
Federal Delisted NPL	0.5	0
Federal CERCLIS	0.5	0

6-1 Subject Site Listings in the Regulatory Database Search

Based on the information found in the regulatory database report (EDR Radius Map Report), the subject site was found in the following databases:

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

The subject site was listed in the UST database under the address of 3377 West Olympic Boulevard. Therefore, EPC requested UST records to the Los Angeles Fire Department (LAFD). Based on records from the LAFD, the subject site was developed with a service station from 1942 to 1966 (Section 2-4-2). USTs at the subject site included two (2) 2,000-gal and two (2) 1,000-gal gasoline USTs. The four (4) USTs were abandoned in 1966.

According to a previous *Phase I Environmental Site Assessment* prepared by Xarax in 2014, a previous subsurface investigation was conducted at the site in 1996 by WEECO due to the former gas station operations and USTs. Based on the analytical results, non-detectable levels of contaminants were found including TPH, VOCs, BTEX, and MTBE (See Section 4-3). However, based on the report and attached documents, the full *Preliminary Site Characterization Report* prepared by WEECO on December 24, 1996 was not able to be found within the appendices of the Xarax's *Phase I Environmental Site Assessment* report. Therefore, EPC could not accurately assess the previous subsurface investigation conducted at the subject site. Information regarding the soil sampling location and depths are unknown.

EPC recommends a Phase II subsurface investigation be conducted at the subject site to verify the analytical results of the previous *Preliminary Site Characterization Report* prepared by WEECO in 1996.

6-2 Neighboring Site Listings in the Regulatory Database Search

State and Tribal CERCLIS

ENVIROSTOR

Description: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

- Eight (8) ENVIROSTOR listings appeared within a 0.5-mile radius of the subject site. However, based on the regulatory status, horizontal distance, and/or groundwater flow direction in the area, the sites are not of significant environmental concern to the subject site.

State and Tribal Leaking Storage Tank

LUST: Leaking Underground Storage Tank

Description: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

- Nine (9) LUST listings appeared within a 0.5-mile radius of the subject site. All nine (9) sites were listed as *Completed-Case Closed* in the SWRCB's GeoTracker online database. Based on the regulatory status of the sites, the sites are not of significant environmental concern to the subject site.

State and Tribal Registered Underground Storage Tank

UST: Underground Storage Tank

Description: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

- Three (3) UST listings appeared within the adjacent neighboring properties. A facility was located at 3411 West Olympic Boulevard, adjacent to west of the subject site across South Gramercy Drive. Currently, the site is occupied as a hotel. Based on historical sources reviewed, the site was a former service station from approximately the 1960s to 1980s. However, based on the SWRCB's GeoTracker online database, the site is listed as *Completed-Case Closed* as of May 22, 1996. Based on the regulatory status of the site, the site is not of significant environmental concern to the subject site.
- A facility was located at 3360 West Olympic Boulevard, adjacent to southeast of the subject site across West Olympic Boulevard. Based on historical sources reviewed, the site was a former service station from approximately the 1940s to 1950s. The site appears to have been redeveloped with present-day commercial office building with a subterranean parking lot. Contamination and USTs, if any, were most likely removed from the site during the construction of the subterranean parking lot. Additionally, groundwater flow in the area is to the south-southeast. Based on the aforementioned, the site is not of significant environmental concern to the subject site.
- A facility was located at 3400 West Olympic Boulevard, adjacent to southwest of the subject site across the intersection of West Olympic Boulevard and South Gramercy Drive. No records of a service station or industrial facility was found for the site. Additionally, the site is developed with a commercial building with a subterranean parking lot. Contamination and USTs, if any, were most likely removed from the site during the construction of the subterranean parking lot. Additionally, groundwater flow in the area is to the south-southeast. Based on the aforementioned, the site is not of significant environmental concern to the subject site.

EDR Hist Auto

Description: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

- Three (3) EDR Hist Auto listing appeared within the adjacent neighboring properties. A facility was located at 3355 West Olympic Boulevard, adjacent to east of the subject site. The facility was listed as a gasoline and oil service station in 1942. From 1971 to 2008, the facility was listed as an automotive transmission repair shop and general automotive repair shop. Based on the site reconnaissance, the site remains as an auto repair shop. Based on historical sources reviewed, the site was a former gasoline station from approximately 1942 to 1966 (~24 years) and an auto repair shop from 1970 to present-day (~51 years). Based on the close proximity to the subject site, a potential vapor encroachment condition (pVEC) exists at the subject site due to the former gasoline station and auto repair shop activities from the east neighboring property.

EPC recommends a Phase II subsurface investigation be conducted at the subject site to assess any subsurface impacts to the subject site from the former gasoline station and auto repair shop activities from the east neighboring property.

- A facility was located at 3411 West Olympic Boulevard, adjacent to west of the subject site across South Gramercy Drive. The facility was listed as a gasoline service station in 1969 and 1970 and an automotive repair shop in 1987. However, based on the SWRCB's GeoTracker online database, the site is listed as *Completed-Case Closed* as of May 22, 1996. Based on the regulatory status of the site, the site is not of significant environmental concern to the subject site.
- A facility was located at 3360 West Olympic Boulevard, adjacent to southeast of the subject site across West Olympic Boulevard. The facility was listed as a gasoline and oil service station in 1942. The site appears to have been redeveloped with present-day commercial office building with a subterranean parking lot. Contamination and USTs, if any, were most likely removed from the site during the construction of the subterranean parking lot. Additionally, groundwater flow in the area is to the south-southeast. Based on the aforementioned, the site is not of significant environmental concern to the subject site.

7. CONCLUSION

A staff consultant of Environ Phase Consulting Company visited the subject site on July 8, 2021 to inspect the current site conditions. **EPC recommends a supplemental environmental site investigation based on the below conclusions of this assessment:**

Subject Site

The subject site is addressed as 3377 West Olympic Boulevard and 974-998 South Gramercy Drive in the City of Los Angeles, California. Additional addresses include 972 South Gramercy Drive and 974-986 Gramercy Place. Prior to 1913, South Gramercy Drive was known as Gramercy Place. The subject site is located at the northeast corner of the intersection of West Olympic Boulevard and South Gramercy Drive. The subject site consists of three rectangular-shaped parcel lots (APNs: 5081-033-011, -014, & -022) totaling approximately 34,967 square-feet and is developed with a vacant commercial building and parking lot. The 6,625 square-foot commercial building is developed at the southern portion of the subject site. The interior of the commercial building appears to have been a former restaurant which appears to have been abandoned with significant damages including fire damage. The remaining portions of the subject site lot consists of an asphalt-paved parking lot and landscaping. See Figure 1 in Appendix 2 for site configuration.

Historical Usage

According to historical sources (e.g., building permit records, historical aerial photographs, historical fire insurance maps, historical tenant search, and etc.), from as early as 1907, the subject site was undeveloped. From 1909 to 1997, the northern portion of the subject site, addressed as 972 & 974 S. Gramercy Drive, was developed with a residential dwelling. Thereafter, the northern portion of the subject site was utilized as a parking lot. From 1908 to 1963, the central portion of the subject site, addressed as 980-986 S. Gramercy Drive, was developed with two residential dwellings. Thereafter, the central portion of the subject site was utilized as a parking lot. From 1921 to 1940, the southern portion of the subject site, addressed as 994-998 S. Gramercy Drive & 3377 W. Olympic Boulevard, was developed with a residential dwelling. Thereafter, from 1942 to 1966, the southern portion of the subject site was redeveloped with a service station. In 1967, the present-day commercial building was developed at the subject site and mostly occupied by various restaurants. Currently, the commercial building is unoccupied and vacant.

REC Search:

Historical RECs Study:

A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

- Historical REC was not found at the subject site.

RECs Study:

The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment.

- On July 22, 2014, a *Phase I Environmental Site Assessment* was prepared by Xarax Environmental & Engineering Solutions, Inc. (Appendix 7). At that time, the subject site's commercial building was occupied by a restaurant under the name U2 Korean BBQ. The remaining portions of the subject site was improved with concrete-paved walkways and an asphalt-paved parking lot.

One historical recognized environmental condition (HREC) was identified for the subject property as follows: The subject property was utilized as a gas station from approximately 1948 to 1966. Xarax reviewed a *Preliminary Site Characterization Report* prepared by Western Environmental Engineers Company (WEECO) dated December 24, 1996. Based on the report, six (6) soil borings were advanced in the area of the former gas station and eighteen (18) soil samples were collected and analyzed for Total Petroleum Hydrocarbons (TPH), Volatile Organic Compounds (VOCs), Benzene, Toluene, Ethylbenzene, Xylenes (BTEX), and Methyl Tertiary Butyl Ether (MTBE). Based on analytical results of the soil samples, all soil samples were determined to be none detected (ND) for any of the constituents tested. Based on the analytical results, the site was considered clean, in accordance with the California Water Resources Control Board "Maximum Soil Screening Levels for TPH and BTEX above Drinking Water Aquifers." The report concluded "based on these analytical results, no further subsurface investigation is necessary for the site."

No Recognized Environmental Condition (REC), de minimis environmental conditions, Business Environmental Risks (BERs), or Vapor Intrusion Conditions (VICs) were found.

Based on investigation of the property for evidence of recognized environmental conditions and other environmental issues, Xarax recommended no further environmental investigations at that time.

EPC's Analysis of Xarax's Phase I Environmental Site Assessment:

Based on the report and attached documents, the full *Preliminary Site Characterization Report* prepared by WEECO on December 24, 1996 was not able to be found within the appendices of the Xarax's Phase I Environmental Site Assessment report. Therefore, EPC could not accurately assess the previous subsurface investigation conducted at the subject site. Information regarding the soil sampling location and depths are unknown. Therefore, EPC considers the former gasoline station at the subject site a recognized environmental condition (REC). Additionally, the east neighboring property, addressed as 3355 West Olympic Boulevard, was a former gasoline station from approximately 1942

to 1966 (~24 years) and an auto repair shop from 1970 to present-day (~51 years). Based on the close proximity to the subject site, a potential vapor encroachment condition (pVEC) exists at the subject site due to the former gasoline station and auto repair shop activities from the east neighboring property.

EPC recommends a supplemental subsurface investigation be conducted at the subject site to verify the analytical results of the previous *Preliminary Site Characterization Report* prepared by WEECO in 1996 and to assess any subsurface impacts to the subject site from the former gasoline station and auto repair shop activities from the east neighboring property.

Controlled RECs Study:

A recognized environmental condition which involves a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority and that is subject to activity and use limitations.

- Controlled REC was not found at the subject site.

Other Recommendations Regarding Non-CERCLA:

- According to the Los Angeles City Department of City Planning's property information online website (ZIMAS), the subject site, addressed as 3377 West Olympic Boulevard, is located within the *Methane Buffer Zone*. EPC recommends a methane survey at the subject site prior to any construction.
- Based on the building built year in 1967, asbestos survey and lead based paint assessment reports are recommended prior to the subject building demolition.
- Based on our visual site inspection, mold was found at the subject building. A safety and health plan should be prepared to protect construction workers during construction activities.

Lien Search:

No environmental liens were found in the Preliminary Title Report.

Immediate Adjacent Neighboring Properties

EPC *did* reveal evidences of human harmful activity or *significant* pollutant emission to pose immediate environmental concern into the subject site from the **neighboring properties** during this environmental assessment. See REC section above.

Environmental Data Research Results

In order to determine reported areas of possible environmental impairment on or within a 1-mile radius of the site, an environmental disclosure report was obtained from database.

Environmental effects from the neighboring sites are evaluated at minimal risk level in accordance with the reported remedial actions, distance between the subject site and reference sites, and limited contamination of the reference sites. Thus, government agencies' listings of the subject site vicinity area are not expected to represent a significant environmental concern on the subject site.

- Based on the information found in the regulatory database report (EDR Radius Map Report), the subject site was, addressed as 3377 West Olympic Boulevard, was listed in the UST database. See REC section above for more information.
- According to the EDR Radius Map Report, twenty-one (21) other listings were found within a specified radius of the subject site. Due to findings of USTs and auto repair activities at the east neighboring site, **EPC recommends a supplemental environmental site investigation (*Phase II*)** (Section 6-2).

Data Gaps

No significant data gaps of historical tenant records, local environmental agency records, weather, and on-site reconnaissance were indicated during this assessment.

8. LIMITATION & EXCEPTION

The report is the property of the Client for whom it was prepared. Its distribution to others is at client's discretion. To the best of our professional ability, EPC warrants that users of the report may rely upon it as on accurate reflection of the environmental condition of the property at the time it was evaluated: The results rendered are options based upon information obtained within records of Environmental Regulatory Agencies (ERS's database), owner/user interview, and visual inspection.

This Phase I report should not be regarded as a guarantee that further hazardous waste/material contamination and spill, leaking of those material. In the future, if suspected some hazardous wastes/materials contamination is encountered during any construction activities, Environmental Site Investigation may be required.

No part of this report may be reproduced, stored in a retrieval system, or transmitted, in any form or by any means, electronic, mechanical, photocopying, or otherwise, without the prior written permission of the EPC.

- **Non-CERCLA considerations are beyond the contracted scope of this assessment:** Non-CERCLA considerations may include the following: asbestos-containing materials (ACMs), PCB-containing materials, lead-based paint, lead in drinking water, urea formaldehyde, wetlands identification, mold inspections, air quality inspections, or flood zone applicability.
- Special Contractual Conditions between users (i.e., the client, the current or previous tenant, the property buyer, and the property seller) and environmental professional (EPC): EPC is an independent consulting firm with no interest in the subject site at the subject site. EPC has no special contractual conditions.

TSCA	Toxic Substances Control Act
TSDF	Treatment, Storage, Disposal Facility
TTLIC	Total Threshold Limit Concentration
UDC	under-dispenser containment
UST	Underground Storage Tank
MCL	the Maximum Contaminant Level or enforceable drinking water standard
RP	Responsible Party
RPHL	the Recommended Public Health Level
VOC	<p>Volatile Organic Compounds</p> <p>BTEX: benzene, toluene, Ethylbenzene, & Xylene</p> <p>MTBE: methyl tertiary-butyl ether DIPE: di-isopropyl ether</p> <p>TAME: tertiary-amyl methyl ether ETBE: ethyl-tertiary butyl ether</p>

	TBA: tertiary-butyl alcohol
HVOC	Halogenated Volatile Organic Compounds (Dichlorodifluoromethane, Chloromethane, Vinyl Chloride, Bromomethane, Chlorobenzene, 1,1,2-Trichloroethane, and etc.)
Material Threat	ASTM guidance defines " material threat " as "a physically observable or obvious threat, which is reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in impact to public health or the environment." It is not sufficient to establish a site feature as a "recognized environmental condition" just because it exists. In order to establish a site feature as a "recognized environmental condition," there "must be compelling evidence that either 1) the hazardous substance or petroleum product was released from its container or operation onto (or into) the surface or 2) by virtue of the condition of the container or state of the operation that stores or handles such products, there is reasonable concern in the foreseeable future that such materials will be released to the surface of the property" (New and Improved Site Assessment Standard, Revisions to the ASTM Phase I Standards Represent Significant Interpretive Changes for Both Users and Environmental Professionals, ASTM Standardization News Insight, March 2001

Company Information

Name: *Jeff Lee*

Title: President of EPC

Education:

* M.S. 1988 Environmental Engineering Kon-Kuk University of Korea

* B.S. 1986 Environmental Engineering Kon-Kuk University of Korea

* Hazardous Material Management Certificate UC Irvine

Affiliation:

- Lab Technologist Grade-II California Water Pollution Control Association Certificate Number 263
- Hazardous Substance Removal License (Haz 776425)
- General Engineering License (A 776425)
- Electrical Contractor License (C-10 776425)
- Registered Environmental Property Assessor (REPA 403790)

Professional Experiences:

While majoring in Environmental Engineering for his Bachelor's and Master's degrees, Mr. Lee has studied great deal in Environmental Site Assessment (ESA), Transaction Screen Assessment (TSA), Site Investigation (Phase II), and soil/groundwater treatment (Phase III) to meet ASTM and environmental government agencies' requirements. Also familiarizes with hazardous material and toxic chemical rules and regulations required by U.S Federal and California State governments. Mr. Jeff Lee has provided environmental site assessments and consulting services to banks and individual clients since 1986.

- Rapid Transit District (RTD) Vernon facility, Vernon, California: Worked for Modification of Existing Underground storage tank (UST).
- Film Recycle Facility, Los Angeles, California: Engaged in Site Assessment and Groundwater Monitoring Well Installations.
- Former Station, Pasadena, 8620 S. Normandie Ave., LA, California; Engaged in Site Assessment and Vapor Extraction Well Installations with Volatile Organic Compound (VOC) Control Thermal Unit.

- Western Environmental Engineering Co, Santa Ana, California: Designed and installed Vapor control/Degassing Engine Unit and Air Monitoring Mobile Laboratory.
- Huge Air Craft, Sherman Oaks, California: Worked for research and laboratory Q/A, Q/C; engaged in groundwater monitoring and estimated radioactivity project.
- Familiar with various types of rotary kilns, fluidized-bed combustors, and moving-grate boilers that can burn organic wastes and contaminated soils.
- Worked for research and laboratory organizations; Engaged in setting up wastewater and air pollutant analyzers and instruments and in preparing necessary protocol procedures for sampling and testing.
- Performed a great deal of lab tests for air pollution and waste water treatments and accumulated a large number of experiences in soil and groundwater sampling, EPA testing, site cleanup and remediation products, contaminated soil excavation and disposal.
- Crenshaw Transmission Shop - Los Angeles California: Prepared a plan to close report on the site assessment and contaminated soil remediation by elevated concentrations of PCB and Semi volatile Organic Compounds.
- National Institute of Environmental Research-Seoul Korea; As a Research engineer for the Air Pollution Engineering Division responsibilities included sampling and analyzing stationary sources, and designed incinerator and air pollution control system.

RESEARCH PAPERS

- 1988 - "The Technical Development of Waste Derived Fuel and Air Pollution Control for Combustible Industrial Waste" for The National (KOREA) Institute of Environmental Research's project.
- 1987 -"A Study on The Formation Mechanism of Particulate and Gaseous Nitrate in Seoul Atmosphere" for Master of Science Degree.
- May 1995 ~ August 1997 - Environmental Column in Journal of Gas Station

LETTER OF GOOD STANDING

Date: 12/15/2017

To Whom It May Concern:

We are pleased to inform you that **Mr. Jeff Lee** has registered with us for **REPA - Registered Environmental Property Assessor** certification in the academic **2017** year and is in good standing.

Certification #: 403790

Expiration Date: 03/15/21

For any more questions, please feel free to contact us at 224-257-4145 or email us at customerservice@nrep.org.

Sincerely,

National Registry of Environmental Professionals
Dr. Richard Young
PhD, REM, PE, CEO
Executive Director

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Environ Phase Consulting were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Environ Phase Consulting were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

LICENSED CONTRACTOR AND WORKERS' COMPENSATION DECLARATION

GENERAL CONTRACTOR

I hereby affirm, under penalty of perjury, that I am the general contractor named on the reverse side of this permit and I am licensed under the provisions of Chapter 9, commencing with Section 7000, of Division 3 of the Business and Professions Code, and my license is in full force and effect. I am responsible for the following permits:

- Building Electrical Plumbing HVAC

GENERAL CONTRACTOR/OWNER BUILDER

I hereby affirm, under penalty of perjury, one of the following declarations:

- I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Sec. 3700 of the Labor Code, for the performance of the work for which this permit is issued.
I have and will maintain workers' compensation insurance, as required by Sec. 3700 of the Labor code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: Policy #: I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the provisions of Sec. 3700 of the Labor Code, I shall forthwith comply with those provisions.

Sign: Date: Owner Contractor

ELECTRICAL CONTRACTOR

I hereby affirm, under penalty of perjury, that I am the electrical contractor named on the reverse side of this permit and I am licensed under the provisions of Chapter 9, commencing with Section 7000, of Division 3 of the Business and Professions Code, and my license is in full force and effect. I am responsible for the electrical permits.

I hereby affirm, under penalty of perjury, one of the following declarations:

- I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Sec. 3700 of the Labor Code, for the performance of the work for which this permit is issued.
I have and will maintain workers' compensation insurance, as required by Sec. 3700 of the Labor code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: Policy #: I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the provisions of Sec. 3700 of the Labor Code, I shall forthwith comply with those provisions.

OWNER-BUILDER DECLARATION

I hereby affirm, under penalty of perjury, that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business & Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chap. 9 commencing with Sec. 70000 of Div. 3 of the Business & Professions Code) or that he or she is exempt therefrom & the basis for the alleged exemption. Any violation of Sec. 7031.5 by any applicant for a permit, subjects the applicant to a civil penalty of not more than five hundred dollars (\$500):

- I, as the owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business & Professions Code: The Contractors License Law does not apply to the owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not intend to improve for the purposes of sale).
I, as the owner of the property, an exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business & Professions Code: The Contractors License Law does not apply to the owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law).

I am exempt under Sec. Bus. & Prof. Code for the following reason:

Print: Sign: Date: 4/19/94 Owner Authorized Agent

FINAL DECLARATION

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein. Also, that it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, that neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed.

Application to Alter, Repair, Move or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles: Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit: First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley or other public place or portion thereof. Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles. Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

DECLARATIONS AND CERTIFICATIONS

16. LICENSED CONTRACTORS DECLARATION

I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 5 of the Business and Professions Code, and my license is in full force and effect.

Date _____ Lic. Class _____ Lic. Number _____ Contractor (Signature) _____

17. OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 5 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500.):

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. _____ B. & P. C. for this reason _____

Date 10/14/92 Owner's Signature _____

18. WORKERS' COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.).

Policy No. _____ Insurance Company _____

Certified copy is hereby furnished.

Certified copy is filed with the Los Angeles City Dept. of Bldg. & Safety.

Date _____ Applicant's Signature _____

19. CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

Date 10/14/92 Applicant's Signature _____

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

20. CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____ Lender's Address _____

21. I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

I realize that this permit is an application for inspection, that it does not approve or authorize the work specified herein, that it does not authorize or permit any violation or failure to comply with any applicable law, that neither the city of Los Angeles nor any board, department, officer or employee thereof make any warranty or shall be responsible for the performance or results of any work described herein or the condition of the property or soil upon which such work is performed. (See Sec. 91.002, Lab. C.)

LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 5 of the Business and Professions Code, and my license is in full force and effect.

Date _____ Lic. Class _____ Lic. Number _____ Contractor (Signature) _____

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 5 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500.):

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. _____ B. & P. C. for this reason _____

DECLARATIONS AND CERTIFICATIONS LICENSED CONTRACTORS DECLARATION 16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. Date Lic. Class Lic. Number Contractor (Signature)

OWNER-BUILDER DECLARATION 17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code): Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500). I am owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale). I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor) licensed pursuant to the Contractor's License Law. I am exempt under Sec. B. & P. C. for this reason Date 12-4-92 Owner's Signature

WORKERS' COMPENSATION DECLARATION 18. I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.). Policy No. Insurance Company Certified copy is hereby furnished. Certified copy is filed with the Los Angeles City Dept. of Bldg. & Safety. Date Applicant's Signature Applicant's Mailing Address

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE 19. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California. Date 12-4-92 Applicant's Signature NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY 20. I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.). Lender's Name Lender's Address

21. I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection, that it does not approve or authorize the work specified herein, that it does not authorize or permit any violation or failure to comply with any applicable law, that neither the city of Los Angeles nor any board, department, officer or employee thereof make any warranty or shall be responsible for the performance or results of any work described herein or the condition of the property or soil upon which such work is performed. (See Sec. 91.0202 LAMC) Signed Owner's agent having property owner's consent Position Date 12-4-92

Environmental Questionnaire

1. EXECUTIVE SUMMARY

Xarax Environmental & Engineering Solutions, Inc. (“Xarax”) has completed a Phase I Environmental Site Assessment (ESA) of the commercial property located at 3377 West Olympic Boulevard (also known as 974, 980, and 986 South Gramercy Drive), Los Angeles, California 90019. The Assessment was performed in general accordance with the scope and limitations of the American Society for Testing and Materials (ASTM) Standard E1527-13 and United States Small Business Administration (SBA), to comply with the contract between Xarax and Mr. Ara Kourouyan of CTBC Bank Corp. (USA) (“Client”) dated July 8, 2014. Any exceptions to, or deletions from, the ASTM E1527-13 standard of practice are described in Section 2.4 of this report.

The subject property consists of three (3) contiguous parcels of land approximately 0.803 acres in combined area and improved with one (1) commercial building. The building is a single-story concrete masonry unit (CMU) structure with a composition roof. Concrete-paved walkways line the perimeter of the building and asphalt-paved parking lot occupy the remaining portions of the property. Currently, the subject property is occupied by U2 Korean BBQ restaurant.

According to Xarax’s historical review, the obvious first developed use of the subject property dates back to 1921, when it was partially occupied by three (3) dwellings and three (3) detached garages (974, 980, and 986 South Gramercy Drive). The obvious first developed use of the 3377 West Olympic Boulevard parcel dates back to 1948, when it was occupied by a gas station. In 1966, the gas station was demolished and four (4) underground storage tanks (USTs) were removed. The current improvements on the subject property were constructed in 1967. The subject property has been utilized for retail/restaurant purposes from 1967 to present.

The vicinity of the subject property can be described as a mixture of residential and commercial/retail developments. Current use of adjoining property includes residential development to the north; commercial development (auto repair shop) followed by St. Andrews Place to the east; Olympic Boulevard followed by commercial development (a bank and parking lot) to the south; and Gramercy Drive followed by commercial development (hotel) to the west.

1.1 PHASE I ESA

In accordance with ASTM Standard E1527-13, this Phase I Environmental Site Assessment included reconnaissance of the subject property and adjoining properties, interviews, and review of historical records and regulatory databases in an effort to identify evidence of recognized environmental conditions that may impact the property. This assessment has revealed no evidence of recognized environmental conditions in connection with the property, except for the following:

ON-SITE CONDITIONS

Recognized Environmental Conditions

- None

Historical Recognized Environmental Conditions

- The subject property was utilized as a gas station from at least 1948 to 1966. According to a Preliminary Site Characterization Report issued by Western Environmental Engineers Company (WEECO) and dated December 24, 1996, six (6) soil borings were advanced in the area of the former gas station and eighteen (18) soil samples were collected and analyzed for Total Petroleum Hydrocarbons (TPH), Volatile Organic Compounds (VOC) (BTEX), and Methyl Tertiary Butyl Ether (MTBE). The reasoning for this investigation was due to the former gas station operations and the four (4) USTs that were removed from the subject property in June of 1966. Upon laboratory analysis of the soil samples, all soil samples were determined to be ND (none detected) for any of the constituents tested. Based on those results, the site was considered clean, in accordance with the California Water Resources Control Board "Maximum Soil Screening Levels for TPH and BTEX above Drinking Water Aquifers." The report concluded "based on these analytical results, no further subsurface investigation is necessary for the site." Based on information reviewed during this assessment, this does not appear to constitute a historical recognized environmental condition (HREC) with reference to onsite activities on the subject property.

OFF-SITE CONDITIONS

Recognized Environmental Conditions

- None

Historical Recognized Environmental Conditions

- None

DE MINIMIS ENVIRONMENTAL CONDITIONS

- None

BUSINESS ENVIRONMENTAL RISKS (BERs)

- None

VAPOR INTRUSION CONDITIONS / POTENTIAL VAPOR INTRUSION CONDITIONS (VIC / pVIC)

- Xarax has performed a search distance test for Vapor Intrusion analysis in conformance with the scope and limitations of the Standard Practice E 2600-10 on

property located at 3377 West Olympic Boulevard, Los Angeles, California 90019. The search distance test involves a review of the regulatory database report and available historical records to make a determination if any *known or suspect potentially contaminated* properties exist within the Area of Concern (AOC). High risk sites are typically current and former gas stations, former and current dry cleaners, manufactured gas plants, and industrial sites (Brownfields). The AOC is defined as any up gradient sites within the ASTM 1527-13 standard search distances and any cross or down gradient sites within 1/3 mile for solvents and petroleum products. In the professional opinion of Xarax, an appropriate level of assessment has been conducted consistent with good commercial and customary practice in an effort to minimize liability, and no evidence or indication of potential vapor intrusion conditions (pVIC) or vapor intrusion conditions (VIC) has been revealed and vapor intrusion is unlikely to be an issue of concern in connection with existing or planned structures on the subject property.

1.2 RECOMMENDATIONS

Based on investigation of the property for evidence of recognized environmental conditions and other environmental issues, Xarax offers the following recommendations.

- No further environmental investigations appear warranted at this time.

1.3 CONFLICT CERTIFICATION

Xarax has no present or contemplated future ownership interest or financial interest in the real estate that is the subject of this Environmental Assessment Report; and Xarax has no personal interest with respect to the subject matter of the Environmental Assessment Report or the parties involved and Xarax has no relationship with the property or the owners thereof which would prevent an independent analysis of the environmental or other conditions of the property.

This summary does not contain all the information that is found in the full report. The report should be read in its entirety to obtain a more complete understanding of the information provided, and to aid in any decisions made or actions taken based on this information.

2. INTRODUCTION

2.1 PURPOSE AND SCOPE

This Phase I Environmental Site Assessment (ESA) was performed to search for evidence of recognized environmental conditions that may have an adverse environmental impact upon the property. The assessment included records review, interviews, and reconnaissance to evaluate whether such conditions exist in connection with the property. The protocol utilized for this Phase I ESA was in general accordance with the requirements of ASTM Standard E 1527-13 as specified in the assessment contract. This report includes documentation to support the analysis, opinions and conclusions as presented.

2.2 SPECIAL TERMS AND CONDITIONS

AUTHORIZATION

Authorization to perform this assessment was given on July 8, 2014, by Mr. Ara Kourouyan of CTBC Bank Corp. (USA).

PROPERTY ACCESS

Mr. In Chun Lee of U2 Korean BBQ provided site access and relevant property information. Xarax inspected all readily accessible and observable areas of the property.

USE BY THIRD PARTIES

This report was prepared pursuant to the contract between Xarax and CTBC Bank Corp. (USA). That contractual relationship included an exchange of information about the property that was unique and between Xarax and its client and serves as the basis upon which this report was prepared. Because of the importance of the communication between Xarax and its client, reliance or any use of this report by anyone other than CTBC Bank Corp. (USA) and United States Small Business Administration (SBA), for whom it was prepared, is prohibited and therefore not foreseeable to Xarax.

Reliance or use by any such third party without explicit authorization in the report does not make said third party a third party beneficiary to Xarax's contract with CTBC Bank Corp. (USA). Any such unauthorized reliance on or use of this report, including any of its information or conclusions, will be at the third party's risk. For the same reasons, no warranties or representations, expressed or implied in this report, are made to any such third party.

Third party reliance letters may be issued on request and upon payment of the, then current fee for such letters. All third parties relying on Xarax's reports, by such reliance, agree to be bound by the proposal and Xarax's General Conditions. No reliance by any party is permitted without such agreement, regardless of the content of the reliance letter itself.

2.3 METHODOLOGY AND RESOURCES

RECONNAISSANCE

Xarax conducted a ground reconnaissance of the subject property on July 11, 2014. The ground reconnaissance consisted of observing the periphery of the property and viewing the site from accessible adjacent public thoroughfares. Interior portions of the property were systematically traversed to provide an overlapping field of view, wherever possible. The periphery of structures, where present on the property, were observed along with interior accessible common areas and a representative number of units in each building. Visual reconnaissance of adjoining properties was limited to areas and facilities that were readily observable from the subject property or from public access areas. Photographs were taken to document the features observed during the reconnaissance and environmental conditions of concern, where possible. Site photographs are included in Appendix D.

INTERVIEWS

Interviews were conducted with persons as noted in the following table. Pertinent information reported by the interviewed parties is discussed in appropriate sections of the report.

Name	Function	Employer	Date	Contact
Mr. Ara Kourouyan	Client	CTBC Bank Corp. (USA)	7/8/14	Email
Mr. In Chun Lee	Subject Property Occupant	U2 Korean BBQ	7/8/14-7/11/14	Telephone & In Person

ENVIRONMENTAL REGULATORY DATABASE INFORMATION

Information for the standard federal and state environmental record sources specified in ASTM Standard E 1527-13 § 7.2.1.1 was obtained through BBL Environmental Information (“BBL”). The database information was reviewed to help identify evidence of recognized environmental conditions in connection with the property. Unmappable (orphan) sites listed in the database with insufficient address or geocoding information to be mapped were evaluated for potential location within the approximate minimum search distance (AMSD). Copies of the BBL research data and a description of the databases are included in Appendix A of this report.

HISTORICAL USE INFORMATION

A history of the previous uses of the property, and properties in the surrounding area to the extent that this information was revealed in the course of researching the subject property, was developed consistent with practices specified in ASTM Standard E 1527-13 § 7.3. From the standard historical sources specified in the ASTM practice Xarax reviewed those sources listed below. Copies of representative historical source information are provided in applicable Appendices.

- Aerial photographs dated 1948, 1952, 1964, 1968, 1980, 1985, and 1994 obtained from BBL.
- Xarax performed a search for Sanborn (Fire Insurance) maps for the years 1867 to 1994 at the Los Angeles Central Public Library (Library of Congress Collection); map coverage for years 1921, 1950, and 1955 was available for the subject property area.
- Historical United States Geological Survey (USGS) 7.5 minute topographic maps titled Hollywood, California Quadrangle, dated 1994.
- Historic local street directories for years 1949, 1956, 1961, 1965, 1972, 1975, 1980, 1985, 1991, 1994, 1998, 2000, 2002, 2004, 2006, 2008, 2010, 2012, and 2013 published by Haine’s & Digital Directory Assistance obtained from BBL.

Based on the historical sources reviewed, the obvious first developed use of the subject property dates back to 1921, when it was partially occupied by three (3) dwellings and three (3) detached garages (974, 980, and 986 South Gramercy Drive). The obvious first developed use of the 3377 West Olympic Boulevard parcel dates back to 1948, when it was occupied by a gas station. In 1966, the gas station was demolished and four (4) underground storage tanks (USTs) were removed. The current improvements on the subject property were constructed in 1967. The subject property has been utilized for retail/restaurant purposes from 1967 to present. Historical information sources researched in this assessment allowed uses of the property to be traced from the present back to 1921. This meets the 1940-minimum, and/or obvious first developed use, research limit per ASTM Standard E 1527-13 § 7.3.2.

INFORMATION REPORTED BY USER

Pursuant to ASTM Standard E 1527-13 § 5.2 and § 5.3 Xarax requested that the client provide information on any environmental liens recorded against the property, communicate any specialized knowledge or experience that is material to recognized environmental conditions in connection with the property, and identify key site managers for interview purposes. Information that was reported has been incorporated into and is discussed in appropriate sections of the report. Documents provided by the client for our use in preparation of this report, if any, are presented in applicable Appendices.

ASTM NON-SCOPE AND OTHER RESOURCES

Methodology and protocols used for evaluation of conditions and issues beyond the scope of ASTM Standard E 1527-13, if any, are described in Section 7 of this report. Other resources and information accessed for purposes of this site assessment are discussed in appropriate sections of the report.

2.4 LIMITATIONS AND EXCEPTIONS OF ASSESSMENT

Along with all of the limitations set forth in various sections of the ASTM Standard E 1527-13 protocol, the accuracy and completeness of this report is necessarily limited by the following:

- Access Limitations – None
- Physical Obstructions to Observations – None
- Outstanding Information Requests – On July 8, 2014, Xarax requested records from the Los Angeles City Fire Department Underground Storage Tanks Unit (LAFD) for the subject property. These records may contain evidence indicating current and/or historical hazardous materials usage, storage or releases, as well as the presence of USTs. To date, Xarax has not received a response to its written request for information relating to the subject property.
- Historical Data Source Failure – None
- Other – None

3. PROPERTY DESCRIPTION AND PHYSICAL SETTING

3.1 LOCATION

The subject property is located at 3377 West Olympic Boulevard, Los Angeles County, Los Angeles, California 90019. Historically, the subject property address has also included 974, 980, and 986 South Gramercy Drive. The Los Angeles County Tax Assessor's Parcel Number (APN) for the subject property is 5081-033-011, 5081-033-014, and 5081-033-022.

The subject site's location is identified on the site vicinity map provided in Appendix C.

3.2 PROPERTY VICINITY CHARACTERISTICS

The vicinity of the subject property can be described as a mixture of residential and commercial/retail developments. Current use of adjoining property includes residential development to the north; commercial development (auto repair shop) followed by St. Andrews Place to the east; Olympic Boulevard followed by commercial development (a bank and parking lot) to the south; and Gramercy Drive followed by commercial development (hotel) to the west.

A site vicinity sketch is included in Appendix C.

3.3 DESCRIPTION OF PROPERTY AND IMPROVEMENTS

The subject property consists of three (3) contiguous parcels of land approximately 0.803 acres in combined area and improved with one (1) commercial building. The building is a single-story concrete masonry unit (CMU) structure with a composition roof. Concrete-paved walkways line the perimeter of the building and asphalt-paved parking lot occupy the remaining portions of the property. Currently, the subject property is occupied by U2 Korean BBQ restaurant.

Photographs showing prominent features of the site are provided in Appendix D.

UTILITIES

Utility systems identified at the property, as specified in ASTM Standard E 1527-13 § 8.4.1 and § 8.4.3 are as follows:

- The heating ventilating and air conditioning (HVAC) system on the subject property consist of roof-mounted units.
- Local municipal sources provide potable water & sewage disposal service to the property.
- Local utility companies provide electric & natural gas service to the property.

3.4 PHYSICAL SETTING

TOPOGRAPHIC MAP REVIEW

A current United States Geological Survey (USGS) 7.5 minute topographic map (or equivalent) showing the area where the property is located was obtained and reviewed as specified in ASTM Standard E 1527-13 § 7.2.3. The 1994 USGS Hollywood, California Quadrangle map was reviewed. According to the contour lines on the topographic map, the property is located approximately 220 feet above mean sea level. The contour lines in the area of the property indicate the area slopes towards the west. No water bodies are evident on or adjacent to the property. The property does not appear on the map as developed.

SUPPLEMENTAL PHYSICAL SETTING INFORMATION

The following discretionary physical setting sources pursuant to ASTM Standard E 1527-13 § 7.2.3, were obtained and reviewed to provide supplemental information regarding geology, soils, and hydrogeology in the vicinity of the property.

SOILS

Surficial soil at the subject property consists of unconsolidated and semi-consolidated deposits of sand and gravel. Site-specific soils reports were not encountered during Xarax's investigation.

GEOLOGY

The subject property is located in a region that is primarily alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast. Thickness of the Quaternary alluvium (0 to 1.6 million years old) in the general site vicinity is approximately 2,300 feet. The base of the alluvium lies on non-water bearing, undifferentiated Tertiary rocks (1.6 million to 66.4 million years old).

HYDROGEOLOGY

Information obtained from the Los Angeles County Public Works Department, Hydraulics Section, indicates that the first-encountered semi-perched groundwater may exist in the subject property vicinity at shallow depths of approximately 13-20 feet below ground surface. Local flow directions and water levels are influenced by changes in pumping and recharge.

Groundwater beneath the subject property is likely to mirror surface topography and flow towards the west.

4. PROPERTY USAGE

4.1 CURRENT USE OF THE PROPERTY

Current use of the property as determined through observation, interviews and records review is described below.

The subject property consists of three (3) contiguous parcels of land approximately 0.803 acres in combined area and improved with one (1) commercial building. The building is a single-story concrete masonry unit (CMU) structure with a composition roof. Concrete-paved walkways line the perimeter of the building and asphalt-paved parking lot occupy the remaining portions of the property. Currently, the subject property is occupied by U2 Korean BBQ restaurant.

The User should refer to Section 6 of this report for additional site reconnaissance details.

4.2 PAST USES OF THE PROPERTY

To the extent that indications of past uses of the property were identified through historical records review, reconnaissance observation, interviews, or through client provided information, they are identified below.

Year	Property Use	Source
<i>Subject Property</i>		
1921	The subject property is depicted as vacant land at 3377 W. Olympic Blvd. and occupied by 3 dwellings and detached garages at 974, 980, and 986 S. Gramercy Drive.	Sanborn Map
1948	The subject property appears to consist of 3 dwelling-type structures fronting Gramercy Drive and 1 gas station-type structure fronting Olympic Boulevard.	Aerial Photograph
1949	The subject property is listed as "Trojan Service."	City Directory
1950	The subject property is depicted as a gas station at 3377 W. Olympic Blvd. and occupied by 3 dwellings and detached garages at 974, 980, and 986 S. Gramercy Drive.	Sanborn Map
1952	The subject property appears to consist of 3 dwelling-type structures fronting Gramercy Drive and 1 gas station-type structure fronting Olympic Boulevard.	Aerial Photograph
1955	The subject property is depicted as a gas station at 3377 W. Olympic Blvd. and 3 dwellings and detached garages at 974, 980, and 986 S. Gramercy Drive.	Sanborn Map

Year	Property Use	Source
Subject Property		
1956	No listings.	City Directory
1961	The subject property is listed as "Vielman's Bodyshop."	City Directory
1961	Building permit for a roof sign for existing gas station on the subject property (3377 W. Olympic Blvd.).	Building/Agency Records
1964	The subject property appears to consist of 3 dwelling-type structures fronting Gramercy Drive and 1 gas station-type structure fronting Olympic Boulevard.	Aerial Photograph
1965	The subject property is listed as "Ray's Auto Repair."	City Directory
1967	Building permit for construction of a new 92'x25' restaurant building on the subject property (3377 W. Olympic).	Building/Agency Records
1968	The subject property appears to consist of 3 dwelling-type structures fronting Gramercy Drive and the current restaurant structure fronting Olympic Boulevard.	Aerial Photograph
1969	Building permit for a roof sign for existing restaurant on the subject property (3377 W. Olympic).	Building/Agency Records
1970	Certificate of Occupancy for a 92'x25' coffee shop and parking (3377 W. Olympic).	Building/Agency Records
1972	No listings.	City Directory
1975	The subject property is listed as "Dragon Palace."	City Directory
1980	The subject property is listed as "Dragon Palace."	City Directory
1980	The subject property appears to consist of 3 dwelling-type structures fronting Gramercy Drive and the current restaurant structure fronting Olympic Boulevard.	Aerial Photograph
1985	The subject property is listed as "RC Satellite Electronics."	City Directory
1985	The subject property appears to consist of 3 dwelling-type structures fronting Gramercy Drive and the current restaurant structure fronting Olympic Boulevard.	Aerial Photograph
1991	No listings.	City Directory
1993	Certificate of Occupancy to change use from restaurant to retail (3377 W. Olympic).	Building/Agency Records
1994	No listings.	City Directory
1994	The subject property appears as it does today.	Aerial Photograph
1998	No listings.	City Directory

2002	No listings.	City Directory

Year	Property Use	Source
Subject Property		
2004	The subject property is listed as "Manna Korean BBQ."	City Directory
2006	The subject property is listed as "Manna Korean BBQ."	City Directory
2008	The subject property is listed as "Manna Korean BBQ."	City Directory
2010	The subject property is listed as "Manna Korean BBQ."	City Directory
2012	The subject property is listed as "Manna Korean BBQ Meat."	City Directory
2013	The subject property is listed as "Manna Korean BBQ Meat."	City Directory
2014	The subject property consists of three (3) contiguous parcels of land approximately 0.803 acres in combined area and improved with one (1) commercial building. The building is a single-story concrete masonry unit (CMU) structure with a composition roof. Concrete-paved walkways line the perimeter of the building and asphalt-paved parking lot occupy the remaining portions of the property. Currently, the subject property is occupied by U2 Korean BBQ restaurant.	Site Reconnaissance

The historical information developed and reviewed for the subject property revealed potential evidence of recognized environmental conditions in connection with the subject property. Please see Section 6.0.

4.3 ENVIRONMENTAL LIENS

No knowledge of environmental liens recorded against the property was reported to Xarax.

4.4 CURRENT AND PAST USES OF ADJOINING PROPERTIES

To the extent that indications of current and past uses of adjoining properties were identified through reconnaissance observation, interviews, records review or through client provided information, they are described below. Locations of adjoining properties discussed can be found on the site vicinity sketch in Appendix C.

Year	Property Use	Source
Adjacent Properties		
1921	The adjacent properties include residential to the north, Olympic Blvd. followed by vacant lot to the south, residences to the east, and Gramercy Dr. followed by residences to the west.	Sanborn Map
1948-1952	The adjacent properties appear to be residential to the north, Olympic Blvd. followed by residential to the south, retail to the east, and Gramercy Dr. followed by residences to the west.	Aerial Photographs
1950	The adjacent properties include residential to the north, Olympic Blvd. followed by residential to the south, retail to the east, and Gramercy Dr. followed by retail to the west.	Sanborn Map
1955	The adjacent properties include residential to the north, Olympic Blvd. followed by residential to the south, retail to the east, and Gramercy Dr. followed by retail to the west.	Sanborn Map
1964-1968	The adjacent properties appear to be residential to the north, Olympic Blvd. followed by retail to the south, retail to the east, and Gramercy Dr. followed by residences to the west.	Aerial Photographs
1980-1994	The adjacent properties appear to be residential to the north, Olympic Blvd. followed by retail to the south, retail to the east, and Gramercy Dr. followed by retail to the west.	Aerial Photographs
2014	The vicinity of the subject property can be described as a mixture of residential and commercial/retail developments. Current use of adjoining property includes residential development to the north; commercial development (auto repair shop) followed by St. Andrews Place to the east; Olympic Boulevard followed by commercial development (a bank and parking lot) to the south; and Gramercy Drive followed by commercial development (hotel) to the west.	Site Reconnaissance

The historical information developed and reviewed for adjoining properties revealed no evidence of recognized environmental conditions in connection with the subject property vicinity.

The User should refer to Section 6 of this report for additional site reconnaissance information on the current use of adjoining property.

5. ENVIRONMENTAL REGULATORY RECORDS REVIEW

Xarax contracted BBL Environmental Information (“BBL”) to perform a regulatory database review for the subject property as well as surrounding properties located up to one mile away from the subject property. The number of listed sites identified within the approximate minimum Search distance (AMSD) from the Federal and state environmental records database listings specified in ASTM Standard E 1527-13 § 7.2.1.1 are summarized in the following tables.

Copies of the BBL research data are included in Appendix A of this report.

NPL Sites

The National Priorities List (NPL), also known as the Superfund List, is an EPA listing of uncontrolled or abandoned hazardous waste sites. These sites are targeted for possible long-term remedial action under the Superfund Act.

**TABLE 1
NPL Sites**

Facility Name / Address	Proximity	Description / Status
None	N/A	N/A

There are no NPL sites listed within a **1.0-mile radius** of the subject property. The subject property itself is not on this list.

CERCLIS Sites:

The Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) Database is a comprehensive listing of known or suspected uncontrolled or abandoned hazardous waste sites. These sites have either been investigated, or are currently under investigation by the federal EPA for the release or threatened release of hazardous substances. Once a site is placed in CERCLIS, it may be subjected to several levels of review and evaluation and ultimately placed on the National Priorities List (NPL).

**TABLE 2
CERCLIS Sites**

Facility Name / Address	Proximity	Description / Status
None	N/A	N/A

There are no CERCLIS sites listed within a **0.5-mile radius** of the subject property. The subject property itself is not on this list.

TSDF / SWIS (SWF) / SWAT Sites:

The Treatment, Storage, and Disposal Facility (TSDF) database contains information pertaining to facilities which either treat, store, or dispose of hazardous waste. The Solid Waste Information System (SWIS) database contains information pertaining to all permitted active and inactive solid waste landfills and processing facilities located within the State of California. The Solid Waste Assessment Test (SWAT) database contains information pertaining to solid waste landfills from which there is a known migration of hazardous waste.

**TABLE 3
TSDF / SWIS (SWF) / SWAT Sites**

Facility Name / Address	Proximity	Description / Status
None	N/A	N/A

There are no TSDF, SWAT, and/or SWIS/SWF sites listed within a **1.0-mile radius** of the subject property. The subject property itself is not on any of these lists.

CALSITES (HWS) Sites (Active):

The California Calsites List contains information pertaining to State Hazardous Waste Sites (HWS). Sites formerly listed in the Annual Workplan (AWP), the Abandoned Sites Project Information System (ASPIS), and the Bond Expenditure Plan (BEP) are now included in the CALSITES database.

**TABLE 4
CALSITES (HWS) Sites**

Facility Name / Address	Proximity	Description / Status
None	N/A	N/A

There are no active CALSITES facilities listed within a **1.0-mile radius** of the subject property. The subject property itself is not on this list.

LUST Sites:

The California Leaking Underground Storage Tank (LUST) List contains information pertaining to reported leaking underground storage tanks within the State of California. BBL has obtained the LUST information from the State EPA and the Regional Water Quality Control Board (RWQCB).

**TABLE 5
LUST Sites**

Facility Name / Address	Proximity	Description / Status
ROTEX DEV./TRANSAM CONS 3411 W OLYMPIC BLVD. LOS ANGELES	0.01 miles Southwest (down-gradient)	Status: CLSD – Case Closed Only the soil is impacted.

There are nine (9) LUST sites listed within a **0.5-mile radius** of the subject property. The LUST site closest to the subject property is discussed above. These sites are not expected to present a recognized environmental condition in connection with the subject property at this time due to distance, status (responsible parties identified, case closed, etc.) and/or hydrologic setting with respect to the subject property. The subject property itself is not on this list.

UST/RST & HISTORICAL UST/RST Sites:

The California Underground Storage Tank (UST) List is a comprehensive listing of all registered underground storage tanks within the State of California.

**TABLE 6
UST/RST Sites**

Facility Name / Address	Proximity	Description / Status
C & P AUTO REPAIR 3411 W OLYMPIC BLVD. LOS ANGELES	0.01 miles Southwest (down-gradient)	No other info provided

There are thirteen (13) UST (RST) sites listed within a **0.25-mile radius** of the subject property. These sites are not expected to present a recognized environmental condition in connection with the subject property at this time due to distance, status (responsible parties identified, registered sites, etc.) and/or hydrologic setting with respect to the subject property. The subject property itself is not on this list.

WDS Sites:

The California Waste Discharge System (WDS) report contains information pertaining to all active and regulated facilities that have been issued waste discharge permits for the release of waste water or hazardous waste into either an injection well or surface water.

**TABLE 7
WDS Sites**

Facility Name / Address	Proximity	Description / Status
None	N/A	N/A

The subject property and/or adjoining properties are not on this list.

CORTESE Sites:

The California Cortese List, also known as the Hazardous Waste and Substances Sites List, contains summary information pertaining to contaminated sites in the State of California. Contaminated wells, leaking underground storage tanks, and sanitary landfills are among the facilities contained on the Cortese List.

**TABLE 8
CORTESE Sites**

Facility Name / Address	Proximity	Description / Status
None	N/A	N/A

There are no CORTESE sites listed within a **0.5-mile radius** of the subject property. The subject property itself is not on this list.

ERNS Sites

The Emergency Response Notification System (ERNS) is a national computer database system that is used to store information on the sudden and/or accidental release of hazardous substances, including petroleum, into the environment. The ERNS reporting system contains preliminary information on specific releases, including the spill location, the substance released, and the responsible party. Please note that information in the ERNS report pertains only to past releases.

**TABLE 9
ERNS Sites**

Discharger Name / Address	Proximity	Description / Status
None	N/A	N/A

The subject property and/or adjoining properties are not on this list.

SARA (TRI) Sites:

The Toxic Release Inventory (TRI) report contains information on the industrial release and/or transfer of toxic chemicals as reportable under Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA Title III).

**TABLE 10
TRI Sites**

Facility Name / Address	Proximity	Description / Status
None	N/A	N/A

The subject property and/or adjoining properties are not on this list.

HWIS (HAZNET) Sites:

The California Hazardous Waste Information System (HWIS) contains summary information pertaining to facilities that are required to report their hazardous waste activities with the California EPA under the Resource Conservation and Recovery Act (RCRA).

**TABLE 11
HWIS (HAZNET) Sites**

Facility Name / Address	Proximity	Description / Status
None	N/A	N/A

The subject property and/or adjoining properties are not on this list.

RCRA / RCRIS Sites:

The RCRIS databases contain information pertaining to facilities which either generate between 100 kg and 1000 kg of hazardous waste per month (Small Quantity Generators), or more than 1000 kg of hazardous waste per month (Large Quantity Generators), or meet other applicable requirements of the Resource Conservation and Recovery Act (RCRA).

**TABLE 12
RCRA / RCRIS Sites**

Facility Name / Address	Proximity	Description / Status
None	N/A	N/A

The subject property and/or adjoining properties are not on this list.

TOXIC PITS:

TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed. The source of this database is the State Water Resources Control Board.

**TABLE 13
TOXIC PITS**

Facility Name / Address	Proximity	Description / Status
None	N/A	N/A

There are no Toxic Pits listed within a **1.0-mile radius** of the subject property. The subject property itself is not on this list.

6. RECONNAISSANCE FINDINGS

6.1 PROPERTY RECONNAISSANCE FINDINGS

A summary of uses and conditions consistent with ASTM Standard E 1527-13 § 8.4 indicating the likelihood of recognized environmental conditions in connection with the property is provided below. For each of the uses or conditions identified on the property, detailed information is discussed following the summary along with an opinion about the significance of the listing to the analysis of recognized environmental conditions in connection with the subject property.

- The subject property was utilized as a gas station from at least 1948 to 1966. According to a Preliminary Site Characterization Report issued by Western Environmental Engineers Company (WEECO) and dated December 24, 1996, six (6) soil borings were advanced in the area of the former gas station and eighteen (18) soil samples were collected and analyzed for Total Petroleum Hydrocarbons (TPH), Volatile Organic Compounds (VOC) (BTEX), and Methyl Tertiary Butyl Ether (MTBE). The reasoning for this investigation was due to the former gas station operations and the four (4) USTs that were removed from the subject property in June of 1966. Upon laboratory analysis of the soil samples, all soil samples were determined to be ND (none detected) for any of the constituents tested. Based on those results, the site was considered clean, in accordance with the California Water Resources Control Board "Maximum Soil Screening Levels for TPH and BTEX above Drinking Water Aquifers." The report concluded "based

on these analytical results, no further subsurface investigation is necessary for the site.” Based on information reviewed during this assessment, this does not appear to constitute a historical recognized environmental condition (HREC) with reference to onsite activities on the subject property.

6.2 ADJOINING PROPERTY RECONNAISSANCE FINDINGS

A summary of uses and conditions identified on adjoining properties consistent with ASTM Standard E 1527-13 § 8.4 indicating the likelihood of recognized environmental conditions in connection with the subject property is provided below. For each of the uses or conditions identified on adjoining properties, detailed information is discussed following the summary along with an opinion about the significance of the listing to the analysis of recognized environmental conditions in connection with the subject property.

- No visual and/or documented evidence of recognized environmental conditions associated with off-site activities were encountered during this assessment.

7. ADDITIONAL SERVICES

Additional assessment activities, beyond the scope of ASTM E 1527-13, were not performed in connection with this Phase I ESA.

8. SUMMARY AND CONCLUSIONS

8.1 PHASE I ENVIRONMENTAL SITE ASSESSMENT

Xarax has performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of the ASTM Standard E 1527-13 protocol of the commercial property located at 3377 West Olympic Boulevard, Los Angeles, California 90019. Exceptions to or deletions from this protocol are discussed earlier in this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the property, except for the following:

ON-SITE CONDITIONS

Recognized Environmental Conditions

- None

Historical Recognized Environmental Conditions

- The subject property was utilized as a gas station from at least 1948 to 1966. According to a Preliminary Site Characterization Report issued by Western Environmental Engineers Company (WEECO) and dated December 24, 1996, six (6) soil borings were advanced in the area of the former gas station and eighteen (18) soil samples were collected and analyzed for Total Petroleum Hydrocarbons (TPH), Volatile Organic Compounds (VOC) (BTEX), and Methyl Tertiary Butyl Ether (MTBE). The reasoning for this investigation was due to the former gas station operations and the four (4) USTs that were removed from the subject property in June of 1966. Upon laboratory analysis of the soil samples, all soil samples were determined to be ND (none detected) for any of the constituents tested. Based on those results, the site was considered clean, in accordance with the California Water Resources Control Board "Maximum Soil Screening Levels for TPH and BTEX above Drinking Water Aquifers." The report concluded "based on these analytical results, no further subsurface investigation is necessary for the site." Based on information reviewed during this assessment, this does not appear to constitute a historical recognized environmental condition (HREC) with reference to onsite activities on the subject property.

OFF-SITE CONDITIONS

Recognized Environmental Conditions

- None

Historical Recognized Environmental Conditions

- None

DE MINIMIS ENVIRONMENTAL CONDITIONS

- None

BUSINESS ENVIRONMENTAL RISKS (BERs)

- None

VAPOR INTRUSION CONDITIONS / POTENTIAL VAPOR INTRUSION CONDITIONS (VIC / pVIC)

- Xarax has performed a search distance test for Vapor Intrusion analysis in conformance with the scope and limitations of the Standard Practice E 2600-10 on property located at 3377 West Olympic Boulevard, Los Angeles, California 90019. The search distance test involves a review of the regulatory database report and available historical records to make a determination if any *known or suspect potentially contaminated* properties exist within the Area of Concern (AOC). High risk sites are typically current and former gas stations, former and current dry cleaners, manufactured gas plants, and industrial sites (Brownfields). The AOC is defined as any up gradient sites within the ASTM 1527-13 standard search distances and any cross or down gradient sites within 1/3 mile for solvents and petroleum products. In the professional opinion of Xarax, an appropriate level of assessment has been conducted consistent with good commercial and customary practice in an effort to minimize liability, and no evidence or indication of potential vapor intrusion conditions (pVIC) or vapor intrusion conditions (VIC) has been revealed and vapor intrusion is unlikely to be an issue of concern in connection with existing or planned structures on the subject property.

9. RECOMMENDATION

Based on investigation of the property for evidence of recognized environmental conditions and other environmental issues, Xarax offers the following recommendations.

- No further environmental investigations appear warranted at this time.

9.1 CONFLICT CERTIFICATION

Xarax has no present or contemplated future ownership interest or financial interest in the real estate that is the subject of this Environmental Assessment Report; and Xarax has no personal interest with respect to the subject matter of the Environmental Assessment Report or the parties involved and Xarax has no relationship with the property or the owners thereof which would prevent an independent analysis of the environmental or other conditions of the property.

Respectfully submitted,
Xarax Environmental & Engineering Solutions, Inc.

Frederick F. Mesbah, CAC, CHMM, REA
Principal

10. WARRANTY

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Xarax warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the USEPA's AAI and ASTM Standard E 1527-13 protocol. These methodologies are described by the standard as representing good commercial and customary practice for conducting an environmental Site Assessment of a parcel of property for the purpose of identifying recognized environmental conditions. However, these findings and conclusions contain all of the limitations inherent in these methodologies which are referred to in the protocol and some of which are more specifically set forth below.

UNIDENTIFIABLE CONDITIONS

There is a possibility that even with proper application of these methodologies, conditions may exist on the property that could not be identified within the scope of the assessment or that were not reasonable identifiable from the available information. Xarax believes that the information obtained from the records review and the interviews concerning the property is reliable. However, Xarax cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The methodologies of this assessment are not intended to produce all inclusive or comprehensive results, but rather to provide the client with information regarding apparent suspicions of existing and potential adverse environmental conditions relating to the subject property.

No other warranties are implied or expressed.

07-08-2014

INTRODUCTION

This document, prepared in accordance with ASTM Standard E-1527-13 and 40 CFR 312.26; Reviews of Federal, State, Tribal, and local government records on 07-08-2014 at the request of XARAX ENVIRONMENTAL & ENGINEER, reports the findings of BBL's investigation of environmental concerns in the vicinity of 3377 W Olympic Blvd; 974 S. Gramercy Dr., Los Angeles CA.

A total of 109 records were identified, representing 75 separate sites. None of these records relates to the subject site itself.

The identified sites are grouped into two separate categories - sites with known environmental concerns (23) and sites which have just operating permits (52).

The report is divided into the following segments:

- **Historical Occupant Table** - An overview of occupants at the subject site and adjacent.
- **Overview Table** - An overview of all the identified records of concern summarized by distance and source.
- **Topographic Map** - of the surrounding area of the subject site.
- **Contour Map** - of the surrounding area of the subject site.
- **Present Aerial Photograph** - of the surrounding area of the subject site.
- **Summary** - listing of the sources investigated and identified records in order of distance to the subject property for each of the categories **Known Environmental Concerns** and **Operating Permits Only**.
- **Detailed Report** - listing of the sites with detailed status information.
- **Fire Insurance Map** review - describing the area of the subject site.

INTRODUCTION

BBL has used its best effort but makes no claims as to the completeness or accuracy of the referenced government sources or the completeness of the search. Our records are frequently updated but only as current as their publishing date and may not represent the entire field of known or potential hazardous waste or contaminated sites. To ensure complete coverage of the subject property and surrounding area, sites may be included in the list if there is any doubt as to the location because of discrepancies in map location, zip code, address, or other information in our sources. For additional information call 858 793-0641.

In accordance with ASTM E-1527-05, the following government sources have been searched for sites at the street address, within the distances of the subject location as listed below.

FEDERAL SOURCES

NPL National Priority List

EPA has prioritized sites with significant risk to human health and the environment. These sites receive remedial funding under the Comprehensive Environmental Response Conservation and Liability Act (CERCLA).

No listings within 1 mile radius of the subject site.

CERCLIS Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS is a database used by the EPA to track activities conducted under the Comprehensive Environmental Response and Liability Act CERCLA (1980) and the amendment the Superfund Amendments and Reauthorization Act SARA (1986).

Sites to be included are identified primarily by the reporting requirements of hazardous substances Treatment, Storage and Disposal (TSD) facilities and releases larger than specific Reportable Quantities (RQ), established by EPA.

Using the National Oil and hazardous Substance Pollution Contingency Plan (National Contingency Plan) the EPA set priorities for cleanup.

The EPA rates National Contingency Plan sites according to a quantitative Hazard Ranking System (HRS) based on the potential health risk via any one or more pathways: groundwater, surface water, air, direct contact, and fire/explosion.

The EPA and state agencies seek to identify potentially responsible parties (PRP) and ultimately Responsible Parties (RP) who can be required to finance cleanup activities, either directly or through reimbursement of federal Superfund expenditures.

Any Institutional/Engineering controls issued under CERCLA are described in the status detail for each site. Sites delisted from the NPL list are included here.

No listings within half of a mile radius of the subject site.

NFRAP No Further Remedial Action Planned sites (CERCLIS)

COMMERCIAL PROPERTY

3377 W OLYMPIC BLVD; 974 S. GRAMERCY DR.
, LOS ANGELES

Page: 2

Date: 07-08-2014

Job: XARA3757-S

As of February 1995, CERCLIS sites designated 'No Further Remedial Action Planned' NFRAP have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the site being placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration.

EPA has removed these NFRAP sites from CERCLIS to lift unintended barriers to the redevelopment of these properties. This policy change is part of EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens promote economic redevelopment of unproductive urban sites.

No listings within half of a mile radius of the subject site.

FEDFAC Federal Facilities

As part of the CERCLA program, federal facilities with known or suspected environmental problems, the Federal Facilities Hazardous Waste Compliance Docket is tracked separately to comply with a Federal Court order.

No listings within half of a mile radius of the subject site.

ERNS Emergency Response Notification System

The ERNS is a national computer database used to store information on unauthorized releases of oil and hazardous substances. The program is a cooperative effort of the Environmental Protection Agency, the Department of Transportation Research and Special Program Administration's John Volpe National Transportation System Center and the National Response Center.

There are primarily five Federal statutes that require release reporting the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) section 103; the Superfund Amendments and Reauthorization Act (SARA) Title III Section 304; the Clean Water Act of 1972(CWA) section 311(b)(3); and the Hazardous Material Transportation Act of 1974(HMTA section 1808(b).

This list has been researched within a quarter of a mile radius of the subject site.

APARTMENT BUILDING	817 S ST ANDREWS PL	.3 mile N	# 52 page 29
.	12TH ST & WESTERN AVE	.3 mile SE	# 64 page 30

HMIRS Hazardous Material Incident Report System

The Hazardous Material Report Incident Report Subsystem HMIRS of the Research and Special Programs Administration (RSPA) Hazardous Material Information System was established in 1971 to fulfill the requirements of the Federal hazardous material transportation law. Part 171 of Title 49, Code of Federal Regulations (49 CFR) contains the incident reporting requirements of carriers of hazardous materials. An unintentional release of hazardous materials meeting the criteria set forth in Section 171.16, 49 CFR, must be reported on DOT Form 5800.1. The data from the reports received are subsequently entered in the HAZMAT database.

No listings within the street address of the subject site.

TBA Targeted Brownfields Assessments

COMMERCIAL PROPERTY

3377 W OLYMPIC BLVD; 974 S. GRAMERCY DR.
, LOS ANGELES

Page: 3

Date: 07-08-2014

Job: XARA3757-S

EPA's Targeted Brownfields Assessment (TBA) program is designed to help states, tribes, and municipalities—especially those without EPA Brownfields Assessment Pilots/Grants—minimize the uncertainties of contamination often associated with brownfields. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Program to promote the cleanup and redevelopment of brownfields. EPA's TBA assistance is available through two sources: directly from EPA through EPA Regional Brownfields offices under Subtitle A of the law, and from state or tribal voluntary response program offices receiving funding under Subtitle C of the law

No listings within half of a mile radius of the subject site.

SETS Site Enforcement Tracking System (SETS)

When expanding Superfund monies at a CERCLA (Comprehensive Environmental Response, Compensation and Liability Act) Site, EPA must conduct a search to identify parties with potential financial responsibility for remediation of uncontrolled hazardous waste sites. EPA regional Superfund Waste Management Staff issue a notice letter to the potentially responsible party (PRP). The status field contains the EPA ID number and name of the site where the actual pollution occurred.

No listings within half of a mile radius of the subject site.

DO Enforcement Docket System (DOCKET)/Consent Decree Tracking System (CDETS)

DOCKET tracks civil judicial cases against environmental polluters, while CDETS processes court settlements, called consent decrees.

No listings within a quarter of a mile radius of the subject site.

CD Criminal Docket System (C-DOCKET)

The Criminal Docket System is a comprehensive automated system for tracking criminal enforcement actions. C-Docket handles data for all environmental statutes and tracks enforcement actions from the initial stages of investigations through conclusion.

No listings within a quarter of a mile radius of the subject site.

ICIS Integrated Compliance Information System (ICIS)

ICIS is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

No listings within half of a mile radius of the subject site.

RCRA RCRA Violators List (CORRACTS)

COMMERCIAL PROPERTY

3377 W OLYMPIC BLVD; 974 S. GRAMERCY DR.
, LOS ANGELES

Page: 4
Date: 07-08-2014
Job: XARA3757-S

The Resource Conservation and Recovery Act of 1976 provides for "cradle to grave" regulation of hazardous wastes. RCRA requires regulation of hazardous waste generators, transporters, and storage/treatment/disposal sites. Evaluation to potential violations, ranging from manifest requirements to hazardous waste discharges, is typically conducted by the US EPA. This database is also known as Corrective Action Report (CORRACTS)

If enforcement is required, it is typically delegated to a state agency.

Any Institutional/Engineering controls issued under CORRACTS are described in the status detail for each site

No listings within 1 mile radius of the subject site.

RCRA-D Resource Conservation and Recovery Information System - Treatment, Storage & Disposal

The Environmental Protection Agency regulates the treatment, storage and disposal of hazardous material through the Resource Conservation and Recovery Act (RCRA). All hazardous waste TSD facilities are required to notify EPA of their existence by submitting the Federal Notification of Regulated Waste Activity Form (EPA Form 8700-12) or a state equivalent form as well as part A (EPA form 8700-23) and Part B of their Hazardous Waste Permit Application.

Status Codes:	I	Incinerator
	T	Storage/Treatment facility other than Incinerator
	D	Land Disposal Facility

No listings within half of a mile radius of the subject site.

CDL Clandestine Drug Laboratories

No listings within half of a mile radius of the subject site.

The U.S. Department of Justice ("the Department") provides this information as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

INDN Indian REservation LUST/VCP/UST

This database includes all environmental records from Indian Reservations such as Leaking Underground Tanks (LUST), Voluntary Cleanup Program (VCP) and Underground Storage Tanks (UST)

No listings within half of a mile radius of the subject site.

FD Federal Enforcement Dockets

The US EPA, Office of Enforcement, maintains a list of sites under enforcement by the US EPA.

No listings within a quarter of a mile radius of the subject site.

COMMERCIAL PROPERTY

CALIFORNIA STATE SOURCES

FL State Response Sites - Federal Lead

The Site Mitigation and Brownfields Reuse Database (SMBRD) identifies certain high priority hazardous waste sites where the U.S. EPA is the lead agency. These sites are typically proposed, on or delisted from the National Priority List.

No listings within 1 mile radius of the subject site.

SR State Response Sites

The Site Mitigation and Brownfields Reuse Database (SMBRD) identifies certain potential hazardous waste sites. These are confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity and deemed generally high-priority and high potential risk.

The information has been compiled into this database by the California Environmental Protection Agency, Department of Toxic Substance Control (DTSC) in accordance with Section 25359.6 of the California Health and Safety Code.

No listings within half of a mile radius of the subject site.

VCP Voluntary Cleanup Program

This category contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have requested that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

No listings within half of a mile radius of the subject site.

FE Properties Needing Further Evaluation

This category of Envirostor, formerly The Site Mitigation and Brownfields Reuse Program Database SMBRPD, contains properties that are suspected, but unconfirmed, contaminated sites that need or have gone through an investigation and assessment process. If a site is found to have confirmed contamination, it will change from Evaluation to either a State Response or Voluntary Cleanup site type. Sites found to have no contamination at the completion of the investigation and assessment process result in a No Action Required (for Phase 1 assessments) or No Further Action (for Phase 2 assessments) determination.

No listings within half of a mile radius of the subject site.

ME Military Evaluation Sites

This category the Site Mitigation and Brownfields Reuse Program Database SMBRPD, contains Formerly Used Defense Sites (FUDS) and Open or Closed military facilities with confirmed or unconfirmed releases and where DTSC is involved in investigation and/or remediation, either in a lead or support capacity. Sites with confirmed releases are generally considered high-priority and high potential risk.

COMMERCIAL PROPERTY

3377 W OLYMPIC BLVD; 974 S. GRAMERCY DR.
, LOS ANGELES

Page: 6

Date: 07-08-2014

Job: XARA3757-S

No listings within half of a mile radius of the subject site.

EP Expedited Remedial Action Program

The Expedited Remedial Action Program is a pilot program limited to 30 sites. These are confirmed release sites worked on by Responsible Parties with oversight of the cleanup by DTSC. These confirmed sites are generally high-priority and high potential risk.

No listings within half of a mile radius of the subject site.

BZ Border Zone Properties

These sites went through the Hazardous Waste Property or Border Zone Property evaluation and formal determination process. (Chapter 6.5, Health and Safety Code section 25221.)

No listings within half of a mile radius of the subject site.

SCH School Property Evaluation Program Properties

This category the Site Mitigation and Brownfields Reuse Program Database (SMBRPD), contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. School sites are further defined as Cleanup (remedial actions occurred) or Evaluation (no remedial action occurred) based on completed activities. All proposed school sites that will receive State funding for acquisition or construction are required to go through a rigorous environmental review and cleanup process under DTSC's oversight.

This list has been researched within a quarter of a mile radius of the subject site.

LUR Brownfields Reuse Program Facility Sites with Land Use Restrictions

The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

No listings within half of a mile radius of the subject site.

DR Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction

The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The

The Well Investigation Program (AB1803) identifies groundwater that is already contaminated and empowers the California Department of Health Services and local health officers to order ongoing monitoring programs. The focus of this program is to monitor and protect drinking water.

No listings within 1 mile radius of the subject site.

WQ Drinking Water Program

The California Health and Safety Code section 116275-116300 stipulates that it is the intent of the Legislature to improve laws governing drinking water quality to improve upon the minimum requirements of the federal Safe Drinking Water Act Amendments of 1986, to establish primary drinking water standards that are at least as stringent as those established under the federal Safe Drinking Water Act, and to establish a program under this chapter that is more protective of public health than the minimum federal requirements.

In order to provide for the orderly and efficient delivery of safe drinking water the State Department of Health Services collect information on the quality of public drinking water wells under the California Drinking Program.

Below, the latest and maximum analysis of contaminants are reported (only positive reading are included). MCL is the Maximum Contaminant Level or enforceable drinking water standard. RPHL is the Recommended Public Health Level. Additional information is available upon request.

No listings within half of a mile radius of the subject site.

REGIONAL SOURCES

NT Toxic Releases

The California Regional Water Quality Control Boards or local Department of Health Services keeps track of toxic releases to the environment. These lists are known as Unauthorized Releases, Spill, Leaks, Investigations and Cleanups (SLIC), Non-Tank Releases, Toxics List or similar, depending on the local agency.

This list has been researched within half of a mile radius of the subject site.

LD Land Disposal Sites

The Land Disposal program managed by the State Water Control Board, regulates the waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills. California Code of Regulations (CCR) Title 23, (Chapter 15) contains the regulatory requirements for hazardous waste. CCR Title 27, contains the regulatory requirements for wastes other than hazardous waste.

No listings within half of a mile radius of the subject site.

TPC Toxic Pits

The Toxic Pits Clean-Up Act (Katz Bill) places strict limitations on the discharge of liquid hazardous wastes into surface impoundment, toxic ponds, pits and lagoons. Regional Water Quality Control Boards are required to inspect all surface impoundment annually, in addition, every facility was required to file a Hydrogeological Assessment Report. Recent legislation allows the Department of Health Services to exempt facilities that closed on or before December 31, 1985, if a showing is made that no significant environmental risk remains (AB1046).

Special exemption provisions have been created for surface impoundment that receive mining wastes.

No listings within 1 mile radius of the subject site.

SWAT Solid Waste Assessment Test - Regional

This program, provided for under the Calderon legislation (Section 13273 of the Water Code), requires that disposal sites with more than 50,000 cubic yards of waste provide sufficient information to the regional water quality control board to determine whether or not the site has discharged hazardous substances which will impact the environment.

Site operators are required to file Solid Waste Assessment Test reports on a staggered basis. Operators of the 150 highest ranking (Rank 1) sites were required to submit Solid Waste Assessment Tests by July 1, 1987, Rank 2 in 1988 and so on.

Operators submit water quality tests to the Regional Water Quality Control Board, describing surface and groundwater quality and supply; and the geology within 1 mile of the site. Air quality tests are submitted to the local Air Quality Management District or Air Pollution Control District.

This program is currently not funded and thus not updated.

Status Codes: Facilities or sites are ranked within each region on a scale 1-15 according to priority.

This list has been researched within 1 mile radius of the subject site.

OPERATING PERMITS

Various agencies issue operating permits or regulate the handling, movements, storage and disposal of hazardous materials and require mandatory reporting. The inclusion in this section does not imply that an environmental problem exists presently or has in the past.

RCRA-G Resource Conservation and Recovery Information System - Generators

The Environmental Protection Agency regulates generators of hazardous material through the Resource Conservation and Recovery Act (RCRA). All hazardous waste generators are required to notify EPA of their existence by submitting the Federal Notification of Regulated Waste Activity Form (EPA Form 8700-12) or a

state equivalent form. The notification form provides basic identification information and specific waste activities.

Status Codes: L - Generators who generate at least 1000 kg/mo of non-acutely hazardous waste (or 1 kg/mo of acutely hazardous waste).
S - Generators who generate 100 kg/mo but less than 1000 kg/mo of non-acutely haz waste.
T - Transporter.

SARA SARA Title III,section 313 (TRIS)

Title III of the Superfund Amendments and Reauthorization Act,Section 313, also known as Emergency Planning and Community Right-to-Know Act of 1986 requires owners or operators of facilities with more than 10 employees and are listed under Standard Industrial Classification(SIC) Codes 20 through 39 to report the manufacturing, processing or use of more than a threshold of certain chemical or chemical categories listed under section 313. This database is also known as Toxic Release Information System (TRIS).

Below summary information for the last five year period is reported grouping the releases into air, water, underground injection, land, public offsite treatment (potw) and transportation offsite.

No listings within a quarter of a mile radius of the subject site.

NC Nuclear Regulatory Commission Licensees

The Nuclear Regulatory Commission, Office of Nuclear Material Safety and Safeguards has been mandated (10 CFR Ch 1.42) to protect the public health and safety, the common defense and security, and the environment by licensing, inspection, and environmental impact assessment for all nuclear facilities and activities, and for the import and export of special nuclear material.

No listings within a quarter of a mile radius of the subject site.

PCB PCB Waste Handlers Database

The U.S. Environmental Protection Agency tracks generators, transporters, commercial stores and/or brokers and disposers of PCB's in accordance with the Toxic Substance Control Act. x

No listings within a quarter of a mile radius of the subject site.

PCS Permit Compliance System

PCS is a database that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS was developed by The U.S. Environmental Protection Agency to meet the information needs of the NPDES program under the Clean Water Act. PCS tracks permit, compliance, and enforcement states of NPDES facilities.

No listings within a quarter of a mile radius of the subject site.

AFS AIRS Facility System

AFS contains emissions and compliance data on air pollution point sources tracked by the U.S. EPA and state and local environmental regulatory agencies. There are seven "criteria pollutants" for which data must be reported to EPA and stored in AIRS: PM10 (particulate matters less than 10 microns in size), carbon monoxide, sulfur dioxide, nitrogen dioxide, lead, reactive volatile organic compounds (VOC), and ozone.

AFS replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aeromatic Data (SAROAD).

No listings within a quarter of a mile radius of the subject site.

PE Section Seven Tracking System (SSTS)

SSTS evolved from the FIFRA and TSCA Enforcement System (FATES). SSTS tracks the registration of all pesticide producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and devices that are produced, sold or distributed each year.

No listings within a quarter of a mile radius of the subject site.

FIFRA FIFRA/TSCA Tracking System/ National Compliance Database (FTTS/NCDB)

NCDB supports implementation of the Federal Insecticide, Fungicide and Rodenticide Control Act (FIFRA) and the Toxic Substance Control Act (TSCA).

No listings within a quarter of a mile radius of the subject site.

FFIS Federal Facilities Information System (FFIS)

Federal Facilities Information System (FFIS) contains a list of all Treatment Storage and Disposal Facilities (TSDs) owned and operated by federal agencies.

No listings within a quarter of a mile radius of the subject site.

CICIS Chemicals in Commerce Information System (CICIS)

Chemicals in Commerce Information System contains an inventory of chemicals manufactured in commerce or imported for Toxic Substances Control Act regulated commercial purposes. CICIS allows EPA to maintain a

comprehensive listing of over 70,000 chemical substances that are manufactured or imported and are regulated under TSCA.

No listings within a quarter of a mile radius of the subject site.

FINDS FINDS EPA Facility Index System

The U.S. Environmental Protection Agency maintains an index system of all facilities which are regulated or have been assigned an identification number for other purposes.

Facilities that have been reported elsewhere in this report will not be listed under this category.

No listings within a quarter of a mile radius of the subject site.

HWIS Hazardous Waste Information System

The Department of Toxic Substance Control, California Environmental Protection Agency, maintains a data base keeping track of the movement and disposal of hazardous waste. The data is used to support the Tanner legislation, AB 2948.

- Status Codes: EPA Facility Permit Number
- CAL - State permanent number
 - CAC - State provisional or emergency number
 - CAH - State prov or perm number for household hazardous waste collections
 - CAI - State permanent number for exotic pest detection
 - CAS - State permanent number issued by county for emergency response
 - CAE - State prov number for hazardous waste removal caused by natural disasters
 - CAX - State permanent or provisional number issued prior to 1987. No longer used.
 - CLU - State permanent number issued by county for clandestine lab cleanup
 - CAR - Federal permanent number
 - CA - Federal permanent number
 - CAD - Federal permanent or provisional number. State provisional before 1988.
 - CAT - Federal permanent number
 - CAP - Federal provisional or emergency number

UST Permitted Underground Storage Tanks - State Water Quality Control Board

The Corteses Bill (AB2013), enacted in 1983, required registration of all underground storage tanks (UST) with the State Water Quality Control Board by July 1, 1984. About 176,000 tanks and surface impounds were registered between 1984 and 1987. An amendment (AB 1413) was passed in 1987, effectively removing the State Board from the registration process starting January 1, 1988. The data reflects the information collected by the state between 1984 and 1987 as well as recent time and includes all tanks and surface impounds in use or closed after 1974.

Home and farm heating fuel tanks with capacities of 1,100 gallons or less and "structures such as sumps, separators, storm drains, catch basins, oil field gathering lines, refinery pipelines, lagoons, evaporation ponds, well cellars, separation sumps, lined and unlined pits, sumps and lagoons" except those defined as UST under HSWA or may be regulated to protect water quality under the Porter-Cologne Water Quality Control Act are excluded.

This list has been researched within a quarter of a mile radius of the subject site.

HOBART/WILTON PRIMARY SCHOOL SC	SAN MARINO ST & ST ANDREWS P LOS ANGELES	13 Map Id .1 mile NE
---------------------------------	---	----------------------------

School Property Evaluation Program

Site: HOBART/WILTON PRIMARY SCHOOL #
Address: SAN MARINO ST & ST ANDREWS PL,/GRAMERCY
City: LOS ANGELES
Status: id: 19880072 021100 PRIVATE HOUSEHOLDS

Actions:

PHASE 1 - CALMORTGAGE AND SCHOOL SITE PROPERTIES (PSCHL)- completed on 02/11/00.
The site has contained residential structures since at least the 1920s. The age of the structures indicates they are or have been a potential source of lead-based paint and asbestos containing material.

(02/10/00) LAUSD MASTER OVERSIGHT AGREEMENT (DOCKET NO. HSA-A 99/00-051) EXECUTED ON 2/10/00.
As part of the Master Oversight Agreement between DTSC and the Los Angeles Unified School District (LAUSD), DTSC will provide oversight for a Preliminary Endangerment Assessment (PEA) for the proposed Hobart/Wilton Primary School #2 site.

(02/11/00) Phase I - Pursuant to an agreement between the Department of Toxic Substances Control (DTSC) and the California Department of Education, DTSC's Site Mitigation Program completed review of a Phase I Environmental Assessment and has determined that a Preliminary Endangerment Assessment (PEA) is required. The PEA will be conducted under DTSC's oversight pursuant to an agreement between DTSC and the Los Angeles Unified School District (LAUSD). Any subsequent cleanup activities (if needed) after the PEA would be conducted pursuant to an agreement with DTSC and LAUSD.

(03/07/03) PROJECT DROPPED BY LAUSD AFTER THE PHASE I DETERMINATION.

School Property Evaluation Program

Site: HOBART/WILTON PRIMARY SCHOOL #
Address: 9TH ST & SAINT ANDREWS PL, /MANHATTAN PL
City: LOS ANGELES
Status:

id: 19880071 020400 PRIVATE HOUSEHOLDS

Actions:

PHASE 1 - CALMORTGAGE AND SCHOOL SITE PROPERTIES (PSCHL)- completed on 02/04/00.

The site has contained residential structures since at least the 1920s. The age of the structures indicates they are or have been a potential source of lead-based paint and asbestos containing materials.

(02/04/00) Phase I - Pursuant to an agreement between the Department of Toxic Substances Control (DTSC) and the California Department of Education, DTSC's Site Mitigation Program completed review of a Phase I Environmental Assessment and has determined that a Preliminary Endangerment Assessment (PEA) is required. The PEA will be conducted under DTSC's oversight pursuant to an agreement between DTSC and the Los Angeles Unified School District (LAUSD). Any subsequent cleanup activities (if needed) after the PEA would be conducted pursuant to an agreement with DTSC and LAUSD.

(02/10/00) LAUSD MASTER OVERSIGHT AGREEMENT (DOCKET NO. HSA-A 99/00-051) EXECUTED ON 2/10/00. As part of the Master Oversight Agreement between DTSC and the Los Angeles Unified School District (LAUSD),

DTSC will provide oversight for a Preliminary Endangerment Assessment (PEA) for the proposed Hobart/Wilton Primary School #1 site.

(03/07/03) PROJECT DROPPED BY LAUSD AFTER THE PHASE I DETERMINATION.

HOBART/WILTON PRIMARY SCHOOL	SC	800 ST ANDREWS PL, EIGHT S LOS ANGELES	59 Map Id .3 mile N
------------------------------	----	---	----------------------------------

School Property Evaluation Program

Site: HOBART/WILTON PRIMARY SCHOOL N
Address: 800 ST ANDREWS PL, EIGHT ST M,
City: LOS ANGELES
Status: id: 19880073 021100 PRIVATE HOUSEHOLDS

Actions:

PHASE 1 - CALMORTGAGE AND SCHOOL SITE PROPERTIES (PSCHL)- completed on 02/11/00.

The site has contained residential structures since at least the 1920s. The age of the structures indicates they are or have been a potential source of lead-based paint and asbestos containing material.

(02/10/00) LAUSD MASTER OVERSIGHT AGREEMENT (DOCKET NO. HSA-A 99/00-051) EXECUTED ON 2/10/00. As part of the Master Oversight Agreement between DTSC and the Los Angeles Unified School District (LAUSD), DTSC will provide oversight for a Preliminary Endangerment Assessment (PEA) for the proposed Hobart/Wilton Primary School #3 site.

(02/11/00) Phase I - Pursuant to an agreement between the Department of Toxic Substances Control (DTSC) and the California Department of Education, DTSC's Site Mitigation Program completed review of a Phase I Environmental Assessment and has determined that a Preliminary Endangerment Assessment (PEA) is required. The PEA will be conducted under DTSC's oversight pursuant to an agreement between DTSC and the Los Angeles Unified School District (LAUSD). Any subsequent cleanup activities (if needed) after the PEA would be conducted pursuant to an agreement with DTSC and LAUSD.

(03/07/03) PROJECT DROPPED BY LAUSD AFTER THE PHASE I DETERMINATION.

id: SL204FT2485 , substance: VOC

00060 REA1THE FORMER DRY CLEANER SITE, OPERATED DURING THE PERIOD FROM 1937 TO 1942, CAUSED PCE CONTAMINATION IN SOIL 2AND GROUNDWATER. NO FURTHER ACTION LETTER RELATED TO SOIL CLEANUP WAS ISSUED ON JUNE 8, 2001. ONE OF THREE3 DOWNGRADIENT GROUNDWATER MONITORING POINTS SHOWED PCE CONCENTRATION 6.7 PPB. NON-DETECTS FROM THE OTHER T4WO. DUE TO ITS LOW RISK PER GROUNDWATER CONCENTRATION, THE SITE HAS BEEN RANKED 'LOW'. RESPONSIBLE PARTY I5S SEEKING TO PERFORM THE REQUIRED GROUNDWATER MONITORING ONCE ACCESS ISSUE IS RESOLVED.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 8 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/25/2021 has revealed that there are 20 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 16 UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 14 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 7 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 4 EDR Hist

EXECUTIVE SUMMARY

Cleaner sites within approximately 0.125 miles of the target property.

Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by MAN KIM - OWNER. Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to <https://cersbusiness2.calepa.ca.gov> to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change.

Violations:

Site ID: 145027
 Site Name: PRO DENT AWAY INC
 Violation Date: 07-15-2014
 Citation: 22 CCR 31 67100.8 - California Code of Regulations, Title 22, Chapter 31, Section(s) 67100.8

Violation Description:

Failure of the generator to prepare a hazardous waste management performance report every four years. The report shall contain sufficient detail to convey an understanding of the hazardous waste management approaches used at the site, using narratives, photographs, illustrations, figures or data as necessary, which includes, at a minimum, all of the following: 1) Name and location of the site 2) Four digit SIC code(s) for the site 3) All of the following information for each waste stream identified: A) An estimate, in pounds, of the quantity of hazardous waste generated and the quantity of hazardous waste managed, both onsite and offsite, during the current reporting year and the baseline year; B) A description of current hazardous waste management approaches and identification of all approaches implemented since the baseline year; C) An assessment of the effect, since the baseline year, of each implemented hazardous waste management approach on the weight of hazardous waste generated, the properties which cause it to be classified as a hazardous waste and/or the onsite and offsite management of hazardous waste. The report shall consider, but shall not be limited to all of the following approaches: 1. Source reduction; 2. Onsite or offsite recycling; 3. Onsite or offsite treatment; and D) A description of factors during the current reporting year that have affected hazardous waste generation and onsite and offsite hazardous waste management since the baseline year, including, but not limited to, any of the following: 1. Changes in business activity; 2. Changes in waste classification; 3. Natural phenomena and; 4. Other factors that have affected either the quantity of hazardous waste generated or onsite and offsite hazardous waste management requirements.

Violation Notes:

Returned to compliance on 12/02/2016. OBSERVATION: Observed 1 X 55 G DM of waste paint thinner unlabeled. All hazardous waste containers shall be marked with the following information: 1) the words G Hazardous WasteG ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label these

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The Business Activities, Owner/Operator Identification, Hazardous
Materials Inventory, Site Map, Emergency Response/Contingency Plan and
Employee Training Plan sections were reviewed in CERS and field
verified. Review and correct any violations indicated previously in
this report, on or before the COMPLY BY date associated with each
violation. NOTE: The LAMC, Sections (L.A.M.C. SECTION 57.105.1.4;
57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store,
use or handle hazardous materials in the City of Los Angeles to obtain
a Consolidated Permit from the Los Angeles Fire Department CUPA ****
Annual submission of a Hazardous Materials Business Plan into CERS is
required between January 1 and March 1 of every year. Please remember
that any change in inventory of greater than 100 percent will require
new submission within 30 days of that change. As a reminder, you must
complete all the [Truncated]

Eval Notes: "Second Notice of Violation Inspection Report Documents uploaded to
CERS were reviewed. Indicated previously in this report are
violations, originally issued on 3.22/19 that have not been resolved
by the original COMPLY BY date. These violations have been re-issued
and the violation class upgraded. Review and correct all violations
indicated in this report, on or before the new COMPLY BY date
associated with each violation. Failure to resolve these violations
will result in this facility being subject to formal enforcement.
NOTE: The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3;
57.121.2 and 57.121.2.1.) requires businesses that store, use or
handle hazardous materials in the City of Los Angeles to obtain a

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by KEVIN HO KIM - OWNER. Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to <https://cersbusiness2.calepa.ca.gov> to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
