DEPARTMENT OF CITY PLANNING

RECOMMENDATION REPORT

City Planning Commission

Date: August 14, 2025
Time: After 8:30 A.M.*
Place: Los Angeles City Hall
John Ferraro Council Chamber
200 North Spring Street, Room 340
Los Angeles, CA 90012

This meeting may be available virtually, in a hybrid format. The meeting's telephone number and access code access number will be provided no later than 72 hours before the meeting on the meeting agenda published at https://planning.lacity.org/about/commissionsboards-hearings and/or by contacting cpc@lacity.org

Public Hearing: July 7, 2025
Appeal Status: Density Bonus On-Menu Incentive is appealable. Density Bonus Off-Menu Incentives and Waivers are not further appealable; All other entitlements are appealable to the City Council.
Expiration Date: August 28, 2025
Multiple Approval: Yes

Case No.: CPC-2024-2450-DB-CDP-SPPC-CUB-VHCA-MEL
CEQA No.: ENV-2024-2452-HES-PEIR
Council No.: 11 - Park
Plan Area: Venice
Specific Plan: Venice Coastal Zone Specific Plan - North Venice Subarea
Certified NC: Venice
GPLU: Community Commercial
Zone: C2-1

Applicant: SFJ Venice LLC
Representative: Susan Steinberg
Howard Robinson & Associates

PROJECT LOCATION: 825 South Hampton Drive, 90291

PROPOSED PROJECT: The demolition of five, one-story, commercial buildings and the construction of a new four-story, 36,716 square-foot mixed-use development consisting of 30 dwelling units (including 3 units restricted to Very Low-Income Households), 2,598 square feet of retail use, an 818 square-foot restaurant with 286 square feet of Service Floor area and 31 seats, requesting on-site sale and consumption of a full line of alcoholic beverages, and two (2) levels of subterranean parking providing 50 parking spaces. In addition, the project includes a landscaped plaza, roof deck, and three new street trees, where one existing street tree is protected in place.

REQUESTED ACTIONS:

1. The Proposed Project is within the scope of the program approved in the 2021-2029 Housing Element, and the 2021-2029 Housing Element Environmental Impact Report No. ENV-2020-672-EIR; SCH No. 2021010130 (EIR), certified on November 24, 2021, adequately describes the activity for the purposes of CEQA;

2. Pursuant to Los Angeles Municipal Code (LAMC) Section 12.22 A.25, a Density Bonus/Affordable Housing Incentives Compliance Review for a Housing Development Project comprised of 30 dwelling units, of which three (3) dwelling units will be set aside

for Very Low-Income households, with the following requested Incentives and Waiver of Development Standards:

a. An On-Menu Incentive to permit an FAR increase of 32.4 percent resulting in a total FAR of 1.98:1 in lieu of 1.5:1 otherwise required by Venice Coastal Zone Specific Plan Section 11.B.3;

b. An Off-Menu Incentive to permit a building height of 44 feet 7 inches (14 foot 7 inches increase) in lieu of the 30 feet height limit otherwise required by Venice Coastal Zone Specific Plan Section 10.F.3.a; and

c. A Waiver to permit a Roof Access Structure with a maximum height of 11 feet 6 inches in lieu of the 10 feet otherwise required by Venice Coastal Zone Specific Plan Section 9.C;

3. Pursuant to LAMC Chapter 1A Section 13B.9.1, a Coastal Development Permit for a project located within the Single Permit Jurisdiction of the California Coastal Zone;

4. Pursuant to LAMC Chapter 1A Section 13B.4.2, a Project Compliance for a project located within the North Venice Subarea of the Venice Coastal Zone Specific Plan;

5. Pursuant to LAMC Section 12.24 W.1, a Class 2 Conditional Use to permit the sale of a full line of alcoholic beverages for on-site consumption in conjunction with a proposed 818 square foot restaurant, providing 31 indoor seats, with hours of operation from 7:00 AM to 11:00 PM, daily; and

6. Pursuant to Government Code Sections 65590 and 65590.1 and the City of Los Angeles Interim Mello Act Compliance Administrative Procedures, a Mello Act Compliance Review for the construction of 30 Residential Units in the Coastal Zone.

RECOMMENDED ACTIONS:

1. **Determine** in the independent judgment of the decisionmaker pursuant to CEQA Guidelines Section 15168(c), based on the whole of the administrative record, including the Housing Element Checklist, and all its appendices, prepared for this Proposed Housing Project, the Proposed Housing Project is within the scope of the program approved with the 2021-2029 Housing Element for which the 2021-2029 Housing Element Environmental Impact Report No. ENV-2020-6762-EIR; SCH No. 2021010130 (EIR), certified on November 24, 2021, and Addendum No. ENV-2020-6762-EIR-ADD1 adopted on June 14, 2022 and the Addendum No. ENV-2020-6762-EIR-ADD2 adopted on December 10, 2024, the Proposed Housing Development project was adequately described in the EIR, and the impacts of the Proposed Housing Project are within the scope of the EIR and the Addendums; and ADOPT the Mitigation Monitoring Program (MMP) for the Proposed Housing Project.

2. **Approve** a Density Bonus/Affordable Housing Incentives Compliance Review for a Housing Development Project comprised of 30 dwelling units, of which three (3) dwelling units will be set aside for Very Low-Income households, with the following requested Incentives and Waiver of Development Standards:

   a. An On-Menu Incentive to permit an FAR increase of 32.4 percent resulting in a total FAR of 1.98:1 in lieu of 1.5:1 otherwise required by Venice Coastal Zone Specific Plan Section 11.B.3;

   b. An Off-Menu Incentive to permit a building height of 44 feet 7 inches (14 foot 7 inches increase) in lieu of the 30 feet height limit otherwise required by Venice Coastal Zone Specific Plan Section 10.F.3.a; and

c. A Waiver of Development Standard to permit a Roof Access Structure with a maximum height of 11 feet 6 inches in lieu of 10 feet, as otherwise required by Venice Coastal Zone Specific Plan Section 9.C.

3. **Approve** a Coastal Development Permit for a project located within the Single Permit Jurisdiction of the California Coastal Zone.

4. **Approve** a Project Compliance for a project located within the North Venice Subarea of the Venice Coastal Zone Specific Plan.

5. **Approve** Pursuant to LAMC Section 12.24 W.1, a Class 2 Conditional Use to permit the sale of a full line of alcoholic beverages for on-site consumption in conjunction with a proposed 818 square foot restaurant, providing 31 indoor seats, with hours of operation from 7:00 AM to 11:00 PM, daily; and

6. **Approve** Pursuant to Government Code Sections 65590 and 65590.1 and the City of Los Angeles Interim Mello Act Compliance Administrative Procedures, a Mello Act Compliance Review for the construction of 30 Residential Units in the Coastal Zone.

7. **Adopt** the attached Conditions of Approval.

8. **Adopt** the attached Findings.

ADVICE TO PUBLIC: *The exact time this report will be considered during the meeting is uncertain since there may be several other items on the agenda. Written communications may be mailed to the Commission Secretariat, Room 272, City Hall, 200 North Spring Street, Los Angeles, CA 90012 (Phone No. 213-978-1300) or emailed to cpc@lacity.org. While all written communications are given to the Commission for consideration, the initial packets are sent to the Commission's Office a week prior to the Commission's meeting date. If you challenge these agenda items in court, you may be limited to raising only those issues you or someone else raised at the public hearing agendized herein, or in written correspondence on these matters delivered to the agency at or prior to the public hearing. As a covered entity under Title II of the Americans with Disabilities Act, the City of Los Angeles does not discriminate on the basis of disability, and upon request, will provide reasonable accommodation to ensure equal access to these programs, services and activities. Sign language interpreters, assistive listening devices, or other auxiliary aids and/or other services may be provided upon request. To ensure availability of services, please make your request not later than three working days (72 hours) prior to the meeting by calling the Commission Secretariat at (213) 978-1300.

PROJECT ANALYSIS

PROJECT SUMMARY

The proposed project consists of the demolition of five, one-story, commercial buildings and the construction of a new four-story, 36,716 square-foot mixed-use development consisting of 30 dwelling units (including 3 units restricted to Very Low-Income Households), 2,598 square feet of retail use, an 818 square-foot restaurant with 286 square feet of Service Floor area and 31 seats, requesting on-site sale and consumption of a full line of alcoholic beverages, and two (2) levels of subterranean parking providing 50 parking spaces and 64 bicycle parking spaces (20 short-term and 44 long-term) and a 3,324 square foot roof deck. The Project provides 5 (five) studio units, 14 one-bedroom units and 11 two-bedroom units.

In addition, the project includes 1,946 square feet of landscaped area, seven (7) trees on-site and three (3) street trees. The project does not include the removal of any on-site trees; the existing street tree will be retained and protected in place. The project provides approximately 5,065 square feet of common open space within the ground level plaza (1,302 square feet), the second level interior courtyard (439 square feet) and the roof terrace (3,324 square feet). In addition, the project provides an 855 square foot fitness room and seven private balconies providing a total of 350 square feet of private open space.

Vehicular access will be provided by a two-way driveway off Brooks Avenue to access both the commercial and residential parking.

Figure 1: Rendering of the proposed project from Abbot Kinney Boulevard

BACKGROUND

Project Site

The project site is a relatively flat, triangular-shaped commercial site that fronts Brooks Avenue and adjoins Hampton Drive to the north and Abbot Kinney Boulevard to the south. The project site is approximately 18,487 square feet (0.42 acres) in lot area. The project site is comprised of

four lots (tied) and developed with five, one-story buildings, currently used as commercial offices. At least three of the buildings were constructed in 1927 and 1937 and had previously been used for automotive-related uses. Initial permits were issued in 1927 for a tire and battery shop, service station and public garage. The Certificate of Occupancy issued in 1983 is for a one-story, 256 square foot spray booth canopy addition to an existing one-story 315 square foot office. According to SurveyLA and the Historical Resource Assessment, dated June 2025, the existing structures are not considered historic resources.

The subject site is located within a Liquefaction area, Methane Zone, and within 4.7 kilometers from the Santa Monica Fault.

Figure 2: Aerial image of the project site (ZIMAS)

General Plan Land Use Designation, Zoning, and Specific Plan

The Project site is located within the Venice Community Plan area with a Community Commercial Land Use designation and zoned C2-1. The property is also located within the Los Angeles Coastal Transportation Corridor Specific Plan, Venice Coastal Zone Specific Plan (North Venice Subarea), and the Single Permit Jurisdiction of the Coastal Zone. In addition, the property is subject to the Venice Local Coastal Land Use Plan (LUP) certified by the California Coastal Commission and adopted as an amendment to the Venice Community Plan.

Surrounding Properties

The neighborhood and surrounding properties are developed with multi-family dwellings and commercial structures with zoning classifications of C2-1, RD1.5-1 and M1-1. Surrounding properties include single and multi-story commercial structures, multi-story residential structures, parking lots, and a mixed-use hotel project which is currently under construction.

The adjoining property to the north has a land use designation of Limited Manufacturing and is zoned M1-1. The property is developed with a three-story, 10-unit residential condominium structure constructed in 2008. The property to the northeast, across Hampton Drive, has a land use designation of Community Commercial and is zoned C2-1. The property is developed with a two-story commercial structure with a ground floor restaurant (Tacos Por Favor) constructed in 1927. The property to the east, across Brooks Avenue, has a land use designation of Community Commercial and is zoned C2-1. The property is developed with a one-story commercial structure constructed in 1912. Further, this property has been identified as a historic resource by SurveyLA: Eames Office. The property to the south, across Abbot Kinney Boulevard, has a land use designation of Community Commercial and is zoned C2-1. This site is developed with a one-story commercial building and surface parking lot.

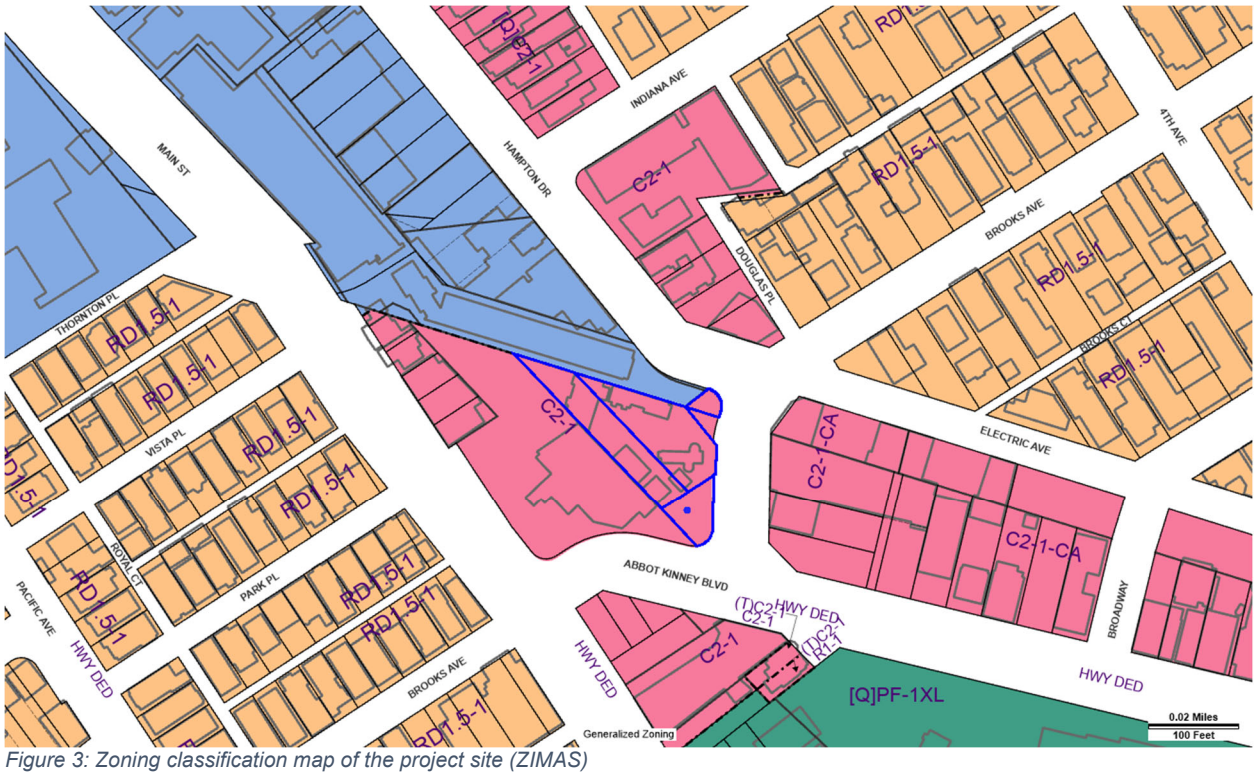

Figure 3: Zoning classification map of the project site (ZIMAS)

Streets and Circulation

Brooks Avenue: is a Collector Street with a designated right-of-way width of 66-feet and a designated roadway width of 40 feet. The portion of Brooks Avenue adjoining the site has a varied width between 60 and 68 feet. Brooks Avenue is improved with a concrete curb, gutter and sidewalk.

Hampton Drive: is a Local Street with a designated right-of-way width of 60 feet and a designated roadway width of 36 feet. Hampton Drive adjoining the project site to the north has an approximate right of way width of 63 feet. Hampton Drive is improved with a concrete curb, gutter and sidewalk.

Abbot Kinney Boulevard: is a Modified Avenue III with a designated right-of-way width of 70 feet and a designated roadway width of 50 feet. Abbot Kinney Boulevard adjoining the project site to the south has an approximate right of way width of 70 feet. Abbot Kinney Boulevard is improved with a concrete curb, gutter and sidewalk.

Public Transit:

The surrounding area is served by Los Angeles County Metropolitan Transit Authority (Metro) bus line 33 and Santa Monica Big Blue Bus line 1 at the intersection of Main Street and Brooks Avenue. In addition, the subject site is located 1,500 feet from a Major Transit Stop at Main Street and Windward Avenue. On September 22, 2022, the Governor signed Assembly Bill (AB) 2097, which added Government Code Section (§) 65863.2. AB 2097 prohibits a public agency from imposing or enforcing any minimum automobile parking requirements on any residential, commercial, or other development that is within one-half mile of a Major Transit Stop, with minor exceptions.

Relevant Cases

On-site:

DIR-2017-3765-CDP-SPP-MEL & ZA-2017-4360-CUB – On June 28, 2019, the Director of Planning and the Zoning Administrator in a joint determination approved a Coastal Development Permit authorizing the demolition of five, one-story, commercial buildings and the construction, use and maintenance of a three-story, 23,950 square-foot, mixed-use development comprised of eight Artist-in-Residence dwelling units (eight residential condominium units) and 8,508 square-feet of ground floor commercial uses (eight commercial condominium units) consisting of 2,365 square feet of retail use, 2,590 square feet of fitness use, and a 3,553 square-foot restaurant use with the sale and on-site consumption of alcoholic beverages providing 1,210 square feet of interior Service Floor area and 90 square feet of exterior Service Floor area with 56 indoor seats and 4 outdoor seats. The structure provides 86 parking spaces within three levels of subterranean parking, located within the single-permit jurisdiction of the Coastal Zone.

VTT-77196 – On June 28, 2019, the Deputy Advisory Agency approved a Vesting Tentative Tract No. 77196-CN composed of the merger and subdivision resulting in one ground lot with eight residential condominium units and eight commercial condominium units resulting in a new three-story, 23,950 square foot mixed-use development consisting of eight artist-in-residence (Joint Living and Work Quarters) dwelling units and 8,508 square feet of ground floor commercial comprised of 2,365 square feet of retail use, 2,590 square feet of fitness use and 3,553 square feet of restaurant use, and three levels of subterranean parking providing 86 parking spaces (76 vehicle parking spaces and 52 bicycle parking spaces, substituting for 13 vehicle parking spaces), as shown on map stamp-dated June 21, 2018, in the Venice Community Plan.

Surrounding Properties:

DIR-2020-2180-CDP-SPP – On May 6, 2021, the Director of Planning approved a Coastal Development Permit and Project Permit Compliance Review authorizing the change of use of 277 square feet of ground floor area and 1,750 square feet of the basement level of an existing Artist-in-Residence dwelling unit into a 2,027 square-foot restaurant with 74 square-feet of Service Floor area. The project provides one parking space for the new restaurant and maintains three spaces for the Artist-in-Residence dwelling unit within the Single Permit Jurisdiction Area of the Coastal Zone, located at 800 – 802 South Main Street.

DIR-2012-3354-CUB-CU-CDP-MEL-WDI-SPP-SPR – On October 29, 2020, the West Los Angeles Planning Commission sustained the approval by the Zoning Administrator of a Conditional Use Permit, Coastal Development Permit, Mello Act Compliance Review, Waiver of Dedication, Specific Plan Permit Compliance, and Site Plan Review for the

demolition of an existing preschool, 2,200 square feet of office, and a 60-space surface parking lot and construction of a 70,310 square foot mixed-use development consisting of 78 guest rooms, 4 dwelling units, a 3,810 square foot hotel restaurant, 2,935 square feet of retail space, 2,027 square feet of office and 175 parking spaces in a three story building with three subterranean levels, within the Single Permit Jurisdiction Area of the Coastal Zone, located at 1011 Electric Avenue, 1021-1033 Abbot Kinney Boulevard, and 1047-1051 Abbot Kinney Boulevard.

DIR-2020-404-SPP – On April 30, 2020, the Director of Planning approved a Project Permit Compliance Review authorizing the remodel and addition to the front portion of an existing two-story, 1,090 square-foot duplex, resulting in a two-story 2,010 square-foot duplex at 135 East Park Place.

DIR-2017-1264-CDP – On January 3, 2018, the Director of Planning approved a Coastal Development Permit authorizing the change of use of an 1,840 square-foot church to an office use and the demolition of a rear portion of the existing structure (unpermitted addition, approximately 371 square-feet). The project will re-stripe an existing adjacent parking lot, providing 12 parking spaces within the Single Permit Jurisdiction Area of the Coastal Zone, located at 1039 & 1041 South Abbot Kinney Boulevard.

DIR-2015-2974-CDP-SPP-MEL – On August 14, 2017, the Planning Director approved a Coastal Development Permit and Mello Act Compliance Review for the substantial demolition of a one-story single-family dwelling at the front, full demolition of a one-story single-family dwelling at the rear, and construction of an addition to the remaining single-family dwelling, resulting in a three-story single-family dwelling with an attached two-car garage and roof deck, within the Single Permit Jurisdiction Area of the Coastal Zone, located at 115 East Park Place.

ZA-2014-4435-CDP-ZAA-MEL – On February 27, 2017, the Zoning Administrator approved a Coastal Development Permit and Mello Act Compliance Review for the demolition of a 324 square-foot detached one-car garage and the major remodel of an existing 1,260 square foot, one-story single-family dwelling, including the demolition of portions of the first floor and the construction of a 2,160 square-foot second-floor, a 96 square-foot roof access structure, and a 900 square-foot attached two-car garage, within the Single Permit Jurisdiction Area of the Coastal Zone, located at 124 East Brooks Avenue.

ZA-2015-1389-CDP – On February 22, 2016, the Zoning Administrator approved a Coastal Development Permit and Mello Act Compliance Review to allow the construction of a new three-story, 5,393 square-foot, duplex with a 456 square-foot garage over a 352 square foot basement on a vacant lot, within the Single Permit Jurisdiction Area of the Coastal Zone, located at 340 East Indiana Avenue.

ZA-2014-3288-CDP-SPP – On November 18, 2015, the Zoning Administrator approved a Coastal Development Permit authorizing the change of use of an existing single-story commercial building from office, retail, medical offices, and storage to five retail spaces (6,130 square feet), one restaurant space (2,315 square feet) with 700 square foot of Service Floor area and storage (800 square feet), within the Single Permit Jurisdiction Area of the Coastal Zone, located at 990 South Abbot Kinney Boulevard.

ZA-2005-8134-CDP-CU-ZV-ZAI-SPP-MEL – On March 2007, the West Los Angeles Area Planning Commission sustained the decision of the Zoning Administrator approving a

Coastal Development Permit for the construction, use, and maintenance of a mixed use development with 2,925 square feet of ground floor retail space; a 15-room extended-stay hotel; and one dwelling unit over a one level subterranean garage with 35 total required parking spaces, within the Single Permit Jurisdiction Area of the Coastal Zone, located at 806 - 812 Main Street.

HOUSING REPLACEMENT

The Housing Crisis Act of 2019, as amended by SB 8 (California Government Code Section 66300 et seq.), prohibits the approval of any proposed housing development project on a site that will require demolition of existing dwelling units or occupied or vacant "Protected Units" unless the project replaces those units. Housing development projects shall provide at least as many residential dwelling units as the greatest number of residential dwelling units that existed on the property within the past five years. Additionally, housing development projects must also replace all existing or demolished "Protected Units." There are no records of residential units previously permitted at the subject site. An SB 8 No Net Loss Declaration dated March 21, 2024, was submitted by the applicant. The project qualifies for an SB 8 No Net Loss Declaration based on the criteria that the project does not involve the removal of any number of units, is not on a site that has removed any units within the past five years and where no units were subject to an Ellis Act withdrawal within the past 10 years.

As such, the project meets the eligibility requirement for providing replacement housing consistent with California Government Code Sections 65915(c)(3) (State Density Bonus Law) and 66300 (Housing Crisis Act of 2019).

REQUESTED ENTITLEMENTS

Density Bonus Affordable Housing Incentives Program

Pursuant to the State Density Bonus Law, the City must grant up to three (3) incentives for a project that includes 15 percent of the total units (base density) for Very Low-Income Households. The State Density Bonus Law further stipulates that in no case may a city apply any development standard that will have the effect of physically precluding the construction of a development meeting the criteria of Government Code 65915 (b) at the densities or with the concessions or incentives permitted by State Density Bonus Law, and allows applicants to submit to a city a proposal for the waiver or reduction of development standards that will have the effect of physically precluding the construction of such a development. The City implements the State Density Bonus Law through the Density Bonus Ordinance.

The applicant proposes to utilize LAMC Section 12.22 A.25 (Affordable Housing Incentives – Density Bonus) to construct a total of 30 dwelling units, of which three (3) dwelling units will be set aside for Very Low-Income Household Occupancy for a period of 55 years. Density Bonus projects are eligible for two (2) incentives if they reserve at least 5 percent of base dwelling units for Very Low-Income Households. The project provides three (3) units reserved for Very Low-Income, which would be five (5) percent of 47 base dwelling units, the project is eligible for two (2) Density Bonus Incentives. The applicant is requesting two (2) Density Bonus Incentives as follows:

a. An On-Menu Incentive to permit a FAR increase of 32.4 percent resulting in a total FAR of 1.98:1 in lieu of 1.5:1 otherwise required by Venice Coastal Zone Specific Plan Section 11.B.3;

b. An Off-Menu Incentive to permit a building height of 44 feet 7 inches (14 foot 7 inches increase) in lieu of the 30 feet height limit otherwise required by Venice Coastal Zone Specific Plan Section 10.F.3.a.

Pursuant to LAMC Section 12.22 A.25(e)(2), in order to be eligible for any on-menu incentives, a Housing Development Project (other than an Adaptive Reuse Project) shall comply with the following criteria:

i. The facade of any portion of a building that abuts a street shall be articulated with a change of material or with a break in plane, so that the facade is not a flat surface.

The proposed project has street frontages along Brooks Avenue. The proposed building provides a variety of architectural materials and building planes along all facades, including those facing the street. Therefore, the façade of any portion of the building that abuts a street is articulated such that the façade is not an entirely flat surface.

ii. All buildings must be oriented to the street by providing entrances, windows, architectural features and/or balconies on the front and along any street-facing elevations.

The proposed project has street frontages along Brooks Avenue and pedestrian access is oriented along Brooks Avenue and retail entrances and lobby entrance at the corner of Brooks Avenue and Abbot Kinney Boulevard. The project is served by one (1) driveway along Brooks Avenue. The front façade also features accent building materials, doors and windows, which highlight the prominence of the façade and the orientation of the building towards the street. Therefore, the proposed building will be oriented towards the street.

iii. The Housing Development Project shall not be a contributing structure in a designated Historic Preservation Overlay Zone and shall not be on the City of Los Angeles list of Historical-Cultural Monuments.

The proposed project is not located within a designated Historic Preservation Overlay Zone, and it does not involve a property that is designated as a City Historic-Cultural Monument.

iv. The Housing Development Project shall not be located on a substandard street in a Hillside Area or in a Very High Fire Hazard Severity Zone as established in Section of this Code.

The project is not located in either a Hillside Area or Very High Fire Hazard Severity Zone.

Per California Government Code Section 65915(e)(1) and Section 12.25 A.25(g) of the Los Angeles Municipal Code (LAMC), a Housing Development Project may also request other “waiver(s) or reduction(s) of development standards that will have the effect of physically precluding the construction of a development meeting the [affordable set-aside percentage] criteria…at the densities or with the concessions or incentives permitted under [State Density Bonus Law]”. In addition to the Density Bonus Incentives, the applicant is requesting one (1) Waiver of Development Standards, as follows:

a. A Waiver to permit a Roof Access Structure with a maximum height of 11 feet 6 inches in lieu of 10 feet otherwise required by Venice Coastal Zone Specific Plan Section 9.C

Density Bonus Projects in the Coastal Zone

Density Bonus Projects located within the Coastal Zone are required to comply with the provisions of both Density Bonus State Law and the Coastal Act. Government Code section 65915(m) states that the density bonus and incentives *provisions do not supersede or in any way alter or lessen the effect or application of the California Coastal Act of 1976 (Division 20 (commencing with Section 30000) of the Public Resources Code). Any density bonus, concessions, incentives, waivers or reductions of development standards, and parking ratios to which the applicant is entitled under this section shall be permitted in a manner that is consistent with this section and Division 20 (commencing with Section 30000) of the Public Resources Code.* In that regard, the Legislature's intent is that the two statutes be harmonized so as to achieve the goal of increasing the supply of affordable housing in the coastal zone while also protecting coastal resources, coastal access, and compliance with all other applicable policies of the Coastal Act.

Coastal Development Permit

Pursuant to Los Angeles Municipal Code (LAMC) Section 12.20.2, the applicant is requesting a Coastal Development Permit for Development proposed in the Single Permit Jurisdiction of the California Coastal Zone.

> *"Development" means, on land, in or under water, the placement or erection of any solid material or structure; discharge or disposal of any dredged material or of any gaseous, liquid, solid, or thermal waste; grading, removing, dredging, mining, or extraction of any materials; change in the density or intensity of the use of land, including, but not limited to, subdivisions pursuant to the Subdivision Map Act (commencing with Section 66410 of the Government Code), and any other division of land, including parcel maps and private street divisions, except where any land division is brought about in connection with the purchase of such land by a public agency for public recreational use; change in the intensity of use of water, or of access thereto; construction, reconstruction, demolition, or alteration of the size of any structure, including any facility of any private, public, or municipal utility; and the removal or harvesting of major vegetation other than for agricultural purposes, kelp harvesting, and timber operations which are in accordance with a timber harvesting plan submitted pursuant to the provisions of the Z'berg-Nejedly Forest Practice Act of 1973 (commencing with Section 4511 of the California Public Resources Code). As used in this definition, "structure" includes, but is not limited to, any building, road, pipe, flume, conduit, siphon, aqueduct, telephone line, and electrical power transmission and distribution line.*

Project Permit Compliance Review

Pursuant to LAMC Chapter 1A Section 13B.4.2, the applicant requests a Project Compliance for a project within the North Venice Subarea of the Venice Coastal Zone Specific Plan. The Specific Plan was adopted as Ordinance 172,897, effective December 22, 1999 and later amended under Ordinance 175,693, effective January 19, 2004. The Specific Plan provisions for use, density, lot area, floor area ratio, height of buildings or structures, setbacks, yards, buffers, parking, drainage, fences, landscaping, design standards, light, trash and signage supersede the regulations outlined in the LAMC.

Class 2 Conditional Use - Beverage

Pursuant to LAMC Section 12.24 W.1, the Applicant requests approval of a Conditional Use Permit for the sale and dispensing of a full-line of alcoholic beverages for on-site consumption within an 818 square-foot restaurant with a total of 31 seats in the C2-1 Zone.

Mello Act Compliance Review
Pursuant to Sections 65590 and 65590.1 of the California Government Code and the City of Los Angeles Interim Mello Act Compliance Administrative Procedures (IAP), the applicant requests a Mello Act Compliance Review for the construction of 30 Residential Units in the Coastal Zone. The project proposes the construction of new dwelling units; therefore, the project is required to provide Inclusionary Residential Units Pursuant to Part 5.0.

- *New Housing Developments (Part 5.0). New Housing Developments of 10 or more Residential Units are required to provide Inclusionary Residential Units and provides two options:*
    - *Option 1 requires 20 percent of all Residential Units, be reserved for occupancy by Very Low or Low-Income Households.*
    - *Option 2 requires 10 percent of all Residential units, be reserved for occupancy by Very Low-Income Households.*

The applicant proposes the development of 30 residential units, of which three (3) units, or 10 percent of the total density, will be set aside for Very Low-Income Households. The project satisfies Option 2 of Part 5.0. No residential uses have ever existed on this property; therefore no Replacement Affordable Units are required.

ISSUES

The following includes a discussion of issues and considerations related to the project. These discussion points were either identified during the design review process with the Urban Design Studio's Professional Volunteer's Program (PVP) or in discussions with the applicant.

Professional Volunteer Program

The proposed project was reviewed by the Department of City Planning, Urban Design Studio's Professional Volunteer Program (PVP) on October 8, 2024. The PVP panel provided the following comments regarding overall project design:

Pedestrian First:

- The proposed plaza should be a nice asset for this neighborhood.
- The residents' entrance is recessed, and this is a relatively small scale project but it still feels as if the entry should be given more emphasis; it gets buried a bit behind retail and conveys little sense of prioritization, of here's the entrance to my home vs. a store.
- Amazing that the project has placed all of the parking underground and on a small, awkwardly shaped site that doesn't allow for much efficiency in layout of the spaces.
- Terrific that the choice has been made to place the transformer in a vault, below ground; should verify with LADWP, though, that their access and minimum setback won't eliminate one or more of the proposed trees on the plaza.

360° Design:

- A very nicely considered and designed project and one that fits well within its context.
- Appreciate the renderings which show the project in relationship with its neighborhood, including in-progress building to south; could serve as a model for other applicants.

- While the fluted cladding does provide some texture, the ground floor's treatment overall feels somewhat flat and sterile, a bit banal in contrast to upper floors.
- Retail spaces could benefit from the addition of an overhang or some other element to give the ground floor more depth and interest.
- Even though signage will come later, it's worthwhile to study now how it will be integrated.
- The design team clearly has the building fully modeled, so it would be helpful if they provided some ground-level views, to study how best to tune up the entry sequence.
- The south elevation facing the adjacent property shows a lot of glazing, which is great, but building code (see comment below) may require a reduction in total area of openings.

Climate-Adapted:

- A contemporary take on courtyard housing, making good use of the outdoor spaces in-between and at a scale in which the fairly shallow units should get good natural light and air.
- Effort should be made to retain the existing street tree and protect it during construction; it appears to be a Eucalyptus torquate, a very slow-growing tree that doesn't cause a lot of trouble plus Urban Forestry wouldn't allow a new tree in that narrow space, close to corner.
- The trees on the plaza will help make the space more usable and inviting; should take advantage of them being planted in finished grade to choose large-growing shade trees
- Plaza may also need some type of shade structure, in addition to the trees/while they grow.

The applicant considered the comments from the Urban Design Studio and PVP, and where appropriate, modified the project plans and provided the following written response:

Pedestrian First:

- We intended to make the residential ground floor entrance discreet; however, the building is also designed to feature 10 feet opening that spans the full length of the building, which is visible from the street (refer to the cover sheet render). We believe this design move effectively demarcates the main residential entrance. Additionally, we will continue to explore opportunities for larger signage to enhance visibility.
- The shape of the site has been challenging, but we aimed to ensure that parking would not be a visual disruption.
- We are working with a utility consultant to further refine this layout during the design development phase. The trees are important, so we will relocate them as needed. We are also in contact with LADWP.

360 Design:

- The fluted stone is intended to be a statement material, serving as a defining feature of the building's aesthetic. Our goal is to showcase its texture and visual impact, creating a sense of refinement and connection to natural elements. The stone we plan to select will have a distinctive texture, reminiscent of the beach, adding a subtle, organic quality that enhances the overall design.
- As we continue to finalize these design elements, we can explore additional features to enhance the overall composition. We also recognize the importance of signage and intend to treat it as a key design element, ensuring it complements the building's aesthetic and contributes to its identity.

- Our main cover page render depicts the perspective of someone walking across the street at the corner of the ground floor. We can certainly explore rendering additional ground-level views. I can assure you that we regularly use ground-floor perspectives during the schematic phase to inform and guide many of our design decisions.

Climate Adapted:

- We intend to retain the existing street trees.
- We can explore this; however, the hope is, as we continue to work with our landscape architect that the trees will provide sufficient shading. The render only depicts thin trees in order not to block the view of the building.

Public Hearing and Communications

A public hearing was held virtually via Zoom by a hearing officer (Ira Brown) on July 7, 2025, at 1:00 pm. Comments from the public hearing are documented in Public Hearing and Communications, Page P-1.

CONCLUSION

Based on evaluation of the project and information submitted, input from the public, and the proposed project's compliance with applicable regulations, Staff recommends the City Planning Commission approve the requested actions and adopt the attached Conditions of Approval and Findings.

Approval of the requests herein will enable the creation of 30 new residential units in the Coastal Zone, including three (3) deed restricted affordable units. The project will enhance the physical appearance of the property and surrounding area through its thoughtful and interesting design features, including a well-articulated façade and roofline design.

CONDITIONS OF APPROVAL

Density Bonus Conditions

1. **Site Development.** Except as modified herein, the project shall be in substantial conformance with the plans and materials submitted by the Applicant, stamped Exhibit "A" attached to the subject case file. No change to the plans will be made without prior review by the Department of City Planning and written approval by the Director of Planning. Each change shall be identified and justified in writing. Minor deviations may be allowed in order to comply with the provisions of the Los Angeles Municipal Code or the project conditions.

2. **Residential Density.** The project shall be limited to a maximum density of 30 dwelling units, including On-Site Restricted Affordable Units.

3. **On-site Restricted Affordable Units.** Three (3) units shall be reserved for Very Low-Income Household Occupancy as defined by the State Density Bonus Law per Government Code Section 65915 and by the Los Angeles Housing Department (LAHD). In the event the SB 8 Replacement Unit condition requires additional affordable units or more restrictive affordability levels, the most restrictive requirements shall prevail.

4. **Changes in Restricted Units.** Deviations that increase the number of restricted affordable units or that change the composition of units or change parking numbers shall be consistent with LAMC Sections 12.22 A.25 and State Density Bonus Law (Government Code Section 65915).

5. **Housing Requirements.** Prior to issuance of a building permit, the owner shall execute a covenant to the satisfaction of the Los Angeles Housing Department (LAHD) to make three (3) units available to Very Low-Income Households or equal to 10 percent of the project's total base residential density allowed, for sale or rental, as determined to be affordable to such households by LAHD for a period of 55 years. In the event the applicant reduces the proposed density of the project, the number of required reserved on-site Restricted Units may be adjusted, consistent with LAMC Section 12.22 A.25, to the satisfaction of LAHD, and in consideration of the project's Replacement Unit Determination. Enforcement of the terms of said covenant shall be the responsibility of LAHD. The applicant shall present a copy of the recorded covenant to the Department of City Planning for inclusion in this file. The project shall comply with the Guidelines for the Affordable Housing Incentives Program adopted by the City Planning Commission and with any monitoring requirements established by the LAHD.

   Unless otherwise required by state or federal law, the project shall provide an onsite building manager's unit, which the owner shall designate in the covenant. The Owner may not use an affordable restricted unit for the manager's unit.

6. **FAR (On-Menu Incentive).** The project is allowed a Floor Area Ratio (FAR) of 1.98:1.

7. **Height (Off-Menu Incentive).** The proposed building shall not exceed a maximum flat roof height of 44 feet 7 inches (14 foot 7 inches increase), as measured from the midpoint of the centerline of Hampton Drive to the highest point of the roof.

8. **Roof Access Structure – Height (Waiver).** The project is allowed to provide a Roof Access Structure with a maximum height of 11 feet 6 inches.

9. **Parking and Access**. As shown in "Exhibit A" and as approved by the Department of Building and Safety, the subject project shall provide 50 parking spaces onsite; all vehicle access shall be provided from Brooks Avenue.

    a. Residential Parking – 35 parking spaces shall be provided for the residential units.

    b. Commercial Parking - 15 parking spaces shall be provided for the commercial uses.

10. **Parking Per AB 2097.** The project shall be permitted to provide a minimum of zero automobile parking spaces pursuant to AB 2097; however, 50 automobile parking spaces are provided.

11. **Bicycle Parking.** Bicycle parking shall be provided consistent with LAMC Section 12.21 A.16.

12. **Adjustment of Parking**. In the event that the number of Restricted Affordable Units should increase, or the composition of such units should change (i.e. the number of bedrooms, or the number of units made available to Senior Citizens and/or Disabled Persons), or the applicant selects another Parking Option (including the Bicycle Parking Ordinance) and no other Condition of Approval or incentive is affected, then no modification of this determination shall be necessary, and the number of parking spaces shall be re-calculated by the Department of Building and Safety based upon the ratios set forth above.

13. **Electric Vehicle Parking**. All electric vehicle charging spaces (EV Spaces) and electric vehicle charging stations (EVCS) shall comply with the regulations outlined in Sections 99.04.106 and 99.05.106 of Article 9, Chapter IX of the LAMC. Any parking spaces provided above LAMC requirements shall be provided with EV chargers to immediately accommodate electric vehicles within the parking areas.

Mello Act Compliance Review Conditions

14. **Inclusionary Residential Units.** Three (3) dwelling units shall be restricted as Inclusionary Residential Units. The applicant shall comply with the requirements outlined in Part 5.0, 7.3, 7.4, and 7.5 of the Interim Mello Act Administrative Procedures.

Coastal Development Permit Conditions

15. **Single Permit Jurisdiction Area.** The project is located within the Single Permit Jurisdiction area of the California Coastal Zone. Pursuant to LAMC Section 13B.9.1.D.4, the decision of the permit granting authority, or any appeal body to approve issuance of a permit shall not be deemed to be final and no Coastal Development Permit may be issued until 20 working days have expired from the date said notice of permit issuance is deemed received by said Executive Director and without an appeal having been taken to the Coastal Commission. Prior to the issuance of any permits, the applicant shall provide a copy of the Coastal Commission's Notification that the City's coastal development permit is effective.

16. **Front Façade (Articulation).** The front façade of the structure shall be articulated as shown in "Exhibit A", incorporating 7 feet 10 inches step-backs at the second and third level; 11 feet step-backs at the fourth level and 14 feet 1 inch setback for the roof deck.

17. **Commercial Floor Area.** The project shall be limited to 2,598 square feet of retail use and 818 square feet of restaurant use providing 286 square feet of Service Floor area.

18. **Street Wall.** The project shall provide the required Street Wall for the portions of the structure fronting Brooks Avenue. The Street wall shall extend for at least 65 percent of the length of the Building Frontage, be set back zero feet from the building line, and maintain a minimum height of 13 feet, as shown on Sheet A3.1 of Exhibit A.

19. **Ground Floor**. At least 50 percent of the area of the Ground Floor Street Wall of the Project shall be devoted to pedestrian entrances, display windows or windows offering views into retail, office gallery or lobby space, as shown on Sheet A3.1 of Exhibit A.

20. All existing curb-cuts not used for vehicle access adjoining the project site shall be removed and replaced with a new curb.

21. The project shall the transportation demand management measures identified in the Transportation Demand Management memorandum dated July 29, 2024.

22. Blank Walls shall be limited to segments of 15 feet in length, except that Blank Walls that contain a vehicle entry door shall be limited to the width of the door plus five feet.

23. **Roof Structures.** Chimneys, exhaust ducts, ventilation shafts and other similar devices essential for building function may exceed the height limit by a maximum of five feet.

Environmental Conditions

24. The Mitigation Monitoring and Reporting Program (MMRP) included in the Housing Element Streamlining Checklist (Case No. ENV-2024-2452-HES-PEIR) has been incorporated into this project and shall be enforced through all phases of the project. The applicant shall be responsible for implementing each Mitigation Measure (MM), Substitute Mitigation Measure, and Implementing Mitigation Measure identified in the MMRP and shall be obligated to provide certification to the appropriate monitoring and enforcement agencies that each MM has been implemented.

Additional Entitlement Conditions

25. **Street Trees.** The existing street tree shall be protected in place. Additional street trees shall be provided to the satisfaction of the Urban Forestry Division. Street trees may be used to satisfy on-site tree requirements pursuant to LAMC Article Section 12.21.G.3 (Chapter 1, Open Space Requirement for Six or More Residential Units).

    Required Trees per 12.21 G.2. As conditioned herein, a final submitted landscape plan shall be reviewed to be in substantial conformance with Exhibit “A.” There shall be a minimum of three (3) 24-inch box, or larger, trees on site pursuant to LAMC Section 12.21 G.2. Any required trees pursuant to LAMC Section 12.21 G.2 shown in the public right-of-way in Exhibit “A” shall be preliminarily reviewed and approved by the Urban Forestry Division prior to building permit issuance. In-lieu fees pursuant to LAMC Section 62.177 shall be paid if placement of required trees in the public right-of-way is proven to be infeasible due to City determined physical constraints.

26. **Open Space.** The project shall provide open space consistent LAMC Section 12.21 G.

27. **Landscape Plan.** Revised landscape plans shall be submitted to show the size and location of all plants. The landscape plan shall indicate landscape points for the Project as required by Los Angeles Municipal Code (LAMC) 12.40 and Landscape Ordinance Guidelines “O”. All

open areas not used for buildings, driveways, parking areas, recreational facilities or walks shall be landscaped, including an automatic irrigation system, and maintained in accordance with a final landscape plan prepared by a licensed landscape architect or licensed architect, and submitted for approval to the Department of City Planning. The final landscape plan shall be in substantial conformance with the submitted Landscape Plan, Exhibit "A," and shall incorporate any modifications required as a result of this grant.

28. **Stormwater/irrigation.** The project shall implement on-site stormwater infiltration as feasible based on the site soils conditions, the geotechnical recommendations, and the City of Los Angeles Department of Building and Safety Guidelines for Storm Water Infiltration. If on-site infiltration is deemed infeasible, the project shall analyze the potential for stormwater capture and reuse for irrigation purposes based on the City Low Impact Development (LID) guidelines.

29. **Solar**. The Project shall comply with the Los Angeles Municipal Green Building Code, Section 99.05.211, to the satisfaction of the Department of Building and Safety.

30. **Solar and Electric Generator.** Generators used during the construction process shall be electric or solar powered. Solar generator and electric generator equipment shall be located as far away from sensitive uses as feasible.

31. **Lighting.** Outdoor lighting shall be designed and installed with shielding, such that the light source cannot be seen from adjacent residential properties, Environmental Sensitive Areas, the public right-of-way, nor from the above.

32. **Trash.** Separate trash collection areas for residential and commercial trash collection shall be maintained and shall also accommodate the separate collection of recyclable trash. The separate trash collection areas shall be clearly identified on final plans submitted for review and sign-off.

33. **Graffiti**. All graffiti on the site shall be removed or painted over to match the color of the surface to which it is applied within 24 hours of its occurrence.

34. **Subterranean Level.** The foundation and subterranean levels shall be waterproofed, subject to review and approval by the Department of Building and Safety.

35. Prior to issuance of a grading permit for the project by the City, the project applicant shall enroll in the Los Angeles County Fire Department Health and Hazardous Materials Unit Voluntary Cleanup Program.

36. Prior to issuance of a building permit for the project by the City, the project applicant shall obtain a closure (no further action) letter from the Los Angeles County Fire Department Health and Hazardous Materials Unit Voluntary Cleanup Program

Alcoholic Beverage Conditions

37. Authorized herein is the sale and dispensing of a full line of alcoholic beverages for on-site consumption, in conjunction with the proposed 818 square-foot restaurant. Subject to the following limitations:

    a. Indoor seating shall be limited to a maximum of 31 seats provided that the number of seats does not exceed the maximum allowable occupant load as determined by the Department of Building and Safety.

b. Hours of operation for the interior space shall be limited to 7:00 a.m. to 11 p.m., daily.

38. After hour use shall be prohibited, except routine clean-up. This includes but is not limited to private or promotional events, special events, excluding any activities which are issued film permits by the City.

39. The establishment shall be maintained as a bona fide eating place (restaurant) with an operational kitchen and shall provide a full menu containing an assortment of foods normally offered in such restaurants. Food service shall be available at all times during operating hours. The establishment shall provide seating and dispense food and refreshments primarily for consumption on the premises and not solely for the purpose of food takeout or delivery.

40. There shall be no Adult Entertainment of any type pursuant to LAMC Section 12.70.

41. A camera surveillance system shall be installed and operating at all times to monitor the interior, entrance, exits and exterior areas, in front of and around the premises. Recordings shall be maintained for a minimum period of 30 days and are intended for use by the Los Angeles Police Department.

42. All exterior portions of the site shall be adequately illuminated in the evening so as to make discernible the faces and clothing of persons utilizing the space. Lighting shall be directed onto the site without being disruptive to persons on adjacent properties.

43. The exterior windows and glass doors of the restaurant shall be maintained substantially free of signs and other materials from the ground to at least 6 feet in height so as to permit surveillance into the restaurant by Police and private security.

44. **Good Neighbor Program.** A telephone number and email address shall be provided for complaints or concerns from the community regarding the operation. The phone number and email address shall be posted at the following locations:

    a. Entry, visible to pedestrians.
    b. Customer service desk, front desk or near the reception area.

    Complaints shall be responded to within 24-hours. The applicant shall maintain a log of all calls and emails, detailing: (1) date complaint received; (2) nature of complaint, and (3) the manner in which the complaint was resolved.

45. **STAR/LEAD/RBS Training.** Within the first six months of operation, all employees involved with the sale of alcohol shall enroll in the Los Angeles Police Department “Standardized Training for Alcohol Retailers” (STAR) or Department of Alcoholic Beverage Control “Licensee Education on Alcohol and Drugs” (LEAD) training program or the Responsible Beverage Service (RBS) Training Program. Upon completion of such training, the applicant shall request the Police Department or Department of Alcohol Beverage Control to issue a letter identifying which employees completed the training. STAR, LEAD, or RBS training shall be conducted for all new hires within three months of their employment.

46. The applicant shall be responsible for monitoring both patron and employee conduct on the premises and within the parking areas under the control of the applicant to assure such conduct does not adversely affect or detract from the quality of life for adjoining residents, property owners, and businesses.

47. Loitering is prohibited on or around these premises and the area under the control of the applicant. "No Loitering or Public Drinking" signs shall be posted in and outside of the subject facility.

48. At least one on-duty manager with authority over the activities within the facility shall be on the premises during business hours. The on-duty manager's responsibilities shall include the monitoring of the premises to ensure compliance with all applicable State laws, Municipal Code requirements, the conditions imposed by the Department of Alcoholic Beverage Control (ABC), and the conditional use granted herein. Every effort shall be undertaken in managing the facility to discourage illegal and criminal activities on the subject premises and in any exterior area, including accessory parking areas, over which the building owner exercises control, in an effort to ensure that no activities associated with such problems as narcotics sales, use or possession, gambling, prostitution, loitering, theft, vandalism, and truancy occur.

49. The approved conditions shall be retained on the premises at all times and produced immediately upon request of the Police Department, Department of Alcoholic Beverage Control, the Department of Building and Safety, the Department of City Planning, or other responsible agencies. The on-site Manager and employees shall be knowledgeable of the conditions herein.

50. The applicant shall provide the Zoning Administrator a copy of each license suspension thereof, or citation issued by the Los Angeles Police Department or State Department of Alcoholic Beverage Control upon such issuance.

51. The applicant shall be responsible for maintaining the premises over which they have control, including the adjoining sidewalk and any public or temporarily closed alleys abutting the site, free of debris and litter.

52. An electronic age verification device shall be purchased and retained on the premises available to determine the age of any individual and shall be installed at each point-of-sales location. This device shall be maintained in operational condition and all employees shall be instructed in its use.

53. Smoking tobacco or any non-tobacco substance, including from electronic smoking devices, is prohibited in or within 10 feet of the outdoor dining areas in accordance with Los Angeles Municipal Code Section 41.50 B.1.c. This prohibition applies to all outdoor areas of the establishment if the outdoor area is used in conjunction with food service and/or the consumption, dispensing or sale of alcoholic or non-alcoholic beverages.

54. The applicant(s) shall comply with Section 6404.5(b) of the Labor Code, which prohibits smoking within any place of employment. The applicant shall not possess ashtrays or other receptacles used for the purpose of collecting trash or cigarettes/cigar butts within the interior of the subject establishment.

55. **Designated Driver Program.** Prior to the utilization of this grant, the applicant shall establish a "Designated Driver Program" which shall include, but not be limited to, signs/cards, notation on websites/social media, notifying patrons of the program. The signs/cards/website/social media shall be visible to the customer and posted or printed in prominent locations or areas. These may include signs/cards on each table, at the entrance, at the host station, in the waiting area, at the bars, or on the bathrooms, or a statement in the menus, a website, or on social media.

56. Any music, sound or noise which is under control of the applicant shall not violate Sections 112.01, 112.06, 115.02, or 116.01 of the Los Angeles Municipal Code (Citywide Noise Ordinance). At any time, a City representative may visit the site during operating hours to measure the noise levels. If, upon inspection, it is found that the noise level exceeds those allowed by the citywide noise regulation, the owner/operator will be notified and will be required to modify or eliminate the source of the noise or retain an acoustical engineer to recommend, design and implement noise control measures within property such as, noise barriers, sound absorbers or buffer zones.

57. **Private Events.** Any use of the facility for private events, including corporate events, birthday parties, anniversary parties, weddings or other private events which are not open to the general public, shall be subject to all the same provisions and hours of operation stated herein.

58. Partitions separating booth/dining areas shall not exceed 54 inches in height. No obstructions shall be attached, fastened or connected to the booths/dining areas within the interior space of the facility that restrict, limit or obstruct the clear observation of the occupants.

59. No enclosed room, other than restrooms, intended for use by patrons or customers shall be permitted. No private dining room with a separate access door shall be permitted.

60. Dancing is prohibited, unless a conditional use authorization to allow such use is obtained. No conditional use for dancing has been requested or approved herein.

61. There shall be no live entertainment or amplified music on the premises. There shall be no karaoke, disc jockey, topless entertainment, performers or fashion shows.

62. Entertainment in conjunction with the restaurant is limited to ambient music to complement the dining experience, shall be limited to background music at a low volume.

63. No employee or agent shall be permitted to accept money or any other item of value from a customer for the purpose of sitting or otherwise spending time with the customers while on the premises. No patrons shall be made available to act as escorts, companions, or guests of customers. Employees shall not be allowed to solicit or accept any alcoholic or non-alcoholic beverage from any customers in the premises.

64. **MViP - Monitoring Verification and Inspection Program.** Prior to the effectuation of this grant, fees required per LAMC Section 19.01 E.3 - Monitoring of Conditional Use Permits, Inspection, and Field Compliance for Review of Operations and Section 19.04 - Miscellaneous ZA Sign Offs shall be paid to the City.

    a. Within 24 months from the beginning of operations or issuance of a Certificate of Occupancy, a City inspector will conduct a site visit to assess compliance with, or violations of, any of the conditions of this grant. Observations and results of said inspection will be documented and included in the administrative file.

    b. The owner and operator shall be notified of the deficiency or violation and required to correct or eliminate the deficiency or violation. Multiple or continued documented violations or Orders to Comply issued by the Department of Building and Safety which are not addressed within the time prescribed, may result in additional corrective conditions imposed by the Zoning Administrator.

65. Should there be a change in the ownership and/or the operator of the business, the property owner and/or the business owner or operator shall provide the prospective new property owner and the business owner/operator with a copy of the conditions of this action prior to the legal acquisition of the property and/or the business. Evidence that a copy of this determination including the conditions required herewith has been provided to the prospective owner/operator shall be submitted to the Development Services Center, Department of City Planning in a letter from the new operator indicating the date that the new operator/management began and attesting to the receipt of this approval and its conditions. The new operator shall submit this letter to the Development Services Center, Department of City Planning, within 30 days of the beginning day of his/her new operation of the establishment along with any proposed modifications to the existing floor plan, seating arrangement or number of seats of the new operation.

66. Should there be a change in the ownership and/or the operator of the business, the Zoning Administrator reserves the right to require that the new owner or operator file a Plan Approval application if it is determined that the new operation is not in substantial conformance with the approved floor plan, or the operation has changed in mode or character from the original approval. The application, in association with the appropriate fees, shall be submitted to the Development Services Center, Department of City Planning, within 30 days of the date of legal acquisition by the new owner or operator. The purpose of the plan approval will be to review the operation of the premise and establish conditions applicable to the use as conducted by the new owner or operator, consistent with the intent of the Conditions of this grant. Upon this review, the Zoning Administrator may modify, add or delete conditions, and if warranted, reserves the right to conduct a public hearing, that may also be conducted for nuisance abatement/revocation purposes.

67. At any time during the period of validity of this grant, should documented evidence be submitted showing continued violation of any condition of this grant and/or the ABC license of the location, resulting in an unreasonable level of disruption or interference with the peaceful enjoyment of the adjoining and neighboring properties, the Zoning Administrator (Upon their initiative, or upon written request by LAPD or Department of ABC) reserves the right to call for a public hearing requiring the applicant to file for a plan approval application together with associated fees pursuant to LAMC Section 19.01 E, the purpose of which will be to review the applicant's compliance with and the effectiveness of these conditions. The applicant shall prepare a radius map and cause notification to be mailed to all owners and occupants of properties within a 500-foot radius of the property, the Council Office, and the Los Angeles Police Department's corresponding division. The applicant shall also submit a summary and any supporting documentation of how compliance with each condition of this grant has been attained. Upon this review, the Zoning Administrator may modify, add, or delete conditions, and reserves the right to conduct this public hearing for nuisance abatement/revocation purposes.

68. Outdoor lighting shall be designed and installed with shielding so that light does not overflow into adjacent residential properties.

69. All graffiti on the site shall be removed or painted over to match the color of the surface to which it is applied within 24 hours of its occurrence.

Administrative Conditions

70. **Final Plans.** Prior to the issuance of any building permits for the project by the Department of Building & Safety, the applicant shall submit all final construction plans that are awaiting

issuance of a building permit by the Department of Building & Safety for final review and approval by the Department of City Planning. All plans that are awaiting issuance of a building permit by the Department of Building & Safety shall be stamped by Department of City Planning staff “Final Plans”. A copy of the Final Plans, supplied by the applicant, shall be retained in the subject case file.

71. **Notations on Plans.** Plans submitted to the Department of Building & Safety, for the purpose of processing a building permit application shall include all of the Conditions of Approval herein attached as a cover sheet, and shall include any modifications or notations required herein.

72. **Approval, Verification and Submittals.** Copies of any approvals, guarantees or verification of consultations, review of approval, plans, etc., as may be required by the subject conditions, shall be provided to the Department of City Planning prior to clearance of any building permits, for placement in the subject file.

73. **Code Compliance.** Use, area, height, and yard regulations of the zone classification of the subject property shall be complied with, except where granted conditions differ herein.

74. A copy of the first page of this grant and all Conditions and/or any subsequent appeal of this grant and its resultant Conditions and/or letters of clarification shall be printed on the building plans submitted to the Department of City Planning and the Department of Building and Safety for purposes of having a building permit issued at any time during the term of this grant.

75. **Covenant.** Prior to the issuance of any permits relative to this matter, an agreement concerning all the information contained in these conditions shall be recorded in the County Recorder’s Office. The agreement shall run with the land and shall be binding on any subsequent property owners, heirs or assign. The agreement must be submitted to the Department of City Planning for approval before being recorded. After recordation, a copy bearing the Recorder’s number and date shall be provided to the Department of City Planning for attachment to the file.

76. **Department of Building & Safety**. The granting of this determination by the Director of Planning does not in any way indicate full compliance with applicable provisions of the Los Angeles Municipal Code Chapter IX (Building Code). Any corrections and/or modifications to plans made subsequent to this determination by a Department of Building & Safety Plan Check Engineer that affect any part of the exterior design or appearance of the project as approved by the Director, and which are deemed necessary by the Department of Building & Safety for Building Code compliance, shall require a referral of the revised plans back to the Department of City Planning for additional review and sign-off prior to the issuance of any permit in connection with those plans.

77. **Enforcement.** Compliance with these conditions and the intent of these conditions shall be to the satisfaction of the Department of City Planning.

78. **Expiration**. In the event that this grant is not utilized within three years of its effective date (the day following the last day that an appeal may be filed), the grant shall be considered null and void. Issuance of a building permit, and the initiation of, and diligent continuation of, construction activity shall constitute utilization for the purposes of this grant.

79. **Indemnification and Reimbursement of Litigation Costs.**

    Applicant shall do all of the following:

(i) Defend, indemnify and hold harmless the City from any and all actions against the City relating to or arising out of, in whole or in part, the City's processing and approval of this entitlement, including but not limited to, an action to attack, challenge, set aside, void, or otherwise modify or annul the approval of the entitlement, the environmental review of the entitlement, or the approval of subsequent permit decisions, or to claim personal property damage, including from inverse condemnation or any other constitutional claim.

(ii) Reimburse the City for any and all costs incurred in defense of an action related to or arising out of, in whole or in part, the City's processing and approval of the entitlement, including but not limited to payment of all court costs and attorney's fees, costs of any judgments or awards against the City (including an award of attorney's fees), damages, and/or settlement costs.

(iii) Submit an initial deposit for the City's litigation costs to the City within 10 days' notice of the City tendering defense to the Applicant and requesting a deposit. The initial deposit shall be in an amount set by the City Attorney's Office, in its sole discretion, based on the nature and scope of action, but in no event shall the initial deposit be less than $50,000. The City's failure to notice or collect the deposit does not relieve the Applicant from responsibility to reimburse the City pursuant to the requirement in paragraph (ii).

(iv) Submit supplemental deposits upon notice by the City. Supplemental deposits may be required in an increased amount from the initial deposit if found necessary by the City to protect the City's interests. The City's failure to notice or collect the deposit does not relieve the Applicant from responsibility to reimburse the City pursuant to the requirement in paragraph (ii).

(v) If the City determines it necessary to protect the City's interest, execute an indemnity and reimbursement agreement with the City under terms consistent with the requirements of this condition.

The City shall notify the applicant within a reasonable period of time of its receipt of any action and the City shall cooperate in the defense. If the City fails to notify the applicant of any claim, action, or proceeding in a reasonable time, or if the City fails to reasonably cooperate in the defense, the applicant shall not thereafter be responsible to defend, indemnify or hold harmless the City.

The City shall have the sole right to choose its counsel, including the City Attorney's office or outside counsel. At its sole discretion, the City may participate at its own expense in the defense of any action, but such participation shall not relieve the applicant of any obligation imposed by this condition. In the event the Applicant fails to comply with this condition, in whole or in part, the City may withdraw its defense of the action, void its approval of the entitlement, or take any other action. The City retains the right to make all decisions with respect to its representations in any legal proceeding, including its inherent right to abandon or settle litigation.

For purposes of this condition, the following definitions apply:

"City" shall be defined to include the City, its agents, officers, boards, commissions, committees, employees, and volunteers.

"Action" shall be defined to include suits, proceedings (including those held under alternative dispute resolution procedures), claims, or lawsuits. Actions includes actions, as defined herein, alleging failure to comply with any federal, state or local law.

Nothing in the definitions included in this paragraph are intended to limit the rights of the City or the obligations of the Applicant otherwise created by this condition.

FINDINGS

Entitlement Findings

Density Bonus/Affordable Housing Incentives Compliance Findings

1. Government Code Section 65915 and LAMC Section 12.22 A.25 state that the Commission shall approve a density bonus and requested incentive(s)/waiver(s) unless the Commission finds that:

a. The incentive does not result in identifiable and actual cost reductions to provide for affordable housing costs as defined in California Health and Safety Code Section 50052.5 or Section 50053 for rents for the affordable units.

The record does not contain substantial evidence that would allow the City Planning Commission to make a finding that the requested incentives do not result in identifiable and actual cost reduction to provide for affordable housing costs per State Law. The California Health & Safety Code Sections 50052.5 and 50053 define formulas for calculating affordable housing costs for very low-, low-, and moderate-income households. Section 50052.5 addresses owner-occupied housing and Section 50053 addresses rental households. Affordable housing costs are a calculation of residential rent or ownership pricing not to exceed 25 percent gross income based on area median income thresholds dependent on affordability levels.

Based on the set-aside of 5 percent of 47 base units for Very Low-Income and Low-Income Households, the applicant is entitled to two (2) Incentives under both Government Code Section 65915 and the Los Angeles Municipal Code (LAMC). The request for an increase in allowable height and FAR are requested Incentives. The remaining request to allow a Roof Access Structure of 11 feet 6 inches height in lieu of the maximum 10 feet is a Waiver of Development Standards.

Floor Area Ratio (On-Menu Incentive) – An On-Menu Incentive to allow a FAR of 1.98:1 in lieu of a FAR of 1.5:1, as otherwise required by Venice Coastal Zone Specific Plan Section 11.B.3. Commercial zoned lots within the Venice Coastal Zone Specific Plan are allowed a floor area ratio (FAR) equal to 1.5 square feet of building floor area to each (1) square foot of buildable lot area for mixed use buildings.

Were the project to adhere to this allowable FAR in the C2-1 zone, its total square footage would be limited to 27,731 square feet. The On-Menu Incentive to increase the FAR by 32.4 percent would allow an increase of 8,985 square feet, which would accommodate a larger construction envelope to provide for the affordable units and additional market rate units. The ability to develop larger building or more units will increase the revenues from the market-rate floor area, which will lower the marginal cost of developing and operating the affordable units. The additional floor area will allow certain fixed costs involved in the construction to be spread over more floor area thereby reducing the per square foot building cost of the development. The requested incentive allows the developer to expand the building envelope so the additional units can be constructed, and the overall space (dedicated to residential uses) is increased. These incentives support the Applicant's decision to provide three affordable units for Very Low-Income Households.

Height (Off-Menu Incentive) – The project site is zoned C2-1 with a Height District No. 1, which provides for unlimited building height. However, the Venice Coastal Zone Specific Plan further limits building height to 30 feet for flat roofs and 35 feet for Varied Rooflines.

The applicant requests a height of 44 feet 7 inches for a Flat Roof. Compliance with the height limitations of the Specific Plan would reduce the number of levels and floor area, resulting in the reduction of one (1) residential level containing seven (7) dwelling units, as well as the elimination of the rooftop amenity deck. As such, the Off-Menu Incentive for increased height is necessary to accommodate a larger construction envelope to provide for the affordable units and market rate units. As with FAR, the ability to develop a larger building with more units will increase revenues from the market-rate units, which will lower the marginal cost of developing and operating the affordable units, thereby making the project financially feasible. The requested incentive allows the developer to expand the building envelope so the additional units can be constructed, and the overall space (dedicated to residential uses) is increased. These incentives support the Applicant's decision to provide three affordable units for Very Low-Income Households.

b. The waiver[s] or reduction[s] of development standards relate to development standards that will have the effect of physically precluding the construction of a development meeting the [affordable set-aside percentage] criteria of subdivision (b) at the densities or with the concessions or incentives permitted under [State Density Bonus Law]" (Government Code Section 65915(e)(1))

A project that meets the requirements of Government Code 65915 may request other "waiver[s] or reduction[s] of development standards that will have the effect of physically precluding the construction of a development meeting the [affordable set-aside percentage] criteria of subdivision (b) at the densities or with the concessions or incentives permitted under [State Density Bonus Law]" (Government Code Section 65915(e)(1)). Therefore, the request for the following is recommended as a Waiver of Development Standards. Without the below Waiver, the existing development standards would physically preclude the development of the provided units, build out of the incentives, and project amenities:

Roof Access Structure (Waiver) – A Waiver to permit a Roof Access Structure with a maximum height of 11 feet 6 inches in lieu of 10 feet, as otherwise required pursuant to the Venice Coastal Zone Specific Plan Section 9.C.

The proposed project includes a 3,275 square foot common open space and 350 square feet of private open space (balconies). The common open space for this project is provided on the roof top, second floor courtyard and ground level plaza. Roof access structures are intended to allow ingress to and egress from a building's rooftop for maintenance, safety, and recreational purposes. The proposed project includes 30 residential dwelling units who share common open space available on the rooftop. At this level of occupancy, the Fire Department requires at least two (2) roof access stairways for emergency egress from the roof. Furthermore, the Americans with Disabilities Act Accessibility Guidelines require any multifamily building with accessible roof features to provide roof access via an elevator so that all residents, regardless of their physical ability level, have equal access to the roof, its amenities, and its emergency egress provisions. Compliance with 10-foot elevator shaft would require the project to reduce the occupancy level of the building and to eliminate the planned rooftop open space in order to observe the Fire Department and Americans with Disabilities Act access regulations. Therefore, the requested Waiver is necessary in order to include adequate open space facilities as well as the affordable dwelling units, including three (3) units reserved for Very Low-Income households.

c. The incentives or waivers will not have a specific adverse impact upon public health and safety or the physical environment, or on any real property that is listed in the California Register of Historical Resources and for which there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact without

rendering the development unaffordable to Very Low, Low and Moderate Income households. Inconsistency with the zoning ordinance or the general plan land use designation shall not constitute a specific, adverse impact upon the public health or safety (Gov. Code 65915(d)(1)(B) and 65589.5(d)).

There is no substantial evidence in the record that the proposed incentive(s) or waiver(s) will have a specific adverse impact. A "specific adverse impact" is defined as, "a significant, quantifiable, direct and unavoidable impact, based on objective, identified written public health or safety standards, policies, or conditions as they existed on the date the application was deemed complete" (Los Angeles Municipal Code (LAMC) Section 12.22 A.25(b)). As required by Section 12.22 A.25(e)(2), the project meets the eligibility criterion that is required for density bonus projects.

The project also does not involve a contributing structure in a designated Historic Preservation Overlay Zone or on the City of Los Angeles list of Historical-Cultural Monuments. Therefore, there is no substantial evidence that the proposed incentive(s) will have a specific adverse impact on public health and safety.

d. The incentives are not contrary to state or federal law.

There is no substantial evidence in the record that the requested incentives are contrary to state or federal law.

2. Coastal Development Permit Findings

a. The development is in conformity with Chapter 3 of the California Coastal Act of 1976.

The project proposes the demolition of five, one-story, commercial buildings and the construction of a new four-story, 36,716 square-foot mixed-use development consisting of 30 dwelling units (including 3 units restricted to Very Low-Income Households), 2,598 square feet of retail use, an 818 square-foot restaurant with 286 square feet of Service Floor area and 31 seats, requesting on-site sale and consumption of a full line of alcoholic beverages, and two (2) levels of subterranean parking providing 50 parking spaces.

The proposed development utilizes the provisions of Density Bonus State Law to deviate from the requirements of the certified Venice Land Use Plan (LUP) and Venice Coastal Zone Specific Plan, as follows:

- increase the building height from 30 feet to 44 feet 7 inches
- Increase the Roof Access Structure height from 10 feet to 11 feet 6 inches
- Increase the Floor Area Ratio (FAR) from 1.5:1 to a FAR of 1.98:1

As discussed in Finding No. 1, the proposed Density Bonus project meets the requirements of Density Bonus State Law to be eligible for the density bonus, incentives and waivers of development standards. In addition, the proposed development must also comply with the requirements of the Coastal Act. As provided in the findings below, the proposed development and the related incentives and waiver of development standards complies with the applicable policies of the Coastal Act and the Venice LUP.

Chapter 3 of the Coastal Act includes provisions that address the impact of development on public services, infrastructure, traffic, the environment and significant resources, and coastal access. Applicable provisions are as follows:

Article 2 Public Access

Section 30211 Development shall not interfere with the public's right of access to the sea where acquired through use or legislative authorization, including, but not limited to, the use of dry sand and rocky coastal beaches to the first line of terrestrial vegetation.

Section 30212 (a) Public access from the nearest public roadway to the shoreline and along the coast shall be provided in new development projects except where: (1) It is inconsistent with public safety, military security needs, or the protection of fragile coastal resources, (2) Adequate access exists nearby, or, (3) Agriculture would be adversely affected. Dedicated accessway shall not be required to be opened to public use until a public agency or private association agrees to accept responsibility for maintenance and liability of the accessway.

The project proposes the demolition of five, one-story, commercial buildings and the construction of a new four-story, 36,716 square-foot mixed-use development consisting of 30 dwelling units (including 3 units restricted to Very Low-Income Households), 2,598 square feet of retail use, an 818 square-foot restaurant with 286 square feet of Service Floor area and 31 seats, requesting on-site sale and consumption of a full line of alcoholic beverages, and two (2) levels of subterranean parking providing 50 parking spaces.

The subject site is located on a triangular-shaped lot that fronts Brooks Avenue and adjoins Hampton Drive to the north and Abbot Kinney Boulevard to the south. The proposed development is limited to the subject property with the exception of required improvements to the right-of-way including new street trees. The project site is not located between the nearest public road and the sea or shoreline of any body of water located within the coastal zone. Therefore, the proposed project will not interfere with or obstruct the public’s right to access to coastal resources.

As such, the project conforms to the applicable Public Access policies of Chapter 3.

Article 5 Land Resources

Section 30240 requires the protection of environmentally sensitive habitat areas and to prevent significant impacts on such areas.

Section 30244 Archaeological and Paleontological Resources. Where development would adversely impact archaeological or paleontological resources as identified by the State Historic Preservation Officer, reasonable mitigation measures shall be required.

The project proposes the demolition of five, one-story, commercial buildings and the construction of a new four-story, 36,716 square-foot mixed-use development consisting of 30 dwelling units (including 3 units restricted to Very Low-Income Households), 2,598 square feet of retail use, an 818 square-foot restaurant with 286 square feet of Service Floor area and 31 seats, requesting on-site sale and consumption of a full line of alcoholic beverages, and two (2) levels of subterranean parking providing 50 parking spaces and 15,390 cubic yards of grading cut for removal.

A Paleontological Resources Assessment (January 2025) was prepared by South Environmental to assess the potential project impacts to paleontological resources and, as necessary, to provide recommendations for mitigation. The project site is located within the Los Angeles Basin, which is heavily influenced by the San Andres transformation zone, leading to extensive deposition of marine and fluvial sediments. The surface geology is mapped as Holocene-aged alluvial deposits, which typically have a low potential for

scientifically significant paleontological resources. However, these Holocene deposits are likely thin (six feet thick or less) and are underlain by Pleistocene-age deposits, which have a high potential to contain scientifically significant paleontological resources. Seven scientifically significant fossil locations have been identified within one mile of the project area by the Natural History Museum of Los Angeles County. No fossils have been discovered within the project site based on records searches. However, due to the likely thin Holocene deposits overlying high-potential Pleistocene sediments and nearby discoveries, the project's ground-disturbing activities for the subterranean parking garage have the "potential to result in significant impacts under CEQA including destruction, damage, or loss of scientifically significant paleontological resources." As such, the report recommends a Qualified Paleontologist be retained to prepare a Paleontological Mitigation Plan & Worker Environmental Awareness Program (WEAP). Further, a full-time Paleontological monitoring should include visual inspection of earth-moving activities, graded areas, trench sidewalls, and spoils piles.

In addition, a Cultural/Tribal Cultural Resources Assessment (May 2025) was prepared by South Environmental to assess the potential project impacts to archaeological and tribal cultural resources and, as necessary, to provide recommendations for mitigation. No archaeological or tribal cultural resources were identified at the project site or within a half of a mile radius through a California Historical Resources Information Center (CHRIS) records search. In addition, the Native American Heritage Commission (NAHC) Sacred Lands File search yielded "positive results" for the project vicinity, indicating resources important to Native Americans are potentially present, though the specific location or nature is not detailed publicly. No archaeological resources or tribal cultural resources were identified on the project site through the CHRIS records search or tribal outreach.

Despite the absence of identified resources within the immediate project area, the City has established standard conditions of approval for inadvertent discoveries, including halting construction and proper assessment, to ensure compliance with state law and reduce potential impacts to a less than significant level.

Although no archaeological or tribal cultural resources were identified by this study and none are anticipated to be impacted by the proposed project, the City has established mitigation measures to be implemented through the City’s imposition of conditions of approval to address inadvertent discovery of archaeological resources and tribal cultural resources. These measures include halting construction, proper assessment by a qualified archaeologist and/or tribal representative and ensuring compliance with state and local regulations to reduce any potential impacts to a less than significant level.

In short, the project site is located in a highly urbanized area of the City and has been subject to past disturbance, including the construction of various types of land uses and the area is not located in an area identified to contain paleontological or archaeological resources. Any archaeological resources that may have existed near the project site surface are likely to have been disturbed or previously removed. However, previously unknown archaeological resources may exist beneath the Project Site that could be uncovered during project grading activities. If previously unknown archaeological resources are found during excavation and grading, the Project would be required to follow procedures detailed in California Public Resources Code Section 21083.2. The required compliance would ensure any found deposits are treated in accordance with federal, State, and local guidelines, including those set forth in PRC Section 21083.2. As such, the project conforms to the applicable Land Resources policies of Chapter 3.

Article 6 Development

Section 30250 Location; existing developed area.
(a) New residential, commercial, or industrial development, except as otherwise provided in this division, shall be located within, contiguous with, or in close proximity to, existing developed areas able to accommodate it or, where such areas are not able to accommodate it, in other areas with adequate public services and where it will not have significant adverse effects, either individually or cumulatively, on coastal resources. In addition, land divisions, other than leases for agricultural uses, outside existing developed areas shall be permitted only where 50 percent of the usable parcels in the area have been developed and the created parcels would be no smaller than the average size of surrounding parcels.

The project is located in an existing developed area surrounded by similar residential and commercial uses and will not have a significant adverse impact on coastal resources. Existing infrastructure servicing the existing commercial uses will be used by the proposed development. Existing utility lines and water pipes will be connected to the proposed development. In addition, the project area is within the service area of the Los Angeles Fire Department Station 63 and the Pacific Division of the Los Angeles Police Department. Primary regional access is provided by the Marina Freeway, Venice Boulevard, and Lincoln Boulevard, which are all accessible within 1.5 miles of the Project Site.

The neighborhood and surrounding properties are developed with multi-family dwellings and commercial structures with zoning classifications of C2-1, RD1.5-1 and M1-1. Surrounding properties include single story and multi-story commercial uses, multi-story residential uses, parking lots, and a mixed-use hotel project which is currently under construction. The adjoining property to the north has a land use designation of Limited Manufacturing and is zoned M1-1. The property is developed with a three-story,10-unit residential condominium structure constructed in 2008. The property to the northeast, across Hampton Drive, has a land use designation of Community Commercial and is zoned C2-1. The property is developed with a two-story commercial structure with a ground floor restaurant (Tacos Por Favor) constructed in 1927. The property to the east, across Brooks Avenue, has a land use designation of Community Commercial and is zoned C2-1. The property is developed with a one-story commercial structure constructed in 1912. Further, this property has been identified as a historic resource by SurveyLA: Eames Office. The property to the south, across Abbot Kinney Boulevard, has a land use designation of Community Commercial and is zoned C2-1. This site is developed with a one-story commercial building and surface parking lot.

As such, the project will be located in an existing developed area contiguous with similar residential uses and will not have a significant adverse impact on coastal resources.

Section 30251 Scenic and Visual Qualities.
The scenic and visual qualities of coastal areas shall be considered and protected as a resource of public importance. Permitted development shall be sited and designed to protect views to and along the ocean and scenic coastal areas, to minimize the alteration of natural land forms, to be visually compatible with the character of surrounding areas, and, where feasible, to restore and enhance visual quality in visually degraded areas. New development in highly scenic areas such as those designated in the California Coastline Preservation and Recreation Plan prepared by the Department of Parks and Recreation and by local government shall be subordinate to the character of its setting.

The architectural character of nearby development includes an eclectic mix of architectural styles including modern and contemporary style buildings. The project's proposed

contemporary design fits into this architectural diversity of the neighborhood. Further, the project height, massing and scale of the project is consistent with the abutting structures and buildings in the vicinity.

The neighborhood and surrounding properties are developed with multi-family dwellings and commercial structures with zoning classifications of C2-1, RD1.5-1 and M1-1. Surrounding properties include single story and multi-story commercial uses, multi-story residential uses, parking lots, and a mixed use hotel project which is currently under construction.

The adjoining property to the north has a land use designation of Limited Manufacturing and is zoned M1-1. The property is developed with a three-story,10-unit residential condominium structure constructed in 2008. The property to the northeast, across Hampton Drive, has a land use designation of Community Commercial and is zoned C2-1. The property is developed with a two-story commercial structure with a ground floor restaurant (Tacos Por Favor) constructed in 1927. The property to the east, across Brooks Avenue, has a land use designation of Community Commercial and is zoned C2-1. The property is developed with a one-story commercial structure constructed in 1912. Further, this property has been identified as a historic resource by SurveyLA: Eames Office. The property to the south, across Abbot Kinney Boulevard, has a land use designation of Community Commercial and is zoned C2-1. This site is developed with a one-story commercial building and a surface parking lot.

The applicant submitted a Compatibility and Visual Impact Analysis report, submitted on April 16, 2024, prepared by Howard Robinson & Associates to demonstrate that the proposed project will not have a negative visual impact on the community or protected public views. This analysis reveals the proposed project exceeds the height averages for the study area; however, the report notes that the largest structures in the study area are abutting the subject site. The two direct neighbors at 815 Hampton Drive and 806 Main Street feature large developments. The Report concludes the proposed mixed-use development, despite exceeding some average compatibility metrics, is appropriate for the North Venice subarea given the context of nearby larger developments and the site's unique characteristics. The project's high-quality design, use of step-backs to mitigate mass, and its positive contribution to visual quality by redeveloping an underutilized site.

The project’s consistency with development standards in the certified Venice LUP is important in assessing the project’s compatibility with the character of the surrounding area. The certified Venice LUP states that the development standards also define for each land use designation a density of housing units and lot coverage to maintain the scale and character of existing residential neighborhoods and minimize the impacts of building bulk and mass.” (LUP, p.II-2.) However, the proposed project qualifies for density bonus incentive and a waiver to deviate from the standards in the Venice Land Use Plan, and the project is consistent with the density bonus policies in the Venice Land Use Plan.

Height Incentive

The density bonus off-menu incentive for height is designed to minimize impacts to coastal resources, where the 14 foot 7 inch increase in height (or an additional floor) is necessary in order to provide the three affordable units. The triangle-shaped lot creates inefficiencies in building design including the layout of the dwelling units and the subterranean parking. This site condition necessitates the need for a building height increase in order to provide the three affordable units.

The project site is zoned C2-1 with a Height District No. 1, which provides for unlimited

building height. However, the Venice Coastal Zone Specific Plan further limits building height to 30 feet for flat roofs and 35 feet for Varied Rooflines. The applicant requests a height of 44 feet 7 inches for a Flat Roof. Compliance with the height limitations of the Specific Plan would reduce the number of levels and floor area, resulting in the reduction of one (1) residential level containing seven (7) dwelling units, as well as the elimination of the rooftop amenity deck. As such, the Off-Menu Incentive for increased height is necessary to accommodate a larger construction envelope to provide for the affordable units and market rate units. As with FAR, the ability to develop a larger building with more units will increase revenues from the market-rate units, which will lower the marginal cost of developing and operating the affordable units, thereby making the project financially feasible.

Further, the project site is a triangular-shaped commercial site that fronts Brooks Avenue and adjoins Hampton Drive to the north and Abbot Kinney Boulevard to the south. The Brooks Avenue frontage takes up an entire block. Due to the narrow, triangular lot shape, the project features generous rear setbacks (22 feet 9 inches at ground level, increasing to 43 feet 1 inch at roof terrace) which minimizes the impacts to the abutting properties at the rear of the lot. This also means that the Project must offset this loss of developable area by increasing its height. This unique location means no neighboring structures will be negatively impacted by the proposed development from the Brooks Avenue frontage.

As discussed, the additional story is offset by generous step-backs, articulation to break up of the building mass into two segments, which ensures consistency with the community character.

FAR Incentive

The density bonus on-menu incentive for an increase in FAR is designed to minimize impacts to Coastal resources, where the 34.2 percent increase in FAR is necessary to provide the three affordable units. The triangle-shaped lot creates inefficiencies in building design including the layout of dwelling units and the subterranean parking. This site condition necessitates the need for a FAR increase in order to provide the three affordable units. Were the project to adhere to this allowable FAR in the C2-1 zone, its total square footage would be limited to 27,731 square feet. The On-Menu Incentive to increase the FAR by 32.4 percent would allow an increase of 8,985 square feet, which would accommodate a larger construction envelope to provide for the affordable units and additional market rate units. The ability to develop larger building or more units will increase the revenues from the market-rate floor area, which will lower the marginal cost of developing and operating the affordable units. The additional floor area will allow certain fixed costs involved in the construction to be spread over more floor area thereby reducing the per square foot building cost of the development.

As discussed above, the additional floor area is off set by the generous step-backs, articulations and the breaking up of the building mass into two segments, which ensures consistency with the community character.

Roof Access Structure Waiver

The density bonus waiver of development standards to provide a Roof Access Structure of 11 feet 6 inches is designed to minimize impactful to coastal resources. The 10 foot limitation for RAS is too restrictive for most modern elevator equipment manufacturers. The strict application of the RAS height limit would restrict the ability of the project to meet the open space requirements and to provide a premium amenity to tenants.

The proposed project includes a 3,275 square foot common open space and 350 square feet of private open space (balconies). The common open space for this project is provided on the roof top, second floor courtyard and ground level plaza. Roof access structures are intended to allow ingress to and egress from a building's rooftop for maintenance, safety, and recreational purposes. The proposed project includes 30 residential dwelling units who share common open space available on the rooftop. At this level of occupancy, the Fire Department requires at least two (2) roof access stairways for emergency egress from the roof. Furthermore, the Americans with Disabilities Act Accessibility Guidelines require any multifamily building with accessible roof features to provide roof access via an elevator so that all residents, regardless of their physical ability level, have equal access to the roof, its amenities, and its emergency egress provisions. Compliance with 10-foot elevator shaft would require the project to reduce the occupancy level of the building and to eliminate the planned rooftop open space in order to observe the Fire Department and Americans with Disabilities Act access regulations. Therefore, the requested Waiver is necessary in order to include adequate open space facilities as well as the affordable dwelling units, including three (3) units reserved for Very Low-Income households.

The project provides one Roof Access Structure which is located in the center of the structure, approximately 35 feet from the front property line. The RAS is designed to avoid visual impacts to pedestrians (at the street level) and to minimize the overall massing of the structure. In addition, the two other required egress stairs are recessed by design to reduce the overall massing of the structure.

The proposed development complies with Policy I.A.13 (Density Bonus Application) which allows for reduced restrictions for density, height and setback standards as outlined in Policies I.A.1, I.A.8, I.E.1, I.E.2, I.E.3 and II.A.3 of the Venice Land Use Plan (LUP), further discussed in Finding No. 2.b. As such, the proposed development is visually compatible with the character of the surrounding area and will further enhance the visual quality of the area.

Section 30252 Maintenance and Enhancement of Public Access.
The location and amount of new development should maintain and enhance public access to the coast by (1) facilitating the provision or extension of transit service, (2) providing commercial facilities within or adjoining residential development or in other areas that will minimize the use of coastal access roads, (3) providing nonautomobile circulation within the development, (4) providing adequate parking facilities or providing substitute means of serving the development with public transportation, (5) assuring the potential for public transit for high intensity uses such as high-rise office buildings, and by (6) assuring that the recreational needs of new residents will not overload nearby coastal recreation areas by correlating the amount of development with local park acquisition and development plans with the provision of onsite recreational facilities to serve the new development.

The proposed project consists of the demolition of five, one-story, commercial buildings and the construction of a new four-story, 36,716 square-foot mixed-use development consisting of 30 dwelling units (including 3 units restricted to Very Low-Income Households), 2,598 square feet of retail use, an 818 square-foot restaurant with 286 square feet of Service Floor area and 31 seats, requesting on-site sale and consumption of a full line of alcoholic beverages, and two (2) levels of subterranean parking providing 50 parking spaces. Specifically, 35 parking spaces are provided for the residential units and 15 parking spaces are provided for the commercial uses. The project also includes the removal of one existing curb cut which will increase the on-street parking supply in the area.

The surrounding area is served by the Los Angeles County Metropolitan Transit Authority

(Metro) bus line 33 and Santa Monica Big Blue Bus line 1 at the intersection of Main Street and Brooks Avenue. In addition, the subject site is located 1,500 feet from a Major Transit Stop at Main Street and Windward Avenue. On September 22, 2022, the Governor signed Assembly Bill (AB) 2097, which added Government Code Section (§) 65863.2. AB 2097 prohibits a public agency from imposing or enforcing any minimum automobile parking requirements on any residential, commercial, or other development that is within one-half mile of a Major Transit Stop, with minor exceptions. Lastly, the subject site is located approximately a quarter of a mile from the Marvin Braude Bike Trail providing regional bicycle access. In addition, the subject site is also located within the LANow ride-share service area, operated by LADOT, that provides on-demand shuttle service at pick-up and drop-off points within a ¼ mile walking distance in Venice, Mar Vista, Del Rey, and Palms

The applicant submitted a Parking Demand and Access Study (May 2025) prepared by Linscott, Law & Greenspan (LLG) to assess the project's potential impacts to coastal access. Coupled with the alternative transportation options within the area, including public transit, increased bicycle infrastructure, amenities within walking distance, and shared ride facilities, would result in sufficient parking demand on-site. The report concludes that the Project will provide more than sufficient parking to meet its peak demand and therefore will not adversely impact coastal access.

Further, the applicant submitted a Transportation Demand Management plan (July 2024) prepared by Linscott, Law & Greenspan (LLG) that outlines programs that the applicant will implement that support alternative modes of transportation. Those measures and programs include but not limited to:

- Public Bicycle Parking
- Employee Transportation Subsidy In Lieu of Parking
- Secure Bicycle Storage for Employees
- Guaranteed Return Trip for Employees (Including Transit Riders, Car/Vanpoolers)
- Unbundled Parking
- Residential Transportation Subsidy In Lieu of Parking

The proposed project is not located between the first public road and the sea and is located a quarter of a mile from the beach. The proposed project will not interfere with or obstruct the public's right to access to coastal resources. The proposed development will not have any adverse impacts on public access to the coast. No permanent structures will be placed within the public right-of-way and public access to the coast will not be obstructed. The proposed project will neither interfere nor reduce access to the shoreline as the site does not have direct access to any water or beach. As such, the project will not have a significant adverse impact on coastal resources.

Section 30253 Minimization of Adverse Impacts.
New development shall: (1) Minimize risks to life and property in areas of high geologic, flood, and fire hazard. (2) Assure stability and structural integrity, and neither create nor contribute significantly to erosion, geologic instability, or destruction of the site or surrounding area or in any way require the construction of protective devices that would substantially alter natural landforms along bluffs and cliffs. (3) Be consistent with requirements imposed by an air pollution control district or the State Air Resources Control Board as to each particular development. (4) Minimize energy consumption and vehicle miles traveled. (5) Where appropriate, protect special communities and neighborhoods which, because of their unique characteristics, are popular visitor destination points for recreational uses.

The subject site is located within a Liquefaction area, Methane Zone, and within 4.7 kilometers from the Santa Monica Fault. As such, the project is subject to compliance with Zoning, Building, and Fire Safety Code requirements that will minimize risks to life and property in geologic hazard areas.

The subject site is also located within an area that may be affected by Sea Level Rise. On August 12, 2015, the Coastal Commission adopted a Sea Level Rise Policy Guidance document, updated on November 13, 2024. This policy document provides a framework and directions for local jurisdictions to address sea level rise (SLR) in Local Coastal Programs (LCPs) and Coastal Development Permits (CDPs). In May 2018, the City completed an initial sea level rise vulnerability assessment for the Venice Coastal Zone. The report provides that: *Existing wide beaches generally protect Venice from coastal hazards. Coastal assets along or near the beachfront are potentially vulnerable during a large storm event in combination with SLR greater than 3.3 feet. After 4.9 feet SLR, beachfront assets are more vulnerable to damage from flooding or potential erosion of the beach. A SLR of 6.6 feet is a tipping point for Venice's exposure to extreme coastal wave events. Beachfront and coastal assets could flood annually, beaches could be greatly reduced in width, and high water levels could greatly increase potential for flooding of inland low-lying areas. As discussed in the analysis, there is considerable uncertainty around the timing of SLR, how coastal processes may be affected, and what adaptation approaches will be applied in the future* (VSLRVA, pg. 45). Policies and development standards to address the potential impacts of SLR would be addressed in the City's LCP for the Venice Coastal Zone. The proposed development includes two subterranean levels, however, the foundation and basement levels are required to be water-proofed and are subject to further review and compliance with zoning and building code requirements. Furthermore, any repair, demolition, and/or new construction as a result of any flooding would be subject to additional review. As conditioned, the proposed development is consistent with Section 30253 of the Coastal Act

The demolition of five, one-story, commercial buildings and the construction of a new four-story, 36,716 square-foot mixed-use development consisting of 30 dwelling units (including 3 units restricted to Very Low-Income Households), 2,598 square feet of retail use, an 818 square-foot restaurant with 286 square feet of Service Floor area and 31 seats, requesting on-site sale and consumption of a full line of alcoholic beverages, and two (2) levels of subterranean parking providing 50 parking spaces. In addition, the project includes a landscaped plaza, roof deck, and new street trees. The proposed use would have no adverse impacts on public access, recreation, public views or the marine environment, as the property is located within a developed residential area and located more than a quarter of a mile from Venice Beach. The project will neither interfere nor reduce access to the shoreline or beach. There will be no dredging, filling, or diking of coastal waters or wetlands associated with the request, and there are no sensitive habitat areas, archaeological or paleontological resources identified on the site. The proposed dwelling will not block any designated public access views. As conditioned, the proposed project is in conformity with Chapter 3 of the California Coastal Act.

b. The development will not prejudice the ability of the City of Los Angeles to prepare a local coastal program that is in conformity with Chapter 3 of the California Coastal Act of 1976.

Coastal Act Section 30604(a) states that prior to the certification of a Local Coastal Program ("LCP"), a coastal development permit may only be issued if a finding can be made that the proposed development is in conformance with Chapter 3 of the Coastal Act. The Venice Local Coastal Land Use Plan ("LUP") was certified by the California Coastal Commission on June 14, 2001; however, the necessary implementation ordinances were

not adopted. The City is in the initial stages of preparing the LCP; prior to its adoption the guidelines contained in the certified LUP are advisory. The subject site is located within the North Venice Subarea with a land use designation of Community Commercial and zoned C2-1.

The following are applicable policies from the certified Venice Land Use Plan:

Policy I.B.2 *Mixed-Use Development. Mixed-use residential commercial development shall be encouraged in all areas designated on the Land Use Policy Map for commercial use. Residential density in commercial land use designations shall not exceed one unit per 800-1200 square feet of lot area and shall comply with the Floor Area Ratio (FAR) limits set forth in Policy I.B.7. The design of mixed-use development is intended to help mitigate the impact of the traffic generated by the development on coastal access roads and reduce parking demand by reducing the need for automobile use by residents and encouraging pedestrian activity. Such development shall comply with the density and development standards set forth in this LUP.*

Policy I.B.6 *Community Commercial Land Use. The areas designated as Community Commercial will accommodate the development of community serving commercial uses and services, with a mix of residential dwelling units and visitor-serving uses. The Community Commercial designation is intended to provide focal points for local shopping, civic and social activities and for visitor-serving commercial uses.*

> *Uses/Density: On a commercial lot, residential uses shall not exceed one unit per 800-1200 square feet of lot area.*

The applicant is proposing the demolition of five, one-story, commercial buildings and the construction of a new four-story, 36,716 square-foot mixed-use development consisting of 30 dwelling units (including 3 units restricted to Very Low-Income Households), 2,598 square feet of retail use, an 818 square-foot restaurant with 286 square feet of Service Floor area and 31 seats, requesting on-site sale and consumption of a full line of alcoholic beverages, and two (2) levels of subterranean parking providing 50 parking spaces. In addition, the project includes a landscaped plaza, roof deck, and new street trees. The proposed neighborhood serving uses have the added benefit of attracting more pedestrian activity to activate the streets in the surrounding area.

Commercially zoned properties in the North Venice Subarea are limited to a maximum of one dwelling unit per 800 square feet of lot area using the R3 density standard. In addition, commercially zoned properties in the North Venice Subarea are limited to a maximum Floor Area Ratio (FAR) of 1.5:1. The proposed project with a lot area of 18,487 square feet would allow for a maximum 23 dwelling units within a 27,731 square foot mixed use structure.

The proposed development utilizes the provisions of Density Bonus State Law to deviate from the requirements of the certified Venice Land Use Plan (LUP) and Venice Coastal Zone Specific Plan for the proposed construction of 30 dwelling units within a 36,743 square foot mixed use structure.

Policy I.B.7 *Commercial Development Standards. The following standards shall apply in all commercial land use designations, unless specified elsewhere within this Land Use Plan.*

> *Density/Intensity: Maximum Floor Area Ratio (FAR)*

0.5 to 1 for retail only (including restaurants)
1.0 to 1 for retail / office
1.5 to 1 for retail and/or office and residential

Lot Consolidation. Two commercial lots may be consolidated, or three with subterranean parking with the following restrictions:

1. *Methods for insuring that the structure does not look consolidated (breaks in front wall of ten feet minimum) shall be utilized.*
2. *Subterranean parking shall be fully depressed with roof at natural grade.*

Exception: Lot consolidation of more than two lots shall be permitted for mixed-use projects which conform to the existing scale and character of the surrounding community and provide adequate on-site parking.

Yards: Per the following Ground Level Development Policy which requires that commercial development be designed in scale with, and oriented to, the adjacent pedestrian accessways (i.e. sidewalks).

Ground Level Development: Every commercial structure shall include a Street Wall, which shall extend for at least 65% of the length of the street frontage, and shall be located at the property line or within five feet of the property line, except on Ocean Front Walk, where all commercial buildings shall have the Street Wall set zero (0) feet from the building line. The required Street Wall at sidewalk level shall be a minimum of 13 feet high. (A Street Wall is the exterior wall of a building that faces a street.)

Street Walls adjacent to a sidewalk café, public plaza, retail courtyard, arcade, or landscaped area may be setback a maximum of 15 feet along the project which consists of the sidewalk café, public plaza, retail courtyard, arcade, or landscaped area. Such areas shall not be considered in calculating the buildable area of a project but, with the exception of areas used only for landscaping, shall be considered in calculations for required parking.

The Venice Land Use Plan permits a Floor Area Ratio (FAR) of 1.5 times the buildable area of the lot for mixed-use projects in the C2-1 zone. The buildable lot area is 18,487 square feet, so a FAR of 1.5 to 1 permits a total floor area of approximately 27,731 square feet. The project proposes a maximum FAR of 1.98:1, a total project size of 36,716 square feet (32.4 percent increase). The proposed development utilizes the provisions of Density Bonus State Law to deviate from the requirements of the LAMC. As discussed in Finding No. 2a, the On-Menu Incentive to increase the FAR by 32.4 percent would allow an increase of 8,985 square feet, which would accommodate a larger construction envelope to provide for the affordable units and additional market rate units. The ability to develop larger building or more units will increase the revenues from the market-rate floor area, which will lower the marginal cost of developing and operating the affordable units. The additional floor area will allow certain fixed costs involved in the construction to be spread over more floor area thereby reducing the per square foot build cost of the development. Further, as discussed in Findings No. 2a, the requested Incentive will not have a negative impact on neighborhood character.

The project consists of the consolidation of four lots. The proposed project is a mixed use development; therefore, meets the exception to the limitation on lot consolidations.

The proposed ground floor commercial use will include a cafe and two retail units fronting on Brooks Avenue. The ground floor uses will enhance the pedestrian experience, providing neighborhood-serving commercial uses and dining options. The proposed neighborhood serving uses have the added benefit of attracting more pedestrian activity which will help to activate the streets in the surrounding area.

Policy I.A.13. *Density Bonus Applications. Required replacement dwelling units shall be counted as reserved units in any related State mandated density bonus application for the same project.*

The Project consists of the demolition of five, one-story, commercial buildings and the construction of a new four-story, 36,716 square-foot mixed-use development consisting of 30 dwelling units (including 3 units restricted to Very Low-Income Households), 2,598 square feet of retail use, an 818 square-foot restaurant with 286 square feet of Service Floor area and 31 seats, requesting on-site sale and consumption of a full line of alcoholic beverages, and two (2) levels of subterranean parking providing 50 parking spaces.

Policy I.A.14. *Parking Requirements for Affordable Housing. Reduced parking is permitted for low-income units only if: a) the project is consistent with LUP policy I.A.13; and b) it is demonstrated that the prospective occupants of the project will have a reduced demand for parking. However, if a unit changes its status from low or low-moderate income to market rate unit, parking should be provided for market rate units according to the parking standards listed in LUP Policies II.A.3 and II.A.4.*

The demolition of five, one-story, commercial buildings and the construction of a new four-story, 36,716 square-foot mixed-use development consisting of 30 dwelling units (including 3 units restricted to Very Low-Income Households), 2,598 square feet of retail use, an 818 square-foot restaurant with 286 square feet of Service Floor area and 31 seats, requesting on-site sale and consumption of a full line of alcoholic beverages, and two (2) levels of subterranean parking providing 50 parking spaces.

On September 22, 2022, the Governor signed Assembly Bill (AB) 2097, which added Government Code Section (§) 65863.2. AB 2097 prohibits a public agency from imposing or enforcing any minimum automobile parking requirement on any residential, commercial, or other development project that is within one-half mile of a Major Transit Stop, with minor exceptions. The subject site is located 1,500 feet from at Major Transit Stop at Main Street and Windward Avenue and qualifies for reduced parking.

Further, the applicant submitted a Parking Demand and Access Study (May 2025) prepared by Linscott, Law & Greenspan (LLG) to assess the project's potential impacts to coastal access. Coupled with the alternative transportation options within the area, including public transit, increased bicycle infrastructure, amenities within walking distance, and shared ride facilities, would result in sufficient parking demand on-site. The report concludes that the Project will provide more than sufficient parking to meet its peak demand and therefore will not adversely impact coastal access.

<u>Preservation of Venice as a Special Coastal Community</u>

Policy I.E.1. General. Venice's unique social and architectural diversity should be protected as a Special Coastal Community pursuant to Chapter 3 of the California Coastal Act of 1976.

Policy I.E.2. Scale. *New development within the Venice Coastal Zone shall respect the scale and character of community development. Buildings which are of a scale compatible with the community (with respect to bulk, height, buffer, and setback) shall be encouraged. All new development and renovations should respect the scale, massing, and landscape of existing residential neighborhoods. Lot consolidations shall be restricted to protect the scale of existing neighborhoods. Roof access structures shall be limited to the minimum size necessary to reduce visual impacts while providing access for fire safety. In visually sensitive areas, roof access structures shall be set back from public recreation areas, public walkways, and all water areas so that the roof access structure does not result in a visible increase in bulk or height of the roof line as seen from a public recreation area, public walkway, or water area. No roof access structure shall exceed the height limit by more than ten (10') feet. Roof deck enclosures (e.g. railings and parapet walls) shall not exceed the height limit by more than 42 inches and shall be constructed of railings or transparent materials. Notwithstanding other policies of this LUP, chimneys, exhaust ducts, ventilation shafts and other similar devices essential for building function may exceed the specified height limit in a residential zone by five feet.*

Policy I.E.3. Architecture. *Varied styles of architecture are encouraged with building facades which incorporate varied planes and textures while maintaining the neighborhood scale and massing.*

The architectural character of nearby development includes an eclectic mix of architectural styles including modern and contemporary style buildings. The project's proposed contemporary design fits into this architectural diversity of the neighborhood. Further, the project height, massing and scale of the project is consistent with the abutting structures and buildings in the vicinity.

The neighborhood and surrounding properties are developed with multi-family dwellings and commercial structures with zoning classifications of C2-1, RD1.5-1 and M1-1. Surrounding properties include single story and multi-story commercial uses, multi-story residential uses, parking lots, and a mixed use hotel project which is currently under construction.

The adjoining property to the north has a land use designation of Limited Manufacturing and is zoned M1-1. The property is developed with a three-story,10-unit residential condominium structure constructed in 2008. The property to the northeast, across Hampton Drive, has a land use designation of Community Commercial and is zoned C2-1. The property is developed with a two-story commercial structure with a ground floor restaurant (Tacos Por Favor) constructed in 1927. The property to the east, across Brooks Avenue, has a land use designation of Community Commercial and is zoned C2-1. The property is developed with a one-story commercial structure constructed in 1912. Further, this property has been identified as a historic resource by SurveyLA: Eames Office. The property to the south, across Abbot Kinney Boulevard, has a land use designation of Community Commercial and is zoned C2-1. This site is developed with a one-story commercial building and a surface parking lot.

The applicant submitted a Compatibility and Visual Impact Analysis report prepared by Howard Robinson & Associates to demonstrate that the proposed project will not have a negative visual impact on the community or protected public views.

The analysis reveals the proposed project exceeds the height averages for the study area; however, the report notes that the largest structures in the study area are abutting the subject site. The two direct neighbors at 815 Hampton Drive and 806 Main Street feature

large developments.

The proposed four-story mixed-use structure is consistent with the policies of the Certified Venice Land Use Plan and the standards of the Venice Coastal Zone Specific Plan. The project will not prejudice the ability of the City to prepare a local coastal program that is in conformity with Chapter 3 of the California Coastal Act.

c. The Interpretive Guidelines for Coastal Planning and Permits as established by the California Coastal Commission dated February 11, 1977 and any subsequent amendments thereto have been reviewed, analyzed and considered in light of the individual project in making this determination.

The Los Angeles County Interpretive Guidelines were adopted by the California Coastal Commission (October 14, 1980) to supplement the Statewide Guidelines. Both regional and statewide guidelines, pursuant to Section 30620 (b) of the Coastal Act, are designed to assist local governments, the regional commissions, the commission, and persons subject to the provisions of this chapter in determining how the policies of this division shall be applied to the coastal zone prior to the certification of a local coastal program.

As stated in the Regional Interpretive Guidelines, the guidelines are intended to be used "in a flexible manner with consideration for local and regional conditions, individual project parameters and constraints, and individual and cumulative impacts on coastal resources". In addition to the Regional Interpretive Guidelines, the policies of the Venice Local Coastal Program Land Use Plan (the Land Use Plan was certified by the Coastal Commission on June 14, 2001) have been reviewed and considered. As discussed in Finding No. 2.b, the proposed development is consistent with the applicable policies of the certified Venice LUP.

d. The decision of the permit granting authority has been guided by any applicable decision of the California Coastal Commission pursuant to Section 30625(c) of the Public Resources Code, which provides that prior decisions of the Coastal Commission, where applicable, shall guide local governments in their actions in carrying out their responsibility and authority under the Coastal Act of 1976.

The project consists of the demolition of five, one-story, commercial buildings and the construction of a new four-story, 36,716 square-foot mixed-use development consisting of 30 dwelling units (including 3 units restricted to Very Low-Income Households), 2,598 square feet of retail use, an 818 square-foot restaurant with 286 square feet of Service Floor area and 31 seats, requesting on-site sale and consumption of a full line of alcoholic beverages, and two (2) levels of subterranean parking providing 50 parking spaces; located within the Single Permit Jurisdiction of the Coastal Zone, where the local jurisdiction (City of Los Angeles) issues Coastal Development Permits. The Coastal Commission will render decisions on appeals of the City's Coastal Development Permits or Coastal Exemptions. The Coastal Commission took action on the following residential projects in the Venice Coastal Zone:

- In December 2024, the Commission, on appeal, found Substantial Issue with the City approval of a Coastal Development Permit authorizing the Venice Dell Community Project consisting of 1) demolition of two existing, City-owned 196-space and seven-space public surface parking lots and an existing two-story, 1,970 square foot four-unit quadraplex; 2) consolidation of 40 lots and subdivision into two ground 2 lots and seven airspace lots; and 3) construction of two new, three- and four-story, 35-ft. tall mixed-use structures totaling 103,957 square feet of habitable interior area and 137,805 square foot of interior garage area. The west structure includes a 67-ft. tall

campanile, 63 affordable dwelling units, 3,065 square feet of commercial uses, 104 residential and commercial parking spaces, and one parking space reserved for public boat launch ramp access. The west structure also includes one subterranean level. The east structure includes 77 affordable dwelling units, a 2,875 square feet art studio, 250 public parking spaces, and three parking spaces reserved for public boat launch ramp access. An on-street loading/unloading space for vehicle access to the boat launch ramp would be provided on North Venice Boulevard. 9,100 cubic yards of cut and no fill is locally approved. At the de novo hearing, the Commission approved a modified project 5-22-0588.

- In February 2024, the Commission, on appeal, found Substantial Issue with the City approval of a Coastal Development Permit authorizing the demolition of three residential structures, the merger of two lots into one 7,800 square foot lot, and the construction of a 15,016 square foot four-story, residential structure with eight condominium units (one unit Very Low-Income and two Low-Income) with 12 parking spaces and removal of five ornamental trees located at 2308 and 2310 Pisani Place (A-5-VEN-23-0044).

- In November 2021, the Commission, on appeal, found Substantial Issue with the City approval of a Coastal Development Permit authorizing the demolition of three detached structures with nine dwelling units, consolidation of two lots, and construction of a new, three-story over basement, 13,412 square foot, mixed-use development including nine dwelling units, which includes one affordable dwelling unit, a 1,568 square foot restaurant, and 27 parking spaces on the two ocean-fronting lots at 815 Ocean Front Walk (A-5-VEN-21-0063).

- In December 2020, the Commission, on appeal, found No Substantial Issue with the City approval of a Coastal Development Permit authorizing the demolition of a 2,056 square foot auto repair shop and addition to and conversion of a 2,482 square foot philanthropic use structure resulting in a four-story, 30,463 square foot mixed-use structure including 39 permanent supportive housing units and one manager unit, with 4,441 square feet of supportive services and 3,085 square feet of ground-floor commercial (office) space with a total of 6 on-site parking spaces, and 42 bicycle parking spaces located at 2467-2471 South Lincoln Boulevard (A-5-VEN-20-0060).

- In June 2019, the Commission, on appeal, found No Substantial Issue with the City approval of a Coastal Development Permit authorizing the demolition of two institutional use structures and the construction of a 4-story, 35-unit affordable supportive housing complex with approximately 1,875 square feet of administrative and program office space and 17 automobile and 48 bicycle parking spaces on two contiguous parcels located at 720 Rose Avenue (A-5-VEN-19-0020).

- On August 9, 2005, the Commission approved a Coastal Development Permit (de novo hearing) for the development of a three-story, 37-foot tall (up to 50 feet for one clock tower), mixed use project comprised of 70 residential condominium units of which seven are restricted for Very Low-Income Households, five live/work units, and one groundfloor commercial use (bakery/restaurant), providing 247 parking spaces within a subterranean garage; the project is located on eight consolidated lots at 512 Rose Avenue, (A-5-VEN-05-206).

In several decisions, the Coastal Commission approved increase density and Density Bonus incentives for increased height, determining that the resulting development would be consistent and visually compatible with existing development in the project vicinity. As such, this decision of the permit granting authority has been guided by applicable

decisions of the California Coastal Commission pursuant to Section 30625(c) of the Public Resources Code, which provides that prior decisions of the Coastal Commission, where applicable, shall guide local governments in their actions in carrying out their responsibility and authority under the Coastal Act of 1976.

e. The development is not located between the nearest public road and the sea or shoreline of any body of water located within the coastal zone, and the development is in conformity with the public access and public recreation policies of Chapter 3 of the California Coastal Act of 1976.

Section 30210 of the Coastal Act states the following in regards to public access:

> *In carrying out the requirement of Section 4 of Article X of the California Constitution, maximum access, which shall be conspicuously posted, and recreational opportunities shall be provided for all the people consistent with public safety needs and the need to protect public rights, right of private property owners, and natural resources from overuse.*

Section 30211 of the Coastal Act states the following in regards to public recreation policies:

> *Development shall not interfere with the public's right of access to the sea where acquired through use or legislative authorization, including, but not limited to, the use of dry sand and rocky coastal beaches to the first line of terrestrial vegetation.*

The subject property is located about quarter of a mile away from the Pacific Ocean shoreline. The project could have an impact on public access to the coast if it resulted in a loss of on-street parking spaces or did not provide adequate parking for the dwelling. As proposed, the project will not conflict with any public access or public recreation policies of the Coastal Act.

f. An appropriate environmental clearance under the California Environmental Quality Act has been granted.

The proposed project was found to be within the scope of the 2021-2029 Housing Element Environmental Impact Report (EIR), SCH No. 2021010130, ENV-2020-672-EIR, certified on November 24, 2021 (Housing Element EIR) and Addendum No. ENV-2020-6762-EIR-ADD1 adopted on June 14, 2022 and the Addendum No. ENV-2020-6762-EIR-ADD2 was adopted on December 10, 2024 (Addenda). The proposed project, which includes the development of 420,327 housing units (cumulatively, 456,643), is within the scope of the 2021-2029 Housing Element as it will build out the City's regional housing needs assessment (RHNA). A CEQA Streamlining Checklist for a Project within the scope of the Housing Element Program EIR, ENV Case No. ENV-2024-2452-HES-PEIR (HE Streamlining Checklist), was prepared for the proposed project, pursuant to CEQA Guidelines Section 15168(c). Section 15168(c) provides for limited environmental review of subsequent projects under a Program EIR, where the project is found to be an activity within the scope of the program for which the EIR was prepared, and the impacts of the project are within the scope of the impacts analyzed in the EIR. Council found that the Housing Element EIR analyzed the impacts of the build-out of the RHNA, which involves the development of housing citywide. The HE Streamlining Checklist was prepared by staff to determine whether the impacts of the proposed project are within the scope of the Housing Element EIR. The prepared HE Streamlining Checklist supports that the impacts of the proposed project are within the scope of the Housing Element EIR and that no

significant environmental effects not examined in the Program EIR will occur from the proposed project. All required mitigation measures from the Housing Element EIR Mitigation Monitoring Program (MMP) will be imposed on the proposed project. An MMP for the proposed project has been prepared for adoption by the decisionmaker.

3. Permit Compliance Review Findings

a. The project substantially complies with the applicable regulations, findings, standards, and provisions of the Venice Coastal Zone Specific Plan.

The project consists of the demolition of five, one-story, commercial buildings and the construction of a new four-story, 36,716 square-foot mixed-use development consisting of 30 dwelling units (including 3 units restricted to Very Low-Income Households), 2,598 square feet of retail use, an 818 square-foot restaurant with 286 square feet of Service Floor area and 31 seats, requesting on-site sale and consumption of a full line of alcoholic beverages, and two (2) levels of subterranean parking providing 50 parking spaces. In addition, the project includes a landscaped plaza, roof deck, and new street trees. As conditioned, the proposed project complies with the applicable General Land Use and Development Regulations set forth in Section 9, Land Use and Development regulations for the North Venice subarea set forth in Section 10.F, and the Parking provisions set forth in Section 13 of the Specific Plan as evidenced below:

A. Section 8.C. Findings

The project meets the required findings set forth in Section 8.C of the Venice Coastal Zone Specific Plan, as shown below:

1. The Venice Coastal Development Project is compatible in scale and character with the existing neighborhood, and that the Venice Coastal Development Project would not be materially detrimental to adjoining lots or the immediate neighborhood.

The project site is a relatively flat, triangular-shaped commercial site that fronts Brooks Avenue and adjoins Hampton Drive to the north and Abbot Kinney Boulevard to the south. The project site is approximately 18,487 square feet (0.42 acres) in lot area. The project site is comprised of four lots (tied) and developed with five, one-story buildings, currently used as commercial offices. At least three of the buildings were constructed in 1927 and 1937 and had previously been used for automotive-related uses. Initial permits were issued in 1927 for a tire and battery shop, service station and public garage. The Certificate of Occupancy issued in 1983 is for a one-story, 256 square foot spray booth canopy addition to an existing one-story 315 square foot office. According to SurveyLA and the Office of Historic Resources, the existing structures are not considered historic resources.

The neighborhood and surrounding properties are developed with multi-family dwellings and commercial structures with zoning classifications of C2-1, RD1.5-1 and M1-1. Surrounding properties include single story and multi-story commercial uses, multi-story residential uses, parking lots, and a mixed use hotel project which is currently under construction.

The adjoining property to the north has a land use designation of Limited Manufacturing and is zoned M1-1. The property is developed with a three-story,10-unit residential condominium structure constructed in 2008. The property to the

northeast, across Hampton Drive, has a land use designation of Community Commercial and is zoned C2-1. The property is developed with a two-story commercial structure with a ground floor restaurant (Tacos Por Favor) constructed in 1927. The property to the east, across Brooks Avenue, has a land use designation of Community Commercial and is zoned C2-1. The property is developed with a one-story commercial structure constructed in 1912. Further, this property has been identified as a historic resource by SurveyLA: Eames Office. The property to the south, across Abbot Kinney Boulevard, has a land use designation of Community Commercial and is zoned C2-1. This site is developed with a one-story commercial building and surface parking lot.

The applicant submitted a Compatibility and Visual Impact Analysis report prepared by Howard Robinson & Associates to demonstrate that the proposed project will not have a negative visual impact on the community or protected public views.

The analysis reveals the proposed project exceeds the height averages for the study area; however, the report notes that the largest structures in the study area are abutting the subject site. The two direct neighbors at 815 Hampton Drive and 806 Main Street feature large developments.

As such, the proposed project is compatible in scale and character with the existing neighborhood, and the Venice Coastal Development Project would not be materially detrimental to adjoining lots or the immediate neighborhood.

2. The Venice Coastal Development Project is in Conformity with the Certified Venice Local Coastal Program.

A Local Coastal Program is comprised of a Land Use Plan and Implementation Plan, certified by the California Coastal Commission. The Venice Local Coastal Land Use Plan (“LUP”) was certified by the Coastal Commission on June 14, 2001, however, the necessary Implementation Plan was not certified. The proposed project conforms to the applicable policies of the certified Venice LUP, as outlined in Finding No. 2.b.

3. The applicant has guaranteed to keep the rent levels of any Replacement Affordable Units at an affordable level for the life of the proposed project and to register the Replacement Affordable Unit with the Los Angeles Housing Department.

The project site is comprised of four lots (tied) and developed with five, one-story buildings, currently used as commercial offices. At least three of the buildings were constructed in 1927 and 1937 and had previously been used for automotive-related uses. Initial permits were issued in 1927 for a tire and battery shop, service station and public garage. The Certificate of Occupancy issued in 1983 is for a one-story, 256 square foot spray booth canopy addition to an existing one-story 315 square foot office. There are no existing residential units and no requirement to replace any Affordable Dwelling Units in conjunction with this project.

4. *The Venice Coastal Development Project is consistent with the special requirements for low- and moderate-income housing units in the Venice Coastal Zone as mandated by California Government Code Section 65590 (Mello Act).*

Inclusionary Residential Units are required for this project. The project proposes the construction of 30 new Residential Units. Pursuant to Part 5 of the Interim Administrative Procedures, development which consists of 10 or greater Residential

Units are New Housing Developments and are required to provide Inclusionary Residential Units. The proposed development of 30 new Residential Units of which three (3) are Inclusionary Units. Therefore, the project provides the required affordable units under the Mello Act. See Finding No. 4 for additional discussion.

In addition to the requisite findings set forth in Section 8.C of the Specific Plan, the project also complies with all applicable provisions of the Specific Plan, as set forth below:

B. Section 9. General Land Use and Development Regulations

1. *Lot Consolidation. Lot consolidation of more than two lots shall be permitted for mixed-use and multi-family residential Venice Coastal Development Projects, provided the project conforms to the existing scale and characteristic of the surrounding community, the required parking is onsite, and the project conforms to developments standards in Section 9.A.2 of the Specific Plan.*

   The proposed project consists of the consolidation of four (4) residential lots for the construction of a new four-story, 36,716 square-foot mixed-use development consisting of 30 dwelling units, providing 50 parking spaces on-site. Therefore, the project complies with Section 9.A of the Specific Plan.

2. *Height. Height shall be measured from the centerline of the street or alley or walk adjacent to the front lot line measured from the projection of the midpoint of the lot frontage, except where more than one building is being constructed on that lot, height for each building shall be measured from the projection of the midpoint of each building*.

   As shown in “Exhibit A”, the height of the structure is measured from the centerline of Brooks Avenue and conforms to this standard of measurement. Therefore, the project complies with Section 9.B of the Specific Plan.

3. Roof Structures. Roof Access Structures shall not exceed the Flat Roof height limit by more than ten feet regardless of roof type.

   As discussed in Finding No. 1, pursuant to Los Angeles Municipal Code (LAMC) Section 12.22 A.25 (Density Bonus Affordable Housing Program), the project qualifies for a Waiver of Development standards to permit a Roof Access Structure with a maximum height of 11 feet 6 inches in lieu of 10 feet, as otherwise required pursuant to the Venice Coastal Zone Specific Plan Section 9.C. Therefore, the project complies with Section 9.B of the Specific Plan.

C. *Sections 10.F. Land Use and Development Regulations for North Venice Subarea*

1. *Density.* Projects in the North Venice Subarea on commercially zoned lots shall not exceed the density permitted in the R3 Zone. The R3 Zone permits a residential density of one dwelling unit per 800 square feet of lot area which permits a maximum of 23 dwelling units on the subject site. Pursuant to Los Angeles Municipal Code (LAMC) Section 12.22 A.25 and recent updates to State Density Bonus law (AB 2334), the project qualifies for the Density Bonus / Affordable Housing Program, where the Base Density is calculated by using the maximum number of units allowed under the zoning ordinance, specific plan, or general plan land use designation. The underlying C2 Zone allows for one dwelling unit per 400 square feet of lot area providing a maximum density of 47 dwelling units, where the proposed project provides 30 dwelling units.

2. *Height.* Projects with a Flat Roof shall not exceed a maximum height of 30 feet. Pursuant to LAMC Section 12.22 A.25(f)(5)(i), the project requests a Density Bonus off-menu incentive to permit a height of 44 feet 7 inches in lieu of 30 feet, as otherwise permitted by Venice Coastal Zone Specific Plan Section 10.F(3)(a). As discussed above, the project includes a Density Bonus Off-Menu Incentive to allow the maximum height of 44 feet 7 inches.

3. Setback. The front yard setback for residential Floor Area shall not be less than five feet. The proposed project provides a seven-foot step-back at the second and third residential floors and an 11-foot step-back at the fourth residential floor.

4. *Access*. Driveways and vehicular access to Venice Coastal Development Projects shall be provided from alleys, unless the Department of Transportation determines that it is not Feasible. As shown in "Exhibit A", the subject site does not adjoin an alley, and the proposed project maintains vehicle access from the existing curb-cut on Brooks Avenue.

D. Section 11 – Commercial Design Standards

1. *Ground Floor Commercial Development. Commercial Development. Pursuant to the Venice Coastal Specific Plan, all commercial Venice Coastal Development Projects which fronts on Ocean Front Walk shall include a street wall which extends a minimum of 65 percent of the length of the Building Frontage, is set back zero feet from the building line, with a minimum height of 13 feet. In addition, a minimum of 50 percent of the area of the Ground Floor Street Wall of a commercial Venice Coastal Development Project shall be devoted to pedestrian entrances or windows; and there shall be at least one pedestrian entrance into each business or use for each Store Frontage*. As proposed, two retail units and a restaurant will be located on the Ground Floor of the new mixed-use building, and the retail space will front on Brooks Avenue, observing no setback from the building line. The commercial portion of the Street Wall has a height of 13 feet as required. The Street Wall that the retail space will occupy approximately 68.45 percent of the lot width and approximately 51.9 percent of the street wall consists of windows into the retail space. A pedestrian walkway and entrance are provided for the restaurant from the corner of Brooks Avenue and Abbot Kinnery Boulevard. Therefore, the project complies with the ground floor commercial development provisions of the Plan.

2. Floor Area Ratio. As discussed in Finding No. 2, the project qualifies for an on-menu incentive, pursuant to LAMC Section 12.22 A.25 (Density Bonus Affordable Housing Program), for an FAR increase of 32.5 percent. The project proposes an FAR of 1.98:1 and a total area of 36,716 square feet.

3. Access. The project will maintain an existing driveway on Brooks Avenue. As such, new curb cuts will be minimized. Existing curb cuts will be maintained in order to protect and maximize public on-street parking opportunities.

4. *Landscaping*. The Project provides approximately 5,065 square feet of usable open space on the ground level, second level courtyard, and fourth level. The ground level features a 1,302 square-foot public plaza, the second floor provides a 439 square-foot courtyard, and the fourth floor provides 3,324 square- foot roof terrace. The project provides three new on-site trees and tree new street trees. In addition, all areas unused and open areas are landscaped.

5. *Light.* All lighting is downward facing and is directed away from existing residential structures. The project is not located near Environmentally Sensitive Habitat Areas.

6. *Trash*. A residential and commercial trash enclosure/room is located at the ground level and includes regular trash and recycling.

E. Section 13 – Parking

Pursuant to Section 13.D of the Specific Plan, multi-family dwellings on lots adjacent to alleys and with a lot width of 35 or more are required to provide 2 parking spaces plus 0.25 guest parking spaces per dwelling unit. The subject site is located 1,500 feet from a Major Transit Stop at Main Street and Windward Avenue. On September 22, 2022, the Governor signed Assembly Bill (AB) 2097, which added Government Code Section (§) 65863.2. AB 2097 prohibits a public agency from imposing or enforcing any minimum automobile parking requirements on any residential, commercial, or other development that is within one-half mile of a Major Transit Stop, with minor exceptions.

b. Complies with CEQA.

The proposed project was found to be within the scope of the 2021-2029 Housing Element Environmental Impact Report (EIR), SCH No. 2021010130, ENV-2020-672-EIR, certified on November 24, 2021 (Housing Element EIR) and Addendum No. ENV-2020-6762-EIR-ADD1 adopted on June 14, 2022 and the Addendum No. ENV-2020-6762-EIR-ADD2 was adopted on December 10, 2024 (Addenda). The proposed project, which includes the development of 420,327 housing units (cumulatively, 456,643), is within the scope of the 2021-2029 Housing Element as it will build out the City's regional housing needs assessment (RHNA). A CEQA Streamlining Checklist for a Project within the scope of the Housing Element Program EIR, ENV Case No. ENV-2024-2452-HES-PEIR (HE Streamlining Checklist), was prepared for the proposed project, pursuant to CEQA Guidelines Section 15168(c). Section 15168(c) provides for limited environmental review of subsequent projects under a Program EIR, where the project is found to be an activity within the scope of the program for which the EIR was prepared, and the impacts of the project are within the scope of the impacts analyzed in the EIR. Council found that the Housing Element EIR analyzed the impacts of the build-out of the RHNA, which involves the development of housing citywide. The HE Streamlining Checklist was prepared by staff to determine whether the impacts of the proposed project are within the scope of the Housing Element EIR. The prepared HE Streamlining Checklist supports that the impacts of the proposed project are within the scope of the Housing Element EIR and that no significant environmental effects not examined in the Program EIR will occur from the proposed project. All required mitigation measures from the Housing Element EIR Mitigation Monitoring Program (MMP) will be imposed on the proposed project. An MMP for the proposed project has been prepared for adoption by the decisionmaker.

Mello Act Compliance Review

4. **Mello Act Compliance Review.** Pursuant to the City of Los Angeles Interim Administrative Procedures for Complying with the Mello Act (IAP), all Conversions, Demolitions, and New Housing Developments must be identified in order to determine if any Affordable Residential Units are onsite and must be maintained, and if the project is subject to the Inclusionary Residential Units requirement. Accordingly, pursuant to the settlement agreement between the City of Los Angeles and the Venice Town Council, Inc., the Barton Hill Neighborhood Organization, and Carol Berman concerning implementation of the Mello Act in the Coastal

Zone Portions of the City of Los Angeles, the findings are as follows:

a. Demolitions and Conversions (Part 4.0)

The project consists of the development of 30 Residential Units on a lot developed with a commercial structure. No dwelling units exist onsite. No Affordable Existing Residential Units will be demolished or converted, as such, the project is not required to provide Affordable Replacement Units.

b. New Housing Developments (Part 5.0)

Part 5.0 of the IAP requires New Housing Developments of 10 or more Residential Units to provide Inclusionary Residential Units and provides two options:

- Option 1 requires 20 percent of all Residential Units, be reserved for occupancy by Very Low or Low-Income Households.

- Option 2 requires 10 percent of all Residential units, be reserved for occupancy by Very Low-Income Households.

The development consists of 30 new Residential Units. Under Option 1, the project would be required to set aside six (6) Residential Units for Very Low or Low-Income Households and under Option 2, the project would be required to set aside a total of three (3) Residential Units for Very Low-Income Households.

The project proposes the construction of 30 Residential Units, of which three (3) units will be set aside for Very Low-Income Occupancy. By restricting three (3) units, 10 percent of the total Residential Units and 5 percent of the Base Density, the project complies with the LAMC Section 12.22 A.25 (Affordable Housing Incentives - Density Bonus) and Option 2 of the Inclusionary Residential Unit Requirement, set forth in Part 5.0 of the Interim Mello Act Administrative Procedures.

5. **Class 2 Conditional Use Permit For Alcohol Establishments**

a. The project will enhance the built environment in the surrounding neighborhood or will perform a function or provide a service that is essential or beneficial to the community, city, or, region.

The Applicant proposes the construction of a new four-story, 36,716 square-foot mixed-use development providing 50 parking spaces within two (2) levels of subterranean parking. The proposal will develop an underutilized, 18,487 square foot site that was formerly automotive facilities and replace it with residential and neighborhood serving commercial uses. The proposed ground floor commercial will include a café and two retail commercial units. The 818 square foot cafe is seeking a Class 2 Conditional Use Permit (CUP) for the sale of a full line of alcohol with proposed hours of operation from 7 a.m. to 11 p.m., daily. The restaurant is designed to provide 286 square feet of service floor area and 532 square feet of back of house operations. The cafe will include 31 interior dining seats. All required parking would be provided on-site, within the proposed subterranean parking area.

The project site is located within a commercial zone developed with restaurants, entertainment uses, and a vibrant nightlife. The requested issuance of a Class 2 Conditional Use for the sale of alcoholic beverages for a small local café is a service essential for neighborhoods and will provide an amenity for residents in and around the

Project site. The sale of alcoholic beverages is incidental to food sales. It is generally accepted that the availability of alcoholic beverages has become a common component to the dining experience. Therefore, approval of the subject request is desirable to public convenience and welfare of the community.

A variety of commercial uses are necessary for the conservation, development, and success of a vibrant neighborhood. The proposed project would activate the sidewalk and provide transparency on the public plaza with glazing along the façade. The current use is an underutilized commercial space. As such, the development would enhance the built environment in the surrounding neighborhood. The proposed use in conjunction with the imposition of a number of conditions addressing operational and alcohol-related issues will ensure that the service of alcoholic beverages will not be disruptive to the community. The availability of a full line of alcoholic beverages for on-site consumption in conjunction with the restaurant will offer an amenity to the local residents and visitors to the Venice area.

b. The project's location, size, height, operations, and other significant features will be compatible with and will not adversely affect or further degrade adjacent properties, the surrounding neighborhood, or the public health, welfare and safety.

The Applicant proposes a 818 square foot restaurant at the ground floor of a new mixed-use development. Restaurant uses contribute to the overall success of the surrounding community and the local economy. Furthermore, restaurant uses are desirable to the public convenience and welfare as such uses are intended to serve nearby residents and workers. However, the sale of alcohol for on-site consumption is necessary for new restaurants to compete with other area restaurants for patrons who desire this service. As the project site is located within an active and vibrant commercial area, the ability to serve a full line of alcoholic beverages for on-site consumption will help to ensure the lasting financial success of the restaurant. The proposed size and location of the restaurant is consistent with other restaurant along Abbot Kinney Boulevard. The approval of the subject CUP request not adversely affect or further degrade adjacent properties, the surrounding neighborhood, or the public health, welfare, and safety.

In addition, at such a small scale, there will be no negative impacts on adjacent properties, the surrounding neighborhood, nor public health, welfare, and safety. Indeed, given the café's location within a mixed-use development, the café will be "self-regulating" in order to mitigate potential impacts to residents of the apartment units.

Conditions have been imposed to encourage responsible management and deter criminal activity. As conditioned, the continued operation of the restaurant with the sale of a full line of alcoholic beverages for on-site consumption will not adversely affect or further degrade adjacent properties, the surrounding neighborhood, or the public health, welfare and safety and the development of the community.

c. The project substantially conforms to the purpose, intent and provisions of the General Plan, the applicable community plan, and any specific plan.

the Citywide General Plan Framework Element, an element of the City of Los Angeles General Plan, and the General Plan System for the City of Los Angeles, which includes the Framework Element, a Land Use Element comprised of 35 community plans, twelve citywide elements which address various citywide topics, a Monitoring System, and an Annual Report on Growth and Infrastructure.

There are eleven elements of the General Plan including the Framework Element, a Land Use Element and twelve citywide elements which address various citywide topics. Each of these elements establishes policies that provide for the regulatory environment in managing the City and for addressing environmental concerns and problems. The majority of the policies derived from these Elements are in the form of Code requirements of Los Angeles Municipal Code (LAMC).

The project is consistent with the following policies of the Framework Element:

- *Policy 7.3.2 of the Framework Element addresses commercial uses, stating the need to "retain existing commercial activities within walking distance of residential areas."*

The Land Use Element of the City's General Plan divides the city into 35 Community Plans. The Venice Community Plan designates the property for General Commercial land uses with the corresponding zones of C1.5, C2, C4, CR, RAS3, and RAS4 and Height District No. 1. In addition, the Venice Community Plan outlines objectives regarding the importance of strengthening commercial development.

The Class 2 Conditional Use request is consistent with the intent of the Venice Community Plan, which aims to increase pedestrian activity and economic prosperity. The subject request meets the following goals and objectives:

- *Goal 2: A strong and competitive commercial sector, which promotes economic vitality, serves the needs of the community through well designed, safe and accessible areas while preserving the historic, commercial and cultural character of the community.*

- *Objective 2-1: To conserve and strengthen viable commercial development in the community and to provide additional opportunities for new commercial development and services within existing commercial areas.*

- *Objective 2-2: To enhance the identity of distinctive commercial districts and to identify pedestrian-oriented districts.*

- *Policy 2-2.1: Encourage pedestrian-oriented uses and mixed-use in designated areas.*

Approval of the subject request would further the goals of the Plan to promote the economic well-being of the community and enhance pedestrian activity in the area.

While the Framework Element and Venice Community Plan provide general policies that support commercial uses in existing commercial areas, the Venice Coastal Zone Specific Plan and Land Use plan outline additional development regulations regarding the intensity of commercial uses within the Venice Specific Plan area.

The Venice Local Coastal Land Use Plan ("LUP") was certified by the California Coastal Commission. The LUP designates the property as a Community Commercial area.

The project is consistent with the following policies of the Venice Land Use Plan:

- *Policy I.B.6. Community Commercial Land Use. The areas designated as Community Commercial on the Land Use Policy Map (Exhibits 9 through 12) will accommodate the development of community serving commercial uses and*

services, with a mix of residential dwelling units and visitor-serving uses. The Community Commercial designation is intended to provide focal points for local shopping, civic and social activities and for visitor-serving commercial uses. They differ from Neighborhood Commercial areas in their size and intensity of business and social activities. The existing community centers in Venice are most consistent with, and should be developed as, mixed-use centers that encourage the development of housing in concert with multi-use commercial uses. The integration and mixing of uses will increase opportunities for employees to live near jobs and residents to live near shopping. Overnight visitor-serving uses, such as hotels and youth hostels, are preferred uses in the Community Commercial land use category.

The Venice Community Plan, Venice Land Use Plan (LUP), and Venice Coastal Zone Specific Plan text are silent as to alcoholic beverage sales. The Los Angeles Municipal Code authorizes the Zoning Administrator to grant the subject request in the zones corresponding to the Plan's Land Use Designation of Community Commercial. The subject request is a permitted use by this land use category in the Venice Community Plan. Indeed, the LUP states that "Community Commercial uses shall accommodate neighborhood and visitor-serving commercial and personal service uses, emphasizing retail and restaurants".

Therefore, as conditioned, the proposed project will be consistent with the intent of the General Plan and Community Plan.

d. The proposed use will not adversely affect the welfare of the pertinent community.

The project site is adjacent to commercial uses with single- and multi-family residential uses further to the west and east. Westminster Elementary School is approximately 200 feet from the site.

The request for a CUP to allow on-site alcohol sales is compatible with the surrounding uses as the restaurant provides a place for business people, residents, guests and visitors to eat, drink, socialize, and do business. The sale of alcoholic beverages is an expected amenity that accompanies most restaurants and further enhances their economic viability.

The project is located within a commercial corridor developed with primarily restaurant and retail uses, proximate to the Venice Beach recreational area. A variety of commercial uses are an integral part of these service amenities necessary for the conservation, development, and success of a vibrant neighborhood. As conditioned, the sale of a full line of alcoholic beverages for off-site consumption will not adversely affect the welfare of the pertinent community. Negative impacts commonly associated with the sale of alcoholic beverages, such as criminal activity, public drunkenness, and loitering are mitigated by the imposition of conditions requiring deterrents against loitering and responsible management. Employees will undergo training on the sale of a full line of alcoholic beverages including training provided by the Los Angeles Police Department Standardized Training for Alcohol Retailers (STAR) Program. Other conditions related to excessive noise, litter and noise prevention will safeguard the residential community. Therefore, with the imposition of such conditions, the sale of a full line of alcoholic beverages for off-site consumption at this location will not adversely affect or further degrade adjacent properties, the surrounding neighborhood, or the public health, welfare and safety.

e. The granting of the application will not result in an undue concentration of premises for the sale or dispensing for consideration of alcoholic beverages, including beer and wine, in the area of the City involved, giving consideration to applicable State

laws and to the California Department of Alcoholic Beverage Control's guidelines for undue concentration; and also giving consideration to the number and proximity of these establishments within a one thousand foot radius of the site, the crime rate in the area (especially those crimes involving public drunkenness, the illegal sale or use of narcotics, drugs or alcohol, disturbing the peace and disorderly conduct), and whether revocation or nuisance proceedings have been initiated for any use in the area.

According to the ABC's licensing criteria, one (1) on-site and zero (0) off-site consumption licenses are allocated to the subject census tract (Census Tract 2734.04). Currently there are eight (8) on-site and one (1) off-site licenses in this Census Tract.

Concentration can be undue when the addition of a license will negatively impact a neighborhood. However, concentration is not undue when the approval of a license does not negatively impact an area, but rather provides a public service and benefits the community. Although the number of existing on-site licenses exceeds the number allocated to the subject census tract, a higher number of alcohol-serving establishments is to be expected in an area that has restaurants and stores along a commercial corridor and that functions as an economic hub and destination with a variety of specialty establishments and restaurants, such as in this case. In active mixed-use areas where there is a demand for licenses beyond the allocated number, the ABC has recognized that high-activity retail and commercial service centers are supported by a significant employee population, in addition to the resident population base in the area. This area also sees a lot of tourism. The ABC has discretion to approve an application if there is evidence that normal operations will not be contrary to public welfare and will not interfere with the quiet enjoyment of property by residents.

The addition of the on-sale alcohol license will add to the number allocated and authorized for the census tract by ABC. However, the addition of the sales and the dispensing of a full line of alcoholic beverages with the conditions imposed will serve a public convenience. It will allow the cafe to offer an expected component of dining and contribute to the commercial vibrancy of the surrounding area. Located adjacent to numerous retail shops and dining establishments, alcohol service will contribute to the economic welfare of the community through the collection of tax revenue and increased employment opportunities.

According to statistics provided by the Los Angeles Police Department's Pacific Division Vice Unit, within Crime Reporting District No. 1412, which has jurisdiction over the subject property, a total of 609 crimes were reported in 2023 (243 Part I, Crimes and 366 Part II, Arrests), compared to the Citywide Average of 162 crimes and compared to the High Crimes average of 194 crimes for the same reporting period. Part II Arrests reported include Narcotics (21), Liquor Laws (69), Public Drunkenness (19), Disturbing the Peace (0), Disorderly Conduct (12), Gambling (0), DUI related (4), Moving Traffic Violations (2), Miscellaneous Other Violations (49).

No evidence was submitted for the record establishing any link between the subject site and the area's crime rate. The grant incorporates operational conditions that will ensure that the proposed use is conducted with due regard for surrounding properties and will reduce any potential crime or nuisance activity. As a result, the instant grant allowing the sale of a full line of alcoholic beverages for on-site consumption at the subject location will benefit the public welfare and will not result in an undue concentration of licenses after giving consideration to the State's guidelines and to the crime rates in the area.

f. The proposed use will not detrimentally affect nearby residentially zoned communities in the area of the City involved, after giving consideration to the distance of the proposed use from residential buildings, churches, schools, hospitals, public playgrounds and other similar uses, and other establishments dispensing, for sale or other consideration, alcoholic beverages, including beer and wine.

While the project site is within proximity to nearby sensitive uses, the location of the site does not directly adjoin these sensitive uses and service of alcoholic beverages is anticipated to be ancillary to the sale of food at the restaurant. The project site is located within a developed commercial area and will not detrimentally affect the neighboring commercial uses. To the west and west of the project site the properties are zoned RD1.5- and are developed with single- and multi-family residential uses. These residential areas are, however, buffered from the project site by commercial zones and uses.

The project site is zoned for commercial uses and will continue to be utilized as such with the existing restaurant use. The following sensitive uses are located within a 1,000-foot radius of the site:

- Westminster Avenue Elementary School, 1010 Abbot Kinney Boulevard
- Westminster Off-Leash Dog Park and Recreation Center, 1234 Pacific Avenue
- Westminster Ave Children's Center, 1010 Main Street
- New Bethel Baptist Church, 503 Brooks Avenue
- Second Community Baptist Church, 1041 Abbot Kinney Boulevard
- Christian Science Church, 132 Brooks Avenue
- Ecole Claire Fontaine, Trilingual School, 352 Westminster Avenue

Consideration has been given to the distance of the subject establishment from the above-referenced sensitive uses. The grant has been well conditioned, which should protect the health, safety and welfare of the surrounding neighbors. The potential effects of excessive noise or disruptive behavior have been considered and addressed by imposing conditions related to noise and loitering. The project is consistent with the zoning and in keeping with the existing uses adjacent to the development. This project will contribute to a neighborhood and will serve the neighboring residents and the local employees as well as visitors. Therefore, as conditioned, the project will not detrimentally affect residentially zoned properties or any other sensitive uses in the area.

ADDITIONAL MANDATORY FINDING

6. **CEQA Finding.** The proposed project was found to be within the scope of the 2021-2029 Housing Element Environmental Impact Report (EIR), SCH No. 2021010130, ENV-2020-672-EIR, certified on November 24, 2021 (Housing Element EIR) and Addendum No. ENV-2020-6762-EIR-ADD1 adopted on June 14, 2022 and the Addendum No. ENV-2020-6762-EIR-ADD2 was adopted on December 10, 2024 (Addenda). The proposed project, the demolition of five, one-story, commercial buildings and the construction of a new four-story, 36,716 square-foot mixed-use development consisting of 30 dwelling units (including 3 units restricted to Very Low-Income Households), 2,598 square feet of retail use, an 818 square-foot restaurant with 286 square feet of Service Floor Area and 31 seats, requesting on-site sale and consumption of a full line of alcoholic beverages, and two (2) levels of subterranean parking, is within the scope of the 2021-2029 Housing Element as it will build out the City's regional housing needs assessment (RHNA). A CEQA Streamlining Checklist for a Project within the Scope of the Housing Element Program EIR, ENV Case No. ENV-2024-2452-HES-PEIR (HE Streamlining Checklist), was prepared for the proposed project, pursuant to CEQA Guidelines Section 15168(c). Section 15168(c) provides for limited environmental review of

subsequent projects under a Program EIR, where the project is found to be an activity within the scope of the program for which the EIR was prepared, and the impacts of the project are within the scope of the impacts analyzed in the EIR. Council found that the Housing Element EIR analyzed the impacts of the build-out of the RHNA, which involves the development of housing citywide. The HE Streamlining Checklist was prepared by staff to determine whether the impacts of the proposed project are within the scope of the Housing Element EIR. The prepared HE Streamlining Checklist supports that the impacts of the proposed project are within the scope of the Housing Element EIR and that no significant environmental effects not examined in the Program EIR will occur from the proposed project. All required mitigation measures from the Housing Element EIR Mitigation Monitoring Program (MMP) will be imposed on the proposed project. An MMP for the proposed project has been prepared for adoption by the decisionmaker.

.

7. **Flood Insurance.** The National Flood Insurance Program rate maps, which are a part of the Flood Hazard Management Specific Plan adopted by the City Council by Ordinance No. 172,081, have been reviewed and it has been determined that this project is located in Zone X, outside the flood zone.

PUBLIC HEARING AND COMMUNICATIONS

A public hearing was held virtually via Zoom on July 7, 2025 at 1:00 PM. The hearing was conducted by a Hearing Officer, Ira Brown, on behalf of the City Planning Commission in taking testimony for Case No. CPC-2024-2450-DB-CDP-SPPC-CUB-VHCA-MEL and ENV-2024-2452-HES-PEIR. All interested parties were invited to attend the public hearing at which they could listen, ask questions, or present testimony regarding the project. The purpose of the hearing was to obtain testimony from affected and/or interested parties regarding this application. Interested parties are also invited to submit written comments regarding the request prior to the hearing. The public hearing was attended by the applicant's representatives and three members of the public.

Applicant Team Presentation:

- Susan Steinberg – Applicant's representative provided a brief project description.

Public Comment:

Max Friedman
- An owner in an adjacent condo development
- Expressed "some concern with the density that is proposed to be programmed with an FAR boost and height variance along the property line bordering the condo building." He highlighted that his condo building is an "interior lot and the only light and air that we have faces directly over this parcel and property line." He finds a "four-story structure built up right on the property line, adjacent to us is a little concerning."

Jim Murez
- A neighbor less than 50 feet away
- Expressed concern about "the height of the project." He noted that the project is "two stories above the height limit in the abutting neighborhood of Oakwood" and "another full story above the abutting condominiums and abutting hotel currently under construction."
- Expressed concern that the "rooftop deck, where the hours have not been restricted." and he fears "a lot of impact on all of the neighbors" He advocated for "some sort of restricted hours to the rooftop just so it can be enforced above what LA Municipal Code normally has, which is 10 o'clock at night."
- Expressed concern about the removal of the eucalyptus tree.

Thomas B.
- A property owner living approximately 100 feet from the project
- Indicated that the project is "in violation of the spirits and application of the Coastal Commission mandate, primarily because of a totally inadequate parking." He details the discrepancy: "You've got 36 apartments, 2,600 square feet of retail, and restaurant, but only 50 parking spaces." He calculates, "if each one of the apartments takes up one space. We now have four parking spaces for retail use, commercial use, and any other use of this project." He further posits that high-rent apartments ($5,000 to $8,000 per month) would likely house "two cars," exacerbating the problem.
- Indicated that the lack of adequate parking violates the "Coastal Commission mandate, which states, Coastal Commission Act prioritizes public access to coastal resources." He predicts that "any overflow parking from the lack of parking stations provided by the commercial projects will be taken up on our street," further restricting "street parking because any overflow parking from the lack of parking stations provided by the commercial projects will be taken up on our street." He notes, "There's already a dearth of parking in this area for residents. Obviously, during summer and beach days, it is further restricted."

Applicant Team Response

Susan Steinberg

- One existing Eucalyptus tree will remain on the subject site. it's noted on the landscape drawings. Three additional street trees will be added as part of the project.
- The plaza area will be an "open area" and is designated as a "private space," not a public one. There are no plans for tables or chairs in the plaza.
- The building incorporates "generous setbacks" from the adjacent condominium units.
- The side yard setback is seven feet, with an additional 16-foot setback from the rooftop, resulting in "more than 20 feet" total in some areas. The setback to the roof deck specifically is 16 feet from the side, not in addition to the seven-foot side yard setback. This "very generous setback" means the building "is not built to the property line."

Lainie Herrera

- Noise from the pool area is expected to be "fairly modest." Studies reviewed indicate that passive uses of a general adult pool area are modest. The area already has a "fairly loud ambient noise," and the project's noise is not expected to exceed this.
- Noise after 10 p.m. will be regulated by the municipal code. The primary factor in maintaining quietness is anticipated to be "self-policing" by the residents. With 30 units, including family units, the expectation is "not going to be a loud party scene."
- A noise analysis was conducted as part of the housing element EIR, which previously considered roof decks for multi-family properties. Those examples involved much larger projects (e.g., 950 dwelling units) where significant impacts might occur. This project is "nothing near that size."
- AB 1307, effective early 2024, states that "for residential projects, the effects of noise generated by project occupants, and their guests as normal human activity is not a significant impact on the environment." This provides a "CEQA perspective on potential noise impacts."

Jared Johnson

- Significant bike parking will be provided. Parking is not the sole metric for assessing coastal access.
- The ability to "live affordably in the coastal zone has been a prohibitive barrier to coastal access for a long time," often due to "onerous parking requirements." The project, by creating "30 new dwelling units, including three affordable units, greatly enhances coastal access for more people to be able to live at the coast."

PROJECT SUMMARY

PROJECT NAME: HAMPTON COURT

ADDRESS: 825 HAMPTON DRIVE

OWNER: SJF VENICE, LLC

PROJECT DESCRIPTION: CONSTRUCTION OF A NEW 4-STORY MIXED USE, 36,716 SQ FT BUILDING INCLUDING 30 APARTMENT UNITS, AND 3,416 SQ FT OF RETAIL; AND AN ATTACHED 2-LEVEL SUBTERRANEAN PARKING STRUCTURE WITH 58 PARKING SPACES

CONSTRUCTION TYPE: TYPE V-A (4 STORIES RESIDENTIAL BULDING)
TYPE 1-A (FIRST FLOOR COMMERCIAL)
TYPE 1-A (2 LEVELS SUBTERRANEAN PARKING)

FLOOD ZONE: OUTSIDE FLOOD ZONE

SITE AREA: 18,487 SF (PER SURVEY)

PROJECT DENSITY: 30 UNITS

ALLOWABLE BLDG HEIGHT: 30 FT (VSP - SECTION 10. F. 3. A.)

PROPOSED BLDG HEIGHT: 44'-7" PROPOSED

OCCUPANCY TYPE: COMMERCIAL (10%)
RESIDENTIAL (90%)

LOT AREA: 18,487 SF

BLDG FOOTPRINT: 13,070 SF
HARDSCAPE: 3,322 SF
LANDSCAPE: 2,095

GENERAL PLAN LAND USE DESIGNATION: COMMUNITY COMMERCIAL

COUNCIL DISTRICT: CD 11

COMMUNITY PLAN: VENICE

SPECIFIC PLAN: VENICE COASTAL ZONE LOS ANGELES COASTAL TRANSPORTATION CORRIDOR

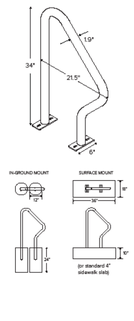
Dero | Swerve Rack — Submittal Sheet



CAPACITY	2 Bikes
MATERIALS	1.9" OD schedule 40 pipe
FINISHES	☐ **Galvanized** An after-fabrication hot dipped galvanized finish is our standard option.
	☐ **Powder Coat** Our powder coat finish assures a high level of adhesion and durability by following these steps: 1. Sandblast 2. Epoxy primer electrostatically applied 3. Final thick TGIC polyester powder coat
	☐ **Stainless** Stainless Steel: 304-grade stainless steel material finished in either a high polished shine or a satin finish.
MOUNT OPTIONS	☐ **Surface** Foot Mount has two 2.5" x 6" x .25" feet with two anchors per foot. Specify foot mount for this option. Tamper-resistant fasteners available upon request.
	☐ **In-Ground** In-ground mount is embedded into concrete base. Specify in-ground mount for this option
	☐ **Rail** Rail Mounted Downtown Racks are bolted to two parallel rails which can be left freestanding or anchored to the ground. Rails are heavy duty 3" x 14" x 3/16" thick galvanized mounting rails. Specify rail mount for this option.

North Venice Subarea

Zoning: C2-1

Land Use: Community Commercial

Rendering of Project at right as seen in context with the surrounding neighborhood.

Project Background

The proposed Project consists of the demolition of all existing, vacant commercial structures and the construction of a new 4-story, 44 ft. 7 in. tall (to top of the roof deck railing), 36,716 sq. ft., mixed-use building comprised of 36 dwelling units (including 4 units restricted to Very Low-Income Households) and approximately 3,416 sq. ft. of ground floor commercial uses. The Project will include 60 parking spaces located within three (3) subterranean parking levels. The Project is located within the Single Permit Jurisdiction area of the California Coastal Zone. As such, the Project is seeking approval of a Coastal Development Permit (CDP), among other entitlements.

In order to facilitate review of the requested CDP, the following Scale, Mass, Character and Visual Impact Analysis has been prepared in order to demonstrate the Project's compliance with Chapter 3 of the Coastal Act. Namely, this report shows, with evidence, that the Project's scale,

mass, and character fit within the pattern of development for the area, known as the North Venice subarea within the Venice Coastal Zone Specific Plan, and that the Project will not have a negative visual impact on the community, nor protected public views.

Density Bonus Policy Considerations

Please note that the proposed Project utilizes the California Density Bonus law and is therefore entitled to incentives, concessions, and/or waivers in order to increase development rights (such as height, FAR, and density) in exchange for the provision of deed restricted affordable units. Currently, the Density Bonus law does not supersede the Coastal Act, nor does the Coastal Act supersede the Density Bonus law. Nonetheless, Density Bonus projects have been notoriously difficult to develop in the Coastal Zone due to abusive use of Coastal Act requirements by decision makers and project opponents (commonly known as "NIMBYs"), mainly by arguing that such projects are out of scale with the surrounding neighborhood, and therefore in violation of Chapter 3 of the Coastal Act.

There is also a clear social justice issue, as the Coastal Zone areas of California are overwhelmingly white and wealthy, and the Coastal Act has further entrenched this inequitable pattern of development. For example, Venice was traditionally a high-density neighborhood for much of its history. However, in the late 1980s and early 1990s, much of Venice was downzoned. This was reflective of the popular policy of "slow growth" encouraged at that time. Although certified by the Coastal Commission in 2001, the Venice Land Use Plan (LUP) reflects this downzoning. The Venice LUP does not reflect the actual pattern of development in Venice. The misguided downzoning has been a significant barrier to the creation of much need housing in Venice. This historical context is important when considering Coastal Act compliance for Venice housing projects that exceed the currently permitted density and related development standards reflect in the LUP.

In 2023, partly to combat this abusive misapplication of the Coastal Act during an ongoing housing crisis, Gov. Newsom signed SB 423 into law. SB 423 extended SB 35's expedited, administrative review provisions to Density Bonus projects within the Coastal Zone that meet certain location qualifications and affordability requirements. SB 423 will come into effect on Jan. 1, 2025, and the subject property will qualify for this streamlined, administrative review process. As such, it is clear that the State legislature has recognized the need to create a non-discretionary, expedited pathway to increased housing development in the Coastal Zone. It is important for decision makers to consider this policy change when reviewing current projects.

Methodology

In order to assess the pattern of development within the surrounding context, a survey of all properties along Hampton Dr., Brooks Ave., Main St. and Abbot Kinney Blvd. within North Venice was conducted. This survey gathered data regarding height, floor area, floor area ratio (FAR), front setback, and residential density. This survey captured 20 existing and/or under construction developments within this area.

All information collected was gathered using publicly availably sources, including NavigateLA, ZIMAS, and the Los Angeles Department of Building and Safety (LADBS) public records website. These sources have been chosen as they are available to the public and their data is easily verifiable.

Additionally, in order to help demonstrate the Project's visual impact on both the surrounding streetscape, renderings of the Project have been included with this report. The full rendering package has been included as **Exhibit 1**.

An aerial photo of the study area is provided below:

Visual Impact Analysis study area outlined in red. Project site outlined in blue.
Source: Google Maps

Surrounding Context

The image on the following page shows the Project site, as it currently exists, and the surrounding neighborhood context. The Project site is visible at the center of the image, including the existing structures to be demolished. The surrounding area is fully built out with a variety of commercial, residential, and mixed-use developments. Please note that the building to the left of the Project site has since been demolished and will be replaced with a 30 ft. tall, 43,048 sq. ft. mixed used development composed of an extended stay hotel, various commercial uses, and one (1) dwelling unit.

Project site visible at center.

The area does not have a unified architectural design aesthetic. Indeed, the area has a unique mixture of architectural design and material choices that contribute to the eclectic character of the North Venice subarea, with modern structures interspersed with Spanish, mid-century, and other types of building designs. The proposed Project will incorporate modern features with clean lines that allow for visual permeability and interest. The Project features a seven (7) ft. stepback at the second and third floors and an 11 ft. stepback at the fourth floor to help further break up and soften its massing.

Additional images of the multi-story structures located along Hampton Dr., Main St., Brooks Ave., and Abbot Kinney Blvd. are provided below:

Nearby property on opposite side of Hampton Drive. Address: 800-812 Hampton Dr.

Property on opposite side of Brooks Ave. from Project site. Address: 901 Abbot Kinney Blvd.

Condominium development at rear of Project site. Address: 700 Main St/815 Hampton Dr.

With regard to the scale and character of the neighborhood, the following table shows the average height, number of stories, FAR, and residential density for the subject study area. A copy of the data collected for this analysis has been provided as **Exhibit 2**. The proposed Project's information is also provided.

Table of Compatibility Data

	Area Average	*Project*
Height (ft.)	28.5	44.6
FAR	0.86	1.97
Front Setback (ft.)	2.8	0
Density	4.2	36

Proposed Project in Context

While the proposed Project, when compared in a vacuum to the raw data presented above, does exceed the averages for the study, it is important to also consider the Project in its specific context. The following rendering shows the Project within the broader area. To the rear of the site is a 3-story (and up to 56 ft. in height), 56-unit condominium. This rendering also includes a massing diagram reflective of the above referenced 43,048 sq. ft. hotel project currently under construction next door to the subject property.

Project rendering visible at center with massing of neighboring project currently under construction shown at left.

Please note that the underlying C2-1 zone normally would allow for unlimited height, however the Venice Coastal Zone Specific Plan limits for 35 ft. of height as measured from the centerline of the frontage street for projects with a varied roofline, or 30 ft. for projects with flat roofs. The proposed Project is requesting an off-menu incentive to allow for 43 ft. 6 in. in lieu of the 30 ft. flat-roof height limit in exchange for the provision of four (4) Very Low-Income units (11% of the total Project density). The increased height over the underlying 30 ft. height limit is necessary in order to physically accommodate the bonus density the Project is entitled to, as well as to allow for the Project to be financially feasible.

As is visible in the rendering, the project fits well within the surrounding context. While taller than the average for the study area, the Project has no impacts on any protected public views. While the Project does exceed the average compatibility data points assessed within the study area, these numbers do not tell the full story, as several of the structures closest to the subject site are the largest developments in the area.

The following table shows the compatibility data points for the surrounding buildings:

	Proposed Project	*806-812 Main St.*	*800-812 Hampton Dr.*	*700 Main St/815 Hampton Dr.*	*901 Abbot Kinney Blvd.*
Height (ft.)	44.6	35	30	56	25.7
Floor Area (sq. ft.)	36,716	43,048	25,964	54,813	12,871
Front Setback (ft.)	0	0	0	5	0
Density	36	15 (hotel)	15	35	0

The map below shows the location of the above-referenced developments and their proximity to the subject property:

As such, it is reasonable to conclude that the scale, mass, and character of the proposed Project is appropriate for the neighborhood. The Project will not result in any detrimental impacts on surrounding properties as this intersection of Hampton Dr., Abbot Kinney Blvd., and Main St. is already developed with several large-scale developments.

Additionally, the Project site is unique in both its triangular shape and because the Brooks Ave. frontage takes up an entire block. The Project would have no neighbors when seen from Brooks Avenue frontage. Indeed, the property has only two (2) direct neighbors, 815 Hampton Dr. and 806 Main St., both featuring very large developments (806 Main St. is currently under

construction). However, these projects front onto their respective streets – not onto Brooks Avenue. This unique location means that no neighboring structures will be negatively impacted by the proposed development.

Indeed, given the narrow, triangular shape of the lot, much of the rear area is impractical for development. This has resulted in a 22 ft. 9 in. rear setback at the ground level, which increases to 34 ft. 1 in. at the fourth floor, and up to 43 ft. 1 in. on the roof terrace. These generous rear setbacks minimize the impacts of the proposed Project at the most sensitive portion of the property – i.e., the point where the three properties (825 Hampton Dr., 815 Hampton Dr., and 806 Main St.) meet. However, this also means that the Project must offset this loss of developable area by increasing its height – a circumstance unique to this location.

The following rendering shows the Project as seen from the Abbot Kinney Blvd. perspective:

Proposed Project rendering, in context, as seen from Abbot Kinney Boulevard.

As visible in the rendering, the Project is highly articulated and thoughtfully designed to reflect the surrounding neighborhood context. While the ground level is not set back, the second and third floors feature a 7 ft. stepback, which increases to 11 ft. on the fourth floor. This design enhances the pedestrian experience by softening the impacts of the street wall along the adjacent sidewalk. The Project's tiered design creates visual interest and buffers the scale and mass of the project, while also enhancing the project compatibility with the character of the area. Many structures nearby feature similar stepbacks – indeed the Venice Specific Plan requires them in many circumstances.

Conclusion

Overall, the Project complies with the Coastal Act's requirements for scale, mass, and character compatibility and has no negative visual impacts. The Project **is** compatible with the existing pattern of development. Specifically, the Project:

- Is comparable to several structures within close proximity to the project site, including 812 Main St., 800 Hampton Dr., 815 Hampton Dr., and 901 Abbot Kinney Blvd.;
- Features high quality design and enhanced articulation and visual interest through the use of stepbacks, which also mitigate scale and mass impacts for pedestrians;
- Results in no negative impacts on protected public views of coastal resources; and
- Enhances the visual quality of the built environment within the surrounding neighborhood.

For these reasons, the Project has demonstrated compliance with Section 30251's requirements to "be visually compatible with the character of surrounding areas." Indeed, the project takes a visually unattractive and underutilized lot and replaces it with a modern, high-quality Project. Therefore, the Project also achieves another stated policy of Section 30251, namely "to restore and enhance visual quality in visually degraded areas." The existing conditions have a negative impact on the surrounding neighborhood and the proposed Project will greatly "enhance visual quality" for residents, visitors, and workers in the area.

Exhibit D: Parking Analysis

D.1 – Parking Demand and Access Study

MEMORANDUM

600 S. Lake Avenue
Suite 500
Pasadena, CA 91106
626.796.2322 T
www.llgengineers.com

Pasadena
Irvine
San Diego

To:	City of Los Angeles	Date:	May 9, 2025
From:	David S. Shender, P.E. Jason A. Shender, AICP Linscott, Law & Greenspan, Engineers	LLG Ref:	1-23-4579-1
Subject:	**Parking Demand and Access Study for the Proposed Hampton Court Mixed-Use Project at 825 Hampton Drive**		

This Parking Demand and Access Study has been prepared by Linscott, Law & Greenspan, Engineers ("LLG") to provide a comprehensive vehicle parking study related to the proposed Hampton Court mixed-use project ("Project") at 825 Hampton Drive ("Project Site") located in the Venice area of the City of Los Angeles. The development program for the Project is as follows:

Market Rate Units
- Studio units: 4
- One-bedroom units: 13
- Two-bedroom units: 10

27 units

Affordable Units
- Studio units: 1
- One-bedroom units: 1
- Two-bedroom units: 1

3 units

Commercial
- Retail: 2,598 s.f.
- Café: 818 s.f., of which 286 s.f. is service area

The Project includes 50 vehicle parking spaces in a two-level subterranean garage. In addition, 64 bicycle parking spaces will be provided on-site, consisting of a mix of short-term and long-term spaces for both the residential and commercial components.

The Project is located within the boundaries of the City's Venice Coastal Zone Specific Plan[1] ("Specific Plan") and the Venice Local Coastal Program Land Use Plan[2] ("LUP"). The Specific Plan, among other purposes, implements the Local Coastal Program ("LCP") for the affected portion of the Venice area located within the Coastal Zone as designated by the State. Included within both the Specific Plan and the LUP are vehicle parking rates applicable to development projects located within the Coastal Zone. It is noted that there

[1] *Venice Coastal Zone Specific Plan, Ordinance No. 175,693*, City of Los Angeles, Effective January 19, 2004. Note, this Plan has not been certified by the California Coastal Commission.
[2] *Venice Coastal Zone Local Coastal Program Land Use Plan*, City of Los Angeles. Certified by the California Coastal Commission on June 14, 2001.

is no certified Local Coastal Program ("LCP") for the Venice area, only the certified LUP. A full LCP would include both the LUP and a certified Local Implementation Plan ("LIP"). As such, the standard of review for Coastal Development within the Venice area is compliance with Chapter 3 of the Coastal Act.

In addition, the Project complies with the State Density Bonus Law as enacted by the City of Los Angeles[3] and with the City's Mello Act implementation guidelines[4] with 10% of the housing units allocated for very low-income households.

The Project Site is located within one-half mile of the Main Street / Windward Avenue intersection, a Major Transit Stop ("MTS"). Accordingly, per Assembly Bill 2097 ("AB 2097"), public agencies, including the Coastal Commission and the City of Los Angeles, are prohibited from imposing or enforcing minimum parking requirements on the Project. While the Coastal Commission cannot impose minimum parking requirements on the Project, the Project's effect on coastal access needs to be analyzed, including through alternative transportation strategies such as investing in public transit, bicycle infrastructure, etc. This Parking Demand and Access study analyzes the Project's proposed parking supply in comparison to the requirements set forth in the LUP, LCP, the State Density Bonus Law, and by the City as if parking were to be required, coupled with alternative transportation strategies to reduce the on-site parking demand.

The Project is located in the Coastal Zone, and in considering the appropriate amount of on-site parking for the Project, LLG has considered the applicable requirements included the Specific Plan, the LUP, the LAMC and the Coastal Act. Thus, this parking study has been prepared to assess the adequacy of the parking rates as proposed by the Project given the various applicable regulations. Details of the parking analysis prepared for the Project are provided in the following sections.

The goal is for the Project's proposed parking supply to be appropriately sized to provide adequate parking for on-site uses, while taking into account the need for Coastal access pursuant to the Coastal Act, and therefore not adversely affecting existing on-street and off-street parking in the local area.

This study concludes that the parking supply proposed within the Project will fully satisfy its peak parking demands, will provide new residents with coastal access, and will not adversely impact coastal access because sufficient parking will be provided on-site. Indeed, given the location of this Project (i.e., adjacent to public transit and established bicycle lanes, within a walkable community, three blocks away from the beach, nearby commercial uses on Main Street and Abbot Kinney Boulevard, etc.), the likelihood is that a significant number of residents will not require a personal vehicle to be parked at the site.

[3] City of Los Angeles Ordinance No. 179,681, effective April 15, 2008.
[4] City of Los Angeles, *Interim Administrative Procedures*, 2000.

Parking Calculation

As previously noted, the Project is located within the Venice Coastal Zone Specific Plan and the LUP. In addition, parking rates provided within the Municipal Code would also apply to the Project as it relates to the residential component based on the Density Bonus program. ***Table 1*** below provides a review and comparison of the Project's parking requirements based on the Specific Plan and LUP parking rates, as well as the Project's recommended parking calculation utilizing the State Density Bonus Law.

Table 1
Project Parking Calculation

Use	Size	Required Parking Per Specific Plan and LUP		Required Parking Using Density Bonus Parking Rates for Residential Units		Parking Spaces Provided
		Parking Rate	No. of Spaces	Parking Rate	No. of Spaces	
Residential						
Studio	5 units	2 sp./unit	10	**1 sp./unit**	**5**	
1-bedroom	14 units	2 sp./unit	28	**1 sp./unit**	**14**	
2-bedroom	11 units	2 sp./unit	22	**1.5 sp./unit**	**16.5**	
	30 units		60		36	
Guest Parking	30 units	0.25 sp./unit	7.5	**0 sp./unit**	**0**	35
Beach Impact Zone	6,642 sf*	1 sp./1,000 sf of ground floor space	6.6	**0 sp./1,000 sf****	0	
Subtotal			75		36	
Commercial						
Retail	2,598 sf	1 sp./225 sf	11.5	1 sp./225 sf	11.5	
Café	286 sf***	1 sp./50 sf of service floor area	5.7	1 sp./50 sf	5.7	
			18		18	15
Beach Impact Zone	3,416 sf*	1 sp./640 sf	5.3	1 sp./640 sf	5.3	
Subtotal			23		23	
Bike Parking Reduction for Commercial****			(4)		(4)	
Total			94		55	50

Bolded values represent variations from the Specific Plan per the Density Bonus program.
*Per the Specific Plan, one (1) parking space is required for every 1,000 sf of first floor residential floor area and for every 640 sf of first floor commercial floor area.
** Beach Impact Zone parking is not required by the State Density Bonus Law.
***The service area for the café is 286 sf of the total 818 sf of floor area.
**** Bicycle parking spaces provided at the Project will replace 4 required commercial vehicle parking spaces.

As shown in *Table 1* above, the Project will provide parking (50 parking spaces), which represents a minor deviation from the Specific Plan and the LUP, and use of the mandatory State Density Bonus Law for parking rates for residential units. Utilization of the parking rates in only the Specific Plan or LUP for residential units would result in the need for 94 parking spaces for the Project.

As also shown in *Table 1*, for the residential component, the Project's 35 on-site parking spaces for the residential component would be one (1) fewer parking space than what would be required by the State Density Bonus Law[5] (36 spaces). As the State Density Bonus Law does not require "Beach Impact Zone" parking, this has been excluded from the parking calculation provided in *Table 1* for the Project's residential component. For the non-residential component of the Project a total of 15 on-site parking spaces are proposed. When compared with the parking rates provided per Section 13 of the Specific Plan and the Parking Requirement Table of the LUP, which includes required parking related to the Project's commercial uses (with four vehicular parking spaces replaced by bicycle parking spaces), but excluding the "Beach Impact Zone" provision of the Specific Plan, the Project will be providing four (4) fewer spaces (19 parking spaces required vs. 15 parking spaces provided).

The primary differences between the Specific Plan and LUP parking requirements and the Municipal Code's Density Bonus program parking rates as reflected in *Table 1* are:

- The Specific Plan and LUP require two parking spaces per unit for studio, one-bedroom and two-bedroom units while the State Density Bonus Law requires one parking space per unit for studio and one-bedroom units and 1.5 parking spaces per two-bedroom units; and

- The Specific Plan and LUP require the provision for residential guest parking spaces while neither the State Density Bonus Law nor the Municipal Code require separate parking spaces on-site for residential guests.

LLG understands that the Project must also comply not only with the Specific Plan and the Municipal Code, but also with the LUP and the Coastal Act. Thus, the Project may be subject to review by the California Coastal Commission, which independently evaluates the sufficiency of parking in proposed development projects in the Coastal Zone, particularly related to coastal access. Thus, additional information has been provided herein regarding the adequacy of the parking supply to be provided at the Project to demonstrate that the Project would comply with the LUP and Coastal Act.

[5] Govt. Code § 65915(p)(1).

California Coastal Commission

While on-site vehicular parking is not required per AB 2097, LLG understands the California Coastal Commission would look to the LUP for guidance on the vehicle parking rates for purposes of determining an appropriate on-site parking supply for the Project. As noted above, the Project proposes to provide a vehicle parking supply that is slightly less than the parking supply required based on the rates listed in the Specific Plan and LUP as it relates to the commercial component of the development, including a reduction of four vehicle parking spaces in exchange for bicycle parking spaces is requested. In addition, the Project will provide the "Beach Impact Zone" parking spaces required by the Specific Plan (12 total, or approximately 24% of the 50 total parking spaces to be provided on-site). The Project proposes to comply, however, with the parking rates provided in the Municipal Code for the studio and one-bedroom units provided at the development. In addition, no on-site reserved parking spaces are proposed for residential guests, which is compliant with the State Density Bonus Law and the Municipal Code.

As noted in *Table 1*, the Specific Plan and LUP would require 94 parking spaces for the Project, as compared to 55 parking spaces required with use of the State Density Bonus Law.
In reviewing various projects in the Coastal Zone, Coastal Commission Staff Reports have supported approval of projects that supply less parking than would otherwise have been required, relying upon parking demand and access studies to approve deviations from the parking standards contained in documents such as the Specific Plan and the LUP.

Residential

For the Project's residential component, the Specific Plan and LUP require two parking spaces for all market-rate residential units, regardless of size, and requires one guest parking space per four dwelling units. Policy I.A.14 of the LUP allows parking requirements for affordable housing to be reduced when they are otherwise consistent with the Density Bonus policy of the LUP and there is sufficient evidence that the demand for affordable units would be reduced. The State Density Bonus Law allows one parking space for studio and one-bedroom units and 1.5 parking spaces per two-bedroom units, and no guest parking. As explained further below, the Specific Plan's and LUP's parking rate for residential units in the Venice area (e.g., an aggregate requirement of 2.25 parking spaces per unit when the required parking for residents and guests are combined) is well in excess of the documented parking demand for such unit types in Venice's urban/mixed-use, transit adjacent and pedestrian oriented areas. Moreover, the Specific Plan and LUP parking rate for residential is significantly higher than the parking requirements for these unit types in other coastal zones with parking standards more recently approved by the Coastal Commission.

With respect to the affordable units, there is ample evidence that these units have a lower demand for parking. Based on peak parking demand rates provided in the Institute of Transportation Engineers' ("ITE") *Parking Generation Manual*[6], parking demand for affordable units is approximately 18% less than demand for parking demand for market rate units. Further, recent Coastal Commission decisions have also permitted zero and significantly reduced parking spaces for affordable housing units (See, e.g. CDP 5-19-0996, A-5-VEN-19-0020[7].).

Ground Floor Retail/Restaurant

With respect to the ground floor commercial uses in mixed-use housing projects, the Coastal Commission has previously relied upon parking studies documenting parking demand. For example, for the Village at the Civic Center (CDP #5-08-159), a mixed-use housing project in close proximity to the project site located at 1600-1800 Ocean Avenue, the Coastal Commission Staff Report explained on page 11:

> The City's parking study concludes the parking design, mix of uses, and location is conducive to reduced parking demand and shared use, and that the parking demand for the commercial uses would be reduced by approximately 50% from the Commission parking requirements.

Coastal Commission Staff expressed confidence in such a study on page 13:

> According to the [parking demand] analysis [performed by Linscott Law & Greenspan], due to the mixed-use nature of the project, the close proximity to other high generators of walk-in patrons, and the extensive public transit service provided immediately adjacent to the site, it is anticipated that there will be a substantially reduced parking demand generated by the project.

The Project is proposing to replace a modest four commercial spaces with bicycle parking in accordance with the Municipal Code, related to the commercial component of the development (15 parking spaces to be provided for the uses proposed, including the related Beach Impact Zone allocation). However, application of the same 50% reduction for the Project's ground floor commercial areas as applied to the Village at the Civic Center results in a commercial parking requirement of 12 commercial parking spaces. These excess parking spaces may be utilized by residential guests to the Project, as well as visitors to the Coastal Zone.

---

[6] Institute of Transportation Engineers, *Parking Generation Manual,* 5th Edition, Washington, D.C., 2019.
[7] The staff report states, "Additionally, in March 2019, Crain and Associates produced a report on the effects of a 100% affordable housing project and transit availability on personal vehicle ownership and parking demand. That study concluded that substantial evidence and academic research support reduced car ownership and parking utilization by lower income households and housing in close proximity to public transit."

Parking Demand Considerations

The Specific Plan was enacted by the City Council nearly 20 years ago and the LUP was adopted by the Coastal Commission over 20 years ago. However, changing trends in residential and commercial parking demand have resulted in a substantially lower parking demand than reflected in the Specific Plan. Specifically, the Specific Plan and LUP have not been revisited to account for societal and technological advancements – infrastructure and policies which reduce the reliance on private automobiles, and by extension, the parking supply required to serve development projects, notably within the Coastal Zone in the Venice area of the City of Los Angeles. Examples include:

- Increased Public Transit Services. The Project Site is well served by local public transit provided by Metro, Culver CityBus, and Santa Monica Big Blue Bus. This public transit service may not have been available when the Specific Plan was adopted. Metro's Local Line 33 and Culver CityBus Line 1 intersect at the intersection of Main Street and Windward Avenue which is located within one-half mile of the Project Site. Based on the methodology provided by the California Association of Governments ("SCAG"), the intersection of Main Street and Windward Avenue qualifies as an MTS. Metro Local Line 33 has an average service frequency of 7.6 minutes in the eastbound direction and 7.5 minutes in the westbound direction during the peak periods (i.e., 6:00 to 9:00 AM and 3:00 to 7:00 PM). Culver CityBus Line 1 has an average service frequency of 16.2 minutes in the eastbound direction and 15.6 minutes in the westbound direction during the peak periods.

  Additionally, Metro's Local Line 33 and Big Blue Bus Line 1 share northbound and southbound transit stops on Main Street at the Electric Avenue – Abbot Kinney Boulevard intersection, both of which are within approximately 200 feet of the Project Site. Furthermore, Main Street qualifies as a High-Quality Transit Corridor ("HQTC") based on the methodology provided by SCAG. As stated above, Metro Local Line 33 has an average service frequency of 7.6 minutes in the eastbound direction and 7.5 minutes in the westbound direction during the peak periods (i.e., 6:00 to 9:00 AM and 3:00 to 7:00 PM). Big Blue Bus Line 1 has an average service frequency of 11.4 minutes in the eastbound direction and 10.8 minutes in the westbound direction during the peak periods.

- Enhanced Infrastructure and Policy for Bicyclists. The Project site is served by newer infrastructure that facilitates travel by bicycle which was not available when the Specific Plan and LUP were adopted. In addition, the Municipal Code now imposes requirements on development projects to mandate on-site bicycle parking for residents and visitors. Specific examples include:

  - Dedicated Class II Bicycle Lanes on local streets such as Main Street facilitate safe travel for bicycles;

- Requirements for development projects to provide bicycle parking (e.g., the Project will provide 64 bicycle parking spaces on-site); and

- Recent implementation of local bike share programs that allow residents and visitors to rent bicycles, including "bike hubs" operated by Metro Bike Share at the Main Street / Rose Avenue and the Cadiz Court / Abbot Kinney Boulevard intersections, each of which are approximately a one-third mile distance from the Project Site.

- Shared Ride Services. Shared ride services have been developed since the adoption of the Specific Plan and LUP which allow residents, customers, and visitors to travel by private vehicle without car ownership and the need for parking spaces. Examples of these highly convenient services include Uber/Lyft for individual rides, as well as Zipcar for multiple and/or extended trips.

- Increased Density to Facilitate Walking Trips. Since the adoption of the Specific Plan and the LUP, increased development has occurred within the Coastal Zone portion of Venice which encourages and allows for walking trips. Residents can meet many of their daily needs by walking to nearby businesses. The company Walk Score grades the Project Site a 97 (out of 100) which is described on the company's website as: "Walker's Paradise – Daily errands do not require a car." Further, for future residents of the Project, there are nearby employment opportunities as the Project Site is located within the "Silicon Beach" technology and entertainment area. In addition, a multitude of shopping and dining options are provided along Main Street and Abbot Kinney Boulevard, most of which are within a mile of the Project Site. With respect to the commercial uses at the Project, the vast majority of patrons are expected to be walk-ins from persons who live, work, or are visiting the area.

- Provisions for Affordable Housing. Based on empirical studies, affordable housing units typically have a lower parking demand as compared to market-rate housing units. However, neither the Specific Plan nor the LUP have been updated to provide separate parking standards for affordable residential units.

- Increased Remote Work Post-Pandemic. The Covid-19 pandemic resulted in a dramatic shift from in-office work (and its related commutes, often done by personal vehicles) to work conducted remotely. A significant portion of work continues to be done remotely post-pandemic, providing opportunities for residents to work from home and therefore greatly reduce or eliminate the need to maintain a personal vehicle for commute purposes. The Covid-19 pandemic and related increases in remote work (and therefore reduced need to maintain a vehicle for commute purposes) occurred subsequent to the adoption of the Specific Plan and the LUP.

- Transportation Demand Management. The City of Los Angeles is currently in the process of updating its Transportation Demand Management ("TDM") Ordinance. The updated TDM Ordinance is expected to be adopted prior to the completion and occupancy of the Project. The Project will be required to prepare and submit to the City a TDM plan for approval prior to occupancy per Section 12.26.G of the Municipal Code. For the Project, the TDM plan required by the Municipal Code will describe the measures that the undertaken to reduce travel by private automobiles for both commercial and residential components. The TDM plans typically include requirements to encourage travel by walking, bicycle, public transit, and/or shared ride services. When implemented, TDM plans result in a reduction in the number of parking spaces needed to support the new development project.

  For example, as part of the TDM plan, the Project may provide on-site transportation information, incentives for employees who work within one-half mile of the workplace, and commuter matching services. The Project's TDM plan may also include measures relevant to the Project's residents, including a transportation welcome package for residents and a marketing and outreach program to employees within one-half mile.

- Mixed-Use Projects. The City requires the development of mixed-use projects such that ground floor area is devoted to commercial uses that would serve both residents in the units above, as well as other patrons who live or work in the area. Therefore, the need to provide parking for the commercial component of mixed-use developments is substantially reduced because nearly all patrons (and likely many of the employees) are walk-ins. The parking requirements provided in the Specific Plan and LUP have not been updated to consider the reduced parking demand associated with the commercial components of mixed-use developments. While the Project will provide vehicle parking for its commercial component largely consistent with the requirements of the Specific Plan and LUP, the parking spaces will likely not be needed for the commercial tenants, and therefore may be used for residential guests, as well as other visitors to the Coastal Zone.

- Shared Mobility Services. Since the adoption of the Specific Plan, shared mobility devices have become widely available in the Venice area. These include bikes, electric bikes, and electric scooters that are shared among users and enabled by technology such as a mobile app. These shared mobility devices provide alternative options for commuting and first/last mile connections complementing public transit options (e.g., Big Blue Bus and Light Rail). Neither the Specific Plan nor the LUP have been updated to consider the reduced parking demand associated with the use of shared mobility devices in areas with dense availability.

As detailed above, there have been significant changes with respect to services and infrastructure, as well as local government policies and mandates which have substantially reduced the need for a personal automobile, and thus, the number of parking spaces required for development projects. Documentation of these changes and the resulting parking demand factors currently recommended by a nearby jurisdiction are provided in the following section.

City of Santa Monica Review

A review of the Project's required parking based on the rates provided for the Downtown Community Plan area of the City of Santa Monica was prepared for informational purposes. Like the Project Site, the Downtown Community Plan area is located within the Coastal Zone, has easy access to transit, and is a very walkable community. For example, the company Walk Score grades the 90401 ZIP Code, which includes the Downtown Community Plan area, a 90 (out of 100) which is described on the company's website as: "Walker's Paradise – Daily errands do not require a car." As stated herein, Walk Score grades the Project Site a 97 (out of 100), indicating that the Project Site is even more walkable than the 90401 ZIP Code.

It is noted that within the Downtown Community Plan area, the City of Santa Monica Municipal Code ("SMMC") provides the maximum parking allowed, rather than minimum requirements. The maximum off-street parking permitted within the Downtown Community Plan area is provided in Table 9.28.060 of the SMMC. The following maximum rates would be applicable to the market-rate residential component of the Project:

- 0.5 parking space per unit for studio units;
- For one-bedroom units, 0.5 parking space per unit;
- For two-bedroom units, one parking space per unit; and
- One guest parking space for every 15 units.

The following maximum rates would be applicable to the affordable residential component of the Project:

- 0.25 parking space per unit for studio units;
- For one-bedroom units, 0.25 parking space per unit;
- For two-bedroom units, 0.5 parking space per unit; and
- One guest parking space for every 30 units.

Additionally, for the retail and café components, the City of Santa Monica permits a maximum of one parking space for every 500 square feet of floor area within the Downtown Community Plan area.

As shown in ***Table 2***, based on application of the maximum parking rates permitted in the Downtown Community Plan area as provided in Table 9.28.060 of the SMMC, the Project would be able to provide a maximum of 21 parking spaces for the residential component, and a maximum of seven parking spaces for the commercial uses, for the commercial uses, for a maximum of 28 parking spaces permitted on-site. The Project proposes to provide an excess of 22 parking spaces as compared to the maximum parking permitted in the Downtown Community Plan area per the SMMC.

Conclusion

In conclusion, the Project will provide more than sufficient parking to meet its peak demand and therefore will not adversely impact coastal access. Instead, the Project will increase access to the coast by providing 30 new dwelling units, including three affordable units. While the Project is not required to provide parking per AB 2097, the proposed on-site parking supply, coupled with the alternative transportation options within the area, including public transit, increased bicycle infrastructure, amenities within walking distance, and shared ride facilities, would result in sufficient parking demand on-site.

D.2 – Transportation Demand Management Plan

MEMORANDUM

600 S. Lake Avenue
Suite 500
Pasadena, CA 91106
626.796.2322 T
www.llgengineers.com

Pasadena
Irvine
San Diego

To:	California Coastal Commission	Date:	July 29, 2024
From:	David S. Shender, P.E. Jason A. Shender, AICP Linscott, Law & Greenspan, Engineers	LLG Ref:	1-24-4579-1
Subject:	**Transportation Demand Management Review for the Proposed Abbot Kinney Commons Mixed-Use Project at 825 Hampton Drive** Venice area of the City of Los Angeles		

This memorandum has been prepared by Linscott, Law, & Greenspan Engineers ("LLG") to provide a review of the Transportation Demand Management ("TDM") plan[1] prepared for the proposed About Kinney Commons mixed-use Project ("Project") located at 825 Hampton Drive ("Project Site") in the Venice area of the City of Los Angeles. The Project Site is located within the Single Permit Jurisdiction Zone of the California Coastal Zone.

Project Description

The Project proposes the construction of a four-story mixed-use development comprised of 36 residential dwelling units (including four [4] units restricted to Very Low-Income households) and approximately 3,416 square feet of ground-floor commercial uses. The Project includes 60 vehicle parking spaces in a three-level subterranean garage. In addition, the Project will provide 72 bicycle parking spaces, consisting of a mix of short-term and long-term spaces for both the residential and commercial components.

Parking Demand and Access Study

LLG previously prepared a Parking Demand and Access Study[2] to provide a comprehensive vehicle parking study for the Project. The Parking Demand and Access Study concluded that the Project would provide more than sufficient parking to meet its peak demand and therefore will not adversely impact coastal access. Factors such as increased public transit service, including the Project Site's proximity to Main Street, a High-Quality Transit Corridor ("HQTC"), enhanced infrastructure and policy for bicyclists, shared ride and mobility services, increased density to facilitate walking trips, and increased remote work post-Covid-19 pandemic are all expected to reduce parking demand for the Project. Furthermore, the Project proposes to implement several TDM measures as outlined in the TDM plan.

[1] *Draft Transportation Demand Management Plan – 825 Hampton Drive*, Howard Robinson & Associates, May 17, 2024.
[2] *Parking Demand and Access Study for the Proposed Abbot Kinney Commons Mixed-Use Project at 825 Hampton Drive,* Linscott, Law & Greenspan, Engineers, May 2, 2024.

Transportation Demand Management

A TDM plan has been prepared for the Project, which details the measures to be implemented by the entirety of the Project, as well as measures applicable only to the commercial and residential components, respectively.

Applicable to Entirety of Project

As outlined in the TDM plan, the following measures will be implemented for the entirety of the Project:

- Maintenance of a Transportation Information Center ("TIC")
- Designation of a Transportation Coordinator
- Public Bicycle Parking

Applicable to Commercial Component Only

As outlined in the TDM plan, the following measures will be implemented for commercial component of the Project:

- Employee Transportation Subsidy In Lieu of Parking
- Secure Bicycle Storage for Employees
- Guaranteed Return Trip for Employees (Including Transit Riders, Car/Vanpoolers, Walkers, and Bicyclists)

Applicable to Residential Component Only

As outlined in the TDM plan, the following measures will be implemented for commercial component of the Project:

- Transit Welcome Package for Employees
- Unbundled Parking
- Convenient and Secure Bicycle Storage for Residents
- Residential Transportation Subsidy In Lieu of Parking
- Shared Bicycle Access

Conclusion

LLG has reviewed the TDM plan prepared for the Project. The TDM plan adequately describes the demand management strategies recommended for implementation at the Project. Implementation of the recommended TDM plan will result in reduced vehicular trip generation and parking demand at the Project as compared to a similar development project which does not proactively consider the demand management strategies recommended in the TDM plan.

Exhibit E: Environmental Clearance ENV-2024-2452-HES-PEIR

E.1 – Housing Element Streamlining Checklist

APPLICATIONS

HOUSING ELEMENT STREAMLINING CHECKLIST FORM
Project Within the Scope of The Program EIR

OVERVIEW

On November 24, 2021, the City Council certified the Citywide Housing Element 2021-2029 and Safety Element Updates Final Environmental Impact Report (EIR), SCH No. 2021010130, EIR No. ENV-2020-6762-EIR (Program EIR), to adopt the 2021-2029 Citywide Housing Element and the Updates to the Safety Element and the Plan for a Healthy LA (Health Element). Pursuant to CEQA Guidelines Sections 15168(c)(4) and 15168(d), the following Proposed Housing Project has been found to be within the scope of the program analyzed in the Program EIR and its environmental effects are within the scope of environmental impacts assessed in the Program EIR.

For additional information regarding this form, see the Housing Element Streamlining Checklist Form Instructions (CP-4091) at the Department of City Planning Forms Page.

PROPOSED HOUSING PROJECT

Description of Proposed Project:

The Project consists of the demolition of five (5) existing commercial buildings, removal of several shipping containers, necessary excavation and grading, and the development of an approximately 36,716-square-foot mixed-use building containing 30 new apartment units of which three (3) units will be set aside as Very Low Income units and approximately 3,416 square feet of ground floor commercial space. The building would be four (4) stories with a maximum height of 44 feet and seven (7) inches and two (2) subterranean garage levels. The Project includes 50 vehicular parking spaces with a minimum of 36 long-term bicycle parking spaces and 19 short-term bicycle parking spaces, approximately 6,270 square feet of open space and nine (9) onsite trees.

☑ Please check this box if you have provided an attachment with additional project description information to this form.

DETERMINATIONS

Based upon the attached, “Project Within the Scope of the Housing Element Program EIR Checklist and Analysis,” the whole of the administrative record on the Proposed Housing Project, and a review and consideration of the Program EIR, the decisionmaker finds all the following statements to be true:

1. This Proposed Housing Project is within the scope of the previously approved program for which the Program EIR was certified.
2. This Proposed Housing Project will have no significant environmental effects not examined in the Program EIR.
3. The Program EIR adequately described the Proposed Housing Project for the purposes of California Environmental Quality Act (CEQA).
4. Pursuant to CEQA Guidelines Section 15162, no substantial changes to the project analyzed in the Program EIR are proposed as part of this Proposed Housing Project. Further, no substantial changes have occurred with respect to the circumstances under which the Program EIR was certified, and no new information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time that the Program EIR was certified as complete, has become available.
5. All applicable mitigation measures, identified in the Program EIR Mitigation Monitoring Program (MMP), have been incorporated into the Proposed Housing Project or will be made into enforceable obligations on the Proposed Housing Project. A mitigation and monitoring program has been prepared for adoption.

PROJECT WITHIN THE SCOPE OF THE HOUSING ELEMENT PROGRAM EIR - CHECKLIST AND ANALYSIS

The following checklist and analysis shall be used to determine if the Proposed Housing Project, described below, is within the scope of the Citywide Housing Element 2021-2029 and Safety Element Updates Final EIR, SCH No. 2021010130, EIR No. ENV-2020-6762 (Program EIR), certified by the City Council.

A. PROPOSED HOUSING PROJECT

A.1 Proposed Housing Project Title:

Hampton Court Project

A.2 Proposed Housing Project Description:

The Project consists of the demolition of five (5) existing commercial buildings, removal of several shipping containers, necessary excavation and grading, and the development of an approximately 36,716-square-foot mixed-use building containing 30 new apartment units of which three (3) units will be set aside as Very Low Income units and approximately 3,416 square feet of ground floor commercial space. The building would be four (4) stories with a maximum height of 44 feet and seven (7) inches and two (2) subterranean garage levels. The Project includes 50 vehicular parking spaces with a minimum of 36 long-term bicycle parking spaces and 19 short-term bicycle parking spaces, approximately 6,270 square feet of open space and nine (9) onsite trees.

A.3 Project Location Description:

The Project Site is located at 825 South Hampton Drive, Los Angeles, California, 90291. The Project Site consists of four tied lots with one Assessor's Parcel Number (APN): 4286-012-039. The triangular-shaped parcel is approximately 18,487 square feet (0.42 acres) in size, and fronts on Brooks Avenue to the east and Hampton Drive to the north.

A.4 Surrounding Area and Uses:

Property in the surrounding area is characterized by a mix of multi-family residential and commercial uses. Specifically, the property to the north has a land use designation of Limited Manufacturing, is zoned M1-1, and is developed with a three- to four-story multi-family residential building. The property to the west has a land use designation of Community Commercial, is zoned C2-1, and is being developed with a three-story hotel building. The property to the south, across Abbot Kinney Boulevard, has a land use designation of Community Commercial, is zoned C2-1, and is developed with a one-story commercial building and surface parking lot. The property to the east, across Brooks Avenue, has a land use designation of Community Commercial, is zoned C2-1, and is developed with a two-story commercial building.

B. PROGRAM EIR BACKGROUND

B.1 CEQA Guidelines Section 15168

The California Environmental Quality Act (CEQA) provides for limited environmental review of subsequent projects under a Program EIR. (CEQA Guidelines Section 15168.) Later activities under a continuing program analyzed in the Program EIR must be examined to determine whether any additional environmental analysis must be conducted. (Guidelines Section 15168(c)(1).) If a lead agency finds that pursuant to Guidelines Section 15162, no subsequent EIR would be required, the lead agency can approve the activity as being within the scope of the project covered by the Program EIR, and no new environmental document would be required. (Guidelines Section 15168(c)(2).) Whether a later activity is within the scope of a Program EIR is a factual question that the lead agency determines based upon substantial evidence in the record. (Guidelines Section 15168(c)(2).) The lead agency shall incorporate feasible mitigation measures from the Program EIR Mitigation and Monitoring Program (MMP) into later activities in the program. (Guidelines Section 15168(c)(3).) Where the later activities involve site specific operations, the lead agency should use a written checklist to determine whether the environmental effects of the site-specific operations are within the scope of the Program EIR. (Guidelines Section 15168(c)(4).)

B.2 Program EIR

In certifying the Program EIR and approving the project, the City Council adopted the following findings related to the scope of the project analyzed in the Program EIR and the types of impacts analyzed:

> *The EIR analyzed the build out of the Regional Housing Needs Assessment (RHNA), that is the build out of 420,327 housing units in eight years (456,643 RHNA minus 36,316 housing units that have received approvals but have not yet been built and/or received the certificate of occupancy [pipeline projects]). The EIR analyzed the program-level impacts from the full build out of the RHNA, as well as the project-level impacts that occur from the development of the types of housing projects that will be developed from build out of the RHNA. The following types of housing projects were analyzed and within the scope of this EIR:*
>
> - *Multi-family residential, ranging from small apartment buildings with two to 10 units, medium apartment buildings with between 11-49 units, large apartment buildings with between 50-200 units, or larger apartment buildings and high-rise structures with more than 200 units.*
> - *Single-family residential, ranging in size and scale from smaller single-family homes to larger single-family homes, small-lot subdivisions and new single subdivisions.*
> - *Accessory dwelling units (ADUs), including attached ADUs, detached ADUs, Junior ADUs, ADUs converted from existing floor area, multiple ADUs on lots with existing multi-family dwellings, and Movable Tiny Homes.*
> - *The mixed-use development ranges in size and scale from neighborhood commercial mixed-use with smaller nonresidential uses, to high-rise mixed-use with larger nonresidential uses.*

- *Conversion and/or rehabilitation of existing nonresidential, residential, or mixed-use structures to be used for housing.*

Housing types for different income levels were analyzed, including single-resident occupancy and affordable housing that may be for families, seniors, residents with special needs or permanent supportive housing. The EIR also analyzed the impacts from various locations, geographies, and environments where build out of the RHNA could occur, including the following:

- *Sites currently zoned for residential uses, including multi-family and single-family uses;*
- *Sites currently zoned for commercial uses, which permit residential uses;*
- *Sites currently zoned for hybrid industrial uses, which permit joint live-work residential uses;*
- *Non-vacant sites, and sites with existing housing;*
- *Sites located near public transit;*
- *Sites located in a Historic Preservation Overlay Zone (HPOZ)*
- *Sites located in areas with special environmental considerations, such as areas located by Open Space, Hillside Areas, Very High Fire Hazard Severity Zones (VHFHSZ) or Coastal Zones.*

To analyze project-level impacts on the environment from the variety of housing types and locations that could potentially be built to accommodate the RHNA citywide, the City established a team of experienced project planners who have experience in reviewing environmental documents and analyzing or consulting on environmental impacts for housing projects, as well as other development types, across the entire City geography, including project planners who work in the Major Projects Section, who are responsible for reviewing and preparing all EIRs citywide for the Planning Department; planners who work in the Citywide Environmental Policy Unit who are responsible for advising on all CEQA impact issues, training and advising planners on preparing CEQA clearances; as well as project planners who review and prepare exemptions, negative declarations, mitigated negative declarations, and sustainable communities environmental assessments (SCEAs) within specific geographies in the City. After assembling this consulting team, the City surveyed the thousands of environmental assessments that have been prepared in the last five years for housing development of the type that will build out the RHNA and selected 54 case studies to discuss in the EIR which identify both the typical- and worst-case environmental impacts from housing development. In the survey of environmental assessments, it was determined that the City reviews hundreds of discretionary housing projects every year for CEQA compliance, that the largest majority of housing projects do not require mitigation, as many housing development projects are found to be exempt from CEQA (specifically, hundreds of categorical exemptions are used for small to medium scale housing projects, including Class 32 for infill projects up to 75 units or less); and less than 10 percent of discretionary housing projects require an EIR due to significant and unavoidable impacts. Based on this, the case studies are more heavily weighted toward larger-scale projects or those in sensitive environments that are more likely to have significant impacts. Smaller projects in more urban infill areas typically do not require an EIR, a mitigated negative declaration, or SCEA, unless there are specific site conditions, such as historical resources, site contamination, or archaeological resources, that

raise potential environmental impact concerns. The case studies, which include EIRs, mitigated negative declarations, and SCEAs, were selected based on the type of project (e.g., multi-family residential, single-family residential, ADUs, mixed-use development, and conversion and/or rehabilitation), scale of project (single-family to large tower/mixed use), locations with the broadest range of geographies and environmental conditions, and levels of development and density (hillsides, urban, regional centers, coastal, and suburban areas), as well as projects that include income-restricted projects. The intent was to be conservative and identify all of the reasonably foreseeable ways housing can result in environmental impacts in the City, as well as identify the best mitigation measures developed to address those impacts. The City finds the case studies reviewed in the EIR and their identified level of impacts (i.e., no impacts, less than significant impacts, less than significant impacts with mitigation, and significant and unavoidable impacts) are representative of the typical- and worst-case environmental impacts of housing development to be built to accommodate the RHNA. Also, the City finds that it is not reasonably foreseeable that housing development that will build out the RHNA will have significant impacts in those impact categories that were scoped out in the Initial Study (Appendix A to the FEIR). Additionally, the City finds the mitigation measures, developed in the EIR and included in the MMP, to be used by projects within the scope of the EIR, are comprehensive and based on the screening criteria included in those mitigation measures, further studies, and performance standards will, in a majority of circumstances, reduce environmental impacts from housing development to less than significant. However, based on the findings below and the EIR analysis, even with the application of the mitigation measures in the MMP, significant impacts identified in the Program EIR Findings can still occur from housing development of all types throughout the City. The City Council finds the EIR has analyzed and identified the significant impacts that are reasonably foreseeable from housing development in the City for the types of housing projects (described above) that will accommodate the RHNA. (Appendix A: Citywide Housing Element 2021-2029 and Safety Element Updates Final EIR, CEQA Findings of Facts and Statement of Overriding Considerations.)

Additional information regarding the analysis of the impacts from housing projects or the Housing Element Program and build-out of the RHNA is provided in Environmental Analysis, Section 4.0, of the Draft EIR.

B.3 Environmental Impacts Analyzed in the Program EIR

The environmental impacts analyzed and the impact conclusions identified for Projects within the Scope of the Program EIR are shown in Appendix A, CEQA Findings of Facts and Statement of Overriding Consideration for the 2021-2029 Citywide Housing Element and Safety Element Updates, and in the Program EIR, which may be found at https://planning.lacity.org/development-services/eir.

B.4 Program EIR Mitigation Measures

The City Council adopted the MMP for the 2021-2029 Housing Element, provided in Appendix B. The MMP provides that, subject to City authority, the applicable mitigation measures in the MMP shall be imposed as conditions of approval for a project analyzed as a subsequent approval pursuant to CEQA Guidelines Section 15168.

C. FINDING THAT THE PROPOSED HOUSING PROJECT IS A PROJECT WITHIN THE SCOPE OF THE PROGRAM FOR WHICH THE PROGRAM EIR WAS CERTIFIED

Check all of the boxes in Table C-1 that describe the Proposed Housing Project:

Table C-1

☑	**Multi-family residential development** – Range from small apartment buildings with two to 10 units, medium apartment buildings with between 11-49 units, large apartment buildings with between 50-200 units, or larger apartment buildings and high-rise structures with more than 200 units
☐	**Single-family residential development** – Range in size and scale from smaller single-family homes to larger single-family homes, small lot subdivisions, and new single-family subdivisions
☐	**Accessory dwelling unit (ADU**) - Include attached ADUs, detached ADUs, Junior ADUs, ADUs converted from existing floor area, multiple ADUs on lots with existing multi-family dwellings, and Movable Tiny Houses
☑	**Mixed-use development** - Range in size and scale from neighborhood commercial mixed use with smaller nonresidential uses, to high-rise mixed-use with larger nonresidential uses
☐	**Conversion and/or rehabilitation** – Existing nonresidential, residential and mixed-use structures to be converted/rehabilitated for housing
☑	**Housing type for different income levels**, including single-resident occupancy and affordable housing that may be for families, seniors, residents with special needs or permanent supportive housing

CONCLUSION

Check one of the following:

☑ AT LEAST ONE BOX IN TABLE C-1 IS CHECKED

The Proposed Housing Project is within the scope of the program that was analyzed in the Program EIR. Go to Section D and E to determine if the site-specific environmental effects of the Proposed Housing Development are within the scope of the Program EIR.

☐ NONE OF THE BOXES IN TABLE C-1 ARE CHECKED

The Proposed Housing Project is not within the scope of the program that was analyzed in the Program EIR. A separate environmental analysis is required.

D. MITIGATION MEASURES APPLICABLE TO THE PROPOSED HOUSING PROJECT

The following mitigation measures (MMs) from the MMP (Appendix B) are relevant and applicable to the Proposed Housing Project based on the mitigation measure thresholds of applicability and based on a review of the Proposed Housing Project:

Check all MMs from the MMP that apply to the Project and provide a brief explanation of why any mitigation measures are not triggered by the applicability standard in the mitigation measure:

Mitigation Measure		Applies to Proposed Housing Project
Air Quality		
4.2-2(a)	Construction Emissions Reduction	☑ Yes ☐ No
4.2-2(b)	Operations Emissions Reduction	☐ Yes ☑ No
4.2-3	Construction TAC Reduction Measures	☑ Yes ☐ No

Brief explanation:

MM 4.2-2(b): The proposed 30 units and 3,416 square feet of commercial floor area will not have equivalent emissions to the 612 multi-family units emissions, as provided in the Air Quality Report in Attachment A, as described in the Mitigation Monitoring Program to trigger the Mitigation Measures. As indicated in Table 2 of the Air Quality Report, the Project's operations emissions would be a small fraction of the emissions associated with these screening criteria.

Mitigation Measure		Applies to Proposed Housing Project
Biological Resources		
4.3-1(a)	Biological Resources Reconnaissance Survey and Reporting	☐ Yes ☑ No
4.3-1(b)	Sensitive Species/Habitat Avoidance: Pre-Construction Bird Nest Surveys, Avoidance, and Notification	☐ Yes ☑ No
4.3-1(c)	Focused Surveys for Rare Plants	☐ Yes ☑ No
4.3-1(d)	Adaptive Management Plan	☐ Yes ☑ No
4.3-2(a)	Habitat Mitigation and Monitoring Plan	☐ Yes ☑ No
4.3-2(b)	Protected Tree and Tree Canopy Survey	☐ Yes ☑ No

Brief explanation:

MM 4.3-1(a): The Project Site is currently occupied by five one-story buildings and several shipping containers, currently used as commercial offices. Nearly the entire site is paved by concrete and asphalt. As evidenced by ZIMAS data sets for mapping biological resources and the project plans., the Project Site site does not have potential to support special-status species, contain sensitive habitat, or is within 300 feet of suitable habitat to support special status species.
MM 4.3-1(b) to MM 4.3-1(d): Pursuant to MM 4.3-1(a), a biological resources assessment report was not required.
MM 4.3-2(a): The Project Site is currently occupied by five one-story buildings and several shipping containers, currently used as commercial offices. Nearly the entire site is paved by concrete and asphalt. The Project Site is located within a heavily urbanized area of the City. As such, the project is not in an area potentially containing sensitive natural community or jurisdictional waters and riparian habitat or other water bodies.
MM 4.3-2(b): The project would not result in the removal trees including street trees.

Mitigation Measure		Applies to Proposed Housing Project
Cultural Resources		
4.4-1(a)	Identification of Built-Environment Historical Resources	☑ Yes ☐ No
4.4-1(b)	Rehabilitation of Historical Resources	☐ Yes ☑ No
4.4-1(c)	Design Requirements for New Construction	☐ Yes ☑ No
4.4-1(d)	Relocation and Rehabilitation of Historical Resources	☐ Yes ☑ No
4.4-1(e)	Historic American Building Survey Documentation	☐ Yes ☑ No
4.4-1(f)	Interpretive Program	☐ Yes ☑ No
4.4-1(g)	Construction Monitoring, Salvage, and Reuse	☐ Yes ☑ No
4.4-1(h)	Temporary Protective Relocation	☐ Yes ☑ No
4.4-1(i)	Excavation and Shoring Plan	☐ Yes ☑ No
4.4-1(j)	Structural Construction Monitoring	☐ Yes ☑ No
4.4-2	Archaeological Resources	☑ Yes ☐ No

Brief explanation:

MM 4.4-1(b) to MM 4.4-1(j) : Pursuant to MM 4.4-1(a), a historical resources assessment report determined no historical resources are located at the subject site.

Mitigation Measure		Applies to Proposed Housing Project
Geology and Soils		
4.5-1(a)	Paleontological Procedures for Discretionary Projects	☑ Yes ☐ No
4.5-1(b)	Worker Environmental Awareness Program, Fossil Salvage, and Construction Monitoring	☑ Yes ☐ No
4.5-1(c)	Construction Monitoring	☑ Yes ☐ No
4.5-1(d)	Fossil Discovery, Salvage, and Treatment	☑ Yes ☐ No
Brief explanation:		
Hazards and Hazardous Materials		
4.7-2(a)	Environmental Site Assessment	☑ Yes ☐ No
4.7-2(b)	Site Remediation and Health and Safety Plan	☑ Yes ☐ No
Brief explanation:		

Mitigation Measure		Applies to Proposed Housing Project
Hydrology and Water Quality		
4.8-1	Drainage Pattern Alterations and Flood Control	☐ Yes ☑ No
Brief explanation: MM 4.8-1: The Project Site is within Zone X – Area of Minimal Flood Hazard, which is a designation for areas determined to be outside the 100-year flood hazard area. Thus, the Project Site is not located within a designated 100-year flood plain area, and the Project would not place structures that would impede or redirect flood flows within a 100-year flood plain. Further, BOE has reviewed the project and has not identified a need to study drainage and flood flow.		
Noise		
4.10-1(a)	Noise Shielding and Silencing	☑ Yes ☐ No
4.10-1(b)	Use of Driven Pile Systems	☑ Yes ☐ No
4.10-1(c)	Enclosures and Screening	☑ Yes ☐ No
4.10-1(d)	Construction Staging Areas	☑ Yes ☐ No
4.10-1(e)	Temporary Sound Barriers	☑ Yes ☐ No
4.10-1(f)	Project-Specific Construction Noise Study	☑ Yes ☐ No
4.10-2	Project-Specific Operational Noise Study	☑ Yes ☐ No
4.10-3(a)	Vibration Control Plan	☐ Yes ☑ No
4.10-3(b)	Vibration Mitigation	☑ Yes ☐ No
Brief explanation: MM 4.10-3(a): The subject site is not located within 50 feet of an extremely fragile building or a designated historical resource or resource identified in Survey LA as potentially eligible for designation.		

Mitigation Measure		Applies to Proposed Housing Project
Public Services		
4.12-1(a)	Design Plans Review	☐ Yes ☑ No
4.12-1(b)	Emergency Access	☐ Yes ☑ No
4.12-1(c)	Hillside Fire/Vegetation Management Plan	☐ Yes ☑ No
4.12-1(d)	Submittal of Plot Plan	☐ Yes ☑ No
4.12-2(a)	Crime Prevention Unit Consultation	☐ Yes ☑ No
4.12-2(b)	Security During Construction	☐ Yes ☑ No
Brief explanation: MM 4.12-1(a) to MM 4.12-1(d): The project includes the development of 30 residential units and is not within a Very High Fire Severity Zone (VHFSZ) or Sensitive Resource Area (SRA). MM 4.12-2(a) and MM 4.12-2(b): The project includes the development of 30 residential units on a 18,487 square-foot (0.42 acres) lot.		
Transportation		
4.14-1	Construction Management Plan	☐ Yes ☑ No
4.14-2	Transportation Demand Management Program	☐ Yes ☑ No
Brief explanation: MM 4.14-1: Mitigation measure is not triggered because DOT has reviewed the project and has not determined the project will have potential to impact the circulation system. Existing regulatory compliance measures are adequate. MM 4.14-2: This mitigation measure is not triggered because pursuant to the City's VMT Calculator, the project will not have VMT impacts.		

Mitigation Measure		Applies to Proposed Housing Project
Tribal Cultural Resources		
4.15-1(a)	Native American Consultation and Monitoring for Discretionary Projects	☑ Yes ☐ No
4.15-1(b)	Discovery of Potential Tribal Cultural Resources	☑ Yes ☐ No
Brief explanation:		
Wildfire		
4.17-1	Hillside Construction Staging and Parking Plan	☐ Yes ☑ No
4.17-3	Undergrounding of Power Lines in and Near an SRA and VHFHSZs	☐ Yes ☑ No
Brief explanation: MM 4.17-1: The project site is not within or adjacent to a VHFSZ or SRA. MM 4.17-3: The project site is not within or adjacent to a VHFSZ or SRA and the project does not include new power lines.		

Substitute Mitigation Measures

THE APPLICANT FOR THE PROPOSED HOUSING PROJECT IS PROPOSING SUBSTITUTED MITIGATION MEASURES FOR ANY OF THE MITIGATION MEASURES THAT ARE CHECKED ABOVE

☐ Yes ☑ No

If YES, include the substituted mitigation measures below, with the necessary findings showing the mitigation measure is equal or more effective to the mitigation measures in the Mitigation Measure Program at reducing the significant impact to less than significant and no new significant impact will result from the substitution:

Any attachments or technical studies that support findings will need to be printed out and attached to the Appendix and will be included in the project file.

THE APPENDIX WILL BE FILLED OUT ☐ Yes ☑ No

Planner to fill out the Appendix page at the end of the checklist to list any substituted measures and any additional pages to support findings.

CONCLUSION

Check one of the following (Note: this may require the analysis in Section E to be completed first):

☐ None of the mitigation measures from the MMP are applicable to the Proposed Housing Project.

☑ All applicable mitigation measures (including substitute measures) will be imposed on the Proposed Housing Project through conditions of approval, or have already been incorporated into the Proposed Housing Project.

☐ Not all applicable mitigation measures will be imposed on the Proposed Housing Project through conditions of approval, or have already been incorporated into the Proposed Housing Project.

E. FINDING THAT SITE SPECIFIC EFFECTS FROM THE PROPOSED HOUSING PROJECT WERE ANALYZED IN THE PROGRAM EIR

E.1 Screening Criteria

The following screening questions shall be answered to evaluate whether the Proposed Housing Project has the potential for site-specific or project-specific circumstances or conditions to result in an environmental effect not examined in the Program EIR. If any of the following questions are answered 'Yes', further analysis will be required in Section E.2.

a. Do any mitigation measures from the MMP require further analysis or study?

☑ Yes ☐ No

If **Yes**, prepare any studies and conduct any analysis required by the mitigation measure, per Section E.2.

b. Does the Proposed Housing Project lack compliance with a mitigation measure (including a substitute mitigation measure) identified as applicable to the Proposed Housing Project in Section D?

☐ Yes ☑ No

If **Yes**, determine if the environmental effect was examined in the Program EIR, per Section E.2.

c. Would the Proposed Housing Project require a variance or specific plan exception to provide relief from a standard required to protect scenic resources or scenic quality in an adopted Code, Specific Plan, or overlay ordinance (e.g., the Mulholland Scenic Parkway Specific Plan, the San Gabriel/Verdugo Mountains Scenic Preservation Specific Plan)?

☐ Yes ☑ No

If **Yes**, conduct an analysis of Questions I.a and I.c in Appendix G of the CEQA Guidelines to determine if the Proposed Housing Project will have an effect that was not examined in the Program EIR, per Section E.2.

d. Would the Proposed Housing Project involve the modification or destruction of a scenic resource or obstruction of public view of a scenic resource?

☐ Yes ☑ No

If **Yes**, conduct an analysis of Questions I.a and I.c in Appendix G of the CEQA Guidelines to determine if the Proposed Housing Project will have an effect that was not examined in the Program EIR, per Section E.2.

e. Would the Proposed Housing Project involve rezoning agriculturally zoned land?

☐ Yes ☑ No

If **Yes**, conduct an analysis of Question II.b in Appendix G of the CEQA Guidelines to determine if the Proposed Housing Project will have an effect that was not examined in the

Program EIR, per Section E.2.

f. Would the Proposed Housing Project be within 50 feet of a fault delineated on the Alquist-Priolo Earthquake Fault Zoning Map?

☐ Yes ☑ No

If **Yes**, conduct an analysis of Question VII.a.i in Appendix G of the CEQA Guidelines to determine if the Proposed Housing Project will have an effect that was not examined in the Program EIR, per Section E.2.

g. Would the Proposed Housing Project result in significant impacts to VMT using the thresholds and methodology provided in the LADOT Transportation Assessment Guidelines?

☐ Yes ☑ No

If **Yes**, conduct an analysis of VMT to determine if the Proposed Housing Project will have an effect that was not examined in the Program EIR, per Section E.2.

h. Would the Proposed Housing Project have peculiar or unique project or site characteristics from those analyzed in the Program EIR that could result in an effect not examined in the Program EIR (e.g., projects that conflict with an adopted Airport Land Use Plan or Water Quality Management Plan, or sites in use for mineral resource recovery (does not include oil and gas), projects involving septic tanks)?

☐ Yes ☑ No

If **Yes**, conduct an analysis to determine if the Proposed Housing Project will have an effect that was not examined in the Program EIR, per Section E.2.

i. Is the project located within one mile of a freeway offramp and does it require a transportation assessment by the Los Angeles Department of Transportation (DOT)?[1]

☐ Yes ☑ No

If **Yes**, conduct an analysis of freeway queueing, as required by DOT, to determine if the Proposed Housing Project will have an effect that was not examined in the Program EIR, per Section E.2.

[1] Transportation assessments are typically required if the project would both generate a net increase of 250 or more daily vehicle trips and would result in a net increase in daily VMT. DOT would also require a transportation assessment if the project is replacing an existing number of residential units with a smaller number of residential units, and the proposed project is located within one-half mile of a heavy rail, light rail, or bus rapid transit station.

CONCLUSION

After finishing review of the screening questions in Section E.1, check one of the following boxes.

☐ **ALL SCREENING QUESTIONS ARE MARKED 'NO'**

Pursuant to CEQA Guidelines Section 15168(c)(4), the environmental effects of the Proposed Housing Project were within the scope of the Program EIR. Prepare a Mitigation and Monitoring Program for the Proposed Housing Project. No further analysis is required.

☑ **ONE OR MORE SCREENING QUESTIONS ARE MARKED 'YES'**

Go to Section E.2.

E.2 Analysis to Determine if the Proposed Housing Project Would Have Effects Not Examined in the Program EIR

Instructions:

Conduct all analysis required in Section E.1 to determine if the Proposed Housing Project would have one or more environmental site- or project-specific effect(s) not examined in the Program EIR.

The following site- or project-specific effects are not effects that were examined in and within the scope of the Program EIR:

- a significant impact that would result because the Proposed Housing Project will not comply with a mitigation measure found applicable to the Proposed Housing Project from Appendix B, or will not comply with a substituted mitigation measure of equal or equivalent effectiveness (see Conclusion in Section D).
- a significant impact in an impact category found in the Program EIR to be less than significant, less than significant with mitigation, or have no impact;
- a significant impact that cannot be mitigated to less than significant with mitigation measures in Appendix B or by a substituted mitigation measure, in any of the following impact categories, which are impacts that by their nature would have impacts unique to the resource(s):
    - to a historical resource;
    - to a biological resource;
    - to an archaeological resource;
    - to a paleontological resource;
    - to tribal cultural resources;
    - related to hazardous materials; or
    - related to wildfires.

Without limitation, the following effects from a Proposed Housing Project are effects examined in and within the scope of the Program EIR:

- a significant and unavoidable impact related to criteria pollutant air quality standards from construction NOx, PM_{10} and $PM_{2.5}$ emissions;

- a significant and unavoidable impact related to criteria pollutant air quality standards from operational NOX, VOC, PM_{10}, and $PM_{2.5}$ emissions; or
- a significant and unavoidable impact (project or cumulative) related to construction and operational noise or vibration impacts.

CONCLUSION

Based on the analysis above, and the whole of the administrative record, substantial evidence supports that (check one):

☑ **THE PROPOSED HOUSING PROJECT WILL NOT HAVE EFFECTS NOT EXAMINED IN THE PROGRAM EIR.**

The Proposed Housing Project is fully within the scope of the program and its impacts were examined in the Program EIR. Prepare a Mitigation and Monitoring Program for the Proposed Housing Project for all mitigation measures identified in Subsection D and E, as applicable. No additional environmental analysis documents need to be prepared.

☐ **THE PROPOSED HOUSING PROJECT WILL HAVE ONE OR MORE EFFECTS NOT EXAMINED IN THE PROGRAM EIR.**

A tiered negative declaration or tiered environmental impact report will be prepared for the following environmental effect(s) pursuant to CEQA Guidelines Section 15152:

Impacts to be Analyzed in Tiered CEQA Clearance:

All other effects are within the scope of the Program EIR and require no further analysis pursuant to CEQA Guideline Section 15152. The analysis provided herein shall be relied upon, in part, to support adoption of the tiered document as only being required to analyze the above listed impact(s).

APPENDIX

SUBSTITUTED MITIGATION MEASURES

List any Substituted Mitigation Measures, if any, along with any additional documents to support findings in the section below:

ANALYSIS

Complete, as applicable, based on Sections E.1 and E.2 above. Please attach any technical studies required and summarize the impact and the required mitigation measures and/or monitoring program for the Proposed Housing Project.

The following analysis is provided as required based on the following questions from Section E.1 and E.2:

Please see attachments:

NTEC

Date: January 6, 2025

RE: 825 Hampton Drive Project – Air Quality Technical Memorandum

Noah Tanski Environmental Consulting ("NTEC") has prepared this technical memorandum to assess the air quality impacts that would be associated with construction and operations of the 825 Hampton Drive Project ("Project") located in the City of Los Angeles, especially as they relate to air quality impacts that have been previously examined in the City's Citywide Housing Element 2021-2029 and Safety Element Updates Program Environmental Impact Report, hereafter referred to as the "Program EIR." Based on NTEC's analysis, the Project's air quality impacts would be considered less than significant.

Project Description

The Project proposes to construct a new four-story mixed-use building containing 30 dwelling units and 3,416 square feet of retail space. Parking would be provided by a three-level subterranean parking garage with 58 parking spaces. The approximately 0.42-acre Project site is currently developed with five one-story buildings and several shipping containers utilized as commercial offices. These existing uses would be demolished prior to construction of the Project.

Regulatory Compliance Measures

Before discussing the Project's air quality impacts and consistency with the Program EIR, it is important to note that there are many regulations in place that would limit the Project's air pollutant emissions from construction and operational sources. Housing development accommodated under the Program EIR is required to comply with the following Regulatory Compliance Measures ("RCMs"):

- **RCM-AQ-1 (Demolition, Grading, and Construction Activities):** The project shall comply with all applicable standards of the Southern California Air Quality Management District, including the following provisions of District Rule 403:
    - All unpaved demolition and construction areas shall be wetted at least twice daily during excavation and construction, and temporary dust covers shall be used to reduce dust

emissions and meet SCAQMD District Rule 403. Wetting could reduce fugitive dust by as much as 50 percent.

- The construction area shall be kept sufficiently dampened to control dust caused by grading and hauling, and at all times provide reasonable control of dust caused by wind.
- All clearing, earth moving, or excavation activities shall be discontinued during periods of high winds (i.e., greater than 15 mph), so as to prevent excessive amounts of dust.
- All dirt/soil loads shall be secured by trimming, watering, or other appropriate means to prevent spillage and dust.
- All dirt/soil materials transported off-site shall be either sufficiently watered or securely covered to prevent excessive amounts of dust.
- General contractors shall maintain and operate construction equipment so as to minimize exhaust emissions.
- Trucks having no current hauling activity shall not idle but be turned off.
- Vehicle speeds shall be limited to 15 mph on unpaved roads.

- **RCM-AQ-2 (Construction Equipment Fleet Regulations):** In accordance with California Off-Road Diesel-Fueled Fleet Regulations, equipment operators shall be registered using the Diesel Off-Road Online Reporting System (DOORS) and diesel-powered construction equipment with 25 horsepower or greater engines shall meet exhaust PM and NO_X emissions standards.
- **RCM-AQ-3 (Idling of Diesel-fueled Commercial Vehicles):** In accordance with Section 2485 in Title 13 of the California Code of Regulations, the idling of all diesel-fueled commercial vehicles (weighing over 10,000 pounds) shall be limited to five minutes at any location.
- **RCM-AQ-4 (Operation of Diesel-fueled Commercial Vehicles):** In accordance with Section 93115 in Title 17 of the California Code of Regulations, operation of any stationary, diesel-fueled, compression-ignition engines shall meet specified fuel and fuel additive requirements and emissions standards
- **RCM-AQ-5 (Architectural Coatings):** The project shall comply with SCAQMD Rule 1113 limiting the volatile organic compound content of architectural coatings.
- **RCM-AQ-6 (Adhesive and Sealant Applications):** Compliance with provisions of the SCAQMD Rule 1168. Projects shall comply with SCAQMD Rule 1168 limiting the VOC content of adhesives, sealants, adhesive primers, and sealant primers.
- **RCM-AQ-7 (Emission Control Measures):** New on-site facility nitrogen oxide emissions shall be minimized through the use of emission control measures (e.g., use of best available control technology for new combustion sources such as boilers and water heaters) as required by SCAQMD Regulation XIII, New Source Review.

Air Quality Impact Analysis

On November 24, 2021, the Los Angeles City Council certified the Citywide Housing Element 2021-2029 and Safety Element Updates Final Environmental Impact Report ("Program EIR"), SCH No. 2021010130, EIR No. ENV-2020-672-EIR, to adopt the 2021-2029 Citywide Housing Element and the Updates to the Safety Element and the Plan for a Healthy LA ("Health Element"). Pursuant to CEQA Guidelines Section 15168(d), the Project has been found to be within the scope of the program analyzed in the Program EIR. In addition, the Proposed Project is subject to applicable mitigation implemented by the Program EIR.

Construction

Pursuant to Program EIR Mitigation Measure 4.2-2(a) (Construction Emissions Reduction), discretionary projects requiring greater than 5,000 cubic yards of soil cut/fill are required to prepare and submit an Air Quality Impact Analysis demonstrating that project construction emissions are less than applicable SCAQMD regional and localized significance thresholds. The Project would involve the export of approximately 11,000 cubic yards of cut soil, triggering this requirement. According to Mitigation Measure 4.2-2(a), the Air Quality Impact Analysis must demonstrate that the Project's construction-related emissions are less than applicable SCAQMD regional and localized significance thresholds ("LSTs"). The applicable SCAQMD regional thresholds and LSTs for the Project are shown and discussed below in **Table 1**.

Table 1
SCAQMD Construction Emissions Thresholds

Criteria Pollutant	Construction Emissions (lbs per day)	
	Regional	Localized[A]
Volatile Organic Compounds – VOCs	75	-
Nitrogen Oxides - NO_X	100	103
Carbon Monoxide – CO	550	562
Sulfur Oxides - SO_X	150	-
Respirable Particulates – PM_{10}	150	4
Fine Particulates – $PM_{2.5}$	55	3

[A] *Localized significance thresholds assume the following:*

- *1-acre maximum daily disturbed acreage. This is the smallest project size used for analysis in the LST guidance document and is consistent with the SCAQMD's "Fact Sheet for Applying CalEEMod to Localized Significance Thresholds" document. Utilizing a 1-acre project size for construction results in the most stringent emissions thresholds.*

- *Receptor distance of 25 meters (approximately 82 feet). This is the shortest distance used for analysis in the LST guidance document, and it results in the most stringent emissions thresholds. Sensitive receptors in the vicinity of the Project site include (but are not limited to) residential land uses located at 800 Main Street (60 feet west) and 811 Hampton Drive (50 feet north).*

- *The Project is located in SRA No. 2, "Northwest Coastal Los Angeles County."*

Sources: SCAQMD, Air Quality Significance Thresholds, revised April 2019; and, SCAQMD, LST Methodology Appendix C – Mass Rate LST Look-Up Table, October 2009.

Construction emissions are estimated using the CalEEMod version 2022 model. Because the SCAQMD's regional and localized significance thresholds for construction emissions are representative of maximum daily emissions that would not be expected to cause or contribute to an exceedance of the most stringent National Ambient Air Quality Standards (NAAQS) or California Ambient Air Quality Standards (CAAQS) for pollutants, the objective of the CalEEMod analysis is to determine whether the Project's maximum single-day construction emissions would have the potential to exceed these thresholds. As such, the CalEEMod analysis relies on conservative construction and phasing/overlap assumptions to conclusively rule out the possibility that threshold exceedances could occur. Construction is a dynamic process and day-to-day emissions can vary widely, even within the same construction phase or subphase. This analytical approach therefore minimizes the potential for inadvertently underestimating daily construction emissions, which are the basis of SCAQMD regional thresholds and LSTs.

The CalEEMod analysis also accounts for SCAQMD Rule 403 for fugitive dust. SCAQMD Rule 403 contains general requirements applicable to all fugitive dust sources, including the Project's construction, that involve minimizing visible emissions and reducing trackout from construction site driveways. SCAQMD Rule 403 "best available control measures" ("BACMs") are mandatory as a matter of regulatory compliance. Additionally, the Program EIR has adopted RCM-AQ-1 to emphasize projects' compliance with SCAQMD Rule 403. Therefore, SCAQMD Rule 403 compliance would also be required and enforced based on the Program EIR's RCM-AQ-1.

None of the Construction Emissions Reductions Measures included under Mitigation Measure 4.2-2(a) have been incorporated into the Project's CalEEMod analysis. The analysis therefore represents "unmitigated" construction conditions.

Construction of the Project is anticipated to last approximately 24 months. During construction, a variety of diesel-powered vehicles and equipment would be operated onsite. For example, grading would require earthmoving vehicles such as excavators and loaders. The Project's construction activities were grouped into the following phases for emissions modeling:

- Demolition – 2 weeks
- Grading – approximately 2 months
- Building Construction – approximately 22 months
- Paving – 1 week
- Architectural Coating – 5 months

The Project's unmitigated maximum daily regional and local emissions from these construction phases, as estimated using CalEEMod version 2022, are shown below in **Table 2**. Regional thresholds and LSTs for each air pollutant are also shown for comparison. The estimated emissions fully account for the Project's worst-case potential overlapping phases of construction, such as the overlap of building construction, paving, and architectural coatings activities. As shown, the Project's unmitigated regional construction emissions would not exceed SCAQMD regional significance thresholds for VOC, NO_X, SO_X, PM_{10}, or $PM_{2.5}$. The Project's unmitigated localized construction emissions also would not exceed SCAQMD LSTs for NO_X, CO, PM_{10}, or $PM_{2.5}$. This demonstrates that construction of the Project would not result in any significant project-level effects relating to regional and localized emissions of criteria air pollutants, and no mitigation measures are required.

Additionally, as discussed later in this analysis, pursuant to Program EIR Mitigation Measure 4.2-3, the Project would be conditioned to utilize construction equipment that meets CARB Tier 4 Final or USEPA Tier 4 off-road emissions for all equipment rated 50 horsepower or greater. Therefore, the Project's actual construction emissions are likely to be substantially lower than the emissions shown in **Table 2**, which do not account for the incorporation of Tier 4 off-road equipment standards or any other mitigation measures.

Table 2
Maximum Regional and Localized Daily Construction Emissions

Operations

Pursuant to Program EIR Mitigation Measure 4.2-2(b) (Operations Emissions Reduction), discretionary projects that would include more than 462 single-family residential units, 612 multi-family units (or mixed-use), or any equivalent combination thereof are required to prepare and submit an Air Quality Impact Analysis demonstrating that project operations emissions are less than applicable SCAQMD regional and localized significance thresholds. The Project would involve the development of 30 housing units and approximately 3,416 square feet of retail space, which would not come close to the equivalent emissions-generation potential of 462 single-family residential units or 612 multi-family units. The

Project's operations emissions would be a small fraction of the emissions associated with these screening criteria. Therefore, the Air Quality Impact Analysis requirement for operations emissions is not triggered. The Project's operations emissions would not exceed applicable SCAQMD regional and localized significance thresholds.

Toxic Air Contaminants ("TACs")

Pursuant to EIR Mitigation Measure 4.2-3 (Construction TAC Reduction Measures), discretionary projects located within 500 feet of a residence or other sensitive receptor and with an anticipated construction duration greater than 18 months are required to prepare and submit an Air Quality Impact Analysis with a construction health risk assessment (HRA) to quantify the cancer risk and Hazard Index posed by a project's DPM emissions. However, for projects conditioned to utilized construction equipment that meets CARB Tier 4 Final or USEPA Tier 4 off-road emissions for all equipment rated 50 horsepower or greater, pursuant to Program EIR Mitigation Measure 4.2-3, these requirements are waived, because the Program EIR has analyzed projects using such low-emissions equipment and determined that they do not generate substantial pollutant concentrations.

The Project is located within 500 feet of sensitive residential uses sited along Main Street, Hampton Drive, and other nearby roadways. The Project's construction is also estimated to last approximately 24 months. However, the Project would be conditioned to utilize construction equipment that meets CARB Tier 4 Final or USEPA Tier 4 off-road emissions for all equipment rated 50 horsepower or greater pursuant to Program EIR Mitigation Measure 4.2-3. Therefore, the Project would not be required to conduct a detailed Air Quality Impact Analysis and construction health risk assessment because the Program EIR has determined that projects using such low-emissions equipment do not generate substantial pollutant concentrations. The Project would not result in any new or increased significant impact related to construction TAC emissions.

Conclusion

As demonstrated above, the Project would not result in significant air quality impacts from construction, operations, TACs, or any other sources.

A checklist of the Program EIR's air quality mitigation measures that are triggered by the Project is included below. As discussed earlier, the Projects meets the criteria set forth in Mitigation Measure 4.2-2(a) (Construction Emissions Reduction), therefore a construction analysis was prepared demonstrating that the Project's construction emissions would result in a less than significant impact. For Mitigation Measure 4.2-2(b) (Operations Emissions Reduction), the Project does not meet the screening criteria and would not result in significant impacts from operational emissions. For Mitigation Measure 4.2-3 (Construction TAC Reduction Measures), the Project would be conditioned to utilize construction equipment meeting CARB Tier 4 Final or USEPA Tier 4 off-road emissions standards. Therefore, pursuant to Mitigation Measure 4.2-3, a construction HRA would not be required. No additional project-level mitigation measures are required.

	Applicable?	
• Mitigation Measure 4.2-2(a) – Construction Emissions Reduction	☒Yes	☐No

825 Hampton Drive Project

CalEEMod Notes

Note A Land use square footage, landscaping square footage, and other details are based on information provided by the Project applicant.

Note B Construction phases and phase durations are based on information provided by the Project applicant and the consultant's experience with similar projects in the City of Los Angeles.

Note C Construction equipment selections are based on construction phase information provided by the Project applicant, as well as Project details and the consultant's experience with similar projects in the City of Los Angeles. For some equipment, CalEEMod default horsepower assumptions were replaced with more conservative default estimates from CalEEMod version 2020. CalEEMod version 2022, the latest version of CalEEMod at the time of the analysis, seems to underestimate default horsepower ratings for certain construction equipment (e.g., excavators).

Note D Haul trip lengths are conservatively increased to 40 miles (one way) to reflect a range of possible landfill or other receiving locations.

6. Climate Risk Detailed Report

6.1. Climate Risk Summary

Cal-Adapt midcentury 2040–2059 average projections for four hazards are reported below for your project location. These are under Representation Concentration Pathway (RCP) 8.5 which assumes GHG emissions will continue to rise strongly through 2050 and then plateau around 2100.

Climate Hazard	Result for Project Location	Unit
Temperature and Extreme Heat	8.06	annual days of extreme heat
Extreme Precipitation	4.50	annual days with precipitation above 20 mm
Sea Level Rise	—	meters of inundation depth
Wildfire	0.00	annual hectares burned

Temperature and Extreme Heat data are for grid cell in which your project are located. The projection is based on the 98th historical percentile of daily maximum/minimum temperatures from observed historical data (32 climate model ensemble from Cal-Adapt, 2040–2059 average under RCP 8.5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Extreme Precipitation data are for the grid cell in which your project are located. The threshold of 20 mm is equivalent to about ¾ an inch of rain, which would be light to moderate rainfall if received over a full day or heavy rain if received over a period of 2 to 4 hours. Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Sea Level Rise data are for the grid cell in which your project are located. The projections are from Radke et al. (2017), as reported in Cal-Adapt (Radke et al., 2017, CEC-500-2017-008), and consider inundation location and depth for the San Francisco Bay, the Sacramento-San Joaquin River Delta and California coast resulting different increments of sea level rise coupled with extreme storm events. Users may select from four scenarios to view the range in potential inundation depth for the grid cell. The four scenarios are: No rise, 0.5 meter, 1.0 meter, 1.41 meters
Wildfire data are for the grid cell in which your project are located. The projections are from UC Davis, as reported in Cal-Adapt (2040–2059 average under RCP 8.5), and consider historical data of climate, vegetation, population density, and large (> 400 ha) fire history. Users may select from four model simulations to view the range in potential wildfire probabilities for the grid cell. The four simulations make different assumptions about expected rainfall and temperature are: Warmer/drier (HadGEM2-ES), Cooler/wetter (CNRM-CM5), Average conditions (CanESM2), Range of different rainfall and temperature possibilities (MIROC5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.

6.2. Initial Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	N/A	N/A	N/A	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	N/A	N/A	N/A	N/A
Wildfire	N/A	N/A	N/A	N/A
Flooding	N/A	N/A	N/A	N/A
Drought	N/A	N/A	N/A	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	N/A	N/A	N/A	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.

The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores do not include implementation of climate risk reduction measures.

6.3. Adjusted Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	N/A	N/A	N/A	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	N/A	N/A	N/A	N/A
Wildfire	N/A	N/A	N/A	N/A
Flooding	N/A	N/A	N/A	N/A
Drought	N/A	N/A	N/A	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	N/A	N/A	N/A	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.
The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores include implementation of climate risk reduction measures.

6.4. Climate Risk Reduction Measures

7. Health and Equity Details

7.1. CalEnviroScreen 4.0 Scores

The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Exposure Indicators	—
AQ-Ozone	47.0
AQ-PM	65.2

AQ-DPM	21.0

Executive Summary

South Environmental conducted a paleontological resources assessment for the Hampton Court Mixed Use Development Project in the City of Los Angeles, Los Angeles County, California (project). The purpose of this assessment is to describe the results of a paleontological resources literature review and records search, summarize the paleontological sensitivity of the geologic units within the project site, assess the potential for the project to impact scientifically significant paleontological resources, and provide management recommendations for avoiding or reducing project-related impacts to paleontological resources. This study was completed in compliance with the California Environmental Quality Act (CEQA) and all applicable City of Los Angeles paleontological resources requirements.

The project proposes to construct a mixed-use building including 30 multi-family residential units and approximately 3,416 square feet of commercial space and up to three subterranean levels of parking.

The geologic units found at the surface of the project site are Holocene-age alluvial deposits and are not likely to contain fossils. However, they are likely relatively thin (six feet thick or less) and underlain by Pleistocene-age deposits that have a much higher potential to contain paleontological resources. Additionally, seven scientifically significant fossil localities have been identified within one-mile of the project area. Therefore, full-time paleontological monitoring should be conducted on all ground-disturbing activities that take place during the course of the project. The full recommendations are presented in Section 3.2.

1 Introduction

South Environmental was retained to complete a paleontological resources assessment for the Hampton Court Mixed Use Development Project located in the City of Los Angeles, Los Angeles County, California. The purpose of this assessment is to describe the results of a paleontological resources literature review and records search, summarize the paleontological sensitivity of the geologic units within the project site, assess the potential for the project to impact scientifically significant paleontological resources, and provide management recommendations for avoiding or reducing project-related impacts to paleontological resources.

This report was prepared in conformance with the California Environmental Quality Act (CEQA) and all applicable City of Los Angeles ordinances by South Environmental Principal Paleontologist Justin Strauss, MS. Resumes for key staff are provided in Appendix C.

1.1 Project Location

The project site is located at 825 Hampton Drive in the City of Los Angeles, on California Assessor's Parcel Number (APN) 4286-012-039, and falls within the U.S. Geological Survey *Venice, California* 7.5 Minute topographical quadrangle map, San Bernardino Base Meridian, in Section 17, Township 02 South, Range 15 West in Los Angeles County, California (Figure 1). The project site is approximately 0.5-mile inland from the Pacific Ocean and 3.5 miles north of Los Angeles International Airport.

1.2 Project Description

The project proposes to construct a mixed-use building including 30 multi-family residential units and approximately 3,416 square feet of commercial space and up to three subterranean levels of parking. The total floor area of the project would be approximately 36,716 square feet, resulting in a Floor Area Ratio (FAR) of 1.986:1.

1.3 Regulatory Setting

Paleontological resources are generally considered non-renewable scientific resources because they cannot be replaced once damaged or destroyed, and considerable scientific information can be lost should they be disturbed or displaced from their original location and geologic context without a proper record of their original placement and arrangement in their natural sediments. For this reason, fossils are typically protected under a variety of federal, state, and local laws and regulations to ensure that these basic scientific considerations are made and carried out whenever paleontological resources are going to be disturbed. The pertinent laws and regulations governing paleontological resources are discussed in this section.

1.3.1 State

California Environmental Quality Act (CEQA)

CEQA requires that public agencies and private interests identify the potential environmental impacts of their projects on any object or site of significance to the scientific annals of California (Division I, California Public Resources Code [PRC] Section 5020.1 [j]). Appendix G in California Code of Regulations (CCR) Section 15023 provides an Environmental Checklist (Section 15023, Appendix G, Section XIV, Part A) that includes the following: "Would the project directly or indirectly destroy a unique paleontological resource or site or unique geological feature?"

California Public Resources Code (PRC)

Section 5097.5 of the PRC states:

> No person shall knowingly and willfully excavate upon, or remove, destroy, injure, or deface any historic or prehistoric ruins, burial grounds, archaeological or vertebrate paleontological site, including fossilized footprints, inscriptions made by human agency, or any other archaeological, paleontological, or historical feature, situated on public lands, except with the express permission of the public agency having jurisdiction over such lands. Violation of this section is a misdemeanor. As used in this PRC section, 'public lands' means lands owned by, or under the jurisdiction of, the state or any city, county, district, authority, or public corporation, or any agency thereof.

Therefore, public agencies are required to comply with PRC Section 5097.5 for their activities including construction and maintenance as well as for permit actions (e.g., encroachment permits) undertaken by others.

1.3.2 Local

City of Los Angeles General Plan

The General Plan for the City of Los Angeles discusses paleontological resources within the *Conservation Element*, under *Chapter II: Resource Conservation and Management*, *Section 3: Archaeological and Paleontological*, subsection *Paleontological* (City of Los Angeles, 1995a). It states:

> Site protection. Pursuant to CEQA, if a land development project is within a potentially significant paleontological area, the developer is required to contact a bona fide paleontologist to arrange for assessment of the potential impact and mitigation disruption of or damage to the site. If significant paleontological resources are uncovered during project execution, authorities are to be notified and the designated paleontologist may order excavations stopped, within reasonable time limits, to enable assessment, removal or protection of the resources. For Los Angeles city and county, the Los Angeles County Museum of Natural History, including the George C. Page Museum, provides advice concerning paleontological resources.
>
> **Conclusion.** The city has a primary responsibility in protecting significant archaeological and paleontological resources.
>
> **Continuing issues.** Loss of or damage to archaeological and paleontological sites due to development, unauthorized removal and vandalism.
>
> **Archaeological and paleontological objective, policy and program:**
>
> > Objective: protect the city's archaeological and paleontological resources for historical, cultural, research and/or educational purposes.
> >
> > Policy: continue to identify and protect significant archaeological and paleontological sites and/or resources known to exist that are identified during land development, demolition or property modification activities.

Additionally, the Final Environmental Impact Report of the General Plan for the City of Los Angeles includes an analysis of the potential for discovering scientifically significant fossil resources within the sediments found in the city of Los Angeles (City of Los Angeles, 1995b). Specifically, paleontological resources are included in Section 2.15 *Cultural Resources*. Within this section, Table CR-1 *High Potential Fossil-Producing Geologic Formations* lists a number for geologic formations within the City of Los Angeles considered to have High Potential for producing fossils. It includes the Palos Verdes Sand, San Pedro Sand, Lomita Marl, Timms Point Silt, Fernando Formation, Monterey Formation, Modelo Formation, Altamira Shale Member, Topanga Formation, Pico Formation, Chico Formation and Quaternary-aged alluvium.

Finally, the *Citywide Housing Element 2021-2029 Final Environmental Impact Report* of the General Plan for the City of Los Angeles contains mitigation measures intended to reduce the potential impacts to paleontological resources from construction activities taking place within the city to less-than-significant levels (City of Los Angeles, 2021). Specifically, *Chapter 5: Mitigation Monitoring Program* contains Mitigation Measure 4.5-1, which provides guidelines for projects that may impact paleontological resources:

4.5-1(a) Paleontological Procedures for Discretionary Projects - For all discretionary projects that involve excavation or grading activities at depths greater than previous disturbance on the respective site(s), prior to the start of construction, the following shall be conducted as discussed in detail below: prepare a resource assessment and records search for the presence of paleontological resources to determine if the project site is underlain by paleontological resources; monitor all excavation and grading activities in areas underlain by soils or geologic units potentially containing paleontological resources; and identify, record, and evaluate all paleontological resources uncovered during project construction and submit a paleontological assessment report to the City for review and approval. In addition, during project construction, the following shall be conducted as discussed in detail below: cease all construction activities in the event of the discovery of paleontological resources; conduct fossil recovery as necessary by a qualified paleontologist; avoid handling of paleontological resources by parties other than the qualified paleontologist responsible for conducting fossil recovery; and resume construction activities only upon clearance by the qualified paleontologist. These procedures, as detailed below, shall be implemented to avoid impacts to paleontological resources or reduce potential impacts to a less-than significant level:

- Prior to excavation and grading activities, a qualified paleontologist shall prepare a resource assessment and records search for the potential presence of paleontological resources. This assessment shall be informed by records from the Natural History Museum of Los Angeles County.

- If the assessment determines the project site is underlain by soils or geologic units with a medium to high potential for containing paleontological resources, a qualified paleontologist shall prepare a monitoring plan, and worker education plan. The paleontologist's assessment and any required monitoring or required worker education plan shall be submitted to the City for review and approval prior to the commencement of construction activities. Any monitoring plan shall include requiring compliance with Mitigation Measure 4.5-1(d) for discovery, salvage and treatment.

4.5-1(b) Worker Environmental Awareness Program, Fossil Salvage, and Construction Monitoring - If required by [paleontological] resources assessment under MM 4.5-1(a), prior to the start of construction, a paleontological monitor shall conduct training for construction personnel regarding the appearance of fossils and the procedures for notifying paleontological

staff should fossils be discovered by construction staff, and notice that the identified qualified paleontologist is the only one authorized to handle paleontological find(s), including but not limited to collection and removal. Approved plans shall include statement of WEAP requirement.

4.5-1(c) Construction Monitoring - If required pursuant to a monitoring plan prepared under MM 4.5-1(a), a paleontologist or designated paleontological monitor shall monitor ground disturbance activities, including the initial five feet below the ground surface, as areas with high paleontological sensitivity may contain resources at shallow depths and within the first five feet. If the paleontological monitor determines that full-time monitoring is no longer warranted, he or she may recommend that monitoring be reduced to periodic spot-checking or cease entirely. Monitoring shall be reinstated if any new or unforeseen deeper ground disturbances are required. After ground disturbing activities are completed, the paleontologist or designated monitor shall complete and submit a report to the City verifying compliance with the monitoring plan. Monitoring plan shall show on the plans.

4.5-1(d) Fossil Discovery, Salvage, and Treatment - All discretionary projects shall be subject to the following mitigation measure:

Discovery. If paleontological resources are uncovered during construction activities (in either a previously disturbed or undisturbed area), all ground-disturbing activities in the area of the find shall cease until a qualified paleontologist has evaluated the find, and identified and prepared an appropriate mitigation plan, in accordance with federal, state, and local guidelines, Construction activities in the area of the discovery shall commence again only after the identified resource(s) are properly processed by a qualified paleontologist, and if construction activities are cleared by the qualified paleontologist to continue. If cleared by the qualified paleontologist, construction activity may continue unimpeded on other portions of the project site that would not affect evaluation or recovery of the identified resource(s).

Fossil Salvage and Treatment. The qualified paleontologist or designated paleontological monitor shall recover intact fossils consistent with the mitigation plan and notify the City of any fossil salvage and recovery efforts. Typically, fossils can be safely salvaged quickly by a single paleontologist and not disrupt construction activity. In some cases, larger fossils (such as complete skeletons or large mammal fossils) require more extensive excavation and longer salvage periods. In this case the paleontologist shall have the authority to temporarily direct, divert or halt construction activity to ensure that the fossil(s) can be removed in a safe and timely manner. Any fossils shall be handled and deposited consistent with a mitigation plan prepared by the paleontological monitor. The qualified paleontologist shall prepare a report according to current professional standards including those of the SVP that describes the resource, how it was assessed, and disposition. The report shall be submitted to the City.

The requirements in this mitigation measure shall be shown on plans.

1.3.3 Paleontological Resource Definitions

SVP Paleontological Resource Significance Determination

Toward the goal of providing guidance to federal, state, and local agencies in carrying out environmental assessments, the Society of Vertebrate Paleontology (SVP) has created a set of definitions to determine the significance of paleontological resources. Significant paleontological resources are defined as follows:

> Fossils and fossiliferous deposits consisting of identifiable vertebrate fossils, large or small, uncommon invertebrate, plant, and trace fossils, and other data that provide taphonomic, taxonomic, phylogenetic, paleoecologic, stratigraphic, and/or biochronologic information. Paleontological resources are considered to be older than recorded human history and/or older than middle Holocene (i.e., older than about 5,000 radiocarbon years). (SVP, 2010)

By this definition, significant paleontological resources are fossils (or fossil assemblages) that are unique, unusual, rare, diagnostically important, or even common with the potential to provide additional scientific information about evolutionary patterns or the paleoenvironmental conditions of a site. This includes fossils that may enhance our understanding of depositional histories, evolutionary trends and patterns within lineages, information regarding palaeoecological environments, that can be used to identify the sedimentary rock units that they are within, or fossils that are unique to a particular geologic region. For this reason, even common or unidentifiable invertebrate and vertebrate fossil remains may be considered scientifically significant, particularly within the larger context of a geologic area from which many specimens have previously been collected and examined.

Because CEQA does not define a "unique paleontological resource or site", the definitions set forth by the SVP are used for all paleontological projects that are subject to CEQA.

For additional information relating to the determination of the potential significance of paleontological resources based on SVP guidelines, please see Appendix A: Paleontological Resource Potential Classifications. These definitions have been used to determine the potential paleontological sensitivity of the project site.

2 Paleontological Sensitivity Determination Methods

To assess the paleontological sensitivity of the project site and determine its placement within the definitions provided by the SVP, and several sources of recorded data were examined:

1) Published geologic maps of the project site and surrounding vicinity.
2) A collections record search was performed by the Natural History Museum of Los Angeles County (NHMLA) to identify previously collected localities within one mile of the project site.
3) Searches of the following on-line databases were performed to determine additional fossil sites recorded within one mile of the project site and within similar rocks in the vicinity:
    a. University of California Museum of Paleontology (UCMP) Collections
    b. The Paleobiology Database
    c. iDigBio
4) Additional published and unpublished paleontological literature pertaining to the project site and the surrounding vicinity.

2.1.1 Geologic Context

Geologic Setting

The project site sits within the Peninsular Ranges Geomorphic Province. The Peninsular Ranges is a region that is approximately 125 miles in length and bound to the north by the Transverse Ranges, stretching to Baja California in the south. It contains northwest trending valleys and is bordered on the east by the Colorado Desert (California Geological Survey, 2002).

Specifically, the project site is located within the Los Angeles Basin, an area that is approximately 20 miles wide and 50 miles long. It is bound to the north by the Santa Monica Mountains, to the east by the Elysian, Puente and Repetto Hills, to the southeast by the San Joaquin Hills and Santa Ana Mountains, to the northeast by the Coyote Hills, and to the southwest by the Palos Verdes Peninsula. The basin is broken into four major blocks, the central, northwest, southwest and northeast blocks (Yerkes et al., 1965). The project is located on the northern end of the southwest block.

The San Andres transformation zone has played a large part in the formation of the Los Angeles Basin, affecting it tectonically (Hauksson, 1990; Wright, 1991), resulting in discontinuous deposition starting in the Late Cretaceous. In the late Miocene to the early Pliocene, the basin went through a period of subsidence that led to extensive deposition of sediments. These sediments were primarily derived from turbidity currents, resulting in the basin filling more rapidly than it was subsiding. This is where much of the present-day marine and fluvial sediments that can be observed on the surface originated from (Hauksson, 1990). There have been at least three cycles of marine transgression and regression that

have created embayments and flood plains along the ancient coastline (Yerkes et al., 1965). This was just one of several basins formed during the Miocene and Plioecene as a result of the San Andres transformation taking place along the western margin of North America (Fuis et al., 2001; Hauksson, 1990). Today, the Los Angeles Basin consists mostly of marine and fluvial sediments that are known to be up to 10 kilometers thick (Hauksson, 1990).

Site Specific Geology and Paleontology

The geology of the project site has been mapped as Quaternary alluvium (Qa / Qal / Qya) (Dibblee and Minch, 2007; Jennings, 1962; Saucedo et al. 2016). It consists of Holocene-aged alluvial gravel, sand and clay that is largely derived from the Santa Monica Mountains and other minor stream channels. Holocene-aged sediments are typically considered to be of Low potential for scientifically significant paleontological resources. However, it is well documented within the area around the project site that these younger sediments are typically relatively thin (six feet thick or less) and are underlain by Pleistocene-age deposits, which are considered to be of High potential paleontological resources.

Pleistocene-age deposits in the area are well known to contain scientifically significant vertebrate fossils (Miller, 1971), including the world famous La Brea Tarpits of Rancho La Brea, which are located just 8.5 miles northeast of the project site. Vertebrate remains of an incredibly wide variety have been collected from the La Brea Tarpits including owls, dire wolf, timber wolf, American lion, Columbian mammoth, horse, and saber-toothed cat, among others (Harris, 2015).

Additionally, there have been a number of significant fossil discoveries made within one mile of the project site within Pleistocene-age sediments found as shallow as six feet below ground surface. Fossils recovered from these paleontological localities include American lion, ground sloth, horse, and a number of invertebrate shell beds (Bell, 2024).

Summary of Geologic Units in the Project Site and their Paleontological Sensitivity

Geologic Units	Map Abbr.[1]	Age	Fossils[2]	Sensitivity
Quaternary Alluvium	Qa / Qal / Qya	Holocene	None	Low

Records Search Results

The NHMLA searched its paleontological records (Bell, 2024) for all fossil localities recorded within one mile of the project site, finding seven within its records. South Environmental also performed a records search of several online databases for all fossil localities recorded within one mile of the project site on the Paleobiology Database (PBDP) and iDigBio database, and for all fossils found in similar deposits within the county recorded in the University of California Museum of Paleontology (UCMP) collections. The results of the records and online database searches are summarized below:

Source	Localities	Age/Formation	Taxa	Depth	Distance
NHMLA					
	LACM VP 5462	Pleistocene, Unknown	American lion (*Felis atrox*)	6 ft.	1-mile
	LACM IP 4749	Pleistocene, Unknown	Invertebrates (gastropod: *Eulima ramondi* and others)	Unk.	1-mile
	LACM VP 7879	Pleistocene, Unknown	Rodent (*Rodentia*), ground sloth (*Paramylodon*), horse (*Equus*)	11 ft. – 130 ft.	1-mile
	LACM IP 5616, 41651, 41652, 24216	Miocene, Palos Verdes Sand	Invertebrates (*Capulus californicus* and others)	30 ft.	1-mile
PBDB	None	-	-	-	-
iDigBio	None	-	-	-	-
UCMP	597	Pleistocene	11 vertebrate; 4 plant; 494 invertebrate; 88 undefined	Not listed	Not specified

*NHMLA=Natural History Museum of Los Angeles County; UCMP = University of California Museum of Paleontology Collections Online Database; PBDB = Paleobiology Online Database; iDigBio = iDigBio Online Database

3 Findings and Recommendations

3.1 Findings

No scientifically significant fossil materials have been discovered within the project site based on the records searches of previously recorded fossil localities completed by the NHMLA. The sediments mapped at the surface are Holocene-aged and have a Low potential to contain paleontological resources. However, these deposits are likely very thin (six feet thick or less) and underlain by Pleistocene-age sediments that have a High potential for yielding scientifically significant fossils. This conclusion is based on the records search performed by the NHMLA (Bell, 2024) and the literature and map review performed by South Environmental. The project proposes to construct a mixed-use building including 30 multi-family residential units and approximately 3,416 square feet of commercial space and up to three subterranean levels of parking. These activities have the potential to result in significant impacts under CEQA including destruction, damage, or loss of scientifically significant paleontological resources. A Qualified Paleontologist (SVP, 2010) should be retained to develop and implement the recommended measures below to reduce impacts to paleontological resources below a level of significance. The proposed measures have been developed in accordance with SVP guidelines and, if implemented, would meet the requirements of the City of Los Angeles and CEQA.

3.2 Recommendations

In accordance with the City of Los Angeles General Plan (City of Los Angeles, 1995a), the City of Los Angeles FEIR (City of Los Angeles, 1995b), and the Citywide Housing Element 2021-2029 FEIR Mitigation Measure 4.5-1 (City of Los Angeles, 2021), a qualified paleontological monitor is required during all excavations. The following sections (Sections 3.2.1 through 3.2.6) provide specific recommendations to conduct paleontological monitoring in accordance with the City of Los Angeles General Plan, the City of Los Angeles FEIR, the City of Los Angeles Citywide Housing Element 2021-2029 FEIR and CEQA.

3.2.1 Paleontological Mitigation Plan

In accordance with the City of Los Angeles General Plan, including the *Citywide Housing Element 2021-2029 FEIR* Mitigation Measure 4.5-1, when a paleontological assessment determines that a project site is underlain by soils or geologic units with a medium to high potential for containing paleontological resources, a qualified paleontologist shall prepare a paleontological resource monitoring plan (PRMP) and worker environmental awareness program (WEAP). The paleontologist's assessment and any required PRMP and WEAP shall be submitted to the City for review and approval prior to the commencement of construction activities. Any monitoring plan shall include requiring compliance with Mitigation Measure 4.5-1(d) for discovery, salvage and treatment.

3.2.2 Pre-Construction Personnel Training

Prior to the beginning of any ground disturbing activities, the Qualified Paleontologist shall conduct a WEAP for all personnel. The program should include descriptions of potential fossil resources that may be encountered in the project site during earth-moving activities, a discussion of the pertinent laws and regulations relating to said paleontological resources in the area, and a review of the steps that should be taken if a fossil discovery is made. The program shall be developed by the Qualified Paleontologist and delivered simultaneously with trainings on cultural and biological resources (if applicable), safety reviews, and other matters of concern.

3.2.3 Paleontological Monitoring

Due to the high potential for the discovery of scientifically significant fossil materials during ground disturbance activities, full-time paleontological resource monitoring should be performed by a paleontological monitor under the direction of a Qualified Paleontologist during said activities. Monitoring should involve the visual inspection of all earth-moving activities, graded areas, trench sidewalls, and spoils piles. If the Qualified Paleontologist determines that full-time monitoring is no longer required based on the geologic conditions of the site, the paleontologist may recommend that monitoring be reduced or stopped entirely.

Paleontological monitors should prepare daily logs describing the activities of the construction crew, the types of excavation work being done, the equipment being used, recordings of the geology observed during these activities, and records of any fossil discoveries made, whether they be determined to be significant or not. Paleontological monitors should also attempt to record the stratigraphy of the rock that is exposed by construction activities, whether or not fossils were discovered within the exposed sediments.

If the paleontological monitor determines that full-time monitoring is no longer warranted, he or she may recommend that monitoring be reduced to periodic spot-checking or cease entirely. Monitoring shall be reinstated if any new or unforeseen deeper ground disturbances are required.

3.2.4 Fossil Discoveries

Should fossil materials be discovered, either by the paleontological monitor or the construction field crew, the paleontological monitor shall have the authority to temporarily halt or divert construction activities and equipment in a 50-foot radius around the site to further assess the discovery. Should the fossils be determined to be of scientific significance, they should be collected as soon as possible. Standard field procedures should be used in the collection of the fossils to ensure that no scientific data is lost in the recovery process. Fossil specimens discovered during construction can typically be collected by a single qualified paleontologist within a single day, usually in less than one hour. Occasionally, more extensive efforts may be required to properly salvage a fossil specimen, particularly for larger skeletal elements, entire skeletons, or large collections of smaller fossil remains. Should this

be the case, the paleontological monitor should have the authority to temporarily halt, divert, or redirect construction activities to ensure that the fossil can be salvaged in a safe and timely manner. The paleontological monitor should work directly with the field crew to clearly communicate their intentions and determine the best way to safely protect and recover the fossils, with minimal disruption to construction efforts.

3.2.5 Fossil Preparation and Curation

The NHMLA should be identified for the long-term storage and care of any fossil specimens discovered during paleontological monitoring. Upon completion of the project, collected fossil specimens should be prepared to the standards required by the NHMLA and delivered as soon as is feasible upon completion of the preparatory work. Preparatory work should include the removal of excess sedimentary matrix, as well as any steps necessary for the repair and stabilization of the specimens. The specimens should be identified to the lowest taxonomic level possible, and copies of all field notes and information related to the fossil should be kept and provided to the repository as well upon delivery of the specimen. The cost of curation will be determined by the repository, and the costs of preparation and curation will be the responsibility of the client.

3.2.6 Final Paleontological Mitigation Report

Upon completion of paleontological monitoring, the Qualified Paleontologist shall prepare a final monitoring and mitigation report to be submitted to all interested parties. This report should detail the monitoring activities and methods used during construction, a description of the construction activities that took place, stratigraphic sections created during monitoring, a review of any fossils discovered (whether or not they were deemed significant and collected), a detailed description of the fossils that were collected including their scientific significance, and information relating to the repository where the fossils will be curated.

4 Certification

I hereby certify that the statements furnished above and in the attached exhibits present the data and information required for this paleontological resources assessment, and that the facts, statements, and information presented are true and correct to the best of my knowledge and belief

Signed:  Date: January 9, 2025

Justin J. Strauss, MS

Appendix A:
Paleontological Resource Potential Classifications

Paleontological Resource Potential Classifications

When specific agency guidelines are not provided regarding the protection and preservation of paleontological resources, professional paleontologists in California will refer to the guidelines set forth by the Society of Vertebrate Paleontology (SVP) in order to determine the level of mitigation activities necessary for a particular project. These assessments are made by examining the geologic units in the area, known paleontological sites and localities recorded in the vicinity, and references made to the area by published literature. Based on the results of these analyses, the paleontological resource potential of the geology in the area can be classified into one of four categories: High Potential, Low Potential, Undetermined Potential, and No Potential.

Although these guidelines were created specifically for vertebrate fossil remains, they have generally been adopted for use in all fields of paleontology. The definitions for these categories are listed below:

High Potential

Rock units from which vertebrate or significant invertebrate, plant, or trace fossils have been recovered are considered to have a high potential for containing additional significant paleontological resources. Rocks units classified as having high potential for producing paleontological resources include, but are not limited to, sedimentary formations and some volcaniclastic formations (e. g., ashes or tephras), and some low-grade metamorphic rocks which contain significant paleontological resources anywhere within their geographical extent, and sedimentary rock units temporally or lithologically suitable for the preservation of fossils (e. g., middle Holocene and older, fine-grained fluvial sandstones, argillaceous and carbonate-rich paleosols, cross-bedded point bar sandstones, fine-grained marine sandstones, etc.). Paleontological potential consists of both (a) the potential for yielding abundant or significant vertebrate fossils or for yielding a few significant fossils, large or small, vertebrate, invertebrate, plant, or trace fossils and (b) the importance of recovered evidence for new and significant taxonomic, phylogenetic, paleoecologic, taphonomic, biochronologic, or stratigraphic data. Rock units which contain potentially datable organic remains older than late Holocene, including deposits associated with animal nests or middens, and rock units which may contain new vertebrate deposits, traces, or trackways are also classified as having high potential.

Low Potential

Reports in the paleontological literature or field surveys by a qualified professional paleontologist may allow determination that some rock units have low potential for yielding significant fossils. Such rock units will be poorly represented by fossil specimens in institutional collections, or based on general scientific consensus only preserve fossils in rare circumstances and the presence of fossils is the exception not the rule, e. g. basalt flows or Recent colluvium. Rock units with low potential typically will not require impact mitigation measures to protect fossils.

Undetermined Potential

Rock units for which little information is available concerning their paleontological content, geologic age, and depositional environment are considered to have undetermined potential. Further study is necessary to determine if these rock units have high or low potential to contain significant paleontological resources. A field survey by a qualified professional paleontologist to specifically determine the paleontological resource potential of these rock units is required before a paleontological resource impact mitigation program can be developed. In cases where no subsurface data are available, paleontological potential can sometimes be determined by strategically located excavations into subsurface stratigraphy.

No Potential

Some rock units have no potential to contain significant paleontological resources, for instance high-grade metamorphic rocks (such as gneisses and schists) and plutonic igneous rocks (such as granites and diorites). Rock units with no potential require no protection nor impact mitigation measures relative to paleontological resources.

South Environmental
Attn: Justin Strauss

re: Paleontological resources records search for the 825 Hampton Court Project (24-267)

Dear Justin:

I have conducted a thorough search of our paleontology collection records for the locality and specimen data for proposed development at the 825 Hampton Court project area as outlined on the portion of the Venice USGS topographic quadrangle map that you sent to me via e-mail on November 22, 2024. We do not have any fossil localities that lie directly within the proposed project area, but we do have fossil localities nearby from the same sedimentary deposits that may occur in the proposed project area, either at the surface or at depth.

The following table shows the closest known localities in the collection of the Natural History Museum of Los Angeles County (NHMLA).

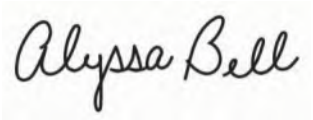
Locality Number	Location	Formation	Taxa	Depth
LACM VP 5462	2500 block of Michigan Ave, Santa Monica	Unknown formation (Pleistocene)	American lion (*Felis atrox*)	6 ft bgs
LACM IP 4749	SW of the intersection of Olympic Blvd and 4th St; Santa Monica	Unknown formation (Pleistocene)	Invertebrates (gastropod: *Eulima ramondi* and others)	Unknown
LACM VP 7879	Penmar Recreation Center; intersection of Penmar Ave and Rose Ave; Venice	Unknown formation (Pleistocene; sandy silty clay)	Rodent (Rodentia); ground sloth (*Paramylodon*); horse (*Equus*)	11 - 130 ft bgs
LACM IP 5616, 41651, 41652, 24216	Vicinity of Marina Del Ray	Palos Verdes Sand	Invertebrates (*Capulus californicus* and others)	30 feet bgs

VP, Vertebrate Paleontology; IP, Invertebrate Paleontology; bgs, below ground surface

This records search covers only the records of the NHMLA. It is not intended as a paleontological assessment of the project area for the purposes of CEQA or NEPA. Potentially fossil-bearing units are present in the project area, either at the surface or in the subsurface. As such, NHMLA recommends that a full paleontological assessment of the project area be conducted by a paleontologist meeting Federal (43 Code of Federal Regulations Part 49.110) or

Society of Vertebrate Paleontology standards.

Sincerely,



Alyssa Bell, Ph.D.
Natural History Museum of Los Angeles County

Mobile: 661-755-6090

Justin Strauss, M.S.

PRINCIPAL PALEONTOLOGIST

Justin Strauss is a paleontological resources professional with more than 23 years of experience in the fields of paleontology and biology. He meets the Society of Vertebrate Paleontology's definition of a Qualified Professional Paleontologist. Mr. Strauss has been involved in paleontological surveys and excavations in California, Colorado, Montana, Nevada, South Dakota, Utah, and Wyoming. He has specific expertise in the paleontological resources requirements of the California Environmental Quality Act (CEQA), Paleontological Resources Preservation Act of 2009 (PRPA), and National Environmental Policy Act (NEPA). His responsibilities include the management and reporting of paleontological resource survey, salvage, and monitoring programs, as well as training paleontological monitors on proper recording, excavation, and handling of fossil materials.

Mr. Strauss has a strong understanding of geology and is knowledgeable in animal anatomy (both invertebrate and vertebrate), and can identify many different elements, rock types and fossil remains in the field. He has extensive experience in monitoring of geologically and paleontologically significant sites and is capable of both the interpretation and creation of geologic and topographic maps. He can read and interpret aerial photographs and has extensive experience using GIS data to develop databases that store paleontological locality information, in addition to using GPS equipment to locate and document fossil localities and other paleontologically and geologically significant sites.

Mr. Strauss has had extensive involvement in the collection and excavation of fossil materials in the field from a variety of rock types, including mudstone, sandstone, and shale. He has excavated a variety of fossil materials, including invertebrate, vertebrate and plant remains. He practices the most up to date excavation techniques to ensure safe and efficient collection of fossil materials in the field. He has collected, handled, and cared for specimens of all kinds and sizes, from tiny rodent teeth to large dinosaur bones.

EXPERTISE

- CEQA, PRPA, and NEPA compliance documentation in consideration of impacts to paleontological resources.
- The identification of rock materials, interpretation of geologic events, and collection, preparation, and preservation of fossil materials.
- Design, management, and reporting of paleontological resource survey, salvage, and monitoring programs.

EDUCATION

M.S., Evolutionary Biology, San Diego State University, 2008

B.S., Geology, emphasis in Paleontology, South Dakota School of Mines and Technology, 2005

PROFESSIONAL AFFILIATIONS

Society of Vertebrate Paleontology (2001–present)

Geological Society of America (2010-present)

American Association for the Advancement of Science (2012-present)

SELECT PROJECT EXPERIENCE

2502 and 2518 Jefferson Street Project, Carlsbad, San Diego County, California (2024). Mr. Strauss prepared a paleontological resources assessment for this residential development project. He conducted a paleontological resources records search at the San Diego Natural History Museum, conducted pedestrian survey of the project site, and prepared a paleontological assessment in compliance with CEQA and the City of Carlsbad's guidelines. Role: Principal Paleontologist.

Tides at Terramar Project, Carlsbad, San Diego County, California (2024). Mr. Strauss prepared a paleontological resources assessment for this residential development project. He conducted a paleontological resources records search at the San Diego Natural History Museum, conducted pedestrian survey of the project site, and prepared a paleontological assessment in compliance with CEQA and the City of Carlsbad's guidelines. Role: Principal Paleontologist.

901 Mission Avenue Project, San Diego County, California (2024). Mr. Strauss prepared a paleontological resources assessment for this residential development project that included a paleontological resources records search at the San Diego Natural History Museum and preparation of a paleontological assessment in compliance with CEQA. Role: Principal Paleontologist.

Haskel Canyon Switching Station, Santa Clarita, Los Angeles County, California (2014). While working for his previous firm, Mr. Strauss conducted paleontological monitoring of construction of switching station foundation. Collection of arthropod and mollusk specimens including gastropods and bivalves. Role: Paleontological Specialist.

Governor Road Onramp Expansion Project, Miramar, San Diego County, California (2014). While working for his previous firm, Mr. Strauss conducted paleontological monitoring of expansion to existing onramp to Governor Road. His work included the collection of gastropod fossils. Role: Paleontological Specialist.

Tonner Hills, Walden Hills Project, Orange County, California (2009). While working for his previous firm, Mr. Strauss prepared a report for paleontological monitoring activities conducted in the Tonner Hills/Walden Hills area for a residential housing development. Role: Paleontological Specialist.

Solar Millennium Project – Blythe, Riverside County, California (2009). While working for his previous firm, Mr. Strauss conducted paleontological block survey on federal lands. His work included the collection and minor preparation of Pleistocene fossils, primarily tortoise remains and petrified wood fragments. Work on final report for survey. Role: Paleontological Field Lead.

Solar Millennium Project – Palen, Riverside County, California (2009). While working for his previous firm, Mr. Strauss conducted paleontological block survey on federal lands. His work included the collection and minor preparation of Pleistocene fossils, primarily tortoise remains and petrified wood fragments. Work on final report for survey. Role: Paleontological Field Lead.

Solar Millennium Project – Ridgecrest, Riverside County, California (2009). While working for his previous firm, Mr. Strauss conducted paleontological block survey on federal lands. He also worked on the paleontological survey report. Role: Paleontological Field Lead.

1.0 EXECUTIVE SUMMARY

An Environmental Site Assessment - Phase I (PEA Formatted) was prepared for the subject property located at 825 South Hampton Drive, Los Angeles, California 90291. The scope of work for this Phase I report conforms to the procedures outlined in the ASTM E 1527-21 *Standard Practice for Environmental Site Assessments* and the scope of the *Preliminary Endangerment Assessment Guidance Manual – CalEPA-DTSC*, October 2015. The purpose of the Phase I (PEA Formatted) report is to provide information regarding the potential for hazardous material impacts to the soil and groundwater beneath the subject property. Such threats or material threats are identified in this report as Recognized Environmental Conditions (RECs). The presence of Historical Recognized Environmental Conditions (HRECs) and Controlled Recognized Environmental Conditions (CRECs) was also evaluated. The extent of this evaluation in conjunction with owner/client-supplied data is intended to satisfy the requirements of all appropriate inquiry into the previous ownership and uses of the property. The scope of the work included a site reconnaissance, research of land use records and other sources for preliminary indications of hazardous material use, storage, or disposal at the property and/or on contiguous parcels.

The subject property is located on the south side of South Hampton Drive at the intersection of Abbot Kinney Boulevard and Brooks Ave, in the neighborhood of Venice in the City of Los Angeles, California. The current street address is 825 South Hampton Drive. Historical addresses include 165 Brooks Avenue and 833 Washington Boulevard. According to the Los Angeles County Tax Assessor's office, the Assessor's Parcel Number APN for the subject property is 4286-012-043.

The subject property consists of one (1) roughly triangular-shaped parcel of land that encompasses approximately 18,847 square feet. The property is currently developed with five (5) permanent structures and several shipping containers used as office space. The five (5) permanent structures were constructed in 1927 and 1931 and the shipping containers were brought onsite between 1994 and 2002. The entire property is currently occupied by Spot Welders, which is a video production company. The remainder of the property is asphalt paved. Access to the property is via Brooks Avenue to the east and S. Hampton Drive to the north. Redevelopment with a four-story mixed-use structure including three levels of subterranean parking is proposed.

Historical site utilization research indicates that the subject property was developed with the four existing permanent structures by 1928. Historical building permits indicate a paint/solvent spray booth was added to the property in 1982. Historical city directory records indicate the subject property was utilized as a tire and battery shop, gas station, auto repair facility, and paint shop from approximately 1927 to 1995. From 1995 to present the subject property has been utilized as office space for the currently existing tenant, Spot Welders Inc.

The City of Los Angeles Fire Department (LAFD) records indicate five (5) gasoline underground storage tanks (USTs) and one (1) waste oil tank were present on the property, with the first two (2) USTs installed in 1926. Two (2) of the tanks (7500 & 550 gallons) were removed or abandoned by 1948. As of 1963, three (3) USTs and one (1) waste oil were reported at the site. The LAFD has no records for abandonment of the three USTs and waste oil tank reported in 1963. Additionally, the LAFD records do not contain information for the removal and associated sampling of the features associated with the auto repair facility (in ground lifts, clarifiers, & drains) or paint/solvent spray booth installed on the subject property in 1982. These are considered a REC.

AEI Consultants (AEI) prepared a Phase I Environmental Site Assessment for the subject property in April 2016. AEI identified several RECs for the subject property including: the subject property's historical use as a tire and

battery shop, gas station, auto repair facility, and paint shop from 1927 to 1986, lack of records for the removal of the former USTs and gas station infrastructure, auto repair facility (in ground lifts, clarifiers, & drains), and paint/solvent spray booth. AEI recommended implementing a Phase II Subsurface Investigation, development of an asbestos O&M plan / asbestos survey, and a lead-based paint survey prior to demolition or renovation of the onsite structures.

AEI conducted a pre-demolition asbestos and lead-based paint survey for the subject property buildings in June 2016. The assessment identified asbestos containing material (ACM) and lead-based paint in the subject property buildings. AEI recommended the ACM should be removed by a California licensed asbestos abatement contractor and Cal-OHSA/HUD lead safety practices should be implemented during building demolition.

AEI conducted a limited Phase II Investigation on the subject property in July 2016. The investigation consisted of five (5) borings to depths of 10 to 15 feet below ground surface (bgs) in the vicinity of the former gas station and auto repair facility. One (1) boring was proximal to the suspected location of the onsite USTs. One (1) soil gas probe was installed at 5 ft bgs in each boring and one (1) soil sample was collected from each boring at a depth of either 5 ft bgs or 10 ft bgs. Soil samples were analyzed for total petroleum hydrocarbons (TPHcc) via EPA Method 8015M, volatile organic compounds (VOCs) via EPA Method 8260B, and Title 22 Metals via EPA Method. Soil gas samples were collected from each probe and analyzed for VOCs and TPHg via EPA Method TO15. One soil sample detected a low concentration of gasoline, with VOCs not detected and metals were generally below the relevant US EPA Residential Screening Levels. Soil gas samples contained TPHg, BTEX compounds, and several other fuel related VOCs. TPHg was detected in all five (5) samples ranging from 2,300 $\mu g/m^3$ to 46,000 $\mu g/m^3$ and 1,3-butadiene was detected in two (2) samples ranging from 10.9 $\mu g/m^3$ to 373 $\mu g/m^3$. Several of the TPHg and 1,3-butadiene concentrations were above the relevant US EPA residential vapor screening levels per 2016 CalEPA guidance. AEI recommended that a soil management plan (SMP) be developed and implemented during any future soil movement work on the subject property.

In December 2018 AEI issued an Addendum Letter to the July 2016 Phase II Investigation. The Addendum reiterated the findings of the AEI Phase II Report and noted that future site development contractors would be required to follow appropriate protocols during site grading work including as required agency notifications, development of a Health & Safety Plan and implementation of best management practices. Additionally, the Addendum noted that if impacted soil was encountered it may be necessary to further characterize soil and perform soil removal confirmation sampling.

AEI developed a Soil Management Plan (SMP) for the subject property dated April 2019. The SMP provided protocols for management of potential impacts to worker health and safety encountered during planned redevelopment activities at the subject property in accordance with standard practices, to provide a framework for subject property management procedures, and to indicate tasks that should be overseen or undertaken by an Environmental Consultant. The SMP indicated the client would enroll the site in the Los Angeles County Fire Department Health and Hazardous Materials Unit Voluntary Oversight Program to provide lead agency status during site redevelopment activities. Additionally, the SMP also provided protocols for post-excavation sampling (tests for TPHcc, VOCs, and Metals) and testing requirements for reuse of soil onsite and for imported fill.

AEI prepared a Phase I Environmental Site Assessment for the subject property in March 2021. AEI updated their evaluation of the soil gas data collected during the July 2016 Phase II investigation and noted that in addition to TPHg and 1,3-butadiene, benzene and ethylbenzene also exceeded the updated 2019 residential environmental soil gas screening levels (ESLs) issued by the San Francisco Regional Water Quality Control Board (SFRWQCB). AEI

noted the lack of historical UST records for the subject property as a REC. AEI recommended implementing engineering controls in the future redevelopment to prevent VOC and methane vapor intrusion, conducting a methane assessment prior to redevelopment, implement the April 2019 SMP during redevelopment, and review the LAFD Historical UST file for the subject property prior to redevelopment.

Methane Specialists conducted a LADBS approved methane survey on the subject property in January 2024. The investigation identified methane concentrations that require future structures on the subject property to have an LA City approved Level II methane mitigation system.

CE revaluated the soil gas concentrations detected in AEI's 2016 Phase II Investigation using the currently accepted CalEPA *Final Draft Supplemental Guidance: Screening and Evaluating Vapor Intrusion* (2023 Supplemental Guidance), that was released jointly by CalEPA DTSC and the SWRQCB in February 2023 to evaluate the overall vapor intrusion risk for the future planned residential structure. As outlined in the guidance document, CE utilized the highest concentration of each compound detected on the subject property and an attenuation factor (AF) of 0.03, which is the current standard when assessing vapor intrusion of future structures. The 2023 Supplemental Guidance document states, "the points of departure for risk management decisions are 1×10^{-6} cancer risk and a noncancer HI of 1." The calculated cumulative residential VI risk and hazard values are 6.74×10^{-4} and 30.1, respectively. The calculated cumulative residential VI risk and hazard values exceed the 10^{-6} cancer risk and 1 HI "point of departure". Engineering controls (such as a vapor intrusion mitigation system – VIMS) should be implemented in future structures on the subject property. This is considered a REC.

The subject property is identified on the standard environmental government sources researched in this report. The property is listed on the CIWQS database. The listing includes the subject property address (825 S Hampton Drive) and the offsite address 700 Main Street under the property name Rad Artlofts. The permit is for storm water construction, was issued in 2004 and terminated in 2010. This is not considered an environmental concern for the subject property.

The nearest listed contaminated site to the subject property is the MTA, Division 6 Bus Terminal (T0603701338) cleanup site located approximately 700 feet to the northwest. In 1998, seven (7) USTs were removed and replaced. Subsequent subsurface investigations identified elevated concentrations for gasoline and BTEX compounds in soil and groundwater above screening levels. Six (6) groundwater monitoring wells were installed and quarterly groundwater monitoring occurred until 2004. By 2004 groundwater samples were at non-detect concentrations. The site received closure from the Los Angeles Regional Water Quality Control Board on August 10, 2004. Based on the sites distance from the subject property and adequate cleanup of groundwater impacts it is considered unlikely that this offsite release has impacted the subject property.

California Environmental has prepared an Environmental Site Assessment - Phase I (PEA Format) in conformance with the scope and limitations of ASTM 1527-21 for the property located at 825 South Hampton Drive, Los Angeles, California. No data failures or data gaps were encountered during the preparation of this report. Review of recorded Land Title Records including environmental liens was excluded from this report. These records should be obtained and reviewed by the user.

The subject property was historically used as a tire and battery shop, gas station, auto repair facility, and paint shop from approximately 1927 to 1986. There are no records for the removal/abandonment for three (3) USTs and one (1) waste oil tank that remained onsite as of 1963 and/or for the removal of infrastructure associated with auto repair facility (in ground lifts, clarifiers, & drains) or paint/solvent spray booth. This is considered a

REC. Subsurface sampling conducted in 2016 identified soil gas concentrations that exceed the point of departure for vapor intrusion risk and engineering controls (such as a vapor intrusion mitigation system – VIMS) should be implemented for future structures on the subject property. This is considered a REC. No evidence of historical recognized environmental conditions (HREC) or controlled recognized environmental conditions (CRECs) were identified in connection with the subject property. CE recommends following the protocols outlined in AEI's April 2019 Soil Management Plan (SMP) during redevelopment. The SMP outlines steps to be taken to remove potential impacts encountered in soil during redevelopment and recommends entering the Los Angeles County Fire Department (LACFD) Health and Hazardous Materials Unit Voluntary Oversight Program. The LACFD will provide guidelines for any further assessment deemed necessary for the subject property, appropriate remediation recommendations, and confirmation sampling requirements. If USTs are encountered during future redevelopment activities, they should be appropriately abandoned following the City of Los Angeles Fire Department guidelines.

Soil gas concentrations detected on the subject property indicate engineering controls (such as a vapor intrusion mitigation system – VIMS) should be implemented to reduce vapor intrusion risk for future structures on the subject property. The VIMS should be designed to meet the required Level II methane mitigation system required for future structures on the subject property. Re-testing of soil gas concentrations, post grading, could be performed since removal of soil to depths of 25 feet during future grading for the proposed three subterranean levels may eliminate the VI hazard.

Asbestos containing material (ACM) and lead-based paint have identified within the subject property buildings. The ACM should be removed by a California licensed asbestos abatement contractor and Cal-OHSA/HUD lead safety practices should be implemented during building demolition.

2.0 INTRODUCTION

The following report presents the findings of the Environmental Site Assessment - Phase I prepared for the subject property located at 825 South Hampton Street, Los Angeles, California. The scope of the Phase I study meets ASTM E 1527-21 *Standard Practice for Environmental Site Assessments* and included research of available land use records and other sources for preliminary indications of hazardous material use, storage or disposal at the property. The findings of this study are intended to provide information to the client regarding potential hazardous material impacts to the soil and groundwater beneath the site.

The scope of the investigation was conducted in general accordance with ASTM Standard Practice for Environmental Site Assessments – Phase I, Environmental Site Assessment Process ASTM E 1527-21. The report also follows the general report guidelines outlined in the Preliminary Endangerment Assessment Guidance Manual – CalEPA-DTSC, October 2015. The steps outlined in this process are intended to permit a user (client) to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide purchaser limitations on CERCLA liability. Specifically, this report along with certain obligations of the client, constitutes All Appropriate Inquiry (AAI) into the previous ownership and uses of the property consistent with the standard of care as practiced in this area by environmental professionals. A main component of the assessment is to identify recognized environmental conditions, controlled recognized environmental conditions, and historical recognized environmental conditions, as they may affect the subject property. As defined by ASTM E 1527-21, a recognized environmental condition (REC) means *"(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment."* A controlled recognized environmental condition (C-REC) is defined *as "recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed*

to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).” An historical recognized environmental condition (HREC) is defined as *“a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).”*

An important component of complying with the ASTM E 1527-21 Standard is information to be obtained or in the possession of the client and/or seller of the property. Such information includes obtaining and review of a recent title report, any specialized information regarding the site or surrounding area which may give rise to identification of a recognized environmental condition, and/or reasons given by the seller should the purchase price be significantly lower than what would be reasonably expected for a property of similar size and value. Often a real estate appraiser is commissioned to evaluate the purchase or sale price of a property. Such an appraisal is outside the scope of this Phase I Assessment report.

The independent conclusions represent California Environmental’s (CE) professional judgment based on the conditions that existed and the information and data available during the course of the study. Factual information regarding operations, conditions, and test data provided by the client, the owner or their representatives have been assumed to be correct and complete. This report includes **CONCLUSIONS AND RECOMMENDATIONS**, which together with the remainder of this report are subject to the **NOTICE** at the end of the report. **This report was prepared for the sole use and reliance by the client as identified on the title page of this report. Use of this report by other entities is expressly forbidden unless the client and CE grant permission.**

The scope of work included:

- A walkover of the site.
- Review of client/owner supplied information.

- Review of building and grading permits on file with the City of Los Angeles Department of Building and Safety.
- A review of underground storage tank files and industrial waste records maintained by the City of Los Angeles Fire Department Underground Storage Tank and Hazardous Materials Divisions.
- Review of historical USGS topographic maps and historical aerial photographs maintained by EDR Company.
- Research of historical Sanborn Fire Insurance Maps maintained by EDR Company.
- Contact with the California Environmental Protection Agency, Department of Toxic Substances Control to review their files.
- Contact with the California Environmental Protection Agency, Regional Water Quality Control Board to review their files.
- Contact with the Los Angeles County Fire Department to review their files.
- Contact with the South Coast Air Quality Management District to review their files.
- Review of oil well records maintained by the Geologic Energy Management Division.
- Review of the City of Los Angeles – Zone Information and Map Access System (ZIMAS) database.
- Review of the California Integrated Waste Management Board - Solid Waste Information System (SWIS) database
- Review of the following lists and maps of suspect or known contaminated sites; a complete listing of these sources is contained within **APPENDIX V**.
    - California Regional Water Quality Control Board, (RWQCB) - *Computer Case Listing of Reported Underground Tank Leaks*, covering Los Angeles County.
    - California Department of Health Services - *Hazardous Waste and Substance Sites - Cortese List and Contaminated Wells List, which includes the Bond Expenditure Plan* (BEP) sites.
    - California Environmental Protection Agency, Facility and Manifest Data, HAZNET.
    - Historical California Environmental Protection Agency, Department of Toxic Substances Control - *CalSites List*.
    - California Department of Health Services, *Hazardous Waste Information System* (HWIS) and Tanner Report.
    - California Integrated Waste Management Board, *Solid Waste Information System* - (SWIS) List.

- State Water Resources Control Board, *Toxic Pits Clean-up Act (Toxic Pits).*
- State Water Resources Control Board, *Hazardous Substance Storage Container Database* (UST, LUST, SLIC, and WDS).
- U.S. Environmental Protection Agency - *National Priorities List* (NPL).
- U.S. Environmental Protection Agency - *Comprehensive Environmental Response, Compensation, and Liability Information System* (CERCLIS).
- U.S. Environmental Protection Agency, *Toxic Release Inventory System* (TRIS).
- U.S. Environmental Protection Agency, *Resource Conservation and Recovery Information, System Treatment, Storage and Disposal Facilities*, (RCRA-TSDF).
- U.S. Environmental Protection Agency, *Resource Conservation and Recovery Information System, Large Quantity Generators*, (RCRA-LQG).
- U.S. Environmental Protection Agency, Resource *Conservation and Recovery Information System, Small Quantity Generators*, (RCRA-SQG).
- U.S. Environmental Protection Agency - *Superfund Amendment and Reauthorization Act, Title III*, (SARA Title III).
- U.S. Environmental Protection Agency, *Emergency Response Notification System* (ERNS).
- U.S. Environmental Protection Agency, *Facility Index System* (FINDS).
- U.S. Environmental Protection Agency, *Civil Enforcement Docket* (DOCKET).

- A review of government records databases of suspect or known contaminated sites and historical city directories research was performed by EDR Company. The results of the search are summarized in this report. The EDR reports are enclosed in **APPENDICES II** and **V**.
- Review of previous environmental reports prepared by AEI Consultants and others.
- Preparation of this report.

3.0 SITE DESCRIPTION

3.1 LOCATION AND LEGAL DESCRIPTION

The subject property is located on the south side of South Hampton Drive at the intersection of Abbot Kinney Boulevard and Brooks Ave, in the neighborhood of Venice in the City of Los Angeles, California, see **FIGURE 1 - VICINITY MAP**. The current street address is 825 South Hampton Drive. Historical addresses include 165 Brooks Avenue and 833 Washington Boulevard. According to the Los Angeles County Tax Assessor's office, the Assessor's Parcel Number APN for the subject property is 4286-012-043.

3.2 DESCRIPTION OF PROPERTY / PROPOSED PROJECT

The subject property consists of one (1) roughly triangular-shaped parcel of land that encompasses approximately 18,847 square feet. The property is currently developed with five (5) permanent structures and several shipping containers used as office space. The five (5) permanent structures were constructed in 1927 and 1931 and the shipping containers were brought onsite between 1994 and 2002. The entire property is currently occupied by Spot Welders, which is a video production company. The remainder of the property is asphalt paved. Access to the property is via Brooks Avenue to the east and S. Hampton Drive to the north. Redevelopment with a four-story mixed-use structure including three levels of subterranean parking is proposed.

3.3 GEOLOGY AND HYDROGEOLOGY

The subject property is located near the southern portion of the Ballona Gap and is underlain by silt, sand, and gravel deposits of alluvial origin. The site is within the Santa Monica Groundwater Basin. The Pacific Ocean is located approximately 2,000 feet to the southwest.

Groundwater level data was obtained from the AEI Consultants Limited Phase II Subsurface Investigation conducted on the subject property in 2016. AEI encountered groundwater at 10.60 feet below ground surface. Regional groundwater flow is to the southwest, towards the Pacific Ocean.

4.0 BACKGROUND INFORMATION

4.1 PREVIOUS WORK

AEI Consultants (AEI) – *Phase I Environmental Site Assessment, 825 Hampton Drive, Venice, Los Angeles County, California 90291,* dated April 22, 2016. AEI prepared a Phase I ESA report for the subject property pursuant to the ASTM 1527-2013 Standard for Phase I Environmental Assessments using the All-Appropriate Inquiry (AAI) Standard. AEI identified a Recognized Environmental Condition (RECs) for the subject property. The site was used as a tire and battery shop, gas station, auto repair facility, and paint shop from 1927 to 1986. AEI was unable to obtain records from the Los Angeles City Fire Department for the removal of the former USTs and gas station infrastructure and any associated verification sampling conducted. Additionally, there were no records available on the removal of features associated with the auto repair facility (inground lifts, clarifiers, & drains) or paint/solvent spray booth. AEI also noted that the subject property is located within a methane zone and due to the date of the building construction asbestos containing material and lead based paint may have been used onsite. AEI recommended implementing a Phase II Subsurface Investigation, development of an asbestos O&M plan / asbestos survey, and a lead-based paint survey prior to demolition or renovation of the onsite structures.

AEI – *Pre-Demolition Asbestos Survey and Lead-Based Pain Screen, 825 Hampton Drive, Venice, Los Angeles County, California 90291,* dated June 9, 2016. As part of the asbestos survey thirty (30) bulk samples were collected of suspect asbestos containing material (ACM). Laboratory samples identified two (2) materials that contained asbestos: Roof Flashing Mastic on the Kitchen Office Roof and Roof Flashing Mastic on the Office Storage building. As part of the lead-based paint survey fourteen (14)

samples of suspect paint were collected. Laboratory samples identified one (1) paint sample that contained lead: Exterior White Paint from the Kitchen Office. AEI recommended that the ACM be removed by a California licensed asbestos abatement contractor and Cal-OHSA/HUD lead safety practices be implemented during building demolition.

AEI – *Limited Phase II Subsurface Investigation, 825 Hampton Drive, Venice, Los Angeles County, California 90291,* dated July 5, 2016. AEI implemented a subsurface investigation on the subject property to investigate the RECs identified in their April 22, 2016 Phase I ESA. The investigation consisted of five (5) borings to a maximum depth of 10 to 15 feet below ground surface (bgs) in the vicinity of the former gas station and auto repair facility. One (1) soil gas probe was installed at 5 ft bgs in each boring. One (1) soil sample was collected from each boring at a depth of either 5 ft bgs or 10 ft bgs and analyzed for total petroleum hydrocarbons (TPHcc) via EPA Method 8015M, volatile organic compounds (VOCs) via EPA Method 8260B, and Title 22 Metals via EPA Method 6010B. One (1) soil gas sample was collected from each probe and analyzed for VOCs and TPHg via EPA Method TO15.

Analysis of the soil samples identified a concentration of 0.2 mg/kg of gasoline range hydrocarbons in one (1) sample. No VOCs were detected above the method detection limits. Metals concentrations were all below the relevant US EPA Residential Screening Level when considering background metals concentrations expected for the region. Analysis of soil gas detected concentrations of TPHg, BTEX compounds, and several other VOCs. TPHg was detected all five (5) samples ranging from 2,300 µg/m^3 to 46,000 µg/m^3, which was above the US EPA residential vapor screening level (3,100 µg/m^3) accepted in 2016. 1,3-Butadiene was detected in two (2) samples ranging from 10.9 µg/m^3 to 373 µg/m^3, which was above the US EPA residential vapor screening level (93 µg/m^3) accepted in 2016. Other VOCs detected, including BTEX compounds, were below the US EPA residential vapor screening levels at the time.

AEI recommended that a soil management plan (SMP) be developed and implemented during any future soil movement work on the subject property.

AEI – Addendum Letter: ***Limited Phase II Subsurface Investigation, 825 Hampton Drive, Venice, Los Angeles County, California 90291,*** **dated December 6, 2018**. AEI issued an addendum letter to their 2016 Phase II Subsurface Investigation. The addendum reiterated the Phase II findings and noted requirements that future site development contractors would be required to follow (agency notification, development of a Health & Safety Plan, etc.). Additionally, the addendum noted that if impacted soil was encountered it may be necessary to further characterize soil and perform soil removal confirmation sampling.

AEI – Soil Management Plan*, 825 Hampton Drive, Venice, Los Angeles County, California 90291,* **dated April 24, 2019.** The SMP provided protocols to be followed to manage potential impacts to worker health and safety encountered during planned redevelopment activities at the subject property in accordance with standard practices, to provide a framework for subject property management procedures, and to indicate tasks that should be overseen or undertaken by an Environmental Consultant. The SMP indicated the client would enroll in the Los Angeles County Fire Department Health and Hazardous Materials Unit Voluntary Oversite Program to provide oversite during site redevelopment activities. Additionally, the SMP also provided protocols for post-excavation sampling (analyzed for TPHcc, VOCs, and Metals) and requirements for reuse of soil and imported fill.

AEI – ***Phase I Environmental Site Assessment, 825 Hampton Drive, Venice, Los Angeles County, California 90291,*** **dated March 16, 2021**. AEI prepared a Phase I ESA report for the subject property pursuant to the ASTM 1527-2013 Standard for Phase I Environmental Assessments using the All-Appropriate Inquiry (AAI) Standard. AEI identified several RECs for the subject property. AEI revaluated the soil gas concentrations detected in 2016 to align with the California Environmental Screening Levels (ESLs) that were updated in 2019. In addition to the exceedances of TPHg and 1,3-butadiene in 2016, AEI found several other compounds that exceeded the updated ESLS. This included benzene (maximum concentration of 41.1 µg/m^3; the residential ESL was 3.2 µg/m^3 and the commercial/industrial ESL was 14 µg/m^3) and ethylbenzene (maximum concentration of 155 µg/m^3; the residential ESL was 37 µg/m^3 and the commercial/ industrial ESL was 160 µg/m^3). Benzene was detected above residential ESLs in four of the five samples and ethylbenzene was detected above residential ESLs in only one sample. AEI noted

it is unclear if the detected soil gas concentrations are from on-site or off-site sources. Additionally, AEI's records search with the LAFD identified the historical site address (165 Brooks Street) as being listed on the Historical UST records list. AEI racqueted the files from the LAFD, but had not received them by the time the report was issued. AEI recommended implementing engineering controls in the future redevelopment to prevent VOC and methane vapor intrusion, conducting a methane assessment prior to redevelopment, implement the April 2019 SMP during redevelopment, and reviewing the LAFD Historical UST file for the subject property prior to redevelopment.

Methane Specialists – *Methane Investigation Report, 825 Hampton Drive, Venice, Los Angeles County, California 90291,* dated January 4, 2024. Methane specialists conducted a subsurface methane investigation for the subject property. The investigation identified methane concentrations that require future structures on the subject property to have a Level II methane mitigation system based on the City of Los Angeles Department of Building and Safety requirements outlined in the Division 71 Methane Seepage Regulations Section 91.7101 of the Los Angeles Municipal Code.

AEI's 2016 Phase II Subsurface Assessment, 2019 SMP, and 2021 Phase I ESA are attached in **APPENDIX VI**.

4.2 SITE UTILIZATION HISTORY

4.2.1 Historical City Directories

EDR Company was contacted to research historical city directories for the subject property and adjacent sites. The city directories were reviewed at approximately five year intervals spanning from 1920-2014. A summary of city directories reviewed for the subject property is included in **TABLE I**. The EDR City Directory is attached in **APPENDIX II**.

TABLE I
Historical City Directories

Year	Use/User	Source
825 S. Hampton Drive		
1995	Gendol Yn Cates Photography	Cole Information
2000-2014	Spot Welders Inc	Cole Information, Haines & Company
2020	Spot Welders Inc, Shipping & Handling Post Inc, Open Container LLC, D&L Funding	EDR Digital Archive
165 Brooks Avenue (Historical Address)		
1928-1933	Venice Super Service Station	Los Angeles Directory Co
1954-1965	Holdren Auto Service	R. L. Polk & Co, Pacific Telephone
1970-1975	Holdren Auto Service, Stewart Body & Paint	Pacific Telephone
1980-1985	Poor Man Body Shop, Lees Body & Paint Shop	Pacific Telephone, Pacific Bell
1991	Design D Avant Garde, Chevalier MG	Cole Information, Pacific Bell
1995	Design D Avant Garde, Chevalier MG, Rasbot Auto Service	Cole Information
2000-2005	M Chevalier	Haines & Company, Cole Information
833 Washington Boulevard		
No Listings		

4.2.2 Historical Aerial Photographs

Historical aerial photographs were reviewed as part of this study. The photographs are part of the aerial photograph collection maintained by the EDR Company. Seventeen (17) photographs were reviewed for the subject property. The photographs are summarized below in **TABLE II**. The aerial photographs are attached in **APPENDIX II** of this report.

TABLE II
Historical Aerial Photographs

Date	Source	Description
1928	FAIR	The subject property appears developed with a commercial structure along the northwest property line and a gas station on the remainder of the subject property. The surrounding area appears densely developed with residential structures to the south, west, and north. Commercial/industrial structure appears to the east of the subject property.
1938	USDA	The subject property and surrounding area appear similar to the previous aerial photograph.

TABLE II
Historical Aerial Photographs (continued)

Date	Source	Description
1947	FAIR	The subject property and surrounding area appear similar to the previous aerial photograph.
1952	USDA	The subject property and surrounding area appear similar to the previous aerial photograph.
1964	USGS	The subject property and surrounding area appear similar to the previous aerial photograph.
1972	EDR	The property adjacent to the southeast appears redeveloped with a parking lot. The subject property appears similar to the previous aerial photograph.
1977	EDR	The subject property and surrounding area appear similar to the previous aerial photograph.
1981	EDR	The subject property and surrounding area appear similar to the previous aerial photograph.
1989	USDA	Two (2) small structures appear on the subject property's southwest property line. The property adjacent to the southwest appears redeveloped with a commercial structure.
1994	SUGS/DOQQ	The subject property and surrounding area appear similar to the previous aerial photograph.
2002	USDA	One (1) additional small structure appears on the subject property's south property line. The remainder of the subject property and surrounding area appears similar to the previous aerial photograph.
2005	USDA/NAIP	The subject property and surrounding area appear similar to the previous aerial photograph.
2009	USDA/NAIP	The property adjacent to the north appears redeveloped with a residential structure. The subject property appears similar to the previous aerial photograph.
2012	USDA/NAIP	The subject property and surrounding area appear similar to the previous aerial photograph.
2016	USDA/NAIP	The subject property and surrounding area appear similar to the previous aerial photograph.
2020	USDA/NAIP	The subject property and surrounding area appear similar to the previous aerial photograph.
2022	Google Earth	The subject property and surrounding area appear similar to the previous aerial photograph.

4.2.3 Historical Fire Insurance Maps

The EDR Company was contacted to review historical fire insurance maps for the subject property. Maps covering the subject property for three (3) time periods between 1918 and 1970 were found. The map descriptions are summarized below in **TABLE III.** Copies of the fire insurance maps are attached in **APPENDIX II** of this report.

TABLE III
Historical Fire Insurance Maps

Date	Description
1918	The subject property appears undeveloped. Dense residential development is seen to the north, south, and west. Present day Abbot Kinney Boulevard is labeled as Washington Boulevard. An auto garage is seen across Washington Boulevard to the east of the subject property. The subject property is bound to the north by a Pacific Electric Railroad line.
1950	The subject property is developed with a gasoline service station and automotive repair shop. The property adjacent to the southeast is developed with a gas station. A gasoline service station appears across Washington Boulevard to the south.
1970	The subject property appears similar to the previous Sanborn Map. The gas station on the property adjacent to the south has been removed and the property is undeveloped. The rest of the surrounding area appears similar to the previous Sanborn Map.

4.2.4 Historical Topographic Maps

Historical USGS topographic maps were provided by EDR Company and from online database sources. Maps covering the subject property for twenty-one (21) time periods were found. The subject property appears in an area of dense urban development by 1923 and a railroad can be seen along the subject property's north property line. The railroad was removed between 1972 and 1981.

4.3 RECORDS REVIEW INFORMATION

4.3.1 Building Information

The City of Los Angeles Department of Building and Safety was contacted for the purpose of researching building permits and Certificates of Occupancies for the property. Building permits for the historical address 165 Brooks Avenue include permits to construct a public garage, wash rack, and rack room in 1927. An alteration permits from 1927 indicates the subject property's use as the time was as a service station. A 1961 alternation permit indicates the subject property was being used as a gas station. A permit was granted for the subject property in 1982 to install a spray booth. Permits for the current subject property address 825 S. Hampton Drive include several administrative approval documents from 2004 for the installation of fire sprinklers and an additional property exit, a 2017 grading permit, and an affidavit stating the adjacent property (812 Main Street) has a foundation extending onto the subject property. Copies of the permits are included in **APPENDIX III**.

4.3.2 Underground Storage Tank & Hazardous Materials Research

The City of Los Angeles Fire Department (LAFD) publishes lists of records for active and inactive underground storage tanks (USTs) and hazardous materials inventories within the city of Los Angeles. CE's review of the lists released by the LAFD indicates that a file is maintained for the historical subject property address 165 Brooks Avenue and CE reviewed the associated LAFD file. The file indicates that one (1) 7,500-gallon gasoline UST and two (2) 500-gallon USTs were installed on the subject property in 1926. The 7,500-gallon UST was abandoned in 1937 and one (1) of the 500-gallon USTs was removed in 1948. One (1) 1,000-gallon gasoline UST was installed on the property in 1937. One (1) 1,000-gallon gasoline UST and one (1) 120-gallon waste oil tank were installed on the property in 1948. As of 1963,

three (3) USTs (550-gallon UST from 1926, 1,000-gallon UST from 1937, and 1,000-gallon UST from 1948) and the one (1) waste oil tank from 1948 were present onsite. The LAFD records do not include a map of the UST locations, however they do include distances from the subject property line. This is the extent of information in the LAFD file. The approximate locations of the USTs are shown on the attached **FIGURE 2 – PLOT PLAN**. The LAFD records do not include information on the abandonment of the USTs remaining as of 1963 or indicate if sampling was conducted during their removal/abandonment. This is considered a REC for the subject property. The LAFD records are attached in **APPENDIX IV**.

4.3.3 State Regulatory Agency File Review

The State of California Department of Toxic Substances Control (DTSC) Envirostor and the California Regional Water Quality Control Board (RWQCB) GeoTracker online databases were reviewed for any information they may have regarding soil, soil gas, water, or air contamination at the subject property. CE's review of the GeoTracker and Envirostor online databases indicates that no files are maintained for the subject property.

4.3.4 LACFD-HHMD and SCAQMD File Review

The online Los Angeles County Fire Department – Health Hazardous Materials Division (LACFD-HHMD) database was reviewed for any information associated with soil, water or air contamination at the subject property. The database does not include files for the subject property's current or historical addresses.

The SCAQMD online FIND database was researched for any active or inactive records related to the subject property. A review of the SCAQMD Facility Information Detail (FIND) database indicates that there is one listing for the historical subject property address 165 Brooks Avenue. The listing is for Lee's Paint & Body Shop, which received a permit to operate a paint and solvent spray booth in 1985. The permit has expired, and Lee's Paint & Body Shop is no longer located on the subject property. The listing is included in **APPENDIX IV**.

4.4 SITE DRIVE-BY

A drive-by of the area within one-quarter mile of the property was conducted to help identify nearby sites that possibly use, store, or generate hazardous materials. The area surrounding the subject property consists of residential and commercial properties. No service stations are located on the properties adjacent to the subject property. A list of selected environmental risk sites identified within a one-quarter mile radius of the subject property is included in the **STANDARD ENVIRONMENTAL RECORDS SOURCES** section of this report.

5.0 SITE RECONNAISSANCE

The site conditions were observed during a reconnaissance conducted by Eric Koons of California Environmental on January 11, 2024. California Environmental completed a Field Reconnaissance Checklist during the site reconnaissance. An Environmental Owner and User Questionnaire were completed by David Hidalgo of David Hidalgo Architects and Greg Naufal of Westwood Financial. During the site reconnaissance CE met with David Glean of Spot Welders, Inc., who is the current tenant on the subject property. Environmental Field Reconnaissance Checklist is included in **APPENDIX I**. The features described below are shown on the enclosed **FIGURE 2 - PLOT PLAN**. Photographs of the subject property are attached in the **ILLUSTRATIONS** section of this report.

5.1 DESCRIPTION OF THE PROPERTY

The subject property consists of one (1) roughly triangular-shaped parcel of land that encompasses approximately 18,847 square feet. The property is currently developed with five (5) permanent structures and several shipping containers used as office space. The five (5) permanent structures were constructed in 1927 and 1931 and the shipping containers were brought onsite between 1994 and 2002. The entire property is currently occupied by Spot Welders, which is a video production company. The remainder of the property is asphalt paved. Access to the property is via Brooks Avenue to the east and

S. Hampton Drive to the north. Redevelopment with a four-story mixed-use structure including three levels of subterranean parking is proposed.

5.2 ADJACENT PROPERTIES

The subject property is bound to the north by Hampton Drive with commercial and residential development beyond, to the east by Brooks Avenue with commercial and residential development beyond, to the south by Abbot Kinney Boulevard with commercial and residential beyond, and to the west by a construction site with Main Street and commercial and residential development beyond.

5.3 TOPOGRAPHY AND DRAINAGE

The subject property has a gentle slope towards the south. The topographic elevation of the subject property ranges is approximately 15 feet above mean sea level. Drainage from the site is by sheetflow towards the adjacent city streets. No evidence of surface drains, catch basins, sumps or standing water was observed on the subject property at the time of the site reconnaissance.

5.4 PAST USES OF THE PROPERTY

No evidence of the past use, treatment, storage, disposal or generation of hazardous substances was observed on the subject property at the time of the site reconnaissance.

5.5 USE OF HAZARDOUS SUBSTANCES

No evidence of significant hazardous substance use was observed on the subject property at the time of the site reconnaissance.

5.6 STORAGE TANKS

No evidence of existing aboveground or underground storage tanks, clarifiers, sumps, or grease interceptors was observed on the subject property at the time of the site reconnaissance.

5.7 CONTAINERS OF HAZARDOUS OR UNIDENTIFIED SUBSTANCES

No evidence of containers of hazardous or unidentified substances was observed on the subject property at the time of the site reconnaissance.

5.8 SOLID WASTE DISPOSAL

Four (4) trash bins were observed along the south property line. No evidence of spills or staining was observed on the pavement beneath the bins.

5.9 POLY-CHLORINATED BIPHENYL'S (PCBs)

No evidence of PCB containing transformers or equipment was observed on the subject property at the time of the site reconnaissance.

5.10 HEATING/COOLING EQUIPMENT

Heating and cooling equipment was observed at the time of the site reconnaissance. Electricity is the power source for the heating and cooling equipment.

5.11 ASBESTOS CONTAINING MATERIALS (ACM)

Sampling of suspect asbestos containing material (ACM) was implemented by AEI Consultants in 2016. ACM was identified on the subject property. The ACM be removed by a California licensed asbestos abatement contractor prior to or during demolition. A discussion of AEI's 2016 asbestos inspection is included in **Section 4.1** of this report.

5.12 WASTEWATER TREATMENT AND DISPOSAL SYSTEMS

No evidence of wastewater treatment or disposal systems was observed on the subject property at the time of the site reconnaissance.

5.13 RADON

Radon hazard assessment was not included in the scope of this study. However, the EDR research report indicates the levels of radon at two (2) of thirty-nine (39) sites located within the 90291-zip code in Los Angeles County exceeded four picoCurie per Liter (4 pCi/L), the Federal Action level.

5.14 LEAD

Sampling of suspect lead in paint was implemented by AEI Consultants in 2016. Lead based paint was identified on the subject property. Cal-OHSA/HUD lead safety practices should be implemented during building demolition. A discussion of AEI's 2016 lead based paint inspection is included in **Section 4.1** of this report.

5.15 WELLS

No evidence of dry wells, irrigation wells, injection wells, abandoned wells, monitoring wells or other wells was observed on the subject property at the time of the site reconnaissance.

5.16 ODOR

No evidence of strong, pungent or noxious odors was noted on the subject property at the time of the site reconnaissance.

5.17 STRESSED VEGETATION

No evidence of stressed vegetation was observed on the subject property at the time of the site reconnaissance.

5.18 STAINING OR RESIDUE

No evidence of significant staining or residue was observed on the subject property at the time of the site reconnaissance.

5.19 PITS, PONDS, OR LAGOONS

No evidence of pits, ponds, and/or lagoons was observed on the subject property at the time of the site reconnaissance.

5.20 POTABLE WATER SUPPLY

Water is supplied to the subject property by the City of Los Angeles Department of Water and Power.

5.21 SEWAGE DISPOSAL SYSTEM

The subject property is connected to the public sewage disposal system.

5.22 OTHER CONDITIONS OF CONCERN

No other conditions of environmental concern regarding potential sources for soil and groundwater contamination were observed on the subject property at the time of the site reconnaissance.

6.0 NEARBY CONTAMINATED SITES

6.1 LANDFILLS

The Solid Waste Information Systems (SWIS), EDR database report, and the Waste Management Unit Database (WMUD) were reviewed to identify landfills and transfer stations located near the property.

These sources indicate that there are no landfills or transfer stations located within a 2,000-foot radius of the subject property. No active hazardous waste landfills are located within Los Angeles County.

6.2 OIL FIELD MAPS/METHANE HAZARD ZONES

The California Geologic Energy Management Division's (CalGEM) online mapping system (Well Finder) was researched to determine if oil production occurred on or near the subject property. The CalGEM Well Finder database indicates the northern boundary of the Venice Beach Oil Field is located approximately 280 feet south of the subject property. However, no oil wells are located within a 2,000-foot radius of the subject property.

The site is located with a recognized Methane Hazard Zone. Methane Hazard Zones are identified by Division 71 of the City of Los Angeles Building Code. Methane testing and possible implementation of methane mitigation measures will be required upon redevelopment of the property.

6.3 STANDARD ENVIRONMENTAL RECORD SOURCES

In addition to the above records, agency database lists were reviewed for known or suspected contaminated sites and for sites which store, generate or use hazardous materials near the subject property. The subject property is identified on the standard environmental government sources researched in this report. The property is listed on the CIWQS database. The listing includes the subject property address (825 S Hampton Drive) and the offsite address 700 Main Street under the property name Rad Artlofts. The permit is for storm water construction, was issued in 2004 and terminated in 2010. This is not considered an environmental concern for the subject property.

The nearest listed contaminated site to the subject property is the MTA, Division 6 Bus Terminal (T0603701338) cleanup site located approximately 700 feet to the northwest. In 1998, seven (7) USTs were removed and replaced. Subsequent subsurface investigations identified elevated concentrations for gasoline and BTEX compounds in soil and groundwater above screening levels. Six (6) groundwater monitoring wells were installed and quarterly groundwater monitoring occurred until 2004. By 2004

groundwater samples were at non-detect concentrations. The site received closure from the Los Angeles Regional Water Quality Control Board on August 10, 2004. Based on the sites distance from the subject property and adequate cleanup of groundwater impacts it is considered unlikely that this offsite release has impacted the subject property.

The number of environmental sites listed on the databases researched for this report located within a one-half mile radius of the subject property are presented in **TABLE IV**.

TABLE IV
Standard Environmental Record Sources

Database	Number of Sites		
	<1/8 Mile	1/8 – 1/4 Mile	1/4 to 1/2 Mile

Note: A search of public information databases may omit some nearby contaminated sites due to missing or inaccurate information in the public record.

6.4 POTENTIAL VAPOR ENCROACHMENT CONDITION (p-VEC)

The State of California has adopted the Vapor Intrusion Guidance document issued by CalEPA DTSC in October 2011. An updated version, *Final Draft Supplemental Guidance: Screening and Evaluating Vapor Intrusion* (2023 Supplemental Guidance), was released jointly by CalEPA DTSC and the SWRQCB in February 2023. CE used the currently accepted 2023 Supplemental Guidance with AEI Consultants' 2016 soil gas sampling data to evaluate the overall vapor intrusion risk for the future planned residential structure. As outlined in the guidance document, CE utilized the highest concentration of each compound detected on the subject property and an attenuation factor (AF) of 0.03, which is the standard when assessing vapor intrusion of future structures. The 2023 Supplemental Guidance document states, "the points of departure for risk management decisions are 1×10^{-6} cancer risk and a noncancer HI of 1." The calculated cumulative residential VI risk and hazard values, using the attenuation factor of 0.03, are 6.74×10^{-4} and 30.1, respectively. The calculated cumulative residential VI risk and hazard values exceed the "point of departure". Engineering controls (such as a vapor intrusion mitigation system – VIMS) should be implemented in future structures on the subject property. The VI risk and hazard calculations are attached in **APPENDIX VII**.

7.0 APPARENT PROBLEMS AND CONCERNS

- The subject property was historically utilized as a tire and battery shop, gas station, auto repair facility, and paint shop from approximately 1927 to 1995.

- LAFD records indicate five (5) gasoline underground storage tanks (USTs) and one (1) waste oil tank were historically present on the property. The 7,500-gallon UST is listed as "temporarily

abandoned" in 1937 and the 550-gallon UST is listed as removed in 1948. As of 1963, three (3) USTs and one (1) waste oil tank were present on the subject property. The LAFD does not maintain records on the abandonment of the USTs, dispensers, and piping remaining as of 1963 or indicate if sampling was conducted during their removal/abandonment. This is considered a REC for the subject property.

- There are no records for the removal and associated sampling of the features associated with the auto repair facility (inground lifts, clarifiers, & drains) or paint/solvent spray booth installed on the subject property in 1982. This is considered a REC.

- Subsurface sampling (soil and soil gas) was implemented on the subject property in 2016 by AEI Consultants. One sample location was located within the approximate area of the former USTs. One soil sample detected a low concentration of gasoline and VOCs were all at non-detectable concentrations. Soil gas sampling detected concentrations of volatile range hydrocarbons and primarily fuel-related VOCs. CE calculated the overall vapor intrusion risk for the future planned residential structure using the currently accepted 2023 CalEPA Supplemental Guidance document. The site exceeds the point of departure for vapor intrusion risk and engineering controls (such as a vapor intrusion mitigation system – VIMS) should be implemented in future structures on the subject property. This is considered a REC.

- Asbestos and lead-based paint sampling were conducted on the subject property by AEI Consultants in 2016. Asbestos containing material (ACM) and lead-based paint were identified in the subject property buildings. The ACM should be removed by a California licensed asbestos abatement contractor and Cal-OHSA/HUD lead safety practices should be implemented during building demolition.

- Methane sampling was conducted on the subject property by Methane Specialists in 2024. Methane was detected and a LA City approved Level II methane mitigation system is required for future structures on the subject property.

8.0 CONCLUSIONS AND RECOMMENDATIONS

California Environmental has prepared an Environmental Site Assessment - Phase I (PEA Format) in conformance with the scope and limitations of ASTM 1527-21 for the property located at 825 South Hampton Drive, Los Angeles, California. No data failures or data gaps were encountered during the preparation of this report. Review of recorded Land Title Records including environmental liens was excluded from this report. These records should be obtained and reviewed by the user.

The subject property was historically used as a tire and battery shop, gas station, auto repair facility, and paint shop from approximately 1927 to 1995. There are no records for the removal/abandonment of three (3) gasoline USTs and one (1) waste oil tank that remained onsite as of 1963 or for the removal of infrastructure associated with auto repair facility (inground lifts, clarifiers, & drains) or paint/solvent spray booth installed on the subject property in 1982. This is considered a REC. Subsurface sampling conducted in 2016 identified soil gas concentrations that exceed the point of departure for vapor intrusion risk and engineering controls (such as a vapor intrusion mitigation system – VIMS) should be implemented in future structures on the subject property. This is considered a REC. No evidence of historical recognized environmental conditions (HREC) or controlled recognized environmental conditions (CRECs) were identified in connection with the subject property. CE recommends following the protocols outlined in AEI's April 2019 Soil Management Plan (SMP) for the subject property prior to and during redevelopment. The SMP outlines steps to be taken to remove potential impacts encountered in soil during redevelopment and recommends enrolling in the Los Angeles County Fire Department (LACFD) Health and Hazardous Materials Unit Voluntary Oversight Program. The LACFD will provide guidelines for further assessment deemed necessary for the subject property, provide appropriate remediation recommendations, and issue confirmation sampling requirements. If USTs are encountered during future redevelopment activities, they should be appropriately abandoned following the City of Los Angeles Fire Department guidelines.

Soil gas concentrations detected on the subject property indicate engineering controls (such as a vapor intrusion mitigation system – VIMS) should be implemented to reduce vapor intrusion risk for future structures on the subject property. The VIMS should be designed to meet the required Level II methane mitigation system required for future structures on the subject property. Re-testing of soil gas concentrations, post grading, could be performed because removal of soil to depths of 25 feet during future grading for the proposed three subterranean levels may eliminate the VI hazard.

Asbestos containing material (ACM) and lead-based paint have identified within the subject property buildings. The ACM should be removed by a California licensed asbestos abatement contractor and Cal-OHSA/HUD lead safety practices should be implemented during building demolition.

This report is subject to the following **NOTICE**:

9.0 OPINION OF ENVIRONMENTAL PROFESSIONAL

All properties are subject to some element of environmental risk and the risk cannot be eliminated. Industrial and commercial properties developed prior to modern environmental laws are especially risk prone to environmental hazards which include, but are not limited to, wastes which may be toxic, ignitable, corrosive or reactive. The potential for these environmental hazards to impact the use of the property can be reduced by the identification and mitigation of the hazards prior to development or redevelopment of the property. Due to the difficulty in locating underground wastes, in some cases it is not always possible to ascertain that hazardous wastes are present on the property prior to development.

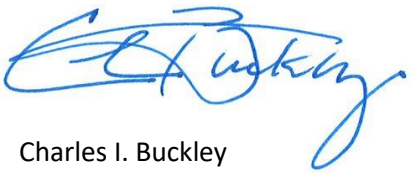
A Phase I environmental site assessment does not utilize subsurface exploration to check for the presence of hazardous wastes on the property. The experience of the assessor, along with the research of available reports, aerial photographs and land use records are used to evaluate the potential for hazardous wastes to occur on the site. Based on the information gained from the historical research, subsurface exploration may be recommended to check for the presence of hazardous wastes. Preexisting environmental problems such as the presence of hazardous wastes in the soil or groundwater, can be concealed by grading activities and site improvements. If such wastes are present these wastes cannot be observed.

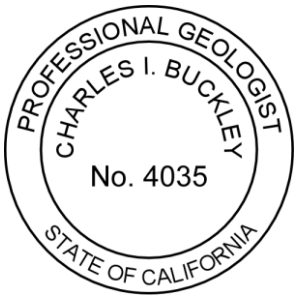
The undersigned, Charles I. Buckley declares that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312 and have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. I have the specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20.

This report was prepared with the skill and competence as commonly used by environmental professionals in this area. No warranty, expressed or implied, of any kind is made or intended in connection with this report, or by the fact you are being furnished this report, or by any other oral or written statement.

Should you have any questions or desire any additional information, please contact the undersigned.

Respectfully submitted,





Charles I. Buckley
Professional Geologist No. 4035
Certified Engineering Geologist No. 1250
Certified Hydrogeologist No. 55

Eric Koons

CHARLES I. BUCKLEY, JR.
30423 Canwood Street, Suite 208
Agoura Hills, California 91301

EDUCATION:

- **Masters** Work in Hydrogeology
  California State University, Los Angeles, 1980-1988
- **Bachelor of Science**, Engineering Geology
  University of California, Los Angeles, 1978

REGISTRATIONS AND APPOINTMENTS:

- State Mining and Geology Board, State of California, Dept. of Conservation, Former Member, (Appointed by Gov. Pete Wilson and State Senate confirmed to 4 year term, 1997-2001)
- State of California, Certified Hydrogeologist, No. 55
- State of California, Professional Geologist No. 4035
- State of California, Certified Engineering Geologist No. 1250
- CA Contractors State License Board #732377A-Haz

PROFESSIONAL EXPERIENCE:

Jan 88-Present CALIFORNIA ENVIRONMENTAL
CEO - Principal Hydrogeologist

- Founded California Environmental in January of 1988. Clients include Fortune 500 Corporations, County Government, Municipal Agencies, Financial Institutions, Land Developers, and Consultants. Principal Investigator for groundwater supply and groundwater contamination investigations. Project leader for groundwater remediation at a State of California Superfund Sites. Principal hydrogeologist for design and implementation of a groundwater-monitoring network for an existing Sanitary Landfill. Lead investigator to delineate structure of a California Groundwater Basin; Pioneered use of a cost effective soil/gas vapor technique used to track groundwater plumes. Conducted over 3,400 Phase I Environmental Investigations in California. These investigations included the use and interpretation of historic topographic maps, Sanborn Insurance Maps, aerial photography, and other historic data sources. Successfully completed remedial clean-up on 500+ sites in southern California; including impacts associated with fuels, PCBs, metals, asbestos and chlorinated solvents. Expert consultant for environmental impairment of soil and groundwater: Expert for the Port of Los Angeles, L.A. County Counsel, L.A. City Recreation and Parks and private attorneys.

CHARLES I. BUCKLEY, JR.
30423 Canwood Street, Suite 208
Agoura Hills, California 91301

PROFESSIONAL EXPERIENCE: (continued)

Mar 84-Dec 87 KOVACS-BYER AND ASSOCIATES
Manager Environmental Services Group

- Spearheaded the development into the groundwater and environmental segments of consulting market. Ascended from project geologist status to manager of Environmental Services Group. Responsible for all aspects of project management including; organization and staffing, developing technical requirements needed to complete projects, client and agency liaison.

- Provided technical leadership for groundwater testing including design and analysis of aquifer pump tests. Lead Geotechnical Investigator for remedial repair of complex landslide terrains. Prepared Seismic Analysis for critical facilities. Recommended specialized drainage systems for abatement of groundwater problems. Project Consultant for award winning projects on which severe geotechnical problems were overcome.

Mar 80-Mar 84 GEOTECHNICAL SERVICES GROUP
BUREAU OF ENGINEERING
CITY OF LOS ANGELES
Assistant Engineering Geologist

- Performed geologic mapping in hillside areas of the City of Los Angeles. Reviewed Geotechnical Reports submitted to the City of Los Angeles for private development. Directed landslide investigations. Prepared Expert Opinion documents regarding groundwater and geologic issues for the City Engineer and City Attorney. Conducted field monitoring of known landslides within the City of Los Angeles.

Aug 79-Mar 80 UNITED STATES GEOLOGICAL SURVEY
Field Assistant

- Assisted in geological mapping for a uranium resource development project sponsored by the Department of Energy and the United States Geological Survey.

CHARLES I. BUCKLEY, JR.
30423 Canwood Street, Suite 208
Agoura Hills, California 91301

CONTINUING EDUCATION:

- "Advanced Data Analysis Techniques for Evaluating and Quantifying Natural Attenuation for Remediation of Contaminated Sites", NGWA Short Course, March 2007.
- "Technical Guidance for Indoor Air Vapor Intrusion", Severn Trent Laboratory, San Pedro, CA, 1/2005.
- "Low Cost Remediation Techniques", AGSE, San Francisco, CA 2002.
- "Remediation of MtBE", AGSE, Anaheim, CA 2002.
- "Assessment and Management of MtBE Impacted Sites", San Francisco, January 1999.
- "Workshop on MtBE Water Issues", Los Angeles, June 1997.
- "Management Action Programs Seminar", Newport Beach, November 1996.
- "ACWA - Groundwater Workshop", Monterey, June 1995.

APPENDIX I

Environmental Field Reconnaissance Checklist and Field Interview, and User Questionnaire

ENVIRONMENTAL FIELD
RECONNAISSANCE CHECKLIST (PART A)

Completed By: Eric Koons Title: Senior Environmental Scientist

Property Address: 825 S Hampton Drive Date: January 11, 2024

USES OF THE PROPERTY	
1. Name of present occupants of the property (include business names and addresses or unit numbers):	Spot Welders Inc
2. Describe the present use(s) of the property:	Office Space
3. Describe the present of adjacent properties:	W = construction site. All other directions = commercial/residential
4. Is the property used for an industrial use?	No
5. Is any adjoining property used for an industrial use?	No
6. Is the property used as a gasoline station, auto repair facility, commercial printing facility, dry cleaners, photo developing laboratory, or junkyard? If so, identify which and give the name of the business(es):	No
7. Is the property used as a landfill or a waste treatment, storage, processing, recycling, or disposal facility?	No
8. Is any adjoining property used as a gasoline station, auto repair facility, commercial printing facility, dry cleaners, photo developing laboratory, or junkyard? If so, identify which and give the name of the business(es):	No
9. Is any adjoining property used as a landfill or a waste treatment, storage, processing, recycling, or disposal facility?	No
10. Is the property used for agricultural purposes?	No
PROPERTY CONDITIONS	
11. Are there or have there been any damaged or discarded industrial or automotive batteries on the property?	Possible – historical use as gas station/auto maintenance
12. Are there currently any solvents, paints, fuels, pesticides, herbicides, or other chemicals, in individual containers larger than 5 gallons or totaling more than 50 gallons, used on or stored at the property?	No
13. Are there currently any industrial drums (typically 55 gallons) or sacks of chemicals located on the property?	No
14. Is there any visible evidence fill dirt has been brought onto the property from a contaminated site?	No
15. Is there any visible evidence fill dirt has been brought onto the property from an unknown site?	No
16. Are there any waste treatment or waste disposal ponds, pits or lagoons on the property?	No
17. Is there any stained soil, or soil emitting unusual odors, on the property?	No

18. Are there any flooring, drains, or walls in the facility that are stained by substances other than water or have emitted unusual odors?	No
19. Is there heating and cooling equipment onsite?	Did not observe
20. What is the fuel source for any onsite heating and cooling equipment?	N/A
21. Is there any visible evidence of storage tanks (underground or aboveground) at the property?	No
22. Are there currently or have there been any vent pipes, fill pipes, fill ports, or surface covers indicating possible fill ports on the property or adjacent to any building located on the property?	Likely, but no visible evidence
23. Is there visible evidence of geotechnical and/or environmental subsurface assessments such as patched borings or groundwater monitoring well covers?	No
24. Are there any oil wells, drilling sumps, mud pits, or oil pipelines on or adjacent to the property?	No
25. Are there any pipelines on, beneath, or adjacent to the property, other than water, sewer, and natural gas utilities serving the property?	No
26. Is the property known to be located in a methane hazard area due to oil fields, natural seepage, or landfill gas?	Yes
27. Does the property or any facility at the property produce wastewater other than domestic sewage and storm water runoff?	No
28. Are there any waste water treatment systems (clarifiers, oil/water separators, grease traps, filtration systems, etc.) at the property?	No
29. How is waste water from the property disposed of? Sanitary sewer. Septic system. Surface water. Pond, pit, sump, or well. Other (describe).	sewer
30. Does the property or any facility at the property produce solid waste other than domestic trash and greenwaste?	No
31. How is solid waste from the property disposed of? Municipal or private trash service. Recycling. Onsite dumping or burial. Other (describe).	Trash bins along south property line
32. How is solid waste stored at the property?	Trash bins
33. Does the property or any facility at the property generate hazardous or special waste in the course of normal operation? Examples include spent solvents, photo processing waste, waste oil, used filters, etc. Provide copies of generator notification or waste manifests.	No
34. If hazardous or special wastes are generated at the property, how are they stored?	N/A

35. Are pesticides or herbicides stored, mixed, or disposed of on the property?	No
36. Are there any transformers, capacitors, or hydraulic equipment on the property that are known or suspected of containing PCBs?	No
37. Are there any building materials on the property known or suspected to contain asbestos? Please describe:	Yes, discussed in 2016 asbestos survey
ENVIRONMENTAL COMPLIANCE	
38. Does the property or any occupant of or facility on the property have any licenses, permits, registrations, or notifications for tanks, pipelines, industrial waste, wastewater treatment, wastewater discharge, stormwater discharge, waste disposal, waste storage or treatment, air emissions, chemical use, or chemical storage?	No
39. Is there visible evidence of any spills, leaks, or other releases or threatened releases of any hazardous substances or petroleum products from the property to soil, groundwater, or surface water?	No
40. Is there visible evidence of any release or threatened release of any hazardous substances or petroleum products from another location to soil, groundwater, or surface water at the property?	No
41. Is there visible evidence of the current or past existence of environmental violations on the property or in any facility located on the property?	No
42. Does the property discharge waste water, other than storm water runoff, into a storm drain or onto adjacent properties or streets?	No
43. Does the property discharge waste water, other than storm water, into a sanitary sewer system?	No
44. Is there visible evidence that hazardous substances, petroleum products, unidentified waste materials, tires, batteries, or any other waste materials have been dumped, buried, or burned on the property?	No

CALIFORNIA ENVIRONMENTAL
ENVIRONMENTAL FIELD INTERVIEW QUESTIONNAIRE (PART B)

Completed By: David Hidalgo, c/o Greg Naufal Title: Architect, c/o Senior Property Manager

Property Relation: Architect, c/o Property Manager Phone: 626.446.4148 / 310.820.5443

Property Address: 825 Hampton Drive, Venice, CA 90291

APN(s): 4286-012-039

Current Property Owner: Fogel Real Estate Site Name: Hampton Court

Present Property Use: (Check all that apply) ☐ Residential ■ Commercial ☐ Industrial ☐ Agricultural ☐ Government ☐ Undeveloped ☐ Other:

# of Buildings: 5 Date(s) Built: 1927 - 1931 # of Units: 8 Total sq. ft. ±5,204

Utility Provider: Water: LADWP Gas: SoCalGas Electric: LADWP

Occupants and General Business Type (Include Unit Numbers): Spot Welders, LLC (5 existing buildings, 3 temporary structures)

Past Owners and Dates of Ownership: R.B. Van Blaricom (1927), Michael Chevalier (1988)

Past Uses of the Property: Tire & Battery Shop (1927), Gas Service Station (1931)

Adjacent Property Use (Include General Business Type and Names):
North: Restaurant Building (Tacos Por Favor)
East: Office Building (Eames Original Offices)
South: HVAC Contractor Building (Optim Cooling & Heating)
West: Vacant lot (proposed Hotel)

If you answered 'Yes' to any of the items above, please explain:

1. Per the available 2016 Pre-Demolition Asbestos Survey & Lead-Based Paint Screening Report, Asbestos Containing Materials and Lead-Based Paint were identified.
2. Per the available City of Los Angeles Building Permit records:
1927: prior Tire & Battery Shop.
1931: prior Gas Service Station.
3. According to David Glean (existing Tenant), this former Gas Service Station (Building A) used to be serviced by an Underground Storage Tank (UST). At some point, the building switched to using two (2) Above-Grade Storage Tanks which are currently existing at the site. It is not known if the prior Underground Storage Tank was taken out or was simply abandoned and remains underground.
The first page of the Phase II Report (PDF page #3) under 2.0 BACKGROUND mentions the following: "A Phase I ESA

PROPERTY CONDITIONS	
Is there currently, or has there been, any solvents, paints, fuels, pesticides, herbicides, or other chemicals in individual containers larger than 5 gallons or totaling more than 50 gallons, used on or stored at the property?	Prior Gas Service Station and Spray Booth used some of these products, but capacity is unknown
What is the current topography (level, sloped, uneven, hills, valleys, etc.) of the property?	Level
Do you have any knowledge that fill dirt has been brought onto the property from a contaminated site?	No
Do you have any knowledge that fill dirt has been brought onto the property from an unknown site?	No
Is there any stained soil, or soil emitting unusual odors, on the property?	No
Is there any flooring, drains, or walls in the facility that are stained by substances other than water or have emitted unusual odors?	No
Is there heating and cooling equipment onsite?	Yes
What is the fuel source for any onsite heating and cooling equipment?	Heating: Gas. Cooling: Electric.
Are there currently or have there been any oil wells, drilling sumps, mud pits, or oil pipelines on or adjacent to the property?	Unknown
Are there currently or have there been any pipelines on, beneath, or adjacent to the property, other than water, sewer, and natural gas utilities serving the property?	Unknown
Is the property known to be located in a methane hazard area due to oil fields, natural seepage, or landfill gas?	Unknown
How is wastewater from the property disposed of (sanitary sewer, septic system, surface water, pond, pit, sump, etc.)?	Sanitary sewer (public)
Does the property or any facility at the property produce solid waste other than domestic trash and greenwaste?	No
How is solid waste from the property disposed (municipal or private trash service, recycling, onsite dumping, burial, etc.)? Please list the service company.	Municipal trash service (Athena S
How is solid waste stored at the property?	Trash dumpsters
Does the property or any facility at the property generate hazardous or special waste in the course of normal operation?	No
Has the property or any facility at the property generated hazardous or special waste due to occasional or one-time events such as asbestos abatement, soil or groundwater cleanup, or accidental events such as spills?	Unknown
If hazardous or special wastes are generated at the property, how are they stored?	They are not generated
Have pesticides or herbicides been stored, mixed, or disposed of on the property?	Unknown
Are there any building materials on the property known or suspected to contain asbestos?	Yes (roof flashing mastic)
Have any asbestos surveys been performed at the property?	Yes, in 2016
Have any asbestos removal or other abatement projects taken place at the property?	Unknown
Is there any known or suspected lead-based paint in buildings located at the property?	Yes (exterior white paint at kitcher

ENVIRONMENTAL COMPLIANCE	
Has the property ever been the subject of an environmental site assessment or environmental audit, with respect to soil, groundwater, surface water, air, or site facilities and processes?	Yes; see attached Environmental Site Assessment report (2016)
Has any environmental site assessment of the property indicated the presence of hazardous substances or petroleum products on, or contamination of, the property or recommended further assessment of the property? Please describe the manner in which any recognized environmental conditions have been addressed.	• Historical sources reviewed for this report identified a tire and battery shop, gas station, auto repair, and paint shop developed on the property from 1927 to circa 1986. At this time, no records have been provided by the Los Angeles City Fire Department regarding the removal and/or abandonment of the former underground storage
Does the property or any occupant of or facility on the property have any licenses, permits, registrations, or notifications for tanks, pipelines, industrial waste, wastewater treatment, wastewater discharge, stormwater discharge, waste disposal, waste storage or treatment, air emissions, chemical use, or chemical storage?	Unknown
Have you been informed of the current or past existence of hazardous substances or petroleum products on the property or in any facility located on the property?	According to David Glean (existing Tenant), this former Gas Service Station (Building A) used to be serviced by an Underground Storage Tank (UST). At some point, the
Do you have knowledge of any spills, leaks, or other releases or threatened releases of any hazardous substances or petroleum products from the property to soil, groundwater, or surface water?	No
Do you have knowledge of any release or threatened release of any hazardous substances or petroleum products from another location to soil, groundwater, or surface water at the property?	No
Have you been informed of the current or past existence of environmental violations on the property or in any facility located on the property?	No
Do you have any knowledge of environmental liens or governmental notifications relating to violations of environmental laws with respect to the property or any facility located on the property?	No
Do you have knowledge of any past, threatened, or pending lawsuits, enforcement actions, or administrative proceedings concerning the property?	No
If the property is served by a private well or a non-public water system, do you have any knowledge that contaminants exceeding applicable guidelines have been identified in the well or water system, or has the well or system been designated as contaminated by any governmental agency?	No
Does the property discharge waste water, other than storm water runoff, into a storm drain or onto adjacent properties or streets?	No
Does the property discharge waste water, other than storm water, into a sanitary sewer system?	Yes
Do you have any knowledge that hazardous substances, petroleum products, unidentified waste materials, tires, batteries, or any other waste materials have been dumped, buried, or burned on the property?	No

ADDITIONAL COMMENTS

Please provide any additional comments regarding the subject property:

USER QUESTIONNAIRE (PART C)

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Action of 2001 (the "*Brownfields Amendments*"), the *user* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that "*all appropriate inquiry*" is not complete.

The purpose of this section, defined in ASTM E1527-13, Section 6.1 *Users Responsibilities*, is to describe tasks to be performed by the user that will help identify the possibility of *recognized environmental conditions* in connection with the property. These tasks do not require the technical expertise of an *environmental professional* and are generally not performed by *environmental professionals* performing a *Phase I Environmental Site Assessment*. The purpose of this *User Questionnaire is* to assist the *environmental professional* in gathering information from the *user* that may be material to *identifying recognized environmental conditions*.

Completed By: David Hidalgo, c/o Greg Naufal Title: Architect, c/o Property Manager
Property Address: 02.07.2024 Date: 02.07.2024

1. Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, sate or local law?	No
2. Are you aware of any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded is a registry under federal, tribal, state or local law?	No
3. As the *user* of this ESA do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?	No
4. Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you concluded that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?	Unknown
5. Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user*,	Yes
a. Do you know the past uses of the *property*?	Yes
b. Do you know of specific chemicals that are present or once were present at the *property*?	Yes
c. Do you know of spills or other chemical releases that have taken place at the *property*?	No
6. Do you know of any environmental cleanups that have taken place at the property?	Unknown
7. As the user of this ESA, based on your knowledge and experience related to the *property*, are there any obvious indicators that point to the presence or likely presence of contamination at the *property*?	Yes

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by California Environmental were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Limited Permission To Make Copies

California Environmental (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT. Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by California Environmental were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# 3681

Project: 3681 - Abboy Kinney Blvd

Coordinates:

Latitude:	33.992826 33° 59' 34" North
Longitude:	-118.473711 -118° 28' 25" West
UTM Zone:	Zone 11 North
UTM X Meters:	363888.87
UTM Y Meters:	3762339.33
Elevation:	15.00' above sea level

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.
