CITY PLANNING COMMISSION

Date: September 26, 2024

Time: After 8:30 a.m. *

Place: Los Angeles City Hall
Council Chamber, Room 340
200 N. Spring Street
Los Angeles, CA 90012

Public Hearing: July 25, 2024

Appeal Status: n/a

Case Number: CPC-2023-7068-CA,
CPC-2024-387-CA,
CPC-2024-388-CA

CEQA Number: ENV-2020-6762-EIR,
ENV-2020-6762-EIR-ADD1,
ENV-2020-6762-EIR-ADD2

Related Cases: CPC-2020-1365-GPA

Council Number: All

Applicant: Department of City Planning

PROJECT

LOCATION: Citywide

PROPOSED

PROJECT: Housing Element Rezoning Program

The Housing Element Rezoning Program, called for by the 2021-2029 Housing Element, sets out to address housing needs and meet the City's housing obligations under state law. The program encompasses three code amendment ordinances: the Citywide Housing Incentive Program (CHIP) Ordinance, Housing Element Sites and Minimum Density (HESMD) Ordinance, and the Resident Protections Ordinance (RPO). These ordinances propose amendments to Chapter 1 and Chapter 1A of the Los

Angeles Municipal Code, including revisions to Sections 12.03, 12.09.1, 12.10, 12.10.5, 12.11, 12.11.5, 12.12, 12.12.2., 12.13, 12.13.5, 12.14, 12.16, 12.17, 12.17.1, 12.21, 12.22, 12.24, 13.09, 13.15, 14.00, 14.5.4, 16.05, 19.01, 19.14, 19.18, 151.28, and any related Code sections and the addition of Sections 11.5.15, 16.60, 16.61 and 16.70 in Chapter 1 and revisions to Articles 1, 2, 4, 6, 7, 8, 9, 13, and 14 of Chapter 1A.

The CHIP Ordinance proposes streamlined project review procedures and new local density bonus incentives for eligible project types including citywide incentives, transit incentives, high opportunity incentives, 100 percent affordable housing incentives, public land incentives, faith-based development incentives, unified adaptive reuse incentives, and other tailored incentives to implement state law. The program overall prioritizes expanding access to affordable housing near transit, jobs, along corridors, and in Higher Opportunity Areas.

The Housing Element Sites and Minimum Density Ordinance creates new minimum density requirements and implements requirements of Housing Element law by establishing regulations on housing replacement, no net loss findings, by-right development review, and minimum density requirements for identified sites.

The Resident Protections Ordinance (RPO) enhances protections for tenants affected by demolitions related to housing development, including relocation assistance, the right to remain and right to return to comparable units in the new construction. RPO also expands requirements related to newly created affordable units, including longer affordability covenant terms, their quality, size, mix and equitable distribution as well enforcing marketing and distribution of the units.

RECOMMENDED ACTIONS RESIDENT PROTECTIONS ORDINANCE:

1. Find and recommend the City Council find, based on the whole of the record in the independent judgment of the decisionmaker, that the Resident Protections Ordinance was assessed in the adopted Housing Element Environmental Impact Report No. ENV-2020-6762-EIR (SCH No. 2021010130) certified on November 29, 2021, Addendum No. 1 (ENV-2020-6762-EIR-ADD1) certified on June 14, 2022, and Addendum No. 2 (ENV-2020-6762-EIR-ADD2)(collectively, "EIR"); adopt Addendum No. 2; determine that pursuant to CEQA Guidelines section 15162 and 15164, no subsequent, no subsequent or supplemental EIR is required; and adopt the Mitigation Monitoring Program;
2. Recommend, pursuant to Sections 13B.1.3 of the Los Angeles Municipal Code, that the City Council adopt the proposed Resident Protections Ordinance (Exhibit A) to amend the Zoning Code and Public Welfare Code including amendments to Chapter 1, Chapter 1A, and Chapter 4 of the Los Angeles Municipal Code (LAMC), including revisions to Sections 12.03, 12.22, 12.24, 14.00, and 19.18, and any related Code sections of Chapter 1, the additions of Sections 16.60 and 16.61 in Chapter 1, and revisions to Articles 4, 14, and any other related

Code sections in Chapter 1A; and the removal of Sections 51.31, 51.32, 51.33, 51.34 and 51.35 from Chapter 4;

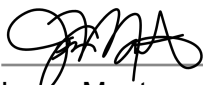

3. Recommend the City Council adopt a Resolution to Amend the "Affordable Housing Incentives Guidelines" (Exhibit B.1) and approve the proposed Fair Housing Requirements for Affordable Housing (Exhibit B.2) pursuant to Los Angeles Municipal Code 12.22 A.25 and Charter Section 550 and 551;
4. Recommend the City Planning Department prepare an ordinance to incorporate the proposed Resident Protections Ordinance, which amends LAMC Chapter 1, identified in Action Item 2 into Chapter 1A of the LAMC (New Zoning Code), subject to the policy changes described in the Staff Recommendation Report and in conformance with the format and style of the New Zoning Code; and Recommend the City Council adopt this Chapter 1A version of the Resident Protections Ordinance;
5. Adopt the Staff Recommendation Report as the Commission's report on the subject; and
6. Adopt the findings.

RECOMMENDED ACTIONS CITYWIDE HOUSING INCENTIVE PROGRAM ORDINANCE:

1. Recommend the City Council find, based on the whole of the record in the independent judgment of the decisionmaker, that the CHIP Ordinance was assessed in the adopted Housing Element Environmental Impact Report No. ENV-2020-6762-EIR (SCH No. 2021010130) certified on November 29, 2021, Addendum No. 1 (ENV-2020-6762-EIR-ADD1) certified on June 14, 2022, and Addendum No. 2 (ENV-2020-6762-EIR-ADD2) (collectively, "EIR"); adopt Addendum No. 2; determine that pursuant to CEQA Guidelines section 15162 and 15164, no subsequent or supplemental EIR is required; and adopt the Mitigation Monitoring Program;
2. Recommend, pursuant to Sections 13B.1.3 of the Los Angeles Municipal Code, that the City Council adopt the proposed CHIP Ordinance (Exhibit A) to amend the Zoning Code including amendments to Chapter 1, Chapter 1A, and Chapter 15 of the Los Angeles Municipal Code, including revisions to sections 12.03, 12.21, 12.22, 12.24, 13.09, 13.15, 14.00, 14.5.4, 16.05, 19.01, 19.14, 19.18, and any related Code sections of Chapter 1; the addition of Section 11.5.15 in Chapter 1; and revisions to Articles 2, 8, 9, and 13, and any other related Code sections of Chapter 1A; and a technical amendment to Section 151.28 of Chapter 15;
3. Recommend that the City Council instruct the Director of City Planning to prepare the Environmental Protection Measures Handbook shown in Exhibit C, after the operative date of the proposed CHIP Ordinance.
4. Request that the City Planning Department prepare an ordinance to incorporate the proposed CHIP Ordinance, which amends LAMC Chapter 1 identified in Action Item 2 into Chapter 1A of the LAMC (New Zoning Code), subject to the policy changes described in the Staff Recommendation Report and in conformance with the format and style of the New Zoning Code; and recommend the City Council adopt this Chapter 1A version of the proposed CHIP Ordinance.
5. Adopt the Staff Recommendation Report as the Commission's report on the subject; and
6. Adopt the findings.

**RECOMMENDED ACTIONS HOUSING ELEMENT SITES AND MINIMUM DENSITY
ORDINANCE:**

1. Recommend the City Council find, based on the whole of the record in the independent judgment of the decisionmaker, that the Housing Element Sites and Minimum Density (HESMD) Ordinance was assessed in the adopted Housing Element Environmental Impact Report No. ENV-2020-6762-EIR (SCH No. 2021010130) certified on November 29, 2021, Addendum No. 1 (ENV-2020-6762-EIR-ADD1) certified on June 14, 2022, and Addendum No. 2 (ENV-2020-6762-EIR-ADD2) (collectively, "EIR"); adopt Addendum No. 2; determine that pursuant to CEQA Guidelines section 15162 and 15164, no subsequent or supplemental EIR is required; and adopt the Mitigation Monitoring Program;
2. Recommend, pursuant to Sections 13B.1.3 of the Los Angeles Municipal Code, that the City Council adopt the proposed HESMD Ordinance (Exhibit A) to amend the Zoning Code including amendments to Chapter 1 and 1A of the Los Angeles Municipal Code, including revisions to sections 12.09.1, 12.10, 12.10.5, 12.11, 12.11.5, 12.12, 12.12.2, 12.13, 12.13.5, 12.14, 12.16, 12.17, 12.17.1, and any related Code sections of Chapter 1; the addition of Section 16.70 and 12.22 C28 in Chapter 1; and revisions to Articles 1, 6, 9, and any other related Code sections of Chapter 1A;
3. Request the City Planning Department prepare an ordinance to incorporate the proposed HESMD Ordinance, which amends LAMC Chapter 1 identified in Action Item 2 into the Chapter 1A of the LAMC (New Zoning Code), subject to the policy changes described in the Staff Recommendation Report and in conformance with the format and style of the New Zoning Code; and recommend the City Council adopt this Chapter 1A version of the HESMD Ordinance.
4. Recommend the City Council adopt the Inventory of Lower Income Rezoning sites by City Council Resolution in Exhibit E;
5. Adopt the Staff Recommendation Report as the Commission's report on the subject; and
6. Adopt the findings.

ADVICE TO PUBLIC: *The exact time this report will be considered during the meeting is uncertain since there may be several other items on the agenda. Written communications may be mailed to the Commission Secretariat, Room 272, City Hall, 200 North Spring Street, Los Angeles, CA 90012 (Phone No. 213-978-1300). While all written communications are given to the Commission for consideration, the initial packets are sent to the week prior to the Commission's meeting date. If you challenge these agenda items in court, you may be limited to raising only those issues you or someone else raised at the public hearing agendaized herein, or in written correspondence on these matters delivered to this agency at or prior to the public hearing. As a covered entity under Title II of the Americans with Disabilities Act, the City of Los Angeles does not discriminate on the basis of disability, and upon request, will provide reasonable accommodation to ensure equal access to these programs, services and activities. Sign language interpreters, assistive listening devices, or other auxiliary aids and/or other services may be provided upon request. To ensure availability of services, please make your request not later than three working days (72 hours) prior to the meeting by calling the Commission Secretariat at (213) 978-1299.

PROJECT ANALYSIS

Project Summary

The City's 2021-2029 Housing Element, certified by the California Department of Housing and Community Development (HCD), identified significant housing needs throughout Los Angeles reflected by high rents, overcrowded conditions and housing instability. Program 121, "RHNA Rezoning," within the 2021-2029 Housing Element sets out to address these critical housing needs and meet the City's housing obligations under state law. Program 121 identified that the Housing Element Rezoning Program would be implemented through a number of work efforts including updates to up to 16 Community Plans, two Specific Plans as well as at least one citywide ordinance that will create additional zoning capacity through an expansion of affordable housing incentive programs or other zoning code amendments. This staff report analyzes three ordinances implementing Program 121, the Citywide Housing Incentive Program (CHIP) Ordinance, the Housing Element Sites and Minimum Density Ordinance (HESMD), and the Resident Protections Ordinance (RPO). For the purposes of this report the term "Program" shall refer to these three Ordinances.

The CHIP Ordinance strives to achieve Los Angeles' housing objectives identified by the 2021-2029 Housing Element through the creation of three programs: the State Density Bonus Program, the Mixed Income Incentive Program (MIIP), and the Affordable Housing Incentive Program (AHIP). The State Density Bonus Program encompasses revisions to the City's existing local Density Bonus Ordinance to align with current State Density Bonus Law. MIIP establishes mixed income housing incentives along certain major corridors and near transit, while AHIP provides tailored incentives encouraging 80-100% affordable housing projects citywide. Together, these three programs are proposed to serve as the City's local implementation of the State Density Bonus Law. By enabling streamlined project review procedures and introducing bold new incentives for project types, the CHIP program seeks to expand access to affordable housing near transit, jobs, and in areas offering greater access to resources and opportunity.

Supporting the CHIP Ordinance, the department has concurrently prepared the Housing Element Sites and Minimum Density Ordinance and the Resident Protections Ordinance. The Housing Element Sites and Minimum Density Ordinance meets State Housing Element law requirements, while facilitating housing development on select sites identified in the current and prior Housing Elements. Meanwhile, the Resident Protections Ordinance puts forth provisions centered on strengthening protections for existing tenants and existing housing from redevelopment pressures citywide.

Background

The 2021-2029 Housing Element found that current zoning regulations in Los Angeles would result in insufficient housing production to meet the state mandated Regional Housing Needs Assessment (RHNA) targets. RHNA is the California State-required process that seeks to ensure cities and counties plan for enough housing to be built for Angelenos of all income levels. Los Angeles' current RHNA target, including a buffer, was 486,379 housing units. After taking into account anticipated housing development, the 2021-2029 Housing Element identified that only a portion of the RHNA target could be accommodated by existing zoning, and the RHNA shortfall would require an update to the City's zoning regulations allowing for the remaining 255,433 housing units to be built. This requirement obligates the City to adopt and effectuate a rezoning program by February 12, 2025 (three years and 120 days from the original 2021-2029 Housing Element adoption deadline).

To address this housing deficit, the 2021-2029 Housing Element identified Program 121, RHNA Re-zoning, consists of several different implementation programs, including updates to Community Plans. These plans are on varying timelines, and some local plans have already been approved by the City Planning Commission while others are still in development. Alongside the CHIP Ordinance, it is expected that the Downtown and Hollywood Community Plan updates will be effectuated by February 12, 2025, to comply with the statutory deadline for rezoning. The CHIP, RP, and HESMD Ordinances will work alongside the City's more localized planning tools to create citywide incentive-based strategies to provide affordable housing and to meet the housing needs identified in the 2021-2029 Housing Element.

In March 2023, City Planning announced the Citywide Housing Incentive Program (or "CHIP") and initiated public engagement to inform development of the following six core strategies: Adaptive Reuse, Affordable Housing Overlay, Opportunity Corridors, Missing Middle, and Process Streamlining. These strategies were developed based on public input and the results of the fair housing analysis conducted as part of the adopted 2021-2029 Housing Element. Furthermore, these rezoning strategies were upheld through a Planning and Land Use Management (PLUM) Committee report (CF-21-1230-S3) adopted on February 7, 2023 by the City Council which affirmed the Program objective to focus new housing opportunities in High Resource Areas as proposed in the 2021-2029 Housing Element certified by HCD. Following extensive outreach including webinars, office hours, and participation in public events (described in more detail in the [Public Hearing and Communications](#) section), City Planning released a draft Citywide Housing Incentive Ordinance in March 2024 incorporating the six core strategies into three programs: the State Density Bonus Program, MIIP, and AHIP.¹ The Housing Element Sites and Minimum Density Ordinance and Resident Protections Ordinance, were also developed in alignment with these six core strategies. The CHIP Ordinance proposes a combination of development bonuses and incentives in exchange for the inclusion of covenanted affordable units, building on State Density Bonus Law (California Government Code Section 65915-65918). Part of the CHIP Ordinance includes an update to the City's current Density Bonus Ordinance to codify state updates that have occurred since the City's adoption of the ordinance in 2008.

¹ The Adaptive Reuse concept was incorporated into an independent ordinance CPC-2023-5968.

In addition to public feedback, the development of the CHIP Ordinance has been informed by City Council motions directing City Planning to develop incentive strategies for One Hundred Percent Affordable Housing Developments (CF-21-0972), including incentives for Faith-Based Organizations (CF 23-0172), as well as incentives for multi-bedroom “family-sized” units in mixed income and One Hundred Percent Affordable Housing Developments (CF 24-0147).

In June 2024, revised drafts of the Program Ordinances were released and a public hearing was held on July 25, 2024. During the public comment period in the month that followed, the Department received over 2,000 emails of direct written feedback from constituents and continued to meet with interested parties to discuss the ordinances. Feedback received during this phase helped to refine the final ordinance drafts presented to City Planning Commission.

Program Requirements

Statutory requirements for the Program are delineated in California State Government Code Sections 65580 – 65589.11. Of the additional 255,433 units that the City must rezone for, more than half (130,553) must occur on lower income sites, which are generally sites that can accommodate higher density and meet the RHNA need for very low and low-income households. These sites are subject to I requirements in state Housing Element law pursuant to Government Code Sections 65583.2 (h) and (i). Specifically, these sites must:

- Allow a by-right approval process for projects that set aside at least 20% of their units for lower-income households,
- Require a minimum density of at least 20 units/acre for residential development projects, and
- Accommodate at least 16 units per site

In addition, while some lower income sites may be located on parcels zoned for commercial uses, more than 50% of these sites must be located on residentially zoned sites. In the event this 50% threshold is not met by the City’s ordinance, future mixed-use projects on commercially zoned parcels would be required to reserve at least 50% of their floor area for residential uses and the City would be prevented from allowing a 100% residential project in a commercial zone. Furthermore all rezoning must Affirmatively Further Fair Housing (AFFH) consistent with Government Code 8899.50, as described below.

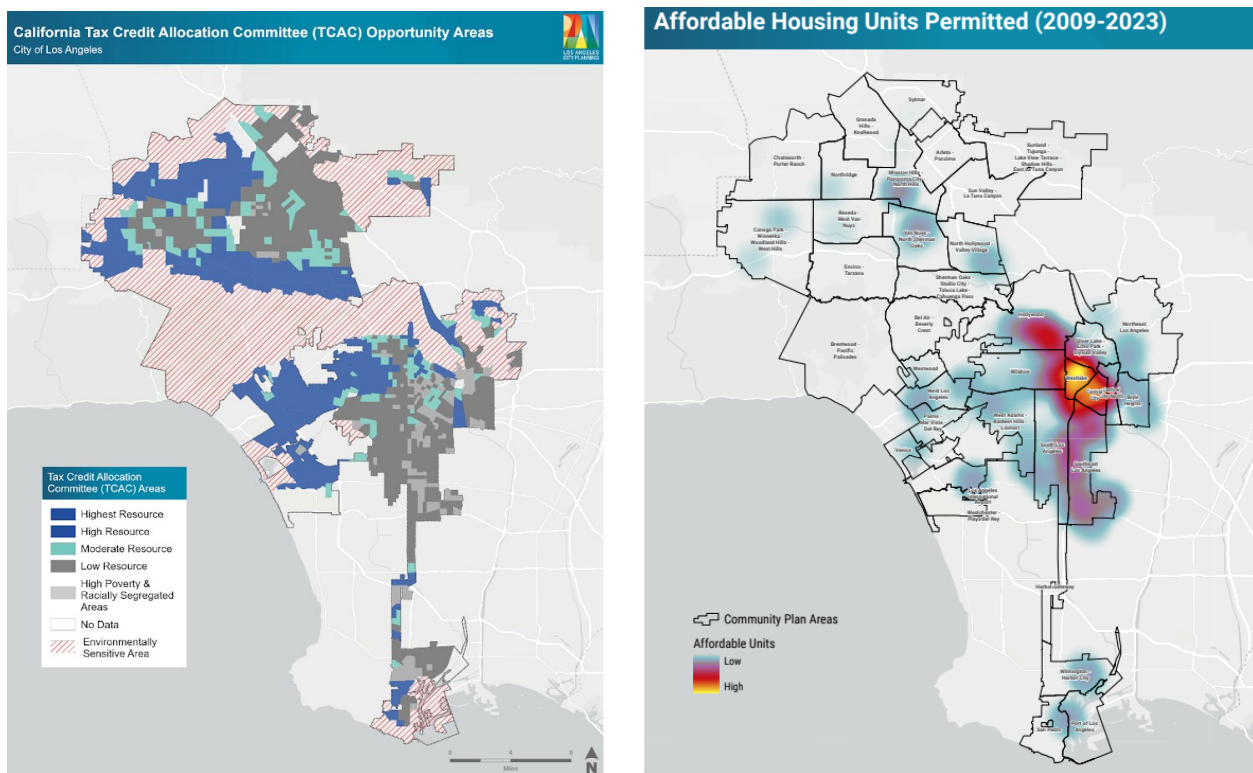

Affirmatively Furthering Fair Housing (AFFH)

State and Federal law (Government Code 8899.50) mandates cities to Affirmatively Further Fair Housing, which is defined as taking meaningful actions that not only combat discrimination, but also undo the legacy of past harms around segregation to foster inclusive communities free from barriers that restrict access to opportunity based on protected characteristics.

The CHIP Ordinance serves as one of the City’s commitments to Affirmatively Further Fair Housing (AFFH) by emphasizing an equitable rezoning approach. One of the ways the program achieves this is by creating greater “access to opportunity”. The term “access to opportunity”

refers to Angeleno’s ability to access places with characteristics linked to positive life outcomes, such as educational attainment, earnings from employment, and economic mobility. These areas are referred to as Higher Opportunity Areas², and have a dense concentration of place-based opportunities such as access to transit, and high-performing schools, with higher rates of employment and education, and lower exposure to environmental pollutants, among other indicators. The CHIP aims to improve equitable access to Higher Opportunity Areas of the City and improve the lives of all Angelenos through its incentive-based approach that promotes housing near higher performing schools, jobs and transit and along major corridors and avoiding environmentally sensitive areas.

Figure 1: TCAC Opportunity Area Map (Left), Affordable Units Permitted from 2009-2023 (Right)

Today, the City’s Higher Opportunity Areas experience far less production of affordable housing than other areas of the City as shown in Figure 1 (Right) above. This is reflective of existing regulations in the zoning code that do not distinguish between Higher and Lower Opportunity geographies. In response to this inequitable distribution of mixed-income, multi-family housing, the CHIP Ordinance prioritizes incentivizing affordable housing production in Higher Opportunity Areas through a variety of programs that create greater access to opportunities for all Angelenos in alignment with AFFH objectives.

² Defined as High and Highest Resource Areas by the state-wide California Tax Credit Allocation Committee and the California Department of Housing and Community Development (TCAC/HCD) [Opportunity Areas Maps](#)

Consequences of Non-Compliance

The City's proposed CHIP and HESMD Ordinances must be operative by February 12th, 2025. Failure to meet this deadline or adopt a program that meets the requirements of state law (per California Government Code 65583(c)(1)(A)) could result in a determination of non-compliance from the state. A non-compliant status would trigger significant consequences for the city, including its public agencies and non-profit housing developers, that may result in the loss of hundreds of millions of dollars in funding for housing, transportation, and infrastructure, loss of local zoning control (Builder's Remedy), court imposed fines, limitations on the issuance of permits, and limitations on the approval of commercial projects. Housing Element law further includes a provision that requires a housing development with at least 49% housing affordable for lower income residents to be approved through a by-right process on any site included in a Housing Element program to be rezoned provided it complies with the applicable objective standards and criteria described in the rezone program action (See California Government Code Section 65583(g)).

In addition, state law grants the Housing and Community Development (HCD) authority to review any actions (or inaction) by a local government that it determines are inconsistent with an adopted Housing Element or Housing Element law. For the City of Los Angeles, this includes failure to implement the Program actions included in the Housing Element. A determination of Housing Element non-compliance could lead to additional consequences including application of the "builder's remedy," a provision in the Housing Accountability Act that limits the ability of local governments to restrict the development of new affordable and mixed income housing development even if inconsistent with local zoning regulations. Additionally, non-compliance could subject the City to court imposed fines and penalties of up to \$600,000 per month and puts millions of dollars for affordable housing production put at risk, including scoring and funding for planning grants and the following programs:

- Permanent Local Housing Allocation (PLHA) - Program provides funding to local jurisdictions for affordable housing for individuals at risk of homelessness and households at or below 60% AMI.
- Affordable Housing and Sustainable Communities (AHSC) - State funding program that aims to reduce greenhouse gas emissions by funding affordable housing in conjunction with transportation improvements.
- Transformative Climate Communities (TCC) - Funding provided for projects including housing and infrastructure, that achieve major environmental, health, and economic benefits in disadvantaged neighborhoods.

Adoption of New Zoning Code and Community Plan Updates

On May 2, 2023, the City Council voted unanimously to approve the Downtown Los Angeles Community Plan Update and the New Zoning Code, a new Chapter 1A of the Los Angeles Municipal Code. This new zoning framework includes a comprehensive zoning code restructure that will be applied as future community plans are updated and will allow for more flexibility to meet the varied needs of Los Angeles' diverse communities and implement a large range of

citywide and community-level goals and policies. It includes a new modular zoning system, updated regulations, and zoning districts and zoning tools necessary to zone and implement the Downtown Community Plan and future Community Plan updates and Specific Plans.

The New Zoning Code and Downtown Community Plan are currently being reviewed and finalized by the City Attorney. Once their form and legality process is complete, they will return to City Council for final approval and adoption, after which the New Zoning Code provisions will be in effect in the Downtown Community Plan Area. Other local plans are also in the process of being updated using the New Zoning Code rules and zoning system. On December 12, 2023 an update to the Cornfield Arroyo Seco Specific Plan (CASP), which simplified the CASP plan and programs and transitioned the plan to Chapter 1A zoning districts and regulations, was recommended for adoption by the City Planning Commission. Following this, the City Planning Commission also recommended the adoption of the Boyle Heights Community Plan on January 11, 2023 and the Harbor Gateway Community Plan and Wilmington-Harbor City Community Plan on February 8, 2024. The plans include new zoning using the new modular zoning districts system established in Chapter 1A, updated policies, and local affordable housing incentives under a new Local Affordable Housing Incentive Program, which was intended to be the principal update and replacement to the Transit Oriented Communities (TOC) Incentive Program passed by voters in 2016 via Measure JJJ. These New Zoning Code provisions will go into effect in these plan areas when the plans pass final approval and adoption by City Council and as future community plan updates are adopted under New Zoning Code rules, Chapter 1A rules and programs will extend to those areas as well. Within the Citywide Housing Incentive Program (CHIP), a Chapter 1A version of the Density Bonus and Affordable Housing Incentive Program (AHIP) will also apply to all future community plan updates. CHIP's Mixed Income Incentive Program (MIIP) will not apply to the Downtown, Harbor, and Boyle Heights Community Plans and the Cornfield Arroyo Seco Specific Plan, which have been presented previously to the City Planning Commission with their own local value capture programs; however, future Community Plan Updates will build from the MIIP's incentive framework and to develop their own local version of the Transit Oriented Incentive Areas program that will live within Chapter 1A of the City's Zoning Code.

The proposed Housing Element Rezoning Program will introduce changes to this New Zoning Code in order to ensure that the policies of the New Zoning Code align with citywide policy changes being introduced in Chapter 1 of the LAMC, the existing Zoning Code, so that areas of the City that are subject to the existing Zoning Code and areas subject to the New Zoning Code can utilize consistent updated housing policy and affordable housing incentives. To accomplish this, the Housing Element Rezoning Program must include updates to and expansions of existing housing incentive programs in Chapter 1A, including the Chapter 1A version of the State Density Bonus Incentive Program, the introduction of new incentive and streamlining programs, and an expansion and renaming of the Local Affordable Housing Incentive Program currently utilized by plans under the New Zoning Code. Other updates to housing policy, such as unit replacement requirements and minimum densities must be included as well. The City Planning Commission's action on the Citywide Housing Incentive Program Ordinance, Resident Protections Ordinance, and Housing Element Sites and Minimum Density Ordinance should therefore include recommending both a version of the proposed ordinances that amends Chapter 1 of the LAMC

as well as a parallel version of the ordinances that would amend Chapter 1A of the LAMC. Some specific policy structure and eligibility provisions may be slightly modified from the Chapter 1 versions of the ordinances to the Chapter 1A versions of the ordinances in order maintain fidelity with the policies of Chapter 1A plans already recommended for adoption by the City Planning Commission and to allow for tailoring of local policy by plan updates in the future. The Chapter 1A versions of each of these ordinances, along with the rest of the the zoning provisions of 1A, will apply both to plan areas already under updated under Chapter 1A and also future plan areas as they are updated plan by plan to utilize the new system.

Citywide Housing Incentive Program (CHIP)

Core Strategies

Early phases of CHIP development were guided by the formulation of six core strategies, informed by outreach conducted during the 2021-2029 Housing Element Update. These strategies prioritized growth near transit infrastructure and centered concepts on Affirmatively Furthering Fair Housing outcomes. Strategies ranged from focusing on creating more affordable housing and new “Missing Middle” housing typologies to improving process streamlining, including for adaptive reuse projects repurposing existing buildings for housing. The strategies also introduced “Opportunity Corridors,” an incentive area for mixed income housing near quality transit in Higher Opportunity Areas, and suggested refinements to the City’s current incentive programs like Density Bonus and Transit Oriented Communities. The CHIP Program includes aspects of all these strategies, though they have changed after extensive public feedback and technical policy formulation. For example, the Adaptive Reuse strategy will be implemented in a separate rezoning program “Citywide Adaptive Reuse Ordinance” (CPC-2023-5986-CA) led by the City Planning Urban Design Studio.

Proposed Ordinance Summary

The CHIP Ordinance is separated into three programs, the State Density Bonus Program, Mixed Income Incentive Program (MIIP), and Affordable Housing Incentive Program (AHIP), that will be located within the Exceptions section (LAMC 12.22) of the LAMC. Together, these programs are proposed to serve as the City’s local density bonus program consistent with State Density Bonus Law (Government Code Sections 65915-65918), and the authority to provide local procedures and greater development bonuses by local ordinance (Gov. Code. Sec. 65915(a) and (n)). In addition to these programs—described in more detail below—the Ordinance contains a series of targeted amendments to correct references, ensure consistency with other sections of the LAMC, and support the implementation of the CHIP Ordinance programs. These include revisions to definitions, establishment of new procedures, revisions to Project Review thresholds, revisions to Linkage Fee exemptions, as well as a new code section authorizing the Director of Planning to adopt an Environmental Protections Measures Handbook.

State Density Bonus Program

The State Density Bonus Program will function as the City's local mechanism for implementing key components of state law. Since the City's Density Bonus Ordinance was passed in 2008, over a dozen state bills have significantly amended State Density Bonus Law. The CHIP Ordinance encompasses revisions to the City's existing local Density Bonus Ordinance, that are currently implemented through department memorandums, to align the City's incentives, processes, and procedures with State Density Bonus Law.

Mixed Income Incentive Program (MIIP)

MIIP will establish mixed income housing incentives along certain major street corridors, near major transit, including tools to encourage the construction of various types of "low scale/low rise" housing to create transitions between single-family homes and mid-rise apartment buildings. These "Opportunity Corridor" and "Opportunity Corridor Transition" incentives will be available for projects located in the City's High and Highest Resource Areas (Higher Opportunity Areas) as defined by the California Tax Credit Allocation Committee Opportunity Area maps. The incentives proposed as part of the MIIP will also be made available to projects involving adaptive reuse. Additionally, MIIP will codify key elements of the Transit Oriented Communities (TOC) Affordable Housing Incentive Guidelines, which will expire in 2026, for sites near transit citywide.

Affordable Housing Incentive Program (AHIP)

AHIP will provide tailored land use incentives for One Hundred Percent Affordable Housing Projects citywide. Additionally, the ordinance will expand the types of zones eligible for One Hundred Percent Affordable Housing projects to "P" Parking zones, "PF" Public Facilities zones, and to parcels owned by public agencies, Faith-Based Organizations (FBOs), and Community Land Trusts or Limited Equity Housing Cooperatives (Shared Equity). FBO and Shared Equity projects will have different affordability requirements wherein 80% of units must be deed-restricted to qualify.

Additional Targeted Amendments**Amendments to Definitions (LAMC Section 12.03)**

The CHIP Ordinance adds several new definitions to LAMC Section 12.03 for terms used in the three CHIP programs (State Density Bonus, MIIP, and AHIP). These new definitions are largely reflective of terminology codified in state law that inform the regulatory framework for the CHIP programs. In particular, a number of terms are reflective of definitions contained in State Density Bonus Law (California Government Code Section 65915) for "Housing Development", "Density Bonus", and "Incentive". Other key terms include the definitions of income levels associated with covenants for Restricted Affordable Units and terms to ensure consistency throughout the CHIP programs and Chapter 1 of the LAMC for references to historic resources. More information on the full list of terms proposed to be added to LAMC Section 12.03 can be found on page 2 of Exhibit A.1, the proposed draft CHIP Ordinance.

Amendments to Findings Associated with the Density Bonus for a Housing Development in which the Density Increase is Greater than the Maximum Permitted (LAMC Section 12.24 U.26)

The CHIP Ordinance proposes an amendment to LAMC Section 12.24 U.26 which contains required findings for Class 3 Conditional Use Permit Density Bonus projects requesting a density increase that exceeds what is permitted under the existing Density Bonus Ordinance (described in Section 12.22 A.25 which are to be replaced by the CHIP Ordinance). The proposed amendments to this section would update the threshold which triggers discretionary review for projects requesting a density bonus beyond 88.75% or 100% in alignment with state law (Government Code Section 65915 (v) added by AB 1287). The maximum density bonus permitted by state law may be 88.75% or 100%, and is determined by the income category of the restricted affordable units a project provides. Prior to AB 1287, State Density Bonus Law projects providing the requisite number of affordable units were able to receive up to a 50% density bonus under certain circumstances (AB 2345). AB 1287, which became effective in 2024, builds upon the 50% bonus and allows a project to receive an additional density bonus beyond 50% in exchange for a greater set aside of restricted affordable units. Projects providing additional restricted affordable units for Very Low Income households may receive an additional bonus of 38.75%, resulting in a total bonus of 88.75%, and projects providing restricted affordable units for Moderate Income households may receive an additional bonus of 50%, resulting in a total bonus of 100%. Additionally, the proposed amendment replaces a reference to “base density” with “Maximum Allowable Residential Density” per Government Code Section 65915 (o)(6). Other updates to this section include adding references to affordable housing requirements added under the Resident Protections Ordinance pursuant to LAMC Section 16.60 and Section 16.61. More information about the Resident Protections Ordinance can be found beginning on page A-39.

Amendments to Exemptions from the Affordable Housing Linkage Fee (LAMC Section 19.18)

The CHIP Ordinance proposes an amendment to LAMC Section 19.18 (containing provisions to the Affordable Housing Linkage Fee) that would add an exemption to LAMC Section 19.18 B.2. In particular, this proposed new exemption would make any MIIP project exempt from payment of the required Linkage Fee which currently applies to projects that set aside less than 8% Extremely Low Income, 11% Very Low Income, 20% Low Income, or 40% Moderate Income units within a new housing development. The CHIP Ordinance proposes this amendment to align the affordability requirements for the linkage fee exemption with those required in the proposed MIIP. Specifically, MIIP will offer projects the ability to meet their affordability requirement by providing restricted affordable units in a single affordability tier or by providing restricted affordable units consistent with a mixed-affordability option, which is consistent with the intent of the Affordable Housing Linkage Fee policy provisions. More information on the required set-asides for restricted affordable units can be found in the *Affordability Level Considerations* section of this staff report on page A-64.

Though MIIP projects utilizing the single affordability tier option to meet their set aside requirement would already be consistent with the requirements of the Affordable Housing Linkage Fee, projects utilizing the mixed-affordability option would be inconsistent with the requirements of the Affordable Housing Linkage Fee and potentially still be subject to a Linkage Fee Payment. For

this reason, the CHIP Ordinance proposes an exemption from the Linkage Fee for all MIIP projects given that these project types will still be mandated to provide on-site affordable units consistent with the intent of the Affordable Housing Linkage Fee policy provisions.

Amendments to Project Review Thresholds (LAMC Section 16.05)

The CHIP Ordinance proposes an amendment to the Exemptions section of LAMC Section 16.05 which contains provisions associated with Project Review (previously referred to as Site Plan Review). The proposed amendment would exempt from the Project Review process (described in Section 13B.2.4 of Chapter 1A) any project that provides restricted affordable units on-site consistent with the set asides required to be exempt from the Affordable Housing Linkage Fee, which as proposed would include projects utilizing the MIIP program. This proposed exemption from Project Review requirements is informed by feedback provided calling for additional process streamlining for projects providing on-site restricted affordable housing.

Project Review is a planning process that requires discretionary actions for larger types of developments. For multi-family housing development, Project Review is required for projects that create a net increase of 50 units or more on a site (prior to any density bonus) and excluding any covenanted affordable units. Project Review determinations require the decision-maker to make various findings, trigger environmental review under the California Environmental Quality Act (CEQA), can result in an optional public hearing, and contain an appeal period. If a Project Review determination is appealed, it requires an appeal hearing to be conducted by the Planning Commission. These procedures significantly expand project review timelines and introduce considerable risk and uncertainty for housing developers of projects that may otherwise meet all local zoning requirements, and were identified as a constraint to affordable housing production in the 2021-2029 Housing Element.

Landscape and Site Design Standards

It is important to note that the Department has proposed a separate Landscape and Site Design Standards Ordinance that would amend the City's Landscape Ordinance (No. 170,978), to create new objective standards for landscape and site design and maintain a point-based system in order to implement healthy building design and climate-adapted site design. As proposed, this ordinance would be applicable to all eligible projects proposing five or more units, regardless of the Project Review process.

Environmental Protection Measures

The CHIP Ordinance proposes a new Section 11.5.15 to the LAMC adding enabling language for the Director of Planning to, in the future, approve and issue Environmental Protection Measures. Environmental Protection Measures serve as a set of standards that will be used to implement mitigation measures adopted pursuant to CEQA, including for City plans and other City policies in compliance with CEQA Guidelines Sec. 15126.4(a)(2), and to create a framework to adopt other standards intended to protect the environment as well as public health and safety. In September 2021, the City Planning Commission approved a recommendation that the City Council instruct the Director of City Planning to adopt the Environmental Protection Measures for projects approved pursuant to Chapter 1A of the LAMC.

The adoption of this authorizing language and future adoption of the Environmental Protection Measures by the Director aligns with the intent underpinning the incorporation of the Environmental Consideration Areas (see Environmental Consideration Areas on page A-67) and associated regulations into the second draft of the CHIP Ordinance released on June 27, 2024. Specifically, the second draft of the CHIP Ordinance proposed to require that sites located within Environmental Consideration Areas complete a Phase I and/or Phase II Environmental Site Assessment in order to utilize certain incentives, or in the case of MIIP, be eligible for incentives entirely.

Additional analysis revealed that rather than proposing regulations in the CHIP Ordinance to apply to sites identified as Environmental Consideration Areas, the City could instead require projects to comply with the Environmental Protection Measures at the time of building permit application. Rather than requiring compliance with certain regulations to access certain types of incentives, requiring compliance with the Environmental Protection Measures ensures broader applicability of important health and safety measures for all projects utilizing the CHIP Ordinance incentive programs. With this in mind, staff recommend that the Director adopt the Environmental Protections Measures, including the associated applicability provisions, at time of the implementation of the CHIP Ordinance so that they apply specifically to projects approved pursuant to LAMC Section 12.22 A.37 (State Density Bonus Program), LAMC Section 12.22 A.38 (Mixed Income Incentive Program), and LAMC Section 12.22 A.39 (Affordable Housing Incentive Program), as well as sites identified as Lower Income Rezoning Sites or Prior Housing Element Sites eligible for by-right review pursuant to state law and the HESMD Ordinance. Revisions proposed to the Environmental Protection Measures originally prepared as part of the City Planning Commission (CPC)'s consideration of the Downtown Community Plan are summarized in the Table below. These revisions are also included in Exhibit C.2

Table 1. Environmental Protection Measures Revisions

Environmental Protection Measures Section	Proposed Revision
Section 1. Administrative Provisions	- Clarifies that projects may be subject to Environmental Protection Measures as stated in Chapter 1 of the LAMC, Chapter 1A of the LAMC, or as stated in the applicability section of each individual Environmental Protection Measure.
Section 2. Required Notices	- No revisions proposed.
Section 3. Environmental Protection Measures	- Hazardous Materials Standards (HM1) revised as follows: <ul style="list-style-type: none"> - Applicability for HM1-1 and HM1-2 proposed to be revised to specifically apply to projects approved pursuant to LAMC Section 12.22 A.37, LAMC Section 12.22

	<p>A.38, LAMC Section 12.22 A.39, and LAMC Section 16.70.</p> <ul style="list-style-type: none"> - HM1-2 (Environmental Site Assessments) applicability thresholds revised as follows: - Active oil well buffer expanded to 1,000 feet <ul style="list-style-type: none"> - Idle oil well buffer expanded to 200 feet - Plugged oil well expanded to 100 feet
--	--

With this in mind, as stated, the draft CHIP Ordinance proposes to:

- Add authorizing language to the LAMC Chapter 1 enabling the Director to, at a future date, adopt the Environmental Protection Measures (LAMC Section 11.5.15);
- Revise eligibility criteria in all three CHIP Ordinance programs to require compliance with Environmental Protection Measures to ensure a Phase I and/or Phase II Environmental Site Assessment is conducted for sites hosting or near hazardous uses as outlined in the Environmental Consideration Area definition; and
- Remove compliance criteria in State Density Bonus and AHIP limiting projects' access to the Menu of Incentives and instead replaces this with eligibility criteria as described above.

Key Provisions

Ordinance Structure

Within the CHIP Ordinance, the local State Density Bonus Program, MIIP, and AHIP all follow the same overall structure with varying incentives offered. The Programs are organized in the following format:

- Purpose
- Definitions
- Eligibility
- Procedures
 - Los Angeles Department of Building and Safety Review
 - Expanded Administrative Review
 - Director of Planning Review (*MIIP & AHIP*)
 - City Planning Commission Review
- Base Incentives
- Additional Incentives
 - Allowed Number of Additional Incentives
 - Menu of Incentives
- Public Benefit Options
- Program Standards
- Relationship to Other Sections of the Los Angeles Municipal Code

As mentioned earlier in this report, all three of the programs are proposed to function together as the City's local density bonus program in compliance with California Government Code Section 65915 (a) and (n) which allows local jurisdictions to offer development bonuses greater than those described in California Government Code Section 65915 and to set local procedures. As such, with State Density Bonus Law as the CHIP Ordinance's regulatory foundation, each program also

codifies key elements of law including baseline density bonuses and parking relief; incentive and waiver allowances; and ministerial approval procedures. More information on how State Density Bonus Law informs each CHIP Ordinance program is described in further detail below.

Eligibility

Each of the three CHIP Ordinance programs establishes specific eligibility criteria that projects must adhere to in order to access each program's development bonuses and incentives. All programs establish required dwelling unit thresholds; set aside requirements for Restricted Affordable Units; and parameters for designated historic resources. A project must meet the state definition of a Housing Development to qualify for the State Density Bonus Program and the state's definition of Maximum Allowable Residential Density is used to qualify projects for lower or higher scale incentives in the MIIP and AHIP, using a threshold of 5 units. MIIP and AHIP go further to create geographic criteria to facilitate the approval of greater development bonuses in priority areas including geographies near transit investments and Higher Opportunity Areas. Essentially, the eligibility criteria function as rules to access each program. A summary of the eligibility criteria associated with each CHIP Ordinance program can be found in Table 2 below.

Table 2. Summary of CHIP Ordinance Eligibility Requirements

**NOTE: All programs shall be required to provide the requisite number of restricted affordable units per the provisions of the applicable code section.*

Program	Geographic Eligibility	Unit Thresholds	Limitations
State Density Bonus Program	<ul style="list-style-type: none"> - Citywide 	<ul style="list-style-type: none"> - Be located on a site that allows at least 5 residential units, including mixed-use developments 	<ul style="list-style-type: none"> - Lots in Very High Fire Hazard Severity Zones, Coastal Zones, and Sea Level Rise Areas not eligible for Menu of Incentives or certain Public Benefit Options - No demolition of Designated Historic Resources and limited Menu of Incentives for sites with Designated Historic Resources
Mixed Income Incentive Program			
Transit Oriented Incentive Areas	<ul style="list-style-type: none"> - Be located within a ½ mile of a major transit stop 	<ul style="list-style-type: none"> - Project must contain at least 5 units 	<ul style="list-style-type: none"> - No demolition of Designated Historic Resources and limited Menu of Incentives for sites with Designated Historic Resources
Opportunity Corridors	<ul style="list-style-type: none"> - Be located on a designated corridor with frequent bus service, high quality transit service, or within ½ mile of a Metro Rail Station in a Higher Opportunity Area 		<ul style="list-style-type: none"> - Very High Fire Hazard Severity Zones (except for limited exceptions), Areas Vulnerable to Sea Level Rise, and Coastal Zones excluded
Opportunity Corridor Transitional Area	<ul style="list-style-type: none"> - Be located within 750 ft from the rear property line of an Opportunity Corridor Incentive Area 	<ul style="list-style-type: none"> - Project must contain at least 4 units and are limited by FAR schedule 	<ul style="list-style-type: none"> - No projects in single-family zones (RW or more restrictive zones), and no projects in manufacturing zones (M1, M2, or M3), including sites zoned CM, MR1, MR2 if no residential uses are permitted through an applicable planning overlay
Affordable Housing Incentive Program			

Program	Geographic Eligibility	Unit Thresholds	Limitations
<p>100% Affordable Housing Project</p>	<ul style="list-style-type: none"> - Be a project where all units are covenanted affordable, exclusive of manager’s units (up to 20% may be for moderate income and the remaining 80% must be restricted to lower income categories) - In any zone/land use permitting multi-family or zoned for Parking (P/PB) 	<ul style="list-style-type: none"> - Project must contain at least 5 units 	<ul style="list-style-type: none"> - Lots in Very High Fire Hazard Severity Zones, Coastal Zones, and Sea Level Rise Areas not eligible for Menu of Incentives or certain Public Benefit Options and not eligible for the program if a Project’s Maximum Allowable Residential Density is less than 5 units. - No projects in single-family zones and no projects in manufacturing zones (M1, M2, or M3), including sites zoned CM, MR1, MR2 if no residential uses are permitted through an applicable planning overlay if a Project’s Maximum Allowable Residential Density is less than 5 units.
<p>Faith-Based Organization (FBO) Project</p>	<ul style="list-style-type: none"> - Be a project where at least 80% of units are covenanted affordable on land owned by a FBO (Of which, up to 20% of units may be for moderate income with remaining restricted units covenanted for lower income categories) 		<ul style="list-style-type: none"> - No projects in Very High Fire Hazard Severity Zones, the Coastal Zone, Sea Level Rise Areas, manufacturing zones, or hybrid industrial zones with residential use restrictions - Single-family sites acquired after 1/1/24 must be located within 528 ft from parcel owned by filing Religious Institution with existing Church or House of Worship - Additional standards and no demolition permitted for projects with Designated Historic Resources or Surveyed Historic Resources
<p>Public Land Project</p>	<ul style="list-style-type: none"> - Be a project where all units are covenanted affordable, exclusive of manager’s units (any mix of moderate and lower income units permitted) on land owned by a public 		<ul style="list-style-type: none"> - No projects in Very High Fire Hazard Severity Zones, the Coastal Zone, Sea Level Rise Areas.

Program	Geographic Eligibility	Unit Thresholds	Limitations
	agency or zoned for Public Facilities (PF)		
Shared Equity Project	<ul style="list-style-type: none"> - Be a project where 80% of units are covenanted affordable on land owned by a Community Land Trust or Limited-equity Housing Cooperative 		<ul style="list-style-type: none"> - No projects in Very High Fire Hazard Severity Zones, the Coastal Zone, or Sea Level Rise Areas. - No projects in single-family zones and no projects in manufacturing zones (M1, M2, or M3), including sites zoned CM, MR1, MR2 if no residential uses are permitted through an applicable planning overlay - Additional standards and no demolition permitted for projects with Designated Historic Resources or Surveyed Historic Resources

Environmental criteria for the CHIP Ordinance were carefully crafted to protect public safety, promote sustainability, and enact environmental justice. The MIIP is not available in Very High Fire Hazard Severity Zones, the Coastal Zone or Sea Level Rise Areas. State Density Bonus and AHIP match state incentives to projects meeting density bonus affordability requirements in these areas and trigger Expanded Administrative Review procedures for projects proposed in Very High Fire Severity Zones and One Hundred Percent Affordable projects proposed in Sea Level Rise Areas.

MIIP and AHIP further limit eligibility criteria by restricting projects from being located in manufacturing zones that do not allow multi-family residential uses (M1, M2, and M3), including hybrid industrial sites zoned CM, MR1, and MR2 with residential use restrictions from an applicable planning overlay. The State Density Bonus Program and AHIP only match state incentives in these areas where a land use designation permits residential density, consistent with State Law.

The CHIP will adopt and use environmental protection measures and the associated handbook to ensure sites with hazardous risks or environmental resources are required to follow the proper

remediation and mitigation measures. Please see the section on the Environmental Protection Measures Handbook on Exhibit C.2 of this report for more information.

Procedures

Each CHIP strategy (DB, MIIP, AHIP) establishes specific ministerial and discretionary procedures required for a project's approval depending on the type of request needed to achieve a project's proposed building envelope. A project's applicable procedure is determined not only by the type of request, but also by the project site's characteristics. A table summarizing CHIP procedures is available for review in Appendix 4. The procedures described below are proposed to be implemented through the processes and procedures included in Article 13 of the New Zoning Code which, today, applies to Chapter 1 and Chapter 1A of the LAMC.

Ministerial Review of Incentives

Under State Density Bonus Law, a project is entitled to a specific number of incentives that must be approved according to specific criteria established by California Government Code Section 65915 (d). Specifically, incentives may only be denied if they do not offer cost reductions needed to provide covenanted affordable housing; if they result in a Specific Adverse Impact (as defined in a proposed definition in LAMC 12.03 of the CHIP Ordinance; or if they would be contrary to state or federal law. The CHIP Ordinance will offer ministerial review to an expanded list of eligible project request types beyond what is currently offered today through the existing Density Bonus Program (contained in LAMC Section 12.22 A.25) and the Transit Oriented Communities Affordable Housing Incentive Program Guidelines (TOC Program) (contained in LAMC Section 12.22 A.31). Across all three programs, the CHIP Ordinance proposes ministerial review of specified incentive requests.

Under all three programs within the proposed CHIP Ordinance, most projects requesting base incentives or incentives on the Menu of Incentives will be processed ministerially by the Department of Building and Safety (LADBS). Projects utilizing the CHIP Ordinance that are requesting incentives not on the Menu of Incentives or using any Public Benefits Options will be eligible for ministerial approval through the City Planning's proposed new Expanded Administrative Review process (see LAMC 13B.3.2 of the proposed draft).

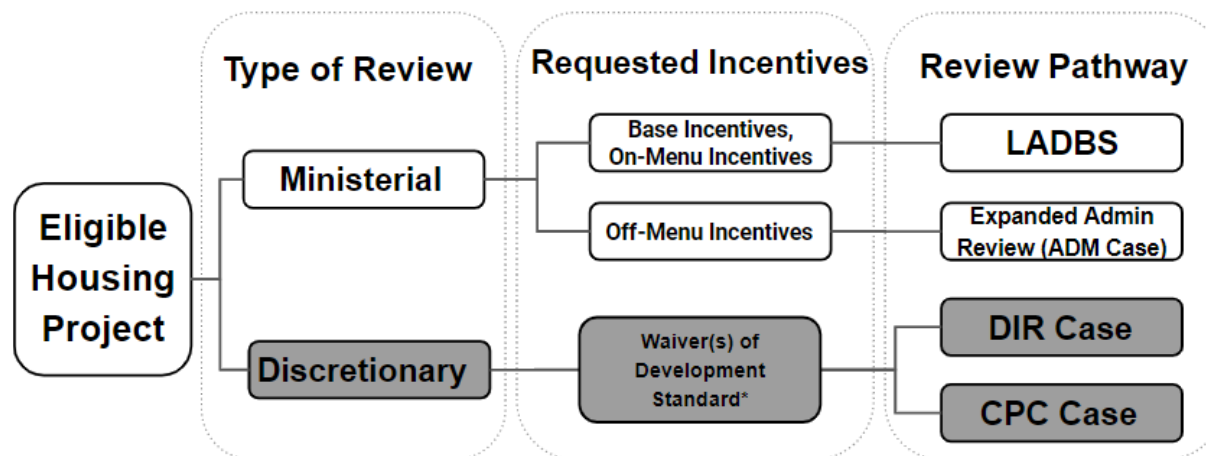

Under Expanded Administrative Review, State Density Bonus Program, MIIP and AHIP projects with requests for incentives not on the Menu of Incentives may require a staff level informational public hearing subject to noticing procedures prior to the completion of the project's administrative review but will not be subject to an appeal. These projects will require a 24-day mailing notice and 10-day posting notice for the public hearing. Within MIIP, requests for FAR, height, open space, setbacks, tree planting and ground floor not on the Menu of Incentives are not permitted, directing projects to utilize the basic State Density Bonus Program for those requests instead of the MIIP Menu of Incentives.

Under AHIP, two additional types of projects are eligible for Expanded Administrative Review. Faith-Based Organization Projects requesting base incentives and/or incentives on the Menu of Incentives that are located on sites with survey historic resources and projects requesting one

waiver of a development standard may be processed ministerially through Expanded Administrative Review.

Figure 2 below provides a high level overview of how procedures are generally structured in the draft CHIP Ordinance.

Figure 2. Summary of Project Review Procedures

*with the exception of AHIP where up to one waiver is processed as ministerial review

Discretionary Review of Waivers

State Density Bonus Law also allows projects to request “waivers or reductions of development standards” pursuant to California Government Code Section 65915 (e) above and beyond the deviations that may be requested as an incentive. However, waivers are subject to different approval criteria. In particular, they may only be approved if the standard being waived would in fact physically preclude a project. For this reason, the CHIP Ordinance proposes waivers to be processed through a discretionary type of review procedure in most instances with the exception of AHIP which proposes the ministerial processing of up to one waiver for eligible projects.

The CHIP Ordinance has two pathways of discretionary review, Director’s Determination and CPC review (Class 3 Conditional Use Permit). The level of review is determined by which program within the CHIP Ordinance a project uses and type of relief requested. For waivers of development standards, each program has a threshold for the number of requests which triggers a higher level of review, as described in the Figure 5 below.

Under the CHIP’s State Density Bonus Program, all waiver requests must be subject to CPC review. The CPC will remain the final decision maker for all projects subject to the Class 3 Conditional Use Permit Process. MIIP will allow requests for one waiver to be filed as a Director-level review application and requests for more than one waiver must be filed as a CPC-level review application. Under AHIP, requests for up to three waivers of a development standard will be subject to Director-level review. Projects requesting more than three waivers are subject to CPC-level review. Discretionary type review procedures for waiver requests in most instances have been maintained as they give City staff the opportunity to review a project for compliance

with the required findings and also will allow an opportunity for community notification and feedback.

A summary of the above described project approval pathways is in Table 3 below as well as in a more detailed chart in [Appendix 4](#).

Table 3: Summary of CHIP Ordinance Project Review Procedures

Program	Allowed Incentives	Ministerial		Discretionary	
		LADBS	ADM	DIR (appeal to CPC)	CPC (CPC Final Decision Maker)
State Density Bonus Program	Up to 4*	-Base Incentives - Menu of Incentives	-Public Benefit Options -Not on Menu of Incentives*	N/A	-Waivers -Projects Exceeding 100% Density Bonus
Mixed Income Incentive Program	Up to 4*	-Base Incentives -On Menu Incentives	-Public Benefit Options - Not on Menu of Incentives	-Up to 1 Waiver	-Over 1 Waiver
Affordable Housing Incentive Program	Up to 5*	- Base Incentives - On Menu Incentives	-Public Benefit Options -Not on Menu of Incentives -Up to 1 Waiver	-Up to 3 Waivers	-Over 3 Waivers
* Per GCS 65915, an applicant may request up to 4 incentives (5 for One Hundred Percent Affordable Housing Projects) on or not on Menu of Incentives. An applicant can mix and match incentives on or not on the Menu of Incentives.					

Base Incentives

All CHIP Ordinance programs offer a set of base incentives in addition to the allotted number of Additional Incentives and Public Benefit Options. Under California Government Code Section 65915 (f) and 65915 (p), projects are entitled to density bonuses and parking relief in addition to their allowed number of incentives. Consistent with California Government Code Section 65915 (d)(2)(D), One Hundred Percent Affordable developments are further eligible for a base height

incentive under State Law. As such, all three CHIP Ordinance programs offer density and parking as what is referred to as “base incentives”. In addition, MIIP and AHIP go further to also offer FAR bonuses and height increases as Base Incentives due to the fact that relief from FAR and height limitations is commonly needed to realize a density bonus. Within MIIP and AHIP Base incentives are calibrated to offer greater incentives in areas near transit and Higher Opportunity Areas of the city, consistent with Affirmatively Furthering Fair Housing goals. More detail on the base incentives offered in each program is included below.

Additional Incentives

Under State Density Bonus Law, projects providing the requisite number of Restricted Affordable Units may request up to four incentives (five if 100% affordable as defined). These incentives must be approved ministerially according to specific criteria set forth in California Government Code Section (d) (also described in each “Additional Incentives” section in the CHIP Ordinance programs).

In addition to allotting projects a specific number of incentives depending on the percentage of Restricted Affordable Units provided, the CHIP Ordinance Programs offer “menus” of incentives that delineate commonly requested deviations. Utilization of these Menus of Incentives enable projects to access streamlined review by the Los Angeles Department of Building and Safety (LADBS) in most cases, while requesting incentives not on the Menu of Incentives subjects a project to a different types or levels of review. The Menu of Incentives was a policy tool established by the City’s local density bonus ordinance in 2008 and continues to be a useful way in which to encourage projects that “stick to the rules” and meet citywide policy goals to access more streamlined procedures. Projects may elect to mix incentives both on and not on the Menu of Incentives.

The CHIP Ordinance allows projects to access a specific number of incentives based on allowances described in State Density Bonus Law. Specifically, projects can access up to five incentives depending on the number of Restricted Affordable Units provided. As the ratio of affordability set asides and affordability depth increase, the more incentives the project can access. Table 12.22 A.37(f)(1)(i) details the percentage of affordable units required to access four incentives under State Density Bonus Law. State Density Bonus Law also stipulates that projects proposed as One Hundred Percent Affordable Housing Developments may access five incentives. With this in mind, each program offers projects the below number of Additional Incentives consistent with allowances in State Density Bonus Law:

Table 4: Allowed Number of Additional Incentives

Program	Project Types	Base Incentives	Additional Incentives Available
State Density Bonus Program (non 100% affordable projects)	Very Low Income (for rental or for sale)	Density and Parking	Up to 4 Incentives is 16% affordable
	Low Income (for rental or for sale)		Up to 3 Incentives if 24% affordable
	Moderate Income (for sale)		Up to 4 Incentives if 45% affordable
	Lower Income Student Housing		Up to 2 incentives if 20% affordable
Mixed Income Incentive Program	Transit Oriented Incentive Areas	Density, Parking, FAR, and Height	Up to 4 Incentives
	Opportunity Corridors		Up to 4 Incentives
	Opportunity Corridor Transitional Area	Density, Parking, and lot standards relief*	Not eligible for incentives on or not on the Menu of Incentives
Affordable Housing Incentive Program	100% Affordable Housing Project	Density, Parking, FAR, and Height	Up to 5 Incentives
	Faith-Based Organization (FBO) Project		Up to 5 Incentives
	Public Land Project		Up to 5 Incentives
*See LAMC Section 12.22 A.38 (g)(3).			

Menus of Incentives

The CHIP Ordinance offers Menus of Incentives that developers may elect to utilize to achieve a project's desired building envelope and access streamlined procedures. Though State Density Bonus Law entitles a project to a specific number of incentives contingent on the amount of affordable housing provided, state law does not specify the types of incentives that can be requested. For this reason, City Planning has, since the adoption of the State Density Bonus Ordinance in 2008, offered projects the ability to select incentives from a predetermined menu of relief options informed by commonly requested deviations. The CHIP Ordinance proposes to maintain this tool to standardize the deviations available to proposed projects. Furthermore, the CHIP Ordinance proposes to go further than the incentive programs offered by the City of Los

Angeles today by offering projects that use incentives from these menus ministerial review by the Los Angeles Department of Building and Safety. If projects seek additional incentives not on the Menu of Incentives or waivers, they will be subject to administrative or discretionary review processes depending on the number and type of request and incentive program being utilized. A summary of the incentives available in each of the CHIP Ordinance's three programs is provided in Table 2 below. Please refer to LAMC 12.22 A.37(f)(2) for the State Density Bonus Program Menu of Incentives; to LAMC 12.22 A.38 (h)(2) for the MIIP Menu of Incentives; and LAMC 12.22 A.39(f)(2) for the AHIP Menu of Incentives. The table below displays the program eligibility of each additional incentive in the ordinance.

Table 5: Additional Menu of Incentives Eligibility

Incentive	DB	MIIP	AHIP
Yards	✓	✓	✓, ✓*
Transitional Height	✓	✓	✓
Space Between Buildings and Passageways	✓	✓	✓, ✓*
Open Space	✓	✓	✓
Density Calculation	✓	✓	✓
Averaging of FAR, Density, Parking or Open Space and Permitting Vehicular Access	✓	✓	✓
Relief from a Development Standard	✓	✓	✓
Supplementary Parking Reductions	✓		✓
Ground Floor Height		✓	✓
FAR	✓	Incl. as base incentive	Incl. as base incentive
Height	✓	Incl. as base incentive	Incl. as base incentive
P Zone	✓	✓	Incl. as base incentive
Ground Floor Activation		✓	✓
Lot Coverage	✓	✓	✓
Lot Width	✓	✓	✓
Lot Requirements			✓*
Senior Independent Housing	✓		
*Tailored Incentive offered for Faith-Based Organization Projects and Shared Equity Projects on sites with a Maximum Allowable Residential Density of less than 5.			

Public Benefit Options

The proposed Public Benefit Options in each program offer projects the ability to access development bonuses above and beyond those offered through Base and Additional Incentives in exchange for design components or project uses deemed community benefits. This is a new policy tool introduced to encourage project elements identified by public comments as critical to successful multi-family projects. While some Public Benefit Options codify bonuses required by State Density Bonus Law for the provision of childcare facilities or off-site affordable housing, others introduce new bonuses for the construction of multi-bedroom units or the preservation of trees. Public benefits are primarily exchanged for greater buildable area including height and FAR, except for privately owned public space which is offset by setback relief.

The table below displays the program eligibility of each Public Benefit Option in the ordinance. Note that projects utilizing the Opportunity Corridor Transition Incentive Area are not eligible for Public Benefit Options and projects in Very High Fire Hazard Severity Zones, Coastal Zones, and Sea Level Rise Areas are only permitted to use Public Benefit incentives for Child Care and Land Donation in the State Density Bonus Program and AHIP.

Incentive	DB	MIIP	AHIP
Child Care Facility	✓	✓	✓
Multi-Bedroom Units	✓	✓	✓
Preservation of Trees		✓	✓
Active Ground Floor Exemption from Calculation of Floor Area		✓	✓
Privately Owned Public Space		✓	✓
Land Donation		✓	✓
Commercial Off-Site	✓		
Surveyed Historic Resource Facade Rehabilitation	✓	✓	✓

Table 6: Public Benefit Options Eligibility

Program Standards

The Program Standards section of each program organizes the key rules governing the programs overall. These rules include those that govern the calculation of Maximum Allowable Residential

Density (defined in 12.03 of the proposed Ordinance); specifications for how to round fractional numbers; and how each program relates to other incentive programs in the Los Angeles Municipal Code. Furthermore, the Program Standards establish how the CHIP Ordinance programs relate to important occupant protection rules and covenant requirements that are proposed to be codified in LAMC 16.60 and LAMC 16.61 (proposed in the draft Resident Protections Ordinance discussed later in this report).

State Density Bonus Program

Overview

The State Density Bonus Program is a citywide incentive-based housing program that will serve as the City of Los Angeles' primary mechanism for implementing State Density Bonus Law (California Government Code Section 65915-65918). While MIIP and AHIP go above and beyond State Density Bonus Law to offer greater bonuses in priority areas, the State Density Bonus program primarily functions as a direct implementation of state law provisions. The City's first local density bonus ordinance was adopted in 2008. Since this time, numerous state bills have been adopted altering how the law is implemented today in the City of Los Angeles. As a result, the City must regularly prepare implementation memos to supplement the City's density bonus ordinance. For this reason, City Planning recommends repealing the existing local density bonus ordinance housing in LAMC 12.22 A.25 and adopting the proposed State Density Bonus Program (LAMC 12.22 A.37).

Base Incentives

Base incentives will match those provided through and added to State Density Bonus Law, with the exception of incentives for One Hundred Percent Affordable Housing projects which are proposed to be available in AHIP. In particular, the State Density Bonus Program implements state law by offering density bonuses and parking relief as base incentives for projects with at least five units depending on the number of Restricted Affordable Units proposed. For the purposes of establishing the required five units, Maximum Allowable Residential Density (defined in LAMC 12.03 of the proposed draft and consistent with California Government Code Section 65915(o)(6)) may be counted and units provided as a result of a Density Bonus shall be excluded. Density bonuses and parking relief are also available for projects that provide housing for one of the target populations described in Table 12.22 A.37(c)(2) of the proposed draft. These incentives are found in the tables in LAMC 12.22 A.37(e). Furthermore, pursuant to a recent change in state law approved through AB 1287 (2023), mixed income projects can now receive up to a 100% density bonus by stacking two income tier set-asides under ministerial review where the restricted affordable units do not exceed 50% of the resulting housing development. Specifically, projects that provide additional units affordable to Very Low Income or Moderate Income Households can access an additional 38.75% or additional 50% density bonus respectively. This is a meaningful change as, previously, only 35% bonuses were allowed by-right through State Density Bonus Law in most areas of the City. Details on the additional density bonuses available and the associated required set-asides are described in LAMC 12.22 A.37(e)(1)(ii) of the proposed draft. Note that the percentage of restricted affordable units provided in exchange for the density bonuses described in the tables in LAMC Section 12.22 A.37(e) would be calculated based on a site's base

density or Maximum Allowable Residential Density. No parking will be required for all State Density Bonus Program projects that are located within a half mile of a major transit stop for compliance with AB 2097. Parking requirements for most projects outside of a half mile of a Major Transit Stop are described in LAMC 12.22 A.37(e)(2) of the proposed draft and are consistent with California Government Code Section 65915(p).

Mixed Income Incentive Program

Overview

MIIP is a local density bonus incentive program (per California Government Code Section 65915) that prioritizes opportunities for housing in specific areas around major streets and transit access to affirmatively further fair housing. The MIIP is comprised of the following three incentive areas:

- Opportunity Corridor Incentive Areas
- Opportunity Corridor Transition Incentive Areas, and
- Transit Oriented Incentive Areas

Opportunity Corridor Incentive Areas

Opportunity Corridor Incentive Areas (Opportunity Corridors) provide opportunities for increasing housing capacity near transit, along major streets (Avenues and Boulevards) in Higher Opportunity Areas of the City. There are three types of corridors identified in this program. Each corridor type has a different level of transit service, ranging from Frequent Bus Service (30 minutes or less frequency during peak hours) to High Quality Transit Service (15 minutes or less frequency during peak hours) to corridors within one-half mile of a Metro Rail Station or Rapid Bus Transit Station.

Opportunity Corridor Transition Incentive Areas

Opportunity Corridor Transition Areas (Corridor Transition Areas) provide opportunities to facilitate the construction of various types of “low-scale” or “low-rise” housing, such as bungalow courts, townhomes, and courtyard apartments that were commonly built in the City before the 1950’s. This aims to fill the gap in housing options between lower scale residential neighborhoods and mid-rise apartments. Projects utilizing these incentives would be required to meet certain design standards to ensure these sites facilitate low-scale housing outcomes, such as garden-style buildings. Shared common outdoor spaces (courtyards, paseos, or rear yards) would be required to encourage community, walkability, and healthy living. The Corridor Transition Areas are intended to provide a transition, in terms of building scale, massing, and density, from the Opportunity Corridors to lower scale residential neighborhoods.

Corridor Transition Areas are parcels that are located within a 750 foot buffer of the rear property line of an Opportunity Corridor. There are three types of Corridor Transition Areas, sites located within 250 feet, 500 feet, and 750 feet of an Opportunity Corridor, with varying incentives as the site is located further from the Opportunity Corridor.

Transit Oriented Incentive Areas

Transit-Oriented Incentive Areas (TOIA) provide opportunities citywide for the construction of affordable housing through tiered development incentives for projects within one-half mile of a high quality bus stop or major transit stop. While the Opportunity Corridors and Corridor Transition Areas described above apply only in the Higher Opportunity Areas across the City, the TOIA program is applicable citywide. This program proposes to codify key elements of the Transit Oriented Communities (TOC) Affordable Housing Incentive Guidelines for sites near transit citywide.

In response to recent state legislation, including Assembly Bill 1287 (AB 1287), which allows projects utilizing the State Density Bonus program to receive up to 88.75%-100% Density Bonuses with increased affordability set-aside requirements, the proposed TOIA program offers Density Bonus incentives beginning at 100%, to ensure the City's local density bonus programs offer more generous incentives when compared with state law. Further, the proposed TOIA program offers different density bonus incentives depending on whether the project site is located in a Lower Opportunity or Higher Opportunity Area of the City. This is to ensure that Higher Opportunity Areas of the City always receive more generous development incentives consistent with affirmatively furthering fair housing goals.

A key distinction between the proposed TOIA program and the existing TOC Guidelines is the ability for projects to opt to utilize incentives not on the Menu of Incentives through a ministerial Expanded Administrative Review pathway, which is not available in the existing TOC Guidelines.

The TOIA program consolidates the four tier structure of the TOC Guidelines into a three tier system, based on varying proximity to transit service. Development incentives vary based on the site's proximity to high quality transit service.

Other Eligibility Criteria

Project sites located within Environmentally Sensitive Areas, including Very High Fire Hazard Severity Zones, Areas Vulnerable to Sea Level Rise, and areas within the Coastal Zone, are not eligible to utilize the MIIP incentive programs. These Environmentally Sensitive Areas present concerns with regard to climate change and resiliency, wildfire risk, and are generally areas of the City where new housing opportunities are not encouraged.

Base Incentives

Base Incentives have been expanded in the MIIP program, in comparison to State Density Bonus Law and the Existing Transit Oriented Communities Guidelines, to include four Base Incentives: Density, Parking, Floor Area Ratio, and Height. Incentives vary based on proximity to transit service across the Opportunity Corridors and TOIA Programs. Project sites furthest from high quality transit may build generally up to 5 stories in height, with sites located in closer proximity to transit allowed to build up to 7 or 8 stories in height. Density Bonuses range from 100% in TOIA Lower Opportunity Areas, to Unlimited Density in all Opportunity Corridors. Corridor Transition Areas generally allow up to 16 units (max.) on sites located within 250 feet from the Opportunity Corridor, and scale down to 6 units (max.) for sites located within 750 feet from the Opportunity

Corridor. FAR incentives are graduated, and scale up or down depending on how many units the project proposes to build. No parking will be required across all projects utilizing the MIIP.

Sites with Designated Historic Resources and Non-Contributing Elements to an Historic Preservation Overlay are eligible for reduced FAR and height incentives in the Opportunity Corridor and TOIA programs, and reduced incentives in the Corridor Transition Program provided the projects conform to the Secretary of the Interior's Standards and complete Office of Historic Resources review.

Unified Adaptive Reuse

In order to encourage the reuse of existing buildings for affordable housing in Los Angeles, the CHIP Ordinance proposes a direct link to the City of Los Angeles' proposed Citywide Adaptive Reuse Ordinance amending LAMC Section 12.22 A.26 (CPC-2023-5986-CA). In particular, Unified Adaptive Reuse Projects that provide Restricted Affordable Units are proposed to be entitled to the development bonuses contained in MIIP and AHIP. The draft Citywide Adaptive Reuse Ordinance defines a Unified Adaptive Reuse Project as a project containing both the conversion of existing floor area to a residential use in at least one existing building and new construction of new floor area proposed to be attached or detached from the existing building. As proposed in the CHIP Ordinance, if these project types provide Restricted Affordable Units, the new construction portion of the project may access unlimited density in addition to any FAR bonus, height bonus, parking relief, or Incentive on the Menu of Incentives contained in MIIP or AHIP.

Affordable Housing Incentive Program

Overview

AHIP is a local density bonus incentive program (per California Government Code Section 65915) that aims to increase housing access by removing the barriers to the development of 80 - 100 Percent Affordable Housing Projects and promoting affordable housing in areas that have historically produced less. The AHIP is comprised of the following project types:

- 100% Affordable Housing Projects: Parcels allowing multi-family residential uses or zoned for Parking (P zones) citywide
- Faith-Based Organization (FBO) Projects: 80 - 100% Affordable Housing development on land owned by FBOs
- Public Land Projects: Incentives for Affordable Housing on "PF" Public Facilities zones and parcels owned by public agencies
- Shared Equity Projects: 80 - 100% Affordable Housing on land owned by Community Land Trusts and Limited Equity Cooperatives

AHIP will streamline procedures and offer land use incentives scaled to higher and lower density contexts for One Hundred Percent Affordable Housing Projects citywide. If a site has a Maximum Allowable Residential Density of less than 5 units, it will qualify for lower incentives (like height or FAR) than a site with a Maximum Allowable Residential Density of over 5 units. Sites eligible for greater Affordable Housing project incentives are found within a half mile of a Major Transit Stop

or Low-Vehicle Miles Traveled (VMT) sites for consistency with and strengthening of State Density Bonus. These incentives are matched or greater in Higher and Moderate Opportunity Areas (i.e. Moderate, High and Highest Resource areas as defined by the TCAC/HCD Opportunity Maps) for the purposes of Affirmatively Furthering Fair Housing and equitably distributing affordable housing development.

As an implementation of State Density Bonus, One Hundred Percent Affordable Housing Projects proposed in Very High Fire Hazard Severity Zones and Sea Level Rise Areas are eligible for limited incentives under AHIP. Additionally, AHIP expands the types of zones eligible for Affordable Housing Project incentives to “P” Parking zones and “PF” Public Facilities zones, and to parcels owned by public agencies. Affordable Housing projects in P or PF zones will qualify for tailored incentives where projects may apply the least restrictive zoning regulation of their adjoining parcels.

AHIP establishes unique incentives tailored for faith-based developments which may be used in lieu of state incentives. Projects that provide at least eighty percent affordable housing projects on sites owned by faith-based institutions are eligible for the program. These incentives are applicable in all zones except manufacturing zones. In addition, parcels acquired after January 1, 2024 and zoned for single-family or more restrictive residential uses must be located within 528 feet of an active religious use to qualify as a project. This distinction was based on public feedback to limit acquisition of single-family parcels by faith-based institutions. The proximity threshold ensures single-family redevelopment would only occur near active religious institutions, limiting isolated developments.

Base Incentives

Base Incentives in AHIP match or exceed those provided to One Hundred Percent Affordable Housing projects as a result of recent updates to State Density Bonus Law (Government Code Section 65915-65918) through AB 1763 and AB 2334. Furthermore, Base Incentives offered through AHIP apply to One Hundred Percent Affordable Housing Projects, Faith-Based Organization Projects, and Public Land Projects. Base Incentives include density, parking, floor area ratio, and height.

Incentives are tiered within each sub area among sites with a Maximum Allowable Residential Density of greater or less than 5 units and tailored to three eligibility subareas:

- Citywide: This sub area includes all parcels with the city eligible for the program, offering an 80% density bonus, FAR is capped to 1.5:1 for low density projects with a height bonus of 1 story and 3:1 (or 35% increase) for high density projects with a height increase of up to 2 stories, whichever is greater.
- Low Vehicle Travel Areas or Within a Half Mile of a Major Transit Stop: Parcels in this sub area are located in either a Low Vehicle Travel Area or within half a mile of a Major Transit Stop as mapped by the Southern California Association of Governments. Incentives match, exceed, and extend State Density Bonus incentives provided in these areas to

implement recent State Density Bonus updates, such as AB 1763 and AB 2334. FAR is capped to 2.0:1 for low density projects with a height bonus of 1 story and 4.5:1 (or 50% increase) for high density projects with a height increase of up to 3 stories, whichever is greater.

- **Moderate and Higher Opportunity Areas:** This subarea counts parcels in either a Moderate or Higher Opportunity area as mapped annually by the California Tax Credit Allocation Committee. Incentives extend and expand upon those available to One Hundred Percent Affordable Projects in Low Vehicle Travel Areas through the AB 1763 and AB 2334 State Density Bonus amendments, to equitably distribute and Affirmatively Further Fair Housing. FAR is capped to 2.5:1 for low density projects with a height bonus of 1 story and 4.65:1 (or 55% increase) for high density residential projects and commercial projects with a height increase of up to 3 stories, whichever is greater.

An additional base incentive for calculating Maximum Allowable Residential Density is extended to Public Land Projects and One Hundred Percent Affordable Housing Projects proposed on land zoned for parking. Public Land Projects are granted an unlimited density and minimum Floor Area Ratio of 3.0:1 by-right though they may also utilize the least restrictive zoning and development standards of the least restrictive adjoining zone. If authorized in a resolution by City Council, Public Land Projects may utilize any development standards so long as the project complies with building code requirements. Automobile Parking Sites can utilize the density and development standards in the least restrictive adjoining zone, including in cases where the subject parcel has split zoning.

Summary of Changes and Revisions

Ordinance Revisions

The first draft of the proposed ordinance was released on March 12, 2024, the second draft on June 27, 2024 and the third draft alongside the release of this report. A number of significant revisions were made to the CHIP Ordinance concurrent with the release of this staff report. The revisions were made in response to public comment (see Key Issues for more information). Revisions made throughout the CHIP Ordinance include:

- 1) Added proposed language (LAMC Section 11.5.15) authorizing the Director of Planning to adopt Environmental Protection Measures under Chapter 1 of the LAMC. Eligibility criteria in all three CHIP Ordinance programs was revised to ensure compliance with the Environmental Protection Measures for sites deemed Environmental Consideration Areas.
- 2) Added language to the Procedures section of each proposed program to ensure the CPC remains the final decision maker (for the initial decisions and any appeals on that, consistent with today's procedures, for the discretionary review of requests for waivers or reductions of development standards. Clarified the relationship of various incentives and procedures to each other.

- 3) Revised the proposed new ministerial procedure in Article 13, Expanded Administrative Review, to refine procedures for requests not on the Menu of Incentives by updating mandatory hearing requirements to clarify a hearing may be required according to Department staff's assessment; to remove appeal procedures, making the administration clearance the final decision; and to revise modifications procedures to limit increases in project scope.
- 4) Revised the oil well buffer in the Environmental Consideration Areas definition contained in LAMC Section 12.22 A.37(b) from within 500 feet of an active or inactive oil well to within 1,000 feet of an active oil well or field.
- 5) Removed requirement that above ground parking count as floor area for use of FAR bonuses.
- 6) Revised multi-bedroom incentives to offer graduated FAR and height dependent on project size. Reduced the required percentage of multi-bedroom units in a project from 20 to 10 percent.
- 7) Removed Public Benefit Options for Unified Adaptive Reuse Projects in MIIP and AHIP and instead made a Type I Unified Adaptive Reuse Project an eligible project type for applicable MIIP and AHIP incentives.
- 8) Added a new Public Benefits incentive for the rehabilitation of and retention of a portion of surveyed historic structures.
- 9) Revised CUP for density bonuses exceeding those allowed by the State Density Bonus Program (LAMC 12.24 U.26) to allow a discretionary procedure for projects opting to provide affordability in a single income category and requesting a density bonus of greater than 50%.
- 10) Clarified definitions and terms throughout the Ordinance. Added definitions to 12.03 for the Coastal Zone, Sea Level Rise Areas, Moderate and Lower Opportunity Areas, and Neighborhood Retail and Service Uses.
- 11) Clarified that lots in Very High Fire Hazard Severity Zones, Coastal Zones and Sea Level Rise Areas are not eligible for the certain Public Benefit Options.
- 12) Revised Program standards throughout to include parameters associated with the height (in feet) of a story.
- 13) Added a table proposing revisions to LAMC Section 19.01 with updated code section references for applications associated with density bonuses.
- 14) Clarified mapping frequency and update processes.
- 15) Corrected references and syntax.

The key revisions made for each program of the Ordinance are described below.

State Density Bonus

The following revisions to the State Density Bonus Program (LAMC Section 12.22 A.37) were made in response to public comment and developer outreach (see [Key Issues](#) for more detail):

- 1) Added language to LAMC Section 12.22 A.37(e)(2) to ensure parking relief for senior citizen housing and special needs housing consistent with California Government Code Section 65915(p)(4).

- 2) Removed language from LAMC Section 12.22 A.37(f) restricting access to the Menu of Incentives for project sites identified as Environmental Consideration Areas as all projects utilizing State Density Bonus will now be subject to the Environmental Protection Measures at the time of application of a building permit.
- 3) Clarified that lots in Very High Fire Hazard Severity Zones, Coastal Zones and Sea Level Rise Areas are not eligible for the Menu of Incentives.
- 4) Made the following revisions to the FAR incentive on the Menu of Incentives:
 - Removed requirement for any above grade parking to count toward FAR calculation.
 - Revised FAR bonuses for both commercial and residential zones as follows:
 - Lots in C and R zones eligible for an increase equal to the percentage of Density Bonus, not to exceed 35% or a maximum FAR of 3.0:1, whichever is greater, if located within a one-half mile radius (2,640 feet) of a Major Transit Stop.
 - Added a new incentive allowing a Housing Development or Senior Citizen Housing Development that also meets the definition of Senior Independent Housing to be permitted in any zone.
 - Clarified that projects designating at least 20% of units for low income students may be eligible for two incentives.

Mixed Income Incentive Program

The following revisions to MIIP were formulated based on the City's market study findings, public feedback, developer outreach, and input from Community Based Organizations:

- 1) Single Affordability Set-Aside Percentages for Lower Market Areas in MIIP were modified to align with existing Transit Oriented Communities Guideline requirements.
- 2) The definition of a Mixed Income Incentive Program Project was modified to require two thirds of the project be residential.
- 3) Modifications to TOIA Incentives:
 - TOIA Tiers 1 and 2 were consolidated, modifying the total number of Tiers from four to three. Tier 1 now offers Density and FAR bonuses in excess of the State DB program.
 - FAR Base Incentives in TOIA were modified to offer varying bonuses in Higher Opportunity Areas compared to Moderate and Lower Opportunity Areas. Revisions to create higher FAR incentives in Higher Opportunity Areas resulted in adjustment to FAR incentives across the tiers. In general, percentage based FAR bonuses in Moderate and Lower Opportunity Areas were reduced by 5% and remained consistent in Higher Opportunity Areas.
 - Alongside the percentage based bonus, the program offers fixed FAR bonuses which may be utilized in lieu of a percentage bonus if it is greater. For instance TOC Tier 3 proposes a bonus of 4.65 or 55% whichever is greater. Fixed FAR Bonuses were increased across all tiers of the TOIA to align with the assumption the fixed bonus should be equivalent to the percentage based bonus multiplied by 3 (to represent a 3.0:1 FAR). This modification aligns residential and

commercial FAR assumptions to encourage greater utilization of commercial zones.

- 4) Consistent with the fixed bonus changes in TOIA, the fixed FAR bonuses in Opportunity Corridors were increased. Percentage base FAR bonuses were modified to increase FAR incentives in residential zones by approximately 5% and by 10% in commercial zones. Residential height limitations were aligned to match commercial limitations based on the new proposed floor area incentives.
- 5) Incentives not on the Menu of Incentives in MIIP were modified from requiring Director review to now require Expanded Administrative Review. Except that requests not on the Menu of Incentives for FAR, height, open space, yard reduction, and ground floor are no longer eligible for use of the Menu in the program and require a project to pursue incentives within the State Density Bonus Program.
- 6) Clarified relationship to Community Plan Updates and allowances to replace MIIP program incentives. Removed eligibility for projects located in the Boyle Heights Community Plan, the Harbor Gateway Community Plan, the Wilmington-Harbor City Community Plan, the Central City North Community Plan, the Central City Community Plan Areas, and the Cornfield Arroyo Seco Specific Plan.

Affordable Housing Incentive Program

Revisions to AHIP were informed by feedback from community outreach and discussions with affordable housing developers (see [Key Issues](#) for more detail).

- 1) A new project type and definition, a Shared Equity Project project was included in ordinance revisions to create more incentives for alternative models of affordable housing on land owned by non-profit community land trusts and limited equity cooperatives. Projects with 80% affordability will be eligible for limited incentives designed for neighborhood context scale. Projects funded by a program established under Ordinance 187692 (Measure ULA) shall be eligible for the full menu of incentives.
- 2) Procedures for the review of Designated and Eligible Historic resources were revised for clarity,
- 3) The definition for 'Qualified Developer' was expanded to reference the United States Department of the Treasury's list of Certified Community Development Financial Institution (CDFI).
- 4) Affordable set asides, rent schedules, and covenant requirements were clarified for each project type.
- 5) Consistent with the fixed bonus changes in MIIP, the fixed FAR bonuses in AHIP were increased to align with a percentage based bonus multiplied by 3 (to represent a 3.0:1 FAR). This modification aligns residential and commercial FAR assumptions to encourage greater utilization of commercial zones.
- 6) The proposed Moderate Opportunity Area Definition was moved to 12.03.

Relationship to New Zoning Code

The City Planning Commission's action on the Citywide Housing Incentive Program would include recommending both a version of the proposed Ordinance that amends Chapter 1 of the LAMC as well as recommending that City Council request that a parallel version of the ordinance be prepared that would amend Chapter 1A of the LAMC, subject to changes to conform to its format and style and the incorporation of the policy differences described below. As Chapter 1A is built around a new zoning system and document structure and organization and incorporates many additional changes to citywide policies, the Chapter 1A version of the ordinance will propose amendments to the New Zoning Code that align with the intent of the Chapter 1 version of the ordinance while maintaining the integrity and functionality of the New Zoning Code system and policies.

On May 2, 2023, as part of its actions to approve the Downtown Community Plan and the New Zoning Code, City Council approved the Local Affordable Housing Incentive Program as a new incentive program structure for mixed-income affordable housing projects in Chapter 1A to update, replace, and make permanent the incentives of the Transit Oriented Communities (TOC) Program and establish local housing incentives. The incorporation of the Citywide Housing Incentive Program into the New Zoning Code may require modifications to the Local Affordable Housing Incentive Program in order to update the program rules and incorporate MIIP Incentives. Other edits to Article 9 (Public Benefit Systems) will include updates to the existing State Density Bonus incentive program section and the addition of the Affordable Housing Incentive Program. Incorporating the CHIP Ordinance into Chapter 1A will also require edits to Article 2 to introduce new options for lot amenity spaces, edits to Article 7 to add new Alternate Typologies to carry forward incentives established by the Affordable Housing Incentive Program, edits to Article 8 to clarify the relationship between State incentive programs and other zoning rules, and edits to Article 14 to add new defined terms and modify existing definitions as needed to support the various new programs and policies. As Article 13 of Chapter 1A applies to both Chapter 1 and Chapter 1A of the Zoning Code, the Expanded Admin Review section in Article 13 that is included in the Chapter 1 version of the proposed ordinance will apply to both the Chapter 1 version and the Chapter 1A version of the Citywide Housing Incentive Program Ordinance. All provisions of the proposed ordinance would need to be translated and carried into the new Zoning Code, subject to changes to conform to the format, style, and updated policy framework and regulatory structure of the New Zoning Code.

The policy outcomes in the New Zoning Code version of the proposed ordinance will be equivalent to those of the Chapter 1 version of the proposed ordinance, with the following minor exceptions, in order to best align the CHIP Ordinance's proposed programs with the updated regulatory system of the New Zoning Code:

1. All CHIP Programs
 - a. **Definitions.** The proposed Chapter 1A version of the CHIP ordinance will have some different defined terms or slightly different definitions of some terms compared to the terms and definitions included in the proposed Chapter 1 version of the CHIP ordinance. In Chapter 1A, all definitions and defined terms are located in a codewide Glossary in Article 14, and these definitions apply whenever the

terms are used across the entirety of Chapter 1A. Some proposed definitions and defined terms from the proposed Chapter 1 version of the CHIP Ordinance will need to be modified to align with Chapter 1A structure and use of terminology, and existing Chapter 1A definitions will need to be modified to integrate the CHIP Ordinance.

- b. **Use of “Applicability” subsections and “Project Activities” paragraphs to determine when standards apply in lieu of adopting section-specific definitions.** The New Zoning Code can utilize new structural and organizational elements to let applicants know when a rule applies, rather than relying on definitions to establish applicability of rules and policies. Instead of referring readers to a definitions section of the code, Chapter 1A uses the Applicability subsection of each code section to explain the nuances when certain standards apply. As such, certain terms such as “housing development project” that are used and defined in Section 12.03, the Definitions Section of Chapter 1 may not be used and defined in the Chapter 1A version of the proposed ordinance. The applicability subsections in the Chapter 1A version of the proposed ordinance will also rely on standardized project activities (e.g. New Construction, Major Remodel, Demolition, Renovation) to clearly identify what scopes of work trigger required compliance for each section. All new definitions will be consistent in meaning with state law.
- c. **General text and terminology changes to align with Chapter 1A terminology.** Some terminology will be modified throughout the proposed 1A version of the CHIP Ordinance in order to align with the standardized and defined terminology used throughout Chapter 1A. These modifications could result in differences in interpretation, meaning, and application; however, any terminology replacements will reflect the intent of the proposed Chapter 1 version of the ordinance as closely as possible. For example, the term “abutting” is used in Chapter 1A in lieu of “contiguous”, and the term “dwelling unit” is used in Chapter 1A in lieu of “residential unit”.
- d. **Eligibility and Map-based Identification.** Many programs and standards in Chapter 1A are triggered by code-enabled Zoning Code Maps, including the previously approved Local Affordable Housing Incentive Program. Chapter 1A utilizes mapping to identify eligibility for programs, alternative typologies, affordability sets, public benefit programs, etc., and eligibility for a program or applicability of a rule may be expressed through eligibility language or mapping, or a combination of the two. In order to best align with the way that incentive programs and geographically-based standards are handled within the New Zoning Code system, CHIP Ordinance programs may utilize Zoning Code Maps to identify eligibility for geographically based incentives in the proposed Chapter 1A version of the ordinance. These maps will work together with other eligibility criteria listed in the rules of each incentive program in order to fully capture the applicability and eligibility of each program and incentive. Consistent with the Chapter 1 Ordinance, the Director will have the authority to issue revised mapping.
- e. **Overall Restructuring of Article 9.** In order to best support the introduction of the three major housing incentive programs in the CHIP ordinance, the proposed

Chapter 1A version of the ordinance will propose a broader restructuring of Article 9 (Public Benefits Systems), which contains all of the incentive programs in Chapter 1A. Some of the proposed restructuring will result in moving and renumbering program sections that are not directly influenced by the new programs and policies proposed to be introduced by the CHIP Ordinance and that are not modified or moved in the proposed Chapter 1 version of the CHIP Ordinance. The overall restructuring and reorganization of Article 9 in the proposed Chapter 1A version of the CHIP Ordinance will help create clarity about the relationship between the new programs introduced by the proposed CHIP ordinance as well as their relationship to the other incentive programs that already existed in Chapter 1A.

- f. **Base Incentives shown as Alternate Typologies.** Alternate Typologies are a new zoning tool in Chapter 1A that allows for certain specific types of developments or specific and specialized uses to receive a bundle of alternate standards for eligible projects in lieu of what would otherwise be required by the applied Zoning Districts on a lot. Given the special challenges of incorporating the new incentive programs into Chapter 1A, alternative topologies may be developed to contain the regulatory framework for development standards like FAR, height, setbacks, etc.
- g. **Adjustment of additional incentives menu.** The menu of additional incentives in all of the programs in the CHIP Ordinance will be simplified and modified for the proposed Chapter 1A version of the ordinance relative to the menu of incentives in the proposed Chapter 1 version of the ordinance. New Zoning Code has updated many zoning rules and has introduced new Form Districts with new baseline requirements for standards such as height, setbacks, and amenity space as well as new Frontage Districts that address requirements such as pedestrian and automobile access, building width, and transparency in a more context-specific way through base zoning. Given this updated and expanded base zoning framework, many of the incentives in the additional menu of incentives in the proposed Chapter 1 version of the CHIP ordinance may be redundant to standards already addressed by the base zoning in Chapter 1A, and thus will not be included in the menu of additional incentives in the proposed Chapter 1A version of the ordinance. Other incentives on the menu of additional incentives will instead be addressed in the proposed Chapter 1A version of the ordinance through a more generalized allowance for projects to request adjustment requests through a by-right process in lieu of the Director Determination process typically required for adjustments of those standards under the New Code.
- h. **Public Benefits.** The affordable housing incentive programs previously approved under Chapter 1A, including programs needed to implement the community facilities program of the Downtown Community Plan, included the ability to facilitate special incentives or second-tier bonuses for a wide variety of non-residential public benefits, such as full service grocery stores, schools and libraries, and health centers. The proposed CHIP Ordinance also includes the option for projects to receive additional or second tier incentives for other public benefits, including

multi-bedroom units, childcare facilities, the preservation of historic resources, etc. The CHIP Public Benefits will be incorporated into this existing framework and will therefore these benefits may be enabled in the future for other work programs. The integration of the public benefits options and incentives adopted under previous programs and the new public benefits and incentives proposed to be introduced through the CHIP ordinance may require some modification and recalibration of the public benefits incentives in the Chapter 1A version of the CHIP ordinance.

- i. **Environmental Consideration Area.** The proposed Chapter 1 version of the CHIP Ordinance programs requires that projects within a Environmental Consideration Area as defined in the State Density Bonus Program, including areas near hazardous waste sites, toxic materials sites, and hazardous uses such as oil wells, conduct an Environmental Site Assessment in order to participate in the incentive programs. Chapter 1A has established a new set of standardized Environmental Protection Measures for all projects citywide, including hazardous materials standards that require the preparation of Environmental Site Assessments. As these hazardous materials Environmental Protection Measures will already be applicable to all projects in Chapter 1A, language and eligibility associated with the Environmental Consideration Areas will be removed from the proposed Chapter 1A version of the CHIP Ordinance. Note that as discussed earlier in this report, the Environmental Protection Measures associated with mitigating the impacts of hazardous materials are proposed to be revised as part of this work program to require an Environmental Site Assessment within 1,000 feet of active oil wells.
 - j. **Incorporating State Incentives.** Due to the fact that the State Density Bonus Program functions as the City's primary mechanism for implementing the fundamental components of State Density Bonus Law (California Government Code Sections 65915-65918) and that the One Hundred Percent Affordable Housing Project type in the AHIP program codifies additional state incentives, the policy aspects of the proposed Chapter 1A version of the State Density Bonus program and One Hundred Percent Affordable Housing Project type contained in Article 9 will remain consistent with those contained in the proposed Chapter 1 version of CHIP.
2. **Mixed Income Incentive Program**
 - a. **Bonus FAR located in Form Districts.** One of the principal changes to the zoning system introduced by the New Zoning Code is that the maximum bonus FAR on a lot is always shown in the zone of a lot. Building scale is regulated in Chapter 1A through Form Districts, which show both a base FAR and base height for projects not participating in any kind of incentive program, and a maximum bonus FAR and bonus height for projects participating in local incentive programs. In order to align with the zoning system, the proposed Chapter 1A version of the MIIP will not offer FAR as a base incentive, but will instead point to the Form District of a lot for the Bonus FAR that will be granted to projects.

- b. **Performance Standards.** The proposed Chapter 1 version of the Mixed Income Incentive Program includes some required performance standards for projects participating in the incentive program. These performance standards, such as street-facing entrances and parking setbacks, are already regulated by the Frontage Districts of the base zoning of every lot in Chapter 1A, so the proposed Chapter 1A version of the Mixed Income Incentive Program will not include these performance standards. Additionally, in lieu of requiring the Common Outdoor Open Space typologies as a performance standard within the Mixed Income Incentive Program, the proposed Chapter 1A version of the CHIP Ordinance will introduce equivalent typologies as “lot amenity space alternatives” available when indicated by a Form District in the base zoning of Chapter 1A. This approach would make the Common Outdoor Open Space typologies an optional alternative way to meet otherwise required lot amenity space requirements for projects more generally, whether or not they are participating in the Mixed Income Incentive Program.
 - c. **Incorporation of select incentive sets from the Local Affordable Housing Incentive Program previously approved in Chapter 1A.** The proposed Chapter 1A version of the Mixed Income Incentive Program may require revisions to incentive sets used by the previously adopted plans to accommodate the incorporation of the proposed incentives of the Mixed Income Incentive Program.
 - d. **Table of optional reduced incentives.** In the proposed Chapter 1 version of the projects that are eligible for an incentive area may opt in to receiving the reduced incentives of a lower incentive area by providing the lower affordability levels required for the lower incentive set. The proposed Chapter 1A will carry forward this flexibility of incentives, but may show them through a table of optional reduced incentives. This change in structure may result in slight differences in the final reduced FARs and heights that a project receives, but policy intent of facilitating flexibility for choosing lower incentives is consistent with that of the proposed Chapter 1 version of the Mixed Income Program.
3. Affordable Housing Incentive Program
 - a. **No special incentives for Parking (P) Zones.** The proposed Chapter 1 version of the AHIP program establishes special allowances for affordable housing projects on Parking (P) Zones, allowing projects in these zones to use the least restrictive use and development allowances of any adjoining lots. As Parking Zones no longer exist under the Chapter 1A zoning system the proposed Chapter 1A version of the AHIP program will not carry forward any of these special rules for projects on Parking Zones.

Resident Protections Ordinance (RPO)

Proposed Ordinance Summary

The Resident Protections Ordinance (RPO) is an important component of the Program. It is intended to provide additional safeguards from displacement for existing tenants, clarify relocation

requirements, and preserve naturally occurring affordable housing at the same time that rezoning strategies are expanding housing options through new construction. This proposed ordinance builds upon a temporary state law called the Housing Crisis Act (HCA or SB 330), which expires in January 2030, and other existing local policies to provide a comprehensive citywide update to rules that apply to new development projects.

The proposed ordinance introduces two new code sections (16.60 and 16.61) in Article 6.1 Review of Development Projects of Chapter 1 of the Los Angeles Municipal Code (LAMC), and would entail amendments to Article 4 Development Standards of Chapter 1A of LAMC. These new code sections establish distinct requirements for two categories of development projects; those involving the demolition of housing units and those that include restricted affordable housing units, primarily units produced through land use incentives and/or replacement requirements. The proposed ordinance also revises multiple code sections pertaining to existing affordable housing incentive programs, aiming to align them with the proposed requirements regarding the duration of affordability covenants and replacement requirements.

The Ordinance would require that “protected units” demolished by new development projects be replaced at the same size and at an affordable cost, and that housing development projects result in a no net loss of housing units. Protected units refer to housing units that are subject to specific requirements due to their affordability or tenancy by low-income households, including those subject to rent control, affordability requirements and those occupied by low-income tenants.

Additionally, the Resident Protections Ordinance would strengthen tenant protections for individuals facing evictions due to the construction of new housing. The state law guarantees the right to remain up to 6 months prior to start of construction, the right to relocation assistance, the right to return if construction does not proceed, and the right of first refusal for a unit in the new housing development. The proposed ordinance also provides a local formula for state required relocation assistance, establishes a private right of action to aggrieved tenants and creates a process for tracking and punishing harassment. It also ensures tenants are better informed of their rights via a regulated tenant notification process.

Additionally, the ordinance extends covenant terms for new restricted affordable housing units from 55 years to 99 years (with some exceptions). The ordinance would also ensure the quality and equitable distribution of affordable units in mixed-income developments and establish marketing requirements and priority preferences for the leasing of affordable housing units.

Key Provisions

Housing Development Projects that Result in Housing Unit Demolitions

The ordinance would prevent the City from approving housing development projects that result in the demolition of protected units without replacing those units. Protected units that have been vacated and demolished within the past five years must be replaced. Housing development projects must meet replacement requirements, have a no net loss of dwelling units, and ensure occupant protections are provided to tenants.

Replacement of Existing or Demolished Protected Units

Housing development projects must replace all existing occupied and vacant protected units, as well as protected units that have been demolished since January 1, 2020, pursuant to Cal. Gov. Code Section 66300.6(b). New developments must include at least as many units, at an “equivalent size” and “affordable cost” as existed on the site within the previous 5 years. In state law (the Housing Crisis Act) “equivalent size” means the same total number of bedrooms; However, the proposed ordinance would require a “comparable unit” be provided when a tenant is exercising their right to return, expanding the requirement to include bathrooms. This would better ensure that replacement units for tenants can function similarly to those being demolished.

Existing units are replaced in the new development at an “affordable cost” that varies depending on several variables. When units are occupied and the tenant’s income is known, they must be replaced with units at an affordable rent for the households in occupancy, based on their income category. The proposed ordinance specifies that these income categories include Acutely Low Income (ALI), Extremely Low Income (ELI), Very Low and Low Income. This is a shift from the City’s current replacement policy which does not include ALI and only includes ELI when a building has existing ELI tenants who provide proof of income to the Los Angeles Housing Department (LAHD).

When incomes of the occupant(s) are not known, including for vacated or demolished units, the affordability requirements for replacement units default to be proportionate with the overall share of citywide renters in various income categories based on defined census data in the Housing and Urban Development Community Housing Affordability Strategy (CHAS) database. Units allocated for moderate and higher income renters would default to low income. The most recent data (September 5, 2023) indicates that there are 31% ELI, 18% VLI, 20% LI and 31% moderate income and above tenants in the City of Los Angeles. In this replacement scenario, 31% of the units (representing the renting population assumed to be above lower income) would be replaced as LI units, for a breakdown of 31% ELI, 18% VLI and 51% LI units. However, to prioritize deeper affordability levels in lower resource communities and further fair housing goals, the ordinance proposes using a different replacement formula that will ensure ELI remains the largest share in areas more likely to have existing ELI renters. The alternative method would forgo using the CHAS allocation for moderate income and above, and would only consider replacement units within the band of lower income residents, where ELI is by far the largest contingent. In this scenario, using the most recent data, the proportion would be 45% ELI, 26% VLI, and 29% LI. As new CHAS data becomes available, these proportions will change to reflect demographics.

Additional provisions apply for RSO units, including that they would always be replaced with lower income units, even if occupants are (or are presumed to be) above lower income. State law permits cities this 1:1 option for the replacement of rent controlled units. Currently, the City implements the other option of replacing RSO units pursuant to the housing replacement provisions of the RSO (LAMC 151.28). The City intends to continue to enforce these existing RSO provisions if it adopts a 1:1 replacement policy, as proposed.

Replacement requirements will not apply to development projects consisting of a single residential unit on a site with a single protected unit or development projects that have had an off-site replacement plan approved by the LAHD.

The ordinance also clarifies and affirms the current LAHD practice regarding the distribution of bedrooms and units in replacement units. Replacement units must contain at least the same total number of units and total aggregate number of bedrooms as the Protected Units being replaced as restricted affordable, but are not required to match on a unit-by-unit basis. For example, one three bedroom unit could be replaced with (1) a three bedroom unit, (2) a one bedroom and a two bedroom unit, or (3) three one bedroom units. This is affirmed by recent advice provided by the California Department of Housing and Community Development (HCD) in a technical assistance letter to the City of Westminster dated August 7, 2023.

The Department has received significant feedback on this issue, urging a higher replacement ratio and that replacement units not count towards other affordability requirements. These issues are discussed further in the Key Issues section of the report.

Occupant Protections

The Housing Crisis Act establishes a baseline for occupant protections, guaranteeing the right to remain up to 6 months prior to start of construction, the right to relocation assistance, the right to return if construction does not proceed, and the right of first refusal for a unit in the new housing development. The proposed ordinance introduces several significant enhancements beyond the provisions of the Housing Crisis Act, including providing a significantly increased local formula for state required relocation assistance for lower income displaced tenants as well as better regulating comparable unit size and ensuring no rent increases for tenants exercising the right to return. The ordinance also provides important legal safeguards from harassment or illegal action by establishing a private right of action to aggrieved tenants and creating a process for tracking and punishing chronic bad-actors. It also ensures tenants are better informed of their rights, particularly the right to return, via a regulated tenant notification process. These changes, described below, all relate directly to feedback heard through the outreach process.

Right to Relocation

On January 1, 2024, a new State law, Assembly Bill 1218, changed how relocation benefits are determined for lower income households displaced by development projects. Specifically, the law requires that every lower-income occupant displaced from their residence by a development project shall receive relocation benefits that are “equivalent to the relocation benefits required to be paid by public entities pursuant to (the California Relocation Assistance Law)” (California Government Code 66300.6(b)(4)(A)).

The California Relocation Assistance law is normally used when state agencies develop publicly-funded projects. The law seeks to ensure that the displaced tenants can secure comparable, “safe, decent, and sanitary, and affordable housing in their communities.” The law requires developers to pay both relocation expenses and the reasonable moving expenses to the displaced tenant. If the displaced tenant is able to secure a comparable and affordable

replacement housing unit, the developer need only pay reasonable moving costs or the local relocation amount (in the City of Los Angeles, that is the relocation amounts required under the Rent Stabilization Ordinance, or the Just Cause Ordinance), whichever is greater. If a comparable and affordable unit is not available, which is almost always the case because market rents are unaffordable to lower income households, the developer is required to pay the difference between the rent of available housing (market rent) and the household's previous rent, or an affordable rent, whichever is greater, for 42 months.

Under the California Relocation Assistance Law, the process for determining the relocation amounts can be expensive and time consuming. As part of the process, LAHD requires developers to retain a relocation consultant. The relocation consultant works with each displaced tenant to explain both the process of displacement and their rights, including the right to relocation benefits and moving costs. The relocation consultant prepares a relocation plan which includes a description of the development project, an assessment of the relocation needs of the current occupants, a description of the relocation resources available, and a comprehensive description of the relocation program, and other requirements. Many relocation plans can be over fifty pages long. As occupants apply for relocation benefits, the consultant verifies each applicant's eligibility, including reviewing over a dozen documents that the tenant is required to provide. The complexity of the California Relocation Assistance Law process means that neither the developer nor the occupant knows the amount of the relocation benefit until after the displaced person has secured new housing, which could take months.

Instead of this resource intensive process, the Resident Protection Ordinance proposes a formula that is simpler, quicker, more efficient, more transparent, and with more predictable outcomes based on the displaced household's income. Specifically, a lower income households displaced by a development project would have the ability to receive a relocation benefit calculated according to the following formula:

The difference between the Section 8 Department Voucher Payment Standard for a two-bedroom unit and the rent affordable for a two-bedroom unit based upon that occupant's income level per Section 50053 of the California Health and Safety Code, multiplied by 42 months, plus estimated incidental moving costs.

The formula determines relocation benefits in a way that is consistent with the California Relocation Assistance Law. The Section 8 Department Voucher Payment Standard is a reasonable estimate for the City of Los Angeles' market rent and thus a good approximation of what the displaced household will be required to pay in their replacement unit. Similarly, Section 50053 of the California Health and Safety Code sets affordable rents for various lower income levels. This is what tenants at various income levels (Extremely Low, Low Income, Very Low income, and Low Income) can afford to pay on rent. The formula uses the two-bedroom unit standard because according to the most recent American Community Survey from the U.S. Census Bureau, two bedroom units are the most common rental unit size in the City of Los Angeles. The difference between the two numbers is multiplied by 42 months because that is the same as what is required under the California Relocation Assistance law. Similarly, the California

Relocation Assistance law requires reimbursement for incidental moving costs and so the proposed relocation benefit formula also includes reimbursement for incidental moving costs. The City shall use the same methodology for determining moving costs as it currently uses to determine relocation benefits under the Rent Stabilization Ordinance. The specific dollar amounts for each part of the formula shall be determined at the time of the adoption of this ordinance, and then adjusted annually according to the Consumer Price Index – All Urban Consumers.

The formula yields similar relocation benefit amounts to those generated by the federal Uniform Relocation Assistance Law process, which is similar to California Relocation Assistance law and required by any project receiving federal funds. For example, in April 2024, the City approved relocation benefits for a publicly-financed residential housing project in the City of Los Angeles. The relocation benefits were governed by the Uniform Relocation Assistance Law process. The occupants of each of the building's ten units were paid an average of \$104,365 per unit. The relocation benefits ranged from a low of \$88,190 to a high of \$131,986. Two bedroom units averaged \$104,554 per unit while one bedroom units averaged \$104,318. The two highest relocation amounts (\$131,986 and \$130,620) and the two lowest relocation amounts (\$88,090 and \$89,152) both were for one bedroom units. If the proposed formula were used to determine the relocation payments, occupants that were Extremely Low-Income would have receive \$108,393, including incidental moving costs; occupants that were Very-Low Income would receive \$90,837, including incidental moving costs, and occupants that were Low-Income would receive \$82,101, including incidental moving costs.

While the formula yields similar outcomes, although slightly lower than the actual relocation benefit amounts in the April 2024 example, the process for determining the outcomes is faster, less expensive, more efficient, and more transparent: As soon as the occupants' income is known, the formula can determine the relocation amount without time-consuming and expensive plans, consultations, documentation, and more. Developers and displaced people will have more certainty about the relocation benefit amounts and they can be paid more promptly. In addition, the formula is cheaper to implement. To fully implement the relocation formula, LAHD would require only one additional staff member. In contrast, under the Uniform Relocation Assistance Law process, not only would the developer be required to hire a relocation consultant, to monitor and validate the process for all development projects that displace lower income occupants, LAHD would need to add five (5) additional staff members to support its relocation benefits team.

Under these AB 1218-mandated relocation benefits, an owner who is removing occupants will have to provide notice of whether they are removing occupants for the intent of developing the building. Those who state that they intend to develop the building will pay the higher amounts mandated by AB 1218. To deter owners from illegally evading the required relocation benefits, owners who are found to have done so shall face the following consequences: (1) the displaced tenant shall be entitled to pursue full relocation benefits, and shall have a private right of action to pursue payment of those relocation benefits, described in detail below; (2) as a condition of getting City approval of any development application at the property, the owner would pay a fine of at least \$250,000 per unit; and (3) for five years after the date on which the owner misrepresented

their intent to develop the property, the owner would be prohibited from getting a demolition permit, and that prohibition would run with the land to a new owner.

As a result of implementing this new State law requirement, the City will help ensure that people displaced by development are provided with sufficient benefits to avoid many of the negative impacts of displacement including separation from jobs, schools, healthcare providers, family, and other support networks, and for too many, homelessness. A consistent point of stakeholder feedback has been the need to increase relocation benefits to better mitigate these negative impacts of development. Enhanced relocation assistance is key to ensuring that residents can afford a new apartment, whether in their same neighborhood or another neighborhood, and offset the cost of losing their prior rent controlled unit. With the implementation of this proposed formula, the City would achieve that goal.

Right to Remain

The right to remain would allow existing occupants to continue to occupy their units up until six months prior to the start of construction activity. A written notice of the planned demolition, the date they must vacate, and their rights must be provided to existing occupants by the developer at least six months prior to the date they must vacate.

Right to Return

The right to return is granted to any occupants of any protected units who are persons and families of lower income and evicted due to new construction. These occupants shall be provided a right of first refusal for a comparable and an affordable unit in the new housing development. See “Comparable Unit” section below for more detail.

The proposed ordinance exceeds state law by better defining a comparable unit in the new building, and by guaranteeing a tenant can return at their prior rental rate, if the previous rental rate is lower than the restricted rent. This policy direction also aligns with the recently revised Executive Directive 1 (ED 1), which gives tenants exercising their right to return the ability to return at their prior rental rate or a restricted affordable rent based on the household’s income, whichever is lower.

Right to Return if the Demolition Does Not Proceed

With the right to return if the demolition does not proceed, prior occupants will be allowed to return at their prior rental rate if the demolition does not proceed and the property is returned to the rental market. The proposed ordinance also adds language to clarify the relationship to similar rental provisions in the RSO (LAMC 151.27). The ordinance also introduces the right to a comparable unit in this scenario, going beyond state law.

Comparable Unit

For the purposes of both right to returns described above, the ordinance establishes a new definition of “comparable unit.” The definition would contain the same number of both bedrooms *and* bathrooms as the demolished unit. This expands upon today’s bedroom only policy. The Department has received feedback on this issue, suggesting that replacement units should match

demolished units in square footage. This is discussed further in the Key Issues section of the report.

Tenant Notifications

Tenants need to be properly notified of their ability to return and given the necessary information to plan and make important life decisions related to moving. The proposed ordinance has been amended to include a new Tenant Notifications section (LAMC 16.60 A.3(b)(5)) which is based upon recently adopted provisions in the South Los Angeles Community Plan Implementation Overlay (South LA CPIO). In addition to being notified of all of their rights, the proposed amendment requires that developers notify tenants of major milestones when exercising their right to return. Notifications will be required on a biannual basis throughout the construction process and 180, 90, 30 and 15 days prior to the anticipated issuance of a project's Certificate of Occupancy.

Private Right of Action

A crucial component of the proposed RPO is the ability of occupants to enforce their rights under the ordinance and remedy any violation through a private right of action. This is because most of the rights afforded tenants are implemented by the housing developer. A private right of action refers to the legal right of an individual or entity to file a lawsuit in court to enforce a particular law or statute, rather than relying on government officials or public prosecutors to bring charges.

The inclusion of private right of action language would not be unique to the Resident Protections Ordinance. The City's current Density Bonus Ordinance and Tenant Anti-Harassment Ordinance (TAHO) previously established private right of action provisions. The South LA CPIO also includes private right of action provisions, which was used as a model for development of the language included in Section 16.60 of the proposed ordinance, which covers the occupant protections described above. Specifically, the proposed 16.60 language establishes that tenants may be awarded reasonable attorney's fees and costs, compensatory or punitive damages, and civil penalties per violation of their provisions related to tenant relocation or relief. Penalties are increased in cases of willful violations and when tenants are 65 years of age or older.

A separate private right of action is included in Section 16.61 for potential class action lawsuits regarding the affirmative marketing and fair housing outreach required for the lease or sale of affordable units.

Anti-Harassment

The ordinance introduces anti-harassment provisions to disincentivize unscrupulous developers from unlawfully harassing tenants in order to avoid paying the costs of lawfully evicting and relocating tenants. These provisions would impose negative consequences on developers that have been found by a California court or the City of Los Angeles to have a recent history of unlawful harassment of tenants in the City of Los Angeles. Developers with this history would have their right to a demolition permit at their property suspended for five years.

These provisions would not create any additional steps in or hurdles to the development process; nothing new is required of developers. Rather, this provision would only impact the small minority of developers that have been proven to have illegally harassed tenants in the City of Los Angeles. Developers who do not have a court or City-documented history of harassment would be unaffected by this provision.

To do this, the provision would incorporate into the Resident Protections Ordinance a strategy that the Council endorsed in 2024 when it adopted the amendments to the South LA Community Planning Implementation Overlay ordinance. The specific strategy requires LAHD to establish an “Anti-Harassment Violators Database” for owners with a recent documented history of harassing tenants. Owners on that list would be suspended from obtaining a demolition permit in the City of Los Angeles for five years. LAHD places a beneficial owner into the Database when:

- 1) A court has issued a final judgment against the beneficial owner within the last five years for unlawful tenant harassment or for wrongfully or illegally evicting a tenant in the City; or
- 2) The City has issued three final citations for TAHO violations against the beneficial owner within the last ten years; or the City has issued one final citation for TAHO violations against the beneficial owner within the last five years in a zone that the City has determined to be at a heightened risk of displacement of lower income tenants.

The Database applies to “beneficial owners” to ensure that all owners that benefit from illegal harassment bear the consequences of the illegal harassment. If an owner financially benefits from a project, the owner should not be able to evade responsibility by hiding behind an LLC or similar structure where all owners are not disclosed.

Before being placed into the Database, LAHD notifies the beneficial owner in writing, and notifies them of their rights to appeal. If LAHD’s determination survives appeal, the beneficial owner is placed into the Database for five years (from the conclusion of the most recent court or City finding of harassment). If, during the five year period, the beneficial owner gets an additional citation or court finding, the period extends to five years after the conclusion of the most recent finding.

When any owner placed into the database applies for a demolition permit, the demolition permit will be denied. If the owner has an approved demolition permit, that approval will be withdrawn. This consequence shall be in place for a period of five years after the most recent documented harassment. The consequence shall not apply where demolition is necessary to comply with a Department of Building and Safety, LAHD, or other government order. Where the owner sells to a new owner during the five year period, the consequence shall run with the sale of the land to the new owner. However, it would not pass to the new owner if the new owner is developing a publicly-funded affordable housing project on the site, with at least 50% of the units affordable.

At the end of the five-year hold period, if no new citations have been issued to and no new court findings have been made against the owner, the owner shall be removed from the LAHD Anti-Harassment Violators database.

Effectuating this policy would require LAHD to dedicate significant resources to build out the Anti-Harassment Violators database as a citywide tool, including both sufficient staffing and time. These needs lead LAHD to believe that the Department would need twelve months from the adoption of the proposed ordinance to obtain the appropriate staffing and develop the system.

Non Housing Development Projects that Result in Housing Unit Demolitions

Any non-housing development project that will require the demolition of occupied or vacant protected units, or is located on a site where protected units were demolished on or after January 1, 2020 must also meet replacement requirements and provide the same existing occupant protections proposed for housing development projects, including payment of relocation assistance. The proposed ordinance would allow these requirements to sunset in 2030 for most non-housing development projects. These requirements would still apply to non-housing development projects on Housing Element Sites (as defined in LAMC 16.70 B), so long as required by state law. Sunsetting these requirements for all other sites is recommended given some of the difficulties being seen already. Evidence of sites being occupied by tenants in the past have prevented child care facilities from opening and other businesses from expanding, as most commercial operations are small-scale and ill-equipped to handle the costs and complexities of providing an affordable housing unit on the site.

In line with state law, replacement units associated with non-residential projects would be permitted to be located off-site from the development if they are developed prior or concurrently to the non-housing development project and located within the City of Los Angeles. In this scenario, a Certificate of Occupancy or Temporary Certificate of Occupancy for the off-site replacement units would need to be obtained before a Certificate of Occupancy or Temporary Certificate of Occupancy for the nonresidential development is obtained. Rather than being constructed by one developer, the project proponent may contract with another entity to develop the replacement units. Also, a commercial developer seeking a commercial density bonus may propose providing restricted affordable units through an agreement with a housing developer for partnered housing. Replacement housing may be established through creation of an Accessory Dwelling Unit with the primary non-residential use on the parcel being used in place of a primary residence.

No Net Loss of Dwelling Units

Development projects that require the demolition of residential dwelling units must construct at least as many residential dwelling units, as will be demolished. In making this determination, the housing development project shall count the greatest number of residential dwellings that existed on the project site within the last five years.

The proposed ordinance permits off-site replacement to be approved by the LAHD within limited circumstances, to account for potential difficulties posed by certain project sites. This could

include when physical changes to unit type do not allow all replacement units to be located on the same site or when the on-site construction of new affordable housing units would not meet the City's required Accessible Housing Program standards. In all of these scenarios, off-site replacement housing units will need to be equivalent or larger in size and amenities. This requirement is expanded to include the same number of bathrooms when a tenant is exercising the right to return, which is described in greater detail below. In addition, off-site replacement units would need to reflect the same affordability levels and covenant lengths as those of on-site replacement units. Off-site replacement units will need to be constructed within a three mile radius of the on-site project site.

While this No Net Loss provision is carried over from the HCA, extending this policy beyond its state law sunset date in 2030 would help ensure that no existing housing stock is lost as new developments are built throughout the City. For example, under a No Net Loss policy, a fourplex could not be demolished to build a duplex, irrespective of Protected Unit status. A citywide No Net Loss policy provides consistency and predictability for developers.

Restricted Affordable Housing Units

The second part of the Resident Protections Ordinance codifies and expands a number of requirements to make enhancements to state law regarding the occupants of restricted affordable units, whether in mixed-income or one hundred percent affordable developments. The proposed ordinance ensures affordable housing units meet fair housing laws and are equitable in terms of size, amenities, location and other factors compared to market rate units in the building, ensures longer-term affordability through extending most covenant lengths to 99 years and establishes criteria for the allocation of affordable units

Covenant Length for Restricted Affordable Units

The ordinance would extend covenant terms for restricted affordable units within housing development projects from 55 to 99 years. This lengthening of affordability covenants will significantly increase the number of deed restricted affordable units in the future and protect future tenants from potential eviction at year 55. This policy change has been requested by decision makers as a part of recent planning efforts. Covenants for restricted affordable units are prepared by the Los Angeles Housing Department, recorded with the County, and guarantee that the occupancy restriction establishing affordability will be observed throughout the entirety of the covenant term from the issuance of the Certificate of Occupancy. Limited exceptions for this extended 99 year covenant term include for-sale projects as well as when public subsidies require their own affordability covenant term length. This addresses concerns from affordable housing developers and LAHD about covenant lengths interfering with the creation of subsidized affordable housing, where the 55 year length is seen as important to obtaining financing and covenant terms are often extended already, if feasible, due to the mission-minded focus of non-profit and other affordable housing developers.

Size, Location, and Amenities of Restricted Affordable Units in Housing Development Projects

The proposed ordinance would establish the authority of the City to create and enforce fair housing requirements for affordable housing units, regarding the unit mix, unit size, quality and

amenities, access to and distribution of affordable housing units (See LAMC 16.61 B). These requirements are particularly needed in mixed income housing development projects where there is a risk of creating fair housing issues between affordable and market rate units if the affordable units are smaller, unequally distributed or don't have access to the same amenities.

A similar set of fair housing requirements exists today in the Affordable Housing Incentive Guidelines. The Guidelines are primarily informational for density bonus projects. They provide descriptions, explanations and examples of how the density bonus law works. The Guidelines were adopted by the Planning Commission in 1995 and updated in September 2004, and June 2005. The revised Guidelines proposed for adoption herein have been revised to reflect the new state law and to include the updated fair housing requirements. However, because these Guidelines are set to sunset upon adoption of the CHIP, and a new User Guide document is in development (see below) the amendments are not considered to be comprehensive.

Because of sequencing issues, these requirements would be codified (through a Resolution of the CPC (Exhibit B.1)) in two separate documents, the proposed Fair Housing Requirements for Affordable Housing (Exhibit B.2) and by amending the current Affordable Housing Incentive Guidelines (Exhibit B.3), which is set to expire upon adoption of the CHIP Ordinance. While the current Affordable Housing Incentive Guidelines regulate many of the same topic areas, the new Fair Housing Requirements will update and expand them based on lessons learned and best practices. Once adopted, the Resident Protections Ordinance would give the City Planning Commission the authority to amend the Fair Housing Requirements for Affordable Housing moving forward. Because the ordinance will not yet be adopted and in effect, the Commission will amend the existing Guidelines, replacing the Design Standards for Affordable Units (Section VII), and replace them with the Fair Housing Requirements for Affordable Housing (Section VI). Upon Council approval, the approved Fair Housing Requirements for Affordable Housing would become a stand-alone document.

While the Affordable Housing Incentive Guidelines are currently being applied to most mixed-income affordable housing projects in the City, there is some concern about the awareness of these rules, in addition to questions about their applicability across project types. The proposed ordinance would clarify applicability to all mixed-income projects and bring greater transparency by embedding the requirements for all in the LAMC.

Separately, the LAHD and Department of City Planning are creating a new informational and explanatory User Guide for Affordable Housing. This document is designed to help potential project applicants to understand the various incentive programs available to them. Because it is not regulatory, it will be created and revised as needed by department staff, and available following adoption of the CHIP ordinance.

Allocation of Restricted Affordable Units

The Ordinance also introduces a number of requirements related to the allocation of restricted affordable units, described below.

Affirmative Marketing and Fair Housing Outreach

Restricted affordable units for sale or lease would be subject to the affirmative marketing and outreach requirements established by LAHD.

Affordable and Accessible Housing Registry

Once available for rent, restricted affordable units shall be registered on the Affordable and Accessible Housing Registry managed by LAHD, or any existing equivalent listing, to the extent feasible. Unfortunately, this Registry is currently only built to list information on subsidized affordable housing units subject to accessibility requirements, and reserved for people with disabilities. Plans to add mixed-income developments to the Registry have unfortunately been pushed back due to unforeseen circumstances. However, the intention is to expand the Registry as soon as feasibly possible. This code amendment makes this intention clear and therefore supports those efforts.

Priority Populations

The Ordinance attempts to prioritize the allocation of restricted affordable units for those with the greatest housing need. These priority populations include those displaced pursuant to provisions in the Ellis Act and LAMC 151.22 to 151.28, lower income residents impacted by a rent increase related to a conversion to market-rate, and those displaced due to natural disasters and other code enforcement orders issued for uninhabitable units. These eligible low-income tenants would be given priority for placement in subsidized or covenanted affordable housing developments.

The ordinance acknowledges that this is a significant work program and unfortunately not ready to be implemented immediately. The Mayor's July 2024 revision to Executive Directive 1 (streamlining for affordable housing) has also directed that LAHD, with the assistance of the City Attorney, create a similar "Priority Occupancy Process" system to achieve the same purpose. Establishing a centralized system for leasing affordable housing units and implementing priority occupancy to meet these directives is a significant undertaking that is currently in process but will take several years to complete. It will also rely on the pending updates to the Registry mentioned above.

Summary of Changes and Revisions

A number of significant revisions were made to the Resident Protections Ordinance concurrent with the release of this staff report. The revisions were made in response to public comment from tenant advocacy groups (see Key Issues for more context). The major revisions are listed below, with the most significant being the expanded relocation assistance in number 4.

- 1) Expanding the definition of a "comparable unit" and applying it to an additional situation. The prior definition mirrored state law (Housing Crisis Act) and applied only to the right to return. It also only required the new units match the old with regards to the number of bedrooms. The definition has been expanded to require the same number of bathrooms and bedrooms. It will now also apply to the right to return when demolition does not occur, in addition to the regular right to return to the new building.

- 2) Clarifying the distribution of bedrooms and units in replacement units, to align with current practice by LAHD and technical assistance provided by the Department of Housing and Community Development (HCD) in a letter to the City of Westminster dated August 7, 2023. Replacement units must contain at least the same total number of units and total aggregate number of bedrooms as the Protected Units being replaced but are not required to match on a unit-by-unit basis, except in the event that a tenant is not exercising a right to return.
- 3) Adding Acutely Low Income as an income category that must be replaced when an existing or prior tenant's income is known to be Acutely Low Income. This helps ensure that the City will not lose the stock of housing units affordable for this important income category.
- 4) Significantly expand the right to relocation assistance for lower income residents to better align with state law and allow for a simpler option to obtain a higher level of relocation assistance than is currently available now. The formula would be based on the income category of the renter and the difference in monthly rent needed to rent an average comparable two bedroom apartment. This difference would be multiplied by 42 months, which is close to the average time it takes for a new apartment to be constructed. This is a critical change to help ensure displaced tenants are able to remain in their neighborhoods until they are able to take advantage of their right to return to the new development.
- 5) Providing for the ability of a tenant to exercise their right to return at their prior rental rate, if the previous rental rate is lower than the restricted rent. Subsequent rent increases would then be limited to those permitted by the Rent Stabilization Ordinance (RSO) and the covenant rents, whichever is more restrictive.
- 6) Expanding tenant notification requirements and procedures to better ensure tenants are adequately notified of their rights, including establishing a right to be notified throughout the life of the project and at important project milestones to ensure tenants can better estimate when they may be able to move into the new building, which is critical for life planning.
- 7) Establishing a new citywide Anti-Harassment Violators Database for LAHD to identify and penalize beneficial owners who are found to have committed unlawful tenant harassment or illegally evicted a tenant. If a beneficial owner receives three verified violations anywhere in the city over a ten year period, or one final citation for TAHO violations in a zone that the City has determined to be at heightened risk of displacement of lower income tenants in a five year period, it will result in the loss of ability to redevelop properties for five years.
- 8) Establishing a private right of action for tenants against developers who violate their rights pursuant the proposed ordinance.
- 9) Specifying a modified replacement policy when incomes are not known in lower resource communities, requiring replacement units to reflect the proportionate share of all lower income tenants, thereby prioritizing Extremely Low Income units.
- 10) Other minor technical changes that do not change policy or minor changes to better align with state law.

Relationship to New Zoning Code

The CPC's action on the Resident Protections Ordinance would include recommending a version of the proposed Ordinance that amends Chapter 1 of the LAMC and recommending that the City Council instruct that a parallel version of the ordinance be prepared that amends Chapter 1A of the LAMC, subject to changes to conform to its format and style and the incorporation of the minor policy differences described below. The amendments proposed in the Chapter 1A version of the Ordinance will be applicable anywhere in the city where the New Zoning Code applies.

As Chapter 1A is built around a new zoning system which has a different document and organizational structure which incorporates many additional changes to existing citywide policies, the Chapter 1A version of the ordinance will not look exactly the same as the Chapter 1 version of the ordinance; rather, it proposes amendments to the New Zoning Code system that align with the intent of the Chapter 1 version of the ordinance while maintaining the integrity and functionality of the New Zoning Code system and policies.

The proposed Resident Protections Ordinance would entail amendments to Article 4 (Development Standards) to incorporate a new set of requirements regarding Resident Protections, and Article 14 (General Rules and Definitions) to codify relevant definitions. It would also make amendments to various code sections in Chapter 1A to clarify replacement requirements and covenant lengths. All provisions of the proposed ordinance would be translated and carried into the new Zoning Code, subject to changes to conform to its format and style.

The policy outcomes in the New Zoning Code version of the proposed ordinance will be equivalent to those of the Chapter 1 version of the proposed ordinance, with the following minor exceptions, in order to align the program with the updated regulatory system of the New Zoning Code:

- a. **Definitions.** The proposed Chapter 1A version of the Resident Protections Ordinance will have some different defined terms or slightly different definitions of some terms compared to the terms and definitions included in the proposed Chapter 1 version of the Resident Protections Ordinance. In chapter 1A, all definitions and defined terms are located in a codewide Glossary in Article 14, and these definitions apply whenever the terms are used across the entirety of Chapter 1A. Some proposed definitions and defined terms from the proposed Chapter 1 version of the Resident Protections Ordinance will need to be modified to align with Chapter 1A structure and use of terminology, and existing Chapter 1A definitions will need to be modified to integrate the Resident Protections Ordinance.
- b. **General text and terminology changes to align with Chapter 1A terminology.** Some terminology will be modified throughout the proposed 1A version of the Resident Protections Ordinance in order to align with the standardized and defined terminology used throughout Chapter 1A. These modifications could result in differences in interpretation, meaning, and application; however, any terminology replacements will reflect the intent of the proposed Chapter 1 version of the ordinance as closely as possible. For example, the term "abutting" is used in Chapter 1A in lieu of "contiguous", and the term "dwelling unit" is used in Chapter 1A in lieu of "residential unit".

- c. **Use of “Applicability” subsections and “Project Activities” paragraphs to determine when standards apply in lieu of adopting section-specific definitions.** The New Zoning Code can utilize new structural and organizational elements to let applicants know when a rule applies rather than relying on definitions to establish applicability of rules and policies. Instead of referring readers to a definitions section of the code, Chapter 1A uses the Applicability subsection of each code section to explain the nuances when certain standards apply. As such, certain terms such as “housing development project” that are used and defined in Section 12.03, the Definitions Section of Chapter 1 will not be used and defined in the Chapter 1A version of the proposed ordinance. The applicability subsections in the Chapter 1A version of the proposed ordinance will also rely on standardized project activities (e.g. New Construction, Major Remodel, Demolition, Renovation) to clearly identify what scopes of work trigger required compliance for each section..
- d. **Use of “Measurement” subsections and embedded explanations, in lieu of providing section specific definitions.** Some terms included in the proposed ordinance will not be used or referenced outside of the new sections established by the Resident Protections Ordinance. For ease of use, certain terms, such as “Comparable Unit” and “Equivalent Size” may appear in the “Measurement” subsections of the proposed Resident Protections Code sections in Chapter 1A. Others will be explained within the ordinance text, as they appear.
- e. **Code sections referencing replacement requirements and covenant lengths.** The Chapter 1 version of the proposed ordinance amends replacement requirements and covenant lengths in a number of code sections, replacing old language with references to the standardized replacement requirements and covenant lengths in the new Resident Protection Ordinance. The equivalent code sections in Chapter 1A may be rearranged, consolidated, split, added, or removed due to the overall restructuring of regulations in the Chapter 1A system. Therefore, the Chapter 1A version of the proposed ordinance may edit different code sections than the Chapter 1 version of the proposed ordinance, and may include edits to replacement and covenant provisions in programs and code sections that do not exist in Chapter 1. Code section revisions resulting from the Resident Protections Ordinance might differ between those required for the Chapter 1 zoning code and those required for the Chapter 1A zoning code.

Housing Element Sites and Minimum Density (HESMD) Ordinance

Proposed Ordinance Summary

The proposed ordinance aims to fulfill state Housing Element law requirements for three types of housing element sites. These include sites identified in the Inventory of Adequate Sites for Housing, sites identified on prior Housing Element Site Inventories as well as Lower Income Rezoning Sites that will be identified to meet the City’s Regional Housing Needs Assessment (RHNA) allocation. The proposed ordinance applies different state law regulations to each of the three types of sites. This includes requirements on housing replacement, no net loss findings, by-right development review, and minimum density requirements.

Housing Element law imposes various requirements on sites identified in the City's Housing Element or Rezoning Program. First, housing replacement and no net loss policies must be enforced on sites identified to meet the City's RHNA allocation. These specific sites are listed in the Inventory of Adequate Sites for Housing.³ Additionally, Los Angeles is required to designate additional sites as Lower Income Rezoning Sites in order to satisfy the 2021 - 2029 Housing Element's RHNA allocation for lower-income households. These sites must have a minimum density of at least 20 dwelling units per acre (or 2,178 square foot per unit) and permit owner-occupied and rental multi-family uses for developments of at least 16 units. By-right development review is required for residential or mixed-use projects on Lower Income Rezoning Sites if at least 20 percent of the units are reserved for lower-income households. State Housing Element law also requires by-right development review for residential or mixed-use projects on sites listed in previous Housing Element Site Inventories that meet the same minimum 20 percent affordability requirement. Finally, the HESMD Ordinance will go beyond state Housing Element law requirements by establishing citywide minimum density standards on many sites zoned for multi-family residential development.

Key Provisions

Definitions of Housing Element Sites

Housing Element Sites

Housing Element Sites are defined to mean sites listed on the inventory of land suitable for residential development identified to meet the City's RHNA allocation. The sites have already been identified in Appendix 4.1, 4.2 and 4.3 of the current 2021-2029 Housing Element.

Prior Housing Element Sites

Prior Housing Element Sites are defined to those Housing Element Sites identified as meeting the criteria for a prior housing element site under state law. These include non vacant sites that were identified in the prior Housing Element and vacant sites that were identified in the prior two Housing Elements. The sites have already been identified in Column O of Appendix 4.1 of the current 2021-2029 Housing Element.

Lower Income Rezoning Sites

Lower Income Rezoning Sites are sites identified as part of a Rezoning Program to meet the shortfall of sites at the lower income levels needed to meet the RHNA allocation. The proposed ordinance specifies that an inventory of these sites shall be established by City Council Resolution, submitted to the state each year as part of the Housing Element Annual Progress Report and identified in a public mapping system including the City's Zoning Information Mapping and Access System (ZIMAS).

³ The Inventory of Adequate Sites for Housing can be found in Appendix 4.1 of the 2021-2029 Housing Element.

As described above (Program Requirements), sites identified as lower income sites must meet certain requirements in state law. In addition to state law criteria, the proposed list of Lower Income Rezoning Housing Element Sites will include sites across the city that meet state law requirements described above and are eligible for the proposed MIIP (part of the CHIP Ordinance). Additionally, the list will include sites being rezoned in the DTLA 2040 Community Plan Update. However, several types of sensitive sites where concerns about by-right development have been expressed and the following sites were removed from the Lower Income Rezoning Housing Element Sites inventory:

- Designated historic resources (local, state and national listings)
- Designated sites subject to the Rent Stabilization Ordinance (RSO) or protected Single Room Occupancy buildings in Lower Opportunity Areas
- Very large sites and smaller sites that can not accommodate 16 units per acre
- Sites with certain types of existing heavy manufacturing or potential toxic uses including:
 - Sites with existing dry cleaners, auto repair and gas stations
 - Sites with certain identified heavy manufacturing or other heavy industrial uses
 - Sites located in an Oil (O) District
- Sites located on or within a certain buffer of particularly toxic uses:
 - California Geologic Energy Management Division (50 ft)
 - State Water Resources Control Board Geotracker (500 ft)
 - DTSC EnviroStor or listed pursuant to Government Code Section 65962.5 (500 ft)
 - DTSC Hazardous Waste Tracking System (500 ft)
 - LAFD Certified Unified Program Agency (500 ft)
 - LA County Fire Department Health Hazardous Materials Division (500 ft)
 - Resource Conservation and Recovery Act (RCRA) Small Quantity Generator or Large Quantity Generator (refer to US EPA Envirofacts database) (500 ft)
- Sites recently rezoned from Industrial Uses in South and Southeast LA Community Plan Areas
- Transit Oriented Incentive Area (TOIA) sites receiving less and a 101% Density Bonus (i.e. less than state Density Bonus).
- Sites in the Coastal Zone
- Sites in Very High Fire Hazard Severity Zones
- Sites in areas vulnerable to Sea Level Rise

Provisions that Apply to the Housing Element Sites

Housing Replacement Requirements

All development projects on sites identified in the 2021-2029 Housing Element's Inventory of Adequate Sites for Housing will be required to replace all units, including existing protected units and any protected units demolished on or after January 1, 2020, pursuant to the replacement requirements outlined in CA Government Code Section 65915(c)(3). State law and the proposed ordinance differentiate between housing and non-housing development projects. The proposed ordinance would allow limited scenarios where the off-site replacement units may be approved,

particularly for non-residential projects. In addition, the housing replacement requirements outlined in the concurrently proposed Resident Protection Ordinance would also apply to these sites.

No Net Loss Findings

CA Government Code Section 65863 mandates that all cities ensure a continuous availability of sites for housing to meet the jurisdiction's unmet RHNA goals throughout the housing element planning period (currently the 2021-2029 period). Specifically, this refers to the Inventory of Adequate Sites for Housing referenced in the Chapter 4 of the Housing Element which identifies a specific number of units allocated to various income categories for each individual site.

To adhere to the legal requirement, often referred to as the "No Net Loss Law," jurisdictions are prohibited from making decisions related to zoning, land use, or development review that would result in fewer housing units than the capacity assumed in Chapter 4 of the 2021-2029 Housing Element. If such actions are taken, the City must provide written findings demonstrating that there are still sufficient adequate sites in the inventory to meet the RHNA requirements. Failure to do so will necessitate mandatory rezoning within six months. The proposed ordinance embeds these requirements into the LAMC.

By-Right Development Review

The proposed ordinance will codify state housing element law provisions requiring by-right development review for designated Lower Income Rezoning Sites as well as sites listed in the Prior Housing Element Site Inventories. Eligible projects that meet objective zoning standards will not be subject to discretionary review procedures, including public hearings and review under the California Environmental Quality Act (CEQA) if at least 20 percent of the units are set aside for lower-income households.

Minimum Densities

State Housing Element law requires that all projects with residential uses proposed on a Lower Income Rezoning Site meet a minimum density requirement of 20 units per acre, inclusive of Accessory Dwelling Units. A density of 20 units per acre is equivalent to 2,178 square feet of lot area per dwelling unit. This is comparable to the density allowed in the RD2 zone. As context, a 6,000 square foot lot with this designation would require the provision of two units, while a 7,000 square foot lot would require three units. These minimum density standards are proposed to be applied to Lower Income Rezoning Sites, but also more broadly to other types of multi-family zoned sites as described further below. This will help ensure that the City's limited supply of multi-family zoned parcels are redeveloped in a way that increases the supply of more affordable housing typologies.

Summary of Changes and Revisions

Most changes since the Public Hearing were in response to comments from the State's HCD and reflect clarifications of how the ordinance implements state law. For example, the term "residential development" was replaced with "Housing Development Project" as defined in CA Gov Code

Section 65589.5(h) to ensure consistency with state law. Certain changes were made to address technical adjustments, including refining definitions, accurately indicating the location of the Adequate Housing Element Sites list, and offering further clarification on eligibility criteria for minimum density sites.

A few larger changes were made prior to the Public Hearing. First, the updated draft specifies that Ministerial Approval for Prior Housing Element Sites and Lower Income Rezoning Sites will be conducted through an Expanded Administrative Review process if the project would have otherwise required a discretionary entitlement. This process will require an optional public hearing with no appeal, but projects will still be exempt from review under CEQA and subject only to objective development standards, pursuant to state law. The Expanded Administrative Review process is intended to strike a balance between the importance of ensuring Angelenos maintain a voice in the future of their community when certain project types are being proposed while also complying with state Housing Element law.

However, the most significant change was to the minimum density requirements. The original version applied the minimum density requirement (at least 20 units per acre or 2,178 square feet of lot area per dwelling unit) only to designated Lower Income Rezoning Sites as required in Gov. Code Section 65583.2(h). However, the updated draft expands the minimum density requirement to many additional sites in the City where multi-family residential uses are permitted. As currently proposed, a minimum density requirement of at least 2,000 square feet of lot area per dwelling unit will apply to nearly all sites in the R3, RAS3, R4, RAS4, R5, CR, C1, C1.5, C2, C4, C5, and CM Zones where at least a portion of a structure is erected and/or used for residential purposes. However, this requirement will not apply to sites located in environmentally sensitive areas or to specific types of projects outlined in the proposed ordinance.

This revision will help ensure that multi-family zoned sites are redeveloped at densities that support the inclusion of more affordable housing typologies. In Los Angeles, developers can build much larger single-family homes in multi-family zones than they can in single-family zones. Consequently, many lower-density multi-family zones (eg. RD Zones) in wealthier areas have been targeted by luxury single-family home developers. This has resulted in housing projects contrary to many goals of the 2021-2029 Housing Element, including the promotion of new multi-family housing in Higher Opportunity Areas. The Department has not seen the same trends or concerns in lower income areas of the City, where multi-family zoned sites are predominantly concentrated. As such, the revised minimum density provisions will only apply to RD1.5 and RD2 Zoned sites located in High or Medium High Residential Market Areas identified pursuant to LAMC Section 19.18 (Affordable Housing Linkage Fee).

Relationship to New Zoning Code

As recommended, the City Planning Commission's actions on the Housing Element Sites and Minimum Density Ordinance would include recommending both a version of the proposed Ordinance that amends Chapter 1 of the LAMC as well as a parallel version of the ordinance that would amend Chapter 1A of the LAMC, subject to changes to conform to its format and style and

the incorporation of the minor policy differences described below. As Chapter 1A is built around a new zoning system and document structure and organization and incorporates many additional changes to citywide policies, the Chapter 1A version of the ordinance will not look exactly the same as the Chapter 1 version of the ordinance; rather, it proposes amendments to the New Zoning Code system that align with the intent of the Chapter 1 version of the ordinance while maintaining the integrity and functionality of the New Zoning Code system and policies. The amendments proposed in the Chapter 1A version of the Ordinance will be applicable anywhere in the city where the New Zoning Code applies.

The proposed Housing Element Sites and Minimum Density Ordinance would be incorporated into the New Zoning Code through edits to Article 1 (Introductory Provisions) in order to establish maps of the Prior Housing Element Sites, the Inventory of Adequate Sites and Lower Income Rezoning Sites, edits to Article 6 (Density) in order to add the new minimum density rule, and Article 9 (Public Benefit Systems) in order to create a program for the streamlined review for affordable housing projects on Lower Income Rezoning Sites and Prior Housing Element Sites. The provisions of these new code sections carry forward a close translation of the language and policies of the Chapter 1 version of the Housing Element Sites and Minimum Density Ordinance; however, the regulations are structurally split up across multiple Articles and programs in the New Zoning Code, rather than being located in a single code section.

The policy outcomes in the New Zoning Code version of the proposed ordinance will be equivalent to those of the Chapter 1 version of the proposed ordinance, with the following minor exceptions, in order to best align with the updated regulatory system of the New Zoning Code:

1. **Definitions.** The proposed Chapter 1A version of the Housing Element Sites and Minimum Density Ordinance will have some different defined terms or slightly different definitions of some terms compared to the terms and definitions included in the proposed Chapter 1 version of the Housing Element Sites and Minimum Density Ordinance. In chapter 1A, all definitions and defined terms are located in a codewide Glossary in Article 14, and these definitions apply whenever the terms are used across the entirety of Chapter 1A. Some proposed definitions and defined terms from the proposed Chapter 1 version of the Housing Element Sites and Minimum Density Ordinance will need to be modified to align with Chapter 1A structure and use of terminology, and existing Chapter 1A definitions will need to be modified to integrate the Housing Element Sites and Minimum Density Ordinance.
2. **General text and terminology changes to align with Chapter 1A terminology.** Some terminology will be modified throughout the proposed 1A version of the Housing Element Sites and Minimum Density Ordinance in order to align with the standardized and defined terminology used throughout Chapter 1A. These modifications could result in differences in interpretation, meaning, and application; however, any terminology replacements will reflect the intent of the proposed Chapter 1 version of the ordinance as closely as possible. For example, the term “abutting” is used in Chapter 1A in lieu of “contiguous”, and the term “dwelling unit” is used in Chapter 1A in lieu of “residential unit”.
3. **Use of formal maps in lieu of showing eligibility by referencing Housing Element appendices.** In the New Zoning Code Structure, when regulations are tied to a map, the

map's applicability, boundaries and amendment processes are enumerated in a formal map enabling section in Article 1 (Introductory Provisions). Due to this Code structure, the proposed Chapter 1A version of the Housing Element Sites and Minimum Density Ordinance will include formal map-enabling sections to establish maps of Prior Housing Element Sites, the Inventory of Adequate Sites, and Lower Income Rezoning Sites. The Chapter 1A version of the Housing Element Sites and Minimum Density Ordinance will reference these maps to establish eligibility for the streamlining program and to establish when non-residential replacement rules apply.

Discussion of Key Issues: Citywide Housing Incentive Program Ordinance

The Citywide Housing Incentive Program (CHIP) provides an important policy response to better meet the City's tremendous housing needs. Without bolder action, the City's housing outcomes are unlikely to improve significantly. The CHIP addresses these challenges by adding and re-aligning strategies to explore new approaches to affordable and mixed-income housing development.

Following is a discussion of several key issues that have been raised throughout the public engagement and plan development process.

Affirmatively Furthering Fair Housing

A primary objective of the CHIP Ordinance is to respond to recent state and federal directives to Affirmatively Furthering Fair Housing (AFFH). Under state law, the City must not only meet Regional Housing Needs Assessment (RHNA) targets, but also do so in a way that Affirmatively Furthers Fair Housing. Government Code 8899.50 defines AFFH as:

“Taking meaningful actions, in addition to combating discrimination, that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity based on protected characteristics. These actions must, taken together, address significant disparities in housing needs and in access to opportunity, replace segregated living patterns with truly integrated and balanced living patterns, transform racially and ethnically concentrated areas of poverty into areas of opportunity, and foster and maintain compliance with civil rights and fair housing laws.”

As part of this mandate, the 2021-2029 Housing Element included an Affirmatively Furthering Fair Housing Assessment to identify disproportionate housing needs, segregation patterns, and disparities in access to opportunity by race, income, disability and familial status. The Assessment outlined the racial and socioeconomic disparities stemming from land use planning and housing investment practices embedded in LA's history. Implicit and explicit forms of discrimination have excluded communities of color and special needs populations from access to educational resources, jobs and healthy neighborhoods and perpetuated segregation, displacement, inequity, and exclusion.

These disparities in access to opportunity are not only an integral part of Los Angeles's land use history, but a fundamental trend in the City's housing landscape today. As reported in the 2021-2029 Housing Element, relatively little affordable housing has been developed in Higher Opportunity Areas of the City. Of the affordable units permitted over a ten year period, only 14% (almost 1,600 units) were produced in the City's High or Highest Resource Areas, while 62% were located in the Low Resource and High Segregation and Poverty Areas⁴. Mixed-income projects supported by land use incentives have a much higher rate of producing affordable housing in Higher Opportunity Areas, compared to those produced through financial subsidy alone. This pattern in which the majority of affordable housing is developed in lower opportunity areas is also clearly displayed in the contrasting maps presented in [Figure 1](#) on page A-4.

Upon finding that the sites identified to meet RHNA targets reflected existing patterns of segregation, the 2021-2029 Housing Element further concluded that a RHNA Re-zoning program (identified as Program 121 in the Housing Element) was necessary to Affirmatively Further Fair Housing and ensure affordable housing opportunities are not concentrated in lower resourced areas or areas of segregation and poverty. Due to the current zoning of the City, the highest capacity for new units, including lower income units, is located in areas of lower resources and high segregation and poverty. The 2021-2029 Housing Element also highlighted that changes to the City's distribution of zoning is needed to address the history of housing discrimination and inequitable opportunity in Los Angeles. As such, the 2021-2029 Housing Element identified interventions in the Affirmatively Further Fair Housing (AFFH) Program 124 to address the contributing factors to fair housing disparities. These implementation programs are described in detail on page F-10 in [The Housing Element](#) Findings section of the report, but as a primary guiding principle for the AFFH Rezoning Targets, the Program committed to expand where mixed income projects may be created, introducing context specific reforms to zoning and land use practices to increase housing choices and affordability, and targeting more than half of rezoning efforts in Higher Opportunity Areas⁵.

The Program accomplishes this goal by focusing new incentive programs in Higher Opportunity neighborhoods, expands affordable housing set asides that account for identified local needs, creates new home ownership and equity building opportunities, expands senior housing incentives, incentivizes use of public land, provides new incentives for 100 percent affordable housing, and ensures a replacement of existing housing units. Within the MIIP and AHIP strategies are tailored to always offer greater development potential in Higher Opportunity Areas, this results in the approximated 56% of housing capacity being added in Higher Opportunity Areas. Centering AFFH as a benchmark in the Program is not only prioritized by the City's internal goals, but ultimately ensures compliance with State mandated requirements. The development of the CHIP ordinance was not informed by a question of whether to conduct a rezoning in the City or not, but rather driven by the intent to ensure the equitable distribution of new housing opportunities and compliance with State law. More information on the specific methods through

⁴2021-2029 Housing Element, Chapter 4, page 211

⁵ 2021-2029 Housing Element, Chapter 6, Program 124.D., page 352

which the CHIP ordinance seeks to address AFFH requirements is available on page F-10 in the Housing Element Programs Findings section of the report.

Single-Family Inclusion

The potential inclusion of single-family zones in the CHIP Ordinance incentive strategies triggered a debate among residents on the challenges associated with preserving single-family neighborhoods while also expanding access to new housing options in communities which have historically been unaffordable to the majority of Angelenos as a result of land use patterns in Los Angeles. With this in mind, this section of the Staff Report provides an overview of comments received on this topic as well as staff's recommendation on how to approach this critical issue.

The 2021-2029 Housing Element included a Program 121 RHNA Re-zoning that included various concepts for achieving the City's housing goals including strategies focused on single-family zones. Specifically, the program identified potentially creating incentives on single-family zones near transit through the TOC Expansion Strategy; tailoring incentives in single-family zones for one-hundred percent affordable construction in the Affordable Housing Overlay Zone (AHOZ) Strategy; creating more flexibility for the subdivision of single-family lots and the construction of accessory dwelling units through the ADU strategy; and providing mid-scale and missing middle incentives on transit corridors in the Residential Opportunity Corridors and Avenues (OPP RC and OPPRC2) strategies. This followed a lengthy Housing Element adoption process that centered around outreach, equity, and Affirmatively Furthering Fair Housing (AFFH).

Following the launch of CHIP program strategies (see [Core Strategies](#) on page A-7) and prior to releasing a draft ordinance, on October 23, 2023 the Department announced that single-family zones would not be included in most rezoning strategies. This decision to not include single-family zones was based on feedback gathered through the Department's CHIP Concept Explorer survey, Office Hours, and feedback received through in person and online outreach during the Listen Phase of this work program. Alongside the October 23, 2023 announcement, the Department solicited feedback through a survey on the desire to include single-family zones and where to prioritize the CHIP program. As of August 26, 2024, the survey had received responses from just over 4,150 participants, with just over 60% expressing support for single-family exclusion.

Since the release of the first draft of the proposed ordinance in March 2024, City Planning has received a substantial amount of public feedback on whether single-family zones should be eligible for affordable housing incentives indicating the significance of this topic. At the staff hearing hosted in July, a majority of commenters expressed support for making single-family zones eligible for CHIP Ordinance incentives. At the same time, 95% of the over 3,100 comments received via email, in the form of letters, and through City Planning's online feedback form on the CHIP Ordinance commented on single-family, with 77% expressing opposition to applying CHIP Ordinance incentives to single-family zones. This feedback received over the course of the development of the CHIP strategies reveals the City's land use approach to single-family zones as one of the most prominent issues in the public dialogue on the CHIP Ordinance.

Those in opposition of the exclusion directly referenced concerns that not including single-family zones fell short of AFFH requirements, placed burdens on lower resource and renter communities to bear the majority of development required to achieve RHNA targets, diminished the likelihood of meeting RHNA targets at all, and failed to address the City's fraught history of housing discrimination that furthers racial and economic inequity. Those in support of excluding single-family zones expressed a desire to prioritize development on corridors, expressed concerns about housing stability for seniors, asked to minimize changes in existing residential neighborhoods, and asked for tailored incentives instead of broad changes. Furthermore, those in support of excluding single-family zones from eligibility argued that single-family neighborhoods do not have sufficient infrastructure to support more density

The department understands the complexity of this issue and believes it would benefit from additional outreach and engagement to create a successful solution. While inclusion of single-family zones may enhance the CHIP ordinance's ability to further the City's fair housing goals, there may be a need for more expansive outreach and engagement to create a meaningful solution that addresses concerns shared on both sides of this issue. Cities like Minneapolis and Portland have reached an arguably successful policy approach to including single-family zones, however their efforts incorporated revisions to the General Plan and spanned five to ten years. The outreach and engagement associated with the CHIP Ordinance provided the public with one of the first formal platforms to voice feedback on this topic and staff recommend that to achieve a thoughtful outcome. As such, the City should engage further with Angelenos and reach a consensus that prioritizes housing equity while moving the needs of the city forward. Furthermore, as explained in the key issue above, the recommended CHIP ordinance meets the 2021-2029 AFFH goals set forth in Program 124 by ensuring the majority of new capacity in the program is created in Higher Opportunity Areas.

Within the proposed Ordinance, single-family zoned land is only eligible for the incentives within the Affordable Housing Incentive Program when a proposed project is constructed on a parcel owned by a public agency or on land owned by a Faith-Based Organization (with some exceptions). Additionally, due to provisions contained in State Density Bonus Law, single-family zoned sites with a multi-family General Plan Land Use designations may be eligible for incentives in the State Density Bonus Program and AHIP. Though not included as a recommendation in the draft CHIP Ordinance itself, given the importance of this issue and considerable public debate, several options to incorporate single-family zones into the CHIP Ordinance are provided for consideration. Exhibit D outlines six options for single-family zone inclusion in MIIP and AHIP that vary in scale and geographic eligibility. For a detailed analysis of each option and further discussion on inclusion of single-family zones, see Exhibit D.

Affordability Level Considerations

Single Affordability Set Aside Requirements

A primary objective of the RHNA Re-zoning Program 121 was to "Promote a more equitable distribution of affordable housing opportunities throughout the city, with a focus on incentivizing or requiring Affordable Housing in Higher Opportunity Areas" (Program 124 D, 2021 - 2029

Housing Element). In doing so, MIIP proposes generous development incentives, including Density Limited by Floor Area, for sites located along major streets and high quality transit in Higher Opportunity Areas of the city. In exchange for these generous development incentives, the MIIP proposes increasing the restricted affordability set-aside percentages from those equivalent to existing Transit Oriented Communities (TOC) Guidelines today (beginning at 9% ELI) to a new structure where affordability set asides vary by Market strength. This means that Lower Market Tiers (areas of the city with lower rents and for sale prices) would be subject to lower affordability set asides and Higher Market Tiers (areas of the city with higher rents and for sale prices) would be required to provide a greater percentage of affordable units.

Feedback from development and urban planning organizations throughout the process included requests to reduce affordable set aside percentages back in alignment with existing TOC requirements. In response to this feedback, the MIIP now proposes set aside percentages that align with and exceed existing TOC requirements for projects in Lower Market Tier areas of the City (beginning at 9% ELI). Projects located in Higher Market Tier Areas of the city would also see a reduction in required set aside percentages to 1% more ELI units than required for the Lower Market Tier Areas (beginning at 11% ELI). Support for this recommendation was found in the market study analysis and economic feasibility analysis conducted by AECOM Consultants (see Appendix B-1 and B-2, respectively). The market analysis established four tiers of market strength throughout the city, Market Tiers 1 and 2 indicated weaker market areas of the city (generally lower rent and for sale prices), and Market Tiers 3 and 4 represented strong market areas of the city (generally higher rents and for sale prices). The economic feasibility analysis explored the economic feasibility of the proposed CHIP Ordinance incentive programs and broad feasibility for increased set-aside requirements in stronger market areas of the city. These findings led the City to recommend requiring two affordability set-aside requirements for Lower Market Tier Area and Higher Market Tier areas of the city.

Mixed Affordability Set Aside Requirements

Traditionally, density bonus programs within the City of Los Angeles, including the existing Transit Oriented Communities (TOC) Guidelines program, have required projects to set-aside a certain percentage of on-site income-restricted affordable units in addition to market-rate units, in exchange for greater development incentives and bonuses. This scaled approach to restricted affordable set-aside requirements allowed applicants to select one income category (single-affordability) from a menu of options, often ranging from Extremely Low Income (ELI), Very Low Income (VLI), Low Income (LI) categories. Feedback received throughout the outreach process emphasized the need to build more affordable housing and expand and deepen affordability throughout the City, by including two new income categories: Acutely Low Income (ALI) and Moderate Income (MI). ALI is defined as individuals and families making between 0% to 15% of the Area Median Income (AMI). MI is defined as individuals and families making between 100% to 120% of the AMI.

In response to this feedback, a mixed-affordability option for meeting the set-aside income restricted affordable units requirement was added to MIIP. This is an optional path for meeting

the minimum set-aside affordability requirements to participate in the program. Applicants would choose one of the following to meet their minimum affordability requirements:

- Option 1: Utilize the traditional single-affordability set-aside options presented in MIIP, which is limited to providing ELI, VLI, or LI income categories, or
- Option 2: Utilize an optional mixed-affordability set-side, where applicants would have a choice of providing one of the following combinations, with varying combinations depending on neighborhood context:
 - Lower Opportunity Areas 4% ELI and 8% VLI
 - Higher Opportunity Areas 4% ALI, 4% ELI and 12% MI

Further, projects that opt to utilize the mixed affordability option would be required to provide one unit at the lowest affordability category as a three-bedroom unit. The set-aside percentages described above were shaped by policies and priorities of the City, as well as input from community residents, business groups, developers, and advocates. The feasibility of the program was evaluated in a market analysis conducted by AECOM Consultants (see Appendix 3). Generally, the study found the feasibility of the mixed income affordability pathways similar to the feasibility of the single affordability pathway, with no feasibility in Lower Market Tier Areas of the City, and more feasibility in Higher Market Areas of the City. The analysis generally found improved feasibility for projects that include ALI and MI units, as compared to projects providing ELI and VLI units, suggesting the projects with MI units often offset the reduced rents from ALI units, regardless of the total set-aside level. Furthermore, in general, larger scale projects (5 to 7 story podium projects) find it easier to offset an ALI unit, when compared to smaller scale projects like 3-4 story courtyard apartments. The structure of MIIP prioritizes the creation of much needed affordable housing, including more deeply affordable units, in areas of higher opportunity of the City.

Process Streamlining

One of the key objectives of the CHIP Ordinance is to implement streamlined procedures for eligible housing projects and to codify state streamlining measures established through recent state legislation. A number of factors affect the review procedures that a project is subject to, including the project's size, location, and type of request(s). Zoning and overlays, such as a specific plan, may also determine a project's applicable review procedure. Ministerial and discretionary review procedures can differ significantly in the length of time it takes a project to receive approval. Complex entitlement processes and longer timelines can introduce risk, costs, and uncertainty to projects, thus acting as an obstacle in the production of affordable housing. With shorter and more predictable processing times and clear pathways for approval, the CHIP Ordinance will remove key barriers that have prevented affordable housing from being approved quickly in the city. Streamlining provisions in the CHIP Ordinance are central to its intent and function, and represent a key piece in implementing the City's goal to increase the production of affordable housing.

Changes to state law as well as feedback from affordable housing developers continue to indicate that more streamlined procedures are needed to effectively maintain a pipeline of affordable

housing required to meet the City's RHNA obligations. Numerous state bills have been adopted in recent years to amend State Density Bonus Law to reduce application processing time, increase the density bonus a project may receive ministerially, and to create a more predictable approval process. Process streamlining has also occurred at the local level through Mayor Bass' Executive Directive 1 (ED1), signed in December 2022, which created a streamlined approval process for one hundred percent affordable housing and shelter projects to address the housing and homelessness crisis in the City. Further discussion of ED1 streamlining can be found in [Executive Directive 1 Considerations](#) (page A-72).

The City's current affordable housing incentive programs offer a mix of discretionary and ministerial review processes for eligible projects. The Los Angeles Department of Building and Safety (LADBS) ministerially processes Density Bonus projects requesting base incentives and projects requesting incentives on the Menu of Incentives are processed by City Planning through a ministerial Administrative Review application. Projects requesting incentives not on the Menu of Incentives must file a discretionary application for CPC review. The City's existing Transit Oriented Communities (TOC) Incentive Program allows only base incentive requests (density, FAR, and parking reductions) to be processed ministerially through LADBS review, while projects with requesting incentives on the Menu of Incentives are still subject to a discretionary (Director's Determination) application that is reviewed by department staff. The CHIP Ordinance builds on this by offering LADBS ministerial review to an expanded list of eligible project request types including those that only request incentives on the Menu of Incentives. By allowing these types of projects to access a ministerial approval pathway, applicants will have increased flexibility and expedited review time, while still allowing City Planning staff to conduct ministerial review for compliance with public benefit and requests for incentives not on the Menu of Incentives. See page A-17 of this report for more information on how the CHIP Ordinance proposes to streamline procedures.

Overall, the CHIP Ordinance will enable a wider variety of affordable housing projects to adhere to certain requirements, including only utilizing the Menu of Incentives within the ordinance, to access a streamlined, ministerial review process in lieu of discretionary procedures that might apply under today's zoning regulations in order to facilitate the creation of housing across the City. Though the CHIP Ordinance does streamline more project request types than those streamlined today, public outreach has revealed a desire to go even further in the CHIP ordinance to streamline more project type requests. Specifically, comments have asked that the streamlining of requests for incentives not on the Menu of Incentives and for waivers of development standards be consistent across the CHIP Ordinance. As drafted, the CHIP Ordinance requires a discretionary review application for waiver requests, requiring either a CPC case or Director of Planning-level case depending on which program was used and how many waivers requested. AHIP, however, allows one waiver to be processed under Expanded Administrative Review to allow further streamlining for One Hundred Percent Affordable Housing Developments. In response to this public comment the draft CHIP Ordinance proposes that all incentives not on the Menu of Incentives be processed ministerially, with the possibility of a staff level hearing and no appeal. Projects utilizing the MIIP program are eligible for the ministerial approval of requests for incentives not on the Menu of Incentives. However, staff recommend that projects that choose to

pursue requests not on the Menu of Incentives for FAR, height, open space, setback, and ground story relief utilize the State Density Bonus program in lieu of the MIIP menus. Staff recommend that most requests for waivers remain discretionary requests as they require a different level of staff review to ensure the standard being waived would in fact physically preclude a proposed project (see page A-19 for more information on the processing of waiver requests).

Environmental Considerations

Feedback gathered from public surveys, community based organizations, advocacy coalitions, and housing developers, as well as a thorough consultation of state and local environmental regulations, has informed how the CHIP ordinance addresses environmental justice issues. Critical provisions pertaining to the CHIP ordinance's eligibility criteria aim to ensure that new housing does not exacerbate dangerous impacts of natural disasters or negative health and safety impacts associated with residential proximity to hazardous substances.

Regarding environmentally sensitive sites that are increasingly at risk due to climate change, additional feedback was received regarding Sea Level Rise Areas. The Sea Level Rise Area definition was changed to an area that is vulnerable to five feet of sea level rise, further reducing higher environmental risk considerations. These areas remain ineligible for local programs and incentives. The second draft added the Coastal Zone to the list of exceptions as Staff identified climate vulnerable locations like Ocean Front walk which were not identified in the Sea Level Rise Area Mapping. As most of Los Angeles's coastal communities are currently undergoing a Community Plan Update in collaboration with the Coastal Commission, removal of the eligibility from CHIP allows climate vulnerability concerns to be addressed through local planning. Feedback and comments suggested that entirely excluding the Coastal Zone would limit housing capacity in higher-resource neighborhoods with temperate weather. At this time, sites in the Coastal Zone remain ineligible for MIIP incentives, so that local planning can address concerns in these geographies. State Density Bonus Program and AHIP incentives may apply under limited circumstances.

Each draft of the CHIP Ordinance has differed in how it addressed concerns associated with housing near environmental hazards. The CHIP Ordinance initially included a list of hazardous sites and declared them ineligible from the MIIP and AHIP programs. The Department received feedback that included a desire not to exclude but instead require stronger regulatory measures including the types of hazardous sites that should be further conditioned or remediated prior to the development of housing. Furthermore, public comment revealed interest in more public participation in determining whether sites in areas with certain environmental risk factors should be eligible for the CHIP. The Alliance for Community Transit Los Angeles—a coalition of Community Based Organizations that the Department has consulted throughout CHIP drafting—and Communities for a Better Environment, representing Wilmington and the South Bay where communities are at the forefront of environmental justice issues, both provided written comment arguing that community members know of environmental threats beyond what is on the Cortese list or within established buffers, further requesting that communities where a CalEnviroScreen score is in the 80th percentile or higher incorporate a public hearing process for CHIP eligibility.

In response to those initial comments the Department altered the second draft to include a definition of “Environmental Consideration Areas” that was then incorporated across all three programs. This definition expanded the oil well or field buffer from 50 feet in the first draft to 500 feet from an active oil well or field, 200 feet from an idle well or field, and 100 feet from a plugged well or field in the second draft. The second draft also included requirements for sites in Environmental Consideration Areas to conduct a Phase I or Phase II (if necessary) and receive a “No Further Action Letter” to access the Menu of Incentives. Without a “No Further Action Letter”, a project would need to comply with Expanded Administrative Review with the public hearing and appeals procedures in order to access the Menu of Incentives.

The Department received more feedback on the Environmental Consideration Areas proposed in the second CHIP draft from two different letters representing developers, affordable housing providers, and real estate interests (ULI CCA, AIA, SoLa Impact, Logos Faith Development among other signatories) stating that it was infeasible to conduct the necessary environmental remediation for these sites and receive a No Further Action letter prior to the entitling a project, as the remediation normally occurs during the construction and grading process. These parties recommended requiring remediation as a condition enforced at the issuance of building permits.

In the interest of both the greater goal of adding more housing and encouraging the cleanup of toxic sites in the City, the department has removed procedures proposed for sites deemed Environmental Consideration Areas in draft three and replaced them with a requirement that all projects comply with the Environmental Protection Measures (described in the ‘Environmental Protection Measures’ section of Key Provisions in this report). Requiring all projects, irrespective of the procedural path, to be subject to Environmental Protection Measures ensures that an environmental site assessment is appropriately applied to all qualifying projects.

The Environmental Protection Measures Handbook, proposed for adoption with the implementation of the Downtown Los Angeles Community Plan and Chapter 1A code amendments, would have only applied to projects subject to Chapter 1A zoning. The current proposal to adopt the Environmental Protection Measures in the Housing Element Ordinance will apply its use for CHIP and Low Income Site projects using the Chapter 1 zoning code. The CHIP further recommends allowing the Director to apply Environmental Protection Measures for housing projects pursuing approval through the proposed CHIP Ordinance incentives, whether the projects are subject to LAMC Chapter 1 or 1A. These measures may be amended by the Director of Planning to ensure the department is able to maintain updated environmental protections. Environmental Protection Measures require site remediation to take place at the time of an issued building permit, but also cover more extensive environmental circumstances than had been previously addressed in the CHIP. By adopting and deferring to these measures, the CHIP has addressed both the concerns of advocates who wanted measures to apply to all three programs, and the concerns of developers who expressed that remediation pre-entitlement would be cost prohibitive and reduce housing production as well as toxic site clean ups. Additionally, revisions to the Environmental Protection Measures (described in the ‘Environmental Protection Measures’ section of Key Provisions in this report) are proposed in response to advocate concerns.

FBO Adjacency and Acquisition

The specific inclusion of Faith-Based Organization (FBO) Projects in AHIP within CHIP was crafted to provide a more permissive City program based on state law SB 4. SB 4 allows by-right processing and development incentives for affordable housing projects on land owned by Religious Institutions on or before January 1st, 2024, including in single-family zones. Religious Institutions in Los Angeles have unique potential for affordable housing development that furthers AFFH goals due to their high proportion of parcels in single-family and High Opportunity Areas as well as their high capacity for development in spaces such as underutilized parking lots.

Although AHIP contains alignment with central components of SB 4, the ordinance offers an alternative pathway for review with varying affordability, acquisition, and site eligibility. Within AHIP a project may utilize either SB4 requirements or the FBO incentives. In its initial draft, the AHIP program was written to be more permissive than SB 4 in its acquisition requirements, instead of limiting the use of incentives to sites owned by Religious Institutions on or before January 1st 2024, the draft removed the acquisition requirement altogether, allowing Religious Institutions to use CHIP incentives for newly purchased properties.

Upon release of the second draft of the CHIP ordinance, the Department received feedback expressing concern for allowing newly purchased property to be eligible for FBO incentives in single-family zones. In order to find the right balance, adjacency and acquisition requirements for FBO projects were incorporated. The ordinance was revised to specify that parcels purchased by FBOs after January 1, 2024 in single-family zones can only use AHIP incentives if they are within a 528 feet (0.1 mile) radius of an existing Church or House of Worship. This new addition ensures not only that development on newly-purchased single-family parcels remains in proximity to existing Religious Institution sites, but also that the policies offered in AHIP are not used as a loophole for developers to purchase any parcels in single-family zones under false pretenses of Religious Institution initiated development. Restricting development on newly-purchased land to be near already existing uses will ensure that Religious Institutions themselves who are integrated into the local community are making decisions about project outcomes while also retaining their right to purchase property with the intention of using CHIP incentives.

With the addition of this adjacency and acquisition clause, CHIP's regulations still remain more permissive than SB 4 as they maintain eligibility of property purchased after January 1, 2024 to use FBO Project incentives. Adding these restrictions addresses concerns and secures more connection between the development and surrounding neighborhood while still providing strong incentives for affordable housing development on Religious Institution owned land in single-family zones.

Additionally, the requirement that FBO Projects are developed by or in partnership with a Qualified Developer was added to the ordinance after the first draft. A Qualified Developer is defined per SB 4 as a local public entity, a non-profit developer, or a developer that the FBO has contracted with before. SB 4 requires applicants using the bill's incentives to meet this definition, effectively limiting the type of developer that is permitted to use these incentives in partnership with Religious

Institutions. Aligning the City's ordinance with state law accordingly further ensures that incentives will be used for their intended purpose in service to the community and Religious Institution.

The addition of adjacency and acquisition requirements for FBO projects in AHIP is meant to center Religious Institutions as leaders in and catalysts of the development that occurs in single-family zones. These requirements ensure AHIP incentives are being used for their intended purposes, and in doing so also provides increased protection for preservation of neighborhood character in single-family zones.

Labor Provisions

Feedback collected during the Program outreach included a letter from the Western States Regional Council of Carpenters requesting provisions for certain labor standards to be used in the construction of CHIP housing projects. In particular, they requested that Faith-Based Organization Projects and One Hundred Percent Affordable Housing Projects either commit to prevailing wage standards and benefits detailed in California Government Code Sections 65912.130 and 65912.131 or hire a general contractor who is signatory to a collective bargaining agreement with similar provisions.

During the CHIP listen phase, faith-based affordable housing developers requested more flexibility than what was proposed in the state's Senate Bill 4 (SB 4) for streamlining affordable housing on land owned by Religious Institutions. SB 4 labor provisions are similar to those requested by the Western States Regional Council of Carpenters, and require that developments with 10 or more units be subject to prevailing wage and developments of 50 or more units be subject to additional labor requirements related to health care and apprenticeship programs. Within the CHIP program, projects utilizing SB 4 incentives are required by state law to abide by the labor requirements of the statute. However, as the AHIP Faith-Based Project incentives are not comparable to the SB 4 incentives and are enabled by Density Bonus law, the local incentives are not subject to labor provisions. While the Faith-Based Project incentives provide more flexible affordability requirements, the program overall offers less buildable area for low density sites than SB 4, with the intention of encouraging more contextual scale design.

As an implementation of State Density Bonus law, the CHIP Ordinance is limited in its ability to impose prevailing wage standards or labor provisions on projects. The stated intent of State Density Bonus law is to "cover at least some of the financing gap of affordable housing with regulatory incentives, rather than additional public subsidy" (California Government Code Section 65915(u)). Imposing costs on projects that are part of an implementation of State Density Bonus might be perceived as imposing financial burden on projects utilizing regulatory land use incentives to reduce the public subsidy needed to produce the state's deficit of restricted affordable units. The imposition of labor and prevailing wage in the State Density Bonus incentive program is unprecedented for this reason.

As labor was not analyzed as a potential constraint for development within Program 121 RHNA Re-zoning, introduction of a labor requirement could require additional analysis and modification to the rezoning need. Within the 2021-2029 Housing Element, constraints for production were

identified and remediation was required. Introduction of a new constraint, such as labor, could require unanticipated amendments, including offsets of the constraint such as additional streamlining, development potential, identification of more sites for rezoning, and a higher rezoning need. With this impact and the legal framework limitations mentioned above, the CHIP Ordinance does not propose the inclusion of labor standards.

Executive Directive 1 Considerations

Executive Directive 1, commonly referred to as ED1, was issued on December 16, 2022 by Mayor Karen Bass to expedite the processing of 100% affordable housing and shelter projects to address the housing and homelessness crisis in Los Angeles. ED 1 exempts these projects from discretionary review if they comply with applicable objective development standards, except as they may be modified or waived by Density Bonus or other local affordable housing incentive programs. Projects that require consideration of a Coastal Development Permit or are subject to the Subdivision Map Act are ineligible for ED 1 streamlining. ED 1 projects are reviewed through a ministerial approval process, which provides various streamlining provisions at all stages of project review for qualifying projects. Subsequent revisions to ED 1 were issued in July 2023 and in July 2024. These revisions have added additional eligibility requirements, parameters around incentives, and requirements to improve resident protections.

ED1 has been remarkably effective at creating affordable housing, largely without the need for financial subsidy. Applications for more than 27,000 units have been submitted to Planning in the first 20 months of its existence. In response to a motion (CF 23-0623) that was adopted by the City Council on June 27, 2023, City Planning prepared an ordinance (Affordable Housing Streamlining Ordinance) that would codify the streamlining provisions of ED1. The proposed ordinance is currently pending scheduling of the required Planning and Land Use Management meeting.

Although the policies share the key goal of streamlining affordable housing production in Los Angeles, ED1 and the AHSO are distinct from the CHIP Ordinance in several key aspects. ED1 is fundamentally a temporary procedural streamlining measure based on a declaration of a state of emergency, while AHIP offers the opportunity to create a long-term fully formed incentive program with a unique menu of development incentives and standards that builds on unique needs and opportunities in Los Angeles, including what has worked and not with ED1.

Another notable distinction between ED1 and CHIP is their varying approaches to location and density based eligibility and incentives. ED1 does not allow this streamlining to be accessed for parcels zoned single-family, with a base density of less than 5 units, registered as a historic resource, or located within an HPOZ. The CHIP Ordinance offers streamlining for 100% affordable housing projects citywide through AHIP, including parcels with a base density less than 5 units, historic sites, and limited eligibility in single-family zones for Faith-Based Organization Projects. AHIP goes beyond ED1 by incentivizing development in areas with low vehicle miles traveled, within a half mile of a major transit stop, and in Higher Opportunity Areas through offering development incentives in FAR, height, and parking above those available under State Density Bonus law. Additionally, AHIP scales these incentives according to the underlying zone's base

density, offering smaller bonuses for parcels with a base density of less than 5 units and greater bonuses for parcels with base densities of higher than 5 units. In this way, AHIP aims to increase the feasibility of affordable development in areas of the city that are in line with the City's goals to affirmatively further fair housing, while also maintaining restrictions on incentives that are responsive to existing neighborhood scale.

The streamlining offered in each policy is also distinct. ED1's streamlining provisions ensure that a building permit will be issued for 100% affordable projects within 5 days, and that appropriate approvals are obtained within 60 days with all required changes to be provided to the applicant within 30 days. ED1 projects are reviewed through a ministerial approval process, which provides various streamlining provisions at all stages of project review for qualifying projects, including an exemption from various local planning procedures (such as hearings and appeals), the California Environmental Quality Act (CEQA), and any non-objective development standards contained in the Zoning Code or other applicable overlays or planning documents. These policies establish significant protection from discretionary review processes for projects using ED1, paving a strong streamlined path to development. The July 2024 revision to ED1 additionally builds in restrictions to requests for incentives not on the Menu of Incentives and waivers such as limiting percentages for increases to FAR and decreases to open space in order to have more control of design outcomes for projects.

The CHIP ordinance's approach to streamlining contains different levels of review processes and does not supersede existing review procedures in other ordinances, specific plans and overlays. In this way, CHIP prioritizes streamlined review while also building in review processes to ensure design outcomes are in line with community goals, scaling review processes in line with the significance of requests. While a project can choose to utilize both the CHIP and ED1 streamlining provisions together, a project may use only one of the programs.

Expanded Incentives

The Department received substantial feedback regarding the incentives each program offers. Key stakeholders including affordable housing developers, consulting and research firms, and advocacy organizations advised the Department to expand certain incentives to increase economic feasibility of projects and ultimately maximize the impact of CHIP policies. Specific incentive feedback regarding each program is discussed below.

Number of Allotted Incentives

Comments received indicated an interest in allowing all projects approved under the CHIP Ordinance to receive five incentives. Staff recommend maintaining the current incentive structure described in Table 4 of this report as it builds off the framework of State Density Bonus Law. Furthermore, due to the fact that the MIIP and AHIP offer Height and FAR as Base Incentives, projects approved under MIIP and AHIP technically have access to a total of six or seven incentives, respectively, including those allowed to be selected on or off the Menu of Incentives. Maintaining more incentives in MIIP and AHIP further incentivizes the use of those programs, which will result in more affordable housing production. Additionally, projects can access even

more bonuses and still qualify for ministerial review by utilizing the Public Benefit Options described in each CHIP Ordinance Program.

FAR Incentives in the State Density Bonus Program

The State Density Bonus Program offers projects the ability to access a FAR bonus through requesting an Incentive from the Menu of Incentives. Though the second draft released in June 2024 limited the FAR incentive on the Menu of Incentives to sites on commercial zones, the draft released in conjunction with this report proposes meaningful increases in response to public feedback. In particular, letters received called for increases in the FAR bonus offered on the Menu of Incentives in order to better enable developers to realize the up to 100% density bonuses now available through changes resulting from the adoption of AB 1287 in 2023.

With this in mind, City Planning recommends permitting FAR bonuses equal to the percentage of Density Bonus for which the Housing Development is eligible, not to exceed 35% or a maximum FAR of 3.0:1, whichever is greater if located within a one-half mile radius (2,640 feet) of a Major Transit Stop. Projects on lots zoned "RD" Restricted Density or more restrictive; or on lots with Designated Historic Resources, or Non-Contributing Elements as defined in LAMC Section 13B.8.1.C of Chapter 1A of this Code, are not eligible for an FAR incentive on the Menu of Incentives. In addition to these base incentives, 0.5:1 - 2.0:1 in additional FAR may also be accessed through the Public Benefits program by providing 10 percent of the units as three-bedroom units.

FAR Incentives in the Mixed Income Incentive Program

MIIP offers varying FAR incentives as Base Incentives in the Opportunity Corridor and Transit Oriented Incentive Areas (TOIA) programs. FARs in Residential (R) zones begin at 3.0 FAR in the Opportunity Corridors program, and scale up to 4.5 FAR in the areas closest to highest quality transit. Feedback collected during the outreach process included requests to increase the FAR incentives in order for projects using the MIIP program to have access to enough floor area to effectively build Type IIIA construction (wood frame construction with reinforced concrete podiums).

In response to feedback, the MIIP program proposes to revise the FAR incentives offered in R zones in Opportunity Corridors and TOIA programs to allow projects the floor area required to build 5 to 7 story buildings on major corridors and near high quality transit. Further, the Market Feasibility Analysis conducted by AECOM Consultants (see [Appendix 3](#)), found that increasing FAR incentives in Opportunity Corridors and TOIA programs may lead to more feasible outcomes, especially when compared to State Density Bonus provisions. Revisions to the FAR incentives in the Opportunity Corridor program propose up to 4.8 FAR in the highest quality transit service areas. In TOIA, FAR was also recalibrated to offer greater FAR in Higher Opportunity Areas of the City and in Commercial zones.

Incentives for Sites Identified as Designated Historic Resource(s) in the Mixed Income Incentive Program

MIIP offers FAR as a Base Incentive in all three geographic incentive areas for projects that include five total units. However, sites eligible for the Opportunity Corridors and Transit Oriented Incentive Areas programs that are identified as Designated Historic Resource(s) or Non-Contributing Element(s) as defined in LAMC Section 13B.8.1C of Chapter 1A, shall not be eligible for incentives to increase allowable FAR. These sites are eligible for their corresponding Density Bonus and one additional story of height, up to 11 additional feet. Sites identified as Designated Historic Resource(s) or Non-Contributing Element(s) are not eligible for CT-3 incentives in the Corridor Transition Incentive Area program. Feedback heard throughout the outreach process has generally agreed that although Designated Historic Resource(s) may warrant different incentives than other areas in the MIIP program, there remained concerns regarding the inclusion of low density multi-family residential neighborhoods in historic neighborhoods in the MIIP program. In order to protect existing historic multi-family neighborhoods from displacement issues, feedback suggests lower density residential zones, such as R2 and RD zones, be removed from the Opportunity Corridor program, but would remain eligible for the Corridor Transition program.

Another key issue raised during the feedback process was the desire to see a partial preservation approach to sites eligible for the Opportunity Corridors Incentive program. Sites would be eligible for greater density and housing opportunities if setback from the historic facade of the existing building or at the rear of the site, in exchange for exemptions of the existing preserved building from counting towards FAR. Feedback noted that many legacy businesses and restaurants are currently eligible for the MIIP program, and flexibility is desired in the program to allow for retention of legacy businesses and prevent the displacement of tenants.

FAR Incentives in the Affordable Housing Incentive Program

Some feedback urged the Department to adopt higher FAR incentives for AHIP, citing that the drafted FAR incentives did not go far enough to make a project financially feasible, especially in the case of 100% affordable projects that already face challenges penciling out. Affordable housing developers expressed that the FAR incentives offered through AHIP actively limit the height incentive, encourage micro-units, and would ultimately result in less affordable housing being produced. Many organizations advocated for eliminating the requirement that above ground parking be counted as FAR in order to boost economic feasibility, increase the impact of FAR incentives on the number of affordable units being produced, and allow design that practically addresses resident parking needs.

In response to this feedback, AHIP base incentives for parcels with a maximum allowable residential density greater than 5 units in High and Moderate Opportunity Areas were adjusted to combine the previously distinct residential and commercial FARs, ensuring that projects in these areas can access the greater of either 4:65:1 FAR or a 55% increase residential or commercial zones. This update is an increase for residential projects, which were previously permitted a maximum of the greater of 3:5:1 of 50%. Additionally, the FAR base incentive for

parcels with a maximum allowable residential density greater than 5 units within a half mile of a Major Transit Stop or in a Very Low VMT area was increased to the greater of 4.5:1 or 50%. Previous to this update, parcels in these areas were eligible to receive an FAR incentive equal to the greater of 3.5:1 or 50%. Allowing higher FAR incentives for projects in High and Moderate Opportunity Areas, within a half mile of a Major Transit Stop, and Very Low VMT areas not only addresses feedback requesting increased FAR incentives, but also supports the City's AFFH goals by focusing the heightened incentive in areas of higher opportunity and near transit.

Relationship with Community Plan Updates

The Program 121 RHNA Re-zoning identified a wide array of multifaceted efforts, including the CHIP, and updates to Community Plans and other Specific Plans or Neighborhood Plans. Some local plan efforts have already been approved by the City Planning Commission but are pending final adoption (including DTLA, Hollywood Community Plan, Boyle Heights Community Plan, Harbor Gateway and Wilmington-Harbor City Community Plans, Cornfield Arroyo Seco Specific Plan, and Slauson Transit Neighborhood Plan), while others are still in development (including Community Plans in the South Valley and West Los Angeles). The CHIP Ordinance will work alongside the Community Plan and other updates to create citywide incentive-based and streamlining strategies aimed at facilitating more affordable housing in citywide priority areas, and meeting the housing needs identified in the Housing Element.

The CHIP Ordinance will be available to projects based on specific eligibility criteria and will not modify the underlying zoning, however, the Community Plan programs will continue to look at communities at the local level to fine tune land use designations and zoning regulations at the parcel level. In Chapter 1, CHIP incentives will be offered in the exceptions section of the code, offering an alternative incentive pathway for projects which would like to use the Citywide incentive in lieu of incentives offered through an Overlay, Specific Plan, or Transit Neighborhood Plans. In Chapter 1, the MIIP program includes provisions to allow for TOIA incentives to be replaced through local planning updates. This provision is consistent with Measure JJJ, which allows Community Plans to supersede the TOC Guidelines. Plans electing to replace TOIA incentives will be required to make no net loss findings, to ensure housing capacity claimed towards rezoning is not lost. Furthermore, the Boyle Heights, Harbor Gateway Community Plan, Wilmington-Harbor City, Central City North, and Central City Community Plan Areas and the Cornfield Arroyo Seco Specific Plan have all previously been reviewed by the City Planning Commission with plans containing local incentive programs for Chapter 1A. As such, these plan areas will not be eligible for MIIP Incentives in Chapter 1 and 1A. Future Community Plans have been developed alongside the CHIP and MIIP incentives, and will be integrated into Chapter 1A Article 9, as enabled in Chapter 1, in Chapter 1A. TOIA incentives may be replaced through local planning with the findings described above.

Discussion of Key Issues: Resident Protections Ordinance (RPO)

Throughout the ordinance process, the City has received significant feedback from three community organizations calling for the Resident Protections Ordinance to more clearly address displacement concerns and expand tenant rights. These organizations are the Alliance for

Community Transit (ACT-LA), Public Counsel, and the Alliance of Californians for Community Empowerment (ACCE). Their comment letters generally support and reference each other (see the Public Hearing and Communications Section)

While many of the initial suggestions have been included in the proposed ordinance (see Key Provisions above), a number of items remain. They largely relate to expanding occupant protections and replacement policies for units subject to the Rent Stabilization ordinance (RSO). Many of the occupant protection policies have been addressed, either directly or indirectly, in the draft ordinance. Therefore this section will focus largely on replacement issues, particularly having to do with the replacement of RSO units being demolished by new construction.

RSO Replacement Requirements

A significant key issue involves the replacement requirements that apply when rent controlled units (e.g. those subject to the Rent Stabilization Ordinance (RSO)) are being demolished for new housing developments. In particular, the issue is how to replace RSO units where current or prior tenant incomes are not known or have been determined to be above low income. This is because under the Housing Crisis Act, when incomes of current tenants are known to be lower income, they are already replaced with restricted affordable units.

The Housing Crisis Act gives local jurisdictions an option on how to replace demolished RSO units. They may either replace all RSO units with deed restricted lower income units, or may replace the units according to any local rent control replacement policies. The City has been opting for the latter by following the replacement of rental units provisions of the Rent Stabilization Ordinance (LAMC 151.28). This law, amended in 2017, requires the entirety of the new units on the property to be subject to the RSO if it is built within five years of the original units removal from the rental market. Alternatively the new building may be deemed exempt from this requirement by providing at least 20 percent of the new units, or at least as many RSO units being demolished, whichever is greater, to be affordable for lower income residents. Under these provisions, many new housing developments have become subject to the RSO, and this policy is intended to continue.

The 2021-2029 Housing Element established a framework for RSO replacement requirements with its no net loss of affordable housing policy (Policy 2.1.1). Program 29 of the 2021-2029 Housing Element specifically called for evaluating the feasibility of enacting a 1:1 replacement requirement. This “no net loss” policy framework was the result of a significant discussion that took place during the housing element outreach with a diverse group of stakeholders. The proposed ordinance would establish a citywide 1:1 replacement requirement, in line with the Housing Element. While increasing the replacement ratio may result in fewer deed restricted units, this policy will disproportionately benefit the preservation of RSO units and existing tenants (per the analysis presented below).

ACT-LA and ACCE have requested three main changes to the replacement affordability provisions. The proposals mirror regulations recently adopted for a small area of the recently amended South Los Angeles Community Plan Implementation Overlay (CPIO) that is

experiencing intense redevelopment pressures due to its location near the University of Southern California. First, they have proposed a higher replacement ratio of 2:1 for RSO units. Second, they requested that the replacement units not be permitted to count towards meeting local affordable housing set aside requirements. Third, ACCE requested that all replacement units be replaced at Extremely Low Income (ELI) Levels. Finally, the size and comparability of the replacement units has been a concern of several groups. These issues will be addressed separately below.

1:1 vs. 2:1 Replacement of RSO Units

The proposed citywide 1:1 replacement ratio for RSO units would significantly increase the required percentage of replacement units (about 45%) from the current default rate that applies when incomes are not known or are higher than lower income. Per state law, this default rate changes annually based on census data but is currently about 69% (i.e. a 0.69:1 ratio). Moving to a 1:1 ratio ensures affordable housing is never lost on a development site and is in line with the policy direction of 2021-2029 Housing Element and consistent with state law. It would require the addition of one affordable unit in 4-6 unit demolitions and two affordable units in 7-9 unit demolitions, thereby appropriately scaling up disincentives as higher numbers of RSO units are demolished. After a thorough study and consideration, staff believes a 1:1 policy strikes an appropriate balance between housing production and preservation.

Advocates have requested that the recommended 1:1 replacement ratio for RSO units be increased to a 2:1 ratio. They have noted that affordable replacement units are able to be counted towards affordability requirements provided through incentive programs and that further changes are needed to further disincentivize redevelopment of sites with existing RSO units and ensure net gains in affordable housing. While the Department shares these important objectives, there are several important considerations and trade-offs that warrant detailed discussion.

The policy challenge is how to appropriately balance critically important goals around housing production with equally important preservation and tenant protection goals. Groups advocating for a 2:1 ratio argue that significantly increasing replacement requirements is necessary to effectively discourage displacement. Unfortunately, in a built out city like Los Angeles, with most multi-family zoned sites occupied by RSO buildings, 2:1 replacement is a significant trade-off with the production of affordable housing, and housing in general. More than 650,000 of the City's 880,000 multi-family rental units are subject to the RSO and most multi-family zoned sites are occupied by RSO buildings.

Staff commissioned a consultant (AECOM) to analyze the impact of applying higher replacement ratios citywide, as well as the "no double dipping" proposal, to better understand their potential impacts (see Appendix 3). Housing development projects that resulted in RSO units being demolished during a three year period (2020-23) were examined, excluding 100% affordable housing projects and a few other minor project types.

The analysis that's been completed demonstrates that increasing ratios from the current default ratio (effectively 0.69:1) to 1:1 would not have affected the majority of projects that demolished

RSO units in recent years. The majority of projects (61%) already met the 1:1 ratio either because of rounding requirements or because the project required more units of affordable housing to meet the affordable housing incentive requirements. The remaining projects have the potential to be impacted as they would have been required to add restricted affordable units to achieve a 1:1 ratio. While it is not possible to ascertain *exactly* how many of these remaining projects would have been rendered infeasible, the study presumes that an affordability set aside exceeding 20% would likely inhibit feasibility. Using this threshold, it is estimated that 16% of all previously developed RSO redevelopment projects would have been negatively impacted by a 1:1 policy.

When compared to *total* housing production during this time, these potentially impacted projects only represent about 6% of all approved projects (and 3% of total units) in the covenant database.⁶ Therefore, while potential impacts on RSO redevelopment projects may be considered significant, impact on overall housing production is less so. In addition, it is worth noting that the impact of this policy disproportionately benefits the preservation of RSO units, compared to the production of total and affordable units. Assuming these 16% of RSO replacement projects would be rendered infeasible and not occur, this would have resulted in the preservation of nearly 25% of RSO units removed (374), compared to a reduction of 10% of new housing units (1,306), and just 5% of new affordable housing units (231).

A citywide 2:1 ratio would have much more significant impacts. The same study found that only about 13% of RSO redevelopment projects would have already met a higher 2:1 ratio (compared to 61% at 1:1). Therefore the remainder (87%) of projects would be required to add more affordable housing and some or all of those would therefore potentially be impacted.

While examining past data on past projects can provide useful insights, it is difficult to make precise conclusions about the feasibility of future projects, especially given the significant change proposed to the densities and incentives through the CHIP program and state Density Bonus law. It also doesn't give much perspective on the total number of developable sites. As such, and given the importance of this topic, a second analysis that looked at the densities made available through the proposed CHIP program was subsequently commissioned. While the second analysis was unable to be finalized by the date of this staff report transmittal, initial results have been shared with staff. The second analysis appears to confirm the significant impacts of enacting a 2:1 replacement ratio, finding that the vast majority of RSO properties considered feasible for mixed-income housing development under a 1:1 policy would become infeasible under a 2:1 policy. Of note, this analysis was in the top market areas of the City, where economic feasibility is generally higher. Should the report be finalized in time, a summary of the analysis is anticipated to be made available prior to the City Planning Commission meeting. The full report will be available for the City Council.

While enacting a 2:1 ratio would likely reduce direct displacement due to fewer demolitions of RSO units, it would also significantly reduce the production of new housing and affordable housing based on the number of projects anticipated to be affected. This could also have negative impacts

⁶ Note that this estimate does not incorporate any site specific economic or physical feasibility analysis.

on displacement and housing instability as we know that unaffordable rents and lack of affordable housing are major drivers of displacement. Of particular concern is that the creation of new deed-restricted affordable housing affordable for 99 years in mixed-income buildings will be significantly impacted. While RSO units offer important affordability benefits by regulating annual rent increase, they typically reset to market rents once vacated and are not restricted to be affordable for 99 years like restricted affordable units. Due to the Just Cause Ordinance, important RSO benefits (e.g. just cause eviction and limits on rent increases) are now available to most non-RSO tenants. In addition, many new developments result in a net gain of RSO units due to the replacement provisions of LAMC 151.28. As the replacement ratios increase, the proportionate preservation benefits of the policy described in the prior paragraph above dissipate, with increasing impacts on affordable housing production. A blanket policy would also not differentiate between small and large RSO sites/buildings, nor whether any tenants are actually being impacted.

To facilitate additional options for decision makers, the Department has provided two additional options for the City Planning Commission to consider. The options described below would enact higher replacement ratios in more limited scenarios to better right-size impacts.

One potential policy option could be to subject demolitions of larger buildings to higher replacement ratios. For example, as more units are demolished, the ratios could increase incrementally. This would disincentivize demolition as the number of existing units was increased. To facilitate deliberations, one potential iteration of this concept could retain 1:1 replacement ratios when there are 1-2 existing RSO units, but apply higher ratios as RSO units increase (e.g. 1.25:1 for 3-4 units, 1.5:1 for 5-9 units, 1.75:1 for 10-14 units and 2:1 for 15 or more RSO units).

While staff was unable to fully analyze this concept, it would likely also have significant impacts on housing production. While these impacts would be shouldered more on projects requiring larger demolitions (not affecting two unit demolitions, for example) the potential loss of covenanted deed restricted affordable housing in the City's multi-family neighborhoods would be significant, compared to a citywide 1:1 policy.

Alternatively, as a way to further limit and target impacts, only demolition of occupied units could be subject to higher replacement ratios. This approach could be combined with the option above or as a standalone policy with a citywide ratio (e.g. 1.25:1, 1.5:1 or 2:1:). Either way, it would further disincentivize redevelopment of sites with tenants currently in occupancy compared to vacant sites. To address concerns that this policy may further incentivize removal of tenants prior to determining a project's replacement obligation, this policy could be complemented by also adding the higher ratios described above to projects on sites where a no-fault eviction occurred in the prior 5 years including pursuant to the Ellis Act or the recently adopted Just Cause Eviction Ordinance. In addition, the proposed ordinance includes provisions to disqualify sites and developers that have committed violations of the Tenant Anti-Harassment Ordinance.

Counting Replacement Units towards Affordability Requirements

In addition to a 2:1 replacement ratio, advocates have also requested that replacement units not be permitted to count towards meeting local affordable housing set aside requirements. However,

this is a practice that state and local law currently requires to be permitted when implementing the Housing Crisis Act, Density Bonus law, and the TOC Program (see Health and Safety Code Sec. 66300.6(b)(1)(B), Government Code Sec. 65915(C)(3)(a)(i)) and LAMC 12.22 A.31(b)(1). Because the CHIP Ordinance is an implementation ordinance of state Density Bonus law, the Department understands that it must comply with these provisions. The same is true for the TOC Program, which will remain on the books until it sunsets in 2026. Setting a stricter policy for other (non-CHIP/TOC) types of projects may be permitted, but would have marginal effect because the vast majority of projects are anticipated to use the incentive programs.

This policy change would also significantly impact project feasibility for these remaining projects. The second AECOM analysis described above has yielded initial results showing that nearly all evaluated RSO sites would become infeasible for the development of mixed-income housing. For the legal reasons described above, this change may also cause additional confusion for staff, tenants and the public by setting divergent policies based on a narrow range of entitlement types. If the CPC would like to strengthen replacement policies, changing the ratio is more advisable than misaligning with state law and local programs on this provision.

Utilizing Extremely Low Income (ELI) for all Replacement Units

Tenant advocacy groups have advocated that, when incomes are not known, protected units should always be replaced as Extremely Low Income (ELI) units. The proposed ordinance would replace ELI units according to the share of total renters citywide (currently 31%) and introduce a separate formula for RSO units in lower resource areas, whereby units are replaced as ELI proportionate to the share of lower income renters citywide (currently 45%). While increasing the number of units affordable at ELI levels is an important goal, the proposed framework may have unanticipated consequences. In addition, the goal to increase ELI units is already furthered by several elements of the CHIP and RPO.

For example, current policy does not require ELI units be replaced when incomes are not known in non-TOC projects. The proposed framework will include ELI in all cases, and include Acutely Low Income (ALI), when incomes are known (ALI units are not identified in the CHAS data so may not be used when incomes are not known). The accompanying Citywide Housing Incentive Program (CHIP) is also geared towards the production of ELI units, building on the success of the Transit Oriented Communities (TOC) Program serving this population. In addition, it is important to consider that the AECOM 1:1 replacement study referenced above found that ELI units already make up the majority (55%) of new affordable units in projects that result in the demolition of RSO units, which is larger than their percentage of renters in Los Angeles as a whole (31%). The proposed ordinance will encourage production of even more ELI units than is typical today.

Replacement units may also offer an opportunity to ensure a diversity of affordable housing ranges are being served in new housing. Low income and very low income households desperately need affordable, adequate housing in the city and may continue to be underserved with regards to incentive programs compared to ELI. Having a diversity of income ranges in a project also allows tenants to increase their incomes in place without fear of losing their affordable housing. ELI incomes are generally just at or above minimum wage, allowing little room for wage

growth. Additionally, because the proposed policy change would only apply to cases when incomes are not known, it may have the unintended effect of incentivizing redevelopment of buildings with existing lower income residents compared to vacant units and higher income occupancies. For example, five vacant units or units occupied by middle and higher income residents would likely be assessed a higher replacement rate than buildings full of lower income tenants.

The proposed approach builds on the success of prioritizing ELI units, particularly in lower income (lower resource) neighborhoods, while encouraging some diversity of income categories. Additionally, the Ordinance is drafted to allow future programs to deviate from the citywide policy if more localized policies are needed. For example, the recent amendments to the South Los Angeles Community Plan Implementation Overlay default to ELI when incomes are not known, recognizing the lower income of residents in the area, relative to the citywide average.

Replacement Unit Size

Several groups have suggested that each replacement unit should match the demolished unit not only in number of bedrooms and bathrooms but also square footage. The ACCE and ACT-LA recommendation to require the same square footage presents an implementation challenge, as there are no publicly available records of floor plans and property owners or tenants may not have floor plans to provide the City. Measurement of floor area is highly technical, based on complex provisions of the zoning code. Additionally, the staff at LAHD who process RUDs are not trained or resourced to review floor plans and arbitrate disagreements between tenants and developers. In addition, requiring exact square footage in units could also have significant impacts on project feasibility given the importance of efficiency in floor plans, which often depend on repetition and vertical alignment of core electrical and plumbing systems. Additionally, the Housing Crisis Act states that comparable units are not required to have the same or similar square footage (see Health and Safety Code Sec. 66300.6(b)(4)(C)(ii)). For these reasons, the proposed ordinance does not regulate floor area, only the number of bedrooms and bathrooms.

Discussion of Key Issues: Housing Element Sites and Minimum Density Ordinance

As previously discussed, the Housing Element Sites and Minimum Density Ordinance (HESMD) will codify statutory requirements from state housing element law. The following paragraphs summarize the key issues concerning the HESMD that have been raised during the public engagement process thus far.

Lower Income Rezoning Site Selection

As previously mentioned, a finalized list of Lower Income Rezoning Sites subject to by-right development review and minimum density requirements will be identified prior to passage of the HESMD. The City must identify these sites and streamline development review to create enough new development capacity to meet its RHNA allocation for lower-income units. These sites must allow a by-right density of at least 16 units to ensure they can be developed at densities that support the inclusion of lower-income units. A candidate list of potential Lower Income Rezoning

Sites was released in Appendix 4.7 of the 2021-2029 Housing Element. Exhibit E of this staff report includes a resolution and Inventory of Housing Element Rezoning Sites which contains the list of Lower Income Rezoning Sites. Planning staff has only received a few letters regarding the overall HESMD Ordinance, most of which were inquiries about whether specific sites would be designated as Lower Income Rezoning Sites.

However, we did receive feedback during the 2021-2029 Housing Element Update process expressing concern that these sites will be disproportionately located in lower-income communities. This would be inconsistent with City's commitment to expand access to Higher Opportunity Areas and Affirmatively Further Fair Housing as required in state housing element law. Planning staff are cognizant of this issue and the underlying history of how land use regulations have been used to perpetuate inequality in Los Angeles. The City made many commitments to begin addressing these injustices in the 2021-2029 Housing Element and the RHNA Re-zoning ordinances discussed in this staff report reflect our efforts to do so. Importantly, we also understand that following through on these commitments will play a significant role in complying with our obligations under Housing Element Law. As such, we have produced a list of candidate rezoning sites that are distributed throughout the City, especially in Higher Opportunity Areas where housing development projects would benefit significantly from a streamlined review process.

Conclusion

The Program, called for by the 2021-2029 Housing Element, sets out to address critical housing needs and meet the City's housing obligations under state law. Timely adoption of the Program ordinances—namely the Citywide Housing Incentive Program (CHIP) Ordinance, Resident Protections Ordinance, and the Housing Element Sites and Minimum Density (HESMD) Ordinance—is required under state law and is necessary for eligibility and scoring for certain funding sources the City relies upon. The proposed ordinances will amend the Los Angeles Municipal Code (LAMC) to enable streamlined project review procedures, introduce bold new incentives for eligible project types near transit, jobs, along corridors, and in Higher Opportunity Areas, and strengthen tenant protections in order to expand and protect access to affordable housing. Following the City Planning Commission public hearing and recommendation to City Council, the City Council will also conduct a public hearing prior to considering adoption of the Program. After adoption, the ordinances comprising the Program will be submitted to HCD for final certification.

FINDINGS

Program Findings and Discussion

Several sets of findings are required to adopt the Program, including consistency with the General Plan and various state housing laws (Housing Element and State Density Bonus).

A. City Charter Findings

City Charter Section 556 and 558, and LAMC Section 13B.1.3 - Charter Sections 556 and 558 and LAMC Section 13B.1.3 require the City Planning Commission and the City Council to adopt the following findings when taking any action to amend zoning or other land use regulations concerning permissible uses, height, density, bulk, location or use of buildings or structures, size of yards, open space, setbacks, building line requirements, and other similar requirements (collectively zoning ordinances):

- (1) The zoning ordinance is in substantial conformance with the purposes, intent, and provisions of the General Plan.
- (2) The zoning ordinance is in conformity with public necessity, convenience, general welfare, and good zoning practice
- (3) Other findings required by law

Pursuant to City Charter Section 556 and 558, and LAMC Section 13B.1.3, the proposed Citywide Housing Incentive Program (CHIP) Ordinance, Resident Protections (RP) Ordinance, and Housing Element Sites and Minimum Density (HESMD) Ordinance as part of the 2021 - 2029 Housing Element RHNA Re-zoning Program 121 are in substantial conformance with the purpose, intent and provisions of the General Plan. The CHIP, RP, and HESMD ordinances, hereafter referred to as “the Program”, are also in conformance with the public necessity, convenience, general welfare and good zoning practice and other laws. In particular, they respond to the City’s acute housing crisis, which negatively impacts the general welfare with high rates of homelessness, overcrowding and unaffordable rents. Incentives for new housing with deed restricted affordable units will increase the housing supply in strategically selected areas according to good zoning practice. These areas are characterized as having strong transportation service, existing infrastructure, access to jobs and amenities and existing resources linked to better life outcomes for residents.

B. General Plan Consistency Findings

General Plan Consistency Requirement – State law requires that the General Plan have horizontal internal consistency among its elements (California Government Code Section 65300.5). The City Charter and California Government Code Section 65860(d) require zoning ordinances to be vertically consistent with the General Plan. The 2021-2029 Housing Element

and the RHNA Re-zoning Program 121 set forth in that document were found to possess internal consistency with the General Plan at the time of The 2021-2029 Housing Element adoption. Those findings are updated to demonstrate the vertical consistency between the proposed zoning ordinances of the Program and the General Plan to comply with City Charter Sections 556 and 558, and LAMC Section 13B.1.3. This consistency discussion is provided for the City Planning Commission's consideration in approving and recommending the Program and its determination that the Program is consistent with the City's General Plan.

For all the reasons provided below, the proposed Program is consistent with the City of Los Angeles General Plan, in that it is compatible with the objectives, policies, general land uses, and programs of the General Plan and will not inhibit or obstruct their attainment.

The Housing Element

The Program is consistent with the goals, objectives, policies, and programs of the 2021-2029 Housing Element, and is required under state Housing Element law (California Government Code Section 65583(c)(1)(A)). The 2021-2029 Housing Element Program 121 RHNA Re-zoning identified a rezoning need of 255,433 units and established an objective to conduct citywide rezoning to meet RHNA Targets by 2024⁷. The program states, "To accommodate the remaining RHNA of 255,433 units, LACP will identify and recommend rezoning for a minimum of 124,880 moderate and above moderate units and a minimum of 130,553 lower income (VLI and LI) units by October 30, 2024." More than 50% of lower income rezoning will occur on sites with exclusively residential uses or allowing 100% residential uses (non-commercial zones). All lower income sites will have a density allowance of at least 20 units per acre. Rezoned sites will permit owner-occupied and rental multi-family uses by-right pursuant to CA Govt. Code § 65583.2(i) for developments in which 20 percent or more of the units are affordable to lower income households and will be selected from sites identified in the parcel listing (Appendix 4.7). As reflected in Appendix 4.7, each development site has the capacity to accommodate at least 16 units and will be available for development in the planning period where water, sewer, and dry utilities can be provided"⁸. The CHIP, RP, and HESMD Ordinances implement the obligations and vision outlined in Program 121.

As a core implementation program of the 2021-2029 Housing Element, the Program strongly furthers its goals, objectives, policies and programs. The five goals that guide the 2021-2029 Housing Element are listed below, along with the most relevant objectives and policies.

Goal 1

A City where housing production results in an ample supply of housing to create more equitable and affordable options that meet existing and projected needs.

⁷ 2021-2029 Housing Element, Chapter 6, pg 343

⁸ 2021-2029 Housing Element, Chapter 6, pg 343

Objective 1.1: Forecast and plan for existing and projected housing needs over time with the intention of furthering Citywide Housing Priorities.

Policy 1.1.7: Incentivize production of mixed-income and 100% Affordable Housing projects by rezoning for more inclusive development at densities that enable their construction in every geography.

Policy 1.1.8: Introduce more flexible zoning and incentives for existing lower density residential areas to create opportunities for more “missing middle” low-scale housing typologies, particularly in Higher Opportunity Areas.

Objective 1.2: Facilitate the production of housing, especially projects that include Affordable Housing and/or meet Citywide Housing Priorities.

Policy 1.2.1: Expand rental and for-sale housing for people of all income levels. Prioritize housing developments that result in a net gain of Affordable Housing and serve those with the greatest needs.

Policy 1.2.2: Facilitate the construction of a range of different housing types that addresses the particular needs of the City’s diverse households.

Policy 1.2.5: Streamline the housing approval process, particularly for Affordable Housing, throughout City departments.

Policy 1.2.6: Create new citywide and local land use incentives and programs that maximize the net gain of affordable housing and produce housing that meets Citywide Housing Priorities. Explore varied affordability ratios, the feasibility of inclusionary zoning requirements, and a greater mix of incomes based on market areas.

Policy 1.2.8: Develop and implement new land use and financing tools to promote more housing that is affordable to those with the lowest incomes and for longer periods of time.

Policy 1.2.9: Allow for zoning flexibility for Affordable Housing at the project review and planning levels when broader Citywide Priorities are being advanced.

Policy 1.2.10: Prioritize the development of Affordable Housing on public land.

Objective 1.3: Promote a more equitable distribution of affordable housing opportunities throughout the city, with a focus on increasing Affordable Housing in Higher Opportunity Areas and in ways that further Citywide Housing Priorities.

Policy 1.3.1: Prioritize housing capacity, resources, policies and incentives to include Affordable Housing in residential development, particularly near transit, jobs, and in Higher Opportunity Areas.

Policy 1.3.2: Prioritize the development of new Affordable Housing in all communities, particularly those that currently have fewer Affordable units.

The proposed Program is based on a detailed assessment of existing and projected housing needs through the Housing Element process. It creates housing opportunities for a larger array of sites than required by state law to meet the scale of housing challenges in Los Angeles. The Program is designed to create a more equitable and affordable city by providing development incentives citywide and tailoring incentives to prioritize areas near transit, jobs, and in Higher Opportunity Areas. Elements of the CHIP Ordinance introduce more flexible zoning incentives for lower density residential development in Corridor Transition Areas to create opportunities for more “missing middle” housing typologies, and tailored incentives for majority affordable housing on sites with lower base densities. Those with the greatest housing needs are being prioritized throughout the CHIP ordinance with the inclusion of an acutely low income Category, family sized unit incentives, senior housing incentives, student housing incentives, and incentives for 100 percent affordable developments. The CHIP ordinance further provides varied affordability ratios based on market areas, new incentives for mixing income categories within developments, and creates both for sale and rental housing incentives for various building scales.

The CHIP’s Affordable Housing Incentive Program (AHIP) also prioritizes the development of affordable housing on public land, Public Facility (PF) zones, Parking (P) zones, and underutilized Faith-Based Organization owned sites by providing unique incentives for these areas. Both the CHIP and HESMD Ordinances establish streamlined review paths for projects providing affordable units, removing barriers to the production of affordable housing. Specifically, the HESMD Ordinance contains minimum density provisions to help ensure that multi-family zoned sites in High or Medium High Residential Market Areas (pursuant to the Affordable Housing Linkage Fee) are redeveloped at densities that support the inclusion of more affordable housing types including restricted affordable units. The Program also streamlines the housing approval process for projects that include affordable housing, ensures the net gain of affordable housing through provisions of the RPO and will produce housing that meets 2021-2029 Citywide Housing Priorities.

Goal 2

A City that preserves and enhances the quality of housing and provides greater housing stability for households of all income levels.

Objective 2.1: Strengthen renter protections, prevent displacement and increase the stock of affordable housing.

Policy 2.1.1: Incentivize and/or require the preservation and replacement of affordable housing, so demolitions and conversions do not result in the net loss of the City's stock of accessible, safe, healthy and affordable housing.

Policy 2.1.4: Strengthen tenant protections by expanding tenants' rights, enforcement, and legal assistance needed to access those rights.

Policy 2.1.5: Expand the right of first refusal to ensure displaced households may occupy replacement housing units that are comparable in size, location, cost, and rent control protection.

As mentioned previously, incentives are tailored according to the base densities of existing sites and their proximity to different types of transit service and Higher Opportunity Areas, creating more "missing middle" housing and mid-density multi-family typologies. The RPO codifies important citywide standards that ensure the quality and fairness of available new affordable units, protecting existing occupants and preventing the net loss of affordable housing units. Affected tenants are afforded certain rights such as the right to return to replacement units, the right to remain, the right to relocation and the right to return to the new development. Tenant rights are being strengthened by providing new notification requirements, as well as a right of private action if these rights are not provided. In order to comply with fair housing law and ensure equity in new housing developments, the proposed ordinance would establish the authority of the City to create and enforce requirements regarding the unit mix, unit size, quality and amenities, access to and distribution of affordable housing units (See LAMC 16.61 B). Affordability covenants are being lengthened to 99 years, which will provide for greater housing stability for all housing programs in the City, including those in CHIP. Additional income levels are being incorporated into the Program by including Acutely Low Income and expanding the use of Extremely Low Income.

Objective 2.2: Promote more affordable ownership opportunities and ownership retention strategies, with an emphasis on stability and wealth building for underserved communities.

Policy 2.2.1: Expand ownership models that increase the ability for households to attain homeownership, including alternative forms of shared- and limited-equity ownership.

Within the CHIP program are tailored incentives to expand home ownership opportunities and equity building for more households and underserved communities. In the MIIP program, the Corridor Transition incentive area offers increased density alongside reduced lot sizes, setbacks, and access requirements when either Very Low Income, Low Income, or Moderate Income units are provided. Minimum density provisions for multi-family zoned sites in High or Medium High Residential Market Areas will facilitate lower density housing typologies that may create ownership opportunities for more households. AHIP incentives in the CHIP Ordinance extend land use incentives to Shared Equity Projects on land owned by nonprofit community land trusts, limited equity cooperatives, and workforce housing cooperatives. Incentives are intended to

encourage a mix of housing types on these lands that includes limited equity for sale projects that can help income qualified individuals build wealth.

Goal 3

A City in which housing creates healthy, livable, sustainable, and resilient communities that improve the lives of all Angelenos.

Objective 3.1: Use design to create a sense of place, promote health, foster community belonging, and promote racially and socially inclusive neighborhoods.

Policy 3.1.1: Provide incentives and financial support for the preservation of historic residential structures, particularly for lower-income households.

Policy 3.1.2: Promote new development that furthers Citywide Housing Priorities in balance with the existing architectural and cultural context.

Policy 3.1.3: Develop and implement design standards that promote quality residential development.

Policy 3.1.4: Site buildings and orient building features to maximize benefit of nearby amenities and minimize exposure to features that may result in negative health or environmental impacts.

Policy 3.1.5: Develop and implement environmentally sustainable urban design standards and pedestrian-centered improvements in development of a project and within the public and private realm such as shade trees, parkways and comfortable sidewalks.

Policy 3.1.6: Establish plans and development standards that promote positive health outcomes for the most vulnerable communities and populations.

Policy 3.1.9: Encourage “convertible design” of above ground parking structures in transit rich areas so they can later be converted to housing.

Objective 3.2: Promote environmentally sustainable buildings and land use patterns that support a mix of uses, housing for various income levels and provide access to jobs, amenities, services and transportation options.

Policy 3.2.1: Promote the integration of housing with other compatible land uses at both the building and neighborhood level.

Policy 3.2.2: Promote new multi-family housing, particularly Affordable and mixed-income housing, in areas near transit, jobs and Higher Opportunity Areas, in order

to facilitate a better jobs-housing balance, help shorten commutes, and reduce greenhouse gas emissions.

Policy 3.2.8: Provide incentives and promote flexibility for the conversion of non-residential structures to new housing in order to reduce the carbon footprint resulting from demolition and new construction.

The CHIP Ordinance encourages housing production near transit and in Higher Opportunity Areas through tailored density bonuses and development incentives that will provide relief from FAR, height, and minimum parking regulations. Residential growth in these areas will help shorten commutes and facilitate a better jobs-housing balance while also furthering citywide goals concerning livability, sustainability, and resilience. This will also help spur construction of new affordable and mixed-income housing subject to the current Los Angeles Green Building Code, which is intended to promote environmentally sustainable buildings. The CHIP Ordinance also contains tailored incentives to encourage the preservation of Designated and Eligible historic resources and incentivizes mixed-use buildings with active ground floors. Finally, the Program has been designed to exclude sites and limit incentives in areas with high environmental risk where residential growth would not prioritize the creation of healthy and resilient communities including in Very High Fire Hazard Severity Zones and the Coastal Zone. Furthermore, the CHIP Ordinance contains provisions for mitigation and distancing from Environmental Consideration Areas through requiring compliance with the new Environmental Protection Measures Handbook, which will assist in reducing hazardous risks to human health and negative environmental impacts.

Goal 4

A City that fosters racially and socially inclusive neighborhoods and corrects the harms of historic racial, ethnic, and social discrimination of the past and present.

Objective 4.1: Ensure that housing opportunities are accessible to all residents without discrimination on the basis of race, color, ancestry, sex, national origin, color, religion, sexual orientation, gender identity, marital status, immigration status, family status, age, intellectual, developmental, and physical disability, source of income and student status or other arbitrary reason.

Policies 4.1.1: Promote and facilitate equal opportunity practices in the construction, provision, sale and rental of housing.

Policy 4.1.5: Eliminate housing accessibility barriers that disproportionately affect populations in protected classes and special needs populations.

Objective 4.3: Affirmatively further fair housing in all housing and land use programs by taking proactive measures to promote diverse, inclusive communities that grant all Angelenos access to housing, particularly in Higher Opportunity Areas, increase place-

based strategies to encourage community revitalization and protect existing residents from displacement.

Policy 4.3.1: Increase access and transparency in the lease-up process for restricted Affordable Housing units, particularly for those who have experienced or are at-risk of displacement and those who may not be aware of Affordable Housing choices.

Policy 4.3.2: Ensure that all neighborhoods have a range of housing typologies to provide housing options for residents to remain in the same community, when and if their needs change.

Policy 4.3.3: Examine land use practices that perpetuate racial exclusion and inequities including but not limited to: single-family / low density zoning, minimum lot size requirements, location of noxious uses, and subjective design review standards. Introduce context specific reforms that further Citywide Housing Priorities

Policy 4.3.4: Advance place-based strategies that create opportunities and financial strength in areas of disinvestment and with a history of predatory financial practices through asset-building shared equity homeownership that creates stability and mitigates displacement pressures through community control.

The Program will advance mixed-income, 100% affordable housing projects, and shared equity projects that will foster more racially and socially inclusive neighborhoods. The CHIP prioritizes expanding housing options in Higher Opportunity Areas to address historic and present land use patterns that concentrate housing in areas with fewer resources and opportunities. For example, only 14% of the deed restricted affordable units permitted citywide between 2013 and 2021 were located in Higher Opportunity Areas, despite these neighborhoods accounting for 35% of the City's census tracts. Focusing incentives in Higher Opportunity Areas helps to create more equitable and affordable housing options for City residents. The CHIP program further offers incentives for various housing typologies citywide near transit, with incentives scaled to residential and commercial zones in addition to higher and lower intensities. Within CHIP, the AHIP will offer a new incentive model for community land trusts, creating new equity sharing tools to help strengthen housing stability and build generational wealth among income qualified persons. The HESMD Ordinance also establishes minimum density provisions for multi-family zones in High or Medium High Residential Market Areas to ensure that there is more housing production in these areas.

The RPO codifies important fair housing requirements regarding unit mix, unit size, quality and amenities, and access to and distribution of affordable housing units in mixed-income housing development projects, to ensure compliance with fair housing law. In order to increase transparency in the lease up process, the RPO would establish code requirements for affirmative marketing and outreach requirements based on current LAHD practice, as well as require

affordable units be made available for rent on the Affordable and Accessible Housing Registry (or any equivalent registry managed by LAHD) to the extent feasible. LAHD has implemented affirmative marketing requirements for projects that have land use covenanted units, such as projects that have used a density bonus. This means that owners of these projects are required to list their affordable units on LAHD's Affordable and Accessible Housing Registry. This new requirement to list on the Registry is applied to new projects with covenants executed after October 1, 2021. These new projects are expected to receive their Certificates of Occupancy as early as 2024. The RPO also attempts to prioritize Restricted Affordable Units in mixed-income housing development projects for those with identified housing needs. These priority populations include those displaced pursuant to provisions in the Ellis Act and LAMC 151.22 to 151.28, lower income residents impacted by a rent increase due to the termination of affordability restrictions, and residents displaced due to natural disasters and other code enforcement orders issued for uninhabitable units.

Goal 5

A City that is committed to preventing and ending homelessness.

Objective 5.1: Provide an adequate supply of short-term and permanent housing in addition to supportive services throughout the City that are appropriate for and meet the specific needs of all persons who are homeless or at-risk of homelessness.

Policy 5.1.5: Expand housing, shelter, and supportive services for the homeless and special needs populations in all communities, and reduce zoning and other regulatory barriers to their placement and operation.

The Program aims to increase housing supply with a diverse range of typologies through incentives and streamlining, to provide more housing options and greater housing stability to all Los Angeles residents. Within the CHIP Ordinance, new incentives for 100% affordable housing will expand permanent housing options for those who are homeless and at risk of homelessness. Furthermore the incentives will alleviate constraints on land with existing zoning barriers including Parking (P) zones, Public Facility (PF) zones, on publicly owned land, and on land owned by Faith-Based Organizations. In addition, the RPO increases housing preservation, occupant protections and replacement requirements that help ensure the creation of new housing does not result in homelessness.

Housing Element Programs

As mentioned previously, the proposed Program implements RHNA Re-zoning Program 121 and related goals and policies. The CHIP Ordinance also implements the following programs in the 2021-2029 Housing Element: 4, 11, 13, 15, 48, 54, 57, 62, 103, 122, 124, 125. The RPO implements programs 28, 29, 45, 87, 121, 122, and 124. The HESMD Ordinance implements programs 28, 29, 46, 54, 57, 61, 121, and 124. These programs are either wholly implemented by the ordinances or are implemented in collaboration with other lead agencies.

Program 124

The Program Affirmatively Furthers Fair Housing (AFFH) is consistent with California Government Code 65583(c)(1)(2)(10)) and Program 124 in the 2021-2029 Housing Element. The Affirmatively Furthering Fair Housing (AFFH) Program (Program 124) of the 2021 - 2029 Housing Element established the following specific strategies and actions to address the primary AFFH issue areas:

Affirmatively Furthering Fair Housing (AFFH) Program 124 Applicable Strategies, Actions, and Implementing Program Summaries	
<i>Strategies and Actions</i>	<i>Implementing Program Summaries</i> (see individual Programs for detailed Objectives and Program Descriptions)
<p>A. Prioritize and expand housing choices for those with the greatest housing needs, including those with the lowest incomes, persons with disabilities, seniors, large families, and victims of domestic violence.</p>	<p>48 and 121: Create new incentives for senior and other special needs housing through the update to the City’s affordable housing incentive programs by 2024.</p> <p>81: Create tailored affordability incentives that account for identified local needs such as insufficient senior, large family units, or multigenerational living, as local plans are adopted. Ensure local plans increase the production and availability of Affordable and accessible housing.</p>
<p>D. Promote a more equitable distribution of affordable housing opportunities throughout the city, with a focus on incentivizing or requiring Affordable Housing in Higher Opportunity Areas.</p>	<p>48, 65 and 121: Create a tailored set of streamlining and development incentives to prioritize 100% affordable housing projects. Expand where mixed income projects may be created, with a particular focus in Higher Opportunity Areas, by 2024. Introduce context specific reforms to zoning and land use practices to increase housing choices and affordability, particularly in Higher Opportunity Areas (see figures in Chapter 4, the candidate sites for rezoning in Appendix 4.7 and associated website maps). Target more than half of rezoning efforts in Higher Opportunity Areas.</p>
<p>E. Prioritize local resources, such as funding and public land, in areas of high opportunity, and evaluate revisions to funding metrics or</p>	<p>15: Increase the utilization of public land for affordable housing with particular emphasis in high resource and gentrifying areas; Identify</p>

<p>policies that may act as a barrier to projects locating in high resource areas. Seek partnerships with other public and private entities to facilitate new potential development sites in these areas for affordable housing</p>	<p>publicly owned housing opportunity sites and issue RFPs to develop the sites by 2023, and annually thereafter; Ensure AFFH is incorporated into the public land selection process. Rezone PF (Public Facility) zoned public to allow affordable housing by-right through rezoning process by 2024; Maintain a publicly accessible citywide inventory of publicly owned sites. Prioritize public land for new models of affordable housing development and control (see Program 16).</p>
<p>F. Develop pathways to homeownership for lower and moderate income households, including targeted down payment assistance and increasing opportunities for community ownership of housing.</p>	<p>3 and 4: Facilitate new types of subdivisions and shared ownership models to encourage more affordable ownership typologies. Prepare an amendment to the zoning code by 2024 to facilitate innovation in more affordable types of for-sale subdivisions. Create accessible online and physical educational resources, and partner with community organizations, especially in gentrifying communities and communities of color, to assist existing or prospective homeowners to better understand options to increase equity and wealth creation by 2023.</p>
<p>K. Require the replacement of affordable housing and the right to return for existing residents, including relocation expenses</p>	<p>28 and 29: Require new housing developments to replace all affordable housing units lost due to new development. Record approximately 200 affordable housing replacement covenants per year. Extend replacement and right to return requirements prior to expiration of Housing Crisis Act in 2030 and evaluate best way to strengthen current requirements in order to make enhancements part of the Density Bonus update by 2024.</p>

The Program implements these strategies and actions by providing greater incentives to projects offering more restricted affordable units, particularly in Higher Opportunity Areas and near transit. Analysis conducted for compliance with state Housing Element Law (see Section C) indicates more than 50% of the Program’s added housing capacity is in Higher Opportunity Areas. Of the Program’s proposed housing capacity, approximately 54% of the overall capacity is located in Higher Opportunity Areas, with 64% and 51% of capacity located in Lower Income Category and Moderate Income Category in Higher Opportunity Areas, respectively. The CHIP incorporates an

acutely low income category to include income levels up to 15% of Area Median Income in the incentive structure, to create housing for those with the greatest need. Additionally, the Density Bonus program codifies incentives for target populations such as seniors and people with disabilities. Public Benefit Options such as child care facilities and multi-bedroom units encourage housing types for large families at lower income levels. The AHIP provides unique incentives for projects on public land to utilize public resources more effectively for housing and introduces a shared equity project type to encourage community land trust and limited equity cooperative housing models that help income qualified households build wealth through equity restricted ownership. The RP ordinance ensures that replacement of affordable units occurs across new development and that existing residents have a right to return, minimizing displacement risk and making the creation of new housing fair for existing residents. The HESMD Ordinance establishes minimum densities on Lower Income Rezoning Sites in high market tiers and requires no net loss findings for parcels included on The Housing Element's Adequate Inventory of Sites.

The Framework Element

The Program is consistent with and carries out the long-range growth goals, objectives, and policies of the Framework Element of the General Plan (adopted in 1996). This section contains a discussion showing the consistency between the Program and Framework Element.

The General Plan Framework Element sets forth a citywide comprehensive long-range growth strategy and defines citywide policies regarding the following categories: growth and capacity, land use, housing, urban form, neighborhood design, open space and conservation, economic development, transportation, infrastructure, and public services. Therefore, the following discussion is organized by the categories found in the Framework Element below:

Growth and Capacity

With regards to growth and capacity, the State of California requires that cities update the Housing Element of their General Plan every eight years to accommodate a share of their region's projected growth. This process is based on the City's RHNA allocation, which quantifies the need for housing within that jurisdiction over an eight year planning period. In 2020, the Southern California Association of Governments (SCAG) determined that the City must accommodate a RHNA allocation of 456,643 housing units, including 184,721 units at lower income levels. While this number of housing units exceeds the Framework Element's 2010 estimates that corresponded with SCAG's forecast for that year, the current RHNA allocation reflects a 2029 time horizon. The Framework Element is a plan to accommodate future growth – the population and housing estimates noted in the plan do not represent maximum or minimum levels of permitted growth. The Framework Element's estimated population and household figures for 2010 have yet to be reached and remain relevant, as do the Framework policies, even if housing needs anticipated by the RHNA exceed these figures. Therefore, the Program's growth and capacity targets are not inconsistent with the Framework Element goals, policies and objectives. The Program accommodates the City's forecasted growth and existing need for housing and does not induce unplanned growth.

Land Use

The Program is consistent with respect to the General Plan Framework Element's goals, objectives, and policies related to **Land Use**. Since the Program does not alter the underlying land use of parcels to increase housing supply, but rather incentivizes additional housing where already permitted, the land use will remain balanced citywide except where the unbalanced lack of housing in Higher Opportunity Areas will be corrected. With regard to Land Use, the General Plan Framework Element states the following:

Framework Goal 3A

A physically balanced distribution of land uses that contributes towards and facilitates the City's long-term fiscal and economic viability, revitalization of economically depressed areas, conservation of existing residential neighborhoods, equitable distribution of public resources, conservation of natural resources, provision of adequate infrastructure and public services, reduction of traffic congestion and improvement of air quality, enhancement of recreation and open space opportunities, assurance of environmental justice and a healthful living environment, and achievement of the vision for a more liveable city.

Objective 3.1 Accommodate a diversity of uses that support the needs of the City's existing and future residents, businesses, and visitors.

Policy 3.1.4 Accommodate new development in accordance with land use and density provisions of the General Plan Framework Long-Range Land Use Diagram.

Policy 3.1.6 Allow for the adjustment of General Plan Framework Element land use boundaries to account for changes in the location or introduction of new transit routes and stations (or for withdrawal of funds) and, in such cases, consider the appropriate type and density of use generally within one quarter mile of the corridor and station to reflect the principles of the General Plan Framework Element and the Land Use/Transportation Policy.

Objective 3.2 Provide for the spatial distribution of development that promotes an improved quality of life by facilitating a reduction of vehicular trips, vehicle miles traveled, and air pollution.

Policy 3.2.2 Establish, through the Framework Long-Range Land Use Diagram, community plans, and other implementing tools, patterns and types of development that improve the integration of housing with commercial uses and the integration of public services and various densities of residential development within neighborhoods at appropriate locations.

Objective 3.3 Accommodate projected population and employment growth within the City and each community plan area and plan for the provision of adequate supporting transportation and utility infrastructure and public services.

Policy 3.3.1 Accommodate projected population and employment growth in accordance with the Long-Range Land Use Diagram and forecasts in Table 2-2 (see Chapter 2: Growth and Capacity), using these in the formulation of the community plans and as the basis for the planning for and implementation of infrastructure improvements and public services.

Objective 3.4 Encourage new multi-family residential, retail commercial, and office development in the City's neighborhood districts, community, regional, and downtown centers as well as along primary transit corridors/boulevards, while at the same time conserving existing neighborhoods and related districts.

Policy 3.4.1 Conserve existing stable residential neighborhoods and lower-intensity commercial districts and encourage the majority of new commercial and mixed-use (integrated commercial and residential) development to be located (a) in a network of neighborhood districts, community, regional, and downtown centers, (b) in proximity to rail and bus transit stations and corridors, and (c) along the City's major boulevards, referred to as districts, centers, and mixed-use boulevards, in accordance with the Framework Long-Range Land Use Diagram (Figure 3-1 and 3-2).

Policy 3.4.3 Establish incentives for the attraction of growth and development in the districts, centers, and mixed-use boulevards targeted for growth that may include:

- a. Densities greater than surrounding areas,
- d. Streamlined development review processes,
- e. "By-right" entitlements for development projects consistent with the community plans and zoning,
- f. Modified parking requirements in areas in proximity to transit or other standards that reduce the cost of development, and
- g. Pro-active solicitation of development.

The proposed Program supports and is consistent with the Framework Goal 3A and its associated policies and objectives. It will implement the 2021-2029 Housing Element plan for local and citywide housing growth while also conserving existing residential neighborhoods.

The CHIP incentivizes housing production in Higher Opportunity Areas primarily through the MIIP's Opportunity Corridors and Opportunity Corridor Transition Areas. These programs are in line with Goal 3A's first direction to balance land uses as well as more equitably distribute public resources such as affordable housing. The proposed Program acknowledges that a focus on Higher Opportunity Areas needs to be balanced with other growth considerations outlined in the

Framework Element including the importance of locating new housing near high-quality transit and jobs while avoiding hazardous and ecologically sensitive areas. For these reasons, the MIIP is not applicable in Very High Fire Severity Zones, Areas Vulnerable to Sea Level Rise or the Coastal Zone unless the project is utilizing State Density Bonus or is a project otherwise eligible for State Density Bonus utilizing the AHIP. The more generous incentives for housing near transit in both the AHIP and MIIP advance Policy 3.1.6 and Objective 3.2 of the Framework Element emphasis on bringing housing closer to job centers. This will help reduce vehicular trips, vehicle miles traveled, and corresponding air pollution. Overall, the Program seeks to support the vision of an equitable, livable, and sustainable city that meets the needs of the population through a thoughtful, balanced distribution of different housing types.

Objectives 3.3 and 3.4 are furthered by the CHIP, which encourages housing at different densities, sizes, and affordability levels citywide to meet the housing needs of a diverse population. The CHIP promotes housing along corridors and boulevards but does not propose changes to the underlying zoning or land use which are used as the basis for new incentives, consistent with Framework Element Policy 3.4.1 and Policy 3.1.4 to accommodate growth in accordance with the designated land use and density of the Framework Element's Long-Range Land Use Diagram. Incentives encourage mixed-use development in commercial zones while also meeting the rezoning requirement in state Housing Element law that over half of lower income sites are parcels zoned exclusively for residential uses (California Government Code Section 665832.2(h)). If the Program did not meet this requirement, the City would have to allow 100 percent residential projects by-right in areas with overlays requiring mixed-use, and dedicate 50 percent of development floor area to residential use in all mixed use projects (see Section C for further discussion). This would compromise The Framework Element's Objective 3.4 to encourage a mix of uses along primary transit corridors.

Consistent with Framework Element Policy 3.4.1, the RPO will help conserve existing stable residential neighborhoods by requiring replacement of deed-restricted affordable and rent stabilized units on sites of redevelopment projects. Replacement and relocation requirements stabilize the existing housing stock and minimize displacement by ensuring that redevelopment is limited to sites where a significant amount of new housing can be produced.

The Program incentivizes stable growth in areas with transportation and stronger resources typical of Higher Opportunity Areas. These updates utilize the existing General Plan land use and zoning. Since new housing is being incentivized near transit infrastructure and/or in Higher Opportunity Areas, it is anticipated that this new development would be served by sufficient public infrastructure and services in the city.

Single-Family Neighborhoods

The Program is consistent with the goals, objectives, and policies related to single-family neighborhoods. With respect to Single-Family Neighborhoods, the General Plan Framework Element states the following:

Framework Goal 3B

Preservation of the City's stable single-family residential neighborhoods.

Objective 3.5 Ensure that the character and scale of stable single-family residential neighborhoods is maintained, allowing for infill development provided that it is compatible with and maintains the scale and character of existing development.

Objective 3.6 Allow for the intensification of selected single-family areas that directly abut high-density development as "transitions" between these uses.

Policy 3.6.1 Ensure that the new development of "duplex" or multi-family units maintains the visual and physical character of adjacent single-family neighborhoods, including the maintenance of front property setbacks, modulation of building volumes and articulation of facade to convey the sense of individual units, and use of building materials that characterize single-family housing.

Policy 7.9.3 Preserve existing single-family neighborhoods throughout the City to assure a continuing supply of variously priced single-family homes from the existing inventory.

The proposed Program is consistent with the Framework Element single-family preservation goals, objectives and policies in that it does not include areas planned and zoned for single-family uses except in limited circumstances.

Multi-Family Neighborhoods

The Program is consistent with the goals, objectives and policies related to Multi-Family Neighborhoods in the General Plan Framework Element. With respect to Multi-Family Neighborhoods, the General Plan Framework Element states the following:

Framework GOAL 3C

Multi-family neighborhoods that enhance the quality of life for the City's existing and future residents.

Objective 3.7 Provide for the stability and enhancement of multi-family residential neighborhoods and allow for growth in areas where there is sufficient public infrastructure and services and the residents' quality of life can be maintained or improved.

Policy 3.7.1 Accommodate the development of multi-family residential units in areas designated in the community plans in accordance with Table 3-1 and Zoning Ordinance densities indicated in Table 3-3, with the density permitted for each parcel to be identified in the community plans.

Policy 3.7.3 Allow the reconstruction of existing multi-family dwelling units destroyed by fire, earthquakes, flooding, or other natural catastrophes to their pre-existing density in areas wherein the permitted multi-family density has been reduced below the pre-existing level.

The proposed Program is consistent with the Framework Element in that it encourages multi-family housing that enhances quality of life. The CHIP contains programs that promote new multi-family housing, particularly affordable and mixed-income housing, in areas near transit stations, jobs, and in Higher Opportunity Areas. Furthermore, the HESMD Ordinance supports the ability to reconstruct after a disaster, furthering Policy 3.7.3.

Boulevards and Adjacent Residential Neighborhoods

The Program is consistent with and furthers the General Plan Framework Element's emphasis on the intermix of boulevards with a mix of uses that include housing and economic opportunities alongside residential neighborhoods. With respect to this development pattern, the Framework Element states:

Framework Goal 3I

A network of boulevards that balance community needs and economic objectives with transportation functions and complement adjacent residential neighborhoods.

Objective 3.13 Provide opportunities for the development of mixed-use boulevards where existing or planned major transit facilities are located and which are characterized by low-intensity or marginally viable commercial uses with commercial development and structures that integrate commercial, housing, and/or public service uses.

Policy 3.13.3 Encourage the inclusion of public service uses (e.g., day and elder care, community meeting rooms, and recreational facilities), school classrooms, cultural facilities (museums and libraries), and similar uses in mixed-use structures.

Policy 3.13.4 Provide adequate transitions where commercial and residential uses are located adjacent to one another.

Policy 3.13.5 Support the development of recreational and small parks in areas developed with mixed-use structures.

The Program generally does not change underlying zoning or alter use categories, and is therefore consistent with this goal and related policies to develop mixed use boulevards adjacent to residential neighborhoods. Instances where multi-family housing is allowed where otherwise not permitted are largely limited to areas where state law has already made the changes, including land owned by Faith-Based Organizations, Parking (P) zones, on publicly owned land or Public Facility (PF) zones, and on sites with land uses or Specific Plan uses which permit residential.

The CHIP's MIIP further supports Framework Goal 3I through the Opportunity Corridors and Opportunity Corridor Transition Area incentive areas. Opportunity Corridors will generally support 3-7 story mixed use or 100% residential projects on major corridors while Opportunity Corridor Transition Areas will enable "Missing Middle" housing typologies within 750 feet of these corridors, further supporting Policy 3.13.4 for providing adequate transitions where commercial and residential uses are adjacent.

All CHIP programs offer Public Benefit Options that provide additional incentives in exchange for child care facilities or privately owned open space, consistent with policies 3.13.3 and 3.13.5. Another Public Benefit Option exempting a portion of active ground floor uses from floor area calculation encourages the inclusion of commercial or social service enterprises in developments where zoning already allows for those uses.

Transit Stations

The Program's incentive structure is consistent with the intent of the General Plan Framework Element to encourage new development in proximity to rail and bus transportation corridors and stations. This considerable mix of uses should be accommodated to provide population support and enhance activity near the stations.

With respect to transit stations, the General Plan Framework Element states the following:

Objective 3.15 Focus mixed commercial/residential uses, neighborhood-oriented retail, employment opportunities, and civic and quasi-public uses around urban transit stations, while protecting and preserving surrounding low-density neighborhoods from the encroachment of incompatible land uses.

Policy 3.15.3 Increase the density generally within one quarter mile of transit stations, determining appropriate locations based on consideration of the surrounding land use characteristics to improve their viability as new transit routes and stations are funded in accordance with Policy 3.1.6.

Policy 3.15.4 Design and site new development to promote pedestrian activity and provide adequate transitions with adjacent residential uses.

The CHIP Ordinance is consistent with the Framework Element in that it encourages multi-family and mixed-use residential development, particularly affordable housing, in areas of the City that have quality transit stations and a range of employment opportunities supported by commercial services and amenities through the transit and transit-opportunity incentive package in the MIIP. Throughout the MIIP and AHIP, incentives are tailored to sites where the Maximum Allowable Residential Density is less or greater than five units, thereby balancing the distribution of housing consistent with existing density contexts and Objective 3.15. With regard to Framework Element Policy 3.15.4, all CHIP projects are subject to citywide design standards as well as the proposed the Landscape and Site Design Ordinance, but the MIIP specifically incentivizes development

through transit to promote walkability, utilizes Corridor Transition incentives to provide adequate residential transitions, and imposes performance standards such as additional open space and frontage requirements on Corridor Transition projects to promote a more vibrant and walkable streetscape.

Historic and Architectural Districts

The Program includes sufficient historical resource protections to be consistent with the how the General Plan Framework Element seeks to balance the benefits of historic and architectural assets with the need for new development as stated in the following goal and policy:

Framework Goal 3M

A City where significant historic and architectural districts are valued.

Policy 3.17.2 Develop other historic preservation tools, including transfer of development rights, adaptive reuse, and community plan historic preservation policies.

The CHIP balances streamlined review processes and tailored incentives with protections for Designated and Eligible Historic Resources. The CHIP offers review processes consistent with State Law. However, where local incentives exceed state law in the MIIP and AHIP, the Ordinance includes additional demolition and review protections for Designated and Surveyed Historic Resources. Furthermore, the CHIP offers new incentives to encourage the retention of eligible historic features by offering Public Benefit incentives for the retention of eligible historic building facades. This incentive was developed based on the public comment of the Los Angeles Conservancy. In addition, the HESMD Ordinance includes provisions to exempt historic resources from minimum density requirements. Similarly, historic resources have been removed from the inventory of Lower Income Sites subject to by-right review and minimum density requirements.

Urban Form and Neighborhood Design

The Program is consistent with the goals, objectives, and policies in respect to **Urban Form and Neighborhood Design** through the use of tailored incentives, Menus of Incentives, Public Benefit Options, and performance standards. The General Plan Framework Element states the following regarding Urban Form and Neighborhood Design:

Framework Goal 5A

A liveable City for existing and future residents and one that is attractive to future investment. A City of interconnected, diverse neighborhoods that builds on the strengths of those neighborhoods and functions at both the neighborhood and citywide scales.

Objective 5.2 Encourage future development in centers and in nodes along corridors that are served by transit and are already functioning as centers for the surrounding neighborhoods, the community or the region.

Policy 5.2.3 Encourage the development of housing surrounding or adjacent to centers and along designated corridors, at sufficient densities to support the centers, corridors, and the transit system. While densities and distances will vary based on local conditions, the following residential density standards, which are based on the City's adopted Land Use/Transportation Policy, should be used as a general guide when updating community plans through a public participation process:

- a. Four-stories over parking (R4) within 1,500 feet of grade-separated (subway or arterial) fixed rail transit stations;
- b. Three-stories over parking (R3) within 1,500 feet of at-grade fixed rail transit stations;
- c. Two-stories over parking (RD1.5) within 750 feet of major bus corridor intersections;
- d. Where appropriate, two units per lot (R2) may be considered within 750 feet of major bus corridors.

Objective 5.5 Enhance the liveability of all neighborhoods by upgrading the quality of development and improving the quality of the public realm.

Policy 5.5.1 Plant and/or facilitate the planting of street trees, which provide shade and give scale to residential and commercial streets in all neighborhoods of the City.

Objective 5.8 Reinforce or encourage the establishment of a strong pedestrian orientation in designated neighborhood districts, community centers, and pedestrian-oriented sub-areas within regional centers, so that these districts and centers can serve as a focus of activity for the surrounding community and a focus for investment in the community.

Policy 5.8.3 Revise parking requirements in appropriate locations to reduce costs and permit pedestrian-oriented building design:

- a. Modify parking standards and trip generation factors based on proximity to transit and provision of mixed-use and affordable housing.
- b. Provide centralized and shared parking facilities as needed by establishing parking districts or business improvement districts and permit in-lieu parking fees in selected locations to further reduce on-site parking and make mixed-use development economically feasible.

Objective 5.9 Encourage proper design and effective use of the built environment to help increase personal safety at all times of day.

Policy 5.9.2 Encourage mixed-use development which provides for activity and natural surveillance after commercial business hours through the development of ground floor retail uses and sidewalk cafes. Mixed-use should also be enhanced

by locating community facilities such as libraries, cultural facilities, or police substations, on the ground floor of such building, where feasible.

The proposed Program is consistent with the Framework Element because it promotes and encourages livable buildings and neighborhoods with a range of housing types for diverse communities that builds on their strengths while also meeting citywide needs. The CHIP Ordinance encourages a wide range of different densities and scales with incentives that balance the need for more housing and quality urban form. As previously discussed, the CHIP Ordinance incentivizes housing near transit with density, FAR, and height incentives which scale based on proximity to transit service and base density.

Regarding livability, the Framework Element contains policy 5.5.1 to plant or facilitate the planting of street trees. The MIIP and AHIP offer the preservation of significant trees as a public benefit option to help maintain the City's existing canopy as more trees are planted. The Framework Element also includes Objective 5.8 and Policy 5.8.3 to create pedestrian oriented areas and reduce parking. There are no parking requirements in the entire MIIP, and the AHIP only requires parking in very limited circumstances. In accordance with Objective 5.9 and Policy 5.9.2, the CHIP Ordinance supports mixed-use development by incentivizing greater residential intensity at sites already allowing mixed uses, which will encourage more street activation and neighborhood presence.

With respect to open space as an integral part of neighborhood form and design, The Framework Element includes these policies:

Policy 6.4.4 Consider open space as an integral ingredient of neighborhood character, especially in targeted growth areas, in order that open space resources contribute positively to the City's neighborhoods and urban centers as highly desirable places to live.

Policy 6.5.5 Establish incentives for the provision of publicly accessible open space in conjunction with private development projects.

The CHIP implements Policies 6.4.4. And 6.5.5 of The Framework Element by maintaining open space requirements for projects in targeted growth areas and establishing incentives to either offset reductions in open space or add open space to projects. Access to incentives for reducing open space requires a higher score on the Landscape and Site Design Ordinance checklist, to require a higher quality of open space in exchange for less. A Public Benefit Option in the MIIP and AHIP offer a reduction in rear yard setback in exchange for setting aside additional lot area beyond the required common outdoor space as Privately Owned Open Space.

Economic Development

The Program is consistent with respect to the Policies and Objectives related to **Economic Development** in the General Plan Framework Element by providing incentives for projects on

public land, incentivizing and streamlining affordable housing without the use of public subsidy, and encouraging mixed-use projects where the underlying zoning allows. Regarding Economic Development, the Framework Element states the following:

Policy 7.2.1 *Identify the characteristics of any surplus City-owned land and determine the appropriateness of designating this land for public, commercial, industrial, or residential uses.*

Policy 7.8.3 *Encourage mixed-use development projects, which include revenue generating retail, to offset the fiscal costs associated with residential development*

Objective 7.4 Improve the provision of governmental services, expedite the administrative processing of development applications, and minimize public and private development application costs.

Policy 7.4.1 Develop and maintain a streamlined development review process to assure the City's competitiveness within the Southern California region.

Policy 7.4.2 Maximize opportunities for "by-right" development.

Framework Goal 7G

A range of housing opportunities in the City

Objective 7.9 Ensure that the available range of housing opportunities is sufficient, in terms of location, concentration, type, size, price/rent range, access to local services and access to transportation, to accommodate future population growth and to enable a reasonable portion of the City's workforce to both live and work in the City.

Policy 7.9.1 Promote the provision of affordable housing through means which require minimal subsidy levels and which, therefore, are less detrimental to the City's fiscal structure.

Policy 7.9.2 Concentrate future residential development along mixed-use corridors, transit corridors and other development nodes identified in the General Plan Framework Element, to optimize the impact of City capital expenditures on infrastructure improvements.

Objective 7.10 Program resources in a manner that encourages appropriate development, housing opportunities, transit service and employment generation in all areas of the City, with particular emphasis on those portions of the City which historically have not received a proportional share of such opportunities, consistent with the City's overall economic policies.

Policy 7.10.2 Support efforts to provide all residents with reasonable access to transit infrastructure, employment, and educational and job training opportunities.

The Framework Element recognizes the critical link between economic development and housing, particularly between jobs and housing. The proposed Program is consistent with the Framework Element Objectives 7.9, 7.10 and related policies in that it aims to enable the City's workforce to both live and work in the City, by encouraging an ample supply of housing for residents and workers and promoting an array of housing types at different costs, including affordable and mixed income housing in areas with transit stations, a range of employment opportunities, and commercial services and amenities. The Program aims to boost affordable housing without relying upon subsidies, in line with its position as an implementation of State Density Bonus and Policy 7.9.1. Incentives in Higher Opportunity Areas throughout the MIIP and the AHIP will alleviate housing concentration by promoting an emphasis on those portions of the City which historically have not received a proportional share of housing opportunities, and will Affirmatively Further Fair Housing near employment and educational resources.

The CHIP Ordinance also provides incentives for developing publicly owned land and sites zoned Public Facility (PF) for affordable housing under the AHIP, which contains a provision under which any public agency, if authorized by a resolution of City Council, may develop land for 100% affordable housing regardless of a site's development standards. This supports Policies 7.2.1 and 7.8.3 of the Framework Element by providing a pathway to a streamlined mixed-use development of public land and public facilities regardless of underlying zoning, and advances both a public commitment to construct affordable housing while balancing the fiscal constraints of residential development where public dollars are being spent.

Framework Element Objective 7.4 and related Policies 7.4.1 and 7.4.2 encourage streamlined development procedures for a better business and economic environment citywide. The CHIP and HESMD Ordinance both provide by-right and streamlined processes for projects providing the public benefit of affordable housing, and will facilitate a more stable development process. Better streamlining is available to projects offering more affordability in an effort to lower costs linked to the development process overall, while also closing the financial gap specific to affordable housing development.

Housing

The Program is consistent with the policies and objectives of The Framework Element **Housing** section, which provides much of its overall policy direction. The Framework Element acknowledges that housing production has not kept pace with the demand for housing leading to increased overcrowding and states that the "City must strive to meet the housing needs of the population in a manner that contributes to stable, safe, and livable neighborhoods, reduces conditions of overcrowding, and improves access to jobs and neighborhood services, particularly by encouraging future housing development near transit corridors and stations."

With respect to **Housing**, the General Plan Framework includes the following overall Housing goals and objectives:

Framework Goal 4A

An equitable distribution of housing opportunities by type and cost accessible to all residents of the City.

Objective 4.1 Plan the capacity for and develop incentives to encourage production of an adequate supply of housing units of various types within each City subregion to meet the projected housing needs by income level of the future population to the year 2010 (Per Table 2-1, the Framework Plan 2010 population is 4,306,500 persons).

Policy 4.1.1 Provide sufficient land use and density to accommodate an adequate supply of housing units by type and cost within each City subregion to meet the twenty-year projections of housing needs (see Figure 4-1).

Policy 4.1.2 Minimize the overconcentration of very low- and low-income housing developments in City subregions by providing incentives for scattered site development citywide.

Policy 4.1.3 Minimize the over concentration of public housing projects in a City subregion.

Policy 4.1.4 Reduce overcrowded housing conditions by providing incentives to encourage development of family-size units.

Policy 4.1.5 Monitor the growth of housing developments and the forecast of housing needs to achieve a distribution of housing resources to all portions of the City and all income segments of the City's residents.

Policy 4.1.6 Create incentives and give priorities in permit processing for low- and very-low income housing developments throughout the City.

Policy 4.1.7 Establish incentives for the development of housing units appropriate for families with children and larger families.

Policy 4.1.8 Create incentives and reduce regulatory barriers in appropriate locations in order to promote the adaptive re-use of structures for housing and rehabilitation of existing units.

Policy 4.1.9 Whenever possible, assure adequate health-based buffer zones between new residential and emitting industries.

Objective 4.2 Encourage the location of new multi-family housing development to occur in proximity to transit stations, along some transit corridors, and within some high activity areas with adequate transitions and buffers between higher-density developments and surrounding lower-density residential neighborhoods.

Policy 4.2.1 Offer incentives to include housing for very low- and low-income households in mixed-use developments.

Objective 4.3 Conserve scale and character of residential neighborhoods.

Objective 4.4 Reduce regulatory and procedural barriers to increase housing production and capacity in appropriate locations.

Policy 4.4.1 Take the following actions in order to increase housing production and capacity:

- a. Establish development standards that are sufficiently detailed and tailored to community and neighborhood needs to reduce discretionary approvals requirements.
- b. Streamline procedures for securing building permits, inspections, and other clearances needed to construct housing.
- c. Consider raising thresholds for categorical exemptions for CEQA clearances for projects conforming to the City's development standards, particularly when housing is combined with commercial uses in targeted growth areas.
- d. Consider establishing City service which assists applicants in processing applications for housing projects.

The proposed Program supports and is consistent with the Framework Element housing goal 4A as it strongly promotes a more equitable distribution of housing opportunities, with higher incentives offered in Higher Opportunity Areas throughout the CHIP. As identified in the 2021-2029 Housing Element, and shown on [Figure 1](#) on page A-4 of this staff report, affordable housing unit production has been heavily concentrated in lower opportunity areas of the city. As such the CHIP program offers larger incentives in Higher Opportunity Areas, expands access to affordable housing, and provides for a more equitable distribution of mixed-income and one hundred percent affordable housing developments. The Program aligns with the Framework's Objective 4.1 and associated policies with its focus on planning to provide a supply of housing available at affordable types and costs while alleviating overconcentration of affordable housing and overcrowding.

The CHIP establishes incentives to encourage a wider variety of housing types by providing tailored incentives for missing middle, mid-scale, and higher intensity developments, alongside options to encourage multi-bedroom units to house large families. Within the CHIP Ordinance, the MIIP and AHIP offer limited FAR and height incentives for both lower density sites and for Designated Historic Resources. The Corridor Transition incentives are crafted to integrate into

existing neighborhood contexts, by offering height and FAR maximums in exchange for incentives which are often below the existing allowances on a site.

Within the CHIP Ordinance, the MIIP incentive affordability requirements are calibrated to market tiers identified by the Linkage Fee Ordinance in Section 19.18 of the Los Angeles Municipal Code. With higher affordability set asides in higher market tiers, affordable housing will be more evenly distributed throughout the City. Set aside options in the MIIP are of an even greater variety of income levels than the Framework Element calls for, and include moderate income (80-120% AMI), low income (80% AMI), very low income (60% AMI), extremely low income (30% AMI), and acutely low income (15% AMI) levels. The popularity of the extremely low income affordability set-aside in the City's Transit Oriented Communities Program indicates that this is an effective and proven way to spur production of these units citywide. As stated in previous findings, the MIIP emphasizes transit as a key location for growth in alignment with Objective 4.2.

Streamlining and reducing development barriers is a key component of the CHIP and The HESMD Ordinance, in alignment with Objective 4.4 and associated policies of the Framework Element. Streamlining is provided in exchange for the public benefit of more affordable housing and does not apply where the value of cultural or environmental assets exceeds that of the proposed project. Consistent with Framework Element Policy 4.1.9, environmental justice is a key consideration of the CHIP Ordinance. Parcels zoned for heavy manufacturing, or hybrid industrial zones with an overlay restricting residential uses, cannot qualify for more than the minimum incentives available under State Density Bonus. Sites within 1,000 feet of certain contaminated areas would be required to complete Phase I and/or II assessment and remediation in compliance with the proposed Environmental Protection Measures, if warranted, or they are not eligible until complying with Environmental Protection Measures once adopted. Furthermore, the Lower Income Rezoning Housing Element Sites List, where by-right streamlining is facilitated by the HESMD, excludes sites with potentially harmful environmental concerns. For additional details, refer to Section C.

It is the ultimate goal of the Program to provide sufficient land use and density to accommodate an adequate supply of housing units by type and cost to meet projections of housing needs. The Program will also decrease the overconcentration of very low- and low-income housing developments in City subregions by preventing development on sites presenting risk to human health or negative externalities and providing greater incentives for scattered site development citywide, particularly in Higher Opportunity Areas where affordable housing production has been underproduced.

Other General Plan Elements

The proposed Program is consistent with the purpose, intent, and provisions of the General Plan in that it implements policies contained in a number of other General Plan Elements in addition to the Housing and Framework Element discussed above, including the:

- Circulation Element (Mobility Plan 2035)

- Health Element (Plan for a Healthy Los Angeles)
- Air Quality Element
- Conservation Element
- Safety Element

Mobility Plan 2035 (Circulation Element)

The City's Mobility Plan 2035 (Circulation Element) provides the policy foundation for achieving a transportation system that balances the needs of all road users and incorporates "complete streets" principles and lays the policy foundation for how future generations of Angelenos interact with their streets. This includes the strong link between residential land uses to transportation.

The City's Mobility Plan 2035 contains a number of important policies supported by and consistent with the proposed Program, including:

Objective 3.1 Ensure that 90% of households have access within one mile to the Transit Enhanced Network by 2035.

Objective 3.2 Ensure that 90% of all households have access within one-half mile to high quality bicycling* facilities by 2035. (*protected bicycle lanes, paths, and neighborhood enhanced streets)

Objective 5.2 Vehicle Miles Traveled (VMT): Support ways to reduce vehicle miles traveled (VMT) per capita

The Program supports the strong link between residential land uses and transportation, particularly public transit stations in the CHIP's MIIP. Incentivizing housing, particularly affordable housing, near transit stations ensures that transit-dependent residents have access to housing and employment opportunities, education, quality healthcare, and other amenities while reducing Vehicle Miles Traveled per capita, which aligns with Mobility Objective 5.2. Additionally consistent with AB 2097 and AB 2334, most projects proposed under the MIIP and AHIP will not require parking, thereby increasing the public transit user base. These policies and programs acknowledge the ample opportunities for transit-oriented development that can support new housing (particularly affordable housing) as a result of significant transit infrastructure investments occurring in multiple neighborhoods of the City.

Plan for a Healthy Los Angeles (Health Element)

The Plan for a Healthy Los Angeles (Health Element) lays the foundation to create healthier communities for all Angelenos. As an Element of the General Plan, it provides high-level policy vision, along with measurable objectives and implementation programs, to elevate health and environmental justice as a priority for the City's future growth and development. It acknowledges that access to safe, affordable, accessible, and healthy housing is of paramount importance to living a healthy life.

The proposed Program is consistent with the Health Element and furthers the following goals, objectives, and policies:

Policy 1.5 Improve Angelenos' health and well-being by incorporating a health perspective into land use, design, policy, and zoning decisions through existing tools, practices, and programs.

Policy 1.6 Reduce the debilitating impact that poverty has on individual, familial, and community health and well-being by: promoting cross-cutting efforts and partnerships to increase access to income; safe, healthy, and stable affordable housing options; and attainable opportunities for social mobility.

Policy 1.7 Reduce the harmful health impacts of displacement on individuals, families, and communities by pursuing strategies to create opportunities for existing residents to benefit from local revitalization efforts by: creating local employment and economic opportunities for low-income residents and local small businesses; expanding and preserving existing housing opportunities available to low-income residents; preserving cultural and social resources; and creating and implementing tools to evaluate and mitigate the potential displacement caused by large-scale investment and development.

Health Element Goal 2

A city that is built for health uses design, construction, and public services to promote the physical, mental, and social well-being of its residents. A healthy city has neighborhoods where health-promoting goods and services are abundant and accessible, so that the healthy choice is the easy choice for all residents. Health is further supported by safe multi-modal corridors that offer active transportation alternatives, access to a diverse housing stock that offers options for all ages and incomes, ample opportunities for recreation, healthy food options, and a vibrant economy that offers quality employment opportunities.

Policy 2.2 Promote a healthy built environment by encouraging the design and rehabilitation of buildings and sites for healthy living and working conditions, including promoting enhanced pedestrian-oriented circulation, lighting, attractive and open stairs, healthy building materials and universal accessibility using existing tools, practices, and programs.

Policy 5.1 Reduce air pollution from stationary and mobile sources; protect human health and welfare and promote improved respiratory health.

Policy 5.4 Protect communities' health and well-being from exposure to noxious activities (for example, oil and gas extraction) that emit odors, noise, toxic, hazardous, or contaminant substances, materials, vapors, and others.

Policy 5.7 Promote land use policies that reduce per capita greenhouse gas emissions, result in improved air quality and decreased air pollution, especially for children, seniors and others susceptible to respiratory diseases.

The proposed Program is consistent with the Health Element goals, objectives, and policies related to housing in the City in that it prioritizes affordable housing with anti-displacement measures and orientates housing development around health, economic stability, and well-being. Carefully designed incentives that work synergistically with the proposed amendments to the City's proposed Landscape and Sites Design Ordinance, as well as Public Benefit Options, are intended to improve health and well being and are consistent with Health Element Policy 1.5 and Goal 2. The RPO alleviates displacement pressure so that existing residents can benefit from increasing housing opportunities as stated in Policy 1.7. As previously stated, incentives in the MIIP promote housing near transit to promote decreased per capita greenhouse gas emissions. The CHIP Ordinance provides higher incentives in Higher Opportunity Areas to Affirmatively Further Fair Housing and works to reduce the debilitating effects of poverty on welfare by providing more affordable housing options in areas with stronger life outcomes that have underproduced it, thereby implementing Health Element Policy 1.6.

Air Quality Element

The Air Quality Element sets forth the goals, objectives, and policies which guide the City in its implementation of its air quality improvement programs and strategies. A number of these goals, objectives, and policies are relevant to land use development, and relate to traffic mobility, discouraging single-occupancy vehicle trips, and increasing energy efficiency in City facilities and private developments.

The proposed Program is consistent with the City's Air Quality Element and furthers the following goals, objectives, and policies:

Air Quality Element Goal 2

Less reliance on single-occupant vehicles with fewer commute and non-work trips

Objective 2.1 Reduce work trips as a step towards attaining trip reduction objectives necessary to achieve regional air quality goals.

Air Quality Element Goal 3

Efficient management of transportation facilities and systems infrastructure using cost-effective system management and innovative demand-management techniques. '

Objective 3.1 Increase the portion of work trips made by transit to levels that are consistent with the goals of the Air Quality Management Plan and the Congestion Management Plan.

Objective 3.2 Reduce vehicular traffic during peak periods.

Air Quality Element Goal 4

Minimal impact of existing land use patterns and future land use development on air quality by addressing the relationship between land use, transportation, and air quality.

Objective 4.2 Reduce vehicle trips and vehicle miles traveled associated with land use patterns

Policy 4.2.3 Ensure that new development is compatible with pedestrians, bicycles, transit, and alternative fuel vehicles.

Air Quality Element Goal 5

Energy Efficiency through land use and transportation planning, the use of renewable resources, and the implementation of conservation measures such as site orientation and tree planting.

The proposed Program is consistent with the Air Quality Element's goals, objectives, and policies related to housing development and reducing vehicle trips in the City in that it encourages housing locations near jobs and transit, particularly through the CHIP Ordinance's MIIP incentives. This program facilitates high quality, healthy housing in neighborhoods that improves accessibility to jobs and services, deploying a transportation demand management strategy to reduce vehicle miles traveled (VMT) and therefore improve air quality. These programs and policies are also aligned with the regional and state mandates of improving air quality. Transportation incentives are scaled according to distance from major transit stops, which for the purposes of the CHIP includes stations and bus stops included in the most recent Southern California Association of Governments Regional Transportation Plan.

Conservation Element

The proposed Program furthers the objectives and policies of the conservation element, specifically related to cultural and historical sites. The Conservation Element states that the City has a primary responsibility for identifying and protecting its cultural and historical structures, natural features or sites of historic, architectural, cultural or aesthetic significance.

Conservation Element Objective 4 Protect important cultural and historical sites and resources for historical, cultural, research, and community educational purposes.

Policy 4.1 Continue to protect historic and cultural sites and/or resources potentially affected by proposed land development, demolition or property modification activities.

The proposed Program is consistent with the Conservation Element in that it seeks to maintain and protect important cultural and historic resources while allowing for the development and preservation of housing in the City. The CHIP Ordinance utilizes the Secretary of the Interior's

Standards for the Treatment of Historic Properties (Standards) for review of projects proposing alterations to Designated Historic Resources. Furthermore, projects are ineligible for the ordinance incentives if demolition of a Designated Historic Resource is proposed. The MIIP and AHIP incentives also offer protections to eligible or surveyed historic resources, requiring any surveyed, eligible or architectural historic resource identified for any protection or special consideration or review by an applicable Overlay or Specific Plan to be compliant with the Standards. As institutions of faith often contain both eligible architectural and cultural resources, the AHIP incentives require eligible buildings using Faith-Based Organization Project incentives to conform with the Standards. Throughout the CHIP Ordinance sites with Designated Historic Resources and Non-Contributing Elements to Historic Preservation Overlay Zones have limited access to FAR and height incentives, to further ensure new development is integrated appropriately into historic sites. In addition, the HESMD Ordinance includes provisions to exempt historic resources from minimum density requirements. Similarly, historic resources have been removed from the inventory of Lower Income Sites subject to by-right review and minimum density requirements.

Safety Element

The Program is consistent with the goals and policies of the Safety Element regarding environmentally sensitive and hazardous sites, and sites that may be especially sensitive to climate change. The Safety Element details a policy direction to prevent, respond to, and recover from disaster events. Policies of the Safety Element include:

Safety Element Goal 1: Hazard Mitigations

A city where potential injury, loss of life, property damage and disruption of the social and economic life of the city due to hazards is minimized.

Policy 1.1.5 Risk Reduction. Reduce potential risk hazards due to disaster with a focus on protecting the most vulnerable people, places and systems.

Policy 1.1.8 Land Use. Consider hazard information and available mitigations when making decisions about future land use. Maintain existing low density and open space designations in Very High Fire Hazard Severity Zones. Ensure mitigations are incorporated for new development in hazard areas such as VHFHSZs, landslide areas, flood zones and in other areas with limited adaptive capacity.

The proposed Program is consistent with the updated policies above in that it contains special provisions for projects proposed in Very High Fire Hazard Severity Zones, the Coastal Zone, Sea Level Rise Areas, or sites that may pose a hazardous risk to human health. Sites in Very High Fire Hazard Severity Zones, areas vulnerable to Sea Level Rise, and the Coastal Zone are excluded from the MIIP. A site in a Very High Fire Hazard Severity Zone would only be included in instances where a project site is abutting, across the street or alley, or sharing a common corner with a subject property that is not in such a zone on an Opportunity Corridor. Projects otherwise

eligible for State Density Bonus in Very High Fire Severity Zones, Sea Level Rise areas, and the Coastal Zone are eligible only for limited state incentives. Inclusion of these limited sites is consistent with Policy 1.1.5, as parcels are located on transit served corridors on the periphery of impacted areas, and have higher mobility in a hazard event. Sites in Environmental Consideration Areas will be eligible for program incentives so long as the project complies with the requirements set forth in the Environmental Protection Measures Handbook. These measures are consistent with the hazard mitigation and risk reduction measures proposed in Safety Element Goal 1 and Policies 1.1.5 and 1.1.8.

Public Facilities and Services Element

The Public Facilities and Services Element contains several Master Plans for facilities and services of public interest in the City. It includes the Cultural and Historical Monuments Plan to guide the preservation of significant, beautiful, or interesting cultural and historic sites in The City of Los Angeles. The Program furthers the first objective in the Cultural and Historical Monuments Plan is:

Objective 1.1 To encourage the preservation and restoration of designated monuments.
Objective To make available a full range of public educational

See Conservation Element findings above for a discussion of consistency of Objective 1.1 with the proposed Program.

The Program is also consistent with and furthers the following objectives in the Public Schools Plan:

Objective 4.1: To make available a full range of public educational facilities from the elementary grades through the junior college level within the Los Angeles City area.

Objective 4.4: To provide safe, direct access to school sites for the maximum number of attending students

The Program provides higher incentives for projects located in Higher Opportunity Areas, which includes areas of the City that have more access to public facilities such as schools. By encouraging housing in these areas, the Program furthers the objectives to make public educational facilities more available in the City of Los Angeles, and provides more direct access to schools for a majority of students through added housing supply in these areas.

Land Use Element

The Community Plans establish neighborhood-specific goals and implementation strategies to achieve the broad objectives laid out in the City's General Plan. Together, the 35 Community Plans make up the General Plan's Land Use Element, which plays an important role in bolstering housing and job opportunities, conserving open space and natural resources, and balancing

different neighborhoods' needs. The Program is consistent with the Land Use Element because it will not change the underlying zoning or land use of any parcels, but functions as a local implementation of State Density Bonus (see Section D).

Uses are only altered where they otherwise prevent residential density increases in line with citywide policies and/or state law. These developments (in P or PF Zones, or on land owned by Faith-Based Organizations or publicly owned land) may only occur on or adjacent to land that otherwise permits residential uses in the General Plan, Zoning Ordinance, or Specific plan, or by City Council resolution. Assembly Bill (AB) 2334 (Wicks) amended California Government Code Section 65915's definition of "Maximum Allowable Residential Density" so that under state law, the City is legally required to afford the applicant the highest base density among the General Plan, Zoning Ordinance, or Specific Plan for purposes of the application of a density bonus. Therefore, there may be instances where a proposed project is not consistent with the Land Use Element of the General Plan or the requirement of a Specific Plan, but the City is legally required to allow the applicant to develop at the highest permitted density among the General Plan, Zoning Ordinance, or Specific Plan (California Government Code Section 65915(o)(6)). In addition, the City has determined that the shortage of affordable housing is an ongoing crisis in Los Angeles. The increased intensity and density of proposed development from the Program will be offset by the increase in affordable units required by the City's local implementation of State Density Bonus. The ordinances provide a service that is essential and beneficial to the community, city and region and conforms to the purpose of the Land Use Element by providing much needed housing near job centers and transit, and by providing housing which fulfills the needs for market rate and affordable housing.

C. State Housing Element Discussion (California State Government Code Section 65580 – 65589.11)

State Housing Element Law

Statutory requirements for the Housing Element and RHNA Re-zoning programs are delineated in California State Government Code Sections 65580 – 65589.11. The California Department of Housing and Community Development approved The City of Los Angeles 2021-2029 Housing Element on June 29, 2022, which outlined Program 121 RHNA Re-zoning. The 2021-2029 Housing Element includes a list of 'Candidate Sites Identified to be Rezoned to Accommodate Housing Shortfall Need' in Appendix 4.7, compiled after identifying a shortfall of 255,433 units, of which 130,553 are a shortfall of lower income units. Pursuant to California Government Code Section 65583(c)(1) and 65583.4(a), rezoning to accommodate the City's RHNA deficit must occur by February 12, 2025, or meet the narrow criteria for a one year extension. Additional requirements for the state mandated rezoning are:

1. Sites shall be made available during the planning period with appropriate zoning and development standards, including the adoption of minimum densities, and with services and facilities to accommodate that portion of the City's or County's share of the regional

- housing need that could not be accommodated on sites identified in The 2021-2029 Housing Element Candidate Sites inventory (California Government Code 65583(c)(1)).
2. Sites shall be identified to Affirmatively Further Fair Housing and to facilitate and encourage the development of a variety of types of housing for all income levels (including but not exclusive to extremely low, very low, low and moderate) (California Government Code 65583(c)(1)(2)(10)).
 3. Pursuant to California Government Code 65583.2(h), Lower Income Sites identified for rezoning must be:
 - (a) On sites that shall permit owner-occupied and rental multi-family residential use by-right for developments in which 20 percent of units are affordable to lower income households during the planning period. Sites must be zoned with a minimum density and development standards permitting at least 20 units per acre and 16 units per site in Los Angeles.
 - (b) At least 50 percent sites designated for residential uses where nonresidential or mixed-uses are not permitted (if a jurisdiction elects not to meet this requirement it must impose mandatory housing requirements in non-residential zones).
 4. Per Housing Element Law, sites previously listed in The Housing Element Inventory of Adequate Sites over two consecutive planning periods must permit by-right development streamlining if 20 percent of proposed project's units are set aside for lower income households. Eligible projects that meet objective zoning standards will be subject to a by-right review procedure (California Government Code 65583.2(c)). Sites listed on the current Inventory of Sites (Appendix 4.1 of The 2021-2029 Housing Element) are subject to no net loss and housing replacement requirements.
 5. Notwithstanding other requirements of the rezoning, a jurisdiction must adopt a replacement requirement policy for sites that currently or within the past five years had residential uses subject to a recorded covenant, ordinance or law restricting rent to lower incomes, consistent with replacement requirements set forth in California Government Code Section 65915(c)(3) (California Government Code 65583.2(g)(3)).

The Program makes sites with more than 255,433 units of capacity available to accommodate the portion of the City's share of the regional housing need that could not be accommodated through the identification of sites in the 2021-2029 Housing Element. The sites have appropriate zoning and development standards and are more than adequate to meet the need for 255,433 units, of which 130,553 are a shortfall of lower income units, as identified by The 2021-2029 Housing Element.

Of these sites, at least 130,553 units of capacity are identified as Lower Income Sites, which meet the requirements in California Government Code 65583.2(h). The sites have appropriate zoning and development standards and are in excess of the 130,553 unit shortfall of lower income units identified by The 2021-2029 Housing Element. More than 50 percent of the rezoned sites and associated capacity are located on residentially zoned sites (i.e. sites designated for residential uses) where nonresidential or mixed-uses are not permitted. Lower Income Sites permit owner-occupied and rental multi-family residential use by-right for developments in which 20 percent of units are affordable to lower income households during the planning period. Sites are zoned with

a minimum density and development standards permitting at least 20 units per acre and 16 units per site in Los Angeles.

It is important to note that the additional rezoning efforts include other efforts that may be adopted within the state required deadline of February 12, 2025. This includes the Downtown Los Angeles Community Plan Update, as well as the Adaptive Reuse Ordinance, with an adoption status that is currently unknown. Rezoned sites through other work programs will also be established by City Council Resolution, submitted to the state each year as part of the Housing Element Annual Progress Report and identified in the public Zoning Information Mapping and Access System (ZIMAS). Approximately 54% of the rezoning efforts of the CHIP Ordinance and the Downtown Los Angeles Community Plan Update are located in Higher Opportunity Areas of the City, with 64% and 51% of capacity located in Lower Income Category Capacity and Moderate Income Category Capacity in Higher Opportunity Areas, respectively.

Shortfall sites have adequate services and facilities to ensure that sites are developable to meet the housing needs. The sites are generally already developed with other uses and connected to reliable energy, water and gas as part of the urbanized area. Streets and highways are available to all sites in the inventory, and in most cases, transit is within close proximity. The methodology used to select the Program sites considers the suitability and availability of each site for residential development during the planning period. Finally, each housing development will be granted a permit on a site-by-site basis, at which time it is possible that some projects may be required to improve the existing infrastructure. A project proposed on any site in the inventory would be allowed where consistent with the zoning provisions for that site, and would be issued a permit by the Department of Building and Safety (provided no extraordinary site-specific health and safety circumstances were found to exist).

The Program's sites Affirmatively Further Fair Housing (AFFH) consistent with Government Code 65583(c)(1)(2)(10)) and Program 124 in the 2021-2029 Housing Element. The sites facilitate and encourage the development of a variety of types of housing for all income levels (including but not exclusive to extremely low, very low, low and moderate). The detailed AFFH discussion earlier in the staff report (under Housing Element Programs) is incorporated here by reference. In summary, the Program focuses new incentive programs in Higher Opportunity Areas, expands affordable housing set asides that account for identified local needs, creates new home ownership and equity building opportunities, expands senior housing incentives, incentivizes use of public land, provides new incentives for 100 percent affordable housing, and ensures a replacement of existing housing units. This results in the majority of new housing opportunities created through the proposed ordinance to be located in Higher Opportunity Areas. The Program therefore achieves the fundamental AFFH metrics set forth for the program in the adopted 2021-2029 Housing Element.

Housing Element Rezoning Sites are drawn primarily from the MIIP, as well as portions of the AHIP. Sites were selected based on whether they facilitate housing development at higher densities than otherwise allowed under state Density Bonus law (100%) and are consistent with the statutory requirements. These sites will also have incentives that provide flexibility for other

important development standards (height, floor area, parking, etc.), along with added procedural certainty compared to what is currently allowed. They include sites eligible for incentives under the following strategies: Opportunity Corridors, Corridor Transition Areas, Transit Oriented Incentive Areas, as well as sites identified as being eligible for AHIP incentives on Faith-Based Organization owned land, publicly owned land, Public Facility (PF) zones, and Parking (P) zones.

The sites and capacity figures have been identified through a detailed exercise to ensure compliance with state law, building upon the model used for the Candidate Sites for Rezoning Appendix 4.7. The system was designed to identify rezoned sites that meet the various requirements, particularly those for Lower Income Rezoning Sites. This includes criteria for accommodating state requirements, where a minimum density of 20 units per acre and an allowance of 16 units per site is needed to qualify as a Lower Income Site, as well as ensuring that bonuses are calculated appropriately utilizing “base units” (number of units allowed prior to any bonus). Additional criteria was also added to screen out sites that may be less suitable for by-right development (see below).

The City updated the Appendix 4.7 model with several new assumptions to better reflect realistic development potential based on information gained by the Appendix 4.1 regression model and recent economic analysis of the CHIP performed by AECOM (see Appendix 3). The methodology takes into consideration the suitability of the parcel’s size as part of the evaluation of whether a site is likely to be redeveloped, including many suitability factors such as the allowable density and realistic capacity of the site, the existing use, age of existing structure, and the current utilization of existing buildings. For a detailed summary of the model and assumptions see [Appendix 5](#).

Sites listed on the Inventory of Lower Income Rezoning Housing Element Sites ([Exhibit E.2](#)) must permit multi-family development as a use-by-right when projects propose 20% affordability to lower income households by state law. The sites identified as Lower Income Rezoning Housing Element Sites utilized additional filtering criteria to ensure that only sites most suitable for by-right development were included. This includes properties subject to the Rent Stabilization Ordinance (RSO), designated historic resources, and environmentally sensitive sites and others listed above in the Key Provisions subsection of the Housing Element Sites and Minimum Density Ordinance section of this report.

The proposed HESMD Ordinance ensures compliance with state law for designated Lower Income Sites and other Housing Element Sites. The ordinance includes provisions for by-right review for developments in which 20 percent of units are affordable to lower income households during the planning period, as well as regulations to enforce the minimum density standards requiring new housing developments to be developed with at least 20 units per acre. Pursuant to state Housing Element law, the proposed ordinance also includes by-right development review for non vacant sites that were identified in the prior Housing Element and vacant sites that were identified in the prior two Housing Elements, including sites identified in Column O of Appendix 4.1 of the current 2021-2029 Housing Element. These Sites are called Prior Housing Element Sites. Finally, the ordinance adopts existing no net loss and housing replacement requirements

for existing Housing Element Sites identified in the 2021-2029 Housing Element. Housing replacement is required for sites that currently or within the past five years had residential uses subject to a recorded covenant, ordinance or law restricting rent to lower incomes, consistent with replacement requirements set forth in California Government Code Section 65915(c)(3) and as additionally codified in the RPO.

In summary, the Program meets the requirements of state Housing Element law.

D. State Density Bonus Law Discussion (California Government Code Sections 65915 - 65918)

As a local implementation of State Density Bonus Law, the CHIP calibrates incentives so that local programs offer greater bonuses and incentives to projects meeting the requirements of California Government Code Sections 65915 - 65918, pursuant to California Government Code Section 65915(n). The density bonuses and incentives offered in all programs match or exceed the bonuses and incentives provided by state law for Housing Developments. Within CHIP, the local state density bonus incentives offer a unique menu of incentives available to all eligible projects for streamlined review. The AHIP provides a FAR incentive and additional menu of incentives to projects located outside of certain environmentally or culturally sensitive sites, and also creates additional project types that qualify for those incentives. The MIIP incentives offer FAR and height as base incentives and provide up to four additional incentives for TOIA and Corridor projects. As the MIIP incentives offer greater bonuses than State Density Bonus Law offers, the MIIP calculates affordability set asides based on a project's proposed units rather than off of a parcel's Maximum Allowable Residential Density, as is done in State Density Bonus. The MIIP also allows for a mixing of incomes in some cases, when the percentage of affordable units in an affordability set-aside for any project otherwise eligible for State Density Bonus also meets the affordability requirements of State Density Bonus (see the affordability footnotes related to Transit Oriented Incentive Areas and Opportunity Corridors). This ensures that the CHIP does not offer greater bonuses to mixed income projects that do not meet the state's affordability requirements.

As an implementation of the state Density Bonus program, the CHIP Ordinance also uses the same definitions as State Density Bonus Law for terms including but not limited to Housing Development, Maximum Allowable Residential Density, Development Standard, One Hundred Percent Affordable Housing Project, and Incentive. The City's local program also aligns with the rent schedule requirements of State Density Bonus. Replacement housing unit and demolition protections align with or exceed State Density Bonus as set forth in California Government Code Section 65915(c)(3) and as additionally mandated by the proposed RPO.

Summary of CEQA Findings

Adoption of the proposed Citywide Housing Incentive Program Ordinance, Housing Element Sites and Minimum Density Ordinance, and Resident Protections Ordinance are called for by the programs in the Housing Element of the City of Los Angeles. The provisions of the proposed

ordinances were called for specifically by Program 121 (RHNA Re-zoning Program) of the Housing Element, which provides the structure for the Program in order to meet the City's RHNA target. The ordinances are further called for and supported by several other Housing Element programs including Program 61 (Provide Adequate Sites for Lower Income Households on Nonvacant and vacant Sites Previously Identified), Program 46 (Housing Element Sites Inventory Update) Program 122 (Anti-Displacement Strategies), and Program 124 (Affirmatively Furthering Fair Housing). The adoption of the proposed ordinances will implement the identified programs set forth in the Housing Element.

An Environmental Impact Report (EIR) (ENV-2020-6762-EIR, SCH No. 2021010130) that analyzed the environmental effects of the 2021-2029 General Plan Housing Element and Safety Element, and a Program for the creation of additional housing was certified by the Los Angeles City Council on November 24, 2021. An Addendum to the EIR (ENV-2020-6762-EIR-ADD1) was subsequently certified by the Los Angeles City Council on June 14, 2022. A second Addendum to the EIR (EIR-2020-6762-ADD2) dated July 2024 has also been prepared. For the purposes of this report, the EIR and Addendums will be referred to as the Housing Element EIR.

The Housing Element EIR was prepared to examine the potential environmental effects of the 2021-2029 Housing Element, including build out of the Regional Housing Needs Assessment (RHNA) Allocation, as well as the programs and policies that have the potential to result in physical environmental effects, and the Inventory of Sites and RHNA Re-zoning Program needed to demonstrate zoned capacity needed to accommodate the City's RHNA Allocation. Additionally, the EIR analyzed the potential effect from the construction and operation of 420,327 housing units (full RHNA build out of 456,643 units minus the 36,316 housing units that have been approved but not built). The Housing Element EIR found that the environmental impacts of several of the issue areas were significant and unavoidable, even with imposition of mitigation measures. Based on the analysis in the Housing Element EIR, the EIR concluded the implementation of the 2021-2029 Housing Element Update would result in unavoidable significant environmental impacts with regard to:

- Air Quality (Exceedance of Criteria Pollutants—Construction and Operations)
- Biological Resources (Special Status Species, Sensitive Habitats, Wildlife Corridors)
- Cultural Resources (Historical Resources and Archaeological Resources)
- Geology and Soils (Paleontological Resources)
- Hazards and Hazardous Materials (Hazardous Materials Near Schools and Hazardous Materials Sites)
- Noise (Construction Noise, Operation Noise, and Construction Vibration)
- Public Services (Fire Protection, Police Protection, and School Facilities)
- Recreation (Deterioration of Recreational Facilities and Construction of Recreational Facilities)

- Transportation (Freeway Queuing)
- Tribal Cultural Resources (Construction: Ground Disturbance during Construction)
- Wildfire (Impair Emergency Response Plan, Exacerbate Wildfire Risks in State Responsibility Area or VHFHSZ, Require Infrastructure that may Exacerbate Fire Risk, Expose People or Structures to Significant Risks in State Responsibility Area or VHFHSZ, and Expose People or Structures to Significant Risks Involving Wildland Fires)

The Housing Element EIR also identified the following significant impacts that were anticipated to be reduced to less than significant with identified mitigation measures:

- Air Quality: Construction-related emissions of toxic air contaminants
- Hydrology: Impeding or Redirect Flood Flows
- Transportation: Circulation Plan Consistency, Hazardous Design, Emergency Access

The proposed Citywide Housing Incentive Program Ordinance, Resident Protections Ordinance, and Housing Element Sites and Minimum Density Ordinance are needed to facilitate the production of affordable housing in the City and to accommodate build out of the City's RHNA Allocation which was analyzed by the Housing Element EIR. Adoption of the proposed ordinances is also needed to implement the City's Housing Element. The City's 2021-2029 Housing Element implements State housing law mandates for the City to adopt zoning ordinances to accommodate RHNA targets which the City cannot accommodate through the existing inventory of sites. To meet the State law mandates, the Housing Element requires the City, through zoning and other actions, to make it possible to build almost 185,000 affordable units for lower-income households in eight years.

The Housing Element EIR fully analyzed the environmental impacts that could occur as a result of the implementation of the 2021-2029 Housing Element, including the construction and operation of up to 420,327 housing units (including 185,000 affordable units and 75,091 moderate income units), and rezoning programs to facilitate the construction and operation of those housing units. Any and all types of potential housing development (including mixed-use development ranging in size and scale from neighborhood commercial mixed-use with smaller non-residential uses, to high-rise mixed-use with larger non-residential uses) were analyzed in the Housing Element EIR. The Housing Element EIR anticipated and fully analyzed that the construction and operation of these housing units would require action to streamline approvals of these housing units, including making more projects subject to by-right or administrative review and eliminating discretion in the approval of affordable housing developments.⁹ The second Addendum found there is no change to the project, change to circumstances, or new information as described in PRC Section 21166 or CEQA Guidelines Section 15162(a) that would cause the need for a subsequent or supplemental EIR.

⁹ Housing Element Draft EIR Environmental Analysis can be found here: https://planning.lacity.org/eir/HEU_2021-2029_SEU/deir/files/04_Environmental%20Analysis.pdf

The Housing Element EIR is available for review at the City of Los Angeles, Department of City Planning Records Management, 221 N. Figueroa Street, Room 1450 Los Angeles, and online at the following weblinks:

- Draft EIR: https://planning.lacity.org/development-services/eir/Housing-Element_2021-2029_Update_Safety-Element_Update_deir
- Final EIR: <https://planning.lacity.org/development-services/eir/housing-element-2021-2029-update-safety-element-update-0>

- Addendum 1 to the EIR: https://clkrep.lacity.org/online/docs/2021/21-1230-S1_misc_7_5-24-22.pdf
- Addendum Administrative Record: Los Angeles City Council File 21-1230-S1 - <https://cityclerk.lacity.org/lacityclerkconnect/index.cfm?fa=ccfi.viewrecord&cfnumber=21-1230-S1>

PUBLIC HEARING AND COMMUNICATIONS

Drafting the Program was a vital next step in the effort to meet the City's RHNA targets and could not have been accomplished effectively without the feedback and participation of the public. The Department of City Planning engaged the public on the formation of the Program Ordinances through numerous in-person and virtual events, including new collaborative engagement formats with community based organizations (CBOs), in order to meaningfully inform and collect the public's input. This outreach has been essential to guide and inform the drafting of the ordinances.

Throughout the entire Program outreach process, the Department held a total of 7 CBO partnered events, attended 10 community events, hosted 6 webinar sessions, received over 1,000 Concept Explorer survey responses and 4,200 single-family poll responses, garnered over a million views across all digital engagement, and received over 3,100 email comments and over 450 verbal comments. Angelenos engaged via this outreach represented the City's diverse racial and ethnic communities, as well as age groups, income levels, and different housing experiences (i.e. renter versus home-owner). Particular efforts were taken by staff to provide bilingual outreach resulting in a total of ten bilingual events and informational sessions offered in Spanish, Korean, or both. The Department developed novel engagement models through this outreach phase including compensated CBO partnered events and digital campaigns, with the goal of reaching communities diverse in language, ethnicity, geography, and educational and socioeconomic backgrounds that have been historically underrepresented in the planning process. The different public participation phases of the CHIP ordinance are illustrated in Figure 3 and are described below.

Figure 3: Program Timeline

Listen Phase

In March 2023, City Planning commenced the Listen Phase of outreach by launching CHIP's six core strategies: Adaptive Reuse, Affordable Housing Overlay, Update to Affordable Housing Incentive Programs, Missing Middle, Opportunity Corridors, and Process Streamlining.

In this phase, City Planning staff engaged with Angelenos across the City so that feedback on the CHIP concepts could be incorporated into the development of the ordinance. In particular, staff engaged with interested parties through the Concept Explorer Survey available online; live webinars; virtual office hours; partnerships with neighborhood groups and organizations; and community events.

Bilingual Kick-Off Webinars

To launch the CHIP and its associated core concepts, the City hosted three interactive webinar events in late March 2023, including one designed for monolingual Spanish speakers. The webinars were live-casted on the Department's Facebook page for those not able to attend via the webinar platform. During the webinars, City Planning Staff provided background on the housing crisis in Los Angeles and introduced the six core concepts and implementation strategies that comprised CHIP. Additionally, Mentimeter, an interactive presentation-based digital tool, was utilized to obtain feedback and responses during the presentation.

Community Events

The Department participated in various community events to interact with diverse communities across Los Angeles to raise awareness about the CHIP Strategies. Community events included two CicLAvias, LA River Fest, Central Ave Jazz Fest, the Sherman Oaks Street Fair, Taste of Soul, P-22 Day Festival, and 626 Golden Streets Arroyo Fest. City Planning staff participation at these events focused on education about the strategies as well as soliciting feedback to address

the needs of diverse populations. Through attendance at the events, the Department engaged with approximately 1,000 Angelenos.

Community Based Organization (CBO) Partnerships

In an effort to work with groups that have been historically underrepresented in the planning process, City Planning partnered with CBOs serving these communities. The Department applied for and received grant funding from the Southern California Association of Governments (SCAG) in order to compensate CBOs for event organization, including logistical coordination, translation, and crafting activities with specialized knowledge of historical, cultural, and geographical factors that impact their members.

On October 19, 2023, the City presented a session on CHIP strategies for The People's Planning School at Strategic Actions for a Just Economy (SAJE). The session had both educational and interactive components in order to maximize understanding of key CHIP concepts and hear the group's thoughts. The session had 20 attendees, most of whom were monolingual Spanish speakers from South LA.

On November 2, 2023, the City presented a session on the CHIP strategies for The People's Collaborative Academy at Pacoima Beautiful. The class included a presentation followed by a small-group activity in which participants placed different types of housing where they thought it was needed across the San Fernando Valley. The session had 14 attendees, a mix of English and Spanish speakers from Pacoima and Arleta.

Office Hours

From the 10th to the 31st of July 2023, the City held over 50 virtual Office Hours to offer the public an opportunity to provide feedback on the CHIP in small group conversations with City Planning staff. The conversations centered around specific questions about how CHIP would impact their neighborhoods. In addition to several constituents from the general public, the following organizations attended Office Hours:

- Wilshire Neighborhood Council
- Westside Neighborhood Council
- Sherman Oaks Neighborhood Council
- Pacific Urbanism
- SoLA Impact
- ACT-LA
- The River Project
- UCLA
- Friends Of The Miracle Mile
- Los Feliz Neighborhood Council
- Central City Association of Los Angeles]
- Craig Lawson & Co
- Encino Neighborhood Council
- City of Glendale

- Greater Wilshire Neighborhood Council
- Hillside Federation
- Greater Toluca Lake Neighborhood Council
- Palms Neighborhood Council
- Century Glen HOA
- West Los Angeles- Sawtelle Neighborhood Council
- Westwood Neighborhood Council
- Mar Vista Community Council

Surveys and Polls

On March 22, 2023, City Planning launched the Concept Explorer Survey on our website following a detailed explanation of each of the six core strategies, including interactive maps. Angelenos had the opportunity to take the survey and select multiple answers from a provided list of options to address what issues they believe to be the most pressing within the City, if the City should focus the majority of housing capacity in Higher Opportunity Areas, and what kinds of additional incentives they think should be made available to affordable housing developments. Although this survey was not statistically significant, the results aided planning staff in identifying what strategies Angelenos valued most in adding new housing capacity. Survey results can be found in Appendix 2.

City Planning additionally launched a poll as a part of a blog post released late October 2023 providing information about the exclusion of single-family zones from the CHIP ordinance. The poll asked respondents where they would like to see housing in residential neighborhoods and single-family zones, providing a list of options for distance from transit and major corridors. The poll received 4,200 responses at the time public comment closed on August 26, 2024. While the poll was not a statistical survey, the results described below provided the Department with insight into public opinion on the inclusion of single-family zones.

Approximately 42% of participants indicated responses in support of adding additional housing in existing residential areas with just over 17% favoring adding additional housing only on major corridors or streets. When asked about single-family zones, just over 60% opposed additional housing in single-family zones. While over half of respondents supported excluding single-family zones, approximately 21% supported seeing more housing in single-family zones on major corridors or streets, transition areas, and near transit stations.

Digital Marketing Campaign

The Department engaged in a digital marketing campaign funded by the SCAG Reap Grant in order to conduct outreach on the CHIP ordinance. In October and November of 2023, City Planning promoted ads on Google and Meta (Facebook and Instagram), encouraging constituents to take the Concept Explorer Survey. The Google ads gained a cumulative total of almost a million impressions, with over 19,000 clicks. 54% of the demographic reached were under 34 years old, and 70% were under 44 years old. On Meta platforms including Facebook and Instagram, 208,600 individuals were reached and the ads generated 6.4K clicks.

Share/ Publish Phase

During the Share/ Publish phase, City Planning released the first draft of the CHIP, RP, and HESMD ordinances, hosted three webinars in three languages, and participated in fourteen outreach activities in order to obtain feedback. Outreach during this phase was crucial not only to provide detailed information on the proposed ordinances, but also to collect focused feedback on desired modifications from the public before entering the revision process. Feedback was obtained through participation in outreach events, webinars, and meetings, via an open comment form on the website's Concept Explorer, as well as through direct emails to the housing element email address.

Webinars

After the release of the proposed ordinance in mid March 2024, City Planning hosted three webinars via Zoom in early April to provide a detailed overview of the ordinances. City Planning prioritized multi-lingual presentations to reflect the large population of Spanish-speaking only Angelenos represented within the city and included Korean translation at the request of Korean speaking constituents. One webinar was hosted in English only, one in Spanish, and one was presented in English with simultaneous Korean translation on a separate channel. The webinar presentations were approximately an hour long, followed by a Q&A session in which attendees received answers to their ordinance questions in real-time. In total, there were approximately 182 attendees across the three webinars. Webinars were also recorded and made available on the website for those who could not attend at the scheduled times.

Concept Explorer

The Concept Explorer was updated upon the release of the CHIP draft ordinance to reflect the change from the six core strategies of the Listen Phase to presenting the three programs within the new proposed ordinance. The Concept Explorer included detailed interactive maps for each aspect of the Mixed Income Incentive Program (MIIP) and the Affordable Housing Incentive Program (AHIP), including distinguishing tiers of eligibility. The use of interactive maps allowed the public to zoom in on specific neighborhoods and view in accessible color-coded visuals which parcels would be eligible for each of the proposed programs. This tool empowered the public to give more focused and informed feedback about the ordinance as it relates to their neighborhood and was used as an effective visual aid in group presentations. Information about the HESMDO and RPO were incorporated prior to the Revise / Publish phase and the release of second ordinance drafts.

Community Based Organization Partnerships

City Planning applied for and received grant funding from the Southern California Association of Governments (SCAG) to conduct compensated outreach through partnership with community based organizations (CBOs) to communities within Los Angeles that have been historically underrepresented within the planning process. This collaborative effort was initiated to address

historic housing discrimination by ensuring that outreach efforts are inclusive and accessible to collect input from all residents, including those from renter, low-income, non-English speaking, and non-White households.

In April and May of 2024, the Department conducted a total of five collaborative outreach events with the following organizations: LA Forward (4/10), Esperanza Community Housing (4/17), The Coalition for Humane Immigrant Rights Los Angeles (CHIRLA) (4/24), Abundant Housing (4/27), and Koreatown Immigrant Workers Alliance (KIWA) (5/04). The organizations hosted the events, differing in scale and format for each member group. Some CBOs opted for a presentation and Q&A format in which LACP staff presented on the ordinances, while others crafted interactive activities and structured sessions to best engage and educate their community on the ordinances and provide feedback. Spanish translation was provided at four events, and Korean translation was provided at KIWA's event. LA Forward's event was virtual, while the rest were held in-person in neighborhoods throughout the city including South LA, Northeast LA, and Westlake. Across all five organizations, a total of over 340 Angelenos were engaged through these collaborative CBO events.

Community Events

City Planning additionally conducted CHIP outreach at two CicLAvia events during this period, offering resources on the ordinance and engaging an approximate total of 300 Angelenos. REAP grant funding was also used to design and order specialized CHIP and LACP merchandise, including tote bags, bandanas, postcards, magnets, and water bottles. For each event, merchandise was distributed to participating members of the public.

Social Media Partnership

In a first for City Planning engagement, the Department partnered with social media account LA in a Minute to make four videos breaking down the key concepts of the CHIP ordinance. This digital marketing campaign was funded through the SCAG REAP Grant. LA in a Minute focuses on providing short and informative videos ranging from the history of Los Angeles to current events and notable places within the City. The intention of this partnership was to inform an audience that might not otherwise be reached through typical outreach channels such as subscriber newsletters and neighborhood council meetings, inviting further engagement and encouraging additional feedback from groups that may not have participated before. Engagement with the CHIP series was high, with approximately 177.6K views on Instagram, over 570 comments, and a cumulative reach of 426.5K through Meta advertising. By partnering with LA in a Minute, the Department was able to boost engagement and significantly expand the network of Angelenos informed about the proposed ordinance.

Additionally, the City continued its digital engagement campaign in this phase, releasing the *Let's Talk About the Citywide Housing Incentive Program* series informing Angelenos on the CHIP strategies through informational slideshows. The slideshows were published in English and Spanish on the Department's social media accounts.

Summary of Input Comments from CHIP Listen and Share Phases

This section summarizes the comments and feedback received during the Listen and Share phases, spanning from 2022 to Spring of 2024. The Department received several comment letters from individuals, coalitions, and organizations that provided feedback and recommendations including:

- Alliance of Californians for Community Empowerment (ACCE) Los Angeles
- Alliance for Community Transit- Los Angeles (ACT-LA)
- A coalition of organizations including: Abundant Housing LA, Inner City Law Center, Southern California Association of NonProfit Housing (SCANPH), Urban Environmentalists LA, American Civil Liberties Union (ACLU) of Southern California, Corporation for Supportive Housing (CSH), Climate Resolve, Healing and Justice Center, Hope the Mission, Hope Community Church of East LA, Holos Communities, East LA Community Corporation, New Life Community Church, Epicentre West LA, Faith and Housing Coalition, Mental Health Advocacy Services, BikeLA, Social Justice Learning Institute, Los Angeles New Liberals , SFV4ALL. Westside for Everyone, Abundant Housing at UCLA, Eastside Housing for All, Downtown Los Angeles For All, Justice in Aging, YIMBY Action, Housing Action Coalition, YIMBY Law, California Housing Defense Fund, Inquilinos Unidos, Supportive Housing Alliance, Community Corporation of Santa Monica, HOPICS, United Way of Greater Los Angeles, El Sereno Community Land Trust, Black Women for Wellness, Streets for All, California YIMBY, Fathers and Mothers Who Care, Housing Rights Center, People for Mobility Justice, LA Family Housing, Miracle Mile Democratic Club, and Ascencia
- Brentwood Homeowners Association
- Communities for a Better Environment (CBE)
- Coastal San Pedro Neighborhood Council
- Del Rey Residents Association
- Hancock Park Homeowners Association
- Livable Communities Initiative
- Northwest San Pedro Neighborhood Council
- One Voice Westchester Playa
- Southern California Association of NonProfit Housing (SCANPH)
- Sunset Square Neighborhood Organization
- West Los Angeles Sawtelle Neighborhood Council
- Westside Regional Alliance of Councils

For organizational purposes, the comments and feedback are grouped by key emerging themes that Angelenos expressed interest in exploring. All public comments are available in full in the project case file. Note that feedback in the Share Phase was almost exclusively received regarding the CHIP and RP ordinances with limited feedback from the Housing Element Sites and Minimum Density Ordinance to allow thematic grouping.

CHIP Focused

INCREASE HOUSING PRODUCTION

- Streamline housing processes and increase transparency, especially for affordable housing
- Develop different types of partnerships to build housing
- Concern that the ordinance does not provide a rapid enough solution for the City's housing crisis
- Recommends increased housing supply should be prioritized over affordability requirements
- General support of more development and increasing housing stock
- Concern for barriers to development in historical districts
- Support for maintaining compliance with the state to prevent fines and builder's remedy
- Concern that current market conditions will hinder development

PRIORITIZE DEEPER AFFORDABILITY

- Add Acutely Low Income category in affordability requirements/ more incentives for lower income levels
- Increased affordability requirements in areas experiencing gentrification and displacement pressure
- Concerns about increased density making more housing unaffordable.
- Prioritize deep affordability and ensure access for low-income residents to diverse housing options while reducing costs and restrictions for development

UPLIFT LIVABLE AND SUSTAINABLE NEIGHBORHOODS

- Retain a walkable and community scale for new development.
- Focus on upzoning and mixed-use zoning for walkable living options
- Manage increased density by building near transit to prevent overparking, overcrowding, and traffic problems
- Concerns about density overcrowding infrastructure (schools, streets, schools, parking), especially in residential neighborhoods
- Support for affordable housing with parking
- Concern that there are not sufficient regulations for project design near transit to emphasize transit accessibility
- Desire for more open space/ green space requirements
- Support for building more accessible housing
- Support of mixed- use developments on commercial corridors with access to grocery stores, shops, amenities, and jobs within the development.

LOCATION & TYPOLOGY OF DEVELOPMENT

- Support for Transit-Oriented Incentive Areas
- Oppose development in single-family zones
- Include single-family zones
- Support for more market rate units
- Support for development of multi-family projects on Opportunity Corridors and Opportunity Corridor Transition Areas

- Support for missing middle typologies
- Recommends cautious planning in areas adjacent to R1 through smaller scale development
- Expand Opportunity Corridor requirements so that more corridors are eligible
- Expand Opportunity Corridor Transition Area buffer zone
- Support for protection of historical districts
- Support for developing housing in underutilized zones
- Support for upzoning of R2 for smaller scale, transitional zoning adjacent to R1
- Facilitate utilization of Senate Bill 9 and state ADU law to create more housing units in lower density neighborhoods
- Prioritize the development of affordable units
- Support for dense development near corridors and underutilized publicly owned land to prevent housing that does not fit the context of the neighborhood
- Support for allowing increased density to projects
- Expresses need for multi-bedroom/ family-sized units
- Concern that transit- oriented development may be ineffective because Los Angeles' transit system is not sufficiently developed
- Concerns about large developments in single-family neighborhoods
- Consider mixed-use zoning, design standards, and building heights in alignment with community character

ADVANCE EQUITY IN HOUSING

- Support for more affordable and multi-family housing in High Opportunity Areas
- Concern that the plan falls short of affirmatively furthering fair housing and undoing patterns of segregation
- Desire for rent to own properties and more typologies designed for ownership
- Concern that there will be inequitable access to affordable housing due to discrimination and racism

PROTECT VULNERABLE POPULATIONS & NEIGHBORHOODS

- Protect the housing status of elderly residents through the creation of specific incentives, design standards, and public benefit options
- Concern that more development will lead to displacement and increased rents for current low-income residents
- Recommends further engagement with neighborhoods be conducted to ensure ordinance is effective and achieves intended goals
- Require community input in decision- making during development process to ensure a project meets the community's needs
- Ensure current residents can remain in High Opportunity Zones.
- Prioritize safety and accessibility to housing for vulnerable populations.
- Protect and expand upon existing affordable and missing middle housing
- Protect older affordable housing

ENVIRONMENTAL CONSIDERATIONS

- Support of site exclusions due to environmental hazards
- Recommendation to extend buffer zone for Oil Drilling Sites to 3200 ft
- Require public participation in identification of environmentally hazardous sites
- Recommends maintaining strong environmental review
- Prioritize environmentally conscious development near key services that all incomes have access to
- Ensure ample open space in projects and preserve existing tree canopy

REVISE INCENTIVES

- Support for more permissive "Modification of Development Standard" incentive
- Concern that FBO incentives in AHIP are too permissive
- Recommends reducing incentives for planned transit that hasn't yet been built
- Expand Public Benefit Options to include Elder Care Sites and Affordable Retail Spaces
- Support for incentives better suited to smaller developers
- Recommends implementing increased density through base zoning instead of incentives
- Desire for less waivers required to undergo discretionary review
- Maximize incentives for affordable housing

RPO Focused

AFFORDABILITY CONSIDERATIONS

- Desire for replacement units to be affordable, e.g. assume Extremely Low Income for replacement unit if income of former tenant is not known, and include Acutely Low as an income category for replacement requirements
- Support for 99-year affordability covenants and desire to extend covenant lengths to 'in perpetuity'
- Some concern that 99 year affordability will not be financially feasible for developers

INCREASE AFFORDABLE HOUSING STOCK

- Recommend replacement units should be counted in addition to affordable set-aside requirement
- Expand the City's Affordable housing stock by requiring 2:1 replacement of demolished RSO units

REPLACEMENT UNIT DESIGN

- Concern for loss of family sized units
- Recommend that "equivalent size" replacement units should also match the number of bathrooms, kitchen area size, dining area size, and should maintain the same or provide greater square footage as the demolished unit

EXPAND OCCUPANT PROTECTIONS

- Recommend that residents should have the right to remain closer to construction start date

- Specify and strengthen relocation requirements to ensure displaced households receive affordable replacement housing and a true opportunity to return
- Recommend that displaced tenants should have a right to return to their community or to a High Opportunity Area
- Desire for a local preference policy that identifies tenants for replacement units using geographical measures informed by AFFH framework

DISPLACEMENT CONCERNS

- Recommend tracking of displaced tenants
- Concern regarding rent increases causing displacement
- Concern for resident's loss of affordable unit if income increases

STRENGTHEN SYSTEMS OF TENANT OUTREACH

- Include requirements to conduct outreach in multiple languages
- Strengthen outreach so that existing residents know their rights
- Encourage CBO involvement in tenant outreach

DISTRIBUTION AND ACCESSIBILITY OF AFFORDABLE UNITS

- Concern regarding access issues for newly created affordable units, particularly related to the Affordable and Accessible Housing Registry
- Recommend training and accreditation requirements for developers regarding outreach to lower income tenants
- Streamline affordable unit applications into universal application system
- Concern that application requirements for affordable housing such as credit checks and deposits reduce accessibility of new units
- Ensure that affordable units are going to low-income tenants
- Ensure that tenant selection for Affordable units is clear and transparent

Revise/Publish Phase

During the Revise/Publish phase, City Planning released the second draft of the CHIP, RP, and HESMD ordinances, hosted a Public Hearing in three languages, and continued to meet with interested parties in order to obtain feedback. Comments were also received via an open comment form on the website's Concept Explorer, as well as through direct emails to the housing element email address. Outreach during this phase helped to refine the ordinance drafts presented to the City Planning Commission.

Public Hearing

A virtual public hearing was held for the CHIP, RP, and HESMD ordinances on July 25th, 2024. Translation services were provided in both Spanish and Korean. Notification of the hearing was emailed to the interest list on June 27th and July 18th and published in the Los Angeles Daily Journal on June 26th, 2024. A total of 98 people provided verbal comments with approximately 580 members of the public in attendance. Over 2,700 additional comments were received via email during this phase. It is of note that an overwhelming majority of comments offered feedback

both in support and opposition to the potential inclusion of single-family zones in the CHIP ordinance.

Meeting with Interested Parties

City Planning met with interested parties upon request to answer questions on the ordinance and conduct focused feedback sessions. During the Revise/Publish phase, the Department met with Central City Association (CCA), Alliance for Community Transit- Los Angeles (ACT-LA), Apartment Association of Greater Los Angeles (AAGLA), Alliance of of Californians for Community Empowerment (ACCE), American Institute of Architects (AIA), Urban Land Institute (ULI) and Southern California Association of Nonprofit Housing (SCANPH) to discuss the ordinance and receive direct feedback. Staff from City Planning and LAHD also attended a Tenant Resource Fair hosted by CD-13 during this phase to share information about the RPO. Throughout this phase of outreach, staff also fielded inquiries from constituents through email.

Summary of Listen, Share/Publish, and Revise/Publish Comments

Comment Letters

After the second draft release of the CHIP, RP, and HESMD ordinances in late June 2024, the Department received comment letters from organizations that provided feedback and recommendations. Letters were received from the following organizations:

- A coalition including: Central City Association, Housing Action Coalition, YIMBY Action, Los Angeles Area Chamber of Commerce, Building Industry Association of Southern California, Inc., AIA Los Angeles, and Craig Lawson & Co., LLC
- A coalition including: Southern California Association of NonProfit Housing (SCANPH), Abundant Housing LA, Inner City Law Center, PATH, Corporation for Supportive Housing, Supportive Housing Alliance, United Way of Greater Los Angeles, Homeless Outreach Program Integrated Care System (HOPICS), Community Corporation of Santa Monica, Westside for Everyone, Faith and Housing Coalition, American Civil Liberties Union (ACLU) of Southern California, Eastside Housing for All, Downtown Los Angeles For All, Hope the Mission, Los Angeles New Liberals, Safe Parking LA, SFV4ALL, Housing Action Coalition, YIMBY Action, YIMBY Law, California Community Builders, BikeLA, New Life Community Church, Salvadoran American Leadership and Educational Fund, Stories From The Frontline, Youth Emerging Stronger, Climate Resolve, Active San Gabriel Valley, Safe Place for Youth, Healing and Justice Center, St. Joseph Center, Mental Health Advocacy Services, Abundant Housing at UCLA, Long Beach Gray Panthers, Epicentre West LA, California Housing Defense Fund, Social Justice Learning Institute, Justice in Aging, East LA Community Corporation, Hope Community Church of East LA, Neighborhood Legal Services of LA County, El Sereno Community Land Trust, Union Station Homeless Services, Miracle Mile Democratic Club, Black Women for Wellness, Making Housing and Community Happen, Housing Rights Center, Hang Out Do Good, South LA Solid, Fideicomiso Comunitario Tierra Libre, Urban Environmentalists LA, Better Angels, Holos Communities, People of Mobility Justice, California YIMBY, Abundant Housing Sunset, South Bay Forward, Streets For All, and Ascencia

- A coalition including: Affordable Housing Solutions LA, Alchemy Planning, Baksh Construction Inc, Broadway Vista LLC, CSWF Construction, Drona Investments, Gatsby Investment, Green Development Company, LH Housing, Logos Faith Development, Orion Housing, Pax Urban Partners, Properties4You LLC, Psalms Development LLC, RRH Construction, SDS Capital Group, SoLa Impact, Southern California Obtainable Housing, TDC Pacific Properties, Terra Capital Development Group LLC, Urban Development Company, and VC Development Inc
- Alliance for Community Transit- Los Angeles (ACT-LA)
- Alliance of Californians for Community Empowerment (ACCE)
- Apartment Association of Greater Los Angeles (AAGLA)
- Cahuenga Pass Property Owners Association
- Coastal San Pedro Neighborhood Council
- Comstock Hills Homeowners Association
- Del Rey Residents Association
- Doheny Sunset Plaza Neighborhood Association
- Faith and Housing Coalition
- Franklin Corridor Communities
- Friends of Historic Miracle Mile
- Hermon Neighborhood Council
- Koreatown Immigrant Workers Alliance
- Los Angeles Conservancy
- Neighborhood Council Valley Village
- North Westwood Neighborhood Council
- Public Counsel
- Preserve Westchester
- Saint Andrews Square Neighborhood Association
- Strategic Actions for a Just Economy (SAJE)
- UCLA Lewis Center for Regional Policy Studies
- United Neighbors
- Valley Village Residents Association
- West Hills Neighborhood Council
- West Toluca Lake Residents Association
- Western States Regional Council of Carpenters
- Westwood Neighborhood Council
- Woodland Hills Homeowners Organization
- YIMBY Law

Summary of Comments Received

This section summarizes the comments and feedback received during the Revise/Publish phase, spanning from the release of the second draft ordinances in late June 2024 to the close of the public comment period in late August 2024. Of the approximate 3,100 public comments received via email, about 95% commented on the topic of single-family zoning and whether it should be included or excluded in the CHIP Ordinance. About 75% of comments that mentioned single-family zoning supported excluding single-family zoning from eligibility for CHIP, and about 25%

of comments supported including single-family zoning as eligible under CHIP. Additionally, approximately 1,000 public comments received voiced their support for the CHIP Ordinance as drafted in June 2024. For organizational purposes, the comments and feedback are grouped by themes. All public comments are available in full in the project case file. Note that feedback during this phase was almost exclusively received regarding the CHIP and RP ordinances with insufficient feedback from the Housing Element Sites and Minimum Density Ordinance to allow thematic grouping.

CHIP Focused

SUPPORT FOR SINGLE-FAMILY ZONES INCLUSION

- Concern that exclusion of single-family zones leads to further displacement
- Concern that exclusion of single-family zones leads to failure to meet RHNA targets, resulting in consequences of non-compliance from State
- Concern that exclusion of single-family zones will lower single-family property values due to restricted development potential
- Concern that exclusion of single-family zones will limit development to areas that have already borne a disproportionate amount of development
- Recommendation to include single-family zones in Corridor Transition Areas to further missing middle housing opportunities
- Recommendation to include single-family zones as eligible in Opportunity Areas/ Corridors
- Recommendation to allow single-family zones in designated historic areas
- Recommendation to include single-family zoned sites on larger corridors, but exclude R1 and R2 lots on smaller streets to reduce displacement pressure and tree canopy loss

OPPOSITION OF SINGLE-FAMILY ZONES INCLUSION

- Concern that single-family neighborhoods lack infrastructure for added density
- Opposes inclusion of single-family zones due to environmental concerns
- Statements that single-family zones will increase in density without rezoning through ADU development and SB9 lot splits
- Concern that inclusion of single-family zones will result in loss of property value for single-family home owners
- Opposes inclusion of single-family zones due to concerns for loss of neighborhood character

ENVIRONMENTAL CONSIDERATIONS

- Recommendation to include Coastal Zone in rezoning and not exempt from incentives
- Recommendation to extend public participation in approval process for projects proposed in environmentally sensitive areas
- Concern for projects not being subject to CEQA review
- Desire to prioritize green space
- Emphasizes importance of requiring new and maintaining existing tree canopy
- Recommendation to extend buffer zone for Oil Drilling Sites to 3200 ft

GEOGRAPHICAL ELIGIBILITY AND TYPOLOGY CONSIDERATIONS

- Support for added density on commercial corridors
- Support for Opportunity Corridors and development in High Opportunity Areas
- Support for adding density near transit
- Recommendation to expand Corridor Transition Areas
- Support for missing middle housing opportunity
- Support for social housing and limited equity/ cooperative housing models
- Support for incentivizing family sized/ multi-bedroom units
- Desire to prioritize protection of historic districts

DEVELOPMENT INCENTIVE AND DESIGN CONSIDERATIONS

- Proposes increased FAR in commercial zones
- Concern that the Menu of Incentives is too restrictive
- Concern that ordinance as proposed is too permissive, benefitting developers financially more than residents who need affordable housing
- Concern that ordinance does not make development feasible enough
- Desire for ordinance to require more parking
- Recommends stronger streamlining provisions
- Emphasizes importance of design considerations
- Desire for upzoning to be conducted through the community plan process rather than via a citywide ordinance
- Desire for infrastructure to be considered when adding density to neighborhood
- Proposes restricting mixed zone parcels to accessing incentives based on the lower density zone

AFFH CONSIDERATIONS

- Concern that current plan doesn't sufficiently AFFH or meet equity goals
- Desire for affordable housing to be incentivized citywide to spread opportunity
- General support of more affordable housing
- Desire to prioritize affordable housing above market rate housing
- Desire to prioritize preventing displacement
- Support for increased homeownership opportunities

AFFORDABILITY REQUIREMENT CONSIDERATIONS

- Desire to increase affordability requirements in areas experiencing gentrification/ displacement pressure
- Recommends deeper affordability/ increased ALI requirements
- Support for current affordability requirements
- Urges against 'double counting' of RPO mandated replacement units toward affordability requirements to ensure a net gain of affordable units

FBO ELIGIBILITY CONSIDERATIONS

- Recommendation to exclude rent stabilized parcels and historic districts from eligibility for FBO incentives for newly purchased property in single-family zones
- Support for added exclusions to FBO project eligibility in SFZ zones

- Desire for FBO policies to not be more permissive than state law

RPO Focused

RPO FEEDBACK

- Support for strengthening and expanding tenant protections
- Recommendation to prohibit the demolition of RSO units
- Recommendation to increase replacement requirement ratios to 2:1
- Recommendation to specify accessibility requirements in the affordable housing application process
- Some opposition to strengthening renters protections
- Recommendation to strengthen and enforce affordable housing outreach
- Recommendation to strengthen relocation benefits
- Some opposition to 99 year covenant lengths

INTRODUCTION

This document is the third draft of the proposed Citywide Housing Incentive Program Ordinance to amend Chapter 1 and Chapter 1A of the Los Angeles Municipal Code. The proposed Citywide Housing Incentive Program Ordinance aims to Affirmatively Further Fair Housing by promoting housing development citywide and, in particular, increasing affordable housing in Higher Opportunity Areas¹, where access to affordable housing is limited today. The draft Citywide Housing Incentive Program Ordinance proposes to do this through three distinct programs seen in Contents below. Note that this is a Clean version of the most recently revised draft. To review a strike-out version of this draft or the drafts released in March or June 2024, please visit:

ORDINANCE NO. _____

An ordinance amending Sections 12.03, 12.21, 12.22, and 12.24 of Article 2, Sections 13.09 and 13.15 of Article 3, Section 14.00 of Article 4, Section 14.5.4 of Article 4.5, Section 16.05 of Article 6, Section 19.01, 19.14, and 19.18 of Article 9 of Chapter 1; adding Section 11.5.15 to Article 1 of Chapter 1; amending Part 2B and Part 2C of Article 2, 8.1.1., 8.2.2., 8.2.3., 8.2.5., 8.2.6., 8.2.7., and 8.2.8 of Article 8, Sections 9.2.1., 9.3.1., 9.3.2., 9.3.3., and 9.4.1. of Article 9, Sections 13A.2.7., 13B.2.1., 13B.2.2., 13B.2.3., 13B.2.5., and 13B.3. of Article 13 of Chapter 1A; and amending 151.28 of Article 1 of Chapter 15 of the Los Angeles Municipal Code for the purpose of implementing the Citywide Housing Incentive Program.

**THE PEOPLE OF THE CITY OF LOS ANGELES
DO ORDAIN AS FOLLOWS:**

Section 1. Section 11.5.15 is added to Chapter I of the Los Angeles Municipal Code to read:

- A. **Intent.** This Section is intended to:
1. Ensure that development in the city does not result in detrimental impacts to those residing or working in and around construction activities, and to abutting properties, and the public right-of-way, including the habitat, cultural resources, and historic or fragile buildings.
 2. Provide a mechanism for mitigation measures adopted pursuant to CEQA for city plans, policies, or regulations to be made enforceable on future development projects consistent with *CEQA Guidelines, Section 15162.4*.
 3. Provide a flexible mechanism to adopt and amend uniformly applicable development standards to allow streamlined environmental review, including pursuant to *CEQA Guidelines Section 15183.3*.
- B. **Applicability.** No building permit shall be issued by the Department of Building and Safety without the applicant demonstrating compliance with any regulations adopted by the Director of Planning under this Section to implement environmental protection measures.
- C. **Adoption and Maintenance of the Environmental Protection Measures Handbook.** The Director of Planning, as deemed necessary and appropriate, is authorized to prepare, maintain, amend, and adopt environmental protection measures to meet the intent of this Division, and to prepare, maintain, amend and adopt regulations to implement the environmental protection measures. The Director of Planning may, as deemed appropriate, use technical consultants or a consultant advisory panel to make recommendations on new environmental protection measures or updates to existing environmental protection measures.

- D. **Noncompliance.** Failure to comply with the environmental protection measures, regulations adopted pursuant to this Section, any condition or commitments made in compliance with the environmental protection measures or their implementing regulations, or any provision of this Section, is a violation of the code, subject to all available administrative, criminal and civil remedies for a violation of this Code. Additionally, upon verification of non-compliance, the City of Los Angeles may require as deemed necessary and appropriate the applicant or property owner to retain at its own expense an independent consultant, subject to the City of Los Angeles' approval, to ensure compliance with the environmental protection measures or regulations, and any conditions or commitments made in compliance with the environmental protection measures or regulations.

Section 2. Section 12.03 of Article 2 of Chapter 1 of the Los Angeles Municipal Code is amended to include the following definitions:

Acutely Low Income. Income level as defined in Section 50063.5 of the California Health and Safety Code as amended from time to time

Area Median Income (AMI). The median income in Los Angeles County as determined annually by the California Department of Housing and Community Development (HCD) or any successor agency, adjusted for household size.

Coastal Zone. The Coastal Zone, as defined in California Public Resources Code, Division 20 (commencing with Section 30000).

Density Bonus. A density increase over the otherwise Maximum Allowable Residential Density, as of the date of application by the applicant to the City.

Designated Historic Resource. A building, structure, object, landscaping element, or natural feature listed or designated as a historical resource, either individually, or as a contributor to a district, at the local, state, or national level. Including but not limited to a listing in the National Register of Historic Places or California Register of Historical Resources, or designation as a Historic-Cultural Monument or Historic Preservation Overlay Zone.

Development Standard. A site or construction condition as defined in California Government Code Section 65915(o)(2), or as amended.

Extremely Low Income. Income Level as defined in Section 50106 of the California Health and Safety Code.

Neighborhood Retail and Service Uses. Uses that involve business activity serving the general public, pursuant to LAMC Section 13.07 C, definitions of Neighborhood Retail and Neighborhood Services, including, but not limited to, retail, professional and personal services, hospitality, restaurants, and entertainment.

High Quality Transit Service. A transit route with 15 minutes or less service frequency during peak commute hours in one direction. For the purpose of determining service interval frequency, a bus route may include a combination of overlapping bus lines when part of a “colinear” or “family” line as determined in coordination with SCAG and local transit agencies, may be considered as one service route for service interval frequency.

Higher Opportunity Areas. High and Highest Resource Areas as defined and identified by the California Tax Credit Allocation Committee (TCAC).

Housing Development. As defined in subdivision (i) of Government Code Section 65915, or as amended, a development project with five or more Residential Units including mixed-use developments; and subdivisions or common interest developments as defined in Section 4100 of the Civil Code or as amended.

Incentive. A reduction in site development standards or a modification to zoning code requirements or architectural design requirements that results in identifiable and actual cost reductions to provide for affordable housing costs as defined in subdivision (k) of California Government Code Section 65915, or as amended.

Lower Income. Income level as defined in California Health and Safety Code Section 50079.5.

Moderate and Lower Opportunity Areas. Moderate Resource, Low Resource, and High-Poverty & Segregation Areas as defined and identified by the California Tax Credit Allocation Committee (TCAC).

Major Transit Stop. In addition to California Public Resources Code Section 21064.3, a site containing a rail or bus rapid transit station or the intersection of two or more bus routes with a service interval of 15 minutes or less during the morning and afternoon peak commute periods in either direction. The stations or bus routes may be existing, under construction or included in the most recent Southern California Association of Governments (SCAG) Regional Transportation Plan (RTP). A bus route may include a combination of overlapping buses and may be considered as one service route for service interval frequency, when part of a “colinear”, “family”, or augmented line as determined in coordination with SCAG and transit agencies).

Maximum Allowable Residential Density. The greatest number of units allowed on a project site as defined in California Government Code Section 65915(o)(6), or as amended.

Moderate Income. Income level as defined in California Health and Safety Code Section 50093.

One Hundred Percent Affordable Housing Project. A Housing Development Project, as defined in California Government Code Section 65589.5, that involves the construction of, addition to, or remodeling of any building or buildings which results in the creation of five or more additional residential dwelling units or guest rooms, where all new dwelling units or guest rooms, exclusive of any manager's units, are restricted affordable for a term of at least 55 years for rental projects or at least 45 years for for-sale projects. With the exception of a manager's unit or units, or staff units for Projects utilizing California Government Code Section 65913.16, all units shall be affordable to lower income households earning up to 80 percent of the area median income, and rents or housing costs to the occupying residents do not exceed 30 percent of the maximum gross income, as those income ranges are defined by the United States Department of Housing and Urban Development (HUD), or any successor agency, except that up to 20 percent of the units may be affordable to Moderate Income households earning up to 120 percent of the area median income, with rents or housing costs consistent with the rents and income ranges as defined by California Health and Safety Code Section 50052.5 or California Health and Safety Code Section 50053.

Privately Owned Public Spaces (POPS). An open space located on private property accessible to the public, such as a plaza, arcades, paseos, through block pedestrian connections, or open air concourses located in or around buildings. To ensure that such open spaces are available to the public, each space must meet the following criteria:

1. Open to the general public free of charge between sunrise and sunset, or during regular business hours, whichever is longer.
2. The publicly accessible open space shall be at a minimum, equal to, or greater than the common outdoor amenity space required by LAMC Section 12.21 G.2(a) and shall have at least one clear minimum dimension of 15 feet in any direction. Planters used for trees and landscaping may be located within the required 15 foot dimension provided that planters do not exceed a height of 42 inches.
3. Shall provide at least one tree (non-palm species) for every 1,000 square feet of POPS space.
4. At least one Privately Owned Public Space (POPS) sign shall be posted at every public entrance to the amenity space in accordance with the Public Amenity Space Sign Standards as established by the Director of Planning, and in accordance with LAMC Ch1A, Div. 4C.11. (Signs).
5. Provides at least three (3) ground floor pedestrian amenities as listed below:

- a. Movable seating/furniture
- b. At grade planting area
- c. Hydration station inclusive of a water fountain or bottle refill station
- d. Urban garden for community use
- e. Play and/or exercise equipment
- f. Running water elements
- g. Shade structures

Residential Unit. A dwelling unit or joint living and work quarters; a mobilehome, as defined in California Health and Safety Code Section 18008, or as amended; a mobile home lot in a mobilehome park, as defined in California Health and Safety Code Section 18214, or as amended; or a Guest Room or Efficiency Dwelling Unit provided that the unit is not located in a Transient Residential Use.

Restricted Affordable Unit. A Residential Unit for which rental or mortgage amounts are restricted so as to be affordable to and occupied by Acutely Low Income, Extremely Low, Very Low, Lower or Moderate Income households, as defined by the California Department of Housing and Community Development (HCD) or any successor agency. Affordable means that rents or housing expenses should not exceed requirements set forth in California Health and Safety Code Section 50052.5 for for-sale Residential Units, California Health and Safety Code Section 50053 for for-lease Residential Units, or by the California Tax Credit Allocation Committee.

Sea Level Rise Area. An area of the coast that is vulnerable to five feet of sea level rise, as determined by the National Oceanic and Atmospheric Administration, the Ocean Protection Council, the United States Geological Survey, the University of California, or as determined by a local coastal hazards vulnerability assessment.

Specific Adverse Impact. Per California Government Code Section 65589.5(d)(2), or as amended, a significant, quantifiable, direct, and unavoidable impact, based on objective, identified written public health or safety standards, policies, or conditions as they existed on the date the application was deemed complete.

Surveyed Historic Resource. Any building, structure, object, site, landscape, or natural feature identified through an Historic Resources Survey as eligible for listing as either an individual resource or as a contributor to an historic district under a local, state or federal designation program, including but not limited to

listing in the National Register of Historic Places or California Register of Historical Resources, or designation as a Historic-Cultural Monument or as an Historic Preservation Overlay Zone. This term does not include a non-contributor to an eligible historic district.

Very High Fire Hazard Severity Zones. Refer to LAMC Section 57.4911.1.1.

Very Low Income. Income level as defined in California Health and Safety Code Section 50105.

Section 3. Subdivision 4 of Subsection A of Section 12.21 of the Los Angeles Municipal Code is modified to read as follows:

4. Off-Street Automobile Parking Requirements. (Amended by Ord. No. 185,480, Eff. 5/9/18.) A garage or an off-street automobile parking area shall be provided in connection with and at the time of the erection of each of the buildings or structures hereinafter specified, or at the time such buildings or structures are altered, enlarged, converted or increased in capacity by the addition of dwelling units, guest rooms, beds for institutions, floor area or seating capacity. The parking space capacity required in said garage or parking area shall be determined by the amount of dwelling units, guest rooms, beds for institutions, floor area or seats so provided, and said garage or parking area shall be maintained thereafter in connection with such buildings or structures.

New or existing automobile parking spaces required by the Code for all uses may be replaced by bicycle parking at a ratio of one standard or compact automobile parking space for every four required or non-required bicycle parking spaces provided, so long as the number of compact stalls complies with Section 12.21 A.5.(c) of this Code. In cases where additional bicycle parking spaces are required as a result of an addition to an existing building, the maximum number of bicycle parking spaces eligible to be applied toward the required number of automobile parking spaces shall be calculated based on the total number of bicycle parking spaces provided for the existing building plus the number of bicycle parking spaces provided for the addition. Notwithstanding the foregoing, no more than 20 percent of the required automobile parking spaces for nonresidential uses shall be replaced at a site. Automobile parking spaces for nonresidential projects or buildings located within 1,500 feet of a major transit stop, as defined in Subdivision (b) of Section 21155 of the California Public Resources Code as that section may be amended from time to time, may replace up to 30 percent of the required automobile parking spaces with bicycle parking. For buildings with less than 20 required automobile parking spaces, those spaces may be replaced subject to the limits described in this Subdivision, not exceeding a total of four parking spaces replaced.

Residential buildings, including hotels, motels and apartment hotels, may replace 10 percent of the required automobile parking with bicycle parking. Automobile parking spaces for residential projects or buildings located within 1,500 feet of a major transit stop, as defined in Subdivision (b) of Section 21155 of the California Public Resources

Code, may replace up to 15 percent of the required automobile parking spaces with bicycle parking. If a residential building includes at least the minimum number of restricted affordable units to receive a density bonus ~~under Section 12.22 A.25,~~ pursuant to California Government Code Section 65915 (b) then up to 30 percent of the required automobile parking may be replaced. In such cases, the replacement of automobile parking with bicycle parking shall be implemented in lieu of the parking options in California Government Code Section 65915(p) Section 12.22 A.25(d).

Section 4. Paragraph e Subdivision 31 of Subsection E of Section 12.22 of the Los Angeles Municipal Code is modified to read as follows:

31. Procedures. Application for the TOC Incentives shall be made on a form provided by the Department of City Planning, and shall follow the procedures outlined in Los Angeles Municipal Code Section 13B.2.5 (Director Determination) of Chapter 1A of this Code 12.22 A.25(g).

Section 5. Subdivision 25 of Subsection A of Section 12.22 of Los Angeles Municipal Code is hereby amended to read as follows:-

See LAMC Section 12.22 A.37 (State Density Bonus Program).

~~25. Affordable Housing Incentives – Density Bonus. (Amended by Ord. No. 179,681, Eff. 4/15/08.)~~

- (a) ~~**Purpose.** The purpose of this subdivision is to establish procedures for implementing State Density Bonus requirements, as set forth in California Government Code Sections 65915-65918, and to increase the production of affordable housing, consistent with City policies.~~
- (b) ~~**Definitions.** Notwithstanding any provision of this Code to the contrary, the following definitions shall apply to this subdivision:~~

~~**Affordable Housing Incentives Guidelines** — the guidelines approved by the City Planning Commission under which Housing Development Projects for which a Density Bonus has been requested are evaluated for compliance with the requirements of this subdivision.~~

~~**Area Median Income (AMI)** — the median income in Los Angeles County as determined annually by the California Department of Housing and Community Development (HCD) or any successor agency, adjusted for household size.~~

~~**Density Bonus** — a density increase over the otherwise maximum allowable residential density under the applicable zoning ordinance and/or specific plan granted pursuant to this subdivision.~~

~~**Density Bonus Procedures**—procedures to implement the City's Density Bonus program developed by the Departments of Building and Safety, City Planning and Housing.~~

~~**Disabled Person**—a person who has a physical or mental impairment that limits one or more major life activities, anyone who is regarded as having that type of an impairment or, anyone who has a record of having that type of an impairment.~~

~~**Floor Area Ratio**—the multiplier applied to the total buildable area of the lot to determine the total floor area of all buildings on a lot.~~

~~**Housing Development Project**—the construction of five or more new residential dwelling units, the addition of five or more residential dwelling units to an existing building or buildings, the remodeling of a building or buildings containing five or more residential dwelling units, or a mixed use development in which the residential floor area occupies at least fifty percent of the total floor area of the building or buildings. For the purpose of establishing the minimum number of five dwelling units, Restricted Affordable Units shall be included and density bonus units shall be excluded.~~

~~**Incentive**—a modification to a City development standard or requirement of Chapter I of this Code (zoning).~~

~~**Income, Very Low, Low or Moderate**—annual income of a household that does not exceed the amounts designated for each income category as determined by HCD or any successor agency.~~

~~**Residential Hotel**—any building containing six or more Guest Rooms or Efficiency Dwelling Units, which are intended or designed to be used, or are used, rented, or hired out to be occupied, or are occupied for sleeping purposes by guests, so long as the Guest Rooms or Efficiency Dwelling Units are also the primary residence of those guests, but not including any building containing six or more Guest Rooms or Efficiency Dwelling Units, which is primarily used by transient guests who do not occupy that building as their primary residence.~~

~~**Residential Unit**—a dwelling unit or joint living and work quarters; a mobilehome, as defined in California Health and Safety Code Section 18008; a mobile home lot in a mobilehome park, as defined in California Health and Safety Code Section 18214; or a Guest Room or Efficiency Dwelling Unit in a Residential Hotel.~~

~~**Restricted Affordable Unit**—a residential unit for which rental or mortgage amounts are restricted so as to be affordable to and occupied by Very Low, Low or Moderate Income households, as determined by the Los Angeles Housing Department. **(Amended by Ord. No. 187,122, Eff. 8/8/21.)**~~

~~**Senior Citizens**—individuals who are at least 62 years of age, except that for projects of at least 35 units that are subject to this subdivision, a threshold of 55 years of age may be used, provided all applicable City, state and federal regulations are met.~~

~~**Senior Citizen Housing Development**—a Housing Development Project for senior citizens that has at least 35 units.~~

~~**Specific Adverse Impact**—a significant, quantifiable, direct, and unavoidable impact, based on objective, identified written public health or safety standards, policies, or conditions as they existed on the date the application was deemed complete.~~

~~**Transit Stop/Major Employment Center**—any one of the following:~~

- ~~(1) A station stop for a fixed transit guideway or a fixed rail system that is currently in use or whose location is proposed and for which a full funding contract has been signed by all funding partners, or one for which a resolution to fund a preferred alignment has been adopted by the Los Angeles County Metropolitan Transportation Authority or its successor agency; or~~
- ~~(2) A Metro Rapid Bus stop located along a Metro Rapid Bus route; or, for a Housing Development Project consisting entirely of Restricted Affordable Units, any bus stop located along a Metro Rapid Bus route; or~~
- ~~(3) The boundaries of the following three major economic activity areas, identified in the General Plan Framework Element: Downtown, LAX and the Port of Los Angeles; or~~
- ~~(4) The boundaries of a college or university campus with an enrollment exceeding 10,000 students.~~

~~(c) **Density Bonus.** Notwithstanding any provision of this Code to the contrary, the following provisions shall apply to the grant of a Density Bonus for a Housing Development Project:~~

- ~~(1) **For Sale or Rental Housing with Low or Very Low Income Restricted Affordable Units.** A Housing Development Project that includes 10% of the total units of the project for Low Income households or 5% of the total units of the project for Very Low Income households, either in rental units or for sale units, shall be granted a minimum Density Bonus of 20%, which may be applied to any part of the Housing Development Project. The bonus may be increased according to the percentage of affordable housing units provided, as follows, but shall not exceed 35%:~~

Percentage Low Income Units	Percentage Density Bonus
40	20

41	21.5
42	23
43	24.5
44	26
45	27.5
46	29
47	30.5
48	32
49	33.5
20	35

5	20
6	22.5
7	25
8	27.5
9	30
10	32.5
11	35

~~(2) For Sale or Rental Senior Citizen Housing (Market Rate). A Senior Citizen Housing Development or a mobile home park that limits residency based on age requirements for housing for older persons pursuant to California Civil Code Sections 798.76 or 799.5 shall be granted a minimum Density Bonus of 20%.~~

~~(3) (Deleted by Ord. No. 181,142, Eff. 6/1/10.)~~

~~(4) A Common Interest Development That Includes Moderate Income Restricted Affordable Units. (Amended by Ord. No. 181,142, Eff. 6/1/10.) A common interest development as defined in Section 1351 of the Civil Code that includes at least 10% of its units for Moderate Income households shall be granted a minimum Density Bonus of 5%. The bonus may be increased according to the percentage of affordable housing units provided, as follows, but shall not exceed 35%:~~

- ~~(5) **Land Donation.** An applicant for a subdivision, parcel map or other residential development approval that donates land for housing to the City of Los Angeles satisfying the criteria of California Government Code Section 65915(h)(2), as verified by the Department of City Planning, shall be granted a minimum Density Bonus of 15%.~~
- ~~(6) **Child Care.** A Housing Development Project that conforms to the requirements of Subparagraphs (1), (2), (3), (4) or (5) of this paragraph and includes a child care facility located on the premises of, as part of, or adjacent to, the project, shall be granted either of the following:

 - ~~(i) an additional Density Bonus that is, for purposes of calculating residential density, an increase in the floor area of the project equal to the floor area of the child care facility included in the project.~~
 - ~~(ii) An additional Incentive that contributes significantly to the economic feasibility of the construction of the child care facility.~~~~
- ~~(7) **Fractional Units.** In calculating Density Bonus and Restricted Affordable units, any number resulting in a fraction shall be rounded up to the next whole number.~~
- ~~(8) **Other Discretionary Approval.** Approval of Density Bonus units shall not, in and of itself, trigger other discretionary approvals required by the Code.~~
- ~~(9) **Other Affordable Housing Subsidies.** Approval of Density Bonus units does not, in and of itself, preclude projects from receipt of other government subsidies for affordable housing.~~
- ~~(10) **Additional Option for Restricted Affordable Units located near Transit Stop/Major Employment Center.** In lieu of providing the requisite number of Restricted Affordable Units in a Housing Development Project located in or within 1,500 feet of a Transit Stop/Major Employment Center that would otherwise be required under this subdivision, an applicant may opt to provide a greater number of smaller units, provided that:~~

- ~~(i) the total number of units in the Housing Development Project including Density Bonus units does not exceed the maximum permitted by this subdivision;~~
 - ~~(ii) the square footage of the aggregate smaller Restricted Affordable units is equal to or greater than the square footage of the aggregate Restricted Affordable Units that would otherwise be required under this subdivision;~~
 - ~~(iii) the smaller Restricted Affordable units are distributed throughout the building and have proportionally the same number of bedrooms as the market rate units; and~~
 - ~~(iv) the smaller Restricted Affordable Units meet the minimum unit size requirements established by the Low Income Housing Tax Credit Program as administered by the California Tax Credit Allocation Committee (TCAC).~~
- ~~(11) **Common Interest Development with Low or Very Low Income restricted Affordable Units for Rent.** In a common interest development as defined in California Government Code Section 1351, such as a condominium, Restricted Affordable Units may be for sale or for rent.~~
- ~~(12) **Condominium Conversion.** A Housing Development Project that involves the conversion of apartments into condominiums and that includes 33 percent of its units restricted to households of Low or Moderate income or 15 percent of its units restricted to households of Very Low Income shall be granted a Density Bonus of 25 percent or up to three incentives as provided in Paragraph (e) of this subdivision.~~
- ~~(d) **Parking in a Housing Development Project.** Required parking spaces for a Housing Development Project that is for sale or for rent and qualifies for a Density Bonus and complies with this subdivision may be provided by complying with whichever of the following options requires the least amount of parking: applicable parking provisions of Section 12.21 A.4. of this Code, or Parking Option 1 or Parking Option 2, below. Required parking in a Housing Development Project that qualifies for a Density Bonus may be sold or rented separately from the dwelling units, so that buyers and tenants have the option of purchasing or renting a unit without a parking space. The separate sale or rental of a dwelling unit and a parking space shall not cause the rent or purchase price of a Restricted Affordable Unit (or the parking space) to be greater than it would otherwise have been.~~
- ~~(1) **Parking Option 1.** Required parking for all residential units in the Housing Development Project (not just the restricted units), inclusive of handicapped and guest parking, shall be reduced to the following requirements:~~

- ~~(i) For each Residential Unit of 0-1 bedroom: 1 on-site parking space.~~
- ~~(ii) For each Residential Unit of 2-3 bedrooms: 2 on-site parking spaces.~~
- ~~(iii) For each Residential Unit of 4 or more bedrooms: 2-1/2 on-site parking spaces.~~

~~(2) **Parking Option 2.** Required parking for the Restricted Affordable Units only shall be reduced as set forth in Subparagraphs (i) and (ii) below. Required parking for all other non-restricted units in the Housing Development Project shall comply with applicable provisions of Section 12.21 of this Code.~~

- ~~(i) One parking space per Restricted Affordable Unit, except:

 - ~~a. 0.5 parking space for each dwelling unit restricted to Low or Very Low Income Senior Citizens or Disabled Persons; and/or~~
 - ~~b. 0.25 parking space for each Restricted Affordable Unit in a Residential Hotel.~~~~
- ~~(ii) Up to 40% of the required parking for the Restricted Affordable Units may be provided by compact stalls.~~

~~(c) **Incentives.**~~

~~(1) In addition to the Density Bonus and parking options identified in Paragraphs (c) and (d) of this subdivision, a Housing Development Project that qualifies for a Density Bonus shall be granted the number of Incentives set forth in the table below.~~

Number of Incentives	Required Percentage* of Units Restricted for Very Low Income Households	Required Percentage* of Units Restricted for Low Income Households	Required Percentage* of Units Restricted for Moderate Income Households (For Sale Only)
One Incentive	5% or	10% or	10%
Two Incentives	10% or	20% or	20%
Three Incentives	15% or	30%	30%

~~*Excluding Density Bonus Units~~

~~(2) To be eligible for any on-menu incentives, a Housing Development Project (other than an Adaptive Reuse project) shall comply with the following:~~

- ~~(i) The facade of any portion of a building that abuts a street shall be articulated with a change of material or with a break in plane, so that the facade is not a flat surface.~~
 - ~~(ii) All buildings must be oriented to the street by providing entrances, windows, architectural features and/or balconies on the front and along any street facing elevations.~~
 - ~~(iii) The Housing Development Project shall not be a contributing structure in a designated Historic Preservation Overlay Zone and shall not be on the City of Los Angeles list of Historical Cultural Monuments.~~
 - ~~(iv) The Housing Development Project shall not be located on a substandard street in a Hillside Area or in a Very High Fire Hazard Severity Zone as established in Section 57.4908 of this Code.~~
- ~~(f) **Menu of Incentives.** Housing Development Projects that meet the qualifications of Paragraph (e) of this subdivision may request one or more of the following Incentives, as applicable:~~
- ~~(1) **Yard/Setback.** Up to 20% decrease in the required width or depth of any individual yard or setback except along any property line that abuts an R1 or more restrictively zoned property provided that the landscaping for the Housing Development Project is sufficient to qualify for the number of landscape points equivalent to 10% more than otherwise required by Section 12.40 of this Code and Landscape Ordinance Guidelines "O."~~
 - ~~(2) **Lot Coverage.** Up to 20% increase in lot coverage limits, provided that the landscaping for the Housing Development Project is sufficient to qualify for the number of landscape points equivalent to 10% more than otherwise required by Section 12.40 of this Code and Landscape Ordinance Guidelines "O".~~
 - ~~(3) **Lot Width.** Up to 20% decrease from a lot width requirement, provided that the landscaping for the Housing Development Project is sufficient to qualify for the number of landscape points equivalent to 10% more than otherwise required by Section 12.40 of this Code and Landscape Ordinance Guidelines "O".~~
 - ~~(4) **Floor Area Ratio:**~~
 - ~~(i) A percentage increase in the allowable Floor Area Ratio equal to the percentage of Density Bonus for which the Housing Development Project is eligible, not to exceed 35%; or~~
 - ~~(ii) In lieu of the otherwise applicable Floor Area Ratio, a Floor Area Ratio not to exceed 3:1, provided the parcel is in a commercial zone in Height~~

~~District 1 (including 1VL, 1L and 1XL), and fronts on a Major Highway as identified in the City's General Plan, and~~

- ~~(iii) the Housing Development Project includes the number of Restricted Affordable Units sufficient to qualify for a 35% Density Bonus, and~~
- ~~(iv) 50% or more of the commercially zoned parcel is located in or within 1,500 feet of a Transit Stop/Major Employment Center.~~

~~A Housing Development Project in which at least 80% of the units in a rental project are Restricted Affordable Units or in which 45% of the units in a for-sale project are Restricted Affordable Units shall be exempt from the requirement to front on a Major Highway.~~

~~(g) **Height.** A percentage increase in the height requirement in feet equal to the percentage of Density Bonus for which the Housing Development Project is eligible. This percentage increase in height shall be applicable over the entire parcel regardless of the number of underlying height limits. For purposes of this subparagraph, Section 12.21.1 A.10. of this Code shall not apply.~~

~~(1) In any zone in which the height or number of stories is limited, this height increase shall permit a maximum of eleven additional feet or one additional story, whichever is lower, to provide the Restricted Affordable Units.~~

~~(i) No additional height shall be permitted for that portion of a of a building in a Housing Development Project that is located within fifteen feet of a lot classified in the R2 Zone.~~

~~(ii) For each foot of additional height the building shall be set back one horizontal foot.~~

~~(2) No additional height shall be permitted for that portion of a building in a Housing Development Project that is located within 50 feet of a lot classified in an R1 or more restrictive residential zone.~~

~~(3) No additional height shall be permitted for any portion of a building in a Housing Development Project located on a lot sharing a common lot line with or across an alley from a lot classified in an R1 or more restrictive zone. This prohibition shall not apply if the lot on which the Housing Development Project is located is within 1,500 feet of a Transit Stop but no additional height shall be permitted for that portion of a building in the Housing Development Project that is located within 50 feet of a lot classified in an R1 or more restrictive residential zone.~~

- ~~(4) **Open Space.** Up to 20% decrease from an open space requirement, provided that the landscaping for the Housing Development Project is sufficient to qualify for the number of landscape points equivalent to 10% more than otherwise required by Section 12.40 of this Code and Landscape Ordinance Guidelines “O”.~~
- ~~(5) **Density Calculation.** The area of any land required to be dedicated for street or alley purposes may be included as lot area for purposes of calculating the maximum density permitted by the underlying zone in which the project is located.~~
- ~~(6) **Averaging of Floor Area Ratio, Density, Parking or Open Space, and permitting Vehicular Access.** A Housing Development Project that is located on two or more contiguous parcels may average the floor area, density, open space and parking over the project site, and permit vehicular access from a less restrictive zone to a more restrictive zone, provided that:~~
- ~~(i) the Housing Development Project includes 11% or more of the units as Restricted Affordable Units for Very Low Income households, or 20% of the units for Low Income households, or 30% of the units for Moderate Income households; and~~
 - ~~(ii) the proposed use is permitted by the underlying zone(s) of each parcel; and~~
 - ~~(iii) no further lot line adjustment or any other action that may cause the Housing Development Project site to be subdivided subsequent to this grant shall be permitted.~~
- ~~(h) **Procedures.**~~
- ~~(1) **Density Bonus and Parking.** Housing Development Projects requesting a Density Bonus without any Incentives (which includes a Density Bonus with only parking requirements in accordance with Paragraphs (c) and (d) of this subdivision) shall be considered ministerial and follow the Affordable Housing Incentives Guidelines and the Density Bonus Procedures. No application for these projects need be filed with the City Planning Department.~~
- ~~(2) **Requests for Incentives on the Menu.**~~
- ~~(i) The applicant for Housing Development Projects that qualify for a Density Bonus and that request up to three Incentives on the Menu of Incentives in Paragraph (f) of this subdivision, and which require no other discretionary actions, the following procedures shall apply:~~

~~a. **Application.** The request shall be made on a form provided by the Department of City Planning, as set forth in Section 11.5.7 B.2.(a) of this Code, accompanied by applicable fees.~~

~~b. **Authority. (Amended by Ord. No. 182,106, Eff. 5/20/12.)** The Director shall be the initial decision maker for applications seeking on Menu incentives.~~

~~**EXCEPTION:** When the application is filed as part of a project requiring multiple approvals, the initial decision maker shall be as set forth in Section 12.36 of this Code; and when the application is filed in conjunction with a subdivision and no other approval, the Advisory Agency shall be the initial decision maker.~~

~~c. **Action.** The Director shall approve a Density Bonus and requested Incentive(s) unless the Director finds that:~~

~~i. The Incentive is not required in order to provide for affordable housing costs as defined in California Health and Safety Code Section 50052.5, or Section 50053 for rents for the affordable units; or~~

~~ii. The Incentive will have a Specific Adverse Impact upon public health and safety or the physical environment or on any real property that is listed in the California Register of Historical Resources and for which there is no feasible method to satisfactorily mitigate or avoid the Specific Adverse Impact without rendering the development unaffordable to Very Low, Low and Moderate Income households. Inconsistency with the zoning ordinance or general plan land use designation shall not constitute a specific, adverse impact upon the public health or safety.~~

~~d. **Transmittal of Written Decision.** Within three business days of making a decision, the Director shall transmit a copy by First Class Mail to the applicant and to all owners of properties abutting, across the street or alley from, or having a common corner with the subject property, and to the local Certified Neighborhood Council.~~

~~e. **Effective Date of Initial Decision.** The Director's decision shall become effective after an elapsed period of 15 calendar days from the date of the mailing of the written decision unless an appeal is filed to the City Planning Commission.~~

~~f. **Appeals. (Amended by Ord. No. 182,106, Eff. 5/20/12.)** An applicant or any owner or tenant of a property abutting, across the street or alley from, or having a common corner with the subject property aggrieved by the Director's decision may appeal the decision to the City Planning Commission pursuant to applicable procedures set forth in Section 11.5.7 C.6. of this Code that are not in conflict with the provisions of this paragraph (g)(2)(i). The appeal shall include a filing fee pursuant to Section 19.01 B. of this Code. Before acting on any appeal, the City Planning Commission shall set the matter for hearing, with written notice of the hearing sent by First Class Mail at least ten days prior to the meeting date to: the applicant; the owner(s) of the property involved; and the interested parties who have requested notice in writing. The appeal shall be placed on the agenda for the first available meeting date of the City Planning Commission and acted upon within 60 days from the last day of the appeal period. The City Planning Commission may reverse or modify, in whole or in part, a decision of the Director. The City Planning Commission shall make the same findings required to be made by the Director, supported by facts in the record, and indicate why the Director erred making the determination.~~

EXCEPTION: ~~When the application is filed as part of a project requiring multiple approvals, the appeals procedures set forth in Section 12.36 of this Code shall govern. When the application is filed in conjunction with a Parcel Map and no other approval, the appeals procedures set forth in Section 17.54 of this Code shall govern. When the application is filed in conjunction with a tentative map and no other approval, the appeals procedures set forth in Section 17.06 A.3. of this Code shall govern, provided that such applications shall only be appealable to the Appeal Board, as defined in Section 17.02 of this Code, and shall not be subject to further appeal to the City's legislative body.~~

~~(ii) For Housing Development Projects that qualify for a Density Bonus and for which the applicant requests up to three Incentives listed in Paragraph (f), above, and that require other discretionary actions, the applicable procedures set forth in Section 12.36 of this Code shall apply.~~

~~a. The decision must include a separate section clearly labeled "Density Bonus/ Affordable Housing Incentives Program Determination".~~

~~b. The decision maker shall approve a Density Bonus and requested Incentive(s) unless the decision maker, based upon substantial evidence, makes either of the two findings set forth in Subparagraph (2)(i)(c), above.~~

~~(3) **Requests for Waiver or Modification of any Development Standard(s) Not on the Menu.**~~

~~(i) For Housing Development Projects that qualify for a Density Bonus and for which the applicant request a waiver or modification of any development standard(s) that is not included on the Menu of Incentives in Paragraph (f), above, and that are not subject to other discretionary applications, the following shall apply:~~

~~a. The request shall be made on a form provided by the Department of City Planning, accompanied by applicable fees, and shall include a pro forma or other documentation to show that the waiver or modification of any development standard(s) are needed in order to make the Restricted Affordable Units economically feasible.~~

~~b. **Notice and Hearing.** The application shall follow the procedures for conditional uses set forth in Section 12.24 D. of this Code. A public hearing shall be held by the City Planning Commission or its designee. The decision of the City Planning Commission shall be final.~~

~~c. The City Planning Commission shall approve a Density Bonus and requested waiver or modification of any development standard(s) unless the Commission, based upon substantial evidence, makes either of the two findings set forth in Subparagraph (g)(2)(i)c., above.~~

~~(ii) For Housing Development Projects requesting waiver or modification of any development standard(s) not included on the Menu of Incentives in Paragraph (f) above, and which include other discretionary applications, the following shall apply:~~

~~a. The applicable procedures set forth in Section 12.36 of this Code shall apply.~~

~~b. The decision must include a separate section clearly labeled "Density Bonus/ Affordable Housing Incentives Program Determination".~~

~~e. The decision maker shall approve a Density Bonus and requested waiver or modification of any development standard(s) unless the decision maker, based upon substantial evidence, makes either of the two findings set forth in Subparagraph (g)(2)(i)c., above.~~

~~(i) **Covenant.** Prior to issuance of a Building Permit, the following shall apply:~~

~~(1) For any Housing Development Project qualifying for a Density Bonus and that contains housing for Senior Citizens, a covenant acceptable to the Los Angeles Housing Department shall be recorded with the Los Angeles County Recorder, guaranteeing that the occupancy restriction to Senior Citizens shall be observed for at least 30 years from the issuance of the Certificate of Occupancy or a longer period of time if required by the construction or mortgage financing assistance program, mortgage assistance program, or rental subsidy program. **(Amended by Ord. No. 187,122, Eff. 8/8/21.)**~~

~~(2) For any Housing Development Project qualifying for a Density Bonus and that contains housing for Low or Very Low Income households, a covenant acceptable to the Los Angeles Housing Department shall be recorded with the Los Angeles County Recorder, guaranteeing that the affordability criteria will be observed for at least 30 years from the issuance of the Certificate of Occupancy or a longer period of time if required by the construction or mortgage financing assistance program, mortgage assistance program, or rental subsidy program. **(Amended by Ord. No. 187,122, Eff. 8/8/21.)**~~

~~(3) For any Housing Development Project qualifying for a Density Bonus and that contains housing for Moderate Income households for sale, a covenant acceptable to the Los Angeles Housing Department and consistent with the for sale requirements of California Government Code Section 65915(c)(2) shall be recorded with the Los Angeles County Recorder guaranteeing that the affordability criteria will be observed for at least ten years from the issuance of the Certificate of Occupancy. **(Amended by Ord. No. 187,122, Eff. 8/8/21.)**~~

~~(4) If the duration of affordability covenants provided for in this subdivision conflicts with the duration for any other government requirement, the longest duration shall control.~~

~~(5) Any covenant described in this paragraph must provide for a private right of enforcement by the City, any tenant, or owner of any building to which a covenant and agreement applies.~~

~~(j) **Fee Deferral.** At the option of the applicant, payment of fees may be deferred pursuant to Sections 19.01 O. and 19.05 A.1. of this Code.~~

~~(k) **Applicability.** To the extent permitted under applicable State law, if a conflict arises between the terms of this subdivision and the terms of the City's Mello Act Settlement Agreement, Interim Administrative Procedures for Complying with the Mello Act or any subsequent permanent Mello Ordinance, Procedures or Regulations (collectively "Mello Terms"), the Mello Terms preempt this subdivision.~~

Section 6. Subdivision 37 of Subsection A of Section 12.22 of the Los Angeles Municipal Code is added to read as follows:

12.22 A.37 STATE DENSITY BONUS PROGRAM

(a) **Purpose.** The purpose of this Subdivision is to establish procedures for the implementation of State Density Bonus requirements, as set forth in California Government Code Sections 65915-65918, and to increase the production of affordable housing, consistent with City policies.

(b) **Definitions.** The following definitions shall apply to this Subdivision:

Disabled Veteran. Disabled Veteran shall be as defined in Section 18541 of the California Government Code.

Environmental Consideration Area. Project sites that were previously used as a gas station, gas or oil well, or dry-cleaning facility, or Project sites located on or within 500 feet of a Hazardous Materials site (as listed on any of the following databases: State Water Resources Control Board Geotracker, DTSC EnviroStor or listed pursuant to Government Code Section 65962.5, DTSC Hazardous Waste Tracking System, LAFD Certified Unified Program Agency, Los Angeles County Fire Department Health Hazardous Materials Division, SCAQMD Facility Information Detail), or Project sites located on or within 500 feet of a Hazardous Materials site designated as a Resource Conservation and Recovery Act (RCRA) Small Quantity Generator or Large Quantity Generator (refer to US EPA Envirofacts database), or Project sites located in an Oil Drilling District (O), or Project sites located within the following buffers of a property identified as having an oil well or an oil field by the California Geologic Energy Management Division: on or within 1,000 feet from an active oil well or field, on or within 200 feet from an idle oil well or field, and on or within 100 feet from a plugged oil well or field.

Homeless Person. Homeless Person as defined in the federal McKinney-Vento Homeless Assistance Act (42 U.S.C. Sec. 11301 et seq.).

Lower Income Student. A student who has a household income and asset level that does not exceed the level for Cal Grant A or Cal Grant B award recipients as set forth in paragraph (1) of subdivision (k) of Section 69432.7 of the Education Code, or as amended. The eligibility of a student to occupy a unit for lower

income students under this section shall be verified by an affidavit, award letter, or letter of eligibility provided by the institution of higher education in which the student is enrolled or by the California Student Aid Commission that the student receives or is eligible for financial aid, including an institutional grant or fee waiver from the college or university, the California Student Aid Commission, or the federal government.

Senior Citizens. Individuals who are at least 62 years of age, except that for projects of at least 35 units that are subject to this subdivision, a threshold of 55 years of age may be used, provided all applicable City, state and federal regulations are met.

Senior Citizen Housing Development. A Housing Development that has at least 35 dwelling units or guest rooms, as defined in Sections 51.3 and 51.12 of the Civil Code, or a mobilehome park that limits residency based on age requirements for housing for older persons pursuant to Section 798.76 or 799.5 of the Civil Code.

Shared Housing Building. A residential or mixed-use structure, with five or more shared housing units and one or more common kitchens and dining areas designed for permanent residence of more than 30 days by its tenants as defined in California Government Code Section 65915(o)(7)(A), or as amended.

Shared Housing Unit. A Residential Unit with one or more habitable rooms, not within another dwelling unit as defined in Government Code Section 65915(o)(7)(B) or as amended. Shared Housing Units shall be considered "Guest Rooms" for purposes of zoning and allowable density.

Student Housing Development. Student Housing Development shall be as defined in California Government Code Section 65915(b)(1)(F).

Transitional Foster Youth. Transitional Foster Youth shall be as defined in Section 66025.9 of the Education Code.

Very Low Vehicle Travel Area. Refer to California Government Code Section 65915 (o)(9).

(c) **Eligibility.** To qualify for the provisions of this Subdivision, a Housing Development must satisfy all of the following:

- (1) Meet the definition of a Housing Development or Shared Housing Building, with five or more Residential Units or Shared Housing Units including mixed-use developments. For the purpose of establishing the minimum number of five Residential Units or Shared Housing Units, Density Bonus units shall be excluded.

DRAFT

- (2) Reserve a percentage of the Residential Units (excluding Residential Units added by a Density Bonus) provided in a Housing Development for:
 - (i) Restricted Affordable Units for at least one of the following income levels in Table 12.22 A.37(c)(2)(iii) below, or
 - (ii) Restricted Affordable Units for one of the Target Populations listed in Table 12.22 A.37(c)(2)(iii) below.

TABLE 12.22 A.37(c)(2)(iii) Required Percentage of Restricted Affordable Units	
Income Level	Minimum % of Residential Units Provided (Excluding Residential Units Added by a Density Bonus)
Very Low Income (For Rental or For Sale)	5
Low Income (For Rental or For Sale)	10
Moderate Income (For Sale)	10
Target Population	Minimum % of Residential Units Provided (Excluding Residential Units Added by a Density Bonus)
Senior Citizen	100 ¹
Transitional Foster Youth, Disabled Veteran, or Homeless Persons ²	10
Lower Income Students ³	20

Footnotes

1 Senior Citizen Housing Development must comply with Sections 51.2 and 51.3 of the California Civil Code and all units provided in the resulting Senior Citizen Housing Development should be reserved for Senior Citizens regardless of the specifications stated in Table 12.22 A.37(c)(2)(iii).

2 Residential Units provided for Transitional Foster Youth, Disabled Veterans, or Homeless Persons in Table 12.22 A.37(c)(2)(iii) shall be provided as Very Low Income Restricted Affordable Units.

3 Residential Units provided for Lower Income Students shall be provided at an affordability level as specified in California Government Code Section 65915(b)(1)(F).

(3) The Housing Development does not require the demolition of a Designated Historic Resource, as demolition is defined in LAMC Section 13B.8.1.C of Chapter 1A of this Code, and any proposed alteration to a Designated Historic Resource shall not be approved until a review has been completed by the Office of Historic Resources.

(4) Housing Developments located on project sites that meet the definition of an Environmental Consideration Area shall comply with all applicable standards

contained in the Environmental Protection Measures adopted pursuant to LAMC Section 11.5.15.

(d) **Procedures.** A Housing Development that meets the provisions of this Subdivision shall be reviewed pursuant to Procedures described in this Paragraph. Though an approval of a Density Bonus or Incentive pursuant to this Subdivision shall not, in and of itself, trigger a General Plan Amendment, Zone Change, Project Review or other discretionary review actions required by this Zoning Code, the applicable procedures set forth in LAMC Section 13A.2.10 (Multiple Approvals) of Chapter 1A of this Code shall apply for Housing Developments seeking other discretionary approvals in conjunction with an application requested pursuant to the procedures in Paragraph (d).

(1) **Los Angeles Department of Building and Safety Review.** Housing Developments seeking Base Incentives described in Paragraph (e) and/or Incentives listed on the Menu of Incentives described in LAMC Section 12.22 A.37(f)(2) shall be considered ministerial and processed by the Department of Building and Safety.

(i) Exception. Housing Developments requesting Incentives from the Menu of Incentives that cannot comply with the criteria established in LAMC Section 12.22 A.37(f)(1)(iii) shall comply with procedures set forth in LAMC Section 12.22 A.37(d)(2).

(2) **Expanded Administrative Review.** The following Housing Developments shall be ministerially reviewed by the Department of City Planning pursuant to Expanded Administrative Review, as set forth by the provisions of LAMC Section 13B.3.2 (Expanded Administrative Review) of Chapter 1A of this Code. As defined in this section, ministerial approval means an administrative process to approve a “use by right” as this term is defined in California Government Code Section 65583.2 (i). Housing Developments requesting waivers or reductions of Development Standards in addition to Incentives shall be subject to the Procedures described in LAMC Section 12.22 A.37(d)(3).

- (i) Housing Developments that request the Public Benefit Options described in Paragraph (g). Housing Developments that request only Public Benefit Options in addition to Incentives listed on the Menu of Incentives shall not be subject to any hearing procedures regardless of the provisions contained in LAMC Section 13B.3.2.D.
- (ii) Housing Developments that request Incentives not listed on the Menu of Incentives described in LAMC Section 12.22 A.37(f)(2). Housing Developments that request Incentives not listed on the Menu of Incentives may be subject to a public hearing as described in LAMC Section 13B.3.2.D.

DRAFT

(3) **City Planning Commission Review.** The following Housing Developments must file an application pursuant to the procedures set forth in LAMC Section 13B.2.3 (Class 3 Conditional Use Permit) of Chapter 1A of this Code. Notwithstanding the provisions set forth in Sec. 13B.2.3. of Chapter 1A, the decision of the City Planning Commission shall be final.

- (i) Housing Developments that request waivers or reductions of any Development Standards not listed on the Menu of Incentives described in LAMC Section 12.22 A.37(f)(2). Waivers or reductions of Development Standards shall be approved by the applicable decision-making authority unless that decision making authority finds that:
 - a. The Development Standard associated with a request for waiver(s) or reduction(s) in Development Standards will not have the effect of physically precluding the construction of a development meeting the Eligibility criteria described in Paragraph (c) at the densities or with the concessions or incentives permitted under Paragraph (e); or
 - b. The waivers or reductions of Development Standards would have a Specific Adverse Impact as defined in paragraph (2) of subdivision (d) of Section 65589.5, upon public health and safety or on a California Register of Historical Resources and for which there is no feasible method to satisfactorily mitigate or avoid the specific, adverse impact without rendering the development unaffordable to low-income and moderate-income households; or
 - c. The waivers or reductions of Development Standards are contrary to state or federal law.

(ii) In addition to the procedures set forth in LAMC Section 13B.2.3 of Chapter 1A of this Code, Housing Developments requesting Density Bonuses that exceed 50% or 88.75% dependent on the percentage of Restricted Affordable Units provided shall be subject to the requirements and findings set forth in LAMC 12.24 U.26.

(4) **One Hundred Percent Affordable Housing Projects.** One Hundred Percent Affordable Housing Projects shall be reviewed pursuant to LAMC Section 12.22 A.39.

- (5) **Other Discretionary Approvals.** Applicable procedures set forth in LAMC Section 13A.2.10 (Multiple Approvals) of Chapter 1A of this Code apply for Housing Developments seeking other discretionary approvals in conjunction with an application requested pursuant to the Procedures in Paragraph (d). Regardless of any other findings that may be applicable, the decision maker must approve the requested Base Incentives and Additional Incentives, either on or off the Menu of Incentives described in LAMC Section 12.22 A.37(f)(2), requested under this Subdivision unless the decision maker, based upon substantial evidence, determines that the Housing Development meets one or more of the criteria described in LAMC Section 12.22 A.37(f)(1)(ii).

DRAFT

(e) **Base Incentives.** A Housing Development shall be granted any of the Base Incentives established in this Paragraph in exchange for the required minimum percentage of Restricted Affordable Units established in Paragraph (c) of this Subdivision. Projects that qualify for Base Incentives established in this Paragraph shall also be eligible for Additional Incentives pursuant to Paragraph (f) and Public Benefit Options pursuant to Paragraph (g) of this Subdivision unless otherwise stated.

(1) **Density.**

(i) **For Sale or Rental Housing with Very Low or Low Income Restricted Affordable Units and For Sale Housing with Moderate Income Units.**

For Sale or Rental Housing with Very Low or Low Income Restricted Affordable Units and For Sale Housing with Moderate Income units shall receive a Density Bonus as follows in Table 12.22 A.37(e)(1)(i)a but shall not exceed 50% unless seeking an Additional Density Bonus pursuant to Table 12.22 A.37(e)(1)(ii). Residential Units constructed as a result of a Density Bonus may be permitted in geographic areas of the Housing Development other than the areas where Restricted Affordable Units or units for a Target Population are located.

(ii) **Additional Density Bonus.** A Housing Development that provides Restricted Affordable Units sufficient to qualify for a 50% Density Bonus may seek an additional Density Bonus pursuant to Table 12.22

A.37(e)(1)(ii)a provided that the resulting Housing Development does not restrict more than 50% of a Housing Development’s overall Residential Units to Restricted Affordable Units. The Additional Density Bonus shall be calculated excluding any Density Bonus allowed by Table 12.22 A.37(e)(1)(i). The Additional Density Bonus shall also be calculated separately from the Density Bonus allowed by Table 12.22 A.37(e)(1)(i)a to account for the rounding of fractional numbers for both the Density Bonus and Additional Density Bonus pursuant to LAMC Section 12.22 A.37(h)(5).

(iii) **Housing for Target Populations.** Housing Developments that provide Residential Units for a target population listed in Table 12.22 A.37(c)(2)(iii) shall receive a Density Bonus as follows in Table 12.22 A.37(e)(1)(iii)a. These Density Bonuses may be combined with a Density Bonus for Residential Units set aside as Restricted Affordable Units based on Table 12.22 A.37(e)(1)(i)a so long as the Restricted Affordable Units are set aside for the applicable Target Population.

TABLE 12.22 A.37(e)(1)(iii)a Housing for Target Populations - Density Bonuses	
Target Population	Percentage of Density Bonus
Senior Citizen	20%
Transitional Foster Youth/Disabled Veterans/Homeless Persons	20%
Lower Income Student Development	35%

Footnotes

1 Senior Citizen Housing Development must comply with Sections 51.2 and 51.3 of the California Civil Code.

(iv) **Land Donation.** An applicant for a subdivision, parcel map or other residential development approval that donates land for housing to the City of Los Angeles satisfying the criteria of California Government Code Section 65915(g)(2), as verified by the Department of City Planning, shall be granted a minimum Density Bonus of 15% in addition to the Density Bonus sought pursuant to LAMC Section 12.22 A.37(e)(1), up to a combined maximum density increase of 35%. The Department of City Planning may create an Implementation Memorandum for the purpose of clarifying procedures associated with the implementation of Land Donations pursuant to California Government Code Section 65915(g).

(2) **Parking.** Housing Developments may reduce the number of required parking spaces set forth in Section 12.21 A.4 of this code as follows, pursuant to California Government Code Section 65915 (p):

(i) Parking shall not be required for Housing Developments located within one-half mile of a Major Transit Stop pursuant to California Government Code Section 65863.2.

(ii) Unless eligible for parking reductions pursuant to California Government Code Section 65863.2, a Housing Development may utilize the vehicular parking ratio described in Table 12.22 A.37(e)(2)(ii)a.

TABLE 12.22 A.37(e)(2)(ii)a Vehicular Parking Ratio for Eligible Housing Developments	
Number of Bedrooms	Parking Spaces per Residential Unit Type
Zero to one bedroom	1
Two to three bedrooms	1.5
Four and more bedrooms	2.5

(iii) Pursuant to California Civil Code Section 1947.1, provided parking shall be sold or rented separately from the Residential Units in Housing Developments with 16 or more units, as verified by the Los Angeles Housing Department.

(iv) Required automobile parking applies for all Residential Units in a Housing Development (not just the Restricted Affordable Units), inclusive of disabled and required guest parking, where applicable. All parking spaces provided shall comply with Subdivision 12.21 A.5 of the LAMC. Except that, consistent with California Government Code Section 65915(p)(4), any combination of standard, compact or tandem spaces may be provided. Tandem parking spaces that do not comply with Subparagraph 12.21 A.5(h)(2) of the LAMC may be provided in any configuration as long as a parking attendant or an automated parking system is provided at all times.

(v) Consistent with California Government Code Section 65915(p)(4), required parking spaces provided may be uncovered.

(f) **Additional Incentives.** A Housing Development shall be granted a number of Additional Incentives pursuant to the provisions of this Paragraph in addition to the Base Incentives established in LAMC Section 12.22 A.37(e).

(1) A Housing Development shall be eligible for Additional Incentives based on Table 12.22 A.37(f)(1)(i) below. A Housing Development may request Incentives listed in Paragraph (f)(2) or use an Incentive to seek a deviation from a Development Standard elsewhere in the LAMC or a Housing Development site’s applicable zoning ordinance, specific plan, or overlay. Refer to Paragraph (d) for the approval Procedure that is consistent with the Housing Development’s Incentive request.

TABLE 12.22 A.37(f)(1)(i) Allowed Number of Additional Incentives				
Level of Affordability	Required Percentage of Residential Units Provided (Excluding Units Added by a Density Bonus)			
	1 Incentive	2 Incentives	3 Incentives	4 Incentives¹
Very Low Income (for rental or for sale)	5%	10%	15%	16%
Low Income (for rental or for sale)	10%	17%	24%	N/A*
Moderate Income (for sale)	10%	20%	30%	45%
Lower Income Student Housing	20%	20%	N/A	N/A

Footnotes

¹ One Hundred Affordable Housing Projects shall be processed pursuant to LAMC Section 12.22 A.39.

- (ii) Incentives allowed per Table 12.22 A.37(f)(1)(i) and requested pursuant to the applicable procedure in Paragraph (d) of this Subdivision shall be granted unless it is found, based upon substantial evidence, that:
- a. The Incentive does not result in identifiable and actual cost reductions, consistent with California Government Code Section 65915(k), to provide for affordable housing costs as defined in California Health and Safety Code Section 50052.5, or for rents for the targeted units to be set as specified in California Government Code Section 65915(c); or
 - b. The Incentive will have a Specific Adverse Impact upon public health and safety or the physical environment or on any real property that is listed in the California Register of Historical Resources and for which there is no feasible method to satisfactorily mitigate or avoid the Specific Adverse Impact without rendering the development unaffordable to low-income and moderate-income households. Inconsistency with the zoning ordinance or general plan land use designation shall not constitute a Specific Adverse Impact upon the public health or safety; or
 - c. The Incentive would be contrary to state or federal law.
- (iii) To be eligible for the Menu of Incentives described in LAMC Section 12.22 A.37(f)(2) a Housing Development shall comply with the following:
- a. The Housing Development shall not be located in a Very High Fire Hazard Severity Zone, a Sea Level Rise Area, or the Coastal Zone.

(iv) Commercial Off-Site. Pursuant to California Government Code Section 65915.7, a commercial development may request one Incentive set forth in California Government Code Section 65915.7 (b) if the commercial developer directly contributes affordable housing, or enters into a contract for partnered housing described in 65915.7(c) with a housing developer to construct affordable housing. If a commercial developer partners with a housing developer, an agreement, subject to approval by the Department of City Planning, shall identify exactly how the commercial developer will contribute affordable housing. Housing constructed pursuant to this Subparagraph shall be constructed on the site of the commercial development or on a site that meets all of the following requirements:

- a. Located within the boundaries of the City of Los Angeles; and
- b. In close proximity to public amenities including schools and employment centers; and
- c. Located within one-half mile of a Major Transit Stop.

(2) **Menu of Incentives.** A Housing Development may elect to request one of the following incentives not to exceed the allowed number of incentives pursuant to Table 12.22 A.37(f)(1)(i). Each request from the Menu of Incentives shall constitute one Incentive request unless otherwise stated.

(i) **Yards.** Housing Developments may request a reduction of otherwise required yards as follows:

Yards/Setbacks	C Zones	R Zones (yard reductions for requests from the Menu of Incentives in R zones may be combined and require the use of only one incentive)
	In any Commercial zone, Housing Developments may utilize any or all of the yard requirements for the RAS3 zone per LAMC Section 12.10.5. Housing Developments on commercially zoned sites adjacent to properties zoned RD or more restrictive may provide a rear yard of not less than five feet.	Front Yards. Front yard reductions are limited to no more than the average of the front yards, regardless of a required Building Line, of adjoining buildings along the same street frontage. Or, if located on a corner lot or adjacent to a vacant lot, the front yard setback may align with the façade of the adjoining building along the same front lot line. If there are no adjoining buildings, no reduction is permitted.
		Side and Rear Yards. Up to 30% decrease in the required width or depth of any individual yard or setback.

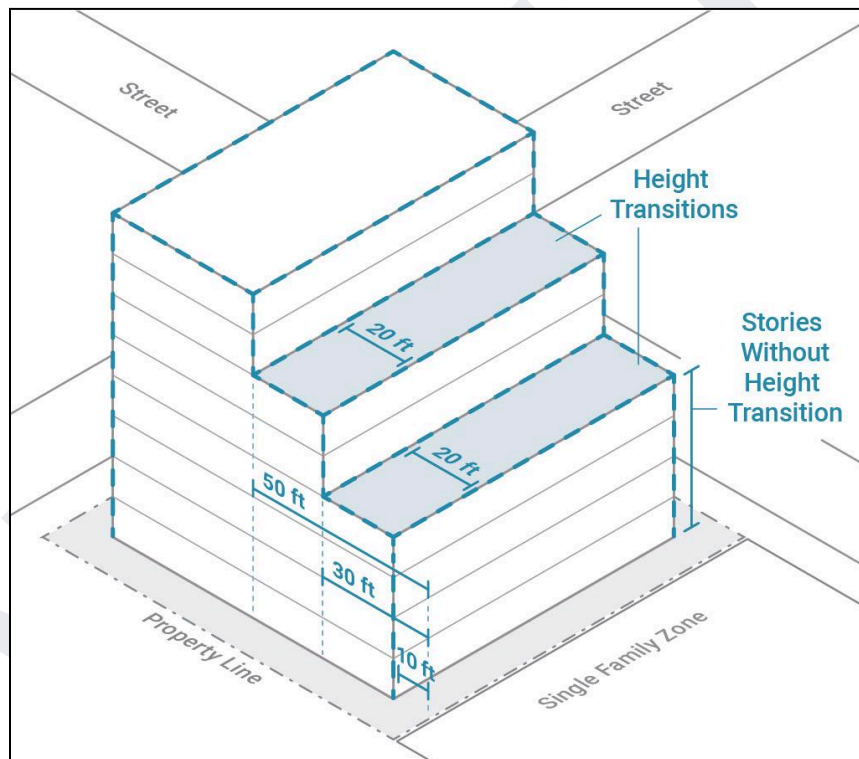

(ii) **Floor Area Ratio.** Housing Developments may request an increase in the otherwise allowed Floor Area Ratio (FAR) equal to the percentage of Density Bonus for which the Housing Development is eligible, not to exceed 35% or a maximum FAR of 3.0:1, whichever is greater, if located within a one-half mile radius (2,640 feet) of a Major Transit Stop. In a mixed-use development, the FAR bonus will apply only to the residential portion of the development and the nonresidential portion shall be limited to the FAR associated with a site's underlying zoning prior to the application of any Incentive.

a. **Exception.** Projects on lots zoned "RD" Restricted Density or more restrictive; or on lots with Designated Historic Resources, or Non-Contributing Elements as defined in LAMC Section 13B.8.1.C of Chapter 1A of this Code, shall not be eligible for an on-menu FAR incentive.

(iii) **Height.** A Housing Development may request a height increase to permit a maximum of eleven additional feet or one additional story, whichever is lower. This increase in height shall be applicable over the entire lot regardless of the number of underlying height limits, including Transitional Height or stepback requirements, except when the Transitional Height Incentive below is also requested. The height increase may be applied to the maximum allowable height in feet or stories permitted by the zone, including for mixed-use Housing Developments.

a. Notwithstanding Section 12.21.1, for Housing Developments where a rooftop deck is provided, roof structures for the housing of elevators and stairways may exceed the building height limit by up to seventeen feet in height on sites where the applicable Height District limits height to thirty feet or forty-five feet provided the proposed roof structure(s) is set back from the roof perimeter by five feet.

(iv) **Transitional Height.** Housing Developments may select the following transitional height requirements in lieu of those found in Section 12.21.1.A.10 of this Code or any applicable transitional height limits in a Housing Development site’s applicable zoning, Specific Plan, or overlay including any requirements for reduced building heights or setbacks when a building is adjoining a RW1 or more restrictive zone. Furthermore, Housing Developments adjoining an OS zone may utilize this incentive to be exempt from the transitional height requirements found in Section 12.21.1.A.10 of this Code or any applicable Specific Plan or Overlay for the portion of the Housing Development abutting the OS zone.

	Setback/Step Back Distance*
Side or Rear Setback	10-feet
4 Story Step-Back	30-feet
6 Story Step-Back	50-feet

*Setback and Step-back is measured from the property line.

- (v) **Space Between Buildings and Passageways.** Housing Developments subject to the provisions set forth in LAMC Section 12.21 C.2 may request a reduction in space between buildings and passageways requirements as follows:
- a. Up to a 30% reduction in the space between buildings required pursuant to LAMC Section 12.21 C.2(a); and
 - b. Up to 50% reduction in the width of the passageway required pursuant to LAMC Section 12.21 C.2(b) or the space provided to meet a subject site's required side yard requirement, whichever provides a greater reduction. Passageways provided may extend from any public street adjacent to the Housing Developments site.
- (vi) **Lot Coverage.** Housing Developments may request up to a 20% increase in lot coverage limits, provided that the landscaping for the Housing Development meets a minimum of 30 points under the Landscape and Site Design Ordinance Section 12.40 of this Code, and the Landscape and Site Design Point System.
- (vii) **Lot Width.** Housing Developments may request up to a 25% decrease from a lot width requirement, provided that the landscaping for the Housing Development meets a minimum of 30 points under the Landscape and Site Design Ordinance Section 12.40 of this Code, and the Landscape and Site Design Point System.
- (viii) **Open Space.** In lieu of the open space calculations set forth in LAMC Section 12.21 G.2, Housing Developments requesting this incentive may calculate their usable open space requirement as 15% of the total lot area or 10% of the total floor area confined within the perimeter walls of the provided Residential Units, whichever is greater, provided that the overall design of the Housing Development meets a minimum of 30 points under the Landscape and Site Design Ordinance Section 12.40 of this Code, and the Landscape and Site Design Point System. Common Open Space shall constitute at least 50% of the usable open space calculated under this incentive and shall be provided as outdoor space and comply with applicable provisions of Section 12.21 G.2(a)(1-4). Usable open space provided as Private Open Space shall comply with Section 12.21 G.2(b).
- (ix) **Density Calculation.** The area of any land required to be dedicated for street or alley purposes may be included as lot area for purposes of calculating the maximum density permitted by the underlying zone in which the Housing Development is located.

(x) **Averaging of Floor Area Ratio, Density, Parking, or Open Space, and permitting Vehicular Access.** A Housing Development that is located on one or more contiguous lots, not separated by a street or alley, may average and permit the floor area, density, open space, and residential and commercial parking over the Housing Development site, and permit vehicular use and access between a less restrictive zone and a more restrictive zone, provided that:

- a. The proposed Housing Development includes the number of Restricted Affordable Units sufficient to qualify for a 35% Density Bonus; and
- b. No further lot line adjustment or any other action that may cause the Housing Development site to be subdivided subsequent to this grant shall be permitted; and
- c. The proposed use is permitted by the underlying zone(s) of each lot.

(xi) **Supplementary Parking Reductions.** An applicant may request the following reductions as a single incentive:

- a. **Commercial Parking.** Housing Developments may request to waive any requirement to provide new or maintain existing automobile parking spaces required by Chapter 1 of this Code associated with a commercial use that is proposed in conjunction with the Housing Developments.
- b. **General Parking Reduction.** Housing Developments located within one-half mile radius of a High Quality Transit Service may receive up to 50% reduction in required parking spaces pursuant to California Government Code Section 65915 (p)(5).

(xii) **P Zone.** In lieu of the limitations described in LAMC Section 12.12.1 and LAMC Section 12.12.1.5, in a P or PB zone a Project may include the uses and area standards permitted in the least restrictive adjoining zone. The phrase “adjoining zone” refers to the zones of properties abutting, across the street or alley from, or having a common corner with, the subject property.

(xiii) **Relief from a Development Standard.** A Housing Development may request up to 20% relief from a Development Standard contained in Chapter 1 of this Code, an Overlay, a Specific Plan, a Q Condition, or a D Condition. Housing Developments requesting this incentive must provide landscaping for the Housing Development that meets a minimum of 30 points under the Landscape and Site Design Ordinance Section 12.40 of this Code, and the Landscape and Site Design Point System. This incentive may be requested more than once, but shall require the use of an Incentive for each request.

a. **Exception.** This incentive shall not apply to standards that regulate FAR, Height, yards/setbacks, ground story requirements, signs, parking in front of buildings, or usable open space. This incentive shall not apply to a Designated Historic Resource(s), or a Non-Contributing Element(s) as defined in LAMC Section 13B.8.1.C of Chapter 1A of this Code.

(xiv) **Senior Independent Housing.** In lieu of otherwise applicable limitations, a Housing Development or Senior Citizen Housing Development that also meets the definition of Senior Independent Housing may be permitted in any zone that would otherwise allow a Housing Development. In addition, a Senior Independent Housing development that qualifies as a Shared Housing Building shall be treated the same as a Shared Housing Building.

(g) **Public Benefit Options.** A Housing Development shall be granted any number of Public Benefit Options pursuant to the provisions described below in addition to the Base Incentives established in LAMC Section 12.22 A.37(e) and the Additional Incentives described in LAMC Section 12.22 A.37(f). Housing Developments located in Sea Level Rise Areas, Very High Fire Hazard Severity Zones, or the Coastal Zone shall not be eligible for the Public Benefit Option described in LAMC Section 12.22 A.37(g)(3) or LAMC Section 12.22 A.37(g)(4).

(1) **Child Care Facility.** A Housing Development that includes a Child Care Facility located on the premises of, as part of, or adjacent to, the Housing Development, and that complies with the requirements set forth in Government Code Section 65915(h)(2) shall be granted either of the following:

- (i) An additional Density Bonus that is, for purposes of calculating residential density, an increase in the floor area of the Housing Development equal to the floor area of the Child Care Facility included in the Housing Development; or
- (ii) An additional Incentive from the Menu of Incentives or not listed on the Menu of Incentives that contributes significantly to the economic feasibility of the construction of the Child Care Facility; or
- (iii) Notwithstanding the Public Benefit available under this Subparagraph, pursuant to California Government Code Section 65915(h)(3), a Density Bonus or Incentive for a Child Care Facility shall not be provided if it is found, based on substantial evidence, that the community has adequate Child Care Facilities.

(2) **Multi-Bedroom Units.** A Housing Development providing multi-bedroom units shall be granted one of the following so long as an affidavit declaring the qualifying multi-bedroom units will maintain the same bedroom count and will not be converted to additional Residential Units in the future is executed and recorded with the Department of City Planning:

- (i) A Housing Development that includes a minimum of 10% of Residential Units, including Residential Units added by a Density Bonus, as Residential Units with three bedrooms or more shall be granted additional Floor Area and Height in addition to what is available on the Menu of Incentives in LAMC Section 12.22 A.37(f)(2) as follows in Table 12.22 A.37(g)(3)(i)a; or

TABLE 12.22 A.37(g)(3)(i)a Additional FAR and Height for Multi-Bedroom Units		
Overall Residential Units (including Density Bonus Units)	Additional FAR	Additional Height (Stories)
0-30	0.5:1	1
31-50	1.0:1	1
51-75	1.5:1	2
75+	2.0:1	2

- (ii) A Housing Development shall be granted the following Floor Area and Height Incentives, as described in (a) and (b) below:
 - a. An exemption of the square footage of all Residential Units with three or more bedrooms from the floor area calculations of multi-bedroom units, and/or
 - b. An additional story of height beyond what is available in the applicable height incentive as listed for Additional Incentives in Paragraph (f), provided, the square footage of this additional story is limited to the square footage exempted as a result of applying 12.22 A.37(g)(4)(ii)(a) above.

- (3) **Surveyed Historic Resource Facade Rehabilitation.** Projects incorporating a Surveyed Historic Resource(s) into the Project design shall be granted additional Floor Area up to 1.0 FAR and 22 feet in height beyond what is available on the Menu of Incentives in LAMC Section 12.22 A.37(f)(2), provided all of the following standards are met:
- (i) The Project retains all street Fronting facades to a depth of 10-feet,
 - (ii) New Floor Area shall be setback behind the 10-foot retention area, except that open space, balconies, and non-habitable architectural projections may encroach on the 10-foot retention area. In instances where a lot contains dual-frontages, the setback shall be applied from both frontages, and
 - (iii) Rehabilitation of the facades is completed pursuant to the Secretary of the Interior's Standards for Rehabilitation to the satisfaction of the Office of Historic Resources.
- (h) **Program Standards.** The following program standards shall be applicable to any Housing Development that meets the eligibility criteria established in Paragraph (c) of this Subdivision.
- (1) **Other Density Bonus Programs.** Housing Developments seeking a Density Bonus pursuant to this Subdivision may not pursue a Density Bonus pursuant to the procedures of any other housing incentive program contained in this Code or in an Overlay or Specific Plan.
 - (2) **Calculating Maximum Allowable Residential Density.** Per Government Code Section 65915 (o)(6), a Housing Development shall calculate its Maximum Allowable Residential Density, before the application of a Density Bonus, using the maximum number of units allowed under a Housing Development site's applicable zoning ordinance, specific plan, overlay, or general plan land use designation, whichever is greater. If a range is permitted, the maximum number of units allowed by the specific zoning range, Specific Plan, or General Plan Land Use designation shall be applicable when determining a Housing Development's density prior to the application of a Density Bonus. Residential Units added using an incentive program contained in a specific plan or overlay shall not count toward a Housing Development's Maximum Allowable Residential Density.
 - (3) **Calculating Restricted Affordable Units.** The required number of Restricted Affordable Units shall be calculated based on the Residential Units (excluding Residential Units added by a Density Bonus) provided in a Housing Development.
 - (4) **Calculating a Density Bonus.** In addition to the provisions set forth in Section 12.22 A.37(h)(2), for the purposes of calculating a Density Bonus, the following shall apply:

- (i) Residential Units that comprise a Housing Development shall be on contiguous lots, not separated by a street or alley, that are the subject of a single development application, but do not need to be based on individual subdivision maps or lots.
- (ii) A Shared Housing Unit and its proportional share of associated common area facilities shall be considered a Guest Room pursuant to California Government Code Section 65915(o)(8)(B).
- (iii) An applicant for a Housing Development may have the ability to apply a lesser percentage of Density Bonus, including but not limited to, no Density Bonus.

(5) Fractional Numbers.

- (i) **Units.** For the purposes of this Subdivision, calculations for the following resulting in fractional numbers shall be rounded up to the next whole number:
 - a. Maximum Allowable Residential Density
 - b. Density Bonus units
 - c. Number of Restricted Affordable Units
 - d. Number of Replacement Housing Units
 - e. Vehicular Parking
 - f. Number of Multi-Bedroom Units provided pursuant to LAMC Section 12.22 A.37(g)(3)

- (6) Replacement Housing Units and Demolition Protections.** A Housing Development must meet any applicable housing replacement requirements and demolition protections of California Government Code Section 65915(c)(3) and LAMC Section 16.60, as verified by the Los Angeles Housing Department (LAHD) prior to the issuance of a building permit. Replacement Housing Units required pursuant to this Subdivision may count towards any Restricted Affordable Unit requirements.

- (7) **Standards for Restricted Affordable Units.** A Housing Development must meet the applicable requirements regarding the size, location, amenities and allocation of Restricted Affordable Units in LAMC Sections 16.61 B and 16.61 C and in any Implementation Memorandum, Technical Bulletin or User Guide prepared and adopted by the Los Angeles Housing Department or Department of City Planning.
- (8) **Rent Schedules.** Restricted Affordable Units required as part of a Housing Development shall be rented at rates not to exceed those specified in California Health and Safety Code 50052.5 for for-sale units or California Health and Safety Code Section 50053 for for-lease units.
- (9) **Implementation Memorandums, FAQs, Forms/Applications and User Guides.** The Director may prepare Implementation Memorandums, Technical Bulletins and/or User Guides for State Density Bonus requirements, as set forth in California Government Code Sections 65915-65918, for the purpose of providing additional information pertaining to this Subdivision and maintaining consistency with State Density Bonus Law.
- (10) **Covenants.** Prior to the issuance of a building permit for any Housing Development qualifying for a Density Bonus pursuant to the provisions of this Subdivision, covenants acceptable to the Los Angeles Housing Department and consistent with the requirements in this Subdivision and set forth in LAMC Section 16.61 shall be recorded with the Los Angeles County Recorder.
- (14) **Story.** A story shall be defined as 11-feet in height.

(i) **Relationship to Other Sections of the Los Angeles Municipal Code.** The following provisions shall govern the relationship to other sections of the Los Angeles Municipal Code for any Housing Development that meets the eligibility criteria established in Paragraph (c) of this Subdivision.

(1) A Housing Development that meets the eligibility criteria established in Paragraph (c) and complies with the Procedures established in Paragraph (d) may exceed the use limitations that may apply to a Housing Development site.

(2) If any of the Procedures described in Paragraph (d), Base Incentives described in Paragraph (e), Additional Incentives described in Paragraph (f), Public Benefit Options described in Paragraph (g), or waivers requested pursuant to LAMC Section 12.22 A.37(d)(3)(i) conflict with those of any otherwise applicable specific plan, overlay, supplemental use district, “Q” condition, “D” limitation, or citywide regulation established in Chapter 1 of this Code, including but not limited to the Ordinance Nos. listed below, this Subdivision shall prevail.

- (i) Alameda District Specific Plan (171,139)
- (ii) Avenue 57 Transit Oriented District (174,663)
- (iii) Bunker Hill Specific Plan (182,576)
- (iv) Century City North Specific Plan (156,122)
- (v) Century City West Specific Plan (186,370)
- (vi) Century City South Specific Plan (168,862)
- (vii) Coastal Bluffs Specific Plan (170,046)
- (viii) Coliseum District Specific Plan (185,042)
- (ix) Colorado Boulevard Specific Plan (178,098)
- (x) Cornfield Arroyo Seco Specific Plan (182,617)
- (xi) Crenshaw Corridor Specific Plan (184,795)

 - (xlili) Westwood Village Specific Plan, Westwood Community Design Review Board Specific Plan (187,644)
 - (xliv) Wilshire - Westwood Scenic Corridor Specific Plan (155,044)
- (j) **Interpretation Consistent with State Density Bonus Law.** This Subdivision is intended to be interpreted as consistent with State Density Bonus Law contained in California Government Code Sections 65915-65918. If at any time, this Subdivision becomes inconsistent with California Government Code Sections 65915-65918, the provisions of State Density Bonus Law shall apply.

Section 7. Subdivision 38 of Subsection A of Section 12.22 of the Los Angeles Municipal Code is added to read as follows:

12.22 A.38 MIXED INCOME INCENTIVE PROGRAM

(a) **Purpose.** The purpose of this subdivision is to establish specific incentives and procedures for the implementation of State Density Bonus requirements, as set forth in California Government Code Sections 65915-65918, and to increase the production of affordable housing near transit, in Higher Opportunity Areas, and on major corridors. In conjunction with the incentives granted by state law, this subdivision shall offer incentives and waivers or reductions of Development Standards for the purposes of increasing the feasibility of housing construction.

(b) **Definitions.** The following definitions shall apply to this Subdivision:

Consolidated Development. A residential or mixed use development that consists of multiple lots with the same owner or developer.

Corridor. A major street with Street Designations as designated in the Mobility Element of the General Plan, including Avenue I, Avenue II, Avenue III, Boulevard I, and Boulevard II.

Direct Pedestrian Access. A means of approaching or entering a lot from the public right-of-way as a pedestrian.

Environmental Consideration Area. As defined in LAMC Section 12.22 A.37 (b).

Finished Floor Elevation. The finished floor height associated with the ground story.

Frequent Bus Service. A bus route with 30 minute or less service frequency during Peak Commute Hours in at least one direction.

Ground Floor Frontage. The lowest story within a building which is accessible to the street, the floor level of which is within three feet above or below curb level, is parallel to or primarily facing any public street, and which is at least 15 feet in depth of the total depth of the structure.

Market Tier. Categories of residential market areas adopted by City Council resolution, as described in the Affordable Housing Linkage Fee Ordinance in LAMC Section 19.18 C.1, for the purposes of informing the amount of the Linkage Fee to be assessed for a given Project.

Mixed Income Incentive Project. A Project that involves the construction of, addition to, or remodeling of any building or buildings which results in the creation of five or more total residential units, including a mixed use development containing two-thirds of the square footage designated for Residential Units, and meets the eligibility criteria described in Paragraph (c) of LAMC Section 12.22 A.38.

Opportunity Corridor Transition Area Incentive Project. A Project, located within 750 feet of an Opportunity Corridor Incentive Area, that involves the construction of, addition to, or remodeling of any building or buildings which result in the creation of four or more total residential dwelling units.

Peak Commute Hour. Peak periods are considered to be between 6:00 to 9:00 AM and 3:00 to 7:00 PM.

Rapid Bus. A higher quality bus service that may include several key attributes, including full-time dedicated bus lanes, branded vehicles and defined stations, high frequency, limited stops at major intersections, intelligent transportation systems, and possible off-board fare collection and/or all door boarding. It includes, but is not limited to, Metro Bus Rapid Transit lines, Metro Rapid 700 lines, Metro NextGen Tier 1 lines that replaced Metro Rapid 700 lines, Metro G (Orange) and J (Silver Lines), Big Blue Rapid lines and the Rapid 6 Culver City bus. Rapid Bus lines do not need to meet the 15 minute average Peak Commute Hour headways if intersecting at a qualified Major Transit Stop.

Total Units. The total units in a project after a Density Bonus is awarded pursuant to this Subdivision.

(c) **Eligibility.** To qualify for the provisions of this subdivision, a Project approved under the Mixed Income Incentive Program must satisfy all of the following eligibility requirements:

- (1) Meet the definition of one of the following Project Types described in Table 12.22 A.38(c)(1)(i):

TABLE 12.22 A.38(c)(1)(i) Eligible Project Types and Total Units Required	
Project Type	Total Units Required
Mixed Income Incentive Project	Five or more
Opportunity Corridor Transition Area Incentive Project	Four or more
Type I Unified Adaptive Reuse Project ¹	Five or more

Footnote

¹ See LAMC 12.22 A.26(h)(1) for additional requirements associated with a Type I Unified Adaptive Reuse Project.

- (2) Be located in and meet the requirements of a Transit Oriented Incentive Area, Opportunity Corridor Incentive Area, or an Opportunity Corridor Transition Incentive Area as described in Paragraphs (e), (f), and (g) below, except that properties abutting, across the street or alley, or having a common corner with a site eligible for Opportunity Corridor Incentives shall also be eligible for the Opportunity Corridor Incentives as described in paragraph (f) below,
- (3) Reserve a percentage of the Project’s Total Units for:
 - (i) On Site Restricted Affordable Units in a Project for at least one of the following income levels, as defined on Table 12.22 A.38(c)(3)(iii) or by providing the combination of income levels as defined on 12.22 A.38(c)(3)(iv) Table, or
 - (ii) Restricted Affordable Units in a Opportunity Corridor Transition Area Incentive Project for at least one of the following income levels, as defined on Table 12.22 A.38(c)(3)(v) below.

TABLE 12.22 A.38(c)(3)(iii)¹					
Single Affordability Options for Meeting Restricted Affordable Units					
Market Tier	Incentive Program		Minimum Percent of Total Units Provided as Restricted Affordable Units		
	Transit Oriented Incentive Area	Opportunity Corridors Incentive Area	Income Level		
			Extremely Low Income (For Rental or For Sale)	Very Low Income (For Rental or For Sale)	Low Income (For Rental or For Sale)
Low and Medium Market Tiers	T1	OC-1	9%	12%	21%
	T2	OC-2	10%	14%	23%
	T3	OC-3	11%	15%	25%
High Medium and High Market Tiers	T1	OC-1	11%	14%	23%
	T2	OC-2	12%	16%	25%
	T3	OC-3	13%	17%	27%

Footnote

1 A Type I Unified Adaptive Reuse Project shall provide Restricted Affordable Units in accordance with the project site's Market Tier location and Base Incentives used. Type I Unified Adaptive Reuse Projects that utilize Base Incentives contingent on a site's location in a Transit Oriented Incentive Area shall provide Restricted Affordable Units in conjunction with a site's applicable Transit Oriented Incentive Area Tier. Type I Unified Adaptive Reuse Projects that utilize Base Incentives contingent on a site's location in an Opportunity Corridor Incentive Area shall provide Restricted Affordable Units in conjunction with a site's applicable Opportunity Corridor. Restricted Affordable Units shall be provided and distributed throughout the entire Type I Unified Adaptive Reuse Project in compliance with LAMC 16.61 B.

TABLE 12.22 A.38(c)(3)(iv) Mixed Affordability Options for Meeting Restricted Affordable Units				
Opportunity Area	Minimum Percent of Total Units Provided as Restricted Affordable Units ¹			
	Income Level			
	Acutely Low Income (For Rental or For Sale)	Extremely Low Income (For Rental or For Sale)	Very Low Income (For Rental or For Sale)	Moderate Income (For Rental or For Sale)
Moderate and Lower Opportunity Areas	-	4% ²	8%	-
Higher Opportunity Areas	4% ²	4%	-	12%

Footnote:

1 Provided at least one affordability income category is consistent with the minimum affordability requirements pursuant to California Government Code Sections 65915.

2 Projects utilizing the combinations of mixed affordability described in Table 12.22 A.38(c)(3)(iv) to meet the required restricted affordable units must provide one 3-bedroom covenanted unit per Project.

TABLE 12.22 A.38(c)(3)(v)			
Incentive Program	Minimum Percent of Total Units Provided as Restricted Affordable Units ^{1,2}		
Corridor Transition Incentive Area	Income Level		
	Very Low Income (For Rental or For Sale)	Low Income (For Rental or For Sale)	Moderate Income (For Rental or For Sale)
CT-1A	-	-	1 unit
CT-1B, and CT-2	1 unit	1 unit	2 unit
CT-3	2 units	2 units	3 units

Footnote:

1 For consolidated lots, the Project shall provide the same affordability as required per individual lot. For example, if a project consolidated two lots into one project using CT-2 incentives, the project would be required to provide either 2 Very Low Income or Low Income units, or 4 Moderate Income units.

2 Provided at least one affordability income category is consistent with the minimum affordability requirements pursuant to California Government Code Sections 65915.

- (4) The Project site does not include any lots located in a single family or more restrictive zone (RW and more restrictive zone), or any lots located in a manufacturing zone that does not allow multi-family residential uses (M1, M2, and M3), including sites zoned CM, MR1, and MR2 with no residential uses permitted from an applicable planning overlay.
- (5) Projects located on sites that meet the definition of an Environmental Consideration Area shall comply with all applicable standards contained in the Environmental Protection Measures adopted pursuant to LAMC Section 11.5.15.
- (5) The Project site does not include any lots located within a Very High Fire Hazard Severity Zone (VHFHSZ), within the Coastal Zone, or within a Sea Level Rise Area. Except that a project site that is located within a VHFHSZ or Coastal Zone shall be eligible for Opportunity Corridor Incentives as defined in Paragraph (f), if properties are abutting, across the street or alley, or having a common corner with the subject property are not in a VHFHSZ or Coastal Zone, and is eligible for the Opportunity Corridor Incentives as described in paragraph (f) below.
- (6) The Project would not require the demolition of any of the following, as demolition is defined in LAMC Section 13B.8.1.C of Chapter 1A of this Code.
 - (i) A Designated Historic Resource, or
 - (ii) Any Surveyed Historic Resource, eligible or architectural historic resource identified for any historic protection or special consideration or review by an applicable Overlay or Specific Plan including sites located in the South Los Angeles Community Plan Implementation Overlay (CPIO) Section 1-6.C.5.b, the Southeast Los Angeles CPIO Section 1-6.C.5.b, the West Adams CPIO Section 6.C.5.b, or the San Pedro CPIO Section 7.C.5.b, Westwood Village Specific Plan, Echo Park CDO District, or the North University Park Specific Plan.
- (7) A Project involving Designated Historic Resources shall be consistent with the Secretary of the Interior's Standards for Rehabilitation.
- (8) A Project shall not be located in the Boyle Heights Community Plan, the Harbor Gateway Community Plan, the Wilmington-Harbor City Community Plan, the Central City North Community Plan, the Central City Community Plan Areas, and the Cornfield Arroyo Seco Specific Plan.

(d) **Procedures.** A Project that meets the provisions of this Subdivision shall be reviewed pursuant to the Procedures, as set forth below. Though an approval of a Density Bonus or Incentive pursuant to this Subdivision shall not, in and of itself, trigger a General Plan Amendment, Zone Change, Project Review, the applicable procedures set forth in LAMC Section 13A.2.10 (Multiple Approvals) of Chapter 1A of this Code shall apply for Projects seeking other discretionary approvals in conjunction with an application requested pursuant to the Procedures in Paragraph (d).

(1) **Los Angeles Department of Building and Safety Review.** Projects seeking Base Incentives described in Paragraphs (e)(2), (f)(2) or (g)(2), and/or Incentives listed on the Menu of Incentives in Paragraph (h) shall be considered ministerial and processed by the Department of Building and Safety.

(2) **Expanded Administrative Review.** The following Projects shall be ministerially approved pursuant to Expanded Administrative Review, as set forth by the provisions of LAMC Section 13B.3.2 (Expanded Administrative Review) of Chapter 1A of this Code. As defined in this Subdivision, ministerial approval means an administrative process to approve a “use by right” as this term is defined in California Government Code Section 65583.2 (i):

(i) Projects that request the Public Benefit Options described in Paragraph (i). Housing Developments that request only Public Benefit Options in addition to Incentives listed on the Menu of Incentives shall not be subject to any hearing procedures regardless of the provisions contained in LAMC Section 13B.3.2.D.

(ii) Projects that request Incentives not listed on the Menu of Incentives described in LAMC Section 12.22 A.38(h)(2). Housing Developments that request Incentives not listed on the Menu of Incentives may be subject to a public hearing as described in LAMC Section 13B.3.2.D

a. Projects requesting Incentives not listed in Paragraph (h) shall be required to meet a minimum of 35 points under the Landscape and Site Design Ordinance.

b. **Exception.** Projects that request an Incentive not on or in excess of the Menu of Incentives for relief from Floor Area Ratio (FAR), Height, Open Space requirements, tree planting requirements, ground story requirements, and/or yards/setback requirements shall seek approval pursuant to the Procedures described in LAMC 12.22 A.37.

(3) **Director's Determination.** The Director of Planning shall review the following Projects pursuant to LAMC Section 13B.2.5 of Chapter 1A of this Code.

- (i) Projects requesting up to one waiver or reduction of any Development Standard not on the Menu of Incentives described in Paragraph (h). Waivers or reductions of any Development Standards shall be reviewed pursuant to the Findings described in LAMC Section 12.22 A.38(d)(3).

(4) **City Planning Commission Review.** The following Projects must file an application pursuant to LAMC Section 13B.2.3 (Class 3 Conditional Use Permit) of Chapter 1A of this Code. Notwithstanding the provisions set forth in Sec. 13B.2.3. of Chapter 1A, the decision of the City Planning Commission shall be final.

- (i) Projects that request more than one waiver or reduction of any Development Standards not on the Menu of Incentives described in Paragraph (h). Waivers or reduction of any Development Standards shall be reviewed pursuant to the Findings described in LAMC Section 12.22 A.38(d)(5).

(5) **Findings for Waivers or Reductions of Development Standards.** Waivers requested pursuant to the procedures described in this Paragraph shall be approved by the applicable decision-making authority unless that decision-making authority finds that:

- (i) The Development Standard associated with a request for waiver(s) or reduction(s) in Development Standards will not have the effect of physically precluding the construction of a development meeting the Eligibility criteria described in Paragraph (c) at the densities or with the concessions or incentives permitted under Paragraphs (e), (f), or (g); or

- (ii) The waivers or reductions of Development Standards would have a Specific Adverse Impact, as defined in paragraph (2) of subdivision (d) of Section 65589.5, upon public health and safety or on a California Register of Historical Resources and for which there is no feasible method to satisfactorily mitigate or avoid the specific, adverse impact without rendering the development unaffordable to low-income and moderate-income households; or

- (iii) The waivers or reductions of Development Standards are contrary to state or federal law.

(6) **Other Discretionary Approvals.** Applicable procedures set forth in LAMC Section 13A.2.10 (Multiple Approvals) of Chapter 1A of this Code apply for Projects seeking other discretionary approvals in conjunction with an application requested pursuant to the Procedures in Paragraph (d). Regardless of any other findings that may be applicable, the decision maker must approve the requested Base Incentives and Additional Incentives, either on or off the Menu of Incentives described in Paragraph (h), requested under this Subdivision unless the decision maker, based upon substantial evidence determines that the Project meets one or more of the criteria described in LAMC Section 12.22 A.38(h)(1).

(e) Transit Oriented Incentive Area.

- (1) **Eligibility.** Projects may seek Base Incentives according to the eligibility criteria for Transit Oriented Incentive Areas described below.
- (i) Each one-half mile radius (2,640 feet) around a Major Transit Stop, shall constitute a unique Transit Oriented Incentive Area.
 - (ii) Each lot within a Transit Oriented Incentive Area shall be determined to be in a specific subarea based on the shortest distance between any point on the lot and a qualified Major Transit Stop as delineated in Table 12.22 A.38(e)(1)(iv) below.
 - (iii) Each lot in a Transit Oriented Incentive Area shall be determined to be in a specific Transit Oriented Incentive Area (T-1 to T-3) based on the shortest distance between any point on the lot and a qualified Major Transit Stop.

Table 12.22 A.38(e)(1)(iv)			
Distance to Major Transit Stop	Eligibility Subarea		
Description	T-1	T-2	T-3
Two Regular Buses (intersection of two non Rapid Bus Lines each with at least 15 minute average peak headways)	<2640 feet	-	-
Regular plus Rapid Bus (intersection of a regular bus and a Rapid Bus line)	750 - < 2640 feet	<750 feet	-
Two Rapid Buses (intersection of two Rapid Bus lines)	1500-2640 feet	<1500 feet	-
Metrolink Rail Stations	750 - <2640 feet	<750 feet	-
Metro Rail Stations and Rapid Bus Transit Stations	-	≤ 2640 feet	<750 feet from intersection with another rail line or a Rapid Bus

(2) **Base Incentives.** Projects shall be granted Base Incentives established in Table 12.22 A.38(e)(2)(i), in exchange for the required minimum percentage of Restricted Affordable Units established in Paragraph (c) of this Subdivision. Projects that qualify for Base Incentives established in the table below shall also be eligible for Public Benefit Options listed in Paragraph (i) of this subdivision. For Type I Unified Adaptive Reuse Projects that meet the eligibility criteria established in LAMC 12.22 A.38(c), notwithstanding the Density Bonuses described in Table 12.22 A.38(e)(2)(i), the density shall be limited by floor area and Base Incentives for Parking, FAR, and Height shall only apply to the project's new construction.

Table 12.22 A.38(e)(2)(i)					
Eligibility Subarea	Density Bonus	Parking	Floor Area Ratio (FAR)	Height	
	In each subarea, the maximum increase in the otherwise Maximum Allowable Residential Density shall be as follows:	In each subarea, the required parking ratio shall be as follows: ^{1,2,6}	In each subarea, the maximum allowable FAR shall be as follows: ^{3,4}	In each subarea, the maximum allowable height permitted shall be equal to the following: ⁵	
T-1	Moderate and Lower Opportunity Areas: 100%	No parking minimum required. If parking is provided, up to 40% of spaces may be provided as compact vehicular spaces. Tandem parking may also be permitted so long as a 24-hour attendant is present on-site.	R - zones: 40% increase. C - zones: 3.25:1, or 40% increase, whichever is greater.	One additional story, up to 11 additional feet.	
	Higher Opportunity Areas: 120%		R - zones: 40% increase. C - zones: 4.2:1, or 45% increase, whichever is greater.		
T-2	Moderate and Lower Opportunity Areas: 110%		R - zones: 40% increase. C - zones: 4.2:1, or 50% increase, whichever is greater.		Two additional stories, up to 22 additional feet.
	Higher Opportunity Areas: Limited by Floor Area		R - zones: 45% increase. C - zones: 4.5:1, or 50% increase, whichever is greater.		
T-3	Moderate and Lower Opportunity Areas: 120%	R - zones: 45% increase. C - zones: 4.5:1, or 50% increase, whichever is greater.	Three additional stories up to 33 additional feet.		
	Higher Opportunity Areas: Limited by Floor Area	R - zones: 50% increase. C - zones: 4.65:1, or 55% increase, whichever is greater.			

Footnotes:

1 Required automobile parking applies for all Residential Units in a Project (not just the restricted affordable units), inclusive of disabled and required guest parking, where applicable. All parking spaces provided shall comply with Subdivision 12.21 A.5 of the Code. Except that any combination of standard, compact or tandem spaces may be provided. Tandem parking spaces that do not comply with Subparagraph 12.21 A.5(h)(2) of the Code may be provided in any configuration as long as a parking attendant or an automated parking system is provided at all times.

2 Pursuant to California Civil Code Section 1947.1, provided parking shall be sold or rented separately from the units in properties with 16 or more units, as verified by the Los Angeles Housing Department.

3 The maximum increase in the allowable FAR permitted shall be equal to the table above, provided that any additional floor area provided through this Paragraph is utilized only by residential uses. Any nonresidential uses shall be limited to the FAR associated with a site's underlying zoning prior to the application of any Incentive.

4 For the purpose of applying this incentive, commercial zones include Hybrid Industrial zones, Commercial Manufacturing zones and any defined area in a Specific Plan or overlay district that allows for both commercial uses and residential uses.

5 The increase in height shall be applicable to a Project over the entire project site regardless of the number of underlying height limits. The height increase may be applied to the maximum allowable height in feet or stories permitted by the zone, including for mixed-use Projects.

6 Consistent with California Government Code Section 65915(p)(4), required parking spaces provided allowable may be uncovered.

(i) Exceptions.

a. Sites with a Maximum Allowable Residential Density of less than 5 units shall be eligible for the following Density Bonuses:

- i. T-1: 60%
- ii. T-2: 70%
- lii. T-3: 80%

b. Sites with a Maximum Allowable Residential Density of less than 5 units, Designated Historic Resource(s), or Non-Contributing Element(s) as defined in LAMC Section 13B.8.1.C of Chapter 1A of this Code shall not be eligible for an incentive to increase allowable FAR or height above one additional story, up to 11 additional feet.

c. In a Specific Plan or overlay district that has a FAR available through a development bonus or incentive program to provide affordable housing, a Project may utilize the Bonus FAR of the Specific Plan or overlay district in lieu of the FAR maximum described above in Table 12.22 A.38(e)(2)(i).

(f) Opportunity Corridor Incentive Area.

(1) **Eligibility.** Projects may seek Base Incentives according to the eligibility criteria for Mixed Income Incentive Projects as described in Paragraph (c) and Opportunity Corridor Incentive Areas, described in Table 12.22 A.38(f)(1)(i), below.

Table 12.22 A.38(f)(1)(i)		
Eligibility Subarea	Corridor Requirements	Geographic Criteria
OC-1	Corridors with Frequent Bus Service	Higher Opportunity Areas
OC-2	Corridors with High Quality Transit Service	
OC-3	Corridors within one - half mile from Metro Rail Station or Portal and Rapid Bus Stop	

(ii) **Corridor Access.** A Project must provide Direct Pedestrian Access to the eligible Opportunity Corridor.

(iii) **Frontage.** Each eligible lot must provide a minimum 25-foot frontage along the eligible corridor, or be part of a Consolidated Development with a 25-foot frontage along the eligible corridor.

(2) **Base Incentives.** A Project shall be granted Base Incentives established in this Paragraph as defined in Table 12.22 A.38(f)(2)(i) below, in exchange for the required minimum percentage of Restricted Affordable Units established in Paragraph 12.22 A.38(c)(3) of this Subdivision. Projects that qualify for Base Incentives established in the table below shall also be eligible for Public Benefit Options listed in Paragraph (i) of this subdivision. For Type I Unified Adaptive Reuse Projects that meet the eligibility criteria established in LAMC 12.22 A.38(c), the Base Incentives shall only apply to the project's new construction.

Table 12.22 A.38(f)(2)(i) Opportunity Corridor Incentive Area Base Incentives				
Eligibility Subarea	Density Bonus	Parking	Floor Area Ratio	Height
Description	In each subarea, the maximum increase in the otherwise Maximum Allowable Residential Density shall be as follows:	In each subarea, the required parking ratio shall be as follows: ^{1 2 5}	In each subarea, the maximum allowable FAR permitted shall be as follows ³ :	In each subarea, the maximum allowable height permitted shall be equal to the following: ⁴
OC-1	Limited by Floor Area	No Parking required.	R - zones: 45% increase.	One additional story, up to 11 additional feet; or up to a maximum of 5 total stories, whichever is greater.
			C - zones: 4.5:1, or 50% increase, whichever is greater.	
OC-2			R - zones: 50% increase.	Two additional stories, up to 22 additional feet; or up to a maximum of 6 total stories, whichever is greater.
	C - zones: 4.65:1, or 55% increase, whichever is greater.			
OC-3			4.8:1, or 60% increase, whichever is greater.	Three additional stories, up to 33 additional feet; or up to a maximum of 7 total stories, whichever is greater.

Footnotes:

1 Required automobile parking applies for all Residential Units in an Eligible Project (not just the restricted affordable units), inclusive of disabled and required guest parking, where applicable. All parking spaces provided shall comply with Subdivision 12.21 A.5 of the Code. Except that any combination of standard, compact or tandem spaces may be provided. Tandem parking spaces that do not comply with Subparagraph 12.21 A.5(h)(2) of the Code may be provided in any configuration as long as a parking attendant or an automated parking system is provided at all times.

2 Pursuant to California Civil Code Section 1947.1, provided parking shall be sold or rented separately from the units in properties with 16 or more units, as verified by the Los Angeles Housing Department.

3 The maximum increase in the allowable FAR permitted shall be equal to the table above, provided that any additional floor area provided through this Subdivision is utilized only by residential uses. Any nonresidential

uses shall be limited to the FAR associated with a site's underlying zoning prior to the application of any Incentive.

4 The increase in height shall be applicable to a Project over the entire project site regardless of the number of underlying height limits. The height increase may be applied to the maximum allowable height in feet or stories permitted by the zone, including for mixed-use Projects.

5 Consistent with California Government Code Section 65915(p)(4), required parking spaces provided may be uncovered.

(ii) Exceptions.

- a. Sites with Designated Historic Resource(s) or Non-Contributing Element(s) as defined in LAMC Section 13B.8.1.C of Chapter 1A of this Code shall not be eligible for an incentive to increase allowable FAR or height above one additional story, up to 11 additional feet.
- b. In a Specific Plan or overlay district that has a FAR available through a development bonus or incentive program to provide affordable housing, a Project may choose to utilize the Bonus FAR and affordability requirement of the Specific Plan or overlay district in lieu of the FAR maximum described above in Table 12.22 A.38(e)(2)(i).

(g) Opportunity Corridor Transition Incentive Area.

(1) **Eligibility.** Projects may seek Base Incentives according to the eligibility criteria for Opportunity Corridor Transition Incentive Areas, described in Table 12.22 A.38(g)(1)(i), below.

Table 12.22 A.38(g)(1)(i)			
Eligibility Subarea	Site Requirements	Eligible Underlying Zones	Geographic Criteria
CT-1	Sites within 750 feet of the furthest property line of a lot from the corridor located within an Opportunity Corridor Incentive Area.	RD zones and R2 zones	Higher Opportunity Areas
CT-2	Sites within 500 feet of the furthest property line of a lot from the corridor located within an Opportunity Corridor Incentive Area.		
CT-3	Sites within 250 feet of the furthest property line of a lot from the corridor located within an Opportunity Corridor Incentive Area.		

(i) **Property Line Measurement.** Distance measured from the Opportunity Corridor Incentive Area shall be measured from the rear property line of the eligible lot located within the Opportunity Corridor Incentive Area. Where a lot is a Reverse Corner Lot in an Opportunity Corridor Incentive Area, distance shall be measured from the property line parallel to the Opportunity Corridor. In the case that Opportunity Corridor sites are abutting or are consolidated, the buffer measurement will not be adjusted to accommodate the new rear property line of the consolidated site.

(ii) **Exceptions.**

- a. Sites with Designated Historic Resource(s), or Non-Contributing Element(s) as defined in LAMC Section 13B.8.1.C of Chapter 1A of this Code shall not be eligible for CT-3 incentives.

(2) Projects utilizing the Opportunity Corridor Transition Incentive Area Base Incentives as defined in Paragraph (g)(3)(i) are not eligible to request waivers or reductions of any Development Standard. Opportunity Corridor Transition

Incentive Area Projects are not eligible to request Incentives on or off the Menu of Incentives.

(3) **Base Incentives.** A Project shall be granted Base Incentives established in this Paragraph as defined in Table 12.22 A.38(g)(3)(i) below, in exchange for the required minimum percentage of Restricted Affordable Units established in Paragraph 12.22 A.38(c)(3) of this Subdivision.

Table 12.22 A.38(g)(3)(i) Opportunity Corridor Transition Base Incentives					
Eligibility Subarea	Density Bonus	Floor Ratio (maximum permitted)	Area	Parking	Height (maximum permitted)
Description	In each subarea, the maximum Density shall be as follows:	For each subarea, the maximum FAR shall be equal to the following:		Required automobile parking for all Residential Units in a Project (not just the restricted affordable units), inclusive of disabled and required guest parking, where applicable, shall be as follows: ^{1 3}	In each subarea, the maximum allowable height permitted shall be as follows:
CT-1A ²	4 units	1.15:1		No parking required.	2 stories
CT-1B ²	5 units	1.30:1			
	6 units	1.45:1			
CT-2	7 units	1.60:1			
	8 units	1.75:1			
	9 units	1.90:1			
	10 units	2.0:1			
CT-3	11 units	2.15:1			3 stories
	12 units	2.30:1			
	13 units	2.45:1			
	14 units	2.60:1			
	15 units	2.75:1			
	16 units	2.90:1			

Footnotes:

1 Pursuant to California Civil Code Section 1947.1, provided parking shall be sold or rented separately from the units in properties with 16 or more units, as verified by the Los Angeles Housing Department.

2 Sites are eligible for CT-1 site requirements from Table 12.22 A.38(g)(1)(i).

3 Consistent with California Government Code Section 65915(p)(4), required parking spaces provided may be uncovered.

- (i) **Lot Requirements.** Projects are eligible for a reduction of otherwise required Lot standards, as part of a subdivision as follows:
- a. Minimum Lot Area: 600 square feet
 - b. Minimum Lot Width: 15 feet
 - c. Minimum Lot Access: A 3-foot pedestrian access easement may be provided in lieu of vehicular access requirements.
- (ii) **Yards.** Projects are eligible for the reduction of otherwise required Yard standards, up to the following minimums:
- a. Front yard setback of 10 feet.
 - b. Side yard setback of 4 feet, or 3 feet for a two-story structure.
 - c. No interior side yard setback shall be required for buildings that are part of the same development.
 - d. Rear yard setbacks of 4 feet, provided structures maintain a height of less than 26 feet within 15 feet of the rear property line.
 - e. Alley setbacks of zero feet for structures that maintain a height of less than 26 feet in height for at least the first 15 feet from the alley.
- (iii) **Multi-Bedroom Units.** A Project that includes a minimum of 40% of total Residential Units as 3-bedrooms or larger, shall be granted either additional Floor Area up to 0.5 FAR and an additional 11 feet in height.
- (iv) **Spaces Between Buildings and Passageways.** Projects do not need to meet zoning requirements related to spaces between buildings or passageways pursuant to section 12.21 C.2.

(v) **Consolidated Development.** In the case that a Opportunity Corridor Transition Project consolidates multiple lots, the Density Bonuses established in Table 12.22 A.38(g)(3)(i) shall be available to each lot, however, FAR and height bonuses shall not exceed the maximum permitted Incentive Area in Table 12.22 A.38(g)(3)(i).

- a. For example, if two CT-1 lots are consolidated in one project, the project is eligible for up to 12 units, with 1.45:1 FAR maximum and a height maximum of 2 stories; or if two CT-2 lots are consolidated in one project, the project is eligible for up to 20 units, with a 2.0:1 FAR maximum and a height maximum of 3 stories.
- b. If a project consolidates two lots of differing incentive areas, for example CT-2 and CT-3, the incentives of the more intense incentive area shall be permitted.

(4) **Performance Standards.** Projects approved pursuant to this Subdivision shall meet the following performance standards, and no deviations from these standards shall be granted, except that any project resulting from the conversion of or an addition up to a maximum of 1,200 square feet to an existing structure need not comply with these standards.

(i) **Common Outdoor Open Space Standards.** Projects shall provide at-grade Common Outdoor Open Space that is accessible to all the residential tenants of a project. The Common Outdoor Open Space shall be open to the sky and have no structures that project into the area, except for Outdoor Amenity Space areas as provided in Sec. 12.21 B and except for Projections into Yards, as provided in Section 12.22 C.20(b). This common open space requirement shall supersede the per Residential Unit calculation of common open space in LAMC Section 12.21 G.2. In lieu of the provisions of LAMC Section 12.21 G.2, a project must meet at least one Common Outdoor Open Space typology from the menu listed in Table 12.22 A.38(g)(4)(ii), below.

- a. **Minimum Planting Area.** The Common Outdoor Open Space provided shall comply with the provisions of LAMC 12.21 G.2.(a).(3) regarding minimum planting area.

Table 12.22 A.38(g)(4)(ii) Common Outdoor Open Space Types Menu		
Common Outdoor Open Space Typologies:	Dimension Requirements (minimum)	Standards
Courtyard	<p>Courtyard width (minimum): 30% of lot width or 15 feet, whichever is greater</p> <p>Courtyard depth (minimum): 40% of lot depth (minimum)</p>	<p>Placement of courtyard shall comply with at least one of the following standards:</p> <ol style="list-style-type: none"> 1. The courtyard shall be oriented so that it and an existing open space courtyard on an adjacent lot work together to create the effect of one large open space. 2. The courtyard shall be contiguous with the minimum front yard setback creating a deep combined courtyard or wide connection between two spaces. 3. The courtyard shall be an internal courtyard, entirely contained onsite.
Paseo	<p>Paseo width (minimum): 10% of lot width or 10 feet wide, whichever is greater</p> <p>Paseo depth (minimum): 60% of the lot depth</p>	<p>A Paseo shall be located between residential structures, perpendicular to the primary lot line. A Paseo shall have a minimum 4 foot wide pedestrian pathway accessible from the Ground Floor Frontage. A Paseo may be covered by architectural projections, but no structures or habitable space shall encroach on the Paseo.</p>
Rear Yard	<p>Rear Yard width (minimum): 50% of lot width</p> <p>Rear Yard depth (minimum): 10% of lot depth, or 15 feet, whichever is greater</p>	<p>Located adjacent to the rear property line</p>

(iii) **Entrances.**

a. **Street-Facing Entrance.** Each unit fronting a public street (provided there is no structure located between the lot line and unit) shall have an entrance facing the public street and one of the following entry features:

1. **Porch.** A wide, raised platform, projecting in front of a street-facing entrance, that is entirely covered but not enclosed. A porch shall have a minimum depth of four and one half feet, a minimum of 30% of the building width, and a finished floor elevation between two to five feet.
2. **Forecourt.** A yard screened with a short wall, fence or hedge that provides significant privacy for tenants located on the ground story, near sidewalk grade. A forecourt shall have a minimum depth of eight feet, a minimum width of 10 feet, required covered entrance, and a fence or wall height between two and one half to three feet and 6 inches.
3. **Recessed entry.** A space set behind the building face plane providing sheltered access to a street-facing entrance. A recessed entry shall have a depth between three to 15 feet minimum, and a maximum width of five feet, and a required covered entrance.

(iv) **Ground Floor External Entrances.** Ground floor external entrances to units not located on a street-fronting lot line, shall have an entrance oriented towards the open space when adjacent to the open space.

(v) Parking Areas, Garages, and Carports

a. Location.

1. No above-ground parking areas including parking structures and parking stalls, shall be allowed between a Ground Floor Frontage and public right-of-way.
2. New detached garages and carports shall be located behind the main building(s) facade, furthest from the Ground Floor Frontage Line.
3. Attached parking areas shall be located either underground (subterranean or semi-subterranean) or behind any main building(s).
4. Access driveways shall be provided from alleys when present and determined feasible by LADOT.

(h) **Additional Incentives.** In addition to the Base Incentives established in Paragraphs (e) and (f), Projects that satisfy eligibility criteria set forth in Paragraph (c) shall have the ability to select up to four Incentives from the Menu of Incentives provided in LAMC Section 12.22 A.38(h)(2) below or use an Incentive to seek a deviation from a Development Standard elsewhere in the LAMC. Refer to Paragraph (d) for the approval Procedure that is consistent with the Project's Incentive request. Projects utilizing the Opportunity Corridor Transition Incentive Area are not eligible for Incentives on or off the Menu of Incentives. For Type I Unified Adaptive Reuse Projects, Additional Incentives shall only apply to the project's new construction.

(1) A Project shall be eligible for up to four Additional Incentives. A Project may request Incentives listed in Paragraph (f)(2) or use an Incentive to seek a deviation from a Development Standard elsewhere in the LAMC or a Project site's applicable zoning ordinance, Specific Plan, or overlay. Refer to Paragraph (d) for the approval Procedure that is consistent with the Project's Incentive request.

(i) Incentives requested pursuant to the applicable procedure in Paragraph (d) of this Subdivision shall be granted unless it is found, based upon substantial evidence, that:

- a. The Incentive does not result in identifiable and actual cost reductions, consistent with California Government Code Section 65915(k), to provide for affordable housing costs as defined in California Health and Safety Code Section 50052.5, or for rents for the targeted units to be set as specified in California Government Code Section 65915(c); or

- b. The Incentive will have a Specific Adverse Impact upon public health and safety or the physical environment or on any real property that is listed in the California Register of Historical Resources and for which there is no feasible method to satisfactorily mitigate or avoid the Specific Adverse Impact without rendering the development unaffordable to low-income and moderate-income households. Inconsistency with the zoning ordinance or general plan land use designation shall not constitute a Specific Adverse Impact upon the public health or safety; or
- c. The Incentive would be contrary to state or federal law.

(2) Menu of Incentives. A Project may elect to request one of the following incentives not to exceed the allowed number of incentives pursuant to Paragraph (h)(1) above. Each request from the Menu of Incentives shall constitute one Incentive request unless otherwise stated.

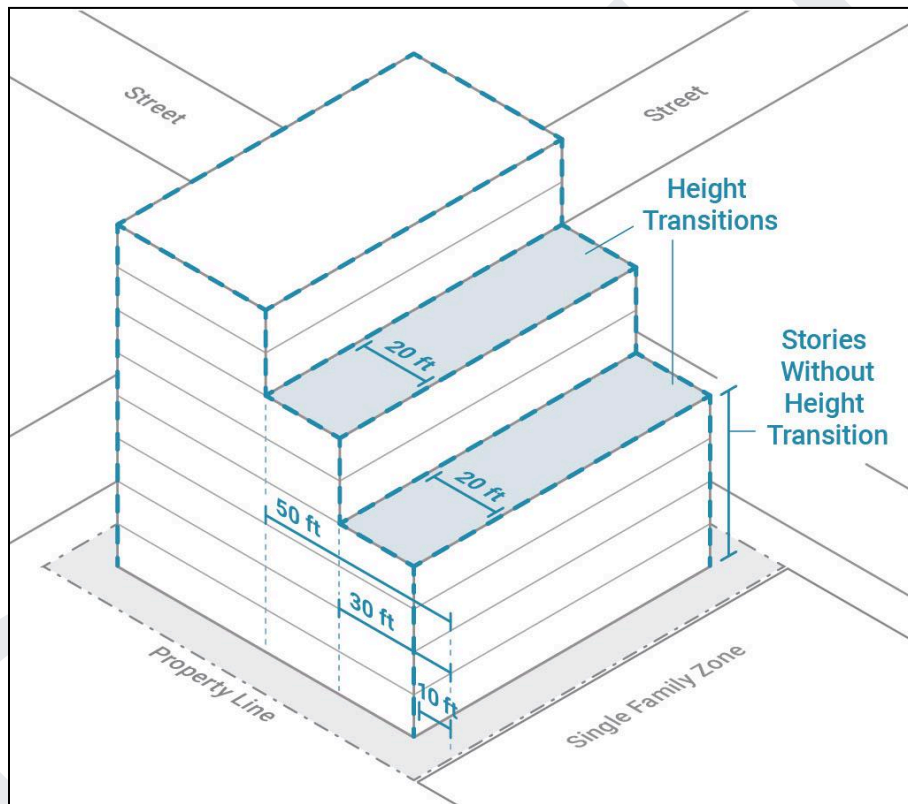

(i) **Yards.** Projects may request a reduction of otherwise required yards as follows:

Yards/Setbacks	C Zones	R Zones (yard reductions for requests from the Menu of Incentives in R zones may be combined and require the use of only one incentive)
	In any Commercial zone, Eligible Projects may utilize any or all of the yard requirements for the RAS3 zone per LAMC Section 12.10.5. Projects on commercially zoned sites adjacent to properties zoned RD or more restrictive may provide a rear yard of not less than five feet.	Front Yards. Front yard reductions are limited to no more than the average of the front yards, regardless of a required Building Line, of adjoining buildings along the same street frontage. If located on a corner lot or adjacent to a vacant lot, the front yard setback may align with the façade of the adjoining building along the same front lot line. If there are no adjoining buildings, no reduction is permitted. If a Project occupies all the lots on an entire street frontage, a reduction to the front yard is permitted so long as it is to the same dimension as a corresponding increase to the rear yard.
		Side and Rear Yards. Up to 30% decrease in the required width or depth of any individual yard or setback.

- (ii) **Ground Floor Height.** Projects involving the construction of a new building or additions may receive up to a 20% reduction in any Ground Floor Height restrictions contained in an Overlay, Specific Plan, Q condition or D condition.

DRAFT

(iii) **Transitional Height.** Projects may select the following transitional height requirements in lieu of those found in Section 12.21.1.A.10 of this Code or any applicable transitional height limits in a Project site’s applicable zoning, Specific Plan, or overlay including any requirements for reduced building heights or setbacks when a building is adjoining a RW1 or more restrictive zone. Furthermore, Projects adjoining an OS zone may utilize this incentive to be exempt from the transitional height requirements found in Section 12.21.1.A.10 of this Code or any applicable Specific Plan or Overlay for the portion of the Project abutting the OS zone.

	Setback/Step Back Distance*
Side or Rear Setback	10-feet
4 Story Step-Back	30-feet
6 Story Step-Back	50-feet

*Setback and Step-back is measured from the property line.

(iv) **Space Between Buildings and Passageways.** Projects subject to the provisions set forth in LAMC Section 12.21 C.2 may request a reduction in space between buildings and passageways requirements as follows:

- a. Up to a 30% reduction in the space between buildings required pursuant to LAMC Section 12.21 C.2(a); and
 - b. Up to 50% reduction in the width of the passageway required pursuant to LAMC Section 12.21 C.2(b) or the space provided to meet a subject site's required side yard requirement, whichever provides a greater reduction. Passageways provided may extend from any public street adjacent to the project site.
- (v) **Lot Coverage.** Projects may request up to a 20% increase in lot coverage limits, provided that the landscaping for the Project meets a minimum of 30 points under the Landscape and Site Design Ordinance of Section 12.40 of this Code, and the Landscape and Site Design Point System.
- (vi) **Lot Width.** Projects may request up to a 25% decrease from a lot width requirement, provided that the landscaping for the Project meets a minimum of 30 points under the Landscape and Site Design Ordinance of Section 12.40 of this Code, and the Landscape and Site Design Point System.
- (vii) **Open Space.** In lieu of the open space calculations set forth in LAMC Section 12.21 G.2, Projects may calculate their usable open space requirement as 15% of the total lot area or 10% of the total floor area confined within the perimeter walls of the provided Residential Units, whichever is greater, provided that the overall design of the Project meets a minimum of 30 points under the Landscape and Site Design Ordinance pursuant to Section 12.40 of this Code, and the Landscape and Site Design Point System. Common Open Space shall constitute at least 50% of the usable open space calculated under this incentive and shall be provided as outdoor space and comply with applicable provisions of Section 12.21 G.2(a)(1-4). Usable open space provided as Private Open Space shall comply with Section 12.21 G.2(b).
- (viii) **Density Calculation.** The area of any land required to be dedicated for street or alley purposes may be included as lot area for purposes of calculating the maximum density permitted by the underlying zone in which the Project is located.

- (ix) **Averaging of Floor Area Ratio, Density, Parking or Open Space, and permitting Vehicular Access.** A Project that is located on one or more contiguous lots, not separated by a street or alley, may average and permit the floor area, density, open space and residential and commercial parking over the project site, and permit vehicular use and access between a less restrictive zone and a more restrictive zone, provided that:
- a. No further lot line adjustment or any other action that may cause the Project site to be subdivided subsequent to this grant shall be permitted; and
 - b. The proposed use is permitted by the underlying zone(s) of each lot.
- (x) **P Zone.** In lieu of the limitations described in LAMC Section 12.12.1 and LAMC Section 12.12.1.5, in a P or PB zone, a Project may include the uses and area standards permitted in the least restrictive adjoining zone. The phrase “adjoining zone” refers to the zones of properties abutting, across the street or alley from, or having a common corner with, the subject property.
- (xi) **Relief from a Development Standard.** A Project may request up to 20% relief from a Development Standard contained in Chapter 1 of this Code, an Overlay, a Specific Plan, a Q Condition, or a D Condition. Projects requesting this incentive must provide landscaping for the Project that meets a minimum of 30 points under the Landscape and Site Design Ordinance of Section 12.40 of this Code, and the Landscape and Site Design Point System. This incentive may be requested more than once but shall require the use of an Incentive for each request.
- a. **Exception.** This incentive shall not apply to standards that regulate FAR, Height, yards/setbacks, ground story requirements, signs, parking in front of buildings, or usable open space. This incentive shall not apply to a Designated Historic Resource(s), or Non-Contributing Element(s) as defined in LAMC Section 13B.8.1.C of Chapter 1A of this Code.

(i) **Public Benefit Options.** Per Paragraphs (e)(2) or (f)(2), all Projects that qualify for the Base Incentives contained in this subdivision shall be eligible for one or more of the following Public Benefit Options. Projects utilizing the Opportunity Corridor Transition Incentive Area are not eligible for Public Benefit Options. Projects may utilize more than one Public Benefit Option if eligible, and development incentives granted in exchange for Public Benefits may be stacked. These Public Benefit Options may be combined with the Additional Incentives pursuant to Paragraph (h). If a Project includes five of the following Public Benefit Options, they shall receive an additional 11 feet in height.

(1) **Child Care Facility.** A Project that includes a Child Care Facility located on the premises of, as part of, or adjacent to, the project, shall be granted either of the following:

(i) An additional Density Bonus that is, for purposes of calculating residential density, an increase in the floor area of the project equal to the floor area of the Child Care Facility included in the project; or

(ii) An additional Incentive from the Menu of Incentives or not listed on the Menu of Incentives that contributes significantly to the economic feasibility of the construction of the Child Care Facility. Projects that utilize this incentive may request an additional 11 feet in height.

(2) **Multi-Bedroom Units.** A Project providing multi-bedroom units shall be granted one of the following so long as an affidavit declaring the qualifying multi-bedroom units will maintain the same bedroom count and will not be converted to additional Residential Units in the future is executed and recorded with the Department of City Planning:

(i) A Project that includes a minimum of 10% of Total Units as Residential Units with three bedrooms or more shall be granted additional Floor Area and Height as follows in Table 12.22 A.38(i)(2)(i)a in addition to what is available in the applicable FAR and Height incentive as listed for Base Incentives in Table 12.22 A.38(e)(2)(i) or Table 12.22 A.38(f)(2)(i); or

TABLE 12.22 A.38(i)(2)(i)a Additional FAR and Height for Multi-Bedroom Units		
Overall Residential Units (including Density Bonus Units)	Additional FAR	Additional Height (Stories)
0-30	0.5:1	1
31-50	1.0:1	1
51-75	1.5:1	2
75+	2.0:1	2

(ii) A Project shall be granted the following:

- a. An exemption of the square footage of all Residential Units with three or more bedrooms from the floor area calculations of family size units.
- b. An additional story of height beyond what is available in the applicable height incentive as listed for Base Incentives in Table 12.22 A.38(e)(2)(i) or Table 12.22 A.38(f)(2)(i). The square footage of this additional story shall be limited to the square footage exempted as a result of applying 12.22 A.38(g)(2)(ii)(a).

(3) **Preservation of Trees.** An additional 11 feet of height may be awarded for projects that maintain existing mature, Significant Trees (any tree that measures 12 inches or more in diameter at four and one-half feet above the average natural grade at the base of the tree and/or is more than 35 feet in height), as verified by a focused Tree Report prepared by a certified arborist. A covenant shall be filed with Los Angeles Department of Building and Safety that requires the tree to be

maintained for at least 15 years unless a certified arborist certifies that the tree is dead, dying, or dangerous to public health.

- (4) **Land Donation.** An applicant for a subdivision, parcel map or other residential development approval that donates land for housing to the City of Los Angeles satisfying the criteria of California Government Code Section 65915(g), as verified by the Department of City Planning, shall be granted a Density Bonus of 15%. Provided developments are otherwise consistent with (insert small lot design standards). The Department of City Planning may adopt administrative guidelines for the purpose of clarifying procedures associated with the implementation of Land Donations pursuant to California Government Code Section 65915(g).
- (5) **Active Ground Floor Exemption from Calculation of Floor Area.** Active uses, up to 1,500 square feet, located on the ground story shall be exempt from the calculation of floor area.
- (i) For the purposes of exempting active uses on the ground story from calculating floor area, active space shall be designed and intended for Neighborhood Retail and Service Uses. Areas for circulation, storage, mechanical equipment, parking, lobbies, mailrooms, laundry rooms, utilities, and waste collection shall not account for more than 15% of an area designated as an active use.
 - (ii) Projects utilizing this option shall provide a ground story transparency of a minimum of 60% along the building Frontage.
 - (iii) Projects utilizing this option shall provide a ground floor entrance at minimum every 50 feet along the front property line that provides both ingress and egress pedestrian access to the ground story of the building.
- (6) **Privately Owned Public Space.** Projects that provide 4% of buildable lot area that is dedicated as Privately Owned Public Space above the Project site's required Common Outdoor Open Space shall be eligible for zero rear yard setback and shall be eligible to utilize the Modification of Development Standard for site landscaping as described in LAMC Section 12.22 A.38 (h)(2)(xi).
- (7) **Surveyed Historic Resource Facade Rehabilitation.** Projects incorporating a Surveyed Historic Resource(s) into the Project design shall be granted additional Floor Area up to 1.0 FAR and 22 feet in height beyond what is available in the applicable height incentive as listed for Base Incentives in Table 12.22 A.38(e)(2)(i) or Table 12.22 A.38(f)(2)(i), provided all of the following standards are met:
- (i) The Project retains all street Fronting facades to a depth of 10-feet,

(ii) New Floor Area shall be setback behind the 10-foot retention area, except that open space, balconies, and non-habitable architectural projections may encroach on the 10-foot retention area. In instances where a lot contains dual-frontages, the setback shall be applied from both frontages, and

(iii) Rehabilitation of the facades is completed pursuant to the Secretary of the Interior's Standards for Rehabilitation to the satisfaction of the Office of Historic Resources.

(j) **Program Standards.** The following program standards shall be applicable to any Project that meets the eligibility criteria established in Paragraphs (e), (f), and (g) of this subdivision.

(1) **Other Density Bonus Programs.** Projects seeking a Density Bonus pursuant to this Subdivision may not pursue a Density Bonus pursuant to the procedures of any other housing incentive program contained in the LAMC or in an Overlay or Specific Plan.

(2) **Calculating Maximum Allowable Residential Density.** The Maximum Allowable Residential Density of a Project site shall be calculated pursuant to Government Code Section 65915(o)(6), before the application of a Density Bonus, using the maximum number of units allowed under a Project site's applicable zoning ordinance, specific plan, overlay, or general plan land use designation, whichever is greater. If a range is permitted, the maximum number of units allowed by the specific zoning range, specific plan, or general plan land use designation shall be applicable when determining a Project site's density prior to the application of a Density Bonus.

(3) **Calculating Restricted Affordable Units.** The required number of Restricted Affordable Units shall be calculated based on a Project's Total Units and shall include any unit added by a Density Bonus awarded pursuant to this subdivision.

(4) **Calculating a Density Bonus.** For the purposes of calculating a Density Bonus, the following shall apply:

(i) Residential Units that comprise a Project shall be on contiguous lots, not separated by a street or alley, that are the subject of a single development application, but do not need to be based on individual subdivision maps or lots.

(ii) An applicant for a Project may have the ability to apply a lesser percentage of Density Bonus, including but not limited to, no Density Bonus.

(5) **Fractional Numbers.**

- (i) **Units.** For the purposes of this Subdivision, calculations for the following resulting in fractional numbers shall be rounded up to the next whole number:
- a. Maximum Allowable Residential Density
 - b. Density Bonus units
 - c. Number of Restricted Affordable Units
 - d. Number of Replacement Housing Units
 - e. Vehicular Parking
 - f. Number of Multi-Bedroom Units provided pursuant to LAMC Section 12.22 A.38(i)(2)
- (6) **Multiple Lots.** A building that crosses one or more lots is eligible for the Transit Oriented Incentive Area or Opportunity Corridor Incentive Area that corresponds to the lot with the highest incentive area permitted in Table 12.22 A.38(e)(1)(iv) or Table 12.22 A.38(f)(1)(i).
- (7) **Update Frequency.** The Director shall have the authority to issue updated eligibility maps on an annual basis in order to align with updated zoning and geographic data updates, including updates to Resource Areas as defined and identified by the California Tax Credit Allocation Committee (TCAC) and updates to the locations of major transit stops.
- (8) **Updates to Community Plans, Specific Plans, Transit Neighborhood Plans and Overlays.** Community Plans, Specific Plans, Transit Neighborhood Plans and Overlays with sites eligible for this Subdivision shall meet at minimum the Base Incentives and percentage of set-aside affordable units for every lot eligible in the Mixed Income Incentive Programs. In the case that a Community Plan Update, Specific Plan, Transit Neighborhood Plan, or Overlay proposes to exceed the development incentives or set-aside percentages as set forth in the Mixed Income Incentive Program, the Community Plan, Specific Plan, Transit Neighborhood Plan, or Overlay may supercede the Transit-Oriented Incentive Area program. If these provisions are met, Community Plans and Overlay Plans shall not be subject to the Update Frequency provisions of Subparagraph 7 of Paragraph (j) above.

(i) **Exception.** In the case that a Community Plan, Specific Plan, Transit Neighborhood Plan, or Overlay assigns a site a zone that does not match the minimum Base Incentives for every lot eligible for the Transit-Oriented Incentive Area program, the Plan shall be required to demonstrate that the zoning action does not result in the net loss of residential capacity.

- (9) **Request for a Lower Eligibility Subarea.** Even though a project site may be eligible for a certain Transit Oriented Incentive Area or Opportunity Corridor Incentive Area, an applicant may choose to select a lower Transit Oriented Incentive Area or Opportunity Corridor Incentive Area within the applicable market tier by providing the percentage of Restricted Affordable Housing Units required for any lower Transit Oriented Incentive Area or Opportunity Corridor Incentive Area and be limited to the incentives available for the lower Transit Oriented Incentive Area or Opportunity Corridor Incentive Area.
- (10) **Replacement Housing Units.** A Project approved under this subdivision must meet any applicable housing replacement requirements and demolition protections of California Government Code Section 65915(c)(3) and LAMC Section 16.60, as verified by the Los Angeles Housing Department (LAHD) prior to the issuance of a building permit. Replacement Housing Units required pursuant to this Subparagraph may count towards any Restricted Affordable Unit requirements.
- (11) **Standards for Restricted Affordable Units.** Projects must meet the applicable requirements regarding the size, location, amenities and allocation of Restricted Affordable Units in LAMC Section 16.61 B and C and in any Implementation Memorandum, Technical Bulletin or User Guide prepared and adopted by the Los Angeles Housing Department or Department of City Planning.
- (12) **Rent Schedules.** Restricted Affordable Units required as part of a Project shall be rented at rates not to exceed those specified in California Health and Safety Code 50052.5 for for-sale units or California Health and Safety Code Section 50053 for for-lease units. Restricted Affordable Units associated with One Hundred Percent Affordable Housing Projects shall comply with the definition set forth in LAMC Section 12.03.
- (13) **Implementation Memorandums, FAQs, Forms/Applications and User Guides.** The Director may prepare Implementation Memorandums, FAQs, Forms/Applications and/or User Guides for State Density Bonus requirements, as set forth in California Government Code Sections 65915-65918, for the purpose of providing additional information pertaining to this Subdivision and maintaining consistency with State Density Bonus Law.

(14) **Covenants.** Prior to the issuance of a building permit for any Project qualifying for a Density Bonus pursuant to the provisions of this Subdivision, covenants acceptable to the Los Angeles Housing Department and consistent with the requirements in this Subdivision and set forth in LAMC Section 16.61 shall be recorded with the Los Angeles County Recorder.

(15) **Story.** A story shall be defined as 11-feet in height.

(k) **Relationship to Other Sections of the Los Angeles Municipal Code.** The following provisions shall govern the relationship to other sections of the Los Angeles Municipal Code for any Project that meets the eligibility criteria established in Paragraph (c) of this Subdivision.

(1) A Project that meets the eligibility criteria established in Paragraph (c) and complies with the Procedures established in Paragraph (d) may exceed the use limitations that may apply to a Project site.

(2) If any of the Procedures described in Paragraph (d), Base Incentives described in Paragraphs (e), (f), and (g), Additional Incentives described in Paragraph (h), Public Benefit options described in Paragraph (i), or waivers requested pursuant to LAMC Section 12.22 A.38(d)(4) conflict with those of any otherwise applicable specific plan, overlay, supplemental use district, "Q" condition, "D" limitation, or citywide regulation established in Chapter 1 of this Code, including but not limited to the Ordinance Nos. listed below, this Subdivision shall prevail.

- (i) Alameda District Specific Plan (171,139)
- (ii) Avenue 57 Transit Oriented District (174,663)
- (iii) Bunker Hill Specific Plan (182,576)
- (iv) Century City North Specific Plan (156,122)
- (v) Century City West Specific Plan (186,370)
- (vi) Century City South Specific Plan (168,862)
- (vii) Coastal Bluffs Specific Plan (170,046)
- (viii) Coliseum District Specific Plan (185,042)

(l) **Interpretations Consistent with State Density Bonus Law.** This Subdivision is intended to be interpreted as consistent with State Density Bonus Law contained in California Government Code Sections 65915-65918. If at any time, this Subdivision becomes inconsistent with California Government Code Sections 65915-65918, the provisions of State Density Bonus Law shall apply.

Section 8. Subdivision 39 of Subsection A of Section 12.22 of the Los Angeles Municipal Code is added to read as follows:

12.22 A.39 AFFORDABLE HOUSING INCENTIVE PROGRAM

(a) **Purpose.** The purpose of this Subdivision is to establish procedures for implementing State Density Bonus requirements as set forth in California Government Code Sections 65915-65918 for affordable housing projects, including Priority Housing Projects, and to increase the production of affordable housing citywide with tailored application for sites on parking (P) zones, public facility (PF) zones, and sites owned by Public Agencies, Faith-Based Organizations and nonprofit Community Land Trusts and Cooperatives. In conjunction with the incentives granted by state law, this subdivision shall offer incentives and waivers or reductions of Development Standards for the purposes of increasing the feasibility of affordable housing construction.

(b) **Definitions.** The following definitions shall apply to this Subdivision:

Environmental Consideration Area. As defined in LAMC Section 12.22 A.37.

Faith-Based Organization Project. A housing project located on land owned entirely, whether directly or through a wholly owned company or corporation, by a Religious Institution at the time of project filing, developed by or in partnership with a Qualified Developer. This includes ownership through an affiliated or associated nonprofit public benefit corporation organized pursuant to the Nonprofit Corporation Law (Part 2 [commencing with Section 5110] of Division 2 of Title 1 of the Corporations Code).

General Commercial Uses. Uses that involve business activity serving the general public, including retail, professional and personal services, hospitality, and entertainment.

Moderate Opportunity Areas. Moderate Resource Areas and areas experiencing moderate rates of rapid change as defined and identified by the California Tax Credit Allocation Committee (TCAC).

Public Agency. Refer to California Government Code Section 20056.

Public Land Project. A housing project located in a Public Facility (PF) Zone and/or located on lots owned by a Public Agency.

Qualified Developer. The same meaning as California Government Code Section 65913.16.(b)(9) exclusive of (D). For purposes of this Subdivision, a Qualified Developer shall also include a Community Development Financial Institution (CDFI) identified on the United States Department of the Treasury's list of Certified CDFIs at the time of project filing, provided the CDFI maintains a

non-profit status pursuant to Section 501(c)(3) of the United States Internal Revenue Code.

Religious Institution. Refer to California Government Code Section 65913.16.(b)(10).

Sea Level Rise Area As defined in LAMC Section 12.22 A.38 (b).

Shared Equity Project. A housing project located on land owned by a Community Land Trust as defined in the California Revenue and Taxation Code Section 402.1(a)(11)(C)(ii), or a Limited-equity Housing Cooperative or Workforce Housing Cooperative Trust as defined in Section 817 of The California Civil Code, except that Residential Units, in addition to being sold or rented to income qualified persons, may also be held by the non-profit corporation for the purpose of making Lower Income units financially stable. The land must be owned by the Community Land Trust, Limited-equity Housing Cooperative or Workforce Housing Cooperative Trust at the time of project filing through the issuance of a Certificate of Occupancy.

Total Units. The total units in a project after a Density Bonus is awarded pursuant to this subdivision.

Very Low Vehicle Travel Area. Refer to California Government Code Section 65915 (o)(9).

(c) **Eligibility Criteria.** To qualify for the provisions of this Subdivision, an Affordable Housing Incentive Project (Project) must satisfy the following eligibility requirements:

- (1) A Project meeting the definition of a One Hundred Percent Affordable Housing Project, Public Land Project, Shared Equity Project, or a Faith Based Organization Project with five or more Total Units.
- (2) Reserve a percentage of the Project’s Total Units for at least one of the following income levels or target populations, as defined on Table 12.22 A.39(c)(2).

TABLE 12.22 A.39(c)(2)(i) Required Percentage of Restricted Affordable Units	
Project Type	Minimum % of Total Units that are Restricted Affordable Units ¹
One Hundred Percent Affordable Housing Project	100% ¹
Public Land Project	100% ²
Faith-Based Organization Project	80% ³
Shared Equity Project	80% ⁴

Footnotes:

1 Per GCS 65915(b)(1)(G), a One Hundred Percent Affordable Housing Project must reserve all units (including units provided as a result of a Density Bonus), excluding a manager's unit or units, for lower income households earning up to 80 percent of the area median income, and rents or housing costs to the occupying residents do not exceed 30 percent of the maximum gross income, as those income ranges are defined by the United States Department of Housing and Urban Development (HUD), or any successor agency except that 20 percent of the units may be affordable to Moderate Income households, as defined in California Health and Safety Code Section 50053, or as amended.

2 Provided at least one affordability income category is consistent with the minimum affordability requirements pursuant to California Government Code Section 65915.

3 A Faith Based Organization Project must reserve ~~up to~~ 20 percent of Total Units (including units provided as a result of a Density Bonus), excluding a manager's unit or units, for households earning up to 120 percent of the area median income, as defined in Section 50053 of the California Health and Safety Code Section, or as amended. Remaining Restricted Affordable Units may use rents or housing costs so the occupying residents do not exceed 30 percent of the maximum gross income, as those income ranges are defined by the United States Department of Housing and Urban Development (HUD). 20 percent of Total Units may be unrestricted.

4 A Shared Equity Project must reserve 20 percent of Total Units (including units provided as a result of a Density Bonus), excluding a manager's unit or units, for households earning up to 120 percent of the area median income, as defined in California Health and Safety Code Section 50053, or as amended. Remaining Restricted Affordable Units may use rents or housing costs so the occupying residents do not exceed 30 percent of the maximum gross income, as those income ranges are defined by the United States Department of Housing and Urban Development (HUD). 20 percent of Total Units may be unrestricted.

- (3) The One Hundred Percent Affordable Housing Project site shall not include any lots located in a single family or more restrictive residential zone (RW and more restrictive zone), if a Project's Maximum Allowable Residential Density is less than 5 units. A Shared Equity Project site shall not include lots located in a single family or more restrictive residential zone (RW and more restrictive).
- (4) Faith-Based Organization Projects utilizing land purchased by a Religious Institution after January 1st, 2024, shall not include any lots located in a single family or more restrictive residential zone (RW and more restrictive) unless the filing Religious Institution owns a lot with an existing Church or House of Worship located within 528 feet of the Project site.
- (5) The Faith-Based Organization Project, Shared Equity Project, or a One Hundred Percent Affordable Project with Maximum Allowable Residential Density of less than 5 units, site shall not include any lots located in a manufacturing zone that does not allow multi-family residential uses (M1, M2, M3), including sites zoned CM, MR1, and MR2 with no residential uses permitted from an applicable planning overlay.

- (6) The Faith-Based Organization Project, Shared Equity Project, or a One Hundred Percent Affordable Project with a Maximum Allowable Residential Density of less than 5 units, shall not include any lots located in a Very High Fire Hazard Severity Zone (VHFHSZ), the Coastal Zone, or a Sea Level Rise Area.
- (7) A Faith-Based Organization Project or Shared Equity Project may be located on a lot with a Surveyed Historic Resource, that is classified as a historical resource, as defined by Public Resources Code Section 21084.1 as determined by the Office of Historic Resources. Provided that:
 - (i) If proposed alterations to a Surveyed Historic Resource do not meet the Secretary of the Interior's Standards for Rehabilitation to the satisfaction of the Office of Historic Resources, the Discretionary Procedure pursuant to Section 12.22.A.39(d)(3) shall be followed; and
 - (ii) The Faith-Based Organization Project or Shared Equity Project does not require Demolition as defined in LAMC Section 13B.8.1.C of Chapter 1A of this Code a Surveyed Historic Resource.
- (8) The Project does not require the demolition of a Designated Historic Resource, as demolition is defined in LAMC Section 13B.8.1.C of Chapter 1A of this Code , and any proposed alteration to a Designated Historic Resource shall not be approved until a review has been completed by the Office of Historic Resources.
- (9) The following shall apply to a Type I Unified Adaptive Reuse Project, as defined in LAMC 12.22 A.26(h)(1), that meets the definition of a One Hundred Percent Affordable Housing Project, Public Land Project, Faith-Based Organization Project, or a Shared Equity Project, and that complies with the criteria for Eligibility associated with the corresponding project type:
 - (i) The portion of the Type I Unified Adaptive Reuse Project consisting of new construction may be eligible for Base Incentives, Additional Incentives, and Public Benefits Options in LAMC 12.22 A.39 for the respective project type definition unless otherwise stated; and
 - (ii) The Type I Unified Adaptive Reuse Project shall comply with the Procedures set forth in LAMC 12.22 A.39(d) based on the corresponding project type definition and associated project request.
- (10) Projects located on project sites that meet the definition of an Environmental Consideration Area shall comply with all applicable standards contained in the Environmental Protection Measures adopted pursuant to LAMC Section 11.5.15.

(d) **Procedures.** A Project that meets the provisions of this Subdivision shall be reviewed pursuant to Procedures, as set forth below. Though an approval of a Density Bonus or Incentive pursuant to this Subdivision shall not, in and of itself, trigger a General Plan Amendment, Zone Change, Project Review or other discretionary review actions required by this Zoning Code, the applicable procedures set forth in LAMC Section 13A.2.10 (Multiple Approvals) of Chapter 1A of this Code shall apply for Projects seeking other discretionary approvals in conjunction with an application requested pursuant to the procedures in Paragraph (d).

(1) **Los Angeles Department of Building and Safety Review.** A Project seeking Base Incentives described in Paragraph (e) and/or Incentives listed on the Menu of Incentives in Paragraph (f) shall be considered ministerial and processed by the Department of Building and Safety.

(i) **Exceptions.**

a. Faith-Based Organization Projects and Shared Equity Projects with Surveyed Historic Resources shall seek approval pursuant to Subparagraph (2) of Paragraph (d).

(2) **Expanded Administrative Review.** The following Projects shall be ministerially approved pursuant to Expanded Administrative Review, as set forth by the provisions of LAMC Section 13B.3.2 (Expanded Administrative Review) of Chapter 1A of this Code. As defined in this Subdivision, ministerial approval means an administrative process to approve a “use by right” as this term is defined in California Government Code Section 65583.2 (i).

(i) Projects that request the Public Benefit Options described in Paragraph (g). Projects that request only Public Benefit Options in addition to Incentives listed on the Menu of Incentives shall not be subject to any hearing procedures regardless of the provisions contained in LAMC Section 13B.3.2.D.

(ii) Projects seeking Incentives not listed on the Menu of Incentives described in Paragraph (f) pursuant to California Government Code Section 65915(e).

(iii) Projects that request waivers or reductions of any Development Standards not listed on the Menu of Incentives described in LAMC Section 12.22 A.39(f)(2). Waivers or reductions of any Development Standard shall be reviewed pursuant to the Findings described in LAMC Section 12.22 A.39(d)(5).

(vi) Faith Based Organization Projects and Shared Equity Projects with Surveyed Historic Resources.

- (vii) Projects requesting Incentives from the Menu of Incentives that cannot comply with the criteria established in LAMC Section 12.22 A.39(f)(1)(ii) shall be subject to the Public Hearing procedures described in LAMC Section 13B.3.2.D of Chapter 1A of this Code in addition to the general procedures described in LAMC Section 13B.3.2 (Expanded Administrative Review) of Chapter 1A of this Code.
- (3) **Director's Determination.** The Director of Planning shall review the following Projects pursuant to LAMC Section 13B.2.5 of Chapter 1A of this Code:
- (i) Projects requesting up to three waivers or reduction of any Development Standards, pursuant to California Government Code Section 65915. Waivers or reductions of any Development Standards shall be reviewed pursuant to the Findings described in LAMC Section 12.22 A.39(d)(5).
- (4) **City Planning Commission Review.** The following Projects must file an application pursuant to LAMC Section 13B.2.3 of Chapter 1A of this Code. Notwithstanding the provisions set forth in Sec. 13B.2.3 (Class 3 Conditional Use Permit) of Chapter 1A , the decision of the City Planning Commission shall be final.
- (i) A Project that requests more than three waivers or reductions of Development Standards pursuant to California Government Code Section 65915. Waivers or reductions of any Development Standards shall be reviewed pursuant to the Findings described in LAMC Section 12.22 A.39(d)(5).

(5) **Findings for Waivers or Reductions of Development Standards.** Waivers requested pursuant to the Procedures described in this Paragraph shall be approved by the applicable decision-making authority unless that decision-making authority finds that:

- (i) The Development Standard associated with a request for waiver(s) or reduction(s) in Development Standards will not have the effect of physically precluding the construction of a development meeting the Eligibility criteria described in Paragraph (c) at the densities or with the concessions or incentives permitted under Paragraph (e) or Paragraph (f); or
- (ii) The waivers or reductions of Development Standards would have a Specific Adverse Impact, as defined in paragraph (2) of subdivision (d) of Section 65589.5, upon public health and safety or on a California Register of Historical Resources and for which there is no feasible method to satisfactorily mitigate or avoid the Specific Adverse Impact without rendering the development unaffordable to low-income and moderate-income households; or
- (iii) The waivers or reductions of Development Standards are contrary to state or federal law.

(6) **Other Discretionary Approvals.** Applicable procedures set forth in LAMC Section 13A.2.10 (Multiple Approvals) of Chapter 1A of this Code apply for a Project seeking other discretionary approvals in conjunction with an application requested pursuant to the Procedures in Paragraph (d). Regardless of any other findings that may be applicable, the decision-maker must approve the requested Base Incentives and Additional Incentives, either on or off the Menu of Incentives described in LAMC Section 12.22 A.39(f)(2), requested under this Subdivision unless the decision-maker, based upon substantial evidence, determines that the Project meets one or more of the criteria described in LAMC Section 12.22 A.37(f)(1)(i).

(e) **Base Incentives.** A Project that meets the eligibility criteria established in Paragraph (c) may utilize Base Incentives described in this Paragraph, in exchange for the required minimum percentage of Restricted Affordable Units established in Paragraph (c) of this Subdivision. A Project that qualifies for Base Incentives established in the table below shall also be eligible for Public Benefit Options listed in subparagraph (g).

TABLE 12.22 A.39(e)(i) Base Incentives				
Eligibility Subarea	Density Bonus	Parking	Floor Area Ratio (FAR)	Height
Description	In each Subarea, the maximum increase in the otherwise Maximum Allowable Residential Density shall be as follows:	In each Subarea, the required shall be as follows: ^{1,2}	In each Subarea, the maximum increase in the allowable FAR permitted shall be as follows ³ :	In each Subarea, the maximum increase in the allowable height permitted shall be equal to the following: ⁴
Citywide	Any Density Bonus provided by California Government Code Section 65915. ⁵	0.5 Parking Spaces per Unit. ⁵	Sites with a Maximum Allowable Residential Density of less than 5 units: The maximum FAR shall be equal to 1.5:1 Otherwise: 3.0:1, or a 35% increase, whichever is greater.	Sites with a Maximum Allowable Residential Density of less than 5 units: Bonus of up to 11' or 1 story, whichever is greater. Otherwise: Bonus of 22' or 2 stories, whichever is greater.
Lots located within a half mile of a Major Transit Stop or Very Low Vehicle Travel Area ⁶	Limited by Floor Area	No minimum parking required. ⁷	Sites with a Maximum Allowable Residential Density of less than 5 units: The maximum FAR shall be equal to 2.0:1 Otherwise: 4.5:1, or a 50% increase, whichever is greater.	Sites with a Maximum Allowable Residential Density of less than 5 units: Bonus of up to 11' or 1 story, whichever is greater. Otherwise: bonus of 33' or 3 stories, whichever is greater.
Higher Opportunity or Moderate Opportunity Area	Limited by Floor Area	No minimum parking required. Required parking for current or proposed nonresidential uses may be reduced by 25%	Sites with a Maximum Allowable Residential Density of less than 5 units: The maximum FAR shall be equal to 2.5:1 Otherwise: 4.65:1, or a 55% increase, whichever is greater.	Sites with a Maximum Allowable Residential Density of less than 5 units: Bonus of up to 11' or 1 story, whichever is greater. Otherwise: bonus of 33' or 3 stories, whichever is greater.

Footnotes:

1 Required automobile parking applies for all Residential Units in a Project (not just the restricted affordable units), inclusive of disabled and required guest parking, where applicable. All parking spaces provided shall comply with LAMC Section 12.21 A.5. Except that any combination of standard, compact or tandem spaces may be provided. Tandem parking spaces that do not comply with LAMC Section 12.21 A.5(h)(2) may be provided in any configuration as long as a parking attendant or an automated parking system is provided at all times. Consistent with California Government Code Section 65915(p)(4), required parking spaces provided may be uncovered.

2 For consistency with California Government Code Section 65913.6, parking that was previously required under a Conditional Use Permit ~~in~~ pursuant to LAMC Section 12.24 for an existing "church" or "house of worship" use, or that would be required as part of a Conditional Use Permit for a proposed "church" or "house of worship" use, shall be reduced by 50%. California Government Code Section 65913.6 does not apply to Projects within half a mile of a Major Transit Stop or to Projects located on a lot within one block of a car share vehicle.

3 Provided that any additional floor area provided through this Subdivision is utilized only by residential uses. Any nonresidential uses shall be limited to the FAR associated with a site's underlying zoning prior to the application of any Incentive.

4 The increase in height shall be applicable to a Project over the entire project site regardless of the number of underlying height limits. The height increase may be applied to the maximum allowable height in feet or stories permitted by the zone, including for mixed-use Projects.

5 No parking shall be required for a Project meeting the criteria of California Government Code Section 65915(p)(3). No minimum parking is required for Faith-Based Organization Project if there is a car share vehicle within one block of the lot.

DRAFT

- (2) **Automobile Parking Zones.** In lieu of the limitations described in LAMC Section 12.12.1 and LAMC Section 12.12.1.5, in a P or PB zone, a Project may establish Maximum Allowable Residential Density, uses and area standards permitted in the least restrictive adjoining zone.
- (i) **Lots with Dual Zoning.** In cases where a lot contains split zoning with a P or PB Zone, the entire lot may utilize the least restrictive adjoining zone.
- (3) **Public Land Project.** In lieu of the requirements in LAMC Section 12.24 U.21 and 12.04.09 B.9, a Public Land Project may either:
- (i) Establish Maximum Allowable Residential Density, uses, and area standards as permitted in the least restrictive adjoining zone. Regardless of adjacent zoning, all Public Land Projects shall be granted a base Floor Area Ratio of 3.0:1 and a base height of three stories or 33 feet whichever is greater; or
- (ii) Where specifically authorized through a resolution of City Council, a Public Land Project, shall be permitted to have multi-family residential uses and shall not be limited to the use and zoning requirements of the underlying zoning, Specific Plan or General Plan.
- (4) **Exceptions.**
- (i) A One Hundred Percent Affordable Housing Project with five or more units prior to the issuance of a Density Bonus pursuant to section (i) of California Government Code Sections 65915-65918 shall not be eligible for the FAR and Parking Incentives indicated in Table 12.22.A.39(e)(1) and shall be limited to the Density Bonus, Parking, and Height Incentives for projects meeting the eligibility criteria of 65915(b)(1)(G) set forth in California Government Code Section 65915 if any of the following is applicable:
- a. The Project is located in a Very High Fire Hazard Severity Zone, the Coastal Zone, or a Sea Level Rise Area; or
 - b. The Project is located in a manufacturing zone that does not allow multi-family residential uses (M1, M2, M3) or is located in a hybrid industrial zone (CM, MR1, MR2) with residential use restrictions from an applicable planning overlay.
 - c. The Project is located in a single-family or more restrictive residential zone (RW or more restrictive).

- (ii) In a Specific Plan or overlay district that has FAR available through a development bonus or incentive program to provide affordable housing, a Project may utilize the Bonus FAR of the Specific Plan or overlay district in lieu of the FAR maximum described in table 12.22 A.39(e)(1).
- (iii) A Shared Equity Project shall be limited to the low density base incentives indicated in Table 22.A.39(e)(1) for a site with a Maximum Allowable Residential Density less than 5 units, regardless of the underlying Maximum Allowable Residential Density or zoning of the Project site.
- a. **Measure ULA Exception.** A Shared Equity Project receiving funding from a program established under Ordinance 187692 (Measure ULA) shall be eligible for incentives as determined by the Project site's Maximum Allowable Residential Density.

(f) **Additional Incentives.** A Project shall be granted a number of Additional Incentives pursuant to the provisions described below in addition to the Base Incentives established in Paragraph (e).

(1) A Project shall be eligible for up to five Additional Incentives. A Project may request Incentives listed in Paragraph (f)(2) or use an Incentive to seek a deviation from a Development Standard elsewhere in the LAMC or a Project site's applicable zoning ordinance, specific plan, or overlay. Refer to Paragraph (d) for the approval Procedure that is consistent with the Project's Incentive request.

(i) Incentives requested pursuant to the applicable procedure in Paragraph (d) of this Subdivision shall be granted unless it is found, based upon substantial evidence, that:

- a. The Incentive does not result in identifiable and actual cost reductions, consistent with California Government Code Section 65915(k), to provide for affordable housing costs as defined in California Health and Safety Code Section 50052.5, or for rents for the targeted units to be set as specified in California Government Code Section 65915(c); or
- b. The Incentive will have a Specific Adverse Impact upon public health and safety or the physical environment or on any real property that is listed in the California Register of Historical Resources and for which there is no feasible method to satisfactorily mitigate or avoid the Specific Adverse Impact without rendering the development unaffordable to low-income and moderate-income households. Inconsistency with the zoning ordinance or general plan land use designation shall not constitute a Specific Adverse Impact upon the public health or safety; or
- c. The Incentive would be contrary to state or federal law.

(ii) To be eligible for the Menu of Incentives described in LAMC Section 12.22 A.39(f)(2) a Project shall comply with all of the following:

- a. The Project shall not be located in a Very High Fire Hazard Severity Zone, Sea Level Rise Area or the Coastal Zone.
- b. The Project would not require the Demolition, as Demolition is defined in LAMC Section 13B.8.1.C of Chapter 1A of this Code, of a Designated Historic Resource, or any Surveyed Historic Resource, eligible or architectural historic resource identified for any historic protection or special consideration or review by an applicable Overlay or Specific Plan including sites located in the South Los Angeles Community Plan Implementation Overlay

(CPIO) Section 1-6.C.5.b, the Southeast Los Angeles CPIO Section 1-6.C.5.b, the West Adams CPIO Section 6.C.5.b, or the San Pedro CPIO Section 7.C.5.b, Westwood Village Specific Plan, Echo Park CDO District, or the North University Park Specific Plan.

- c. The Project shall not include any lots located in a manufacturing zone that does not allow multi-family residential uses (M1, M2, M3) or lots located in a hybrid industrial zone (CM, MR1, MR2) with residential use restrictions from an applicable planning overlay, except for Public Land Projects.

DRAFT

(2) **Menu of Incentives.** A Project may elect to request any of the following incentives not to exceed the allowed number of incentives pursuant to Subparagraph (f)(1) above. Each request from the Menu of Incentives shall constitute one Incentive request unless otherwise stated.

(i) **Yards.** Projects contained in this subdivision may request a reduction of otherwise required yards as follows:

Yards/ Setbacks	C Zones	R Zones (yard reductions in R zones may be combined and require the use of only one incentive)
	<p>In any Commercial zone, a Project may utilize any or all of the yard requirements for the RAS3 zone per LAMC Section 12.10.5. Projects on commercially zoned sites adjacent to properties zoned RD or more restrictive may provide a rear yard of not less than five feet.</p>	<p>Front Yards. Front yard reductions are limited to no more than the average of the front yards, regardless of a required Building Line, of adjoining buildings along the same street frontage. Or, if located on a corner lot or adjacent to a vacant lot, the front yard setback may align with the façade of the adjoining building along the same front lot line. If there are no adjoining buildings, no reduction is permitted. If a Project occupies all the lots on an entire street frontage, a reduction to the front yard is permitted so long as it is to the same dimension as a corresponding increase to the rear yard.</p>
		<p>Side and Rear Yards. Up to 30% decrease in the required width or depth of any individual yard or setback.</p>

- (ii) **Transitional Height.** No otherwise applicable requirement for transitional height including Section 12.21.1 A.10., or any applicable transitional height limits in a Project site's applicable zoning, Specific Plan, or overlay, including any requirements for reduced building heights when a building is adjoining a more restrictive zone, shall need to be met for projects eligible for the Base Incentives contained in this subdivision.
- (iii) **Ground Floor Activation.** Where nonresidential Floor Area is required by a zoning ordinance, Specific Plan, Community Plan Implementation Overlay, Pedestrian Overlay Zone, or other set of Development Standards, including to meet the definition of a Mixed Use Project in LAMC Section 13.09 B.3, that requirement may be reduced by 50 percent and be satisfied by residential lobbies, community rooms, resident amenities spaces, child care centers, supportive services areas, common open space or use whose primary purpose is to provide services and assistance to residents of the building or the general public.
- (iv) **Ground Floor Height.** Projects eligible for the base incentives contained in this subdivision may request a 30% reduction in any ground floor height requirement.
- (v) **Commercial Parking.** Projects may request to waive any requirement to provide new or maintain existing automobile parking spaces associated with a commercial use that is proposed in conjunction with the Project.
- (vi) **Space Between Buildings and Passageways.** Projects subject to the provisions set forth in LAMC Section 12.21 C.2 may request a reduction in space between buildings and passageways requirements as follows:
- a. Up to a 30% reduction in the space between buildings required pursuant to LAMC Section 12.21 C.2(a).
 - b. Up to 50% reduction in the width of the passageway required pursuant to LAMC Section 12.21 C.2(b) or the space provided to meet a subject site's side yard requirement, whichever provides a greater reduction. Passageways provided may extend from any public street adjacent to the project site.
- (vii) **Lot Coverage.** Up to 20% increase in lot coverage limits, provided that the landscaping for the Project meets a minimum of 30 points under the Landscape and Site Design Ordinance, Section 12.40 of this Code, and the Landscape and Site Design Point System.

- (viii) **Lot Width.** Up to 25% decrease from a lot width requirement, provided that the landscaping for the Project meets a minimum of 30 points under the Landscape and Site Design Ordinance, Section 12.40 of this Code, and the Landscape and Site Design Point System.
- (ix) **Open Space.** In lieu of the open space calculations set forth in LAMC Section 12.21 G.2, A Project requesting this incentive may calculate its usable open space requirement as 15 of the total lot area or 10 of the total floor area confined within the perimeter walls of the provided Residential Units, whichever is greater, provided that the overall design of the Project meets a minimum of 30 points under the Landscape and Site Design Ordinance, Section 12.40 of this Code, and the Landscape and Site Design Point System. Common Open Space shall constitute at least 50% of the usable open space calculated under this incentive and shall be provided as outdoor space and comply with applicable provisions of Section 12.21 G.2(a)(1-4). Usable open space provided as Private Open Space shall comply with Section 12.21 G.2(b).
- (x) **Density Calculation.** The area of any land required to be dedicated for street or alley purposes may be included as lot area for purposes of calculating the maximum density permitted by the underlying zone in which the Project is located.
- (xi) **Averaging of Floor Area Ratio, Density, Parking or Open Space, and permitting Vehicular Access.** A Project that is located on two or more contiguous lots, not separated by a street or alley, may average and permit the floor area, density, open space, and residential and commercial parking over the project site, and permit vehicular use and access between a less restrictive zone and a more restrictive zone, provided that:
- a. No further lot line adjustment or any other action that may cause the Project to be subdivided subsequent to this grant shall be permitted; and
 - b. The proposed use is permitted by the underlying zone(s) of each lot.

- (xii) **Relief from a Development Standard.** A Project may request up to 20% relief from a Development Standard contained in Chapter 1 of this Code, an Overlay, a Specific Plan, a Q Condition, or a D Condition. Projects requesting this incentive must provide landscaping for the Projects that meets a minimum of 30 points under the Landscape and Site Design Ordinance, Section 12.40 of this Code, and the Landscape and Site Design Point System. This incentive may be requested more than once, but shall require the use of an Incentive for each request.
- a. **Exception.** This incentive shall not apply to standards that regulate FAR, Height, yards/setbacks, signs, parking in front of buildings, or usable open space. This incentive shall not apply to a Designated Historic Resource(s), or a Non-Contributing Element(s) as defined in LAMC Section 13B.8.1.C of Chapter 1A of this Code.
- (xiii) **Lot Requirements.** Faith Based Organization Projects and Shared Equity Projects on sites with a Maximum Allowable Residential Density of less than 5 units are eligible for a reduction of otherwise required Lot standards, as part of a subdivision as follows:
- a. Minimum Lot Area: 600 square feet
- b. Minimum Lot Width: 15 feet
- c. Minimum Lot Access: A 3-foot pedestrian access easement may be provided in lieu of vehicular access requirements.
- (xiv) **Yards.** Faith Based Projects and Shared Equity Projects on sites with a Maximum Allowable Residential Density of less than 5 units are eligible for the reduction of otherwise required Yard standards, up to the following minimums:
- a. Front yard reductions are limited to no more than the average of the front yards, regardless of a required Building Line, of adjoining buildings along the same street frontage. Or, if located on a corner lot or adjacent to a vacant lot, the front yard setback may align with the façade of the adjoining building along the same front lot line. If there are no adjoining buildings, no reduction is permitted. If a Project occupies all the lots on an entire street frontage, a reduction to the front yard is permitted so long as it is to the same dimension as a corresponding increase to the rear yard.
- b. Side yard setback of 4 feet, or 3 feet for a two-story structure.
- c. No interior side yard setback shall be required for buildings that are part of the same development.
- d. Rear yard setbacks of 4 feet, provided structures maintain a height of less than 26 feet within 15 feet of the rear property line.

- e. Alley setbacks of zero feet for structures that maintain a height of less than 26 feet in height for at least the first 15 feet from the alley.

(xv) **Spaces Between Buildings and Passageways.** A Faith Based Organization Project or Shared Equity Project on sites with a Maximum Allowable Residential Density of less than 5 units does not need to meet zoning requirements related to spaces between buildings or passageways pursuant to section 12.21 C.2.

- (g) **Public Benefits Options.** A Project that qualifies for the Base Incentives contained in this Subdivision shall be eligible for one or more of the following Public Benefit Options. Projects may utilize more than one Public Benefit Option if eligible, and bonuses granted in exchange for Public Benefits may be stacked. These Public Benefit Options may be combined with the Additional Incentives granted pursuant to Paragraph (h). If a Project includes 5 of the following Public Benefit Options, they shall receive an additional 11 feet in height. Projects located in Very High Fire Hazard Severity Zones, Coastal Zones or Sea Level Rise Areas shall only be eligible for Public Benefit Options listed in 12.22 A.39(g)(1) or 12.22 A.39(g)(4).

- (1) **Child Care Facility.** A Project that includes a Child Care Facility located on the premises of, as part of, or adjacent to, the Project, shall be granted either of the following:

- (i) An additional Density Bonus that is, for purposes of calculating residential density, an increase in the Floor Area of the project equal to the Floor Area of the Child Care Facility included in the Project.

- (ii) An additional Incentive from the Menu of Incentives or not listed on the Menu of Incentives that contributes significantly to the economic feasibility of the construction of the Child Care Facility. A Project that utilizes this incentive may request an additional 11 feet in height.

(2) **Multi-Bedroom Units.** A Project providing multi-bedroom units shall be granted one of the following so long as an affidavit declaring the qualifying multi-bedroom units will maintain the same bedroom count and will not be converted to additional Residential Units in the future is executed and recorded with the Department of City Planning:

- (i) A Project that includes a minimum of 10% of the Total Units, as Residential Units with three bedrooms or more shall be granted additional Floor Area and Height in addition to what is available on the Base Incentives in LAMC Section 12.22 A.39(e) as follows in Table 12.22 A.39(g)(2)(i)a; or

TABLE 12.22 A.39(g)(2)(i)a Additional FAR and Height for Multi-Bedroom Units		
Overall Residential Units (including Density Bonus Units)	Additional FAR	Additional Height (Stories)
0-30	0.5:1	1
31-50	1.0:1	1
51-75	1.5:1	2
75+	2.0:1	2

- (ii) A Project shall be granted the following:
 - a. An exemption of the square footage of all Residential Units with three or more bedrooms from the floor area calculations of family size units.
 - b. An additional story of height beyond what is available in the applicable height incentive as listed for Base Incentives in Paragraph (e). The square footage of this additional story shall be limited to the square footage exempted as a result of applying 12.22 A.39(g)(2)(ii)(a).

- (3) **Preservation of Trees.** Additional 11 feet of height may be awarded for Projects that maintain existing mature, Significant Trees (any tree that measures 12 inches or more in diameter at four and one-half feet above the average natural grade at the base of the tree and/or is more than 35 feet in height), as verified by a focused Tree Report prepared by a certified arborist. A covenant shall be filed with Los Angeles Department of Building and Safety that requires the tree to be maintained for at least 15 years unless a certified arborist certifies that the tree is dead, dying or dangerous to public health.
- (4) **Land Donation.** An applicant for a subdivision, parcel map or other residential development approval that donates land for housing to the City of Los Angeles satisfying the criteria of California Government Code Section 65915(g), as verified by the Department of City Planning, shall be granted a minimum Density Bonus of 15%. The Department of City Planning may adopt administrative guidelines for the purpose of clarifying procedures associated with the implementation of Land Donations pursuant to California Government Code Section 65915(g).
- (5) **Active Ground Floor Exemption from Calculation of Floor Area.** Active uses, up to 1,500 square feet, located on the ground story shall be exempt from the calculation of floor area.
- (i) For the purposes of exempting active uses on the ground story from calculating floor area, active space shall be designed and intended for Neighborhood Retail and Service Uses. Areas for circulation, storage, mechanical equipment, parking, lobbies, mailrooms, laundry rooms, utilities, and waste collection shall not account for more than 15% of an area designated as an active use.
 - (ii) Projects utilizing this option shall provide a ground story transparency of a minimum of 60% along the building Frontage.
 - (iii) Projects utilizing this option shall provide a ground floor entrance at minimum every 50 feet along the front property line that provides both ingress and egress pedestrian access to the ground story of the building.
- (6) **Privately Owned Public Space.** Projects that provide 4% of buildable lot area that is dedicated as Privately Owned Public Space above the Project site's required Common Outdoor Open Space, the Project shall be eligible for zero rear yard setback and shall be eligible to utilize the Modification of Development Standard for site landscaping as described in Paragraph (f)(2)(xii).

(7) **Surveyed Historic Resource Facade Rehabilitation.** Projects incorporating a Surveyed Historic Resource(s) into the Project design shall be granted additional Floor Area up to 1.0 FAR and 22 feet in height beyond what is available in the applicable height incentive as listed for Base Incentives in Table 12.22 A.39(e)(2)(i), provided all of the following standards are met:

(i) The Project retains all street Fronting facades to a depth of 10-feet,

(ii) New Floor Area shall be setback behind the 10-foot retention area, except that open space, balconies, and non-habitable architectural projections may encroach on the 10-foot retention area. In instances where a lot contains dual-frontages, the setback shall be applied from both frontages, and

(iii) Rehabilitation of the facades is completed pursuant to the Secretary of the Interior's Standards for Rehabilitation to the satisfaction of the Office of Historic Resources.

(h) **Program Standards.** The following program standards shall be applicable to any Project that meets the eligibility criteria established in Paragraph (c) of this subdivision.

(1) **Other Density Bonus Programs.** Projects seeking a Density Bonus pursuant to this Subdivision may not pursue a Density Bonus pursuant to the procedures of any other housing incentive program contained in the LAMC or in an Overlay or Specific Plan.

(2) **Calculating Maximum Allowable Residential Density.** The Maximum Allowable Residential Density of a Project site shall be calculated pursuant to Government Code Section 65915(o)(6), before the application of a density bonus, using the maximum number of units allowed under a project site's applicable zoning ordinance, specific plan, or general plan land use designation, whichever is greater. If a range is permitted, the maximum number of units allowed by the specific zoning range, specific plan, or general plan land use designation shall be applicable when determining a Project site's density prior to the application of a density bonus. A Project in a P or PB zone shall calculate Maximum Allowable Residential Density using additional provisions pursuant to Subparagraph (2) of LAMC 12.22.A.39(e), and a Public Land Project shall calculate Maximum Allowable Residential Density using additional provisions pursuant to Subparagraph (3) of LAMC 12.22.A.39(e).

(3) **Calculating Restricted Affordable Units.** The required number of Restricted Affordable Units shall be calculated based on the Total Units of a Project.

(4) **Calculating a Density Bonus.** For the purposes of calculating a Density Bonus, the following shall apply:

- (i) Residential Units that comprise a Project shall be on contiguous lots, not separated by a street or alley, that are the subject of a single development application, but do not need to be based on an individual subdivision maps or lots.
- (ii) An applicant for a Project may always have the ability to apply a lesser percentage of Density Bonus, including but not limited to, no Density Bonus.

(5) Fractional Numbers.

- (i) Units. For the purposes of this Subdivision, calculations for the following resulting in fractional numbers shall be rounded up to the next whole number:
 - a. Maximum Allowable Residential Density
 - b. Density Bonus Units
 - c. Number of Restricted Affordable Units
 - d. Number of Replacement Housing Units
 - e. Vehicular Parking
 - f. Number of Multi-Bedroom Units provided pursuant to LAMC Section 12.22 A.39(g)(2)

(6) Replacement Housing Units and Demolition Protections. A Project approved under this subdivision must meet any applicable housing replacement requirements and demolition protections of California Government Code Section 65915(c)(3) and LAMC Section 16.60, as verified by the Los Angeles Housing Department (LAHD) prior to the issuance of a building permit. Replacement Housing Units required pursuant to this Subdivision may count towards any Restricted Affordable Unit requirements.

(7) Standards for Restricted Affordable Units. A Project must meet the applicable requirements regarding the size, location, amenities and allocation of Restricted Affordable Units in LAMC Section 16.61 B and C and in any Implementation Memorandum, Technical Bulletin or User Guide prepared and adopted by the Los Angeles Housing Department or Department of City Planning.

- (8) **Implementation Memorandums, FAQs, Forms/Applications and User Guides.** The Director may prepare Implementation Memorandums, FAQs, Forms/Applications and/or User Guides for State Density Bonus requirements, as set forth in California Government Code Sections 65915-65918, for the purpose of providing additional information pertaining to this Subdivision and maintaining consistency with State Density Bonus Law.
- (9) **Covenants.** Prior to the issuance of a building permit for any Project qualifying for a Density Bonus pursuant to the provisions of this Subdivision, covenants acceptable to the Los Angeles Housing Department and consistent with the requirements in this Subdivision and set forth in LAMC Section 16.61 shall be recorded with the Los Angeles County Recorder. For Shared Equity Projects covenants shall restrict the resale of the property to Community Land Trusts, Limited Equity Housing Cooperatives, Workforce Housing Cooperative Trusts, or nonprofit affordable housing corporations pursuant to Section 501(c)(3) of the United States Internal Revenue Code.
- (10) **Interpretation Consistent with State Density Bonus Law.** This Subdivision is intended to be interpreted as consistent with State Density Bonus Law contained in California Government Code Sections 65915-65918. If at any time, this Subdivision becomes inconsistent with California Government Code Sections 65915-65918, the provisions of State Density Bonus Law shall apply.
- (11) **Update Frequency.** The Director shall have the authority to issue updated eligibility maps on an annual basis in order to align with updated zoning and geographic data updates, including updates to Resource Areas as defined and identified by the California Tax Credit Allocation Committee (TCAC) and updates to the locations of Very Low Vehicle Travel Areas and Major Transit Stops.
- (12) **Adjoining Zone.** Refers to the zones of properties abutting, across the street or alley from, or having a common corner with, the subject property.
- (13) **Income Limits, For-sale Costs, and Rent Schedules.** Restricted Affordable Units required as part of a One Hundred Percent Affordable Housing Project, Public Land Project, Faith-Based Organization Project, or Shared Equity Project shall meet the income limit, for-sale cost and rent schedule requirements specified for these Projects in footnotes (1) (2) (3) and (4) of Table A.39(c)(2)(i).
- (14) **Story.** A story shall be defined as 11-feet in height.

(i) **Relationship to Other Sections of the Los Angeles Municipal Code.** The following provisions shall govern the relationship to other sections of the Los Angeles Municipal Code for any Project that meets the eligibility criteria established in Paragraph (c) of this Subdivision.

- (1) A Project that meets the eligibility criteria established in Paragraph (c) and complies with the Procedures established in Paragraph (d) may exceed the use limitations that may apply to a Project site.
- (2) If any of the Procedures described in Paragraph (d), Base Incentives described in Paragraph (e), Additional Incentives described in Paragraph (f), Public Benefit Options described in Paragraph (g), or waivers requested pursuant to LAMC Section 12.22 A.39(d)(2) or LAMC Section 12.22 A.39(d)(4) conflict with those of any otherwise applicable specific plan, overlay, supplemental use district, “Q” condition, “D” limitation, or citywide regulation established in Chapter 1 of this Code, including but not limited to the Ordinance Nos. listed below, this Subdivision shall prevail.

- (i) Alameda District Specific Plan (171,139)
- (ii) Avenue 57 Transit Oriented District (174,663)
- (iii) Bunker Hill Specific Plan (182,576)
- (iv) Century City North Specific Plan (156,122)
- (v) Century City West Specific Plan (186,370)
- (vi) Century City South Specific Plan (168,862)
- (vii) Coastal Bluffs Specific Plan (170,046)
- (viii) Coliseum District Specific Plan (185,042)
- (ix) Colorado Boulevard Specific Plan (178,098)
- (x) Cornfield Arroyo Seco Specific Plan (182,617)
- (xi) Crenshaw Corridor Specific Plan (184,795)
- (xii) Devonshire/Topanga Corridor Specific Plan (168,937)
- (xiii) Exposition Corridor Transit Neighborhood Plan (186,402)
- (xiv) Foothill Boulevard Corridor Specific Plan (170,694)
- (xv) Girard Tract Specific Plan (170,774)
- (xvi) Glencoe/Maxella Specific Plan (171,946)
- (xvii) Granada Hills Specific Plan (184,296)
- (xviii) Hollywoodland Specific Plan (168,121)
- (xix) Jordan Downs Urban Village Specific Plan (184,346)
- (xx) Los Angeles Airport/El Segundo Dunes Specific Plan (167,940)
- (xxi) Los Angeles International (LAX) Specific Plan (185,164)
- (xxii) Los Angeles Sports and Entertainment District Specific Plan (181,334)
- (xxiii) Loyola Marymount University Specific Plan (181,605)
- (xxiv) Mt. Washington/Glassell Park Specific Plan (168,707)
- (xxv) Mulholland Scenic Parkway Specific Plan (167,943)
- (xxvi) North Westwood Village Specific Plan (163,202)

- (xxvii) Oxford Triangle Specific Plan (170,155)
- (xxviii) Pacific Palisades Commercial Village and Neighborhood Specific Plan (184,371)
- (xxix) Paramount Pictures Specific Plan (184,539)
- (xxx) Park Mile Specific Plan (162,530)
- (xxxi) Playa Vista Area D Specific Plan (176,235)
- (xxxii) Ponte Vista at San Pedro Specific Plan (182,937 and 182,939)
- (xxxiii) Porter Ranch Land Use/Transportation Specific Plan (180,083)
- (xxxiv) Redevelopment Plans (186,325)
- (xxxv) San Vicente Scenic Corridor Specific Plan (173,381)
- (xxxvi) University of Southern California University Park Campus Specific Plan (182,343)
- (xxxvii) Valley Village Specific Plan (168,613)
- (xxxviii) Venice Coastal Zone Specific Plan (175,693)
- (xxxix) Ventura-Cahuenga Boulevard Corridor Specific Plan (174,052)
- (xl) Vermont/Western Transit Oriented District Specific Plan (Station Neighborhood Area Plan) (173,749)
- (xli) Warner Center 2035 Plan (182,766)
- (xlii) Westwood Community Multi-Family Specific Plan (163,203 and 163,186)
- (xlili) Westwood Village Specific Plan, Westwood Community Design Review Board Specific Plan (187,644)
- (xliv) Wilshire - Westwood Scenic Corridor Specific Plan (155,044)

(j) **Interpretations Consistent with State Density Bonus Law.** This Subdivision is intended to be interpreted as consistent with State Density Bonus Law contained in California Government Code Sections 65915-65918. If at any time, this Subdivision becomes inconsistent with California Government Code Sections 65915-65918, the provisions of State Density Bonus Law shall apply.

Section 9. Subdivision 26 of Subsection U of Section 12.24 of the Los Angeles Municipal Code is amended as follows:

Density Bonus for a Housing Development in Which the Density Increase Is Greater than the Maximum Permitted in Section ~~12.22 A.25~~ 12.22 A.37. (Amended by Ord. No. 185,373, Eff. 2/26/18.)

(a) In addition to the findings set forth in LAMC Section 13B.2.3. (Class 3 Conditional Use Permit) of Chapter 1A of this Code, the City Planning Commission shall find that:

(1) the project is consistent with and implements the affordable housing provisions of the Housing Element of the General Plan;

(2) the project contains the requisite number of Restricted Affordable Units ~~sufficient to qualify for a 88.75% or 100% Density Bonus pursuant to ~~12.22 A.37~~~~, based on the number of Residential Units units permitted by the maximum allowable density provided, excluding Residential Units added by a Density Bonus, on the date of application, as follows:

(i) ~~a. 25~~ 44% Very Low Income Units for a 88.75 ~~35~~% density increase; or

(ii) ~~b. 24~~ 20% Low Income Units for a 50 ~~35~~% density increase; or

(iii) ~~c. 44~~ 40% Moderate Income Units for a 50 ~~35~~% density increase in for-sale projects.

The project may then be granted an additional Density Bonus ~~density increases~~ beyond 50 ~~100~~ ~~35~~% or 88.75% by providing additional affordable housing units in the following manner:

~~a.—d.~~ (iv) For every additional 1% set aside of Very Low Income Units, the project is granted an additional 2.5% density increase; or

~~b.—e.~~ (v) For every additional 1% set aside of Low Income Units, the project is granted an additional 1.5% density increase; or

- e.— f.— (vi) For every additional 1% set aside of Moderate Income Units in for-sale projects, the project is granted an additional 1% density increase; or
- d.—g.— (vii) In calculating the density increase and Restricted Affordable Units, each component of any density calculation, including the calculation of Maximum Allowable Residential Density, base density and bonus density, resulting in fractional units shall be separately rounded up to the next whole number.
- (3) the project meets any applicable dwelling unit replacement requirements and demolition protections of California Government Code Section 65915(c)(3) and LAMC Section 16.60 as verified by the Los Angeles Housing Department (LAHD). Replacement housing units required pursuant to these sections may count towards any On-Site Restricted Affordable Unit requirement;
- (4) the project meets the requirements for projects including affordable housing in LAMC Section 16.61 B and C.
- (5) ~~(4)~~ the project's Restricted Affordable Units are subject to a recorded affordability restriction of 55 years or 99 years longer pursuant to LAMC Section 16.61 A from the issuance of the Certificate of Occupancy, recorded in a covenant acceptable to the Los Angeles Housing Department, and subject to fees as set forth in Section 19.14 of the Los Angeles Municipal Code; and **(Amended by Ord. No. 187,122, Eff. 8/8/21.)**
- ~~—(5)— the project addresses the policies and standards contained in the City Planning Commission's Affordable Housing Incentives Guidelines.~~

Section 10. Paragraph e of Subdivision 3 of Subsection E of Section 13.09 of the Los Angeles Municipal Code is modified to read as follows:

- e. Affordable Housing. The transit facility and Central Parking Structure incentives set forth above shall not be combined with the parking reduction provided for affordable housing as set forth in Section ~~42.22 A.25(d)(2)~~ 12.22 A.37, 12.22 A.38, or 12.22 A.39.

Section 11. Subdivision 1 of Subsection E of Section 13.15 of the Los Angeles Municipal Code is modified to read as follows:

1. An MPR District shall not authorize any of the strategies listed above, except for the strategies described in subsections D.5. and D.6., for any lot that contained a residential use subject to the Rent Stabilization Ordinance, or that contained any Restricted Affordable units, ~~as defined in Section 12.22 A.25.(b) of the Code,~~ within the five years preceding the adoption of the MPR District. Required parking on such properties, however, may be reduced pursuant to ~~Section 12.22 A.25.~~ 12.22 A.37, 12.22 A.38, or 12.22 A.39. of the Code, or pursuant to any other applicable affordable housing incentive program.

Section 12. Subdivision 2 of Subsection E of Section 13.15 of the Los Angeles Municipal Code is modified to read as follows:

2. Minimum parking requirements for multi-residential uses in an MPR district shall be less restrictive for projects that qualify for a density bonus under ~~Section 12.22 A.25~~ 12.22 A.37, 12.22 A.38, or 12.22 A.39. of the Code.

Section 13. Subdivision 2 of Subsection A of Section 14.00 of the Los Angeles Municipal Code is modified to read as follows:

2. Density increase for a Housing Development to provide for additional density in excess of that permitted in ~~Section 12.22 A.25~~ 12.22 A.37, 12.22 A.38, or 12.22 A.39. (Subdivision Title Amended by Ord. No. 179,681, Eff. 4/15/08.)

Section 14. Sub-subparagraph i of Subparagraph 4 of Paragraph d of Subdivision 10 of Subsection A of Section 14.00 of the Los Angeles Municipal Code is modified to read as follows:

i. Parking may be recalculated for all units in the project (not just the restricted units) using ~~Parking Option 1 in LAMC Section 12.22 A.25(d) Table 12.22 A.37(e)(2)(iii) in~~ Section 12.22 A.37.

Section 15. Sub-subparagraph ii of Subparagraph 4 of Paragraph d of Subdivision 10 of Subsection A of Section 14.00 of the Los Angeles Municipal Code is modified to read as follows:

ii. Parking may be calculated by maintaining all existing parking and providing additional parking just for the newly legalized unit(s) in accordance with ~~Parking Option 2 in LAMC Section 12.22 A.25(d) Table 12.22 A.37(e)(2)(iii) in Section 12.22 A.37~~ as long as one Restricted Affordable Unit or dwelling unit for Low Income individuals who are 62 years of age or more, or who has a physical or mental impairment that limits one or more major life activities is provided for each legalized unit; or

Section 16. Subparagraph 1 of Paragraph b of Subdivision 13 of Subsection A of Section 14.00 of the Los Angeles Municipal Code is modified to read as follows:

1. Other Affordable Housing Incentive Programs. Except as described in Paragraph (f), applicants for other affordable housing incentive programs, including, but not limited to, the Floor Area Bonus for the Greater Downtown Housing Incentive Area in Section 12.22 A.29.; the Density Bonus provisions in Section ~~12.22 A.25~~ 12.22 A.37, 12.22 A.38, 12.22 A.39.; the Transit Oriented Communities Affordable Housing Incentive Program in Section 12.22 A.31.; or affordable housing incentive provisions in Community Plan Implementation Overlays (CPIOs) ~~community plan implementation overlays (CIPOs)~~, shall not also be eligible for a Qualified Permanent Supportive Housing Project approval at the same location.

Section 17. Sub-subparagraph ii of Subparagraph 2 of Paragraph d of Subdivision 13 of Subsection A of Section 14.00 of the Los Angeles Municipal Code is modified to read as follows:

ii. For Qualified Permanent Supportive Housing Projects located within one-half (1/2) mile of a ~~Transit Stop~~ Rapid Bus, as defined in Section 12.22 A.38(b) ~~Section 12.22 A.25(b)~~, High Quality Transit Service, or of a Major Transit Stop as defined in Section 21155(b) of the Public Resources Code, no more than one-half (1/2) parking space shall be required for each income-restricted Dwelling Unit or Guest Room not occupied by the Target Population. Otherwise, no more than one (1) parking space shall be required for each income-restricted Dwelling Unit or Guest Room not occupied by the Target Population.

Section 18. Paragraph f of Subdivision 13 of Subsection A of Section 14.00 of the Los Angeles Municipal Code modified to read as follows:

f. Request for Additional Waivers. The City may not apply a development standard that will physically preclude the construction of the Qualified Permanent Supportive Housing Project. Applicants may request additional waivers pursuant to the discretionary review procedures described in Section ~~12.22 A.25(g)(3)~~ 12.22 A.37(d)(3) of this Code. The applicant shall not be required to provide a pro forma or other documentation to show

that the waiver or modification of any development standard(s) is needed in order to make the Qualified Permanent Supportive Housing Project economically feasible, but must provide reasonable documentation of its eligibility for the requested waiver. Additional waivers shall not be used to exempt compliance with the performance standards described in Paragraph (g).

Section 19. Subdivision 5 of Subsection A of Section 14.5.4 of the Los Angeles Municipal Code is modified to read as follows:

5. Residential Projects that exceed the number of dwelling units or Floor Area permitted by the zoning or the Community Plan as a result of a density or Floor Area bonus received pursuant to Sections ~~12.22 A.25, 12.22 A.37, 12.22 A.38, 12.22 A.39, 12.22 A.29.~~, 12.24 U.26. or 12.24 U.27. of this Code.

Section 20. Subdivision 4 of Subsection B of Section 14.5.4 of the Los Angeles Municipal Code is modified to read as follows:

4. Residential Projects that exceed the number of dwelling units or Floor Area permitted by the zoning or the Community Plan as a result of a density or Floor Area bonus received pursuant to Sections ~~12.22 A.25, 12.22 A.37, 12.22 A.38, 12.22 A.39.~~, 12.22 A.29., 12.24 U.26. or 12.24 U.27. of this Code.

Section 21. Subdivision 11 of Subsection D of Section 16.05 of the Los Angeles Municipal Code is added to read as follows:

11. A Housing Development that provides Restricted Affordable Units consistent with the affordability requirements set forth in LAMC Section 19.18 B.2(b) in lieu of the Linkage Fee that may otherwise be required pursuant to LAMC Section 19.18.

Section 22. Subsection M of Section 19.01 of the Los Angeles Municipal code is modified to read as follows:

Type of Application	Base Fee*
<p>Application for a Density Bonus <u>in conjunction with:</u> <u>Up to one waiver of a development standard under the Mixed Income Incentive Program; or</u> <u>Up to three waivers of a development standard under the Affordable Housing Incentive Program including a request for one or more Incentives included in the Menu of Incentives</u> (Section 12.22 A.25.(g)(2)Section 12.22 A.38(d)(3); Section 12.22 A.39(d)(3); Section 13B.2.5.)</p>	\$9,459
<p>Application for a Density Bonus <u>in conjunction with:</u> <u>Waivers under the State Density Bonus Program;</u> <u>More than one waiver under the Mixed Income Incentive Program; or</u> <u>More than three waivers under the Affordable Housing Incentive Program including a request for one or more Incentives not included in the Menu of Incentives</u> (Section 12.22 A.25.(g)(3)Section 12.22 A.37(d)(3); Section 12.22 A.38(d)(4); Section 12.22 A.39(d)(4); Section 13B.2.3.)</p>	\$24,349
<p>Application for a Density Bonus in excess of that permitted by Section 12.22 A.3725. (Section 12.24 U.26.; Section 13B.2.3)</p>	\$24,359

Section 23. Subsection A of Section 19.14 of the Los Angeles Municipal Code is modified to read as follows:

A. Unless a fee Exemption pursuant to Section 19.14(b) applies, the following fees shall be charged and collected by the Los Angeles Housing Department (Department) for the preparation, enforcement, monitoring, and associated work relating to the affordable housing covenants ~~described in Sections 12.22 A.25(h)(1) through (3), required by~~ Sections 12.22 A.37, 12.22 A.38, 12.22 A.39, 12.22 A.29.(d)(1) through (2), and 14.00 A.10.(c)(2) of this Code. (Amended by Ord. No. 187,122, Eff. 8/8/21.)

Section 24. Paragraph b of Subdivision 2 of Subsection C of Section 19.18 of the Los Angeles Municipal Code is modified to read as follows:

b. Any for-sale or rental housing development containing restricted affordable units where at least 40% of the total units or guest rooms are dedicated for moderate income households, or at least 20% of the total units or guest rooms are dedicated for low income households, or at least 11% of the total units or guest rooms are dedicated for very low income households, or at least 8% of the total units or guest rooms are

dedicated for extremely low income households, for at least 55 years, where a covenant has been made with the Los Angeles Housing Department and required covenant and monitoring fees have been paid, or any Mixed Income Incentive Project consistent with LAMC Section 12.22 A.38. Such a covenant shall also subject projects using this exemption to the replacement policies in Government Code Section 65915(c)(3), as that section may be amended from time to time, and to LAHD fees related to housing replacement determinations pursuant to state law, as set forth in this Code. For the purposes of this section, total units includes any units added by a density bonus or other land use incentive, consistent with the affordability levels defined in Government Code Section 65915, as that section may be amended from time to time.

Section 25. Paragraph b of Subdivision 4 of Subsection C of Section 19.18 of the Los Angeles Municipal Code is modified to read as follows:

b. Affordable Housing Units. Any Restricted Affordable Units ~~as defined in Section 12.22 A.25 of this Code~~ may be subtracted from the total number of dwelling units or guest rooms in a building in determining the required Linkage Fee.

Section 26. Part 2B and Part 2C of Article 2 (Form) of Chapter 1A of the Los Angeles Municipal Code are amended as follows:

[Language in Development. Intent: Provide revisions to Part 2B and Part 2C of Article 2 (Form)]

Section 27. Sections 8.1.1, 8.2.2, 8.2.3, 8.2.5, 8.2.6, 8.2.7, and 8.2.8 of Article 8 (Specific Plans, Supplemental and Special Districts) of Chapter 1A of the Los Angeles Municipal Code are amended as follows:

[Language in Development. Intent: Provide revisions to 8.1.1, 8.2.2, 8.2.3, 8.2.5, 8.2.6, 8.2.7, and 8.2.8 of Article 8 (Specific Plans, Supplemental and Special Districts)]

Section 28. Sections 9.2.1, 9.3.1, 9.3.2, 9.3.3, and 9.4.1 of Article 9 (Public Benefit Programs) of Chapter 1A of the Los Angeles Municipal Code are amended to read as follows:

[Language in Development. Intent: Provide revisions to Sections 9.2.1, 9.3.1, 9.3.2, 9.3.3, and 9.4.1 of Article 9 (Public Benefit Programs)]

Section 29. Section 13B.3.2. Expanded Administrative Review within Division 13B.3. of Part B. of the Table of Contents of Article 13 of Chapter 1A of the Los Angeles Municipal Code is added as follows:

Section 33. Paragraph (C) of Section 13A.2.7. (Scope of Decision) of Article 13 (Administration) of Chapter 1A of the Los Angeles Municipal Code is amended as follows:

C. Utilizing the Grant

1. A discretionary project approval is considered utilized after it has been effectuated by the Department of City Planning and a building permit has been issued by the Department of Building and Safety. Utilization of a grant must occur no later than 3 years from the last date an action can be effectuated. An approval not requiring building permits from the Department of Building and Safety is considered utilized when compliance with all conditions of approval have been demonstrated, appropriate fees paid, plans stamped and authorization has been obtained from the Department of City Planning.
2. Exceptions
 - a. Religious and Institutional Uses
Where a lot or lots have been approved for use as a governmental enterprise, religious use, hospital, educational institution or private school,

including elementary and high schools, no time limit to utilize the privileges shall apply provided that all of the following conditions are met:

- i. The property involved is acquired or legal proceedings for its acquisition are commenced within one year of the effective date of the decision approving the conditional use.
 - ii. A sign is immediately placed on the property indicating its ownership and the purpose to which it is to be developed, as soon as legally possible after the effective date of the decision approving the conditional use. This sign shall have a surface area of at least 20 square feet.
 - iii. The sign is maintained on the property and in good condition until the conditional use privileges are utilized.
- b. Affordable Housing Projects
A six-year time limit to utilize the privileges shall apply where a lot or lots have been approved for housing that includes 100% restricted Affordable Units, exclusive of a manager's unit or units, as defined in ~~Sec. 12.22 A.25(b) (Exceptions: Affordable Housing Incentives – Density Bonus; Definitions)~~ *Sec. 12.03 (Definitions) of Chapter 1 (General Provisions and Zoning)* of this Code.

Section 34. Paragraph (D) of Section 13B.2.1 (Class 1 Conditional Use Permit) of Article 13 (Administration) of Chapter 1A of the Los Angeles Municipal Code is amended as follows:

DG. Decision

1. General Procedures
See *Sec. 13A.2.5. (Decisions)*.
2. Decision Maker
The Zoning Administrator is the initial decision maker.
3. Public Hearing
 - a. The Zoning Administrator shall set the matter for public hearing, giving notice in the manner specified in Subsection C. (Notice) of this Section.
 - b. The Zoning Administrator may conduct the hearing or designate a Hearing Officer to conduct the hearing.
4. Decision
 - a. The Zoning Administrator shall render the initial decision within 75 days of the date the application is deemed complete.
 - b. If the Zoning Administrator fails to make a timely decision, the applicant may file a request for transfer of jurisdiction to the Area Planning Commission pursuant to *Sec. 13A.2.6. (Transfer of Jurisdiction)*.

5. Conditions of Approval and inspections

- a. In approving a project, the decision maker may impose conditions related to the interests addressed in the findings set forth in Subsection E. (Standards for Review and Required Findings) of this Section.
- b. The decision may state that the height and area regulations required by other provisions of this Chapter and *Chapter 1 (General Provisions and Zoning)* shall not apply to the conditional use approved. ~~If the Density Bonus is increased beyond the maximum allowed as defined in Sec. 12.22 A.37 (State Density Bonus Program), the development project must also contain the requisite number of Restricted Affordable Units as set forth in Sec. 12.24 U.26. (a)(1) – (5) (Density Bonus for a Housing Development in Which the Density increase is Greater than the Maximum Permitted in Sec. 12.22 A.3725) of this Code.~~
- c. The Department shall have the authority to conduct inspections to verify compliance with any and all conditions imposed on any conditional use or other similar Quasi-judicial approval granted pursuant to this Section. Clearance, monitoring and inspection fees shall be paid by the business operator or property owner to the Department in accordance with the fee schedule in *Article 9 (Fees) of Chapter 1 (General Provisions and Zoning)*.
- d. If, upon inspection, the Department finds that the applicant has failed to comply with conditions of any conditional use or other similar Quasi-judicial approval granted pursuant to this Section, the Department shall give notice to the business operator or property owner to correct the specific deficiencies and the time in which to complete the correction. Evidence of compliance shall be submitted to the Department within the specified correction period. If the deficiencies are not corrected within the time prescribed by the Department, revocation proceedings pursuant to *Sec. 13B.6.1. (Evaluation of Non-Compliance)* or *Sec. 13B.6.2. (Nuisance Abatement/Revocation)* may commence.

Section 35. Paragraph (D) of Section 13B.2.2 (Class 2 Conditional Use Permit) of Article 13 (Administration) of Chapter 1A of the Los Angeles Municipal Code is amended as follows:

D. Decision

1. General Procedures

See *Sec. 13A.2.5. (Decisions)*.

2. Decision Maker

The Zoning Administrator is the initial decision maker.

3. Public Hearing

- a. Upon receipt of a complete application, the Zoning Administrator shall set the matter for public hearing, giving notice in the manner specified in Subsection C. (Notice) of this Section.
- b. The Zoning Administrator may conduct the hearing or designate a Hearing Officer to conduct the hearing.

4. Decision

- a. The Zoning Administrator shall render the initial decision within 75 days of the date the application is deemed complete.
- b. If the Zoning Administrator fails to make a timely decision, the applicant may file a request for transfer of jurisdiction to the Area Planning Commission pursuant to *Sec. 13A.2.6. (Transfer of Jurisdiction)*.

5. Conditions of Approval and inspections

- a. In approving a project, the decision maker may impose conditions related to the interests addressed in the findings set forth in Subsection E. (Standards for Review and Required Findings) of this Section.
- b. The decision may state that the height and area regulations required by other provisions of this Chapter and *Chapter 1 (General Provisions and Zoning)* shall not apply to the conditional use approved. ~~If the Density Bonus is increased beyond the maximum allowed as defined in Sec. 12.22 A.37 (Affordable Housing incentives – Density Bonus), the development project must also contain the requisite number of Restricted Affordable Units as set forth in Sec. 12.24 U.26. (a)(1) – (5) (Density Bonus for a Housing Development in Which the Density increase is Greater than the Maximum Permitted in Sec. 12.22 A.3725) of this Code.~~
- c. The Department shall have the authority to conduct inspections to verify compliance with any and all conditions imposed on any conditional use or other similar Quasi-judicial approval granted pursuant to this Section.

Clearance, monitoring and inspection fees shall be paid by the business operator or property owner to the Department in accordance with the fee schedule in *Article 9 (Fees) of Chapter 1 (General Provisions and Zoning)*.

- d. If, upon inspection, the Department finds that the applicant has failed to comply with conditions of any conditional use or other similar Quasi-judicial approval granted pursuant to this Section, the Department shall give notice to the business operator or property owner to correct the specific deficiencies and the time in which to complete the correction. Evidence of compliance shall be submitted to the Department within the specified correction period. If the deficiencies are not corrected within the time prescribed by the Department, revocation proceedings pursuant to *Sec. 13B.6.1. (Evaluation of Non-Compliance)* or *Sec. 13B.6.2. (Nuisance Abatement/Revocation)* may commence.

6. Transmittal

The Zoning Administrator shall transmit a copy of the written findings and decision to the applicant, to all owners of properties abutting, across the street or alley from, or having a common corner with, the subject property and all persons who filed a written request for the notice with the Zoning Administrator.

Section 36. Paragraph (D) of Section 13B.2.3 (Class 3 Conditional Use Permit) of Article 13 (Administration) of Chapter 1A of the Los Angeles Municipal Code is amended as follows:

D. Decision

1. General Procedures

See *Sec. 13A.2.5. (Decisions)*.

2. Decision Maker

The City Planning Commission is the initial decision maker.

3. Public Hearing

- a. Upon receipt of a complete application, the City Planning Commission shall set the matter for public hearing, giving notice in the manner specified in Subsection C. (Notice) of this Section.
- b. The City Planning Commission may conduct the hearing itself or designate the Director to conduct the hearing.

4. Decision

- a. If the Director conducts the public hearing, the Director shall transmit its findings and recommendation to the City Planning Commission.

- b. After the Director or City Planning Commission's hearing is closed, the City Planning Commission shall render the initial decision at a public meeting.
 - c. The City Planning Commission shall render the initial decision within 75 days of the date the application is deemed complete.
 - d. If the City Planning Commission fails to make a timely decision, the applicant may file a request for transfer of jurisdiction to the City Council pursuant to *Sec. 13A.2.6. (Multiple Approvals)*.
5. Conditions of Approval and inspections
- a. In approving a project, the decision maker may impose conditions related to the interests addressed in the findings set forth in Subsection E. (Standards for Review and Required Findings) of this Section.
 - b. The decision may state that the height and area regulations required by other provisions of this Chapter and *Chapter 1 (General Provisions and Zoning)* shall not apply to the conditional use approved. If the Density Bonus is increased beyond the maximum allowed as defined in ~~Sec. 12.22 A. 25 (Affordable Housing Incentives – Density Bonus)~~, Sec. 12.22 A.37 (State Density Bonus Program), the development project must also contain the requisite number of Restricted Affordable Units as set forth in *Sec. 12.24 U.26. (a)(1) - (5) (Density Bonus for a Housing Development in Which the Density Increase is Greater than the Maximum Permitted in Sec. 12.22 A.2537)* of this Code.
 - c. The Department shall have the authority to conduct inspections to verify compliance with any and all conditions imposed on any conditional use or other similar Quasi-judicial approval granted pursuant to this Section. Clearance, monitoring, and inspection fees shall be paid by the business operator or property owner to the Department in accordance with the fee schedule in *Article 9 (Fees) of Chapter 1 (General Provisions and Zoning)*.
 - d. If, upon inspection, the Department finds that the applicant has failed to comply with conditions of any conditional use or other similar Quasi-judicial approval granted pursuant to this Section, the Department shall give notice to the business operator or property owner to correct the specific deficiencies and the time in which to complete the correction. Evidence of compliance shall be submitted to the Department within the specified correction period. If the deficiencies are not corrected within the time prescribed by the Department, revocation proceedings pursuant to *Sec. 13B.6.1. (Evaluation of Non-Compliance)* or *Sec. 13B.6.2. (Nuisance Abatement/Revocation)* may commence.

6. Transmittal

The City Planning Commission shall transmit a copy of the written findings and decision to the applicant, to all owners of properties abutting, across the street or alley from, or having a common corner with the subject property and all persons who filed a written request for the notice.

Section 37. Paragraph (G) of Section 13B.2.5 of Chapter 1A of the Los Angeles Municipal Code is amended as follows:

G. Appeals

1. General Procedures

See Sec. 13A.2.8. (Appeals).

2. Decision Maker

a. The Area Planning Commission is the appellate decision maker.

b. ~~On-Menu Density Bonus~~ Density Bonus

The City Planning Commission is the appellate decision maker for projects seeking approval pursuant to Sec. 12.22 A.37(d)(5)(iii) (State Density Bonus Program), Sec. 12.22 A.38(d)(3) (Mixed Income Incentive Program), or Sec. 12.22 A.39(d)(3) (Affordable Housing Incentive Program) ~~(Sec. 12.22 A.25. (Affordable Housing Incentives — Density Bonus))~~ of Chapter 1 (General Provisions and Zoning).

3. Filing

a. An applicant or any other person aggrieved by the Director's decision may file an appeal.

b. ~~On-Menu Density Bonus~~ Density Bonus

An applicant or any owner or tenant of a property abutting, across the street or alley from, or having a common corner with the subject property aggrieved by the Director's decision may file an appeal on projects seeking approval pursuant to Sec. 12.22 A.37(d)(5)(iii) (State Density Bonus Program), Sec. 12.22 A.38(d)(3) (Mixed Income Incentive Program), or Sec. 12.22 A.39(d)(3) (Affordable Housing Incentive Program) ~~Sec. 12.22 A.25. (Affordable Housing Incentives — Density Bonus)~~ of Chapter 1 (General Provisions and Zoning).

4. Appellate Decision

a. Before acting on any appeal, the Area Planning Commission shall set the matter for hearing, giving notice in the manner specified in Subsection C. (Notice) of this Section.

- b. The Area Planning Commission shall act within 75 days after the expiration of the appeal period.

5. Exception

- a. When the application is filed as part of a project requiring multiple approvals, the appeals procedures set forth in LAMC Section 13A.2.10. (Multiple Approvals) of this Code shall govern.
- b. When the application is filed in conjunction with a Parcel Map and no other approval, the appeals procedures set forth in LAMC Section 13B.7.8. (Subdivision Appeal) of this Code shall govern.
- c. When the application is filed in conjunction with a Tentative Map and no other approval, the appeals procedures set forth in LAMC Section 13B.7.3.G. (Tentative Tract Map; Appeals) of this Code shall govern, provided that such applications shall only be appealable to the Appeal Board, as defined in Div. 13C.1. (Administration Definitions) of this Code, and shall not be subject to further appeal to the City's legislative body.

Section 38. A new Section 2. is added to Division 13B.3. of Article 13 (Administration) of Chapter 1A of the Los Angeles Municipal Code as follows:

A. Applicability

1. This Section applies where any provision of this Code requires an Expanded Administrative Review.

B. Initiation

1. An application for an Expanded Administrative Review is filed with the Department.
2. An Expanded Administrative Review is initiated as required in order to obtain a building permit.

C. Notice

1. Notice of Public Hearing

The following notice is required for the public informational hearing on the decision, if held.

Type of Notice	When	Where/To Whom/Additional Requirements
Mail	24 days	<ul style="list-style-type: none"> • The applicant; • The owner(s) of the property involved; • The owners and tenants of all property within 300 feet of the boundary of the subject site; • The Certified Neighborhood Council representing the area in which the property is located; and • Interested parties who have requested in writing to be notified
Posting	10 days	<ul style="list-style-type: none"> • The applicant will post notice in a conspicuous place on the property

D. Review

1. The Department shall determine compliance with the applicable regulations and standards for projects requiring an Administrative Review.

2. Clearance

Clearance shall be issued as required pursuant to the applicable ordinance or building permit requirement.

3. Public Hearing

If the matter has a significant effect on neighboring properties, or if required where any provision of this Code requires an Expanded Administrative Review and a public hearing, the Department may require a public hearing in the manner specified in Subsection C.

E. Criteria for Compliance Review

The Department shall review the application for compliance with the applicable regulations and standards of this Code or the applicable specific plan or overlay, including the zoning standards, established development standards, and any supplemental use regulations.

F. Scope of Action

After the Expanded Administrative Review determines that the application is in compliance with the applicable regulations and standards, the following actions must comply with the approved plans:

1. The erection, enlargement or maintenance of buildings;
2. Any development or construction work; or
3. Issuance of a grading, building, demolition, or change of use permit.

G. Appeals

There is no appeal.

H. Modification Procedures

1. Modifications Equal to or Less than 10%
 - a. Projects approved pursuant to this Section may seek a modification to modify conditions of approval for the original action prior to the issuance of the Certificate of Occupancy.
 - b. For purposes of this Section, a “modification” means any changes in the proposed physical development or related conditions of approval that were approved in the original action by no more than 10%.
 - c. A modification does not include the granting of any new rights or increased or additional incentives, nor does it include the granting of any new deviation from zoning regulations in this Chapter or Chapter 1 (General Provisions and Zoning).
 - d. An application for a Modification pursuant to this Section shall be filed with the Department before the original action expires and include development plans showing the requested modifications.
 - e. In approving a modification pursuant to this section, the Department shall review the application for compliance with the applicable regulations and standards of this Code or the applicable specific plan or overlay, including the zoning standards, established development standards, and any supplemental use regulations
2. Modifications Greater than 10%

Any request for a modification that exceeds the 10% limitation will not be processed as a modification of the original action under this Subdivision and shall instead require a filing of a new Expanded Administrative Review Application pursuant to this Section.

Section 39. Subsection B of Section 151.28 of Chapter 15 of the Los Angeles Municipal Code is modified to read as follows:

Units that are used to qualify for a density bonus pursuant to the provisions of either California Government Code Section 65915 or Los Angeles Municipal Code Section ~~12.22 A.25~~, 12.22 A.37, 12.22 A.38, or 12.22 A.39, or are used to satisfy any inclusionary zoning or replacement affordable housing requirement, or are used to qualify for any other public benefit or incentive, may be used to qualify as replacement affordable housing units pursuant to the provisions of this subsection.

Section 40. **SEVERABILITY.** If any portion, subsection, sentence, clause or phrase of this ordinance is for any reason held by a court of competent jurisdiction to be invalid such a decision shall not affect the validity of the remaining portions of this ordinance. The City Council hereby declares that it would have passed this ordinance and each portion or subsection, sentence, clause and phrase herein, irrespective of the fact that any one or more portions, subsections, sentences, clauses or phrases be declared invalid.

DRAFT

EXHIBIT A.2:
Resident Protections Ordinance

CPC-2023-7068-CA, CPC-2024-387-CA, CPC-2024-388-CA

For consideration by the City Planning Commission

September 26, 2024

ORDINANCE NO. _____

An ordinance amending Sections 12.03, 12.22, 12.24 of Article 2, Section 14.00 of Article 4, Sections 16.60 and 16.61 of Article 6.1, and Section 19.18 of Article 9 of Chapter 1 and Sections 51.31, 51.32, 51.33, 51.34 and 51.35 of Article 19 of Chapter 4 of the Los Angeles Municipal Code (LAMC), for the purpose of codifying housing replacement requirements, strengthening occupant protections, complying with state housing law and establishing reasonable regulations regarding affordable housing development for the protection of residents.

**THE PEOPLE OF THE CITY OF LOS ANGELES
DO ORDAIN AS FOLLOWS:**

Sec. 1. The following definitions are added to Section 12.03 of Article 2 of Chapter 1 of the LAMC in alphabetical order to read as follows:

Development Project includes any project involving the issuance of a City Planning application or building permit to allow the alteration of the size of or construction or demolition of any structure, or a change in the density or intensity of use of land consistent with how the term is used in Section 66300.6 of the California Government Code.

Housing Development Project has the same meaning as defined in paragraph (2) of subdivision (h) of California Government Code Section 65589.5, as amended from time to time, except that it also includes projects that involve no discretionary approvals and projects that include a proposal to construct a single dwelling unit

Protected Units means any of the following:

- (a) Residential dwelling units that are or were subject to a recorded covenant, ordinance, or law that restricts rents to levels affordable to persons and families of lower or very low income within the past five years.
- (b) Residential dwelling units that are or were subject to the Rent Stabilization Ordinance pursuant to Chapter XV of the LAMC, or any other form of rent or price control through a public entity's valid exercise of its police power within the past five years.
- (c) Residential dwelling units that are or were rented by lower or very low income households within the past five years.

- (d) Residential dwelling units that were withdrawn from rent or lease in accordance with the Ellis Act (Chapter 12.75 (commencing with Section 7060) of Division 7 of Title 1 of the California Government Code) within the past 10 years.

Replace has the same meaning as provided in subparagraphs (B) and (C) of paragraph (3) of subdivision (c) of Section 65915 of the California Government Code, as amended from time to time.

Sec. 2. Subparagraph (1) of Paragraph (d) of Subdivision 29. of Subsection A. of Section 12.22 of Article 2 of Chapter 1 of the LAMC is amended to read as follows:

- (1) For any project qualifying for a Floor Area Bonus that contains rental housing for Low, Very Low, Moderate or Workforce Income households, a covenant acceptable to the Los Angeles Housing Department shall be recorded with the Los Angeles County Recorder, guaranteeing that the affordability criteria will be observed for at least 55 or 99 ~~30~~ years pursuant to LAMC 16.61 A from the issuance of the Certificate of Occupancy or a longer period of time if required by the construction or mortgage financing assistance program, mortgage assistance program, or rental subsidy program. (Amended by Ord. No. 187,122, Eff. 8/8/21.)

Sec. 3. Subparagraph (1) of Paragraph (b) of Subdivision 31. of Subsection A. of Section 12.22 of Article 2 of Chapter 1 of the the LAMC is amended to read as follows:

- (1) A Housing Development located within a TOC Affordable Housing Incentive Area shall be eligible for TOC Incentives if it provides minimum required percentages of On-Site Restricted Affordable Units, meets any applicable replacement requirements of ~~California Government Code Section 65915(c)(3)~~ LAMC 16.60, and is...

Sec. 4. Subparagraph (1) of Paragraph (f) of Subdivision 31. of Subsection A. of Section 12.22 of Article 2 of Chapter 1 of the the LAMC is amended to read as follows:

- (1) For any Housing Development qualifying for a TOC Incentive that contains rental housing for Extremely Low, Very Low, or Lower Income households, a covenant acceptable to the Los Angeles Housing Department shall be recorded with the Los Angeles County Recorder, guaranteeing that the affordability criteria will be observed for 55 or 99 years pursuant to LAMC 16.61 A.

Sec. 5. Subparagraph (3) and (4) of Paragraph (a) of Subdivision 26. of Subsection U. of Section 12.24 of Article 2 of Chapter 1 of the the LAMC is amended to read as follows:

- (3) ...the project meets any applicable dwelling unit replacement requirements of ~~California Government Code Section 65915(c)(3)~~ LAMC Section 16.60;

(4) the project's Restricted Affordable Units are subject to a recorded affordability restriction of 55 or 99 years pursuant to LAMC 16.61 A from the issuance of the Certificate of Occupancy, recorded in a covenant acceptable to the Los Angeles Housing Department, and subject to fees as set forth in Section 19.14 of the Los Angeles Municipal Code; and (Amended by Ord. No. 187,122, Eff. 8/8/21.)

Sec. 6. Subparagraph (4) of Paragraph (a) of Subdivision 30. of Subsection U. of Section 12.24 of Article 2 of Chapter 1 of the the LAMC is amended to read as follows:

(d) the affordability of all reserved lower income dwelling units will continue for a minimum of 55 or 99 years pursuant to LAMC 16.61 A;

Sec. 7. Subparagraph (3) of Paragraph (c) of Subdivision 13. of Subsection A.. of Section 14.00 of Article 4 of Chapter 1 of the the LAMC is amended to read as follows:

(3) Projects shall meet any applicable dwelling unit replacement requirements of ~~California Government Code Section 65915(c)(3)~~ LAMC Section 16.60, or as thereafter amended, as verified by ~~LAHDCIDLA~~ and all applicable covenant and monitoring fees in Section 19.14 of this Code shall be paid by the applicant prior to the issuance of any building permit.

Sec. 8. Subparagraph (2) of Paragraph (c) of Subdivision 10. of Subsection A. of Section 14.00 of Article 4 of Chapter 1 of the the LAMC is amended to read as follows:

(2) ... guaranteeing that each required Restricted Affordable Unit shall be reserved and maintained for at least 55 or 99 years ~~from the issuance of the Certificate of Occupancy~~ pursuant to LAMC 16.61 A.

Sec. 9. A new Section 16.60 is added to Article 6.1 of Chapter 1 of the the LAMC as follows:

SEC. 16.60. DEMOLITION OF HOUSING UNITS

A. Development Projects that Result in the Demolition of Housing Units

1. **Purpose.** The purpose of this subdivision is to comply with state law and offer protections related to the demolition of housing units as part of Development Projects and to extend these requirements past their expiration date of January 1, 2030 for Housing Development Projects.

2. **Definitions.**

Affordable Housing Cost has the same meaning as defined in Section 50052.5 of the California Health and Safety Code as amended from time to time.

Affordable Rent has the same meaning as defined in Section 50053 of the California Health and Safety Code as amended from time to time.

Comparable Unit contains the same or greater number of existing bedrooms and bathrooms.

Equivalent Size means that the replacement units contain at least the same total number of bedrooms as the units being replaced.

3. **Approval of Housing Development Projects that Result in the Demolition of Housing Units.** Notwithstanding any law the City shall not approve any Housing Development Project that will require the demolition of occupied or vacant Protected Units, or that is located on a site where Protected Units were demolished in the previous five years, unless all of the following requirements are satisfied.

- (a) **Replacement of Existing or Demolished Protected Units.** The Housing Development Project shall Replace all existing Protected Units and Protected Units demolished on or after January 1, 2020 pursuant to the replacement requirements of California Government Code Section 65915(c)(3) consistent with the requirements included in this section. This is in addition to any requirements included in Section 151.28 (Ellis Act Provisions) of Article 1 of Chapter XV of the LAMC.

- (1) **Income Requirements.** Units occupied on the date of application shall be replaced with units at an Affordable Rent or Affordable Housing Cost to, and occupied by, persons and families in the same or lower income category as those households in occupancy based upon the units and incomes of those households in occupancy pursuant to California Government Code Section 65915(c)(3)(B)(i) inclusive of the following income categories: Low Income, Very Low Income, Extremely Low Income and Acutely Low Income. Units that have been demolished or vacated on the date of application shall be replaced with units at an Affordable Rent or Affordable Housing Cost based upon the highpoint in occupancy during the previous five years pursuant to California Government Code Section 65915(c)(3)(B)(ii).

- (i) **Replacement When Incomes Are Not Known.** If the incomes of the individuals and households are not known and unless otherwise demonstrated, the presumption in California Government Code Section 65915(c)(3)(B)(i)

regarding Lower Income Households shall be inclusive of the percentage of Extremely Low Income, Very Low Income and Low Income Households in the same proportion as their share of all renter households within the City of Los Angeles, as determined by the General Manager of the Los Angeles Housing Department utilizing the most recently available data from the United States Department of Housing and Urban Development's Comprehensive Housing Affordability Strategy database or equivalent census data disaggregated by tenure and income category.

(ii) **Replacement of Rent or Price Controlled Units.**

Notwithstanding LAMC 16.60 A.3(a)(1)(i) above, units subject to a form of rent or price control through a local government's valid exercise of its police power shall be replaced as follows:

(i) **In Higher Opportunity Areas and Moderate Opportunity Areas**, units deemed or presumed to be occupied by persons or families above the lower income category shall be replaced with low income units.

(ii) **In Lower Opportunity Areas**, with the units proportionate to the share of all lower income renter households within the City of Los Angeles described in LAMC 16.60 A.3(a)(1)(i) above.

(2) **Equivalent Size.** All replacement units must be Equivalent Size, and Development Projects shall contain at least the same total number of units and total aggregate number of bedrooms as the Protected Units being replaced. New units do not have to match bedroom configurations of demolished units, except when a tenant is exercising the right to return as defined in LAMC 16.60 A.3(b)(4).

(3) **Relationship to Other Affordability Requirements.** Any Protected Units replaced pursuant to this subparagraph shall be considered in determining whether the Housing Development Project satisfies the requirements of any state, local or federal requirement that requires, as a condition of the development of residential rental units, that the project provide a certain

percentage of residential rental units affordable to, and occupied by, households with incomes that do not exceed the limits for moderate-income, lower income, very low income, extremely low income, or acutely low income households, as specified in Sections 50063.5, 50079.5, 50093, 50105, and 50106 of the California Health and Safety Code.

(4) **Exceptions.** Notwithstanding the requirements above, the replacement requirements of this section shall not apply to the following:

- (i) A Housing Development Project that consists of a single residential unit on a site with a single Protected Unit.
- (ii) A Housing Development Project that complies with the requirements of LAMC Section 16.60 A.5(a).

(5) **Procedures.** Owners of a Housing Development Project subject to the above requirements must complete an application for a Replacement Unit Determination with the Los Angeles Housing Department (LAHD). Information provided by the owner and existing tenant(s), as well as information gathered by LAHD will be used to determine whether any Protected Units exist.

(b) **Existing Occupant Protections**

(1) **Right to Remain.** Any existing occupants shall be allowed to occupy their units until six months before the start of construction activities with proper notice, subject to Chapter 16 (commencing with Section 7260) of Division 7 of Title 1 of the California Government Code. The project proponent shall provide existing occupants with written notice of the planned demolition, the date they must vacate, and their rights under this section. Notice shall be provided at least six months in advance of the date that existing occupants must vacate plus additional extensions under state or local law that may require an additional notification period.

(2) **Right to Return if Demolition Does Not Proceed.** Any existing occupants that are required to leave their units shall be allowed to return to the same rental unit, or a Comparable Unit at their prior rental rate if the demolition does not proceed and the property is returned to the rental market. This right to return is in addition to any applicable requirement in Los Angeles Municipal Code

Section 151.27 (Ellis Act Provisions - Re-Rental Rights of Displaced Tenants) of Article 1 of Chapter XV.

(3) **Right to Relocation.** Occupants of Lower Income Households including Very Low Income and Extremely Low Income, shall be entitled to, and the owner shall pay, relocation benefits under this provision in the amounts set forth below when the occupant is displaced by the owner from their residence by a development project. The owner shall pay the relocation benefits required pursuant to this provision prior to the issuance of any demolition permit for the site.

- (i) For purposes of determining whether a tenant is displaced by a Development Project, the following actions shall constitute evidence of development:
 - a. Owner files for an entitlement or building permit for a Development Project requiring the demolition of an existing rental unit and the tenancy is or will be terminated as result; or
 - b. Owner applies for a Replacement Unit Determination and the tenancy is or will be terminated as a result; or
 - c. Owner serves a notice or otherwise seeks to terminate a tenancy or recover possession of a rental unit based upon one of the grounds under LAMC Sections 165.03 I(1) or (3) (Just Cause Evictions) of Article 5 of Chapter XVI, 151.09 A.10 (Evictions) of Article 1 of Chapter XV, 47.08 (Tenant Relocation Assistance Where Mobilehome Parks Are Changed to a Different Use) or 47.09 (Mobilehome Park Closure Impact Report) of Article 7 of Chapter IV requiring payment of relocation assistance that includes evidence of intent to develop the property.
- (ii) For occupants that are Lower Income Households including Very Low Income and Extremely Low Income households, who are displaced from their residence by a Development Project under the criteria set forth above, the relocation benefit shall be:

- a. Equal to the difference between the Section 8 Department Voucher Payment Standard and the rent affordable to that occupant's income level per Section 50053 of the California Health and Safety Code, multiplied by 42 months, plus estimated incidental moving costs. The amount for the Section 8 Department Voucher Payment Standard, the determination of the affordable rent per Section 50053 of the California Health and Safety Code, and the estimated incidental moving costs shall be determined upon the adoption of this ordinance, and then adjusted annually according to the Consumer Price Index – All Urban Consumers. For efficient implementation, the City will use a 2-bedroom standard since 2-bedrooms are the most common unit type in the City. For the year beginning July 1, 2025, and all subsequent years, the fee amounts shall be adjusted on an annual basis pursuant to the formula set forth in LAMC Section 151.06 D (Automatic Adjustments) of Article 1 of Chapter XV. The adjusted amount shall be rounded to the nearest \$50 increment.
 - b. If the occupant is entitled to a relocation benefit due to a termination of tenancy under the Los Angeles Municipal Code Sections 165.03 I(1) or (3) (Just Cause Evictions) of Article 5 of Chapter XVI, 151.09 A.10 (Evictions) of Article 1 of Chapter XV, 47.08 (Tenant Relocation Assistance Where Mobilehome Parks Are Changed to a Different Use) or 47.09 (Mobilehome Park Closure Impact Report) of Article 7 of Chapter IV, the payment shall be made in accordance with Los Angeles Municipal Code Section 151.09 G.1-2 (Evictions) of Article 1 of Chapter XV.
 - c. For mobile home park closures, at least the amount required by Government Code Section 65863.7.
- (iii) For occupants who are not Lower Income Households, relocation benefits shall be the amounts as applicable pursuant to Los Angeles Municipal Code Section 165.06 A (Just Cause Ordinance), 151.09 G (Rent Stabilization

Ordinance), Government Code 65863.7 (Mobile Home Closures) or for publicly funded projects the greater amount under either local city laws or under Chapter 16 (commencing with Section 7260) of Division 7 of Title 1 of the California Government Code.

- (iv) Under no circumstances shall a demolition permit be issued unless the Los Angeles Housing Department provides a written clearance to the Department of Building and Safety stating that the landlord has complied with the relocation assistance requirements of this section. The landlord shall provide proof of compliance with the relocation assistance requirements of this section to the Los Angeles Housing Department on a form provided by the Los Angeles Housing Department. The form shall be accompanied by a fee of \$45 per unit.

- (v) If an owner of residential real property has exercised its rights under Chapter 12.75 (commencing with Section 7060) of Division 7 of Title 1 of the California Government Code to withdraw the property from residential rent or lease or LAMC 165.03 I (1) or (3) (Just Cause Evictions) of Article 5 of Chapter XVI, and the owner did not state an intent to redevelop the property in its Notice of Intent to Withdraw; and the owner did not pay occupants of the property relocation payments consistent with LAMC 16.60 A.3(b)(3)(ii), above, and then within five years of submitting this Notice of Intent to Withdraw, the owner seeks to develop the property as demonstrated by actions described in LAMC 16.60 A.3(b)(3)(i), above, the following shall apply:
 - a. As a condition of the clearance of demolition or new construction permits, the applicant or the applicant's successor-in-interest shall be required to pay to the LAHD a fine equal to three times the relocation benefit amount that would have been paid under LAMC 16.60 A.3(b)(3)(ii), above where the income of the former occupants are known; where incomes of the former occupants are not known, the applicant shall be required to pay \$250,000 per displaced occupant household. The LAHD shall not clear a demolition or new construction permit until the

applicant complies with this section. The withholding of permits shall not apply to demolition permits or approvals that are necessary to comply with a Department of Building and Safety, LAHD, or other government order.

- i. **Notice Process.** When a owner seeks a demolition or new construction permit clearance from LAHD at a property where the owner may have misrepresented its intention to develop the property in its Notice of Intent to Withdraw, and it has not paid relocation benefits to tenants consistent with having displaced them for development, LAHD will provide written notice to the owner that the LAHD's clearance of the permits is conditioned on payment of the fine. The notice shall include the address of the property at issue, a copy of the owners Notice of Intent to Withdraw, the amount of the potential fine, and the process to appeal the imposition of the fine.
- ii. **Appeal Process.** The notice shall include a right to file an appeal within 30 calendar days of the notice of the condition to pay the fine which shall include the right to an administrative hearing.

Owners who file an appeal will be subject to an administrative fee to pay for the costs of the appeal. The amount will be the same amount as for appeals under LAMC Section 165.06.C (Relocation Assistance) of Article 5 of Chapter XVI.

After the hearing officer issues a decision in the administrative hearing, the owner will have a right to seek judicial review of the determination governed by California Code of Civil Procedure Section 1094.5. Under that provision, a petitioner may seek judicial review of any decision of the City pursuant to California Code of Civil Procedure Section 1094.5 only if the

petition for writ of mandate pursuant to that section is filed no later than the 90th day following the date on which the City's decision became final.

- b. Any Lower Income Household who is displaced as a result of a tenancy termination for the purpose of property development under Los Angeles Municipal Code Sections 165.03 I.(1) or (3) (Just Cause Evictions) of Article 5 of Chapter XVI, 151.09 A.10 (Evictions) of Article 1 of Chapter XV, 47.08 (Tenant Relocation Assistance Where Mobilehome Parks Are Changed to a Different Use) or 47.09 (Mobilehome Park Closure Impact Report) of Article 7 of Chapter IV, shall be entitled to relocation benefits under Section LAMC 16.60 A.3(b)(3)(ii)(a), above. The payment shall be made in accordance with Los Angeles Municipal Code Section 151.09.G.1-2 (Evictions) of Article 1 of Chapter XV.
- c. For the occupant who was in possession of their unit at the time the owner filed the Notice of Intent to Withdraw who seeks to pursue a private right action under LAMC Section 16.60 A.7, below, for causes of action arising out of 16.60 A.3(b)(3)(v) above, the cause of action shall accrue when the owner files for an entitlement, building permit, or Replacement Unit Determination to construct a Development Project.

(4) **Right to Return.** The developer shall provide the following to the existing occupants of any Protected Units that are lower income households and agree to this requirement on a form provided by the Los Angeles Housing Department:

- (i) A right of first refusal for a Comparable Unit available in the new housing development affordable to the household at their prior rental rate or an Affordable Rent or an Affordable Housing Cost, whichever is lower. In cases where the prior rental rate is used to establish the initial rent, subsequent rent increases for such tenants shall not exceed the allowable rent increase for rent stabilized units under LAMC Chapter XV (Rent Stabilization Ordinance), and this limitation shall be included in the covenant recorded for the

affordable replacement unit. In cases where one or more single family homes with four or more bedrooms are being replaced by a project that consists of two or more units, a Comparable Unit may have three bedrooms. This requirement shall not apply to any of the following:

- a. A Development Project that consists of a single residential unit located on a site where a single Protected Unit is being demolished.
- b. Units in a housing development in which 100 percent of the units, exclusive of a manager's unit or units, are reserved for Lower Income Households, except when Protected Units occupied by an occupant who qualifies for residence in the new development and for whom providing a Comparable Unit would not be precluded due to unit size limitations or other requirements of any funding source of the housing development, as determined by the Los Angeles Housing Department.
- c. A Development Project that meets all of the criteria in 16.60 A.4(a)(1).

(5) Additional Tenant Notification Obligations.

- (i) Project applicants shall notify existing tenants in writing of all their legal rights under LAMC Section 16.60 A.3(b). Information regarding the tenant's eligibility for these rights, rent guidelines for the new unit, and any procedures the tenant will need to follow to exercise these rights shall be provided in writing to the tenant in accordance with any and all requirements and procedures of LAHD's Replacement Unit Determination (RUD). The applicant shall provide and maintain accurate contact information to tenants for purposes of communicating throughout the construction and lease up of the Development Project.
- (ii) Project applicants or their predecessor-in-interest shall provide written notice to any tenant who is exercising their right to return of major milestones in the development process, including but not limited to: (1) the start of

construction, (2) on at least a bi-annual basis provide updates on the anticipated date of when occupancy would be opened, (3) at least 180, 90, 30 and 15 days in advance of the anticipated availability of the unit pursuant to the issuance of the Temporary or Final Certificate of Occupancy, (4) when the Temporary Certificate of Occupancy is issued, and (5) when the Final Certificate of Occupancy is issued. Failure to inform tenants of the project's major milestones may result in additional time provided to the tenant to return to the replacement unit. This shall not preclude tenants from contacting the applicant or their predecessor-in-interest to inquire about progress throughout construction and lease up of the Development Project.

- (iii) Where a tenant household has a right of return pursuant to LAMC Section 16.60 A.3(b), the project applicant or their predecessor-in-interest shall notify the tenant household. The notice must comply with the applicable standards set forth by LAHD and include the rent guidelines for the project and any procedures the tenant will need to follow in order to claim a new unit. Where LAHD has created a standard notice, the project applicant must provide that standard notice to tenant households.
- (iv) Within thirty (30) days of receipt of the notice that the Final Certificate of Occupancy has been issued and the replacement unit is available, a tenant household must notify the owner if it wishes to reoccupy the replacement unit or room. The owner must hold the unit or room vacant at no cost to the tenant for sixty (60) days from the date the tenant household's written notice of its intent to reoccupy the rental unit is received.
- (v) Where a tenant household has a right to remain pursuant to LAMC Section 16.60 A.3(b) the project applicant or their predecessor-in-interest shall provide written notice to existing occupants of the planned demolition, the date they must vacate, and their rights under this section.
- (vi) Project applicants who experience unforeseen delays in issuance of a Temporary Certificate of Occupancy or Certificate of Occupancy impacting the timeline of their

construction milestone updates shall not be subject to the Private Right of Action described in LAMC Section 16.60 A.7, so long as they can demonstrate compliance with the tenant notification obligations in LAMC Section 16.60 A.3(b)(5).

4. Approval of Non-Housing Development Projects that Result in the Demolition of Housing Units until January 1, 2030. Notwithstanding any law, the City shall not approve any Development Project that is not a Housing Development Project that will require the demolition of occupied or vacant Protected Units, or that is located on a site where Protected Units were demolished in the previous five years, until January 1, 2030, unless all of the following requirements are satisfied.

(a) **Replacement of Existing or Demolished Protected Units.** The project shall Replace all existing Protected Units and Protected Units demolished on or after January 1, 2020 pursuant to the replacement requirements of California Government Code Section 65915(c)(3) and Section 16.60 A.3(a) of this Code, consistent with the following requirements:

- (1) The Development Project may not include an industrial use nor be located on a site that is entirely within a zone, adopted prior to January 1, 2022, that does not allow residential uses and the Protected Units that are or were on the project site are or were nonconforming uses.
- (2) At the time of permit issuance, a Development Project proponent must sign an affidavit for the Los Angeles Department of Building and Safety to ensure the replacement housing will be developed prior to or concurrently to the Development Project. Developed prior means a Certificate of Occupancy or Temporary Certificate of Occupancy for the replacement housing must be obtained prior to issuance of a Certificate of Occupancy or Temporary Certificate of Occupancy for the nonresidential Development Project.
- (3) The required replacement housing may be located on a site other than the project site but shall be located within the City of Los Angeles, with a preference for sites within close proximity.
- (4) The project proponent may contract with another entity to develop the required replacement housing units, except that the replacement housing units shall not fulfill the affordability requirements of any other development pursuant to another law.

(5) A commercial developer seeking a commercial density bonus may propose providing restricted affordable units through an agreement with a housing developer for partnered housing. The agreement must be approved by the City pursuant to California Government Code Section 65915.7.

(6) Notwithstanding the requirement that an Accessory Dwelling Unit be located on a lot with an existing or proposed primary residence, the replacement housing may be established through creation of an Accessory Dwelling Unit with the primary nonresidential use on the parcel being able to be used in place of a primary residence.

(b) **Existing Occupant Protections.** The Development Project meets the occupant protections described in LAMC Section 16.60 A.3(b).

(c) **Sunset Provisions.** The requirements of this subparagraph shall not apply to projects approved after January 1, 2030, except for those Development Projects that submitted a preliminary application pursuant to Section 65941.1 of the California Government Code before January 1, 2030. This subsection shall remain in effect only until January 1, 2034, and as of that date is repealed.

5. No Net Loss of Dwelling Units. Notwithstanding any other law and notwithstanding density limitations on a site, no permit shall be issued for a Housing Development Project that will require the demolition of one or more residential dwelling units irrespective of Protected Unit status, unless the project will create at least as many residential dwelling units as will be demolished. In addition, the Housing Development Project shall include at least as many residential dwelling units as the greatest number of residential dwelling units that existed on the project site within the last five years, except for the following:

(a) LAHD may approve an off-site replacement plan for buildings with covenanted affordable housing units that request approval to build a smaller number of units on the site in the following circumstances:

(1) The proposed construction of the new affordable units cannot Replace all units on site due to physical changes in unit type, such as replacing Single Room Occupancy or Residential Hotel guest rooms with studio dwelling units.

(2) The proposed construction of the new affordable housing units cannot Replace all units on site and meet the City's required

Accessible Housing Program standards.

- (3) Off-site replacements units approved pursuant to this subparagraph shall be subject to the following requirements, subject to LAHD approval:
 - i) The off-site replacement housing units will be of Equivalent Size or larger and have equivalent amenities as the on-site replacement housing units, and will be covenanted at the same affordability levels and for at least the same length of time as the on-site replacement housing.
 - ii) The off-site replacement housing units will be constructed within a three mile radius of the on-site replacement housing units.

6. Withholding or Revoking of Demolition Permit Approval for Illegal Tenant Harassment or Eviction

(a) Thresholds to Place individual or entity on LAHD's Anti-Harassment Violators Database. LAHD shall place a beneficial owner onto the LAHD Anti-Harassment Violators Database when:

- (1) A final judgment has been issued against the beneficial owner within the last five years for unlawful tenant harassment under the City's Tenant Anti-Harassment Ordinance, known as "TAHO," as set forth under Article 5.3 in Chapter IV of the Los Angeles Municipal Code, or similar actions within City limits under California Civil Code Section 1940.2, 1942.4, or 1942.5; or
- (2) The City has either (A) issued three final citations for TAHO violations at properties in the City against the beneficial owner within the last ten years for which all appellate remedies have expired or (B) in zones where there is a heightened risk of displacement of lower income tenants as determined by the City's Displacement Assessment Risk Tool, issued one final citation for TAHO violations at a property against the beneficial owner within the last five years for which all appellate remedies have expired; or
- (3) A final judgment has been issued against the beneficial owner within the last five years for wrongfully or illegally evicting a tenant within City limits, or causing a tenant to involuntarily quit within City limits in

violation of local or State law.

(4) Definition. For purposes of LAMC Section 16.60 A.6, a "beneficial owner" includes any of the following:

- (i) A natural person with a recorded ownership interest in the real property where the tenant harassment takes place.
- (ii) An ownership entity, including a corporation, limited liability company, limited partnership, partnership, or trust with a recorded interest in the real property where the tenant harassment takes place
- (iii) An entity or natural person that meets any of the following criteria:
 - a. has an ownership interest, as the term is defined in Section 1010.380(d)(2)(i)-(ii) (Reports of Beneficial Ownership Information) of Title 31 of the Code of Federal Regulations, in an entity described in Sub-subparagraph (4)(i) or (4)(ii) above; or
 - b. exercises "substantial control", as the term is defined in Section 1010.380(d)(1) (Reports of Beneficial Ownership Information) of Title 31 of the Code of Federal Regulations, over an entity described in Sub-subparagraph (4)(i) or (4)(ii) above; or
 - c. receives "substantial economic benefits" from the assets of an entity described in Sub-subparagraph (4)(i) or (4)(ii) above.
- (iv) An owner for purposes of the above does not mean any of the following:
 - a. A minor child;
 - b. A person acting solely as an employee of an ownership entity and whose control over or economic benefits from that ownership entity derives solely from the employment status of the person;

- c. A person whose only interest in an ownership entity is a future interest through a right of inheritance; or
- d. A creditor of an ownership entity, unless the creditor meets the requirements specified in Sub-subparagraph (4)(i) above.

(b) **Notice of Determination and Right to Staff Review.** Upon placement in the LAHD Anti-Harassment Violators Database, LAHD shall send a Notice of Determination to the known beneficial owner(s) placed into the database. A copy of the Notice of Determination shall also be mailed to the beneficial owner(s) of the property, if different from the applicant or permittee, as shown on the last equalized assessment roll, and to any person holding a deed of trust, mortgage, or other security interest in the property as revealed by a title search with respect to the property.

The Notice of Determination shall state that the LAHD General Manager, or designee, has determined that the beneficial owner should be placed in the LAHD Anti-Harassment Violators Database because the criteria in LAMC Section 16.60 A.6(a) have been satisfied, the basis for that determination, and the potential consequences under this ordinance. This section does not create any new appeal rights under the Administrative Citation Enforcement Program, known as the ACE program. Within 14 days of the date of this notice, the beneficial owner(s), subject to being placed in the database, shall have a right to request an LAHD staff level review of this determination. At the review, the beneficial owner may submit any evidence relevant to this determination.

(c) **Review of Determination.** The LAHD staff review shall be set on a date no earlier than 20 days after the date of the Notice of Determination, and the review shall be conducted no later than 60 days after the date of the Notice of Determination. At the review, the beneficial owner may submit any evidence relevant to this determination regarding the correct identity of the violator and the correct number of violations. The review shall be limited to whether the beneficial owner meets one of the stated criteria set forth in LAMC Section 16.60 A.6(a) above.

Within thirty (30) days of the review, LAHD shall provide a written LAHD Notice of Outcome notifying the beneficial owner of the outcome of the review. If the determination is upheld in review, the beneficial owner may seek judicial review by writ of mandamus.

(d) **Consequences of Placement on LAHD's Anti-Harassment Violators Database.** When there has been a final determination to place a beneficial owner on the LAHD Anti-Harassment Violators Database, LAHD shall notify in writing the Superintendent of Building and Safety and the Director of Planning.

If any applicant or permittee seeking a demolition permit or approval pursuant to LAMC Section 16.60 for a Development Project involving new construction, major renovations, or additions, that is within a property with Protected Units and the applicant or permittee is on the LAHD Anti-Harassment Violators Database, the Superintendent of Building and Safety shall withhold or revoke the issuance of any demolition permits for five years and the Director of Planning shall withhold the issuance of any approval for five years. Where the City has denied or revoked a demolition permit or approval to any applicant under this paragraph (iv), the denial or revocation for a five year term for the subject property shall transfer ("run with the land") at sale to any new owner, unless the new owner is developing a publicly-financed affordable housing project on the same site where more than 50 percent of the units are affordable, except for manager's unit(s).

The withholding or revoking of permits shall not apply for demolition permits or approvals that are necessary to comply with a Department of Building and Safety, LAHD, or other government order.

The five-year hold period shall commence on the date that the court's final judgment or the City's citation is final and no further judicial remedies are available.

If at the end of the five-year hold period, no new citations have been issued to and no court findings have been made against the beneficial owner(s), the beneficial owner(s) shall be removed from the LAHD Anti-Harassment Violators database. However, if during the five-year period, there is a new citation or court finding against the same beneficial owner, the five-year ban shall be extended from the date that the most recent citation or court finding becomes final and no further appeals available. No citation used to place a beneficial owner into the database may be used against the beneficial owner more than once.

Any action by the Department of Building and Safety or the Department of City Planning resulting from any of the provisions of this section, including demolition permit revocation and withholding of an approval shall not be

further appealable.

- (e) **Operative Date and Subsequent Ordinance.** This LAMC Section 16.60 A.6 shall become operative upon the effective date that LAHD establishes a determination and review process and publishes a notice of its effective date on the LAHD website and at least once in a newspaper circulated in the City of Los Angeles.

If the City adopts a subsequent ordinance in conflict with the procedures in this LAMC Section 16.60 A.6 relating to the withholding or revoking of a demolition permit, this Subparagraph shall be of no further force and effect.

7. Private Right of Action; Civil Penalties.

- (a) An aggrieved tenant under LAMC Section 16.60, or any person, organization, or entity who will daily and adequately represent the interests of an aggrieved tenant(s) under this LAMC Section 16.60, may institute civil proceedings as provided by law, against any applicant, or their successor-in-interest, violating any of the provisions of this LAMC Section 16.60 and any person who aids, facilitates, or incites another to violate the provisions of this article, including but not limited to submitting false information in response to the requirements of this section, regardless of whether the rental unit remains occupied or has been vacated due to harassment.
- (b) A tenant prevailing in court under this LAMC Section 16.60 shall be awarded reasonable attorney's fees and costs. A tenant prevailing in court under this LAMC Section 16.60 may be awarded compensatory or punitive damages, and imposition of civil penalties up to \$10,000 per violation of this LAMC Section 16.60 depending upon the severity of that violation, tenant relocation, or other appropriate relief, as adjudged by the court. Treble damages may also be awarded for willful violations. If a tenant prevailing under this article is older than 65 years or disabled, the court may impose additional civil penalties up to \$5,000 per violation depending upon the severity of the violation of this LAMC Section 16.60.
- (c) Any landlord or their agents violating any of the provisions of LAMC Section 16.60, may be enjoined therefrom by a court of competent jurisdiction.
- (d) The remedies to bring a civil action under LAMC Section 16.60 shall extend to current tenants at a property, to former tenants at a property

who were displaced by violations of LAMC Section 16.60 at a property, and to the City. The remedies in this paragraph are not exclusive nor do they preclude any tenant from seeking any other remedies, penalties and punitive damages, as provided by law.

- (e) The remedies provided by this LAMC Section 16.60 are in addition to any other legal or equitable remedies and are not intended to be exclusive.
- (f) Any agreement, whether written or oral, waiving any of the provisions contained in this LAMC Section 16.60 shall be void as contrary to public policy.

8. Relationship to Other Zoning Provisions. The Demolition of Housing Units Standards in LAMC Section 16.60 A shall apply citywide except for Historic Preservation Overlay Zones (HPOZs). Specific Plans, Supplemental Use Districts, or other overlays may establish additional replacement requirements and/or additional occupant protections greater than those provided in LAMC 16.60 A, in which case, the greater replacement requirements and occupant protections shall be used.

Sec. 10. A new Section 16.61 is added to Article 6.1 of Chapter 1 of the LAMC as follows:

SEC. 16.61. RESTRICTED AFFORDABLE HOUSING UNITS

A. Length of Affordability.

- 1. Unless covenant terms are otherwise specified due to a requirement contained in Chapter 1 of this Code or as a condition of approval, a Development Project is subject to this section and must be restricted by a covenant acceptable to the Los Angeles Housing Department recorded with the Los Angeles County Recorder, guaranteeing that the occupancy restriction will be observed for at least 99 years from the issuance of the Certificate of Occupancy except for:
 - (a) A Development Project in which public subsidies are tied to a specified covenant period, as determined by the Los Angeles Housing Department, unless voluntarily agreed to by the project applicant.
 - (b) For sale units, which must be consistent with the for-sale requirements of California Government Code Section 65915(c)(2).
 - (c) Residential Units for Lower Income Students, Transitional Foster Youth, Disabled Veterans, and/or Homeless Persons, shall be provided at affordability levels as determined in Los Angeles Municipal Code Section 12.22 A.37 for at least 55 years from the issuance of the Certificate of Occupancy or a longer period of time if required by the construction or

mortgage financing assistance program, mortgage assistance program, or rental subsidy program.

B. Requirements Regarding Unit Design, Unit Mix, Unit Size, Quality and Amenities, Access to, and Distribution of Affordable Units in Mixed-Income Development Projects. The Los Angeles Housing Department shall have the authority to establish and administer requirements applicable to all Restricted Affordable Units in mixed-income developments regarding the unit mix, unit size, quality and amenities, access to and distribution of affordable housing units in mixed-income Development Projects, in order to ensure compliance with fair housing law and any other applicable requirements, including but not limited to requirements from funding sources. The requirements shall be enforced through an approval prior to permit issuance. The requirements shall be established in a set of Fair Housing Requirements for Affordable Housing created by the Los Angeles Housing Department and the Department of City Planning, and adopted by Resolution at the City Planning Commission. LAHD shall have the authority to interpret these requirements to best implement their goals.

1. Amendments to the Fair Housing Requirements for Affordable Housing shall be approved by the City Planning Commission, pursuant to the procedures in Sec. 13B.1.5 (Guidelines or Standards Adoption/Amendment) of Chapter 1A of this Code.
2. The Director of Planning and General Manager of LAHD may prepare Implementation Memorandums, Technical Bulletins and/or User Guides for the purpose of providing additional information pertaining to this Subsection and maintaining consistency with State Housing Crisis Act.

C. Allocation of Restricted Affordable Units. Restricted Affordable Units shall be subject to the following:

1. **Affirmative Marketing and Fair Housing Outreach.** Sale or lease of the Restricted Affordable Units shall follow the affirmative marketing and outreach requirements of the Los Angeles Housing Department (LAHD), as outlined in a deed restriction drafted by LAHD and filed with the County of Los Angeles.
2. **Affordable and Accessible Housing Registry.** All Restricted Affordable Units shall be registered to the extent feasible on the Affordable and Accessible Housing Registry managed by the LAHD, or any existing equivalent listing, when available for rent.
3. **Priority Populations.** To the extent practical and in alignment with local, state and federal law, and pursuant to any locally adopted guidelines, the Affirmative

Marketing and Fair Housing Outreach provisions in Subdivision 1 and Affordable and Accessible Housing Registry in Subdivision 2 of Subsection C of Section 16.61, as well as any other City Planning or LAHD administrative procedure, should attempt to prioritize those with the greatest housing needs that have been displaced by government actions. This may include, but not be limited to:

- (a) Any person or household who has been displaced through a withdrawal of units pursuant to the Ellis Act and Sections 151.22 to 151.28 (Ellis Act Provisions) of Article 1 of Chapter XV of the LAMC.
- (b) A lower income person or household subject to a rent increase related to conversion to market-rate housing due to termination of a public funding subsidy contract, mortgage prepayment, or expiring use restrictions based on land use entitlement concessions.
- (c) A person or household who was displaced due to a code enforcement order, including those affected by a natural disaster that resulted in their residential unit being rendered uninhabitable.

D. Private Right of Action; Civil Penalties

1. A covenant acceptable to the Department of City Planning and the Los Angeles Housing Department shall be recorded guaranteeing the requirements in this LAMC Section 16.61 and providing for a private right of enforcement by the City, any tenant of any building to which a covenant and agreement applies.
2. An aggrieved tenant under LAMC Section 16.61, or collection of tenants as part of a representative class, may institute civil proceedings as provided by law, against any applicant, or their successor-in-interest, violating any of the provisions of the covenant as described in this LAMC Section 16.61 and any person who aids, facilitates, or incites another to violate the provisions of this article, including but not limited to submitting false information in response to the requirements of this section, regardless of whether the rental unit remains occupied or has been vacated due to harassment.
3. A tenant prevailing in court to enforce any provisions of this LAMC Section 16.61 shall be awarded reasonable attorney's fees and costs. A tenant prevailing in court to enforce any provisions of the covenant as described in this LAMC Section 16.61 may be awarded compensatory or punitive damages, and imposition of civil penalties up to \$10,000 per violation of provisions of the covenant described in this LAMC Section 16.61 depending upon the severity of that violation, tenant relocation, or other appropriate relief, as adjudged by the court. Treble damages may also be awarded for willful violations. If a tenant

prevailing under this article is older than 65 years or disabled, the court may impose additional civil penalties up to \$5,000 per violation depending upon the severity of the violation of the covenants as described in this LAMC Section 16.61.

4. Any landlord or their agents violating any of the provisions of the covenant as described in this LAMC Section 16.61, may be enjoined therefrom by a court of competent jurisdiction.
5. The remedies to a successful civil action brought under LAMC Section 16.61 shall extend to current tenants at a property, to former tenants at a property who were displaced by violations of the covenants as described in LAMC Section 16.61 at a property, and to the City. The remedies in this subsection are not exclusive nor do they preclude any tenant from seeking any other remedies, penalties and punitive damages, as provided by law. The remedies provided by this LAMC Section 16.61 are in addition to any other legal or equitable remedies and are not intended to be exclusive.
6. Any agreement, whether written or oral, waiving any of the provisions contained in this LAMC Section 16.61 shall be void as contrary to public policy.

E. Relationship to Other Zoning Provisions. The Restricted Affordable Units Standards in LAMC Section 16.61 shall apply citywide except HPOZs. Specific Plans, Supplemental Use Districts, or other overlays may establish longer covenant lengths, requirements for unit design, mix, etc. and/or additional allocation requirements greater than those provided in LAMC 16.61, in which case the greater covenant length, requirements for unit design, mix, etc. and allocation requirements shall be used.

Sec. 11. Paragraph (b) and (h) of Subdivision (2) of Subsection B. of Section 19.18 of Article 9 of Chapter 1 of the the LAMC is amended to read as follows:

(b) ... Such a covenant shall also subject projects using this exemption to the replacement policies in ~~Government Code Section 65915(e)(3)~~ LAMC Section 16.60, as that section may be amended from time to time, and...

(h) Any project located within the boundaries of the Central City West Specific Plan Area, as defined in Ordinance No. 163,094, if the Applicant agrees by covenant and agreement with the City or by development agreement to abide by the linkage fee and replacement housing obligations set forth in ~~the Specific Plan for the Central City West Area~~ LAMC Section 16.60.

Sec. 12. Article 19 of Chapter 4 of the the LAMC is amended to read as follows:

See LAMC Section 16.60 (Demolition of Housing Units) of Article 2 of Chapter 1 of this code.

SEC. 51.31. DEFINITIONS:

~~—The following words and phrases, whenever used in this article, shall be construed as defined in this section:~~

~~—“Complete application” refers to a complete application pursuant to Section 65943 of the California Government Code.~~

~~—“Housing development project” shall have the same meaning as defined in paragraph (3) of subdivision (b) of Section 65905.5 of the California Government Code; however, shall not include a housing development project located within a very high fire hazard severity zone.~~

~~—“Protected units” has the same meaning as set forth in California Government Code Section 66300(d)(2).~~

~~—“Very high fire severity zone” has the same meaning as provided in California Government Code Section 51177.~~

SEC. 51.32. APPLICABILITY:

~~—This article shall apply only to housing development projects that: (1) on or after January 1, 2022, but before January 1, 2030, submit a complete application to the Department of City Planning or a complete set of building plans for plan check and permit to the Department of Building and Safety, along with any associated submittal fee; or (2) on or after the effective date of this article, receive an approval of a complete application that was submitted to the Department of City Planning on or after January 1, 2020, but before January 1, 2022. This article does not apply to a housing development project that submitted a complete application to the Department of City Planning before January 1, 2020.~~

SEC. 51.33. REPLACEMENT OBLIGATIONS AND OCCUPANT PROTECTIONS REQUIRED FOR NEW HOUSING DEVELOPMENT PROJECTS:

~~—A.—The City shall not approve or issue a building permit for a housing development project that will require the demolition of one or more residential dwelling units unless the project will create at least as many residential dwelling units as will be demolished.~~

~~—B.—The City shall not approve or issue a building permit for a housing development project that will require the demolition of occupied or vacant protected units, unless the housing development project meets all of the requirements of California Government Code Section 66300(d)(2).~~

SEC. 51.34. SEVERABILITY:

~~—If any provision of this article is found to be unconstitutional or otherwise invalid by any court of competent jurisdiction, that invalidity shall not affect the remaining provisions of this article which can be implemented without the invalid provisions, and to this end, the provisions of this article are declared to be severable. The City Council hereby declares that it would have adopted this article and each provision thereof irrespective of whether any one or more provisions are found invalid, unconstitutional or otherwise unenforceable.~~

~~SEC. 51.35. SUNSET PROVISION:~~

~~—A. This article shall remain in effect only until January 1, 2034, and as of that date is repealed.~~

~~—B. A housing development project that submits a preliminary application pursuant to Section 65941.1 of the California Government Code before January 1, 2030, remains subject to this article after January 1, 2030.~~

DRAFT

EXHIBIT A.3:
Housing Element Sites and Minimum Density Ordinance

CPC-2023-7068-CA, CPC-2024-387-CA, CPC-2024-388-CA

For consideration by the City Planning Commission

September 26, 2024

ORDINANCE NO. _____

An ordinance adding Section 16.70 and 12.22.C.28 and amending Sections 12.09.1, 12.10, 12.10.5, 12.11, 12.11.5, 12.12, 12.12.2, 12.13, 12.13.5, 12.14, 12.16, 12.17, 12.17.1 of Chapter 1 of the Los Angeles Municipal Code (LAMC) for the purpose of establishing reasonable regulations regarding affordable housing development, codifying housing replacement requirements, establishing minimum density requirements and to comply with state housing law.

**THE PEOPLE OF THE CITY OF LOS ANGELES
DO ORDAIN AS FOLLOWS:**

Sec. 1. Section 16.70 of Chapter 1 of the the Los Angeles Municipal Code is added to read as follows:

SEC. 16.70. HOUSING ELEMENT SITES AND MINIMUM DENSITY ORDINANCE

A. **Purpose.** This section is intended to create procedures to implement state housing element law related to sites identified by the most recent Housing Element of the General Plan and its associated rezoning program. These regulations shall apply to the Inventory of Housing Element Sites, Prior Housing Element Sites and Lower Income Rezoning Housing Element Sites and where so stated herein shall supersede the regulations applying on the sites pursuant to state law.

B. **Definitions.** For purposes of this Section the following words and phrases are defined as follows:

“Development Project” has the same meaning as defined in Section 12.03 of Article 2 of Chapter 1 of the LAMC.

“Housing Development Project” has the same meaning as defined in Section 12.03 of Article 2 of Chapter 1 of the LAMC.

“Housing Element Sites” means sites listed on the inventory of land suitable for residential development developed pursuant to paragraph (3) of subdivision (a) of California Government Code Section 65583 that exists in the most recently adopted Housing Element, including Appendices 4.1, 4.2, and 4.3 of the 2021-2029 Housing Element.

“Lower Income Households” has the same meaning as defined in Section 50079.5 of the Health and Safety Code.

“Lower Income Rezoning Housing Element Sites” means sites that were rezoned as part of a rezoning program to meet the Housing Element need for

very low and low-income households allocated pursuant to Government Code Section 65584. The inventory of these sites shall be established by City Council Resolution, submitted to the state each year as part of the Housing Element Annual Progress Report and identified in a public mapping system including the Zoning Information Mapping and Access System (ZIMAS). Sites shall comply with Government Code Section 65583.2(h)

“Ministerial Approval” means an administrative review process to approve a “use by right” as this term is defined in California Government Code Section 65583.2(i).

“Prior Housing Element Sites” means Housing Element Sites identified as meeting the criteria for a prior housing element site in the most recently adopted Housing Element, including non vacant sites that were identified in the prior Housing Element and vacant sites that were identified in the prior two Housing Elements, including sites identified in Column O P of Appendix 4.1 of the current 2021-2029 Housing Element.

“Protected units” has the same meaning as defined in Section 12.03 of Article 2 of Chapter 1 of the LAMC.

C. Requirements for Development Projects on Housing Element Sites.

Notwithstanding any law including any density limits, the City shall not approve a development project on a Housing Element Site that will require the demolition of occupied or vacant protected units, or that is located on a site where protected units were demolished in the previous five years, unless all of the following requirements are satisfied.

1. Replacement of Existing or Demolished Protected Units.

(a) **Housing Development Projects.** A Housing Development Project will replace all existing Protected Units and Protected Units demolished on or after January 1, 2020 pursuant to the replacement requirements of California Government Code Section 65915(c)(3) and Section 16.60 A.3(a) of this Code.

(b) **Non Housing Development Projects.** A Development Project that is not a Housing Development Project must satisfy the replacement requirements in California Government Code Section 65915(c)(3) and Section 16.60 A.4(a), except that the provisions in Section 16.60 A.4(c) shall not apply.

D. Maintenance of Adequate Housing Element Sites Throughout the Housing Element Period.

1. The Departments of City Planning and Building and Safety shall not, through any administrative, quasi-judicial, legislative or other actions, reduce the density of a Housing Element Site, or approve any development project on a Housing Element Sites parcel(s) with fewer units in aggregate, by income category, than shown as realistic capacity in the most recent list of Housing Element Sites for the remaining housing element planning period pursuant to California Government Code Section 65584, including from columns P, Q, R and S of Appendix 4.1 and Appendix 4.2, and columns E, F, G and H of Appendix 4.3 of the current 2021-2029 Housing Element, unless it either:
 - (a) Makes a finding pursuant to Government Code Section 65863(b)(2) that, while the proposed project would result in fewer units by income category than those identified in the Housing Element Sites inventory prepared for the 2021-2029 Housing Element, the remaining sites identified in the Housing Element of the General Plan are adequate to meet the requirements of GC Section 65583.2 and to accommodate the jurisdiction's share of the regional housing need pursuant to GC Section 65584. A written finding with substantial evidence shall be included as part of approval of the project on the number of sites by income category and their adequacy to meet the requirements.
 - (b) If a finding can not be made, the Department of City Planning shall, within 180 days, identify and make available additional adequate sites through a rezoning to accommodate the jurisdiction's share of the regional housing need by income level.
2. A housing development project may not be denied on the basis that approval of the housing project would require compliance with this Subsection.

E. Approval Requirements for Housing Element Sites**1. Ministerial Approval for Prior Housing Element Sites**

If a Housing Development Project is proposed on a Prior Housing Element Site and at least twenty percent of the project's units will be made affordable and available to Lower Income Households, the project shall be subject to Ministerial Approval pursuant to California Government Code section 65583.2(i). If an eligible project would have otherwise required a discretionary entitlement from the Department of City Planning it shall be processed through an Expanded Administrative Review process, as set forth by the provisions of Sec. 13B.3.2. of

Chapter 1A of this Code.

2. Ministerial Approval for Lower Income Rezoning Housing Element Sites.

If a Housing Development Project is proposed on a Lower Income Rezoning Housing Element Site, and at least twenty percent of the project's units will be made affordable and available to Lower Income Households, the project shall be subject to Ministerial Approval pursuant to California Government Code section 65583.2(i). If an eligible project would have otherwise required a discretionary entitlement from the Department of City Planning it shall be processed through an Expanded Administrative Review process, as set forth by the provisions of Sec. 13B.3.2. of Chapter 1A of this Code.

3. Densities for Lower Income Rezoning Sites.

If a Housing Development Project is proposed on a Lower Income Rezoning Housing Element-Site, it shall not be approved unless it meets a minimum density requirement of 20 units per acre, inclusive of Accessory Dwelling Units.

Section 2. A new Subdivision 5 of Subsection B of Section 12.09.1 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

5. Minimum Density. In the RD1.5 and RD2 zones located within a High or Medium High Residential Market Area pursuant to the Affordable Housing Linkage Fee established by LAMC 19.18 C, a minimum density of one Dwelling Unit or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for every Housing Development Project on lots, prior to any subdivision, meeting the minimum width on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 3. A new Subdivision 5 of Subsection C of Section 12.10 of Chapter 1 of the LAMC shall be added as follows:

5. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area is required for every Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 4. A new Subdivision 6 of Subsection C of Section 12.10.5 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

6. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for every Housing Development Project development project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 5. A new Subdivision 6 of Subsection C of Section 12.11 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

6. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for every Housing Development Project residential development project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 6. A new Subdivision 6 of Subsection C of Section 12.11.5 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

6. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for every Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 7. A new Subdivision 6 of Subsection C of Section 12.12 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

6. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for every Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the

requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 8. A new Subdivision 6 of Subsection C of Section 12.12.2 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

6. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 9. A new Subdivision 6 of Subsection C of Section 12.13 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

6. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 10. A new Subdivision 5 of Subsection B of Section 12.13.5 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

5. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 11. A new Subdivision 5 of Subsection C of Section 12.14 of Chapter 1 of the Los Angeles Municipal Code as follows:

5. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 12. A new Subdivision 5 of Subsection C of Section 12.16 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

5. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, with the exception of lots meeting the requirements of Section 12.22 C.28 of this code. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 13. A new Subdivision 4 of Subsection C of Section 12.17 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

4. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, with the exception of lots meeting the requirements of Section 12.22 C.28 of this code. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 13. A new Subdivision 4 of Subsection C of Section 12.17.1 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

4. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, with the exception of lots meeting the requirements of Section 12.22 C.28 of this code. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 14. Add Subdivision 28 to Subsection C of Section 12.22 of Chapter 1 of the the Los Angeles Municipal Code is added to read as follows:

28. Minimum Density in the RD2, RD1.5, R3, RAS3, R4, RAS4, R5, C1, C1.5, C2, C4, C5 and CM Zones. In the RD2, RD1.5, R3, RAS3, R4, RAS4, R5, C1, C1.5, C2, C4, C5 and CM Zones, the minimum density requirements shall not apply to the following types of development projects unless they are designated Lower Income Rezoning Housing Element Sites pursuant to LAMC 16.70 E3:

- a) Additions, remodeling or rehabilitations that do not result in more than 1,500 square feet in net new Floor Area and that do not result in the demolition of an existing dwelling unit(s).
- b) The only new dwelling unit(s) being added to the parcel is an Accessory Dwelling Unit(s).
- c) Existing dwelling units or guest rooms that have been damaged by a disaster or are deemed unsafe by LADBS and are being reconstructed with no increase to the amount Floor Area in the prior building or buildings.
- d) The development is located on an environmentally sensitive area specified in subparagraphs-(B) to (K) of Government Code Section 65913.4(a)(6), including a Very High Fire Hazard Severity Zone, regardless of any mitigations.
- e) Lots where at least 60% of the Lot is composed of Slopes which are 30% or greater, as determined by a Slope Analysis Map prepared in accordance with LAMC 12.21 C.10(b)(1).
- f) Lots that are designated as parks or open space in any plan or zoning designation.
- g) Lots that contain a Designated Historic Resource.
- h) Lots that can not achieve the minimum density requirement due to any objective provision that physically precludes the construction of a development per the Los Angeles Municipal Code or due to any provision of Specific Plans, or Q, T, D Conditions, or a Community Plan Implementation Overlay.

Exhibit B.1 - CITY PLANNING COMMISSION RESOLUTION TO AMEND AFFORDABLE HOUSING INCENTIVE GUIDELINES AND ESTABLISH FAIR HOUSING REQUIREMENTS FOR AFFORDABLE HOUSING

EXHIBIT B.1:

City Planning Commission Resolution to Amend Affordable Housing Incentive Guidelines and Establish Fair Housing Requirements for Affordable Housing

CPC-2023-7068-CA, CPC-2024-387-CA, CPC-2024-388-CA

For consideration by the City Planning Commission

September 26, 2024

Exhibit B.1 - CITY PLANNING COMMISSION RESOLUTION TO AMEND AFFORDABLE HOUSING INCENTIVE GUIDELINES AND ESTABLISH FAIR HOUSING REQUIREMENTS FOR AFFORDABLE HOUSING

RESOLUTION

WHEREAS, pursuant to City Charter section 550 and 551 and Los Angeles Municipal Code (LAMC) sections 12.22 A.25 of Chapter 1 and 13A.1.3(d)(2)(C) of Chapter 1A, the City Planning Commission has the authority adopt or amend Guidelines and Standards;

WHEREAS, the Affordable Housing Incentive Guidelines, adopted by the City Planning Commission in 1995 and updated in 2004 and 2005, more fully describe the provisions of state Density Bonus law (CA Government Code Section 65915) including qualifying criteria, provisions to meet fair housing requirements, as well as the incentives and procedures available to qualifying projects.

WHEREAS, the City's 2005 Density Bonus Ordinance (No. 179681), established in LAMC Section 12.22.A.25, was adopted by Los Angeles City Council on February 20, 2008;

WHEREAS, the Density Bonus Ordinance requires that Housing Development Projects for which a Density Bonus has been requested are evaluated for compliance with the requirements of the ordinance and the the Affordable Housing Incentives Guidelines;

WHEREAS, the Affordable Housing Incentives Guidelines, which were last adopted by the City Planning Commission on June 9, 2005, have become out of date with many amendments to state Density Bonus law and City procedures since 2005;

WHEREAS, the Ordinance and Guidelines contain the authority for the City Planning Commission to modify the Affordable Housing Incentives Guidelines by a resolution of the City Planning Commission;

WHEREAS, a draft of Fair Housing Requirements for Affordable Housing has been proposed for the City Planning Commission's considerations, with the intent that these requirements be adopted by the Commission and applied to restricted affordable housing units located in mixed-income housing development projects pursuant to the LAMC;

WHEREAS, the City Planning Commission has considered the proposed amendments to the Affordable Housing Incentives Guidelines and the Fair Housing Requirements for Affordable Housing;

Exhibit B.1 - CITY PLANNING COMMISSION RESOLUTION TO AMEND AFFORDABLE HOUSING INCENTIVE GUIDELINES AND ESTABLISH FAIR HOUSING REQUIREMENTS FOR AFFORDABLE HOUSING

NOW, THEREFORE, BE IT RESOLVED, that the resolution to amend the Affordable Housing Incentives Guidelines and adopt the Fair Housing Requirements for Affordable Housing, both of which shall become effective upon the operative date of the CHIP Ordinance, is adopted by the City Planning Commission.

EXHIBIT B.2:
Fair Housing Requirements for Affordable Housing

CPC-2023-7068-CA, CPC-2024-387-CA, CPC-2024-388-CA

For consideration by the City Planning Commission

September 26, 2024

FAIR HOUSING REQUIREMENTS FOR AFFORDABLE HOUSING

The following requirements shall be applied to restricted affordable housing units located in mixed-income housing development projects pursuant to Los Angeles Municipal Code Section 16.61 B in order to facilitate fair housing opportunities.

1. **Unit Mix.** Except as these requirements conflict with any housing replacement requirements pursuant to state or local law, the number of Restricted Affordable Units that are required in mixed-income housing development projects shall reflect the project's unit type mix, in terms of the number of bedrooms. Five or more bedroom units may be provided for by creating either three or four bedroom Restricted Affordable Units as long as the total number of bedrooms are replaced as affordable. For cases where rounding results in fewer Restricted Affordable Units of a particular number of bedrooms than required, the share of units with the highest remainder shall be rounded up. In cases where rounding would result in more total Restricted Affordable Units than otherwise required, then the share of units with the lowest remainder shall not be rounded. In instances where the remainders are equal, then the larger unit type should be allocated as Restricted Affordable Units.
2. **Unit Size.** Restricted Affordable Units shall, on average, be no less than 90% of the average square footage of the market rate units for the unit type. In addition, if these requirements conflict with state or local requirements relating to housing replacement or right of return related to the demolition of protected units, the provision resulting in the higher number of bedrooms shall be required.
3. **Quality and Amenities.** Restricted Affordable Units should be generally comparable to market rate dwelling units in construction quality and basic amenities for daily living (laundry, patios/balconies, number of bathrooms, etc.), but may differ in the quality of interior "finish" materials (eg., flooring, cabinetry, hardware, countertops, appliances, light fixtures, bathroom fixtures, trim and moldings, wall coverings, etc).
4. **Distribution.** Restricted Affordable Units should be interspersed equally on different floors but are not required to be located on a particular floor if the number of units is less than the number of stories. No two Restricted Affordable Units may be located next to each other or isolated to a specific area of the building, such as near the freight elevator or trash room, or vertically stacked. Restricted Affordable Units should generally not be separated into one building, except in cases where the affordable units will be located on the same development site, including across the street, and is necessary, as determined by LAHD, to facilitate either: 1) servicing of special needs populations (e.g. seniors, persons with disabilities, target populations, etc.) that benefit from unique services in their own building, or 2) a relocation plan to house residents being displaced. Units awarded as part of a density bonus pursuant to CA Government Code Section 65915 shall be permitted in geographic areas of

Exhibit B.2 - FAIR HOUSING REQUIREMENTS FOR AFFORDABLE HOUSING

the housing development other than the areas where the units for the lower income households are located. An applicant can seek an exemption from distribution of Restricted Affordable Units on the top floor for penthouses subject to the approval of LAHD.

5. **Access.** The occupants of the Restricted Affordable Units within a mixed-income multifamily development shall have the same access to the common entrances, areas and amenities as the occupants of the market-rate housing units and may not be charged for amenities that are provided at no cost to other residents including, but not limited to, access to recreational facilities, parking, internet, TV, and interior amenities such as laundry spaces, dishwashers and microwave ovens. Optional services provided must be optional for all residents, and available to all under the same terms and conditions. Tenants of restricted affordable units cannot be required to purchase additional services.

AFFORDABLE HOUSING INCENTIVES GUIDELINES

I. SCOPE AND PURPOSE

As required by State law, the Municipal Code implements the State's density bonus provisions by setting forth the density bonus program requirements, incentives and procedures. These Guidelines more fully describe the density bonus provisions and qualifying criteria; the incentives available to qualifying projects; and the procedures whereby projects may apply for a bonus and incentives.

The Guidelines may be modified by resolution of the Planning Commission.

II. DEFINITIONS

Area Median Income (AMI) – The estimate of median income in the Los Angeles – Long Beach Primary Metropolitan Statistical Area that is determined periodically by the US Department of Housing and Urban Development (HUD), adjusted for household size and which is published periodically.

Density Bonus -- A density increase over the otherwise maximum allowable residential density pursuant to California Government Code Section 65915. The density bonus shall apply to housing developments consisting of three or more dwelling units.

Incentive or Concession – A reduction in a development standard or a modification of the Zoning Code.

Moderate Income, Lower Income and Very Low Income – Annual income of a household that does not exceed the Area Median Income for the income category as specified in the California Health and Safety Code Sections 50079.5 and 50105. (See Appendix for Annual Household Income Levels)

Mass Transit Station – A transit stop for a fixed rail system or Major Bus Center. A station is one that is currently in use, whose location is proposed and for which a full funding contract has been signed by all funding partners, or one for which a resolution to fund a preferred alignment has been adopted by the Los Angeles County Metropolitan Transit Authority.

Major Bus Route – A bus route with peak-hour headways of 15 minutes or less in two directions for 2 of the 3 hours between 4:00 p.m. and 7:00 p.m.

Senior Citizens – Individuals who are at least 62 years of age, except that for density bonus projects of at least 35 dwelling units, a threshold of 55 years of age may be used, provided all applicable City, State and federal regulations are met.

III. DENSITY BONUS AND SET-ASIDES [\(SEE APPENDIX FOR EXAMPLES\)](#)

Density bonus provisions apply to projects of 5 or more units, [prior to any density bonus](#). Projects qualify for a **20% density bonus**, if they provide the following tenant set-asides for a period of at least ~~30-55~~ years, as established by State Law:

- **5% of the dwelling units for Very Low Income households**, earning no more than 50% of the AMI and paying no more in rent than the amount established by LAHD for households earning up to 50% of the median income, OR
- **10% of the dwelling units for Lower Income households**, earning no more than 80% of the AMI and paying no more in rent than the amount established by the Los Angeles Housing Department (LAHD) for households earning up to 60% of the median income.

Projects may qualify for an **additional density bonus to a maximum of 35%** provided the number of set-aside units are increased as follows:

- For each 1% increase in the percentage of Very Low Income affordable units, projects will receive an additional 2.5% density bonus up to a maximum of 35%.
- For each 1% increase in the percentage of Lower Income affordable units, projects will receive an additional 1.5% density bonus up to a maximum of 35%.

Projects qualify for an **additional 10% density bonus up to a maximum of 35%** if they are located on or near a transit corridor or major employment center (see By-Right Incentives, below).

[Projects qualify for an additional density bonus up to a maximum of 88% or 100% if a project provides an additional set-aside of Very Low Income or Moderate Income units, as set forth in the tables of Government Code Section 65915\(v\).](#)

Senior Housing Projects

State law provides an automatic 20% density bonus for housing projects that set-aside 100% of the housing for senior citizens. There are no income or rent restrictions for this bonus. As an incentive to provide affordable housing for seniors, senior housing projects that set aside at least 10% of the units for Lower Income seniors or 5% of the units for Very Low Income seniors will qualify for an additional 15% density bonus, for a total density bonus of 35%. All senior housing projects are required to sign a Covenant with the Los Angeles Housing Department assuring that the units are restricted to seniors for a period of 30 years.

For-Sale Housing Developments

Housing developments that set-aside 5% of the dwelling units for sale to Very Low Income households or 10% of the dwelling units for sale to Lower Income dwelling units will qualify for the density bonus a 20% and additional density up to a maximum of 35% as noted above.

Housing developments that set aside 10% of the dwelling units for buyers who meet the criteria of Moderate Income households (earning no more than 120% of AMI) will also qualify for a density bonus of 20%. For each additional 1% set-aside, the developer may receive an additional 1%

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

density bonus up to a maximum of 35%. It is the intent of this program that these units will be owner-occupied.

Consistent with State law, the owner of the Moderate Income ~~and lower income levels~~ set-aside unit can sell that unit any time at an unrestricted price. At the time of sale, the owner can recoup his/her down payment, and the value of any improvements, but any profit must be shared with the City. The City's share is equal to the percentage by which the initial sale price to the Moderate-Income Household was less than the fair market value of the home at the time of the initial sale. These funds are to be used within ~~five~~three years for the construction, rehabilitation, or preservation of affordable housing for Extremely Low, Very Low, Lower, and Moderate-Income persons or families.

~~The Los Angeles Housing Department (LAHD) will develop additional guidelines to implement this provision of State law and to address for sale Lower and Very Low Income units.~~

● **Donation of Land in Lieu of Set Aside**

State law permits an applicant for a subdivision, parcel map or other residential development approval to obtain a 15% density bonus, if the applicant donates land to the City that meets, at a minimum, the following criteria:

- The developable acreage and zoning of the land being transferred are sufficient to permit construction of at least 10% of the number of residential units in the proposed development.
- The transferred land is at least one acre in size or of sufficient size to permit development of at least 40 units.
- The transferred land is within the boundary of the proposed development, or with the City's agreement, within ¼ mile of the development.
- The transferred land is fully entitled to permit the number of required affordable units.
- The applicant donates and transfers the land no later than the date of approval of the final subdivision map, parcel map or residential development application.

For each additional 1% land donated, the applicant may obtain an additional 1% density bonus up to a maximum of 35%. Also, an applicant may receive a density bonus for setting aside affordable units within the development project with the total bonus not to exceed 35%.

Density Bonus Calculation

The number of ~~set-aside and~~ density bonus units is based upon the maximum density allowed in the zone. State law requires that all density and set-aside calculations resulting in a fractional number be rounded up to the next whole number. For example, a 5,000 square foot lot in the R3 zone would permit 76 units (not 67 since the maximum density ~~allowed~~ is ~~also not~~ "rounded up"). A 20% bonus would allow 2 extra units (1.2 is rounded up to 2 extra units). The required set-aside for Very Low Income households would be 1 unit (5% of 6 is .03, which is rounded up to 1.)

Where the developer is not requesting a density bonus and the housing development uses less than the maximum density allowed in the zone, the percentage of set-aside units is based upon the number of units in the development.

Other Discretionary Approval

Approval of density bonus units does not, in and of itself, trigger other discretionary approval such as Site Plan Review.

Term of Affordability

All Lower and Very Low Income rental density bonus units must remain affordable for ~~30~~ 55 years (or longer, if required by the construction or mortgage financing assistance program, mortgage insurance program, or rental subsidy program.) ~~L.A.H.D. has determined that State law has been amended to clarify that~~ equity sharing is the ~~preferred~~ method of ensuring ongoing availability of affordable housing upon re-sale of affordable restricted ~~units~~. ~~L.A.H.D. will be preparing implementing guidelines for the re-sale of Moderate, Lower and Very Low Income restricted units.~~

IV. BY-RIGHT INCENTIVES

Parking. State law provides parking standards that may be requested by a developer of a density bonus project and that the City must grant if requested. These standards apply not only to the restricted affordable units (the set-aside units) but also to the entire project. These standards are inclusive of handicapped and guest parking and are as follows:

- 0 – 1 bedrooms: one onsite parking space
- 2 – 3 bedrooms: two onsite parking spaces
- 4 or more bedrooms: 2½ parking spaces

If the total number of spaces required in the development results in a fractional number, it is rounded up to the next whole number. Tandem parking and uncovered parking are also permitted to meet these parking requirements.

State Law has also been amended to permit additional types of parking reductions for certain types of projects, and/or projects located in certain areas. Please see California Government Code Section 65915(p) for more.

Transit Corridor / Major Employment Centers. Projects that meet the following criteria will be granted an additional 10% density bonus, up to a maximum of 35%:

- At or within a 1,500 foot radius of an existing or fully funded major bus center, bus stop along a major bus route (defined as a bus route with peak-hour headways of 15 minutes or less in two directions in at least two of the three hours between 4:00 p.m. and 7:00 p.m.), or mass transit station; or
- At or within a 1,500 foot radius of an intersection of transit priority arterials; or

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

- In or within a 1,500 foot radius of the boundaries of a regional center; or
- In or within a 1,500 foot radius of boundaries of a major economic activity area (LAX, the Port of Los Angeles and Downtown);
- Within 1,500 feet of the boundaries of a college or university with an enrollment exceeding 10,000 students.

V. OTHER AFFORDABLE HOUSING INCENTIVES

In conformance with State law, at least one incentive or concession, in addition to the density bonus, must be provided to projects that set aside affordable units. The number of incentives increases as the percentage of set-aside units increases, as follows:

Very Low Income Households:

- One Incentive/Concession – 5% set-aside
- Two Incentives/Concessions – 10% set-aside
- Three Incentives/Concessions – 15% set-aside
- [Four Incentives/Concessions – 16% set-aside](#)

Low Income Households and

- [One Incentive/Concession – 10% set-aside](#)
- [Two Incentives/Concessions – 27% set-aside](#)
- [Three Incentives/Concessions – 24% set-aside](#)
- [Four Incentives/Concessions – N/A](#)

Moderate Income Households:

- One Incentive/Concession – 10% set-aside
- Two Incentives/Concessions – 20% set-aside
- Three Incentives/Concessions – 30% set-aside
- [Four Incentives/Concessions – 45% set-aside](#)

Menu of Incentives/Concessions

Projects may request one or more of the following incentives or concessions, depending upon the income level of the targeted households and the percentage of set-aside units, in order to provide the affordable units:

- Up to 20% deviation from yard/setback requirements, except along any property line that abuts an R1 or more restrictively zoned property
- Up to 20% deviation from lot coverage requirements
- Up to 20% deviation from lot width requirements
- Up to 20% deviation from floor area requirements
- Up to 20% deviation from open space requirements
- Up to 20% additional building height, with the exception of properties within a Specific Plan for which 10% additional building height will be permitted

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

- Include area of street and alley dedication for purposes of calculating density
- A reduction or waiver in parking to include:
 - A reduction in parking requirements to not less than 1 parking space per restricted dwelling unit irrespective of the number of habitable rooms.
 - A reduction in parking requirements to not less than ½ parking space per dwelling unit for dwelling units restricted to Very Low or Low Income senior citizens.

VI. PROCEDURE FOR PROJECTS REQUESTING INCENTIVES/CONCESSIONS

For projects requesting a density bonus and one or more incentives included in the Menu of Incentives/Concessions above, the following procedures shall apply:

- The applicant shall pay the required fee, complete the appropriate environmental clearance and the required form(s) and submit the following to the Department of City Planning: (Note: density bonus projects are eligible for processing by the Expediting Unit, with payment of the appropriate fees.)
 - A summary of the project including location, number and type of housing units, including affordable units and bonus units
 - A parcel profile printout from the Zoning Information Map Access System (ZIMAS) confirming eligibility for the transit corridor incentive (if requested.)
 -
 - The rationale and accurate supporting information, sufficient to demonstrate that the specific request is necessary to make the affordable units feasible.
 - A site plan including floor plans and elevations of the project. The drawings must clearly and completely illustrate the intent of the project and the necessity of the incentive requested.
 - Photographs of the entire site and surrounding properties.
 - Information that the proposed project has no adverse impact on an Historic Cultural Monument as declared by City, State or Federal government.
- The Director of Planning or his/her designee will review the information provided and issue a determination based on State law and these Guidelines.
- In conformance with State law, denial of a request must include documentation that either the concession or incentive is not required to provide for affordable housing, or the concession or incentive will have a specific adverse impact upon public health and safety, on the physical environment or on a property that includes an Historic Cultural Monument as declared by the City, State or Federal government, and there is no way to reasonably mitigate or avoid the adverse impact without making the project unaffordable to Moderate, Lower or Very Low Income Households.
- Notice and Appeal. Notice of the determination will be provided to the applicant, all owners of properties abutting, across the street or alley from, or having a common corner with the

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

~~subject property and the local Certified Neighborhood Council. The determination by the Director of Planning is final unless appealed to the Area Planning Commission within 15 calendar days of the date of mailing. Only the applicant and abutting owners who received notice of the determination have the right to appeal. The decision of the Area Planning Commission is final.~~

~~For projects requesting an incentive/concession not on the Menu of Incentives/Concessions or a waiver of a development standard, the following procedures shall apply:~~

- ~~• The applicant shall pay the required fee, complete the appropriate environmental clearance, complete the required form(s) and submit the information listed above for projects requesting an incentive on the Menu.~~
- ~~• Hearing and Notice. The Director of Planning or designee will set the matter for public hearing at which evidence will be taken. Written notices shall be mailed, at least 24 days prior to the date of the hearing, to the Certified Neighborhood Council, applicant, property owners and occupants of property within 500' of the property that is the subject of the request.~~
- ~~• The Director of Planning or his/her designee will prepare a report for the City Planning Commission with conclusions and recommendations. The City Planning Commission decision may be appealed to the City Council.~~
- ~~• In conformance with State law, denial of a request must include documentation that either the concession or incentive is not required to provide for affordable housing, or the concession or incentive will have a specific adverse impact upon public health and safety, on the physical environment or on a property that includes an Historic-Cultural Monument as declared by the City, State or Federal government, and there is no way to reasonably mitigate or avoid the adverse impact without making the project unaffordable to Moderate, Lower or Very Low Income Households.~~

~~VI. FAIR HOUSING REQUIREMENTS FOR AFFORDABLE HOUSING IN MIXED INCOME DEVELOPMENTS VII. DESIGN STANDARDS FOR AFFORDABLE UNITS~~

- Unit Mix.** Except as these requirements conflict with any housing replacement requirements pursuant to state or local law, the number of Restricted Affordable Units that are required in mixed-income housing development projects shall reflect the project's unit type mix, in terms of the number of bedrooms. Five or more bedroom units may be provided for by creating either three or four bedroom Restricted Affordable Units as long as the total number of bedrooms are replaced as affordable. For cases where rounding results in fewer Restricted Affordable Units of a particular number of bedrooms than required, the share of units with the highest remainder shall be rounded up. In cases where rounding would result in more total Restricted Affordable Units than otherwise required, then the share of units with the lowest remainder shall not be rounded. In instances where the remainders are equal, then the larger unit type should be allocated as Restricted Affordable Units.

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

2. **Unit Size.** Affordable units shall, on average, be no less than 90% of the average square footage of the market rate units for the unit type. In addition, if these requirements conflict with state or local requirements relating to housing replacement or right of return related to the demolition of protected units, the provision resulting in the higher number of bedrooms shall be required.
3. **Quality and Amenities.** Restricted Affordable Units should be generally comparable to market rate dwelling units in construction quality and basic amenities for daily living (laundry, patios/balconies, number of bathrooms, etc.), but may differ in the quality of interior "finish" materials (eg., flooring, cabinetry, hardware, countertops, appliances, light fixtures, bathroom fixtures, trim and moldings, wall coverings, etc).
4. **Distribution.** Restricted affordable units should be interspersed equally on different floors but are not required to be located on a particular floor if the number of units is less than the number of stories. No two restricted affordable units may be located next to each other or isolated to a specific area of the building, such as near the freight elevator or trash room, or vertically stacked. Restricted Affordable Units should generally not be separated into one building, except in cases where the affordable units will be located on the same development site, including across the street, and is necessary, as determined by LAHD, to facilitate either: 1) servicing of special needs populations (e.g. seniors, persons with disabilities, target populations, etc.), that benefit from unique services in their own building, or 2) a relocation plan to house residents being displaced. Units awarded as part of a density bonus pursuant CA Government Code Section 65915 shall be permitted in geographic areas of the housing development other than the areas where the units for the lower income households are located. An applicant can seek an exemption from distribution of Restricted Affordable Units on the top floor for penthouses subject to the approval of LAHD.
5. **Access.** The occupants of the Restricted Affordable Units within a mixed-income multifamily development shall have the same access to the common entrances, areas and amenities as the occupants of the market-rate housing units and may not be charged for amenities that are provided at no cost to other residents including, but not limited to, access to recreational facilities, parking, internet, TV, and interior amenities such as laundry spaces, dishwashers and microwave ovens. Optional services provided must be optional for all residents, and available to all under the same terms and conditions. Tenants of affordable units cannot be required to purchase additional services.

~~Design of Affordable Units in Mixed-Income Projects~~

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

~~Affordable dwelling units shall be generally comparable to market rate dwelling units, including total square footage, bedroom size, closet space amenities, number of bathrooms, etc., except in the quality of interior “finish” materials (e.g., floor and wall coverings). Affordable units should be no less than 90% of the average square footage of the market rate units with the same number of bedrooms. The design of restricted dwelling units should generally reflect the average number of bedrooms per dwelling unit in the development.~~

~~Location of Affordable Units within Mixed Income Projects~~

~~Affordable dwelling units must be reasonably interspersed among market rate dwelling units within the same building.~~

~~Equal Distribution of Amenities~~

~~Residents of affordable dwelling units may not be charged for amenities that are provided at no cost to other residents including, but not limited to, access to recreational facilities, parking, cable TV, and interior amenities such as dishwashers and microwave ovens. Optional services provided must be optional for all residents, and available to all under the same terms and conditions. Tenants of restricted units cannot be required to purchase additional services.~~

VIII. AFFORDABILITY REQUIREMENTS (SEE APPENDIX FOR HOUSEHOLD INCOME, MAXIMUM RENTS AND PURCHASE PRICES)

~~The Los Angeles Housing Department (LAHD) establishes the affordability restrictions on household income, based upon State law. These restrictions are subject to annual review and an owner can contact LAHD directly to receive the current restrictions. The examples provided in the Appendix (Section XII of these Guidelines) are for calendar year 2005 and represent the maximum that may~~

be charged to Moderate, Lower and Very Low Income residents. For all questions about affordability requirements, contact LAHD at (213) 806-8806.

IX. LAHD MONITORING REQUIREMENTS

All projects shall comply with the annual monitoring requirements established by LAHD by means of a Covenant and Agreement. It is the responsibility of the owner to notify LAHD of any changes in the building that may affect compliance, such as change of ownership, management agent or on-site manager, vacancies in restricted units, or changes in compliance with the Los Angeles Department of Building and Safety (LADBS) requirements.

The following are LAHD requirements (a complete list is found in the LAHD Covenant):

- LAHD reviews all initial tenants' eligibility for affordable, set-aside dwelling units prior to occupancy
- LAHD annually reviews tenants' eligibility for affordable dwelling units.
- Building owners must provide LAHD with an annual review letter identifying the number of restricted dwelling units, household income and size, rent levels, dwelling unit size and verification of vacancies. LAHD may at any time audit a building containing restricted units to monitor the occupancy of these units.
- LAHD may make annual site visits to ensure that the restricted dwelling units are maintained in decent, safe and sanitary condition and that they are provided with the same level of services, including security and maintenance, as are applied to the other dwelling units in the development.
- If violations are found, fees and/or fines may be levied against the owner including the cost of legal action.

X. PROCEDURE FOR OBTAINING HOUSING DEPARTMENT SIGN-OFF FOR BUILDING PERMIT APPLICATION

- In the plan check process, LADBS determines the allowable density.
- LADBS requires a building permit applicant to get a "sign-off" from various City departments, including LAHD, and provides the applicant a "Clearance Summary Worksheet" for this purpose.
- If the project has obtained additional incentive(s) or relief from a development standard, documentation provided by the Department of City Planning should be presented to Building and Safety in the plan check process.
- Owner or his/her representative provides the following information to LAHD, in order for an Agreement Containing Covenants Affecting Real Property (Covenant) to be prepared:
 - Copy of the LADBS Clearance Summary Worksheet
 - Copy of the LADBS "Application for Building Permit and Certificate of Occupancy"

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

- ~~○ Address of site~~
 - ~~○ Full legal description of property as specified in the grant deed~~
 - ~~○ Property owner's name, address and telephone number~~
 - ~~○ Name and title of individual signing the Agreement on behalf of the owner~~
 - ~~○ Name, address and phone number of owner's representative~~
 - ~~○ The incentives being requested and those that require a Covenant~~
 - ~~○ The original number of units permitted by the zoning, before bonus~~
 - ~~○ Number of units and bedroom mix of units~~
 - ~~○ Number of restricted, set-aside units and number of bedrooms contained in each~~
- ~~● LAHD confirms the required number of the restricted affordable units, as specified in the Zoning Code based upon the LADBS Clearance Summary Worksheet, or as required by the Planning Department, and assures that the set-aside units meet all requirements established by these Guidelines~~
 - ~~● LAHD determines the rent level or purchase price of the restricted affordable units and prepares a Covenant that establishes the number of such units, the affordability level and the term of affordability.~~
 - ~~● The owner signs the Covenant and has it notarized. LAHD then completes the electronic sign-off of the building permit application and has the Covenant recorded by the County of Los Angeles.~~
 - ~~● LAHD refers the applicant to LADBS to complete the permitting process.~~

~~Prior to the issuance of any Certificate of Occupancy, the following clearance must be obtained:~~

- ~~● Final clearance from LAHD that all conditions of the Agreement Containing Covenants Affecting Real Property have been met.~~

EXHIBIT A.2:
Resident Protections Ordinance

CPC-2023-7068-CA, CPC-2024-387-CA, CPC-2024-388-CA

For consideration by the City Planning Commission

September 26, 2024

ORDINANCE NO. _____

An ordinance amending Sections 12.03, 12.22, 12.24 of Article 2, Section 14.00 of Article 4, Sections 16.60 and 16.61 of Article 6.1, and Section 19.18 of Article 9 of Chapter 1 and Sections 51.31, 51.32, 51.33, 51.34 and 51.35 of Article 19 of Chapter 4 of the Los Angeles Municipal Code (LAMC), for the purpose of codifying housing replacement requirements, strengthening occupant protections, complying with state housing law and establishing reasonable regulations regarding affordable housing development for the protection of residents.

**THE PEOPLE OF THE CITY OF LOS ANGELES
DO ORDAIN AS FOLLOWS:**

Sec. 1. The following definitions are added to Section 12.03 of Article 2 of Chapter 1 of the LAMC in alphabetical order to read as follows:

Development Project includes any project involving the issuance of a City Planning application or building permit to allow the alteration of the size of or construction or demolition of any structure, or a change in the density or intensity of use of land consistent with how the term is used in Section 66300.6 of the California Government Code.

Housing Development Project has the same meaning as defined in paragraph (2) of subdivision (h) of California Government Code Section 65589.5, as amended from time to time, except that it also includes projects that involve no discretionary approvals and projects that include a proposal to construct a single dwelling unit

Protected Units means any of the following:

- (a) Residential dwelling units that are or were subject to a recorded covenant, ordinance, or law that restricts rents to levels affordable to persons and families of lower or very low income within the past five years.
- (b) Residential dwelling units that are or were subject to the Rent Stabilization Ordinance pursuant to Chapter XV of the LAMC, or any other form of rent or price control through a public entity's valid exercise of its police power within the past five years.
- (c) Residential dwelling units that are or were rented by lower or very low income households within the past five years.

- (d) Residential dwelling units that were withdrawn from rent or lease in accordance with the Ellis Act (Chapter 12.75 (commencing with Section 7060) of Division 7 of Title 1 of the California Government Code) within the past 10 years.

Replace has the same meaning as provided in subparagraphs (B) and (C) of paragraph (3) of subdivision (c) of Section 65915 of the California Government Code, as amended from time to time.

Sec. 2. Subparagraph (1) of Paragraph (d) of Subdivision 29. of Subsection A. of Section 12.22 of Article 2 of Chapter 1 of the LAMC is amended to read as follows:

- (1) For any project qualifying for a Floor Area Bonus that contains rental housing for Low, Very Low, Moderate or Workforce Income households, a covenant acceptable to the Los Angeles Housing Department shall be recorded with the Los Angeles County Recorder, guaranteeing that the affordability criteria will be observed for at least 55 or 99 ~~30~~-years pursuant to LAMC 16.61 A from the issuance of the Certificate of Occupancy or a longer period of time if required by the construction or mortgage financing assistance program, mortgage assistance program, or rental subsidy program. (Amended by Ord. No. 187,122, Eff. 8/8/21.)

Sec. 3. Subparagraph (1) of Paragraph (b) of Subdivision 31. of Subsection A. of Section 12.22 of Article 2 of Chapter 1 of the the LAMC is amended to read as follows:

- (1) A Housing Development located within a TOC Affordable Housing Incentive Area shall be eligible for TOC Incentives if it provides minimum required percentages of On-Site Restricted Affordable Units, meets any applicable replacement requirements of ~~California Government Code Section 65915(c)(3)~~ LAMC 16.60, and is...

Sec. 4. Subparagraph (1) of Paragraph (f) of Subdivision 31. of Subsection A. of Section 12.22 of Article 2 of Chapter 1 of the the LAMC is amended to read as follows:

- (1) For any Housing Development qualifying for a TOC Incentive that contains rental housing for Extremely Low, Very Low, or Lower Income households, a covenant acceptable to the Los Angeles Housing Department shall be recorded with the Los Angeles County Recorder, guaranteeing that the affordability criteria will be observed for 55 or 99 years pursuant to LAMC 16.61 A.

Sec. 5. Subparagraph (3) and (4) of Paragraph (a) of Subdivision 26. of Subsection U. of Section 12.24 of Article 2 of Chapter 1 of the the LAMC is amended to read as follows:

- (3) ...the project meets any applicable dwelling unit replacement requirements of ~~California Government Code Section 65915(c)(3)~~ LAMC Section 16.60;

(4) the project's Restricted Affordable Units are subject to a recorded affordability restriction of 55 or 99 years pursuant to LAMC 16.61 A from the issuance of the Certificate of Occupancy, recorded in a covenant acceptable to the Los Angeles Housing Department, and subject to fees as set forth in Section 19.14 of the Los Angeles Municipal Code; and (Amended by Ord. No. 187,122, Eff. 8/8/21.)

Sec. 6. Subparagraph (4) of Paragraph (a) of Subdivision 30. of Subsection U. of Section 12.24 of Article 2 of Chapter 1 of the the LAMC is amended to read as follows:

(d) the affordability of all reserved lower income dwelling units will continue for a minimum of 55 or 99 years pursuant to LAMC 16.61 A;

Sec. 7. Subparagraph (3) of Paragraph (c) of Subdivision 13. of Subsection A.. of Section 14.00 of Article 4 of Chapter 1 of the the LAMC is amended to read as follows:

(3) Projects shall meet any applicable dwelling unit replacement requirements of ~~California Government Code Section 65915(c)(3)~~ LAMC Section 16.60, or as thereafter amended, as verified by ~~LAHDHCDLA~~ and all applicable covenant and monitoring fees in Section 19.14 of this Code shall be paid by the applicant prior to the issuance of any building permit.

Sec. 8. Subparagraph (2) of Paragraph (c) of Subdivision 10. of Subsection A. of Section 14.00 of Article 4 of Chapter 1 of the the LAMC is amended to read as follows:

(2) ... guaranteeing that each required Restricted Affordable Unit shall be reserved and maintained for at least 55 or 99 years from the issuance of the Certificate of Occupancy pursuant to LAMC 16.61 A.

Sec. 9. A new Section 16.60 is added to Article 6.1 of Chapter 1 of the the LAMC as follows:

SEC. 16.60. DEMOLITION OF HOUSING UNITS

A. Development Projects that Result in the Demolition of Housing Units

1. **Purpose.** The purpose of this subdivision is to comply with state law and offer protections related to the demolition of housing units as part of Development Projects and to extend these requirements past their expiration date of January 1, 2030 for Housing Development Projects.

2. **Definitions.**

Affordable Housing Cost has the same meaning as defined in Section 50052.5 of the California Health and Safety Code as amended from time to time.

Affordable Rent has the same meaning as defined in Section 50053 of the California Health and Safety Code as amended from time to time.

Comparable Unit contains the same or greater number of existing bedrooms and bathrooms.

Equivalent Size means that the replacement units contain at least the same total number of bedrooms as the units being replaced.

3. **Approval of Housing Development Projects that Result in the Demolition of Housing Units.** Notwithstanding any law the City shall not approve any Housing Development Project that will require the demolition of occupied or vacant Protected Units, or that is located on a site where Protected Units were demolished in the previous five years, unless all of the following requirements are satisfied.

- (a) **Replacement of Existing or Demolished Protected Units.** The Housing Development Project shall Replace all existing Protected Units and Protected Units demolished on or after January 1, 2020 pursuant to the replacement requirements of California Government Code Section 65915(c)(3) consistent with the requirements included in this section. This is in addition to any requirements included in Section 151.28 (Ellis Act Provisions) of Article 1 of Chapter XV of the LAMC.

- (1) **Income Requirements.** Units occupied on the date of application shall be replaced with units at an Affordable Rent or Affordable Housing Cost to, and occupied by, persons and families in the same or lower income category as those households in occupancy based upon the units and incomes of those households in occupancy pursuant to California Government Code Section 65915(c)(3)(B)(i) inclusive of the following income categories: Low Income, Very Low Income, Extremely Low Income and Acutely Low Income. Units that have been demolished or vacated on the date of application shall be replaced with units at an Affordable Rent or Affordable Housing Cost based upon the highpoint in occupancy during the previous five years pursuant to California Government Code Section 65915(c)(3)(B)(ii).

- (i) **Replacement When Incomes Are Not Known.** If the incomes of the individuals and households are not known and unless otherwise demonstrated, the presumption in California Government Code Section 65915(c)(3)(B)(i)

regarding Lower Income Households shall be inclusive of the percentage of Extremely Low Income, Very Low Income and Low Income Households in the same proportion as their share of all renter households within the City of Los Angeles, as determined by the General Manager of the Los Angeles Housing Department utilizing the most recently available data from the United States Department of Housing and Urban Development's Comprehensive Housing Affordability Strategy database or equivalent census data disaggregated by tenure and income category.

(ii) **Replacement of Rent or Price Controlled Units.**

Notwithstanding LAMC 16.60 A.3(a)(1)(i) above, units subject to a form of rent or price control through a local government's valid exercise of its police power shall be replaced as follows:

(i) **In Higher Opportunity Areas and Moderate Opportunity Areas**, units deemed or presumed to be occupied by persons or families above the lower income category shall be replaced with low income units.

(ii) **In Lower Opportunity Areas**, with the units proportionate to the share of all lower income renter households within the City of Los Angeles described in LAMC 16.60 A.3(a)(1)(i) above.

(2) **Equivalent Size.** All replacement units must be Equivalent Size, and Development Projects shall contain at least the same total number of units and total aggregate number of bedrooms as the Protected Units being replaced. New units do not have to match bedroom configurations of demolished units, except when a tenant is exercising the right to return as defined in LAMC 16.60 A.3(b)(4).

(3) **Relationship to Other Affordability Requirements.** Any Protected Units replaced pursuant to this subparagraph shall be considered in determining whether the Housing Development Project satisfies the requirements of any state, local or federal requirement that requires, as a condition of the development of residential rental units, that the project provide a certain

percentage of residential rental units affordable to, and occupied by, households with incomes that do not exceed the limits for moderate-income, lower income, very low income, extremely low income, or acutely low income households, as specified in Sections 50063.5, 50079.5, 50093, 50105, and 50106 of the California Health and Safety Code.

(4) **Exceptions.** Notwithstanding the requirements above, the replacement requirements of this section shall not apply to the following:

- (i) A Housing Development Project that consists of a single residential unit on a site with a single Protected Unit.
- (ii) A Housing Development Project that complies with the requirements of LAMC Section 16.60 A.5(a).

(5) **Procedures.** Owners of a Housing Development Project subject to the above requirements must complete an application for a Replacement Unit Determination with the Los Angeles Housing Department (LAHD). Information provided by the owner and existing tenant(s), as well as information gathered by LAHD will be used to determine whether any Protected Units exist.

(b) **Existing Occupant Protections**

(1) **Right to Remain.** Any existing occupants shall be allowed to occupy their units until six months before the start of construction activities with proper notice, subject to Chapter 16 (commencing with Section 7260) of Division 7 of Title 1 of the California Government Code. The project proponent shall provide existing occupants with written notice of the planned demolition, the date they must vacate, and their rights under this section. Notice shall be provided at least six months in advance of the date that existing occupants must vacate plus additional extensions under state or local law that may require an additional notification period.

(2) **Right to Return if Demolition Does Not Proceed.** Any existing occupants that are required to leave their units shall be allowed to return to the same rental unit, or a Comparable Unit at their prior rental rate if the demolition does not proceed and the property is returned to the rental market. This right to return is in addition to any applicable requirement in Los Angeles Municipal Code

Section 151.27 (Ellis Act Provisions - Re-Rental Rights of Displaced Tenants) of Article 1 of Chapter XV.

(3) **Right to Relocation.** Occupants of Lower Income Households including Very Low Income and Extremely Low Income, shall be entitled to, and the owner shall pay, relocation benefits under this provision in the amounts set forth below when the occupant is displaced by the owner from their residence by a development project. The owner shall pay the relocation benefits required pursuant to this provision prior to the issuance of any demolition permit for the site.

- (i) For purposes of determining whether a tenant is displaced by a Development Project, the following actions shall constitute evidence of development:
 - a. Owner files for an entitlement or building permit for a Development Project requiring the demolition of an existing rental unit and the tenancy is or will be terminated as result; or
 - b. Owner applies for a Replacement Unit Determination and the tenancy is or will be terminated as a result; or
 - c. Owner serves a notice or otherwise seeks to terminate a tenancy or recover possession of a rental unit based upon one of the grounds under LAMC Sections 165.03 I(1) or (3) (Just Cause Evictions) of Article 5 of Chapter XVI, 151.09 A.10 (Evictions) of Article 1 of Chapter XV, 47.08 (Tenant Relocation Assistance Where Mobilehome Parks Are Changed to a Different Use) or 47.09 (Mobilehome Park Closure Impact Report) of Article 7 of Chapter IV requiring payment of relocation assistance that includes evidence of intent to develop the property.
- (ii) For occupants that are Lower Income Households including Very Low Income and Extremely Low Income households, who are displaced from their residence by a Development Project under the criteria set forth above, the relocation benefit shall be:

- a. Equal to the difference between the Section 8 Department Voucher Payment Standard and the rent affordable to that occupant's income level per Section 50053 of the California Health and Safety Code, multiplied by 42 months, plus estimated incidental moving costs. The amount for the Section 8 Department Voucher Payment Standard, the determination of the affordable rent per Section 50053 of the California Health and Safety Code, and the estimated incidental moving costs shall be determined upon the adoption of this ordinance, and then adjusted annually according to the Consumer Price Index – All Urban Consumers. For efficient implementation, the City will use a 2-bedroom standard since 2-bedrooms are the most common unit type in the City. For the year beginning July 1, 2025, and all subsequent years, the fee amounts shall be adjusted on an annual basis pursuant to the formula set forth in LAMC Section 151.06 D (Automatic Adjustments) of Article 1 of Chapter XV. The adjusted amount shall be rounded to the nearest \$50 increment.
 - b. If the occupant is entitled to a relocation benefit due to a termination of tenancy under the Los Angeles Municipal Code Sections 165.03 I(1) or (3) (Just Cause Evictions) of Article 5 of Chapter XVI, 151.09 A.10 (Evictions) of Article 1 of Chapter XV, 47.08 (Tenant Relocation Assistance Where Mobilehome Parks Are Changed to a Different Use) or 47.09 (Mobilehome Park Closure Impact Report) of Article 7 of Chapter IV, the payment shall be made in accordance with Los Angeles Municipal Code Section 151.09 G.1-2 (Evictions) of Article 1 of Chapter XV.
 - c. For mobile home park closures, at least the amount required by Government Code Section 65863.7.
- (iii) For occupants who are not Lower Income Households, relocation benefits shall be the amounts as applicable pursuant to Los Angeles Municipal Code Section 165.06 A (Just Cause Ordinance), 151.09 G (Rent Stabilization

Ordinance), Government Code 65863.7 (Mobile Home Closures) or for publicly funded projects the greater amount under either local city laws or under Chapter 16 (commencing with Section 7260) of Division 7 of Title 1 of the California Government Code.

- (iv) Under no circumstances shall a demolition permit be issued unless the Los Angeles Housing Department provides a written clearance to the Department of Building and Safety stating that the landlord has complied with the relocation assistance requirements of this section. The landlord shall provide proof of compliance with the relocation assistance requirements of this section to the Los Angeles Housing Department on a form provided by the Los Angeles Housing Department. The form shall be accompanied by a fee of \$45 per unit.

- (v) If an owner of residential real property has exercised its rights under Chapter 12.75 (commencing with Section 7060) of Division 7 of Title 1 of the California Government Code to withdraw the property from residential rent or lease or LAMC 165.03 I (1) or (3) (Just Cause Evictions) of Article 5 of Chapter XVI, and the owner did not state an intent to redevelop the property in its Notice of Intent to Withdraw; and the owner did not pay occupants of the property relocation payments consistent with LAMC 16.60 A.3(b)(3)(ii), above, and then within five years of submitting this Notice of Intent to Withdraw, the owner seeks to develop the property as demonstrated by actions described in LAMC 16.60 A.3(b)(3)(i), above, the following shall apply:
 - a. As a condition of the clearance of demolition or new construction permits, the applicant or the applicant's successor-in-interest shall be required to pay to the LAHD a fine equal to three times the relocation benefit amount that would have been paid under LAMC 16.60 A.3(b)(3)(ii), above where the income of the former occupants are known; where incomes of the former occupants are not known, the applicant shall be required to pay \$250,000 per displaced occupant household. The LAHD shall not clear a demolition or new construction permit until the

applicant complies with this section. The withholding of permits shall not apply to demolition permits or approvals that are necessary to comply with a Department of Building and Safety, LAHD, or other government order.

- i. **Notice Process.** When a owner seeks a demolition or new construction permit clearance from LAHD at a property where the owner may have misrepresented its intention to develop the property in its Notice of Intent to Withdraw, and it has not paid relocation benefits to tenants consistent with having displaced them for development, LAHD will provide written notice to the owner that the LAHD's clearance of the permits is conditioned on payment of the fine. The notice shall include the address of the property at issue, a copy of the owners Notice of Intent to Withdraw, the amount of the potential fine, and the process to appeal the imposition of the fine.
- ii. **Appeal Process.** The notice shall include a right to file an appeal within 30 calendar days of the notice of the condition to pay the fine which shall include the right to an administrative hearing.

Owners who file an appeal will be subject to an administrative fee to pay for the costs of the appeal. The amount will be the same amount as for appeals under LAMC Section 165.06.C (Relocation Assistance) of Article 5 of Chapter XVI.

After the hearing officer issues a decision in the administrative hearing, the owner will have a right to seek judicial review of the determination governed by California Code of Civil Procedure Section 1094.5. Under that provision, a petitioner may seek judicial review of any decision of the City pursuant to California Code of Civil Procedure Section 1094.5 only if the

petition for writ of mandate pursuant to that section is filed no later than the 90th day following the date on which the City's decision became final.

- b. Any Lower Income Household who is displaced as a result of a tenancy termination for the purpose of property development under Los Angeles Municipal Code Sections 165.03 I.(1) or (3) (Just Cause Evictions) of Article 5 of Chapter XVI, 151.09 A.10 (Evictions) of Article 1 of Chapter XV, 47.08 (Tenant Relocation Assistance Where Mobilehome Parks Are Changed to a Different Use) or 47.09 (Mobilehome Park Closure Impact Report) of Article 7 of Chapter IV, shall be entitled to relocation benefits under Section LAMC 16.60 A.3(b)(3)(ii)(a), above. The payment shall be made in accordance with Los Angeles Municipal Code Section 151.09.G.1-2 (Evictions) of Article 1 of Chapter XV.
- c. For the occupant who was in possession of their unit at the time the owner filed the Notice of Intent to Withdraw who seeks to pursue a private right action under LAMC Section 16.60 A.7, below, for causes of action arising out of 16.60 A.3(b)(3)(v) above, the cause of action shall accrue when the owner files for an entitlement, building permit, or Replacement Unit Determination to construct a Development Project.

(4) **Right to Return.** The developer shall provide the following to the existing occupants of any Protected Units that are lower income households and agree to this requirement on a form provided by the Los Angeles Housing Department:

- (i) A right of first refusal for a Comparable Unit available in the new housing development affordable to the household at their prior rental rate or an Affordable Rent or an Affordable Housing Cost, whichever is lower. In cases where the prior rental rate is used to establish the initial rent, subsequent rent increases for such tenants shall not exceed the allowable rent increase for rent stabilized units under LAMC Chapter XV (Rent Stabilization Ordinance), and this limitation shall be included in the covenant recorded for the

affordable replacement unit. In cases where one or more single family homes with four or more bedrooms are being replaced by a project that consists of two or more units, a Comparable Unit may have three bedrooms. This requirement shall not apply to any of the following:

- a. A Development Project that consists of a single residential unit located on a site where a single Protected Unit is being demolished.
- b. Units in a housing development in which 100 percent of the units, exclusive of a manager's unit or units, are reserved for Lower Income Households, except when Protected Units occupied by an occupant who qualifies for residence in the new development and for whom providing a Comparable Unit would not be precluded due to unit size limitations or other requirements of any funding source of the housing development, as determined by the Los Angeles Housing Department.
- c. A Development Project that meets all of the criteria in 16.60 A.4(a)(1).

(5) Additional Tenant Notification Obligations.

- (i) Project applicants shall notify existing tenants in writing of all their legal rights under LAMC Section 16.60 A.3(b). Information regarding the tenant's eligibility for these rights, rent guidelines for the new unit, and any procedures the tenant will need to follow to exercise these rights shall be provided in writing to the tenant in accordance with any and all requirements and procedures of LAHD's Replacement Unit Determination (RUD). The applicant shall provide and maintain accurate contact information to tenants for purposes of communicating throughout the construction and lease up of the Development Project.
- (ii) Project applicants or their predecessor-in-interest shall provide written notice to any tenant who is exercising their right to return of major milestones in the development process, including but not limited to: (1) the start of

construction, (2) on at least a bi-annual basis provide updates on the anticipated date of when occupancy would be opened, (3) at least 180, 90, 30 and 15 days in advance of the anticipated availability of the unit pursuant to the issuance of the Temporary or Final Certificate of Occupancy, (4) when the Temporary Certificate of Occupancy is issued, and (5) when the Final Certificate of Occupancy is issued. Failure to inform tenants of the project's major milestones may result in additional time provided to the tenant to return to the replacement unit. This shall not preclude tenants from contacting the applicant or their predecessor-in-interest to inquire about progress throughout construction and lease up of the Development Project.

- (iii) Where a tenant household has a right of return pursuant to LAMC Section 16.60 A.3(b), the project applicant or their predecessor-in-interest shall notify the tenant household. The notice must comply with the applicable standards set forth by LAHD and include the rent guidelines for the project and any procedures the tenant will need to follow in order to claim a new unit. Where LAHD has created a standard notice, the project applicant must provide that standard notice to tenant households.
- (iv) Within thirty (30) days of receipt of the notice that the Final Certificate of Occupancy has been issued and the replacement unit is available, a tenant household must notify the owner if it wishes to reoccupy the replacement unit or room. The owner must hold the unit or room vacant at no cost to the tenant for sixty (60) days from the date the tenant household's written notice of its intent to reoccupy the rental unit is received.
- (v) Where a tenant household has a right to remain pursuant to LAMC Section 16.60 A.3(b) the project applicant or their predecessor-in-interest shall provide written notice to existing occupants of the planned demolition, the date they must vacate, and their rights under this section.
- (vi) Project applicants who experience unforeseen delays in issuance of a Temporary Certificate of Occupancy or Certificate of Occupancy impacting the timeline of their

construction milestone updates shall not be subject to the Private Right of Action described in LAMC Section 16.60 A.7, so long as they can demonstrate compliance with the tenant notification obligations in LAMC Section 16.60 A.3(b)(5).

4. Approval of Non-Housing Development Projects that Result in the Demolition of Housing Units until January 1, 2030. Notwithstanding any law, the City shall not approve any Development Project that is not a Housing Development Project that will require the demolition of occupied or vacant Protected Units, or that is located on a site where Protected Units were demolished in the previous five years, until January 1, 2030, unless all of the following requirements are satisfied.

(a) **Replacement of Existing or Demolished Protected Units.** The project shall Replace all existing Protected Units and Protected Units demolished on or after January 1, 2020 pursuant to the replacement requirements of California Government Code Section 65915(c)(3) and Section 16.60 A.3(a) of this Code, consistent with the following requirements:

- (1) The Development Project may not include an industrial use nor be located on a site that is entirely within a zone, adopted prior to January 1, 2022, that does not allow residential uses and the Protected Units that are or were on the project site are or were nonconforming uses.
- (2) At the time of permit issuance, a Development Project proponent must sign an affidavit for the Los Angeles Department of Building and Safety to ensure the replacement housing will be developed prior to or concurrently to the Development Project. Developed prior means a Certificate of Occupancy or Temporary Certificate of Occupancy for the replacement housing must be obtained prior to issuance of a Certificate of Occupancy or Temporary Certificate of Occupancy for the nonresidential Development Project.
- (3) The required replacement housing may be located on a site other than the project site but shall be located within the City of Los Angeles, with a preference for sites within close proximity.
- (4) The project proponent may contract with another entity to develop the required replacement housing units, except that the replacement housing units shall not fulfill the affordability requirements of any other development pursuant to another law.

(5) A commercial developer seeking a commercial density bonus may propose providing restricted affordable units through an agreement with a housing developer for partnered housing. The agreement must be approved by the City pursuant to California Government Code Section 65915.7.

(6) Notwithstanding the requirement that an Accessory Dwelling Unit be located on a lot with an existing or proposed primary residence, the replacement housing may be established through creation of an Accessory Dwelling Unit with the primary nonresidential use on the parcel being able to be used in place of a primary residence.

(b) **Existing Occupant Protections.** The Development Project meets the occupant protections described in LAMC Section 16.60 A.3(b).

(c) **Sunset Provisions.** The requirements of this subparagraph shall not apply to projects approved after January 1, 2030, except for those Development Projects that submitted a preliminary application pursuant to Section 65941.1 of the California Government Code before January 1, 2030. This subsection shall remain in effect only until January 1, 2034, and as of that date is repealed.

5. No Net Loss of Dwelling Units. Notwithstanding any other law and notwithstanding density limitations on a site, no permit shall be issued for a Housing Development Project that will require the demolition of one or more residential dwelling units irrespective of Protected Unit status, unless the project will create at least as many residential dwelling units as will be demolished. In addition, the Housing Development Project shall include at least as many residential dwelling units as the greatest number of residential dwelling units that existed on the project site within the last five years, except for the following:

(a) LAHD may approve an off-site replacement plan for buildings with covenanted affordable housing units that request approval to build a smaller number of units on the site in the following circumstances:

(1) The proposed construction of the new affordable units cannot Replace all units on site due to physical changes in unit type, such as replacing Single Room Occupancy or Residential Hotel guest rooms with studio dwelling units.

(2) The proposed construction of the new affordable housing units cannot Replace all units on site and meet the City's required

Accessible Housing Program standards.

- (3) Off-site replacements units approved pursuant to this subparagraph shall be subject to the following requirements, subject to LAHD approval:
 - i) The off-site replacement housing units will be of Equivalent Size or larger and have equivalent amenities as the on-site replacement housing units, and will be covenanted at the same affordability levels and for at least the same length of time as the on-site replacement housing.
 - ii) The off-site replacement housing units will be constructed within a three mile radius of the on-site replacement housing units.

6. Withholding or Revoking of Demolition Permit Approval for Illegal Tenant Harassment or Eviction

(a) Thresholds to Place individual or entity on LAHD's Anti-Harassment Violators Database. LAHD shall place a beneficial owner onto the LAHD Anti-Harassment Violators Database when:

- (1) A final judgment has been issued against the beneficial owner within the last five years for unlawful tenant harassment under the City's Tenant Anti-Harassment Ordinance, known as "TAHO," as set forth under Article 5.3 in Chapter IV of the Los Angeles Municipal Code, or similar actions within City limits under California Civil Code Section 1940.2, 1942.4, or 1942.5; or
- (2) The City has either (A) issued three final citations for TAHO violations at properties in the City against the beneficial owner within the last ten years for which all appellate remedies have expired or (B) in zones where there is a heightened risk of displacement of lower income tenants as determined by the City's Displacement Assessment Risk Tool, issued one final citation for TAHO violations at a property against the beneficial owner within the last five years for which all appellate remedies have expired; or
- (3) A final judgment has been issued against the beneficial owner within the last five years for wrongfully or illegally evicting a tenant within City limits, or causing a tenant to involuntarily quit within City limits in

violation of local or State law.

(4) Definition. For purposes of LAMC Section 16.60 A.6, a "beneficial owner" includes any of the following:

- (i) A natural person with a recorded ownership interest in the real property where the tenant harassment takes place.
- (ii) An ownership entity, including a corporation, limited liability company, limited partnership, partnership, or trust with a recorded interest in the real property where the tenant harassment takes place
- (iii) An entity or natural person that meets any of the following criteria:
 - a. has an ownership interest, as the term is defined in Section 1010.380(d)(2)(i)-(ii) (Reports of Beneficial Ownership Information) of Title 31 of the Code of Federal Regulations, in an entity described in Sub-subparagraph (4)(i) or (4)(ii) above; or
 - b. exercises "substantial control", as the term is defined in Section 1010.380(d)(1) (Reports of Beneficial Ownership Information) of Title 31 of the Code of Federal Regulations, over an entity described in Sub-subparagraph (4)(i) or (4)(ii) above; or
 - c. receives "substantial economic benefits" from the assets of an entity described in Sub-subparagraph (4)(i) or (4)(ii) above.
- (iv) An owner for purposes of the above does not mean any of the following:
 - a. A minor child;
 - b. A person acting solely as an employee of an ownership entity and whose control over or economic benefits from that ownership entity derives solely from the employment status of the person;

- c. A person whose only interest in an ownership entity is a future interest through a right of inheritance; or
- d. A creditor of an ownership entity, unless the creditor meets the requirements specified in Sub-subparagraph (4)(i) above.

(b) **Notice of Determination and Right to Staff Review.** Upon placement in the LAHD Anti-Harassment Violators Database, LAHD shall send a Notice of Determination to the known beneficial owner(s) placed into the database. A copy of the Notice of Determination shall also be mailed to the beneficial owner(s) of the property, if different from the applicant or permittee, as shown on the last equalized assessment roll, and to any person holding a deed of trust, mortgage, or other security interest in the property as revealed by a title search with respect to the property.

The Notice of Determination shall state that the LAHD General Manager, or designee, has determined that the beneficial owner should be placed in the LAHD Anti-Harassment Violators Database because the criteria in LAMC Section 16.60 A.6(a) have been satisfied, the basis for that determination, and the potential consequences under this ordinance. This section does not create any new appeal rights under the Administrative Citation Enforcement Program, known as the ACE program. Within 14 days of the date of this notice, the beneficial owner(s), subject to being placed in the database, shall have a right to request an LAHD staff level review of this determination. At the review, the beneficial owner may submit any evidence relevant to this determination.

(c) **Review of Determination.** The LAHD staff review shall be set on a date no earlier than 20 days after the date of the Notice of Determination, and the review shall be conducted no later than 60 days after the date of the Notice of Determination. At the review, the beneficial owner may submit any evidence relevant to this determination regarding the correct identity of the violator and the correct number of violations. The review shall be limited to whether the beneficial owner meets one of the stated criteria set forth in LAMC Section 16.60 A.6(a) above.

Within thirty (30) days of the review, LAHD shall provide a written LAHD Notice of Outcome notifying the beneficial owner of the outcome of the review. If the determination is upheld in review, the beneficial owner may seek judicial review by writ of mandamus.

(d) **Consequences of Placement on LAHD's Anti-Harassment Violators Database.** When there has been a final determination to place a beneficial owner on the LAHD Anti-Harassment Violators Database, LAHD shall notify in writing the Superintendent of Building and Safety and the Director of Planning.

If any applicant or permittee seeking a demolition permit or approval pursuant to LAMC Section 16.60 for a Development Project involving new construction, major renovations, or additions, that is within a property with Protected Units and the applicant or permittee is on the LAHD Anti-Harassment Violators Database, the Superintendent of Building and Safety shall withhold or revoke the issuance of any demolition permits for five years and the Director of Planning shall withhold the issuance of any approval for five years. Where the City has denied or revoked a demolition permit or approval to any applicant under this paragraph (iv), the denial or revocation for a five year term for the subject property shall transfer ("run with the land") at sale to any new owner, unless the new owner is developing a publicly-financed affordable housing project on the same site where more than 50 percent of the units are affordable, except for manager's unit(s).

The withholding or revoking of permits shall not apply for demolition permits or approvals that are necessary to comply with a Department of Building and Safety, LAHD, or other government order.

The five-year hold period shall commence on the date that the court's final judgment or the City's citation is final and no further judicial remedies are available.

If at the end of the five-year hold period, no new citations have been issued to and no court findings have been made against the beneficial owner(s), the beneficial owner(s) shall be removed from the LAHD Anti-Harassment Violators database. However, if during the five-year period, there is a new citation or court finding against the same beneficial owner, the five-year ban shall be extended from the date that the most recent citation or court finding becomes final and no further appeals available. No citation used to place a beneficial owner into the database may be used against the beneficial owner more than once.

Any action by the Department of Building and Safety or the Department of City Planning resulting from any of the provisions of this section, including demolition permit revocation and withholding of an approval shall not be

further appealable.

- (e) **Operative Date and Subsequent Ordinance.** This LAMC Section 16.60 A.6 shall become operative upon the effective date that LAHD establishes a determination and review process and publishes a notice of its effective date on the LAHD website and at least once in a newspaper circulated in the City of Los Angeles.

If the City adopts a subsequent ordinance in conflict with the procedures in this LAMC Section 16.60 A.6 relating to the withholding or revoking of a demolition permit, this Subparagraph shall be of no further force and effect.

7. Private Right of Action; Civil Penalties.

- (a) An aggrieved tenant under LAMC Section 16.60, or any person, organization, or entity who will daily and adequately represent the interests of an aggrieved tenant(s) under this LAMC Section 16.60, may institute civil proceedings as provided by law, against any applicant, or their successor-in-interest, violating any of the provisions of this LAMC Section 16.60 and any person who aids, facilitates, or incites another to violate the provisions of this article, including but not limited to submitting false information in response to the requirements of this section, regardless of whether the rental unit remains occupied or has been vacated due to harassment.
- (b) A tenant prevailing in court under this LAMC Section 16.60 shall be awarded reasonable attorney's fees and costs. A tenant prevailing in court under this LAMC Section 16.60 may be awarded compensatory or punitive damages, and imposition of civil penalties up to \$10,000 per violation of this LAMC Section 16.60 depending upon the severity of that violation, tenant relocation, or other appropriate relief, as adjudged by the court. Treble damages may also be awarded for willful violations. If a tenant prevailing under this article is older than 65 years or disabled, the court may impose additional civil penalties up to \$5,000 per violation depending upon the severity of the violation of this LAMC Section 16.60.
- (c) Any landlord or their agents violating any of the provisions of LAMC Section 16.60, may be enjoined therefrom by a court of competent jurisdiction.
- (d) The remedies to bring a civil action under LAMC Section 16.60 shall extend to current tenants at a property, to former tenants at a property

who were displaced by violations of LAMC Section 16.60 at a property, and to the City. The remedies in this paragraph are not exclusive nor do they preclude any tenant from seeking any other remedies, penalties and punitive damages, as provided by law.

- (e) The remedies provided by this LAMC Section 16.60 are in addition to any other legal or equitable remedies and are not intended to be exclusive.
- (f) Any agreement, whether written or oral, waiving any of the provisions contained in this LAMC Section 16.60 shall be void as contrary to public policy.

8. Relationship to Other Zoning Provisions. The Demolition of Housing Units Standards in LAMC Section 16.60 A shall apply citywide except for Historic Preservation Overlay Zones (HPOZs). Specific Plans, Supplemental Use Districts, or other overlays may establish additional replacement requirements and/or additional occupant protections greater than those provided in LAMC 16.60 A, in which case, the greater replacement requirements and occupant protections shall be used.

Sec. 10. A new Section 16.61 is added to Article 6.1 of Chapter 1 of the LAMC as follows:

SEC. 16.61. RESTRICTED AFFORDABLE HOUSING UNITS

A. Length of Affordability.

1. Unless covenant terms are otherwise specified due to a requirement contained in Chapter 1 of this Code or as a condition of approval, a Development Project is subject to this section and must be restricted by a covenant acceptable to the Los Angeles Housing Department recorded with the Los Angeles County Recorder, guaranteeing that the occupancy restriction will be observed for at least 99 years from the issuance of the Certificate of Occupancy except for:
 - (a) A Development Project in which public subsidies are tied to a specified covenant period, as determined by the Los Angeles Housing Department, unless voluntarily agreed to by the project applicant.
 - (b) For sale units, which must be consistent with the for-sale requirements of California Government Code Section 65915(c)(2).
 - (c) Residential Units for Lower Income Students, Transitional Foster Youth, Disabled Veterans, and/or Homeless Persons, shall be provided at affordability levels as determined in Los Angeles Municipal Code Section 12.22 A.37 for at least 55 years from the issuance of the Certificate of Occupancy or a longer period of time if required by the construction or

mortgage financing assistance program, mortgage assistance program, or rental subsidy program.

B. Requirements Regarding Unit Design, Unit Mix, Unit Size, Quality and Amenities, Access to, and Distribution of Affordable Units in Mixed-Income Development Projects. The Los Angeles Housing Department shall have the authority to establish and administer requirements applicable to all Restricted Affordable Units in mixed-income developments regarding the unit mix, unit size, quality and amenities, access to and distribution of affordable housing units in mixed-income Development Projects, in order to ensure compliance with fair housing law and any other applicable requirements, including but not limited to requirements from funding sources. The requirements shall be enforced through an approval prior to permit issuance. The requirements shall be established in a set of Fair Housing Requirements for Affordable Housing created by the Los Angeles Housing Department and the Department of City Planning, and adopted by Resolution at the City Planning Commission. LAHD shall have the authority to interpret these requirements to best implement their goals.

1. Amendments to the Fair Housing Requirements for Affordable Housing shall be approved by the City Planning Commission, pursuant to the procedures in Sec. 13B.1.5 (Guidelines or Standards Adoption/Amendment) of Chapter 1A of this Code.
2. The Director of Planning and General Manager of LAHD may prepare Implementation Memorandums, Technical Bulletins and/or User Guides for the purpose of providing additional information pertaining to this Subsection and maintaining consistency with State Housing Crisis Act.

C. Allocation of Restricted Affordable Units. Restricted Affordable Units shall be subject to the following:

1. **Affirmative Marketing and Fair Housing Outreach.** Sale or lease of the Restricted Affordable Units shall follow the affirmative marketing and outreach requirements of the Los Angeles Housing Department (LAHD), as outlined in a deed restriction drafted by LAHD and filed with the County of Los Angeles.
2. **Affordable and Accessible Housing Registry.** All Restricted Affordable Units shall be registered to the extent feasible on the Affordable and Accessible Housing Registry managed by the LAHD, or any existing equivalent listing, when available for rent.
3. **Priority Populations.** To the extent practical and in alignment with local, state and federal law, and pursuant to any locally adopted guidelines, the Affirmative

Marketing and Fair Housing Outreach provisions in Subdivision 1 and Affordable and Accessible Housing Registry in Subdivision 2 of Subsection C of Section 16.61, as well as any other City Planning or LAHD administrative procedure, should attempt to prioritize those with the greatest housing needs that have been displaced by government actions. This may include, but not be limited to:

- (a) Any person or household who has been displaced through a withdrawal of units pursuant to the Ellis Act and Sections 151.22 to 151.28 (Ellis Act Provisions) of Article 1 of Chapter XV of the LAMC.
- (b) A lower income person or household subject to a rent increase related to conversion to market-rate housing due to termination of a public funding subsidy contract, mortgage prepayment, or expiring use restrictions based on land use entitlement concessions.
- (c) A person or household who was displaced due to a code enforcement order, including those affected by a natural disaster that resulted in their residential unit being rendered uninhabitable.

D. Private Right of Action; Civil Penalties

1. A covenant acceptable to the Department of City Planning and the Los Angeles Housing Department shall be recorded guaranteeing the requirements in this LAMC Section 16.61 and providing for a private right of enforcement by the City, any tenant of any building to which a covenant and agreement applies.
2. An aggrieved tenant under LAMC Section 16.61, or collection of tenants as part of a representative class, may institute civil proceedings as provided by law, against any applicant, or their successor-in-interest, violating any of the provisions of the covenant as described in this LAMC Section 16.61 and any person who aids, facilitates, or incites another to violate the provisions of this article, including but not limited to submitting false information in response to the requirements of this section, regardless of whether the rental unit remains occupied or has been vacated due to harassment.
3. A tenant prevailing in court to enforce any provisions of this LAMC Section 16.61 shall be awarded reasonable attorney's fees and costs. A tenant prevailing in court to enforce any provisions of the covenant as described in this LAMC Section 16.61 may be awarded compensatory or punitive damages, and imposition of civil penalties up to \$10,000 per violation of provisions of the covenant described in this LAMC Section 16.61 depending upon the severity of that violation, tenant relocation, or other appropriate relief, as adjudged by the court. Treble damages may also be awarded for willful violations. If a tenant

prevailing under this article is older than 65 years or disabled, the court may impose additional civil penalties up to \$5,000 per violation depending upon the severity of the violation of the covenants as described in this LAMC Section 16.61.

4. Any landlord or their agents violating any of the provisions of the covenant as described in this LAMC Section 16.61, may be enjoined therefrom by a court of competent jurisdiction.
5. The remedies to a successful civil action brought under LAMC Section 16.61 shall extend to current tenants at a property, to former tenants at a property who were displaced by violations of the covenants as described in LAMC Section 16.61 at a property, and to the City. The remedies in this subsection are not exclusive nor do they preclude any tenant from seeking any other remedies, penalties and punitive damages, as provided by law. The remedies provided by this LAMC Section 16.61 are in addition to any other legal or equitable remedies and are not intended to be exclusive.
6. Any agreement, whether written or oral, waiving any of the provisions contained in this LAMC Section 16.61 shall be void as contrary to public policy.

E. Relationship to Other Zoning Provisions. The Restricted Affordable Units Standards in LAMC Section 16.61 shall apply citywide except HPOZs. Specific Plans, Supplemental Use Districts, or other overlays may establish longer covenant lengths, requirements for unit design, mix, etc. and/or additional allocation requirements greater than those provided in LAMC 16.61, in which case the greater covenant length, requirements for unit design, mix, etc. and allocation requirements shall be used.

Sec. 11. Paragraph (b) and (h) of Subdivision (2) of Subsection B. of Section 19.18 of Article 9 of Chapter 1 of the the LAMC is amended to read as follows:

(b) ... Such a covenant shall also subject projects using this exemption to the replacement policies in ~~Government Code Section 65915(e)(3)~~ LAMC Section 16.60, as that section may be amended from time to time, and...

(h) Any project located within the boundaries of the Central City West Specific Plan Area, as defined in Ordinance No. 163,094, if the Applicant agrees by covenant and agreement with the City or by development agreement to abide by the linkage fee and replacement housing obligations set forth in ~~the Specific Plan for the Central City West Area~~ LAMC Section 16.60.

Sec. 12. Article 19 of Chapter 4 of the the LAMC is amended to read as follows:

See LAMC Section 16.60 (Demolition of Housing Units) of Article 2 of Chapter 1 of this code.

SEC. 51.31. DEFINITIONS:

~~—The following words and phrases, whenever used in this article, shall be construed as defined in this section:~~

~~—“Complete application” refers to a complete application pursuant to Section 65943 of the California Government Code.~~

~~—“Housing development project” shall have the same meaning as defined in paragraph (3) of subdivision (b) of Section 65905.5 of the California Government Code; however, shall not include a housing development project located within a very high fire hazard severity zone.~~

~~—“Protected units” has the same meaning as set forth in California Government Code Section 66300(d)(2).~~

~~—“Very high fire severity zone” has the same meaning as provided in California Government Code Section 51177.~~

SEC. 51.32. APPLICABILITY:

~~—This article shall apply only to housing development projects that: (1) on or after January 1, 2022, but before January 1, 2030, submit a complete application to the Department of City Planning or a complete set of building plans for plan check and permit to the Department of Building and Safety, along with any associated submittal fee; or (2) on or after the effective date of this article, receive an approval of a complete application that was submitted to the Department of City Planning on or after January 1, 2020, but before January 1, 2022. This article does not apply to a housing development project that submitted a complete application to the Department of City Planning before January 1, 2020.~~

SEC. 51.33. REPLACEMENT OBLIGATIONS AND OCCUPANT PROTECTIONS REQUIRED FOR NEW HOUSING DEVELOPMENT PROJECTS:

~~—A.—The City shall not approve or issue a building permit for a housing development project that will require the demolition of one or more residential dwelling units unless the project will create at least as many residential dwelling units as will be demolished.~~

~~—B.—The City shall not approve or issue a building permit for a housing development project that will require the demolition of occupied or vacant protected units, unless the housing development project meets all of the requirements of California Government Code Section 66300(d)(2).~~

SEC. 51.34. SEVERABILITY:

~~—If any provision of this article is found to be unconstitutional or otherwise invalid by any court of competent jurisdiction, that invalidity shall not affect the remaining provisions of this article which can be implemented without the invalid provisions, and to this end, the provisions of this article are declared to be severable. The City Council hereby declares that it would have adopted this article and each provision thereof irrespective of whether any one or more provisions are found invalid, unconstitutional or otherwise unenforceable.~~

~~SEC. 51.35. SUNSET PROVISION:~~

~~—A. This article shall remain in effect only until January 1, 2034, and as of that date is repealed.~~

~~—B. A housing development project that submits a preliminary application pursuant to Section 65941.1 of the California Government Code before January 1, 2030, remains subject to this article after January 1, 2030.~~

DRAFT

EXHIBIT A.3:
Housing Element Sites and Minimum Density Ordinance

CPC-2023-7068-CA, CPC-2024-387-CA, CPC-2024-388-CA

For consideration by the City Planning Commission

September 26, 2024

ORDINANCE NO. _____

An ordinance adding Section 16.70 and 12.22.C.28 and amending Sections 12.09.1, 12.10, 12.10.5, 12.11, 12.11.5, 12.12, 12.12.2, 12.13, 12.13.5, 12.14, 12.16, 12.17, 12.17.1 of Chapter 1 of the Los Angeles Municipal Code (LAMC) for the purpose of establishing reasonable regulations regarding affordable housing development, codifying housing replacement requirements, establishing minimum density requirements and to comply with state housing law.

**THE PEOPLE OF THE CITY OF LOS ANGELES
DO ORDAIN AS FOLLOWS:**

Sec. 1. Section 16.70 of Chapter 1 of the the Los Angeles Municipal Code is added to read as follows:

SEC. 16.70. HOUSING ELEMENT SITES AND MINIMUM DENSITY ORDINANCE

A. **Purpose.** This section is intended to create procedures to implement state housing element law related to sites identified by the most recent Housing Element of the General Plan and its associated rezoning program. These regulations shall apply to the Inventory of Housing Element Sites, Prior Housing Element Sites and Lower Income Rezoning Housing Element Sites and where so stated herein shall supersede the regulations applying on the sites pursuant to state law.

B. **Definitions.** For purposes of this Section the following words and phrases are defined as follows:

“Development Project” has the same meaning as defined in Section 12.03 of Article 2 of Chapter 1 of the LAMC.

“Housing Development Project” has the same meaning as defined in Section 12.03 of Article 2 of Chapter 1 of the LAMC.

“Housing Element Sites” means sites listed on the inventory of land suitable for residential development developed pursuant to paragraph (3) of subdivision (a) of California Government Code Section 65583 that exists in the most recently adopted Housing Element, including Appendices 4.1, 4.2, and 4.3 of the 2021-2029 Housing Element.

“Lower Income Households” has the same meaning as defined in Section 50079.5 of the Health and Safety Code.

“Lower Income Rezoning Housing Element Sites” means sites that were rezoned as part of a rezoning program to meet the Housing Element need for

very low and low-income households allocated pursuant to Government Code Section 65584. The inventory of these sites shall be established by City Council Resolution, submitted to the state each year as part of the Housing Element Annual Progress Report and identified in a public mapping system including the Zoning Information Mapping and Access System (ZIMAS). Sites shall comply with Government Code Section 65583.2(h)

“Ministerial Approval” means an administrative review process to approve a “use by right” as this term is defined in California Government Code Section 65583.2(i).

“Prior Housing Element Sites” means Housing Element Sites identified as meeting the criteria for a prior housing element site in the most recently adopted Housing Element, including non vacant sites that were identified in the prior Housing Element and vacant sites that were identified in the prior two Housing Elements, including sites identified in Column O P of Appendix 4.1 of the current 2021-2029 Housing Element.

“Protected units” has the same meaning as defined in Section 12.03 of Article 2 of Chapter 1 of the LAMC.

C. Requirements for Development Projects on Housing Element Sites.

Notwithstanding any law including any density limits, the City shall not approve a development project on a Housing Element Site that will require the demolition of occupied or vacant protected units, or that is located on a site where protected units were demolished in the previous five years, unless all of the following requirements are satisfied.

1. Replacement of Existing or Demolished Protected Units.

(a) **Housing Development Projects.** A Housing Development Project will replace all existing Protected Units and Protected Units demolished on or after January 1, 2020 pursuant to the replacement requirements of California Government Code Section 65915(c)(3) and Section 16.60 A.3(a) of this Code.

(b) **Non Housing Development Projects.** A Development Project that is not a Housing Development Project must satisfy the replacement requirements in California Government Code Section 65915(c)(3) and Section 16.60 A.4(a), except that the provisions in Section 16.60 A.4(c) shall not apply.

D. Maintenance of Adequate Housing Element Sites Throughout the Housing Element Period.

1. The Departments of City Planning and Building and Safety shall not, through any administrative, quasi-judicial, legislative or other actions, reduce the density of a Housing Element Site, or approve any development project on a Housing Element Sites parcel(s) with fewer units in aggregate, by income category, than shown as realistic capacity in the most recent list of Housing Element Sites for the remaining housing element planning period pursuant to California Government Code Section 65584, including from columns P, Q, R and S of Appendix 4.1 and Appendix 4.2, and columns E, F, G and H of Appendix 4.3 of the current 2021-2029 Housing Element, unless it either:
 - (a) Makes a finding pursuant to Government Code Section 65863(b)(2) that, while the proposed project would result in fewer units by income category than those identified in the Housing Element Sites inventory prepared for the 2021-2029 Housing Element, the remaining sites identified in the Housing Element of the General Plan are adequate to meet the requirements of GC Section 65583.2 and to accommodate the jurisdiction's share of the regional housing need pursuant to GC Section 65584. A written finding with substantial evidence shall be included as part of approval of the project on the number of sites by income category and their adequacy to meet the requirements.
 - (b) If a finding can not be made, the Department of City Planning shall, within 180 days, identify and make available additional adequate sites through a rezoning to accommodate the jurisdiction's share of the regional housing need by income level.
2. A housing development project may not be denied on the basis that approval of the housing project would require compliance with this Subsection.

E. Approval Requirements for Housing Element Sites**1. Ministerial Approval for Prior Housing Element Sites**

If a Housing Development Project is proposed on a Prior Housing Element Site and at least twenty percent of the project's units will be made affordable and available to Lower Income Households, the project shall be subject to Ministerial Approval pursuant to California Government Code section 65583.2(i). If an eligible project would have otherwise required a discretionary entitlement from the Department of City Planning it shall be processed through an Expanded Administrative Review process, as set forth by the provisions of Sec. 13B.3.2. of

Chapter 1A of this Code.

2. Ministerial Approval for Lower Income Rezoning Housing Element Sites.

If a Housing Development Project is proposed on a Lower Income Rezoning Housing Element Site, and at least twenty percent of the project's units will be made affordable and available to Lower Income Households, the project shall be subject to Ministerial Approval pursuant to California Government Code section 65583.2(i). If an eligible project would have otherwise required a discretionary entitlement from the Department of City Planning it shall be processed through an Expanded Administrative Review process, as set forth by the provisions of Sec. 13B.3.2. of Chapter 1A of this Code.

3. Densities for Lower Income Rezoning Sites.

If a Housing Development Project is proposed on a Lower Income Rezoning Housing Element-Site, it shall not be approved unless it meets a minimum density requirement of 20 units per acre, inclusive of Accessory Dwelling Units.

Section 2. A new Subdivision 5 of Subsection B of Section 12.09.1 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

5. Minimum Density. In the RD1.5 and RD2 zones located within a High or Medium High Residential Market Area pursuant to the Affordable Housing Linkage Fee established by LAMC 19.18 C, a minimum density of one Dwelling Unit or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for every Housing Development Project on lots, prior to any subdivision, meeting the minimum width on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 3. A new Subdivision 5 of Subsection C of Section 12.10 of Chapter 1 of the LAMC shall be added as follows:

5. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area is required for every Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 4. A new Subdivision 6 of Subsection C of Section 12.10.5 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

6. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for every Housing Development Project development project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 5. A new Subdivision 6 of Subsection C of Section 12.11 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

6. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for every Housing Development Project residential development project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 6. A new Subdivision 6 of Subsection C of Section 12.11.5 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

6. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for every Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 7. A new Subdivision 6 of Subsection C of Section 12.12 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

6. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for every Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the

requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 8. A new Subdivision 6 of Subsection C of Section 12.12.2 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

6. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 9. A new Subdivision 6 of Subsection C of Section 12.13 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

6. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 10. A new Subdivision 5 of Subsection B of Section 12.13.5 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

5. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 11. A new Subdivision 5 of Subsection C of Section 12.14 of Chapter 1 of the Los Angeles Municipal Code as follows:

5. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 12. A new Subdivision 5 of Subsection C of Section 12.16 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

5. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, with the exception of lots meeting the requirements of Section 12.22 C.28 of this code. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 13. A new Subdivision 4 of Subsection C of Section 12.17 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

4. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, with the exception of lots meeting the requirements of Section 12.22 C.28 of this code. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 13. A new Subdivision 4 of Subsection C of Section 12.17.1 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

4. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, with the exception of lots meeting the requirements of Section 12.22 C.28 of this code. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 14. Add Subdivision 28 to Subsection C of Section 12.22 of Chapter 1 of the the Los Angeles Municipal Code is added to read as follows:

28. Minimum Density in the RD2, RD1.5, R3, RAS3, R4, RAS4, R5, C1, C1.5, C2, C4, C5 and CM Zones. In the RD2, RD1.5, R3, RAS3, R4, RAS4, R5, C1, C1.5, C2, C4, C5 and CM Zones, the minimum density requirements shall not apply to the following types of development projects unless they are designated Lower Income Rezoning Housing Element Sites pursuant to LAMC 16.70 E3:

- a) Additions, remodeling or rehabilitations that do not result in more than 1,500 square feet in net new Floor Area and that do not result in the demolition of an existing dwelling unit(s).
- b) The only new dwelling unit(s) being added to the parcel is an Accessory Dwelling Unit(s).
- c) Existing dwelling units or guest rooms that have been damaged by a disaster or are deemed unsafe by LADBS and are being reconstructed with no increase to the amount Floor Area in the prior building or buildings.
- d) The development is located on an environmentally sensitive area specified in subparagraphs-(B) to (K) of Government Code Section 65913.4(a)(6), including a Very High Fire Hazard Severity Zone, regardless of any mitigations.
- e) Lots where at least 60% of the Lot is composed of Slopes which are 30% or greater, as determined by a Slope Analysis Map prepared in accordance with LAMC 12.21 C.10(b)(1).
- f) Lots that are designated as parks or open space in any plan or zoning designation.
- g) Lots that contain a Designated Historic Resource.
- h) Lots that can not achieve the minimum density requirement due to any objective provision that physically precludes the construction of a development per the Los Angeles Municipal Code or due to any provision of Specific Plans, or Q, T, D Conditions, or a Community Plan Implementation Overlay.

EXHIBIT A.3:
Housing Element Sites and Minimum Density Ordinance

CPC-2023-7068-CA, CPC-2024-387-CA, CPC-2024-388-CA

For consideration by the City Planning Commission

September 26, 2024

ORDINANCE NO. _____

An ordinance adding Section 16.70 and 12.22.C.28 and amending Sections 12.09.1, 12.10, 12.10.5, 12.11, 12.11.5, 12.12, 12.12.2, 12.13, 12.13.5, 12.14, 12.16, 12.17, 12.17.1 of Chapter 1 of the Los Angeles Municipal Code (LAMC) for the purpose of establishing reasonable regulations regarding affordable housing development, codifying housing replacement requirements, establishing minimum density requirements and to comply with state housing law.

**THE PEOPLE OF THE CITY OF LOS ANGELES
DO ORDAIN AS FOLLOWS:**

Sec. 1. Section 16.70 of Chapter 1 of the the Los Angeles Municipal Code is added to read as follows:

SEC. 16.70. HOUSING ELEMENT SITES AND MINIMUM DENSITY ORDINANCE

A. **Purpose.** This section is intended to create procedures to implement state housing element law related to sites identified by the most recent Housing Element of the General Plan and its associated rezoning program. These regulations shall apply to the Inventory of Housing Element Sites, Prior Housing Element Sites and Lower Income Rezoning Housing Element Sites and where so stated herein shall supersede the regulations applying on the sites pursuant to state law.

B. **Definitions.** For purposes of this Section the following words and phrases are defined as follows:

“**Development Project**” has the same meaning as defined in Section 12.03 of Article 2 of Chapter 1 of the LAMC.

“**Housing Development Project**” has the same meaning as defined in Section 12.03 of Article 2 of Chapter 1 of the LAMC.

“**Housing Element Sites**” means sites listed on the inventory of land suitable for residential development developed pursuant to paragraph (3) of subdivision (a) of California Government Code Section 65583 that exists in the most recently adopted Housing Element, including Appendices 4.1, 4.2, and 4.3 of the 2021-2029 Housing Element.

“**Lower Income Households**” has the same meaning as defined in Section 50079.5 of the Health and Safety Code.

“**Lower Income Rezoning Housing Element Sites**” means sites that were rezoned as part of a rezoning program to meet the Housing Element need for

very low and low-income households allocated pursuant to Government Code Section 65584. The inventory of these sites shall be established by City Council Resolution, submitted to the state each year as part of the Housing Element Annual Progress Report and identified in a public mapping system including the Zoning Information Mapping and Access System (ZIMAS). Sites shall comply with Government Code Section 65583.2(h)

“Ministerial Approval” means an administrative review process to approve a “use by right” as this term is defined in California Government Code Section 65583.2(i).

“Prior Housing Element Sites” means Housing Element Sites identified as meeting the criteria for a prior housing element site in the most recently adopted Housing Element, including non vacant sites that were identified in the prior Housing Element and vacant sites that were identified in the prior two Housing Elements, including sites identified in Column O P of Appendix 4.1 of the current 2021-2029 Housing Element.

“Protected units” has the same meaning as defined in Section 12.03 of Article 2 of Chapter 1 of the LAMC.

C. Requirements for Development Projects on Housing Element Sites.

Notwithstanding any law including any density limits, the City shall not approve a development project on a Housing Element Site that will require the demolition of occupied or vacant protected units, or that is located on a site where protected units were demolished in the previous five years, unless all of the following requirements are satisfied.

1. Replacement of Existing or Demolished Protected Units.

(a) **Housing Development Projects.** A Housing Development Project will replace all existing Protected Units and Protected Units demolished on or after January 1, 2020 pursuant to the replacement requirements of California Government Code Section 65915(c)(3) and Section 16.60 A.3(a) of this Code.

(b) **Non Housing Development Projects.** A Development Project that is not a Housing Development Project must satisfy the replacement requirements in California Government Code Section 65915(c)(3) and Section 16.60 A.4(a), except that the provisions in Section 16.60 A.4(c) shall not apply.

D. Maintenance of Adequate Housing Element Sites Throughout the Housing Element Period.

1. The Departments of City Planning and Building and Safety shall not, through any administrative, quasi-judicial, legislative or other actions, reduce the density of a Housing Element Site, or approve any development project on a Housing Element Sites parcel(s) with fewer units in aggregate, by income category, than shown as realistic capacity in the most recent list of Housing Element Sites for the remaining housing element planning period pursuant to California Government Code Section 65584, including from columns P, Q, R and S of Appendix 4.1 and Appendix 4.2, and columns E, F, G and H of Appendix 4.3 of the current 2021-2029 Housing Element, unless it either:
 - (a) Makes a finding pursuant to Government Code Section 65863(b)(2) that, while the proposed project would result in fewer units by income category than those identified in the Housing Element Sites inventory prepared for the 2021-2029 Housing Element, the remaining sites identified in the Housing Element of the General Plan are adequate to meet the requirements of GC Section 65583.2 and to accommodate the jurisdiction's share of the regional housing need pursuant to GC Section 65584. A written finding with substantial evidence shall be included as part of approval of the project on the number of sites by income category and their adequacy to meet the requirements.
 - (b) If a finding can not be made, the Department of City Planning shall, within 180 days, identify and make available additional adequate sites through a rezoning to accommodate the jurisdiction's share of the regional housing need by income level.
2. A housing development project may not be denied on the basis that approval of the housing project would require compliance with this Subsection.

E. Approval Requirements for Housing Element Sites**1. Ministerial Approval for Prior Housing Element Sites**

If a Housing Development Project is proposed on a Prior Housing Element Site and at least twenty percent of the project's units will be made affordable and available to Lower Income Households, the project shall be subject to Ministerial Approval pursuant to California Government Code section 65583.2(i). If an eligible project would have otherwise required a discretionary entitlement from the Department of City Planning it shall be processed through an Expanded Administrative Review process, as set forth by the provisions of Sec. 13B.3.2. of

Chapter 1A of this Code.

2. Ministerial Approval for Lower Income Rezoning Housing Element Sites.

If a Housing Development Project is proposed on a Lower Income Rezoning Housing Element Site, and at least twenty percent of the project's units will be made affordable and available to Lower Income Households, the project shall be subject to Ministerial Approval pursuant to California Government Code section 65583.2(i). If an eligible project would have otherwise required a discretionary entitlement from the Department of City Planning it shall be processed through an Expanded Administrative Review process, as set forth by the provisions of Sec. 13B.3.2. of Chapter 1A of this Code.

3. Densities for Lower Income Rezoning Sites.

If a Housing Development Project is proposed on a Lower Income Rezoning Housing Element-Site, it shall not be approved unless it meets a minimum density requirement of 20 units per acre, inclusive of Accessory Dwelling Units.

Section 2. A new Subdivision 5 of Subsection B of Section 12.09.1 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

5. Minimum Density. In the RD1.5 and RD2 zones located within a High or Medium High Residential Market Area pursuant to the Affordable Housing Linkage Fee established by LAMC 19.18 C, a minimum density of one Dwelling Unit or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for every Housing Development Project on lots, prior to any subdivision, meeting the minimum width on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 3. A new Subdivision 5 of Subsection C of Section 12.10 of Chapter 1 of the LAMC shall be added as follows:

5. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area is required for every Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 4. A new Subdivision 6 of Subsection C of Section 12.10.5 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

6. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for every Housing Development Project development project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 5. A new Subdivision 6 of Subsection C of Section 12.11 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

6. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for every Housing Development Project residential development project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 6. A new Subdivision 6 of Subsection C of Section 12.11.5 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

6. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for every Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 7. A new Subdivision 6 of Subsection C of Section 12.12 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

6. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for every Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the

requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 8. A new Subdivision 6 of Subsection C of Section 12.12.2 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

6. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 9. A new Subdivision 6 of Subsection C of Section 12.13 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

6. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 10. A new Subdivision 5 of Subsection B of Section 12.13.5 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

5. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 11. A new Subdivision 5 of Subsection C of Section 12.14 of Chapter 1 of the Los Angeles Municipal Code as follows:

5. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, except when the requirements of Section 12.22.C.28 are met. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 12. A new Subdivision 5 of Subsection C of Section 12.16 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

5. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, with the exception of lots meeting the requirements of Section 12.22 C.28 of this code. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 13. A new Subdivision 4 of Subsection C of Section 12.17 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

4. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, with the exception of lots meeting the requirements of Section 12.22 C.28 of this code. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 13. A new Subdivision 4 of Subsection C of Section 12.17.1 of Chapter 1 of the Los Angeles Municipal Code shall be added as follows:

4. Minimum Density. A minimum density of one Dwelling Unit, inclusive of Accessory Dwelling Units, or Guest Room for every 2,000 square feet of lot area, inclusive of Accessory Dwelling Units, is required for Housing Development Project on lots, prior to any subdivision, meeting the minimum width and lot area requirements for the zone, with the exception of lots meeting the requirements of Section 12.22 C.28 of this code. The minimum density calculation shall be rounded up to ensure the standard is met. If the minimum lot area per dwelling or guest room for the zone does not allow for the construction of the required minimum density, the minimum density shall not apply.

Section 14. Add Subdivision 28 to Subsection C of Section 12.22 of Chapter 1 of the the Los Angeles Municipal Code is added to read as follows:

28. Minimum Density in the RD2, RD1.5, R3, RAS3, R4, RAS4, R5, C1, C1.5, C2, C4, C5 and CM Zones. In the RD2, RD1.5, R3, RAS3, R4, RAS4, R5, C1, C1.5, C2, C4, C5 and CM Zones, the minimum density requirements shall not apply to the following types of development projects unless they are designated Lower Income Rezoning Housing Element Sites pursuant to LAMC 16.70 E3:

- a) Additions, remodeling or rehabilitations that do not result in more than 1,500 square feet in net new Floor Area and that do not result in the demolition of an existing dwelling unit(s).
- b) The only new dwelling unit(s) being added to the parcel is an Accessory Dwelling Unit(s).
- c) Existing dwelling units or guest rooms that have been damaged by a disaster or are deemed unsafe by LADBS and are being reconstructed with no increase to the amount Floor Area in the prior building or buildings.
- d) The development is located on an environmentally sensitive area specified in subparagraphs-(B) to (K) of Government Code Section 65913.4(a)(6), including a Very High Fire Hazard Severity Zone, regardless of any mitigations.
- e) Lots where at least 60% of the Lot is composed of Slopes which are 30% or greater, as determined by a Slope Analysis Map prepared in accordance with LAMC 12.21 C.10(b)(1).
- f) Lots that are designated as parks or open space in any plan or zoning designation.
- g) Lots that contain a Designated Historic Resource.
- h) Lots that can not achieve the minimum density requirement due to any objective provision that physically precludes the construction of a development per the Los Angeles Municipal Code or due to any provision of Specific Plans, or Q, T, D Conditions, or a Community Plan Implementation Overlay.

Exhibit B.1 - CITY PLANNING COMMISSION RESOLUTION TO AMEND AFFORDABLE HOUSING INCENTIVE GUIDELINES AND ESTABLISH FAIR HOUSING REQUIREMENTS FOR AFFORDABLE HOUSING

EXHIBIT B.1:

City Planning Commission Resolution to Amend Affordable Housing Incentive Guidelines and Establish Fair Housing Requirements for Affordable Housing

CPC-2023-7068-CA, CPC-2024-387-CA, CPC-2024-388-CA

For consideration by the City Planning Commission

September 26, 2024

Exhibit B.1 - CITY PLANNING COMMISSION RESOLUTION TO AMEND AFFORDABLE HOUSING INCENTIVE GUIDELINES AND ESTABLISH FAIR HOUSING REQUIREMENTS FOR AFFORDABLE HOUSING

RESOLUTION

WHEREAS, pursuant to City Charter section 550 and 551 and Los Angeles Municipal Code (LAMC) sections 12.22 A.25 of Chapter 1 and 13A.1.3(d)(2)(C) of Chapter 1A, the City Planning Commission has the authority adopt or amend Guidelines and Standards;

WHEREAS, the Affordable Housing Incentive Guidelines, adopted by the City Planning Commission in 1995 and updated in 2004 and 2005, more fully describe the provisions of state Density Bonus law (CA Government Code Section 65915) including qualifying criteria, provisions to meet fair housing requirements, as well as the incentives and procedures available to qualifying projects.

WHEREAS, the City's 2005 Density Bonus Ordinance (No. 179681), established in LAMC Section 12.22.A.25, was adopted by Los Angeles City Council on February 20, 2008;

WHEREAS, the Density Bonus Ordinance requires that Housing Development Projects for which a Density Bonus has been requested are evaluated for compliance with the requirements of the ordinance and the the Affordable Housing Incentives Guidelines;

WHEREAS, the Affordable Housing Incentives Guidelines, which were last adopted by the City Planning Commission on June 9, 2005, have become out of date with many amendments to state Density Bonus law and City procedures since 2005;

WHEREAS, the Ordinance and Guidelines contain the authority for the City Planning Commission to modify the Affordable Housing Incentives Guidelines by a resolution of the City Planning Commission;

WHEREAS, a draft of Fair Housing Requirements for Affordable Housing has been proposed for the City Planning Commission's considerations, with the intent that these requirements be adopted by the Commission and applied to restricted affordable housing units located in mixed-income housing development projects pursuant to the LAMC;

WHEREAS, the City Planning Commission has considered the proposed amendments to the Affordable Housing Incentives Guidelines and the Fair Housing Requirements for Affordable Housing;

Exhibit B.1 - CITY PLANNING COMMISSION RESOLUTION TO AMEND AFFORDABLE HOUSING INCENTIVE GUIDELINES AND ESTABLISH FAIR HOUSING REQUIREMENTS FOR AFFORDABLE HOUSING

NOW, THEREFORE, BE IT RESOLVED, that the resolution to amend the Affordable Housing Incentives Guidelines and adopt the Fair Housing Requirements for Affordable Housing, both of which shall become effective upon the operative date of the CHIP Ordinance, is adopted by the City Planning Commission.

EXHIBIT B.2:
Fair Housing Requirements for Affordable Housing

CPC-2023-7068-CA, CPC-2024-387-CA, CPC-2024-388-CA

For consideration by the City Planning Commission

September 26, 2024

FAIR HOUSING REQUIREMENTS FOR AFFORDABLE HOUSING

The following requirements shall be applied to restricted affordable housing units located in mixed-income housing development projects pursuant to Los Angeles Municipal Code Section 16.61 B in order to facilitate fair housing opportunities.

1. **Unit Mix.** Except as these requirements conflict with any housing replacement requirements pursuant to state or local law, the number of Restricted Affordable Units that are required in mixed-income housing development projects shall reflect the project's unit type mix, in terms of the number of bedrooms. Five or more bedroom units may be provided for by creating either three or four bedroom Restricted Affordable Units as long as the total number of bedrooms are replaced as affordable. For cases where rounding results in fewer Restricted Affordable Units of a particular number of bedrooms than required, the share of units with the highest remainder shall be rounded up. In cases where rounding would result in more total Restricted Affordable Units than otherwise required, then the share of units with the lowest remainder shall not be rounded. In instances where the remainders are equal, then the larger unit type should be allocated as Restricted Affordable Units.
2. **Unit Size.** Restricted Affordable Units shall, on average, be no less than 90% of the average square footage of the market rate units for the unit type. In addition, if these requirements conflict with state or local requirements relating to housing replacement or right of return related to the demolition of protected units, the provision resulting in the higher number of bedrooms shall be required.
3. **Quality and Amenities.** Restricted Affordable Units should be generally comparable to market rate dwelling units in construction quality and basic amenities for daily living (laundry, patios/balconies, number of bathrooms, etc.), but may differ in the quality of interior "finish" materials (eg., flooring, cabinetry, hardware, countertops, appliances, light fixtures, bathroom fixtures, trim and moldings, wall coverings, etc).
4. **Distribution.** Restricted Affordable Units should be interspersed equally on different floors but are not required to be located on a particular floor if the number of units is less than the number of stories. No two Restricted Affordable Units may be located next to each other or isolated to a specific area of the building, such as near the freight elevator or trash room, or vertically stacked. Restricted Affordable Units should generally not be separated into one building, except in cases where the affordable units will be located on the same development site, including across the street, and is necessary, as determined by LAHD, to facilitate either: 1) servicing of special needs populations (e.g. seniors, persons with disabilities, target populations, etc.) that benefit from unique services in their own building, or 2) a relocation plan to house residents being displaced. Units awarded as part of a density bonus pursuant to CA Government Code Section 65915 shall be permitted in geographic areas of

Exhibit B.2 - FAIR HOUSING REQUIREMENTS FOR AFFORDABLE HOUSING

the housing development other than the areas where the units for the lower income households are located. An applicant can seek an exemption from distribution of Restricted Affordable Units on the top floor for penthouses subject to the approval of LAHD.

5. **Access.** The occupants of the Restricted Affordable Units within a mixed-income multifamily development shall have the same access to the common entrances, areas and amenities as the occupants of the market-rate housing units and may not be charged for amenities that are provided at no cost to other residents including, but not limited to, access to recreational facilities, parking, internet, TV, and interior amenities such as laundry spaces, dishwashers and microwave ovens. Optional services provided must be optional for all residents, and available to all under the same terms and conditions. Tenants of restricted affordable units cannot be required to purchase additional services.

AFFORDABLE HOUSING INCENTIVES GUIDELINES

I. SCOPE AND PURPOSE

As required by State law, the Municipal Code implements the State's density bonus provisions by setting forth the density bonus program requirements, incentives and procedures. These Guidelines more fully describe the density bonus provisions and qualifying criteria; the incentives available to qualifying projects; and the procedures whereby projects may apply for a bonus and incentives.

The Guidelines may be modified by resolution of the Planning Commission.

II. DEFINITIONS

Area Median Income (AMI) – The estimate of median income in the Los Angeles – Long Beach Primary Metropolitan Statistical Area that is determined periodically by the US Department of Housing and Urban Development (HUD), adjusted for household size and which is published periodically.

Density Bonus -- A density increase over the otherwise maximum allowable residential density pursuant to California Government Code Section 65915. The density bonus shall apply to housing developments consisting of three or more dwelling units.

Incentive or Concession – A reduction in a development standard or a modification of the Zoning Code.

Moderate Income, Lower Income and Very Low Income – Annual income of a household that does not exceed the Area Median Income for the income category as specified in the California Health and Safety Code Sections 50079.5 and 50105. (See Appendix for Annual Household Income Levels)

Mass Transit Station – A transit stop for a fixed rail system or Major Bus Center. A station is one that is currently in use, whose location is proposed and for which a full funding contract has been signed by all funding partners, or one for which a resolution to fund a preferred alignment has been adopted by the Los Angeles County Metropolitan Transit Authority.

Major Bus Route – A bus route with peak-hour headways of 15 minutes or less in two directions for 2 of the 3 hours between 4:00 p.m. and 7:00 p.m.

Senior Citizens – Individuals who are at least 62 years of age, except that for density bonus projects of at least 35 dwelling units, a threshold of 55 years of age may be used, provided all applicable City, State and federal regulations are met.

III. DENSITY BONUS AND SET-ASIDES [\(SEE APPENDIX FOR EXAMPLES\)](#)

Density bonus provisions apply to projects of 5 or more units, [prior to any density bonus](#). Projects qualify for a **20% density bonus**, if they provide the following tenant set-asides for a period of at least ~~30-55~~ years, as established by State Law:

- **5% of the dwelling units for Very Low Income households**, earning no more than 50% of the AMI and paying no more in rent than the amount established by LAHD for households earning up to 50% of the median income, OR
- **10% of the dwelling units for Lower Income households**, earning no more than 80% of the AMI and paying no more in rent than the amount established by the Los Angeles Housing Department (LAHD) for households earning up to 60% of the median income.

Projects may qualify for an **additional density bonus to a maximum of 35%** provided the number of set-aside units are increased as follows:

- For each 1% increase in the percentage of Very Low Income affordable units, projects will receive an additional 2.5% density bonus up to a maximum of 35%.
- For each 1% increase in the percentage of Lower Income affordable units, projects will receive an additional 1.5% density bonus up to a maximum of 35%.

Projects qualify for an **additional 10% density bonus up to a maximum of 35%** if they are located on or near a transit corridor or major employment center (see By-Right Incentives, below).

[Projects qualify for an additional density bonus up to a maximum of 88% or 100% if a project provides an additional set-aside of Very Low Income or Moderate Income units, as set forth in the tables of Government Code Section 65915\(v\).](#)

Senior Housing Projects

State law provides an automatic 20% density bonus for housing projects that set-aside 100% of the housing for senior citizens. There are no income or rent restrictions for this bonus. As an incentive to provide affordable housing for seniors, senior housing projects that set aside at least 10% of the units for Lower Income seniors or 5% of the units for Very Low Income seniors will qualify for an additional 15% density bonus, for a total density bonus of 35%. All senior housing projects are required to sign a Covenant with the Los Angeles Housing Department assuring that the units are restricted to seniors for a period of 30 years.

For-Sale Housing Developments

Housing developments that set-aside 5% of the dwelling units for sale to Very Low Income households or 10% of the dwelling units for sale to Lower Income dwelling units will qualify for the density bonus a 20% and additional density up to a maximum of 35% as noted above.

Housing developments that set aside 10% of the dwelling units for buyers who meet the criteria of Moderate Income households (earning no more than 120% of AMI) will also qualify for a density bonus of 20%. For each additional 1% set-aside, the developer may receive an additional 1%

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

density bonus up to a maximum of 35%. It is the intent of this program that these units will be owner-occupied.

Consistent with State law, the owner of the Moderate Income ~~and lower income levels~~ set-aside unit can sell that unit any time at an unrestricted price. At the time of sale, the owner can recoup his/her down payment, and the value of any improvements, but any profit must be shared with the City. The City's share is equal to the percentage by which the initial sale price to the Moderate-Income Household was less than the fair market value of the home at the time of the initial sale. These funds are to be used within ~~five~~^{three} years for the construction, rehabilitation, or preservation of affordable housing for Extremely Low, Very Low, Lower, and Moderate-Income persons or families.

~~The Los Angeles Housing Department (LAHD) will develop additional guidelines to implement this provision of State law and to address for sale Lower and Very Low Income units.~~

● **Donation of Land in Lieu of Set Aside**

State law permits an applicant for a subdivision, parcel map or other residential development approval to obtain a 15% density bonus, if the applicant donates land to the City that meets, at a minimum, the following criteria:

- The developable acreage and zoning of the land being transferred are sufficient to permit construction of at least 10% of the number of residential units in the proposed development.
- The transferred land is at least one acre in size or of sufficient size to permit development of at least 40 units.
- The transferred land is within the boundary of the proposed development, or with the City's agreement, within ¼ mile of the development.
- The transferred land is fully entitled to permit the number of required affordable units.
- The applicant donates and transfers the land no later than the date of approval of the final subdivision map, parcel map or residential development application.

For each additional 1% land donated, the applicant may obtain an additional 1% density bonus up to a maximum of 35%. Also, an applicant may receive a density bonus for setting aside affordable units within the development project with the total bonus not to exceed 35%.

Density Bonus Calculation

The number of ~~set-aside and~~ density bonus units is based upon the maximum density allowed in the zone. State law requires that all density and set-aside calculations resulting in a fractional number be rounded up to the next whole number. For example, a 5,000 square foot lot in the R3 zone would permit ~~7~~⁶ units (not ~~6~~⁷ since the maximum density ~~allowed~~ is ~~also not~~ "rounded up"). A 20% bonus would allow 2 extra units (1.2 is rounded up to 2 extra units). The required set-aside for Very Low Income households would be 1 unit (5% of 6 is .03, which is rounded up to 1.)

Where the developer is not requesting a density bonus and the housing development uses less than the maximum density allowed in the zone, the percentage of set-aside units is based upon the number of units in the development.

Other Discretionary Approval

Approval of density bonus units does not, in and of itself, trigger other discretionary approval such as Site Plan Review.

Term of Affordability

All Lower and Very Low Income rental density bonus units must remain affordable for ~~30~~ 55 years (or longer, if required by the construction or mortgage financing assistance program, mortgage insurance program, or rental subsidy program.) ~~L.A.H.D. has determined that State law has been amended to clarify that~~ equity sharing is the ~~preferred~~ method of ensuring ongoing availability of affordable housing upon re-sale of affordable restricted ~~units~~. ~~L.A.H.D. will be preparing implementing guidelines for the re-sale of Moderate, Lower and Very Low Income restricted units.~~

IV. BY-RIGHT INCENTIVES

Parking. State law provides parking standards that may be requested by a developer of a density bonus project and that the City must grant if requested. These standards apply not only to the restricted affordable units (the set-aside units) but also to the entire project. These standards are inclusive of handicapped and guest parking and are as follows:

- 0 – 1 bedrooms: one onsite parking space
- 2 – 3 bedrooms: two onsite parking spaces
- 4 or more bedrooms: 2½ parking spaces

If the total number of spaces required in the development results in a fractional number, it is rounded up to the next whole number. Tandem parking and uncovered parking are also permitted to meet these parking requirements.

State Law has also been amended to permit additional types of parking reductions for certain types of projects, and/or projects located in certain areas. Please see California Government Code Section 65915(p) for more.

Transit Corridor / Major Employment Centers. Projects that meet the following criteria will be granted an additional 10% density bonus, up to a maximum of 35%:

- At or within a 1,500 foot radius of an existing or fully funded major bus center, bus stop along a major bus route (defined as a bus route with peak-hour headways of 15 minutes or less in two directions in at least two of the three hours between 4:00 p.m. and 7:00 p.m.), or mass transit station; or
- At or within a 1,500 foot radius of an intersection of transit priority arterials; or

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

- In or within a 1,500 foot radius of the boundaries of a regional center; or
- In or within a 1,500 foot radius of boundaries of a major economic activity area (LAX, the Port of Los Angeles and Downtown);
- Within 1,500 feet of the boundaries of a college or university with an enrollment exceeding 10,000 students.

V. OTHER AFFORDABLE HOUSING INCENTIVES

In conformance with State law, at least one incentive or concession, in addition to the density bonus, must be provided to projects that set aside affordable units. The number of incentives increases as the percentage of set-aside units increases, as follows:

Very Low Income Households:

- One Incentive/Concession – 5% set-aside
- Two Incentives/Concessions – 10% set-aside
- Three Incentives/Concessions – 15% set-aside
- [Four Incentives/Concessions – 16% set-aside](#)

Low Income Households and

- [One Incentive/Concession – 10% set-aside](#)
- [Two Incentives/Concessions – 27% set-aside](#)
- [Three Incentives/Concessions – 24% set-aside](#)
- [Four Incentives/Concessions – N/A](#)

Moderate Income Households:

- One Incentive/Concession – 10% set-aside
- Two Incentives/Concessions – 20% set-aside
- Three Incentives/Concessions – 30% set-aside
- [Four Incentives/Concessions – 45% set-aside](#)

Menu of Incentives/Concessions

Projects may request one or more of the following incentives or concessions, depending upon the income level of the targeted households and the percentage of set-aside units, in order to provide the affordable units:

- Up to 20% deviation from yard/setback requirements, except along any property line that abuts an R1 or more restrictively zoned property
- Up to 20% deviation from lot coverage requirements
- Up to 20% deviation from lot width requirements
- Up to 20% deviation from floor area requirements
- Up to 20% deviation from open space requirements
- Up to 20% additional building height, with the exception of properties within a Specific Plan for which 10% additional building height will be permitted

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

- Include area of street and alley dedication for purposes of calculating density
- A reduction or waiver in parking to include:
 - A reduction in parking requirements to not less than 1 parking space per restricted dwelling unit irrespective of the number of habitable rooms.
 - A reduction in parking requirements to not less than ½ parking space per dwelling unit for dwelling units restricted to Very Low or Low Income senior citizens.

VI. PROCEDURE FOR PROJECTS REQUESTING INCENTIVES/CONCESSIONS

For projects requesting a density bonus and one or more incentives included in the Menu of Incentives/Concessions above, the following procedures shall apply:

- The applicant shall pay the required fee, complete the appropriate environmental clearance and the required form(s) and submit the following to the Department of City Planning: (Note: density bonus projects are eligible for processing by the Expediting Unit, with payment of the appropriate fees.)
 - A summary of the project including location, number and type of housing units, including affordable units and bonus units
 - A parcel profile printout from the Zoning Information Map Access System (ZIMAS) confirming eligibility for the transit corridor incentive (if requested.)
 -
 - The rationale and accurate supporting information, sufficient to demonstrate that the specific request is necessary to make the affordable units feasible.
 - A site plan including floor plans and elevations of the project. The drawings must clearly and completely illustrate the intent of the project and the necessity of the incentive requested.
 - Photographs of the entire site and surrounding properties.
 - Information that the proposed project has no adverse impact on an Historic Cultural Monument as declared by City, State or Federal government.
- The Director of Planning or his/her designee will review the information provided and issue a determination based on State law and these Guidelines.
- In conformance with State law, denial of a request must include documentation that either the concession or incentive is not required to provide for affordable housing, or the concession or incentive will have a specific adverse impact upon public health and safety, on the physical environment or on a property that includes an Historic Cultural Monument as declared by the City, State or Federal government, and there is no way to reasonably mitigate or avoid the adverse impact without making the project unaffordable to Moderate, Lower or Very Low Income Households.
- Notice and Appeal. Notice of the determination will be provided to the applicant, all owners of properties abutting, across the street or alley from, or having a common corner with the

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

~~subject property and the local Certified Neighborhood Council. The determination by the Director of Planning is final unless appealed to the Area Planning Commission within 15 calendar days of the date of mailing. Only the applicant and abutting owners who received notice of the determination have the right to appeal. The decision of the Area Planning Commission is final.~~

~~For projects requesting an incentive/concession not on the Menu of Incentives/Concessions or a waiver of a development standard, the following procedures shall apply:~~

- ~~• The applicant shall pay the required fee, complete the appropriate environmental clearance, complete the required form(s) and submit the information listed above for projects requesting an incentive on the Menu.~~
- ~~• Hearing and Notice. The Director of Planning or designee will set the matter for public hearing at which evidence will be taken. Written notices shall be mailed, at least 24 days prior to the date of the hearing, to the Certified Neighborhood Council, applicant, property owners and occupants of property within 500' of the property that is the subject of the request.~~
- ~~• The Director of Planning or his/her designee will prepare a report for the City Planning Commission with conclusions and recommendations. The City Planning Commission decision may be appealed to the City Council.~~
- ~~• In conformance with State law, denial of a request must include documentation that either the concession or incentive is not required to provide for affordable housing, or the concession or incentive will have a specific adverse impact upon public health and safety, on the physical environment or on a property that includes an Historic-Cultural Monument as declared by the City, State or Federal government, and there is no way to reasonably mitigate or avoid the adverse impact without making the project unaffordable to Moderate, Lower or Very Low Income Households.~~

~~VI. FAIR HOUSING REQUIREMENTS FOR AFFORDABLE HOUSING IN MIXED INCOME DEVELOPMENTS VII. DESIGN STANDARDS FOR AFFORDABLE UNITS~~

- Unit Mix.** Except as these requirements conflict with any housing replacement requirements pursuant to state or local law, the number of Restricted Affordable Units that are required in mixed-income housing development projects shall reflect the project's unit type mix, in terms of the number of bedrooms. Five or more bedroom units may be provided for by creating either three or four bedroom Restricted Affordable Units as long as the total number of bedrooms are replaced as affordable. For cases where rounding results in fewer Restricted Affordable Units of a particular number of bedrooms than required, the share of units with the highest remainder shall be rounded up. In cases where rounding would result in more total Restricted Affordable Units than otherwise required, then the share of units with the lowest remainder shall not be rounded. In instances where the remainders are equal, then the larger unit type should be allocated as Restricted Affordable Units.

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

2. **Unit Size.** Affordable units shall, on average, be no less than 90% of the average square footage of the market rate units for the unit type. In addition, if these requirements conflict with state or local requirements relating to housing replacement or right of return related to the demolition of protected units, the provision resulting in the higher number of bedrooms shall be required.
3. **Quality and Amenities.** Restricted Affordable Units should be generally comparable to market rate dwelling units in construction quality and basic amenities for daily living (laundry, patios/balconies, number of bathrooms, etc.), but may differ in the quality of interior "finish" materials (eg., flooring, cabinetry, hardware, countertops, appliances, light fixtures, bathroom fixtures, trim and moldings, wall coverings, etc).
4. **Distribution.** Restricted affordable units should be interspersed equally on different floors but are not required to be located on a particular floor if the number of units is less than the number of stories. No two restricted affordable units may be located next to each other or isolated to a specific area of the building, such as near the freight elevator or trash room, or vertically stacked. Restricted Affordable Units should generally not be separated into one building, except in cases where the affordable units will be located on the same development site, including across the street, and is necessary, as determined by LAHD, to facilitate either: 1) servicing of special needs populations (e.g. seniors, persons with disabilities, target populations, etc.), that benefit from unique services in their own building, or 2) a relocation plan to house residents being displaced. Units awarded as part of a density bonus pursuant CA Government Code Section 65915 shall be permitted in geographic areas of the housing development other than the areas where the units for the lower income households are located. An applicant can seek an exemption from distribution of Restricted Affordable Units on the top floor for penthouses subject to the approval of LAHD.
5. **Access.** The occupants of the Restricted Affordable Units within a mixed-income multifamily development shall have the same access to the common entrances, areas and amenities as the occupants of the market-rate housing units and may not be charged for amenities that are provided at no cost to other residents including, but not limited to, access to recreational facilities, parking, internet, TV, and interior amenities such as laundry spaces, dishwashers and microwave ovens. Optional services provided must be optional for all residents, and available to all under the same terms and conditions. Tenants of affordable units cannot be required to purchase additional services.

~~Design of Affordable Units in Mixed-Income Projects~~

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

~~Affordable dwelling units shall be generally comparable to market rate dwelling units, including total square footage, bedroom size, closet space amenities, number of bathrooms, etc., except in the quality of interior “finish” materials (e.g., floor and wall coverings). Affordable units should be no less than 90% of the average square footage of the market rate units with the same number of bedrooms. The design of restricted dwelling units should generally reflect the average number of bedrooms per dwelling unit in the development.~~

~~Location of Affordable Units within Mixed Income Projects~~

~~Affordable dwelling units must be reasonably interspersed among market rate dwelling units within the same building.~~

~~Equal Distribution of Amenities~~

~~Residents of affordable dwelling units may not be charged for amenities that are provided at no cost to other residents including, but not limited to, access to recreational facilities, parking, cable TV, and interior amenities such as dishwashers and microwave ovens. Optional services provided must be optional for all residents, and available to all under the same terms and conditions. Tenants of restricted units cannot be required to purchase additional services.~~

VIII. AFFORDABILITY REQUIREMENTS (SEE APPENDIX FOR HOUSEHOLD INCOME, MAXIMUM RENTS AND PURCHASE PRICES)

The Los Angeles Housing Department (LAHD) establishes the affordability restrictions on household income, based upon State law. These restrictions are subject to annual review and an owner can contact LAHD directly to receive the current restrictions. The examples provided in the Appendix (Section XII of these Guidelines) are for calendar year 2005 and represent the maximum that may

be charged to Moderate, Lower and Very Low Income residents. For all questions about affordability requirements, contact LAHD at (213) 806-8806.

IX. LAHD MONITORING REQUIREMENTS

All projects shall comply with the annual monitoring requirements established by LAHD by means of a Covenant and Agreement. It is the responsibility of the owner to notify LAHD of any changes in the building that may affect compliance, such as change of ownership, management agent or on-site manager, vacancies in restricted units, or changes in compliance with the Los Angeles Department of Building and Safety (LADBS) requirements.

The following are LAHD requirements (a complete list is found in the LAHD Covenant):

- LAHD reviews all initial tenants' eligibility for affordable, set-aside dwelling units prior to occupancy
- LAHD annually reviews tenants' eligibility for affordable dwelling units.
- Building owners must provide LAHD with an annual review letter identifying the number of restricted dwelling units, household income and size, rent levels, dwelling unit size and verification of vacancies. LAHD may at any time audit a building containing restricted units to monitor the occupancy of these units.
- LAHD may make annual site visits to ensure that the restricted dwelling units are maintained in decent, safe and sanitary condition and that they are provided with the same level of services, including security and maintenance, as are applied to the other dwelling units in the development.
- If violations are found, fees and/or fines may be levied against the owner including the cost of legal action.

X. PROCEDURE FOR OBTAINING HOUSING DEPARTMENT SIGN-OFF FOR BUILDING PERMIT APPLICATION

- In the plan check process, LADBS determines the allowable density.
- LADBS requires a building permit applicant to get a "sign-off" from various City departments, including LAHD, and provides the applicant a "Clearance Summary Worksheet" for this purpose.
- If the project has obtained additional incentive(s) or relief from a development standard, documentation provided by the Department of City Planning should be presented to Building and Safety in the plan check process.
- Owner or his/her representative provides the following information to LAHD, in order for an Agreement Containing Covenants Affecting Real Property (Covenant) to be prepared:
 - Copy of the LADBS Clearance Summary Worksheet
 - Copy of the LADBS "Application for Building Permit and Certificate of Occupancy"

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

- ~~o Address of site~~
 - ~~o Full legal description of property as specified in the grant deed~~
 - ~~o Property owner's name, address and telephone number~~
 - ~~o Name and title of individual signing the Agreement on behalf of the owner~~
 - ~~o Name, address and phone number of owner's representative~~
 - ~~o The incentives being requested and those that require a Covenant~~
 - ~~o The original number of units permitted by the zoning, before bonus~~
 - ~~o Number of units and bedroom mix of units~~
 - ~~o Number of restricted, set-aside units and number of bedrooms contained in each~~
- ~~• LAHD confirms the required number of the restricted affordable units, as specified in the Zoning Code based upon the LADBS Clearance Summary Worksheet, or as required by the Planning Department, and assures that the set-aside units meet all requirements established by these Guidelines~~
 - ~~• LAHD determines the rent level or purchase price of the restricted affordable units and prepares a Covenant that establishes the number of such units, the affordability level and the term of affordability.~~
 - ~~• The owner signs the Covenant and has it notarized. LAHD then completes the electronic sign-off of the building permit application and has the Covenant recorded by the County of Los Angeles.~~
 - ~~• LAHD refers the applicant to LADBS to complete the permitting process.~~

~~Prior to the issuance of any Certificate of Occupancy, the following clearance must be obtained:~~

- ~~• Final clearance from LAHD that all conditions of the Agreement Containing Covenants Affecting Real Property have been met.~~

EXHIBIT B.2:
Fair Housing Requirements for Affordable Housing

CPC-2023-7068-CA, CPC-2024-387-CA, CPC-2024-388-CA

For consideration by the City Planning Commission

September 26, 2024

FAIR HOUSING REQUIREMENTS FOR AFFORDABLE HOUSING

The following requirements shall be applied to restricted affordable housing units located in mixed-income housing development projects pursuant to Los Angeles Municipal Code Section 16.61 B in order to facilitate fair housing opportunities.

1. **Unit Mix.** Except as these requirements conflict with any housing replacement requirements pursuant to state or local law, the number of Restricted Affordable Units that are required in mixed-income housing development projects shall reflect the project's unit type mix, in terms of the number of bedrooms. Five or more bedroom units may be provided for by creating either three or four bedroom Restricted Affordable Units as long as the total number of bedrooms are replaced as affordable. For cases where rounding results in fewer Restricted Affordable Units of a particular number of bedrooms than required, the share of units with the highest remainder shall be rounded up. In cases where rounding would result in more total Restricted Affordable Units than otherwise required, then the share of units with the lowest remainder shall not be rounded. In instances where the remainders are equal, then the larger unit type should be allocated as Restricted Affordable Units.
2. **Unit Size.** Restricted Affordable Units shall, on average, be no less than 90% of the average square footage of the market rate units for the unit type. In addition, if these requirements conflict with state or local requirements relating to housing replacement or right of return related to the demolition of protected units, the provision resulting in the higher number of bedrooms shall be required.
3. **Quality and Amenities.** Restricted Affordable Units should be generally comparable to market rate dwelling units in construction quality and basic amenities for daily living (laundry, patios/balconies, number of bathrooms, etc.), but may differ in the quality of interior "finish" materials (eg., flooring, cabinetry, hardware, countertops, appliances, light fixtures, bathroom fixtures, trim and moldings, wall coverings, etc).
4. **Distribution.** Restricted Affordable Units should be interspersed equally on different floors but are not required to be located on a particular floor if the number of units is less than the number of stories. No two Restricted Affordable Units may be located next to each other or isolated to a specific area of the building, such as near the freight elevator or trash room, or vertically stacked. Restricted Affordable Units should generally not be separated into one building, except in cases where the affordable units will be located on the same development site, including across the street, and is necessary, as determined by LAHD, to facilitate either: 1) servicing of special needs populations (e.g. seniors, persons with disabilities, target populations, etc.) that benefit from unique services in their own building, or 2) a relocation plan to house residents being displaced. Units awarded as part of a density bonus pursuant to CA Government Code Section 65915 shall be permitted in geographic areas of

Exhibit B.2 - FAIR HOUSING REQUIREMENTS FOR AFFORDABLE HOUSING

the housing development other than the areas where the units for the lower income households are located. An applicant can seek an exemption from distribution of Restricted Affordable Units on the top floor for penthouses subject to the approval of LAHD.

5. **Access.** The occupants of the Restricted Affordable Units within a mixed-income multifamily development shall have the same access to the common entrances, areas and amenities as the occupants of the market-rate housing units and may not be charged for amenities that are provided at no cost to other residents including, but not limited to, access to recreational facilities, parking, internet, TV, and interior amenities such as laundry spaces, dishwashers and microwave ovens. Optional services provided must be optional for all residents, and available to all under the same terms and conditions. Tenants of restricted affordable units cannot be required to purchase additional services.

AFFORDABLE HOUSING INCENTIVES GUIDELINES

I. SCOPE AND PURPOSE

As required by State law, the Municipal Code implements the State's density bonus provisions by setting forth the density bonus program requirements, incentives and procedures. These Guidelines more fully describe the density bonus provisions and qualifying criteria; the incentives available to qualifying projects; and the procedures whereby projects may apply for a bonus and incentives.

The Guidelines may be modified by resolution of the Planning Commission.

II. DEFINITIONS

Area Median Income (AMI) – The estimate of median income in the Los Angeles – Long Beach Primary Metropolitan Statistical Area that is determined periodically by the US Department of Housing and Urban Development (HUD), adjusted for household size and which is published periodically.

Density Bonus -- A density increase over the otherwise maximum allowable residential density pursuant to California Government Code Section 65915. The density bonus shall apply to housing developments consisting of three or more dwelling units.

Incentive or Concession – A reduction in a development standard or a modification of the Zoning Code.

Moderate Income, Lower Income and Very Low Income – Annual income of a household that does not exceed the Area Median Income for the income category as specified in the California Health and Safety Code Sections 50079.5 and 50105. (See Appendix for Annual Household Income Levels)

Mass Transit Station – A transit stop for a fixed rail system or Major Bus Center. A station is one that is currently in use, whose location is proposed and for which a full funding contract has been signed by all funding partners, or one for which a resolution to fund a preferred alignment has been adopted by the Los Angeles County Metropolitan Transit Authority.

Major Bus Route – A bus route with peak-hour headways of 15 minutes or less in two directions for 2 of the 3 hours between 4:00 p.m. and 7:00 p.m.

Senior Citizens – Individuals who are at least 62 years of age, except that for density bonus projects of at least 35 dwelling units, a threshold of 55 years of age may be used, provided all applicable City, State and federal regulations are met.

III. DENSITY BONUS AND SET-ASIDES [\(SEE APPENDIX FOR EXAMPLES\)](#)

Density bonus provisions apply to projects of 5 or more units, [prior to any density bonus](#). Projects qualify for a **20% density bonus**, if they provide the following tenant set-asides for a period of at least ~~30-55~~ years, as established by State Law:

- **5% of the dwelling units for Very Low Income households**, earning no more than 50% of the AMI and paying no more in rent than the amount established by LAHD for households earning up to 50% of the median income, OR
- **10% of the dwelling units for Lower Income households**, earning no more than 80% of the AMI and paying no more in rent than the amount established by the Los Angeles Housing Department (LAHD) for households earning up to 60% of the median income.

Projects may qualify for an **additional density bonus to a maximum of 35%** provided the number of set-aside units are increased as follows:

- For each 1% increase in the percentage of Very Low Income affordable units, projects will receive an additional 2.5% density bonus up to a maximum of 35%.
- For each 1% increase in the percentage of Lower Income affordable units, projects will receive an additional 1.5% density bonus up to a maximum of 35%.

Projects qualify for an **additional 10% density bonus up to a maximum of 35%** if they are located on or near a transit corridor or major employment center (see By-Right Incentives, below).

[Projects qualify for an additional density bonus up to a maximum of 88% or 100% if a project provides an additional set-aside of Very Low Income or Moderate Income units, as set forth in the tables of Government Code Section 65915\(v\).](#)

Senior Housing Projects

State law provides an automatic 20% density bonus for housing projects that set-aside 100% of the housing for senior citizens. There are no income or rent restrictions for this bonus. As an incentive to provide affordable housing for seniors, senior housing projects that set aside at least 10% of the units for Lower Income seniors or 5% of the units for Very Low Income seniors will qualify for an additional 15% density bonus, for a total density bonus of 35%. All senior housing projects are required to sign a Covenant with the Los Angeles Housing Department assuring that the units are restricted to seniors for a period of 30 years.

For-Sale Housing Developments

Housing developments that set-aside 5% of the dwelling units for sale to Very Low Income households or 10% of the dwelling units for sale to Lower Income dwelling units will qualify for the density bonus a 20% and additional density up to a maximum of 35% as noted above.

Housing developments that set aside 10% of the dwelling units for buyers who meet the criteria of Moderate Income households (earning no more than 120% of AMI) will also qualify for a density bonus of 20%. For each additional 1% set-aside, the developer may receive an additional 1%

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

density bonus up to a maximum of 35%. It is the intent of this program that these units will be owner-occupied.

Consistent with State law, the owner of the Moderate Income ~~and lower income levels~~ set-aside unit can sell that unit any time at an unrestricted price. At the time of sale, the owner can recoup his/her down payment, and the value of any improvements, but any profit must be shared with the City. The City's share is equal to the percentage by which the initial sale price to the Moderate-Income Household was less than the fair market value of the home at the time of the initial sale. These funds are to be used within ~~five~~three years for the construction, rehabilitation, or preservation of affordable housing for Extremely Low, Very Low, Lower, and Moderate-Income persons or families.

~~The Los Angeles Housing Department (LAHD) will develop additional guidelines to implement this provision of State law and to address for sale Lower and Very Low Income units.~~

● **Donation of Land in Lieu of Set Aside**

State law permits an applicant for a subdivision, parcel map or other residential development approval to obtain a 15% density bonus, if the applicant donates land to the City that meets, at a minimum, the following criteria:

- The developable acreage and zoning of the land being transferred are sufficient to permit construction of at least 10% of the number of residential units in the proposed development.
- The transferred land is at least one acre in size or of sufficient size to permit development of at least 40 units.
- The transferred land is within the boundary of the proposed development, or with the City's agreement, within ¼ mile of the development.
- The transferred land is fully entitled to permit the number of required affordable units.
- The applicant donates and transfers the land no later than the date of approval of the final subdivision map, parcel map or residential development application.

For each additional 1% land donated, the applicant may obtain an additional 1% density bonus up to a maximum of 35%. Also, an applicant may receive a density bonus for setting aside affordable units within the development project with the total bonus not to exceed 35%.

Density Bonus Calculation

The number of ~~set-aside and~~ density bonus units is based upon the maximum density allowed in the zone. State law requires that all density and set-aside calculations resulting in a fractional number be rounded up to the next whole number. For example, a 5,000 square foot lot in the R3 zone would permit 76 units (not 67 since the maximum density ~~allowed~~ is ~~also not~~ "rounded up"). A 20% bonus would allow 2 extra units (1.2 is rounded up to 2 extra units). The required set-aside for Very Low Income households would be 1 unit (5% of 6 is .03, which is rounded up to 1.)

Where the developer is not requesting a density bonus and the housing development uses less than the maximum density allowed in the zone, the percentage of set-aside units is based upon the number of units in the development.

Other Discretionary Approval

Approval of density bonus units does not, in and of itself, trigger other discretionary approval such as Site Plan Review.

Term of Affordability

All Lower and Very Low Income rental density bonus units must remain affordable for ~~30~~ 55 years (or longer, if required by the construction or mortgage financing assistance program, mortgage insurance program, or rental subsidy program.) ~~L.A.H.D. has determined that State law has been amended to clarify that~~ equity sharing is the ~~preferred~~ method of ensuring ongoing availability of affordable housing upon re-sale of affordable restricted ~~units~~. ~~L.A.H.D. will be preparing implementing guidelines for the re-sale of Moderate, Lower and Very Low Income restricted units.~~

IV. BY-RIGHT INCENTIVES

Parking. State law provides parking standards that may be requested by a developer of a density bonus project and that the City must grant if requested. These standards apply not only to the restricted affordable units (the set-aside units) but also to the entire project. These standards are inclusive of handicapped and guest parking and are as follows:

- 0 – 1 bedrooms: one onsite parking space
- 2 – 3 bedrooms: two onsite parking spaces
- 4 or more bedrooms: 2½ parking spaces

If the total number of spaces required in the development results in a fractional number, it is rounded up to the next whole number. Tandem parking and uncovered parking are also permitted to meet these parking requirements.

State Law has also been amended to permit additional types of parking reductions for certain types of projects, and/or projects located in certain areas. Please see California Government Code Section 65915(p) for more.

Transit Corridor / Major Employment Centers. Projects that meet the following criteria will be granted an additional 10% density bonus, up to a maximum of 35%:

- At or within a 1,500 foot radius of an existing or fully funded major bus center, bus stop along a major bus route (defined as a bus route with peak-hour headways of 15 minutes or less in two directions in at least two of the three hours between 4:00 p.m. and 7:00 p.m.), or mass transit station; or
- At or within a 1,500 foot radius of an intersection of transit priority arterials; or

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

- In or within a 1,500 foot radius of the boundaries of a regional center; or
- In or within a 1,500 foot radius of boundaries of a major economic activity area (LAX, the Port of Los Angeles and Downtown);
- Within 1,500 feet of the boundaries of a college or university with an enrollment exceeding 10,000 students.

V. OTHER AFFORDABLE HOUSING INCENTIVES

In conformance with State law, at least one incentive or concession, in addition to the density bonus, must be provided to projects that set aside affordable units. The number of incentives increases as the percentage of set-aside units increases, as follows:

Very Low Income Households:

- One Incentive/Concession – 5% set-aside
- Two Incentives/Concessions – 10% set-aside
- Three Incentives/Concessions – 15% set-aside
- [Four Incentives/Concessions – 16% set-aside](#)

Low Income Households and

- [One Incentive/Concession – 10% set-aside](#)
- [Two Incentives/Concessions – 27% set-aside](#)
- [Three Incentives/Concessions – 24% set-aside](#)
- [Four Incentives/Concessions – N/A](#)

Moderate Income Households:

- One Incentive/Concession – 10% set-aside
- Two Incentives/Concessions – 20% set-aside
- Three Incentives/Concessions – 30% set-aside
- [Four Incentives/Concessions – 45% set-aside](#)

Menu of Incentives/Concessions

Projects may request one or more of the following incentives or concessions, depending upon the income level of the targeted households and the percentage of set-aside units, in order to provide the affordable units:

- Up to 20% deviation from yard/setback requirements, except along any property line that abuts an R1 or more restrictively zoned property
- Up to 20% deviation from lot coverage requirements
- Up to 20% deviation from lot width requirements
- Up to 20% deviation from floor area requirements
- Up to 20% deviation from open space requirements
- Up to 20% additional building height, with the exception of properties within a Specific Plan for which 10% additional building height will be permitted

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

- Include area of street and alley dedication for purposes of calculating density
- A reduction or waiver in parking to include:
 - A reduction in parking requirements to not less than 1 parking space per restricted dwelling unit irrespective of the number of habitable rooms.
 - A reduction in parking requirements to not less than ½ parking space per dwelling unit for dwelling units restricted to Very Low or Low Income senior citizens.

VI. PROCEDURE FOR PROJECTS REQUESTING INCENTIVES/CONCESSIONS

For projects requesting a density bonus and one or more incentives included in the Menu of Incentives/Concessions above, the following procedures shall apply:

- The applicant shall pay the required fee, complete the appropriate environmental clearance and the required form(s) and submit the following to the Department of City Planning: (Note: density bonus projects are eligible for processing by the Expediting Unit, with payment of the appropriate fees.)
 - A summary of the project including location, number and type of housing units, including affordable units and bonus units
 - A parcel profile printout from the Zoning Information Map Access System (ZIMAS) confirming eligibility for the transit corridor incentive (if requested.)
 -
 - The rationale and accurate supporting information, sufficient to demonstrate that the specific request is necessary to make the affordable units feasible.
 - A site plan including floor plans and elevations of the project. The drawings must clearly and completely illustrate the intent of the project and the necessity of the incentive requested.
 - Photographs of the entire site and surrounding properties.
 - Information that the proposed project has no adverse impact on an Historic Cultural Monument as declared by City, State or Federal government.
- The Director of Planning or his/her designee will review the information provided and issue a determination based on State law and these Guidelines.
- In conformance with State law, denial of a request must include documentation that either the concession or incentive is not required to provide for affordable housing, or the concession or incentive will have a specific adverse impact upon public health and safety, on the physical environment or on a property that includes an Historic Cultural Monument as declared by the City, State or Federal government, and there is no way to reasonably mitigate or avoid the adverse impact without making the project unaffordable to Moderate, Lower or Very Low Income Households.
- Notice and Appeal. Notice of the determination will be provided to the applicant, all owners of properties abutting, across the street or alley from, or having a common corner with the

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

~~subject property and the local Certified Neighborhood Council. The determination by the Director of Planning is final unless appealed to the Area Planning Commission within 15 calendar days of the date of mailing. Only the applicant and abutting owners who received notice of the determination have the right to appeal. The decision of the Area Planning Commission is final.~~

~~For projects requesting an incentive/concession not on the Menu of Incentives/Concessions or a waiver of a development standard, the following procedures shall apply:~~

- ~~• The applicant shall pay the required fee, complete the appropriate environmental clearance, complete the required form(s) and submit the information listed above for projects requesting an incentive on the Menu.~~
- ~~• Hearing and Notice. The Director of Planning or designee will set the matter for public hearing at which evidence will be taken. Written notices shall be mailed, at least 24 days prior to the date of the hearing, to the Certified Neighborhood Council, applicant, property owners and occupants of property within 500' of the property that is the subject of the request.~~
- ~~• The Director of Planning or his/her designee will prepare a report for the City Planning Commission with conclusions and recommendations. The City Planning Commission decision may be appealed to the City Council.~~
- ~~• In conformance with State law, denial of a request must include documentation that either the concession or incentive is not required to provide for affordable housing, or the concession or incentive will have a specific adverse impact upon public health and safety, on the physical environment or on a property that includes an Historic-Cultural Monument as declared by the City, State or Federal government, and there is no way to reasonably mitigate or avoid the adverse impact without making the project unaffordable to Moderate, Lower or Very Low Income Households.~~

~~VI. FAIR HOUSING REQUIREMENTS FOR AFFORDABLE HOUSING IN MIXED INCOME DEVELOPMENTS VII. DESIGN STANDARDS FOR AFFORDABLE UNITS~~

- Unit Mix.** Except as these requirements conflict with any housing replacement requirements pursuant to state or local law, the number of Restricted Affordable Units that are required in mixed-income housing development projects shall reflect the project's unit type mix, in terms of the number of bedrooms. Five or more bedroom units may be provided for by creating either three or four bedroom Restricted Affordable Units as long as the total number of bedrooms are replaced as affordable. For cases where rounding results in fewer Restricted Affordable Units of a particular number of bedrooms than required, the share of units with the highest remainder shall be rounded up. In cases where rounding would result in more total Restricted Affordable Units than otherwise required, then the share of units with the lowest remainder shall not be rounded. In instances where the remainders are equal, then the larger unit type should be allocated as Restricted Affordable Units.

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

2. **Unit Size.** Affordable units shall, on average, be no less than 90% of the average square footage of the market rate units for the unit type. In addition, if these requirements conflict with state or local requirements relating to housing replacement or right of return related to the demolition of protected units, the provision resulting in the higher number of bedrooms shall be required.
3. **Quality and Amenities.** Restricted Affordable Units should be generally comparable to market rate dwelling units in construction quality and basic amenities for daily living (laundry, patios/balconies, number of bathrooms, etc.), but may differ in the quality of interior "finish" materials (eg., flooring, cabinetry, hardware, countertops, appliances, light fixtures, bathroom fixtures, trim and moldings, wall coverings, etc).
4. **Distribution.** Restricted affordable units should be interspersed equally on different floors but are not required to be located on a particular floor if the number of units is less than the number of stories. No two restricted affordable units may be located next to each other or isolated to a specific area of the building, such as near the freight elevator or trash room, or vertically stacked. Restricted Affordable Units should generally not be separated into one building, except in cases where the affordable units will be located on the same development site, including across the street, and is necessary, as determined by LAHD, to facilitate either: 1) servicing of special needs populations (e.g. seniors, persons with disabilities, target populations, etc.), that benefit from unique services in their own building, or 2) a relocation plan to house residents being displaced. Units awarded as part of a density bonus pursuant CA Government Code Section 65915 shall be permitted in geographic areas of the housing development other than the areas where the units for the lower income households are located. An applicant can seek an exemption from distribution of Restricted Affordable Units on the top floor for penthouses subject to the approval of LAHD.
5. **Access.** The occupants of the Restricted Affordable Units within a mixed-income multifamily development shall have the same access to the common entrances, areas and amenities as the occupants of the market-rate housing units and may not be charged for amenities that are provided at no cost to other residents including, but not limited to, access to recreational facilities, parking, internet, TV, and interior amenities such as laundry spaces, dishwashers and microwave ovens. Optional services provided must be optional for all residents, and available to all under the same terms and conditions. Tenants of affordable units cannot be required to purchase additional services.

~~Design of Affordable Units in Mixed-Income Projects~~

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

~~Affordable dwelling units shall be generally comparable to market rate dwelling units, including total square footage, bedroom size, closet space amenities, number of bathrooms, etc., except in the quality of interior “finish” materials (e.g., floor and wall coverings). Affordable units should be no less than 90% of the average square footage of the market rate units with the same number of bedrooms. The design of restricted dwelling units should generally reflect the average number of bedrooms per dwelling unit in the development.~~

~~Location of Affordable Units within Mixed Income Projects~~

~~Affordable dwelling units must be reasonably interspersed among market rate dwelling units within the same building.~~

~~Equal Distribution of Amenities~~

~~Residents of affordable dwelling units may not be charged for amenities that are provided at no cost to other residents including, but not limited to, access to recreational facilities, parking, cable TV, and interior amenities such as dishwashers and microwave ovens. Optional services provided must be optional for all residents, and available to all under the same terms and conditions. Tenants of restricted units cannot be required to purchase additional services.~~

VIII. AFFORDABILITY REQUIREMENTS (SEE APPENDIX FOR HOUSEHOLD INCOME, MAXIMUM RENTS AND PURCHASE PRICES)

~~The Los Angeles Housing Department (LAHD) establishes the affordability restrictions on household income, based upon State law. These restrictions are subject to annual review and an owner can contact LAHD directly to receive the current restrictions. The examples provided in the Appendix (Section XII of these Guidelines) are for calendar year 2005 and represent the maximum that may~~

be charged to Moderate, Lower and Very Low Income residents. For all questions about affordability requirements, contact LAHD at (213) 806-8806.

IX. LAHD MONITORING REQUIREMENTS

All projects shall comply with the annual monitoring requirements established by LAHD by means of a Covenant and Agreement. It is the responsibility of the owner to notify LAHD of any changes in the building that may affect compliance, such as change of ownership, management agent or on-site manager, vacancies in restricted units, or changes in compliance with the Los Angeles Department of Building and Safety (LADBS) requirements.

The following are LAHD requirements (a complete list is found in the LAHD Covenant):

- LAHD reviews all initial tenants' eligibility for affordable, set-aside dwelling units prior to occupancy
- LAHD annually reviews tenants' eligibility for affordable dwelling units.
- Building owners must provide LAHD with an annual review letter identifying the number of restricted dwelling units, household income and size, rent levels, dwelling unit size and verification of vacancies. LAHD may at any time audit a building containing restricted units to monitor the occupancy of these units.
- LAHD may make annual site visits to ensure that the restricted dwelling units are maintained in decent, safe and sanitary condition and that they are provided with the same level of services, including security and maintenance, as are applied to the other dwelling units in the development.
- If violations are found, fees and/or fines may be levied against the owner including the cost of legal action.

X. PROCEDURE FOR OBTAINING HOUSING DEPARTMENT SIGN-OFF FOR BUILDING PERMIT APPLICATION

- In the plan check process, LADBS determines the allowable density.
- LADBS requires a building permit applicant to get a "sign-off" from various City departments, including LAHD, and provides the applicant a "Clearance Summary Worksheet" for this purpose.
- If the project has obtained additional incentive(s) or relief from a development standard, documentation provided by the Department of City Planning should be presented to Building and Safety in the plan check process.
- Owner or his/her representative provides the following information to LAHD, in order for an Agreement Containing Covenants Affecting Real Property (Covenant) to be prepared:
 - Copy of the LADBS Clearance Summary Worksheet
 - Copy of the LADBS "Application for Building Permit and Certificate of Occupancy"

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

- ~~o Address of site~~
 - ~~o Full legal description of property as specified in the grant deed~~
 - ~~o Property owner's name, address and telephone number~~
 - ~~o Name and title of individual signing the Agreement on behalf of the owner~~
 - ~~o Name, address and phone number of owner's representative~~
 - ~~o The incentives being requested and those that require a Covenant~~
 - ~~o The original number of units permitted by the zoning, before bonus~~
 - ~~o Number of units and bedroom mix of units~~
 - ~~o Number of restricted, set-aside units and number of bedrooms contained in each~~
- ~~• LAHD confirms the required number of the restricted affordable units, as specified in the Zoning Code based upon the LADBS Clearance Summary Worksheet, or as required by the Planning Department, and assures that the set-aside units meet all requirements established by these Guidelines~~
 - ~~• LAHD determines the rent level or purchase price of the restricted affordable units and prepares a Covenant that establishes the number of such units, the affordability level and the term of affordability.~~
 - ~~• The owner signs the Covenant and has it notarized. LAHD then completes the electronic sign-off of the building permit application and has the Covenant recorded by the County of Los Angeles.~~
 - ~~• LAHD refers the applicant to LADBS to complete the permitting process.~~

~~Prior to the issuance of any Certificate of Occupancy, the following clearance must be obtained:~~

- ~~• Final clearance from LAHD that all conditions of the Agreement Containing Covenants Affecting Real Property have been met.~~

AFFORDABLE HOUSING INCENTIVES GUIDELINES

I. SCOPE AND PURPOSE

As required by State law, the Municipal Code implements the State's density bonus provisions by setting forth the density bonus program requirements, incentives and procedures. These Guidelines more fully describe the density bonus provisions and qualifying criteria; the incentives available to qualifying projects; and the procedures whereby projects may apply for a bonus and incentives.

The Guidelines may be modified by resolution of the Planning Commission.

II. DEFINITIONS

Area Median Income (AMI) – The estimate of median income in the Los Angeles – Long Beach Primary Metropolitan Statistical Area that is determined periodically by the US Department of Housing and Urban Development (HUD), adjusted for household size and which is published periodically.

Density Bonus -- A density increase over the otherwise maximum allowable residential density pursuant to California Government Code Section 65915. The density bonus shall apply to housing developments consisting of three or more dwelling units.

Incentive or Concession – A reduction in a development standard or a modification of the Zoning Code.

Moderate Income, Lower Income and Very Low Income – Annual income of a household that does not exceed the Area Median Income for the income category as specified in the California Health and Safety Code Sections 50079.5 and 50105. (See Appendix for Annual Household Income Levels)

Mass Transit Station – A transit stop for a fixed rail system or Major Bus Center. A station is one that is currently in use, whose location is proposed and for which a full funding contract has been signed by all funding partners, or one for which a resolution to fund a preferred alignment has been adopted by the Los Angeles County Metropolitan Transit Authority.

Major Bus Route – A bus route with peak-hour headways of 15 minutes or less in two directions for 2 of the 3 hours between 4:00 p.m. and 7:00 p.m.

Senior Citizens – Individuals who are at least 62 years of age, except that for density bonus projects of at least 35 dwelling units, a threshold of 55 years of age may be used, provided all applicable City, State and federal regulations are met.

III. DENSITY BONUS AND SET-ASIDES [\(SEE APPENDIX FOR EXAMPLES\)](#)

Density bonus provisions apply to projects of 5 or more units, [prior to any density bonus](#). Projects qualify for a **20% density bonus**, if they provide the following tenant set-asides for a period of at least ~~30-55~~ years, as established by State Law:

- **5% of the dwelling units for Very Low Income households**, earning no more than 50% of the AMI and paying no more in rent than the amount established by LAHD for households earning up to 50% of the median income, OR
- **10% of the dwelling units for Lower Income households**, earning no more than 80% of the AMI and paying no more in rent than the amount established by the Los Angeles Housing Department (LAHD) for households earning up to 60% of the median income.

Projects may qualify for an **additional density bonus to a maximum of 35%** provided the number of set-aside units are increased as follows:

- For each 1% increase in the percentage of Very Low Income affordable units, projects will receive an additional 2.5% density bonus up to a maximum of 35%.
- For each 1% increase in the percentage of Lower Income affordable units, projects will receive an additional 1.5% density bonus up to a maximum of 35%.

Projects qualify for an **additional 10% density bonus up to a maximum of 35%** if they are located on or near a transit corridor or major employment center (see By-Right Incentives, below).

[Projects qualify for an additional density bonus up to a maximum of 88% or 100% if a project provides an additional set-aside of Very Low Income or Moderate Income units, as set forth in the tables of Government Code Section 65915\(v\).](#)

Senior Housing Projects

State law provides an automatic 20% density bonus for housing projects that set-aside 100% of the housing for senior citizens. There are no income or rent restrictions for this bonus. As an incentive to provide affordable housing for seniors, senior housing projects that set aside at least 10% of the units for Lower Income seniors or 5% of the units for Very Low Income seniors will qualify for an additional 15% density bonus, for a total density bonus of 35%. All senior housing projects are required to sign a Covenant with the Los Angeles Housing Department assuring that the units are restricted to seniors for a period of 30 years.

For-Sale Housing Developments

Housing developments that set-aside 5% of the dwelling units for sale to Very Low Income households or 10% of the dwelling units for sale to Lower Income dwelling units will qualify for the density bonus a 20% and additional density up to a maximum of 35% as noted above.

Housing developments that set aside 10% of the dwelling units for buyers who meet the criteria of Moderate Income households (earning no more than 120% of AMI) will also qualify for a density bonus of 20%. For each additional 1% set-aside, the developer may receive an additional 1%

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

density bonus up to a maximum of 35%. It is the intent of this program that these units will be owner-occupied.

Consistent with State law, the owner of the Moderate Income ~~and lower income levels~~ set-aside unit can sell that unit any time at an unrestricted price. At the time of sale, the owner can recoup his/her down payment, and the value of any improvements, but any profit must be shared with the City. The City's share is equal to the percentage by which the initial sale price to the Moderate-Income Household was less than the fair market value of the home at the time of the initial sale. These funds are to be used within ~~five~~three years for the construction, rehabilitation, or preservation of affordable housing for Extremely Low, Very Low, Lower, and Moderate-Income persons or families.

~~The Los Angeles Housing Department (LAHD) will develop additional guidelines to implement this provision of State law and to address for sale Lower and Very Low Income units.~~

● **Donation of Land in Lieu of Set Aside**

State law permits an applicant for a subdivision, parcel map or other residential development approval to obtain a 15% density bonus, if the applicant donates land to the City that meets, at a minimum, the following criteria:

- The developable acreage and zoning of the land being transferred are sufficient to permit construction of at least 10% of the number of residential units in the proposed development.
- The transferred land is at least one acre in size or of sufficient size to permit development of at least 40 units.
- The transferred land is within the boundary of the proposed development, or with the City's agreement, within ¼ mile of the development.
- The transferred land is fully entitled to permit the number of required affordable units.
- The applicant donates and transfers the land no later than the date of approval of the final subdivision map, parcel map or residential development application.

For each additional 1% land donated, the applicant may obtain an additional 1% density bonus up to a maximum of 35%. Also, an applicant may receive a density bonus for setting aside affordable units within the development project with the total bonus not to exceed 35%.

Density Bonus Calculation

The number of ~~set-aside and~~ density bonus units is based upon the maximum density allowed in the zone. State law requires that all density and set-aside calculations resulting in a fractional number be rounded up to the next whole number. For example, a 5,000 square foot lot in the R3 zone would permit 76 units (not 67 since the maximum density ~~allowed~~ is ~~also not~~ "rounded up"). A 20% bonus would allow 2 extra units (1.2 is rounded up to 2 extra units). The required set-aside for Very Low Income households would be 1 unit (5% of 6 is .03, which is rounded up to 1.)

Where the developer is not requesting a density bonus and the housing development uses less than the maximum density allowed in the zone, the percentage of set-aside units is based upon the number of units in the development.

Other Discretionary Approval

Approval of density bonus units does not, in and of itself, trigger other discretionary approval such as Site Plan Review.

Term of Affordability

All Lower and Very Low Income rental density bonus units must remain affordable for ~~30~~ 55 years (or longer, if required by the construction or mortgage financing assistance program, mortgage insurance program, or rental subsidy program.) ~~L.A.H.D. has determined that State law has been amended to clarify that~~ equity sharing is the ~~preferred~~ method of ensuring ongoing availability of affordable housing upon re-sale of affordable restricted ~~units~~. ~~L.A.H.D. will be preparing implementing guidelines for the re-sale of Moderate, Lower and Very Low Income restricted units.~~

IV. BY-RIGHT INCENTIVES

Parking. State law provides parking standards that may be requested by a developer of a density bonus project and that the City must grant if requested. These standards apply not only to the restricted affordable units (the set-aside units) but also to the entire project. These standards are inclusive of handicapped and guest parking and are as follows:

- 0 – 1 bedrooms: one onsite parking space
- 2 – 3 bedrooms: two onsite parking spaces
- 4 or more bedrooms: 2½ parking spaces

If the total number of spaces required in the development results in a fractional number, it is rounded up to the next whole number. Tandem parking and uncovered parking are also permitted to meet these parking requirements.

State Law has also been amended to permit additional types of parking reductions for certain types of projects, and/or projects located in certain areas. Please see California Government Code Section 65915(p) for more.

Transit Corridor / Major Employment Centers. Projects that meet the following criteria will be granted an additional 10% density bonus, up to a maximum of 35%:

- At or within a 1,500 foot radius of an existing or fully funded major bus center, bus stop along a major bus route (defined as a bus route with peak-hour headways of 15 minutes or less in two directions in at least two of the three hours between 4:00 p.m. and 7:00 p.m.), or mass transit station; or
- At or within a 1,500 foot radius of an intersection of transit priority arterials; or

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

- In or within a 1,500 foot radius of the boundaries of a regional center; or
- In or within a 1,500 foot radius of boundaries of a major economic activity area (LAX, the Port of Los Angeles and Downtown);
- Within 1,500 feet of the boundaries of a college or university with an enrollment exceeding 10,000 students.

V. OTHER AFFORDABLE HOUSING INCENTIVES

In conformance with State law, at least one incentive or concession, in addition to the density bonus, must be provided to projects that set aside affordable units. The number of incentives increases as the percentage of set-aside units increases, as follows:

Very Low Income Households:

- One Incentive/Concession – 5% set-aside
- Two Incentives/Concessions – 10% set-aside
- Three Incentives/Concessions – 15% set-aside
- [Four Incentives/Concessions – 16% set-aside](#)

Low Income Households and

- [One Incentive/Concession – 10% set-aside](#)
- [Two Incentives/Concessions – 27% set-aside](#)
- [Three Incentives/Concessions – 24% set-aside](#)
- [Four Incentives/Concessions – N/A](#)

Moderate Income Households:

- One Incentive/Concession – 10% set-aside
- Two Incentives/Concessions – 20% set-aside
- Three Incentives/Concessions – 30% set-aside
- [Four Incentives/Concessions – 45% set-aside](#)

Menu of Incentives/Concessions

Projects may request one or more of the following incentives or concessions, depending upon the income level of the targeted households and the percentage of set-aside units, in order to provide the affordable units:

- Up to 20% deviation from yard/setback requirements, except along any property line that abuts an R1 or more restrictively zoned property
- Up to 20% deviation from lot coverage requirements
- Up to 20% deviation from lot width requirements
- Up to 20% deviation from floor area requirements
- Up to 20% deviation from open space requirements
- Up to 20% additional building height, with the exception of properties within a Specific Plan for which 10% additional building height will be permitted

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

- Include area of street and alley dedication for purposes of calculating density
- A reduction or waiver in parking to include:
 - A reduction in parking requirements to not less than 1 parking space per restricted dwelling unit irrespective of the number of habitable rooms.
 - A reduction in parking requirements to not less than ½ parking space per dwelling unit for dwelling units restricted to Very Low or Low Income senior citizens.

VI. PROCEDURE FOR PROJECTS REQUESTING INCENTIVES/CONCESSIONS

For projects requesting a density bonus and one or more incentives included in the Menu of Incentives/Concessions above, the following procedures shall apply:

- The applicant shall pay the required fee, complete the appropriate environmental clearance and the required form(s) and submit the following to the Department of City Planning: (Note: density bonus projects are eligible for processing by the Expediting Unit, with payment of the appropriate fees.)
 - A summary of the project including location, number and type of housing units, including affordable units and bonus units
 - A parcel profile printout from the Zoning Information Map Access System (ZIMAS) confirming eligibility for the transit corridor incentive (if requested.)
 -
 - The rationale and accurate supporting information, sufficient to demonstrate that the specific request is necessary to make the affordable units feasible.
 - A site plan including floor plans and elevations of the project. The drawings must clearly and completely illustrate the intent of the project and the necessity of the incentive requested.
 - Photographs of the entire site and surrounding properties.
 - Information that the proposed project has no adverse impact on an Historic Cultural Monument as declared by City, State or Federal government.
- The Director of Planning or his/her designee will review the information provided and issue a determination based on State law and these Guidelines.
- In conformance with State law, denial of a request must include documentation that either the concession or incentive is not required to provide for affordable housing, or the concession or incentive will have a specific adverse impact upon public health and safety, on the physical environment or on a property that includes an Historic Cultural Monument as declared by the City, State or Federal government, and there is no way to reasonably mitigate or avoid the adverse impact without making the project unaffordable to Moderate, Lower or Very Low Income Households.
- Notice and Appeal. Notice of the determination will be provided to the applicant, all owners of properties abutting, across the street or alley from, or having a common corner with the

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

~~subject property and the local Certified Neighborhood Council. The determination by the Director of Planning is final unless appealed to the Area Planning Commission within 15 calendar days of the date of mailing. Only the applicant and abutting owners who received notice of the determination have the right to appeal. The decision of the Area Planning Commission is final.~~

~~For projects requesting an incentive/concession not on the Menu of Incentives/Concessions or a waiver of a development standard, the following procedures shall apply:~~

- ~~• The applicant shall pay the required fee, complete the appropriate environmental clearance, complete the required form(s) and submit the information listed above for projects requesting an incentive on the Menu.~~
- ~~• Hearing and Notice. The Director of Planning or designee will set the matter for public hearing at which evidence will be taken. Written notices shall be mailed, at least 24 days prior to the date of the hearing, to the Certified Neighborhood Council, applicant, property owners and occupants of property within 500' of the property that is the subject of the request.~~
- ~~• The Director of Planning or his/her designee will prepare a report for the City Planning Commission with conclusions and recommendations. The City Planning Commission decision may be appealed to the City Council.~~
- ~~• In conformance with State law, denial of a request must include documentation that either the concession or incentive is not required to provide for affordable housing, or the concession or incentive will have a specific adverse impact upon public health and safety, on the physical environment or on a property that includes an Historic-Cultural Monument as declared by the City, State or Federal government, and there is no way to reasonably mitigate or avoid the adverse impact without making the project unaffordable to Moderate, Lower or Very Low Income Households.~~

~~VI. FAIR HOUSING REQUIREMENTS FOR AFFORDABLE HOUSING IN MIXED INCOME DEVELOPMENTS VII. DESIGN STANDARDS FOR AFFORDABLE UNITS~~

- Unit Mix.** Except as these requirements conflict with any housing replacement requirements pursuant to state or local law, the number of Restricted Affordable Units that are required in mixed-income housing development projects shall reflect the project's unit type mix, in terms of the number of bedrooms. Five or more bedroom units may be provided for by creating either three or four bedroom Restricted Affordable Units as long as the total number of bedrooms are replaced as affordable. For cases where rounding results in fewer Restricted Affordable Units of a particular number of bedrooms than required, the share of units with the highest remainder shall be rounded up. In cases where rounding would result in more total Restricted Affordable Units than otherwise required, then the share of units with the lowest remainder shall not be rounded. In instances where the remainders are equal, then the larger unit type should be allocated as Restricted Affordable Units.

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

2. **Unit Size.** Affordable units shall, on average, be no less than 90% of the average square footage of the market rate units for the unit type. In addition, if these requirements conflict with state or local requirements relating to housing replacement or right of return related to the demolition of protected units, the provision resulting in the higher number of bedrooms shall be required.
3. **Quality and Amenities.** Restricted Affordable Units should be generally comparable to market rate dwelling units in construction quality and basic amenities for daily living (laundry, patios/balconies, number of bathrooms, etc.), but may differ in the quality of interior "finish" materials (eg., flooring, cabinetry, hardware, countertops, appliances, light fixtures, bathroom fixtures, trim and moldings, wall coverings, etc).
4. **Distribution.** Restricted affordable units should be interspersed equally on different floors but are not required to be located on a particular floor if the number of units is less than the number of stories. No two restricted affordable units may be located next to each other or isolated to a specific area of the building, such as near the freight elevator or trash room, or vertically stacked. Restricted Affordable Units should generally not be separated into one building, except in cases where the affordable units will be located on the same development site, including across the street, and is necessary, as determined by LAHD, to facilitate either: 1) servicing of special needs populations (e.g. seniors, persons with disabilities, target populations, etc.), that benefit from unique services in their own building, or 2) a relocation plan to house residents being displaced. Units awarded as part of a density bonus pursuant CA Government Code Section 65915 shall be permitted in geographic areas of the housing development other than the areas where the units for the lower income households are located. An applicant can seek an exemption from distribution of Restricted Affordable Units on the top floor for penthouses subject to the approval of LAHD.
5. **Access.** The occupants of the Restricted Affordable Units within a mixed-income multifamily development shall have the same access to the common entrances, areas and amenities as the occupants of the market-rate housing units and may not be charged for amenities that are provided at no cost to other residents including, but not limited to, access to recreational facilities, parking, internet, TV, and interior amenities such as laundry spaces, dishwashers and microwave ovens. Optional services provided must be optional for all residents, and available to all under the same terms and conditions. Tenants of affordable units cannot be required to purchase additional services.

~~Design of Affordable Units in Mixed-Income Projects~~

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

~~Affordable dwelling units shall be generally comparable to market rate dwelling units, including total square footage, bedroom size, closet space amenities, number of bathrooms, etc., except in the quality of interior “finish” materials (e.g., floor and wall coverings). Affordable units should be no less than 90% of the average square footage of the market rate units with the same number of bedrooms. The design of restricted dwelling units should generally reflect the average number of bedrooms per dwelling unit in the development.~~

~~Location of Affordable Units within Mixed Income Projects~~

~~Affordable dwelling units must be reasonably interspersed among market rate dwelling units within the same building.~~

~~Equal Distribution of Amenities~~

~~Residents of affordable dwelling units may not be charged for amenities that are provided at no cost to other residents including, but not limited to, access to recreational facilities, parking, cable TV, and interior amenities such as dishwashers and microwave ovens. Optional services provided must be optional for all residents, and available to all under the same terms and conditions. Tenants of restricted units cannot be required to purchase additional services.~~

VIII. AFFORDABILITY REQUIREMENTS (SEE APPENDIX FOR HOUSEHOLD INCOME, MAXIMUM RENTS AND PURCHASE PRICES)

~~The Los Angeles Housing Department (LAHD) establishes the affordability restrictions on household income, based upon State law. These restrictions are subject to annual review and an owner can contact LAHD directly to receive the current restrictions. The examples provided in the Appendix (Section XII of these Guidelines) are for calendar year 2005 and represent the maximum that may~~

be charged to Moderate, Lower and Very Low Income residents. For all questions about affordability requirements, contact LAHD at (213) 806-8806.

IX. LAHD MONITORING REQUIREMENTS

All projects shall comply with the annual monitoring requirements established by LAHD by means of a Covenant and Agreement. It is the responsibility of the owner to notify LAHD of any changes in the building that may affect compliance, such as change of ownership, management agent or on-site manager, vacancies in restricted units, or changes in compliance with the Los Angeles Department of Building and Safety (LADBS) requirements.

The following are LAHD requirements (a complete list is found in the LAHD Covenant):

- LAHD reviews all initial tenants' eligibility for affordable, set-aside dwelling units prior to occupancy
- LAHD annually reviews tenants' eligibility for affordable dwelling units.
- Building owners must provide LAHD with an annual review letter identifying the number of restricted dwelling units, household income and size, rent levels, dwelling unit size and verification of vacancies. LAHD may at any time audit a building containing restricted units to monitor the occupancy of these units.
- LAHD may make annual site visits to ensure that the restricted dwelling units are maintained in decent, safe and sanitary condition and that they are provided with the same level of services, including security and maintenance, as are applied to the other dwelling units in the development.
- If violations are found, fees and/or fines may be levied against the owner including the cost of legal action.

X. PROCEDURE FOR OBTAINING HOUSING DEPARTMENT SIGN-OFF FOR BUILDING PERMIT APPLICATION

- In the plan check process, LADBS determines the allowable density.
- LADBS requires a building permit applicant to get a "sign-off" from various City departments, including LAHD, and provides the applicant a "Clearance Summary Worksheet" for this purpose.
- If the project has obtained additional incentive(s) or relief from a development standard, documentation provided by the Department of City Planning should be presented to Building and Safety in the plan check process.
- Owner or his/her representative provides the following information to LAHD, in order for an Agreement Containing Covenants Affecting Real Property (Covenant) to be prepared:
 - Copy of the LADBS Clearance Summary Worksheet
 - Copy of the LADBS "Application for Building Permit and Certificate of Occupancy"

Exhibit B.3 - AFFORDABLE HOUSING INCENTIVES GUIDELINES

- ~~o Address of site~~
 - ~~o Full legal description of property as specified in the grant deed~~
 - ~~o Property owner's name, address and telephone number~~
 - ~~o Name and title of individual signing the Agreement on behalf of the owner~~
 - ~~o Name, address and phone number of owner's representative~~
 - ~~o The incentives being requested and those that require a Covenant~~
 - ~~o The original number of units permitted by the zoning, before bonus~~
 - ~~o Number of units and bedroom mix of units~~
 - ~~o Number of restricted, set-aside units and number of bedrooms contained in each~~
- ~~• LAHD confirms the required number of the restricted affordable units, as specified in the Zoning Code based upon the LADBS Clearance Summary Worksheet, or as required by the Planning Department, and assures that the set-aside units meet all requirements established by these Guidelines~~
 - ~~• LAHD determines the rent level or purchase price of the restricted affordable units and prepares a Covenant that establishes the number of such units, the affordability level and the term of affordability.~~
 - ~~• The owner signs the Covenant and has it notarized. LAHD then completes the electronic sign-off of the building permit application and has the Covenant recorded by the County of Los Angeles.~~
 - ~~• LAHD refers the applicant to LADBS to complete the permitting process.~~

~~Prior to the issuance of any Certificate of Occupancy, the following clearance must be obtained:~~

- ~~• Final clearance from LAHD that all conditions of the Agreement Containing Covenants Affecting Real Property have been met.~~

EXHIBIT C.1:
**Addendum to the Final Environmental Impact Report for the
Citywide 2021-2029 Housing Element Update and Safety
Element Update**

CPC-2023-7068-CA, CPC-2024-387-CA, CPC-2024-388-CA

For consideration by the City Planning Commission

September 26, 2024

ADDENDUM

HOUSING ELEMENT REZONING PROGRAM: CITYWIDE HOUSING INCENTIVE PROGRAM ORDINANCE, HOUSING ELEMENT SITES AND MINIMUM DENSITY ORDINANCE, RESIDENT PROTECTIONS ORDINANCE, AND ADAPTIVE REUSE ORDINANCE

ADDENDUM TO THE FINAL ENVIRONMENTAL IMPACT REPORT FOR THE CITYWIDE 2021-2029 HOUSING ELEMENT UPDATE AND SAFETY ELEMENT UPDATE

Case Number: ENV-2020-6762-EIR-ADD2

State Clearinghouse Number: 2021010130

Project Location: The Los Angeles Housing Element Rezoning Program would apply to the entire geographic area located within the boundaries of the City of Los Angeles (City), which encompasses 467 square miles. Los Angeles is a coastal city, generally surrounded by the San Gabriel Mountains to the north, urban development and the Verdugo Mountains, San Rafael Hills and San Gabriel Valley to the east, and urban development and the Santa Susana Mountains, Santa Monica Mountains, and Pacific Ocean to the west and south. The City is highly urbanized and contains a variety of residential, civic, institutional, commercial, industrial, and recreational/open space uses within the communities that comprise the City.

Community Plan Area: All

Council District: 1 - Eunisses Hernandez, 2 - Paul Krekorian, 3 - Bob Blumenfield, 4 - Nithya Raman, 5 - Katy Yaroslavsky, 6 - Imelda Padilla, 7 - Monica Rodriguez, 8 - Marqueece Harris-Dawson, 9 - Curren D. Price Jr., 10 - Heather Hutt, 11 - Traci Park, 12 - John Lee, 13 - Hugo Soto-Martinez, 14 - Kevin de León, 15 - Tim McOsker

Project Description: The City's 2021-2029 Housing Element evaluated sites with the potential to be developed with housing during the applicable planning period to meet the City's Regional Housing Needs Assessment allocation and, as a result, identified a need for a Housing Element Rezoning Program to accommodate capacity for at least 255,432 new units of housing. The Housing Element Rezoning Program consists of several key work efforts, including ongoing and parallel initiatives to update the City's Community Plans, Transit Neighborhood Plans, and Specific Plans. The Housing Element Rezoning Program also encompasses targeted citywide code amendments including those that comprise the Proposed Project. Specifically, the Proposed Project includes four ordinances, which entail amendments to both Chapter 1 and Chapter 1A of the Los Angeles Municipal Code: the Citywide Housing Incentive Program Ordinance, an expansion to the City's existing Adaptive Reuse Ordinance, a Housing Element Sites and Minimum Density Ordinance, and a Resident Protections Ordinance.

DRAFT

1 INTRODUCTION

1.1 PURPOSE OF THIS ADDENDUM

The purpose of this Addendum to the Environmental Impact Report (EIR) prepared for the 2021-2029 Housing Element Update and Safety Element Update (“Housing Element EIR”) is to evaluate the environmental effects of targeted code amendments (the Citywide Housing Incentive Program [CHIP] Ordinance, the Citywide Adaptive Reuse Ordinance, the Housing Element Sites and Minimum Density Ordinance, and the Resident Protections Ordinance) associated with the Housing Element Rezoning Program (“Proposed Project”).

On November 24, 2021, the Los Angeles City Council certified the Housing Element EIR and adopted the updates to the Housing Element, Safety Element, and Health Element. Subsequently on June 14, 2022, the Los Angeles City Council adopted additional targeted amendments to the Housing Element that were identified as needed for compliance with State housing element law. The Housing Element EIR was prepared to examine the potential environmental effects of the 2021-2029 Housing Element Update and Safety Element Update, including build out of the Regional Housing Needs Assessment (RHNA), as well as the programs and policies that have the potential to result in physical environmental effects. Furthermore, it provides analysis associated with the Inventory of Housing Element Inventory of Sites (currently Appendix 4.1, 4.2, and 4.3 of the 2021-2029 Housing Element) and Housing Element Rezoning Program required to demonstrate zoned capacity needed to accommodate the City’s RHNA allocation.

As indicated in *Section 2, Project Description*, the Proposed Project involves targeted code amendments as part of the Housing Element Rezoning Program, required by the 2021-2029 Housing Element. In particular, the Proposed Project encompasses new land use incentives for affordable housing as well as updates to the City’s existing incentive-based housing development programs. Furthermore, the Proposed Project includes targeted code amendments to expand tenant protections as well as align with State law streamlining and lower income site requirements [California Government Code Section 65583.2(h) and (i)]. The purpose of this Addendum is therefore to evaluate the Proposed Project consistent with *CEQA Guidelines* Section 15164. Based on the analysis found herein, this Addendum affirms the Proposed Project does not result in a change to the project or new circumstances (created as a result of changes to State legislation) that would require a major revision to the Housing Element EIR due to new significant impacts or a substantial increase in the severity of a previously identified significant effect.

1.2 HOUSING ELEMENT UPDATE AND THE HOUSING ELEMENT EIR

The Housing Element is one of the eight State-mandated elements of the General Plan. It identifies the City’s housing conditions and needs, establishes the goals, objectives, and policies that are the foundation of the City’s housing strategy, and provides an array of programs to create sustainable, mixed-income neighborhoods across the City. The Housing Element Law, enacted in 1969, mandates that local governments adequately plan to meet the existing and projected housing needs of all economic segments of the community through the preparation of a housing element. The law requires local governments to adopt land use plans and regulatory systems that provide opportunities for, and do not unduly constrain, housing development. Furthermore, the law mandates the update of a local jurisdiction’s housing element every eight years to accommodate the jurisdiction’s RHNA.

The RHNA is mandated by State law as part of the periodic process of updating local housing elements of a jurisdiction’s general plan. The RHNA allocation process begins with a regional determination figure (the total number of housing units needed to meet housing needs of

California's regional bodies known as Councils of Governments [COG] issued by the California Department of Housing and Community Development (HCD), followed by an allocation to each jurisdiction within the region (specific number of units allocated to each jurisdiction within a COG). For the City of Los Angeles, the current RHNA projection period covers an eight-year period from October 2021 to October 2029 and the RHNA allocation is assigned by the Southern California Association of Governments (SCAG).

Under the RHNA allocation, the City is required to provide the zoned capacity to accommodate the development of at least 456,643 residential units using various land use planning strategies. The City provides capacity for housing through local zoning regulations. The City, however, is not required to physically construct 456,643 units as a result of the RHNA allocation.¹

The City's 2021-2029 Housing Element evaluated sites with the potential to be developed with housing during the planning period, and as a result identified a need for a Housing Element Rezoning Program to accommodate 255,432 units of housing capacity, as required to meet the RHNA allocation. The 2021-2029 Housing Element includes a detailed description of the anticipated Housing Element Rezoning Program, including an identified implementation program (see Program 121) and an Inventory of Candidate Sites for Rezoning (Appendix 4.7). For more information on the other 2021-2029 Housing Element Programs that will be implemented through the Proposed Project, please refer to *Section 2, Project Description*. Appendix 4.7 represents a list of potential sites that will be considered through the Housing Element Rezoning Program; however, not all sites that will be rezoned are necessarily included on this list, and not all sites on the list will necessarily be rezoned as part of the Housing Element Rezoning Program. See *Section 2.3, Description of the Housing Element Rezoning Program Targeted Code Amendments (Proposed Project)*, for additional information.

Following the adoption of the housing element, jurisdictions have three years to adopt the rezoning of sites, with some ability for extensions based on specific criteria. For the City of Los Angeles, the rezonings must be adopted and effective by February 2025.

As stated, on November 24, 2021, the Los Angeles City Council certified the Citywide 2021-2029 Housing Element Update and Safety Element Update EIR, SCH No. 2021010130 and adopted the updates to the Housing Element and Safety Element. The Housing Element EIR analyzed the environmental effects of the Citywide Housing Element 2019-2029 Update and Safety Element Update, and the associated Housing Element Rezoning Program for the creation of additional housing.

On June 14, 2022, the Los Angeles City Council adopted additional targeted amendments to the 2021-2029 Housing Element that were identified as needed to achieve substantial compliance with State housing element law and adopted an Addendum to the Housing Element EIR (ENV-2020-6762-EIR-ADD1). For the purposes of this document, the November 24, 2021, EIR and June 14, 2022, Addendum will be collectively referred to as the Housing Element EIR.

The adopted 2021-2029 Housing Element may be accessed online at: <https://planning.lacity.org/plans-policies/housing-element-update#adopted-plan>.

The Housing Element EIR is available for review at the City of Los Angeles, Department of City Planning Records Management, 221 North Figueroa Street, Room 1450 Los Angeles, and online at the following weblinks:

¹ As discussed in the Housing Element EIR, to ensure that sufficient capacity exists in the housing element to accommodate the RHNA throughout the planning period, HCD recommends that jurisdictions identify a buffer over the required allocation, particularly for the lower-income allocation, for the purposes of creating the inventory of sites. The City has set a target capacity that is 10 percent higher than the RHNA for lower income units, and 15 percent higher than the RHNA for moderate income units. As such, the City's Housing Element Inventory of Sites targets identifying a capacity of 486,379 units.

1.3 CEQA REQUIREMENTS

According to Section 15164(a) of the *CEQA Guidelines*, "the lead agency or responsible agency shall prepare an addendum to a previously certified EIR if some changes or additions are necessary but none of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred." Section 15164(c) states that an addendum does not need to be circulated for public review. Section 15164(d) provides that the decision-making body shall consider the addendum in conjunction with the certified EIR prior to making a decision on the project. Section 15164(e) requires documentation of the decision not to prepare a subsequent or supplemental EIR pursuant to Section 15162.

Section 15162 of the *CEQA Guidelines* lists the conditions that would require the preparation of a subsequent EIR or negative declaration rather than an addendum. These include the following:

1. Substantial changes are proposed in the project which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;
2. Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR or Negative Declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;
3. New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete or the Negative Declaration was adopted, shows any of the following:
 - The project will have one or more significant effects not discussed in the previous EIR or negative declaration;
 - Significant effects previously examined will be substantially more severe than shown in the previous EIR;
 - Mitigation measures or alternatives previously found not to be feasible would in fact be feasible, and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or
 - Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

The Proposed Project has been reviewed by the City of Los Angeles in light of Sections 15162 and 15164 of the *CEQA Guidelines*. As the CEQA Lead Agency, the City of Los Angeles has determined, based on the analysis presented herein, that none of the conditions apply which would require preparation of a subsequent or supplemental EIR and that an Addendum to the certified Housing Element EIR is the appropriate environmental documentation under CEQA for the Proposed Project.

1.4 CHANGES TO THE HOUSING ELEMENT EIR TO BE ANALYZED BY ADDENDUM

Per Section 15162 of the *CEQA Guidelines*, changes to the proposed project may necessitate a subsequent EIR or negative declaration if the changes contribute to a new or intensified significant environmental impact not contemplated in the previously certified EIR. The Proposed Project would apply citywide and its location and geographic distribution is consistent with the project analyzed as part of the Housing Element EIR except under a limited circumstance. In particular, the strategies proposed as part of the Mixed Income Incentive Program (described in further detail in *Section 2, Project Description*) would not be applicable in Very High Fire Hazard Severity Zones (VHFHSZs), Coastal Zone, or areas vulnerable to sea level rise. Notwithstanding this eligibility requirement, project sites that are on Ventura Boulevard in VHFHSZs; or abutting, across the street or alley, or having a common corner with properties not in a VHFHSZ may be eligible for the incentives proposed as part of the Mixed Income Incentive Program only.

The Housing Element EIR analysis contemplated potential development in VHFHSZs, however it did not contemplate a specific program that would enable this construction in these very targeted areas. For this reason, this policy direction currently incorporated into the Proposed Project has been identified as a potential change to the project analyzed as part of the Housing Element EIR. This exception to the prohibition of development in the VHFHSZs would apply to approximately 1,100 parcels predominantly at the periphery of the city's hillsides in areas including the South Valley along Ventura Boulevard as well as in areas of Northeast Los Angeles and Hollywood (see VHFHSZ maps provided in *Section 2.1, Project Location* for additional information). The Proposed Project will also propose an amendment to the Zoning Code in Chapter 1 of the Los Angeles Municipal Code (LAMC) to authorize the Director to adopt environmental protection measures to allow the adoption of an environmental standard for housing development in the vicinity of an active oil well and to modify the mitigation measures to provide an improved administrative and enforcement scheme to implement mitigation measures for the 2021-2029 Housing Element.

1.5 CHANGES TO CIRCUMSTANCES

Per Section 15162 of the *CEQA Guidelines* a change in circumstances would necessitate the preparation of a subsequent EIR or negative declaration should the change in circumstances contribute to a new significant environmental impact or an increase in the severity of a previously identified significant impact. This section provides additional information on State legislation adopted after the certification of the 2021-2029 Housing Element that could influence housing production in Los Angeles.

In 2022 and 2023, the California State Legislature adopted numerous housing production focused bills that have and will continue to impact housing development in Los Angeles. Based on a thorough review of new State legislation (described in further detail as follows), this Addendum has determined that the new State laws will not result in a change in circumstance that necessitates a major revision to the Housing Element EIR pursuant to Public Resources Code (PRC) Section 21166 and *CEQA Guidelines* Section 15162.

2022 – Assembly Bills 682, 1551, 2011, 2097, and 2334

Assembly Bill 682

Assembly Bill (AB) 682 establishes “shared housing” as a new eligible category in State Density Bonus Law (California Government Code Sections 65915-65918) for projects providing the designated set aside of affordable units. A “shared housing unit” means one or more habitable rooms not contained within another dwelling unit, which includes a bathroom, sink, refrigerator, and microwave within the unit, and complies with the definition of “guestroom” per the California Building Code. The law allows shared housing buildings, with five or more shared housing units, to be built in areas where density bonus projects are permitted and to receive incentives and density bonuses under the State Density Bonus Law.

Implementation of AB 682 is not expected to result in substantial new environmental impacts beyond those analyzed in the Housing Element EIR by expanding the types of housing projects deemed eligible under State Density Bonus Law to include “shared housing buildings.” The 2021-2029 Housing Element contemplated providing affordable housing incentives to alternative building typologies, including shared housing (see Program 62), and the introduction of a new eligible housing category will facilitate the build out of the City’s RHNA allocation in areas that already permit residential uses.

Assembly Bill 1551

AB 1551 refreshes a 2016 law (AB 1943) to extend State Density Bonus Law benefits to commercial projects that provide affordable housing, either onsite or within a local jurisdiction on a site that is located within a half mile of a major transit stop and in close proximity to public amenities. A commercial developer may receive a development bonus that could include but is not limited to up to a 20 percent increase in maximum allowable intensity in the General Plan, up to a 20 percent increase in maximum allowable floor area ratio (FAR), or up to a 20 percent increase in maximum height requirements, in exchange for setting aside at least 30 percent of units for Low Income households or 15 percent of units for Very Low Income households.

The provisions of AB 1551 are aligned with the goals, policies, and objectives of the 2021-2029 Housing Element that called for the expansion of the types of projects that are eligible for affordable housing incentives. Commercial projects providing affordable housing units either onsite or locally offsite would support the City’s build out of its RHNA allocation. The bill does not permit housing in areas of the City not already considered and analyzed by the Housing Element EIR, and therefore it is not anticipated that AB 1551 will have new environmental impacts.

Assembly Bill 2011

AB 2011 creates a streamlined approval process for mixed income and 100 percent affordable housing projects that are in eligible areas zoned for retail, office, and parking uses. Sites that are located on or adjacent to an industrial use or land use designation, or on an environmentally sensitive site, in a mobile home park, within a Specific Plan that prohibits housing, within 500 feet of a freeway, or within 3,200 feet of an oil refinery are not eligible. Vacant sites that contain tribal cultural resources or are in a VHFHSZ are also not eligible. Projects with less than 50 units must follow the prevailing wage requirements of California Government Code Section 65912.130, and projects with 50 units or more must also follow the apprenticeship and healthcare provisions of California Government Code Section 65912.131.

The streamlining provisions for mixed income and 100 percent affordable housing projects enabled by AB 2011 are not expected to result in substantial new environmental impacts that exceed what was analyzed in the Housing Element EIR. The types of sites eligible for streamlining

are mostly within areas of the City that already allow residential uses (commercial zones), avoid environmentally sensitive areas, and would not result in unanticipated growth or a change in development patterns. Based on previous utilization of local programs, the labor requirements are anticipated to limit use of the bill largely to 100 percent affordable housing projects which already are subject to labor requirements. The streamlined approval process for eligible projects will further facilitate housing development that helps the City meet its RHNA allocation.

Assembly Bill 2097

AB 2097 prohibits cities from imposing minimum vehicle parking requirements for residential, commercial, or other development projects located within a half mile of a major transit stop. To deny parking reductions, findings with a preponderance of evidence in the record must be made to demonstrate a substantially negative impact to meet the RHNA needs for Low or Very Low Income households, meet special needs housing, or existing residential or commercial parking facilities located within a half mile of the project.

By reducing the amount of parking required for projects in close proximity to transit, AB 2097 potentially supports the production of affordable housing at a lower cost. The provisions of AB 2097 serve as a housing production mechanism that will aid the City in meeting its RHNA allocation. Furthermore, the provisions of the bill are consistent with the policies of the 2021-2029 Housing Element which call for transit-oriented incentives along transit-served corridors, reduced parking requirements, and innovative parking strategies (see Program 21). Since AB 2097 became effective, it has been observed that housing developers tend to utilize the bill to “right-size” their parking, not eliminate it, as parking remains an amenity for prospective residents in new construction. Thus, the implementation of reduced parking near transit does not constitute a change in circumstance and is not anticipated to have substantial new environmental impacts.

Assembly Bill 2334

AB 2334 expands the definition of “maximum allowable residential density” to identify a project’s base density as the greatest number of units found in a project site’s applicable zoning ordinance, specific plan, or general plan, if a range is permitted or if inconsistent. The bill also broadened locations of where significant concessions are provided for 100 percent affordable housing developments to include very low vehicle travel areas.

Implementation of the revised “maximum allowable residential density” definition and the expansion of geographic eligibility 100 percent affordable housing projects per AB 2334 will increase development capacity in areas of the City that already allow or are planned for multi-family residential uses in the General Plan. The analysis associated with the 2021-2029 Housing Element identified the need to increase the City’s zoning capacity to meet RHNA allocation requirements. By enabling additional capacity and expanding areas where affordable housing incentives apply, AB 2334 contributes to the overall production of affordable housing needed to meet the City’s RHNA allocation and is in alignment with many of the central priorities and strategies contemplated in the Housing Element. As such, AB 2334 is not anticipated to have significant impacts beyond those identified in the Housing Element EIR.

2023 – Senate Bills 4, 423 and SB 684, and Assembly Bills 1218, 1287, 1449, and 1490

Senate Bill 4

Senate Bill (SB) 4 enables a streamlined approval process for eligible housing developments proposed by faith-based organizations or nonprofit colleges. Under SB 4 housing developments

proposed by faith-based organizations or nonprofit colleges may receive additional density or height allowances so long as projects are 100 percent affordable. For the purposes of SB 4, 100 percent affordable means all units should be affordable to Low Income households except that 20 percent may be affordable to Moderate Income households. Additionally, five percent of units may be reserved for staff. Elements of SB 4 will be embedded into the LAMC through the CHIP Ordinance, discussed in more detail in *Section 2.3, Description of the Housing Element Rezoning Program Targeted Code Amendments (Proposed Project)*.

The Housing Element EIR analyzed the potential environmental impacts that could result from the build-out of the City's RHNA on lots zoned single-family and multi-family. Furthermore, the provisions of SB 4 are consistent with the policy objectives and programs included in the certified 2021-2029 Housing Element which called for expanded incentives for sites owned by religious organizations as part of the RHNA Re-zoning Program (see Program 121). For this reason, implementation of SB 4 is not anticipated to result in any substantial new environmental impacts beyond those analyzed and discussed in the Housing Element EIR.

Senate Bill 423

SB 423 makes the streamlining provisions of SB 35 (2017) permanent by removing the previously codified sunset date. Furthermore, SB 423 removes the prohibition on the usage of SB 35 streamlining in the Coastal Zone starting in 2025 but adds certain limitations on sensitive coastal sites. Additionally, the bill amends SB 35's labor provisions by requiring prevailing wages for projects greater than 10 units and mandating paid healthcare and apprenticeship opportunities on projects greater than 50 units.

The passage and implementation of SB 423 is not expected to result in any substantial new environmental impacts beyond those analyzed in the Housing Element EIR. This is because the provisions contained in SB 423 serve more as a procedural tool to facilitate the build out of the RHNA in areas of Los Angeles where multi-family residential uses are already allowed. Changes brought forth by SB 423 do expand streamlining to the Coastal Zone, but the Coastal Zone was taken into consideration by the Housing Element EIR as an area where the development of units that count toward the City's RHNA target could reasonably occur. Only areas that already permit multi-family use in the Coastal Zone are permitted to use the new allowance. Therefore, implementation of SB 423 does not constitute a change in circumstance that would result in new environmental impacts.

Senate Bill 684

SB 684 streamlines the review of subdivisions by requiring a ministerial approval process for a parcel map or a tentative and final map for a subdivision of 10 or fewer parcels and its corresponding housing development project, excluding Accessory Dwelling Units (ADUs) and Junior Accessory Dwelling Units (JADUs). The bill allows eligible projects meeting specified requirements to not be subject to discretionary review or a public hearing and must be approved or denied within 60 days from the date an application is deemed complete.

The implementation of SB 684 is not expected to result in new environmental impacts not already contemplated by the Housing Element EIR. The procedural, streamlining provisions of this bill will facilitate the build out of the RHNA in areas of the city that already permit residential uses. Additionally, SB 684 is consistent with the programs and policies analyzed in the 2021-2029 Housing Element calling for new, innovative procedures for subdivisions (see Program 3). As such, SB 684 is not anticipated to have substantial impacts beyond those analyzed in the Housing Element EIR.

Assembly Bill 1218

AB 1218 expands requirements for replacement units and other tenant protections to nonresidential projects thereby mandating that nonresidential developments replace any protected units demolished in the last five years from the date a project is proposed. In essence, AB 1218 makes replacement requirements applicable to proposed nonresidential developments that were previously only applicable to housing developments under the Housing Crisis Act of 2019. Industrial projects in zones that prohibit residential uses are exempt from this expanded replacement unit requirement.

The provisions of AB 1218 are not expected to result in new environmental impacts and the expanded replacement requirements align with what was contemplated in the Housing Element EIR. In particular, the 2021-2029 Housing Element goals, policies, and objectives placed a strong emphasis on replacement requirements as a key tool for displacement prevention and preservation of affordable housing. The most likely impact of the new requirements on the physical environment may be to slow or prevent some types of nonresidential development. Though the scope of AB 1218 goes beyond what was contemplated in the 2021-2029 Housing Element since it applies replacement requirements to nonresidential projects, it still is consistent with the priorities disclosed in the 2021-2029 Housing Element and analysis conducted as part of the Housing Element EIR.

Assembly Bill 1287

AB 1287 amends State Density Bonus Law to require a city or county to grant a housing development an additional density bonus when a proposed project provides additional affordable units (for-lease or for-sale) restricted to households with Very Low or Moderate incomes on top of the commensurate number of restricted affordable units required to utilize a 50 percent density bonus. Additionally, AB 1287 allows housing development projects to access a fourth incentive or concession if a project restricts at least 16 percent of units to Very Low Income households (for-lease) or 45 percent to Moderate Income households (for-sale). One hundred percent affordable housing developments may also take advantage of a fifth incentive under AB 1287. The City will facilitate the implementation of AB 1287 through administrative memorandums as well as memorializing its provisions in the LAMC as part of the CHIP Ordinance as discussed in *Section 2.3, Description of the Housing Element Rezoning Program Targeted Code Amendments (Proposed Project)*.

As AB 1287 expands incentives for mixed income and 100 percent affordable housing development under State Density Bonus Law, it will facilitate the build out of the RHNA in areas of the City that allow multi-family residential uses as contemplated by the Housing Element EIR. For this reason, it is not anticipated that its implementation would result in any new environmental impacts beyond what has already been analyzed.

Assembly Bill 1449

AB 1449 broadens exemptions under CEQA for projects that meet the definition of a 100 percent affordable housing development. Projects are also only eligible for these expanded exemptions if labor standards contained in California Government Code Sections 65912.130 and 65912.131 are met and projects are located in Low Vehicle Miles Traveled (VMT) Areas or within a half mile of a Major Transit Stop or High Quality Transit Corridor.

Implementation of AB 1449 is not expected to result in substantial new environmental impacts since its provisions enable new CEQA streamlining tools that will help facilitate housing units that could already be constructed in areas that allow residential uses and CEQA streamlining was envisioned as a strategy in the Housing Element. AB 1449 will support the build out of the City's

RHNA in areas where development is anticipated as discussed and analyzed in the Housing Element EIR and will not generate development not already contemplated in the Housing Element EIR.

Assembly Bill 1490

AB 1490 requires local jurisdictions to classify 100 percent affordable housing developments (including at least 50 percent for Very Low Income households) adaptively reusing an existing building to be considered a by-right use regardless of underlying zoning so long as specific conditions are met. To qualify for the provisions of this bill, a proposed housing development must be located within the envelope of an existing residential or commercial building. Furthermore, it must be located on an infill parcel as defined in California Government Code Section 65913.12 (a)(6) and may not be located on or adjoining a site where more than one-third of site's square footage is dedicated to industrial use. The provisions of AB 1490 are to be embedded in the LAMC through the Citywide Adaptive Reuse Ordinance as discussed in *Section 2.3, Description of the Housing Element Rezoning Program Targeted Code Amendments (Proposed Project)*.

Implementation of the provisions of AB 1490 would not result in substantial new environmental impacts not already contemplated by the Housing Element EIR. In particular, the Housing Element EIR took into consideration a variety of rezoning strategies as part of the City's Housing Element Rezoning Program including amendments to the City's Zoning Code needed to better support the adaptive reuse of existing structures (see Program 13).

2 PROJECT DESCRIPTION

2.1 PROJECT LOCATION

The “Proposed Project”, which includes code amendments (the CHIP Ordinance, the Citywide Adaptive Reuse Ordinance, the Housing Element Sites and Minimum Density Ordinance, and the Resident Protections Ordinance) proposed as part of the Los Angeles Housing Element Rezoning Program, would apply to the entire geographic area located within the boundaries of the City of Los Angeles, which encompasses 467 square miles. Los Angeles is a coastal city, generally surrounded by the San Gabriel Mountains to the north, urban development and the Verdugo Mountains, San Rafael Hills and San Gabriel Valley to the east, and urban development and the Santa Susana Mountains, Santa Monica Mountains, and Pacific Ocean to the west and south. The City is highly urbanized and contains a variety of residential, civic, institutional, commercial, industrial, and recreational/open space uses within the communities that comprise the City. Figure 1 on the following page shows the general boundaries of the City limits in the context of the greater County of Los Angeles area.

A grid system of east-west and north-south roadways, including arterials, collectors, and local streets, provides vehicular access throughout the City. The major freeways and highways providing regional access through the City are Interstate 5 (I-5), Interstate 405 (I-405), Interstate 10 (I-10), Interstate 110 (I-110), Interstate and State Route 210 and 710, and U.S. Highway 101 (U.S. 101). The Port of Los Angeles, located at the southern end of the City, is a seaport managed by the Los Angeles Harbor Department that occupies 7,500 acres of land and water along 43 miles of waterfront and adjoins the separate Port of Long Beach.

Geographic Distribution of Project

The 2021-2029 Housing Element analyzed in the Housing Element EIR is the build out of the RHNA over the planning period through 2029, which may occur anywhere in the City on sites currently zoned for housing or sites not currently zoned for housing (e.g., industrial sites), but which are rezoned on a project by project basis or rezoned as part of the Housing Element Rezoning Program (the current Proposed Project). The Rezoning Program included in the Housing Element, would occur in geographic areas that are similar to those identified in the Housing Element Inventory of Sites (i.e., areas near public transit, jobs, in existing growth areas identified in the Framework Element), and in Higher Opportunity Areas. Higher Opportunity Areas are defined as High and Highest Resource Areas as identified in the California Tax Credit Allocation Committee (TCAC)/HCD Opportunity Maps, which are shown in Figure 2 following Figure 1 and can be accessed at <https://www.treasurer.ca.gov/ctcac/opportunity.asp>.

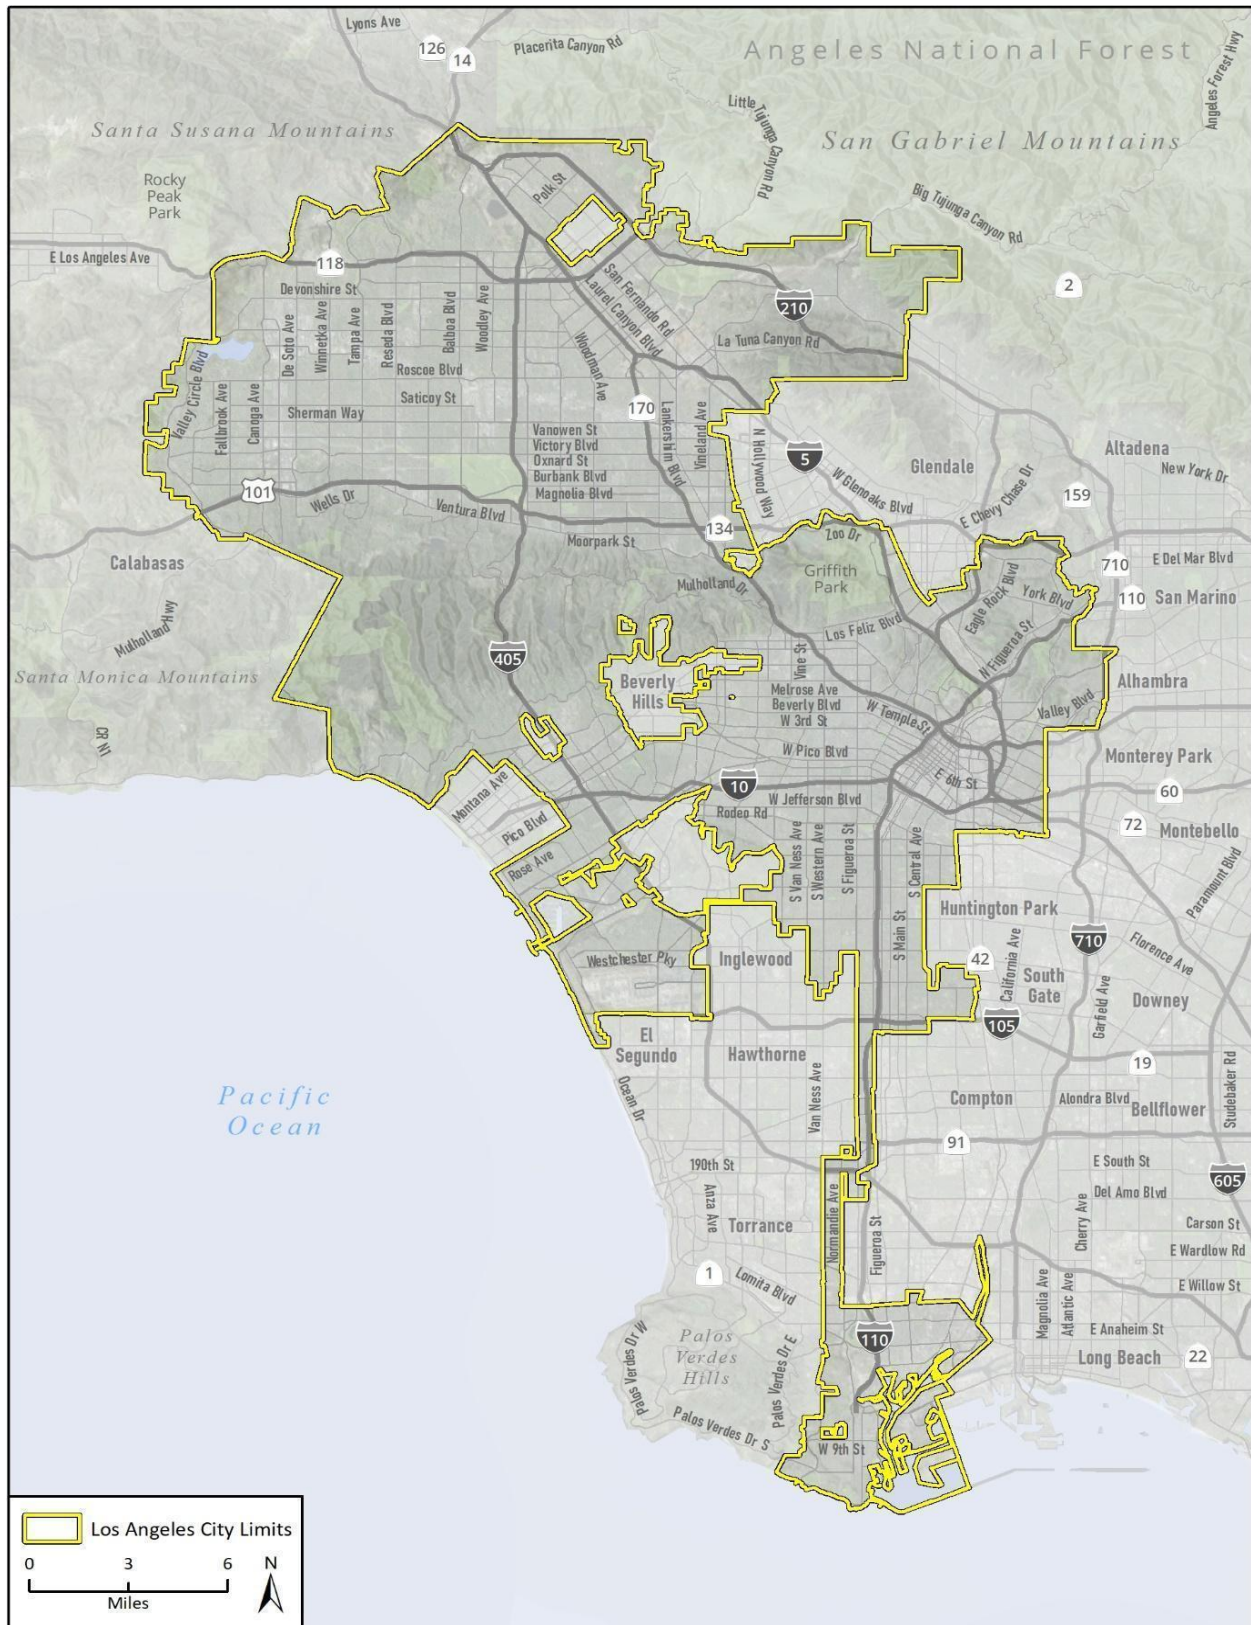

While it is foreseeable that rezoning may occur anywhere on a project-by-project basis anywhere in the City, rezoning under the Housing Element Rezoning Program will foreseeably occur in areas identified in the General Plan including near transit corridors and stations, job centers, neighborhood services and amenities, and particularly in Higher Opportunity Areas to provide a more equitable distribution of housing opportunities. The concentration of build out of the RHNA in these areas is be consistent with the development patterns studied in the Housing Element EIR.

The Proposed Project would apply citywide unless otherwise specified in this Project Description. In particular, the strategies proposed as part of the Mixed Income Incentive Program (described in further detail in *Section 2.3, Description of the Housing Element Rezoning Program Targeted Code Amendments [Proposed Project]*) would not be applicable in VHFHSZs, areas vulnerable to sea level rise, or the Coastal Zone. Notwithstanding this eligibility criteria, project sites that are

on Ventura Boulevard and within VHFHSZs; or sites in VHFHSZs that are abutting, across the street or alley, or having a common corner with properties not in a VHFHSZ may be eligible for the incentives proposed as part of the Mixed Income Incentive Program only. Additionally, projects pursuing approvals pursuant to the provisions and procedures described in State Density Bonus Law in the proposed State Density Bonus Program and proposed Affordable Housing Incentive Program may be permitted in VHFHSZs, areas vulnerable to Sea Level Rise, and in sites within the Coastal Zone under certain circumstances. Figure 3 through Figure 12 show the opportunity corridor parcels in VHFHSZs that may be eligible for these incentives, whereas Figure 13 through Figure 16 show areas vulnerable to sea level rise.

The geographic distribution of the Proposed Project is in alignment with State law and the project studied in the Housing Element EIR regarding the overarching Affirmatively Furthering Fair Housing (AFFH) goal of prioritizing the identification of sites in Higher Opportunity Areas, as indicated in Figure 2. This was consistent with the Housing Element EIR, which found that some housing may occur in VHFHSZ over the plan period but not a significant amount. It is also consistent with the goals of the Housing Element for build out of the RHNA to occur in Higher Opportunity Areas in alignment with Program 121 described in *Section 2.3, Description of the Housing Element Rezoning Program Targeted Code Amendments (Proposed Project)*, of this Addendum.

2.2 EXISTING SITE CHARACTERISTICS

Current Land Use Designation and Zoning

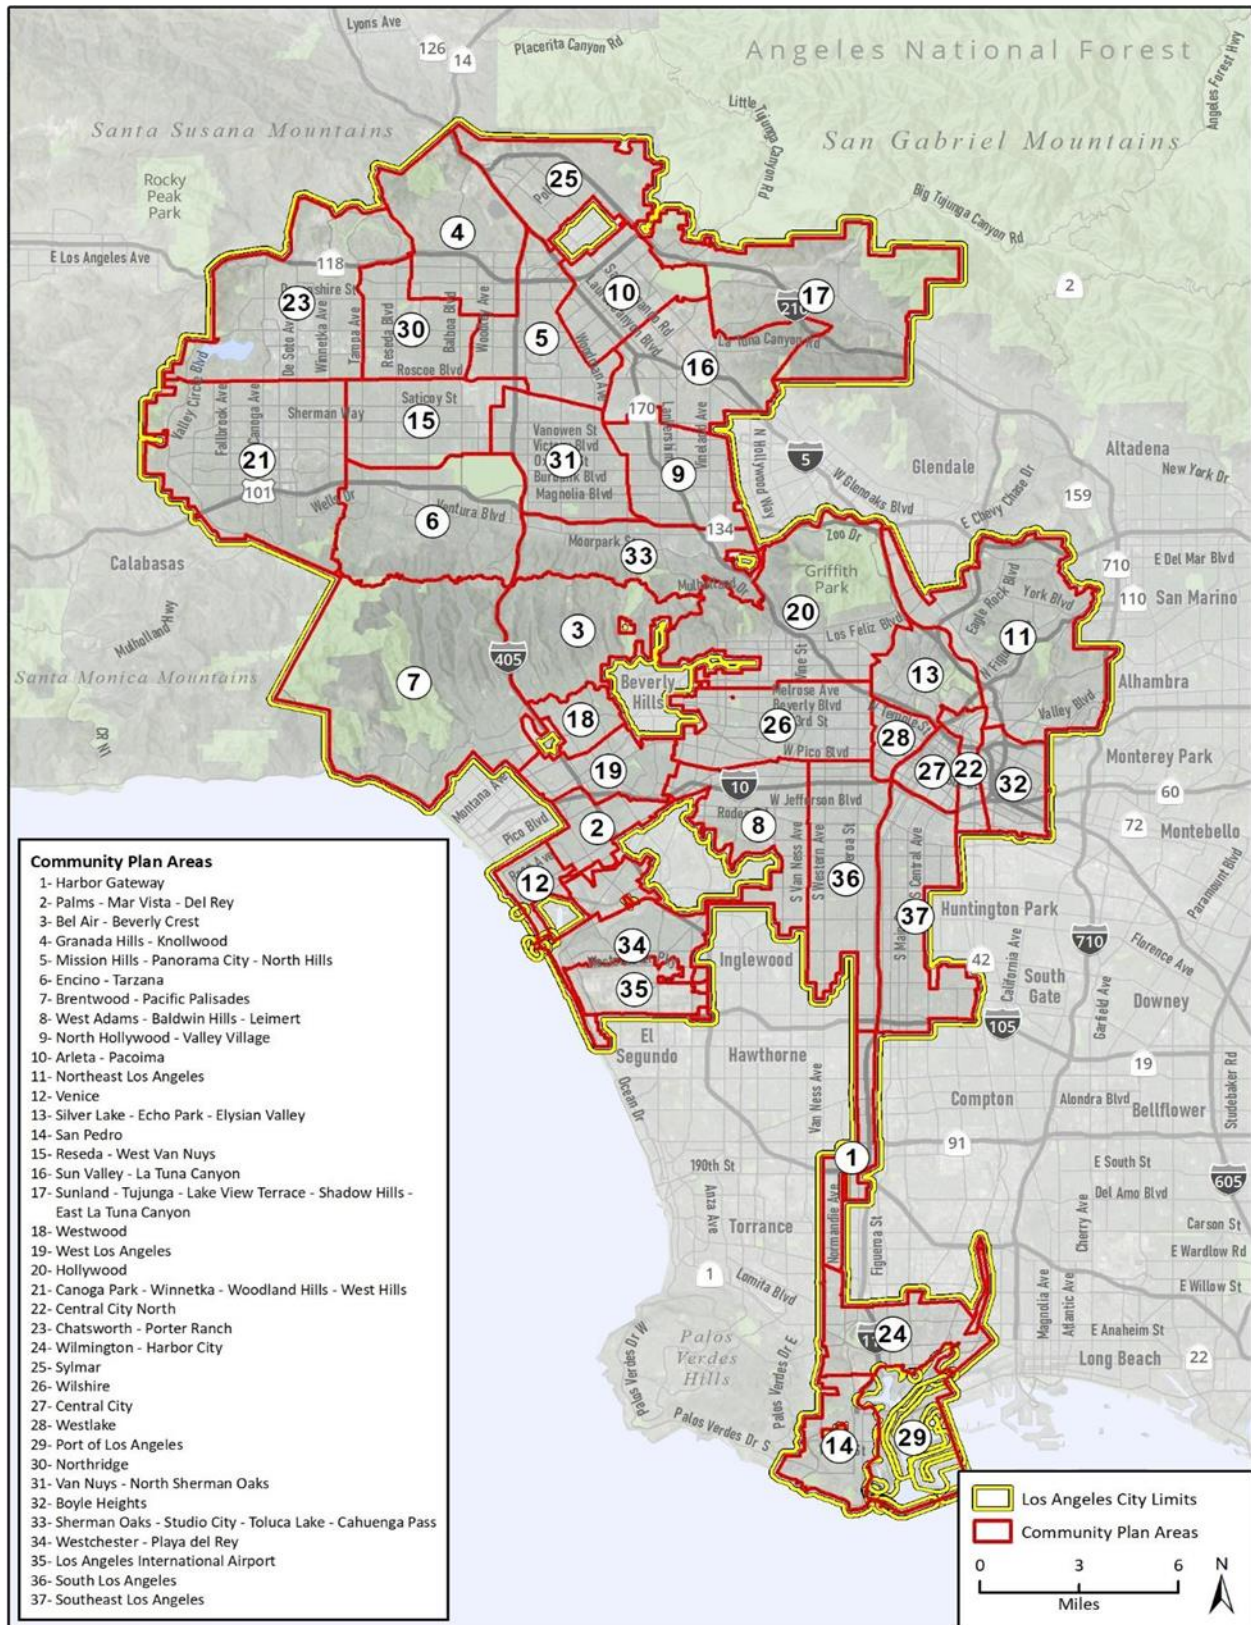

The City of Los Angeles is highly urbanized and contains a variety of residential, civic, commercial, industrial, and open space uses within the communities that comprise the City. Land Use designations are established by the General Plan Land Use Element, which contains 35 Community Plans for the Community Plan Areas within the City (34 upon the operative date of the Downtown Community Update). These Community Plans are currently being updated. Figure 17 illustrates the boundaries of the Community Plan Areas.

Zoning designations are established in the LAMC Chapter 1, Article 2 (Zoning Code) and Chapter 1A (the City's new Zoning Code which will apply to properties in the City as Community Plans are updated). The Proposed Project would amend the Zoning Code to provide for additional capacity for housing development within the City, as further discussed in *Section 2.3, Description of the Housing Element Rezoning Program Targeted Code Amendments (Proposed Project)*. Residential zones established in the LAMC include Suburban (RS), Residential Estate (RE), One-family (R1), Residential Urban (RU), Residential Zero Side Yard (RZ), Residential Waterways (RW1 and RW2), Two-family (R2), Restricted Density Multiple Dwelling (RD), Mobilehome Park (RMP), Multiple Dwelling (R3, R4, and R5), and Residential/Accessory Services (RAS3 and RAS4). Additionally, Commercial (C) Zones permit residential uses. Furthermore, certain Specific Plans have introduced new zoning classifications that allow for residential uses. These include the Urban Village (UV[CA]), Urban Innovation (UI[CA]), and Urban Center (UC[CA]) zones in the Cornfield Arroyo Seco Specific Plan as well as the Hybrid Industrial: Job Emphasis (HJ[EC]), Hybrid Industrial: Residential Emphasis (HR[EC]), Mixed Use: Commercial/Residential (MU[EC]), Neighborhood Mixed Use: Commercial/Residential (NMU[EC]), and Multiple Dwelling (R3[EC]) zones in the Exposition Corridor Transit Neighborhood Plan. The Proposed Project would allow for increased housing development in these zones through the codification of incentive-based tools in order to accommodate the necessary housing growth in the City. Figure 18 and Figure 19 illustrate the pattern of existing land use designations and zoning throughout the city.

Surrounding Land Uses

The City is generally surrounded by the San Gabriel Mountains to the north; urban development and the Verdugo Mountains, San Rafael Hills and San Gabriel Valley to the east; and urban development and the Santa Susana Mountains, Santa Monica Mountains and Pacific Ocean to the west and south.

Fig. 2-3 Zoning

2.3 DESCRIPTION OF THE HOUSING ELEMENT REZONING PROGRAM TARGETED CODE AMENDMENTS (PROPOSED PROJECT)

Summary

As discussed under *Section 1.2, Housing Element Update and the Housing Element EIR*, the City is required to provide the zoned capacity to accommodate the development of at least 456,643 residential units using various land use planning strategies to meet the RHNA allocation. The City's 2021-2029 Housing Element evaluated sites with the potential to be developed with housing during the planning period, and as a result identified a need for a Housing Element Rezoning Program to accommodate 255,432 units of housing capacity to meet the RHNA allocation. The Housing Element Rezoning Program is consistent with the program previously identified in the 2021-2029 Housing Element and described in the Housing Element EIR. The Housing Element Rezoning Program consists of several key work efforts, including ongoing and parallel initiatives to update the City's Community Plans, Transit Neighborhood Plans, and Specific Plans. Furthermore, the Housing Element Rezoning Program encompasses parallel citywide rezoning efforts, including the Proposed Project. The Proposed Project is a citywide policy effort that would create new affordable housing incentives, as well as make updates to the City's existing incentive-based housing development programs, through four ordinances, which entail amendments to both Chapter 1 and Chapter 1A of the LAMC.

Specifically, the Proposed Project proposes:

- The CHIP Ordinance which includes a substantial revision to the City's State Density Bonus Law implementation program; the creation of a new Mixed Income Incentive Program, and the establishment of a new Affordable Housing Incentive Program; and authorization for Director of Planning to adopt Environmental Protection Measures for Housing Development Projects.
- An expansion to the City's existing Adaptive Reuse Ordinance;
- A Housing Element Sites and Minimum Density Ordinance; and
- A Resident Protections Ordinance

The above ordinances include proposed revisions to the Zoning Code's processes and procedures contained in Article 13 of Chapter 1A of the LAMC. More information on the listed ordinances can be found in the following *Additional Information on the Proposed Project* section.

Adoption of the ordinances that comprise the Proposed Project supports several programs in the City's 2021-2029 Housing Element:

- **Program 121 (RHNA Re-zoning)** calls for the Department of City Planning to identify and recommend rezoning for the remaining RHNA of 255,432 units. This includes a range of strategies including the Proposed Project that would create additional zoning capacity through an expansion of affordable housing incentive programs, creation of new incentive programs, enhancement of existing housing development programs, and strengthening of community benefits and tenant protections.
- **Program 48 (Update Density Bonus and Other Affordable Housing Incentive Programs)** calls for the Department of City Planning to pursue an update to the Density Bonus Ordinance and existing incentive-based programs aimed at creating more affordable housing.
- **Program 103 (Missing Middle)** calls for the creation of flexible zoning standards to facilitate more low-scale multi-unit housing typologies.

- **Program 13 (Adaptive Reuse)** calls for the Department of City Planning to expand the opportunities for adaptive reuse of commercial and office buildings citywide for housing by preparing revisions to the Citywide Adaptive Reuse Ordinance and/or the Density Bonus Ordinance, to include incentives and provisions for adaptive re-use by 2023.
- **Program 61 (Provide Adequate Sites for Lower income Households on Nonvacant and Vacant Sites Previously Identified)** describes rezoning needed to allow developments by-right pursuant to California Government Code Section 65583.2(i) when 20 percent or more of the units are affordable to lower income households. This would apply to sites identified in the Inventory of Adequate Sites for Housing (Appendix 4.1) to accommodate the lower income RHNA that were previously identified in past housing elements.
- **Program 29 (Enforcement of No Net Loss and Affordable Housing Replacements Requirement)** calls for the City to codify and consider expanding existing housing replacement requirements to provide one-for-one replacement of Rent Stabilized housing units.
- **Program 54 (Expedite Affordable Housing Projects)** calls for the expeditious review and approval for entitlements and permits associated with projects containing covenanted affordable housing units.
- **Program 15 (Public Land for Affordable Housing)** calls for expanding the utilization of publicly owned land for the provision of affordable housing especially in areas vulnerable to displacement pressures. Program 15 proposes modifying the use limitations of the “PF” Public Facilities zone to allow for affordable housing by-right.
- **Program 57 (Improvements to Development Processing)** calls for interdepartmental coordination to increase the number of cases that can be processed ministerially and reduce project review time.
- **Program 62 (Facilitate Housing Innovation)** calls for modifications in the Zoning Code to incentivize and facilitate innovative housing types.
- **Program 122 (Anti-Displacement Strategies)** calls for the Department of City Planning and Housing Department to develop policy strategies to strengthen tenant protections and to preserve and increase the stock of affordable housing to protect vulnerable communities facing displacement.
- **Program 124 (Affirmatively Furthering Fair Housing)** calls for the Department of City Planning to comply with federal Department of Housing and Urban Development requirements to promote and AFFH opportunities by taking actions to overcome patterns of segregation and foster inclusive communities free from barriers that restrict opportunity.
- **Program 28 (Replacement Program for Selected Sites)** calls for the Department of City Planning to require new housing developments on sites identified in the site inventory to replace all affordable housing units when certain conditions are met.
- **Program 45 (Enforce, Monitor and Preserve Affordable Housing Covenants)** calls for the Department of City Planning and Housing Department to continue to maintain a database of existing covenanted affordable housing units citywide, and to monitor and enforce compliance with affordability and accessibility covenants.
- **Program 46 (Inventory of Housing Element Sites Update)** calls for the Department of City Planning to identify parcels included in the Housing Element Inventory of Sites on the City’s Zone Information and Map Access System (ZIMAS) database, and to monitor and track the redevelopment of sites on the inventory throughout the planning period.
- **Program 87 (Strengthen Enforcement of Ellis Act Provisions)** calls for the Department of City Planning and Housing Department to strengthen Ellis Act monitoring and enforcement to

preserve Rent Stabilization Ordinance (RSO) housing units, prevent tenant displacement, and ensure relocation assistance to tenants.

- **Program 43 (Historic Preservation)** calls for the Department of City Planning to designate historic and culturally significant resources and to explore incentives for the rehabilitation and adaptive reuse of historic resources and programs for low-income homeowners of historic properties in Historic Preservation Overlay Zones.
- **Program 9 (Facilitate Housing for Senior and Disabled Persons)** calls for the Department of City Planning to explore and implement measures to better streamline developments that propose housing for senior citizens.

The Proposed Project does not propose any Zone Changes or Plan Amendments and would instead offer a range of zoning incentives and streamlining measures to build on existing zoning parameters to promote the production of housing, particularly income restricted affordable housing. As identified in the Housing Element, the Proposed Project is Citywide with a focus on qualified sites located in Higher Opportunity Areas in alignment with AFFH objectives as discussed in the 2021-2029 Housing Element and required under State law.

Citywide Housing Incentive Program Ordinance

The CHIP Ordinance encompasses three critical programs including revisions to the City's local Density Bonus ordinance (or State Density Bonus Program), a new Mixed Income Incentive Program, and a new Affordable Housing Incentive Program. The Ordinance as a whole would serve as a local implementation program of State Density Bonus Law (California Government Code Sections 65915-65918). The State Density Bonus Program would function as a direct implementation mechanism for the provisions of State Density Bonus Law. The Mixed Income Incentive Program would establish different project eligibility criteria and provide development bonuses in compliance with California Government Code Section 65915(n) which allows local jurisdictions to provide greater density bonuses for projects providing affordable housing in accordance with State Density Bonus Law. The Affordable Housing Incentive Program proposes to both codify incentives for One Hundred Percent Affordable Housing Developments under State Density Bonus Law in addition to the codification of greater development bonuses for projects developed by Faith Based Organizations and projects in Higher Opportunity Areas. Underpinning all programs in the CHIP Ordinance is a focus on process streamlining. With this in mind, all program strategies aim to remove procedural barriers and create efficient and expedited processes for projects creating new housing units that align with City priorities and objectives. This is proposed to be accomplished through expanded access to administrative ministerial planning review processes for projects that meet objective zoning standards and comply with the CHIP Ordinance's incentive limitations. In addition to the three aforementioned programs that comprise the CHIP Ordinance, the Ordinance puts forth technical amendments aimed to support the utilization of CHIP Ordinance incentives. Key technical amendments include:

- A proposed exemption from the LAMC's Project Review requirements for multi-family developments if a proposed project provides restricted affordable units consistent with the requirements associated with an exemption from the Affordable Housing Linkage fee.
- A proposed amendment to the Affordable Housing Linkage Fee provisions of the LAMC (LAMC Section 19.18) that would allow any Mixed Income Incentive Program Project consistent with the proposed LAMC Section 12.22 A.38 to be exempt from the Affordable Housing Linkage Fee.
- A proposed ministerial procedure including informational hearing and appeal processes for certain types of project requests.

More information on the programs that comprise the CHIP Ordinance can be found below.

State Density Bonus Program

The Department of City Planning proposes critical amendments to the Density Bonus ordinance in LAMC Section 12.22 A.25 (Section 9.2.1 in Article 9 in Chapter 1A) which serves as the City's primary mechanism for implementing State Density Bonus Law. Revisions include administrative and procedural updates to improve clarity and affirm consistency with State law. The State Density Bonus Program would apply citywide, however procedural exceptions, incentive limitations, and eligibility criteria may apply for properties in VHFHSZs, sites hosting designated historic resources, and sites hosting active or previously active hazardous uses.

Key revisions proposed as part of the State Density Bonus Program include:

- Revising and establishing definitions in alignment with State law
- Updating maximum density bonus tiers in alignment with State Density Bonus Law to allow for up to 50 percent density bonuses by-right
- Revising the number of incentives a project is eligible for based on the percentage of affordable housing provided in alignment with State Density Bonus Law
- Creating allowance for ministerial approval of additional density bonuses (up to 100 percent) in exchange for additional units restricted to Very Low Income households or Moderate Income households (pursuant to AB 1287 referred to in *Section 1.5, Changes to Circumstances*)
- Refining and expanding the pre-vetted menu of development incentives for eligible projects
- Establishing a new Public Benefit Options section that would provide projects with greater development bonuses in exchange for community benefits, except for projects on sites in Very High Fire Hazard Severity Zones and areas vulnerable to sea level rise only eligible for incentives under State Density Bonus Law.
- Streamlined procedures under certain circumstances to allow for expanded by-right processing for eligible projects without public hearings or appeals
- Requiring compliance with Environmental Protection Measures pertaining to sites hosting or near current or previously hazardous uses.
- Incorporating density bonus incentives for housing for target populations including Low Income Students, Transitional Foster Youth, Veterans, and individuals experiencing homelessness in alignment with State law.

Mixed Income Incentive Program

The Mixed Income Incentive Program encompasses several incentive strategies refined as part of the overall development of the Proposed Project. The strategies detailed in this program include both citywide incentives near transit as well as incentives that would be available only in Higher Opportunity Areas. Generally, environmentally sensitive areas including areas vulnerable to sea level rise, sites in the Coastal Zone, and properties in VHFHSZs would be ineligible for the Mixed Income Incentive Program except under limited circumstances as discussed in *Section 2.4, Project Modifications*. Additionally, projects proposing the demolition of designated historic resources would be ineligible for incentives described in this program. Projects proposed on sites with designated historic resources would be subject to additional review by City Planning staff. This program would advance multiple key strategies of the Proposed Project and would also promote opportunities for developments to include a wider mix of affordable income level units. In particular, affordability requirements may differ depending on geographic market areas, as well as a market-based value capture system informed by economic modeling, to ensure that the highest level of affordability is provided.

Key code amendments proposed as part of the Mixed Income Incentive Program include:

- Density bonuses ranging from 90 percent to unlimited citywide depending on proximity to Major Transit Stops
- Unlimited density on major corridors in Higher Opportunity Areas
- Greater FAR and height bonuses within a half mile of Major Transit Stops in Higher Opportunity Areas
- Expanded base incentives, including height and FAR, depending on site eligibility
- Affordability requirements that vary depending on market area
- Revising and establishing definitions
- Refining and expanding the pre-vetted menu of development incentives for eligible projects
- Establishing new Public Benefit Options section that would provide projects with greater development bonuses in exchange for community benefits including publicly accessible open space, tree preservation, and provision of active ground floor uses
- Requiring compliance with Environmental Protection Measures pertaining to sites hosting or near current or previously hazardous uses.
- Streamlined procedures, to allow for expanded by-right processing for eligible projects without public hearings or appeals

Transit Oriented Incentive Areas

A key element of the proposed Mixed Income Incentive Program is to build upon the successes of one of the City's existing incentive-based housing development programs known as the Transit Oriented Communities Affordable Housing Incentive Program Guidelines (TOC Guidelines). In particular, the Mixed Income Incentive Program ordinance would codify and refine the transit proximity incentives, established by the TOC Guidelines, for multi-family housing. The Mixed Income Incentive Program proposes to codify these transit proximity incentives as Transit Oriented Incentive Areas.

Key amendments proposed as part of the proposal of Transit Oriented Incentive Areas include:

- Revising and establishing definitions
- Revising maximum density bonuses (90 percent to Unlimited)
- Revise maximum FAR bonuses
- Removal of minimum parking requirements for projects eligible for transit oriented incentives
- Updating procedures so that projects requesting incentives from a pre-vetted menu are guaranteed ministerial review without a public hearing or appeal
- Updating procedures to allow for off-menu incentive and waiver requests
- Revising the pre-vetted menu of incentives to incorporate new incentives and clarify existing incentives
- Revising the pre-vetted menu of incentives to incorporate new incentives and clarify existing incentives

Opportunity Corridor Incentive Areas

The Opportunity Corridors strategy aims to create housing capacity along major streets located in Higher Opportunity Areas through an incentive-based approach. This entails the creation of a geographically targeted affordable housing incentive system for existing commercial and residential zoned lots located along key corridors in Higher Opportunity Areas, with a tiered

structure that provides varying incentives, including unlimited density, based on proximity to transit and frequency of transit service.

The Opportunity Corridors strategy includes targeted incentives to allow for higher intensity multi-family residential development on residential and commercial zoned parcels that front corridors in Higher Opportunity Areas when affordable housing units are provided. The Opportunity Corridors strategy allows for proposed developments to take advantage of incentives that would allow for building envelopes that reflect the varying densities and site conditions in place on these corridors. The strategy would also plan around mobility options including corridor/network designations in the City's 2035 Mobility Plan. Housing scales facilitated through this strategy would range from lower rise typologies to high rise apartment buildings, with varied building scale incentives offered dependent on the corridor's existing zoning limitations, proximity to transit, and frequency of service.

In particular, the Opportunity Corridors program would facilitate development bonuses on all Avenues and Boulevards in Higher Opportunity Areas. Unlimited density would be offered for all thoroughfares designated as Opportunity Corridors and FAR and height incentive would be scaled depending on proximity to transit and underlying zoning with the largest FAR bonus (4.5:1) offered for corridors within a half mile of a Metro Rail Station or Portal and Rapid Bust Stop and on zones that have base densities of greater than five units.

In addition to the distinct incentive structure described above, key code amendments proposed as part of the Opportunity Corridors Strategy include:

- Unlimited density along major corridors
- Provision of FAR and Height bonuses as base incentives
- Elimination of parking requirements for projects that meet site eligibility criteria

"Missing Middle" Opportunity Corridor Transition Areas

The Proposed Project's Mixed Income Incentive Program also includes a "missing middle" strategy referred to as Opportunity Corridor Transition Areas. These incentive areas are intended to promote opportunities to facilitate the construction of various types of "low scale/low rise" housing (4 to 16 units) to fill the gap in housing options that exists between single-family homes and mid-rise apartment buildings. This strategy also aims to help create better physical transitions in building scale and density from development created as a result of the Opportunity Corridor strategies (described above) to lower scale neighborhoods by offering incentives within 750 feet of an Opportunity Corridor incentive area.

Key code amendments proposed as part of the Opportunity Corridor Transition Area Strategy include:

- Increased density for residentially zoned sites that are directly adjacent to designated opportunity corridors)
- Tailored menu of incentives, performance standards and inability to access waivers or modifications of development standards in order to ensure appropriate scale and quality of design. Automatic base incentives including height, increases contingent on the number of units provided, reduction in required setbacks and minimum lot area
- Elimination of parking requirements

Affordable Housing Incentive Program

The Affordable Housing Incentive Program would provide tailored land use incentives for One Hundred Percent Affordable Housing Projects and affordable housing projects constructed by

Faith Based Organizations in Moderate, High and Highest Resource areas of the City, as defined by TCAC. Additionally, the ordinance would expand the types of zones eligible for One Hundred Percent Affordable Housing Projects or projects constructed by Faith Based Organizations to “P” Parking zones and “PF” Public Facilities zones. Please note that the Affordable Housing Incentive Program is separate from the City’s existing affordable housing incentive programs aimed at creating more mixed-income housing developments.

The Affordable Housing Incentive Program is expected to apply unique sets of incentives for commercially or residentially zoned sites. The program would reflect existing State density bonus incentives available to One Hundred Percent Affordable Housing Projects;² However, the incentives in lower density residential areas would be designed with neighborhood context and scale in mind. Furthermore, the incentives would include limitations pertaining to environmentally sensitive, historic, and socially significant areas of the City. On “PF” Public Facilities zones, per direction from the Los Angeles City Council, One Hundred Percent Affordable Housing Projects would be allowed by-right without limitations on density, FAR, or height. Eligible Historic Resources would be reviewed by the Office of Historic Resources through an administrative review process to ensure that character-defining features are not compromised and that the conversion process conforms to the Secretary of the Interior’s Standards for Rehabilitation.

Key code amendments proposed as part of the Affordable Housing Incentive Program include:

- Unlimited density for One Hundred Percent Affordable Housing Projects or projects constructed by Faith Based Organizations near transit or within Higher or Moderate Opportunity areas
- Codification of density, height, and parking reduction incentives permitted for One Hundred Percent Affordable Housing Projects under State Density Bonus Law (California Government Code Sections 65915-65918)
- Expanded base incentives, including height and FAR, except for sites in Very High Fire Hazard Severity Zones and areas vulnerable to sea level rise only eligible for incentives under State Density Bonus Law
- Revising and establishing definitions
- Allowance of One Hundred Percent Affordable Housing Projects in “P” zones
- New incentives, including unlimited density, for Public Land projects (projects on land owned by a Public Agency or zoned “PF”) and Shared Equity Projects (projects on land owned by Community Land Trusts)
- Refining and expanding the pre-vetted menu of development incentives for eligible projects
- Establishing a new Public Benefit Options section that would provide projects with greater development bonuses in exchange for community benefits, except for sites in Very High Fire Hazard Severity Zones and areas vulnerable to sea level rise only eligible for incentives under State Density Bonus Law
- Streamlined procedures, to allow for expanded by-right processing for eligible projects without public hearings or appeals
- Requiring compliance with Environmental Protection Measures pertaining to sites hosting or near current or previously hazardous uses.
- Tailored procedures for projects constructed by Faith Based Organizations on sites with Eligible Historic Resources

² As provided by AB 1763 (California Government Code Section 65915).

- Acquisition and adjacency considerations for single-family parcels purchased by Faith Based Organizations after January 1, 2024

Citywide Adaptive Reuse Ordinance

The Proposed Project includes an update to the City's Adaptive Reuse Ordinance (ARO), first adopted in 1999 to apply to parts of downtown Los Angeles and modified in 2003 to expand adaptive reuse incentives to the Adaptive Reuse Incentives Area (ARIA) Specific Plan which included the areas of Chinatown, Lincoln Heights, Hollywood, Wilshire/Koreatown, and Central Avenue south of downtown Los Angeles. The Citywide update supersedes the Adaptive Reuse Incentive Areas, expanding general adaptive reuse incentives that will apply citywide, while retaining certain provisions unique to the ARIA subareas.³ The ARO update would alleviate additional barriers to streamline the conversion of underutilized office and commercial properties, including hotels, to housing through a by-right conversion process for buildings that are at least 15 years old. The ARO update could also potentially allow smaller unit sizes, reuse of more recently constructed buildings, and conversion of vacant ground floor commercial space, with certain exceptions.

The Citywide ARO would facilitate reuse of more buildings by updating eligibility criteria to apply to any building that is at least five years old, with buildings over fifteen years old eligible for ministerial review by Los Angeles Department of Building and Safety. The current program relies on a fixed date of July 1, 1974, to determine Adaptive Reuse Project eligibility. The purpose of this change in building age is to expand the pool of buildings eligible for a ministerial approval process to allow for residential conversions. Eligible Historic Resources would be reviewed by the Office of Historic Resources through an administrative review process to ensure that character-defining features are not compromised and that the conversion process conforms to the Secretary of the Interior's Standards for Rehabilitation. Buildings of between five and fifteen years of age would remain eligible for the adaptive reuse incentives but would still be required to obtain a discretionary Zoning Administrator approval.

The proposed Citywide ARO will supersede the Adaptive Reuse Incentive Area Specific Plan so that the same Citywide ARO provisions are applicable citywide. Special provisions associated with the Specific Plan boundaries, including allowing conversions of commercial properties to hotels and conversion to residential uses in manufacturing zones, will be maintained for the Specific Plan areas and are not proposed to apply citywide.

Key code amendments proposed as part of the Citywide ARO include:

- Revising and establishing definitions
- Updating eligibility criteria for buildings proposing conversions to residential uses
- Establishing streamlined procedures, including no hearing and no appeals, for projects proposing the conversion of a non-residential use into a residential use
- Additional review for adaptive reuse conversion projects on sites containing Eligible Historic Resources
- Revised and enhanced menu of incentives for projects proposing conversion of non-residential buildings to residential uses
- Tailored Unified Adaptive Reuse incentives for Adaptive Reuse Projects providing affordable housing with new construction
- Alignment with provisions set forth in AB 1490 (2023)

³ Notably, the Citywide ARO would not apply in the Downtown Los Angeles Community Plan area as that community plan area would be subject to a separate set of development regulations.

- Amendments to both Chapters 1 and 1A of the LAMC to align provisions described above

Housing Element Sites and Minimum Density Ordinance

The Proposed Project would also include an ordinance to implement various housing element law requirements that apply to several different categories of sites identified in the City's 2021-2029 Housing Element. The requirements pertain to housing replacement, by-right development review for 20 percent affordable developments, no net loss, and minimum density requirements. Specifically, they apply to properties identified in the Housing Element Inventory of Sites (currently Appendix 4.1, 4.2, and 4.3 of the 2021-2029 Housing Element); sites that have been listed in Prior Housing Element Site Inventories; and rezoning sites identified to meet the lower income portion of the remaining RHNA.

The housing replacement requirements apply to sites listed in the current Housing Element Inventory of Sites. These requirements prevent the City from approving any development project on a Housing Element site that includes (or included within the last 5 years) certain protected units (e.g., those subject to the Rent Stabilization Ordinance or occupied by lower-income tenants) unless it complies with the replacement provisions defined in California Government Code Section 65915(c)(3). These provisions often mandate that the new development must provide replacement units to ensure there is no net loss of affordable housing. The ordinance also requires separate no net loss findings, which would not have an impact on the environment, but which are designed to ensure an adequate inventory of sites.

The replacement requirement substantially mirrors existing State law requirements in the Housing Crisis Act (Section 66330 of the Government Code), as well as the requirements in today's Density Bonus program and TOC Guidelines. It should be noted that these requirements have become entirely duplicative since AB 1218 (2023) took effect on January 1, 2024. Furthermore, the accompanying Resident Protections Ordinance (see below) extends replacement requirements beyond 2030. Due to the significant overlap between existing and proposed laws, the impact of this aspect of the ordinance is anticipated to be relatively minor.

A more substantial aspect of this ordinance includes the State law requirements [Government Code Section 65583.2(h) and (i)] to permit owner-occupied and rental multi-family uses "by right" for developments in which 20 percent or more of the units are affordable to lower income households. By-right means local governmental review must not require a discretionary review or approval for projects that otherwise meet objective zoning standards. The only exception is for new subdivisions of land. A residential use that meets the criteria shall not constitute a "project" for CEQA purposes.

State housing element law requires by-right development review for eligible development projects on the following site categories. The first are those identified in Prior Housing Element Site Inventories in either the prior two housing element planning periods (or three if the site is vacant). In addition, by-right development review is applied to rezoning sites that are identified to meet the lower income portion of the RHNA. These Lower Income Rezoning Sites must also be zoned with development standards that permit at least 16 units per site and require a minimum density of at least 20 units per acre in metropolitan areas like Los Angeles.

The minimum density requirement also applies to sites across the city where multi-family residential uses are permitted. A minimum density requirement of at least one dwelling unit for every 2,000 square feet of lot area will apply to residential or mixed-use developments on nearly all sites in the R3, RAS3, R4, RAS4, R5, CR, C1, C1.5, C2, C4, C5, CM zones. This requirement will only apply to RD1.5 and RD2 Zoned sites in High or Medium High Residential Market Areas, as defined in the Affordable Housing Linkage Fee. Applying minimum density requirements aligns

with the 2021-2029 Housing Element to promote new multi-family housing development in Higher Opportunity Areas.

Resident Protections Ordinance

The Proposed Project would also include an ordinance that would strengthen and expand existing regulations related to tenant protections and affordable housing units. These regulations would be generally applicable to any housing development project within the City, including those that do not utilize affordable housing incentives. In alignment with the Housing Crisis Act, they would also apply to non-housing development projects submitted until 2030.

Regarding tenant protections, the ordinance would codify requirements pertaining to the demolition of existing housing. This would include the following key components:

- Codification of State housing replacement requirements and occupant protections that were created through the Housing Crisis Act, to extend applicability beyond the 2030 sunset date in State law and incorporate recent amendments by AB 1218 (2023);
- Strengthen occupant protections guaranteed by state law, including:
 - Guarantee the right to return at the prior rental rate, and to a comparable unit (meaning same number of bedrooms and bathrooms)
 - Establish a local formula to implement the state framework for expanded relocation assistance for lower income residents
 - Codify tenant notification requirements regarding all rights, but particularly right to return
 - Create a citywide Anti-Harassment Violators Database to identify and penalize developers who are found to have committed unlawful tenant harassment or illegally evicted a tenant pursuant to the City's existing Anti-Tenant Harassment Ordinance.
 - Establish a private right of action for tenants to seek legal remedies against developers who violate their rights pursuant to the ordinance
- Expand and clarify replacement requirements, including:
 - Increase housing replacement requirements for units subject to the RSO, to ensure one-for-one replacement of any demolished RSO housing units
 - Replace Acutely Low and Extremely Low Income units when incomes of tenants are known; and

The ordinance would also codify requirements for any project within the City that includes restricted affordable housing units, including the following key components:

- Extend required terms of affordable housing covenants to 99 years, with some limited exceptions;
- Codify State requirements pertaining to equal access to amenities and standards for distribution of affordable housing units within a mixed income building, as these standards are not currently codified within the LAMC; and
- Codify policies around the allocation of restricted affordable units, including affirmative marketing and fair housing outreach policies and the listing of affordable units on the Affordable and Accessible Housing Registry with a goal to prioritize those most in need.

Environmental Protection Measures

The CHIP Ordinance would add Section 11.5.15 to the LAMC to allow the Director of Planning to adopt environmental protection measures. Similar language is included in Chapter 1A of the

LAMC and proposed to be adopted with the Downtown Community Plan Update. Adding the language to Chapter 1, would allow the Director to also adopt measures for housing development projects throughout the City, not just in the Downtown Community Plan area. This would allow the Director to add an environmental protection measure to address community concerns with review of technical studies and remediation plans related to contamination in and around active oil wells as well as sites on or near lots with previously hazardous uses including gas stations and dry cleaners. Additionally, adoption of the current proposed environmental protection measures to implement the mitigation measures adopted with the 2021-2029 Housing Element would improve the administration and enforcement of the mitigation as the proposed environmental protection measures and implementing regulations provide a comprehensive administrative and enforcement scheme for the regulation of mitigation measures that are equal or more effective than the mitigation measures adopted in the Housing Element EIR Mitigation Monitoring Program (MMP), which is included as Appendix A to this Addendum.

2.4 PROJECT MODIFICATIONS

Below is a summary of modifications associated with the Proposed Project to the project scope analyzed by the Housing Element EIR.

Housing Development Adjacent to Very High Fire Hazard Severity Zones

As stated in *Section 2 Project Description*, properties located in VHFHSZs or areas vulnerable to sea level rise would generally not be eligible for incentives available in the proposed CHIP Ordinance. However, properties using the Mixed Income Incentive Program in VHFHSZs on Ventura Boulevard; or that are abutting, across the street or alley, or having a common corner with properties not in a VHFHSZ may still be eligible. The Housing Element EIR analysis contemplated potential development in VHFHSZs, however it did not contemplate a specific program that would enable this construction in these very targeted areas. For this reason, this policy direction currently incorporated into the Proposed Project has been identified as a potential change to the project analyzed as part of the Housing Element EIR.

This exception to the prohibition of development in the VHFHSZs would apply to approximately 1,100 parcels predominantly at the periphery of the city's hillsides in areas including the South Valley along Ventura Boulevard as well as in areas of Northeast Los Angeles and Hollywood.

State Legislation (2022 and 2023)

As described in Chapter 1, the California State Legislature enacted a range of new bills focused on housing development in 2022 and 2023 that were not considered as part of the environmental analysis conducted for the 2021-2029 Housing Element. A thorough review of these bills reveals that the provisions implemented as a result of their passage would not result in environmental impacts that exceed those contemplated in the Housing Element EIR. More information on this is provided in *Section 1.5, Changes to Circumstances*.

Environmental Protection Measures

The Proposed Project would authorize the Director to adopt environmental protection measures under Chapter 1 of the LAMC. This would allow the proposed implementing regulations, including extensive noticing, and the proposed environmental protection measures for construction impacts to air, noise, biological resources, archeology, including measures for the Zanja Madre, tribal cultural resources, paleontological resources, noise and vibration to provide alternative mitigations to the mitigation measures for Mitigation Measures 4.3-1(b), 4.4-2, 4.5-1(a)-(d), 4.7-2(a)(b), and 4.15-1(a)(b), and to make minor clean up changes to Mitigation Measures, including

4.2-2(a) and (b), 4.8-1, and 4.10.2 to clarify expert study requirements for drainage, and reconcile the mitigation measures with new state law related to residential operational noise, and to clarify that air study needs to provide all feasible mitigation and recognize the EIR and adopted EIR findings found all feasible air mitigation measures may not reduce impacts to less than significant. The proposed environmental protection measures and their implementing regulations and ordinance are stricter than the adopted mitigation measures because they make a violation of an environmental protection measure a violation of the code subject to criminal, civil and administrative enforcement. The regulations also require all applicants to include the measures on plans, and the owner and contractors to sign an acknowledgement of the standards. It also requires owners to maintain all records of compliance for at least five years after occupancy and allow City inspection of compliance records and allow the Director to require construction monitors. The project also proposed to include the Director adopting an environmental standard for Housing Element Rezoning Sites in and around active oil sites. Based on the above, it is found that the proposed environmental protection measures are equal or more effective than the mitigation measures they will replace in the MMP adopted with the Housing Element EIR (Appendix A) and will not result in new or more severe significant impacts than those identified in the Housing Element EIR. As such, no further analysis will be required in this Addendum.

DRAFT

3 ENVIRONMENTAL IMPACT ANALYSIS

This section of the Addendum provides an impact analysis under *CEQA Guidelines* Section 15162(a)(1) to assess whether the changes to the project scope analyzed in the Housing Element EIR (i.e., the 2021-2029 Housing Element) from the Proposed Project will result in new or more severe significant impacts when compared to those resulting from the 2021-2029 Housing Element, as analyzed in the Housing Element EIR. As summarized in *Section 2.4, Project Modifications* there are no changed circumstances that are anticipated to result in new or more severe significant impacts. The only changed circumstances identified since the adoption of the 2021-2029 Housing Element were the new State housing bills discussed above and as summarized in *Section 1.5, Changes to Circumstances*. These laws are not anticipated to change the impacts caused by the 2021-2029 Housing Element analyzed in the Housing Element EIR. Additionally, as discussed above, the only change or modification to the 2021-2029 Housing Element identified is the proposal to adopt policies to allow some of the new development incentives in VHFHSZs. As such, that is the “change to the project” and the focus of the following environmental analysis.

The Proposed Project, including specifically, the changes to the Housing Element Project from the Proposed Project related to VHFHSZs, would not add new housing citywide, rather it would redistribute previous housing assumptions within the same transportation analysis zones (TAZs) that were used in the Housing Element EIR analysis. This conclusion is supported by the fact that nothing in the Proposed Project would change the forecasted population, housing, or employment numbers for the TAZ zones, based on results from the City of Los Angeles Travel Demand Forecasting model. Therefore, because the Proposed Project would not remove, alter, or otherwise redistribute the forecast development and population growth across TAZs, it is not foreseeable that the Proposed Project would result in any new or different environmental impacts to the impacts that rely on density forecasts, including air quality, greenhouse gas emissions, utilities and service systems, land use, population and housing, and recreation. Additionally, as the Housing Element EIR forecasted redevelopment of sites in the areas affected by the changes from the Proposed Project, the impact analysis related to ground disturbing activity and demolition and construction would foreseeably remain unchanged. Specifically, these impacts include those related to archaeological resources, historical resources, paleontological resources, geology and soils, hydrology and water quality, hazards and hazardous materials and tribal cultural resources. As such, the following environmental impacts would not foreseeably change based on the modification to the 2021-2029 Housing Element from implementation the Proposed Project, and therefore are not analyzed further in the impact assessment of this Addendum: Aesthetics, Air Quality, Cultural Resources, Geology and Soils, Greenhouse Gas Emissions, Hazards and Hazardous Materials, Hydrology and Water Quality, Land Use and Planning, Noise, Population and Housing, Public Services, Recreation, Tribal Cultural Resources, and Utilities and Service Systems.

The analysis in this section of the Addendum, therefore, focuses on impacts that would potentially be impacted by development that may occur in VHFHSZ, including those related to Biological Resources due to development that would be adjacent to undisturbed hillsides under the Proposed Project (*Section 3.1, Biological Resources*, of the Addendum), and Wildfire due to the inclusion of the opportunity corridor parcels in VHFHSZs that may be eligible for incentives under the Proposed Project (*Section 3.3, Wildfire*, of the Addendum). In addition, for a direct comparison of the Proposed Project’s transportation impacts to those analyzed under the Housing Element EIR, *Section 3.2, Transportation*, of the Addendum summarizes the findings of the Transportation Impacts Memorandum (Appendix B) prepared by Fehr & Peers on June 20, 2024.

The conclusions of the previously adopted Housing Element EIR are provided as a reference to further describe how the Proposed Project would not result in any new significant impacts and would not increase the severity of the significant impacts identified in the Housing Element EIR for Biological Resources, Transportation, and Wildfire. The analysis in this section addresses whether any of the conditions set forth in PRC Section 21166 and *CEQA Guidelines* Section 15162, requiring preparation of a supplemental or subsequent EIR, have been triggered. Specifically, this section and associated evaluations provide the following information for all analyzed impacts:

- A. Impact Determination in the Housing Element EIR.** This section summarizes the impact determination made in the Housing Element EIR for each impact category.
- B. Are Substantial Changes Proposed in the Proposed Project Which Will Require Major Revisions of the Housing Element EIR, Due to New Significant Impacts or Substantially More Severe Impacts?** Pursuant to *CEQA Guidelines* Section 15162(a)(1), this section indicates whether the Proposed Project would result in new significant impacts that have not already been considered and mitigated by the prior environmental review or would result in a substantial increase in the severity of a previously identified impact.
- C. Any Change in Circumstances Regarding the Proposed Project Which Will Require Major Revisions of the Housing Element EIR, Due to New Significant Impacts or Substantially More Severe Impacts?** Pursuant to *CEQA Guidelines* Section 15162(a)(2), this section indicates whether there have been changes to the Project Site or the vicinity (circumstances under which the project is undertaken) which have occurred subsequent to the prior environmental documents, which would result in new significant environmental impacts that were not considered in the prior environmental documents or that substantially increase the severity of a previously identified impact.
- D. Any Information of Substantial Importance, Not Known and Could Not Have Been Known with the Exercise of Reasonable Diligence at the time the Housing Element EIR was Certified and Was Approved?** Pursuant to *CEQA Guidelines* Section 15162(a)(3)(A-D), this section indicates whether new information of substantial importance which was not known and could not have been known with the exercise of reasonable diligence at the time the previous environmental documents were certified as complete shows that: (A) The project will have one or more significant effects not discussed in the prior environmental documents; (B) Significant effects previously examined will be substantially more severe than shown in the prior environmental documents; (C) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or (D) Mitigation measures or alternatives which are considerably different from those analyze in the prior environmental documents would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative. New studies completed as part of this environmental review are attached to this Addendum or are on file with the Planning Department.
- E. Conclusion.** For each environmental topic, a discussion of the conclusion relating to the analysis is provided.

3.1 BIOLOGICAL RESOURCES

Issues	Impact Determination in the Housing Element EIR	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?
(a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?	Significant and Unavoidable	No	No	No

A. Impact Determination in the Housing Element EIR

Urbanization has substantially reduced the abundance and diversity of biological resources in Los Angeles, particularly in the central and southern portions of the City. Nonetheless, habitat types that remain in the City are limited, but diverse. These habitats include but are not limited to chaparral and coastal scrub covered hillsides, valley grasslands, and riparian areas that support oak, sycamore, and walnut woodlands. Special-status species have the potential to occur throughout these natural areas.

Because housing development carried out under the Housing Element Update has the potential to occur in these natural areas, vegetation clearing and excavation could remove habitats or individuals. Excavation, ground clearing, equipment and materials storage, access routes, and other activities could result in impacts on runoff and/or water quality, potentially affecting habitats. Moreover, excavation, ground clearing, and access routes could result in air quality impacts (dust, exhaust) or generate noise that could affect adjacent individuals. Equipment or construction-related traffic could introduce hazardous materials into habitats as well. Equipment and construction personnel could also introduce harmful, noxious, and/or invasive species that could damage habitats (such as by tracking in weed seeds). Any of these direct and indirect effects could result in significant impacts on special-status species. Even in fully developed areas, housing development activities have the potential to result in impacts on protected species. If housing is sited within or adjacent to natural habitats, then it could affect special-status species or their habitats, which would be considered a significant impact.

Notably, migratory birds, including most birds that nest in the areas subject to housing development under the Housing Element Update, are protected by the federal Migratory Bird Treaty Act (MBTA), which forbids most forms of harm to birds, including to their active nests. In addition, California Fish and Game Code (CFGF) Section 3503 makes it unlawful to destroy nests or eggs of any bird, except as otherwise provided by code or regulation. Where vegetation, and especially trees, are removed as part of housing development under any of the various housing types, there is the potential for violations under the MBTA and Section 3503 of the CFGF, which are considered significant. Compliance with existing laws and regulations (e.g., MBTA and CFGF), would reduce potential impacts.

Conclusion: Impacts from build out of the RHNA would depend most on the location of the housing development project whether it is occurring near habitats that could support or is used by special status species. The size and scope of the project can also affect the level of impact, but even the construction of a single-family home or ADU can have the potential to impact sensitive species,

depending on the location of the project. As such, impacts to special-status species from build out of the RHNA under the Housing Element Update are *potentially significant*.

Mitigation Measures:

4.3-1(a) Biological Resources reconnaissance Survey and Reporting

For all discretionary projects that require vegetation removal, ground disturbance, staging of vehicles, equipment, or materials, and access routes of on natural (e.g., native, virgin) or disturbed (e.g., unpaved, areas barren, or ruderal), areas that contain or have the potential to support special-status species, sensitive habitat, or within 300 feet of suitable habitat to support special-status species (e.g., nesting passerines) as determined by the Department of City Planning and/or CDFW, the project applicant shall be required to conduct a biological resources assessment report to characterize the biological resources on-site and to determine the presence or absence of sensitive species. The report shall identify 1) approximate population size and distribution of any sensitive plant or animal species, 2) any sensitive habitats (such as wetlands or riparian areas), and 3) any potential impacts of the Proposed Project on wildlife corridors. Off-site areas that may be directly or indirectly affected by the individual project shall also be surveyed. The report shall include site location, literature sources, methodology, timing of surveys, vegetation map, site photographs, and descriptions of on-site biological resources (e.g., observed and detected species, as well as an analysis of those species with the potential to occur on-site). The biological resources assessment report and surveys shall be conducted by a qualified biologist, and any special status species surveys shall be conducted according to standard methods of surveying for the species as appropriate.

If sensitive species and/or habitat are absent from the individual project site and adjacent lands potentially affected by the individual project, a written report substantiating such shall be submitted to the Department of City Planning (DCP) prior to issuance of a grading permit, and the project may proceed without any further biological investigation. If wildlife corridors are present, the report shall identify measures (such as providing native landscaping to provide cover on the wildlife corridor) that the individual project would be required to implement such that the existing wildlife corridor would remain. Wildlife corridors identified in the biological resources assessment report shall not be entirely closed by any development or improvements occurring within the Project Area.

4.3-1(b) Pre-Construction Bird Nest Surveys, Avoidance, and Notification

For all discretionary projects where sensitive species and/or habitat are identified in the biological resources assessment prepared pursuant to MM 4.3-1(a), the biological resources assessment report shall require pre-construction surveys for sensitive species and/or construction monitoring to ensure avoidance, relocation, or safe escape of the sensitive species from the construction activities, as appropriate. If sensitive species are found to be nesting, brooding, denning, etc. on-site during the pre-construction survey or during construction monitoring, construction activities shall be halted until offspring are weaned, fledged, etc. and are able to escape the site or be safely relocated to appropriate off-site habitat areas. A qualified biologist shall be on-site to conduct surveys, for construction monitoring, to perform or oversee implementation of protective measures, and to determine when construction activity may resume. Additionally, the biological resources assessment report shall be submitted to DCP and California Department of Fish and Wildlife (CDFW) prior to ground-disturbing activities. A follow-up report documenting construction monitoring, relocation methods, and the results of the monitoring and species relocation shall also be submitted to DCP and CDFW following construction.

Construction activities initiated during the bird nesting season (February 1 – August 31) involving removal of vegetation or other nesting bird habitat, including abandoned structures and other man-made features, a pre-construction nesting bird survey shall be conducted no more than three days prior to initiation of ground disturbance and vegetation removal activities. The nesting bird pre-construction survey shall be conducted on foot and shall include a 100-foot buffer around the construction site. The survey shall be conducted by a biologist familiar with the identification of avian species known to occur in southern California. If nests are found, an avoidance buffer shall be determined dependent upon the species, the proposed work activity, and existing disturbances associated with land uses outside of the site, which shall be demarcated by the biologist with bright orange construction fencing, flagging, construction lathe, or other means to demarcate the boundary. All construction personnel shall be notified as to the existence of the buffer zone and to avoid entering the buffer zone during the nesting season. No ground disturbing activities shall occur within the buffer until the avian biologist has confirmed that breeding/ nesting is completed, and the young have fledged the nest. Encroachment into the buffer shall occur only at the discretion of the qualified biologist on the basis that the encroachment will not be detrimental to an active nest. A report summarizing the pre-construction survey(s), construction monitoring, and implementation of protective measures conducted shall be prepared by a qualified biologist and shall be submitted to the City within two weeks of project completion.

Proposed Project site plans shall include a statement acknowledging compliance with the federal MBTA and CFGC that includes avoidance of active bird nests and identification of Best Management Practices to avoid impacts to active nests, including checking for nests prior to construction activities during February 1 to August 31 and what to do if an active nest is found so that the nest is not inadvertently impacted during grading or construction activities.

4.3-1(c) Focused Surveys for Rare Plants

If indicated as appropriate by the biological resources assessment report required in Mitigation Measure 4.3-1(a), focused surveys for special status plants shall be conducted. Prior to vegetation clearing for construction in open space areas, special status plants identified in the focused surveys shall be counted and mapped and a special-status plant relocation plan shall be developed and implemented to provide for translocation of the plants. The plan shall be prepared by a qualified biologist and shall include the following components: (1) identify an area of appropriate habitat, on-site preferred; (2) depending on the species detected, determine if translocation will take the form of seed collection and deposition, or transplanting the plants and surrounding soil as appropriate; (3) develop protocols for irrigation and maintenance of the translocated plants where appropriate; (4) set forth performance criteria (e.g., establishment of quantitative goals, expressed in percent cover or number of individuals, comparing the restored and impacted population) and remedial measures for the translocation effort; and (5) establish a five-year monitoring procedures/protocols for the translocated plants. Five years after initiation of the restoration activities, a report shall be submitted to DCP and CDFW, which shall at a minimum discuss the implementation, monitoring, and management of the restoration activities over the five-year period and indicate whether the restoration activities have, in part or in whole, been successful based on the established performance criteria. The restoration activities shall be extended if the performance criteria have not been met at the end of the five-year period to the satisfaction of DCP, CDFW, and U.S. Fish and Wildlife Service (USFWS), when applicable.

4.3-1(d) Adaptive Management Plan

If indicated as appropriate in a reconnaissance, pre-construction or focused survey required in Mitigation Measure 4.3-1(a), (b), or (c) the biologist shall prepare an Adaptive Management

Plan for future operations to ensure that operations will not result in impacts to special status species, such as lighting plans, fencing plans, revegetation plans, and/or necessary covenants to ensure property owners maintain their properties in a way to reduce impacts to native species, such as requirements for keeping domestic animals or use of non-native vegetation, and/or education campaigns. Applicants shall prepare necessary documentation and provide adequate assurances to ensure compliance with ongoing operational requirements, including such measures as, but not limited to, filing of covenants, creation of funding mechanism, or provision of bonds.

Level of Significance of Impact after Mitigation: Mitigation Measure 4.3-1(a) through 4.3-1(d) requires the completion of a biological resources assessment reports for any projects that require vegetation removal, ground disturbance, staging of vehicles, equipment, or materials, and access routes on natural (e.g., native, virgin) or disturbed (e.g., unpaved, barren, or ruderal), areas that contain or have the potential to support special-status species, sensitive habitat, or are within 300 feet of suitable habitat to support special-status species. If sensitive species and/or habitat are identified, pre-construction surveys will be conducted, and other protective measures will be implemented as needed during the pre-construction and construction monitoring phases. In addition, the measure requires focused surveys for special-status plants if the biological resources assessment report deems it appropriate to conduct such a survey. Additionally, mitigation plans to address operational impacts may also be required.

Implementing these conditions for projects would reduce the potential for substantial adverse effect on species identified as a candidate, sensitive, or special species in local or regional plans, policies, or regulations, or by the CDFW or United States Fish and Wildlife Service (USFWS), on most development sites. However, as Mitigation Measure 4.3-1(a)-(d) would not apply to ministerial projects, the mitigation measures would not eliminate all potential impacts to special-status species from implementation of the Housing Element Update. Applying the measure to ministerial projects is infeasible based on the necessary resources to implement and administer the measure and the burden to needed housing. Additionally, without knowing all site-specific conditions and depending on circumstances, even applying mitigation measures, impacts may still occur. Therefore, impacts related to the Housing Element Update are *significant and unavoidable*.

B. Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?

As stated in *Section 2, Project Description*, the Housing Element EIR analysis contemplated potential development in VHFHSZs, however, it did not contemplate a specific program (i.e., properties using the Mixed Income Incentive Program under the Citywide Housing Incentive Program Ordinance) that would enable construction in these very targeted areas (i.e., approximately in VHFHSZs on Ventura Boulevard; or that are abutting, across the street or alley, or having a common corner with properties not in a VHFHSZ). For this reason, the policy direction under the Proposed Project has been identified as a potential change to the project analyzed as part of the Housing Element EIR. This exception to the prohibition of development in the VHFHSZs would apply to approximately 1,100 parcels predominantly at the periphery of the city's hillsides in areas including the South Valley along Ventura Boulevard as well as in areas of Northeast Los Angeles and Hollywood, as shown in Figure 3 through Figure 12.

With respect to candidate, sensitive, or special status species, the Housing Element EIR acknowledges that urbanization has substantially reduced the abundance and diversity of biological resources in the city and impacts from build out of the RHNA would depend most on the location of the housing development and whether it is occurring within or near natural habitat

that could support or is used by these species. Specifically, the Housing Element EIR anticipates that housing growth would occur in areas already developed with residential uses or areas with potential for residential redevelopment, including but not limited to the following:

- Sites currently zoned for residential uses, including multi-family and single-family uses;
- Sites currently zoned for commercial uses, which permit residential uses;
- Sites currently zoned for hybrid industrial uses, which permit joint live-work residential uses;
- Non-vacant sites, and sites with existing housing units;
- Sites located near public transportation;
- Sites located in a Historic Preservation Overlay Zone; and
- Sites located in areas with special environmental considerations, such as areas located near Open Space, Hillside Areas, VHFHSZ, or the Coastal Zone.

Note, the EIR recognized and included case studies that analyzed housing on sites that are in hillsides and VHFHSZ and in non-residential zones, such as industrial zones, recognizing that build out of the RHNA could occur anywhere in the City.

Although the 1,100 parcels are on the periphery of the city's hillsides, these parcels would occur in geographic areas that are similar to those identified in the areas that the Housing Element EIR identified for the Rezoning Program or where the highest concentration of build out of the RHNA would occur (i.e., already developed areas near public transit, jobs, in existing growth areas identified in the Framework Element), and in Higher Opportunity Areas (High and Highest Resource Areas as defined by TCAC). Nonetheless, and as discussed in the Housing Element EIR, any housing sited within or adjacent to natural habitat could affect candidate, sensitive, or special status species, which would result in a significant impact. However, similar to housing development analyzed under the Housing Element EIR, implementation of Mitigation Measure 4.3-1(a) through 4.3-1(d) would require the completion of a biological resources assessment reports for any projects that require vegetation removal, ground disturbance, staging of vehicles, equipment, or materials, and access routes on natural or disturbed, areas that contain or have the potential to support special-status species, sensitive habitat, or are within 300 feet of suitable habitat to support special-status species. These measures would reduce impacts to biological resources on most developed sites. However, as Mitigation Measures 4.3-1(a) through (d) would not apply to ministerial projects, the mitigation measures would still not eliminate all potential impacts to special-status species from implementation of the Proposed Project. Additionally, as stated in the Housing Element EIR, without knowing all site-specific conditions and depending on circumstances, even applying mitigation measures, impacts may still occur. Therefore, this impact would remain significant and unavoidable.

There are no proposed changes under the Proposed Project that would require major revisions to the Housing Element EIR due to new significant impacts or substantially more severe impacts beyond what was previously analyzed in the Housing Element EIR.

C. Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?

Refer to *Section 1.5, Changes to Circumstances*, for discussion of recent State housing laws and how they do not affect the analyses presented in the Housing Element EIR. There are no substantial changes to the circumstances under which the Proposed Project is being undertaken that would require major revisions to the Housing Element EIR due to the involvement of new or

more severe significant impacts related to candidate, sensitive, or special status species beyond what was previously analyzed in the Housing Element EIR.

D. Any New Information Requiring New Analysis or Verification?

There is no new information of substantial importance that has been identified, which was not known and could not have been known with the exercise of reasonable diligence at the time the Housing Element EIR was certified, that shows the Proposed Project involves new significant impacts or substantially more severe impacts related to candidate, sensitive, or special status species beyond what was previously analyzed in the Housing Element EIR.

E. Conclusion

The Proposed Project would not result in any of the conditions set forth in PRC Section 21166 or *CEQA Guidelines* Section 15162 or 15163 that would require the preparation of a subsequent or supplemental EIR.

DRAFT

Issues	Impact Determination in the Housing Element EIR	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?
(b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?	Significant and Unavoidable	No	No	No

A. Impact Determination in the Housing Element EIR

Housing development accommodated under the Housing Element Update that is within or adjacent to sensitive habitats, such as riparian, oak woodlands, or stands of protected trees (e.g., walnuts, oaks, sycamore), could result in potential direct and impacts through removal of vegetation, compaction of soils, and/or indirectly through dust and vegetation thinning. Through zoning restrictions, housing development under the Housing Element Update would be consistent with the objectives, policies, and programs contained within the City’s General Plan Conservation Element to protect sensitive species, which would have direct and indirect beneficial effects for special status species, such as through preserving, protecting, restoring, and enhancing natural plant and wildlife diversity, habitats, corridors, and linkages to enable the health propagation and survival of native species.

Conclusion: The Housing Element Update would not change the objectives, policies, and programs contained within the City’s General Plan Conservation Element. However, it is reasonably foreseeable that implementation of the Housing Element Update could impact various habitat types, including riparian habitat and other sensitive plant communities. Therefore, impacts related to riparian habitat or other sensitive natural community identified in local or regional plans, policies or regulations, or by the CDFW or USFWS are *potentially significant*.

Mitigation Measures:

4.3-2(a) Habitat Mitigation and Monitoring Program

For discretionary projects that are in areas potentially containing sensitive natural communities or jurisdictional waters and riparian habitat, including streams, wetlands, riparian habitat, and other water bodies, affected sites as well as off-site areas that may be directly or indirectly affected by the individual development project, prior to the issuance of grading permits, the applicant shall prepare and submit a Habitat Mitigation and Monitoring Program (HMMP), which shall mitigate for impacts to CDFW jurisdictional habitat at a 2:1 ratio for permanent impacts and a 1:1 ratio for temporary impacts, or as otherwise approved by CDFW and the City.

The HMMP shall mitigate for impacts to jurisdictional areas via an acceptable mitigation approach that involves one or a combination of the on-site or off-site restoration or enhancement of degraded in-kind habitats, preservation of in-kind habitats, or by a contribution to an in-lieu fee program approved by the City, CDFW (and USACE, RWQCB, if applicable).

The final HMMP shall be developed by a qualified biologist, restoration ecologist or resource specialist and submitted to and approved by the City and CDFW (USACE, RWQCB, if applicable), in compliance with Clean Water Act Sections 401 and 404 and California Fish and Game Code 1602 and supporting regulations, prior to issuance of a grading permit for the project. In broad terms, this Program shall at a minimum include:

- Description of the project/impact and mitigation sites;
- Specific objectives;
- Success criteria;
- Plant palette;
- Implementation plan;
- Maintenance activities;
- Monitoring plan; and
- Contingency measures.

Success criteria shall at a minimum be evaluated based on appropriate survival rates and percent cover of planted native species, as well as eradication and control of invasive species within the restoration area.

The target species and native plant palette, as well as the specific methods for evaluating whether the project has been successful at meeting the above-mentioned success criteria shall be determined by the qualified biologist, restoration ecologist, or resource specialist and included in the HMMP.

The HMMP shall be implemented over a five-year period and shall incorporate an iterative process of annual monitoring and evaluation of progress and allow for adjustments to the program, as necessary, to achieve desired outcomes and meet success criteria. Annual reports discussing the implementation, monitoring, and management of the HMMP shall be submitted to the City and the CDFW (USACE, RWQCB, if applicable). Five years after project start, a final report shall be submitted to the City and the CDFW (USACE, RWQCB, if applicable), which shall at a minimum discuss the implementation, monitoring and management of the mitigation project over the five-year period and indicate whether the HMMP has met the established success criteria. The annual reports and the final report shall include as-built plans submitted as an appendix to the report. Restoration will be considered successful after the success criteria have been met for a period of at least two years without any maintenance or remediation activities other than invasive species control. The project shall be extended if the success criteria have not been met at the end of the five-year period to the satisfaction of the City and the CDFW (USACE, RWQCB, if applicable).

4.3-2(b) Protected Tree and Tree Canopy Survey

For discretionary projects that include the removal of trees, prior to the issuance of a grading permit, a tree report and tree replanting plan shall be conducted by a certified arborist prior to project construction to tag and assess all trees (defined as woody plant material that is five inches or greater in diameter at breast height [DBH – four and a half feet off grade]) subject to the City's Protected Tree Ordinance on the project site. Trees shall be tagged to correspond with a tree exhibit map. Also, the genus and species of the trees, size of the trees at DBH, and structure and vigor of the trees shall be determined, and an evaluation of the trees' resource value (i.e., the biological impacts of the tree removals, potential to be considered wildlife habitat, and locating trees deserving protection) shall be completed. All protected trees shall receive a visual tree assessment (VTA – meaning tree observations shall be from the ground and that no special devices [e.g., increment borers, drills] shall be used). Following

the completion of the tree survey, the arborist shall prepare a report that shall at a minimum provide a description of the general character of the trees on the site and identify opportunities and constraints for preservation. The report and tree replanting plan shall be provided to the City for review. As part of the assessment, a plot plan shall also be prepared indicating the location, type, and canopy coverage of all existing trees on the site and within the adjacent public right(s)-of-way.

Based on the results of the tree survey, development plans shall be clustered to maximum extent feasible in order to avoid impacts to sensitive natural communities (e.g., oak woodlands, riparian habitats, extensive tree canopy) and to maintain the largest and most contiguous area of sensitive communities on the site. Additionally, the development plans shall include a proposed minimum buffer to protect adjacent sensitive communities. Development plans that impact sensitive natural communities shall include a detailed feasibility analysis showing how the design has accomplished these avoidance strategies; the City shall not approve development plans until the site design has adequately demonstrated maximum avoidance of sensitive natural communities to the satisfaction of the City Planning.

Further, removal or planting of any tree in the public right(s)-of-way requires approval of the Board of Public Works. All trees in the public right(s)-of-way shall conform to the current standards of the Department of Public Works, Urban Forestry Division, Bureau of Street Services.

The following measures shall be implemented in addition to those required under the City's Protected Tree Ordinance (Ordinance No. 177,404) to avoid and/or compensate for potential indirect impacts to preserved sensitive natural communities before, during, and following construction activities.

Pre-Construction

- **Fencing:** Protective fencing at least three feet high with signs and flagging shall be erected around all preserved sensitive natural communities where adjacent to proposed vegetation clearing and grubbing, grading, or other construction activities. The protective fence shall be installed at a minimum of five feet beyond the tree canopy dripline. The intent of protection fencing is to prevent inadvertent limb/vegetation damage, root damage and/or compaction by construction equipment. The protective fencing shall be depicted on all construction plans and maps provided to contractors and labeled clearly to prohibit entry, and the placement of the fence in the field shall be approved by a qualified biologist prior to initiation of construction activities. The contractor shall maintain the fence to keep it upright, taut and aligned at all times. Fencing shall be removed only after all construction activities are completed.
- **Pre-Construction Meeting:** A pre-construction meeting shall be held between all site contractors and a registered consulting arborist and/or a qualified biologist. All site contractors and their employees shall provide written acknowledgement of their receiving sensitive natural community protection training. This training shall include, but shall not be limited to, the following information: (1) the location and marking of protected sensitive natural communities; (2) the necessity of preventing damage to these sensitive natural communities; and (3) a discussion of work practices that shall accomplish such.

During Construction

- **Fence Monitoring:** The protective fence shall be monitored regularly (at least weekly) during construction activities to ensure that the fencing remains intact and functional, and that no encroachment has occurred into the protected natural community; any repairs to the fence or encroachment correction shall be conducted immediately.

- **Equipment Operation and Storage:** Contractors shall avoid using heavy equipment around the sensitive natural communities. Operating heavy machinery around the root zones of trees would increase soil compaction, which decreases soil aeration and, subsequently, reduces water penetration into the soil. All heavy equipment and vehicles shall, at minimum, stay out of the fenced protected zones, unless where specifically approved in writing and under the supervision of a registered consulting arborist and/or a qualified biologist.
- **Materials Storage and Disposal:** Contractors shall not store or discard any construction materials within the fenced protected zones and shall remove all foreign debris within these areas. The contractors shall leave the duff, mulch, chips, and leaves around the retained trees for water retention and nutrient supply. Contractors shall avoid draining or leakage of equipment fluids near retained trees. Fluids such as gasoline, diesel, oils, hydraulics, brake and transmission fluids, paint, paint thinners, and glycol (anti-freeze) shall be disposed of properly. The contractors shall ensure that equipment be parked at least 50 feet, and that equipment/vehicle refueling occur at least 100 feet, from fenced protected zones to avoid the possibility of leakage of equipment fluids into the soil.
- **Grade Changes:** Contractors shall ensure that grade changes, including adding fill, shall not be permitted within the fenced protected zone without special written authorization and under supervision by a registered consulting arborist and/or a qualified biologist. Lowering the grade within the fenced protected zones could necessitate cutting main support and feeder roots, thus jeopardizing the health and structural integrity of the tree(s). Adding soil, even temporarily, on top of the existing grade could compact the soil further, and decrease both water and air availability to the tree roots. Contractors shall ensure that grade changes made outside of the fenced protected zone shall not create conditions that allow water to pond.
- **Trenching:** Except where specifically approved in writing beforehand, all trenching shall be outside of the fenced protected zone. Roots primarily extend in a horizontal direction forming a support base to the tree similar to the base of a wineglass. Where trenching is necessary in areas that contain roots from retained trees, contractors shall use trenching techniques that include the use of either a root pruner (Dosko root pruner or equivalent) or an Air-Spade to limit root impacts. A registered consulting arborist shall ensure that all pruning cuts shall be clean and sharp, to minimize ripping, tearing, and fracturing of the root system. Root damage caused by backhoes, earthmovers, dozers, or graders is severe and may ultimately result in tree mortality. Use of both root pruning and Air-Spade equipment shall be accompanied only by hand tools to remove soil from trench locations. The trench shall be made no deeper than necessary.
- **Erosion Control:** Appropriate erosion control best management practices (BMPs) shall be implemented to protect preserved sensitive natural communities during and following project construction. Erosion control materials shall be certified as weed free.
- **Inspection:** A registered consulting arborist shall inspect the preserved trees adjacent to grading and construction activity on a monthly basis for the duration of the grading and construction activities. A report summarizing site conditions, observations, tree health, and recommendations for minimizing tree damage shall be submitted by the registered consulting arborist following each inspection.

Post-construction

- **Mulch:** The contractors shall ensure that the natural duff layer under all trees adjacent to construction activities shall be maintained. This would stabilize soil temperatures in root zones, conserve soil moisture, and reduce erosion. The contractors shall ensure that the mulch be kept clear of the trunk base to avoid creating conditions favorable to the

establishment and growth of decay causing fungal pathogens. Should it be necessary to add organic mulch beneath retained oak trees, packaged or commercial oak leaf mulch shall not be used as it may contain root fungus. Also, the use of redwood chips shall be avoided as certain inhibitive chemicals may be present in the wood. Other wood chips and crushed walnut shells can be used, but the best mulch that provides a source of nutrients for the tree is its own leaf litter. Any added organic mulch added by the contractors shall be applied to a maximum depth of 4 inches where possible.

- **Watering Adjacent Plant Material:** All installed landscaping plants near the preserved sensitive natural communities shall require moderate to low levels of water. The surrounding plants shall be watered infrequently with deep soaks and allowed to dry out in-between, rather than frequent light irrigation. The soil shall not be allowed to become saturated or stay continually wet, nor should drainage allow ponding of water. Irrigation spray shall not hit the trunk of any tree. The contractors shall maintain a 30-inch dry-zone around all tree trunks. An above ground micro-spray irrigation system shall be used in lieu of typical underground pop-up sprays.
- **Monitoring:** A certified arborist shall inspect the trees preserved on the site adjacent to construction activities for a period of two years following the completion of construction. Monitoring visits shall be completed quarterly, totaling eight visits. Following each monitoring visit, a report summarizing site conditions, observations, tree health, and recommendations for promoting tree health shall be submitted to the City. Additionally, any tree mortality shall be noted and any tree dying during the two-year monitoring period shall be replaced at a minimum 3:1 ratio on-site in coordination with the City.

Level of Significance of Impact after Mitigation: Mitigation Measures 4.3-2(a) and 4.3-2(b) require the completion of a HMMP and a protected tree and tree canopy survey for any projects that require vegetation removal, ground disturbance, staging of vehicles, equipment, or materials, and access routes in riparian or other sensitive habitats, including urban tree canopies. Implementing these conditions for projects would reduce the potential for substantial adverse effect on these resources by avoiding, minimizing, and mitigating impacts through approval of site-specific mitigation plans or replanting plans prior to the issuance of a grading permit. However, as Mitigation Measures 4.3-2(a) and 4.3-2(b) would not apply to ministerial projects, the mitigation measures would not eliminate all potential impacts to sensitive habitats from implementation of the Housing Element Update. Imposing the mitigation measures on all ministerial projects is not feasible based on the resources required to adopt and implement the requirement and based on the burden on urgently needed housing. Additionally, even with mitigation depending on the circumstances impacts may still result. Therefore, the Housing Element Update would result in a *significant and unavoidable* impact after mitigation.

B. Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?

As stated in *Section 2 Project Description*, the Housing Element EIR analysis contemplated potential development in VHFHSZs, however, it did not contemplate a specific program (i.e., properties using the Mixed Income Incentive Program under the Citywide Housing Incentive Program Ordinance) that would enable construction in these very targeted areas (i.e., approximately in VHFHSZs on Ventura Boulevard; or that are abutting, across the street or alley, or having a common corner with properties not in a VHFHSZ). For this reason, the policy direction under the Proposed Project has been identified as a potential change to the project analyzed as part of the Housing Element EIR. This exception to the prohibition of development in the VHFHSZs would apply to approximately 1,100 parcels predominantly at the periphery of the city's

hillsides in areas including the South Valley along Ventura Boulevard as well as in areas of Northeast Los Angeles and Hollywood, as shown in Figure 3 through Figure 12.

Although urbanization has substantially reduced the abundance and diversity of biological resources in the city, the Housing Element EIR acknowledges that housing development accommodated under the 2021-2029 Housing Element within or adjacent to sensitive habitats could result in potential direct indirect impacts through removal of vegetation, compaction of soils, and/or indirectly through dust and vegetation trimming. However, the Housing Element EIR also anticipates that housing growth would occur in areas already developed with residential uses or areas with potential for residential development (refer to the *Section 3.1, Biological Resources*, impact analysis (a) for a list of site types).

The 1,100 parcels under the Proposed Project are on the periphery of the city's hillsides in geographic areas that are similar to those areas that the Housing Element EIR identified for the Rezoning Program or where the highest concentration of build out of the RHNA would occur (i.e., already developed areas near public transit, jobs, in existing growth areas identified in the Framework Element), and in Higher Opportunity Areas. Nonetheless, as with housing development under the 2021-2029 Housing Element, it is reasonably foreseeable that implementation of the Proposed Project could impact various habitat types, including riparian habitat and other sensitive plant communities. Mitigation Measures 4.3-2(a) and 4.3-2(b) would require the completion of a HMMP and a protected tree and tree canopy survey for any projects that require vegetation removal, ground disturbance, staging of vehicles, equipment, or materials, and access routes in riparian or other sensitive habitats, including urban tree canopies. However, as Mitigation Measures 4.3-2(a) and 4.3-2(b) would not apply to ministerial projects, the mitigation measures would not eliminate all potential impacts to sensitive habitats from implementation of the Proposed Project. This impact would remain significant and unavoidable.

There are no proposed changes under the Proposed Project that would require major revisions to the Housing Element EIR due to new significant impacts or substantially more severe impacts beyond what was previously analyzed in the Housing Element EIR.

C. Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?

Refer to *Section 1.5, Changes to Circumstances*, for discussion of recent State housing laws and how they do not affect the analyses presented in the Housing Element EIR. There are no substantial changes to the circumstances under which the Proposed Project is being undertaken that would require major revisions to the Housing Element EIR due to the involvement of new or more severe significant impacts related to riparian or other sensitive natural communities beyond what was previously analyzed in the Housing Element EIR.

D. Any New Information Requiring New Analysis or Verification?

There is no new information of substantial importance that has been identified, which was not known and could not have been known with the exercise of reasonable diligence at the time the Housing Element EIR was certified, that shows the Proposed Project involves new significant impacts or substantially more severe impacts related to riparian or other sensitive natural communities beyond what was previously analyzed in the Housing Element EIR.

E. Conclusion

The Proposed Project would not result in any of the conditions set forth in PRC Section 21166 or *CEQA Guidelines* Section 15162 or 15163 that would require the preparation of a subsequent or supplemental EIR.

Issues	Impact Determination in the Housing Element EIR	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?
(c) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	Significant and Unavoidable	No	No	No

A. Impact Determination in the Housing Element EIR

There are undeveloped areas within the City that are located adjacent to large tracts of native habitat (e.g., Santa Monica Mountains, Griffith Park, Sullivan Canyon), which provide vegetative cover suitable for the movement of many terrestrial wildlife species, including medium to large-sized, mobile mammals with relatively large home ranges, such as coyote, deer, bobcat, grey fox, and mountain lion, and also provide foraging and breeding habitat for many species. Wildlife species can move through these vegetated areas routinely with some species also using concrete-lined or earthen stormwater channels in the area for movement.

Housing development could potentially occur within areas that support sensitive habitat (e.g., riparian areas, SEAs, undeveloped natural areas). Within these areas, potential development generally would be limited to improvements associated with low density residential uses, ADUs or conversions, depending on the zoning and land use designation of the parcels.

Even in more urbanized areas such as South Los Angeles and the Harbor Area, there are pockets of natural areas that are considered native wildlife nursery sites (e.g., Baldwin Hills, South LA Wetlands Park, Banning Park, and Harbor Lake). These areas have the potential to support nesting birds and other breeding wildlife. Development projects are required to comply with CFGC sections (e.g., Sections 3503, 3503.5, 3513, and 4150); thus, it is unlikely that housing development accommodated under the Housing Element Update would result in the disturbance or destruction of active nest sites or the unauthorized take of birds or nongame mammals. Nevertheless, if development activities directly (e.g., cutting of trees or other vegetation, or removal of man-made structures containing an active bird nest or denning wildlife) or indirectly (e.g., if activities sufficiently harassed birds to cause nest abandonment) affect nesting birds and nongame mammals, a violation of the CFGC would result.

Conclusion: Housing development accommodated by the Housing Element Update could interfere with the movement of any native resident or migratory fish or wildlife species or within established native resident or migratory wildlife corridors or impede the use of native wildlife nursery sites. Additionally, the Housing Element Update could result in development of parcels that may contain suitable nesting habitat for birds. Therefore, impacts to native resident, migratory fish and wildlife; established native resident or migratory wildlife corridors; or native wildlife nursery sites would be *potentially significant*.

Mitigation Measure: Refer to Mitigation Measure 4.3-1.

Level of Significance of Impact after Mitigation: To avoid impacts to wildlife corridors and the wildlife that rely on them, all potential wildlife movement pathways, including those with existing obstacles and constrictions, such as roads, pipelines, aqueducts, and landscaped or otherwise

altered terrain, must be identified and evaluated. While the measures identified under the Mitigation Measure 4.3-1 would help to reduce potential impacts to wildlife movement and nursery sites, projects sited within or adjacent to these areas have the potential to generate adverse edge effects that could significantly reduce the use of surrounding habitats by wildlife for movement through the area. Therefore, encroachment (e.g., night lighting, domestic animals, and urban noises) into these areas would reduce the overall size and function of the wildlife movement corridor or nursery site. Furthermore, as Mitigation Measure 4.3-1 would not apply to ministerial projects, the mitigation measures would not eliminate all potential impacts to special-status species from implementation of the project. Additionally, even with mitigation measures imposed depending on circumstances, impacts may still occur. Therefore, the Housing Element Update would result in a *significant and unavoidable* impact after mitigation.

B. Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?

As stated in *Section 2 Project Description*, the Housing Element EIR analysis contemplated potential development in VHFHSZs, however, it did not contemplate a specific program (i.e., properties using the Mixed Income Incentive Program under the Citywide Housing Incentive Program Ordinance) that would enable construction in these very targeted areas (i.e., approximately in VHFHSZs on Ventura Boulevard; or that are abutting, across the street or alley, or having a common corner with properties not in a VHFHSZ). For this reason, the policy direction under the Proposed Project has been identified as a potential change to the project analyzed as part of the Housing Element EIR. This exception to the prohibition of development in the VHFHSZs would apply to approximately 1,100 parcels predominantly at the periphery of the city's hillsides in areas including the South Valley along Ventura Boulevard as well as in areas of Northeast Los Angeles and Hollywood, as shown in Figure 3 through Figure 12.

Although urbanization has substantially reduced the abundance and diversity of biological resources in the city, the Housing Element EIR acknowledges there are pockets of natural areas and housing development accommodated under the 2021-2029 Housing Element could interfere with the movement of native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors. However, the Housing Element EIR also anticipates that housing growth would occur in areas already developed with residential uses or areas with potential for residential development (refer to the *Section 3.1, Biological Resources*, impact analysis (a) for a list of site types).

The 1,100 parcels under the Proposed Project are on the periphery of the city's hillsides along developed urban corridors, rather than deep within natural and undisturbed areas. These parcels would occur in geographic areas that are similar to those areas that the Housing Element EIR identified for the Rezoning Program or where the highest concentration of build out of the RHNA would occur (i.e., already developed areas near public transit, jobs, in existing growth areas identified in the Framework Element), and in Higher Opportunity Areas. As such, development on these parcels would not increase impacts when compared to the analysis in the Housing Element EIR. Nonetheless, as with housing development under the 2021-2029 Housing Element, it is reasonably foreseeable that implementation of the Proposed Project could interfere with the movement of any native resident or migratory wildlife corridors. While the measures identified under the Mitigation Measure 4.3-1 would help to reduce potential impacts to wildlife movement and nursery sites, projects sited within or adjacent to these areas have the potential to generate adverse edge effects that could significantly reduce the use of surrounding habitats by wildlife for movement through the area. Therefore, encroachment (e.g., night lighting, domestic animals, and urban noises) into these areas would reduce the overall size and function of the wildlife movement corridor or nursery site. Furthermore, as Mitigation Measure 4.3-1 would not apply to ministerial

projects, the mitigation measures would not eliminate all potential impacts to special-status species from implementation of the project. Therefore, this impact would remain significant and unavoidable.

There are no proposed changes under the Proposed Project that would require major revisions to the Housing Element EIR due to new significant impacts or substantially more severe impacts beyond what was previously analyzed in the Housing Element EIR.

C. Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?

Refer to *Section 1.5, Changes to Circumstances*, for discussion of recent State housing laws and how they do not affect the analyses presented in the Housing Element EIR. There are no substantial changes to the circumstances under which the Proposed Project is being undertaken that would require major revisions to the Housing Element EIR due to the involvement of new or more severe significant impacts related to native resident, migratory fish and wildlife; established native resident or migratory wildlife corridors; or native wildlife nursery sites beyond what was previously analyzed in the Housing Element EIR.

D. Any New Information Requiring New Analysis or Verification?

There is no new information of substantial importance that has been identified, which was not known and could not have been known with the exercise of reasonable diligence at the time the Housing Element EIR was certified, that shows the Proposed Project involves new significant impacts or substantially more severe impacts related to native resident, migratory fish and wildlife; established native resident or migratory wildlife corridors; or native wildlife nursery sites beyond what was previously analyzed in the Housing Element EIR.

E. Conclusion

The Proposed Project would not result in any of the conditions set forth in PRC Section 21166 or *CEQA Guidelines* Sections 15162 or 15163 that would require the preparation of a subsequent or supplemental EIR.

Issues	Impact Determination in the Housing Element EIR	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?
(d) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	Less than Significant Impact	No	No	No

A. Impact Determination in the Housing Element EIR

Housing development accommodated under the Housing Element Update would occur in areas on private property, street rights-of-way, and open space areas that are known and/or expected to have protected tree species. Housing development occurring within the City would be required to comply with the City’s Tree Preservation Ordinance, which makes it illegal to relocate, remove, or fatally harm the trees without the issuance of a permit. The Housing Element Update does not include any components that would preclude implementation of or alter the requirements and procedures contained under this ordinance in any way.

The City identifies southern California black walnut as a protected tree species in accordance with Article 2 and 7 of Chapter I and Article 6 of Chapter IV and Section 96.303.5 of the LAMC (Ordinance 177404, “Protected Tree Ordinance”). In adopting that ordinance, the City did not make a determination that the California black walnut is rare in the City or otherwise and the City has not conducted any survey or study to make such a determination. In accordance with the Protected Tree Ordinance, the City requires that southern California black walnut trees that measure four inches or more in cumulative diameter, four and one-half feet above the ground level at the base of the tree that would be removed by a project be mitigated at a 1:1 ratio with a 15-gallon replacement tree. Based on the above, there is no evidentiary basis to find that the California black walnut is rare in the City, the County or the State.

Conclusion: In accordance with Mitigation Measure 4.3-2(a), impacts to walnut vegetation communities shall be mitigated through the preparation and implementation of a HMMP. The HMMP shall mitigate impacts to CDFW jurisdictional habitat at a 2:1 ratio for permanent impacts and a 1:1 ratio for temporary impacts, or as otherwise approved by CDFW and the City. Furthermore, assertion that a plant is rare without detailed studies can lead to unwarranted and costly expenditures for local government, non-profit groups, and other stakeholders, particularly in cases of infill development. In the case of southern California black walnut, adopted ordinances and/or policies suffice to protect and/or compensate for impacts to individual protected trees. Consistent with current City requirements, future development occurring under the project would be required to comply with the City’s Tree Preservation Ordinance. Therefore, impacts related to local policies or ordinances protecting biological resources would be *less than significant*.

Mitigation Measures: No mitigation measures were required.

B. Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?

As stated in *Section 2 Project Description*, the Housing Element EIR analysis contemplated potential development in VHFHSZs, however, it did not contemplate a specific program (i.e., properties using the Mixed Income Incentive Program under the Citywide Housing Incentive Program Ordinance) that would enable construction in these very targeted areas (i.e.,

approximately in VHFHSZs on Ventura Boulevard; or that are abutting, across the street or alley, or having a common corner with properties not in a VHFHSZ). For this reason, the policy direction under the Proposed Project has been identified as a potential change to the project analyzed as part of the Housing Element EIR. This exception to the prohibition of development in the VHFHSZs would apply to approximately 1,100 parcels predominantly at the periphery of the city's hillsides in areas including the South Valley along Ventura Boulevard as well as in areas of Northeast Los Angeles and Hollywood, as shown in Figure 3 through Figure 12.

The Housing Element EIR anticipates that housing growth would occur in areas already developed with residential uses or areas with potential for residential development (refer to the *Section 3.1, Biological Resources*, impact analysis (a) for a list of site types). Although the 1,100 parcels under the Proposed Project would occur in areas that the Housing Element EIR identified for the Rezoning Program or where the highest concentration of build out of the RHNA would occur (i.e., already developed areas near public transit, jobs, in existing growth areas identified in the Framework Element) and in Higher Opportunity Areas, these parcels could contain protected tree species. However, housing development under the Proposed Project would also be required to comply with the City's Tree Preservation Ordinance, which makes it illegal to relocate, remove, or fatally harm the trees without the issuance of a permit. Moreover, in accordance with Mitigation Measure 4.3-2(a), impacts to walnut vegetation communities shall be mitigated through the preparation and implementation of a HMMP. Therefore, impacts related to local policies or ordinances protecting biological resources would remain less than significant.

There are no proposed changes under the Proposed Project that would require major revisions to the Housing Element EIR due to new significant impacts or substantially more severe impacts beyond what was previously analyzed in the Housing Element EIR.

C. Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?

Refer to *Section 1.5, Changes to Circumstances*, for discussion of recent State housing laws and how they do not affect the analyses presented in the Housing Element EIR. There are no substantial changes to the circumstances under which the Proposed Project is being undertaken that would require major revisions to the Housing Element EIR due to the involvement of new or more severe significant impacts related to local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance, beyond what was previously analyzed in the Housing Element EIR.

D. Any New Information Requiring New Analysis or Verification?

There is no new information of substantial importance that has been identified, which was not known and could not have been known with the exercise of reasonable diligence at the time the Housing Element EIR was certified, that shows the Proposed Project involves new significant impacts or substantially more severe impacts related to local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance beyond what was previously analyzed in the Housing Element EIR.

E. Conclusion

The Proposed Project would not result in any of the conditions set forth in PRC Section 21166 or *CEQA Guidelines* Sections 15162 or 15163 that would require the preparation of a subsequent or supplemental EIR.

3.2 TRANSPORTATION

The analysis in this section is based on the Transportation Impacts Memorandum prepared for the Proposed Project by Fehr & Peers, dated September 13, 2024 and included as Appendix B to this Addendum.

Issues	Impact Determination in the Housing Element EIR	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?
(a) Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?	Less than Significant with Mitigation Incorporated	No	No	No

A. Impact Determination in the Housing Element EIR

As discussed in the Housing Element EIR, the Housing Element Update helps fulfill existing City of Los Angeles General Plan Framework strategies to encourage growth in higher-intensity commercial and mixed-use districts, centers, and boulevards, and in proximity to transit. The geographic distribution of the identified housing capacity will be consistent with recent build activity and while housing may occur anywhere in the City, it will mostly occur in areas of the City that are currently zoned for multi-family and commercial development, along commercial corridors and in proximity to public transportation. A large portion of the anticipated housing capacity is expected to be located within a half-mile radius around a Major Transit Stop. Based on the estimated capacity of 266,647 units, and the total target capacity of 486,379 units, the Housing Element finds a need for a Housing Element Rezoning Program for the creation of 255,432 additional units of capacity. The Housing Element Rezoning Program, which would need to be completed by February 2025, will likely be accomplished through updates to the City’s Community Plans (Land Use Element), an update to the City’s Density Bonus program, targeted zone changes, updates to specific plans and overlays, or other zoning ordinances. These programs would likely identify opportunities for rezoning or development incentives in areas that are located in a Transit Priority Area, near major job centers, neighborhood services and amenities, and particularly in higher resource areas shown in Figure 3-5 to provide the most equitable distribution of housing opportunities. These programs may also consider rezoning or development incentives in existing lower density residential zones to create opportunities for missing middle housing typologies (up to low-medium residential density) in these areas. The outcome of full build-out of the RHNA under the Housing Element Update would be an increased level of development of infill sites and/or intensification of existing residential parcels, with a majority of the development occurring in locations within the City where neighborhood services are plentiful and multimodal transportation options, including public transit and active modes, are most competitive with driving. This will provide more opportunity for residents to choose housing close to their places of employment, shortening their work trips and perhaps even resulting in a shift in commute mode, and to complete more household-serving trips within their own neighborhoods, whether in a very short trip in a car or on foot or bike. Finally, any rezoning under the Housing Element Rezoning Program will need to be found consistent with the General Plan, including the Mobility Plan 2035, pursuant to Charter Section 556 and 558 and pursuant to State Planning and Zoning laws.

Conclusion: Most housing development accommodated by the Housing Element Update would generally not conflict with any applicable program, plan, ordinance, or policy relevant to the

transportation system, nor would it limit or preclude the City's ability to implement programs and policies in furtherance of climate or equity goals. However, larger projects or projects with unique site conditions or project attributes may have impacts from construction to the circulation system. Therefore, impacts are *potentially significant*.

Mitigation Measure:

4.14-1 Construction Management Plan

Any discretionary project that the Los Angeles Department of Transportation (LADOT) determines will have potential impacts to the circulation system even with application of existing regulatory compliance measures, shall prepare a detailed Construction Management Plan (CMP), including street closure information, detour plans, haul routes, and staging plans shall be prepared and submitted to LADOT for review and approval. The Construction Management Plan will formalize how construction would be carried out and identify specific actions that would be required to reduce effects on the surrounding community. The Construction Management Plan shall be based on the nature and timing of the specific construction activities and other projects in the vicinity of the Project Site, and shall include those elements required by LADOT for the project, which may include but are not limited to the following:

- Providing for temporary traffic control during all construction activities adjacent to public right of way to improve traffic flow on public roadways (e.g., flag men)
- Prohibition of construction worker parking on any adjacent residential streets
- Encouragement of carpool/vanpool of workers
- Prohibitions on construction-related vehicles parking on surrounding public streets
- Prohibitions on construction equipment or material deliveries within the public right-of-way
- Accommodation of all equipment on site as feasible
- Provisions for temporary traffic control during all construction activities adjacent to public right-of-way to improve traffic flow on public roadways (e.g., flag men)
- Scheduling of construction activities, including deliveries, to reduce the effect on peak hour traffic flow on surrounding arterial streets
- Rerouting of construction trucks to reduce travel on congested streets to the extent feasible
- Provisions of safety precautions for pedestrians and bicyclists through alternate routing and protection barriers and signage
- Provisions to accommodate the staging and storage of equipment
- Scheduling of construction-related deliveries to reduce travel during commuter peak hours
- Obtain necessary permits for any truck hauling from the City prior to issuance of any permit for the project.
- Noticing and coordination with any nearby schools that may be affected by construction activities, including deliveries, hauling and other construction transportation, to ensure safety of school children.
- Ensuring all feasible safety measures are taken to accommodate safe travel of pedestrian, bicyclists, and other users of the sidewalks around the construction site, including but not limited through the following measures:
 - Construction staging to maintain pedestrian access on adjacent sidewalks throughout all construction phases.

- Maintaining adequate and safe pedestrian protection, including physical separation (including utilization of barriers such as K-Rails or scaffolding, etc.) from work space and vehicular traffic and overhead protection, due to sidewalk closure or blockage, at all times.
- Providing temporary pedestrian facilities adjacent to the Project Site and provide safe, accessible routes that replicate as nearly as practical the most desirable characteristics of the existing facility.
- Covered walkways shall be provided where pedestrians are exposed to potential injury from falling objects.
- Keeping sidewalk open during construction until only when it is absolutely required to close or block sidewalk for construction staging.
- Reopening the sidewalk as soon as reasonably feasible taking construction and construction staging into account.

Level of Significance of Impact After Mitigation: With implementation of the Mitigation Measure 4.14-1 and existing regulations and project review by LADOT, impacts would be *less than significant with mitigation incorporated*.

B. Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?

As stated in Section 2, *Project Description*, the Housing Element EIR analysis contemplated potential development in VHFHSZs, however it did not contemplate a specific program (i.e., properties using the Mixed Income Incentive Program under the Citywide Housing Incentive Program Ordinance) that would enable construction in these very targeted areas (i.e., approximately in VHFHSZs on Ventura Boulevard; or that are abutting, across the street or alley, or having a common corner with properties not in a VHFHSZ). For this reason, this policy direction under the Proposed Project has been identified as a potential change to the project analyzed as part of the Housing Element EIR. This exception to the prohibition of development in the VHFHSZs would apply to approximately 1,100 parcels predominantly at the periphery of the city's hillsides in areas including the South Valley along Ventura Boulevard as well as in areas of Northeast Los Angeles and Hollywood, as shown in Figure 3 through Figure 12.

The Housing Element EIR anticipates that housing growth would occur in areas already developed with residential uses or areas with potential for residential development (refer to the *Section 3.1, Biological Resources*, impact analysis (a) for a list of site types). The Proposed Project would occur in geographic areas that are similar to areas that the Housing Element EIR identified for the Rezoning Program or where the highest concentration of build out of the RHNA would occur (i.e., already developed areas near public transit, jobs, in existing growth areas identified in the Framework Element), and in Higher Opportunity Areas. Comparative to housing development under the 2021-2029 Housing Element, the Proposed Project seeks to incentivize density in geographic areas that are adjacent to and characteristically similar to areas that are already zoned for dense use, including areas within a half-mile radius around a Major Transit Stop. The Proposed Project does not add new housing, but rather redistributes the housing assumptions within the same TAZs that were used in the Housing Element EIR analysis. Moreover, the Proposed Project would be consistent with goals of the 2021-2029 Housing Element relevant to the transportation system listed in the Housing Element EIR:

- Goal 1: A City where housing production results in an ample supply of housing to create more equitable and affordable options that meet existing and projected needs.

- Goal 3: A City in which housing helps to create healthy, livable, sustainable, and resilient communities that improve the lives of all Angelenos.

As further stated in the Transportation Impacts Memorandum (Appendix B), the Proposed Project aligns with the programs outlined in the Housing Element including building upon existing policy tools, such as the City's existing incentive-based housing development programs. Furthermore, the Proposed Project is consistent with recent changes to State law that enable project streamlining and impose specific requirements on sites identified for lower income households. As there is no change to the circulation system assumptions, Mitigation Measure 14.4-1 would remain applicable to the Proposed Project. Impacts would remain less than significant with mitigation incorporated.

There are no proposed changes under the Proposed Project that would involve new significant impacts or substantially more severe impacts beyond what was identified in the Housing Element EIR.

C. Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?

Refer to *Section 1.5, Changes to Circumstances*, for discussion of recent State housing laws and how they do not affect the analyses presented in the Housing Element EIR. There are no substantial changes to the circumstances under which the Proposed Project is being undertaken that would require major revisions to the Housing Element EIR due to the involvement of new or more severe significant impacts related to conflict with a program, plan, ordinance or policy addressing the circulation system beyond what was previously analyzed in the Housing Element EIR.

D. Any New Information Requiring New Analysis or Verification?

There is no new information of substantial importance that has been identified, which was not known and could not have been known with the exercise of reasonable diligence at the time the Housing Element EIR was certified, that shows the Proposed Project involves new significant impacts or substantially more severe impacts related to conflict with a program, plan, ordinance or policy addressing the circulation system beyond what was previously analyzed in the Housing Element EIR.

E. Conclusion

The Proposed Project would not result in any of the conditions set forth in PRC Section 21166 or *CEQA Guidelines* Sections 15162 or 15163 that would require the preparation of a subsequent or supplemental EIR.

Issues	Impact Determination in the Housing Element EIR	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?
(b) Conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?	Less than Significant	No	No	No

A. Impact Determination in the Housing Element EIR

As discussed in the Housing Element EIR, full build-out of the Housing Element Update would result in a 34 percent decrease in vehicle miles traveled (VMT) compared to 2021 SCAG Region conditions and does not exceed the 15 percent below the regional average total VMT per service population threshold. Furthermore, full build out of the Housing Element Update would result in a 2 percent decrease in service population VMT compared to 2021 citywide Baseline conditions and does not exceed the average total VMT per service population threshold.

At a plan level, the Housing Element Update would not result in a significant impact to VMT. At the individual project level, utilizing a different evaluation methodology and with different thresholds, some projects may result in impacts to VMT. For the most part, however, development of new housing in existing neighborhoods where services already exist, as envisioned by the Housing Element Update, results in a reduction to VMT. For example, a multi-family development developed in a dense urban environment with multiple land uses and access to transit may reduce vehicle trip lengths as there are options for people to undertake their trips more locally, rather than needing to travel outside their neighborhood to meet their needs.

Conclusion: Even with some individual housing development projects exceeding VMT project thresholds, the Housing Element Update would not exceed the City’s threshold of significance. Therefore, impacts would be *less than significant*

Mitigation Measure: Although the Housing Element Update was determined to have a less than significant impact at the plan level, the following mitigation measure for a transportation demand management (TDM) program may be used by discretionary projects that show potentially significant impacts to VMT.

4.14-2 Transportation Demand Management Program

If a discretionary project will have significant impacts to VMT under LADOT Transportation Assessment Guidelines, the Applicant shall prepare a TDM program to reduce VMT impacts below the City’s project threshold to the extent feasible. TDM program elements could include measures such as unbundled parking although the exact measures will be determined when the plan is prepared. The City of Los Angeles requires that the TDM plan be prepared during construction, with the final TDM plan approved by LADOT prior to the City’s issuance of the certificate of occupancy for the Project. Implementation of the TDM plan occurs after building occupancy. TDM measures shall include but not be limited to the following examples:

TDM strategies applicable for the residential component:

Unbundled Parking—Unbundling parking typically separates the cost of purchasing or renting parking spaces from the cost of purchasing or renting a dwelling unit. Saving money on a dwelling unit by forgoing a parking space acts as an incentive that minimizes auto ownership.

Similarly, paying for parking (by purchasing or leasing a space) acts as a disincentive that discourages auto ownership and trip-making.

TDM strategies applicable if the project includes an office component:

Required Commute Trip Reduction Program—This strategy involves the development of an employee-focused travel behavior change program that targets individual attitudes, goals, and travel behaviors, educating participants on the impacts of their travel choices and the opportunities to alter their habits. The program typically includes elements such as a coordinated ride-sharing or carpooling program, vanpool program, alternative work schedule program, preferential carpool parking, guaranteed ride home service, and a program coordinator. The program requires the development of metrics to evaluate success, program monitoring, and regular reporting.

TDM strategies applicable for both the office and residential components:

Promotions and Marketing—This strategy involves the use of marketing and promotional tools to educate and inform travelers about site-specific transportation options and the effects of their travel choices. This strategy includes passive educational and promotional materials, such as posters, info boards, or a website with information that a traveler could choose to read at their own leisure. It can also include more active promotional strategies such as gamification.

Level of Significance of Impact After Mitigation: With implementation of Mitigation Measure 14.4-2, some projects may not be able to reduce VMT impacts to less than significant at the individual project level. Nonetheless, even with some housing development projects accommodated by the Housing Element Update having significant impacts, VMT impacts associated with the Housing Element Update would remain *less than significant* under the City's thresholds of significance.

B. Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?

As stated in Section 2, *Project Description*, the Housing Element EIR analysis contemplated potential development in VHFHSZs, however it did not contemplate a specific program (i.e., properties using the Mixed Income Incentive Program under the Citywide Housing Incentive Program Ordinance) that would enable construction in these very targeted areas (i.e., approximately in VHFHSZs on Ventura Boulevard; or that are abutting, across the street or alley, or having a common corner with properties not in a VHFHSZ). For this reason, this policy direction under the Proposed Project has been identified as a potential change to the project analyzed as part of the Housing Element EIR. This exception to the prohibition of development in the VHFHSZs would apply to approximately 1,100 parcels predominantly at the periphery of the city's hillsides in areas including the South Valley along Ventura Boulevard as well as in areas of Northeast Los Angeles and Hollywood, as shown in Figure 3 through Figure 12. However, the Housing Element EIR conservatively analyzed potential development in VHFHSZ.

The Housing Element EIR anticipates that housing growth would occur in areas already developed with residential uses or areas with potential for residential development (refer to the *Section 3.1, Biological Resources*, impact analysis (a) for a list of site types). The Proposed Project would occur in geographic areas that are similar to areas that the Housing Element EIR identified for the Rezoning Program or where the highest concentration of build-out of the RHNA would occur (i.e., already developed areas near public transit, jobs, in existing growth areas identified in the Framework Element), and in Higher Opportunity Areas. Comparative to housing development under the 2021-2029 Housing Element, the Proposed Project seeks to incentivize density in geographic areas that are adjacent to and characteristically similar to areas that are

already zoned for dense use, including areas within a half-mile radius around a Major Transit Stop. The Proposed Project does not add new housing, but rather redistributes the housing assumptions within the same TAZs that were used in the Housing Element EIR analysis.

As stated in the Transportation Impacts Memorandum (Appendix B), the Proposed Project seeks to prevent low densities through minimum density requirements in the Higher Opportunity Areas than the Housing Element originally planned. VMT per service population would likely not change or may slightly improve by condensing the housing assumptions into these Higher Opportunity Areas. With no increase in the total number of units and marginally increased housing density, the impact conclusions from the Housing Element EIR would remain the same and Mitigation Measure 4.14-2 would continue to be applicable at the individual project level under the Proposed Project. Impacts would remain less than significant.

There are no proposed changes under the Proposed Project that would involve new significant impacts or substantially more severe impacts beyond what was identified in the Housing Element EIR.

C. Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?

Refer to *Section 1.5, Changes to Circumstances*, for discussion of recent State housing laws and how they do not affect the analyses presented in the Housing Element EIR. There are no substantial changes to the circumstances under which the Proposed Project is being undertaken that would require major revisions to the Housing Element EIR due to the involvement of new or more severe significant impacts related to VMT beyond what was previously analyzed in the Housing Element EIR.

D. Any New Information Requiring New Analysis or Verification?

There is no new information of substantial importance that has been identified, which was not known and could not have been known with the exercise of reasonable diligence at the time the Housing Element EIR was certified, that shows the Proposed Project involves new significant impacts or substantially more severe impacts related to VMT beyond what was previously analyzed in the Housing Element EIR.

E. Conclusion

The Proposed Project would not result in any of the conditions set forth in PRC Section 21166 or *CEQA Guidelines* Sections 15162 or 15163 that would require the preparation of a subsequent or supplemental EIR.

Issues	Impact Determination in the Housing Element EIR	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?
(c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible use (e.g., farm equipment)?	Significant and Unavoidable	No	No	No

A. Impact Determination in the Housing Element EIR

As discussed in the Housing Element EIR, any development proposal would be reviewed by the City for consistency with all City regulations, standards, and policies, including as they result in geometric design features, including the number and placement of driveways, lines of sight, and any necessary roadway modifications. It is assumed that any projects developed as a result of the Housing Element Update would be designed to meet all City standards such that they do not result in geometric design hazards.

However, as part of individual development project entitlements, the Interim Guidance for Freeway Safety Analysis released by LADOT in May 2020 requires that individual land use projects evaluate the potential for safety impacts related to freeway off ramp queuing. The specific concern relates to the possibility that the speed differential between vehicles traveling on freeway mainlines and vehicles queuing at freeway off-ramps may create the potential for collisions if drivers on the freeway mainline lack sufficient time to slow or stop once they are aware of a queuing situation. It is anticipated that freeway mainline traffic would slow at times when high levels of off ramp queuing occurs and that the speed differential would be sufficiently small that mainline drivers would have sufficient warning about a queuing situation; however, it is possible that queuing at individual off ramps could occur at times when mainline traffic congestion is low, thus creating a potential safety issue.

Conclusion: Most housing development accommodated by the Housing Element Update would generally not substantially increase hazards due to geometric design features or incompatible uses. However, larger projects or projects with unique site conditions or project attributes may have impacts during construction. Therefore, impacts related to construction activities are *potentially significant*. Moreover, because the Housing Element Update is programmatic in nature, it does not include specific development projects or details about the size, nature, or location of individual developments and future traffic levels and speeds at individual off ramps in and near the City cannot be predicted with any degree of certainty at this time because it is not known how conditions may change over the eight-year planning horizon and what measures the City and the California Department of Transportation (Caltrans) may implement to address any off ramp queuing issues that arise. Therefore, any detailed analysis of potential future impacts related to off ramp queuing would be speculative. Nonetheless, queuing-related safety issues could potentially arise as build out of the RHNA occurs in the City, although it is anticipated that the City and Caltrans would address any such issues as they arise, it cannot be determined with certainty that queuing related safety issues would not occur. As such, safety impacts related to off ramp queuing as growth occurs are *potentially significant*.

Mitigation Measure: Refer to Mitigation Measure 14.4-1.

Level of Significance of Impact After Mitigation: With implementation of Mitigation Measure 4.14-1, impacts related to construction hazards due to geometric design features or incompatible uses would be *less than significant with mitigation incorporated*. However, without specific information on where safety impacts may occur as a result of freeway off ramp queuing, it is not possible to identify appropriate mitigation measures to reduce project-specific ramp queuing safety impacts. Therefore, no feasible mitigation was identified for the Housing Element Update. It is anticipated that subsequent land use development projects that are seeking approval under the plan will study freeway queuing and safety impacts in more detail per the Interim Guidance for Freeway Safety Analysis released by LADOT. Impacts related to highway safety as a result of design features or incompatible uses would be *significant and unavoidable*.

B. Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?

As stated in Section 2, *Project Description*, the Housing Element EIR analysis contemplated potential development in VHFHSZs, however it did not contemplate a specific program (i.e., properties using the Mixed Income Incentive Program under the Citywide Housing Incentive Program Ordinance) that would enable this construction in these very targeted areas (i.e., approximately in VHFHSZs on Ventura Boulevard; or that are abutting, across the street or alley, or having a common corner with properties not in a VHFHSZ). For this reason, this policy direction under the Proposed Project has been identified as a potential change to the project analyzed as part of the Housing Element EIR. This exception to the prohibition of development in the VHFHSZs would apply to approximately 1,100 parcels predominantly at the periphery of the city's hillsides in areas including the South Valley along Ventura Boulevard as well as in areas of Northeast Los Angeles and Hollywood, as shown in Figure 3 through Figure 12.

The Housing Element EIR anticipates that housing growth would occur in areas already developed with residential uses or areas with potential for residential development (refer to the *Section 3.1, Biological Resources*, impact analysis (a) for a list of site types). The Proposed Project would occur in areas that the Housing Element EIR identified for the Rezoning Program or where the highest concentration of build-out of the RHNA would occur (i.e., already developed areas near public transit, jobs, in existing growth areas identified in the Framework Element), and in Higher Opportunity Areas. Comparative to housing development under the 2021-2029 Housing Element, the Proposed Project seeks to incentivize density in geographic areas that are adjacent to and characteristically similar to areas that are already zoned for dense use, including areas within a half-mile radius around a Major Transit Stop. The Proposed Project does not add new housing, but rather redistributes the housing assumptions within the same TAZs that were used in the Housing Element EIR analysis.

As stated in the Transportation Impacts Memorandum (Appendix B), while the Proposed Project does impose minimum development standards in some areas which could result in some larger projects or those with unique site conditions, there are no changes to the assumptions of total number of units within a given TAZ or to the RHNA build out totals. As such, the impact conclusions from the Housing Element EIR would remain the same. Mitigation Measure 4.14-1 would continue to be applicable at the individual project level under the Proposed Project to reduce impacts related to construction to less than significant with mitigation incorporated. However, similar to the analysis in the EIR without specific information on where safety impacts may occur as a result of freeway off ramp queuing, it is not possible to identify appropriate mitigation measures to reduce project-specific ramp queuing safety impacts under the Proposed Project. Impacts would remain significant and unavoidable related to freeway queuing.

There are no proposed changes under the Proposed Project that would involve new significant impacts or substantially more severe impacts beyond what was identified in the Housing Element EIR.

C. Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?

Refer to *Section 1.5, Changes to Circumstances*, for discussion of recent State housing laws and how they do not affect the analyses presented in the Housing Element EIR. There are no substantial changes to the circumstances under which the Proposed Project is being undertaken that would require major revisions to the Housing Element EIR due to the involvement of new or more severe significant impacts related to hazards due to a geometric design feature beyond what was previously analyzed in the Housing Element EIR.

D. Any New Information Requiring New Analysis or Verification?

There is no new information of substantial importance that has been identified, which was not known and could not have been known with the exercise of reasonable diligence at the time the Housing Element EIR was certified, that shows the Proposed Project involves new significant impacts or substantially more severe impacts related to hazards due to a geometric design feature beyond what was previously analyzed in the Housing Element EIR.

E. Conclusion

The Proposed Project would not result in any of the conditions set forth in PRC Section 21166 or *CEQA Guidelines* Sections 15162 or 15163 that would require the preparation of a subsequent or supplemental EIR.

Issues	Impact Determination in the Housing Element EIR	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?
(d) Result in inadequate emergency access?	Less than Significant with Mitigation Incorporated	No	No	No

A. Impact Determination in the Housing Element EIR

As discussed in the Housing Element EIR, any development proposal would be reviewed by the City for consistency with all City regulations, standards, and policies, including as they relate to issues of emergency access. Densification would largely occur within the community plan update process, allowing community plan areas to allocate the necessary public services in conjunction with expected growth in housing, such as location of emergency service stations and hospitals. Additionally, as most new housing would be located in high-resource areas served by public transit and providing a multimodal transportation network, it is possible that implementation of the Housing Element Update would result in increased transit ridership and active transportation, reducing the number of vehicles on the road and actually improving emergency access.

Conclusion: Most housing development projects accommodated by the Housing Element Update would not foreseeably have impacts to emergency access. However, larger projects or projects with unique site or project attributes may have impacts at construction. Therefore, housing development projects accommodated by the Housing Element Update impacts related to emergency access are *potentially significant*.

Mitigation Measure: Refer to Mitigation Measure 14.4-1.

Level of Significance of Impact After Mitigation: With implementation of Mitigation Measure 4.14-1, impacts related to inadequate emergency access during construction would be *less than significant with mitigation incorporated*.

B. Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?

As stated in Section 2, *Project Description*, the Housing Element EIR analysis contemplated potential development in VHFHSZs, however it did not contemplate a specific program (i.e., properties using the Mixed Income Incentive Program under the Citywide Housing Incentive Program Ordinance) that would enable this construction in these very targeted areas (i.e., approximately in VHFHSZs on Ventura Boulevard; or that are abutting, across the street or alley, or having a common corner with properties not in a VHFHSZ). For this reason, this policy direction under the Proposed Project has been identified as a potential change to the project analyzed as part of the Housing Element EIR. This exception to the prohibition of development in the VHFHSZs would apply to approximately 1,100 parcels predominantly at the periphery of the city’s hillsides in areas including the South Valley along Ventura Boulevard as well as in areas of Northeast Los Angeles and Hollywood, as shown in Figure 3 through Figure 12.

The Housing Element EIR anticipates that housing growth would occur in areas already developed with residential uses or areas with potential for residential development (refer to the *Section 3.1, Biological Resources*, impact analysis (a) for a list of site types). The Proposed

Project would occur in areas that the Housing Element EIR identified for the Rezoning Program or where the highest concentration of build -out of the RHNA would occur (i.e., already developed areas near public transit, jobs, in existing growth areas identified in the Framework Element), and in Higher Opportunity Areas. Comparative to housing development under the 2021-2029 Housing Element, the Proposed Project seeks to incentivize density in geographic areas that are adjacent to and characteristically similar to areas that are already zoned for dense use, including areas within a half-mile radius around a Major Transit Stop. The Proposed Project does not add new housing, but rather redistributes the housing assumptions within the same TAZs that were used in the Housing Element EIR analysis.

As stated in the Transportation Impacts Memorandum (Appendix B), the Proposed Project increases the density possible on select Higher Opportunity Areas (i.e., 1,100 parcels) predominantly at the periphery of the city's hillsides within VHFHSZs, where evacuation and emergency services may be necessary in the event of a fire. However, these specific parcels are along major streets on edges of mountainous areas with access to the main street grid. These parcels are also adjacent to parcels that allowed for higher density in the Housing Element EIR, making the density of parcels along the same major street more similar in nature to one another.

The Proposed Project is not expected to increase housing density in areas that would be more difficult for emergency services to access, nor does it significantly increase the total number of housing units. In addition, the Los Angeles Fire Department (LAFD) provides online informational resources regarding fire and emergency preparedness (<http://www.lafd.org/faqs>). Given the same assumptions about construction management plans and LAFD response times and practices, the impact conclusions from the Housing Element EIR would remain the same. Mitigation Measure 4.14-1 would continue to be applicable at the individual project level under the Proposed Project to reduce impacts related to construction to less than significant with mitigation incorporated.

C. Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?

Refer to *Section 1.5, Changes to Circumstances*, for discussion of recent State housing laws and how they do not affect the analyses presented in the Housing Element EIR. There are no substantial changes to the circumstances under which the Proposed Project is being undertaken that would require major revisions to the Housing Element EIR due to the involvement of new or more severe significant impacts related to inadequate emergency access beyond what was previously analyzed in the Housing Element EIR.

D. Any New Information Requiring New Analysis or Verification?

There is no new information of substantial importance that has been identified, which was not known and could not have been known with the exercise of reasonable diligence at the time the Housing Element EIR was certified, that shows the Proposed Project involves new significant impacts or substantially more severe impacts related to inadequate emergency access beyond what was previously analyzed in the Housing Element EIR.

E. Conclusion

The Proposed Project would not result in any of the conditions set forth in PRC Section 21166 or *CEQA Guidelines* Sections 15162 or 15163 that would require the preparation of a subsequent or supplemental EIR.

3.3 WILDFIRE

Issues	Impact Determination in the Housing Element EIR	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?
If located in or near state responsibility areas or lands classified as very high fire hazard severity zones:				
(a) Substantially impair an adopted emergency response plan or emergency evacuation plan?	Significant and Unavoidable	No	No	No

A. Impact Determination in the Housing Element EIR

As discussed in the Housing Element EIR, areas at risk for wildfire in the City are concentrated around the hillsides and mountainous areas, such as the Santa Monica, Santa Susana, and San Gabriel Mountains. The only State Responsibility Area (SRA) lands in the City are two relatively small areas near the northeastern and northwestern boundaries of the City within the San Gabriel Mountains. These areas and the areas immediately adjacent are primarily zoned for low-density, single-family residential uses. The geographic distribution of development would largely occur in areas of the City that are currently zoned for multi-family residential and commercial development and designated as Higher Opportunity Areas.

Construction of individual housing developments in VHFHSZs could interfere with adopted emergency response or evacuation plans as a result of temporary construction activities within rights-of-way. However, temporary construction barricades or other construction-related obstructions used for project development that could impede emergency access would be subject to the City’s permitting process, which requires a traffic control plan subject to City review and approval. Implementation of these plans would limit the extent to which development under the Housing Element Update would impair or physically interfere with adopted emergency response or evacuation procedures. As part of standard development procedures, future housing development plans in VHFHSZs would be submitted for review and approval to ensure that all new development has adequate emergency access and escape routes in compliance with existing City regulations and complies with home hardening requirements and recommendations. For instance, the California Building Standards Code and LAMC include minimum requirements for driveway widths, the creation and maintenance of wildfire buffers, sprinklers, and alarms. Furthermore, the Housing Element Update would not introduce any features or policies that would preclude implementation of, or alter, these policies and procedures.

Conclusion: The City’s extensive regulations and project review scheme would ensure that impacts related to impairment of adopted emergency response plan or emergency evacuation plan would be avoided. However, some areas designated as VHFHSZs or in or near SRAs are currently zoned for residential use and could be subject to future development accommodated by the Housing Element Update. Generally, the City’s extensive regulatory and review scheme would be expected to avoid impacts. However, based on unusual site-specific, roadway or project aspects, development in such areas would have the potential to cause the impairment of an adopted emergency response plan or emergency evacuation plan due to the temporary obstruction of roads associated with construction activities on or near a designated emergency route. For those projects, implementation of Mitigation Measure 4.17-1 and 4.12-1(b) of Section 4.12, *Public Services*, of the Housing Element EIR would be expected to reduce the potential for obstruction of roadways by regulating construction-related staging and parking for projects in hillside areas. However, imposition of the mitigation measures on all projects is not feasible and

even with existing regulations and imposition of the measures, build out of the RHNA in or near an SRA or VHFSHZ areas could still result in a significant impact. Therefore, impacts would be *potentially significant*.

Mitigation Measure: Projects in a VHFSHZ or SRA must comply with Mitigation Measure 4.12-1(b) and the following measure where the LAFD has determined existing regulations are not adequate based on unusual site-specific conditions, roadway conditions, or project characteristics.

4.17-1 Hillside Construction Staging and Parking Plan

For discretionary projects for development located in or adjacent to an SRA or VHFSHZ, where LAFD finds it necessary to add additional conditions above existing regulations to reduce the risk of construction-related activities impairing an emergency response plan or emergency evacuation plan, prior to the issuance of a grading or building permit, the applicant shall submit a Construction Staging and Parking Plan to the Department of Building and Safety and the Fire Department for review and approval. The plan shall identify where all construction materials, equipment, and vehicles will be stored through the construction phase of the project, as well as where contractor, subcontractor, and laborers will park their vehicles as to prevent blockage of two-way traffic on streets in the vicinity of the construction site. The Construction Staging and Parking Plan shall include, but not be limited to, the following:

- No construction equipment or material shall be permitted to be stored within the public right-of-way.
- If the property fronts on a designated Red Flag Street, on noticed “Red Flag” days, all workers shall be shuttled from an off-site area, located on a non-Red Flag Street, to and from the site in order to keep roads open on Red Flag days.
- During the Excavation and Grading phases, only one truck hauler shall be allowed on the site at any one time. The drivers shall be required to follow the designated travel plan or approved Haul Route.
- Truck traffic directed to the project site for the purpose of delivering materials, construction-machinery, or removal of graded soil shall be limited to off-peak traffic hours, Monday through Friday only. No truck deliveries shall be permitted on Saturdays or Sundays.
- All deliveries during construction shall be coordinated so that only one vendor/delivery vehicle is at the site at one time, and that a construction supervisor is present at such time.
- A radio operator shall be on-site to coordinate the movement of material and personnel, in order to keep the roads open for emergency vehicles, their apparatus, and neighbors.
- During all phases of construction, all construction vehicle parking and queuing related to the project shall be as required to the satisfaction of the Department of Building and Safety, and in substantial compliance with the Construction Staging and Parking Plan, except as may be modified by the Department of Building and Safety or the Fire Department.

Level of Significance of Impact After Mitigation: Mitigation Measure 4.17-1 as well as Mitigation Measure 4.12-1(b) would be expected to reduce the risk of construction-related activities impairing an emergency response plan or emergency evacuation plan for those projects LAFD finds pose an unusual threat that existing regulations do not address by limiting parking on streets in areas subject to fire-hazard-related parking restrictions, limiting the amount of heavy machinery on a development site at a given time, regulating traffic related to construction and deliveries, and installing personnel to coordinate traffic to and from the development site. However, imposition of the mitigation measure on all ministerial projects is infeasible based on resource requirements

and for some development projects even with implementation of the mitigation measures impacts may result from unusual site-specific or road conditions, or project characteristics. Based on this information, impacts would be *significant and unavoidable*.

B. Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?

As stated in Section 2, *Project Description*, the Housing Element EIR analysis contemplated potential development in VHFHSZs, however it did not contemplate a specific program (i.e., properties using the Mixed Income Incentive Program under the Citywide Housing Incentive Program Ordinance) that would enable this construction in these very targeted areas (i.e., approximately in VHFHSZs on Ventura Boulevard; or that are abutting, across the street or alley, or having a common corner with properties not in a VHFHSZ). For this reason, this policy direction under the Proposed Project has been identified as a potential change to the project analyzed as part of the Housing Element EIR. This exception to the prohibition of development in the VHFHSZs would apply to approximately 1,100 parcels predominantly at the periphery of the city's hillsides in areas including the South Valley along Ventura Boulevard as well as in areas of Northeast Los Angeles and Hollywood, as shown in Figure 3 through Figure 12.

The Housing Element EIR states that impacts related to wildfire would vary not necessarily by housing typology but by location and scale and scope of the project, specifically whether the housing development is in or near a SRA or a VHFHSZ, and whether the development would have the potential to impair an adopted emergency response plan or emergency evacuation plan due to temporary obstruction of a right-of-way associated with construction activities and increased traffic as a result of increased development. With respect to housing location, the Housing Element EIR anticipates that housing growth could occur anywhere in the City but would mostly occur in areas already developed with residential uses or areas with potential for residential development (refer to the *Section 3.1, Biological Resources*, impact analysis (a) for a list of site types). As discussed under *Section 3.2, Transportation*, impact analysis (d), the Proposed Project increases the density possible on select Higher Opportunity Areas (i.e., 1,100 parcels) predominantly on the periphery of the city's hillsides within VHFHSZs; however, these areas are similar to areas that the Housing Element EIR identified for the Rezoning Program or where the highest concentration of build-out of the RHNA would occur (i.e., already developed areas near public transit, jobs, in existing growth areas identified in the Framework Element). Furthermore, these parcels are along major streets on edges of mountainous areas with access to the main street grid. The Proposed Project is not expected to increase housing density in areas that would be more difficult for emergency services to access, nor does it significantly increase the total number of housing units. In addition, the LAFD provides online informational resources regarding fire and emergency preparedness at <http://www.lafd.org/faqs>. Given the same assumptions about construction management plans and LAFD response times and practices, the impact conclusions from the Housing Element EIR would remain the same and the Proposed Project would not increase impacts when compared to the analysis in the Housing Element EIR. As with housing development under the 2021-2029 Housing Element, even with implementation of Mitigation Measures 4.17-1 and 4.12-1(b), development under the Proposed Project could result in potentially significant impacts related to emergency response plans or emergency evacuation plans. As the mitigation measure does not apply to ministerial projects and for some development projects even with implementation of the mitigation measures impacts may result from unusual site-specific or road conditions, or project characteristics. Impacts would remain significant and unavoidable.

There are no proposed changes under the Proposed Project that would involve new significant impacts or substantially more severe impacts beyond what was identified in the Housing Element EIR.

C. Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?

Refer to *Section 1.5, Changes to Circumstances*, for discussion of recent State housing laws and how they do not affect the analyses presented in the Housing Element EIR. There are no substantial changes to the circumstances under which the Proposed Project is being undertaken that would require major revisions to the Housing Element EIR due to the involvement of new or more severe significant impacts related to emergency response plans or emergency evacuation plans beyond what was previously analyzed in the Housing Element EIR.

D. Any New Information Requiring New Analysis or Verification?

There is no new information of substantial importance that has been identified, which was not known and could not have been known with the exercise of reasonable diligence at the time the Housing Element EIR was certified, that shows the Proposed Project involves new significant impacts or substantially more severe impacts related to emergency response plans or emergency evacuation plans beyond what was previously analyzed in the Housing Element EIR.

E. Conclusion

The Proposed Project would not result in any of the conditions set forth in PRC Section 21166 or *CEQA Guidelines* Sections 15162 or 15163 that would require the preparation of a subsequent or supplemental EIR.

Issues	Impact Determination in the Housing Element EIR	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?
If located in or near state responsibility areas or lands classified as very high fire hazard severity zones:				
(b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire? (d) Expose people or structures to significant risks, including downslopes or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?	Significant and Unavoidable	No	No	No

A. Impact Determination in the Housing Element EIR

Properties located in VHFHSZs as mapped by CAL FIRE and Fire Brush Clearance Zones are required to minimize fire risks during the high fire season through vegetation clearance, maintenance of landscape vegetation to minimize fuel supply that would spread the intensity of a fire, compliance with provisions for emergency vehicle access, use of approved building materials and design, and compliance with LAFD brush clearance requirements pursuant to the Los Angeles Fire Code. The undeveloped portions of the Santa Monica Mountains, the eastern slopes of the Santa Susana Mountains, and the southern slopes of the San Gabriel Mountains are generally designated for Open Space and development opportunities in these areas are limited. Development opportunities in hillside areas are further limited by single-family residential density regulations, slope density restrictions, and topography.

Individual project development accommodated under the Housing Element Update may be located in any area where the zoning permits residential uses, including lower density residential sites in hillside areas and in or in the vicinity of VHFHSZs or SRAs. Build out of the RHNA would generally be directed away from more fire-prone neighborhoods, including hillside areas at risk of the spread of wildfire and subsequent downslope flooding and landslides, though it is possible that some development under the Housing Element Update would occur in these areas.

All development would be subject to applicable response plans and would be required to comply with the vegetation management, building materials, and emergency access requirements. Fuel modification requirements dictate permanent vegetation management standards surrounding buildings, particularly in area in or near the SRA or a VHFHSZ. In the event of a wildfire, implementation of the County’s Emergency Response Plan would coordinate all the facilities and personnel of County government, along with the jurisdictional resources of the cities and special districts within the County, into an efficient organization capable of managing emergency evacuation for affected areas. Furthermore, project development would be constructed according to the Los Angeles Fire Code requirements for fire-protection and would be subject to review and approval by the LAFD. The LAFD provides several fire development services to the City related to enforcing codes concerning new construction and remodeling, including Fire Life Safety Plan Checks and Fire Life Safety Inspections.

Conclusion: The City's extensive regulations and project review scheme would ensure that impacts related to build out of the RHNA in SRA or VHFHSZ areas exacerbating wildfire risks and resulting in risks to people and structures from pollutants, flooding and landslides would be avoided. New development would be required to comply with extensive regulations and fire safety provisions in the LAMC, including the Fire Code. Based on the regulatory scheme and project review process with LAFD; impacts should be avoided. Imposition of Mitigation Measures 4.12-1(a) through 4.12-1(d) where found necessary based on unusual site conditions or project characteristics should further reduce impacts to less than significant. However, it remains possible that even with existing regulations or imposition of mitigation measures, construction or other human activities related to development in or near an SRA or VHFHSZ of build-out of the RHNA could cause a wildfire in an area where slopes, winds, or other conditions could exacerbate the risk of exposure to pollutants, or where wildfires could expose people and structures to increased risks due to flooding or landslide. Impacts would be *potentially significant*.

Mitigation Measures: For any project in a VHFHSZ or SRA where the LAFD has determined existing regulations are not adequate based on unusual site-specific conditions, roadway conditions, or project characteristics, the project must comply with Mitigation Measure 4.12-1(a) through Mitigation Measures 4.12-1(d) of Section 4.12, *Public Services*, of the Housing Element EIR.

Level of Significance of Impact After Mitigation: Along with existing regulations, implementation of Mitigation Measures 4.12-1(a) through 4.12-1(d) would reduce impacts related to exacerbating wildfire risks that could result in risks to structures or housing development occupants or others to exposure of pollutant concentrations and runoff, post-fire slope instability or drainage changes. However, it is not feasible to impose the measures on ministerial projects based on the City resources needed to apply and enforce the new regulations on all housing developments. Additionally, it is possible that for some discretionary housing projects during the Housing Element Update plan horizon, Mitigation Measures 4.12-1(a) through 4.12-1(d) may be found infeasible. Based on unusual site-specific conditions or project characteristics, impacts of a housing development project under build out of RHNA may still occur with imposition of mitigation measures. Therefore, impacts would be *significant and unavoidable*.

B. Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?

As stated in *Section 2, Project Description*, the Housing Element EIR analysis contemplated potential development in VHFHSZs, however it did not contemplate a specific program (i.e., properties using the Mixed Income Incentive Program under the Citywide Housing Incentive Program Ordinance) that would enable this construction in these very targeted areas (i.e., approximately in VHFHSZs on Ventura Boulevard; or that are abutting, across the street or alley, or having a common corner with properties not in a VHFHSZ). For this reason, this policy direction under the Proposed Project has been identified as a potential change to the project analyzed as part of the Housing Element EIR. This exception to the prohibition of development in the VHFHSZs would apply to approximately 1,100 parcels predominantly at the periphery of the city's hillsides in areas including the South Valley along Ventura Boulevard as well as in areas of Northeast Los Angeles and Hollywood, as shown in Figure 3 through Figure 12.

The Housing Element EIR states that the portions of the city that are subject to wildland fire risk are primarily areas where single-family residential development abuts the undeveloped hillsides and natural areas in the northern portion of the City and around the Santa Monica Mountains. The Housing Element EIR anticipates that housing growth could occur anywhere in the City but would mostly occur in areas already developed with residential uses or areas with potential for residential development (refer to the *Section 3.1, Biological Resources*, impact analysis (a) for a

list of site types). The Housing Element EIR also acknowledges that housing development could occur on hillside areas and in or in the vicinity of VHFHSZs or SRAs. As discussed *under Section 3.2, Transportation*, impact analysis (d), the Proposed Project increases the density possible on select Higher Opportunity Areas (i.e., 1,100 parcels) predominantly on the periphery of the city's hillsides within VHFHSZs; however, these areas are similar to those areas that the Housing Element EIR identified for the Rezoning Program or where the highest concentration of build-out of the RHNA would occur (i.e., already developed areas near public transit, jobs, in existing growth areas identified in the Framework Element). The 1,100 parcels under the Proposed Project consist of urban infill sites rather than vacant sites deep within the undeveloped hillsides and other natural areas in the city and in an SRA or VHFHSZ. Therefore, the Proposed Project would not increase impacts when compared to the analysis in the Housing Element EIR.

Nonetheless, as discussed in the Housing Element EIR, implementation of Mitigation Measures 4.12-1(a) through 4.12-1(d) would reduce impacts related to exacerbating wildfire risks that could result in risks to structures or housing development occupants or others to exposure of pollutant concentrations and runoff, post-fire slope instability or drainage changes. However, mitigation measures would not apply to ministerial projects. Based on unusual site-specific conditions or project characteristics, impacts of a housing development project under build out of the RHNA may still occur with imposition of mitigation measures. Impacts would remain significant and unavoidable.

There are no proposed changes under the Proposed Project that would involve new significant impacts or substantially more severe impacts beyond what was identified in the Housing Element EIR.

C. Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?

Refer to *Section 1.5, Changes to Circumstances*, for discussion of recent State housing laws and how they do not affect the analyses presented in the Housing Element EIR. There are no substantial changes to the circumstances under which the Proposed Project is being undertaken that would require major revisions to the Housing Element EIR due to the involvement of new or more severe significant impacts related to wildfires, and the risks associated with them, beyond what was previously analyzed in the Housing Element EIR.

D. Any New Information Requiring New Analysis or Verification?

There is no new information of substantial importance that has been identified, which was not known and could not have been known with the exercise of reasonable diligence at the time the Housing Element EIR was certified that shows the Proposed Project involves new significant impacts or substantially more severe impacts related to wildfires and the risks associated with them beyond what was previously analyzed in the Housing Element EIR.

E. Conclusion

The Proposed Project would not result in any of the conditions set forth in PRC Section 21166 or *CEQA Guidelines* Sections 15162 or 15163 that would require the preparation of a subsequent or supplemental EIR.

Issues	Impact Determination in the Housing Element EIR	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?
If located in or near state responsibility areas or lands classified as very high fire hazard severity zones:				
(c) If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would housing development accommodated by the Housing Element Update require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?	Significant and Unavoidable	No	No	No

A. Impact Determination in the Housing Element EIR

The Housing Element Update would prioritize the development of new housing in urbanized areas of the City. Under the Housing Element Update, the Housing Element Rezoning Program will prioritize areas near transit, jobs, and in Higher Opportunity Areas. Generally, development would occur in areas that are well-served by existing roadways and utilities infrastructure. Development in urbanized areas would not be anticipated to require additional roads, fuel breaks, emergency water sources, power lines or other utilities that would exacerbate fire risk. Nonetheless, development in portions of the SRA and VHFHSZs currently zoned for low-density, single-family residential use remains a possibility. If such development takes place on land not served by existing roads, fuel breaks, emergency water sources, power lines, or other utilities, the construction of new infrastructure could be required. As a result, infrastructure development and ongoing use of new infrastructure could introduce human-caused ignition sources, such as the sparking of power utilities or the operation of construction equipment or other vehicles.

Although the installation and ongoing use of new infrastructure could be potential sources of wildfire ignition, risks would be reduced by existing State and local policies and safety measures. PRC Section 4290 requires adoption of minimum fire safety standards related to defensible space for residential, as well as commercial and industrial, properties in the SRA or, after July 1, 2021, a VHFHSZ. Relevant standards under this section include road standards for fire equipment access, as well as signs identifying streets, roads, and buildings. PRC Section 4292 mandates the maintenance of a specific circumference around poles and towers that support certain types of electrical utility apparatuses, while PRC section 4431 requires a clearance zone of at least 25 feet when operating certain types of power tools in an area covered by forest, brush, or grass. California Government Code Section 66474.02 mandates that the design of new subdivisions adhere to defensible space regulations and ingress and egress road standards for fire equipment. LAFD Fire Life Safety review of plans for new development would likely require fire hydrants along new roadways built to serve development in the SRA or a VHFHSZ. Nonetheless, new development on previously undeveloped sites could require the installation and maintenance of new or improved roads, emergency water sources, power lines or other utilities, the construction

and operation of which would introduce potential sources of wildfire ignition, such as the sparking of an overhead power line or construction equipment or the operation of resident vehicles.

Conclusion: Because the City currently does not require the undergrounding of power lines, a potentially significant impact may occur in areas subject to wildfire risk. Most development under the Housing Element Update would occur as infill development in previously developed area of the City situated neither in nor near SRAs or VHFHSZs and would not involve the risk of wildfires due to the installation of new associated infrastructure. However, certain areas of the SRA and VHFHSZs within the City are currently zoned for low-density, single-family residential uses, and single-family and ADU development could be accommodated in these areas under the Housing Element Update. Such new development in the SRA or VHFHSZs could require the construction and maintenance of new infrastructure, including aboveground power lines, which have been linked to exacerbation of wildfires. Although impacts are unlikely based upon existing regulations, impacts may occur based upon unusual site-specific conditions or aspects of the infrastructure project. Impacts would be *potentially significant*.

Mitigation Measures: The following mitigation measure would apply to discretionary projects.

4.17-3 Undergrounding of Power Lines in and Near an SRA and VHFHSZs

For all discretionary applications for development located in or within one mile of an SRA or VHFHSZs, that involve or require the installation of new power lines shall be required to install the new power line underground. Prior to the issuance of a grading or building permit, the applicant shall submit plans for undergrounding of power lines.

Level of Significance of Impact After Mitigation: Implementation of Mitigation Measure 4.17-3 would reduce the potential for impacts under this threshold by restricting power lines to underground in areas subject to wildfire risk. It is not feasible to impose the mitigation measure on all ministerial projects due to the required resources to implement. It is also possible that future discretionary projects may determine the measure is infeasible. Additionally, even with existing regulations and the mitigation measure based on unusual site-specific conditions or aspects of the infrastructure project, including power line project and others, may result in wildfire impacts from the installation or maintenance of infrastructure required by build out of the RHNA. Therefore, impacts remain *significant and unavoidable*.

B. Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?

As stated in *Section 2 Project Description*, the Housing Element EIR analysis contemplated potential development in VHFHSZs, however it did not contemplate a specific program (i.e., properties using the Mixed Income Incentive Program under the Citywide Housing Incentive Program Ordinance) that would enable this construction in these very targeted areas (i.e., approximately in VHFHSZs on Ventura Boulevard; or that are abutting, across the street or alley, or having a common corner with properties not in a VHFHSZ). For this reason, this policy direction under the Proposed Project has been identified as a potential change to the project analyzed as part of the Housing Element EIR. This exception to the prohibition of development in the VHFHSZs would apply to approximately 1,100 parcels predominantly at the periphery of the city's hillsides in areas including the South Valley along Ventura Boulevard as well as in areas of Northeast Los Angeles and Hollywood, as shown in Figure 3 through Figure 12.

The Housing Element EIR anticipates that housing growth would occur anywhere in the City but mostly in areas already developed with residential uses or areas with potential for residential development (refer to the *Section 3.1, Biological Resources*, impact analysis (a) for a list of site types). As discussed *under Section 3.2, Transportation*, impact analysis (d), the Proposed Project

increases the density possible on select Higher Opportunity Areas (i.e., 1,100 parcels) predominantly on the periphery of the city's hillsides within VHFHSZs; however, these areas are similar to those areas that the Housing Element EIR identified for the Rezoning Program or where the highest concentration of build-out of the RHNA would occur (i.e., already developed areas near public transit, jobs, in existing growth areas identified in the Framework Element). The 1,100 parcels under the Proposed Project consist of urban infill sites already well-served by existing roadways and utilities infrastructure. Therefore, the Proposed Project would not increase impacts when compared to the analysis in the Housing Element EIR as it is unlikely individual housing developments would require the installation and maintenance of new or improved roads, emergency water sources, power lines or other utilities.

Nonetheless, as discussed in the Housing Element EIR, implementation of Mitigation Measure 4.17-3 would reduce the potential for impacts under this threshold by restricting power lines to underground in areas subject to wildfire risk. However, the mitigation measure will not be imposed on all ministerial projects due to the required resources to implement. Additionally, even with existing regulations and the mitigation measure based on unusual site-specific conditions or aspects of the infrastructure project, including power line project and others, may result in wildfire impacts from the installation or maintenance of infrastructure required by build out of the RHNA. Impacts would remain significant and unavoidable.

There are no proposed changes under the Proposed Project that would involve new significant impacts or substantially more severe impacts beyond what was identified in the Housing Element EIR.

C. Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?

Refer to *Section 1.5, Changes to Circumstances*, for discussion of recent State housing laws and how they do not affect the analyses presented in the Housing Element EIR. There are no substantial changes to the circumstances under which the Proposed Project is being undertaken that would require major revisions to the Housing Element EIR due to the involvement of new or more severe significant impacts related to the installation or maintenance of infrastructure required by build out of the RHNA, beyond what was previously analyzed in the Housing Element EIR.

D. Any New Information Requiring New Analysis or Verification?

There is no new information of substantial importance that has been identified, which was not known and could not have been known with the exercise of reasonable diligence at the time the Housing Element EIR was certified that shows the Proposed Project involves new significant impacts or substantially more severe impacts related to the installation or maintenance of infrastructure required by build out of the RHNA beyond what was previously analyzed in the Housing Element EIR.

E. Conclusion

The Proposed Project would not result in any of the conditions set forth in PRC Section 21166 or *CEQA Guidelines* Sections 15162 or 15163 that would require the preparation of a subsequent or supplemental EIR.

Issues	Impact Determination in the Housing Element EIR	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?
If located in or near state responsibility areas or lands classified as very high fire hazard severity zones:				
(e) Would housing development accommodated by the Housing Element Update expose people or structures, either directly or indirectly, to a significant risk of loss, injury, or death involving wildland fires?	Significant and Unavoidable	No	No	No

A. Impact Determination in the Housing Element EIR

The Housing Element Update would generally direct future housing development away from neighborhoods, such as those near the urban-wildland interface, where the risk of wildland fires is heightened. However, individual project development accommodated under the Housing Element Update may be in any area where the zoning permits residential uses. Because many hillside areas in or adjacent to VHFHSZs or SRAs are zoned for low-density residential use, it remains possible that single-family and ADU development under the Housing Element Update may occur in the SRA or a VHFHSZ. To the extent any project development is located in or near VHFHSZs or SRAs as mapped by CAL FIRE and Fire Brush Clearance Zones, regulations require development to minimize fire risks during the high fire season through vegetation clearance, maintenance of landscape vegetation to minimize fuel supply that would spread the intensity of a fire, compliance with provisions for emergency vehicle access, use of approved building materials and design, and compliance with LAFD hazardous vegetation clearance requirements pursuant to the Los Angeles Fire Code.

Part 9 of the California Fire Code mandates minimum building requirements designed to “safeguards the public health, safety and general welfare from the hazards of fire, explosion or dangerous conditions, ...and provides safety and assistance to fire fighters and emergency responders.” The requirements apply to the construction, alteration, movement, or movement of buildings, in addition to repairs, operation of equipment, use and occupancy of buildings, means of egress, evacuation plans, location, maintenance, removal, and demolition of every building or structure or any appurtenances. PRC Section 4290 establishes minimum standards related to defensible space, including provisions for pertaining to road standards for fire equipment access; standards for signs identifying streets, roads, and buildings; minimum private water supply reserves for emergency fire use; and fuel breaks and greenbelts. Applicable sections of the PRC mandate standards for firebreaks (Section 4292) and operation of power equipment (Sections 4427, 4428, 4431) intended to minimize risks in areas subject to wildfire. In addition, California Government Code Section 66474.02, also known as the Subdivision Map Act, prohibits the subdivision of parcels in a VHFHSZ, unless a city or county planning commission finds that the subdivision design and location are consistent with defensible space regulations in PRC Sections 4290 and 4291, public fire protection services would be available for structures located throughout the subdivision, and road designs meet standards for fire equipment ingress and egress per PCR Section 4290 and any local ordinance. Provisions in the Los Angeles Fire Code reinforce State safety regulation by defining standards for the design of fire access roads (Section 503), mandating fire safety procedures for the construction and demolition of structures (Section 3301-

3317), regulating the types of activities permitted within a VHFHSZ (Section 4908), and requiring that property owners in a VHFHSZ clear brush and other native vegetation within a 200-foot radius of a building (Section 57.322). In addition, project development would be required to be constructed according to the UBC requirements for fire-protection and would be subject to review and approval the LAFD Fire Life Safety Plan Check review process.

Conclusion: Most development accommodated under the Housing Element Update would occur as infill development in previously developed areas of the City situated neither in nor near the SRA or VHFHSZs and would likely not expose people or structures, either directly or indirectly, to a significant risk of loss, injury, or death involving wildland fires due to the implementation of existing State and local regulations. However, certain areas of the SRA and VHFHSZs within the City are zoned for low-density, single-family residential uses and could accommodate single family and ADU development under the Housing Element. In addition, based on this being a plan level analysis and the potential for unusual site-specific conditions, hazards or project characteristics, build out of the RHNA may result in impacts. Therefore, impacts are *potentially significant*.

Mitigation Measures: For any project in a VHFHSZ or SRA where the LAFD has determined existing regulations are not adequate based on unusual site-specific conditions, roadway conditions, or project characteristics, compliance with Mitigation Measures 4.17-1 and 4.12-1(a) through Mitigation Measure 4.12-1(d) is required. For all discretionary applications for development located in or within one mile of an SRA, implementation of Mitigation Measure 4.17-3 is required.

Level of Significance of Impact After Mitigation: Along with existing regulations, implementation of Mitigation Measures 4.17-1 and 4.17-3 would reduce the risk of construction-related activities and the potential for impacts associated with power lines in areas subject to wildfire risk. In addition, implementation of Mitigation Measures 4.12-1(a) through 4.12-1(d) require plan reviews by LAFD, emergency access plans, and hillside fire/vegetation management plans, which would reduce demands on LAFD for fire protection services. However, it is not feasible to impose the measures on ministerial projects based on the City resources needed to apply and enforce the new regulations on all housing developments. Additionally, it is possible that for some discretionary housing projects during the Housing Element Update plan horizon, implementation of Mitigation Measures 4.12-1(a) through 4.12-1(d), 4.17-1 and 4.17-3 may be found infeasible. Based on unusual site-specific conditions or project characteristics, impacts of a housing development project under build out of RHNA may still occur with imposition of mitigation measures. Therefore, impacts would be *significant and unavoidable*.

B. Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?

As stated in *Section 2 Project Description*, the Housing Element EIR analysis contemplated potential development in VHFHSZs, however it did not contemplate a specific program (i.e., properties using the Mixed Income Incentive Program under the Citywide Housing Incentive Program Ordinance) that would enable this construction in these very targeted areas (i.e., approximately in VHFHSZs on Ventura Boulevard; or that are abutting, across the street or alley, or having a common corner with properties not in a VHFHSZ). For this reason, this policy direction under the Proposed Project has been identified as a potential change to the project analyzed as part of the Housing Element EIR. This exception to the prohibition of development in the VHFHSZs would apply to approximately 1,100 parcels predominantly at the periphery of the city's hillsides in areas including the South Valley along Ventura Boulevard as well as in areas of Northeast Los Angeles and Hollywood, as shown in Figure 3 through Figure 12.

The Housing Element EIR states that the portions of the city that are subject to wildland fire risk are primarily areas where single-family residential development abuts the undeveloped hillsides and natural areas in the northern portion of the City and around the Santa Monica Mountains. The Housing Element EIR anticipates that housing growth would occur anywhere in the City but mostly in areas already developed with residential uses or areas with potential for residential development (refer to the *Section 3.1, Biological Resources*, impact analysis (a) for a list of site types). As discussed under *Section 3.2, Transportation*, impact analysis (d), the Proposed Project increases the density possible on select Higher Opportunity Areas (i.e., 1,100 parcels) predominantly on the periphery of the city's hillsides within VHFHSZs; however, these areas are similar to those that the Housing Element EIR identified for the Rezoning Program or where the highest concentration of build out of the RHNA would occur (i.e., already developed areas near public transit, jobs, in existing growth areas identified in the Framework Element). The 1,100 parcels under the Proposed Project consist of urban infill sites rather than vacant sites deep within the undeveloped hillsides and other natural areas in the city and in an SRA or VHFHSZ. Therefore, the Proposed Project would not increase impacts when compared to the analysis in the Housing Element EIR.

Nonetheless, as discussed in the Housing Element EIR, implementation of Mitigation Measures 4.17-1 and 4.17-3 would reduce the risk of construction-related activities and the potential for impacts associated with power lines in areas subject to wildfire risk. In addition, implementation of Mitigation Measures 4.12-1(a) through 4.12-1(d) require plan reviews by LAFD, emergency access plans, and hillside fire/vegetation management plans, which would reduce demands on LAFD for fire protection services. However, the mitigation measures is not imposed on ministerial projects. Based on unusual site-specific conditions or project characteristics, impacts may still occur with imposition of mitigation measures. Impacts would remain significant and unavoidable.

There are no proposed changes under the Proposed Project that would involve new significant impacts or substantially more severe impacts beyond what was identified in the Housing Element EIR.

C. Any New Circumstances Involving New Significant Impact or Substantially More Severe Impacts?

Refer to *Section 1.5, Changes to Circumstances*, for discussion of recent State housing laws and how they do not affect the analyses presented in the Housing Element EIR. There are no substantial changes to the circumstances under which the Proposed Project is being undertaken that would require major revisions to the Housing Element EIR related to exposure of people or structures to a significant risk of loss, injury, or death involving wildland fires, beyond what was previously analyzed in the Housing Element EIR.

D. Any New Information Requiring New Analysis or Verification?

There is no new information of substantial importance that has been identified, which was not known and could not have been known with the exercise of reasonable diligence at the time the Housing Element EIR was certified that shows the Proposed Project involves new significant impacts or substantially more severe impacts related to exposure of people or structures to a significant risk of loss, injury, or death involving wildland fires beyond what was previously analyzed in the Housing Element EIR.

E. Conclusion

The Proposed Project would not result in any of the conditions set forth in PRC Section 21166 or *CEQA Guidelines* Sections 15162 or 15163 that would require the preparation of a subsequent or supplemental EIR.

4 CONCLUSION

As demonstrated by the discussion in this Addendum, the potential impacts associated with the Proposed Project would be similar to the impacts addressed in the Housing Element EIR and would not result in new or more severe significant impacts than those identified in the Housing Element EIR. As such, the Proposed Project would not result in any of the conditions set forth in PRC Section 21166 or *CEQA Guidelines* Sections 15162 or 15163 that would require the preparation of a Subsequent or Supplemental EIR.

Table 5-1	Mitigation Monitoring Program	5-4
-----------	-------------------------------	-----

5 MITIGATION MONITORING PROGRAM

Public Resources Code (PRC) Section 21081.6 and California Environmental Quality Act (CEQA) Guidelines Section 15097 require adoption of a Mitigation Monitoring Program (MMP) for all projects for which an Environmental Impact Report (EIR) has been prepared. Specifically, PRC Section 21081.6 states:

“...the agency shall adopt a reporting or monitoring program for the changes made to the project or conditions of project approval, adopted in order to mitigate or avoid significant effects on the environment...[and that the program] ...shall be designed to ensure compliance during project implementation.”

CEQA Guidelines Section 15097 provides guidelines for implementing monitoring and reporting programs. Specific monitoring requirements to be enforced during project implementation must be defined prior to final approval of a project by the decision-maker. Although the Lead Agency (the City of Los Angeles) may delegate monitoring responsibilities to other agencies or entities, the Lead Agency “...remains responsible for ensuring that implementation of the mitigation measures occurs in accordance with the program.”

The MMP describes the procedures for the implementation of the mitigation measures adopted for the Proposed Project. The MMP for the Proposed Project will be in place through the planning horizon of the Housing Element Update (2029), or until the element and EIR are updated again, whichever is later, or for individual development projects for which the mitigation measures have been imposed, the MMP is effective until the mitigation measures have been satisfied or deleted/modified pursuant to this MMP. The City of Los Angeles Department of City Planning (DCP) staff and staff of other City Departments (e.g., Department of Building and Safety) are responsible for administering the MMP activities, or delegating them to consultants or contractors. The Monitoring or Enforcing Agencies identified herein, at their discretion, may require a project applicant or operator to pay for one or more independent professional(s), with any necessary training and qualifications, to be responsible for preparing, reviewing, or certifying any required report, study, analysis, or certification, or monitoring implementation of mitigation measures (e.g., City building inspector, project contractor, certified professionals, etc., depending on the requirements of the mitigation measures) required of project applicants or operators. Monitors would be hired by the City or by the applicant or operator at the City’s discretion.

Each mitigation measure is identified in Table 5-1 and is categorized by environmental topic and corresponding number, with identification of:

- The Implementing Party– this is in most cases, the applicant for individual projects who will be required to implement most of the measures subject to City review and approval.
- The Enforcement Agency and Monitoring Agency – this is the agency or agencies that will monitor each measure and ensure that it is implemented in accordance with this MMP.
- Monitoring Phase / Monitoring Actions – this is the timeframe that monitoring would occur and the criteria that would determine when the measure has been accomplished and/or the monitoring actions to be undertaken to ensure the measure is implemented.

All the identified mitigation measures are to be implemented through the City’s imposition of conditions of approval on future discretionary projects. These mitigation measures shall be imposed as a condition of approval subject to the City’s authority to condition the applicable entitlement for any subsequent environmental review pursuant to CEQA Guidelines Sections 15162, 15163, 15164, or 15168, or tiered clearance to the Housing Element 2021-2029 and Safety Element Updates EIR, pursuant to the procedures in CEQA Guidelines Section 15152 or streamlining CEQA Clearance as permitted in PRC Sections 21083, 21094.5, 21155-21155.2, 21155.4 or CEQA Guidelines Sections 15183 or 15183.3. Nothing herein requires the mitigation measures in this MMP to be imposed on projects which are categorically or statutorily exempt from CEQA or for which an independent environmental analysis and findings were prepared in compliance with CEQA. Mitigation measures imposed as a condition of approval shall be imposed with a MMP that includes all of the following provisions:

- (1) This MMP shall be enforced throughout all phases of development projects subject to the mitigation measures. The Applicant shall be responsible for implementing each mitigation measure and shall be obligated to provide certification, as identified below, to the appropriate monitoring agency and the appropriate enforcement agency that each project design feature and mitigation measure has been implemented. The Applicant shall maintain records demonstrating compliance with each project design feature and mitigation measure. Such records shall be made available to the City upon request. Further, specifically during the construction phase (including excavation, grading and demolition) and prior to the issuance of building permits, the Applicant shall retain an independent Construction Monitor (either via the City or through a third-party consultant), approved by the Department of City Planning, who shall be responsible for monitoring implementation of mitigation measures during construction activities consistent with the monitoring phase and frequency set forth in this MMP. The Construction Monitor shall also prepare documentation of the Applicant’s compliance with the mitigation measures during construction every 90 days. The documentation must be signed by the Applicant and Construction Monitor and be maintained by the Applicant. The Construction Monitor shall be obligated to immediately report to the Enforcement Agency any non-compliance with the mitigation measures within two business

days if the Applicant does not correct the non-compliance within a reasonable time of notification to the Applicant by the monitor or if the non-compliance is repeated. Such non-compliance shall be appropriately addressed by the Enforcement Agency. Until two years after all mitigation measures are fully satisfied, the Applicant and Owner shall maintain all records of mitigation measure compliance (e.g., reports, studies, certifications, verifications, monitoring or mitigation plans) and make available for the City's inspection within three business days of the City requesting the records. All records related to construction shall be maintained on the site during construction and shall be immediately available for inspection by the City or by the Construction Monitor. The Applicant/Owner shall also sign a Statement of Compliance, in a form approved by the City, prior to any building permit, committing to compliance with all applicable mitigation measures.

- (2) Modifications. The project shall be in substantial conformance with the mitigation measures contained in this MMP. The enforcing departments or agencies may determine substantial conformance with mitigation measures in the MMP in their reasonable discretion. If the department or agency cannot find substantial conformance, a mitigation measure may be modified or deleted as follows: the enforcing department or agency, or the decision maker for a subsequent discretionary project related approval, complies with CEQA Guidelines, including sections 15162 and 15164, by preparing an addendum or subsequent environmental clearance to analyze the impacts from the modifications to or deletion of the mitigation measures. Any addendum or subsequent CEQA clearance shall explain why the mitigation measure is no longer needed, not feasible, or the other basis for modifying or deleting the project design feature or mitigation measure. Under this process, the modification or deletion of a mitigation measure shall not require a modification to any project discretionary approval unless the Director of Planning also finds that the change to the mitigation measures results in a substantial change to the Project or the non-environmental conditions of approval.

Table 5-1 Mitigation Monitoring Program

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
Air Quality			
4.2-2(a) Construction Emissions Reduction			
<p>For discretionary projects that meet the following criteria, prior to project approval, the Applicant shall be required to provide to the City an Air Quality Impact Analysis prepared by a qualified air quality analyst to analyze construction emissions and identify necessary mitigation:</p> <ul style="list-style-type: none"> Demolition of more than 13,500 square feet of building area; Greater than 5,000 cubic yards of soil cut/fill; Greater than 5-acres of graded area; or use of more than ten pieces of heavy-duty construction equipment and 150 truck trips (or a total of 6,000 vehicle miles traveled by truck) on any given day during demolition, site clearing, or grading. <p>The Air Quality Impact Analysis shall demonstrate that project emissions are less than applicable SCAQMD regional and LST thresholds, and as applicable may include, but are not limited to, the following mitigation:</p> <ul style="list-style-type: none"> Off-road diesel-powered construction equipment greater than 50 horsepower shall be certified for either the Tier 4 Final emission standards for CARB In-Use Off-Road Diesel-Fueled Fleets Regulations or the USEPA Tier 4 emission standards, where available. In the event that Tier 4 engines are not available for any off-road equipment larger than 100 horsepower, that equipment shall be equipped with a Tier 3 engine or an engine that is equipped with retrofit controls to reduce exhaust emissions of NOX and DPM to no more than Tier 3 levels unless certified by engine manufacturers or the onsite air quality construction mitigation manager that the use of such devices is not practical for specific engine types. All construction equipment shall be outfitted with BACT devices certified by CARB. Any emissions control device used by the contractor shall achieve emissions reductions that are no less than what could be achieved by a Level 3 diesel emissions control strategy for a similarly sized engine as defined by CARB regulations. At the time of mobilization of each applicable unit of equipment, a copy of each unit's 	Applicant for individual project	Department of City Planning (DCP), Los Angeles Department of Building and Safety (LADBS)	<p>Prior to project approval: review and approve the Air Quality Impact Analysis;</p> <p>During grading, excavation, demolition and construction: monitor compliance</p>

¹ The Monitoring Phase/Monitoring Actions are applicable to projects that are subject to the measures as described within each measure.

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>certified tier specification, BACT documentation, and ARB or SCAQMD operating permit shall be provided.</p> <ul style="list-style-type: none"> • Vehicle idling shall be limited to five minutes as set forth in the California Code of Regulations, Title 13. Signs shall be posted in areas where they will be seen by vehicle operators stating idling time limits. • Heavy duty diesel-fueled equipment shall use low NOx diesel fuel to the extent that it is available and feasible to use. • Construction haul truck operators for demolition debris and import/export of soil shall use trucks that meet the California Air Resources Board’s (CARB) 2010 engine emissions standards at 0.01 grams per brake horsepower-hour of PM and 0.20 grams per brake horsepower-hour of NOx emissions. Operators shall maintain records of all trucks associated with project construction to document that each truck used meets these emission standards and shall make these records available for inspection upon request by the City of Los Angeles or the South Coast Air Quality Management District (SCAQMD). • Construction contractors shall utilize construction equipment that uses low polluting fuels (i.e., compressed natural gas, liquid petroleum gas, and unleaded gasoline) to the extent that they are available and feasible to use. • Equipment such as tower cranes and signal boards shall be electric or alternative fueled (i.e., non-diesel). Pole power shall be made available for use for electric tools, equipment, lighting, etc. Construction equipment such as tower cranes and signal boards shall utilize electricity from power poles or alternative fuels (i.e., non-diesel), rather than diesel power generators and/or gasoline power generators. If stationary construction equipment, such as diesel- or gasoline-powered generators, must be operated continuously, such equipment shall be located at least 100 feet from sensitive land uses (e.g., residences, schools, childcare centers, hospitals, parks, or similar uses), whenever possible. • Alternative-fueled generators shall be used when commercial models that have the power supply requirements to meet the construction needs of the Project are commercially available from local suppliers/vendors. The determination of commercial availability of such equipment will be made by the City prior to issuance of grading or building permits based on applicant provided evidence of the availability or unavailability of alternative-fueled generators and/or evidence 			

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>obtained by the City from expert sources such as construction contractors in the region.</p> <ul style="list-style-type: none"> • Consistent with SCAQMD Rule 403, construction contractors shall identify and implement best available dust control measures during active construction operations capable of generating dust. • Construction contractors shall maintain construction equipment in good, properly tuned operating condition, as specified by the manufacturer, to minimize exhaust emissions. Documentation demonstrating that the equipment has been maintained in accordance with the manufacturer’s specifications shall be kept on-site and made available to LADBS inspectors during inspection. • Construction contractors shall reroute construction trucks away from congested streets or sensitive receptor areas, as feasible. • Construction activities shall be discontinued during second-stage smog alerts (when feasible). A record of any second-stage smog alerts and of discontinued construction activities as applicable shall be maintained by the Contractor on-site. If infeasible to stop work, i.e., in the instance of a continuous concrete pour, construction activities shall be limited to those activities necessary to complete the immediate job. • For projects where continuous pour activities will extend past the typical construction day: <ul style="list-style-type: none"> • Concrete trucks shall have an average capacity of 10 cubic yards to minimize the number of concrete truck trips. • Contractor shall use local concrete suppliers with 90 percent or more of the concrete supplied by one or more facilities within a driving distance of less than 5 miles per one-way trip or 10 miles round trip where feasible. • Contractor shall be required to use alternatively fueled concrete trucks that achieve the same or lower NOx emissions as CNG-fueled concrete trucks to the extent feasible. The level of feasibility/infeasibility shall be approved by the City prior to the beginning of concrete pouring activities. • During plan check, applicant shall make available to SCAQMD a comprehensive inventory of all of road trucks and concrete trucks to be used for the project, including horsepower rating, engine production year, and certification of the specified equipment. 			

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
4.2-2(b) Operations Emissions Reduction			
<p>For discretionary projects, prior to project approval, the Applicant shall be required to provide the City an Air Quality Impact Analysis prepared by a qualified air quality analyst to analyze operational emissions and identify necessary mitigation for any discretionary project that would include more than 462 single-family residential units, 612 multi-family residential units, or any equivalent combination thereof. The Air Quality Impact Analysis shall demonstrate that project emissions are less than applicable SCAQMD regional and LST thresholds, and as applicable may include, but are not limited to, the following mitigation:</p> <ul style="list-style-type: none"> • Implementation of a Transportation Demand Management Plan. <ul style="list-style-type: none"> • Installation of additional electric vehicle charging stations • Public infrastructure improvements (e.g., bus stop shelter improvements) • Carpool or ridesharing programs • Subsidized transit costs • Unbundled parking costs • Bicycle amenities (storage, showers, lockers, etc.) • Use of all-electric appliances (i.e., elimination of natural gas service). • Use solar or low emission water heaters that exceed Title 24 requirements. • Increased walls and attic insulation beyond Title 24 requirements. • Property management plan that obligates property manager to use of low-VOC paints and coatings, meeting SCAQMD standards, for property management and required use of electric yard and landscaping equipment, including lawnmowers, leaf-blowers, and chainsaws. 	Applicant for individual project	DCP, LADBS	<p>Prior to project approval: review and approve the Air Quality Impact Analysis, any required TDM Plan or Property Management Plan, and condition any necessary assurances and commitments of compliance.</p> <p>Prior to building permits, ensure any necessary assurances and commitments of compliance are obtained.</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
4.2-3 Construction TAC Reduction Measures			
<p>For discretionary projects with an anticipated construction duration of greater than 18-months and located within 500 feet of a residence or other sensitive receptor, prior to issuance of a permit to construct, the applicant shall provide to the City an Air Quality Impact Analysis, prepared by a qualified air quality analyst, that includes a construction health risk assessment. If the analysis shows incremental cancer risk would exceed 10 persons in one million at a sensitive receptor or the calculated Hazard Index for chronic or acute risks would exceed a value of 1.0 at a sensitive receptor, the air quality analyst shall prepare a mitigation plan subject to City review and approval that reduce TACs to less than SCAQMD thresholds. The applicant shall comply with all mitigation measures in the mitigation plan.</p> <p>Alternatively, no Air Quality Impact Analysis, health risk assessment, and mitigation plan shall be required for discretionary projects conditioned to use construction equipment that meets the CARB Tier 4 Final or USEPA Tier 4 off-road emissions for all equipment rated 50 horsepower or greater. A copy of each unit’s certified tier specification or model year specification and CARB or SCAQMD operating permit (if applicable) shall be available upon request at the time of mobilization of each applicable unit of equipment.</p>	Applicant for individual project	DCP, LADBS	<p>Prior to project approval: review and approve an Air Quality Impact Analysis with a Health Risk Assessment; or condition for applicant to provide necessary assurances to use Tier 4 equipment with necessary CARB or SCAQMD operating permit (if applicable).</p> <p>Prior to building permits: verify necessary assurances provided</p>
Biological Resources			
4.3-1(a) Biological Resources Reconnaissance Survey and Reporting			
<p>For all discretionary projects that require vegetation removal, ground disturbance, staging of vehicles, equipment, or materials, and access routes on natural (e.g., native, virgin) or disturbed but undeveloped (e.g., unpaved, areas barren, or ruderal), areas that contain or have the potential to support special-status species, sensitive habitat, or within 300 feet of suitable habitat to support special-status species (e.g., nesting passerines) as determined by the Department of City Planning, including through consultation with CDFW, the project applicant shall be required to conduct a biological resources assessment report to characterize the biological resources on-site and to determine the presence or absence of sensitive species. The report shall identify 1) approximate population size and distribution of any sensitive plant or animal species, 2) any sensitive habitats (such as wetlands or riparian areas), and 3) any potential impacts of Proposed Project on wildlife corridors.</p>	Applicant for individual project	Department of City Planning (DCP)	<p>Prior to project approval: review and approve biological resource assessment, condition project, if necessary, regarding identified wildlife corridors</p> <p>Prior to building permits: ensure any identified wildlife corridors are not closed by project;</p> <p>During Construction/grading; monitor compliance</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>Off-site areas that may be directly or indirectly affected by the individual project shall also be surveyed. The report shall include site location, literature sources, methodology, timing of surveys, vegetation map, site photographs, and descriptions of on-site biological resources (e.g., observed and detected species, as well as an analysis of those species with the potential to occur on-site). The biological resources assessment report and surveys shall be conducted by a qualified biologist, and any special status species surveys shall be conducted according to standard methods of surveying for the species as appropriate.</p> <p>If sensitive species and/or habitat are absent from the individual project site and adjacent lands potentially affected by the individual project, a written report substantiating such shall be submitted to Department of City Planning (DCP) prior to project approval, and the project may proceed without any further biological investigation. If wildlife corridors are present, the report shall identify measures (such as providing native landscaping to provide cover on the wildlife corridor) that the individual project would be required to implement such that the existing wildlife corridor would remain. Wildlife corridors identified in the biological resources assessment report shall not be entirely closed by any development or improvements occurring within the Project Area.</p>			
4.3-1(b) Sensitive Species/Habitat Avoidance: Pre-Construction Bird Nest Surveys, Avoidance, and Notification			
<p>For all discretionary projects where sensitive species and/or habitat are identified in the biological resources assessment prepared pursuant to MM 4.3-1(a), the biological resources assessment report shall require pre-construction surveys for sensitive species and/or construction monitoring to ensure avoidance, relocation, or safe escape of the sensitive species from the construction activities, as appropriate. If sensitive species are found to be nesting, brooding, denning, etc. on-site during the pre-construction survey or during construction monitoring, construction activities shall be halted until offspring are weaned, fledged, etc. and are able to escape the site or be safely relocated to appropriate off-site habitat areas. A qualified biologist shall be on-site to conduct surveys, for construction monitoring, to perform or oversee implementation of protective measures, and to determine when construction activity may resume. Additionally, the biological resources assessment report shall be submitted to DCP and California Department of Fish and Wildlife (CDFW) prior to ground-disturbing activities. A follow-up report documenting construction monitoring, relocation methods, and the results of the</p>	<p>Applicant for individual project</p>	<p>DCP, California Department of Fish and Wildlife (CDFW)</p>	<p>Prior to project approval: review and approve biological resources assessment including necessary surveys and avoidance, relocation, plans, etc.</p> <p>Prior to issuance of grading permit; ensure plans show requirement to avoid bird nest and BMPs</p> <p>During construction (including excavation, grading, and demolition): monitor compliance</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>monitoring and species relocation shall be prepared and submitted to DCP and CDFW following construction.</p> <p>Construction activities initiated during the bird nesting season (February 1 – August 31) involving removal of vegetation or other nesting bird habitat, including abandoned structures and other man-made features, a pre-construction nesting bird survey shall be conducted no more than three days prior to initiation of ground disturbance and vegetation removal activities. The nesting bird pre-construction survey shall be conducted on foot and shall include a 100-foot buffer around the construction site. The survey shall be conducted by a biologist familiar with the identification of avian species known to occur in southern California. If nests are found, an avoidance buffer shall be determined dependent upon the species, the proposed work activity, and existing disturbances associated with land uses outside of the site, which shall be demarcated by the biologist with bright orange construction fencing, flagging, construction lathe, or other means to demarcate the boundary. All construction personnel shall be notified as to the existence of the buffer zone and to avoid entering the buffer zone during the nesting season. No ground disturbing activities shall occur within the buffer until the avian biologist has confirmed that breeding/ nesting is completed, and the young have fledged the nest. Encroachment into the buffer shall occur only at the discretion of the qualified biologist on the basis that the encroachment will not be detrimental to an active nest. A report summarizing the pre-construction survey(s), construction monitoring, and implementation of protective measures conducted shall be prepared by a qualified biologist.</p> <p>Proposed Project site plans shall include a statement acknowledging compliance with the federal MBTA and CFGC that includes avoidance of active bird nests and identification of Best Management Practices to avoid impacts to active nests, including checking for nests prior to construction activities during February 1 to August 31 and what to do if an active nest is found so that the nest is not inadvertently impacted during grading or construction activities.</p>			

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
4.3-1(c) Focused Surveys for Rare Plants			
<p>If indicated as appropriate by the biological resources assessment report required in Mitigation Measure 4.3-1(a), focused surveys for special status plants shall be conducted. Prior to vegetation clearing for construction in open space areas, special status plants identified in the focused surveys shall be counted and mapped and a special-status plant relocation plan shall be developed and implemented to provide for translocation of the plants. The plan shall be prepared by a qualified biologist and shall include the following components: (1) identify an area of appropriate habitat, on-site preferred; (2) depending on the species detected, determine if translocation will take the form of seed collection and deposition, or transplanting the plants and surrounding soil as appropriate; (3) develop protocols for irrigation and maintenance of the translocated plants where appropriate; (4) set forth performance criteria (e.g., establishment of quantitative goals, expressed in percent cover or number of individuals, comparing the restored and impacted population) and remedial measures for the translocation effort; and (5) establish a five-year monitoring procedures/protocols for the translocated plants. Five years after initiation of the restoration activities, a report shall be submitted to DCP and CDFW, which shall at a minimum discuss the implementation, monitoring, and management of the restoration activities over the five-year period and indicate whether the restoration activities have, in part or in whole, been successful based on the established performance criteria. The restoration activities shall be extended if the performance criteria have not been met at the end of the five-year period to the satisfaction of DCP, and CDFW.</p>	<p>Applicant for individual project</p>	<p>DCP, CDFW</p>	<p>Prior to project approval: review and approve the Plant Relocation Plan</p> <p>During construction (including excavation, grading, and demolition): monitor compliance</p> <p>Five years after restoration activities or as extended: review and approve the restoration report</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
4.3-1(d) Adaptive Management Plan			
<p>If indicated as appropriate in a reconnaissance, pre-construction or focused survey required in Mitigation Measure 4.3-1(a), (b), or (c) the biologist shall prepare an Adaptive Management Plan for future operations to ensure that operations will not result in impacts to special status species, such as lighting plans, fencing plans, revegetation plans, and/or necessary covenants to ensure property owners maintain their properties in a way to reduce impacts to native species, such as requirements for keeping domestic animals or use of non-native vegetation, and/or education campaigns. Applicants shall prepare necessary documentation and provide adequate assurances to ensure compliance with ongoing operational requirements, including, but not limited to, such measures as filing of covenants, creation of funding mechanism, or provision of bonds.</p>	<p>Applicant for individual project</p>	<p>DCP, CDFW</p>	<p>Prior to project approval: review and approve Adaptive Management Plan; condition to obtain necessary assurances and commitments for continued compliance</p> <p>Prior to issuance of building permit: ensure necessary assurances for continued compliance obtained</p>
4.3-2(a) Habitat Mitigation and Monitoring Plan			
<p>For discretionary projects that are in areas potentially containing sensitive natural communities or jurisdictional waters and riparian habitat, including streams, wetlands, riparian habitat, and other water bodies, affected sites as well as off-site areas that may be directly or indirectly affected by the individual development project, prior to the project approval, the applicant shall prepare and submit a Habitat Mitigation and Monitoring Program (HMMP), which shall mitigate for impacts to CDFW jurisdictional habitat at a 2:1 ratio for permanent impacts and a 1:1 ratio for temporary impacts, or as otherwise approved by CDFW and the City.</p> <p>The HMMP shall mitigate for impacts to jurisdictional areas via an acceptable mitigation approach that involves one or a combination of the on-site or off-site restoration or enhancement of degraded in-kind habitats, preservation of in-kind habitats, or by a contribution to an in-lieu fee program approved by the City, CDFW (and USACE, RWQCB, if applicable).</p> <p>The final HMMP shall be developed by a qualified biologist, restoration ecologist or resource specialist and submitted to and approved by the City and CDFW (USACE, RWQCB, if applicable), in compliance with Clean Water Act Sections 401 and 404 and California Fish and Game Code Section 1602 and supporting regulations, prior to issuance</p>	<p>Applicant for individual project</p>	<p>DCP, CDFW</p> <p>If applicable: U.S. Army Corps of Engineers (USACE), Los Angeles Regional Water Quality Control Board (RWQCB)</p>	<p>Prior to project approval: review and approve the Habitat Mitigation and Monitoring Program (HMMP); verify approval from CDFW</p> <p>Annually after issuance Certificate of Occupancy: review and approve the annual reports regarding the HMMP</p> <p>Five years after issuance of Certificate of Occupancy: review and approve the final report</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>of a grading permit for the project. In broad terms, this Program shall at a minimum include:</p> <ul style="list-style-type: none"> • Description of the project/impact and mitigation sites; • Specific objectives; • Success criteria; • Plant palette; • Implementation plan; • Maintenance activities; • Monitoring plan; and • Contingency measures. <p>Success criteria shall at a minimum be evaluated based on appropriate survival rates and percent cover of planted native species, as well as eradication and control of invasive species within the restoration area.</p> <p>The target species and native plant palette, as well as the specific methods for evaluating whether the project has been successful at meeting the above-mentioned success criteria shall be determined by the qualified biologist, restoration ecologist, or resource specialist and included in the HMMP.</p> <p>The HMMP shall be implemented over a five-year period and shall incorporate an iterative process of annual monitoring and evaluation of progress and allow for adjustments to the program, as necessary, to achieve desired outcomes and meet success criteria. Annual reports discussing the implementation, monitoring, and management of the HMMP shall be submitted to the City and the CDFW (USACE, RWQCB, if applicable). Five years after project start, a final report shall be submitted to the City and the CDFW (USACE, RWQCB, if applicable), which shall at a minimum discuss the implementation, monitoring and management of the mitigation project over the five-year period, and indicate whether the HMMP has met the established success criteria. The annual reports and the final report shall include as-built plans submitted as an appendix to the report. Restoration will be considered successful after the success criteria have been met for a period of at least two years without any maintenance or remediation activities other than invasive species control. The project shall be extended if the success criteria have not been met at the end of the five-year period to the satisfaction of the City and the CDFW (USACE, RWQCB, if applicable).</p>			

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
4.3-2(b) Protected Tree and Tree Canopy Survey			
<p>For discretionary projects that include the removal of trees, prior to project approval, a tree report and tree replanting plan shall be conducted by a certified arborist to tag and assess all trees (defined as woody plant material that is five inches or greater in diameter at breast height [DBH – four and a half feet off grade]) subject to the City’s Protected Tree Ordinance on the project site. Trees shall be tagged to correspond with a tree exhibit map. Also, the genus and species of the trees, size of the trees at DBH, and structure and vigor of the trees shall be determined, and an evaluation of the trees’ resource value (i.e., the biological impacts of the tree removals, potential to be considered wildlife habitat, and locating trees deserving protection) shall be completed. All protected trees shall receive a visual tree assessment (VTA – meaning tree observations shall be from the ground and that no special devices [e.g., increment borers, drills] shall be used). Following the completion of the tree survey, the arborist shall prepare a report that shall at a minimum provide a description of the general character of the trees on the site and identify opportunities and constraints for preservation. The report and tree replanting plan shall be provided to the City for review. As part of the assessment, a plot plan shall also be prepared indicating the location, type, and canopy coverage of all existing trees on the site and within the adjacent public right(s)-of-way.</p> <p>Based on the results of the tree survey, development plans shall be clustered to maximum extent feasible in order to avoid impacts to sensitive natural communities (e.g., oak woodlands, riparian habitats, extensive tree canopy) and to maintain the largest and most contiguous area of sensitive communities on the site. Additionally, the development plans shall include a proposed minimum buffer to protect adjacent sensitive communities. Development plans that impact sensitive natural communities shall include a detailed feasibility analysis showing how the design has accomplished these avoidance strategies; the City shall not approve development plans until the site design has adequately demonstrated maximum avoidance of sensitive natural communities to the satisfaction of City Planning.</p> <p>Further, removal or planting of any tree in the public right(s)-of-way requires approval of the Board of Public Works. All trees in the public right(s)-of-way shall conform to the current standards of the Department of Public Works, Urban Forestry Division, Bureau of Street Services.</p>	<p>Applicant for individual project</p>	<p>DCP, Department of Public Works (DPW), Urban Forestry Division (UFD), Bureau of Street Services (BSS)</p>	<p>Prior to project approval: review and approve tree report, tree planting plan, and plot plan of all existing trees on-site and adjacent public rights of way; review project for compliance with mitigation requirement to avoid sensitive natural communities: condition project to comply with tree replanting plan and site plan and provide necessary assurances for compliance</p> <p>Prior to issuance of grading permit: review site plans for compliance with conditions and obtain necessary assurances</p> <p>During construction: monitoring</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>The following measures shall be implemented in addition to those required under the City’s Protected Tree Ordinance (Ordinance No. 177,404) to avoid and/or compensate for potential indirect impacts to preserved sensitive natural communities before, during, and following construction activities.</p> <p><i>Pre-Construction</i></p> <ul style="list-style-type: none"> • Fencing: Protective fencing at least three feet high with signs and flagging shall be erected around all preserved sensitive natural communities where adjacent to proposed vegetation clearing and grubbing, grading, or other construction activities. The protective fence shall be installed at a minimum of five feet beyond the tree canopy dripline. The intent of protection fencing is to prevent inadvertent limb/vegetation damage, root damage and/or compaction by construction equipment. The protective fencing shall be depicted on all construction plans and maps provided to contractors and labeled clearly to prohibit entry, and the placement of the fence in the field shall be approved by a qualified biologist prior to initiation of construction activities. The contractor shall maintain the fence to keep it upright, taut and aligned at all times. Fencing shall be removed only after all construction activities are completed. • Pre-Construction Meeting: A pre-construction meeting shall be held between all site contractors and a registered consulting arborist and/or a qualified biologist. All site contractors and their employees shall provide written acknowledgement of their receiving sensitive natural community protection training. This training shall include, but shall not be limited to, the following information: (1) the location and marking of protected sensitive natural communities; (2) the necessity of preventing damage to these sensitive natural communities; and (3) a discussion of work practices that shall accomplish such. <p><i>During Construction</i></p> <ul style="list-style-type: none"> • Fence Monitoring: The protective fence shall be monitored regularly (at least weekly) during construction activities to ensure that the fencing remains intact and functional, and that no encroachment has occurred into the protected natural community; any repairs to the fence or encroachment correction shall be conducted immediately. • Equipment Operation and Storage: Contractors shall avoid using heavy equipment around the sensitive natural communities. Operating heavy machinery around the 			

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>root zones of trees would increase soil compaction, which decreases soil aeration and, subsequently, reduces water penetration into the soil. All heavy equipment and vehicles shall, at minimum, stay out of the fenced protected zones, unless where specifically approved in writing and under the supervision of a registered consulting arborist and/or a qualified biologist.</p> <ul style="list-style-type: none"> Materials Storage and Disposal: Contractors shall not store or discard any construction materials within the fenced protected zones and shall remove all foreign debris within these areas. The contractors shall leave the duff, mulch, chips, and leaves around the retained trees for water retention and nutrient supply. Contractors shall avoid draining or leakage of equipment fluids near retained trees. Fluids such as gasoline, diesel, oils, hydraulics, brake and transmission fluids, paint, paint thinners, and glycol (anti-freeze) shall be disposed of properly. The contractors shall ensure that equipment be parked at least 50 feet, and that equipment/vehicle refueling occur at least 100 feet, from fenced protected zones to avoid the possibility of leakage of equipment fluids into the soil. Grade Changes: Contractors shall ensure that grade changes, including adding fill, shall not be permitted within the fenced protected zone without special written authorization and under supervision by a registered consulting arborist and/or a qualified biologist. Lowering the grade within the fenced protected zones could necessitate cutting main support and feeder roots, thus jeopardizing the health and structural integrity of the tree(s). Adding soil, even temporarily, on top of the existing grade could compact the soil further, and decrease both water and air availability to the tree roots. Contractors shall ensure that grade changes made outside of the fenced protected zone shall not create conditions that allow water to pond. Trenching: Except where specifically approved in writing beforehand, all trenching shall be outside of the fenced protected zone. Roots primarily extend in a horizontal direction forming a support base to the tree similar to the base of a wineglass. Where trenching is necessary in areas that contain roots from retained trees, contractors shall use trenching techniques that include the use of either a root pruner (Dosko root pruner or equivalent) or an Air-Spade to limit root impacts. A registered consulting arborist shall ensure that all pruning cuts shall be clean and sharp, to minimize ripping, tearing, and fracturing of the root system. Root damage caused by backhoes, earthmovers, dozers, or graders is severe and may ultimately result in tree mortality. Use of both root pruning and Air-Spade equipment shall be accompanied only by 			

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>hand tools to remove soil from trench locations. The trench shall be made no deeper than necessary.</p> <ul style="list-style-type: none"> • Erosion Control: Appropriate erosion control best management practices (BMPs) shall be implemented to protect preserved sensitive natural communities during and following project construction. Erosion control materials shall be certified as weed free. • Inspection: A registered consulting arborist shall inspect the preserved trees adjacent to grading and construction activity on a monthly basis for the duration of the grading and construction activities. A report summarizing site conditions, observations, tree health, and recommendations for minimizing tree damage shall be submitted by the registered consulting arborist following each inspection. <p><i>Post-construction</i></p> <ul style="list-style-type: none"> • Mulch: The contractors shall ensure that the natural duff layer under all trees adjacent to construction activities shall be maintained. This would stabilize soil temperatures in root zones, conserve soil moisture, and reduce erosion. The contractors shall ensure that the mulch be kept clear of the trunk base to avoid creating conditions favorable to the establishment and growth of decay causing fungal pathogens. Should it be necessary to add organic mulch beneath retained oak trees, packaged or commercial oak leaf mulch shall not be used as it may contain root fungus. Also, the use of redwood chips shall be avoided as certain inhibitive chemicals may be present in the wood. Other wood chips and crushed walnut shells can be used, but the best mulch that provides a source of nutrients for the tree is its own leaf litter. Any added organic mulch added by the contractors shall be applied to a maximum depth of 4 inches where possible. • Watering Adjacent Plant Material: All installed landscaping plants near the preserved sensitive natural communities shall require moderate to low levels of water. The surrounding plants shall be watered infrequently with deep soaks and allowed to dry out in-between, rather than frequent light irrigation. The soil shall not be allowed to become saturated or stay continually wet, nor should drainage allow ponding of water. Irrigation spray shall not hit the trunk of any tree. The contractors shall maintain a 30-inch dry-zone around all tree trunks. An above ground micro-spray irrigation system shall be used in lieu of typical underground pop-up sprays. 			

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<ul style="list-style-type: none"> Monitoring: A certified arborist shall inspect the trees preserved on the site adjacent to construction activities for a period of two years following the completion of construction. Monitoring visits shall be completed quarterly, totaling eight visits. Following each monitoring visit, a report summarizing site conditions, observations, tree health, and recommendations for promoting tree health shall be prepared. Additionally, any tree mortality shall be noted and any tree dying during the two-year monitoring period shall be replaced at a minimum 3:1 ratio on-site in coordination with the City. 			
Cultural Resources			
4.4-1(a) Identification of Built-Environment Historical Resources			
<p>For discretionary projects, the following procedures shall be implemented to identify historical resources, as defined by Public Resources Code Section 21084.1, located on or near a development site and implement appropriate techniques to avoid or reduce significant impacts to historical resources.</p> <p>The City of Los Angeles Historic Resources Survey (SurveyLA) results shall be consulted to determine whether the project area, or adjacent areas, have been subject to previous cultural resources studies and whether historical resources were identified.</p> <p>If a development involves the alteration or demolition of a property 45 years of age or older that was not evaluated in SurveyLA, including sites with a QQQ code, a historical resources evaluation shall be prepared for the development. The evaluation shall be prepared according to the following standards:</p> <ul style="list-style-type: none"> The evaluation shall be prepared by a qualified architectural historian or historian who meets the Secretary of the Interior’s Professional Qualifications Standards (PQS) in architectural history or history. The qualified architectural historian or historian shall conduct an intensive-level evaluation in accordance with the guidelines and best practices promulgated by the State Office of Historic Preservation (OHP) and the City of Los Angeles Office of Historic Resources (OHR) to identify any potential historical resources within the Area of Potential Effects. 	Applicant for individual project	DCP, Office of Historic Resources (OHR)	Prior to approval of project: check SurveyLA; review and approve any historical resource evaluation and mitigation plan.

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>Those buildings and structures required to be assessed in a historical resource evaluation not located in an HPOZ shall be evaluated within their historic context and documented in a report meeting the OHP and OHR guidelines. All evaluated properties shall be documented on Department of Parks and Recreation Series 523 Forms. The report shall be submitted to the OHR for review and concurrence. If, as a result of the cultural resources records search or the subsequent historical resources evaluation, it is determined that the proposed development would result in a significant adverse effect to one or more historical resources, appropriate techniques consistent with the Secretary of Interior Standards to avoid or reduce significant impacts to the degree feasible shall be implemented. Measures to reduce impacts shall generally be overseen by a qualified architectural historian or historic architect meeting the PQS, unless unnecessary under the circumstance (e.g., preservation in place). In conjunction with any development application that may affect the historical resource, a mitigation plan identifying measures for the treatment or protection of character-defining features shall be provided to the City for review. Measures may include but not be limited to mitigation measures 4.4-1(b) to 4.4-1(j) below.</p>			
4.4-1(b) Rehabilitation of Historical Resources			
<p>If required under the mitigation plan in the historical resources evaluation prepared under MM 4.4-1(a), comply with the following measure.</p> <p>If a development proposes alteration or addition to a historical resource to allow for its continued use, the integrity of the resource could be undermined such that it would no longer convey the historical associations that make it eligible for listing. To reduce such impacts, a resource may be rehabilitated in conformance with the Secretary’s Standards to allow for continued or new uses while maintaining features that convey the resource’s historical significance. Construction of a project as it relates to rehabilitation of a historical resource shall be monitored for compliance with the Secretary’s Standards. The construction monitoring shall:</p> <ul style="list-style-type: none"> • Be performed by a professional meeting the Secretary of the Interior’s Professional Qualifications Standards (PQS) for historic architecture with at least five years of demonstrated experience in rehabilitating historic buildings of similar size. 	<p>Applicant for individual project</p>	<p>DCP, OHR</p>	<p>Prior to project approval: condition monitoring and necessary assurances of compliance</p> <p>During alteration or addition of a historical resource: monitoring</p> <p>During construction: review and approve the technical memoranda developed throughout the alteration activities</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<ul style="list-style-type: none"> Be performed by the professional at regular intervals during the rehabilitation of the historical resource. The intervals shall include, but not necessarily limited to 50 percent, 90 percent, and 100 percent construction. <p>The monitor shall create a technical memorandum at each interval summarizing the findings, making recommendations as necessary to ensure compliance with the Secretary’s Standards, and documenting construction with digital photographs. Compliance with the Secretary’s Standards shall include the review specifications, tests, and mockups for the treatment of historic building materials.</p> <p>The monitor shall submit the memoranda to City of Los Angeles Office of Historic Resources (OHR) for concurrence. In the event OHR does not concur, all activities shall cease until compliance with the Secretary’s Standards is resolved and concurrence is obtained.</p>			
4.4-1(c) Design Requirements for New Construction			
<p>If required under the mitigation plan in the historical resources evaluation prepared under MM 4.4-1(a), comply with the following measure.</p> <p>If a development proposes new construction on a site containing a historical resource, the project design team shall consult with a preservation architect or other qualified professional to ensure that new construction is designed and constructed in accordance with the Secretary of Interior’s Standards to ensure the proposed new construction would protect the historic integrity of the historical resource and any adjacent historical resources. The final design shall require the approval of OHR. In the event OHR does not concur, all activities shall cease until compliance with the Secretary’s Standards is resolved and concurrence is obtained.</p>	Applicant for individual project	DCP, OHR	<p>Prior to approval of project or building permit: review and approve the design plan</p> <p>During construction: monitoring</p>
4.4-1(d) Relocation and Rehabilitation of Historical Resources			
<p>If required under the mitigation plan in the historical resources evaluation prepared under MM 4.4-1(a), comply with the following measure.</p> <p>For any project for which retention or rehabilitation of a historical resource is not feasible, a feasibility study, subject to City review and approval, shall be prepared weighing the costs, advantages, and disadvantages of relocation, which would preclude the demolition of a resource by removing it intact to another site. If the study concludes it is feasible to</p>	Applicant for individual project	DCP, OHR	<p>Prior to project approval or building permit: review and approve the feasibility study; if relocation is feasible a Relocation and Rehabilitation Plan will be reviewed and approved by OHR</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>relocate the historical resource, the structure’s availability shall be advertised in historic preservation websites such as HistoricForSale, Historic Properties, Old Houses, and Preservation Directory and a local newspaper such as the Los Angeles Times for a period of not less than 60 days by the project applicant. Any such relocation efforts shall be undertaken in accordance with a Relocation and Rehabilitation Plan prepared by the party taking possession of the structure to be moved. The Relocation and Rehabilitation Plan shall be developed in conjunction with a qualified architectural historian, historic architect, or historic preservation professional who satisfies the Secretary of the Interior’s Professional Qualifications Standards (PQS) for History, Architectural History, or Architecture, pursuant to 36 CFR 61. The Plan shall include relocation methodology recommended by the National Park Service, which are outlined in the booklet entitled “Moving Historic Buildings,” by John Obed Curtis (1979). Upon relocation of the structure to the new site, any maintenance, repair, stabilization, rehabilitation, preservation, conservation, or reconstruction work performed in conjunction with the relocation of the building shall be undertaken in a manner consistent with the Secretary’s Standards. The Relocation and Rehabilitation Plan shall be reviewed and approved by the City of Los Angeles Office of Historic Resources (OHR) prior to its implementation. In addition, a plaque describing the date of the move and the original location shall be placed in a visible location on the historical resource. If after three months it is evident that no party is interested in purchasing the historical resource per the mitigation measure stipulated above, then the Historic American Building Survey (HABS) Level II documentation, as described below in Mitigation Measure 4.4-1(e), would be required to document the important history and architecture of the historical resource. Relocation shall not take place until the historical resource is first recorded pursuant to the HABS Level II requirements.</p> <p>Any relocation activities undertaken by third parties shall be fully completed prior to the commencement of construction activities. The relocated historical resource shall be moved in accordance with all applicable regulatory requirements, including those applicable provisions of Chapter 83 of the Los Angeles Building Code, and shall be moved during off-peak hours so as to avoid potential traffic impacts.</p>			<p>Prior to building permits; verify that relocation of the building has occurred</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
4.4-1(e) Historic American Building Survey Documentation			
<p>If required under the mitigation plan in the historical resources evaluation prepared under MM 4.4-1(a), comply with the following measure.</p> <p>If significant historical resources are identified on a development site and avoidance or compliance with the Secretary’s Standards is not possible, prior to development activities, the project applicant shall prepare a Historic American Buildings Survey (HABS) Level II documentation for the historical resource and remaining historic property setting. The HABS document shall be prepared by a qualified architectural historian, historic architect, or historic preservation professional who satisfies the Secretary of the Interior’s PQS for History, Architectural History, or Architecture, pursuant to 36 CFR 61. This document shall record the history and architecture of the property, as well as important events or other significant contributions to the patterns and trends of history with which the property is associated, as appropriate. The property’s physical condition, both historic and current, shall be documented through site plans; historic maps and photographs; original as-built drawings; large format photographs; and written data. Building exteriors, representative interior spaces, character-defining features, as well as the property setting and contextual views shall be documented. Field photographs and notes shall also be included. All documentation components shall be completed in accordance with the Secretary of the Interior’s Standards and Guidelines for Architectural and Engineering Documentation. The HABS documentation shall be submitted to the National Park Service for transmittal to the Library of Congress, and archival copies shall be sent to the City of Los Angeles Office of Historic Resources (OHR) and Los Angeles Public Library. Per the Secretary of the Interior’s Standards for Architectural and Engineering Documentation, preparation of the HABS document serves to “[provide] important information on a property’s significance for use by scholars, researchers, preservationists, architects, engineers and others interested in preserving and understanding historic properties.”²</p>	Applicant for individual project	DCP, OHR	<p>Prior to project approval: review and approve HABS document or condition project to prepare HABS document or and provide necessary assurances to comply</p> <p>Prior to issuance of grading permit: review and approve the Historic American Buildings Survey documentation and/or obtain necessary assurances</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
4.4-1(f) Interpretive Program			
<p>If required under the mitigation plan in the historical resources evaluation prepared under MM 4.4-1(a), comply with the following measure.</p> <p>If avoidance of the historical resource is not feasible, the project shall include an interpretive display located on the property which addresses the historical context and architectural or historical significance of the resource and informs the public about the history and original configuration of the property. The display shall be reviewed and approved by the City prior to installation at a site to be chosen by the City.</p>	Applicant for individual project	DCP, OHR	<p>Prior to project approval: approve interpretive program or condition project to prepare interpretive program and provide necessary assurances for compliance</p> <p>Prior to building permits: review and approve the plan for interpretive program or ensure necessary assurances obtained</p>
4.4-1(g) Construction Monitoring, Salvage, and Reuse			
<p>If required under the mitigation plan in the historical resources evaluation prepared under MM 4.4-1(a), comply with the following measure.</p> <p>If retention of a historical resource is not feasible, and the historical resource is significant for its architectural design or construction method, the project applicant shall retain a qualified architectural historian or historic preservation professional who satisfies the Secretary of the Interior’s Professional Qualifications Standards (PQS) for Architectural History to conduct construction monitoring and salvage during demolition. Any important historic fabric associated with the historical resource’s period of significance shall be fully recorded in photographic images and written manuscript notes. Prior to the commencement of demolition, significant material shall be inventoried and evaluated for potential salvage, analysis, reuse, and interpretation. The qualified architectural historian or historic preservation professional shall prepare the necessary written and illustrated documentation in a construction monitoring and salvage report. This document shall record any historically significant construction methods completed during the period of significance as well as document the historical resource’s present physical condition through site plans; historic maps and photographs; sketch maps; digital photography; and written data and text.</p> <p>A salvage and reuse plan shall be created, identifying elements and materials that can be saved prior to the issuance of a demolition permit. The plan shall be prepared by a qualified architectural historian or historic preservation professional with demonstrated</p>	Applicant for individual project	DCP, OHR	<p>Prior to project approval or demolition permit: approve salvage and reuse plan or condition project to provide salvage and reuse plan and provide necessary assurances to ensure compliance</p> <p>Prior to issuance of demolition permit: approve salvage and reuse plan and/or obtain necessary assurances</p> <p>During demolition: monitor</p> <p>Prior to issuance of building permit: review and approve the construction monitoring salvage report</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>experience in developing salvage and reuse plans. The plan shall be submitted to the City of Los Angeles Office of Historic Resources. Elements and materials that may be salvageable include: windows, doors, roof tiles, decorative elements, framing members, light fixtures, plumbing fixtures, and flooring materials such as tiles and hardwood. The salvageable items shall be removed in the gentlest, least destructive manner possible. The plan shall identify the recipient(s) for the items.</p> <p>All documentation components shall be completed in accordance with the Secretary of the Interior’s Standards and for Archaeological Documentation for above ground structures. The completed documentation shall be placed on file at the South Central Coastal Information Center, California State University, Fullerton, California; and the City of Los Angeles Public Library. Findings shall be incorporated into the Historic American Buildings Survey (HABS) report.</p>			
4.4-1(h) Temporary Protective Relocation			
<p>If required under the mitigation plan in the historical resources evaluation prepared under MM 4.4-1(a), comply with the following measure.</p> <p>For projects for which development would have the potential to cause damage to a historical resource and the resource cannot be protected in place, if feasible, the resource may be temporarily relocated to prevent such damage. Prior to development, the applicant shall contact stakeholders directly via letter detailing the location of the project site, its potential impact on the resource, project timeframe, identification of the affected resource, proposed procedures for removal resource or parts of resource with affected, where and for how long the resource would be stored, how it would be secured, and other relevant details. Photographic and documentary recordation of the potentially impacted resource shall be completed by a qualified architectural historian meeting the PQS for Architectural History. Prior to any construction or demolition activities that have the potential to damage the resource, elements that cannot be reasonably protected in place shall be carefully removed by a qualified restoration contractor. Each removed element shall be promptly stored at a secured off-site location. Following completion of project construction, reinstallation of each affected element at its original documented location shall occur [by a qualified restoration contractor] with work completed to the satisfaction of the OHR, and the Department of Public Works Bureau of Engineering, and other interested parties. Excavation and construction activities in the vicinity of the</p>	<p>Applicant for individual project</p>	<p>DCP, OHR, DPW</p>	<p>Prior to project approval: condition project to provide notice and to provide necessary assurances to ensure compliance</p> <p>Prior to demolition permit: verify that stakeholders were notified with all required information and/or obtain assurances</p> <p>During and after demolition: field verify reinstallation of affected elements at their original documented location; review and approve the monitoring report</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>resource and work conducted by the restoration contractor to remove, store, and replace affected elements, shall be monitored by a qualified historic preservation consultant meeting the PQS for Architectural History and documented in a monitoring report that shall be provided to OHR.</p>			
<p>4.4-1(i) Excavation and Shoring Plan</p>			
<p>If required under the mitigation plan in the historical resources evaluation prepared under MM 4.4-1(a), comply with the following measure.</p> <p>For projects in which excavation and shoring have the potential to damage a historical resource in close proximity to the project site, an excavation and shoring plan shall be implemented to reduce the likelihood that earth-moving activities will result in damage to the historical resource due to earth moving activities. Procedures shall be implemented for shoring system design and monitoring of pre-excavation, grading, and shoring activities:</p> <ul style="list-style-type: none"> Excavation and shoring plans and calculations for temporary shoring walls shall be prepared by a California Registered Civil Engineer experienced in the design and construction of shoring systems and hired under the excavation subcontractor. The shoring systems shall be selected and designed in accordance with all current code requirements, industry best practices, and the recommendations of the Project Geotechnical Engineer. Maximum allowable lateral deflections for the project site are to be developed by the Geotechnical Engineer in consideration of adjacent structures, property, and public rights-of-way. These deflection limits shall be prepared in consideration of protecting adjacent historic resources. The shoring engineer shall produce a shoring design, incorporating tie-backs, soldier piles, walers, or other means of reinforcement, that is of sufficient capacity and stiffness to meet or exceed the strength and deflection requirements. Calculations shall be prepared by the shoring engineer showing the anticipated lateral deflection of the shoring system and its components and demonstrating that these deflections are within the allowable limits. Where tie-back anchors shall extend across property lines or encroach into the public rights-of-way, appropriate notification and approval procedures shall be followed. The final excavation and shoring plans shall include all appropriate details, material specifications, testing and special inspection requirements and shall be reviewed by the Geotechnical Engineer for conformance with the design intent and 	<p>Applicant for individual project</p>	<p>DCP, LADBS</p>	<p>Prior to project approval: condition project to prepare excavation and shoring plan and provide necessary assurances to ensure compliance</p> <p>Prior to issuance of grading permit: review and approve the final excavation and shoring plans</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>submitted to the Los Angeles Department of Building and Safety (LADBS) for review and approval during the grading permit application submission. The Geotechnical Engineer shall provide on-site observation during the excavation and shoring work.</p> <ul style="list-style-type: none"> The general contractor shall hire a California Registered Professional Engineer or California Professional Land Surveyor to prepare an Adjacent Structures Construction Monitoring Plan, subject to review and approval by LADBS, prior to initiation of any excavation, grading, or shoring activities to ensure the protection of adjacent historic resources from damage due to settlement during construction and excavation. The Adjacent Structures Construction Monitoring Plan shall be carried out by a California Professional Land Surveyor and establish survey monuments and document and record through any necessary means, including video, photography, survey, etc. the initial positions of adjacent structures, sidewalks, buildings, utilities, facades, cracks, etc. to form a baseline for determining settlement or deformation. Upon installation of soldier piles, survey monuments shall be affixed to the tops of representative piles so that deflection can be measured. The shored excavation and adjacent structures, sidewalks, buildings, utilities, facades, cracks, etc. shall be visually inspected each day. Survey monuments shall be measured at critical stages of dewatering, excavation, shoring, and construction but shall not occur less frequently than once every 30 days. Reports shall be prepared by the California Professional Land Surveyor documenting the movement monitoring results. Appropriate parties shall be notified immediately, and corrective steps shall be identified and implemented if movement exceeds predetermined thresholds, calculated amounts, or if new cracks or distress are observed in adjacent structures, sidewalks, buildings, utilities, façades, etc. In the event that settlement due to excavation or construction activity causes damage requiring touch-ups or repairs to the finishes of adjacent historic buildings, that work shall be performed in consultation with a qualified preservation consultant and in accordance with the California Historical Building Code and the Secretary’s Standards, as appropriate. <p>Foundation systems are to be designed in accordance with all applicable loading requirements, including seismic, wind, settlement, and hydrostatic loads, as determined by the California Building Code and in accordance with the recommendations provided by the Geotechnical Engineer.</p>			

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
4.4-1(j) Structural Construction Monitoring			
<p>If required under the mitigation plan in the historical resources evaluation prepared under MM 4.4-1(a), comply with the following measure.</p> <p>For developments in which excavation and shoring have the potential to damage a historical resource in close proximity to the project site, construction monitoring shall be implemented to minimize damage to nearby historical resources. The construction monitoring shall be performed by a licensed structural engineer with at least five years of demonstrated experience in rehabilitating historic buildings of similar size. A survey of the existing foundations and other structural aspects of historical resources in close proximity to the site shall be conducted to establish baseline conditions and provide a shoring design to protect the historical resources from potential damage. The survey shall take place prior to any construction activities. Pot holing or other destructive testing of the below grade conditions on the development site and immediately adjacent to the nearby historical resources may be necessary to establish baseline conditions and prepare the shoring design. A construction monitor shall submit to OHR a pre-construction survey that establishes baseline conditions to be monitored during construction, prior to issuance of any building permit for the development. The monitoring process shall include a meeting with the project contractor prior to the demolition and/or excavation activities to discuss minimizing damage to historical resources in close proximity.</p>	Applicant for individual project	DCP, OHR, LADBS	<p>Prior to project approval: condition project to provide necessary monitoring and provide necessary assurances to ensure compliance</p> <p>Prior to issuance of grading permit: obtain necessary assurances to ensure pre-construction survey, meeting with the project contractor, and monitoring</p> <p>During construction; monitoring compliance</p>
4.4-2 Archaeological Resources			
<p>Discretionary projects that involve ground disturbance in native soils or soils of unknown origin, shall implement the following procedures to identify archaeological resources located in a development site and implement applicable impact reduction techniques to reduce substantial adverse effects associated with the inadvertent discovery of archaeological resources.</p> <p>A. The project applicant shall retain a qualified archaeologist meeting the Secretary of the Interior’s Professional Qualifications Standards (PQS) in archaeology to complete a cultural resources assessment of the development site. A cultural resources assessment may include an archaeological pedestrian survey of the development site, if possible, and sufficient background archival research and field sampling to determine whether subsurface prehistoric or historic remains may be present.</p>	Applicant for individual project	DCP, OHR, affiliated California Native American Tribal Representative	<p>Prior to project approval: review and approve the cultural resources assessment of development; obtain necessary assurances to ensure compliance</p> <p>Prior to grading permit: obtain necessary assurances to ensure compliance</p> <p>During all ground disturbing activities: monitoring if required by cultural resources assessment;</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>Archival research should include a records search conducted at the South Central Coastal Information Center (SCCIC) and a Sacred Lands File (SLF) search conducted with the Native American Heritage Commission (NAHC).</p> <p>B. If prehistoric or historic archaeological remains are identified as a result of the SCCIC or SLF searches, the remains shall be avoided and preserved in place where feasible.</p> <p>C. Where preservation is not feasible, each resource shall be evaluated for significance and eligibility to the California Register. Phase 2 evaluation shall include any necessary archival research to identify significant historical associations as well as mapping of surface artifacts, collection of functionally or temporally diagnostic tools and debris, and excavation of a sample of the cultural deposit to characterize the nature of the sites, define the artifact and feature contents, determine horizontal boundaries and depth below surface, and retrieve representative samples of artifacts and other remains.</p> <p>D. Excavation at Native American sites shall be monitored by a geographically affiliated tribal representative, as agreed upon in any formal consultation proceedings with the geographically affiliated tribe or as indicated by the NAHC. If no tribal monitor is available, the monitoring shall be done by a qualified archaeologist.</p> <p>E. Cultural materials collected from the sites shall be processed and analyzed in the laboratory according to standard archaeological procedures. The age of the remains shall be determined using radiocarbon dating and other appropriate procedures; lithic artifacts, faunal remains, and other cultural materials shall be identified and analyzed according to current professional standards.</p> <p>F. Following laboratory analysis, the significance of the sites shall be evaluated according to the criteria of the California Register. The results of the investigations shall be presented in a technical report following the standards of the California Office of Historic Preservation (OHP) publication “Archaeological Resource Management Reports: Recommended Content and Format (1990 or latest edition)” (http://ohp.parks.ca.gov/pages/1054/files/armr.pdf).</p> <p>G. Upon completion of the work, all artifacts, other cultural remains, records, photographs, and other documentation shall be curated by an appropriate curation facility. All fieldwork, analysis, report production, and curation shall be fully funded by the applicant.</p>			<p>if archeological resources are uncovered, verify that a qualified archeologist evaluates and prepares a treatment plan; monitoring to ensure that construction in the area ceases until the treatment plan process is complete</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>H. If the resources meet California Register significance standards, the City shall ensure that all feasible recommendations for impact reduction of archaeological impacts are incorporated into the final design and permits issued for development. Necessary Phase 3 data recovery excavation, conducted to exhaust the data potential of significant archaeological sites, shall be carried out by a qualified archaeologist meeting the Secretary of the Interior’s PQS for archaeology according to a research design reviewed and approved by the City prepared in advance of fieldwork and using appropriate archaeological field and laboratory methods consistent with the OHP Planning Bulletin 5 (1991), Guidelines for Archaeological Research Design, or the latest edition thereof.</p> <p>I. If recommended by a cultural resources assessment, prior to issuance of a grading permit and prior to the start of any ground-disturbing activity, the applicant shall retain a qualified archaeologist who meets the Secretary of the Interior’s PQS to oversee an archaeological monitor who shall be present during construction excavations, such as demolition, clearing/grubbing, grading, trenching, or any other construction excavation activity associated with the project, including peripheral activities, such as sidewalk replacement, utilities work, and landscaping, which may occur adjacent to the project site. The frequency of monitoring shall be based on the rate of excavation and grading activities, the materials being excavated (younger sediments vs. older sediments), the depth of excavation, and, if found, the abundance and type of archaeological resources encountered. Full-time monitoring may be reduced to part-time inspections, or ceased entirely, if determined adequate by the qualified archaeologist. Prior to commencement of excavation activities, Archaeological Sensitivity Training shall be given for construction personnel. The training session shall be carried out by the qualified archaeologist and shall focus on how to identify archaeological resources that may be encountered during earthmoving activities and the procedures to be followed in such an event.</p> <p>J. In the event that historic (e.g., bottles, foundations, refuse dumps/privies, railroads, etc.) or prehistoric (e.g., hearths, burials, stone tools, shell and faunal bone remains, etc.) archaeological resources are unearthed, ground-disturbing activities shall be halted or diverted away from the vicinity of the find so that the find can be evaluated. A 50-foot buffer within which construction activities shall not be allowed to continue shall be established by the qualified archaeologist around the find. Work shall be allowed to continue outside of the buffer area. All archaeological resources</p>			

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>unearthed by project development activities shall be evaluated by the qualified archaeologist. If a resource is determined by the qualified archaeologist to constitute a “historical resource” pursuant to CEQA Guidelines Section 15064.5(a) or a “unique archaeological resource” pursuant to Public Resources Code Section 21083.2(g), the qualified archaeologist shall coordinate with the applicant and the City to develop a formal treatment plan that would serve to reduce impacts to the resources. The treatment plan established for the resources shall be in accordance with CEQA Guidelines Section 15064.5(f) for historical resources and Public Resources Code Sections 21083.2(b) for unique archaeological resources. Preservation in place (i.e., avoidance) is the preferred manner of treatment. If, in coordination with the City, it is determined that preservation in place is not feasible, appropriate treatment of the resource shall be developed by the qualified archaeologist in coordination with the City and may include implementation of archaeological data recovery excavations to remove the resource along with subsequent laboratory processing and analysis. Any archaeological material collected shall be curated at a public, non-profit institution with a research interest in the materials, if such an institution agrees to accept the material. If no institution accepts the archaeological material, they shall be donated to a local school, Tribe, or historical society in the area for educational purposes.</p> <p>K. As applicable, the final Phase 1 Inventory, Phase 2 Testing and Evaluation, or Phase 3 Data Recovery reports shall be submitted to the City prior to issuance of construction permit. Recommendations contained therein shall be implemented throughout all ground disturbance activities.</p>			
Geology and Soils			
4.5-1(a) Paleontological Procedures for Discretionary Projects			
<p>For all discretionary projects that involve excavation or grading activities at depths greater than previous disturbance on the respective site(s), prior to the start of construction, the following shall be conducted as discussed in detail below: prepare a resource assessment and records search for the presence of paleontological resources to determine if the project site is underlain by paleontological resources; monitor all excavation and grading activities in areas underlain by soils or geologic units potentially containing paleontological resources; and identify, record, and evaluate all paleontological resources uncovered during project construction and submit a</p>	<p>Applicant for individual project</p>	<p>DCP, OHR, LADBS</p>	<p>Prior to project approval: review and approve the paleontological resource assessment and records search, monitoring plan and worker education plan; condition project to comply with any</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>paleontological assessment report to the City for review and approval. In addition, during project construction, the following shall be conducted as discussed in detail below: cease all construction activities in the event of the discovery of paleontological resources; conduct fossil recovery as necessary by a qualified paleontologist; avoid handling of paleontological resources by parties other than the qualified paleontologist responsible for conducting fossil recovery; and resume construction activities only upon clearance by the qualified paleontologist. These procedures, as detailed below, shall be implemented to avoid impacts to paleontological resources or reduce potential impacts to a less-than-significant level:</p> <ul style="list-style-type: none"> • Prior to excavation and grading activities, a qualified paleontologist shall prepare a resource assessment and records search for the potential presence of paleontological resources. This assessment shall be informed by records from the Natural History Museum of Los Angeles County. • If the assessment determines the project site is underlain by soils or geologic units with a medium to high potential for containing paleontological resources, a qualified paleontologist shall prepare a monitoring plan, and worker education plan. The paleontologist's assessment and any required monitoring or required worker education plan shall be submitted to the City for review and approval prior to the commencement of construction activities. Any monitoring plan shall include requiring compliance with Mitigation Measure 4.5-1(d) for discovery, salvage and treatment. 			<p>monitoring plan or worker education plan</p>
4.5-1(b) Worker Environmental Awareness Program, Fossil Salvage, and Construction Monitoring			
<p>If required by cultural resources assessment under MM 4.5-1(a), prior to the start of construction, a paleontological monitor shall conduct training for construction personnel regarding the appearance of fossils and the procedures for notifying paleontological staff should fossils be discovered by construction staff, and notice that the identified qualified paleontologist is the only one authorized to handle paleontological find(s), including but not limited to collection and removal. Approved plans shall include statement of WEAP requirement.</p>	<p>Applicant for individual project</p>	<p>DCP, OHR</p>	<p>Prior to grading permits, obtain necessary assurances to ensure WEAP plan requirement are met; ensure plans show WEAP requirement</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
4.5-1(c) Construction Monitoring			
<p>If required pursuant to a monitoring plan prepared under MM 4.5-1(a), a paleontologist or designated paleontological monitor shall monitor ground disturbance activities, including the initial five feet below the ground surface, as areas with high paleontological sensitivity may contain resources at shallow depths and within the first five feet. If the paleontological monitor determines that full-time monitoring is no longer warranted, he or she may recommend that monitoring be reduced to periodic spot-checking or cease entirely. Monitoring shall be reinstated if any new or unforeseen deeper ground disturbances are required. After ground disturbing activities are completed, the paleontologist or designated monitor shall complete and submit a report to the City verifying compliance with the monitoring plan. Monitoring plan shall show on the plans.</p>	<p>Applicant for individual project</p>	<p>DCP, OHR</p>	<p>Prior to grading permits, obtain necessary assurances to ensure monitoring plan compliance, including compliance with mitigation measure 4.5-1(d) for discovery, salvage and treatment; ensure plans show monitoring plan requirements</p> <p>During all ground disturbing activities: monitor compliance</p> <p>Prior to building permit: obtain verification report</p>
4.5-1(d) Fossil Discovery, Salvage, and Treatment			
<p>All discretionary projects shall be subject to the following mitigation measure:</p> <p>Discovery. If paleontological resources are uncovered during construction activities (in either a previously disturbed or undisturbed area), all ground-disturbing activities in the area of the find shall cease until a qualified paleontologist has evaluated the find, and identified and prepared an appropriate mitigation plan, in accordance with federal, state, and local guidelines, Construction activities in the area of the discovery shall commence again only after the identified resource(s) are properly processed by a qualified paleontologist, and if construction activities are cleared by the qualified paleontologist to continue. If cleared by the qualified paleontologist, construction activity may continue unimpeded on other portions of the project site that would not affect evaluation or recovery of the identified resource(s).</p> <p>Fossil Salvage and Treatment. The qualified paleontologist or designated paleontological monitor shall recover intact fossils consistent with the mitigation plan and notify the City of any fossil salvage and recovery efforts. Typically, fossils can be safely salvaged quickly by a single paleontologist and not disrupt construction activity. In some cases, larger fossils (such as complete skeletons or large mammal fossils) require more extensive</p>	<p>Applicant for individual project</p>	<p>DCP, OHR</p>	<p>Prior to project approval: condition project to comply with requirement and obtain necessary assurances to ensure compliance</p> <p>Prior to grading permit: verify site plan shows requirement and obtain necessary assurances</p> <p>During fossil salvage: monitor compliance</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>excavation and longer salvage periods. In this case the paleontologist shall have the authority to temporarily direct, divert or halt construction activity to ensure that the fossil(s) can be removed in a safe and timely manner. Any fossils shall be handled and deposited consistent with a mitigation plan prepared by the paleontological monitor. The qualified paleontologist shall prepare a report according to current professional standards including those of the SVP that describes the resource, how it was assessed, and disposition. The report shall be submitted to the City.</p> <p>The requirements in this mitigation measure shall be shown on plans.</p>			
Hazards and Hazardous Materials			
4.7-2a Environmental Site Assessment			
<p>(1) Applicability Threshold. Discretionary projects that require grading, excavation, or building permit from LADBS and which meet the criteria below shall comply with the standard in (2):</p> <ul style="list-style-type: none"> • Located on or within 500 feet of a Hazardous Material site listed on the following databases: <ul style="list-style-type: none"> • SWRCB GeoTracker (refer to https://geotracker.waterboards.ca.gov); • DTSC EnviroStor (refer to https://www.envirostor.dtsc.ca.gov/public); • DTSC Hazardous Waste Tracking System (refer to https://hwts.dtsc.ca.gov); • LAFD Certified Unified Program Agency (refer to the active, inactive, and historical inventory lists at https://www.lafd.org/fire-prevention/cupa/public-records); • Los Angeles County Fire Department Health Hazardous Materials Division (refer to the active and inactive facilities, site mitigation, and California Accidental Release Prevention inventory lists at https://fire.lacounty.gov/public-records-requests); • SCAQMD Facility Information Detail (refer to https://xappprod.aqmd.gov/find); or 	<p>Applicant for individual project</p>	<p>DCP, LADBS, Los Angeles Fire Department (LAFD)</p>	<p>Prior to project approval or prior to grading permits: review and approve the Phase I Environmental Site Assessment (ESA), if no Recognized Environmental Conditions (REC), no further documentation required</p> <p>If the Phase I ESA identifies a REC and/or if recommended in the Phase I ESA, a Phase II ESA shall also be reviewed for approval</p> <p>If Phase II indicates the need for remediation submit remediation plan to DBS and regulatory agency/agencies as appropriate. <ul style="list-style-type: none"> • Located on or within 500 feet of a Hazardous Materials site designated as a RCRA Small Quantity Generator or Large Quantity Generator (refer to the USEPA Envirofacts database at https://enviro.epa.gov/index.html); or • Located on an Oil Drilling District or located on or within 50 feet of a property identified as having an oil well or an oil field (active or inactive) by CalGEM (refer to https://www.conservation.ca.gov/calgem/Pages/WellFinder.aspx); or • Located on any land currently or previously designated with an industrial use class or industrial zoning; or • Located on land currently or previously used for a gas station or dry-cleaning facility. <p>Or:</p> <ul style="list-style-type: none"> • The Applicant or Owner are aware or have reason to be aware that the Project site was previously used for an industrial use, gas station, or dry-cleaner, or otherwise is contaminated with hazardous substances. <p>And:</p> <ul style="list-style-type: none"> • The site has not been previously remediated to the satisfaction of the relevant regulatory agency/agencies for any contamination associated with the above uses or conditions. <p>(2) A Phase I Environmental Site Assessment (ESA) shall be prepared by a Qualified Environmental Professional in accordance with State standards/guidelines and current professional standards, including the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments, to evaluate whether the site, or the surrounding area, is contaminated with hazardous substances from any past or current land uses, including contamination related to the storage, transport, generation, or disposal of toxic or Hazardous Waste or materials.</p> <p>If the Phase I ESA identifies a Recognized Environmental Condition (REC) and/or if recommended in the Phase I ESA, a Phase II ESA shall also be prepared by a Qualified Environmental Professional. The Phase I and/or Phase II ESAs shall be maintained by the Applicant and Owner and made available for review and inclusion in the case file, as applicable, by the appropriate regulatory agency, such as the SWRCB, DTSC, or LAFD Hazard Mitigation Program. Any remediation plan recommended in the Phase II ESA or by the appropriate regulatory agency shall be implemented and, if required, a No Further Action letter shall be issued by the appropriate regulatory agency prior to issuance of any</p>			<p>remediation shall be submitted to the DBS</p> <p>If oversight or approval by a regulatory agency is not required, review and approve the verification of compliance with and completion of the remediation plan</p> <p>If needed, verify that a No Further Action letter is submitted to LADBS</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>permit from LADBS, unless the regulating agency determines that remedial action can be implemented in conjunction with excavation and/or grading. If oversight or approval by a regulatory agency is not required, the Qualified Environmental Professional shall provide written verification of compliance with and completion of the remediation plan, such that the site meets the applicable standards for the proposed use, which shall be maintained by the Applicant and Owner.</p>			
4.7-2b Site Remediation and Health and Safety Plan			
<p>For discretionary projects that require site remediation under MM-HAZ 4.7-2a, if contaminants of concern (COCs) are detected above regulatory action levels, the project applicant shall retain a qualified environmental consultant to prepare a Soil Management Plan (SMP). If the project is under regulatory oversight, the SMP shall be submitted to appropriate agencies (such as SCAQMD, DTSC or others) for review and approval prior to the commencement of excavation and grading activities. The SMP shall be implemented during excavation and grading activities associated with the project to ensure that contaminated soils are properly identified, excavated, and disposed of off-site, as follows:</p> <ul style="list-style-type: none"> • The SMP shall be prepared and executed in accordance with South Coast Air Quality Management District (SCAQMD) Rule 1166, Volatile Organic Compound Emissions from Decontamination of Soil. The SMP shall require the timely testing and sampling of soils so that contaminated soils can be separated from inert soils for proper disposal. The SMP shall specify the testing parameters and sampling frequency. During excavation, Rule 1166 requires that soils identified as contaminated shall be sprayed with water or another approved vapor suppressant or covered with sheeting during periods of inactivity of greater than an hour, to prevent contaminated soils from becoming airborne. Under Rule 1166, contaminated soils shall be transported from the Project Site by a licensed transporter and disposed of at a licensed storage/treatment facility to prevent contaminated soils from becoming airborne or otherwise released into the environment. • During the project’s excavation phase, the applicant shall remove and properly dispose of impacted materials in accordance with the provisions of the SMP. If soil is stockpiled prior to disposal, it will be managed in accordance with the Project’s Storm Water Pollution Prevention Plan, prior to its transfer for treatment and/or 	<p>Applicant for individual project</p>	<p>DCP, LADBS</p>	<p>Prior to issuance of grading permit: review and approve the Soil Management Plan; if applicable, verification that appropriate regulatory agency has determined that further remedial action is not required</p> <p>Prior to issuance of building permit: review and approve the Health and Safety plan</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>disposal. All impacted soils would be properly treated and disposed of in accordance with SCAQMD Rule 1166.</p> <ul style="list-style-type: none"> The project applicant shall commission a site-specific Health and Safety Plan (HASP) to be prepared in compliance with Occupational Safety and Health Administration (OSHA) Safety and Health Standards (29 Code of Federal Regulations 1910.120) and Cal-OSHA requirements (CCR Title 8, General Industry Safety Orders and California Labor Code, Division 5, Part 1, Sections 6300-6719) and submitted for review by the Department of Building and Safety. The HASP shall address, as appropriate, safety requirements that will serve to avoid significant impacts or risks to workers or the public. The HASP shall include emergency contact numbers, maps to the nearest hospital, gas monitoring action levels, gas response actions, allowable worker exposure times, and mandatory personal protective equipment requirements. The HASP shall be signed by all workers involved in the activities associated with the investigation to demonstrate their understanding of the risks of excavation. <p>If remediation is determined to be necessary, the grading permit shall not be issued until the applicable regulatory agency has indicated that further remedial action is not required.</p>			
Hydrology and Water Quality			
4.8-1 Drainage Pattern Alterations and Flood Control			
<p>For any development project that the City has determined based on an expert study will impede or redirect flood flows even with compliance with existing regulations and RCMS, the project shall develop and implement a project-specific Stormwater Pollution Prevention Plan (SWPPP) for compliance with the Clean Water Act’s National Pollutant Discharge Elimination System (NPDES) program. The purpose of the SWMP, similar to the SWPPP, is to maintain during construction and operations the existing drainage patterns of the site and vicinity to the maximum extent feasible, to avoid downstream impacts associated with flooding or water quality degradation from ground disturbance during construction. To address the potential for long-term drainage pattern alterations associated with the placement of future development projects in areas where no development is currently present, the SWMP must also include operational and maintenance BMPs; such BMPs may include but would not be limited to the upkeep of</p>	<p>Applicant for individual projects</p>	<p>DCP, DPW</p>	<p>Prior to issuance of grading permit: review and approve the project specific Stormwater Pollution Prevention Plan</p>

landscaped/vegetated swales to dissipate stormwater runoff, or the maintenance (dredging and disposal of accumulated materials) of detention basins placed to capture stormwater runoff resulting from the project.			
Noise			
4.10-1(a) Noise Shielding and Silencing			
<p>For all discretionary projects, power construction equipment (including combustion engines), fixed or mobile, shall be equipped with noise shielding and silencing devices consistent with manufacturer’s standards or the Best Available Control Technology. Equipment shall be properly maintained, and the Project Applicant or Owner shall require any construction contractor to keep documentation on-site during any earthwork or construction activities demonstrating that the equipment has been maintained in accordance with manufacturer’s specifications. Measure shall be shown on plans.</p>	Applicant for individual projects	DCP, LADBS	<p>Prior to project approval: condition project to comply with measures and to provide necessary assurances to ensure compliance</p> <p>Prior to building permits (including grading, demolition): ensure that requirement shows on plans and necessary assurances are obtained</p> <p>During construction: field verify that power construction equipment includes noise shielding and silencing devices</p>
4.10-1(b) Use of Driven Pile Systems			
<p>For all discretionary projects, driven (impact), sonic, or vibratory pile drivers shall not be used, except in locations where the underlying geology renders alternative methods infeasible, as determined by a soils or geotechnical engineer and documented in a soils report. Requirement shall show on plans.</p>	Applicant of individual project	DCP, LADBS	<p>Prior to grading permits: ensure that requirement shows on plans and necessary assurances have been obtained.</p> <p>During construction: field verify that driven, sonic or vibratory pile drivers are avoided</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
4.10-1(c) Enclosures and Screening			
<p>For all discretionary projects, all outdoor mechanical equipment shall be enclosed or screened from off-site noise-sensitive uses. The equipment enclosure or screen shall be impermeable (i.e., solid material with minimum weight of 2 pounds per square feet) and break the line-of-sight from the equipment and off-site noise-sensitive uses.</p>	<p>Applicant of individual project</p>	<p>DCP, LADBS</p>	<p>Prior to project approval: condition project to comply with measures</p> <p>Prior to building permits: ensure mechanical equipment is enclosed or screened</p> <p>During construction: field verify that all outdoor mechanical equipment are screened or enclosed</p>
4.10-1(d) Construction Staging Areas			
<p>Construction staging areas shall be located as far from noise-sensitive uses as reasonably possible and feasible in consideration of site boundaries, topography, intervening roads and uses, and operational constraints. Requirement shall show on plans.</p>	<p>Applicant of individual project</p>	<p>DCP, LADBS</p>	<p>Prior to project approval: condition project to comply with measures and to provide necessary assurances to ensure compliance</p> <p>Prior to building permits (including grading, demolition): ensure that requirement shows on plans and necessary assurances are obtained</p> <p>During construction: field verify that construction staging areas are located far from noise sensitive uses when possible and feasible.</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
4.10-1(e) Temporary Sound Barriers			
<p>Sound barriers, such as temporary walls or sound blankets, shall be erected between construction activities and noise-sensitive uses when construction activities are located within a line-of-sight to and within 500 feet of noise-sensitive uses. Requirement shall show on plans.</p>	<p>Applicant of individual project</p>	<p>DCP, LADBS</p>	<p>Prior to project approval: condition project to comply with measures and to provide necessary assurances to ensure compliance</p> <p>Prior to building permits (including grading, demolition): ensure that requirement shows on plans and necessary assurances are obtained</p> <p>During construction: field verify that sound barriers between construction activities and noise-sensitive uses are provided</p>
4.10-1(f) Project-Specific Construction Noise Study			
<p>A Construction Noise Study, prepared by a qualified noise expert to meet the requirements herein, shall be required for discretionary projects in the City located within 500 feet of noise-sensitive land uses and that have one or more of the following characteristics:</p> <ul style="list-style-type: none"> • Two or more subterranean levels or 20,000 cubic yards or more of excavated material; • Construction duration (excluding architectural coatings) of 18 months or more; • Use of large, heavy-duty equipment rated 300 horsepower or greater; or • The potential for impact pile driving. <p>The Construction Noise Study shall characterize sources of construction noise, quantify noise levels at noise-sensitive uses (e.g., residences, transient lodgings, schools, libraries, churches [or other places of assembly], hospitals, nursing homes, auditoriums, concert halls, amphitheaters, playgrounds, and parks), and identify measures to reduce noise exposure. The Construction Noise Study shall identify reasonably available noise reduction devices or techniques to reduce noise levels to acceptable levels and/or</p>	<p>Applicant of individual project</p>	<p>DCP, LADBS</p>	<p>Prior to project approval: review and approve the Construction Noise Study identifying any required mitigation; condition project to comply with noise reduction measures in the Study and provide necessary assurances to ensure compliance</p> <p>Prior to issuance of building permit: obtain necessary assurances for compliance with noise reducing measures</p> <p>During construction: field verify that compliance with mitigation</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p> durations including through reliance on any relevant federal, state or local standards or guidelines or accepted industry practices, and in compliance with LAMC standards. Noise reduction devices or techniques may include but not be limited to mufflers, shields, sound barriers, and time and place restrictions on equipment and activities. Each measure in the Construction Noise Study shall identify anticipated noise reductions at noise-sensitive land uses.</p> <p> Project Applicants shall be required to comply with all requirements of Mitigation Measures 4.10-1(a) through 4.10-5(e) in addition to any additional requirements identified and recommended by the Construction Noise Study and shall maintain proof that notice of, as well as compliance with, the identified measures have been included in contractor agreements.</p>			<p> plan from Construction Noise Study</p>
4.10-2 Project-Specific Operational Noise Study			
<p> A Noise Study, prepared by a qualified noise expert to meet the requirements herein, shall be required for all discretionary housing developments with roof decks and/or pool decks in the City of Los Angeles concurrent with Design Review and prior to the approval of building permits. The Noise Study shall include:</p> <ul style="list-style-type: none"> • Description of pertinent noise regulations. • Analysis of operational noise generated by the project’s roof decks and/or pool decks to noise-sensitive land uses. • Comparison of noise levels to applicable City thresholds, such as if the project’s operational noise would exceed 3 dBA in an unacceptable land use category or 5 dBA in an acceptable land use category per the City’s land use compatibility guidelines included in the City of Los Angeles General Plan Noise Element. • If project noise would exceed City thresholds, identification of mitigation measures to reduce noise to below 3dBA in an unacceptable land use category or 5 dBA in an acceptable land use category to the extent feasible. Mitigation measures may include, but would not be limited to, operational restrictions, sound dampening equipment, or sound walls. • Each mitigation measure in the Noise Study shall identify anticipated noise reductions at noise-sensitive land uses. 	<p> Applicant of individual project</p>	<p> DCP, LADBS</p>	<p> Prior to project approval; review and approve the Noise Study, condition compliance with any mitigation measures and providing necessary assurances to ensure compliance</p> <p> Prior to building permits: ensure mitigation measures are on plans and obtain necessary assurances</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<ul style="list-style-type: none"> Applicant/owners shall comply with the mitigation plan and include the measures in construction contracts. Mitigation plan shall be included on plans. 			
4.10-3(a) Vibration Control Plan			
<p>For construction activity for discretionary projects involving vibratory rollers or sonic pile drivers within 50 feet of an extremely fragile building (non-engineered masonry) or historical resource (designated or in SurveyLA or other City recognized survey), the Applicant shall prepare a Vibration Control Plan. The Vibration Control Plan requirement shall also apply to use of impact pile drivers within 140 feet of extremely fragile buildings or historical resources or residential structures. The Vibration Control Plan shall be prepared by a licensed structural engineer and shall include methods to minimize vibration, including, but not limited to:</p> <ul style="list-style-type: none"> Use of drilled piles or similar method rather than impact pile driving Use of rubber-tired equipment rather than metal-tracked equipment Avoiding the use of vibrating equipment when allowed by best engineering practices <p>The Vibration Control Plan shall include a pre-construction survey letter establishing baseline conditions at potentially affected extremely fragile buildings/historical resources. The survey letter shall provide a shoring design to protect the extremely fragile buildings/historical resources from potential damage. At the conclusion of vibration causing activities, the qualified structural engineer shall issue a follow-up letter describing damage, if any, to impacted buildings. The letter shall include recommendations for any repair, as may be necessary, in conformance with the Secretary of the Interior Standards. Repairs shall be undertaken and completed by the Contractor and monitored by a qualified structural engineer in conformance with all applicable codes including the California Historical Building Code (Part 8 of Title 24).</p> <p>A Statement of Compliance, in a form approved by the City, committing the Applicant and Owner to complying with the measure shall be signed by the Applicant and Owner is required to be submitted to the Los Angeles Department of Building and Safety (LADBS) at plan check and prior to the issuance of any permit. The Vibration Control Plan, prepared as outlined above shall be documented by a qualified structural engineer, and</p>	<p>Applicant of individual project</p>	<p>DCP, LADBS</p>	<p>Prior to project approval or grading permit: review and approve Vibration Control Plan or condition project to prepare Vibration Control Plan and provide necessary assurances to ensure compliance</p> <p>Prior to issuance of grading permit: review and approve the Vibration Control Plan and/or obtain necessary assurances; Vibration Control Plan showing on the plans</p> <p>During construction; monitoring</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
shall be provided to the City upon request. Vibration Control Plan shall show on the plans.			
4.10-3(b) Vibration Mitigation			
<p>For all discretionary projects:</p> <ul style="list-style-type: none"> Impact pile drivers shall be avoided to eliminate excessive vibration levels. Drilled piles or similar methods are alternatives that shall be utilized where geological conditions permit their use. Construction activities shall involve rubber-tired equipment rather than metal-tracked equipment. <p>The construction contractor shall manage construction phasing (scheduling demolition, earthmoving, and ground-impacting operations so as not to occur in the same time period), use low-impact construction technologies, and shall avoid the use of vibrating equipment when allowed by best engineering practices.</p> <p>Requirement to be on plans.</p>	Applicant of individual project	DCP, LADBS	<p>Prior to project approval: condition project to comply with measures and to provide necessary assurances to ensure compliance</p> <p>Prior to building permits (including grading, demolition): ensure that requirement shows on plans and necessary assurances are obtained</p> <p>During construction: verify that vibrating equipment is avoided</p>
Public Services			
4.12-1(a) Design Plans Review			
<p>For discretionary projects with more than 300 housing units or located in VHFHSZ or SRA areas and where LAFD finds it necessary on the basis that existing regulations are not adequate to avoid risk of fire based on unusual site-specific, area, roadway or project characteristics, prior to the start of construction, design plans shall be submitted to the LAFD that demonstrate the use of construction and design features that reduce fire potential and/or promote containment, including increased spacing between buildings, noncombustible roofs, fire-resistant landscaping, and special irrigation facilities. Design features shall be reviewed and approved by the LAFD prior to project approval.</p> <p>Upon completion of project construction, a diagram of each portion of the property, including access routes and any additional information that might facilitate fire and emergency medical response, shall be submitted to the LAFD.</p>	Applicant of individual project	DCP, LAFD	<p>Prior to project approval: condition project to submit design plans to LAFD; condition project to provide necessary assurances to ensure compliance</p> <p>Prior to issuance of building permit: review and approve design plans; obtain necessary assurances</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
4.12-1(b) Emergency Access			
<p>For discretionary projects with more than 300 units or located in VHFHSZ or SRA areas and where LAFD finds it necessary on the basis that existing regulations are not adequate to avoid risk of fire based on unusual site-specific, area, roadway or project characteristics, during demolition and construction of discretionary projects, access roads and alleyways shall remain clear and unobstructed in order to ensure access for emergency vehicles. If road closures during construction are necessary, prior to the issuance of a building permit for the discretionary project, a detailed Construction Management Plan including street closure information, a detour plan, haul routes, and a staging plan, shall be prepared and submitted to the Los Angeles Fire Department and the Los Angeles Department of Transportation for review and approval.</p> <p>Furthermore, if emergency access gates are provided on a project access road, the gates shall be equipped with approved locking devices for both Los Angeles City and County Fire Departments on both sides of the gate. Signs shall be provided on the project access road.</p>	Applicant of individual project	DCP, LAFD, Los Angeles Department of Transportation (LADOT)	<p>Prior to project approval: review and approve Construction Management Plan or condition project to provide Construction Management Plan; condition project to provide necessary assurances.</p> <p>Prior to issuance of building permit: review and approve the Construction Management Plan with construction road closure details; obtain necessary assurances</p>
4.12-1(c) Hillside Fire/Vegetation Management Plan			
<p>For discretionary projects with more than 300 units or located in VHFHSZ or SRA areas and where LAFD finds it necessary on the basis that existing regulations are not adequate to avoid risk of fire based on unusual site-specific, area, roadway or project characteristics, projects shall have a 200-foot minimum Fuel Management Zone in place, and it shall be cleared annually, around each structure on the project site. A Fire/Vegetation Management Plan for the Fuel Management Zone shall be prepared that requires the following: all-natural vegetation will be thinned out by 70 percent and all dead vegetation, including grass will be maintained at less than four inches in height; if the zone is not irrigated, the area may be covered with chipped biomass four inches deep; no tree limb shall be within 10 feet of a chimney, including outdoor barbeques; trees must be maintained free of dead branches; trees must be limbed up four feet or 1/3 the height of the tree; trees over driveways or roads must be limbed up to 15 feet; the shrub height limit is two feet.</p>	Applicant of individual project	DCP, LAFD	<p>Prior to project approval: approve Fire/Vegetation Management Plan or condition project to provide Fire/Vegetation Management Plan and provide necessary assurances to ensure compliance</p> <p>Prior to issuance of building permit: review and approve the Fire/Vegetation Management Plan; obtain necessary assurances</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>Furthermore, the following requirements shall be included in the Fire/Vegetation Management Plan. The following shrubs and trees are highly flammable and shall not be planted on or around the project site:</p> <ul style="list-style-type: none"> • Sage species (<i>Salvia</i> spp.) • Pampas grass (<i>Cortaderia</i> spp.) • Cypress (<i>Cupressus</i> spp.) • Eucalyptus (<i>Eucalyptus</i> spp.) • Juniper (<i>Juniperus</i> spp.) • Pine (<i>Pinus</i> spp.) • Cedar (<i>Cedrus</i> spp.) <p>The following shrubs and trees shall be used for general landscaping to reduce fire hazard associated with flammable vegetation:</p> <ul style="list-style-type: none"> • Coastal live oak (<i>Quercus</i> spp.) • California sycamore (<i>Platanus racemosa</i>) • Cottonwood (<i>Populus fremontii</i>) • Willow (<i>Salix</i> spp.) • Mulefat (<i>Baccharis salicifolia</i>) • California bay (<i>Umbellularia californica</i>) • California black walnut (<i>Juglans californica</i>) • Liquidambar (<i>Liquidambar styraciflua</i>) • California lilac (<i>Ceanothus</i> spp.) • Toyon (<i>Heteromeles arbutifolia</i>) • Mountain mahogany (<i>Cercocarpus betuloides</i>) • Holly leaf cherry (<i>Prunus ilicifolia</i>) • Dwarf periwinkle (<i>Vinca minor</i>) • Grass (<i>Stipa</i> spp.) <p>The Fire/Vegetation Management Plan shall be reviewed and approved by the City of Los Angeles Fire Department prior to project approval.</p>			

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
4.12-1(d) Submittal of Plot Plan			
<p>For discretionary projects with more than 300 units or located in VHFHSZ or SRA areas and where LAFD finds it necessary on the basis that existing regulations are not adequate to avoid risk of fire based on unusual site-specific, area, roadway or project characteristics, submittal of a plot plan for approval by the LAFD shall be required. The plot plan shall include the following minimum design features: fire lanes, where required, shall be a minimum of 20 feet in width; all structures must be within 300 feet of an approved fire hydrant, and entrances to any dwelling unit or guest room shall not be more than 150 feet in distance in horizontal travel from the edge of the roadway of an improved street or approved fire lane. In addition, the following recommendations by the LAFD relative to fire safety may be incorporated into the building plans:</p> <ul style="list-style-type: none"> • Access for Fire Department apparatus and personnel to and into all structures shall be required. • The entrance to a residence lobby must be within 50 feet of the desired street address curb face. • Where above ground floors are used for residential purposes, the access requirement shall be interpreted as being the horizontal travel distance from the street, driveway, alley, or designated fire lane to the main entrance of individual units. • The entrance or exit of all ground dwelling units shall not be more than 150 feet from the edge of a roadway of an improved street, access road, or designated fire lane. No building or portion of a building shall be constructed more than 150 feet from the edge of a roadway of an improved street, access road, or designated fire lane. • The Fire Department may require additional vehicular access where buildings exceed 28 feet in height. • Building designs for multi-storied residential buildings shall incorporate at least one access stairwell off the main lobby of the building; but, in no case greater than 150 feet horizontal travel distance from the edge of the public street, private street or Fire Lane. This stairwell shall extend unto the roof. • Entrance to the main lobby shall be located off the address side of the building. 	<p>Applicant of individual project</p>	<p>DCP, LAFD, LADBS</p>	<p>Prior to project approval: require plot plan to be submitted to LAFD</p> <p>Prior to building permit: review and approve the plot plan</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<ul style="list-style-type: none"> • Any required Fire Annunciator panel or Fire Control Room shall be located within 50 feet of the visual line of site of the main entrance stairwell or to the satisfaction of the Fire Department. • Where rescue window access is required, provide conditions and improvements necessary to meet accessibility standards as determined by the Los Angeles Fire Department. • Fire lane width shall not be less than 20 feet. When a fire lane must accommodate the operation of Fire Department aerial ladder apparatus or where fire hydrants are installed, those portions shall not be less than 28 feet in width. • The width of private roadways for general access use and fire lanes shall not be less than 20 feet, and the fire lane must be clear to the sky. • Fire lanes, where required, and dead ending streets shall terminate in a cul-de-sac or other approved turning area. No dead ending street or fire lane shall be greater than 700 feet in length or secondary access shall be required. • Submit plot plans indicating access road and turning area for Fire Department approval. • Adequate public and private fire hydrants shall be required. • Standard cut-corners will be used on all turns. • Any roof elevation changes in excess of three feet may require the installation of ships ladders. The Fire Department may require additional roof access via parapet access roof ladders where buildings exceed 28 feet in height, and when overhead wires or other obstructions block aerial ladder access. • All parking restrictions for fire lanes shall be posted and/or painted prior to any Temporary Certificate of Occupancy being issued. • Plans showing areas to be posted and/or painted "FIRE LANE NO PARKING" shall be submitted and approved by the Fire Department prior to building permit application sign-off. • Electric Gates approved by the Fire Department shall be tested by the Fire Department prior to Building and Safety granting a Certificate of Occupancy. • All new buildings shall have approved radio coverage for emergency responders within the building based upon the existing coverage levels of the public safety 			

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>communication systems of the jurisdiction at the exterior of the building. This section shall not require improvement of the existing public safety communication systems.</p> <ul style="list-style-type: none"> • Helicopter landing facilities are required on all high-rise buildings in the City in accordance with the recently revised Fire Protection Bureau Requirement 10. • Each standpipe in a new high-rise building shall be provided with two remotely located fire department connections (FDCs) for each zone in compliance with NFPA 14-2013, Section 7.12.2. 			
4.12-2(a) Crime Prevention Unit Consultation			
<p>For a discretionary project with more than 300 units or on a project site of more than 10 acres, the project applicant shall consult with the Los Angeles Police Department’s Crime Prevention Unit regarding the incorporation of crime prevention features appropriate for the design of the project, including applicable features in the Los Angeles Police Department’s Design Out Crime Guidelines. The crime prevention features recommended by the Los Angeles Police Department’s Crime Prevention Unit and agreed to by the project applicant during consultation shall be made part of the project. The plans shall incorporate the design guidelines relative to security, semipublic and private spaces, which may include but not be limited to access control to building, secured parking facilities, walls/fences with key systems, well-illuminated public and semi-public space designed with a minimum of dead space to eliminate areas of concealment, location of toilet facilities or building entrances in high-foot traffic areas, and provision of security guard patrol throughout the project site if needed. These measures shall be approved by the Police Department prior to the issuance of building permits.</p>	<p>Applicant of individual project</p>	<p>LADBS, Los Angeles Police Department (LAPD)</p>	<p>Prior to project approval: require applicant to consult with police department and condition project to comply with crime prevention features recommended by LAPD; or condition project applicant to consult with LAPD prior to building permits and provide necessary assurances to ensure compliance</p> <p>Prior to issuance of building permit: review project and provide consultation for crime prevention measures; obtain assurances</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
4.12-2(b) Security During Construction			
<p>During construction of discretionary projects with more than 300 units or with more than 10 acres, private security personnel shall monitor vehicle and pedestrian access to the construction areas and patrol the project site, construction fencing with gated and locked entry shall be installed around the perimeter of the construction site, and security lighting shall be provided in and around the construction site.</p> <p>Furthermore, temporary construction fencing shall be placed along the periphery of the active construction areas to screen as much of the construction activity from view at the local street level and to keep unpermitted persons from entering the construction area. Low-level security lighting, and locked entry (e.g., padlock gates or guard-restricted access) shall be provided to limit access by the general public. Regular security patrols during non-construction hours shall also be provided. During construction activities, the contractor shall document the security measures; and the documentation shall be made available to the construction monitor.</p>	Applicant of individual project	DCP, LADBS	<p>Prior to project approval: condition project to comply with measure and provide necessary assurances to ensure compliance</p> <p>Prior to building permit: obtain necessary assurances</p> <p>During construction: review and approve documentation of security measures to construction monitor</p>
Transportation			
4.14-1 Construction Management Plan			
<p>Any discretionary project that LADOT determines will have potential impacts to the circulation system even with application of existing regulatory compliance measures, shall prepare a detailed Construction Management Plan (CMP), including street closure information, detour plans, haul routes, and staging plans shall be prepared and submitted to LADOT for review and approval. The Construction Management Plan will formalize how construction would be carried out and identify specific actions that would be required to reduce effects on the surrounding community. The Construction Management Plan shall be based on the nature and timing of the specific construction activities and other projects in the vicinity of the Project Site, and shall include those elements required by LADOT for the project, which may include but are not limited to the following:</p> <ul style="list-style-type: none"> • Providing for temporary traffic control during all construction activities adjacent to public right of way to improve traffic flow on public roadways (e.g., flag men) • Prohibition of construction worker parking on any adjacent residential streets 	Applicant of individual project	DCP; LADOT; LADBS	<p>Prior to project approval: review and approve construction management plan or condition project to provide construction management plan and provide necessary assurances to ensure compliance</p> <p>Prior to issuance of building permit: review and approve Construction Management Plan; obtain necessary assurances</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<ul style="list-style-type: none"> • Encouragement of carpool/vanpool of workers • Prohibitions on construction-related vehicles parking on surrounding public streets • Prohibitions on construction equipment or material deliveries within the public right-of-way • Accommodation of all equipment on site as feasible • Provisions for temporary traffic control during all construction activities adjacent to public right-of-way to improve traffic flow on public roadways (e.g., flag men) • Scheduling of construction activities, including deliveries, to reduce the effect on peak hour traffic flow on surrounding arterial streets • Rerouting of construction trucks to reduce travel on congested streets to the extent feasible • Provisions of safety precautions for pedestrians and bicyclists through alternate routing and protection barriers and signage • Provisions to accommodate the staging and storage of equipment • Scheduling of construction-related deliveries to reduce travel during commuter peak hours • Obtain necessary permits for any truck hauling from the City prior to issuance of any permit for the project. • Noticing and coordination with any nearby schools that may be affected by construction activities, including deliveries, hauling and other construction transportation, to ensure safety of school children. • Ensuring all feasible safety measures are taken to accommodate safe travel of pedestrian, bicyclists, and other users of the sidewalks around the construction site, including but not limited through the following measures: <ul style="list-style-type: none"> • Construction staging as to maintain pedestrian access on adjacent sidewalks throughout all construction phases. • Maintaining adequate and safe pedestrian protection, including physical separation (including utilization of barriers such as K-Rails or scaffolding, etc.) from work space and vehicular traffic and overhead protection, due to sidewalk closure or blockage, at all times. 			

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<ul style="list-style-type: none"> • Providing temporary pedestrian facilities adjacent to the Project Site and provide safe, accessible routes that replicate as nearly as practical the most desirable characteristics of the existing facility. • Covered walkways shall be provided where pedestrians are exposed to potential injury from falling objects. • Keeping sidewalk open during construction until only when it is absolutely required to close or block sidewalk for construction staging. • Reopening the sidewalk as soon as reasonably feasible taking construction and construction staging into account. 			
4.14-2 Transportation Demand Management Program			
<p>If a discretionary project will have significant impacts to VMT under LADOT Transportation Assessment Guidelines, the Applicant shall prepare a TDM program to reduce VMT impacts below the City’s project threshold to the extent feasible. TDM program elements could include measures such as unbundled parking although the exact measures will be determined when the plan is prepared. The City of Los Angeles requires that the TDM plan be prepared during construction, with the final TDM plan approved by LADOT prior to the City’s issuance of the certificate of occupancy for the Project. Implementation of the TDM plan occurs after building occupancy. TDM measures shall include but not be limited to the following examples:</p> <p>TDM strategies applicable for the residential component:</p> <p>Unbundled Parking—Unbundling parking typically separates the cost of purchasing or renting parking spaces from the cost of purchasing or renting a dwelling unit. Saving money on a dwelling unit by forgoing a parking space acts as an incentive that minimizes auto ownership. Similarly, paying for parking (by purchasing or leasing a space) acts as a disincentive that discourages auto ownership and trip-making.</p> <p>TDM strategies applicable if the project includes an office component:</p> <p>Required Commute Trip Reduction Program—This strategy involves the development of an employee-focused travel behavior change program that targets individual attitudes, goals, and travel behaviors, educating participants on the impacts of their travel choices and the opportunities to alter their habits. The program typically includes elements such as a coordinated ride-sharing or carpooling program, vanpool program, alternative work</p>	<p>Applicant of individual project</p>	<p>LADOT, DCP, LADBS</p>	<p>Prior to project approval: condition project to provide a TDM plan and provide necessary assurances to ensure compliance</p> <p>Prior to building permit: obtain necessary assurances</p> <p>During construction: review and approve the TDM plan</p> <p>Prior to issuance of Certificate of Occupancy: review and approve final TDM plan</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<p>schedule program, preferential carpool parking, guaranteed ride home service, and a program coordinator. The program requires the development of metrics to evaluate success, program monitoring, and regular reporting.</p> <p>TDM strategies applicable for both the office and residential components:</p> <p>Promotions and Marketing—This strategy involves the use of marketing and promotional tools to educate and inform travelers about site-specific transportation options and the effects of their travel choices. This strategy includes passive educational and promotional materials, such as posters, info boards, or a website with information that a traveler could choose to read at their own leisure. It can also include more active promotional strategies such as gamification.</p>			
Tribal Cultural Resources			
4.15-1(a) Native American Consultation and Monitoring for Discretionary Projects			
<p>All discretionary projects that involve ground disturbing activities in previously undisturbed soils, shall prepare a cultural resources assessment and do a record search with a study area of no less than 0.5 mile around the project area. Projects conducted in culturally and historically sensitive areas, as determined by a Qualified Archaeologist meeting the Secretary of the Interior’s Professional Qualification Standards for Archaeologist, should include a record search with a study area of no less than 1 mile around the project area.</p> <p>Notification shall be provided to California Native American tribes that are traditionally and culturally affiliated with the geographic area of the project site and have submitted a written request to the Department of City Planning to be notified of proposed projects in that area. Should projects have potential to impact cultural resources, as determined during the environmental assessment or Tribal consultation, a Cultural Resources Monitoring Program (CRMP) shall be prepared by Qualified Archaeologist, in consultation with all interested Tribes, prior to the commencement of any and all ground-disturbing activities for the Project, including any archaeological testing. The CRMP shall include compliance with 4.15-1(b) and will provide details regarding the process for in-field treatment of inadvertent discoveries and the disposition of inadvertently discovered non-funerary resources and shall be consistent with the treatment of unique archaeological resources in PRC 21083.2.</p>	Applicant of individual project	DCP, LADBS	<p>Prior to project approval: review and approve cultural resource assessment report and verify that notification to applicable tribes is provided; if potential impact to cultural resources, review and approve the Cultural Resources Monitoring program; condition project to comply with monitoring program and to provide adequate assurances to ensure compliance</p> <p>During ground disturbing activities: monitor</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
4.15-1(b) Discovery of Potential Tribal Cultural Resources			
<p>In the event that Tribal Cultural Resources are discovered during Project activities, whether or not a tribal monitor is present, and there is no CRMP or the CRMP does not cover treatment of inadvertent discovery, all work within a 50-foot buffer of the find shall cease and a Qualified Archaeologist meeting the Secretary of the Interior’s Professional Qualification Standards for Archaeology shall assess the find. Tribes that are culturally and historically affiliated with the Project area and have requested consultation shall be notified, should any potential tribal cultural resource be discovered during project implementation. Construction personnel shall not collect or move any tribal resources. Construction activity may continue unimpeded on other portions of the project site. Unless agreed otherwise during the tribal consultation process or in a CRMP, if tribal cultural resources are discovered during construction, the applicant and/or owner shall retain a Qualified Tribal Monitor (as approved by the Tribe) if requested by the Tribe. Any and all archaeological/cultural documents created as a part of the Project (isolate records, site records, survey reports, testing reports, and monitoring reports) should be provided to consulting Tribes. Any tribal cultural resources discovered shall be treated with appropriate dignity and protected and preserved as appropriate with the agreement of the Tribal Representative and in accordance with federal, state, and local guidelines. If not otherwise provided in the CRMP, the Lead Agency and/or applicant shall, in good faith, provide all consulting Tribes the opportunity to consult on the disposition and treatment of resources. The location of the find of tribal cultural resources and the type and nature of the find will not be published, except to provide information to the Qualified Archaeologist, tribal representatives, and public agencies with jurisdiction or responsibilities related to the resources. An agreement will be reached with the Tribal Representative to mitigate or avoid any significant impacts to identified tribal cultural resources. Absent an agreement with the Tribal Representative, as provided in Public Resources Code Section 21083.2, the find should be preserved in place or left in an undisturbed state unless the Project would damage the resource. When preserving in place or leaving in an undisturbed state is not possible, excavation should not occur until testing or studies prepared by a Qualified Archaeologist have adequately documented the recovery of scientifically consequential information from and about the resource. Construction activity may continue unimpeded on other portions of the project site if cleared by the Qualified Tribal Monitor or Qualified Archaeologist. Ground Disturbance Activities in the area where resources were found may commence once the identified</p>	<p>Applicant for individual project</p>	<p>DCP, LADBS</p>	<p>Prior to project approval: condition project to comply with measure and provide assurance to ensure compliance</p> <p>Prior to building permit: obtain necessary assurances: ensure measure shown on plans</p> <p>During project activities: if resources are found, field verify that all work within a 50-foot buffer is ceased; verify that affiliated tribal representatives are notified; verify that the identified resources are properly assessed and processed by a Tribal Representative or, if no Tribal Representative is identified, a Qualified Archaeologist</p>

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
resources are properly assessed and processed by a Tribal Representative or, if no Tribal Representative is identified, a Qualified Archaeologist. The measure shall be shown on plans.			
Wildfire			
4.17-1 Hillside Construction Staging and Parking Plan			
For discretionary projects for development located in or adjacent to an SRA or VHFHSZ, where LAFD finds it necessary to add additional conditions above existing regulations to reduce the risk of construction-related activities impairing an emergency response plan or emergency evacuation plan, prior to the issuance of a grading or building permit, the applicant shall submit a Construction Staging and Parking Plan to the Department of Building and Safety and the Fire Department for review and approval. The plan shall identify where all construction materials, equipment, and vehicles will be stored through the construction phase of the project, as well as where contractor, subcontractor, and laborers will park their vehicles so as to prevent blockage of two-way traffic on streets in the vicinity of the construction site. The Construction Staging and Parking Plan shall include, but not be limited to, the following: <ul style="list-style-type: none"> • No construction equipment or material shall be permitted to be stored within the public right-of-way. • If the property fronts on a designated Red Flag Street, on noticed “Red Flag” days, all workers shall be shuttled from an off-site area, located on a non-Red Flag Street, to and from the site in order to keep roads open on Red Flag days. • During the Excavation and Grading phases, only one truck hauler shall be allowed on the site at any one time. The drivers shall be required to follow the designated travel plan or approved Haul Route. • Truck traffic directed to the project site for the purpose of delivering materials, construction-machinery, or removal of graded soil shall be limited to off-peak traffic hours, Monday through Friday only. No truck deliveries shall be permitted on Saturdays or Sundays. 	Applicant for individual project	LADBS, LAFD	Prior to project approval: approve Construction Staging and Parking Plan or condition project to provide a Construction Staging and Parking Plan and to provide necessary assurances to ensure compliance Prior to issuance of grading or building permit: review and approve the Construction Staging and Parking Plan, obtain necessary assurances

Mitigation Measure/Condition of Approval	Implementing Party	Enforcement and Monitoring Agency	Monitoring Phase and Monitoring Actions ¹
<ul style="list-style-type: none"> All deliveries during construction shall be coordinated so that only one vendor/delivery vehicle is at the site at one time, and that a construction supervisor is present at such time. A radio operator shall be on-site to coordinate the movement of material and personnel, in order to keep the roads open for emergency vehicles, their apparatus, and neighbors. During all phases of construction, all construction vehicle parking and queuing related to the project shall be as required to the satisfaction of the Department of Building and Safety, and in substantial compliance with the Construction Staging and Parking Plan, except as may be modified by the Department of Building and Safety or the Fire Department. 			
4.17-3 Undergrounding of Power Lines in and Near an SRA and VHFHSZs			
<p>For all discretionary applications for development located in or within one mile of an SRA or VHFHSZs, that involve or require the installation of new power lines shall be required to install the new power line underground. Prior to the issuance of a grading or building permit, the applicant shall submit plans for undergrounding of power lines.</p>	<p>Applicant for individual project</p>	<p>DCP, LADBS, LADWP</p>	<p>Prior to project approval: condition project to comply and obtain necessary assurances to ensure compliance</p> <p>Prior to issuance of a grading or building permit: review and approve plans for undergrounding power lines; obtain necessary assurances</p>

Appendix B

Transportation Impacts Memorandum

Memorandum

Date: Updated September 13, 2024
To: Rincon Consultants, City of Los Angeles Department of City Planning
From: Fehr & Peers
Subject: **LA Housing Element Rezoning Transportation Impacts**

LA24-3535

The City of Los Angeles Citywide Housing Element 2021-2029 Update and Safety Element Update (“Housing Element EIR”) is currently in the process of receiving an Addendum to evaluate the environmental effects of the targeted code amendments associated with the Housing Element Rezoning Program (“Proposed Project”). The purpose of this memorandum is to convey whether the results of impact assessment on transportation in the Housing Element EIR would be expected to change with the Proposed Project.

Housing Element EIR Transportation Impacts

The original transportation analysis involved in the Housing Element EIR included the following assessments of impacts and results:

- Threshold 4.14-1:
 - Threshold: Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadways, bicycle and pedestrian facilities.
 - Impact conclusion: Less than significant with mitigation.
- Threshold 4.14-2:
 - Threshold: Conflict or be inconsistent with CEQA Guidelines Section 15064.3, Subdivision (b).; or more specifically:
 - The Proposed Project would result in average total VMT per service population in the plan horizon year that exceeds 15% below the regional average total VMT per service population from the most recent regional metric available.
 - The Proposed Project would result in average total VMT per service population in the plan horizon year that exceeds the average total VMT per service population for the “project area” for the baseline year.

- Impact conclusion: Less than significant.
- Threshold 4.14-3:
 - Threshold: Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment).
 - Impact conclusion: The impact related to construction is less than significant with mitigation. Impacts related to highway safety as a result of design features or incompatible uses would be significant and unavoidable.
- Threshold 4.14-4:
 - Threshold: Result in inadequate emergency access.
 - Impact conclusion: Less than significant with mitigation.

Proposed Project Expected Transportation Impacts

The Proposed Project involves the inclusion of the following code amendments:

- The Citywide Housing Incentive Program Ordinance substantially revising the City's State Density Bonus Law implementation program, creating a new Mixed Income Incentive Program, and establishing a new Affordable Housing Incentive Program;
- An expansion to the City's existing Adaptive Reuse Ordinance;
- Housing Element Sites and Minimum Density Ordinance; and
- A Resident Protections Ordinance

With these amendments, the Proposed Project seeks to incentivize density in geographic areas that are adjacent to and characteristically similar to areas that are already zoned for dense use. The Proposed Project does not add new housing, but rather redistributes the housing assumptions within the same transportation analysis zones (TAZs) that were used in the Housing Element EIR analysis (based on results from the City of Los Angeles Travel Demand Forecasting model).

These changes outlined in the Proposed Project are not anticipated to result in different transportation impact results. A discussion of some specific aspects follows:

- Threshold 4.14-1:
 - The Proposed Project further aligns with the Programs contained in the Housing Element including policy proposals to build on the City's existing incentive-based tools to promote housing development. Furthermore, the Proposed Project is consistent with State law changes to expand project streamlining opportunities and requirements for sites identified for lower income households. As there is no change to the circulation system assumptions, the impact conclusions from the Housing Element EIR would remain the same.
- Threshold 4.14-2:

- The Proposed Project seeks to prevent low densities through minimum density requirements in specific Higher Opportunity Areas than the Housing Element originally planned. VMT per service population would likely not change or may slightly improve by condensing the housing assumptions into these more streamlined locations. With no increase in the total number of units and marginally increased housing density, the impact conclusions from the Housing Element EIR would remain the same.
- Threshold 4.14-3:
 - The Housing Element EIR notes that the impact related to construction would be less than significant with mitigation because while not the majority, larger projects or projects with unique site conditions or attributes may result in potential impacts from construction activities. The Housing Element EIR also notes that impacts related to highway safety as a result of design features or incompatible uses would be significant and unavoidable because build out of the RHNA may contribute to queuing on off-ramps that lead to unsafe speed differentials. While the Proposed Project does impose minimum development standards in some areas which could result in some larger projects or those with unique site conditions, there is no change to the assumptions of total number of units within a given TAZ or to the RHNA build out totals. As such, the impact conclusions from the Housing Element EIR would remain the same.
- Threshold 4.14-4:
 - The Proposed Project increases the density possible on select Higher Opportunity Areas that are within Very High Fire Hazard Severity Zones (VHFHSZs), where evacuation and emergency services may be necessary in the event of a fire. However, the specific parcels included in the Proposed Project are along major streets on edges of mountainous areas with access to the main street grid, and adjacent to parcels that allowed for higher density in the original Housing Element EIR, making the density of parcels along the same major street more similar in nature to one another. The Proposed Project is not expected to increase housing density in areas that would be more difficult for emergency services to access, nor does it increase the total amount of housing significantly. Additionally, LAFD provides many informational resources regarding fire and emergency preparedness; visit <http://www.lafd.org/faqs>. In the Housing Element EIR, the primary focus of this impact discussion was related to construction management planning, and the reasoning would apply to the Proposed Project as well. Given the same assumptions about construction management plans and LAFD response times and practices, the impact conclusions from the Housing Element EIR would remain the same.

EXHIBIT C.2:
**Proposed DRAFT Environmental Protection Measures Handbook
for Housing Element Rezoning Program**

CPC-2023-7068-CA, CPC-2024-387-CA, CPC-2024-388-CA

For consideration by the City Planning Commission

Note to Reader: Proposed revisions are highlighted in [blue text](#) throughout the document.

September 26, 2024

ENVIRONMENTAL PROTECTION MEASURES HANDBOOK

SECTION 1. ADMINISTRATIVE PROVISIONS

- A. Authority. These Environmental Protection Measures are adopted pursuant to [Section 11.5.15 of Chapter 1 and Div. 4C.13 \(Environmental Protection\)](#) of Chapter 1A of the LAMC.
- B. Applicability. An Environmental Protection Measure (EPM) applies to a Project that:
1. Is subject to the Environmental Protection Measures per Sec. 4A.2.2. (Development Standards Applicability) of Chapter 1A of the LAMC; or
 2. Is made subject to an EPM by any applicability threshold in the EPM in [Section 3](#); or
 3. Is made subject to EPMs by any section or provision in the LAMC;

AND the Project:

1. Meets the applicability threshold for that specific EPM set forth in [Section 3. \(Environmental Protection Measures\)](#) of this Handbook.
- C. Required Compliance with Environmental Protection Measures (EPM). Failure to comply with any applicable EPM as required in Subsection B. (Applicability), above, will be subject to all remedies available pursuant to [Sec. 4C.13.1.D \(Noncompliance\)](#) of Chapter 1A of the LAMC; or for projects approved under [Chapter 1 of the LAMC](#), subject to all civil, criminal and administrative remedies available for a violation of the LAMC pursuant to [Section 11.5.15](#).
- D. Additional Requirements. In addition to complying with any applicable EPM as required in Subsection B. (Applicability), above, an Applicant and Owner shall comply with all of the following:
1. Imprint all EPMs on all plans that are reviewed and approved by LADBS. More specifically, if an Applicant submits construction or operational plans as part of the Project description for a land use application, the Applicant shall imprint all EPMs on those plans. An Applicant may also include in the Project description and/or plans described above any best practices from [Appendix 1 \(Best Practices\)](#) the Applicant intends to implement as part of the Project, as they deem them necessary and/or desirable to: (i) ensure compliance with applicable local, state, and federal laws; (ii) protect public health and safety; or (iii) meet other elective performance standards, such as LEED designation.
 2. Sign and submit an affidavit to LADBS, at Plan Check prior to the issuance of any grading, excavation, or building permit, in which the Applicant and Owner acknowledge the requirements of the EPM standards and sign an affidavit of intent to comply. The affidavit shall substantially conform to the example provided in [Appendix 2](#) attached to this EPM Handbook.
 3. Notify any contractor hired by the Applicant or Owner who is doing work subject to one or more EPM standards of the requirement to comply with the applicable EPM(s); and collect a signed acknowledgement of the notice from the contractor, consistent with the Contractor Acknowledgement in [Appendix 3](#) attached to this EPM Handbook.
 4. Maintain a copy of all EPM(s) on the Project site at all times during construction.
 5. Obtain a qualifications sheet or statement demonstrating proof of qualifications for any Qualified Expert, as defined below in [Section 1.G. \(Definitions\)](#), who is required in the applicable EPMs and retained for purposes of preparing a survey, study or report; performing site monitoring activities; or otherwise ensuring compliance with

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

the applicable EPM(s).

6. Maintain a copy of all records documenting compliance with the EPM Handbook for a minimum of five years after the Certificate of Occupancy is issued. Records of compliance include but are not limited to any reports, studies, certifications, or surveys required in any applicable EPM in Section 3 (Environmental Protection Measures); the qualifications sheet or statement for any retained Qualified Expert; and any acknowledgment, notice, or Statement of Compliance required in Section 1 (Administrative Provisions) or Section 2 (Required Notices) of this EPM Handbook.
 7. Upon request of a City inspector or officer, produce records of compliance, referenced in paragraph 6, above, for inspection as follows:
 - a. Immediately, while construction activities are on-going at the site.
 - b. At any other time, within 72 hours' notice.
- E. Best Practices. Attached in Appendix 1 (Best Practices) to this EPM Handbook is a set of best practices to avoid or reduce adverse impacts to certain environmental resources. The best practices in Appendix 1 are intended to be used as guidelines but are not mandated.
- F. Acronyms. For purposes of this EPM Handbook, the following acronyms used herein are defined as follows:
- CEQA. California Environmental Quality Act, Public Resources Code Sections 21000—21189.57, and California Code of Regulations, Title 14, Chapter 3, Sections 15000—15387 (CEQA Guidelines).
- DTSC. Department of Toxic Substances Control.
- LADBS. City of Los Angeles Department of Building and Safety.
- LADPW. City of Los Angeles Department of Public Works.
- LAFD. City of Los Angeles Fire Department.
- SCAQMD. South Coast Air Quality Management District.
- USEPA. United States Environmental Protection Agency.
- G. Definitions. For purposes of this EPM Handbook, the following words and phrases used herein are defined as follows:
- Active Nest. An Active Nest is one that contains viable eggs and/or chicks. A nest becomes active when the first egg is laid and remains active until fledged young are no longer dependent on the nest. Nests that are empty, contain nonviable eggs, or are being built but do not yet have an egg in them are considered inactive.
- Applicant. The person or entity who files an application for a Project. Once an application has been approved, the Applicant includes any successor or assignee of the original Applicant.
- Best Available Control Technology. As defined in the federal Clean Air Act Section 169(3), this refers to production processes and available methods, systems, and techniques, including fuel cleaning or treatment or innovative fuel combustion techniques for the control of pollutants, that result in the maximum emission reduction that the permitting authority determines is achievable.
- Ground Disturbance Activities. Any earthwork activity including, but not limited to, excavating, digging, trenching, plowing, drilling, tunneling, quarrying, grading, leveling, removing peat, clearing, driving posts, augering, backfilling,

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

blasting, stripping topsoil or a similar activity at a Project site.

Hazardous Materials. Any substance or material that has been determined to be capable of posing an unreasonable risk to health, safety, and property when transported in commerce.

Hazardous Waste. A solid waste with properties that make it dangerous or capable of having a harmful effect on human health or the environment.

Heavy Construction Equipment. Equipment used during construction that has a minimum of 300 horsepower and operating weight of 80,000 pounds or more. Examples include a large bulldozer or excavator.

Historic Resources Survey. A document, officially recognized by a local, state, or federal agency, resulting from a process of systematically identifying and documenting buildings, structures, objects, cultural landscapes, natural features, and historic districts that reflect important themes in the city's growth and development or the historic or cultural significance of a given area. Historic resources surveys may identify these Surveyed Historic Resources as potentially eligible for listing in the National Register of Historic Places, California Register of Historical Resources, or City of Los Angeles List of Historic-Cultural Monuments, including National and California Register Historic Districts or Los Angeles Historic Preservation Districts. In Historic Preservation Districts (See Sec. 8.2.6. Historic Preservation Districts (HPOZ) of Chapter 1A of the LAMC), historic resources surveys must be certified as to accuracy and completeness by the Cultural Heritage Commission (See Sec. 13.A.1.5. (Cultural Heritage Commission) of Chapter 1A of the LAMC).

Hillside Area. Lots identified as being in a Hillside Area, as established in Chapter 1A of the LAMC, Sec.1.5.6. (Hillside Area Map).

Noise-Sensitive Uses. Any of the following uses: Dwelling; Mobile Home Park; Supportive Housing (including General, Medical Care, Non-Medical, and Transitional Shelter); Lodging; School (including K-12, Post-Secondary, and Preschool/Daycare); Religious Assembly; Medical (including Local and Regional); Entertainment Venue, Indoor, Regional; Amphitheater or Stadium (including Major and Minor); Recreation, Public; Open Space, Public, (with the exception of privately-owned plazas); and Public Libraries, defined as any publicly-accessible facility, owned or operated by a governmental or community organization, that provides free access to books, periodicals, and other digital and physical media and may also provide community or instructional services. See Part 5D. (Use Definitions) of Chapter 1A of the LAMC for definitions of these terms.

Owner. Any person, association, partnership, firm, corporation, or public entity, identified as the holder of title on any property as shown on the records of the City Engineer or on the last assessment roll of the County of Los Angeles, as applicable. For purposes of this Handbook, Owner also refers to an appointed representative of an association, partnership, firm, corporation, or public entity, which is a recorded Owner.

Petroleum Engineer. A professional engineer with at minimum a bachelor's degree in petroleum engineering, mechanical engineering, or chemical engineering and work experience in engineering, geology, and/or thermodynamics fields.

Project. Any project activity subject to Div. 4C.13 (Environmental Protection) of Chapter 1A of the LAMC per Sec. 4A.2.2B (Project Activities) of Chapter 1A of the LAMC.

Protected Tree or Shrub. Any protected tree or shrub as defined in Sec. 46.01 (Definitions) of Article 6 (Preservation of Protected Trees and Shrubs) of Chapter 4 (Public Welfare) of the LAMC.

Qualified Expert. A person with specified knowledge, skill, education, experience and/or training in a specialized field, including the following types of experts:

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

- **Archaeological Monitor.** An archaeologist who has a minimum of a bachelor's or equivalent degree in archaeology, anthropology, paleontology, or another closely related field and no less than one year of experience conducting archaeological monitoring and/or excavation in similar regional archaeological contexts.
- **Paleontological Monitor.** A paleontologist who has a minimum of a bachelor's or equivalent degree in geology or paleontology and no less than one year of experience performing paleontological monitoring and salvaging fossil materials in the relevant geologic province; or an equivalent degree in biology or pursuit of a degree in geology or paleontology and no less than two years of comparable experience.
- **Qualified Archaeologist.** A professional archaeologist who meets the Secretary of the Interior's Archeology and Historic Preservation Professional Qualification Standards and is eligible for listing on the Register of Professional Archaeologists or the Society for American Archaeology; holds a graduate degree in archaeology or a related field; and has a minimum of five years of experience completing and supervising field work in archaeological contexts similar to the Project site.
- **Qualified Biologist.** A biologist with the appropriate education, training and experience to conduct biological surveys, monitor Project activities that have the potential to affect biological resources, provide construction worker education programs related to the protection of biological resources, and supervise or perform other tasks related to biological resources; possesses a bachelor's or equivalent degree in biology, ecology, or a related environmental science; and has at least five years of professional experience that requires knowledge of natural history, habitat affinities, and identification of flora and fauna species, and relevant local, state and federal laws and regulations governing the protection of biological resources.
- **Qualified Environmental Professional.** An environmental professional who is credentialed through the Institute of Professional Environmental Practice (IPEP); holds a bachelor's or equivalent degree in physical, earth or natural sciences, engineering, or mathematics; and has at least five years of professional environmental work experience, or eight years of professional environmental work experience with a degree in a discipline other than those listed above.
- **Qualified Historian.** A person with a graduate degree in architectural history or a closely related area of study, such as art history or historic preservation, and at least one year of experience in applying the methods and practices of architectural history in the historic preservation arena; or with a bachelor's or equivalent degree in one of the same areas of study and at least three years of related experience.
- **Qualified Noise Expert.** An acoustics professional who is a member of the Institute of Noise Control Engineering (INCE) or National Council of Acoustical Consultants (NCAC) and has a minimum of five years of experience conducting noise and vibration measurements, monitoring, modeling, and mitigation; analysis of such measurements; and related activities.
- **Qualified Paleontologist.** A paleontologist who meets the Society of Vertebrate Paleontology standards for a Principal Investigator or Project Paleontologist; has demonstrated competence in field techniques, preparation, identification, curation, and reporting and/or a graduate degree in paleontology or geology or a publication record in peer reviewed journals; at least two years professional experience with administration and project management experience; proficiency in recognizing fossils in the field and determining their significance; expertise in local geology, stratigraphy, and biostratigraphy; and experience collecting vertebrate fossils in the field.
- **Qualified Structural Engineer.** A civil engineer who holds licenses as both a Professional Engineer (PE) and a Structural Engineer (SE) from the State Board for Professional Engineers, Land Surveyors, and Geologists and who has at least three years of civil engineering experience.

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

- **Qualified Tribal Monitor.** A tribal representative who possesses the knowledge, skills, abilities and experience established by the Native American Heritage Commission's (NAHC) Guidelines for Native American Monitors/Consultants (2005), and as may be amended.

Sensitive Uses. Any of the following uses: any Residential use; Medical, Regional or Medical, Local; School (including Preschool/Daycare, K-12, and Post-secondary); Recreation, Public; or Open Space, Public.

Statement of Compliance. A written statement that acknowledges which EPM(s) apply to a Project and includes an affidavit of intent to comply with those applicable EPM(s), signed by the Applicant and Owner. A sample Statement of Compliance is provided in Appendix 2 attached to this EPM Handbook.

Surveyed Historic Resource. Any building, structure, landscaping, or natural feature identified through a Historic Resources Survey as potentially eligible for listing in the National Register of Historic Places, California Register of Historical Resources, or City of Los Angeles List of Historic-Cultural Monuments, including National and California Register Historic Districts or Los Angeles Historic Preservation District.

To the Extent Available and Feasible. Employment of best efforts to implement or comply with a requirement, assuming any necessary technology, equipment, or other resources are readily available and costs or other constraints are not prohibitive.

- H. While the Environmental Protection Measures and Notices may be considered in any environmental analysis for a Project, consistent with the California Environmental Quality Act and its Guidelines, nothing herein is intended to control any analysis or mitigation measure required by the City, acting as a lead or responsible agency.

SECTION 2. REQUIRED NOTICES

In addition to any other requirement in this EPM Handbook, LADBS shall provide notices and collect acknowledgements of those notices from Applicants and Owners at Plan Check, as provided below.

A. Projects Requiring Grading or Excavation. Prior to issuance of a permit for grading or excavation, LADBS shall issue the following notice(s) and obtain a signed acknowledgement that the notice(s) was received and read by the Applicant and Owner.

1. Archaeological, Paleontological, and Tribal Cultural Resources Notice: Several laws regulate the treatment of archaeological, paleontological, and tribal cultural resources and make it a criminal violation to destroy those resources. These regulations include, but are not limited to:

- California Penal Code Section 622½ provides the following: “Every person, not the owner thereof, who willfully injures, disfigures, defaces, or destroys any object or thing of archeological or historical interest or value, whether situated on private lands or within any public park or place, is guilty of a misdemeanor.”
- Public Resources Code Section 5097.5(a) provides: “A person shall not knowingly and willfully excavate upon, or remove, destroy, injure, or deface, any historic or prehistoric ruins, burial grounds, archaeological or vertebrate paleontological site, including fossilized footprints, inscriptions made by human agency, rock art, or any other archaeological, paleontological or historical feature, situated on public lands, except with the express permission of the public agency having jurisdiction over the lands.” A violation of Section 5097.5 is a misdemeanor subject to a fine up to \$10,000 and/or a year in jail, and potential restitution.

Appendix 1 (Best Practices) to this City of Los Angeles EPM Handbook includes suggested best practices to avoid damage to archaeological, paleontological, and tribal cultural resources.

B. Projects Requiring Grading, Excavation, or Building. Prior to issuance of a permit for grading, excavation, or building, LADBS shall issue all of the following notice(s) and obtain a signed acknowledgement that the notice(s) was received and read by the Applicant and Owner.

1. Nesting Bird Notice. Under the federal Migratory Bird Treaty Act, among other prohibitions, it is unlawful to destroy migratory birds or remove bird nests. Under California Fish and Game Code Section 3503, et seq., among other prohibitions, it is unlawful to destroy nests and eggs of any bird. Appendix 1 (Best Practices) to this City of Los Angeles EPM Handbook includes suggested best practices to avoid damage to Active Nests.
2. Noise and Vibration Notice. The Los Angeles Municipal Code (LAMC) regulates excessive noise, including from construction activities and uses of property, including but not limited to those regulations in LAMC Chapter XI, ‘Noise Regulation.’ Appendix 1 (Best Practices) to this City of Los Angeles EPM Handbook includes suggested best practices to avoid excessive vibration.

SECTION 3. ENVIRONMENTAL PROTECTION MEASURES

For each Environmental Protection Measure (EPM) provided in this Section there is an applicability threshold and a standard. Projects that meet all of the criteria in the applicability thresholds shall comply with the associated EPM standards, as provided in Section 1. (Administrative Provisions).

A. Air Quality Standard (AQ1)—Operation of Construction Equipment

1. AQ1-1: Dust Control Compliance with SCAQMD Rule 403

a. Applicability Threshold

Any Project whose construction activities involve the use of construction equipment and require a permit from LADBS.

b. Standard

Consistent with SCAQMD Rule 403, best available dust control measures (see Appendix 4) shall be implemented during Ground Disturbance Activities and active construction operations capable of generating dust.

2. AQ1-2: Equipment Maintenance

a. Applicability Threshold

Any Project whose construction activities involve the use of construction equipment and require a permit from LADBS.

b. Standard

Maintain construction equipment in good, properly tuned operating condition, as specified by the manufacturer, to minimize exhaust emissions. Documentation demonstrating that the equipment has been maintained in accordance with the manufacturer's specifications shall be maintained per the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements).

All construction equipment shall achieve emissions reductions that are no less than what could be achieved by a Tier 3 diesel emissions control strategy for a similarly sized engine as defined by California Air Resources Board regulations.

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

3. AQ1-3: Vehicle Idling Limit and Notification Signs

a. Applicability Threshold

Any Project whose construction activities involve the use of construction vehicles and require a permit from LADBS.

b. Standard

Vehicle idling during construction activities shall be limited to five minutes as set forth in the California Code of Regulations, Title 13, Section 2449. Signs shall be posted in areas where they will be seen by vehicle operators stating idling time limits.

4. AQ1-4: Non-Diesel Fueled Electrical Power

a. Applicability Threshold

Any Project whose construction activities involve the use of construction equipment and require a permit from LADBS.

b. Standard

Electricity from power poles rather than temporary gasoline or diesel-powered generators shall be used To the Extent Available and Feasible.

5. AQ1-5: Emissions Standards for Off-Road Construction Equipment Greater than 50 Horsepower

a. Applicability Threshold

Any Project whose construction activities involve the use of construction equipment, require a permit from LADBS, and involve at least 5,000 cubic yards of on-site cut/fill on any given day.

b. Standard

All off-road diesel-powered construction equipment equal to or greater than 50 horsepower shall meet the U.S. Environmental Protection Agency's (USEPA) Tier 4 emission standards during construction. Operators shall maintain records of all off-road equipment associated with Project construction to document that each piece of equipment used meets these emission standards per the proof of compliance requirement in Sec. 1.D.6. (Additional Requirements).

In lieu of compliance with the above requirement, an air quality study prepared in accordance with the SCAQMD's Air Quality Handbook may be provided by the Applicant or Owner demonstrating that Project construction activities would not exceed the SCAQMD's regional and localized construction thresholds.

6. AQ1-6: Use of Low Polluting Fuels

a. Applicability Threshold

Any Project whose construction activities involve the use of construction equipment, require a permit from LADBS, and involve at least 5,000 cubic yards of on-site cut/fill on any given day.

b. Standard

Construction equipment less than 50 horsepower shall use low polluting fuels (i.e., compressed natural gas, liquid petroleum gas, and unleaded gasoline).

In lieu of compliance with the above requirement, an air quality study prepared in accordance with the SCAQMD's Air Quality Handbook may be provided by the Applicant or Owner demonstrating that Project construction activities would not exceed the SCAQMD's regional and localized construction thresholds.

7. AQ1-7: Emission Standards for On-Road Haul Trucks

a. Applicability Threshold

Any Project whose construction activities involve the use of construction equipment, require a permit from LADBS, and involve more than 90 round-trip haul truck trips on any given day for demolition debris and import/export of soil.

b. Standard

Construction haul truck operators for demolition debris and import/export of soil shall use trucks that meet the California Air Resources Board's (CARB) 2010 engine emissions standards at 0.01 g/bhp-hr of particulate matter (PM) and 0.20 g/bhp-hr of nitrogen oxides (NOX) emissions. Operators shall maintain records of all trucks associated with Project construction to document that each truck used meets these emission standards per the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements).

In lieu of compliance with the above requirement, an air quality study prepared in accordance with the SCAQMD's Air Quality Handbook may be provided by the Applicant or Owner demonstrating that Project construction activities would not exceed the SCAQMD's regional and localized construction thresholds.

8. AQ1-8: Routes for On-Road Haul Trucks

a. Applicability Threshold

Any Project whose construction activities involve the use of construction vehicles and require a permit from LADBS.

b. Standard

Construction contractors shall reroute construction trucks away from congested streets or Sensitive Uses, as feasible. The burden of proving that compliance is infeasible shall be upon the Applicant or Owner. Where avoiding Sensitive Uses and congested streets altogether is infeasible, routing away from Sensitive Uses shall be prioritized over routing away from congested streets.

B. Biological Resources Standards (BR1)—Protected Trees

Reserved.

C. Biological Resources Standards (BR2)—Special Status Species

Reserved.

D. Biological Resources Standards (BR3)—Nesting Native and Migratory Birds

1. BR3-1: Restriction of Ground Disturbance Activity

a. Applicability Threshold

Any Project for which an active bird nest has been discovered on-site.

b. Standard

If any active bird nest is found during a pre-construction nesting bird survey or is discovered inadvertently during earthwork or construction-related activities, a Qualified Biologist shall be retained by the Applicant or Owner to

determine an appropriate avoidance buffer which shall be no less than is necessary to protect the nest, eggs and/or fledglings, from damage or disturbance in consideration of the following factors: the bird species, the availability of suitable habitat within the immediate area, the proposed work activity, and existing disturbances associated with surrounding land uses. The buffer shall be demarcated using bright orange construction fencing, flagging, construction lathe, or other means to mark the boundary of the buffer. All construction personnel shall be notified of the buffer zone and shall avoid entering the protected area. No Ground Disturbing Activities or vegetation removal shall occur within this buffer area until the Qualified Biologist has confirmed that breeding/nesting is complete and the young have fledged the nest and/or that the nest is no longer an Active Nest. The Qualified Biologist shall prepare a report prior to the issuance of any building permit detailing the results of the nesting bird survey and subsequent monitoring, which shall be maintained pursuant to the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements).

E. Cultural Resources Standards (CR1)—Archaeological Resources

1. CR1-1: Inadvertent Discovery

a. Applicability Threshold

Any Project that requires a permit for grading or excavation.

b. Standard

If a possible archaeological resource is uncovered during earthwork or construction, all work shall cease within a minimum distance of 50 feet from the find until a Qualified Archaeologist has been retained to evaluate the find in accordance with National Register of Historic Places and California Register of Historical Resources criteria. The Qualified Archaeologist may adjust this avoidance area, ensuring appropriate temporary protection measures of the find are taken while also considering ongoing construction needs in the surrounding area. Temporary staking and delineation of the avoidance area shall be installed around the find in order to avoid any disturbance from construction equipment. Ground Disturbance Activities may continue unimpeded on other portions of the site outside the specified radius.

Any potential archaeological resource or associated materials that are uncovered shall not be moved or collected by anyone other than an Archaeological Monitor or Qualified Archaeologist unless the materials have been determined to be non-unique archaeological resources, as defined in Public Resources Code Section 21083.1(h), by the Qualified Archaeologist. The Qualified Archaeologist shall determine if the resources are unique archeological resources as defined in Public Resources Code Section 21083.2(g).

Consistent with Public Resources Code Section 21083.2, the handling, treatment, preservation, and recordation of unique archaeological resources should occur as follows:

- The find should be preserved in place or left in an undisturbed state unless the Project would damage the resource.
- When preserving in place or leaving in an undisturbed state is not possible, excavation and recovery of the find for scientific study should occur unless testing or studies already completed have adequately recovered the scientifically consequential information from and about the resource, and this determination is documented by a Qualified Archaeologist.

Ground Disturbance Activities in the area where resource(s) were found may recommence once the identified resources are properly assessed and processed by a Qualified Archaeologist. A report that describes the resource(s) and its disposition, as well as the assessment methodology, shall be prepared by the Qualified

Archaeologist according to current professional standards and maintained pursuant to the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements). If appropriate, the report should also contain the Qualified Archaeologist's recommendations for the preservation, conservation, and curation of the resource at a suitable repository, such as the Natural History Museum of Los Angeles County, with which the Applicant or Owner must comply.

F. Cultural Resources Standards (CR2)—Zanja Madre and the Zanja System

1. CR2-1: Zanja Madre HAER Documentation

a. Applicability Threshold

Any project that requires a permit for grading or excavation and that is located within one mile of the currently known and mapped segments of the Zanja system (see Appendix 5).

b. Standard

Projects within 500 feet of the currently mapped known segments of the Zanja system (see Appendix 5) have increased likelihood of encountering segments of the Zanja system during construction. The Zanja system includes the Zanja Madre and its outbranching secondary Zanja segments. If possible segments of the Zanja system are uncovered during earthwork or construction, all work shall cease within a minimum distance of 50 feet from the find until a Qualified Archaeologist has been retained to inspect and evaluate the find. The Qualified Archaeologist may adjust this avoidance area, ensuring appropriate temporary protection measures of the find are taken while also considering ongoing construction needs in the surrounding area. Temporary staking and delineation of the avoidance area shall be installed around the find in order to avoid any disturbance from construction equipment. Ground Disturbance Activities may continue unimpeded on other portions of the site outside the specified radius.

At a minimum, and even if avoided, should the find be determined to be related to the Zanja system, the Qualified Archaeologist shall prepare a memo and complete all relevant State of California Department of Parks and Recreation (DPR) DPR 523 forms documenting the find.

If the Qualified Archaeologist, having evaluated the find, determines that the find retains integrity, documentation consistent with the standards and guidelines established the Historic American Engineering Record (HAER) shall be undertaken and transmitted to the Library of Congress before any alteration, demolition, construction, or removal activity may occur within the determined avoidance area. Documentation shall include narrative records, measured drawings, and photographs in conformance with HAER Guidelines. The found segments shall also be mapped using Geographic Information Systems (GIS) or 3D mapping technology in order to contribute to the existing record of the location and extent of the Zanja system as a whole. At minimum, GIS data shall include the geographic coordinates and depth of all portions of the find. All records, including geographic data, georeferenced photographs, and information about the depth of the find shall be submitted to City Planning. Report documentation and GIS files shall additionally be provided to the South Central Coastal Information Center (SCCIC) located at California State University, Fullerton.

In addition to HAER documentation, if determined appropriate by the Qualified Archaeologist, one or more of the following specific treatments shall be developed and implemented based on potential California Register eligibility criteria or the significance of the find as a unique archaeological resource:

- i. Treatment Under Criterion 1: Treatment shall include interpretation of the Zanja system for the public. The interpretive materials may include, but not be limited to, interpretive displays of photographs and drawings produced during the HAER documentation, signage at the Zanja Madre alignment, relocating preserved

segments in a publicly accessible display, or other visual representations of Zanja alignments through appropriate means such as a dedicated internet website other online-based materials. At a minimum, the interpretive materials shall include photographs and drawings produced during the HAER documentation and signage. These interpretive materials shall be employed as part of Project public outreach efforts that may include various forms of public exhibition and historic image reproduction. Additionally, the results of the historical and archaeological studies conducted for the Project shall be made available to the public through repositories such as the local main library branch or with identified non-profit historic groups interested in the subject matter. The interpretive materials shall be prepared at the expense of the Project applicant, by professionals meeting the Secretary of the Interior's Professional Qualifications Standards in history or historical archaeology. The development of the interpretive materials shall consider any such materials already available to the public so that the development of new materials would add to the existing body of work on the historical Los Angeles water system, and to this end, shall be coordinated, to the extent feasible and to the satisfaction of the Department of City Planning, in consultation with the Office of Historic Resources. The interpretive materials shall include a consideration of the Zanja segment located on the Project Site in relation to the entire Zanja system. The details of the interpretive materials, including the content and format, and the timing of their preparation, shall be completed to the satisfaction and subject to the approval of the Department of City Planning, in consultation with the Office of Historic Resources.

- ii. Treatment Under Criterion 2: No additional work; archival research about important persons directly associated with the construction and use of the Zanja system would be addressed as part of HAER documentation.
- iii. Treatment Under Criterion 3: No additional work; HAER documentation is sufficient.
- iv. Treatment Under Criterion 4: No additional work; archaeological data recovery and HAER documentation are sufficient.
- v. Treatment as a unique archaeological resource, as defined by PRC Section 21083.2(g): Same as Criterion 1 treatment.

G. Cultural Resources Standards (CR3)—Paleontological Resources

1. CR3-1: Inadvertent Discovery

a. Applicability Threshold

Any Project that requires a permit for grading or excavation.

b. Standard

If a probable paleontological resource is uncovered during earthwork or construction, all work shall cease within a minimum distance of 50 feet from the find until a Qualified Paleontologist has been retained to evaluate the find in accordance with the Society of Vertebrate Paleontology's Standard Procedures for the Assessment and Mitigation of Adverse Impacts to Paleontological Resources. Temporary flagging shall be installed around the find in order to avoid any disturbance from construction equipment. Any paleontological materials that are uncovered shall not be moved or collected by anyone other than a Qualified Paleontologist or his/her designated representative such as a Paleontological Monitor. If cleared by the Qualified Paleontologist, Ground Disturbance Activities may continue unimpeded on other portions of the site. The found deposit(s) shall be treated in accordance with the Society of Vertebrate Paleontology's Standard Procedures. Ground Disturbance Activities in the area where resource(s) were found may recommence once the identified resources are properly assessed and processed by a Qualified Paleontologist. A report that describes the resource and its disposition, as well as the assessment methodology,

shall be prepared by the Qualified Paleontologist according to current professional standards and maintained pursuant to the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements). If appropriate, the report should also contain the Qualified Paleontologist's recommendations for the preservation, conservation, and curation of the resource at a suitable repository, such as the Natural History Museum of Los Angeles County, with which the Applicant or Owner must comply.

H. Cultural Resources Standards (CR4)—Tribal Cultural Resources

1. CR4-1: Inadvertent Discovery

a. Applicability Threshold

Any Project that requires a permit for grading or excavation.

b. Standard

If a possible tribal cultural resource is uncovered during earthwork or construction, all work shall cease within a minimum distance of 50 feet from the find until a Qualified Tribal Monitor or Archaeological Monitor has been retained to evaluate the find.

Following discovery, the Applicant or Owner shall immediately contact all Native American tribes that have informed the City of Los Angeles they are traditionally and culturally affiliated with the geographic area of the Project, as well as the Department of City Planning, Office of Historic Resources (OHR). If a Qualified Tribal Monitor or Archaeological Monitor determines, pursuant to Public Resources Code Section 21074(a)(2), that the object or artifact appears to be a potential tribal cultural resource, in its discretion and supported by substantial evidence, the Applicant and Owner shall provide any affected tribe a reasonable period of time, not less than five business days, to conduct a site visit and make recommendations to the Applicant or Owner and OHR regarding the monitoring of future Ground Disturbance Activities and the treatment and disposition of any discovered tribal cultural resources. The Applicant or Owner shall implement the tribe's recommendations if the Qualified Tribal Monitor or Archaeological Monitor reasonably concludes such recommendations are reasonable and feasible.

Consistent with Public Resources Code Section 21083.2, the handling, treatment, preservation, and recordation of tribal cultural resources should occur as follows:

- The find should be preserved in place or left in an undisturbed state unless the Project would damage the resource.
- When preserving in place or leaving in an undisturbed state is not possible, excavation and recovery of the find for scientific study should occur unless testing or studies already completed have adequately recovered the scientifically consequential information from and about the resource, and this determination is documented by a Qualified Tribal Monitor or Qualified Archaeologist.

All collected artifacts and fieldwork notes, if not human remains or other mortuary objects, shall be curated at the Natural History Museum of Los Angeles County or another appropriate curatorial facility for educational purposes. If cleared by the Qualified Tribal Monitor or Archaeological Monitor, Ground Disturbance Activities may continue unimpeded on other portions of the site. Ground Disturbance Activities in the area where resource(s) were found may recommence once the identified resources are properly assessed and processed. A report that describes the resource and its disposition, as well as the assessment methodology shall be prepared by the Qualified Tribal Monitor or Archaeological Monitor, according to current professional standards and maintained pursuant to the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements). A copy of the report shall be submitted to OHR, the South Central Coastal Information Center at California State University, Fullerton and to

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

the Native American Heritage Commission for inclusion in its Sacred Lands File. If requested by the City, OHR may review and approve any monitoring or mitigation plan prior to implementation.

I. Hazardous Materials Standards (HM1)—Hazardous Materials Site

1. HM1-1: Unanticipated Hazards

a. Applicability Threshold

Any Project that requires a grading, excavation, or building permit from LADBS. In addition to any other Project that requires a grading, excavation, or building permit from LADBS, this environmental protection measure is applicable to projects approved under 12.22 A.37 (State Density Bonus Program), 12.22 A.38 (Mixed Income Incentive Program), 12.22 A.39 (Affordable Housing Incentive Program), or 16.70 (Housing Element Sites and Minimum Density Ordinance) are also subject to this measure if they meet the above applicability threshold.

b. Standard

In the event that suspected Hazardous Materials, contamination, debris, or other features or materials that could present a threat to human health or the environment are discovered during earthwork or construction, such activities shall cease immediately until the affected area is evaluated by a Qualified Environmental Professional. If the Qualified Environmental Professional determines that a hazard exists, a remediation plan shall be developed by the Qualified Environmental Professional in consultation with the appropriate regulatory agency, and the remediation identified shall be completed. Work shall not resume in the affected area until appropriate actions have been implemented in accordance with the remediation plan, to the satisfaction of the regulatory agency.

A report that describes the Hazardous Materials, contamination or debris and its disposition, shall be prepared by the Qualified Environmental Professional, according to current professional standards and maintained pursuant to the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements).

2. HM1-2: Environmental Site Assessment(s)

a. Applicability Threshold

Any Project that requires a grading, excavation, or building permit from LADBS or approved under 12.22 A.37 (State Density Bonus Program), 12.22 A.38 (Mixed Income Incentive Program), 12.22 A.39 (Affordable Housing Incentive Program), or 16.70 (Housing Element Sites and Minimum Density Ordinance); and which is:

vi. Located on or within 500 feet of a Hazardous Materials site listed in any of the following databases:

- State Water Resources Control Board GeoTracker (refer to <https://geotracker.waterboards.ca.gov>);
- DTSC EnviroStor (refer to <https://www.envirostor.dtsc.ca.gov/public>);
- DTSC Hazardous Waste Tracking System (refer to <https://hwts.dtsc.ca.gov>);
- LAFD Certified Unified Program Agency (refer to the active, inactive, and historical inventory lists at <https://www.lafd.org/fire-prevention/cupa/public-records>);
- Los Angeles County Fire Department Health Hazardous Materials Division (refer to the active and inactive facilities, site mitigation, and California Accidental Release Prevention inventory lists at <https://fire.lacounty.gov/public-records-requests>);
- SCAQMD Facility Information Detail (refer to <https://xapprod.aqmd.gov/find>); or

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

- vii. Located on or within 500 feet of a Hazardous Materials site designated as a Resource Conservation and Recovery Act (RCRA) Small Quantity Generator or Large Quantity Generator (refer to the USEPA Envirofacts database at <https://enviro.epa.gov/index.html>); or
- viii. Located in an Oil Drilling District (O) or located on or within ~~the following buffers as identified by the by the California Geologic Energy Management Division (refer to <https://www.conservation.ca.gov/calgem/Pages/WellFinder.aspx>);~~
 - ~~50~~ 1,000 feet of a property identified as having an ~~active~~ oil well or an oil field (~~active or inactive~~) ~~by the California Geologic Energy Management Division (refer to <https://www.conservation.ca.gov/calgem/Pages/WellFinder.aspx>);~~ or
 - 200 feet of a property identified as having an idle oil well or field; or
 - 100 feet of a property identified as having a plugged oil well or field.
- ix. Located on land currently or previously designated with an industrial use class or industrial zoning, in whole or in part; or
- x. Located on land currently or previously used for a gas station or dry cleaning facility.

Or:

- xi. The Applicant or Owner are aware or have reason to be aware that the Project site was previously used for an industrial use, gas station or dry cleaner.

And:

- xii. The site has not been previously remediated to the satisfaction of the relevant regulatory agency/agencies for any contamination associated with the above uses or site conditions, or the site was not previously assessed in a Phase I Environmental Site Assessment (ESA) in the prior two years, which found no Recognized Environmental Conditions (REC), or a subsequent Phase II that concluded there are no RECs..

b. Standard

A Phase I Environmental Site Assessment shall be prepared by a Qualified Environmental Professional in accordance with State standards/guidelines and current professional standards, including the American Society for Testing and Materials' (ASTM) Standard Practice for Environmental Site Assessments, to evaluate whether the site, or the surrounding area, is contaminated with hazardous substances from any past or current land uses, including contamination related to the storage, transport, generation, or disposal of toxic or Hazardous Waste or materials.

If the Phase I identifies a Recognized Environmental Condition (REC) and/or if recommended in the Phase I, a Phase II Environmental Site Assessment shall also be prepared by a Qualified Environmental Professional. The Phase I and/or Phase II Environmental Site Assessment(s) shall be maintained pursuant to the proof of compliance requirements in Section I.D.6 and made available for review and inclusion in the case file by the appropriate regulatory agency, such as the State Water Resources Control Board, the State Department of Toxic Substances Control, or the LAFD Hazard Mitigation Program. Any remediation plan recommended in the Phase II Environmental Site Assessment or by the appropriate regulatory agency shall be implemented and, if required, a No Further Action letter shall be issued by the appropriate regulatory agency prior to issuance of any permit from LADBS, unless the regulating agency determines that remedial action can be implemented in conjunction with excavation and/or grading. If oversight or approval by a regulatory agency is not required, the Qualified

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

Environmental Professional shall provide written verification of compliance with and completion of the remediation plan, such that the site meets the applicable standards for the proposed use, which shall be maintained pursuant to the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements).

3. HM1-3: County Fire Department Oversight

a. Applicability Threshold

Any Project that generates or handles Hazardous Material(s) and/or Hazardous Waste of quantities at any one time during a year equal to or greater than a volume of 55 gallons, a total weight of 500 pounds, or a total of 200 cubic feet of a compressed gas.

b. Standard

Prior to the issuance of a building permit, the Applicant and Owner shall report the required operator, site, training, emergency response and contingency information in the California Environmental Reporting System (CERS), in coordination with the Los Angeles County Fire Department Health Hazardous Materials Division. Documentation of all CERS reporting shall be maintained pursuant to the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements).

J. Hazardous Materials Standards (HM2)—Abandoned Oil Wells

Reserved.

K. Noise and Vibration Standards (NV1)—Construction Noise

1. NV1-1: Noise Shielding and Muffling

a. Applicability Threshold

Any Project whose earthwork or construction activities involve the use of powered exterior construction equipment and require a permit from LADBS.

b. Standard

Powered exterior construction equipment (including combustion engines), fixed or mobile, shall be equipped with noise shielding and muffling devices consistent with manufacturers' standards or the Best Available Control Technology. All equipment shall be properly maintained, and the Applicant or Owner shall require any construction contractor to keep documentation on-site during any earthwork or construction activities demonstrating that the equipment has been maintained in accordance with manufacturer's specifications. Construction hours shall be posted on-site along with a contact for any issues related to construction.

2. NV1-2: Use of Driven Pile Systems

a. Applicability Threshold

Any Project whose earthwork or construction activities involve the use of construction equipment and require a permit from LADBS.

b. Standard

Driven (impact) pile systems shall not be used, except in locations where the underlying geology renders drilled piles, sonic, or vibratory pile drivers infeasible, as determined by a soils or geotechnical engineer and documented in a soils report.

3. NV1-3: Enclosure or Screening of Outdoor Mechanical Equipment

a. Applicability Threshold

Any Project whose earthwork or exterior construction activities involve the use of powered construction equipment and require a permit from LADBS.

b. Standard

All outdoor mechanical equipment (e.g., generators, compressors) shall be enclosed or visually screened. The equipment enclosure or screen shall be impermeable (i.e., solid material with minimum weight of 2 pounds per square feet) and break the line of sight between the equipment and any off-site Noise-Sensitive Uses.

4. NV1-4: Location of Construction Staging Areas

a. Applicability Threshold

Any Project whose earthwork or construction activities involve the use of construction equipment and require a permit from LADBS.

b. Standard

Construction staging areas, including those related to constructing a mat pour foundation, shall be located as far from Noise-Sensitive Uses as reasonably possible and technically feasible in consideration of site boundaries, topography, intervening roads and uses, and operational constraints. The burden of proving that compliance is technically infeasible shall be upon the Applicant or Owner. Technical infeasibility shall mean that noise barriers

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

cannot be located between construction activities and Noise-Sensitive Uses due to site boundaries, topography, intervening roads and uses, and/or operational constraints.

5. NV1-5: Temporary Walls

a. Applicability Threshold

Any Project whose earthwork or exterior construction activities involve the use of powered construction equipment and require a permit from LADBS; and whose construction activities are located within a line of sight to and within 500 feet of Noise-Sensitive Uses, with the exception of Projects limited to the construction of 2,500 square feet or less of floor area.

b. Standard

Noise barriers, such as temporary walls (minimum ½-inch thick plywood) or sound blankets (minimum STC 25 rating),¹ that are a minimum of eight feet tall, shall be erected between construction activities and Noise-Sensitive Uses as reasonably possible and technically feasible in consideration of site boundaries, topography, intervening roads and uses, and operational constraints. The burden of proving that compliance is technically infeasible shall be upon the Applicant or Owner. Technical infeasibility shall mean that noise barriers cannot be located between construction activities and Noise-Sensitive Uses due to site boundaries, topography, intervening roads and uses, and/or operational constraints.

6. NV1-6: Noise Study

a. Applicability Threshold

Any Project whose earthwork or exterior construction activities involve the use of powered construction equipment and require a permit from LADBS; are located within 500 feet of Noise-Sensitive Uses; and have one or more of the following characteristics:

- i. Two or more subterranean levels;
- ii. 20,000 cubic yards or more of excavated material
- iii. Exterior simultaneous use of five or more pieces of powered construction equipment; or
- iv. Construction duration (excluding architectural coatings) of 18 months or more.

Or any Project whose construction activities involve impact pile driving or the use of 300 horsepower equipment.

b. Standard

A Noise Study prepared by a Qualified Noise Expert shall be required and prepared prior to obtaining any permit by LADBS. The Noise Study shall characterize expected sources of earthwork and construction noise that may affect identified Noise-Sensitive Uses, quantify expected noise levels at these Noise-Sensitive Uses, and recommend measures to reduce noise exposure to the extent noise reduction measures are available and feasible, and to demonstrate compliance with any noise requirements in the LAMC. Specifically, the Noise Study shall identify noise reduction devices or techniques to reduce noise levels in accordance with accepted industry practices and in compliance with LAMC standards. Noise reduction devices or techniques shall include but not be limited to mufflers, shields, sound barriers, and time and place restrictions on equipment and activities. The Noise Study shall identify anticipated noise reductions at Noise-Sensitive Uses associated with the noise reduction

¹1. At a Sound Transmission Class (STC) rating of 25, soft speech can be heard and understood.

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

measures. Applicants and Owners shall be required to implement and comply with all measures identified and recommended in the Noise Study. The Noise Study and copies of any contractor agreements shall be maintained pursuant to the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements).

7. NV1-7: LAUSD Notification

a. Applicability Threshold

Any Project located within 200 feet of an LAUSD facility whose earthwork or construction activities involve the use of powered exterior construction equipment and require a permit from LADBS.

b. Standard

LAUSD shall be notified of future construction activities.

L. Noise and Vibration Standards (NV2)—Construction Vibration

1. NV2-1: Baseline Survey and Vibration Control Plan

a. Applicability Threshold

Any Project, with the exception of Projects limited to the construction of 2,500 square feet or less of floor area, whose earthwork or construction activities: (1) involve the use of construction equipment, including Heavy Construction Equipment, that produces 0.12 PPV or more of vibration at a distance of 25 feet (see reference vibration levels in Appendix 6); (2) require a permit from LADBS; and (3) which occur:

- v. Within 25 feet of any building extremely susceptible to vibration damage, including unreinforced masonry buildings, wood-frame multi-story buildings with soft, weak or open front walls, and non-ductile concrete buildings that have not been retrofitted, or a building that is designated or determined to be a historic resource pursuant to local or state law or that is determined to be potentially eligible for historic designation in a Historic Resources Survey; or
- vi. Within 15 feet of non-engineered timber and masonry buildings.

Or any Project whose construction activities involve the use of pile drivers within 135 feet of any building extremely susceptible to vibration damage, including existing unreinforced masonry buildings, existing tilt-up concrete wall buildings, existing wood-frame multi-story buildings with soft, weak or open front walls, and existing non-ductile concrete buildings, or a building that is designated or determined to be a historic resource pursuant to local or state law or that is determined to be potentially eligible for historic designation in a Historic Resources Survey.

b. Standard

Prior to demolition, grading/excavation, or construction, a Qualified Structural Engineer shall prepare a survey establishing baseline structural conditions of potentially affected structures and a Vibration Control Plan, which shall include methods to minimize vibration, including, but not limited to:

- i. A visual inspection of the potentially affected structures to document (by video and/or photography) the apparent physical condition of the building (e.g., cracks, broken panes, etc.).
- ii. A shoring design to protect the identified structures from potential damage;
- iii. Use of drilled piles or a sonic vibratory pile driver rather than impact pile driving, when the use of vibrating equipment is unavoidable;

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

- iv. Use of rubber-tired equipment rather than metal-tracked equipment; and
- v. Avoiding the use of vibrating equipment when allowed by best engineering practice.

2. NV2-2: Repair of Damage

a. Applicability Threshold

Any Project, with the exception of Projects limited to the construction of 2,500 square feet or less of floor area, whose earthwork or construction activities: (1) involve the use of construction equipment, including Heavy Construction Equipment, that produces 0.12 PPV or more of vibration at a distance of 25 feet (see reference vibration levels in Appendix 6); (2) require a permit from LADBS; and (3) which occur:

- i. Within 25 feet of any building extremely susceptible to vibration damage, including unreinforced masonry buildings, tilt-up concrete wall buildings, wood-frame multi-story buildings with soft, weak or open front walls, and non-ductile concrete buildings, or a building that is designated or determined to be a historic resource pursuant to local or state law or that is determined to be potentially eligible for historic designation in a Historic Resources Survey; or
- ii. Within 15 feet of non-engineered timber and masonry buildings.

Or any Project whose construction activities involve the use of pile drivers within 135 feet of any building extremely susceptible to vibration damage, including existing unreinforced masonry buildings, existing tilt-up concrete wall buildings, existing wood-frame multi-story buildings with soft, weak or open front walls, and existing non-ductile concrete buildings, or a building that is designated or determined to be a historic resource pursuant to local or state law or that is determined to be potentially eligible for historic designation in a Historic Resources Survey.

b. Standard

In the event of damage to any non-historic building due to construction vibration, as verified by the Qualified Structural Engineer, a letter describing the damage to the impacted building(s) and recommendations for repair shall be prepared by the Qualified Structural Engineer within 60 days of the time when damage occurred. Repairs shall be undertaken and completed, at the Owner's or Applicant's expense, in conformance with all applicable codes.

In the event of vibration damage to any building that is designated or determined to be a historic resource pursuant to local or state law or that is determined to be potentially eligible for historic designation in a Historic Resources Survey, a letter describing the damage to the impacted building(s) and recommendations for repair shall be prepared by the Qualified Historian within 60 days of the time when damage occurred. Repairs shall be undertaken and completed, at the Owner's or Applicant's expense, in conformance with the California Historical Building Code (Title 24, Part 8) as well as the Secretary of the Interior's Standards for the Treatment of Historic Properties and associated guidelines, as applicable and as determined by the Qualified Historian.

3. NV2-3: Vibration Sensitive Uses

a. Applicability Threshold

Any Project, with the exception of Projects limited to the construction of 2,500 square feet or less of floor area, whose earthwork or construction activities involve the use of equipment with high vibration levels in close proximity to vibration sensitive uses including hospital and veterinary operating centers, imaging facilities, and recording studios. Specifically, this includes use of a vibratory roller within 250 feet of such uses or use of a large bulldozer or drill-rig within 150 feet of such uses.

b. Standard

- iii. Prior to demolition, grading/excavation, or construction, a Qualified Vibration Consultant shall prepare a vibration impact analysis at the vibration sensitive use and shall prepare a vibration control plan, to minimize vibration impacts.
- iv. The qualified vibration consultant shall take vibration monitoring measurements during use of the vibratory roller within 250 of the vibration sensitive use and during use of the large bulldozer or drill-rig within 150 feet of the vibration sensitive use in order to assess the actual impact of vibration on the structures and to incorporate and adjust techniques as necessary to reduce vibration. To the extent the adjacent vibration sensitive use allows the applicant to conduct monitoring within the adjacent sensitive use, baseline monitoring prior to construction and monitoring during these construction activities shall be conducted at the sensitive use. The engineer shall insure the incorporation of measures that reduce vibration at the sensitive use.
- v. Noticing of the scheduling of various phases of construction will be submitted to the adjacent vibration-sensitive use 45 days in advance of activities and shall identify the dates of activity, the hours of activity, types of equipment to be used and the anticipated noise and vibration levels.

M. Pedestrian Safety Standards (PS1)—Safe and Accessible Walkways

Reserved.

APPENDIX 1. BEST PRACTICES

Disclaimer: The following best practices were developed by the City in consultation with environmental consultants who specialize in preparing environmental impact reports (EIRs) to comply with the California Environmental Quality Act, Public Resources Code, Sections 21000, et seq. Best practices are professional procedures, methods, or techniques that are accepted or prescribed as industry standards and considered correct or most effective. Nothing provided in this Appendix is intended to be a mandate or to relieve an Applicant and an Owner from their responsibility to comply with any and all applicable laws. The City assumes no responsibility for any Applicant's or Owner's use or reliance upon the best practices provided herein and does not guarantee their adequacy for any purpose. Any use by any person of the best practices provided herein is solely at the discretion and responsibility of that person.

A. Archaeological Resources

The following best practices are recognized by archaeologists and environmental consultants to ensure archaeological resources are not damaged during grading, excavation, or other Ground Disturbance Activities:

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

1. Records Search. A cultural resources records search should be requested from and conducted by the California Historical Resources Information System's (CHRIS) South Central Coastal Information Center (SCCIC) located at California State University, Fullerton to determine whether any cultural resources have been previously identified on or within a 0.5-mile radius of the Project site. The results of this records search shall be used as an indicator of the archaeological sensitivity of the Project site.
2. A Qualified Archaeologist shall be retained and use all reasonable methods, consistent with professional standards and best practices, to determine the potential for archaeological resources to be present on the Project site.
3. If the Qualified Archaeologist determines there is a medium to high potential that archaeological resources may be located on the Project site and it is possible that such resources will be impacted by the Project, the Qualified Archaeologist shall advise the Applicant and Owner to retain an Archaeological Monitor to observe all Ground Disturbance Activities within those areas identified as having a medium to high potential in order to identify any resources and avoid potential impacts to such resources.
4. Monitoring. An Archaeological Monitor should monitor excavation and grading activities in soils that have not been previously disturbed in order to identify and record any potential archaeological finds and avoid potential impacts to such resources. In the event of a possible archaeological discovery, the Archaeological Monitor shall notify a Qualified Archaeologist. The Archaeological Monitor has the authority to temporarily halt earthwork activities.
 - a. Handling, Evaluation, and Preservation. Any archaeological resource materials or associated materials that are uncovered shall not be moved or collected by anyone other than an Archaeological Monitor or Qualified Archaeologist unless they have been determined to be nonunique archaeological resources, as defined in Public Resources Code Section 21083.1(h) by a Qualified Archaeologist. A Qualified Archaeologist shall determine if the resources are unique archeological resources as defined in Public Resources Code Section 21083.2(g).
5. Consistent with Public Resources Code Section 21083.2, the handling, treatment, preservation, and recordation of unique archaeological resources should occur as follows:
 - b. The find should be preserved in place or left in an undisturbed state unless the Project would damage the resource.
 - c. When preserving in place or leaving in an undisturbed state is not possible, excavation and recovery of the find for scientific study should occur unless testing or studies already completed have adequately recovered the scientifically consequential information from and about the resource, and this determination is documented by a Qualified Archaeologist.
6. If recommended by the Qualified Archaeologist, the resource(s) shall be curated by a public, non-profit institution with a research interest in the material, such as the Natural History Museum of Los Angeles County or another appropriate curatorial facility for educational purposes.
7. Ground Disturbance Activities in the area where resource(s) were found may recommence once the identified resources are properly assessed and processed by a Qualified Archaeologist.

B. Biological Resources

The following best practices are recognized by biologists to ensure Active Nests are not damaged or disturbed during construction or Ground Disturbance Activities, which is a violation of the Federal Migratory Bird Treaty Act and the

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

State Fish and Game Code:

1. Pre-Construction Survey. If a Project proposes the demolition of a structure or removal of a tree or vegetation during bird nesting season (February 1 to August 31), a pre-construction nesting bird survey of all suitable habitat shall be conducted no more than 10 days prior to the initiation of demolition or tree or vegetation removal to determine if nesting birds are present. The pre-construction nesting bird survey shall be conducted on foot within the Project site boundaries by a Qualified Biologist.
2. No Nests Found. If the pre-construction survey indicates bird nests are not present or are inactive, or if potential habitat is unoccupied, no further avoidance is required.
3. Buffer for Active Nest. If any active bird nest is found during a pre-construction nesting bird survey, a Qualified Biologist shall recommend an avoidance buffer which shall be no less than is necessary to protect the nest, eggs and/or fledglings, from damage or disturbance in consideration of the following factors: the bird species, the availability of suitable habitat within the immediate area, the proposed work activity, and existing disturbances associated with surrounding land uses. The buffer shall be demarcated using bright orange construction fencing, flagging, construction lathe, or other means to mark the boundary of the buffer. All construction personnel shall be notified of the buffer zone and shall avoid entering the protected area. No Ground Disturbing Activities or vegetation removal shall occur within this buffer area until the Qualified Biologist has confirmed that breeding/nesting is complete and the young have fledged the nest and/or that the nest is no longer an Active Nest.

C. Paleontological Resources

The following best practices are recognized by paleontologists and environmental consultants to ensure paleontological resources are not damaged during construction or Ground Disturbance Activities:

1. A paleontological resources records search shall be requested from and conducted by the Natural History Museum of Los Angeles County to determine whether any paleontological resources have been previously identified on or near the Project site. The results of this records search shall be used as an indicator of the paleontological sensitivity of the Project site.
2. A Qualified Paleontologist shall be retained and use all reasonable methods, consistent with professional standards and best practices, to determine the potential for paleontological resources to be present on the Project site.
3. If the Qualified Paleontologist determines there is a high potential that paleontological resources may be located on the Project site and it is possible that such resources will be impacted by the Project, the Qualified Paleontologist or his/her designated representative such as a Paleontological Monitor shall observe all Ground Disturbance Activities within those areas identified as having an undetermined or high potential in order to identify any resources and avoid potential impacts to such resources. In the event of a possible paleontological discovery, the Qualified Paleontologist or Paleontological Monitor shall have the authority to temporarily halt earthwork activities within an appropriate radius of the find, as determined by the Qualified Paleontologist, necessary to protect the resource or other potential resources on or near the Project site. Temporary flagging shall be installed around the find in order to avoid any disturbance from construction equipment.
4. Prior to the start of construction, the Qualified Paleontologist or his/her designee shall conduct training for construction personnel regarding the appearance of fossils and the procedures for notifying paleontological staff should fossils be discovered by construction staff.

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

- d. If paleontological resources are uncovered (in either a previously disturbed or undisturbed area), all work should cease in the area of the find until a Qualified Paleontologist has evaluated the find in accordance with federal, state, and local guidelines, including the Society of Vertebrate Paleontology's Standard Procedures for the Assessment and Mitigation of Adverse Impacts to Paleontological Resources (SVP, 2010).
- e. If fossils are discovered, a Qualified Paleontologist shall recover them. Typically, fossils can be safely salvaged quickly by a single paleontologist and not disrupt construction activity. In some cases, larger fossils (such as complete skeletons or large mammal fossils) require more extensive excavation and longer salvage periods. In this case the paleontologist has the authority to temporarily direct, divert or halt construction activity to ensure the fossil(s) can be removed in a safe and timely manner. Handling and disposition of fossils is done at the direction and guidance of a Qualified Paleontologist.
- f. Personnel of the Project should not collect or move any paleontological materials or associated materials.
- g. If cleared by the Qualified Paleontologist, construction activity may continue unimpeded on other portions of the Project site.
- h. Construction activities in the area where resources were found may commence once the identified resources are properly assessed and processed by a Qualified Paleontologist, and the Qualified Paleontologist clears the site for construction activity.

D. Tribal Cultural Resources

The following best practices are recognized by tribal monitors and environmental consultants to ensure that tribal cultural resources are not damaged during grading, excavation, or other Ground Disturbance Activities:

1. A Sacred Lands File (SLF) records search shall be requested from and conducted by the California Native American Heritage Commission (NAHC) to determine whether cultural resources associated with any Native American tribe(s) with traditional lands or cultural places located within or near the Project site have been previously identified or whether the Project area is considered sensitive for the presence of tribal cultural resources.
2. All tribes listed on the NAHC's Native American Contact List included with the SLF records search shall be contacted, informed of the Project, and given an opportunity to provide input. If the tribe provides substantial evidence of a potential for discovery of tribal cultural resources within the Project site and requests monitoring of Project excavation, grading or other Ground Disturbance Activities, a Qualified Tribal Monitor or an Archaeological Monitor shall be retained.
3. The Qualified Tribal Monitor or Archaeological Monitor shall observe all Ground Disturbance Activities within those areas identified in the records search as sensitive for the presence of tribal cultural resources in order to identify any resources and avoid potential impacts to such resources. In the event of a possible discovery of a tribal cultural resource, the Qualified Tribal Monitor or Archaeological Monitor shall have the authority to temporarily halt earthwork activities within an appropriate radius of the find, as determined by the Qualified Tribal Monitor or Qualified Archaeologist to ensure the find is not damaged or any other potential tribal cultural resources on or near the Project site.
4. If tribal cultural resources are uncovered, all work should cease in the appropriate radius determined by the Qualified Tribal Monitor or Archaeological Monitor.
5. Any find should be treated with appropriate dignity and protected and preserved as appropriate with the

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

agreement of the Qualified Tribal Monitor and in accordance with federal, state, and local guidelines.

6. The location of the tribal cultural resource find and the type and nature of the find should not be published beyond providing the information to public agencies with jurisdiction or responsibilities related to the resources and any affected tribal representatives.
7. Personnel of the Project should not collect or move any tribal cultural resources or associated materials or publish the location of tribal cultural resources.
8. Following discovery, the Applicant or Owner shall immediately contact all Native American tribes that have informed the City of Los Angeles they are traditionally and culturally affiliated with the geographic area of the Project, as well as the Department of City Planning, Office of Historic Resources (OHR).
9. The Applicant and Owner shall provide any affected tribe a reasonable period of time, not less than fourteen calendar days, to conduct a site visit and make recommendations to the Applicant or Owner regarding the monitoring of future Ground Disturbance Activities and the treatment and disposition of any discovered tribal cultural resources.
10. The Applicant or Owner shall implement the tribe's recommendations if the Qualified Tribal Monitor or Archaeological Monitor reasonably concludes such recommendations are reasonable and feasible and determined to be supported with substantial evidence.
11. Consistent with Public Resources Code Section 21083.2, the handling, treatment, preservation, and recordation of tribal cultural resources shall occur as follows:
 - i. The find shall be preserved in place or left in an undisturbed state unless the Project would damage the resource.
 - j. When preserving in place or leaving in an undisturbed state is not possible, excavation and recovery of the find for scientific study shall occur unless testing or studies already completed have adequately recovered the scientifically consequential information from and about the resource, and this determination is documented by a Qualified Tribal Monitor or Qualified Archaeologist.
12. All collected artifacts and fieldwork notes, if not human remains or other mortuary objects, shall be curated at the Natural History Museum of Los Angeles County or another appropriate curatorial facility.
13. If cleared by the Qualified Tribal Monitor or Archaeological Monitor, Ground Disturbance Activities may continue unimpeded on other portions of the site. Ground Disturbance Activities in the area where resource(s) were found may recommence once the identified resources are properly assessed and processed.

E. Vibration

The following best practices are recognized by structural engineers and environmental consultants to reduce damage to vibration-sensitive uses:

1. The use of impact pile drivers should be avoided to eliminate excessive vibration levels. Drilled piles or sonic vibratory pile drivers are alternatives that should be utilized where geological conditions permit their use.
2. Construction activities should involve rubber-tired equipment rather than metal-tracked equipment.
3. The construction contractor should schedule and phase construction activities, including demolition, earthmoving, and ground-impacting operations, so they do not occur concurrently; use low-impact construction technologies;

and avoid the use of vibrating equipment in accordance with best engineering practices.

APPENDIX 2. AFFIDAVIT

Date:

Project Site Address:

This affidavit shows my intent to comply with the City of Los Angeles (City) Environmental Protection Measure (EPM) Handbook.

With regard to this Project, I/we _____ and _____
Owner Applicant (if different than Owner)

each hereby acknowledge and commit to all of the following:

1. I have read the EPM Handbook, found at <https://planning.lacity.gov/zoning/new-code>.
2. I understand the Project may be subject to specific EPM standards and related requirements set forth in the EPM Handbook, and I acknowledge pursuant to 4A.2.2 (Development Standards Applicability) of the Los Angeles Municipal Code (LAMC) and/or LAMC Section 11.5.15 that I am obligated to and will comply with any and all EPM standards applicable to the Project.
3. I understand that failure to comply with applicable EPM standards is a violation of 4A.2.2 (Development Standards Applicability) of Chapter 1A of the LAMC and/or LAMC Section 11.5.15 and is subject to all civil, criminal, and administrative remedies and penalties pursuant to Sec. 4C.13.1.D (Noncompliance) of Chapter 1A of the LAMC and pursuant to Section 11.5.15. Additionally, if City determines that I have violated any required EPM, the City may require me to hire an independent consultant to ensure compliance pursuant to Sec. 4C.13.1.D (Noncompliance) of Chapter 1A of the LAMC or LAMC Section 11.5.15.
4. I understand it is my responsibility to consult with any appropriate professional, including but not limited to legal counsel, environmental consultants, or construction contractors, if necessary, to understand (i) the applicable LAMC requirements for my Project, (ii) the EPM Handbook, and (iii) this affidavit before signing this document or undertaking work on the Project.
5. I understand it is my responsibility and I agree to ensure that all individuals who perform any work or service related to the development or construction of the Project, including but not limited to environmental consultants, engineers, construction contractors and workers, or any required Qualified Expert, whether such work or service is performed at the Project site address or elsewhere, are aware of and familiar with the applicable EPM requirements for the Project and have received or obtained a copy of the EPM Handbook as well as the list of applicable EPM standards included in this signed affidavit.

Date:

APPENDIX 3. CONTRACTOR ACKNOWLEDGEMENT

Environmental Protection Measures Contractor Acknowledgement

Date:

Project Site Address:

This Contractor Acknowledgement serves as an affidavit of intent to comply with the City of Los Angeles (City) Environmental Protection Measure (EPM) Handbook.

With regard to this Project, I, hereby _____

Contractor

acknowledge and commit to the following:

- 11. I have read the EPM Handbook, found at <https://planning.lacity.gov/zoning/new-code>.
- 12. I understand the Project may be subject to specific EPM standards and related requirements set forth in the EPM Handbook, and I acknowledge pursuant to Sec. 4A.2.2 (Development Standards Applicability) of Chapter 1A of the Los Angeles Municipal Code (LAMC) or LAMC Section 11.5.15, that the Applicant and Owner are required to comply with any and all EPM standards applicable to the Project.
- 13. In fulfilling my responsibilities and contracted services for the Project, I acknowledge that I am obligated to implement and comply with all applicable EPM standards as they relate to the performance of my duties.
- 14. The Applicant and Owner have identified the following EPM standards as applicable to the Project:

Air Quality Standard (AQ1)—Operation of Construction Equipment	Cultural Resources Standards (CR4)—Tribal Cultural Resources	Biological Resources Standards (BR1)—Protected Trees
--	--	--

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

Hazardous Materials Standards (HM1)— Hazardous Materials Site	Biological Resources Standards (BR2)—Special Status Species	Hazardous Materials Standards (HM2)—Abandoned Oil Wells
Biological Resources Standards (BR3)—Nesting Native and Migratory Birds	Noise and Vibration Standards (NV1)—Construction Noise	Cultural Resources Standards (CR1)—Archaeological Resources
Noise and Vibration Standards (NV2)—Construction Vibration	Cultural Resources Standards (CR2)—Zanja Madre and the Zanja System	Pedestrian Safety Standards (PS1)—Safe and Accessible Walkways
Cultural Resources Standards (CR3)—Paleontological Resources		

- 15. Documentation demonstrating compliance with all EPM standards applicable to the Project shall be maintained per the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements) of the EPM Handbook.
- 17. I am obligated to adhere to all recommendations, limitations, or other guidance from any Qualified Expert retained by the Applicant or Owner as part of EPM compliance.
- 18. I understand that failure to comply with applicable EPM standards is a violation of Sec. 4A.2.2. (Development Standards Applicability) of Chapter 1A of the LAMC or LAMC Section 11.5.15 and is subject to all civil, criminal, and administrative remedies and penalties pursuant to Sec. 4C.13.1.D (Noncompliance) of Chapter 1A of the LAMC or Section 11.5.15.

APPENDIX 4. **SCAQMD RULE 403 BEST AVAILABLE CONTROL MEASURES**

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

(Applicable to All Construction Activity Sources)

Table 1: Best Available Control Measures (Applicable to All Construction Activity Sources)		
Source Category	Control Measure	Guidance
Backfilling	01-1 Stabilize backfill material when not actively handling; and 01-2 Stabilize backfill material during handling; and 01-3 Stabilize soil at completion of activity.	Mix backfill soil with water prior to moving. Dedicate water truck or high-capacity hose to backfilling equipment. Empty loader bucket slowly so that no dust plumes are generated. Minimize drop height from loader bucket.
Clearing and Grubbing	02-1 Maintain stability of soil through pre-watering of site prior to clearing and grubbing; and 02-2 Stabilize soil during clearing and grubbing activities; and 02-3 Stabilize soil immediately after clearing and grubbing activities.	Maintain live perennial vegetation where possible. Apply water in sufficient quantity to prevent generation of dust plumes.
Clearing Forms	03-1 Use water spray to clear forms; or 03-2 Use sweeping and water spray to clear forms; or 03-3 Use vacuum system to clear forms.	Use of high-pressure air to clear forms may cause exceedance of Rule requirements.
Crushing	04-1 Stabilize surface soils prior to operation of support equipment; and 04-2 Stabilize material after crushing.	Follow permit conditions for crushing equipment. Pre-water material prior to loading into crusher. Monitor crusher emissions opacity. Apply water to crushed material to prevent dust plumes.
Cut and Fill	05-1 Pre-water soils prior to cut and fill activities; and 05-2 Stabilize soil during and after cut and fill activities	For large sites, pre-water with sprinklers or water trucks and allow time for penetration. Use water trucks/pulls to water soils to depth of cut prior to subsequent cuts.
Demolition—Mechanical/Manual	06-1 Stabilize wind erodible surfaces to reduce dust; and 06-2 Stabilize surface soil where support equipment and vehicles will operate; and 06-3 Stabilize loose soil and demolition debris; and 06-4 Comply with AQMD Rule 1403.	Apply water in sufficient quantities to prevent the generation of visible dust plumes.
Disturbed Soil	07-1 Stabilize disturbed soil throughout the construction site; and	Limit vehicular traffic and disturbances on soils where possible.

**Table 1: Best Available Control Measures
(Applicable to All Construction Activity Sources)**

Source Category	Control Measure	Guidance
	07-2 Stabilize disturbed soil between structures	If interior block walls are planned, install as early as possible. Apply water or a stabilizing agent in sufficient quantities to prevent the generation of visible dust plumes.
Earth-Moving Activities	08-1 Pre-apply water to depth of proposed cuts; and 08-2 Re-apply water as necessary to maintain soils in a damp condition and to ensure that visible emissions do not exceed 100 feet in any direction; and 08-3 Stabilize soils once earth-moving activities are complete.	Grade each project phase separately, timed to coincide with construction phase. Upwind fencing can prevent material movement onsite. Apply water or a stabilizing agent in sufficient quantities to prevent the generation of visible dust plumes.
Importing/Exporting of Bulk Materials	09-1 Stabilize material while loading to reduce fugitive dust emissions; and 09-2 Maintain at least six inches of freeboard on haul vehicles; and 09-3 Stabilize material while transporting to reduce fugitive dust emissions; and 09-4 Stabilize material while unloading to reduce fugitive dust emissions; and 09-5 Comply with Vehicle Code Section 23114.	Use tarps or other suitable enclosures on haul trucks. Check belly-dump truck seals regularly and remove any trapped rocks to prevent spillage. Comply with track-out prevention/mitigation requirements. Provide water while loading and unloading to reduce visible dust plumes.
Landscaping	10-1 Stabilize soils, materials, slopes	Apply water to materials to stabilize. Maintain materials in a crusted condition. Maintain effective cover over materials. Stabilize sloping surfaces using soil binders until vegetation or ground cover can effectively stabilize the slopes. Hydroseed prior to rain season.
Road Shoulder Maintenance	11-1 Apply water to unpaved shoulders prior to clearing; and 11-2 Apply chemical dust suppressants and/or washed gravel to maintain a stabilized surface after completing road shoulder maintenance.	Installation of curbing and/or paving of road shoulders can reduce recurring maintenance costs. Use of chemical dust suppressants can inhibit vegetation growth and reduce future road shoulder maintenance costs.
Screening	12-1 Pre-water material prior to screening; and 12-2 Limit fugitive dust emissions to opacity and plume length standards; and	Dedicate water truck or high-capacity hose to screening operation. Drop material through the screen slowly and minimize drop height.

**Table 1: Best Available Control Measures
(Applicable to All Construction Activity Sources)**

Source Category	Control Measure	Guidance
	12-3 Stabilize material immediately after screening.	Install wind barrier with a porosity of no more than 50% upwind of screen to the height of the drop point.
Staging areas	13-1 Stabilize staging areas during use; and 13-2 Stabilize staging area soils at project completion.	Limit size of staging area. Limit vehicle speeds to 15 miles per hour. Limit number and size of staging area entrances/exits.
Stockpiles/Bulk Material Handling	14-1 Stabilize stockpiled materials. 14-2 Stockpiles within 100 yards of off-site occupied buildings must not be greater than eight feet in height; or must have a road bladed to the top to allow water truck access or must have an operational water irrigation system that is capable of complete stockpile coverage.	Add or remove material from the downwind portion of the storage pile. Maintain storage piles to avoid steep sides or faces.
Traffic Areas for Construction Activities	15-1 Stabilize all off-road traffic and parking areas; and 15-2 Stabilize all haul routes; and 15-3 Direct construction traffic over established haul routes.	Apply gravel/paving to all haul routes as soon as possible to all future roadway areas. Barriers can be used to ensure vehicles are only used on established parking areas/haul routes.
Trenching	16-1 Stabilize surface soils where trencher or excavator and support equipment will operate; and 16-2 Stabilize soils at the completion of trenching activities.	Pre-watering of soils prior to trenching is an effective preventive measure. For deep trenching activities, pretrench to 18 inches soak soils via the pre-trench and resuming trenching. Washing mud and soils from equipment at the conclusion of trenching activities can prevent crusting and drying of soil on equipment.
Truck Loading	17-1 Pre-water material prior to loading; and 17-2 Ensure that freeboard exceeds six inches (CVC 23114)	Empty loader bucket such that no visible dust plumes are created. Ensure that the loader bucket is close to the truck to minimize drop height while loading.
Turf Overseeding	18-1 Apply sufficient water immediately prior to conducting turf vacuuming activities to meet opacity and plume length standards; and 18-2 Cover haul vehicles prior to exiting the site.	Haul waste material immediately off-site.

Table 1: Best Available Control Measures (Applicable to All Construction Activity Sources)		
Source Category	Control Measure	Guidance
Unpaved Roads/Parking Lots	19-1 Stabilize soils to meet the applicable performance standards; and 19-2 Limit vehicular travel to established unpaved roads (haul routes) and unpaved parking lots.	Restricting vehicular access to established unpaved travel paths and parking lots can reduce stabilization requirements.
Vacant Land	20-1 In instances where vacant lots are 0.10 acre or larger and have a cumulative area of 500 square feet or more that are driven over and/or used by motor vehicles and/or off-road vehicles, prevent motor vehicle and/or off-road vehicle trespassing, parking and/or access by installing barriers, curbs, fences,	

Table 2: Dust Control Measures for Large Operations	
Fugitive Dust Source Category	Control Actions
Earth-Moving (except construction cutting and filling areas, and mining operations)	(1a) Maintain soil moisture content at a minimum of 12 percent, as determined by ASTM method D- 2216, or other equivalent method approved by the Executive Officer, the California Air Resources Board, and the U.S. EPA. Two soil moisture evaluations must be conducted during the first three hours of active operations during a calendar day, and two such evaluations each subsequent four-hour period of active operations; OR (1a-1) For any earth-moving which is more than 100 feet from all property lines, conduct watering as necessary to prevent visible dust emissions from exceeding 100 feet in length in any direction.
Earth-Moving: Construction Fill Areas:	(1b) Maintain soil moisture content at a minimum of 12 percent, as determined by ASTM method D- 2216, or other equivalent method approved by the Executive Officer, the California Air Resources Board, and the U.S. EPA. For areas which have an optimum moisture content for compaction of less than 12 percent, as determined by ASTM Method 1557 or other equivalent method approved

Table 2: Dust Control Measures for Large Operations	
Fugitive Dust Source Category	Control Actions
	by the Executive Officer and the California Air Resources Board and the U.S. EPA, complete the compaction process as expeditiously as possible after achieving at least 70 percent of the optimum soil moisture content. Two soil moisture evaluations must be conducted during the first three hours of active operations during a calendar day, and two such evaluations during each subsequent four-hour period of active operations.
Earth-Moving: Construction Cut Areas And Mining Operations:	(1c) Conduct watering as necessary to prevent visible emissions from extending more than 100 feet beyond the active cut or mining area unless the area is inaccessible to watering vehicles due to slope conditions or other safety factors.
Disturbed Surface Areas (Except Completed Grading Areas)	(2a/b) Apply dust suppression in sufficient quantity and frequency to maintain a stabilized surface. Any areas which cannot be stabilized, as evidenced by wind driven fugitive dust must have an application of water at least twice per day to at least 80 percent of the unstabilized area.
Disturbed Surface Areas: Completed Grading Areas	(2c) Apply chemical stabilizers within five working days of grading completion; OR (2d) Take actions (3a) or (3c) specified for inactive disturbed surface areas.
Inactive Disturbed Surface Areas	(3a) Apply water to at least 80 percent of all inactive disturbed surface areas on a daily basis when there is evidence of wind driven fugitive dust, excluding any areas which are inaccessible to watering vehicles due to excessive slope or other safety conditions; OR (3b) Apply dust suppressants in sufficient quantity and frequency to maintain a stabilized surface; OR (3c) Establish a vegetative ground cover within 21 days after active operations have ceased. Ground cover must be of sufficient density to expose less than 30 percent of unstabilized ground within 90 days of planting, and at all times thereafter; OR (3d) Utilize any combination of control actions (3a), (3b), and (3c) such that, in total, these actions apply to all inactive disturbed surface areas.
Unpaved Roads	(4a) Water all roads used for any vehicular traffic at least once per every two hours of active operations [3 times per normal 8-hour work day]; OR (4b) Water all roads used for any vehicular traffic once daily and restrict vehicle speeds to 15 miles per hour; OR (4c) Apply a chemical stabilizer to all unpaved road surfaces in

Table 2: Dust Control Measures for Large Operations	
Fugitive Dust Source Category	Control Actions
	sufficient quantity and frequency to maintain a stabilized surface.
Open Storage Piles	(5a) Apply chemical stabilizers; OR (5b) Apply water to at least 80 percent of the surface area of all open storage piles on a daily basis when there is evidence of wind driven fugitive dust; OR (5c) Install temporary coverings; OR (5d) Install a three-sided enclosure with walls with no more than 50 percent porosity which extend, at a minimum, to the top of the pile. This option may only be used at aggregate-related plants or at cement manufacturing facilities.
All Categories	(6a) Any other control measures approved by the Executive Officer and the U.S. EPA as equivalent to the methods specified in Table 2 may be used.

Table 3: Contingency Control Measures for Large Operations	
Fugitive Dust Source Category	Control Measures
Earth-Moving	(1A) Cease all active operations; OR (2A) Apply water to soil not more than 15 minutes prior to moving such soil.
Disturbed Surface Areas	(0B) On the last day of active operations prior to a weekend, holiday, or any other period when active operations will not occur for not more than four consecutive days: apply water with a mixture of chemical stabilizer diluted to not less than 1/20 of the concentration required to maintain a stabilized

Table 3: Contingency Control Measures for Large Operations	
Fugitive Dust Source Category	Control Measures
	<p>surface for a period of six months; OR</p> <p>(1B) Apply chemical stabilizers prior to wind event; OR (2B) Apply water to all unstabilized disturbed areas 3 times per day. If there is any evidence of wind driven fugitive dust, watering frequency is increased to a minimum of four times per day; OR</p> <p>(3B) Take the actions specified in Table 2, Item (3c); OR (4B) Utilize any combination of control actions (1B), (2B), and (3B) such that, in total, these actions apply to all disturbed surface areas.</p>
Unpaved Roads	<p>(1C) Apply chemical stabilizers prior to wind event; OR</p> <p>(2C) Apply water twice per hour during active operation; OR</p> <p>(3C) Stop all vehicular traffic.</p>
Open Storage Piles	<p>(1D) Apply water twice per hour; OR</p> <p>(2D) Install temporary coverings.</p>
Paved Road Track-Out	<p>(1E) Cover all haul vehicles; OR</p> <p>(2E) Comply with the vehicle freeboard requirements of Section 23114 of the California Vehicle Code for both public and private roads.</p>
All Categories	<p>(1F) Any other control measures approved by the Executive Officer and the U.S. EPA as equivalent to the methods specified in Table 3 may be used.</p>

Table 4: Conservation Management Practices for Confined Animal Facilities	
Fugitive Dust Source Category	Control Measures
<p>Manure Handling (Only Applicable to Commercial Poultry Ranches)</p>	<p>(1a) Cover manure prior to removing material off-site; AND</p> <p>(1b) Spread the manure before 11:00 a.m. and when wind conditions are less than 25 miles per hour; AND</p> <p>(1c) Utilize coning and drying manure management by removing manure at laying hen houses at least twice per year and maintain a base of no less than 6 inches of dry manure after clean out; or in lieu of complying with conservation</p>

Table 4: Conservation Management Practices for Confined Animal Facilities	
Fugitive Dust Source Category	Control Measures
	<p>management practice (1c), comply with conservation management practice (1d).</p> <p>(1d) Utilize frequent manure removal by removing the manure from laying hen houses at least every seven days and immediately thin bed dry the material.</p>
Feedstock Handling	(2a) Utilize a sock or boot on the feed truck auger when filling feed storage bins.
Disturbed Surfaces	<p>(3a) Maintain at least 70 percent vegetative cover on vacant portions of the facility; OR</p> <p>(3b) Utilize conservation tillage practices to manage the amount, orientation and distribution of crop and other plant residues on the soil surface year-round, while growing crops (if applicable) in narrow slots or tilled strips; OR</p> <p>(3c) Apply dust suppressants in sufficient concentrations and frequencies to maintain a stabilized surface.</p>
Unpaved Roads	<p>(4a) Restrict access to private unpaved roads either through signage or physical access restrictions and control vehicular speeds to no more than 15 miles per hour through worker notifications, signage, or any other necessary means; OR</p> <p>(4b) Cover frequently traveled unpaved roads with low silt content material (i.e., asphalt, concrete, recycled road base, or gravel to a minimum depth of 4 inches); OR</p> <p>(4c) Treat unpaved roads with water, mulch, chemical dust suppressants or other cover to maintain a stabilized surface.</p>
Equipment Parking Areas	<p>(5a) Apply dust suppressants in sufficient quantity and frequency to maintain a stabilized surface; OR</p> <p>(5b) Apply material with low silt content (i.e., asphalt, concrete, recycled road base, or gravel to a depth of 4 inches).</p>

September 26, 2024

Introduction

The inclusion of single-family zones in the 2021-2029 Housing Element RHNA Re-zoning Program 121 and the CHIP Ordinance has been an ongoing consideration since outreach for the 2021-2029 Housing Element began in 2019. The 2021-2029 Housing Element included RHNA Re-zoning Program 121, which included various concepts for achieving the City's housing goals including strategies focused on single-family zones. Specifically, the Program identified creating incentives on single-family zones near transit through the TOC Expansion Strategy, tailoring incentives in single-family zones for one-hundred percent affordable construction in the Affordable Housing Overlay Zone (AHOZ) strategy, creating more flexibility for the subdivision of single-family lots and the construction of accessory dwelling units through the ADU strategy, and providing mid-scale and missing middle incentives on transit corridors in the Residential Opportunity Corridors and Avenues (OPP RC and OPPRC2) strategies. This followed a lengthy Housing Element Update process that centered on public feedback, equity, and Affirmatively Furthering Fair Housing (AFFH).

This Exhibit presents six distinct options for potential inclusion of single-family zones in the CHIP ordinance that range in geographic eligibility, incentives offered, and affordability requirements, and one option to remove R2 and RD properties from Corridor strategies. These options were intentionally drafted to offer varying geographies and intensities. Some options are more permissive and expansive than others. Development of these options was based on comment letters submitted. Within all of these options VHFHSZ, Coastal Areas, and Sea Level Rise Areas have been excluded.

While inclusion of single family is not necessary for meeting state obligations for AFFH, as outlined in the Staff report. Inclusion of any of the options below would further support equity goals that the City outlined in the 2021-2029 Housing Element. One of the main Housing Element goals was to preserve and enhance the quality of housing and provide greater housing stability for households of all income levels. Objective 4.3 specifically addresses Affirmatively Furthering Fair Housing in all housing and land use programs by taking proactive measures to promote diverse, inclusive communities that grant all Angelenos access to housing, particularly in Higher Opportunity Areas, increase place-based strategies to encourage community revitalization, and protect existing residents from displacement. This is proposed to be implemented through increasing opportunities for Affordable Housing in Higher Opportunity Areas and prioritizing housing capacity, resources, policies, and incentives to include Affordable Housing in residential development, particularly near transit, jobs, and in Higher Opportunity Areas. As provided in the Staff Report, the Proposed Project fulfills the City's AFFH requirements by providing more than half of rezoning capacity in Higher Opportunity Areas. The options below would help increase the proportion of new housing capacity in the City's Higher Opportunity Areas. They would also relieve pressure on existing multi-family zones, reducing potential displacement pressures on existing multi-family development by increasing the amount of land where multi-family uses can be developed in the City.

The table below summarizes the geographic eligibility of each option including which CHIP program they apply to, with detailed descriptions of each option following.

Options Summary Table

	Programs	Eligibility
Option 1	MIIP and AHIP	All Single-Family in Higher Opportunity Areas
Option 2	MIIP	All Single-Family in Opportunity Corridors and Corridor Transition Areas 2 & 3
Option 3	MIIP	Single-Family in Opportunity Corridor 3 and Corridor Transition Areas 2 & 3
Option 4	MIIP	All Single-Family in Opportunity Corridors
Option 5	MIIP	Removed Lower Density Multi-Family Residential zones from Opportunity Corridors
Option 6	AHIP	Single-Family in Moderate and High Opportunity Areas within 0.5 Miles of a Major Transit Stop for One Hundred Percent Affordable Housing Projects, Faith-Based Organization Projects, and Shared Equity Projects
Option 7	AHIP	Single-Family within 0.5 miles of a Major Transit Stop for Shared Equity Projects

A detailed map inventory is included following Option 7.

Option 1 - Comprehensive CHIP Applicability in Higher Opportunity Areas (Advocate Recommendation)

Eligibility

Option 1: Comprehensive CHIP Applicability in Higher Opportunity Areas (Option 1), is the broadest application of single-family zones to the CHIP Ordinance. Several community advocacy groups, including ACT LA, LA Conservancy, YIMBY Law, and a Coalition of organizations including SCANPH, Abundant Housing LA, Urban Environmentalists, and many others have recommended in their comment letters on the CHIP Ordinance that the proposed Ordinance should expand eligibility to include single-family zones in Higher Opportunity Areas in all Mixed Income Incentive Programs (MIIP) and Affordable Housing Incentive Programs (AHIP), including One Hundred Percent Affordable Housing Projects, Faith-Based Organization Projects, and Shared Equity Projects. The request asked that single-family zones receive the same incentives as other eligible sites.

Tables 1 and 2 below summarize which CHIP strategies would be impacted by this policy change and the proposed bonus incentives.

Table 1: Option 1 Mixed Income Incentive Program Base Incentives			
Rezoning Program	Bonus Density	FAR (max.)	Height (max.)
Mixed Income Incentive Program			
Opportunity Corridors Incentive Areas			
OC-1 Single-Family	Limited by Floor Area.	3.0, or 45% increase, whichever is greater.	One additional story, up to 11 additional feet; or up to a maximum of 5 total stories, whichever is greater.
OC-2 Single-Family		3.0 or 50% increase, whichever is greater.	Two additional stories, up to 22 additional feet; or up to a maximum of 6 total stories, whichever is greater.
OC-3 Single-Family		4.65 or 60% increase, whichever is greater.	Three additional stories, up to 33 additional feet; or up to a maximum of 7 total stories, whichever is greater.
Opportunity Corridor Transition Areas			
CT-1 Single-Family	Up to 6 units.	Up to 1.45	2 stories max.
CT-2 Single-Family	Up to 10 units.	Up to 2.0	3 stories max.
CT-3 Single-Family	Up to 16 units.	Up to 2.90	3 stories max.
Transit Oriented Incentive Areas (Higher Opportunity Areas only)			
T-1 Single-Family	Up to 16 units.	3.0 or 40% increase, whichever is greater.	One additional story, up to 11 additional feet; or up to a maximum of 5 total stories, whichever is greater.
T-2 Single-Family	Limited by Floor Area.	3.0 or 45% increase, whichever is greater.	Two additional stories, up to 22 additional feet; or up to a maximum of 6 total stories, whichever is greater.
T-3 Single-Family	Limited by Floor Area.	3.0 or 50% increase, whichever is greater.	Three additional stories, up to 33 additional feet; or up to a maximum of 7 total stories, whichever is greater.

Table 2: Option 1 AHIP Low Density, High and Moderate Opportunity Areas Base Incentives			
Density	Parking	FAR	Height
Limited by FAR.	No Minimum Parking Required.	Maximum of 2.5:1	Bonus of up to 11' or 1 story, whichever is greater.

Considerations

Option 1 as described above is the broadest and most expansive of the options described in this exhibit. Approximately 43,000 parcels zoned for single-family uses (RW and more restrictive zones, excluding A1 and A2 zones) would be included in the MIIP as a result of Option 1, and approximately 160,800 parcels zoned for single-family uses would be included in the AHIP Program.

While this option would continue to support the City’s equity goals, inclusion of this option would exceed the City’s state housing capacity obligations which are currently being addressed through the CHIP program. This option would expand eligibility for the CHIP Ordinance to interior neighborhoods across the Higher Opportunity through the Corridor Transition Areas program, primarily in areas of Mid-City, West LA, and the South Valley and Northwest Valley. **Map 1A through 1C** below shows maps where eligibility would be expanded as a result of Option 1 (for more detailed maps by Area Planning Commission, please refer to the Appendix). Further, inclusion of Option 1 would create new opportunity corridors with single-family zones on major streets with transit service in areas such as the South Valley (Canoga Park - Winnetka - Woodland Hills, West Hills), Northwest Valley (Chatsworth and Northridge).

Option 1 proposes the inclusion of single-family zones to receive the same base incentives as multi-family zones would be eligible to receive in the Mixed Income Incentive Program and Affordable Housing Incentive Program, with some revisions to allow for fixed density bonuses where the current program proposed percentage based increases. Inclusion of single family in the incentives designed for high density development could lead to potential out-of-scale developments without transitional height elements to existing neighborhoods. Additional density and FAR could lead to larger scale developments, potentially up to seven-stories, in existing low-scale neighborhoods, especially in areas located around the highest quality transit service (TOIA T-2 and T-3).

Capacity

The inclusion of Option 1 to the proposed CHIP Ordinance would result in approximately 43,000 parcels zoned single-family (RW and less restrictive zones, excluding A1 and A2 parcels) in the MIIP program. This would increase the proportion of housing opportunities located in Higher Opportunity Areas from approximately 54% to 67%. The distribution of these sites are visible

below in Map 1A-1C at a Citywide level. Maps at an Area Planning Commission Level are available on page 26.

Option 2 - Broader Option Near Transit

Eligibility

Option 2: Broader Options in Transit (Option 2) focuses inclusion of single-family zones in areas of the Mixed Income Incentive Program around corridors with transit service in Higher Opportunity Areas, namely, the Opportunity Corridor Incentive Areas and Opportunity Corridor Transition Incentive Areas. This option proposes reduced incentives for lots in single-family zones (RW and more restrictive, excluding A1 and A2 zones) on Opportunity Corridors, and emphasizes a gentle transition in density and building scale in the Corridor Transition Areas, the farther the site is from the corridor. The development of this option was informed by the Los Angeles Conservancy's Comment Letter. The Conservancy also requested the Corridor Transition 3 (CT-3) incentives be introduced within non-historic single-family zones within 750 feet of an Opportunity Corridor and further requested that non-historic single-family zones facing an eligible opportunity corridor receive the CT-3 incentives. The letter also requested R2 and RD zones be removed from the Opportunity Corridor Program, but remain eligible for Corridor Transition incentives. Staff would recommend a more graduated approach in this scenario to allow for a transition from the corridor and scale incentives based on corridor types. **Table 3** below summarizes the base incentives in Option 2.

Table 3: Option 2 - Mixed Income Incentive Program Base Incentives			
Rezoning Program	Density Bonus	FAR (max.)	Height (max.)
Mixed Income Incentive Program			
Opportunity Corridors Incentive Areas			
OC-1 Single-Family	Up to 6 units.	Up to 1.45:1	2 stories.
OC-2 Single-Family	Up to 10 units.	Up to 2.0:1	3 stories.
OC-3 Single-Family	Up to 16 units.	Up to 2.9:1	3 stories.
Opportunity Corridor Transition Areas			
CT-2 Single-Family (500 feet from OC-2 and OC-3)	Up to 6 units.	Up to 1.45:1	2 stories max.
CT-3 Single-Family (250 feet from OC-2 and OC-3)	Up to 10 units.	Up to 2.0:1	3 stories max.

Considerations

Similar to Option 1 described above, Option 2 introduces context specific incentives that scale down in density and intensity the farther the site is from transit service and the corridor. Option 2 proposes that single-family zones in the most transit rich areas of the City, along Opportunity

Corridor-3 (OC-3) would be eligible to build up to 16 units and up to a maximum of 3 stories in height. Sites adjacent to the corridor would scale down in intensity, and would be allowed to build up to 10 units and up to 3 stories within 250 feet of the Opportunity Corridor. Sites within 500 feet of an OC-3 corridor would be eligible for incentives to build up to 6 units and 2 stories. No incentives would be offered for sites up to 750 feet from an OC-3. As summarized in Table 3 above, reduced incentives would be offered for single-family zones located on Opportunity Corridor-2 (OC-2) and Opportunity Corridor-1 (OC-1), with similar scaled down incentives in the Corridor Transition Areas.

While this option would continue to support the City's equity goals, inclusion of this option would exceed the City's state housing capacity obligations. This option would expand eligibility for the Mixed Income Incentive Program to interior neighborhoods across the Higher Opportunity Areas of the City through the Corridor Transition Areas program, primarily in areas of Mid-City, West LA, and the South Valley and Northwest Valley. However, applicability of this Option is reduced compared to Option 1, as it would not include eligibility for incentives in the Transit Oriented Incentive Areas in Higher Opportunity Areas. **Map 2A** below shows maps where eligibility would be expanded as a result of Option 2.

Option 2 increases the land available for multi-family housing in the West LA and South Valley, and as a result would help adding development pressure in existing multi-family areas. It also provides reduced incentives in single-family zones compared to Option 1, to address potential concerns around out-of-context development. Option 2's emphasis on development in areas with transit and in Higher Opportunity Areas addresses the Housing Element's objective of promoting new multi-family housing, particularly Affordable and mixed-income housing, in areas near transit, jobs and Higher Opportunity Areas, in order to facilitate a better jobs-housing balance, help shorten commutes, and reduce greenhouse gas emissions (Objective 3.2).

Capacity

The analysis for applicability of Option 2 at this time does not exclude eligible resources or remove eligible multi-family parcels from the program. The inclusion of Option 2 to the proposed CHIP Ordinance would result in approximately 24,000 parcels zoned single-family (RW and less restrictive zones, excluding A1 and A2 parcels). This would increase the proportion of housing opportunities located in Higher Opportunity Areas from approximately 54% to 58% (see Figure 2). The distribution of these sites are visible below in Map 2A at a Citywide level. Maps at an Area Planning Commission Level are available on page 26.

Option 2 - Broader Option Near Transit Citywide APCs

Option 3 - Major Transit Stops Only

Eligibility

Option 3: Major Transit Stops (Option 3) focuses inclusion of single-family zones in areas of the Mixed Income Incentive Program around Avenues and Boulevards in TOIA Tiers 2 and 3: the Opportunity Corridor Incentive Areas and Opportunity Corridor Transition Incentive Areas. Single-family zones would be included if they are only along an OC-3 corridor or if they are within 500 feet of the furthest property line from the corridor of an OC-3 site. **Table 4** below summarizes the proposed incentives.

Table 4: Option 3 -Mixed Income Incentive Program Base Incentives			
Rezoning Program	Density Bonus	FAR (max.)	Height (max.)
Mixed Income Incentive Program			
Opportunity Corridors Incentive Areas			
OC-3 Single-Family	Up to 16 units.	Up to 2.9	3 stories max.
Opportunity Corridor Transition Areas			
CT-2 Single-Family (500 feet from OC-3 Single-Family)	Up to 6 units.	Up to 1.45	2 stories max.
CT-3 Single-Family (250 feet from OC-3 Single-Family)	Up to 10 units.	Up to 2.0	3 stories max.

Considerations

Option 3 focuses specifically in areas that provide the highest quality transit services. Between all five options, Option 3 impacts the least single-family zones in the highest priority growth areas. Option 3 proposes that single-family zones in the most transit-rich areas of the City, along Opportunity Corridor-3 (OC-3) would be eligible to build up to 16 units and up to a maximum of 3 stories in height. Sites adjacent to the corridor would scale down in intensity, and would be allowed to build up to 10 units and up to 3 stories within 250 feet of the Opportunity Corridor. Sites within 500 feet of an OC-3 corridor would be eligible for incentives to build up to 6 units and 2 stories. No incentives would be offered for sites up to 750 feet from an OC-3, sites in OC-1, or sites in OC-2.

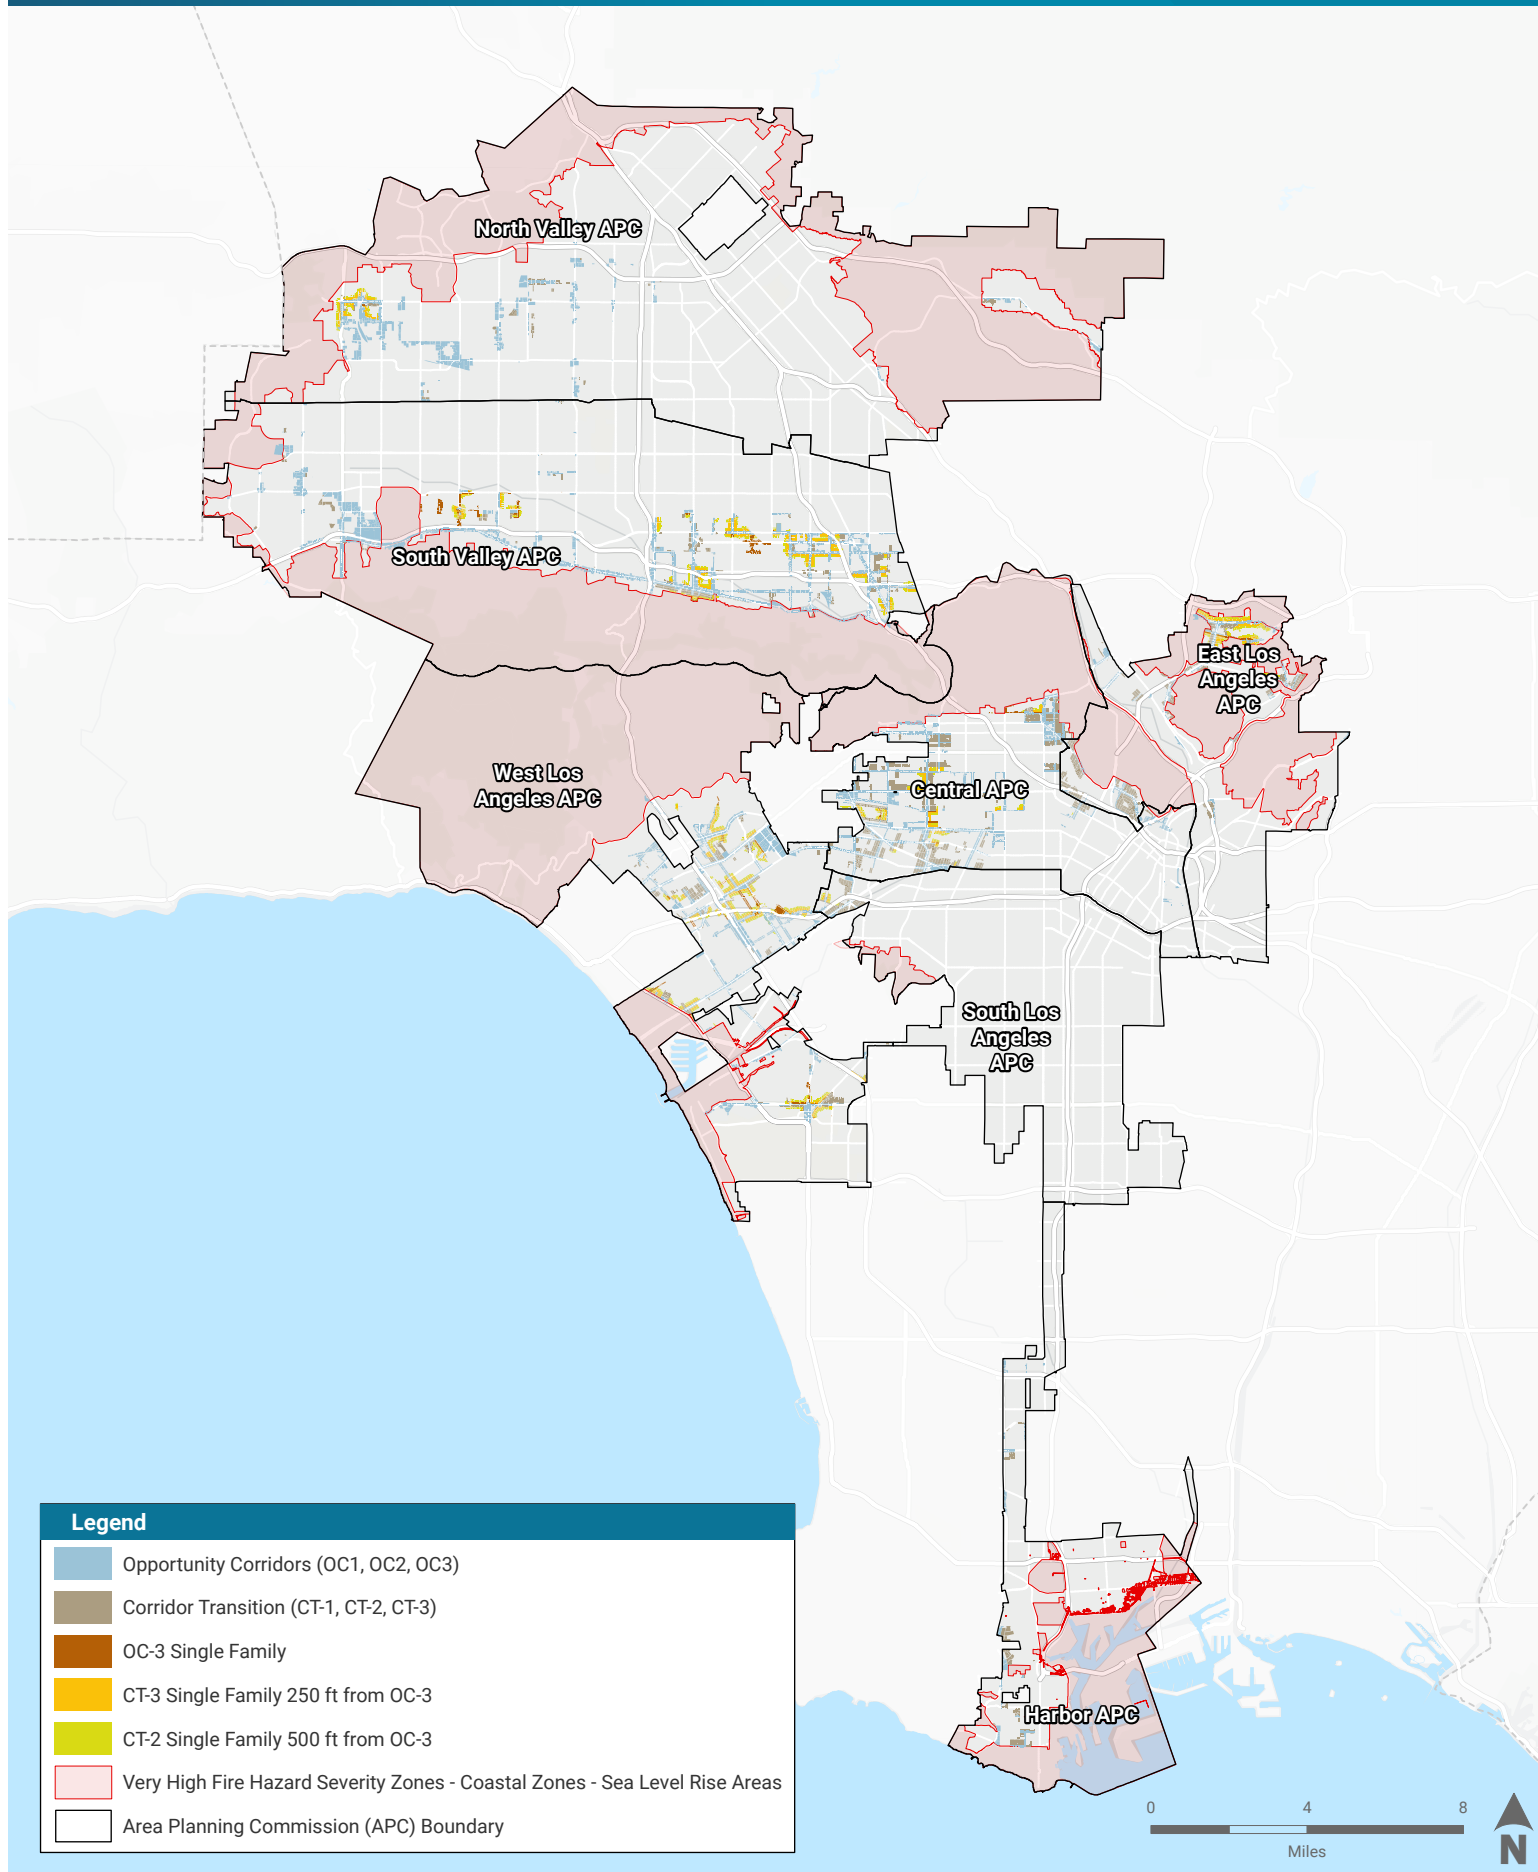

Applicability of this Option is reduced compared to Option 1, as it would not include eligibility for incentives in the Transit Oriented Incentive Areas in Higher Opportunity Areas. **Map 3A** below shows maps where eligibility would be expanded as a result of Option 3.

This option would help increase the proportion of new housing capacity in the City's Higher Opportunity Areas. It would also relieve pressure on existing multi-family zones, reducing potential displacement pressures on existing multi-family development by increasing the amount of land where multi-family uses can be developed in the City. It also addresses concerns we have heard from the public of ensuring that developments are built around public transit stops as housing would be centered around permanent rail stations. However, this option provides the least amount of development potential as Higher Opportunity Areas are unlikely to have OC-3 and CT-2 and CT-3 parcels.

Capacity

The inclusion of Option 3 to the proposed CHIP Ordinance would result in approximately 10,500 parcels zoned single-family (RW and less restrictive zones, excluding A1 and A2 parcels). This would increase the proportion of housing opportunities located in Higher Opportunity Areas from approximately 54% to 56% (see **Figure 3**). The distribution of these sites are visible below in Map 3A at a Citywide level. Maps at an Area Planning Commission Level are available on page 26.

Option 3 Major Transit Stops Citywide APCs

Option 4 - Opportunity Corridors Only

Eligibility

Option 4: Opportunity Corridor Only (Option 4) focuses the inclusion of single-family zones on Avenues and Boulevards through the Opportunity Corridor Incentive Areas in the MIIP. This option proposes the same incentives for zones in single-family zones as the other eligible zones in the Opportunity Corridors strategy. **Table 5** below summarizes the proposed incentives.

Table 5: Option 4 Mixed Income Incentive Program Base Incentives			
Rezoning Program	Bonus Density	FAR (max.)	Height (max.)
Mixed Income Incentive Program			
Opportunity Corridors Incentive Areas			
OC-1 Single-Family	Limited by Floor Area.	3.0, or 40% increase, whichever is greater.	One additional story, up to 11 additional feet; or up to a maximum of 5 total stories, whichever is greater.
OC-2 Single-Family		3.0 or 45% increase, whichever is greater.	Two additional stories, up to 22 additional feet; or up to a maximum of 6 total stories, whichever is greater.
OC-3 Single-Family		4.5 or 50% increase, whichever is greater.	Three additional stories, up to 33 additional feet; or up to a maximum of 7 total stories, whichever is greater.

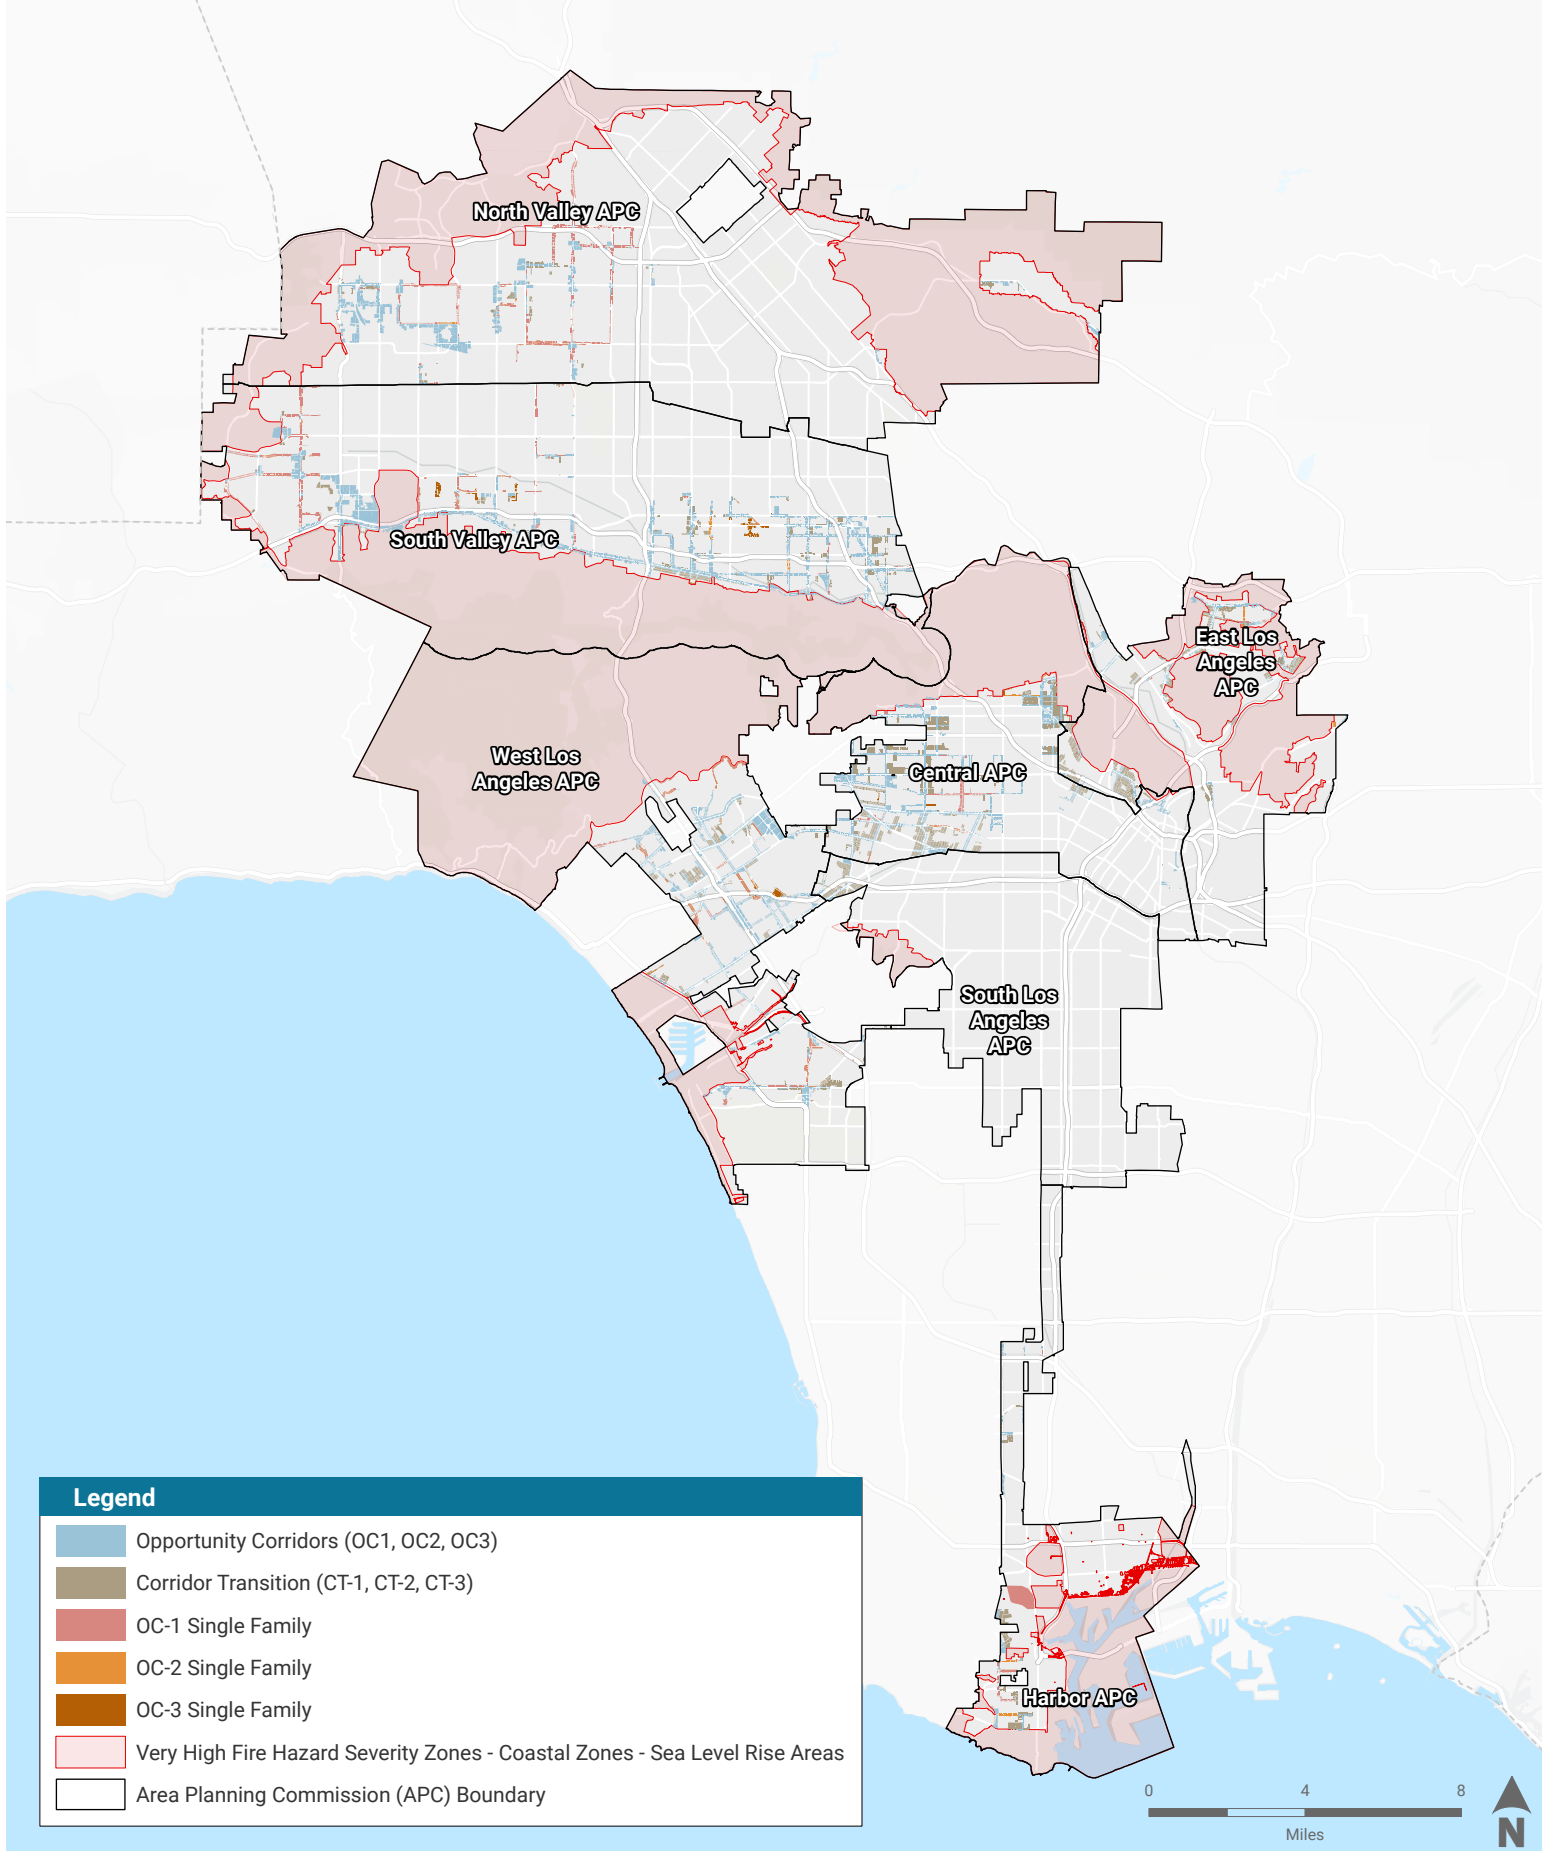

Considerations

Option 4 would introduce continuity of building massing and scale along transit served corridors in Higher Opportunity Areas, as the single-family zones would receive similar incentives as the multi-family zones on Opportunity Corridors, as proposed in the CHIP Ordinance. As with Option 1, described above, the inclusion of single-family zones would create new Opportunity Corridors in areas of the city, most notably in the South Valley (Canoga Park - Winnetka - Woodland Hills, West Hills) and Northwest Valley (Chatsworth and Northridge). These corridors have transit service along them, but were not eligible for the proposed Opportunity Corridors Incentive Areas program due to single-family zoning. While this option would continue to support the City's obligations to AFFH and equity goals, inclusion of this option would exceed the City's state housing capacity obligations which are currently being addressed through the CHIP program. **Map 4A** below shows maps where eligibility would be expanded as a result of this Option.

Capacity

The inclusion of Option 4 to the proposed CHIP Ordinance would result in approximately 6,500 parcels zoned single-family (RW and less restrictive zones, excluding A1 and A2 parcels). This would increase the proportion of housing opportunities located in Higher Opportunity Areas from approximately 54% to 58% (see **Figure 4**). The distribution of these sites are visible below in Map 4A at a Citywide level. Maps at an Area Planning Commission Level are available on page 26.

Option 4: Opportunity Corridors Only Citywide APCs

Option 5 - Limited Multi-Family Zones in Opportunity Corridors

Eligibility

Option 5: Limited Multi-Family Zones in Opportunity Corridors (Option 5) responds to an advocacy push from the Sawtelle Neighborhood and LA Conservancy to focus inclusion of single-family zones on Avenues and Boulevards through the Opportunity Corridor Incentive Areas in the MIIP. Additionally, advocates have asked that R2 and RD zones in the proposed Opportunity Corridors Incentive Areas program be removed from eligibility, citing concerns regarding displacement of existing low density housing opportunities. This option proposes removing R2 and RD zones from eligibility in the Opportunity Corridors as proposed in the Opportunity Corridors Program in the proposed CHIP Ordinance. Sites zoned single-family (RW and less restrictive) are not included in the Corridor Transition Incentive Areas.

Considerations

Option 5 would address concerns raised by advocates regarding displacement of existing low density multi-family housing in Higher Opportunity Areas. This option would remove R2 and RD zones, which are often already built out with existing low scale housing from the proposed Opportunity Corridors program in the CHIP Ordinance. The removal of these zones from the proposed CHIP Ordinance could result in a shift in the proportion of rezoning program sites located in Higher Opportunity Areas, as described in the Capacity section, below. **Map 5A** below shows maps where eligibility would be expanded as a result of this Option.

Capacity

The inclusion of Option 5 to the proposed CHIP Ordinance would result in the removal of approximately 1,900 sites zoned for R2 and RD zones, and capacity for approximately 15,000 housing units. As a result of the removal of R2 and RD zones from Opportunity Corridor Incentive program eligibility, the overall proportion of housing opportunities located in Higher Opportunity Areas as part of the Program would decrease from approximately 54% to 53% (see **Figure 5**). The distribution of these sites are visible below in Map 5A at a Citywide level. Maps at an Area Planning Commission Level are available on page 26.

Option 5 - Reduced Multi-Family Zones in Opportunity Corridors Citywide APCs

Legend

- Opportunity Corridors (OC1, OC2, OC3)
- Very High Fire Hazard Severity Zones - Coastal Zones - Sea Level Rise Areas
- Area Planning Commission (APC) Boundary

Option 6 - High Opportunity Transit Areas in AHIP

Eligibility

Option 6 proposes single-family eligibility for One Hundred Percent Affordable Projects, Faith-Based Organization Projects, and Shared Equity Projects on parcels located within 0.5 miles of a Major Transit Stop and in Higher and Moderate Opportunity Areas. These parcels would be eligible for the low density option (sites with a maximum allowable residential density of less than 5 units) of Moderate and Higher Opportunity Area base incentives already available in AHIP as displayed in the chart below, provided that the proposed projects contain 100% covenanted Affordable units.

Table 6: Low Density, High and Moderate Opportunity Base Incentives in AHIP			
Density	Parking	FAR	Height
Limited by FAR.	No Minimum Parking Required.	Maximum of 2.5:1	Bonus of up to 11' or 1 story, whichever is greater.

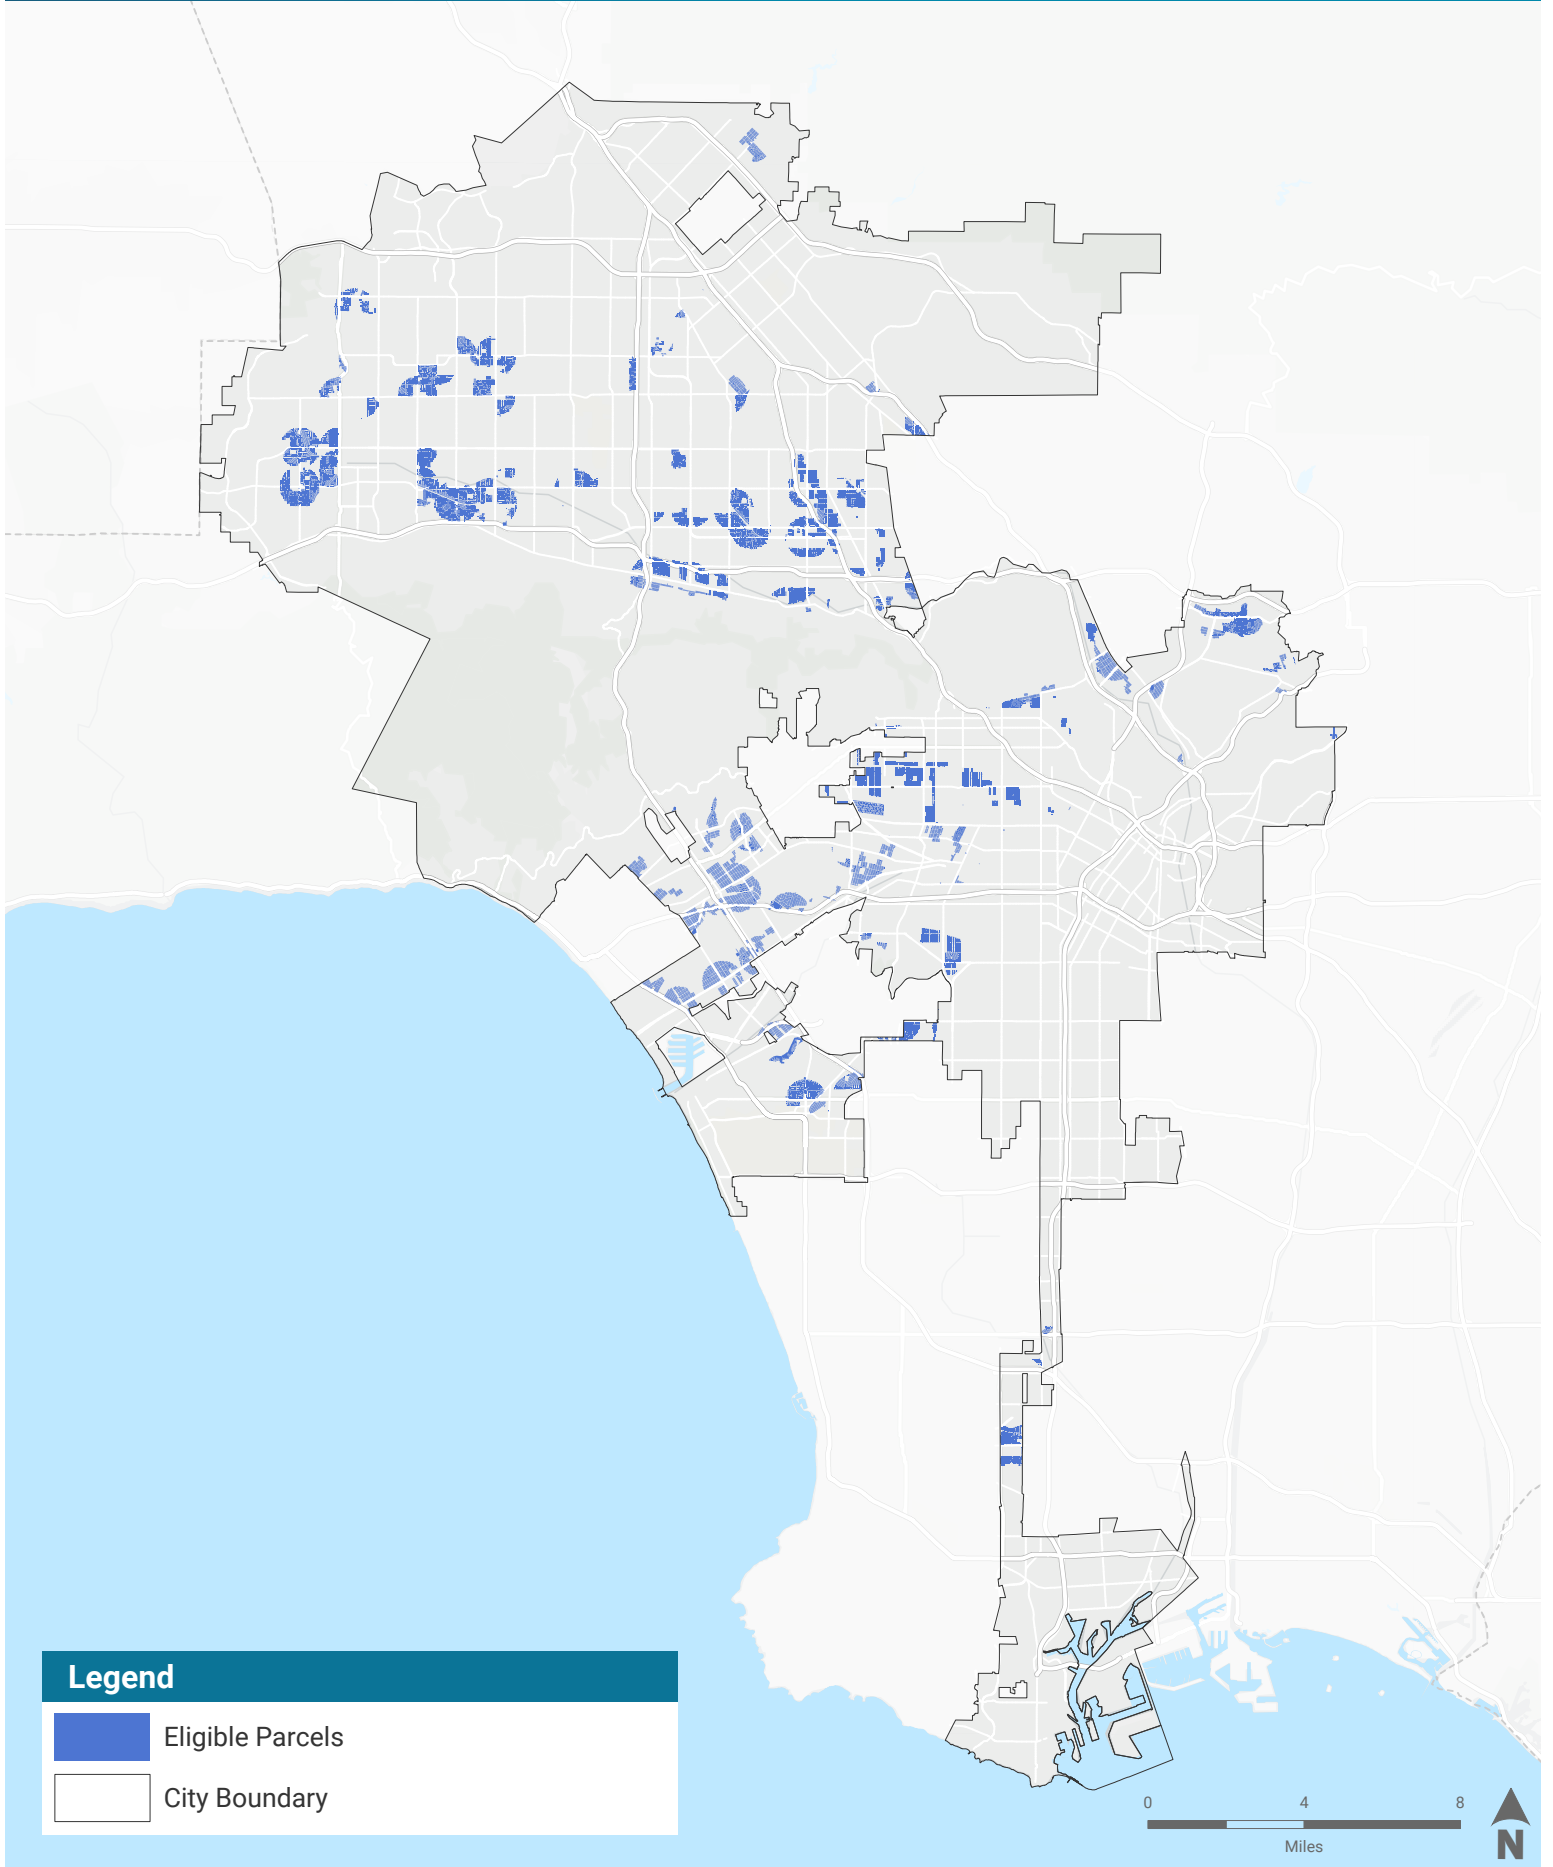

Considerations

Option 6 limits the development to a community scale with a maximum of 2.5:1 FAR and height at an addition of 11 feet or 1 story for the base incentives, providing a strong control on the potential height and density of a project. Option 6 incentivizes housing development in single-family zones within 0.5 miles of a Major Transit Stop, promoting access to jobs, shortening commutes, and reducing greenhouse gas emissions. Incentivizing affordable housing development in neighborhoods with strong transit networks provides a pathway to heightened sustainability and mobility within the community and citywide.

Capacity

Option 6 increases potential sites eligible for AHIP, with notable increases on the Westside and in the Valley (see map below). Approximately 66,800 parcels would become eligible for AHIP based on geographic eligibility and single-family zoning through Option 6. Notably, the majority (approximately 69%) of these parcels are in Higher Opportunity Areas as designated by TCAC. The distribution of these sites are visible below in Map 6A at a Citywide level.

AHIP Single Family Inclusion Option 6: Single Family Parcels within a Half Mile of a Major Transit Stop, in Moderate and Higher Opportunity Areas

Legend

-  Eligible Parcels
-  City Boundary

Option 7 - Shared Equity Projects Citywide Near Transit

Eligibility

In addition to Option 6, additional incentives could be introduced for single-family zones on Land owned by a Community Land Trust, Limited Equity Cooperative, or Workforce Housing Cooperative within half a mile of a major transit stop. Option 7 also includes parcels within 0.5 miles of a major transit stop like Option 6, but has more expansive eligibility by allowing parcels in all levels of opportunity, not just Moderate and High Opportunity Areas. However, Option 7 solely permits Shared Equity Projects access to incentives in single-family, while Option 6 grants eligibility to Shared Equity Projects, One Hundred Percent Affordable Projects, and Faith-Based Organization Projects.

Table 7: Within Half a Mile of a Major Transit Stop Base Incentives in AHIP			
Density	Parking	FAR	Height
Limited by FAR.	No Minimum Parking Required.	Maximum of 2.0:1	Bonus of up to 11' or 1 story, whichever is greater.

Considerations

Shared equity models created by nonprofit community land trusts and cooperatives are an emerging form of non-speculative housing development that stewards land for low and moderate income households, leasing land as an ownership interest or charging affordable rents to tenants. Measure ULA, approved by Los Angeles voters in 2022, has allocated funding towards these models as a way of formulating long-term solutions that address the root cause of the housing crisis. The Citywide Housing Incentive Program could offer complementary land use incentives for this influx of funding, that would likewise assist future non-ULA funded projects.

Community land trusts have difficulty competing for land with market rate developers, as shared in an informational session between these organizations and City Planning. Offering these organizations an exclusive incentive area not accessible to other developers provides an incubation opportunity for emerging alternative land stewardship models. Due to financial constraints regarding construction costs and the purchasing of land, most limited equity model projects have historically focused on preservation or rehabilitation. Granting an exclusive incentive area to these organizations would facilitate more new-build community land trust and cooperative projects, while responding to displacement pressure with a supply oriented solution.

Capacity

The shared equity model is new and only resulted in a limited number of projects. It is therefore difficult to predict the realistic development capacity for this project type within the 2021 - 2029 planning period, and inclusion of incentives for this project type is not expected to result in significant capacity increases. Approximately 139,000 parcels would be eligible, with a majority approximately 52% located in Lower Opportunity Areas, approximately 15% located in Moderate Opportunity Areas, and approximately 33% located in Higher Opportunity Areas. The distribution of these sites are visible below in Map 7A at a Citywide level.

AHIP Single Family Inclusion Option 7: Shared Equity Projects in Single Family Zones within a Half Mile of a Major Transit Stop Citywide

EXHIBIT C.2:
**Proposed DRAFT Environmental Protection Measures Handbook
for Housing Element Rezoning Program**

CPC-2023-7068-CA, CPC-2024-387-CA, CPC-2024-388-CA

For consideration by the City Planning Commission

Note to Reader: Proposed revisions are highlighted in [blue text](#) throughout the document.

September 26, 2024

ENVIRONMENTAL PROTECTION MEASURES HANDBOOK

SECTION 1. ADMINISTRATIVE PROVISIONS

A. Authority. These Environmental Protection Measures are adopted pursuant to [Section 11.5.15 of Chapter 1 and Div. 4C.13 \(Environmental Protection\)](#) of Chapter 1A of the LAMC.

B. Applicability. An Environmental Protection Measure (EPM) applies to a Project that:

1. Is subject to the Environmental Protection Measures per Sec. 4A.2.2. (Development Standards Applicability) of Chapter 1A of the LAMC; or
2. Is made subject to an EPM by any applicability threshold in the EPM in [Section 3](#); or
3. Is made subject to EPMs by any section or provision in the LAMC;

AND the Project:

1. Meets the applicability threshold for that specific EPM set forth in [Section 3. \(Environmental Protection Measures\)](#) of this Handbook.

C. Required Compliance with Environmental Protection Measures (EPM). Failure to comply with any applicable EPM as required in Subsection B. (Applicability), above, will be subject to all remedies available pursuant to [Sec. 4C.13.1.D \(Noncompliance\)](#) of Chapter 1A of the LAMC; or for projects approved under [Chapter 1 of the LAMC](#), subject to all civil, criminal and administrative remedies available for a violation of the LAMC pursuant to [Section 11.5.15](#).

D. Additional Requirements. In addition to complying with any applicable EPM as required in Subsection B. (Applicability), above, an Applicant and Owner shall comply with all of the following:

1. Imprint all EPMs on all plans that are reviewed and approved by LADBS. More specifically, if an Applicant submits construction or operational plans as part of the Project description for a land use application, the Applicant shall imprint all EPMs on those plans. An Applicant may also include in the Project description and/or plans described above any best practices from [Appendix 1 \(Best Practices\)](#) the Applicant intends to implement as part of the Project, as they deem them necessary and/or desirable to: (i) ensure compliance with applicable local, state, and federal laws; (ii) protect public health and safety; or (iii) meet other elective performance standards, such as LEED designation.
2. Sign and submit an affidavit to LADBS, at Plan Check prior to the issuance of any grading, excavation, or building permit, in which the Applicant and Owner acknowledge the requirements of the EPM standards and sign an affidavit of intent to comply. The affidavit shall substantially conform to the example provided in [Appendix 2](#) attached to this EPM Handbook.
3. Notify any contractor hired by the Applicant or Owner who is doing work subject to one or more EPM standards of the requirement to comply with the applicable EPM(s); and collect a signed acknowledgement of the notice from the contractor, consistent with the Contractor Acknowledgement in [Appendix 3](#) attached to this EPM Handbook.
4. Maintain a copy of all EPM(s) on the Project site at all times during construction.
5. Obtain a qualifications sheet or statement demonstrating proof of qualifications for any Qualified Expert, as defined below in [Section 1.G. \(Definitions\)](#), who is required in the applicable EPMs and retained for purposes of preparing a survey, study or report; performing site monitoring activities; or otherwise ensuring compliance with

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

the applicable EPM(s).

6. Maintain a copy of all records documenting compliance with the EPM Handbook for a minimum of five years after the Certificate of Occupancy is issued. Records of compliance include but are not limited to any reports, studies, certifications, or surveys required in any applicable EPM in Section 3 (Environmental Protection Measures); the qualifications sheet or statement for any retained Qualified Expert; and any acknowledgment, notice, or Statement of Compliance required in Section 1 (Administrative Provisions) or Section 2 (Required Notices) of this EPM Handbook.
 7. Upon request of a City inspector or officer, produce records of compliance, referenced in paragraph 6, above, for inspection as follows:
 - a. Immediately, while construction activities are on-going at the site.
 - b. At any other time, within 72 hours' notice.
- E. Best Practices. Attached in Appendix 1 (Best Practices) to this EPM Handbook is a set of best practices to avoid or reduce adverse impacts to certain environmental resources. The best practices in Appendix 1 are intended to be used as guidelines but are not mandated.
- F. Acronyms. For purposes of this EPM Handbook, the following acronyms used herein are defined as follows:
- CEQA. California Environmental Quality Act, Public Resources Code Sections 21000—21189.57, and California Code of Regulations, Title 14, Chapter 3, Sections 15000—15387 (CEQA Guidelines).
- DTSC. Department of Toxic Substances Control.
- LADBS. City of Los Angeles Department of Building and Safety.
- LADPW. City of Los Angeles Department of Public Works.
- LAFD. City of Los Angeles Fire Department.
- SCAQMD. South Coast Air Quality Management District.
- USEPA. United States Environmental Protection Agency.
- G. Definitions. For purposes of this EPM Handbook, the following words and phrases used herein are defined as follows:
- Active Nest. An Active Nest is one that contains viable eggs and/or chicks. A nest becomes active when the first egg is laid and remains active until fledged young are no longer dependent on the nest. Nests that are empty, contain nonviable eggs, or are being built but do not yet have an egg in them are considered inactive.
- Applicant. The person or entity who files an application for a Project. Once an application has been approved, the Applicant includes any successor or assignee of the original Applicant.
- Best Available Control Technology. As defined in the federal Clean Air Act Section 169(3), this refers to production processes and available methods, systems, and techniques, including fuel cleaning or treatment or innovative fuel combustion techniques for the control of pollutants, that result in the maximum emission reduction that the permitting authority determines is achievable.
- Ground Disturbance Activities. Any earthwork activity including, but not limited to, excavating, digging, trenching, plowing, drilling, tunneling, quarrying, grading, leveling, removing peat, clearing, driving posts, augering, backfilling,

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

blasting, stripping topsoil or a similar activity at a Project site.

Hazardous Materials. Any substance or material that has been determined to be capable of posing an unreasonable risk to health, safety, and property when transported in commerce.

Hazardous Waste. A solid waste with properties that make it dangerous or capable of having a harmful effect on human health or the environment.

Heavy Construction Equipment. Equipment used during construction that has a minimum of 300 horsepower and operating weight of 80,000 pounds or more. Examples include a large bulldozer or excavator.

Historic Resources Survey. A document, officially recognized by a local, state, or federal agency, resulting from a process of systematically identifying and documenting buildings, structures, objects, cultural landscapes, natural features, and historic districts that reflect important themes in the city's growth and development or the historic or cultural significance of a given area. Historic resources surveys may identify these Surveyed Historic Resources as potentially eligible for listing in the National Register of Historic Places, California Register of Historical Resources, or City of Los Angeles List of Historic-Cultural Monuments, including National and California Register Historic Districts or Los Angeles Historic Preservation Districts. In Historic Preservation Districts (See Sec. 8.2.6. Historic Preservation Districts (HPOZ) of Chapter 1A of the LAMC), historic resources surveys must be certified as to accuracy and completeness by the Cultural Heritage Commission (See Sec. 13.A.1.5. (Cultural Heritage Commission) of Chapter 1A of the LAMC).

Hillside Area. Lots identified as being in a Hillside Area, as established in Chapter 1A of the LAMC, Sec.1.5.6. (Hillside Area Map).

Noise-Sensitive Uses. Any of the following uses: Dwelling; Mobile Home Park; Supportive Housing (including General, Medical Care, Non-Medical, and Transitional Shelter); Lodging; School (including K-12, Post-Secondary, and Preschool/Daycare); Religious Assembly; Medical (including Local and Regional); Entertainment Venue, Indoor, Regional; Amphitheater or Stadium (including Major and Minor); Recreation, Public; Open Space, Public, (with the exception of privately-owned plazas); and Public Libraries, defined as any publicly-accessible facility, owned or operated by a governmental or community organization, that provides free access to books, periodicals, and other digital and physical media and may also provide community or instructional services. See Part 5D. (Use Definitions) of Chapter 1A of the LAMC for definitions of these terms.

Owner. Any person, association, partnership, firm, corporation, or public entity, identified as the holder of title on any property as shown on the records of the City Engineer or on the last assessment roll of the County of Los Angeles, as applicable. For purposes of this Handbook, Owner also refers to an appointed representative of an association, partnership, firm, corporation, or public entity, which is a recorded Owner.

Petroleum Engineer. A professional engineer with at minimum a bachelor's degree in petroleum engineering, mechanical engineering, or chemical engineering and work experience in engineering, geology, and/or thermodynamics fields.

Project. Any project activity subject to Div. 4C.13 (Environmental Protection) of Chapter 1A of the LAMC per Sec. 4A.2.2B (Project Activities) of Chapter 1A of the LAMC.

Protected Tree or Shrub. Any protected tree or shrub as defined in Sec. 46.01 (Definitions) of Article 6 (Preservation of Protected Trees and Shrubs) of Chapter 4 (Public Welfare) of the LAMC.

Qualified Expert. A person with specified knowledge, skill, education, experience and/or training in a specialized field, including the following types of experts:

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

- **Archaeological Monitor.** An archaeologist who has a minimum of a bachelor's or equivalent degree in archaeology, anthropology, paleontology, or another closely related field and no less than one year of experience conducting archaeological monitoring and/or excavation in similar regional archaeological contexts.
- **Paleontological Monitor.** A paleontologist who has a minimum of a bachelor's or equivalent degree in geology or paleontology and no less than one year of experience performing paleontological monitoring and salvaging fossil materials in the relevant geologic province; or an equivalent degree in biology or pursuit of a degree in geology or paleontology and no less than two years of comparable experience.
- **Qualified Archaeologist.** A professional archaeologist who meets the Secretary of the Interior's Archeology and Historic Preservation Professional Qualification Standards and is eligible for listing on the Register of Professional Archaeologists or the Society for American Archaeology; holds a graduate degree in archaeology or a related field; and has a minimum of five years of experience completing and supervising field work in archaeological contexts similar to the Project site.
- **Qualified Biologist.** A biologist with the appropriate education, training and experience to conduct biological surveys, monitor Project activities that have the potential to affect biological resources, provide construction worker education programs related to the protection of biological resources, and supervise or perform other tasks related to biological resources; possesses a bachelor's or equivalent degree in biology, ecology, or a related environmental science; and has at least five years of professional experience that requires knowledge of natural history, habitat affinities, and identification of flora and fauna species, and relevant local, state and federal laws and regulations governing the protection of biological resources.
- **Qualified Environmental Professional.** An environmental professional who is credentialed through the Institute of Professional Environmental Practice (IPEP); holds a bachelor's or equivalent degree in physical, earth or natural sciences, engineering, or mathematics; and has at least five years of professional environmental work experience, or eight years of professional environmental work experience with a degree in a discipline other than those listed above.
- **Qualified Historian.** A person with a graduate degree in architectural history or a closely related area of study, such as art history or historic preservation, and at least one year of experience in applying the methods and practices of architectural history in the historic preservation arena; or with a bachelor's or equivalent degree in one of the same areas of study and at least three years of related experience.
- **Qualified Noise Expert.** An acoustics professional who is a member of the Institute of Noise Control Engineering (INCE) or National Council of Acoustical Consultants (NCAC) and has a minimum of five years of experience conducting noise and vibration measurements, monitoring, modeling, and mitigation; analysis of such measurements; and related activities.
- **Qualified Paleontologist.** A paleontologist who meets the Society of Vertebrate Paleontology standards for a Principal Investigator or Project Paleontologist; has demonstrated competence in field techniques, preparation, identification, curation, and reporting and/or a graduate degree in paleontology or geology or a publication record in peer reviewed journals; at least two years professional experience with administration and project management experience; proficiency in recognizing fossils in the field and determining their significance; expertise in local geology, stratigraphy, and biostratigraphy; and experience collecting vertebrate fossils in the field.
- **Qualified Structural Engineer.** A civil engineer who holds licenses as both a Professional Engineer (PE) and a Structural Engineer (SE) from the State Board for Professional Engineers, Land Surveyors, and Geologists and who has at least three years of civil engineering experience.

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

- **Qualified Tribal Monitor.** A tribal representative who possesses the knowledge, skills, abilities and experience established by the Native American Heritage Commission's (NAHC) Guidelines for Native American Monitors/Consultants (2005), and as may be amended.

Sensitive Uses. Any of the following uses: any Residential use; Medical, Regional or Medical, Local; School (including Preschool/Daycare, K-12, and Post-secondary); Recreation, Public; or Open Space, Public.

Statement of Compliance. A written statement that acknowledges which EPM(s) apply to a Project and includes an affidavit of intent to comply with those applicable EPM(s), signed by the Applicant and Owner. A sample Statement of Compliance is provided in Appendix 2 attached to this EPM Handbook.

Surveyed Historic Resource. Any building, structure, landscaping, or natural feature identified through a Historic Resources Survey as potentially eligible for listing in the National Register of Historic Places, California Register of Historical Resources, or City of Los Angeles List of Historic-Cultural Monuments, including National and California Register Historic Districts or Los Angeles Historic Preservation District.

To the Extent Available and Feasible. Employment of best efforts to implement or comply with a requirement, assuming any necessary technology, equipment, or other resources are readily available and costs or other constraints are not prohibitive.

- H. While the Environmental Protection Measures and Notices may be considered in any environmental analysis for a Project, consistent with the California Environmental Quality Act and its Guidelines, nothing herein is intended to control any analysis or mitigation measure required by the City, acting as a lead or responsible agency.

SECTION 2. REQUIRED NOTICES

In addition to any other requirement in this EPM Handbook, LADBS shall provide notices and collect acknowledgements of those notices from Applicants and Owners at Plan Check, as provided below.

A. Projects Requiring Grading or Excavation. Prior to issuance of a permit for grading or excavation, LADBS shall issue the following notice(s) and obtain a signed acknowledgement that the notice(s) was received and read by the Applicant and Owner.

1. Archaeological, Paleontological, and Tribal Cultural Resources Notice: Several laws regulate the treatment of archaeological, paleontological, and tribal cultural resources and make it a criminal violation to destroy those resources. These regulations include, but are not limited to:

- California Penal Code Section 622½ provides the following: “Every person, not the owner thereof, who willfully injures, disfigures, defaces, or destroys any object or thing of archeological or historical interest or value, whether situated on private lands or within any public park or place, is guilty of a misdemeanor.”
- Public Resources Code Section 5097.5(a) provides: “A person shall not knowingly and willfully excavate upon, or remove, destroy, injure, or deface, any historic or prehistoric ruins, burial grounds, archaeological or vertebrate paleontological site, including fossilized footprints, inscriptions made by human agency, rock art, or any other archaeological, paleontological or historical feature, situated on public lands, except with the express permission of the public agency having jurisdiction over the lands.” A violation of Section 5097.5 is a misdemeanor subject to a fine up to \$10,000 and/or a year in jail, and potential restitution.

Appendix 1 (Best Practices) to this City of Los Angeles EPM Handbook includes suggested best practices to avoid damage to archaeological, paleontological, and tribal cultural resources.

B. Projects Requiring Grading, Excavation, or Building. Prior to issuance of a permit for grading, excavation, or building, LADBS shall issue all of the following notice(s) and obtain a signed acknowledgement that the notice(s) was received and read by the Applicant and Owner.

1. Nesting Bird Notice. Under the federal Migratory Bird Treaty Act, among other prohibitions, it is unlawful to destroy migratory birds or remove bird nests. Under California Fish and Game Code Section 3503, et seq., among other prohibitions, it is unlawful to destroy nests and eggs of any bird. Appendix 1 (Best Practices) to this City of Los Angeles EPM Handbook includes suggested best practices to avoid damage to Active Nests.
2. Noise and Vibration Notice. The Los Angeles Municipal Code (LAMC) regulates excessive noise, including from construction activities and uses of property, including but not limited to those regulations in LAMC Chapter XI, ‘Noise Regulation.’ Appendix 1 (Best Practices) to this City of Los Angeles EPM Handbook includes suggested best practices to avoid excessive vibration.

SECTION 3. ENVIRONMENTAL PROTECTION MEASURES

For each Environmental Protection Measure (EPM) provided in this Section there is an applicability threshold and a standard. Projects that meet all of the criteria in the applicability thresholds shall comply with the associated EPM standards, as provided in Section 1. (Administrative Provisions).

A. Air Quality Standard (AQ1)—Operation of Construction Equipment

1. AQ1-1: Dust Control Compliance with SCAQMD Rule 403

a. Applicability Threshold

Any Project whose construction activities involve the use of construction equipment and require a permit from LADBS.

b. Standard

Consistent with SCAQMD Rule 403, best available dust control measures (see Appendix 4) shall be implemented during Ground Disturbance Activities and active construction operations capable of generating dust.

2. AQ1-2: Equipment Maintenance

a. Applicability Threshold

Any Project whose construction activities involve the use of construction equipment and require a permit from LADBS.

b. Standard

Maintain construction equipment in good, properly tuned operating condition, as specified by the manufacturer, to minimize exhaust emissions. Documentation demonstrating that the equipment has been maintained in accordance with the manufacturer's specifications shall be maintained per the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements).

All construction equipment shall achieve emissions reductions that are no less than what could be achieved by a Tier 3 diesel emissions control strategy for a similarly sized engine as defined by California Air Resources Board regulations.

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

3. AQ1-3: Vehicle Idling Limit and Notification Signs

a. Applicability Threshold

Any Project whose construction activities involve the use of construction vehicles and require a permit from LADBS.

b. Standard

Vehicle idling during construction activities shall be limited to five minutes as set forth in the California Code of Regulations, Title 13, Section 2449. Signs shall be posted in areas where they will be seen by vehicle operators stating idling time limits.

4. AQ1-4: Non-Diesel Fueled Electrical Power

a. Applicability Threshold

Any Project whose construction activities involve the use of construction equipment and require a permit from LADBS.

b. Standard

Electricity from power poles rather than temporary gasoline or diesel-powered generators shall be used To the Extent Available and Feasible.

5. AQ1-5: Emissions Standards for Off-Road Construction Equipment Greater than 50 Horsepower

a. Applicability Threshold

Any Project whose construction activities involve the use of construction equipment, require a permit from LADBS, and involve at least 5,000 cubic yards of on-site cut/fill on any given day.

b. Standard

All off-road diesel-powered construction equipment equal to or greater than 50 horsepower shall meet the U.S. Environmental Protection Agency's (USEPA) Tier 4 emission standards during construction. Operators shall maintain records of all off-road equipment associated with Project construction to document that each piece of equipment used meets these emission standards per the proof of compliance requirement in Sec. 1.D.6. (Additional Requirements).

In lieu of compliance with the above requirement, an air quality study prepared in accordance with the SCAQMD's Air Quality Handbook may be provided by the Applicant or Owner demonstrating that Project construction activities would not exceed the SCAQMD's regional and localized construction thresholds.

6. AQ1-6: Use of Low Polluting Fuels

a. Applicability Threshold

Any Project whose construction activities involve the use of construction equipment, require a permit from LADBS, and involve at least 5,000 cubic yards of on-site cut/fill on any given day.

b. Standard

Construction equipment less than 50 horsepower shall use low polluting fuels (i.e., compressed natural gas, liquid petroleum gas, and unleaded gasoline).

In lieu of compliance with the above requirement, an air quality study prepared in accordance with the SCAQMD's Air Quality Handbook may be provided by the Applicant or Owner demonstrating that Project construction activities would not exceed the SCAQMD's regional and localized construction thresholds.

7. AQ1-7: Emission Standards for On-Road Haul Trucks

a. Applicability Threshold

Any Project whose construction activities involve the use of construction equipment, require a permit from LADBS, and involve more than 90 round-trip haul truck trips on any given day for demolition debris and import/export of soil.

b. Standard

Construction haul truck operators for demolition debris and import/export of soil shall use trucks that meet the California Air Resources Board's (CARB) 2010 engine emissions standards at 0.01 g/bhp-hr of particulate matter (PM) and 0.20 g/bhp-hr of nitrogen oxides (NOX) emissions. Operators shall maintain records of all trucks associated with Project construction to document that each truck used meets these emission standards per the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements).

In lieu of compliance with the above requirement, an air quality study prepared in accordance with the SCAQMD's Air Quality Handbook may be provided by the Applicant or Owner demonstrating that Project construction activities would not exceed the SCAQMD's regional and localized construction thresholds.

8. AQ1-8: Routes for On-Road Haul Trucks

a. Applicability Threshold

Any Project whose construction activities involve the use of construction vehicles and require a permit from LADBS.

b. Standard

Construction contractors shall reroute construction trucks away from congested streets or Sensitive Uses, as feasible. The burden of proving that compliance is infeasible shall be upon the Applicant or Owner. Where avoiding Sensitive Uses and congested streets altogether is infeasible, routing away from Sensitive Uses shall be prioritized over routing away from congested streets.

B. Biological Resources Standards (BR1)—Protected Trees

Reserved.

C. Biological Resources Standards (BR2)—Special Status Species

Reserved.

D. Biological Resources Standards (BR3)—Nesting Native and Migratory Birds

1. BR3-1: Restriction of Ground Disturbance Activity

a. Applicability Threshold

Any Project for which an active bird nest has been discovered on-site.

b. Standard

If any active bird nest is found during a pre-construction nesting bird survey or is discovered inadvertently during earthwork or construction-related activities, a Qualified Biologist shall be retained by the Applicant or Owner to

determine an appropriate avoidance buffer which shall be no less than is necessary to protect the nest, eggs and/or fledglings, from damage or disturbance in consideration of the following factors: the bird species, the availability of suitable habitat within the immediate area, the proposed work activity, and existing disturbances associated with surrounding land uses. The buffer shall be demarcated using bright orange construction fencing, flagging, construction lathe, or other means to mark the boundary of the buffer. All construction personnel shall be notified of the buffer zone and shall avoid entering the protected area. No Ground Disturbing Activities or vegetation removal shall occur within this buffer area until the Qualified Biologist has confirmed that breeding/nesting is complete and the young have fledged the nest and/or that the nest is no longer an Active Nest. The Qualified Biologist shall prepare a report prior to the issuance of any building permit detailing the results of the nesting bird survey and subsequent monitoring, which shall be maintained pursuant to the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements).

E. Cultural Resources Standards (CR1)—Archaeological Resources

1. CR1-1: Inadvertent Discovery

a. Applicability Threshold

Any Project that requires a permit for grading or excavation.

b. Standard

If a possible archaeological resource is uncovered during earthwork or construction, all work shall cease within a minimum distance of 50 feet from the find until a Qualified Archaeologist has been retained to evaluate the find in accordance with National Register of Historic Places and California Register of Historical Resources criteria. The Qualified Archaeologist may adjust this avoidance area, ensuring appropriate temporary protection measures of the find are taken while also considering ongoing construction needs in the surrounding area. Temporary staking and delineation of the avoidance area shall be installed around the find in order to avoid any disturbance from construction equipment. Ground Disturbance Activities may continue unimpeded on other portions of the site outside the specified radius.

Any potential archaeological resource or associated materials that are uncovered shall not be moved or collected by anyone other than an Archaeological Monitor or Qualified Archaeologist unless the materials have been determined to be non-unique archaeological resources, as defined in Public Resources Code Section 21083.1(h), by the Qualified Archaeologist. The Qualified Archaeologist shall determine if the resources are unique archeological resources as defined in Public Resources Code Section 21083.2(g).

Consistent with Public Resources Code Section 21083.2, the handling, treatment, preservation, and recordation of unique archaeological resources should occur as follows:

- The find should be preserved in place or left in an undisturbed state unless the Project would damage the resource.
- When preserving in place or leaving in an undisturbed state is not possible, excavation and recovery of the find for scientific study should occur unless testing or studies already completed have adequately recovered the scientifically consequential information from and about the resource, and this determination is documented by a Qualified Archaeologist.

Ground Disturbance Activities in the area where resource(s) were found may recommence once the identified resources are properly assessed and processed by a Qualified Archaeologist. A report that describes the resource(s) and its disposition, as well as the assessment methodology, shall be prepared by the Qualified

Archaeologist according to current professional standards and maintained pursuant to the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements). If appropriate, the report should also contain the Qualified Archaeologist's recommendations for the preservation, conservation, and curation of the resource at a suitable repository, such as the Natural History Museum of Los Angeles County, with which the Applicant or Owner must comply.

F. Cultural Resources Standards (CR2)—Zanja Madre and the Zanja System

1. CR2-1: Zanja Madre HAER Documentation

a. Applicability Threshold

Any project that requires a permit for grading or excavation and that is located within one mile of the currently known and mapped segments of the Zanja system (see Appendix 5).

b. Standard

Projects within 500 feet of the currently mapped known segments of the Zanja system (see Appendix 5) have increased likelihood of encountering segments of the Zanja system during construction. The Zanja system includes the Zanja Madre and its outbranching secondary Zanja segments. If possible segments of the Zanja system are uncovered during earthwork or construction, all work shall cease within a minimum distance of 50 feet from the find until a Qualified Archaeologist has been retained to inspect and evaluate the find. The Qualified Archaeologist may adjust this avoidance area, ensuring appropriate temporary protection measures of the find are taken while also considering ongoing construction needs in the surrounding area. Temporary staking and delineation of the avoidance area shall be installed around the find in order to avoid any disturbance from construction equipment. Ground Disturbance Activities may continue unimpeded on other portions of the site outside the specified radius.

At a minimum, and even if avoided, should the find be determined to be related to the Zanja system, the Qualified Archaeologist shall prepare a memo and complete all relevant State of California Department of Parks and Recreation (DPR) DPR 523 forms documenting the find.

If the Qualified Archaeologist, having evaluated the find, determines that the find retains integrity, documentation consistent with the standards and guidelines established the Historic American Engineering Record (HAER) shall be undertaken and transmitted to the Library of Congress before any alteration, demolition, construction, or removal activity may occur within the determined avoidance area. Documentation shall include narrative records, measured drawings, and photographs in conformance with HAER Guidelines. The found segments shall also be mapped using Geographic Information Systems (GIS) or 3D mapping technology in order to contribute to the existing record of the location and extent of the Zanja system as a whole. At minimum, GIS data shall include the geographic coordinates and depth of all portions of the find. All records, including geographic data, georeferenced photographs, and information about the depth of the find shall be submitted to City Planning. Report documentation and GIS files shall additionally be provided to the South Central Coastal Information Center (SCCIC) located at California State University, Fullerton.

In addition to HAER documentation, if determined appropriate by the Qualified Archaeologist, one or more of the following specific treatments shall be developed and implemented based on potential California Register eligibility criteria or the significance of the find as a unique archaeological resource:

- i. Treatment Under Criterion 1: Treatment shall include interpretation of the Zanja system for the public. The interpretive materials may include, but not be limited to, interpretive displays of photographs and drawings produced during the HAER documentation, signage at the Zanja Madre alignment, relocating preserved

segments in a publicly accessible display, or other visual representations of Zanja alignments through appropriate means such as a dedicated internet website other online-based materials. At a minimum, the interpretive materials shall include photographs and drawings produced during the HAER documentation and signage. These interpretive materials shall be employed as part of Project public outreach efforts that may include various forms of public exhibition and historic image reproduction. Additionally, the results of the historical and archaeological studies conducted for the Project shall be made available to the public through repositories such as the local main library branch or with identified non-profit historic groups interested in the subject matter. The interpretive materials shall be prepared at the expense of the Project applicant, by professionals meeting the Secretary of the Interior's Professional Qualifications Standards in history or historical archaeology. The development of the interpretive materials shall consider any such materials already available to the public so that the development of new materials would add to the existing body of work on the historical Los Angeles water system, and to this end, shall be coordinated, to the extent feasible and to the satisfaction of the Department of City Planning, in consultation with the Office of Historic Resources. The interpretive materials shall include a consideration of the Zanja segment located on the Project Site in relation to the entire Zanja system. The details of the interpretive materials, including the content and format, and the timing of their preparation, shall be completed to the satisfaction and subject to the approval of the Department of City Planning, in consultation with the Office of Historic Resources.

- ii. Treatment Under Criterion 2: No additional work; archival research about important persons directly associated with the construction and use of the Zanja system would be addressed as part of HAER documentation.
- iii. Treatment Under Criterion 3: No additional work; HAER documentation is sufficient.
- iv. Treatment Under Criterion 4: No additional work; archaeological data recovery and HAER documentation are sufficient.
- v. Treatment as a unique archaeological resource, as defined by PRC Section 21083.2(g): Same as Criterion 1 treatment.

G. Cultural Resources Standards (CR3)—Paleontological Resources

1. CR3-1: Inadvertent Discovery

a. Applicability Threshold

Any Project that requires a permit for grading or excavation.

b. Standard

If a probable paleontological resource is uncovered during earthwork or construction, all work shall cease within a minimum distance of 50 feet from the find until a Qualified Paleontologist has been retained to evaluate the find in accordance with the Society of Vertebrate Paleontology's Standard Procedures for the Assessment and Mitigation of Adverse Impacts to Paleontological Resources. Temporary flagging shall be installed around the find in order to avoid any disturbance from construction equipment. Any paleontological materials that are uncovered shall not be moved or collected by anyone other than a Qualified Paleontologist or his/her designated representative such as a Paleontological Monitor. If cleared by the Qualified Paleontologist, Ground Disturbance Activities may continue unimpeded on other portions of the site. The found deposit(s) shall be treated in accordance with the Society of Vertebrate Paleontology's Standard Procedures. Ground Disturbance Activities in the area where resource(s) were found may recommence once the identified resources are properly assessed and processed by a Qualified Paleontologist. A report that describes the resource and its disposition, as well as the assessment methodology,

shall be prepared by the Qualified Paleontologist according to current professional standards and maintained pursuant to the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements). If appropriate, the report should also contain the Qualified Paleontologist's recommendations for the preservation, conservation, and curation of the resource at a suitable repository, such as the Natural History Museum of Los Angeles County, with which the Applicant or Owner must comply.

H. Cultural Resources Standards (CR4)—Tribal Cultural Resources

1. CR4-1: Inadvertent Discovery

a. Applicability Threshold

Any Project that requires a permit for grading or excavation.

b. Standard

If a possible tribal cultural resource is uncovered during earthwork or construction, all work shall cease within a minimum distance of 50 feet from the find until a Qualified Tribal Monitor or Archaeological Monitor has been retained to evaluate the find.

Following discovery, the Applicant or Owner shall immediately contact all Native American tribes that have informed the City of Los Angeles they are traditionally and culturally affiliated with the geographic area of the Project, as well as the Department of City Planning, Office of Historic Resources (OHR). If a Qualified Tribal Monitor or Archaeological Monitor determines, pursuant to Public Resources Code Section 21074(a)(2), that the object or artifact appears to be a potential tribal cultural resource, in its discretion and supported by substantial evidence, the Applicant and Owner shall provide any affected tribe a reasonable period of time, not less than five business days, to conduct a site visit and make recommendations to the Applicant or Owner and OHR regarding the monitoring of future Ground Disturbance Activities and the treatment and disposition of any discovered tribal cultural resources. The Applicant or Owner shall implement the tribe's recommendations if the Qualified Tribal Monitor or Archaeological Monitor reasonably concludes such recommendations are reasonable and feasible.

Consistent with Public Resources Code Section 21083.2, the handling, treatment, preservation, and recordation of tribal cultural resources should occur as follows:

- The find should be preserved in place or left in an undisturbed state unless the Project would damage the resource.
- When preserving in place or leaving in an undisturbed state is not possible, excavation and recovery of the find for scientific study should occur unless testing or studies already completed have adequately recovered the scientifically consequential information from and about the resource, and this determination is documented by a Qualified Tribal Monitor or Qualified Archaeologist.

All collected artifacts and fieldwork notes, if not human remains or other mortuary objects, shall be curated at the Natural History Museum of Los Angeles County or another appropriate curatorial facility for educational purposes. If cleared by the Qualified Tribal Monitor or Archaeological Monitor, Ground Disturbance Activities may continue unimpeded on other portions of the site. Ground Disturbance Activities in the area where resource(s) were found may recommence once the identified resources are properly assessed and processed. A report that describes the resource and its disposition, as well as the assessment methodology shall be prepared by the Qualified Tribal Monitor or Archaeological Monitor, according to current professional standards and maintained pursuant to the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements). A copy of the report shall be submitted to OHR, the South Central Coastal Information Center at California State University, Fullerton and to

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

the Native American Heritage Commission for inclusion in its Sacred Lands File. If requested by the City, OHR may review and approve any monitoring or mitigation plan prior to implementation.

I. Hazardous Materials Standards (HM1)—Hazardous Materials Site

1. HM1-1: Unanticipated Hazards

a. Applicability Threshold

Any Project that requires a grading, excavation, or building permit from LADBS. In addition to any other Project that requires a grading, excavation, or building permit from LADBS, this environmental protection measure is applicable to projects approved under 12.22 A.37 (State Density Bonus Program), 12.22 A.38 (Mixed Income Incentive Program), 12.22 A.39 (Affordable Housing Incentive Program), or 16.70 (Housing Element Sites and Minimum Density Ordinance) are also subject to this measure if they meet the above applicability threshold.

b. Standard

In the event that suspected Hazardous Materials, contamination, debris, or other features or materials that could present a threat to human health or the environment are discovered during earthwork or construction, such activities shall cease immediately until the affected area is evaluated by a Qualified Environmental Professional. If the Qualified Environmental Professional determines that a hazard exists, a remediation plan shall be developed by the Qualified Environmental Professional in consultation with the appropriate regulatory agency, and the remediation identified shall be completed. Work shall not resume in the affected area until appropriate actions have been implemented in accordance with the remediation plan, to the satisfaction of the regulatory agency.

A report that describes the Hazardous Materials, contamination or debris and its disposition, shall be prepared by the Qualified Environmental Professional, according to current professional standards and maintained pursuant to the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements).

2. HM1-2: Environmental Site Assessment(s)

a. Applicability Threshold

Any Project that requires a grading, excavation, or building permit from LADBS or approved under 12.22 A.37 (State Density Bonus Program), 12.22 A.38 (Mixed Income Incentive Program), 12.22 A.39 (Affordable Housing Incentive Program), or 16.70 (Housing Element Sites and Minimum Density Ordinance); and which is:

vi. Located on or within 500 feet of a Hazardous Materials site listed in any of the following databases:

- State Water Resources Control Board GeoTracker (refer to <https://geotracker.waterboards.ca.gov>);
- DTSC EnviroStor (refer to <https://www.envirostor.dtsc.ca.gov/public>);
- DTSC Hazardous Waste Tracking System (refer to <https://hwts.dtsc.ca.gov>);
- LAFD Certified Unified Program Agency (refer to the active, inactive, and historical inventory lists at <https://www.lafd.org/fire-prevention/cupa/public-records>);
- Los Angeles County Fire Department Health Hazardous Materials Division (refer to the active and inactive facilities, site mitigation, and California Accidental Release Prevention inventory lists at <https://fire.lacounty.gov/public-records-requests>);
- SCAQMD Facility Information Detail (refer to <https://xapprod.aqmd.gov/find>); or

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

- vii. Located on or within 500 feet of a Hazardous Materials site designated as a Resource Conservation and Recovery Act (RCRA) Small Quantity Generator or Large Quantity Generator (refer to the USEPA Envirofacts database at <https://enviro.epa.gov/index.html>); or
- viii. Located in an Oil Drilling District (O) or located on or within ~~the following buffers as identified by the by the California Geologic Energy Management Division (refer to <https://www.conservation.ca.gov/calgem/Pages/WellFinder.aspx>);~~
 - ~~50~~ 1,000 feet of a property identified as having an active oil well or an oil field ~~(active or inactive) by the California Geologic Energy Management Division (refer to <https://www.conservation.ca.gov/calgem/Pages/WellFinder.aspx>);~~ or
 - 200 feet of a property identified as having an idle oil well or field; or
 - 100 feet of a property identified as having a plugged oil well or field.
- ix. Located on land currently or previously designated with an industrial use class or industrial zoning, in whole or in part; or
- x. Located on land currently or previously used for a gas station or dry cleaning facility.

Or:

- xi. The Applicant or Owner are aware or have reason to be aware that the Project site was previously used for an industrial use, gas station or dry cleaner.

And:

- xii. The site has not been previously remediated to the satisfaction of the relevant regulatory agency/agencies for any contamination associated with the above uses or site conditions, or the site was not previously assessed in a Phase I Environmental Site Assessment (ESA) in the prior two years, which found no Recognized Environmental Conditions (REC), or a subsequent Phase II that concluded there are no RECs..

b. Standard

A Phase I Environmental Site Assessment shall be prepared by a Qualified Environmental Professional in accordance with State standards/guidelines and current professional standards, including the American Society for Testing and Materials' (ASTM) Standard Practice for Environmental Site Assessments, to evaluate whether the site, or the surrounding area, is contaminated with hazardous substances from any past or current land uses, including contamination related to the storage, transport, generation, or disposal of toxic or Hazardous Waste or materials.

If the Phase I identifies a Recognized Environmental Condition (REC) and/or if recommended in the Phase I, a Phase II Environmental Site Assessment shall also be prepared by a Qualified Environmental Professional. The Phase I and/or Phase II Environmental Site Assessment(s) shall be maintained pursuant to the proof of compliance requirements in Section I.D.6 and made available for review and inclusion in the case file by the appropriate regulatory agency, such as the State Water Resources Control Board, the State Department of Toxic Substances Control, or the LAFD Hazard Mitigation Program. Any remediation plan recommended in the Phase II Environmental Site Assessment or by the appropriate regulatory agency shall be implemented and, if required, a No Further Action letter shall be issued by the appropriate regulatory agency prior to issuance of any permit from LADBS, unless the regulating agency determines that remedial action can be implemented in conjunction with excavation and/or grading. If oversight or approval by a regulatory agency is not required, the Qualified

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

Environmental Professional shall provide written verification of compliance with and completion of the remediation plan, such that the site meets the applicable standards for the proposed use, which shall be maintained pursuant to the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements).

3. HM1-3: County Fire Department Oversight

a. Applicability Threshold

Any Project that generates or handles Hazardous Material(s) and/or Hazardous Waste of quantities at any one time during a year equal to or greater than a volume of 55 gallons, a total weight of 500 pounds, or a total of 200 cubic feet of a compressed gas.

b. Standard

Prior to the issuance of a building permit, the Applicant and Owner shall report the required operator, site, training, emergency response and contingency information in the California Environmental Reporting System (CERS), in coordination with the Los Angeles County Fire Department Health Hazardous Materials Division. Documentation of all CERS reporting shall be maintained pursuant to the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements).

J. Hazardous Materials Standards (HM2)—Abandoned Oil Wells

Reserved.

K. Noise and Vibration Standards (NV1)—Construction Noise

1. NV1-1: Noise Shielding and Muffling

a. Applicability Threshold

Any Project whose earthwork or construction activities involve the use of powered exterior construction equipment and require a permit from LADBS.

b. Standard

Powered exterior construction equipment (including combustion engines), fixed or mobile, shall be equipped with noise shielding and muffling devices consistent with manufacturers' standards or the Best Available Control Technology. All equipment shall be properly maintained, and the Applicant or Owner shall require any construction contractor to keep documentation on-site during any earthwork or construction activities demonstrating that the equipment has been maintained in accordance with manufacturer's specifications. Construction hours shall be posted on-site along with a contact for any issues related to construction.

2. NV1-2: Use of Driven Pile Systems

a. Applicability Threshold

Any Project whose earthwork or construction activities involve the use of construction equipment and require a permit from LADBS.

b. Standard

Driven (impact) pile systems shall not be used, except in locations where the underlying geology renders drilled piles, sonic, or vibratory pile drivers infeasible, as determined by a soils or geotechnical engineer and documented in a soils report.

3. NV1-3: Enclosure or Screening of Outdoor Mechanical Equipment

a. Applicability Threshold

Any Project whose earthwork or exterior construction activities involve the use of powered construction equipment and require a permit from LADBS.

b. Standard

All outdoor mechanical equipment (e.g., generators, compressors) shall be enclosed or visually screened. The equipment enclosure or screen shall be impermeable (i.e., solid material with minimum weight of 2 pounds per square feet) and break the line of sight between the equipment and any off-site Noise-Sensitive Uses.

4. NV1-4: Location of Construction Staging Areas

a. Applicability Threshold

Any Project whose earthwork or construction activities involve the use of construction equipment and require a permit from LADBS.

b. Standard

Construction staging areas, including those related to constructing a mat pour foundation, shall be located as far from Noise-Sensitive Uses as reasonably possible and technically feasible in consideration of site boundaries, topography, intervening roads and uses, and operational constraints. The burden of proving that compliance is technically infeasible shall be upon the Applicant or Owner. Technical infeasibility shall mean that noise barriers

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

cannot be located between construction activities and Noise-Sensitive Uses due to site boundaries, topography, intervening roads and uses, and/or operational constraints.

5. NV1-5: Temporary Walls

a. Applicability Threshold

Any Project whose earthwork or exterior construction activities involve the use of powered construction equipment and require a permit from LADBS; and whose construction activities are located within a line of sight to and within 500 feet of Noise-Sensitive Uses, with the exception of Projects limited to the construction of 2,500 square feet or less of floor area.

b. Standard

Noise barriers, such as temporary walls (minimum ½-inch thick plywood) or sound blankets (minimum STC 25 rating),¹ that are a minimum of eight feet tall, shall be erected between construction activities and Noise-Sensitive Uses as reasonably possible and technically feasible in consideration of site boundaries, topography, intervening roads and uses, and operational constraints. The burden of proving that compliance is technically infeasible shall be upon the Applicant or Owner. Technical infeasibility shall mean that noise barriers cannot be located between construction activities and Noise-Sensitive Uses due to site boundaries, topography, intervening roads and uses, and/or operational constraints.

6. NV1-6: Noise Study

a. Applicability Threshold

Any Project whose earthwork or exterior construction activities involve the use of powered construction equipment and require a permit from LADBS; are located within 500 feet of Noise-Sensitive Uses; and have one or more of the following characteristics:

- i. Two or more subterranean levels;
- ii. 20,000 cubic yards or more of excavated material
- iii. Exterior simultaneous use of five or more pieces of powered construction equipment; or
- iv. Construction duration (excluding architectural coatings) of 18 months or more.

Or any Project whose construction activities involve impact pile driving or the use of 300 horsepower equipment.

b. Standard

A Noise Study prepared by a Qualified Noise Expert shall be required and prepared prior to obtaining any permit by LADBS. The Noise Study shall characterize expected sources of earthwork and construction noise that may affect identified Noise-Sensitive Uses, quantify expected noise levels at these Noise-Sensitive Uses, and recommend measures to reduce noise exposure to the extent noise reduction measures are available and feasible, and to demonstrate compliance with any noise requirements in the LAMC. Specifically, the Noise Study shall identify noise reduction devices or techniques to reduce noise levels in accordance with accepted industry practices and in compliance with LAMC standards. Noise reduction devices or techniques shall include but not be limited to mufflers, shields, sound barriers, and time and place restrictions on equipment and activities. The Noise Study shall identify anticipated noise reductions at Noise-Sensitive Uses associated with the noise reduction

¹1. At a Sound Transmission Class (STC) rating of 25, soft speech can be heard and understood.

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

measures. Applicants and Owners shall be required to implement and comply with all measures identified and recommended in the Noise Study. The Noise Study and copies of any contractor agreements shall be maintained pursuant to the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements).

7. NV1-7: LAUSD Notification

a. Applicability Threshold

Any Project located within 200 feet of an LAUSD facility whose earthwork or construction activities involve the use of powered exterior construction equipment and require a permit from LADBS.

b. Standard

LAUSD shall be notified of future construction activities.

L. Noise and Vibration Standards (NV2)—Construction Vibration

1. NV2-1: Baseline Survey and Vibration Control Plan

a. Applicability Threshold

Any Project, with the exception of Projects limited to the construction of 2,500 square feet or less of floor area, whose earthwork or construction activities: (1) involve the use of construction equipment, including Heavy Construction Equipment, that produces 0.12 PPV or more of vibration at a distance of 25 feet (see reference vibration levels in Appendix 6); (2) require a permit from LADBS; and (3) which occur:

- v. Within 25 feet of any building extremely susceptible to vibration damage, including unreinforced masonry buildings, wood-frame multi-story buildings with soft, weak or open front walls, and non-ductile concrete buildings that have not been retrofitted, or a building that is designated or determined to be a historic resource pursuant to local or state law or that is determined to be potentially eligible for historic designation in a Historic Resources Survey; or
- vi. Within 15 feet of non-engineered timber and masonry buildings.

Or any Project whose construction activities involve the use of pile drivers within 135 feet of any building extremely susceptible to vibration damage, including existing unreinforced masonry buildings, existing tilt-up concrete wall buildings, existing wood-frame multi-story buildings with soft, weak or open front walls, and existing non-ductile concrete buildings, or a building that is designated or determined to be a historic resource pursuant to local or state law or that is determined to be potentially eligible for historic designation in a Historic Resources Survey.

b. Standard

Prior to demolition, grading/excavation, or construction, a Qualified Structural Engineer shall prepare a survey establishing baseline structural conditions of potentially affected structures and a Vibration Control Plan, which shall include methods to minimize vibration, including, but not limited to:

- i. A visual inspection of the potentially affected structures to document (by video and/or photography) the apparent physical condition of the building (e.g., cracks, broken panes, etc.).
- ii. A shoring design to protect the identified structures from potential damage;
- iii. Use of drilled piles or a sonic vibratory pile driver rather than impact pile driving, when the use of vibrating equipment is unavoidable;

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

- iv. Use of rubber-tired equipment rather than metal-tracked equipment; and
- v. Avoiding the use of vibrating equipment when allowed by best engineering practice.

2. NV2-2: Repair of Damage

a. Applicability Threshold

Any Project, with the exception of Projects limited to the construction of 2,500 square feet or less of floor area, whose earthwork or construction activities: (1) involve the use of construction equipment, including Heavy Construction Equipment, that produces 0.12 PPV or more of vibration at a distance of 25 feet (see reference vibration levels in Appendix 6); (2) require a permit from LADBS; and (3) which occur:

- i. Within 25 feet of any building extremely susceptible to vibration damage, including unreinforced masonry buildings, tilt-up concrete wall buildings, wood-frame multi-story buildings with soft, weak or open front walls, and non-ductile concrete buildings, or a building that is designated or determined to be a historic resource pursuant to local or state law or that is determined to be potentially eligible for historic designation in a Historic Resources Survey; or
- ii. Within 15 feet of non-engineered timber and masonry buildings.

Or any Project whose construction activities involve the use of pile drivers within 135 feet of any building extremely susceptible to vibration damage, including existing unreinforced masonry buildings, existing tilt-up concrete wall buildings, existing wood-frame multi-story buildings with soft, weak or open front walls, and existing non-ductile concrete buildings, or a building that is designated or determined to be a historic resource pursuant to local or state law or that is determined to be potentially eligible for historic designation in a Historic Resources Survey.

b. Standard

In the event of damage to any non-historic building due to construction vibration, as verified by the Qualified Structural Engineer, a letter describing the damage to the impacted building(s) and recommendations for repair shall be prepared by the Qualified Structural Engineer within 60 days of the time when damage occurred. Repairs shall be undertaken and completed, at the Owner's or Applicant's expense, in conformance with all applicable codes.

In the event of vibration damage to any building that is designated or determined to be a historic resource pursuant to local or state law or that is determined to be potentially eligible for historic designation in a Historic Resources Survey, a letter describing the damage to the impacted building(s) and recommendations for repair shall be prepared by the Qualified Historian within 60 days of the time when damage occurred. Repairs shall be undertaken and completed, at the Owner's or Applicant's expense, in conformance with the California Historical Building Code (Title 24, Part 8) as well as the Secretary of the Interior's Standards for the Treatment of Historic Properties and associated guidelines, as applicable and as determined by the Qualified Historian.

3. NV2-3: Vibration Sensitive Uses

a. Applicability Threshold

Any Project, with the exception of Projects limited to the construction of 2,500 square feet or less of floor area, whose earthwork or construction activities involve the use of equipment with high vibration levels in close proximity to vibration sensitive uses including hospital and veterinary operating centers, imaging facilities, and recording studios. Specifically, this includes use of a vibratory roller within 250 feet of such uses or use of a large bulldozer or drill-rig within 150 feet of such uses.

b. Standard

- iii. Prior to demolition, grading/excavation, or construction, a Qualified Vibration Consultant shall prepare a vibration impact analysis at the vibration sensitive use and shall prepare a vibration control plan, to minimize vibration impacts.
- iv. The qualified vibration consultant shall take vibration monitoring measurements during use of the vibratory roller within 250 of the vibration sensitive use and during use of the large bulldozer or drill-rig within 150 feet of the vibration sensitive use in order to assess the actual impact of vibration on the structures and to incorporate and adjust techniques as necessary to reduce vibration. To the extent the adjacent vibration sensitive use allows the applicant to conduct monitoring within the adjacent sensitive use, baseline monitoring prior to construction and monitoring during these construction activities shall be conducted at the sensitive use. The engineer shall insure the incorporation of measures that reduce vibration at the sensitive use.
- v. Noticing of the scheduling of various phases of construction will be submitted to the adjacent vibration-sensitive use 45 days in advance of activities and shall identify the dates of activity, the hours of activity, types of equipment to be used and the anticipated noise and vibration levels.

M. Pedestrian Safety Standards (PS1)—Safe and Accessible Walkways

Reserved.

APPENDIX 1. BEST PRACTICES

Disclaimer: The following best practices were developed by the City in consultation with environmental consultants who specialize in preparing environmental impact reports (EIRs) to comply with the California Environmental Quality Act, Public Resources Code, Sections 21000, et seq. Best practices are professional procedures, methods, or techniques that are accepted or prescribed as industry standards and considered correct or most effective. Nothing provided in this Appendix is intended to be a mandate or to relieve an Applicant and an Owner from their responsibility to comply with any and all applicable laws. The City assumes no responsibility for any Applicant's or Owner's use or reliance upon the best practices provided herein and does not guarantee their adequacy for any purpose. Any use by any person of the best practices provided herein is solely at the discretion and responsibility of that person.

A. Archaeological Resources

The following best practices are recognized by archaeologists and environmental consultants to ensure archaeological resources are not damaged during grading, excavation, or other Ground Disturbance Activities:

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

1. Records Search. A cultural resources records search should be requested from and conducted by the California Historical Resources Information System's (CHRIS) South Central Coastal Information Center (SCCIC) located at California State University, Fullerton to determine whether any cultural resources have been previously identified on or within a 0.5-mile radius of the Project site. The results of this records search shall be used as an indicator of the archaeological sensitivity of the Project site.
2. A Qualified Archaeologist shall be retained and use all reasonable methods, consistent with professional standards and best practices, to determine the potential for archaeological resources to be present on the Project site.
3. If the Qualified Archaeologist determines there is a medium to high potential that archaeological resources may be located on the Project site and it is possible that such resources will be impacted by the Project, the Qualified Archaeologist shall advise the Applicant and Owner to retain an Archaeological Monitor to observe all Ground Disturbance Activities within those areas identified as having a medium to high potential in order to identify any resources and avoid potential impacts to such resources.
4. Monitoring. An Archaeological Monitor should monitor excavation and grading activities in soils that have not been previously disturbed in order to identify and record any potential archaeological finds and avoid potential impacts to such resources. In the event of a possible archaeological discovery, the Archaeological Monitor shall notify a Qualified Archaeologist. The Archaeological Monitor has the authority to temporarily halt earthwork activities.
 - a. Handling, Evaluation, and Preservation. Any archaeological resource materials or associated materials that are uncovered shall not be moved or collected by anyone other than an Archaeological Monitor or Qualified Archaeologist unless they have been determined to be nonunique archaeological resources, as defined in Public Resources Code Section 21083.1(h) by a Qualified Archaeologist. A Qualified Archaeologist shall determine if the resources are unique archeological resources as defined in Public Resources Code Section 21083.2(g).
5. Consistent with Public Resources Code Section 21083.2, the handling, treatment, preservation, and recordation of unique archaeological resources should occur as follows:
 - b. The find should be preserved in place or left in an undisturbed state unless the Project would damage the resource.
 - c. When preserving in place or leaving in an undisturbed state is not possible, excavation and recovery of the find for scientific study should occur unless testing or studies already completed have adequately recovered the scientifically consequential information from and about the resource, and this determination is documented by a Qualified Archaeologist.
6. If recommended by the Qualified Archaeologist, the resource(s) shall be curated by a public, non-profit institution with a research interest in the material, such as the Natural History Museum of Los Angeles County or another appropriate curatorial facility for educational purposes.
7. Ground Disturbance Activities in the area where resource(s) were found may recommence once the identified resources are properly assessed and processed by a Qualified Archaeologist.

B. Biological Resources

The following best practices are recognized by biologists to ensure Active Nests are not damaged or disturbed during construction or Ground Disturbance Activities, which is a violation of the Federal Migratory Bird Treaty Act and the

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

State Fish and Game Code:

1. Pre-Construction Survey. If a Project proposes the demolition of a structure or removal of a tree or vegetation during bird nesting season (February 1 to August 31), a pre-construction nesting bird survey of all suitable habitat shall be conducted no more than 10 days prior to the initiation of demolition or tree or vegetation removal to determine if nesting birds are present. The pre-construction nesting bird survey shall be conducted on foot within the Project site boundaries by a Qualified Biologist.
2. No Nests Found. If the pre-construction survey indicates bird nests are not present or are inactive, or if potential habitat is unoccupied, no further avoidance is required.
3. Buffer for Active Nest. If any active bird nest is found during a pre-construction nesting bird survey, a Qualified Biologist shall recommend an avoidance buffer which shall be no less than is necessary to protect the nest, eggs and/or fledglings, from damage or disturbance in consideration of the following factors: the bird species, the availability of suitable habitat within the immediate area, the proposed work activity, and existing disturbances associated with surrounding land uses. The buffer shall be demarcated using bright orange construction fencing, flagging, construction lathe, or other means to mark the boundary of the buffer. All construction personnel shall be notified of the buffer zone and shall avoid entering the protected area. No Ground Disturbing Activities or vegetation removal shall occur within this buffer area until the Qualified Biologist has confirmed that breeding/nesting is complete and the young have fledged the nest and/or that the nest is no longer an Active Nest.

C. Paleontological Resources

The following best practices are recognized by paleontologists and environmental consultants to ensure paleontological resources are not damaged during construction or Ground Disturbance Activities:

1. A paleontological resources records search shall be requested from and conducted by the Natural History Museum of Los Angeles County to determine whether any paleontological resources have been previously identified on or near the Project site. The results of this records search shall be used as an indicator of the paleontological sensitivity of the Project site.
2. A Qualified Paleontologist shall be retained and use all reasonable methods, consistent with professional standards and best practices, to determine the potential for paleontological resources to be present on the Project site.
3. If the Qualified Paleontologist determines there is a high potential that paleontological resources may be located on the Project site and it is possible that such resources will be impacted by the Project, the Qualified Paleontologist or his/her designated representative such as a Paleontological Monitor shall observe all Ground Disturbance Activities within those areas identified as having an undetermined or high potential in order to identify any resources and avoid potential impacts to such resources. In the event of a possible paleontological discovery, the Qualified Paleontologist or Paleontological Monitor shall have the authority to temporarily halt earthwork activities within an appropriate radius of the find, as determined by the Qualified Paleontologist, necessary to protect the resource or other potential resources on or near the Project site. Temporary flagging shall be installed around the find in order to avoid any disturbance from construction equipment.
4. Prior to the start of construction, the Qualified Paleontologist or his/her designee shall conduct training for construction personnel regarding the appearance of fossils and the procedures for notifying paleontological staff should fossils be discovered by construction staff.

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

- d. If paleontological resources are uncovered (in either a previously disturbed or undisturbed area), all work should cease in the area of the find until a Qualified Paleontologist has evaluated the find in accordance with federal, state, and local guidelines, including the Society of Vertebrate Paleontology's Standard Procedures for the Assessment and Mitigation of Adverse Impacts to Paleontological Resources (SVP, 2010).
- e. If fossils are discovered, a Qualified Paleontologist shall recover them. Typically, fossils can be safely salvaged quickly by a single paleontologist and not disrupt construction activity. In some cases, larger fossils (such as complete skeletons or large mammal fossils) require more extensive excavation and longer salvage periods. In this case the paleontologist has the authority to temporarily direct, divert or halt construction activity to ensure the fossil(s) can be removed in a safe and timely manner. Handling and disposition of fossils is done at the direction and guidance of a Qualified Paleontologist.
- f. Personnel of the Project should not collect or move any paleontological materials or associated materials.
- g. If cleared by the Qualified Paleontologist, construction activity may continue unimpeded on other portions of the Project site.
- h. Construction activities in the area where resources were found may commence once the identified resources are properly assessed and processed by a Qualified Paleontologist, and the Qualified Paleontologist clears the site for construction activity.

D. Tribal Cultural Resources

The following best practices are recognized by tribal monitors and environmental consultants to ensure that tribal cultural resources are not damaged during grading, excavation, or other Ground Disturbance Activities:

1. A Sacred Lands File (SLF) records search shall be requested from and conducted by the California Native American Heritage Commission (NAHC) to determine whether cultural resources associated with any Native American tribe(s) with traditional lands or cultural places located within or near the Project site have been previously identified or whether the Project area is considered sensitive for the presence of tribal cultural resources.
2. All tribes listed on the NAHC's Native American Contact List included with the SLF records search shall be contacted, informed of the Project, and given an opportunity to provide input. If the tribe provides substantial evidence of a potential for discovery of tribal cultural resources within the Project site and requests monitoring of Project excavation, grading or other Ground Disturbance Activities, a Qualified Tribal Monitor or an Archaeological Monitor shall be retained.
3. The Qualified Tribal Monitor or Archaeological Monitor shall observe all Ground Disturbance Activities within those areas identified in the records search as sensitive for the presence of tribal cultural resources in order to identify any resources and avoid potential impacts to such resources. In the event of a possible discovery of a tribal cultural resource, the Qualified Tribal Monitor or Archaeological Monitor shall have the authority to temporarily halt earthwork activities within an appropriate radius of the find, as determined by the Qualified Tribal Monitor or Qualified Archaeologist to ensure the find is not damaged or any other potential tribal cultural resources on or near the Project site.
4. If tribal cultural resources are uncovered, all work should cease in the appropriate radius determined by the Qualified Tribal Monitor or Archaeological Monitor.
5. Any find should be treated with appropriate dignity and protected and preserved as appropriate with the

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

agreement of the Qualified Tribal Monitor and in accordance with federal, state, and local guidelines.

6. The location of the tribal cultural resource find and the type and nature of the find should not be published beyond providing the information to public agencies with jurisdiction or responsibilities related to the resources and any affected tribal representatives.
7. Personnel of the Project should not collect or move any tribal cultural resources or associated materials or publish the location of tribal cultural resources.
8. Following discovery, the Applicant or Owner shall immediately contact all Native American tribes that have informed the City of Los Angeles they are traditionally and culturally affiliated with the geographic area of the Project, as well as the Department of City Planning, Office of Historic Resources (OHR).
9. The Applicant and Owner shall provide any affected tribe a reasonable period of time, not less than fourteen calendar days, to conduct a site visit and make recommendations to the Applicant or Owner regarding the monitoring of future Ground Disturbance Activities and the treatment and disposition of any discovered tribal cultural resources.
10. The Applicant or Owner shall implement the tribe's recommendations if the Qualified Tribal Monitor or Archaeological Monitor reasonably concludes such recommendations are reasonable and feasible and determined to be supported with substantial evidence.
11. Consistent with Public Resources Code Section 21083.2, the handling, treatment, preservation, and recordation of tribal cultural resources shall occur as follows:
 - i. The find shall be preserved in place or left in an undisturbed state unless the Project would damage the resource.
 - j. When preserving in place or leaving in an undisturbed state is not possible, excavation and recovery of the find for scientific study shall occur unless testing or studies already completed have adequately recovered the scientifically consequential information from and about the resource, and this determination is documented by a Qualified Tribal Monitor or Qualified Archaeologist.
12. All collected artifacts and fieldwork notes, if not human remains or other mortuary objects, shall be curated at the Natural History Museum of Los Angeles County or another appropriate curatorial facility.
13. If cleared by the Qualified Tribal Monitor or Archaeological Monitor, Ground Disturbance Activities may continue unimpeded on other portions of the site. Ground Disturbance Activities in the area where resource(s) were found may recommence once the identified resources are properly assessed and processed.

E. Vibration

The following best practices are recognized by structural engineers and environmental consultants to reduce damage to vibration-sensitive uses:

1. The use of impact pile drivers should be avoided to eliminate excessive vibration levels. Drilled piles or sonic vibratory pile drivers are alternatives that should be utilized where geological conditions permit their use.
2. Construction activities should involve rubber-tired equipment rather than metal-tracked equipment.
3. The construction contractor should schedule and phase construction activities, including demolition, earthmoving, and ground-impacting operations, so they do not occur concurrently; use low-impact construction technologies;

and avoid the use of vibrating equipment in accordance with best engineering practices.

APPENDIX 2. AFFIDAVIT

Date:

Project Site Address:

This affidavit shows my intent to comply with the City of Los Angeles (City) Environmental Protection Measure (EPM) Handbook.

With regard to this Project, I/we _____ and _____
Owner Applicant (if different than Owner)

each hereby acknowledge and commit to all of the following:

1. I have read the EPM Handbook, found at <https://planning.lacity.gov/zoning/new-code>.
2. I understand the Project may be subject to specific EPM standards and related requirements set forth in the EPM Handbook, and I acknowledge pursuant to 4A.2.2 (Development Standards Applicability) of the Los Angeles Municipal Code (LAMC) and/or LAMC Section 11.5.15 that I am obligated to and will comply with any and all EPM standards applicable to the Project.
3. I understand that failure to comply with applicable EPM standards is a violation of 4A.2.2 (Development Standards Applicability) of Chapter 1A of the LAMC and/or LAMC Section 11.5.15 and is subject to all civil, criminal, and administrative remedies and penalties pursuant to Sec. 4C.13.1.D (Noncompliance) of Chapter 1A of the LAMC and pursuant to Section 11.5.15. Additionally, if City determines that I have violated any required EPM, the City may require me to hire an independent consultant to ensure compliance pursuant to Sec. 4C.13.1.D (Noncompliance) of Chapter 1A of the LAMC or LAMC Section 11.5.15.
4. I understand it is my responsibility to consult with any appropriate professional, including but not limited to legal counsel, environmental consultants, or construction contractors, if necessary, to understand (i) the applicable LAMC requirements for my Project, (ii) the EPM Handbook, and (iii) this affidavit before signing this document or undertaking work on the Project.
5. I understand it is my responsibility and I agree to ensure that all individuals who perform any work or service related to the development or construction of the Project, including but not limited to environmental consultants, engineers, construction contractors and workers, or any required Qualified Expert, whether such work or service is performed at the Project site address or elsewhere, are aware of and familiar with the applicable EPM requirements for the Project and have received or obtained a copy of the EPM Handbook as well as the list of applicable EPM standards included in this signed affidavit.

APPENDIX 3. CONTRACTOR ACKNOWLEDGEMENT

Environmental Protection Measures Contractor Acknowledgement

Date:

Project Site Address:

This Contractor Acknowledgement serves as an affidavit of intent to comply with the City of Los Angeles (City) Environmental Protection Measure (EPM) Handbook.

With regard to this Project, I, hereby _____

Contractor

acknowledge and commit to the following:

- 11. I have read the EPM Handbook, found at <https://planning.lacity.gov/zoning/new-code>.
- 12. I understand the Project may be subject to specific EPM standards and related requirements set forth in the EPM Handbook, and I acknowledge pursuant to Sec. 4A.2.2 (Development Standards Applicability) of Chapter 1A of the Los Angeles Municipal Code (LAMC) or LAMC Section 11.5.15, that the Applicant and Owner are required to comply with any and all EPM standards applicable to the Project.
- 13. In fulfilling my responsibilities and contracted services for the Project, I acknowledge that I am obligated to implement and comply with all applicable EPM standards as they relate to the performance of my duties.
- 14. The Applicant and Owner have identified the following EPM standards as applicable to the Project:

Air Quality Standard (AQ1)—Operation of Construction Equipment	Cultural Resources Standards (CR4)—Tribal Cultural Resources	Biological Resources Standards (BR1)—Protected Trees
--	--	--

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

Hazardous Materials Standards (HM1)— Hazardous Materials Site	Biological Resources Standards (BR2)—Special Status Species	Hazardous Materials Standards (HM2)—Abandoned Oil Wells
Biological Resources Standards (BR3)—Nesting Native and Migratory Birds	Noise and Vibration Standards (NV1)—Construction Noise	Cultural Resources Standards (CR1)—Archaeological Resources
Noise and Vibration Standards (NV2)—Construction Vibration	Cultural Resources Standards (CR2)—Zanja Madre and the Zanja System	Pedestrian Safety Standards (PS1)—Safe and Accessible Walkways
Cultural Resources Standards (CR3)—Paleontological Resources		

- 15. Documentation demonstrating compliance with all EPM standards applicable to the Project shall be maintained per the proof of compliance requirements in Sec. 1.D.6. (Additional Requirements) of the EPM Handbook.
- 17. I am obligated to adhere to all recommendations, limitations, or other guidance from any Qualified Expert retained by the Applicant or Owner as part of EPM compliance.
- 18. I understand that failure to comply with applicable EPM standards is a violation of Sec. 4A.2.2. (Development Standards Applicability) of Chapter 1A of the LAMC or LAMC Section 11.5.15 and is subject to all civil, criminal, and administrative remedies and penalties pursuant to Sec. 4C.13.1.D (Noncompliance) of Chapter 1A of the LAMC or Section 11.5.15.

APPENDIX 4. **SCAQMD RULE 403 BEST AVAILABLE CONTROL MEASURES**

Exhibit C.2- DRAFT ENVIRONMENTAL PROTECTION MEASURES HANDBOOK (SEPTEMBER 2024)

(Applicable to All Construction Activity Sources)

Table 1: Best Available Control Measures (Applicable to All Construction Activity Sources)		
Source Category	Control Measure	Guidance
Backfilling	01-1 Stabilize backfill material when not actively handling; and 01-2 Stabilize backfill material during handling; and 01-3 Stabilize soil at completion of activity.	Mix backfill soil with water prior to moving. Dedicate water truck or high-capacity hose to backfilling equipment. Empty loader bucket slowly so that no dust plumes are generated. Minimize drop height from loader bucket.
Clearing and Grubbing	02-1 Maintain stability of soil through pre-watering of site prior to clearing and grubbing; and 02-2 Stabilize soil during clearing and grubbing activities; and 02-3 Stabilize soil immediately after clearing and grubbing activities.	Maintain live perennial vegetation where possible. Apply water in sufficient quantity to prevent generation of dust plumes.
Clearing Forms	03-1 Use water spray to clear forms; or 03-2 Use sweeping and water spray to clear forms; or 03-3 Use vacuum system to clear forms.	Use of high-pressure air to clear forms may cause exceedance of Rule requirements.
Crushing	04-1 Stabilize surface soils prior to operation of support equipment; and 04-2 Stabilize material after crushing.	Follow permit conditions for crushing equipment. Pre-water material prior to loading into crusher. Monitor crusher emissions opacity. Apply water to crushed material to prevent dust plumes.
Cut and Fill	05-1 Pre-water soils prior to cut and fill activities; and 05-2 Stabilize soil during and after cut and fill activities	For large sites, pre-water with sprinklers or water trucks and allow time for penetration. Use water trucks/pulls to water soils to depth of cut prior to subsequent cuts.
Demolition—Mechanical/Manual	06-1 Stabilize wind erodible surfaces to reduce dust; and 06-2 Stabilize surface soil where support equipment and vehicles will operate; and 06-3 Stabilize loose soil and demolition debris; and 06-4 Comply with AQMD Rule 1403.	Apply water in sufficient quantities to prevent the generation of visible dust plumes.
Disturbed Soil	07-1 Stabilize disturbed soil throughout the construction site; and	Limit vehicular traffic and disturbances on soils where possible.

**Table 1: Best Available Control Measures
(Applicable to All Construction Activity Sources)**

Source Category	Control Measure	Guidance
	07-2 Stabilize disturbed soil between structures	If interior block walls are planned, install as early as possible. Apply water or a stabilizing agent in sufficient quantities to prevent the generation of visible dust plumes.
Earth-Moving Activities	08-1 Pre-apply water to depth of proposed cuts; and 08-2 Re-apply water as necessary to maintain soils in a damp condition and to ensure that visible emissions do not exceed 100 feet in any direction; and 08-3 Stabilize soils once earth-moving activities are complete.	Grade each project phase separately, timed to coincide with construction phase. Upwind fencing can prevent material movement onsite. Apply water or a stabilizing agent in sufficient quantities to prevent the generation of visible dust plumes.
Importing/Exporting of Bulk Materials	09-1 Stabilize material while loading to reduce fugitive dust emissions; and 09-2 Maintain at least six inches of freeboard on haul vehicles; and 09-3 Stabilize material while transporting to reduce fugitive dust emissions; and 09-4 Stabilize material while unloading to reduce fugitive dust emissions; and 09-5 Comply with Vehicle Code Section 23114.	Use tarps or other suitable enclosures on haul trucks. Check belly-dump truck seals regularly and remove any trapped rocks to prevent spillage. Comply with track-out prevention/mitigation requirements. Provide water while loading and unloading to reduce visible dust plumes.
Landscaping	10-1 Stabilize soils, materials, slopes	Apply water to materials to stabilize. Maintain materials in a crusted condition. Maintain effective cover over materials. Stabilize sloping surfaces using soil binders until vegetation or ground cover can effectively stabilize the slopes. Hydroseed prior to rain season.
Road Shoulder Maintenance	11-1 Apply water to unpaved shoulders prior to clearing; and 11-2 Apply chemical dust suppressants and/or washed gravel to maintain a stabilized surface after completing road shoulder maintenance.	Installation of curbing and/or paving of road shoulders can reduce recurring maintenance costs. Use of chemical dust suppressants can inhibit vegetation growth and reduce future road shoulder maintenance costs.
Screening	12-1 Pre-water material prior to screening; and 12-2 Limit fugitive dust emissions to opacity and plume length standards; and	Dedicate water truck or high-capacity hose to screening operation. Drop material through the screen slowly and minimize drop height.

**Table 1: Best Available Control Measures
(Applicable to All Construction Activity Sources)**

Source Category	Control Measure	Guidance
	12-3 Stabilize material immediately after screening.	Install wind barrier with a porosity of no more than 50% upwind of screen to the height of the drop point.
Staging areas	13-1 Stabilize staging areas during use; and 13-2 Stabilize staging area soils at project completion.	Limit size of staging area. Limit vehicle speeds to 15 miles per hour. Limit number and size of staging area entrances/exits.
Stockpiles/Bulk Material Handling	14-1 Stabilize stockpiled materials. 14-2 Stockpiles within 100 yards of off-site occupied buildings must not be greater than eight feet in height; or must have a road bladed to the top to allow water truck access or must have an operational water irrigation system that is capable of complete stockpile coverage.	Add or remove material from the downwind portion of the storage pile. Maintain storage piles to avoid steep sides or faces.
Traffic Areas for Construction Activities	15-1 Stabilize all off-road traffic and parking areas; and 15-2 Stabilize all haul routes; and 15-3 Direct construction traffic over established haul routes.	Apply gravel/paving to all haul routes as soon as possible to all future roadway areas. Barriers can be used to ensure vehicles are only used on established parking areas/haul routes.
Trenching	16-1 Stabilize surface soils where trencher or excavator and support equipment will operate; and 16-2 Stabilize soils at the completion of trenching activities.	Pre-watering of soils prior to trenching is an effective preventive measure. For deep trenching activities, pretrench to 18 inches soak soils via the pre-trench and resuming trenching. Washing mud and soils from equipment at the conclusion of trenching activities can prevent crusting and drying of soil on equipment.
Truck Loading	17-1 Pre-water material prior to loading; and 17-2 Ensure that freeboard exceeds six inches (CVC 23114)	Empty loader bucket such that no visible dust plumes are created. Ensure that the loader bucket is close to the truck to minimize drop height while loading.
Turf Overseeding	18-1 Apply sufficient water immediately prior to conducting turf vacuuming activities to meet opacity and plume length standards; and 18-2 Cover haul vehicles prior to exiting the site.	Haul waste material immediately off-site.

Table 1: Best Available Control Measures (Applicable to All Construction Activity Sources)		
Source Category	Control Measure	Guidance
Unpaved Roads/Parking Lots	19-1 Stabilize soils to meet the applicable performance standards; and 19-2 Limit vehicular travel to established unpaved roads (haul routes) and unpaved parking lots.	Restricting vehicular access to established unpaved travel paths and parking lots can reduce stabilization requirements.
Vacant Land	20-1 In instances where vacant lots are 0.10 acre or larger and have a cumulative area of 500 square feet or more that are driven over and/or used by motor vehicles and/or off-road vehicles, prevent motor vehicle and/or off-road vehicle trespassing, parking and/or access by installing barriers, curbs, fences,	

Table 2: Dust Control Measures for Large Operations	
Fugitive Dust Source Category	Control Actions
Earth-Moving (except construction cutting and filling areas, and mining operations)	(1a) Maintain soil moisture content at a minimum of 12 percent, as determined by ASTM method D- 2216, or other equivalent method approved by the Executive Officer, the California Air Resources Board, and the U.S. EPA. Two soil moisture evaluations must be conducted during the first three hours of active operations during a calendar day, and two such evaluations each subsequent four-hour period of active operations; OR (1a-1) For any earth-moving which is more than 100 feet from all property lines, conduct watering as necessary to prevent visible dust emissions from exceeding 100 feet in length in any direction.
Earth-Moving: Construction Fill Areas:	(1b) Maintain soil moisture content at a minimum of 12 percent, as determined by ASTM method D- 2216, or other equivalent method approved by the Executive Officer, the California Air Resources Board, and the U.S. EPA. For areas which have an optimum moisture content for compaction of less than 12 percent, as determined by ASTM Method 1557 or other equivalent method approved

Table 2: Dust Control Measures for Large Operations	
Fugitive Dust Source Category	Control Actions
	by the Executive Officer and the California Air Resources Board and the U.S. EPA, complete the compaction process as expeditiously as possible after achieving at least 70 percent of the optimum soil moisture content. Two soil moisture evaluations must be conducted during the first three hours of active operations during a calendar day, and two such evaluations during each subsequent four-hour period of active operations.
Earth-Moving: Construction Cut Areas And Mining Operations:	(1c) Conduct watering as necessary to prevent visible emissions from extending more than 100 feet beyond the active cut or mining area unless the area is inaccessible to watering vehicles due to slope conditions or other safety factors.
Disturbed Surface Areas (Except Completed Grading Areas)	(2a/b) Apply dust suppression in sufficient quantity and frequency to maintain a stabilized surface. Any areas which cannot be stabilized, as evidenced by wind driven fugitive dust must have an application of water at least twice per day to at least 80 percent of the unstabilized area.
Disturbed Surface Areas: Completed Grading Areas	(2c) Apply chemical stabilizers within five working days of grading completion; OR (2d) Take actions (3a) or (3c) specified for inactive disturbed surface areas.
Inactive Disturbed Surface Areas	(3a) Apply water to at least 80 percent of all inactive disturbed surface areas on a daily basis when there is evidence of wind driven fugitive dust, excluding any areas which are inaccessible to watering vehicles due to excessive slope or other safety conditions; OR (3b) Apply dust suppressants in sufficient quantity and frequency to maintain a stabilized surface; OR (3c) Establish a vegetative ground cover within 21 days after active operations have ceased. Ground cover must be of sufficient density to expose less than 30 percent of unstabilized ground within 90 days of planting, and at all times thereafter; OR (3d) Utilize any combination of control actions (3a), (3b), and (3c) such that, in total, these actions apply to all inactive disturbed surface areas.
Unpaved Roads	(4a) Water all roads used for any vehicular traffic at least once per every two hours of active operations [3 times per normal 8-hour work day]; OR (4b) Water all roads used for any vehicular traffic once daily and restrict vehicle speeds to 15 miles per hour; OR (4c) Apply a chemical stabilizer to all unpaved road surfaces in

Table 2: Dust Control Measures for Large Operations	
Fugitive Dust Source Category	Control Actions
	sufficient quantity and frequency to maintain a stabilized surface.
Open Storage Piles	(5a) Apply chemical stabilizers; OR (5b) Apply water to at least 80 percent of the surface area of all open storage piles on a daily basis when there is evidence of wind driven fugitive dust; OR (5c) Install temporary coverings; OR (5d) Install a three-sided enclosure with walls with no more than 50 percent porosity which extend, at a minimum, to the top of the pile. This option may only be used at aggregate-related plants or at cement manufacturing facilities.
All Categories	(6a) Any other control measures approved by the Executive Officer and the U.S. EPA as equivalent to the methods specified in Table 2 may be used.

Table 3: Contingency Control Measures for Large Operations	
Fugitive Dust Source Category	Control Measures
Earth-Moving	(1A) Cease all active operations; OR (2A) Apply water to soil not more than 15 minutes prior to moving such soil.
Disturbed Surface Areas	(0B) On the last day of active operations prior to a weekend, holiday, or any other period when active operations will not occur for not more than four consecutive days: apply water with a mixture of chemical stabilizer diluted to not less than 1/20 of the concentration required to maintain a stabilized

Table 3: Contingency Control Measures for Large Operations	
Fugitive Dust Source Category	Control Measures
	<p>surface for a period of six months; OR</p> <p>(1B) Apply chemical stabilizers prior to wind event; OR (2B) Apply water to all unstabilized disturbed areas 3 times per day. If there is any evidence of wind driven fugitive dust, watering frequency is increased to a minimum of four times per day; OR</p> <p>(3B) Take the actions specified in Table 2, Item (3c); OR (4B) Utilize any combination of control actions (1B), (2B), and (3B) such that, in total, these actions apply to all disturbed surface areas.</p>
Unpaved Roads	<p>(1C) Apply chemical stabilizers prior to wind event; OR</p> <p>(2C) Apply water twice per hour during active operation; OR</p> <p>(3C) Stop all vehicular traffic.</p>
Open Storage Piles	<p>(1D) Apply water twice per hour; OR</p> <p>(2D) Install temporary coverings.</p>
Paved Road Track-Out	<p>(1E) Cover all haul vehicles; OR</p> <p>(2E) Comply with the vehicle freeboard requirements of Section 23114 of the California Vehicle Code for both public and private roads.</p>
All Categories	<p>(1F) Any other control measures approved by the Executive Officer and the U.S. EPA as equivalent to the methods specified in Table 3 may be used.</p>

APPENDIX 6. VIBRATION SOURCE LEVELS FOR CONSTRUCTION EQUIPMENT

Below is “Table 7-4 Vibration Source Levels for Construction Equipment”, an excerpt from page 184 of the Federal Transit Administration’s September 2018, “Transit Noise and Vibration Impact Assessment Manual,” prepared by John A. Volpe National Transportation Systems Center.

EXHIBIT D:
Single-Family Considerations

CPC-2023-7068-CA, CPC-2024-387-CA, CPC-2024-388-CA

For consideration by the City Planning Commission

September 26, 2024

Introduction

The inclusion of single-family zones in the 2021-2029 Housing Element RHNA Re-zoning Program 121 and the CHIP Ordinance has been an ongoing consideration since outreach for the 2021-2029 Housing Element began in 2019. The 2021-2029 Housing Element included RHNA Re-zoning Program 121, which included various concepts for achieving the City's housing goals including strategies focused on single-family zones. Specifically, the Program identified creating incentives on single-family zones near transit through the TOC Expansion Strategy, tailoring incentives in single-family zones for one-hundred percent affordable construction in the Affordable Housing Overlay Zone (AHOZ) strategy, creating more flexibility for the subdivision of single-family lots and the construction of accessory dwelling units through the ADU strategy, and providing mid-scale and missing middle incentives on transit corridors in the Residential Opportunity Corridors and Avenues (OPP RC and OPPRC2) strategies. This followed a lengthy Housing Element Update process that centered on public feedback, equity, and Affirmatively Furthering Fair Housing (AFFH).

This Exhibit presents six distinct options for potential inclusion of single-family zones in the CHIP ordinance that range in geographic eligibility, incentives offered, and affordability requirements, and one option to remove R2 and RD properties from Corridor strategies. These options were intentionally drafted to offer varying geographies and intensities. Some options are more permissive and expansive than others. Development of these options was based on comment letters submitted. Within all of these options VHFHSZ, Coastal Areas, and Sea Level Rise Areas have been excluded.

While inclusion of single family is not necessary for meeting state obligations for AFFH, as outlined in the Staff report. Inclusion of any of the options below would further support equity goals that the City outlined in the 2021-2029 Housing Element. One of the main Housing Element goals was to preserve and enhance the quality of housing and provide greater housing stability for households of all income levels. Objective 4.3 specifically addresses Affirmatively Furthering Fair Housing in all housing and land use programs by taking proactive measures to promote diverse, inclusive communities that grant all Angelenos access to housing, particularly in Higher Opportunity Areas, increase place-based strategies to encourage community revitalization, and protect existing residents from displacement. This is proposed to be implemented through increasing opportunities for Affordable Housing in Higher Opportunity Areas and prioritizing housing capacity, resources, policies, and incentives to include Affordable Housing in residential development, particularly near transit, jobs, and in Higher Opportunity Areas. As provided in the Staff Report, the Proposed Project fulfills the City's AFFH requirements by providing more than half of rezoning capacity in Higher Opportunity Areas. The options below would help increase the proportion of new housing capacity in the City's Higher Opportunity Areas. They would also relieve pressure on existing multi-family zones, reducing potential displacement pressures on existing multi-family development by increasing the amount of land where multi-family uses can be developed in the City.

The table below summarizes the geographic eligibility of each option including which CHIP program they apply to, with detailed descriptions of each option following.

Options Summary Table

	Programs	Eligibility
Option 1	MIIP and AHIP	All Single-Family in Higher Opportunity Areas
Option 2	MIIP	All Single-Family in Opportunity Corridors and Corridor Transition Areas 2 & 3
Option 3	MIIP	Single-Family in Opportunity Corridor 3 and Corridor Transition Areas 2 & 3
Option 4	MIIP	All Single-Family in Opportunity Corridors
Option 5	MIIP	Removed Lower Density Multi-Family Residential zones from Opportunity Corridors
Option 6	AHIP	Single-Family in Moderate and High Opportunity Areas within 0.5 Miles of a Major Transit Stop for One Hundred Percent Affordable Housing Projects, Faith-Based Organization Projects, and Shared Equity Projects
Option 7	AHIP	Single-Family within 0.5 miles of a Major Transit Stop for Shared Equity Projects

A detailed map inventory is included following Option 7.

Option 1 - Comprehensive CHIP Applicability in Higher Opportunity Areas (Advocate Recommendation)

Eligibility

Option 1: Comprehensive CHIP Applicability in Higher Opportunity Areas (Option 1), is the broadest application of single-family zones to the CHIP Ordinance. Several community advocacy groups, including ACT LA, LA Conservancy, YIMBY Law, and a Coalition of organizations including SCANPH, Abundant Housing LA, Urban Environmentalists, and many others have recommended in their comment letters on the CHIP Ordinance that the proposed Ordinance should expand eligibility to include single-family zones in Higher Opportunity Areas in all Mixed Income Incentive Programs (MIIP) and Affordable Housing Incentive Programs (AHIP), including One Hundred Percent Affordable Housing Projects, Faith-Based Organization Projects, and Shared Equity Projects. The request asked that single-family zones receive the same incentives as other eligible sites.

Tables 1 and 2 below summarize which CHIP strategies would be impacted by this policy change and the proposed bonus incentives.

Table 1: Option 1 Mixed Income Incentive Program Base Incentives			
Rezoning Program	Bonus Density	FAR (max.)	Height (max.)
Mixed Income Incentive Program			
Opportunity Corridors Incentive Areas			
OC-1 Single-Family	Limited by Floor Area.	3.0, or 45% increase, whichever is greater.	One additional story, up to 11 additional feet; or up to a maximum of 5 total stories, whichever is greater.
OC-2 Single-Family		3.0 or 50% increase, whichever is greater.	Two additional stories, up to 22 additional feet; or up to a maximum of 6 total stories, whichever is greater.
OC-3 Single-Family		4.65 or 60% increase, whichever is greater.	Three additional stories, up to 33 additional feet; or up to a maximum of 7 total stories, whichever is greater.
Opportunity Corridor Transition Areas			
CT-1 Single-Family	Up to 6 units.	Up to 1.45	2 stories max.
CT-2 Single-Family	Up to 10 units.	Up to 2.0	3 stories max.
CT-3 Single-Family	Up to 16 units.	Up to 2.90	3 stories max.
Transit Oriented Incentive Areas (Higher Opportunity Areas only)			
T-1 Single-Family	Up to 16 units.	3.0 or 40% increase, whichever is greater.	One additional story, up to 11 additional feet; or up to a maximum of 5 total stories, whichever is greater.
T-2 Single-Family	Limited by Floor Area.	3.0 or 45% increase, whichever is greater.	Two additional stories, up to 22 additional feet; or up to a maximum of 6 total stories, whichever is greater.
T-3 Single-Family	Limited by Floor Area.	3.0 or 50% increase, whichever is greater.	Three additional stories, up to 33 additional feet; or up to a maximum of 7 total stories, whichever is greater.

Table 2: Option 1 AHIP Low Density, High and Moderate Opportunity Areas Base Incentives			
Density	Parking	FAR	Height
Limited by FAR.	No Minimum Parking Required.	Maximum of 2.5:1	Bonus of up to 11' or 1 story, whichever is greater.

Considerations

Option 1 as described above is the broadest and most expansive of the options described in this exhibit. Approximately 43,000 parcels zoned for single-family uses (RW and more restrictive zones, excluding A1 and A2 zones) would be included in the MIIP as a result of Option 1, and approximately 160,800 parcels zoned for single-family uses would be included in the AHIP Program.

While this option would continue to support the City’s equity goals, inclusion of this option would exceed the City’s state housing capacity obligations which are currently being addressed through the CHIP program. This option would expand eligibility for the CHIP Ordinance to interior neighborhoods across the Higher Opportunity through the Corridor Transition Areas program, primarily in areas of Mid-City, West LA, and the South Valley and Northwest Valley. **Map 1A through 1C** below shows maps where eligibility would be expanded as a result of Option 1 (for more detailed maps by Area Planning Commission, please refer to the Appendix). Further, inclusion of Option 1 would create new opportunity corridors with single-family zones on major streets with transit service in areas such as the South Valley (Canoga Park - Winnetka - Woodland Hills, West Hills), Northwest Valley (Chatsworth and Northridge).

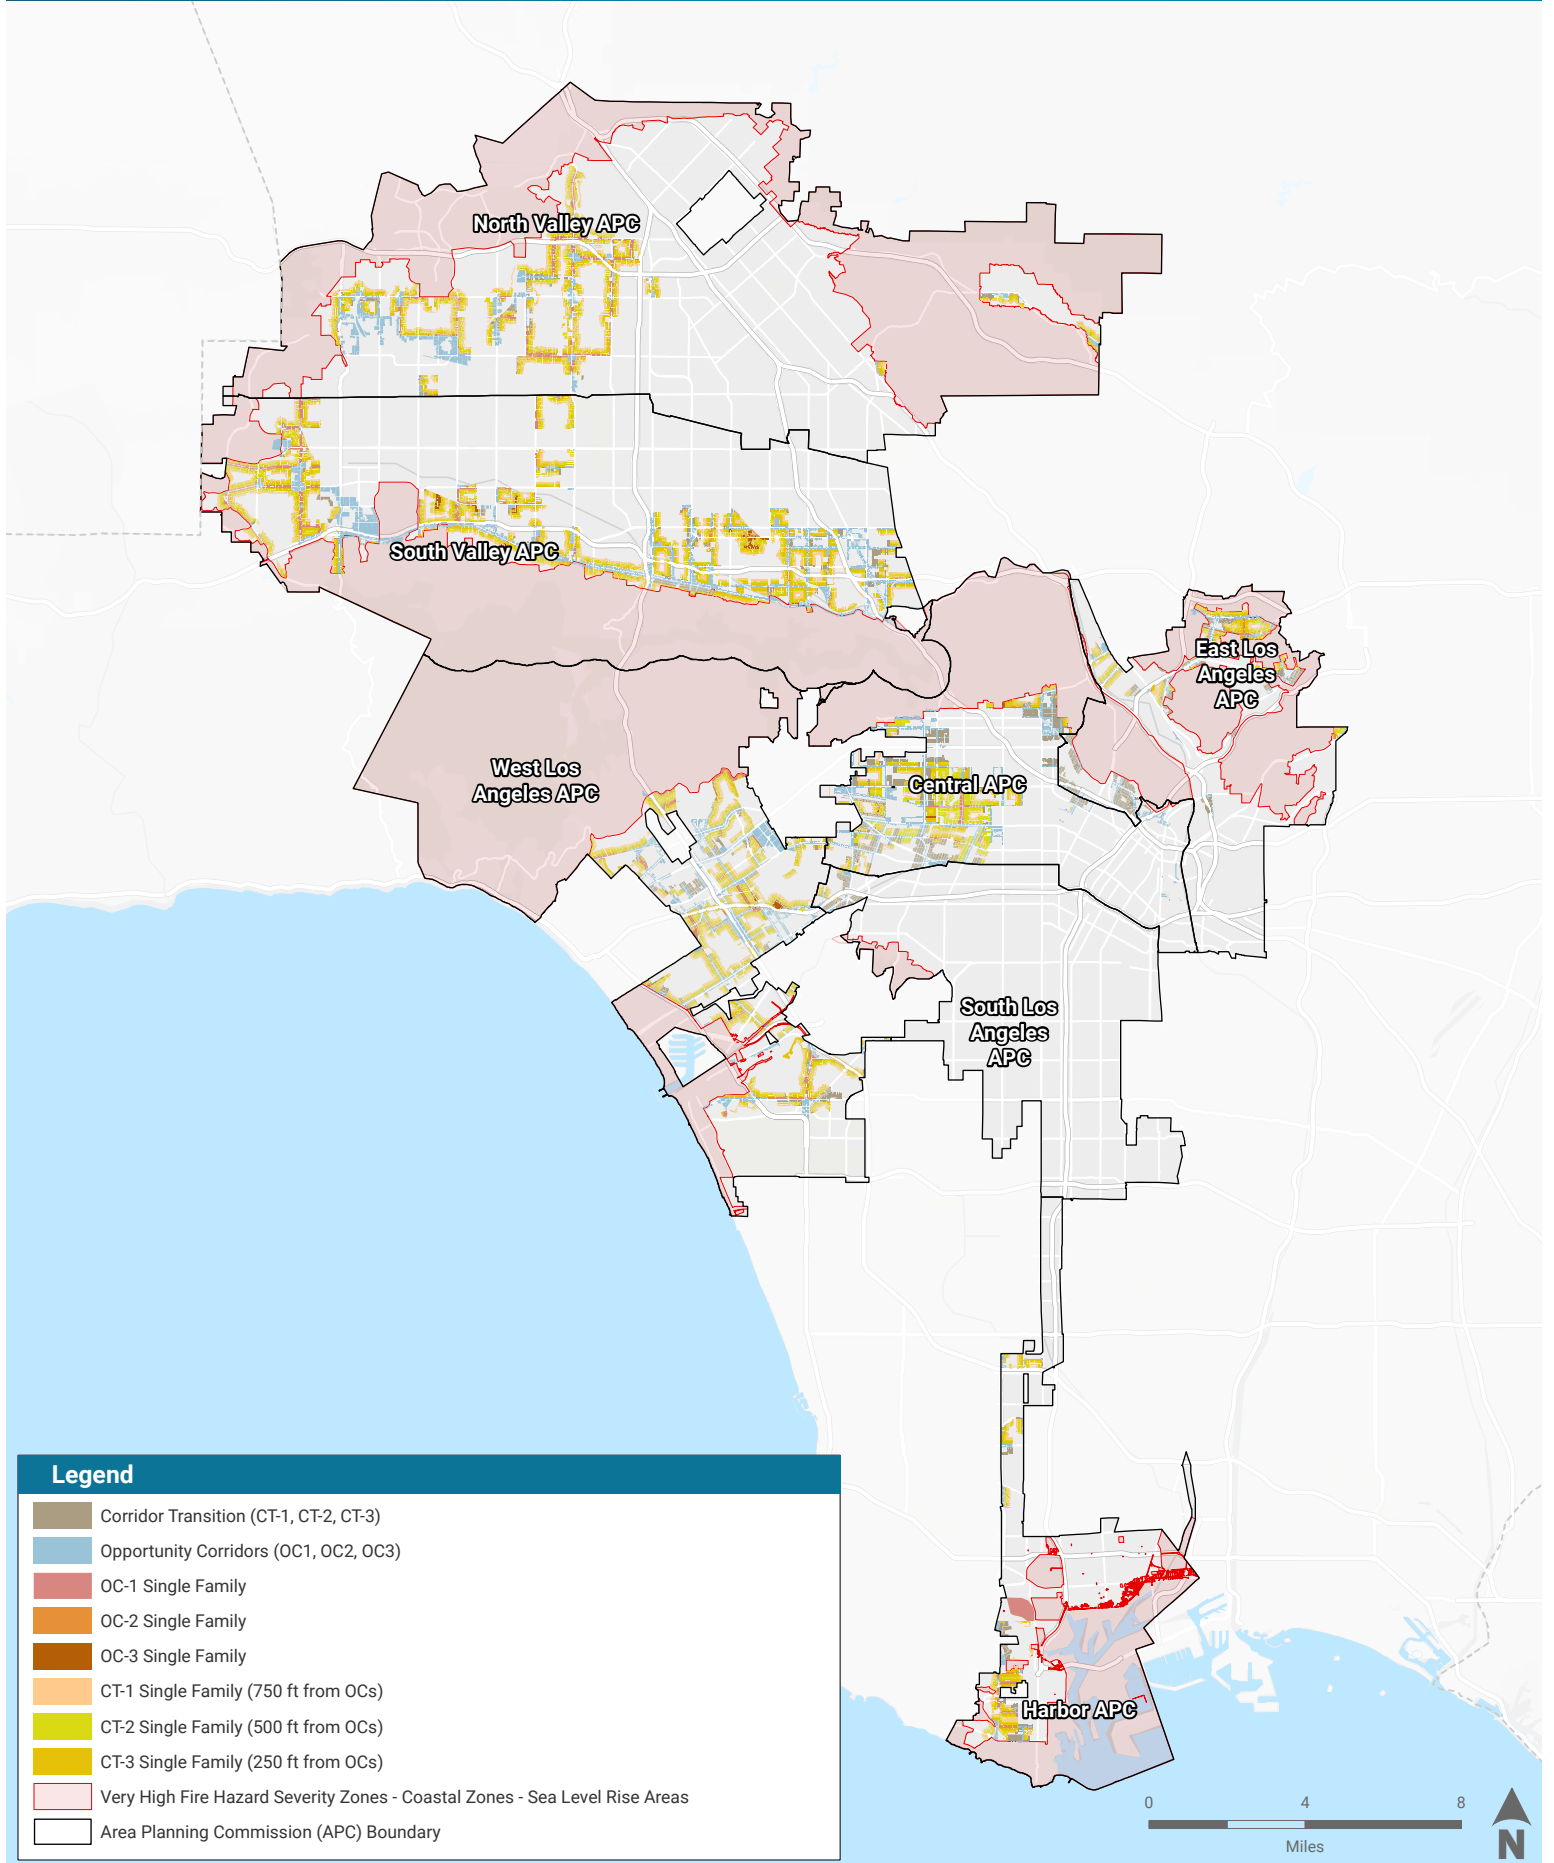

Option 1 proposes the inclusion of single-family zones to receive the same base incentives as multi-family zones would be eligible to receive in the Mixed Income Incentive Program and Affordable Housing Incentive Program, with some revisions to allow for fixed density bonuses where the current program proposed percentage based increases. Inclusion of single family in the incentives designed for high density development could lead to potential out-of-scale developments without transitional height elements to existing neighborhoods. Additional density and FAR could lead to larger scale developments, potentially up to seven-stories, in existing low-scale neighborhoods, especially in areas located around the highest quality transit service (TOIA T-2 and T-3).

Capacity

The inclusion of Option 1 to the proposed CHIP Ordinance would result in approximately 43,000 parcels zoned single-family (RW and less restrictive zones, excluding A1 and A2 parcels) in the MIIP program. This would increase the proportion of housing opportunities located in Higher Opportunity Areas from approximately 54% to 67%. The distribution of these sites are visible

below in Map 1A-1C at a Citywide level. Maps at an Area Planning Commission Level are available on page 26.

Option 2 - Broader Option Near Transit

Eligibility

Option 2: Broader Options in Transit (Option 2) focuses inclusion of single-family zones in areas of the Mixed Income Incentive Program around corridors with transit service in Higher Opportunity Areas, namely, the Opportunity Corridor Incentive Areas and Opportunity Corridor Transition Incentive Areas. This option proposes reduced incentives for lots in single-family zones (RW and more restrictive, excluding A1 and A2 zones) on Opportunity Corridors, and emphasizes a gentle transition in density and building scale in the Corridor Transition Areas, the farther the site is from the corridor. The development of this option was informed by the Los Angeles Conservancy's Comment Letter. The Conservancy also requested the Corridor Transition 3 (CT-3) incentives be introduced within non-historic single-family zones within 750 feet of an Opportunity Corridor and further requested that non-historic single-family zones facing an eligible opportunity corridor receive the CT-3 incentives. The letter also requested R2 and RD zones be removed from the Opportunity Corridor Program, but remain eligible for Corridor Transition incentives. Staff would recommend a more graduated approach in this scenario to allow for a transition from the corridor and scale incentives based on corridor types. **Table 3** below summarizes the base incentives in Option 2.

Table 3: Option 2 - Mixed Income Incentive Program Base Incentives			
Rezoning Program	Density Bonus	FAR (max.)	Height (max.)
Mixed Income Incentive Program			
Opportunity Corridors Incentive Areas			
OC-1 Single-Family	Up to 6 units.	Up to 1.45:1	2 stories.
OC-2 Single-Family	Up to 10 units.	Up to 2.0:1	3 stories.
OC-3 Single-Family	Up to 16 units.	Up to 2.9:1	3 stories.
Opportunity Corridor Transition Areas			
CT-2 Single-Family (500 feet from OC-2 and OC-3)	Up to 6 units.	Up to 1.45:1	2 stories max.
CT-3 Single-Family (250 feet from OC-2 and OC-3)	Up to 10 units.	Up to 2.0:1	3 stories max.

Considerations

Similar to Option 1 described above, Option 2 introduces context specific incentives that scale down in density and intensity the farther the site is from transit service and the corridor. Option 2 proposes that single-family zones in the most transit rich areas of the City, along Opportunity

Corridor-3 (OC-3) would be eligible to build up to 16 units and up to a maximum of 3 stories in height. Sites adjacent to the corridor would scale down in intensity, and would be allowed to build up to 10 units and up to 3 stories within 250 feet of the Opportunity Corridor. Sites within 500 feet of an OC-3 corridor would be eligible for incentives to build up to 6 units and 2 stories. No incentives would be offered for sites up to 750 feet from an OC-3. As summarized in Table 3 above, reduced incentives would be offered for single-family zones located on Opportunity Corridor-2 (OC-2) and Opportunity Corridor-1 (OC-1), with similar scaled down incentives in the Corridor Transition Areas.

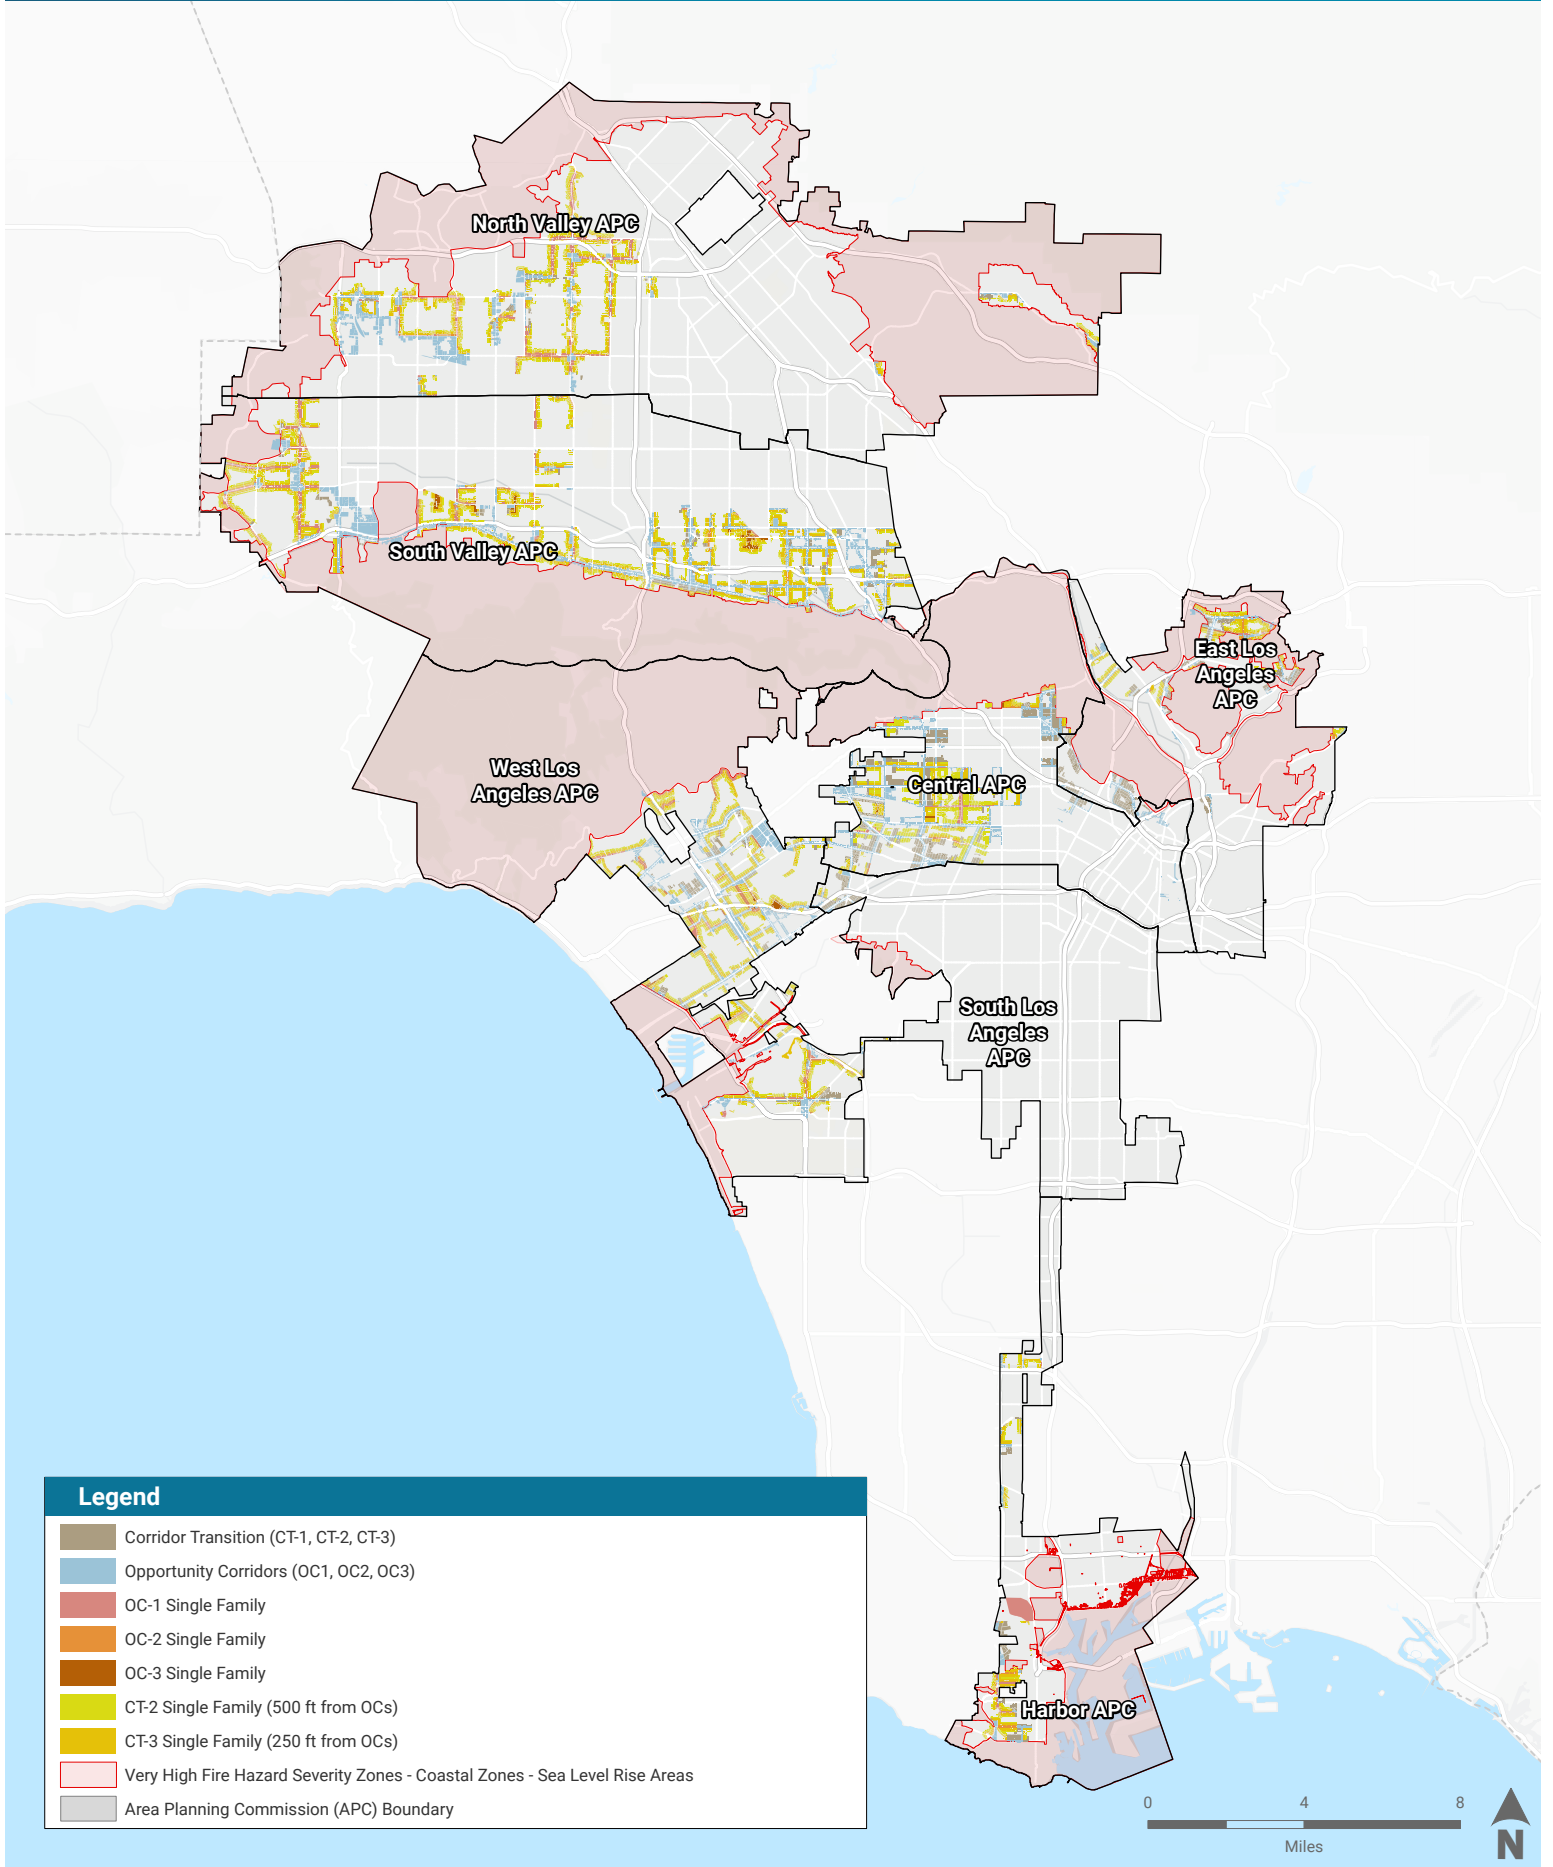

While this option would continue to support the City's equity goals, inclusion of this option would exceed the City's state housing capacity obligations. This option would expand eligibility for the Mixed Income Incentive Program to interior neighborhoods across the Higher Opportunity Areas of the City through the Corridor Transition Areas program, primarily in areas of Mid-City, West LA, and the South Valley and Northwest Valley. However, applicability of this Option is reduced compared to Option 1, as it would not include eligibility for incentives in the Transit Oriented Incentive Areas in Higher Opportunity Areas. **Map 2A** below shows maps where eligibility would be expanded as a result of Option 2.

Option 2 increases the land available for multi-family housing in the West LA and South Valley, and as a result would help adding development pressure in existing multi-family areas. It also provides reduced incentives in single-family zones compared to Option 1, to address potential concerns around out-of-context development. Option 2's emphasis on development in areas with transit and in Higher Opportunity Areas addresses the Housing Element's objective of promoting new multi-family housing, particularly Affordable and mixed-income housing, in areas near transit, jobs and Higher Opportunity Areas, in order to facilitate a better jobs-housing balance, help shorten commutes, and reduce greenhouse gas emissions (Objective 3.2).

Capacity

The analysis for applicability of Option 2 at this time does not exclude eligible resources or remove eligible multi-family parcels from the program. The inclusion of Option 2 to the proposed CHIP Ordinance would result in approximately 24,000 parcels zoned single-family (RW and less restrictive zones, excluding A1 and A2 parcels). This would increase the proportion of housing opportunities located in Higher Opportunity Areas from approximately 54% to 58% (see Figure 2). The distribution of these sites are visible below in Map 2A at a Citywide level. Maps at an Area Planning Commission Level are available on page 26.

Option 2 - Broader Option Near Transit Citywide APCs

Option 3 - Major Transit Stops Only

Eligibility

Option 3: Major Transit Stops (Option 3) focuses inclusion of single-family zones in areas of the Mixed Income Incentive Program around Avenues and Boulevards in TOIA Tiers 2 and 3: the Opportunity Corridor Incentive Areas and Opportunity Corridor Transition Incentive Areas. Single-family zones would be included if they are only along an OC-3 corridor or if they are within 500 feet of the furthest property line from the corridor of an OC-3 site. **Table 4** below summarizes the proposed incentives.

Table 4: Option 3 -Mixed Income Incentive Program Base Incentives			
Rezoning Program	Density Bonus	FAR (max.)	Height (max.)
Mixed Income Incentive Program			
Opportunity Corridors Incentive Areas			
OC-3 Single-Family	Up to 16 units.	Up to 2.9	3 stories max.
Opportunity Corridor Transition Areas			
CT-2 Single-Family (500 feet from OC-3 Single-Family)	Up to 6 units.	Up to 1.45	2 stories max.
CT-3 Single-Family (250 feet from OC-3 Single-Family)	Up to 10 units.	Up to 2.0	3 stories max.

Considerations

Option 3 focuses specifically in areas that provide the highest quality transit services. Between all five options, Option 3 impacts the least single-family zones in the highest priority growth areas. Option 3 proposes that single-family zones in the most transit-rich areas of the City, along Opportunity Corridor-3 (OC-3) would be eligible to build up to 16 units and up to a maximum of 3 stories in height. Sites adjacent to the corridor would scale down in intensity, and would be allowed to build up to 10 units and up to 3 stories within 250 feet of the Opportunity Corridor. Sites within 500 feet of an OC-3 corridor would be eligible for incentives to build up to 6 units and 2 stories. No incentives would be offered for sites up to 750 feet from an OC-3, sites in OC-1, or sites in OC-2.

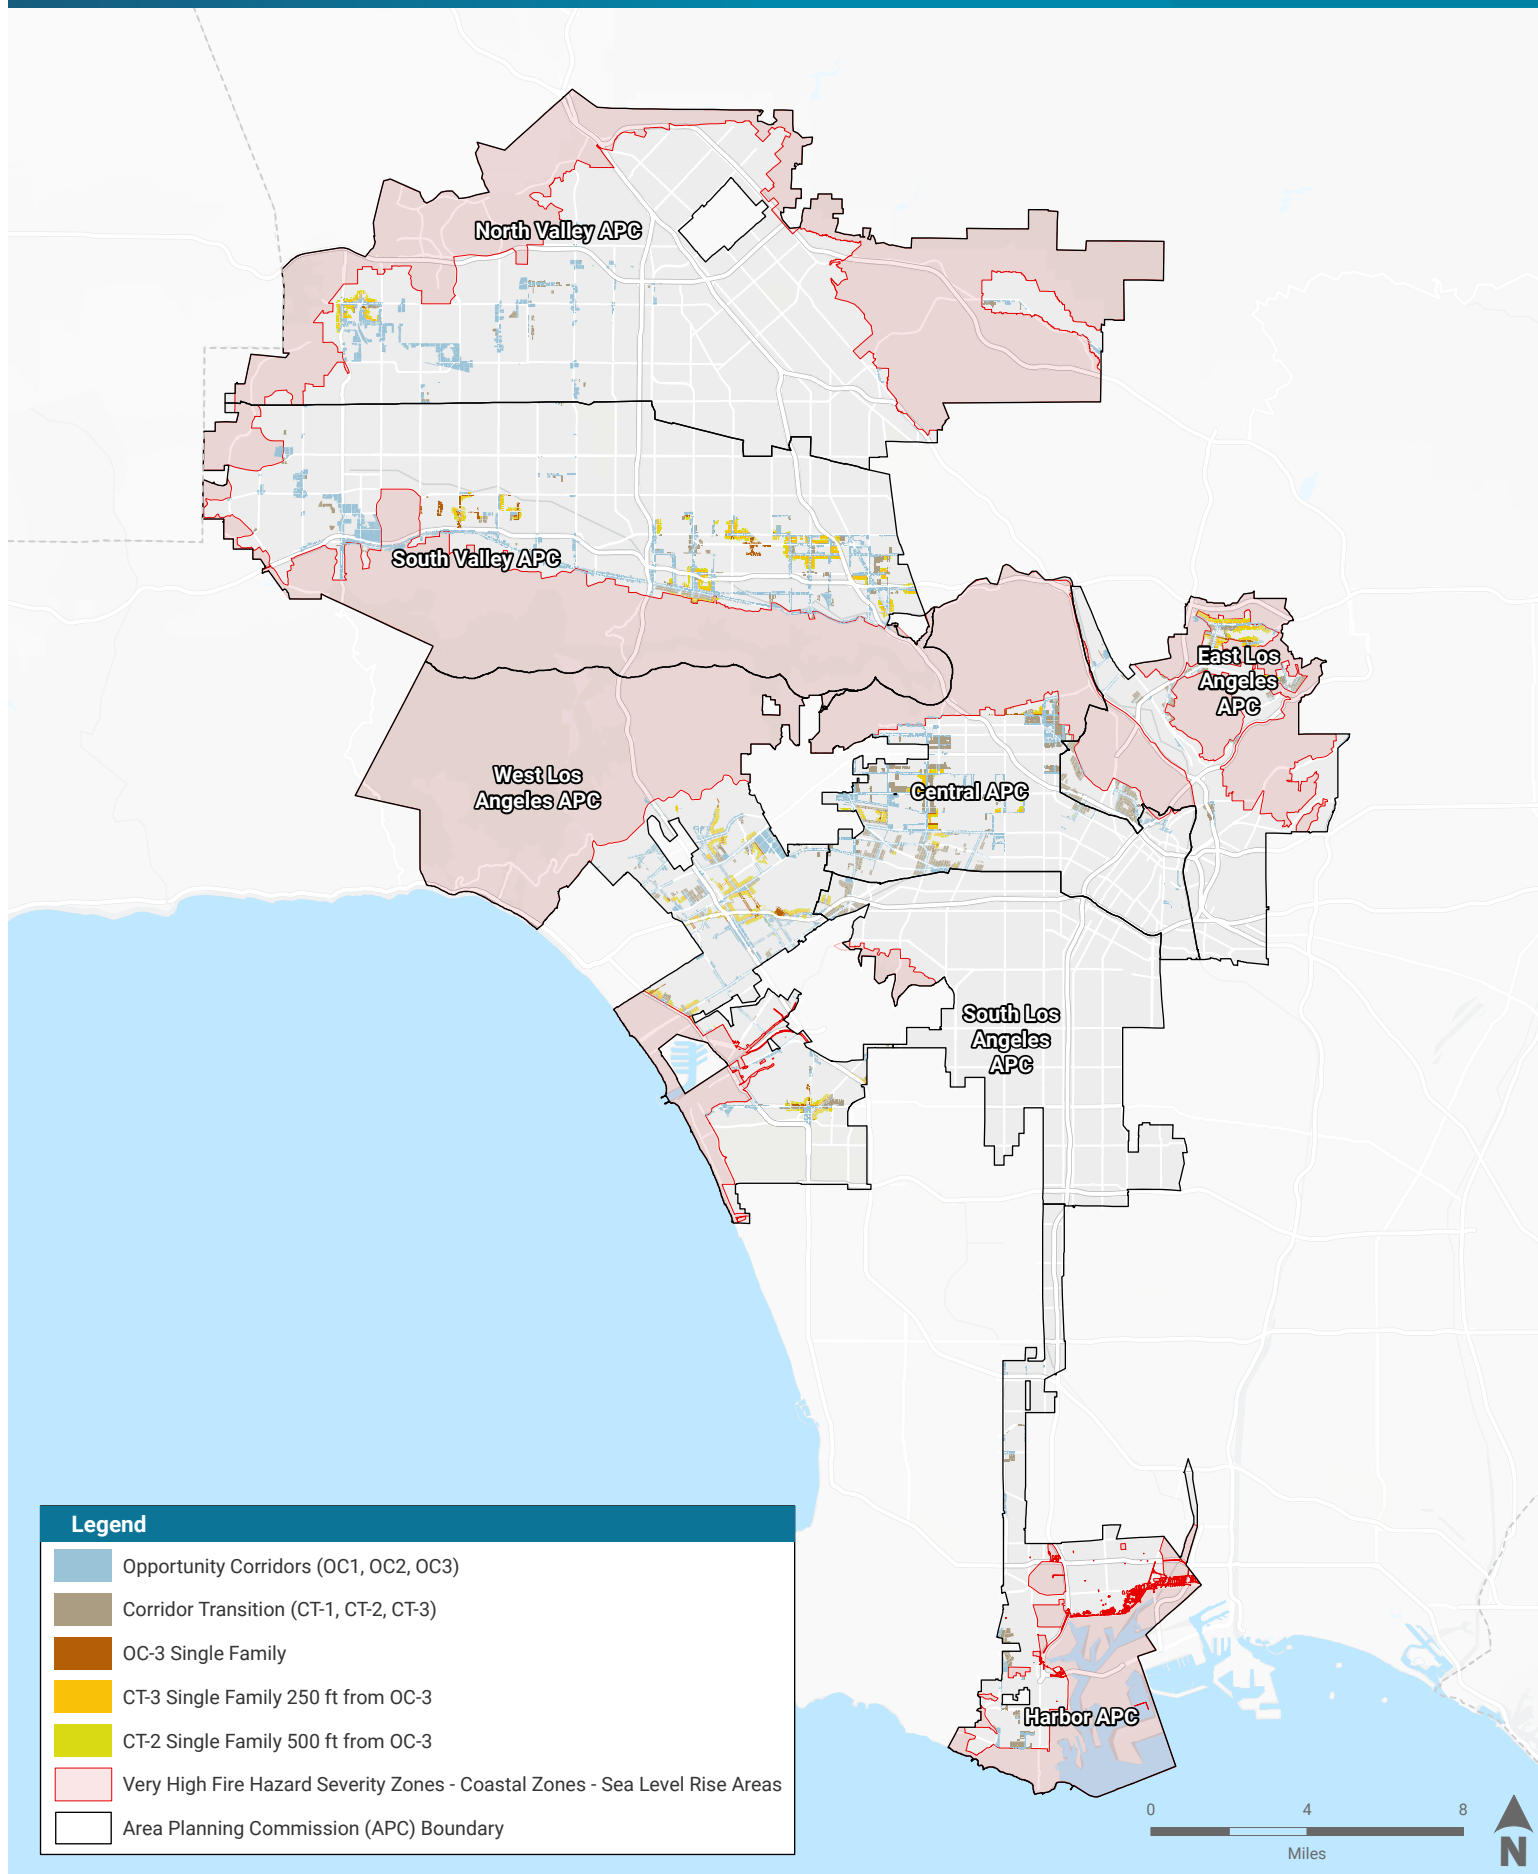

Applicability of this Option is reduced compared to Option 1, as it would not include eligibility for incentives in the Transit Oriented Incentive Areas in Higher Opportunity Areas. **Map 3A** below shows maps where eligibility would be expanded as a result of Option 3.

This option would help increase the proportion of new housing capacity in the City's Higher Opportunity Areas. It would also relieve pressure on existing multi-family zones, reducing potential displacement pressures on existing multi-family development by increasing the amount of land where multi-family uses can be developed in the City. It also addresses concerns we have heard from the public of ensuring that developments are built around public transit stops as housing would be centered around permanent rail stations. However, this option provides the least amount of development potential as Higher Opportunity Areas are unlikely to have OC-3 and CT-2 and CT-3 parcels.

Capacity

The inclusion of Option 3 to the proposed CHIP Ordinance would result in approximately 10,500 parcels zoned single-family (RW and less restrictive zones, excluding A1 and A2 parcels). This would increase the proportion of housing opportunities located in Higher Opportunity Areas from approximately 54% to 56% (see **Figure 3**). The distribution of these sites are visible below in Map 3A at a Citywide level. Maps at an Area Planning Commission Level are available on page 26.

Option 3 Major Transit Stops Citywide APCs

Option 4 - Opportunity Corridors Only

Eligibility

Option 4: Opportunity Corridor Only (Option 4) focuses the inclusion of single-family zones on Avenues and Boulevards through the Opportunity Corridor Incentive Areas in the MIIP. This option proposes the same incentives for zones in single-family zones as the other eligible zones in the Opportunity Corridors strategy. **Table 5** below summarizes the proposed incentives.

Table 5: Option 4 Mixed Income Incentive Program Base Incentives			
Rezoning Program	Bonus Density	FAR (max.)	Height (max.)
Mixed Income Incentive Program			
Opportunity Corridors Incentive Areas			
OC-1 Single-Family	Limited by Floor Area.	3.0, or 40% increase, whichever is greater.	One additional story, up to 11 additional feet; or up to a maximum of 5 total stories, whichever is greater.
OC-2 Single-Family		3.0 or 45% increase, whichever is greater.	Two additional stories, up to 22 additional feet; or up to a maximum of 6 total stories, whichever is greater.
OC-3 Single-Family		4.5 or 50% increase, whichever is greater.	Three additional stories, up to 33 additional feet; or up to a maximum of 7 total stories, whichever is greater.

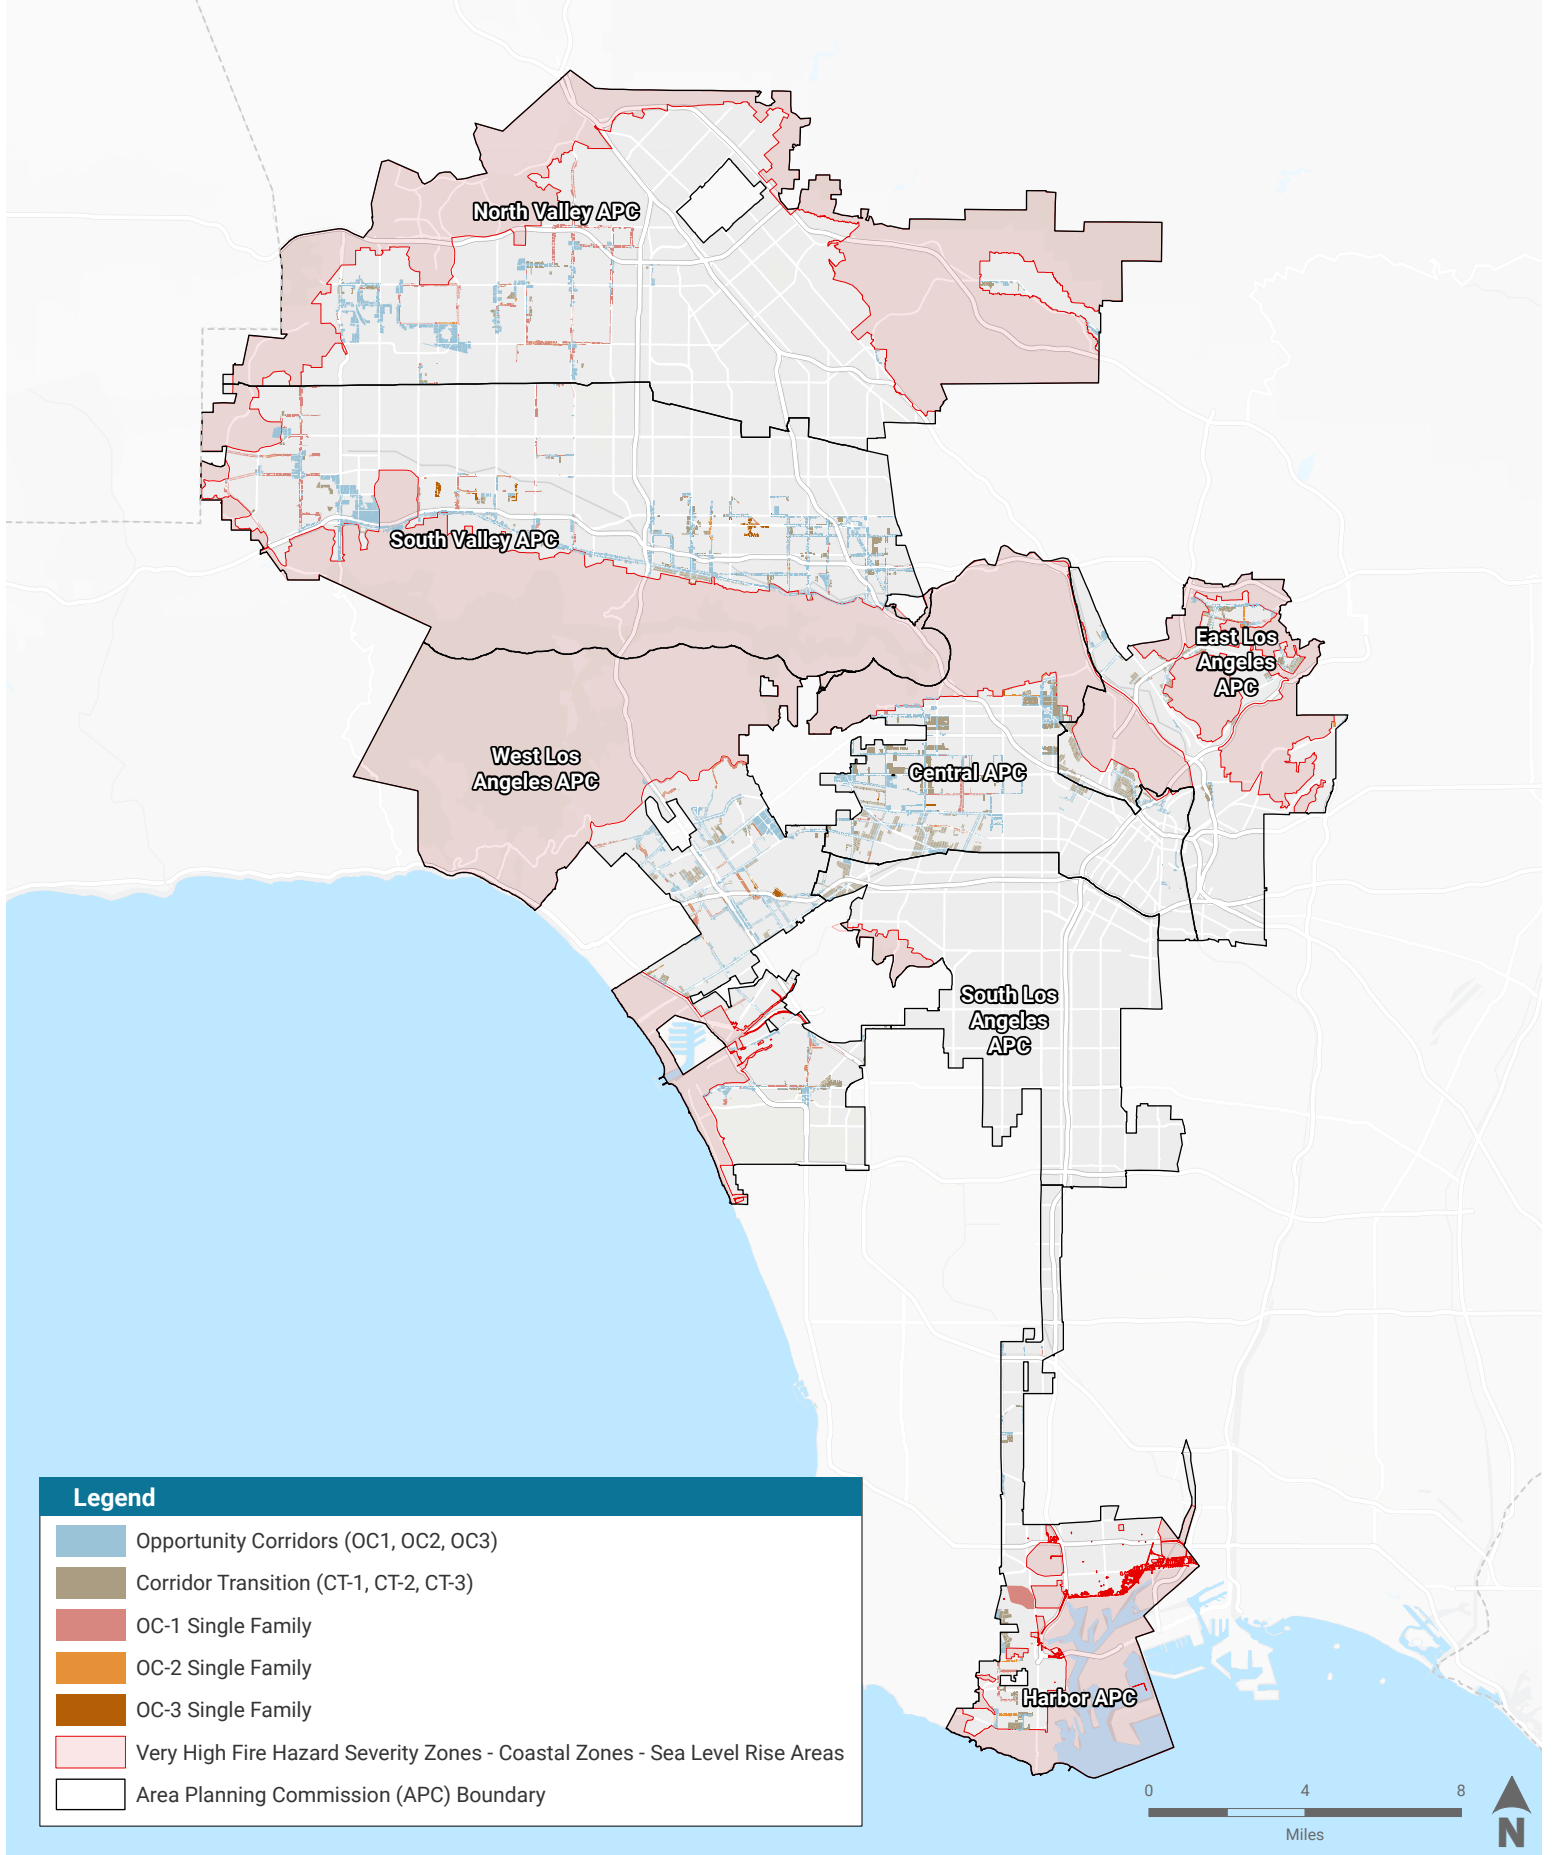

Considerations

Option 4 would introduce continuity of building massing and scale along transit served corridors in Higher Opportunity Areas, as the single-family zones would receive similar incentives as the multi-family zones on Opportunity Corridors, as proposed in the CHIP Ordinance. As with Option 1, described above, the inclusion of single-family zones would create new Opportunity Corridors in areas of the city, most notably in the South Valley (Canoga Park - Winnetka - Woodland Hills, West Hills) and Northwest Valley (Chatsworth and Northridge). These corridors have transit service along them, but were not eligible for the proposed Opportunity Corridors Incentive Areas program due to single-family zoning. While this option would continue to support the City's obligations to AFFH and equity goals, inclusion of this option would exceed the City's state housing capacity obligations which are currently being addressed through the CHIP program. **Map 4A** below shows maps where eligibility would be expanded as a result of this Option.

Capacity

The inclusion of Option 4 to the proposed CHIP Ordinance would result in approximately 6,500 parcels zoned single-family (RW and less restrictive zones, excluding A1 and A2 parcels). This would increase the proportion of housing opportunities located in Higher Opportunity Areas from approximately 54% to 58% (see **Figure 4**). The distribution of these sites are visible below in Map 4A at a Citywide level. Maps at an Area Planning Commission Level are available on page 26.

Option 4: Opportunity Corridors Only Citywide APCs

Option 5 - Limited Multi-Family Zones in Opportunity Corridors

Eligibility

Option 5: Limited Multi-Family Zones in Opportunity Corridors (Option 5) responds to an advocacy push from the Sawtelle Neighborhood and LA Conservancy to focus inclusion of single-family zones on Avenues and Boulevards through the Opportunity Corridor Incentive Areas in the MIIP. Additionally, advocates have asked that R2 and RD zones in the proposed Opportunity Corridors Incentive Areas program be removed from eligibility, citing concerns regarding displacement of existing low density housing opportunities. This option proposes removing R2 and RD zones from eligibility in the Opportunity Corridors as proposed in the Opportunity Corridors Program in the proposed CHIP Ordinance. Sites zoned single-family (RW and less restrictive) are not included in the Corridor Transition Incentive Areas.

Considerations

Option 5 would address concerns raised by advocates regarding displacement of existing low density multi-family housing in Higher Opportunity Areas. This option would remove R2 and RD zones, which are often already built out with existing low scale housing from the proposed Opportunity Corridors program in the CHIP Ordinance. The removal of these zones from the proposed CHIP Ordinance could result in a shift in the proportion of rezoning program sites located in Higher Opportunity Areas, as described in the Capacity section, below. **Map 5A** below shows maps where eligibility would be expanded as a result of this Option.

Capacity

The inclusion of Option 5 to the proposed CHIP Ordinance would result in the removal of approximately 1,900 sites zoned for R2 and RD zones, and capacity for approximately 15,000 housing units. As a result of the removal of R2 and RD zones from Opportunity Corridor Incentive program eligibility, the overall proportion of housing opportunities located in Higher Opportunity Areas as part of the Program would decrease from approximately 54% to 53% (see **Figure 5**). The distribution of these sites are visible below in Map 5A at a Citywide level. Maps at an Area Planning Commission Level are available on page 26.

Option 5 - Reduced Multi-Family Zones in Opportunity Corridors Citywide APCs

Legend

- Opportunity Corridors (OC1, OC2, OC3)
- Very High Fire Hazard Severity Zones - Coastal Zones - Sea Level Rise Areas
- Area Planning Commission (APC) Boundary

Option 6 - High Opportunity Transit Areas in AHIP

Eligibility

Option 6 proposes single-family eligibility for One Hundred Percent Affordable Projects, Faith-Based Organization Projects, and Shared Equity Projects on parcels located within 0.5 miles of a Major Transit Stop and in Higher and Moderate Opportunity Areas. These parcels would be eligible for the low density option (sites with a maximum allowable residential density of less than 5 units) of Moderate and Higher Opportunity Area base incentives already available in AHIP as displayed in the chart below, provided that the proposed projects contain 100% covenanted Affordable units.

Table 6: Low Density, High and Moderate Opportunity Base Incentives in AHIP			
Density	Parking	FAR	Height
Limited by FAR.	No Minimum Parking Required.	Maximum of 2.5:1	Bonus of up to 11' or 1 story, whichever is greater.

Considerations

Option 6 limits the development to a community scale with a maximum of 2.5:1 FAR and height at an addition of 11 feet or 1 story for the base incentives, providing a strong control on the potential height and density of a project. Option 6 incentivizes housing development in single-family zones within 0.5 miles of a Major Transit Stop, promoting access to jobs, shortening commutes, and reducing greenhouse gas emissions. Incentivizing affordable housing development in neighborhoods with strong transit networks provides a pathway to heightened sustainability and mobility within the community and citywide.

Capacity

Option 6 increases potential sites eligible for AHIP, with notable increases on the Westside and in the Valley (see map below). Approximately 66,800 parcels would become eligible for AHIP based on geographic eligibility and single-family zoning through Option 6. Notably, the majority (approximately 69%) of these parcels are in Higher Opportunity Areas as designated by TCAC. The distribution of these sites are visible below in Map 6A at a Citywide level.

AHIP Single Family Inclusion Option 6: Single Family Parcels within a Half Mile of a Major Transit Stop, in Moderate and Higher Opportunity Areas

Legend

-  Eligible Parcels
-  City Boundary

Option 7 - Shared Equity Projects Citywide Near Transit

Eligibility

In addition to Option 6, additional incentives could be introduced for single-family zones on Land owned by a Community Land Trust, Limited Equity Cooperative, or Workforce Housing Cooperative within half a mile of a major transit stop. Option 7 also includes parcels within 0.5 miles of a major transit stop like Option 6, but has more expansive eligibility by allowing parcels in all levels of opportunity, not just Moderate and High Opportunity Areas. However, Option 7 solely permits Shared Equity Projects access to incentives in single-family, while Option 6 grants eligibility to Shared Equity Projects, One Hundred Percent Affordable Projects, and Faith-Based Organization Projects.

Table 7: Within Half a Mile of a Major Transit Stop Base Incentives in AHIP			
Density	Parking	FAR	Height
Limited by FAR.	No Minimum Parking Required.	Maximum of 2.0:1	Bonus of up to 11' or 1 story, whichever is greater.

Considerations

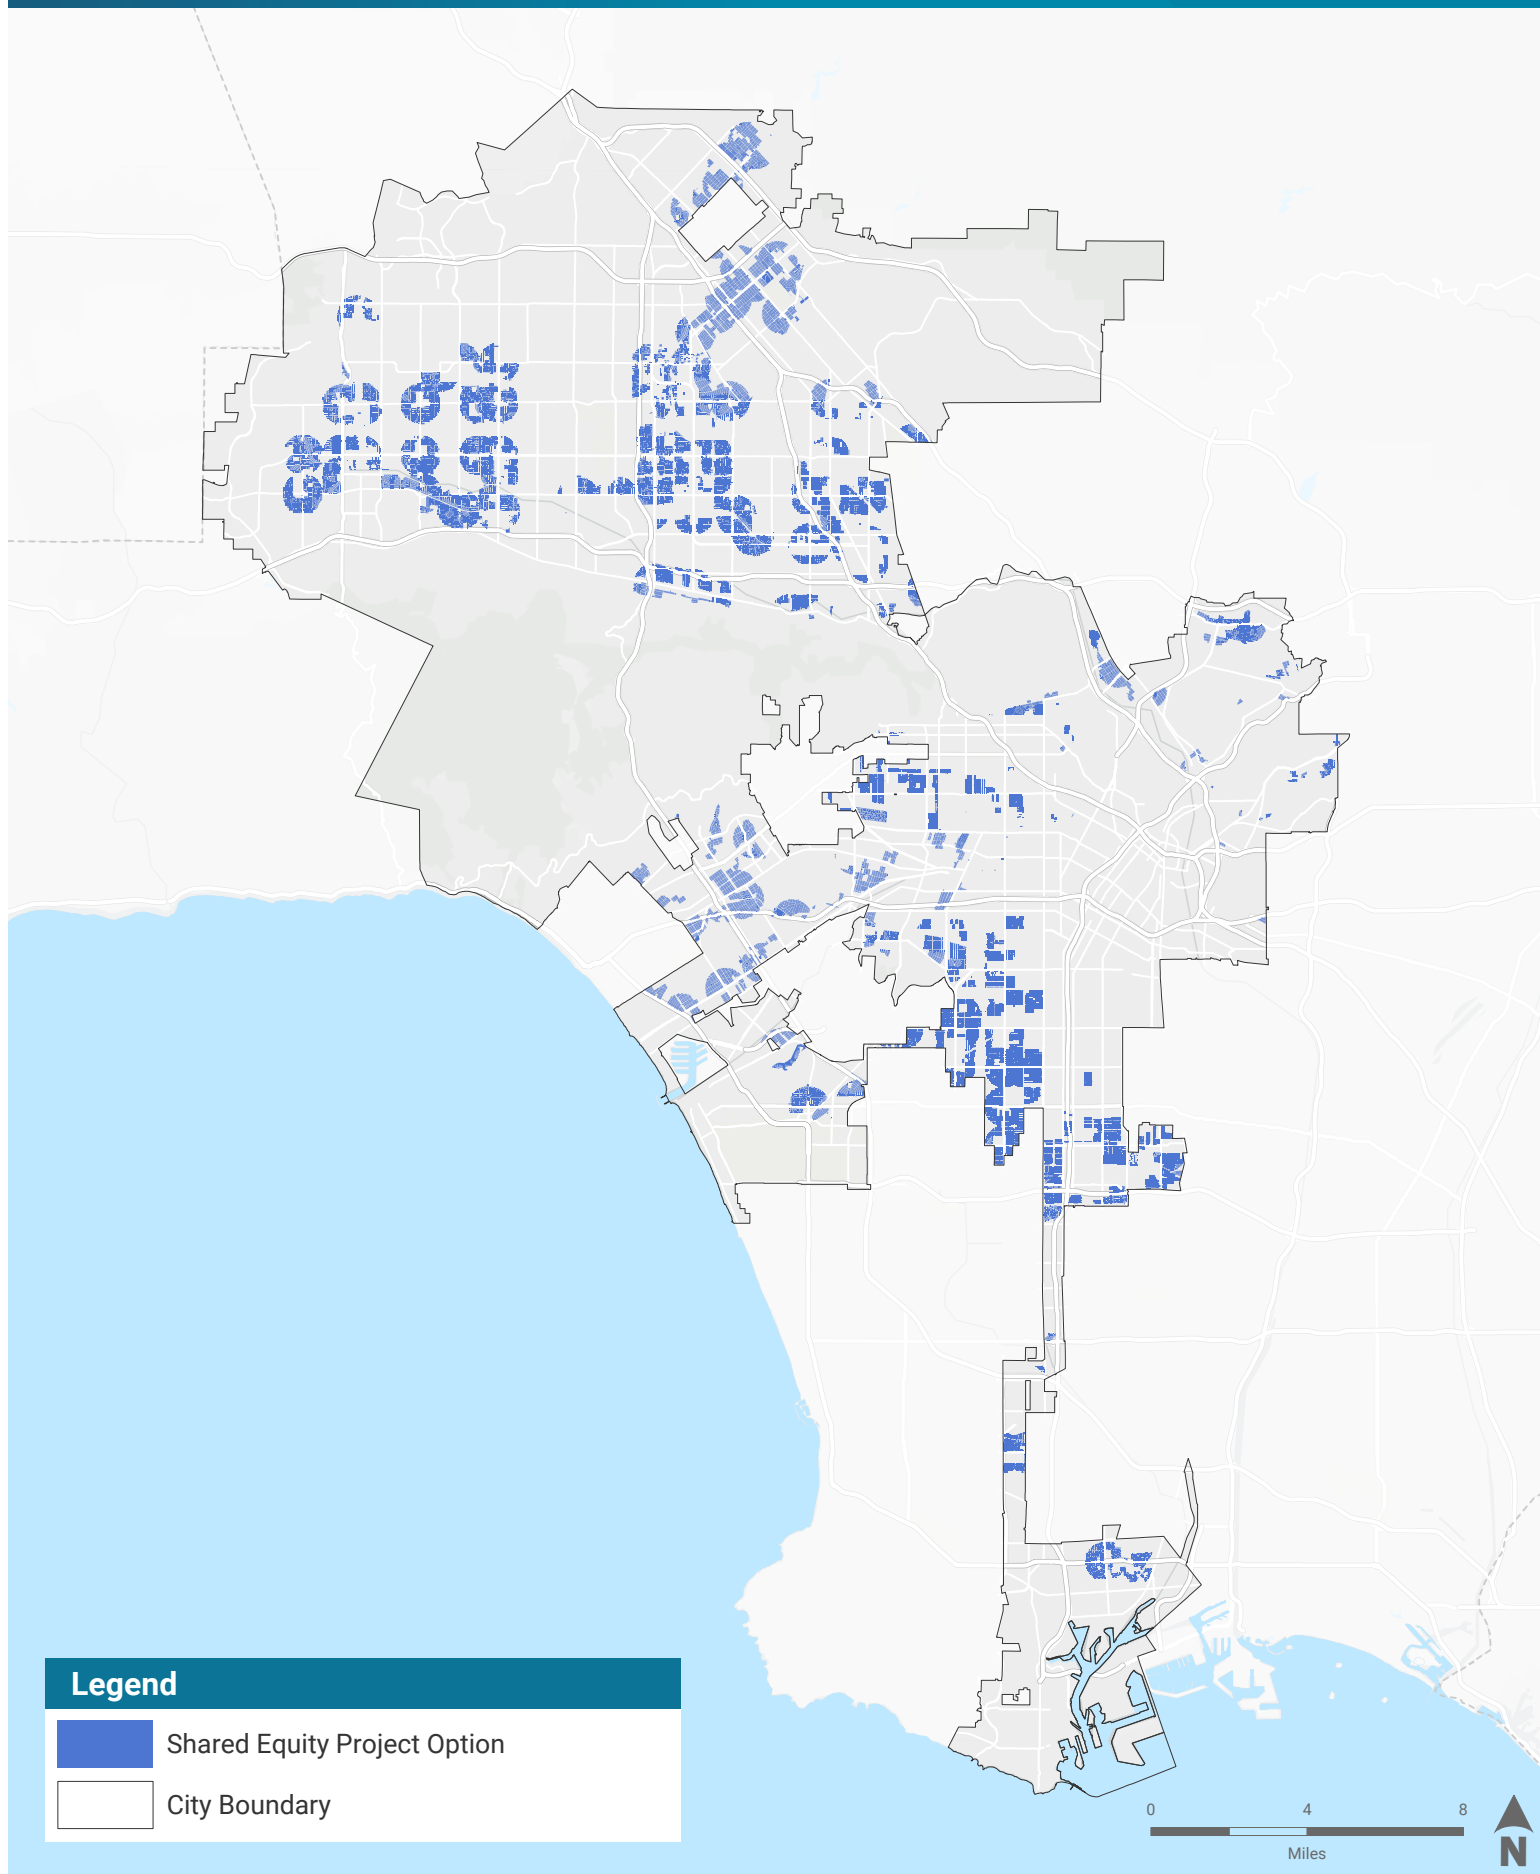

Shared equity models created by nonprofit community land trusts and cooperatives are an emerging form of non-speculative housing development that stewards land for low and moderate income households, leasing land as an ownership interest or charging affordable rents to tenants. Measure ULA, approved by Los Angeles voters in 2022, has allocated funding towards these models as a way of formulating long-term solutions that address the root cause of the housing crisis. The Citywide Housing Incentive Program could offer complementary land use incentives for this influx of funding, that would likewise assist future non-ULA funded projects.

Community land trusts have difficulty competing for land with market rate developers, as shared in an informational session between these organizations and City Planning. Offering these organizations an exclusive incentive area not accessible to other developers provides an incubation opportunity for emerging alternative land stewardship models. Due to financial constraints regarding construction costs and the purchasing of land, most limited equity model projects have historically focused on preservation or rehabilitation. Granting an exclusive incentive area to these organizations would facilitate more new-build community land trust and cooperative projects, while responding to displacement pressure with a supply oriented solution.

Capacity

The shared equity model is new and only resulted in a limited number of projects. It is therefore difficult to predict the realistic development capacity for this project type within the 2021 - 2029 planning period, and inclusion of incentives for this project type is not expected to result in significant capacity increases. Approximately 139,000 parcels would be eligible, with a majority approximately 52% located in Lower Opportunity Areas, approximately 15% located in Moderate Opportunity Areas, and approximately 33% located in Higher Opportunity Areas. The distribution of these sites are visible below in Map 7A at a Citywide level.

EXHIBIT D:
Single-Family Considerations

CPC-2023-7068-CA, CPC-2024-387-CA, CPC-2024-388-CA

For consideration by the City Planning Commission

September 26, 2024

Introduction

The inclusion of single-family zones in the 2021-2029 Housing Element RHNA Re-zoning Program 121 and the CHIP Ordinance has been an ongoing consideration since outreach for the 2021-2029 Housing Element began in 2019. The 2021-2029 Housing Element included RHNA Re-zoning Program 121, which included various concepts for achieving the City's housing goals including strategies focused on single-family zones. Specifically, the Program identified creating incentives on single-family zones near transit through the TOC Expansion Strategy, tailoring incentives in single-family zones for one-hundred percent affordable construction in the Affordable Housing Overlay Zone (AHOZ) strategy, creating more flexibility for the subdivision of single-family lots and the construction of accessory dwelling units through the ADU strategy, and providing mid-scale and missing middle incentives on transit corridors in the Residential Opportunity Corridors and Avenues (OPP RC and OPPRC2) strategies. This followed a lengthy Housing Element Update process that centered on public feedback, equity, and Affirmatively Furthering Fair Housing (AFFH).

This Exhibit presents six distinct options for potential inclusion of single-family zones in the CHIP ordinance that range in geographic eligibility, incentives offered, and affordability requirements, and one option to remove R2 and RD properties from Corridor strategies. These options were intentionally drafted to offer varying geographies and intensities. Some options are more permissive and expansive than others. Development of these options was based on comment letters submitted. Within all of these options VHFHSZ, Coastal Areas, and Sea Level Rise Areas have been excluded.

While inclusion of single family is not necessary for meeting state obligations for AFFH, as outlined in the Staff report. Inclusion of any of the options below would further support equity goals that the City outlined in the 2021-2029 Housing Element. One of the main Housing Element goals was to preserve and enhance the quality of housing and provide greater housing stability for households of all income levels. Objective 4.3 specifically addresses Affirmatively Furthering Fair Housing in all housing and land use programs by taking proactive measures to promote diverse, inclusive communities that grant all Angelenos access to housing, particularly in Higher Opportunity Areas, increase place-based strategies to encourage community revitalization, and protect existing residents from displacement. This is proposed to be implemented through increasing opportunities for Affordable Housing in Higher Opportunity Areas and prioritizing housing capacity, resources, policies, and incentives to include Affordable Housing in residential development, particularly near transit, jobs, and in Higher Opportunity Areas. As provided in the Staff Report, the Proposed Project fulfills the City's AFFH requirements by providing more than half of rezoning capacity in Higher Opportunity Areas. The options below would help increase the proportion of new housing capacity in the City's Higher Opportunity Areas. They would also relieve pressure on existing multi-family zones, reducing potential displacement pressures on existing multi-family development by increasing the amount of land where multi-family uses can be developed in the City.

The table below summarizes the geographic eligibility of each option including which CHIP program they apply to, with detailed descriptions of each option following.

Options Summary Table

	Programs	Eligibility
Option 1	MIIP and AHIP	All Single-Family in Higher Opportunity Areas
Option 2	MIIP	All Single-Family in Opportunity Corridors and Corridor Transition Areas 2 & 3
Option 3	MIIP	Single-Family in Opportunity Corridor 3 and Corridor Transition Areas 2 & 3
Option 4	MIIP	All Single-Family in Opportunity Corridors
Option 5	MIIP	Removed Lower Density Multi-Family Residential zones from Opportunity Corridors
Option 6	AHIP	Single-Family in Moderate and High Opportunity Areas within 0.5 Miles of a Major Transit Stop for One Hundred Percent Affordable Housing Projects, Faith-Based Organization Projects, and Shared Equity Projects
Option 7	AHIP	Single-Family within 0.5 miles of a Major Transit Stop for Shared Equity Projects

A detailed map inventory is included following Option 7.

Option 1 - Comprehensive CHIP Applicability in Higher Opportunity Areas (Advocate Recommendation)

Eligibility

Option 1: Comprehensive CHIP Applicability in Higher Opportunity Areas (Option 1), is the broadest application of single-family zones to the CHIP Ordinance. Several community advocacy groups, including ACT LA, LA Conservancy, YIMBY Law, and a Coalition of organizations including SCANPH, Abundant Housing LA, Urban Environmentalists, and many others have recommended in their comment letters on the CHIP Ordinance that the proposed Ordinance should expand eligibility to include single-family zones in Higher Opportunity Areas in all Mixed Income Incentive Programs (MIIP) and Affordable Housing Incentive Programs (AHIP), including One Hundred Percent Affordable Housing Projects, Faith-Based Organization Projects, and Shared Equity Projects. The request asked that single-family zones receive the same incentives as other eligible sites.

Tables 1 and 2 below summarize which CHIP strategies would be impacted by this policy change and the proposed bonus incentives.

Table 1: Option 1 Mixed Income Incentive Program Base Incentives			
Rezoning Program	Bonus Density	FAR (max.)	Height (max.)
Mixed Income Incentive Program			
Opportunity Corridors Incentive Areas			
OC-1 Single-Family	Limited by Floor Area.	3.0, or 45% increase, whichever is greater.	One additional story, up to 11 additional feet; or up to a maximum of 5 total stories, whichever is greater.
OC-2 Single-Family		3.0 or 50% increase, whichever is greater.	Two additional stories, up to 22 additional feet; or up to a maximum of 6 total stories, whichever is greater.
OC-3 Single-Family		4.65 or 60% increase, whichever is greater.	Three additional stories, up to 33 additional feet; or up to a maximum of 7 total stories, whichever is greater.
Opportunity Corridor Transition Areas			
CT-1 Single-Family	Up to 6 units.	Up to 1.45	2 stories max.
CT-2 Single-Family	Up to 10 units.	Up to 2.0	3 stories max.
CT-3 Single-Family	Up to 16 units.	Up to 2.90	3 stories max.
Transit Oriented Incentive Areas (Higher Opportunity Areas only)			
T-1 Single-Family	Up to 16 units.	3.0 or 40% increase, whichever is greater.	One additional story, up to 11 additional feet; or up to a maximum of 5 total stories, whichever is greater.
T-2 Single-Family	Limited by Floor Area.	3.0 or 45% increase, whichever is greater.	Two additional stories, up to 22 additional feet; or up to a maximum of 6 total stories, whichever is greater.
T-3 Single-Family	Limited by Floor Area.	3.0 or 50% increase, whichever is greater.	Three additional stories, up to 33 additional feet; or up to a maximum of 7 total stories, whichever is greater.

Table 2: Option 1 AHIP Low Density, High and Moderate Opportunity Areas Base Incentives			
Density	Parking	FAR	Height
Limited by FAR.	No Minimum Parking Required.	Maximum of 2.5:1	Bonus of up to 11' or 1 story, whichever is greater.

Considerations

Option 1 as described above is the broadest and most expansive of the options described in this exhibit. Approximately 43,000 parcels zoned for single-family uses (RW and more restrictive zones, excluding A1 and A2 zones) would be included in the MIIP as a result of Option 1, and approximately 160,800 parcels zoned for single-family uses would be included in the AHIP Program.

While this option would continue to support the City’s equity goals, inclusion of this option would exceed the City’s state housing capacity obligations which are currently being addressed through the CHIP program. This option would expand eligibility for the CHIP Ordinance to interior neighborhoods across the Higher Opportunity through the Corridor Transition Areas program, primarily in areas of Mid-City, West LA, and the South Valley and Northwest Valley. **Map 1A through 1C** below shows maps where eligibility would be expanded as a result of Option 1 (for more detailed maps by Area Planning Commission, please refer to the Appendix). Further, inclusion of Option 1 would create new opportunity corridors with single-family zones on major streets with transit service in areas such as the South Valley (Canoga Park - Winnetka - Woodland Hills, West Hills), Northwest Valley (Chatsworth and Northridge).

Option 1 proposes the inclusion of single-family zones to receive the same base incentives as multi-family zones would be eligible to receive in the Mixed Income Incentive Program and Affordable Housing Incentive Program, with some revisions to allow for fixed density bonuses where the current program proposed percentage based increases. Inclusion of single family in the incentives designed for high density development could lead to potential out-of-scale developments without transitional height elements to existing neighborhoods. Additional density and FAR could lead to larger scale developments, potentially up to seven-stories, in existing low-scale neighborhoods, especially in areas located around the highest quality transit service (TOIA T-2 and T-3).

Capacity

The inclusion of Option 1 to the proposed CHIP Ordinance would result in approximately 43,000 parcels zoned single-family (RW and less restrictive zones, excluding A1 and A2 parcels) in the MIIP program. This would increase the proportion of housing opportunities located in Higher Opportunity Areas from approximately 54% to 67%. The distribution of these sites are visible

below in Map 1A-1C at a Citywide level. Maps at an Area Planning Commission Level are available on page 26.

- T-3

- Very High Fire Hazard Severity Zones - Coastal Zones - Sea Level Rise Areas
- Area Planning Commission (APC) Boundary

Option 2 - Broader Option Near Transit

Eligibility

Option 2: Broader Options in Transit (Option 2) focuses inclusion of single-family zones in areas of the Mixed Income Incentive Program around corridors with transit service in Higher Opportunity Areas, namely, the Opportunity Corridor Incentive Areas and Opportunity Corridor Transition Incentive Areas. This option proposes reduced incentives for lots in single-family zones (RW and more restrictive, excluding A1 and A2 zones) on Opportunity Corridors, and emphasizes a gentle transition in density and building scale in the Corridor Transition Areas, the farther the site is from the corridor. The development of this option was informed by the Los Angeles Conservancy’s Comment Letter. The Conservancy also requested the Corridor Transition 3 (CT-3) incentives be introduced within non-historic single-family zones within 750 feet of an Opportunity Corridor and further requested that non-historic single-family zones facing an eligible opportunity corridor receive the CT-3 incentives. The letter also requested R2 and RD zones be removed from the Opportunity Corridor Program, but remain eligible for Corridor Transition incentives. Staff would recommend a more graduated approach in this scenario to allow for a transition from the corridor and scale incentives based on corridor types. **Table 3** below summarizes the base incentives in Option 2.

Table 3: Option 2 - Mixed Income Incentive Program Base Incentives			
Rezoning Program	Density Bonus	FAR (max.)	Height (max.)
Mixed Income Incentive Program			
Opportunity Corridors Incentive Areas			
OC-1 Single-Family	Up to 6 units.	Up to 1.45:1	2 stories.
OC-2 Single-Family	Up to 10 units.	Up to 2.0:1	3 stories.
OC-3 Single-Family	Up to 16 units.	Up to 2.9:1	3 stories.
Opportunity Corridor Transition Areas			
CT-2 Single-Family (500 feet from OC-2 and OC-3)	Up to 6 units.	Up to 1.45:1	2 stories max.
CT-3 Single-Family (250 feet from OC-2 and OC-3)	Up to 10 units.	Up to 2.0:1	3 stories max.

Considerations

Similar to Option 1 described above, Option 2 introduces context specific incentives that scale down in density and intensity the farther the site is from transit service and the corridor. Option 2 proposes that single-family zones in the most transit rich areas of the City, along Opportunity

Corridor-3 (OC-3) would be eligible to build up to 16 units and up to a maximum of 3 stories in height. Sites adjacent to the corridor would scale down in intensity, and would be allowed to build up to 10 units and up to 3 stories within 250 feet of the Opportunity Corridor. Sites within 500 feet of an OC-3 corridor would be eligible for incentives to build up to 6 units and 2 stories. No incentives would be offered for sites up to 750 feet from an OC-3. As summarized in Table 3 above, reduced incentives would be offered for single-family zones located on Opportunity Corridor-2 (OC-2) and Opportunity Corridor-1 (OC-1), with similar scaled down incentives in the Corridor Transition Areas.

While this option would continue to support the City's equity goals, inclusion of this option would exceed the City's state housing capacity obligations. This option would expand eligibility for the Mixed Income Incentive Program to interior neighborhoods across the Higher Opportunity Areas of the City through the Corridor Transition Areas program, primarily in areas of Mid-City, West LA, and the South Valley and Northwest Valley. However, applicability of this Option is reduced compared to Option 1, as it would not include eligibility for incentives in the Transit Oriented Incentive Areas in Higher Opportunity Areas. **Map 2A** below shows maps where eligibility would be expanded as a result of Option 2.

Option 2 increases the land available for multi-family housing in the West LA and South Valley, and as a result would help adding development pressure in existing multi-family areas. It also provides reduced incentives in single-family zones compared to Option 1, to address potential concerns around out-of-context development. Option 2's emphasis on development in areas with transit and in Higher Opportunity Areas addresses the Housing Element's objective of promoting new multi-family housing, particularly Affordable and mixed-income housing, in areas near transit, jobs and Higher Opportunity Areas, in order to facilitate a better jobs-housing balance, help shorten commutes, and reduce greenhouse gas emissions (Objective 3.2).

Capacity

The analysis for applicability of Option 2 at this time does not exclude eligible resources or remove eligible multi-family parcels from the program. The inclusion of Option 2 to the proposed CHIP Ordinance would result in approximately 24,000 parcels zoned single-family (RW and less restrictive zones, excluding A1 and A2 parcels). This would increase the proportion of housing opportunities located in Higher Opportunity Areas from approximately 54% to 58% (see Figure 2). The distribution of these sites are visible below in Map 2A at a Citywide level. Maps at an Area Planning Commission Level are available on page 26.

Option 2 - Broader Option Near Transit Citywide APCs

Option 3 - Major Transit Stops Only

Eligibility

Option 3: Major Transit Stops (Option 3) focuses inclusion of single-family zones in areas of the Mixed Income Incentive Program around Avenues and Boulevards in TOIA Tiers 2 and 3: the Opportunity Corridor Incentive Areas and Opportunity Corridor Transition Incentive Areas. Single-family zones would be included if they are only along an OC-3 corridor or if they are within 500 feet of the furthest property line from the corridor of an OC-3 site. **Table 4** below summarizes the proposed incentives.

Table 4: Option 3 -Mixed Income Incentive Program Base Incentives			
Rezoning Program	Density Bonus	FAR (max.)	Height (max.)
Mixed Income Incentive Program			
Opportunity Corridors Incentive Areas			
OC-3 Single-Family	Up to 16 units.	Up to 2.9	3 stories max.
Opportunity Corridor Transition Areas			
CT-2 Single-Family (500 feet from OC-3 Single-Family)	Up to 6 units.	Up to 1.45	2 stories max.
CT-3 Single-Family (250 feet from OC-3 Single-Family)	Up to 10 units.	Up to 2.0	3 stories max.

Considerations

Option 3 focuses specifically in areas that provide the highest quality transit services. Between all five options, Option 3 impacts the least single-family zones in the highest priority growth areas. Option 3 proposes that single-family zones in the most transit-rich areas of the City, along Opportunity Corridor-3 (OC-3) would be eligible to build up to 16 units and up to a maximum of 3 stories in height. Sites adjacent to the corridor would scale down in intensity, and would be allowed to build up to 10 units and up to 3 stories within 250 feet of the Opportunity Corridor. Sites within 500 feet of an OC-3 corridor would be eligible for incentives to build up to 6 units and 2 stories. No incentives would be offered for sites up to 750 feet from an OC-3, sites in OC-1, or sites in OC-2.

Applicability of this Option is reduced compared to Option 1, as it would not include eligibility for incentives in the Transit Oriented Incentive Areas in Higher Opportunity Areas. **Map 3A** below shows maps where eligibility would be expanded as a result of Option 3.

This option would help increase the proportion of new housing capacity in the City's Higher Opportunity Areas. It would also relieve pressure on existing multi-family zones, reducing potential displacement pressures on existing multi-family development by increasing the amount of land where multi-family uses can be developed in the City. It also addresses concerns we have heard from the public of ensuring that developments are built around public transit stops as housing would be centered around permanent rail stations. However, this option provides the least amount of development potential as Higher Opportunity Areas are unlikely to have OC-3 and CT-2 and CT-3 parcels.

Capacity

The inclusion of Option 3 to the proposed CHIP Ordinance would result in approximately 10,500 parcels zoned single-family (RW and less restrictive zones, excluding A1 and A2 parcels). This would increase the proportion of housing opportunities located in Higher Opportunity Areas from approximately 54% to 56% (see **Figure 3**). The distribution of these sites are visible below in Map 3A at a Citywide level. Maps at an Area Planning Commission Level are available on page 26.

Option 3 Major Transit Stops Citywide APCs

Option 4 - Opportunity Corridors Only

Eligibility

Option 4: Opportunity Corridor Only (Option 4) focuses the inclusion of single-family zones on Avenues and Boulevards through the Opportunity Corridor Incentive Areas in the MIIP. This option proposes the same incentives for zones in single-family zones as the other eligible zones in the Opportunity Corridors strategy. **Table 5** below summarizes the proposed incentives.

Table 5: Option 4 Mixed Income Incentive Program Base Incentives			
Rezoning Program	Bonus Density	FAR (max.)	Height (max.)
Mixed Income Incentive Program			
Opportunity Corridors Incentive Areas			
OC-1 Single-Family	Limited by Floor Area.	3.0, or 40% increase, whichever is greater.	One additional story, up to 11 additional feet; or up to a maximum of 5 total stories, whichever is greater.
OC-2 Single-Family		3.0 or 45% increase, whichever is greater.	Two additional stories, up to 22 additional feet; or up to a maximum of 6 total stories, whichever is greater.
OC-3 Single-Family		4.5 or 50% increase, whichever is greater.	Three additional stories, up to 33 additional feet; or up to a maximum of 7 total stories, whichever is greater.

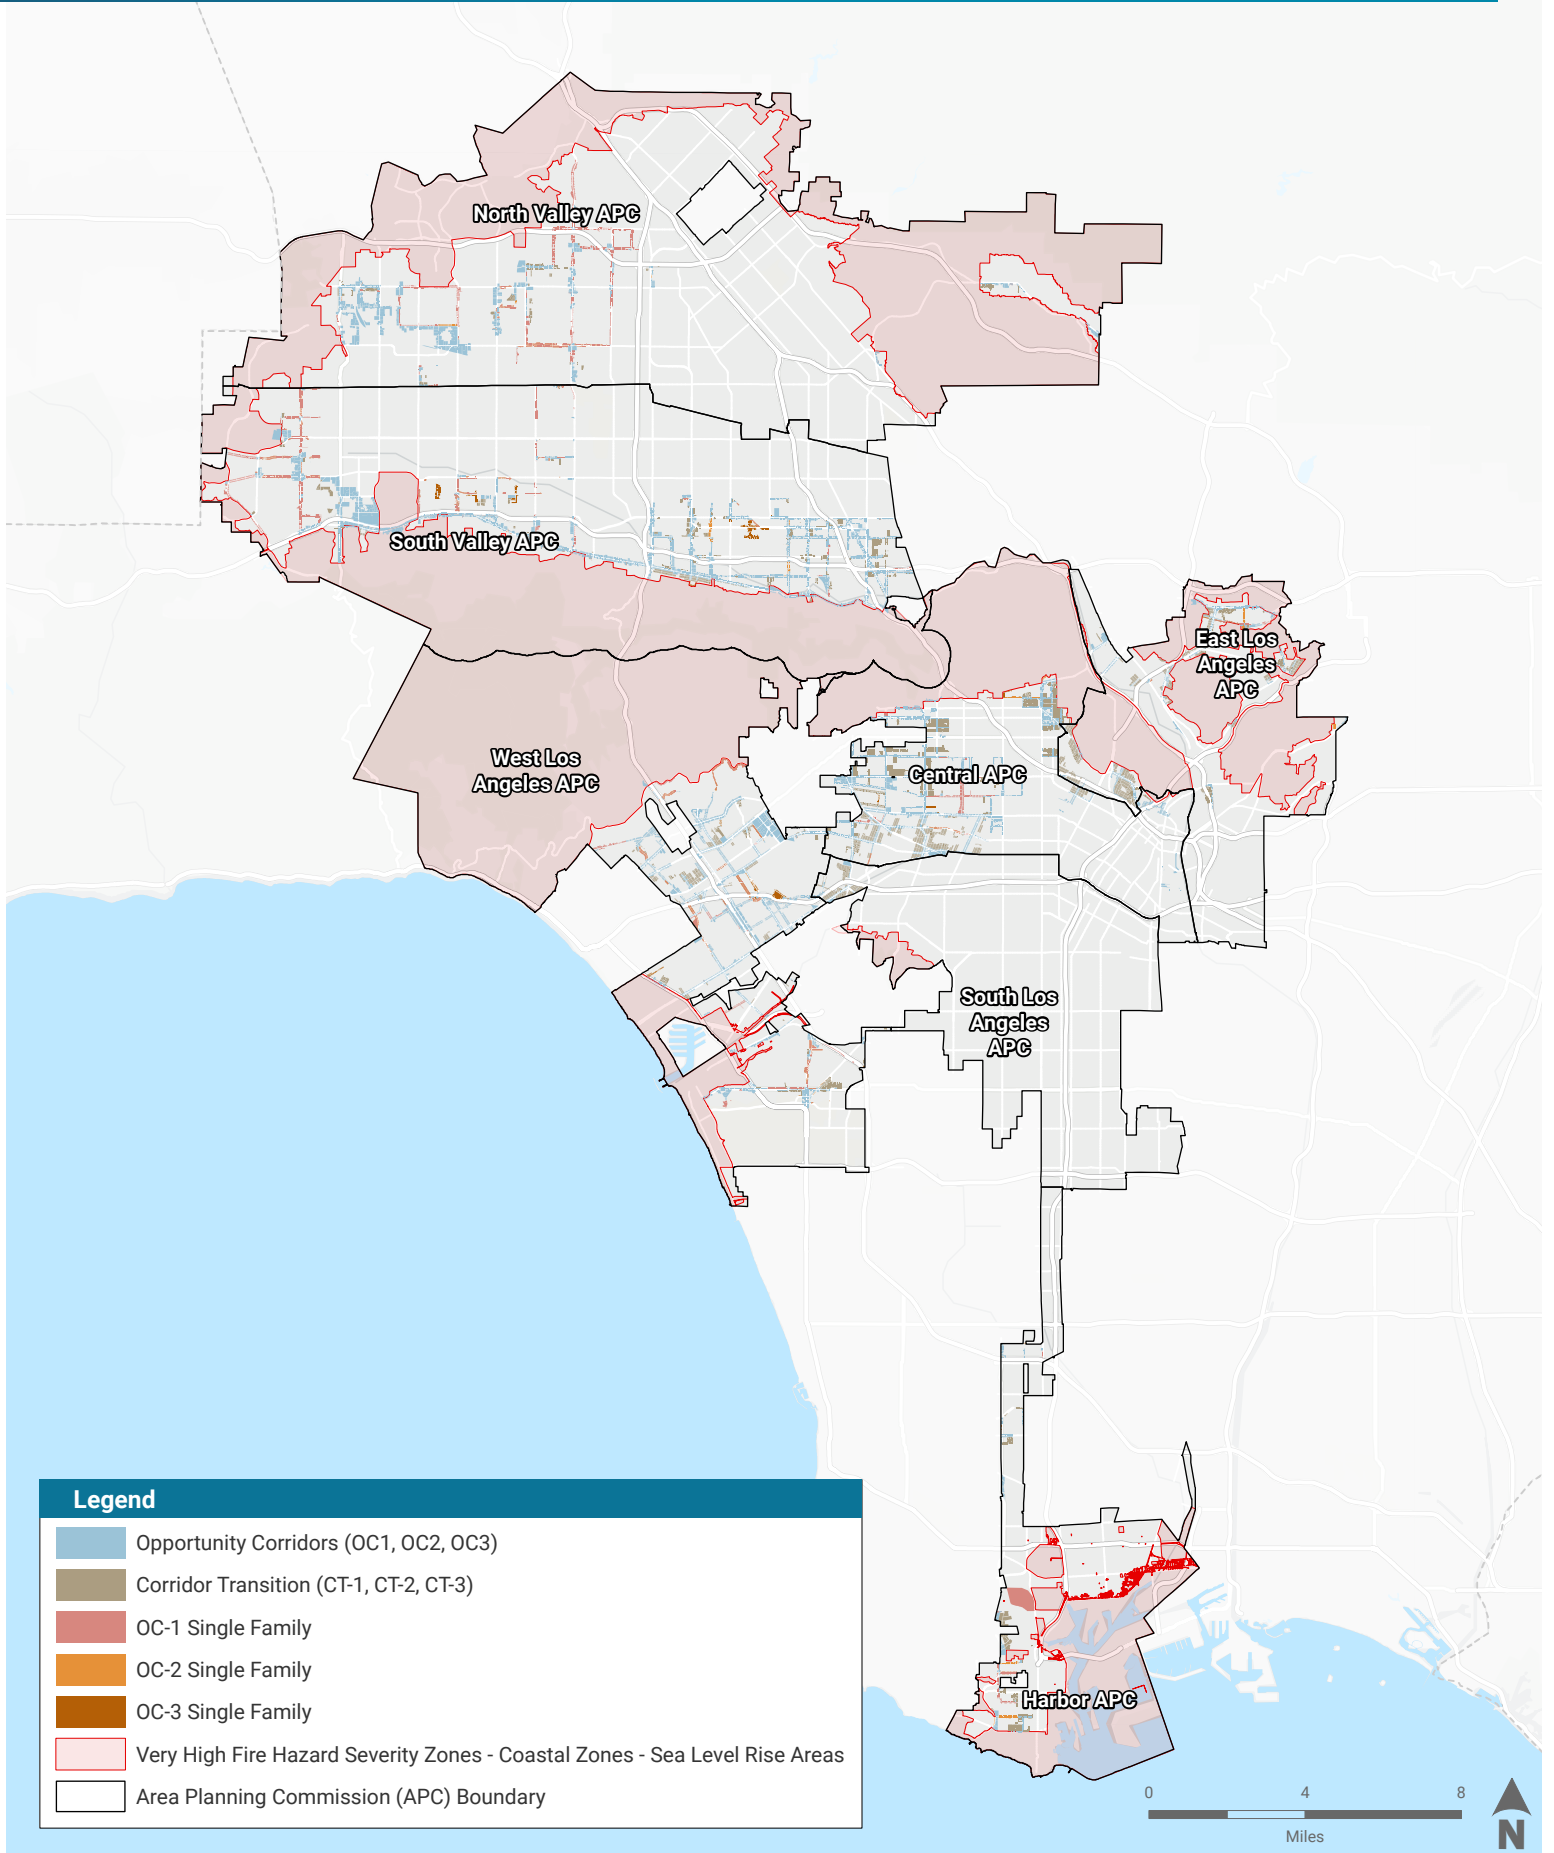

Considerations

Option 4 would introduce continuity of building massing and scale along transit served corridors in Higher Opportunity Areas, as the single-family zones would receive similar incentives as the multi-family zones on Opportunity Corridors, as proposed in the CHIP Ordinance. As with Option 1, described above, the inclusion of single-family zones would create new Opportunity Corridors in areas of the city, most notably in the South Valley (Canoga Park - Winnetka - Woodland Hills, West Hills) and Northwest Valley (Chatsworth and Northridge). These corridors have transit service along them, but were not eligible for the proposed Opportunity Corridors Incentive Areas program due to single-family zoning. While this option would continue to support the City's obligations to AFFH and equity goals, inclusion of this option would exceed the City's state housing capacity obligations which are currently being addressed through the CHIP program. **Map 4A** below shows maps where eligibility would be expanded as a result of this Option.

Capacity

The inclusion of Option 4 to the proposed CHIP Ordinance would result in approximately 6,500 parcels zoned single-family (RW and less restrictive zones, excluding A1 and A2 parcels). This would increase the proportion of housing opportunities located in Higher Opportunity Areas from approximately 54% to 58% (see **Figure 4**). The distribution of these sites are visible below in Map 4A at a Citywide level. Maps at an Area Planning Commission Level are available on page 26.

Option 4: Opportunity Corridors Only Citywide APCs

Option 5 - Limited Multi-Family Zones in Opportunity Corridors

Eligibility

Option 5: Limited Multi-Family Zones in Opportunity Corridors (Option 5) responds to an advocacy push from the Sawtelle Neighborhood and LA Conservancy to focus inclusion of single-family zones on Avenues and Boulevards through the Opportunity Corridor Incentive Areas in the MIIP. Additionally, advocates have asked that R2 and RD zones in the proposed Opportunity Corridors Incentive Areas program be removed from eligibility, citing concerns regarding displacement of existing low density housing opportunities. This option proposes removing R2 and RD zones from eligibility in the Opportunity Corridors as proposed in the Opportunity Corridors Program in the proposed CHIP Ordinance. Sites zoned single-family (RW and less restrictive) are not included in the Corridor Transition Incentive Areas.

Considerations

Option 5 would address concerns raised by advocates regarding displacement of existing low density multi-family housing in Higher Opportunity Areas. This option would remove R2 and RD zones, which are often already built out with existing low scale housing from the proposed Opportunity Corridors program in the CHIP Ordinance. The removal of these zones from the proposed CHIP Ordinance could result in a shift in the proportion of rezoning program sites located in Higher Opportunity Areas, as described in the Capacity section, below. **Map 5A** below shows maps where eligibility would be expanded as a result of this Option.

Capacity

The inclusion of Option 5 to the proposed CHIP Ordinance would result in the removal of approximately 1,900 sites zoned for R2 and RD zones, and capacity for approximately 15,000 housing units. As a result of the removal of R2 and RD zones from Opportunity Corridor Incentive program eligibility, the overall proportion of housing opportunities located in Higher Opportunity Areas as part of the Program would decrease from approximately 54% to 53% (see **Figure 5**). The distribution of these sites are visible below in Map 5A at a Citywide level. Maps at an Area Planning Commission Level are available on page 26.

Option 5 - Reduced Multi-Family Zones in Opportunity Corridors Citywide APCs

Legend

- Opportunity Corridors (OC1, OC2, OC3)
- Very High Fire Hazard Severity Zones - Coastal Zones - Sea Level Rise Areas
- Area Planning Commission (APC) Boundary

Option 6 - High Opportunity Transit Areas in AHIP

Eligibility

Option 6 proposes single-family eligibility for One Hundred Percent Affordable Projects, Faith-Based Organization Projects, and Shared Equity Projects on parcels located within 0.5 miles of a Major Transit Stop and in Higher and Moderate Opportunity Areas. These parcels would be eligible for the low density option (sites with a maximum allowable residential density of less than 5 units) of Moderate and Higher Opportunity Area base incentives already available in AHIP as displayed in the chart below, provided that the proposed projects contain 100% covenanted Affordable units.

Table 6: Low Density, High and Moderate Opportunity Base Incentives in AHIP			
Density	Parking	FAR	Height
Limited by FAR.	No Minimum Parking Required.	Maximum of 2.5:1	Bonus of up to 11' or 1 story, whichever is greater.

Considerations

Option 6 limits the development to a community scale with a maximum of 2.5:1 FAR and height at an addition of 11 feet or 1 story for the base incentives, providing a strong control on the potential height and density of a project. Option 6 incentivizes housing development in single-family zones within 0.5 miles of a Major Transit Stop, promoting access to jobs, shortening commutes, and reducing greenhouse gas emissions. Incentivizing affordable housing development in neighborhoods with strong transit networks provides a pathway to heightened sustainability and mobility within the community and citywide.

Capacity

Option 6 increases potential sites eligible for AHIP, with notable increases on the Westside and in the Valley (see map below). Approximately 66,800 parcels would become eligible for AHIP based on geographic eligibility and single-family zoning through Option 6. Notably, the majority (approximately 69%) of these parcels are in Higher Opportunity Areas as designated by TCAC. The distribution of these sites are visible below in Map 6A at a Citywide level.

AHIP Single Family Inclusion Option 6: Single Family Parcels within a Half Mile of a Major Transit Stop, in Moderate and Higher Opportunity Areas

Legend

-  Eligible Parcels
-  City Boundary

Option 7 - Shared Equity Projects Citywide Near Transit

Eligibility

In addition to Option 6, additional incentives could be introduced for single-family zones on Land owned by a Community Land Trust, Limited Equity Cooperative, or Workforce Housing Cooperative within half a mile of a major transit stop. Option 7 also includes parcels within 0.5 miles of a major transit stop like Option 6, but has more expansive eligibility by allowing parcels in all levels of opportunity, not just Moderate and High Opportunity Areas. However, Option 7 solely permits Shared Equity Projects access to incentives in single-family, while Option 6 grants eligibility to Shared Equity Projects, One Hundred Percent Affordable Projects, and Faith-Based Organization Projects.

Table 7: Within Half a Mile of a Major Transit Stop Base Incentives in AHIP			
Density	Parking	FAR	Height
Limited by FAR.	No Minimum Parking Required.	Maximum of 2.0:1	Bonus of up to 11' or 1 story, whichever is greater.

Considerations

Shared equity models created by nonprofit community land trusts and cooperatives are an emerging form of non-speculative housing development that stewards land for low and moderate income households, leasing land as an ownership interest or charging affordable rents to tenants. Measure ULA, approved by Los Angeles voters in 2022, has allocated funding towards these models as a way of formulating long-term solutions that address the root cause of the housing crisis. The Citywide Housing Incentive Program could offer complementary land use incentives for this influx of funding, that would likewise assist future non-ULA funded projects.

Community land trusts have difficulty competing for land with market rate developers, as shared in an informational session between these organizations and City Planning. Offering these organizations an exclusive incentive area not accessible to other developers provides an incubation opportunity for emerging alternative land stewardship models. Due to financial constraints regarding construction costs and the purchasing of land, most limited equity model projects have historically focused on preservation or rehabilitation. Granting an exclusive incentive area to these organizations would facilitate more new-build community land trust and cooperative projects, while responding to displacement pressure with a supply oriented solution.

Capacity

The shared equity model is new and only resulted in a limited number of projects. It is therefore difficult to predict the realistic development capacity for this project type within the 2021 - 2029 planning period, and inclusion of incentives for this project type is not expected to result in significant capacity increases. Approximately 139,000 parcels would be eligible, with a majority approximately 52% located in Lower Opportunity Areas, approximately 15% located in Moderate Opportunity Areas, and approximately 33% located in Higher Opportunity Areas. The distribution of these sites are visible below in Map 7A at a Citywide level.

EXHIBIT E.1:
Lower Income Rezoning Housing Element Sites Resolution

CPC-2023-7068-CA, CPC-2024-387-CA, CPC-2024-388-CA

For consideration by the City Planning Commission

September 26, 2024

RESOLUTION

WHEREAS, the City's 2021 – 2029 Housing Element ("Housing Element") was adopted on November 24, 2021 and later amended on April 21, 2022;

WHEREAS, on June 29, 2022, HCD certified the City's Housing Element as compliant with Housing Element Law;

WHEREAS, the City's Housing Element recognized that current zoning capacity could not fully accommodate the Regional Housing Needs Assessment (RHNA) for all income levels;

WHEREAS, to make sites available for the remaining RHNA, the Housing Element contains a rezoning program (Program 121);

WHEREAS, rezoned sites for Lower Income RHNA are subject to the minimum density requirements in Gov. Code Sec. 65583.2(h) and ministerial approval under Gov. Code Sec. 65583.2(i);

WHEREAS, the Housing Element Sites and Minimum Density Ordinance provides that the Lower Income Rezoned sites are subject to these minimum density requirements and ministerial approval; and

WHEREAS, the Housing Element Sites and Minimum Density Ordinance provides that the Inventory of these Lower Income Rezoning Housing Element Sites shall be established by City Council Resolution, submitted to the state each year as part of the Housing Element Annual Progress Report and identified in a public mapping system including the Zoning Information Mapping and Access System (ZIMAS);

NOW, THEREFORE, BE IT RESOLVED, that the Inventory of Lower Income Rezoning Housing Element Sites in Attachment A is hereby adopted by the City Council.
