Application to Alter, Repair or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

CLASS "D"

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

DECLARATIONS AND CERTIFICATIONS

LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date _____ Lic. Class _____ Lic. Number _____ Contractor _____ (Signature)

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☑ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code. The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

☐ I am exempt under Sec. _____, B. & P. C. for this reason _____

Date 12/7/82 Owner's Signature _____

WORKERS' COMPENSATION DECLARATION

18. I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.).

Applicant's Mailing Address _____

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

19. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

Date 12/7/82 Applicant _____

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

20. I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____ Lender's Address _____

21. I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

I realize that this permit is an application for inspection, that it does not approve or authorize the work specified hereon, that it does not authorize or permit any violation or failure to comply with any applicable law, that neither the city of Los Angeles nor any board, department, officer or employee thereof make any warranty or shall be responsible for the performance or results of any work described herein or the condition of the property or soil upon which such work is performed. This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA) INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, LLC or its affiliates. All other trademarks used herein are the property of their respective owners.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

825 HAMPTON DR
VENICE, CA 90291

COORDINATES

Latitude (North):	33.9928260 - 33° 59' 34.17''
Longitude (West):	118.4737110 - 118° 28' 25.35''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	363885.8
UTM Y (Meters):	3762145.0
Elevation:	15 ft. above sea level

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was identified in the following records. For more information on this property see page 9 of the attached EDR Radius Map report:

Site	Database(s)	EPA ID
RAD ARTLOFTS 700 MAIN ST & 825 HA VENICE, CA 90291	CIWQS	N/A

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL ---------- National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---------- Federal Facility Site Information listing
SEMS ---------- Superfund Enterprise Management System

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE ---------- Superfund Enterprise Management System Archive

Lists of Federal RCRA TSD facilities

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-VSQG ---------- RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System

US ENG CONTROLS ..... Engineering Controls Sites List
US INST CONTROLS ..... Institutional Controls Sites List

Federal ERNS list

ERNS ..... Emergency Response Notification System

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF ..... Solid Waste Information System

Lists of state and tribal leaking storage tanks

INDIAN LUST ..... Leaking Underground Storage Tanks on Indian Land

Lists of state and tribal registered storage tanks

FEMA UST ..... Underground Storage Tank Listing
AST ..... Aboveground Petroleum Storage Tank Facilities
INDIAN UST ..... Underground Storage Tanks on Indian Land

Lists of state and tribal voluntary cleanup sites

INDIAN VCP ..... Voluntary Cleanup Priority Listing

Lists of state and tribal brownfield sites

BROWNFIELDS ..... Considered Brownfieds Sites Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

WMUDS/SWAT ..... Waste Management Unit Database
SWRCY ..... Recycler Database
HAULERS ..... Registered Waste Tire Haulers Listing
INDIAN ODI ..... Report on the Status of Open Dumps on Indian Lands
ODI ..... Open Dump Inventory
DEBRIS REGION 9 ..... Torres Martinez Reservation Illegal Dump Site Locations
IHS OPEN DUMPS ..... Open Dumps on Indian Land

Local Lists of Hazardous waste / Contaminated Sites

AOCONCERN ..... Key Areas of Concerns in Los Angeles County
US HIST CDL ..... Delisted National Clandestine Laboratory Register
SCH ..... School Property Evaluation Program
CDL ..... Clandestine Drug Labs
Toxic Pits ..... Toxic Pits Cleanup Act Sites
US CDL ..... National Clandestine Laboratory Register

Local Lists of Registered Storage Tanks

CERS TANKS ..... California Environmental Reporting System (CERS) Tanks

Local Land Records

LIENS ..... Environmental Liens Listing

LIENS 2 ---- CERCLA Lien Information
DEED ---- Deed Restriction Listing

Records of Emergency Release Reports

HMIRS ---- Hazardous Materials Information Reporting System
CHMIRS ---- California Hazardous Material Incident Report System
LDS ---- Land Disposal Sites Listing
MCS ---- Military Cleanup Sites Listing
SPILLS 90 ---- SPILLS 90 data from FirstSearch

Other Ascertainable Records

FUDS ---- Formerly Used Defense Sites
DOD ---- Department of Defense Sites
SCRD DRYCLEANERS ---- State Coalition for Remediation of Drycleaners Listing
US FIN ASSUR ---- Financial Assurance Information
EPA WATCH LIST ---- EPA WATCH LIST
2020 COR ACTION ---- 2020 Corrective Action Program List
TSCA ---- Toxic Substances Control Act
TRIS ---- Toxic Chemical Release Inventory System
SSTS ---- Section 7 Tracking Systems
ROD ---- Records Of Decision
RMP ---- Risk Management Plans
RAATS ---- RCRA Administrative Action Tracking System
PRP ---- Potentially Responsible Parties
PADS ---- PCB Activity Database System
ICIS ---- Integrated Compliance Information System
FTTS ---- FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
MLTS ---- Material Licensing Tracking System
COAL ASH DOE ---- Steam-Electric Plant Operation Data
COAL ASH EPA ---- Coal Combustion Residues Surface Impoundments List
PCB TRANSFORMER ---- PCB Transformer Registration Database

SAMPLING POINT	SAMPLING POINT (GEOTRACKER)
WELL STIM PROJ	Well Stimulation Project (GEOTRACKER)

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA LF	Recovered Government Archive Solid Waste Facilities List
RGA LUST	Recovered Government Archive Leaking Underground Storage Tank

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal

EXECUTIVE SUMMARY

Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/24/2023 has revealed that there are 9 ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 26 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 09/23/2023 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

EDISON/VENICE MGP PA	340 MAIN STREET	NW 1/4 - 1/2 (0.265 mi.)	S98	177

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and

operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 8 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS HAZ WASTE:
Name: BBR RACING
Address: 703 S HAMPTON DR
City,State,Zip: VENICE, CA 90291
Site ID: 11350
CERS ID: 10251757
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 11350
Site Name: BBR RACING
Violation Date: 12-09-2016
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 01/23/2017. OBSERVATION: Copies of hazardous waste disposal records for 2014, 2015 and 2016. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the CUPA by 01/10/17.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code: F010
Waste Description: Quenching Bath Residues From Oil Baths From Metal Heat Treating Operations In Which Cyanides Are Used In The Process.

Waste Code: F037
Waste Description: Petroleum Refinery Primary Oil/Water/Solids Separation Sludge - Any Sludge Generated From The Gravitational Separation Of Oil/Water/Solids During The Storage Or Treatment Of Process Wastewaters And Oily Cooling Wastewaters From Petroleum Refineries. Such Sludges Include, But Are Not Limited To, Those Generated In Oil/Water/Solids Separators; Tanks And Impoundments; Ditches And Other Conveyances; Sumps; And Storm Water Units Receiving Dry Weather Flow. Sludges Generated In Storm Water Units That Do Not Receive Dry Weather Flow, Sludges Generated In Aggressive Biological Treatment Units As Defined In Section 261.31(B)(2) (Including Sludges Generated In One Or More Additional Units After Wastewaters Have Been Treated In Aggressive Biological Treatment Units), And K051 Wastes Are Exempted From This Listing.

Waste Code: F038
Waste Description: Petroleum Refinery Secondary (Emulsified) Oil/Water/Solids Separation Sludge - Any Sludge And/Or Float Generated From The Physical And/Or Chemical Separation Of Oil/Water/Solids In Process Wastewaters And Oily Cooling Wastewaters From Petroleum Refineries. Such Wastes Include, But Are Not Limited To, All Sludges And Floats Generated In Induced Air Flotation (Iaf) Units, Tanks And Impoundments, And All Sludges Generated In Daf Units. Sludges Generated In Stormwater Units That Do Not Receive Dry Weather Flow, Sludges Generated In Aggressive Biological Treatment Units As Defined In Section 261.31(B)(2) (Including Sludges Generated In One Or More Additional Units After Wastewaters Have Been Treated In Aggressive Biological Treatment Units), And F037, K048, And K051 Wastes Are Exempted From This Listing.

EDR MGP:

The Venice Manufactured Gas Plant site is a former "towne gas" facility. Manufactured gas was produced onsite in the early part of the century. In the 1920s, a portion of the property was transferred to the city of Los Angeles so that Main Street couuld be widened. In 1977, the property was sold to a private party who divided the site into Parcel A and Parcel B. Residues from the gasification process, mainly consisting of a material called "lamp black", were discovered at the site. "Lamp black"contains varying amounts of polynuclear or polycyclic aromatic hydrocarbons (PNAs or PAHs). Deposits, or seams, of this tar-like material are found throughout the site. Other constitu- ents of concern are cyanide, lead, and semi-volatile organics. Coomplaints of odors had been received from the neighborhood during the preliminary excavation activities for construction of a new building on Parcel A. An epidemiological survey by Los Angeles County found borderline significance between odor detect-- ion and symptom onset (headache; eyes, nose, and throat irrita- tion; fatigue; etc.) To date, analysis of air samples for benzene and napthalene have not revealed detectable levels of contami- ants. No excavation has occurred on Parcel B and at preesent Parcel B is an asphalt paved parking lot. The Remedial Investigation workplan, which addressed the con- tamination on both Parcel A and B, was approved by the Department on August 24, 1989. The Department has recently received the Feasibility SStudy and Health Risk Assessment which included the appropriate receptors and exposure pathways. The receptors include residents in the area and onsite and offsite workers. Exposure pathways include air and soil. Groundwater in the site vicinity is nnonpotable.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CA BOND EXP. PLAN:
Reponsible Party: RESPONSIBLE PARTY-LEAD SITE CLEANUP WORKPLAN
Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc: The RPs are in compliance with an order issued by the Department. DHS will be overseeing and monitoring the RPs cleanup efforts. DHS has budgeted $35,000 for direct costs related to the project. DHS will recover 100 percent of direct costs plus staff costs and overhead related to the project. The responsible parties will pay all costs associated with cleanup.
Site Description: Manufactured gas was produced onsite from petroleum residue roughly between the years 1900 to 1916. Various wastes were disposed of onsite. The site was subdivided. Some parcels have been developed and other portions paved over. The site is an old "towne gas" facility.
Hazardous Waste Desc: The wastes are generally characterized as polynuclear or polycyclic aromatic hydrocarbons (PNAs or PAHs). Deposits or seams of this tar-like material are found throughout the site. Constituents of concern include heavy metals, cyanide, benzene, naphthalene, and other semivolatile and volatile organics.
Threat To Public Health & Env: Ground water contamination is not suspected at the site. The unconfined zone that historically supplied the City of Santa Monica pumping plants is continuous beneath the gas plant site. Complaints of odors have been received from the neighborhood during the preliminary excavation activities. An epidemiological survey by Los Angeles County found borderline significance between odor detection and symptom onset (headache, eyes, nose, and throat irritation, fatigue, etc.). To date, analysis of air samples for benzene and naphthalene have not revealed detectable levels of contaminants.
Site Activity Status: The Department has issued a RAO to Southern California Edison and Southern California Gas and has approved an excavation plan for "Parcel A" of the site. The excavation should be completed in early 1989. Phase 1 of the RI has been completed. Additional contamination was discovered during the RI. Further site characterization has been conducted to determine the nature and extent of the additional contamination.

EDR MGP:

The Venice Manufactured Gas Plant site is a former "towne gas" facility. Manufactured gas was produced onsite in the early part of the century. In the 1920s, a portion of the property was transferred to the city of Los Angeles so that Main Street couuld be widened. In 1977, the property was sold to a private party who divided the site into Parcel A and Parcel B. Residues from the gasification process, mainly consisting of a material called "lamp black", were discovered at the site. "Lamp black"contains varying amounts of polynuclear or polycyclic aromatic hydrocarbons (PNAs or PAHs). Deposits, or seams, of this tar-like material are found throughout the site. Other constitu- ents of concern are cyanide, lead, and semi-volatile organics. Coomplaints of odors had been received from the neighborhood during the preliminary excavation activities for construction of a new building on Parcel A. An epidemiological survey by Los Angeles County found borderline significance between odor detect-- ion and symptom onset (headache; eyes, nose, and throat irrita- tion; fatigue; etc.) To date, analysis of air samples for benzene and napthalene have not revealed detectable levels of contami- ants. No excavation has occurred on Parcel B and at preesent Parcel B is an asphalt paved parking lot. The Remedial Investigation workplan, which addressed the con- tamination on both Parcel A and B, was approved by the Department on August 24, 1989. The Department has recently received the Feasibility SStudy and Health Risk Assessment which included the appropriate receptors and exposure pathways. The receptors include residents in the area and onsite and offsite workers. Exposure pathways include air and soil. Groundwater in the site vicinity is nnonpotable.

EDISON/VENICE MGP PARCEL A (Continued) **S105749947**

Background Info: The Venice Manufactured Gas Plant site is a former "towne gas" facility. Manufactured gas was produced onsite in the early part of the century. In the 1920's, a portion of the property was transferred to the City of Los Angeles so that Main Street could be widened. In 1977, the property was sold to a private party who divided the site into Parcel A and Parcel B.
Residues from the gasification process, mainly consisting of a material called "lamp black," were discovered at the site. "Lamp black" contains varying amounts of polynuclear or polycyclic aromatic hydrocarbons (PNAs or PAHs). Deposits or seams of this tar-like material are found throughout the site. Other constituents of concern are cyanide, lead, and semi-volatile organics.
In May 86, excavation began on Parcel A, for a new building and three story underground parking structure. Shortly thereafter, work was halted due to the discovery of contaminated soils and rubble. In July of the same year, removal of 5,000 cubic yards of contaminated soil and rubble began under Department supervision. This removal was completed in December 1986.
Complaints of odors have been received from the neighborhood during the preliminary excavation activities. An epidemiological survey by Los Angeles County found borderline significance between odor detection and symptom onset (headache, eyes, nose, and throat irritation, fatigue, etc.). To date, analysis of air samples for benzene and naphthalene have not revealed detectable levels of contaminants.
The Remedial Investigation workplan, which addressed the contamination on both Parcel A and B was approved by the Department on August 24, 1989. The Department has recently received the Feasibility Study and Health Risk Assessment which included the appropriate receptors and exposure pathways. The receptors include residents in the area and onsite and offsite workers. Exposure pathways include air and soil. Groundwater in the site vicinity is nonpotable.
In December 1989, another excavation of contaminated soil was completed. This excavation, undertaken at the request of the current landowner, consisted of removing soil to 30 feet below ground surface. This removal action resulted in removal of all significantly contaminated soil at Parcel A.

Site History:	The Site is a 1,050-square foot retail commercial property located in a mixed commercial and residential area of Venice, California (Figure 1). The Site is part of a two-story multi-tenant commercial building currently occupied by DTA Posse, a small office/design studio and

MAIN STREET DRY CLEANERS (Continued) **S105119573**

internet retail business that designs T-shirts and related apparel. Adjacent tenants include a barbershop, medical marijuana dispensary and a Chinese massage studio. The property located immediately to the east is used as an architect s office. The Site is located approximately one-half mile east of the Pacific Ocean. From 1982 to 2000, Main Street Cleaners operated a commercial dry cleaning facility at the Site. In 2000, the facility ceased operations and removed all dry cleaning equipment. Since 2000, the Site has been used primarily as a small retail office. The Site lies within the Ballona Gap area of the Santa Monica Groundwater Basin and is underlain by fine-grained alluvial deposits of clay and sandy clay. According to the California Department of Water Resources (DWR) Bulletin 104, the top of the Ballona aquifer beneath the Site occurs at approximately 11 feet below ground surface (bgs) and its base occurs at 23 feet bgs. The underlying Silverado aquifer is reportedly merged with the Ballona aquifer. Subsurface lithology consists primarily of clay and sandy clay with minor silty sand to a depth of approximately 11 feet bgs underlain by medium-grained sand to 15 feet, the maximum depth investigated. First groundwater occurs at approximately 9 feet bgs, but is of poor quality due to high total dissolved solids and is, therefore, non-potable. Groundwater flow direction has varied from southwest to southeast under the influence of very low gradients. Soil, soil vapor and groundwater have been impacted by halogenated volatile organic compounds (VOCs), primarily tetrachloroethylene (PCE), due to former dry cleaning operations. Secondary VOCs including trichloroethene (TCE), cis 1,2 dichloroethere (cis-1,2-DCE), trans-1,2-dichloroethene (trans-1,2-DCE), vinyl chloride (VC), and 1,1,2,2-tetrachloroethane are also present due to natural attenuation. Between 2000 and 2005, six phases of investigation were conducted and a total of 17 soil borings, five soil vapor probes, and six groundwater monitoring wells were installed at the Site (Figure 2). Soil matrix samples have been collected at depths of 1, 2, 4 and 8 feet bgs. In 2000, up to 724,000 micrograms per kilogram (g/kg) PCE was detected in soil near the former dry cleaning machine. Subsequent work showed that VOCs-impacted soil extended to eight feet bgs and that adsorbed-phase VOCs concentrations in soil decreased laterally away from the former source areas. In June 2003, PCE was detected in soil vapor up to 11,595 micrograms per liter (g/L). The highest levels were detected near former sources. Twelve groundwater monitoring events have been conducted since 2005, primarily on a quarterly basis. Water level measurements have shown consistent groundwater elevations, but flow directions have been variable over time. VOCs in groundwater include PCE, TCE, cis-1,2-DCE, trans-1,2-DCE, and VC. The highest concentrations are associated with MW-1 near the former dry cleaning machine and solvent drums (Figure 2). The emergent chemicals 1,4-dioxane, 1,2,3-trichloropropane, and hexavalent chromium were analyzed during four consecutive events in 2008 and were not detected. Metals were detected in low concentrations and were considered representative of background conditions. Total dissolved solids, sulfate and specific conductance levels exceed drinking water standards and reflect saline conditions. Soil Vapor Extraction (SVE) remediation was conducted from September 2003 to February 2004. Measured influent PCE concentrations decreased over time and showed apparent asymptotic trends. However, results of confirmation soil vapor sampling indicated that SVE remediation was largely unsuccessful in reducing VOCs concentrations, primarily due to the

MAIN STREET DRY CLEANERS (Continued) **S105119573**

predominantly fine-grained soil beneath the Site. Remedial soil excavation was conducted in May 2011. The excavation was conducted in slots that were staggered to prevent undermining the building. Excavation depths ranged from three to eight feet bgs, based on previous soil data collected at the Site (Figure 3). Approximately 204 cubic yards of soil were excavated and transported off site for disposal. Confirmation soil samples were collected from the floor and sidewalls of the excavation and analyzed for VOCs by USEPA Method 8260B. Samples from the floor of the excavation were all below residential USEPA Region IX Regional Screening Levels (RSLs). Sidewall confirmation samples showed maximum VOCs concentrations of 38,659 g/kg PCE, 996 g/kg TCE, 3,871 cis-1,2-DCE g/kg and 54 g/kg trans-1,2-DCE. The highest concentrations were detected in the southeastern portion of the building, near the former source areas. PCE soil concentrations from these samples exceeded commercial/industrial RSLs. However, all other VOCs were below residential RSLs. Following confirmation soil sampling, the excavation was backfilled with 2-sack concrete slurry, and the concrete floor was replaced. Prior to backfilling, eight sub-horizontal soil vapor probes were installed at depths of two feet bgs along the eastern and southern sidewalls for confirmation soil vapor sampling. Results were compared to environmental screening criteria based on California Human Health Screening Levels (CHHSLs) established by the California Office of Environmental Health Hazard Assessment (OEHHA) for the protection of human health. Maximum concentrations of 4,880 g/L PCE, 315 g/L TCE, 284 g/L cis-1,2-DCE, 29 g/L trans-1,2-DCE and 11 g/L vinyl chloride were detected along the southeastern sidewall. With the exception of trans-1,2-DCE, these concentrations significantly exceed commercial/industrial CHHSLs. Based on the residual high concentrations of PCE in soil and soil vapor along the eastern portion of the southern sidewall, the Regional Board required that a vapor intrusion evaluation and human health risk assessment (HHRA) be conducted to evaluate the risk to current and future onsite commercial occupants. A preliminary vapor intrusion evaluation was conducted in April 2012. Three soil vapor probes were resampled along with two indoor air and one ambient air sample for VOCs by USEPA Method TO-15. Results showed that only PCE was detected in indoor air samples up to 7.2 micrograms per cubic meter (g/m3). Maximum soil vapor levels of 59,000 g/m3 PCE and 15,000 g/m3 TCE were detected in VP-6 along the southeastern sidewall. The results also showed significant concentrations (up to 260 g/L), of n-Propanol, a tracer gas used to evaluate the integrity of the bentonite seals in the soil vapor probes. The detection of n-Propanol indicates incomplete seals in the respective vapor probes, which may have caused dilution of the soil vapor samples with ambient air. Based on these results, and in accordance with the DTSC October 2011 Final Vapor Intrusion Guidance, a second round of vapor intrusion evaluation was conducted in July 2012. Prior to sampling, EC Group West, LLC (ECGW) conducted VOCs screening of monitoring wells, vapor probes and ambient air to evaluate potential sources of leakage. Based on the results, ECGW had the bottoms of soil vapor probe and monitoring well vaults sealed with a non-solvent epoxy resin. Approximately 10-days following the sealant application, ECGW conducted the second round of indoor air and soil gas sampling. Results of the updated vapor intrusion evaluation showed indoor air concentrations of up to 28.4 g/m3 PCE and 2.23 g/m3 TCE. No other VOCs were detected in indoor air. Maximum detected VOCs in shallow

MAIN STREET DRY CLEANERS (Continued) **S105119573**

soil vapor were 53,000 g/m3 PCE and 9,500 g/m3 TCE. Based on the indoor air data from the vapor intrusion evaluations, ECGW conducted a preliminary HHRA and calculated cumulative cancer risks of 1.2x10-5 to 4.6x10-5 using maximum values for PCE and TCE. OEHHA determined that these risk values are conservative, based on the use of maximum values of PCE and TCE in indoor air. If average indoor air concentration values were applied to the risk calculations, OEHHA estimated that the risk to indoor workers from inhalation of VOCs could decrease and might range from 9x10-6 to 3.6x10-5. OEHHA also noted that because only one ambient air sample was used and VOCs were not detected in ambient air (on two separate events), the limited ambient air sampling could not have underestimated the risk and might have resulted in an overestimation of the risk. Based on our review of the Remediation Section Case Review Summary and all available data in our files, Regional Board staff recommends NFA for soil at the Site with the following justifications: The primary sources of PCE in soil were removed in 2000. No other primary solvents were used or stored onsite. The presence of TCE, cis/trans-1,2-DCE and vinyl chloride are due to natural attenuation of PCE. Nearly all of the residual secondary VOCs in soil have been successfully removed by remedial excavation. Consequently, further impacts to groundwater via infiltration and leeching and impacts to soil vapor via molecular diffusion are significantly reduced. Following excavation, confirmation soil sampling indicated that residual VOCs at the floor and most of the excavation sidewalls were below residential screening levels. Residual PCE soil contamination is restricted to a small portion along the east end of the southern sidewall, is inaccessible and does not constitute a significant threat human health or groundwater. VOCs concentrations in soil vapor along the southern and eastern sidewalls have decreased significantly over the past year since the remedial soil excavation was conducted. This appears to be the result of significantly reduced secondary soil contaminant mass and slow diffusion and dispersion of residual soil vapor over time. With the secondary soil contaminant mass removed, it is anticipated that soil vapor concentrations will continue to decrease by natural attenuation processes over time. Results of vapor intrusion evaluations indicate that the vapor intrusion pathway from subsurface soil vapor to indoor air is complete. However, a comparison of indoor air and soil vapor probe data indicates that there is a 99.99% difference in maximum concentrations, suggesting that the cement, slurry backfill and newly-installed concrete floor are effective barriers to vapor intrusion. Preliminary HHRA calculations by ECGW indicate cumulative cancer risk ranges of 1.2x10-5 to 4.6x10-5 for indoor air inhalation risks based on the maximum concentrations of PCE and TCE detected in indoor air. OEHHA confirmed these values and considered these estimates to be conservative based on the use of maximum concentrations. If average indoor air concentrations were applied to the risk calculations, OEHHA estimates that the risk could decrease to 9x10-6 to 3.6x10-5. Further, because only one ambient air sample was used and VOCs were not detected, the risk could not have been underestimated and might have been an overestimate. Based on this information, the risk to onsite personnel from vapor intrusion to indoor air is considered to be minimal. A land use covenant (deed restriction) has been filed and recorded in Official Records, Recorder s Office, Los Angeles County on October 11, 2012 (see attached), which restricts current and future land use to commercial/industrial use only. The deed restriction provides current

MAIN STREET DRY CLEANERS (Continued) **S105119573**

and future property owners and tenants information on the prior soil contamination, the remedial excavation that was conducted, and the minor residual impacts. Based upon the information provided to the Regional Board, and with the provision that the information is accurate and representative of site conditions, Regional Board staff supports a Soil NFA determination for the Site at this time. The Soil NFA applies only to the known chemicals of concern which have been tested during the site assessment and monitoring phases. Therefore, Regional Board staff has determined that the residual contamination in the soil and soil gas beneath the Site does not pose a significant threat to human health or groundwater under current conditions. The following are required for the Soil NFA: Existing soil vapor probes (VP-1 through VP-8) must be removed and their respective boreholes shall be backfilled with a pre-hydrated bentonite and cement slurry and capped with concrete to match that of the existing surface flooring. All necessary permits must be obtained from all appropriate agencies prior to initiating fieldwork. A report documenting the removal of soil vapor probes and site restoration as necessary shall be submitted to the Regional Board by February 28, 2013. A report documenting the removal of soil vapor probes was submitted on May 2, 2013 indicating compliance with the Soil NFA requirements. Semi-annual monitoring has continued at the Site since the Soil NFA was issued. The groundwater data shows variable yet generally declining PCE concentrations in the source well MW-1, but continues to show relatively high concentrations of daughter products, including TCE, cis-1,2-DCE and vinyl chloride. The data indicate natural bioattenuation is occurring, albeit at a relatively slow pace. Active groundwater remediation will be necessary to reduce the residual VOCs in groundwater to concentrations that do not pose a risk to human health and the environment.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	10/27/1992
Comments:	The site is a City of Santa Monica Development Project. The site investigation report submitted to the Department shows evidence of TPH contamination at the site. The results of the Phase I assessment indicated the potential for soil contamination and groundwater contamination due to the past land use and gw contamination from an unauthorized gasoline release at the adjecent Bonus Car Wash. Groundwater was encountered at 10-12 feet bags. Staff recommends PEA due to the evidence of contamination.
Completed Area Name:	PROJECT WIDE

FISHER AUTO WRECKING (Continued) **S101481054**

Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 01/10/1994
Comments: The City of Santa Monica, Environmental Programs Division submitted a site remediation report to the Department. City certified that no further activities be required at the site. On December 21, 1992, the city assumed the oversight of site assessment and remedial activities. City certified that the assessment and subsequent remediation were conducted in accordance with or in a manner exceeding standards set forth in Title 22 of the CCR.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/19/2023

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 09/25/2023

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Version Date:	2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

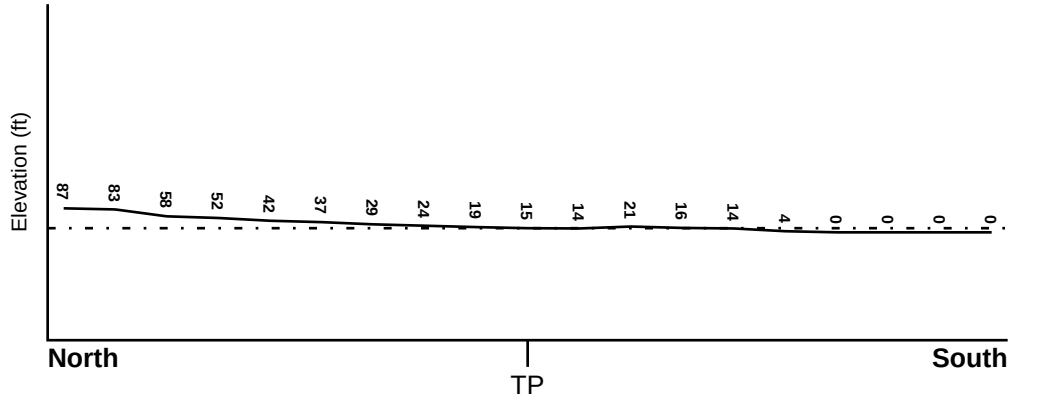
TOPOGRAPHIC INFORMATION

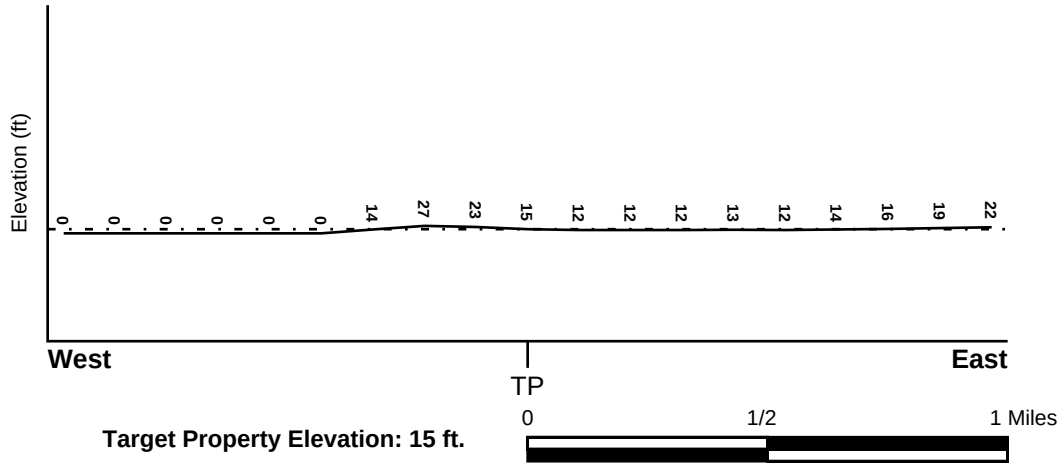
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES





Target Property Elevation: 15 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

VENICE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
A7	1/8 - 1/4 Mile WNW	SW
B8	1/4 - 1/2 Mile NNW	S
B9	1/4 - 1/2 Mile NNW	Not Reported
B10	1/4 - 1/2 Mile NNW	S

8G	1/2 - 1 Mile ESE	S
9G	1/4 - 1/2 Mile SSE	E

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Subject: **Limited Phase II Subsurface Investigation**
825 Hampton Drive
Venice, California 90291
AEI Project No. 356695

AEI Consultants (AEI) is pleased to provide this report which describes the activities and results of the Limited Phase II Subsurface Investigation (Phase II) performed at the above referenced subject property (Figures 1 and 2). This investigation was completed in general accordance with the authorized scope of services outlined in our authorized proposal number 46650.

1.0 SITE DESCRIPTION

The subject property (Site) consists of a single-story office building with dual-stacked containers converted into additional offices. The Site is also improved with an asphalt parking lot and associated landscaping on the southwestern corner of Hampton Drive and Brooks Avenue in a mixed commercial/residential area of Venice, California (Figure 2).

The Site is relatively flat and slopes towards the south-southwest at an elevation of approximately 15 feet above mean sea level. The regional topographic gradient direction slopes toward the south-southwest and, therefore, the direction of groundwater flow beneath the Site is inferred to be to the south-southwest. The Pacific Ocean is located approximately 0.38 mile to the southwest.

According to the *Supplemental Assessment for Impacts in Soil and Groundwater*, dated May 4, 2016 and written by California Environmental of Agoura Hills, California for COC Real Estate II LLC, the depth to groundwater 0.49 mile northwest of the Site ranged from 16.74 feet to 17.63 feet below ground surface (bgs).

Refer to Section 4.1 below for additional information on the site geology and groundwater conditions.

2.0 BACKGROUND

A Phase I ESA was performed by AEI as detailed in a report dated April 22, 2016 (AEI Project Number 356695). As detailed in the Phase I ESA, automotive repair businesses (including a tire and battery shop), a gasoline station, and a paint shop were associated with the property from 1927 to 1986. Based on this information, it is possible that the previous facilities were equipped

with underground storage tanks (USTs) for fuel and waste oil, clarifiers, in-ground hydraulic lifts, drains, and a waste oil tank. Also, according to historical records, a spray paint booth was located in the northeastern portion of the Site in 1970, indicating that solvents would have been stored onsite to clean automotive parts and spray paint guns. No historical documentation was available indicating whether soil, groundwater, or soil gas samples had ever been collected at the Site and analyzed for the presence of petroleum hydrocarbon constituents and/or volatile organic compounds. The absence of subsurface data following closure of the gasoline station and previous businesses was therefore cited in the Phase I ESA as a recognized environmental condition.

Based on the absence of soil sampling data AEI recommended the performance of a Limited Phase II in order to determine if the property has been adversely impacted by the former on-Site operations.

3.0 INVESTIGATION EFFORTS

AEI was requested to perform an investigation, including the collection of soil and soil gas samples, to evaluate whether the previous gasoline dispensing, automotive repair, and painting operations have adversely impacted the property.

This work was performed under the oversight of a California licensed Professional Geologist.

3.1 Health and Safety Plan

A site-specific health and safety plan was prepared, reviewed by onsite personnel, and kept onsite for the duration of the fieldwork.

3.2 Permitting and Utility Clearance

Drilling permits were not required for this investigation. The public underground utility locating service DigAlert was notified to identify public utilities in the work area. Private utility locating was conducted by Ground Penetrating Radar Systems, Inc. (GPRS) of Los Angeles, California to identify underground utilities on the subject property.

3.3 Geophysical Survey

On June 4, 2016, a geophysical survey was conducted by GPRS (Appendix A). The purpose of the survey was to evaluate the proposed boring locations for subsurface obstructions (Appendix A). The geophysical survey was conducted using magnetometer and ground penetrating radar. Where the geophysical survey indicated the presence of subsurface utilities, locations were adjusted accordingly.

The client should be aware of the inherent limitations of geophysical surveying methods and that above and underground utilities and other man-made or natural features (i.e. automobiles, debris piles, tree roots, reinforced concrete, certain soil conditions, etc.), if in the area of the survey, may decrease the effectiveness of the survey. The client should be aware that the lack of a detection of a feature from a geophysical survey does not mean that the feature does not exist only that it was not detected.

3.4 Drilling and Soil Sample Collection

On June 4, 2016, 5 soil borings (B-1 through B-5) were advanced on the subject property (Figure 2). The borings were advanced by J & H Drilling Company of Buena Park, California. The borings were advanced outdoors to depths between 10 and 15 feet below ground surface (bgs). The location of each boring are listed below:

- Boring B-1 was advanced to a depth of 10 feet bgs in the eastern portion of the former automobile repair facility.
- Boring B-2 was advanced to a depth of 10 feet bgs in the northwestern portion of the former automobile repair facility.
- Boring B-3 was advanced to a depth of 10 feet bgs within the footprint of the former gasoline station. The location of B-3 was adjusted due to access limitations in the originally proposed location.
- Boring B-4 was advanced to a depth of 15 feet bgs in the western portion of the former automobile repair facility.
- Boring B-5 was advanced to a depth of 10 feet bgs in the parking area in the southern portion of the Site. The location of B-5 was adjusted due to the presence of an easement in the originally proposed location.

The borings were advanced using 2-inch outer diameter rods and samples were collected by advancing the rods with acetate sample liners in approximately 5-foot intervals. After each interval, the core was retrieved, core barrel disassembled, and the sample liner was removed and transferred to the onsite geologist.

The soil borings were logged using the Unified Soil Classification System. A photo ionization detector (PID) was used to screen soil samples in the field and the PID readings for each sample were included on the boring logs (Appendix B). Selected soil samples were sealed with Teflon tape and plastic end caps.

Down-hole equipment was decontaminated using a triple rinse system containing detergent.

3.5 Soil Gas Sample Collection

On June 4, 2016, soil gas sampling was conducted on the Site. Temporary soil gas probes were installed at 5 feet bgs in each of the 5 borings (B-1 through B-5) on Site. Each soil gas probe consisted of 1/4th-inch inner diameter Teflon® sampling tubing, with a 0.5-foot section of screen that was placed at the targeted depth of 5 feet bgs. Approximately one foot of sand was placed at the terminus of the probe, and approximately one foot of dry granular bentonite was placed on top of the sand pack. Hydrated bentonite was used to backfill the remaining borehole space to ground surface to prevent ambient air intrusion. The tubing end of each probe was sealed with a stainless steel compression cap at ground surface.

The subsurface was allowed a minimum of 2 hours to equilibrate before the soil gas probes were sampled. Soil gas samples were collected in laboratory provided, batch certified 1.4-Liter passivated canisters by AEI personnel in general accordance with the July 2015, DTSC and the Los Angeles RWQCB, “Advisory – Active Soil Gas Investigations.”

A shut-in test was performed to test the integrity of the sample train by closing the valve closest to the vapor probe, opening the purge valve, and using a clean syringe to draw a vacuum. Once a vacuum of approximately 5 inches of mercury was achieved, the open valve was closed and aloud to sit for a minimum of 1 minute. If a drop in vacuum was observed, fittings were tightened, and the test was performed again. Following the successful completion of the shut-in test, a leak check was performed by applying a leak check compound (99% isopropal alcohol) to the sampling connections. A total of 3 volumes of air were purged from each probe and a sample was collected using a laboratory-supplied regulator set at 200 milliliters per minute.

3.6 Boring Destruction

Following completion of sample collection and removal of tooling, the borings were backfilled with hydrated bentonite and completed at the surface with asphalt patch to match the surrounding conditions.

3.7 Laboratory Analyses

The soil samples were labeled and placed into a cooler with ice following sampling. The samples were transferred under appropriate chain-of-custody documentation to Alpha Scientific Corporation of Cerritos, California. Soil gas samples were transferred under appropriate chain-of-custody documentation to ESC Lab Sciences of Mt. Juliet, Tennessee. Laboratory analytical documentation is provided in Appendix C.

Laboratory analysis of 5 soil samples consisted of the following:

- Total petroleum hydrocarbons (TPH-cc) by U.S. Environmental Protection Agency (EPA) Method 8015M.
- Volatile organic compounds (VOCs) by U.S. EPA Method 8260B.
- CAM-17 (Title 22) metals by U.S. EPA Methods 6010B/7471A.

Laboratory analysis of 5 soil gas samples consisted of the following:

- VOCs by U.S. EPA Method TO-15.

3.8 Investigation Derived Waste

No investigation derived waste was created during this investigation.

4.0 FINDINGS

The soil results for TPH-cc analyzed as part of this investigation were reviewed and compared to the Maximum Soil Screening Levels (MSSLs) published by the state of California Regional Water Quality Control Board (RWQCB). The current MSSL comparison values were originally published in April 2004 and last revised in September 2006. The MSSLs are used for site screening of soils and may be used as initial clean-up goals, if applicable. The primary goal of the RWQCB in issuing the MSSL was the protection of the state's drinking water aquifers. As such, the MSSL comparison values for total petroleum hydrocarbons (TPH) as gasoline (TPH-g), as diesel (TPH-d), and as oil (TPH-o), collectively known as the carbon chain (TPH-cc), vary with the depth from which the soil sample was collected and its distance above any known or potential drinking water aquifer. In practice, the MSSL comparison values are selected based

on the difference between the depth from which the soil sample was collected and its distance above the known groundwater table on the site or in the immediate vicinity.

Due to the potential future redevelopment of the Site for mixed commercial and residential use, the soil results for VOCs and metals analyzed as part of this investigation were reviewed and compared to the May 2016 U.S. EPA Residential Regional Screening Levels (RSLs), Region 9. The RSLs are risk-based concentrations derived from standardized equations combining exposure information assumptions with U.S. EPA toxicity data. The RSLs are used for site screening and as initial cleanup goals, if applicable. The RSLs are considered by the U.S. EPA to be protective for humans (including sensitive groups) over a lifetime; however, they are not always applicable to a particular site and do not address non-human health endpoints, such as ecological impacts.

The soil results for metals were further reviewed and compared to background concentrations of metals that naturally exists in Southern California soils. A study entitled Background Concentrations of Trace and Major Elements in California Soils, dated March 1996, by the Kearney Foundation of Soil Science was also reviewed for information on the concentrations of background metals in California soils. The Kearny report is a relevant source used by public policy makers and those in the private sector concerned with environmental remediation and land use planning.

Due to the potential future redevelopment of the Site for mixed commercial and residential use, the soil gas results of this investigation were reviewed and compared to the May 2016 U.S. EPA Regional Screening Levels (RSLs). The RSLs are considered to be conservative. Under most circumstances, and within the limitations described in the RSL guidance document, the presence of a chemical in soil, soil gas or groundwater at concentrations below the corresponding RSL can generally be assumed to not pose a significant threat to human health and the environment. Additional evaluation will generally be necessary at sites where a chemical is present at concentrations above the corresponding RSL.

An attenuation factor of 0.001 was applied to the Residential Indoor Air RSLs for sites expected to be redeveloped with future Residential exposure pathways to create the vapor screening or comparison level (VSL), as detailed in the Guidance for the Evaluation and Mitigation of Subsurface Vapor Intrusion to Indoor Air prepared by the DTSC (October 2011).

4.1 Geology and Hydrogeology

Sediment encountered in each of the borings generally consisted of fine to coarse sand and silty sand through the maximum depth explored of 15 feet bgs (Appendix B).

Groundwater was encountered in boring B-4 at a depth of 10.60 feet bgs. Groundwater sampling was not part of the scope of this investigation.

4.2 Soil Sample Analytical Results

The following information is a summary of the analytical test results of the soil samples submitted for analysis as part of this investigation (Appendix C). This information has also been included in Table 1.

- TPH-g was detected in boring B-1 at a concentration of 0.2J milligrams per kilogram (mg/kg). The detected concentration does not exceed regulatory screening levels. The "J" flag indicates that the detected concentration is an estimated value above the laboratory method detection limit, but below the limit for reporting.
- No TPH-d or TPH-o were detected above laboratory method detection limits in any of the samples analyzed as part of this investigation.
- VOCs were not detected in the soil samples at concentrations exceeding the laboratory method detection limits.

The following information is a summary of the analytical test results of the soil samples submitted for analysis for metals as part of this investigation (Appendix C). This information has also been included in Table 2.

- Antimony was detected in boring B-1 at a concentration of 2.1 milligrams per kilogram (mg/kg). Although this concentration exceeds the established background concentration, it is below the RSL.
- Arsenic was detected in each of the soil samples submitted for analysis. The detected concentrations exceed the RSL, but are below the established background concentration for arsenic.
- Barium, cobalt, copper, lead, nickel, vanadium, and zinc were detected in each of the soil samples at concentrations exceeding their respective laboratory method detection limits. However, the detected concentrations are below both their respective RSLs and established California background concentrations.

4.3 Soil Gas Sample Analytical Results

The following information is a summary of the analytical test results for soil gas samples analyzed as part of this investigation (Appendix C). This information has also been included in Table 3.

- TPH (low fraction) was detected in each of the five soil vapor samples at concentrations ranging from 2,300 to 485,000 micrograms per cubic meter (µg/m^3). Four of these detected concentrations exceed the future residential property VSL of 3,100 µg/m^3 for TPH (low fraction).
- 1,3-butadiene was detected in soil vapor samples B-4 and B-5 at concentrations of 10.9 and 373 µg/m^3, one of which exceeds the future residential property VSL of 94 µg/m^3 for 1,3-butadiene.
- Other VOCs were detected in the soil gas samples submitted for analysis above their respective laboratory detection limits; however, the detected concentrations are below their respective VSLs.

The leak-check compound 2-propanol also known as isopropyl alcohol or isopropanol was detected at low concentrations in soil vapor samples B-4 and B-5, but was well below the "10 times the reporting limit" for 2-propanol which would indicate that corrective action is necessary (DTSC, July 2015).

5.0 SUMMARY AND CONCLUSIONS

AEI has completed a Limited Phase II at the Site. The purpose of the Phase II at the subject property was to evaluate current conditions related to historic automotive repair, gasoline station, and paint shop businesses which operated on the subject property from 1927 through 1986 as revealed in a Phase I ESA by AEI dated April 22, 2016. A total of 5 borings (B-1 through B-5) were advanced at the subject property for the collection of soil and soil gas samples.

TPH-g was detected in the soil sample submitted from boring B-1 at a concentration below regulatory screening levels.

VOCs were not detected in the soil samples submitted as part of this investigation.

Metals were detected in the soil samples submitted for analysis; however, the detected concentrations were below either their respective regulatory screening values or their respective established background concentrations.

The soil gas samples collected during this investigation were submitted to a laboratory for the analysis of VOCs. TPH (low fraction) was detected in all five soil gas samples, and four of these detections were seen at concentrations above the VSL for a future residential building. 1,3-butadiene was detected in two of the collected soil vapor samples, and one of these detections exceeds the VSL for a future residential building. Other VOCs were detected in the soil gas samples submitted for analysis; however, the detected concentrations are below their respective VSLs.

Based on the results of this investigation, AEI recommends a Soil Management Plan be developed to provide guidance and explanations of steps to take if certain environmental conditions are encountered during future soil movement. This includes, but is not limited to excavation and movement of soil within the property boundary.

6.0 REPORT LIMITATIONS AND RELIANCE

This report presents a summary of work completed by AEI Consultants. The completed work includes observations and descriptions of site conditions encountered. Where appropriate, it includes analytical results for samples taken during the course of the work. The number and location of samples are chosen to provide the requested information, subject to scope of work for which AEI was retained and limitations inherent in this type of work, but it cannot be assumed that they are representative of areas not sampled. This report should not be regarded as a guarantee that no further contamination beyond that which could have been detected within the scope of this investigation is present beneath the subject property. Undocumented, unauthorized releases of hazardous material, the remains of which are not readily identifiable by visual inspection and are of different chemical constituents, are difficult and often impossible to detect within the scope of a chemical specific investigation.

Any conclusions and/or recommendations are based on these analyses and observations, and the governing regulations. Conclusions beyond those stated and reported herein should not be inferred from this document. These services were performed in accordance with generally accepted practices, in the environmental engineering and construction field, which existed at the time and location of the work. No other warranty, either expressed or implied, has been made.

This investigation was prepared for the sole use and benefit of Mr. Blake Fogel/Fogel Real Estate Corporation. All reports, both verbal and written, whether in draft or final, are for the benefit of Mr. Blake Fogel/Fogel Real Estate Corporation. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's Proposal and Standard Terms & Conditions executed by Mr. Blake Fogel. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

If there are any questions regarding our investigation, please do not hesitate to contact AEI at (310) 798-4255.

Sincerely,
AEI Consultants

Andrew Leavitt, PG
Project Manager

Kent Vollmer, PG, CEG
Site Mitigation Dept. Manager

Site: 825 Hampton DR, Los Angeles CA

Re: GPR Investigation to Locate Utilities prior to boring.

We appreciate the opportunity to provide this report for our work completed on 6/04/16 at the above address in Los Angeles, CA.

Purpose

The purpose of the survey was to possibly locate any utilities prior to boring in location.

Equipment

- **Ground Penetrating Radar (GPR), Manufacturer: GSSI, Model: SIR-3000 processing unit with 400 MHz antenna.** GPR works by sending pulses of energy into a material and recording the strength and the time require for the return of the reflected signal. Reflections are produced when the energy pulses enter into a material with different electrical conduction properties from the material it left. The strength of the reflection is determined by the contrast in conductivity between the two materials. The total depth achieved can be as much as 8' with this antenna but can vary widely depending on the dielectric properties of the materials. For more information, please visit: http://www.geophysical.com/Documentation/Brochures/GSSI-UtilityScanBrochure.pdf

- **RD7100 pipe locator, Manufacturer: Radiodetection.** The RD7000 can detect the electromagnetic fields from live power or radio frequency signals. It can also be used in conjunction with a trasmitter to connect directly to accessible, metallic pipes, risers, or tracer wires. A tone is sent through the pipe or tracer wire at a specific frequency which can then be detected by the receiver. For more information, please visit: http://www.spx.com/en/radiodetection/pd-rd7000/

Process

Our process begins with collecting scans with GPR across the areas in a grid pattern. Scans are typically spaced 2'-3' apart depending on the size of the targets being searched for. The GPR data is interpreted in real time and anomalies in the data are located and marked on the surface with spray paint, pin flags, etc.

The RD7000 is used to locate pipes or utilities at the soil boring locations. We first sweep all areas with the receiver to detect live power or radio frequency signals followed by connecting to any visible risers or tracer wires that may be in the area.

Findings

We found that the soil allowed for GPR depth penetration of 6' in most areas. We were able to find most utilities within the area of boring. Traced out all conduits and utilities. Unable to open Sewer Cap to see the direction of

flow but with GPR was able to find the direction. With location being an old street turned in drive way there were many main utilities within the area. Please see all the pictures to show the findings.

Limitations

Please keep in mind that there are limitations to any subsurface investigation. The equipment may not achieve maximum effectiveness due to soil conditions, above ground obstructions, reinforced concrete, and a variety of other factors. No subsurface investigation or equipment can provide a complete image of what lies below. Our results should always be used in conjunction with as many methods as possible including consulting existing plans and drawings, exploratory excavation or potholing, visual inspection of above ground features, and utilization of services such as Dig Alert/Underground Service Alert.

At this site, our scans were limited by brush, cars, and many different objects.

The following pages will further explain the findings.

Signed,

Michael Newell
Project Manager —Southern California, Orange County
GPRS, Inc.

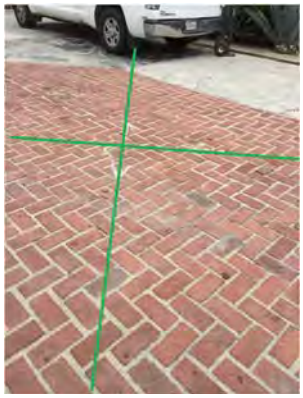
This photo shows a power source/conduit running right through the drive way into another building and coming out the other side.



This is the findings of the possible sewer flows. The GPR data led me to believe that the Sewer was running from both directions due to the buildings surrounding the drive way and the location of the bore.

This is a photo shows that were many different lines running in the same direction of the location wanting to bore. Mapped out all findings (gas power, water, and possible sewer)

This photo shows another area of heavy utilities where wanting to bore. Mapped all findings and color coordinated them to which they were.

APPENDIX C

Laboratory Analytical Data

Alpha Scientific Corporation
Environmental Laboratories

06-09-2016

Mr. Kent Vollmer
AEI Consultants
2233 W. 190th Street
Torrance, CA 90504

Project: 356695
Project Site: Venice-Hampton Dr.
Sample Date: 06-04/06-2016
Lab Job No.: AI606021

Dear Mr. Vollmer:

Enclosed please find the analytical report for the sample(s) received by Alpha Scientific Corporation on 06-06-2016 and analyzed by the following EPA methods:

EPA 8015M (Total Petroleum Hydrocarbons)
EPA 8260B (VOCs & Oxygenates by GC/MS)
EPA 6010B/7471A for Title-22 Metals

All analyses have met the QA/QC criteria of this laboratory.

The sample(s) arrived in good conditions (i.e., chilled, intact) and with a chain of custody record attached.

Alpha Scientific Corporation is a CA DHS certified laboratory (Certificate Number 2633). Thank you for giving us the opportunity to serve you. Please feel free to call me at (562) 809-8880 if our laboratory can be of further service to you.

Sincerely,

Roger Wang, Ph. D.
Laboratory Director

Container types: M=Metal Tube, A=Air Bag, P=Plastic bottle, G=Glass bottle, V=VOA vial

Alpha Scientific Corporation
16760 Gridley Road
Cerritos, CA 90703

Email: ascorp@verizon.net
Tel: (562) 809-8880
Fax: (562) 809-8801

Note: Samples are discarded 30 days after results are reported unless other arrangements are made. Hazardous samples will be returned to client or disposed of at client's expense.
Distribution: White with report, Yellow to courier.

ANALYTICAL REPORT

June 16, 2016

AEI Consultants - CA

Sample Delivery Group:	L840525
Samples Received:	06/09/2016
Project Number:	356695
Description:	Venice - Hampton Dr

Report To: Kent Vollmer
1200 Main Street, Suite D
Irvine, CA 92614

Entire Report Reviewed By:

Jarred Willis
Technical Service Representative

Results relate only to the items tested or calibrated and are reported as rounded values. This test report shall not be reproduced, except in full, without written approval of the laboratory. Where applicable, sampling conducted by ESC is performed per guidance provided in laboratory standard operating procedures: 060302, 060303, and 060304.

All sample aliquots were received at the correct temperature, in the proper containers, with the appropriate preservatives, and within method specified holding times. All MDL (LOD) and RDL (LOQ) values reported for environmental samples have been corrected for the dilution factor used in the analysis. All Method and Batch Quality Control are within established criteria except where addressed in this case narrative, a non-conformance form or properly qualified within the sample results. By my digital signature below, I affirm to the best of my knowledge, all problems/anomalies observed by the laboratory as having the potential to affect the quality of the data have been identified by the laboratory, and no information or data have been knowingly withheld that would affect the quality of the data.

Abbreviations and Definitions

SDG	Sample Delivery Group.
MDL	Method Detection Limit.
RDL	Reported Detection Limit.
ND	Not detected at the Reporting Limit (or MDL where applicable).
U	Not detected at the Reporting Limit (or MDL where applicable).
RPD	Relative Percent Difference.
(S)	Surrogate (Surrogate Standard) - Analytes added to every blank, sample, Laboratory Control Sample/Duplicate and Matrix Spike/Duplicate; used to evaluate analytical efficiency by measuring recovery. Surrogates are not expected to be detected in all environmental media.
Rec.	Recovery.

Qualifier	Description
B	The same analyte is found in the associated blank.
J	The identification of the analyte is acceptable; the reported value is an estimate.
J1	Surrogate recovery limits have been exceeded; values are outside upper control limits.

ESC Lab Sciences is the only environmental laboratory accredited/certified to support your work nationwide from one location. One phone call, one point of contact, one laboratory. No other lab is as accessible or prepared to handle your needs throughout the country. Our capacity and capability from our single location laboratory is comparable to the collective totals of the network laboratories in our industry. The most significant benefit to our "one location" design is the design of our laboratory campus. The model is conducive to accelerated productivity, decreasing turn-around time, and preventing cross contamination, thus protecting sample integrity. Our focus on premium quality and prompt service allows us to be **YOUR LAB OF CHOICE.**
***** Not all certifications held by the laboratory are applicable to the results reported in the attached report.

Subject: **Soil Management Plan**
825 Hampton Drive
Venice, California 90291
AEI Project No. 356695

AEI Consultants (AEI) has prepared this Soil Management Plan (SMP) on behalf of the Fogel Real Estate Corporation ("Client"). This SMP has been prepared for the property addressed as 825 Hampton Drive, Venice, California 90291 ("Site"; Figure 1; Figure 2) and in general accordance with the authorized scope of services outlined in AEI's proposal number 55375.

The purpose of this SMP is to manage potential impacts to worker health and safety encountered during planned redevelopment activities at the Site in accordance with standard practices, to provide a framework for Site management procedures described below in Section 2.0 and to indicate those tasks to be overseen or undertaken by an Environmental Consultant.

This SMP is in accordance with all federal, state, or local regulations dictating the handling of contaminated media or regulations addressing worker exposure, including Federal and California Occupational Health and Safety Administration (OSHA) training and worker protection rules and regulations, Title 29 Code of Federal Regulations (CFR), Part 1910.120 and Title 8 California Code of Regulations (CCR) § 5192.

As AEI has performed the initial Phase I Environmental Site Assessment and subsequent Limited Phase II subsurface investigation at the Site and, AEI will act as the Client's Environmental Consultant. AEI will oversee the excavation work and perform stockpile soil sampling during grading and excavation activities, working with the Client and the Client's representative to assist with soil characterization. AEI will assist the Client with the process of requesting regulatory oversight. If approved by the regulator, will perform confirmation soil sampling as described in Section 5.0 once the excavation and grading work is complete.

The analytical results of stockpile soil sampling performed during grading and excavation for profiling purposes will be evaluated in accordance with state regulations (Title 22 CCR) and federal regulations (Title 40) as discussed in Section 4.4.1.

If confirmation soil sampling as discussed in Section 5.0, is approved by the regulatory agency, AEI will evaluate the resulting analytical data. Otherwise, AEI will evaluate the data by first comparing them to the Tier 1 (residential) Environmental Screening Levels (ESLs) dated January 2019 by the San Francisco Bay Regional Water Quality Control Board (SFBRWQCB). The ESLs are

created by the SFBRWQCB, but also used by other jurisdictions, including the Los Angeles Regional Water Quality Control Board (RWQCB). Any compounds not covered by the ESLs will be evaluated by comparing them to the Regional Screening Levels (RSLs; Region 9) for residential soil issued November 2018 by the U.S. Environmental Protection Agency (EPA). The results of soil confirmation soil sampling will be reported to the Client and included in a report as required by the regulatory agency.

If the results of the confirmation sampling activities are below their regulatory comparison values, AEI's report will recommend that no further environmental investigations at this time. If the results exceed the regulatory comparison values, AEI will discuss their proposed recommendations with the client and include the recommendations in its report to the regulator.

While currently there is no reason to believe that groundwater is impacted on site, if during excavation activities groundwater is found to be impacted above residential regulatory guidelines, the agency providing regulatory oversight (one of those listed above) will be notified. Anything encountered during the redevelopment of the Site will be addressed in accordance with the regulations and instructions from the applicable agency, as discussed in more detail herein, with the understanding that the Site is to be developed as a residential property.

AEI understands the Site is located within a designated methane zone. In accordance with California Building Code Volume 1 Title 26 of the Los Angeles County Code as amended by Ordinance No. 2002-0076, which addresses development in methane zones, the Los Angeles Department of Building and Safety will require installation of a vapor barrier to prevent the migration of naturally occurring methane gas into the structure. This vapor barrier would be designed to also aid in the protection of human heath from other potential constituents which may be encountered at the Site during redevelopment including, but not limited to, total petroleum hydrocarbons (TPH). While effects on the local environment during redevelopment activities may be temporary, AEI is not in the position to determine or to judge the long-term effects of the completed redevelopment project on the local environment.

This SMP will provide guidelines for the Site owner, as well as for future owners, tenants, and workers. It is AEI's understanding that the Site is to be redeveloped from its current configuration (Figure 2), into residential apartments equipped with subterranean parking, which will involve soil movement and excavation activities. Data collected in May and June 2016 (Section 2.0) indicates the presence of asbestos containing materials, lead-based paint, and high concentrations petroleum hydrocarbons in soil gas beneath the Site that present a potential cause for concern to human health and the environment. This SMP is intended to reduce the potential for direct contact exposure from these or other chemical constituents that may be present.

The client shall enroll in the Los Angeles County Fire Department (LACoFD; regulatory agency) Health and Hazardous Materials Unit Voluntary Oversight Program. Prior to enrolling in the Program, the Client and AEI, in its role as Environmental Consultant shall schedule a meeting with the manager of the Site Mitigation Unit (SMU), as required by the LACoFD. Following the meeting, the Client shall complete the brief Remedial Action Agreement form. The Agreement form with a check made out to the Los Angeles County Fire Department in the amount specified on the form, together with electronic copies of reports documenting previous assessment work performed at the Site (Phase I and Phase II) shall be sent to AEI. AEI will have hard copies

produced and will submit the check and application per the instructions on the Agreement form to the LACoFD.

During the period of oversight provided by the LACoFD, the LACoFD may require additional sampling and/or monitoring both during and after grading, excavation, as well as after redevelopment activities are complete. If so, when required sampling and/or monitoring tasks have been performed at the intervals and for the duration of time as may be specified by the LACoFD, AEI will prepare and submit printed and electronic copies of the requisite report(s) to the regulatory case manager. The LACoFD will review the reports and return them to the Client and AEI with comments. Guidelines for such reports are set forth at http://www.fire.lacounty.gov/wp-content/uploads/2014/02/CONSENT_AGREEMENT_ATT.pdf, attached hereto. When the final reports have been submitted and the LACoFD's comments have been addressed to the satisfaction of the regulatory case manager, the process for case closure can begin. The process is considered complete when the LACoFD issues a letter to the Client stating that the Client has fulfilled their obligations and that environmental conditions at that time require no further action. This letter will subsequently be submitted to the City.

The Client should be aware that alternative regulatory agencies to the LACoFD which can provide guidance and oversight to address potential issues are the Los Angeles Regional Water Quality Control Board (LARWQCB) and the California Department of Toxic Substances Control (DTSC).

1.0 SITE DESCRIPTION AND HISTORY

The Site consists of a single-story office building with dual-stacked containers converted into additional offices. The Site is also improved with an asphalt parking lot and associated landscaping on the southwestern corner of Hampton Drive and Brooks Avenue in a mixed commercial/residential area of Venice, California (Figure 2).

The Site is relatively flat and slopes towards the south-southwest at an elevation of approximately 15 feet above mean sea level. The regional topographic gradient direction slopes toward the south-southwest and, therefore, the direction of groundwater flow beneath the Site is inferred to be to the south-southwest. The Pacific Ocean is located approximately 0.38 mile to the southwest.

According to the *Supplemental Assessment for Impacts in Soil and Groundwater*, dated May 4, 2016 and written by California Environmental of Agoura Hills, California for COC Real Estate II LLC, the depth to groundwater 0.49-mile northwest of the Site ranged from 16.74 feet to 17.63 feet below ground surface (bgs).

AEI performed a Phase I Environmental Site Assessment (ESA) in 2016, as documented in the report dated April 22, 2016. The Phase I ESA report indicates that as of 2016, the Site was occupied by a single commercial tenant, Spot Welders, Inc. The Site history documented in the Phase I ESA report discusses the Site's tenants between the years 1927 and 1986 as consisting exclusively of various automotive repair businesses. The absence of regulatory data and the length of time during which the Site was utilized for automotive repair activities constituted a recognized environmental condition (REC). Information later received from the Los Angeles Fire Department indicated that there were no records of an underground storage tank (UST) ever

having been on the Site. Based on the REC, the Phase I ESA included a recommendation that a Phase II subsurface investigation be performed.

The Client is aware that in addition to the RECs cited in the report, that the Phase I ESA report included Other Environmental Considerations warranting discussion:

- The Site's location near significant oil production areas known as Methane Zones, according to the City of Los Angeles Departments of Planning and Building & Safety. It should be noted that subsequent re-examination and comparison of the Site location with respect to the City of Los Angeles Methane Map indicates that the Site is located within the Methane Buffer Zone (Appendix A).
- Locations adjacent to the Site were historically developed with gasoline stations. AEI was unable to eliminate these historic adjacent activities as not potentially having affected the subsurface beneath the Site.
- The age of the buildings indicating the potential use of lead-based paint and the potential presence of asbestos containing materials on the Site.

2.0 INVESTIGATIVE BACKGROUND

On May 27, 2016 a Pre-Demolition Asbestos Survey and Lead-based Paint Screen (Pre-Demolition report) for the building structures was performed by AEI and documented in a report dated June 9, 2016. The investigation included the collection of samples analyzed for these chemicals of concern. The result of testing indicated that asbestos-containing materials (chrysotile) were present in roof flashing in the roof above the kitchen and above the area identified as Office Storage 1 (Figure 2). Analysis of the roof material indicated that the asbestos content above the kitchen contained 10% chrysotile and the roof material over Office Storage 1 contained 5% chrysotile. Lead-based paint was identified in sample P1, collected from the kitchen office exterior. Sample analysis revealed that the lead concentration by weight to be 1.4%. AEI advised the Client to ensure that all applicable laws and regulations were followed to ensure worker safety during redevelopment activities.

On June 4, 2016 AEI performed a Limited Phase II subsurface investigation at the Site, as documented in a report dated July 5, 2016. The limited investigation included the collection and selection of soil samples for laboratory analysis and the collection of soil vapor samples for laboratory analysis. Five (5) borings (B-1 through B-5) were advanced on the Site. Borings B-1, B-2, B-3, and B-5 were advanced to a depth of 10 feet below ground surface (bgs). Boring B-4 was advanced to a depth of 15 feet bgs. The laboratory analytical data from the soil samples submitted for laboratory analysis detected 0.23 milligrams per kilogram (mg/kg) petroleum hydrocarbons as gasoline (TPH-g) in the soil sample from boring B-1 at a depth of 5 feet bgs. The detected concentration was below the regulatory screening level established by LARWQCB. No other petroleum hydrocarbons or volatile organic compounds (VOCs) were detected in the soil samples submitted for analysis as part of the investigation. The soil samples were also analyzed for the presence of metals. Metals were detected in each of the soil samples. However, the detected concentrations were below their respective regulatory screening levels and/or established background concentrations, as documented in the July 5, 2016 report.

The results of soil vapor analysis indicated that aromatic low fraction petroleum hydrocarbons were present in soil vapor beneath the Site. The maximum concentration of aromatic low fraction

total petroleum hydrocarbons detected in soil vapor was 485,000 micrograms per cubic meter (µg/m^3). The regulatory limit against which the detected concentration was compared was based on the Residential Indoor Air Screening Level published by the U.S. Environmental Protection Agency (EPA) of 3.1 µg/m^3. Because the U.S. EPA does not publish a direct regulatory screening limit for compounds detected soil vapor, an attenuation factor of 0.001 was applied, in accordance with the *Final-Vapor Intrusion Guidance Document* issued by the California DTSC in October 2011. Application of the attenuation factor generated a comparison value for soil vapor of 3,100 µg/m^3. The detected concentration of low fraction petroleum hydrocarbons in soil vapor exceeded the regulatory vapor screening level.

It should be noted that during the course of this investigation, groundwater was encountered in boring B-4 at a depth of 10.60 feet bgs.

3.0 SMP BACKGROUND

It is AEI's understanding that current redevelopment plans for the Site include construction of a residential, multi-story building, with a three-story underground parking garage.

3.1 Contaminants of Potential Concern

Based on the information resulting from the information cited in the Phase I ESA report, the Pre-Demolition Survey & Screen, and the Limited Phase II investigation, contaminants of potential concern include asbestos containing materials, lead-based paint, petroleum hydrocarbon vapors, and methane.

4.0 SITE MANAGEMENT PLAN

This section presents the risk management procedures to be followed during any on-Site work which will disturb soil, including landscaping, trenching, grading, and/or other construction activities. This SMP includes sections that discuss worker training and impact mitigation measures.

4.1 General Pre-Construction Planning and Notification

Prior to beginning any construction activity involving subsurface work (e.g., grading, foundation removal or construction, excavation, or utility trenching), information regarding Site risk management procedures (i.e., a copy of this SMP) shall be provided to the Contractor(s) for their review. Each contractor, in turn, shall provide this information to their respective subcontractors. The contractor(s) shall also develop a site-specific Health and Safety Plan (HASP) as required by 40 CFR 1910 requirements and Title 8 CCR § 5192.

A further review of the Los Angeles Methane Zone Map indicates the Site appears to be located within a designated Methane Buffer Zone (Appendix A). The Los Angeles City Ordinance 175790, §91.7103 requires all new buildings and paved areas located within a Methane Zone or Methane Buffer Zone to comply with the requirements and Methane Mitigation Standards established by the Los Angeles Department of Building and Safety (LADBS). Such requirements include but are not limited to: Methane Site Testing (§91.7104.1) and Methane Mitigation Systems (§91.7104.2 through §91.7104.3).

If, during demolition and/or construction activities, asphalt, concrete, or building foundations are destroyed or removed, or any other deleterious material encountered, such non-soil debris shall be removed from the Site. In addition, any and all excavated impacted soil exceeding Site cleanup levels shall be removed from the Site and managed in accordance with the provisions of the SMP and the approved HASP. In the event that the Client is accepted into the Voluntary Oversight Program conducted by the LACoFD, an electronic and printed copy of this SMP shall be submitted to the regulatory agency sufficiently in advance of the commencement of demolition and earth-moving activities. Impacted soil encountered as the result grading, excavating, trenching, or backfilling shall be managed in accordance with all applicable provisions of State and Federal laws and regulations, as discussed in further detail below.

4.1.1. Asbestos Notifications

According to Title 8 CCR § 1529, the California Department of Industrial Relations, which oversees Cal/OSHA requires Contractors who remove asbestos/asbestos-containing materials to register with Cal/OSHA if materials contain more than 0.1% asbestos fiber and the quantity to be handled equals 100 square feet or more. Contractors who are not registered with Cal/OSHA should contact the Asbestos Contractors' Registration Unit (ACRU) Department of Operational Safety and Health (DOSH):

ACRU-DOSH
P.O. Box 420603
San Francisco, CA 9442
Phone: 916-574-2993
Fax: 916-483-0572
e-mail: ACRU@dir.ca.gov

Contractors who are certified to work with asbestos must notify the local DOSH office prior to commencing work at the Site:

DOSH
320 West 4th Street, Room 820
Los Angeles, CA 9013
Phone: 213-576-7451
Fax: 213-576-7461

In addition, prior to commencing work, the registered asbestos Contractor must notify the South Coast Air Quality Management District in accordance with Rule 1403. This registration can only be performed online:

http://www.aqmd.gov/home/rules-compliance/compliance/asbestos-demolition-removal/r1403-web-app

4.1.2 Lead Notification

California law (Title 17 CCR §36100(a)(1)) requires that those engaging in work designed to eliminate lead-based pain in or on residential buildings are to be certified as California Department of Public Health Lead-Related Construction (CDPH LRC) certified. In accordance with Title 8 CCR § 1532.1(p), the Contractor(s) shall provide written notification (Appendix B) via the Lead-Work Pre-Job Notification form. The completed form can be submitted via e-mail to DOSHLeadNotice@dir.ca.gov. The Contractor(s) is/are required to provide 48-hour notice prior

to the scheduled start date. The Contractor(s) can call 1-800-963-9424 beforehand, then follow up by sending the completed notification form.

4.1.3 Fugitive Dust Notification

The South Coast Air Quality Management District (SCAQMD) Rule 403 (Fugitive Dust) requires reduction of the amount of particulate matter 10 micrometers (µm) or less in diameter suspended in ambient air as the result of anthropogenic activities. Notification prior to commencing earth moving activities is not required for operations on a property which contains less than 50 acres of disturbed surface area or any earth-moving operation with a daily earth-moving or throughput volume less than 3,850 cubic meters (5,000 cubic yards) or no more than three times during the most recent 365-day period.

4.2 General Site-Specific Worker Health and Safety Requirements

Each contractor shall be responsible for the health and safety of their own workers, as required by Cal-OSHA, including but not limited to the preparation of their own HASP and injury and illness prevention plan (IIPP) consistent with the requirements in 29 CFR 1910.120 and Title 8 CCR § 5192. The purpose of these documents is to provide general guidance to the work hazards that may be encountered during each phase of construction activities at sites. Contractors must also determine the requirements for worker training, based on each worker's expected level of contact with the soil. The HASP will contain provisions for limiting and monitoring chemical exposure to construction workers, chemical and non-chemical hazards, emergency procedures, and standard safety protocols.

Appropriate Personal Protective Equipment (PPE) will be used to isolate workers from COPCs and physical hazards. The minimum level of protection for workers coming into direct contact with potentially impacted materials is OSHA Level D PPE, listed below. The level of PPE will be evaluated by the contractor on a continuing basis and modified if warranted based upon conditions encountered at the Site and/or type of work activity in accordance with their own HASP.

- Construction work clothing consisting of long pants and minimum of t-shirt (no sleeveless shirts such and tank-tops);
- Reflective safety vests;
- Work boots;
- Hard hat;
- Work gloves, as necessary;
- Safety glasses; and
- Hearing protection, as necessary

4.2.1 Worker Safety: Asbestos Containing Materials

AEI's Pre-Demolition report cited asbestos-containing materials, specifically roof flashing mastic, in the portions of the roof above the kitchen and the area identified as "Office Storage 1." AEI recommends removal of these asbestos-containing materials by a licensed asbestos contractor. As these materials were found to contain more than 1% asbestos fibers (chrysotile), the Client

shall ensure that the licensed asbestos contractor adheres to all applicable portions of Title 40 CFR, Part 61, Subpart M: National Emission Standard for Hazardous Air Pollutants (NESHAP), including the filing of all proper pre-demolition notifications.

The U.S. EPA NESHAP for asbestos requires that at least one onsite person be trained in the applicable regulatory provisions and means of compliance. This individual must possess proof of training within the previous 2-year period and must be familiar with the applicability of the rules, asbestos hazards, worker protections, notifications, identification of materials, control procedures for removal, adequate wetting, local exhaust ventilation, glove-bag procedures, employment of HEPA (high efficiency particulate air) filters, waste disposal work practice, reporting and recordkeeping.

4.2.2 Worker Safety: Lead-Based Paint

Potential inhalation hazards are posed by demolition of surfaces containing lead-based paint. According to the Pre-Demolition report, the white paint exterior of the kitchen area is such a surface. The Client and Contractor shall comply with all applicable regulations stipulated in Title 8 CCR, Division 1, Chapter 4, Subchapter 4, Article 4, §1532.1 Lead and federal OSHA standards 1910.1025 and 1910.1026. The maximum allowable Permissible Exposure Limit (PEL) is 50 milligrams per cubic meter ($\mu g/m^3$), based on an 8-hour day according to the following calculation:

$$400\ \mu g/m^3 \div 8$$

Thus, the PEL may decrease based on a longer work-day requirement. During demolition of the kitchen building, workers assigned to this task shall be outfitted with disposable coveralls and, at minimum, half-face respirators equipped with, at minimum, P-100 filter cartridges or greater. The Client and Contractor shall be responsible for ensuring that the time weighted average of respirator cartridges provided to workers are applicable to the hours worked and the volume of dust generated. A copy of the Safety & Health Fact Sheet for Lead in Construction issued by Cal/OSHA has been included as Appendix C.

In addition to issuing supplemental PPE, the Client and Contractor shall employ dust monitoring equipment at the perimeter of the Site and shall use dust control methods (wetting of demolished areas) to keep lead-containing dust to a minimum. Title 8 and OSHA regulations include but are not limited to the information explicitly contained in this SMP.

4.3 General Site Controls

The general Site controls discussed in this section are mandated by SCAQMD Rule 403 (Fugitive Dust).

For phases of work where substantial soil disturbance is anticipated, such as that associated with construction excavations and utility trenching, Site control procedures presented in the sections below are to be implemented by the contractor to control the flow of personnel, vehicles, and materials into and out of the work areas while handling potentially impacted materials. In addition, Site control measures shall be implemented to help control the spread of potentially impacted materials from the Site, should they be deemed to be present. For example, shaker

plates should be used for trucks exiting the Site during earth removal operations, excess soil should be removed from the outsides of trucks, and loads exiting the Site should be covered.

A work area perimeter shall be established by the contractor using temporary fencing or delineators and barrier tape. Ingress and egress shall be controlled at selected locations and workers entering the area will be required to be informed of the pertinent sections of this SMP. Site control measures for small excavations such as segregation of soils should be utilized. Construction debris and deleterious material shall be segregated from excavated soil. Segregated stockpiles of soil should be managed in accordance with approved Site best management practices (BMPs) described in Section (c)(23) for example, by placing soil on and covering with plastic sheeting to prevent contact with the ground, runoff from rain, or movement of windblown particles.

4.4 Soil Management Plan

This section discusses soil sampling activities before and after excavation work to occur as part of development. All soil sampling activities shall be performed under the supervision of a California licensed Professional Geologist.

4.4.1 Excavation and Soil Handling

Construction work that includes soil disturbance shall follow the guidelines presented in this SMP. At a minimum, the construction contractor shall take the following precautions when conducting excavation and stockpiling activities.

The following soil handling information is required by the U.S. EPA Best Management Practices for Soils Treatment Technologies (5303W; Table 3-2) "Suggested Operational Guidelines to Prevent Cross-Media Transfer of Contaminants" with respect to handling potentially impacted soil encountered during excavation activities.

Soil excavated and stockpiled on the Site shall be placed on plastic sheeting and covered with plastic sheeting to prevent runoff.

If adequately characterized by the disposal facility and accepted by a disposal facility, impacted soil may be loaded directly into covered trucks and transported for off-site disposal. The U.S. EPA defines Small Quantity Waste Generators (SQGs) as those generating more than 220 pounds, but less than 2,200 pounds of hazardous waste per month (https://www.epa.gov/hwgenerators/categories-hazardous-waste-generators#small). An SQG may accumulate hazardous waste onsite for 180 days without a permit (or 270 days if the distance to a licensed disposal facility is greater than 200 miles). Any quantity of acutely or extremely hazardous waste must be removed in 90 days (Title 22 CCR, §66262.34(d)). Soil identified as hazardous waste must be transported by a licensed transporter for disposal at a properly licensed disposal facility.

4.4.1.1 Potentially impacted soil

AEI will provide oversight during grading and excavation activities. This oversight will include the performance of periodic field screening of excavated areas and any stockpiled soil on site using a photoionization detector (PID) for the potential presence of volatile organic compounds. In the event that the short-term exposure limit (STEL) of 50 ppm is detected, soil sample shall be

collected and submitted to a state-licensed laboratory for analysis. Unless otherwise specified by the regulatory agency, required analyses for profiling purposes will be determined by the Client or the Client's representative based on the advice of their selected licensed disposal facility. The Environmental Consultant shall inform the Site Supervisor of this field screening detection to determine whether Level C PPE is required.

Soil that appears discolored or fuel-saturated shall be segregated for further characterization (laboratory analysis) and/or potential disposal then temporarily stockpiled on and covered with a physical barrier (plastic sheeting). The soil shall be stored in a manner so as to prevent contact with the ground, or infiltration from precipitation or storm water runoff. If such soils are encountered, the Client or the Client's representative is to contact a licensed disposal facility (landfill) for guidance regarding the number of soil samples to be collected, and the analyses required by the disposal facility to enable them to characterize the soil for purposes of proper disposal. Soil samples shall be collected using method SW-846 in accordance with the Resource Conservation and Recovery Act (RCRA; Title 40 CFR § 261.22 and § 261.24).

AEI will evaluate the laboratory analytical results of stockpile soil sampling performed during grading and excavation activities for toxicity in accordance with regulations outlined in Title 22 CCR Division 4.5 § 66261.24 and Title 40 CFR § 261.24. In the event that laboratory analytical data should indicate the presence of compounds in soil exceeding the applicable state (DTSC) and federal (RCRA) regulations governing the characterization of soil as hazardous or non-hazardous, AEI shall inform the Client and/or the Client's representative (as arranged). Assuming that the Site has been placed under regulatory oversight, AEI will also inform the regulatory case manager of the appropriate regulatory agency.

4.4.2 Worker Safety

The rules for worker safety described in this section are required in accordance with Title 29 CFR 1910.120, Title 29 CFR 1910.134, Title 8 CCR Division 1, Chapter 4, Subchapter 7, Group 16, managed using methods consistent with the protection of human health and the environment and will include preparation of a HASP and the use of appropriately trained personnel.

- When engaging in activities that generate dust, such as demolition, grubbing, and/or excavating, workers' PPE shall consist of long pants, high-visibility safety vest, hard hat, long-sleeved work shirt, safety glasses, gloves, and a dust (particulate) removal mask covering the nose and mouth.
- Access to the excavation work area shall be controlled by the contractor using fencing where applicable, or signs, barricades, and barrier tape.

4.4.3 Fugitive Dust

SCAQMD Rule 403 requires that, *No person shall cause or allow the emissions of fugitive dust from any active operation, open storage pile, or disturbed surface area such that:*

(A) The dust remains visible in the atmosphere beyond the property line of the emission source; or

(B) The dust emission exceeds 20 percent opacity (as determined by the appropriate test method included in the Rule 403 Implementation Handbook), if the dust emission is the result of movement of a motorized vehicle (Appendix D).

- No person shall conduct active operations without utilizing the applicable best available control measures included in Table 1 of this Rule (Appendix D) to minimize fugitive dust emissions from each fugitive dust source type within the active operation §(d)(2). Such measures include but are not limited to those described below.
    - No person shall allow vehicle or equipment track-out to extend 25 feet or more in cumulative length from the point of origin from an active operation. Notwithstanding the preceding, all track-out from an active operation shall be removed at the conclusion of each workday or evening shift §(d)(4).
    - Install and utilize a wheel washing system to remove bulk from tires and vehicle undercarriages before vehicles exit the Site §(d)(5)(D).

The Contractor shall abide by Rule 403 for Fugitive Dust.

4.5 Noise Regulations

Contractors shall abide by Los Angeles Municipal Code (LAMC) Chapter IV (Public Welfare), Article 1 (Disorderly Conduct Places and Publications), §41.40(a) – "Noise Due to Construction, Excavation Work – When Prohibited". This section of the LAMC ("Code") states, "No person shall, between the hours of 9:00 P.M. and 7:00 A.M. of the following day, perform any construction or repair work of any kind upon, or any excavating for, any building or structure, where any of the foregoing entails the use of any power driven drill, riveting machine, excavator or any other machine, tool, device, or equipment which makes loud noises to the disturbance of persons occupying sleeping quarters in any dwelling, hotel or apartment or other place of residence. In addition, the operation, repair or servicing of construction equipment and the job-site delivering of construction material in such areas shall be prohibited during the hours herein specified. Any person who knowingly and willfully violates the foregoing provision shall be deemed guilty of a misdemeanor punishable as elsewhere provided in [the] Code."

4.6 Disposal of Materials Containing Asbestos or Lead

4.6.1 Asbestos-Containing Materials

The Client or their representative shall hire a certified asbestos contractor to ensure proper removal and disposal of the asbestos-containing roofing material identified in the Pre-demolition report. However, should the Client and Contractor wish to have this work done by onsite personnel, there must be at least one NESHAP-trained person onsite, as described in Section 4.2.1, above.

According to the U.S. EPA NESHAP web page, the rule for transport and waste disposal of asbestos containing materials states:

> "*asbestos-containing waste [is to] be sealed in a leak-tight container while wet, labeled, and disposed of properly in a landfill qualified to receive asbestos waste"*

The U.S. EPA's Asbestos NESHAP is currently found in Title 40 CFR, Chapter 1, Subchapter C, Part 61, §61.140 through §61.157, Subpart M and Appendix A to Subpart M of Part 61.

According to California's Department of Resources Recycling and Recovery (CalRecycle) few, if any landfills within the state accept certain kinds of asbestos wastes, in accordance with rules established by the California State Water Resources Control Board. The Client shall ensure that the certified asbestos contractor has selected a landfill with the appropriate requirements for handling and securing these materials to prevent a release into the air and that the selected transporter follows the special labeling requirements and waste shipment record keeping requirements. A list of landfills approved by the Los Angeles Regional Water Quality Control Board is included as Appendix E.

4.6.2 Construction Debris Containing Lead-Based Paint

The Contractor shall be certified in lead renovation and/or dust sampling in accordance with Title 40 CFR, Chapter 1, Subchapter R, Part 745, Subpart E, §745.90 and shall comply with all parts of Title 40 §745.80 through §745.92. Work practice standards are outlined in Title 40 CFR §745.85.

5.0 POST EXCAVATION ACTIVITIES

The most recent information known to AEI indicates that impacts to soil do not extend past a depth of 15 feet bgs. It is AEI's understanding that the Client will have their contractor perform excavation work to a depth past 15 feet bgs to accommodate the installation of a subterranean parking structure.

AEI will contract the services of a licensed driller to advance borings within the footprint of the new building, based on construction plans. The borings will be advanced to a depth of 10 feet bgs and samples collected from depths of 2.5 feet, 5 feet and 10 feet bgs will be submitted to the laboratory for analysis. Samples will be analyzed for the presence of petroleum hydrocarbons, volatile organic compounds, and metals.

The Client should be aware that, should the Site be accepted into a voluntary oversight program, whether that of the LACoFD or that of another agency, the regulatory agency may require the performance of additional sampling work.

Results of these analyses will be sent to the LACoFD for review and comment. It is expected that the area of the boring(s) exceeding the respective regulatory comparison value will be excavated past the depth of the detection(s) and the process will be repeated until concentrations are below their respective regulatory comparison values.

6.0 REUSE OF SOIL AND IMPORTED FILL

Data evaluated by AEI as part of the Limited Phase II subsurface investigation performed in 2016 indicated that there were no discernable impacts to soil, as represented by the soil samples analyzed as part of its investigation. As such, so long as discernable impacts are not observed, (e.g., visually, olfactory or via PID measurements), in the course of redevelopment activities, it is AEI's opinion that the existing soil is eligible to be reused onsite provided it meets the geotechnical requirements of the proposed redevelopment project.

If import fill is brought to the Site, the Environmental Consultant and geotechnical engineer shall be notified prior to importing fill soil onto the Site. An evaluation of import fill materials will be conducted to ensure the fill meets the geotechnical and environmental requirements for the proposed redevelopment activities. To minimize the potential introduction of impacted fill onto

the Site, AEI recommends that all selected sources of import fill have adequate documentation or certification to verify that the fill source is appropriate for the Site prior to delivery of such soil to the Site. Documentation should include detailed information on previous land use of the fill source, any Phase I Environmental Site Assessments performed and the findings, and the results of any analytical testing performed. If no documentation is available or the documentation is inadequate or if no analytical testing has been performed, AEI recommends that samples of the potential fill material be collected and analyzed prior to delivery of such soil to the Site. The analyses selected should be based on the fill source and knowledge of the previous land use as determined by the Environmental Consultant. AEI also recommends that the sample frequency for potential fill material be conducted in accordance with that outlined in the technical document titled, "*Information Advisory on Clean Imported Fill Material*", issued by the DTSC in October 2001. The Environmental Consultant shall provide guidance to the Contractor regarding acceptability of imported fill; no fill material shall be accepted if contaminant levels exceed current federal environmental screening limits for commercial Sites and/or regional background concentrations.

7.0 REVIEW REQUIREMENTS

The Client, Contractors, and Subcontractors shall review this SMP prior to commencing work at the Site and are responsible for the health and safety of their own employees.

8.0 REPORT LIMITATIONS AND RELIANCE

Contractors and subcontractors are responsible for review of this SMP prior to commencing work at the Site and for the health and safety of their own employees and subcontractors. The Owner is responsible for review of the provisions of this SMP and for incorporating its guidelines into their project planning and specifications. This document was prepared for the use and benefit of Client and its contractors and consultants at the Site. Where information prepared by others has been provided, AEI cannot be responsible for its accuracy or completeness or for the availability of all information that may be relevant to the preparation of this document.

If there are any questions regarding our investigation, please do not hesitate to contact AEI at 310-797-4255.

Sincerely,
AEI Consultants

Alicia Siegel
Project Geologist

Adam Bennett, REPA
Vice President

Cal/OSHA Contractors' Lead Notification Form

STATE OF CALIFORNIA
Division of Occupational Safety and Health

LEAD-WORK PRE-JOB NOTIFICATION

☐ Annual Notification for Steel Structures

(*Note: items marked are required)

*Name of employer doing 'Lead Work'	*Address	*Zipcode	*Phone
Calif. Cont. Lic. No. (if applicable)			Pager/cellular phone no.

Supervisor:	*Number of lead-job workers: (Check one below)
* Supervisor name: _____ California Department of Health Services Lead Cert. No. (if applicable) _____	☐ 1 - 5 ☐ 6 - 10 ☐ 11 - 20 ☐ 21 - 30 ☐ 31 - 40 ☐ 41 - 50 ☐ > 50

*Job start date/time	*Job completion date/time	Shift (Check all that apply)	*Approximate duration of 'Lead Work' in days
		☐ Day ☐ Swing ☐ Graveyard ☐ Other	

*Street address or location of job	City	Nearest cross street
	County	Zipcode

*Precise location of work (building no., room no., etc.)

Entity contracting the lead-work (check one)	Address	Zipcode	Phone
☐ Premises Owner ☐ Lessee Name:			Pager/cellular phone no.

Type of structure and use: (Check all that apply)

☐ Office Building ☐ Residence ☐ Steel Structure/Type _____
☐ Public Access/Commercial ☐ School ☐ Other _____

Scope of work and work practices:

*Describe lead-related work to be done (check all that apply)

☐ Surface Preparation ☐ Wall Repair ☐ Other _____
☐ Water/Moisture Damage Repair ☐ Paint Removal
☐ Window/Door Repair/Replacement Demolition

*Describe paint removal methods (Check all that apply):

☐ Manual Scraping/Sanding ☐ Demolition ☐ Hydroblasting ☐ Other work practices disturbing lead:
☐ Power Sanding/Grinding ☐ Heat Guns ☐ Torch Cutting _____
☐ Chemical Stripping ☐ Abrasive Blasting ☐ Welding

*Amount of area to be disturbed: (Check one per column)

☐ < 10 square feet	☐ < 10 linear feet
☐ 10 - 100 square feet	☐ 10 - 100 linear feet
☐ 101 - 1000 square feet	☐ 100 - 1000 linear feet
☐ > 1000 square feet	☐ > 1000 linear feet

Torch cutting/welding
Duration of work: _____

Concentration of lead in disturbed materials:

_____ parts per million (ppm) _____ % percent by weight
_____ mg/cm^2 Assumed to be lead-containing: ☐ YES

Name of Notifier:	Title:	Date:

This information is provided in accordance with Title 8, California Code of Regulations, Construction Safety Order Section1532.1 (p).

APPENDIX D

South Coast Air Quality Management District Rule 403 - Fugitive Dust Information:

Table 1 - Best Available Control Measures And 2004 Draft Final Rule 403 Implementation Handbook

TABLE 1
BEST AVAILABLE CONTROL MEASURES
(Applicable to All Construction Activity Sources)

Source Category	Control Measure	Guidance
Backfilling	01-1 Stabilize backfill material when not actively handling; and 01-2 Stabilize backfill material during handling; and 01-3 Stabilize soil at completion of activity.	✓ Mix backfill soil with water prior to moving ✓ Dedicate water truck or high capacity hose to backfilling equipment ✓ Empty loader bucket slowly so that no dust plumes are generated ✓ Minimize drop height from loader bucket
Clearing and grubbing	02-1 Maintain stability of soil through pre-watering of site prior to clearing and grubbing; and 02-2 Stabilize soil during clearing and grubbing activities; and 02-3 Stabilize soil immediately after clearing and grubbing activities.	✓ Maintain live perennial vegetation where possible ✓ Apply water in sufficient quantity to prevent generation of dust plumes
Clearing forms	03-1 Use water spray to clear forms; or 03-2 Use sweeping and water spray to clear forms; or 03-3 Use vacuum system to clear forms.	✓ Use of high pressure air to clear forms may cause exceedance of Rule requirements
Crushing	04-1 Stabilize surface soils prior to operation of support equipment; and 04-2 Stabilize material after crushing.	✓ Follow permit conditions for crushing equipment ✓ Pre-water material prior to loading into crusher ✓ Monitor crusher emissions opacity ✓ Apply water to crushed material to prevent dust plumes

TABLE 1

(Applicable to All Construction Activity Sources)

Source Category	Control Measure	Guidance
Cut and fill	05-1 Pre-water soils prior to cut and fill activities; and 05-2 Stabilize soil during and after cut and fill activities.	✓ For large sites, pre-water with sprinklers or water trucks and allow time for penetration ✓ Use water trucks/pulls to water soils to depth of cut prior to subsequent cuts
Demolition – mechanical/manual	06-1 Stabilize wind erodible surfaces to reduce dust; and 06-2 Stabilize surface soil where support equipment and vehicles will operate; and 06-3 Stabilize loose soil and demolition debris; and 06-4 Comply with AQMD Rule 1403.	✓ Apply water in sufficient quantities to prevent the generation of visible dust plumes
Disturbed soil	07-1 Stabilize disturbed soil throughout the construction site; and 07-2 Stabilize disturbed soil between structures	✓ Limit vehicular traffic and disturbances on soils where possible ✓ If interior block walls are planned, install as early as possible ✓ Apply water or a stabilizing agent in sufficient quantities to prevent the generation of visible dust plumes
Earth-moving activities	08-1 Pre-apply water to depth of proposed cuts; and 08-2 Re-apply water as necessary to maintain soils in a damp condition and to ensure that visible emissions do not exceed 100 feet in any direction; and 08-3 Stabilize soils once earth-moving activities are complete.	✓ Grade each project phase separately, timed to coincide with construction phase ✓ Upwind fencing can prevent material movement on site ✓ Apply water or a stabilizing agent in sufficient quantities to prevent the generation of visible dust plumes

TABLE 1
BEST AVAILABLE CONTROL MEASURES
(Applicable to All Construction Activity Sources)

Source Category	Control Measure	Guidance
Importing/exporting of bulk materials	09-1 Stabilize material while loading to reduce fugitive dust emissions; and 09-2 Maintain at least six inches of freeboard on haul vehicles; and 09-3 Stabilize material while transporting to reduce fugitive dust emissions; and 09-4 Stabilize material while unloading to reduce fugitive dust emissions; and 09-5 Comply with Vehicle Code Section 23114.	✓ Use tarps or other suitable enclosures on haul trucks ✓ Check belly-dump truck seals regularly and remove any trapped rocks to prevent spillage ✓ Comply with track-out prevention/mitigation requirements ✓ Provide water while loading and unloading to reduce visible dust plumes
Landscaping	10-1 Stabilize soils, materials, slopes	✓ Apply water to materials to stabilize ✓ Maintain materials in a crusted condition ✓ Maintain effective cover over materials ✓ Stabilize sloping surfaces using soil binders until vegetation or ground cover can effectively stabilize the slopes ✓ Hydroseed prior to rain season
Road shoulder maintenance	11-1 Apply water to unpaved shoulders prior to clearing; and 11-2 Apply chemical dust suppressants and/or washed gravel to maintain a stabilized surface after completing road shoulder maintenance.	✓ Installation of curbing and/or paving of road shoulders can reduce recurring maintenance costs ✓ Use of chemical dust suppressants can inhibit vegetation growth and reduce future road shoulder maintenance costs

TABLE 1
BEST AVAILABLE CONTROL MEASURES
(Applicable to All Construction Activity Sources)

Source Category	Control Measure	Guidance
Screening	12-1 Pre-water material prior to screening; and 12-2 Limit fugitive dust emissions to opacity and plume length standards; and 12-3 Stabilize material immediately after screening.	✓ Dedicate water truck or high capacity hose to screening operation ✓ Drop material through the screen slowly and minimize drop height ✓ Install wind barrier with a porosity of no more than 50% upwind of screen to the height of the drop point
Staging areas	13-1 Stabilize staging areas during use; and 13-2 Stabilize staging area soils at project completion.	✓ Limit size of staging area ✓ Limit vehicle speeds to 15 miles per hour ✓ Limit number and size of staging area entrances/exists
Stockpiles/ Bulk Material Handling	14-1 Stabilize stockpiled materials. 14-2 Stockpiles within 100 yards of off-site occupied buildings must not be greater than eight feet in height; or must have a road bladed to the top to allow water truck access or must have an operational water irrigation system that is capable of complete stockpile coverage.	✓ Add or remove material from the downwind portion of the storage pile ✓ Maintain storage piles to avoid steep sides or faces

TABLE 1
BEST AVAILABLE CONTROL MEASURES
(Applicable to All Construction Activity Sources)

Source Category	Control Measure	Guidance
Traffic areas for construction activities	15-1 Stabilize all off-road traffic and parking areas; and 15-2 Stabilize all haul routes; and 15-3 Direct construction traffic over established haul routes.	✓ Apply gravel/paving to all haul routes as soon as possible to all future roadway areas ✓ Barriers can be used to ensure vehicles are only used on established parking areas/haul routes
Trenching	16-1 Stabilize surface soils where trencher or excavator and support equipment will operate; and 16-2 Stabilize soils at the completion of trenching activities.	✓ Pre-watering of soils prior to trenching is an effective preventive measure. For deep trenching activities, pre-trench to 18 inches soak soils via the pre-trench and resuming trenching ✓ Washing mud and soils from equipment at the conclusion of trenching activities can prevent crusting and drying of soil on equipment
Truck loading	17-1 Pre-water material prior to loading; and 17-2 Ensure that freeboard exceeds six inches (CVC 23114)	✓ Empty loader bucket such that no visible dust plumes are created ✓ Ensure that the loader bucket is close to the truck to minimize drop height while loading
Turf Overseeding	18-1 Apply sufficient water immediately prior to conducting turf vacuuming activities to meet opacity and plume length standards; and 18-2 Cover haul vehicles prior to exiting the site.	✓ Haul waste material immediately off-site

TABLE 1
BEST AVAILABLE CONTROL MEASURES
(Applicable to All Construction Activity Sources)

Source Category	Control Measure		Guidance
Unpaved roads/parking lots	19-1	Stabilize soils to meet the applicable performance standards; and	✓ Restricting vehicular access to established unpaved travel paths and parking lots can reduce stabilization requirements
	19-2	Limit vehicular travel to established unpaved roads (haul routes) and unpaved parking lots.	
Vacant land	20-1	In instances where vacant lots are 0.10 acre or larger and have a cumulative area of 500 square feet or more that are driven over and/or used by motor vehicles and/or off-road vehicles, prevent motor vehicle and/or off-road vehicle trespassing, parking and/or access by installing barriers, curbs, fences, gates, posts, signs, shrubs, trees or other effective control measures.	

DRAFT FINAL

RULE 403 IMPLEMENTATION HANDBOOK

South Coast Air Quality Management District

Office of Planning and Policy

21865 Copley Drive

Diamond Bar, California 91765

April 2004

SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT
GOVERNING BOARD

Chairman: WILLIAM A. BURKE, Ed.D.
Speaker of the Assembly Appointee

Vice Chairman: S. ROY WILSON, Ed.D.
Supervisor, Fourth District
Riverside County Representative

MEMBERS:

S T A T E M E N T OF P U R P O S E

STATEMENT OF PURPOSE

The purpose of Rule 403 is to reduce the amount of fugitive dust entrained as a result of human activities. Rule 403 applies to any activity capable of generating fugitive dust.

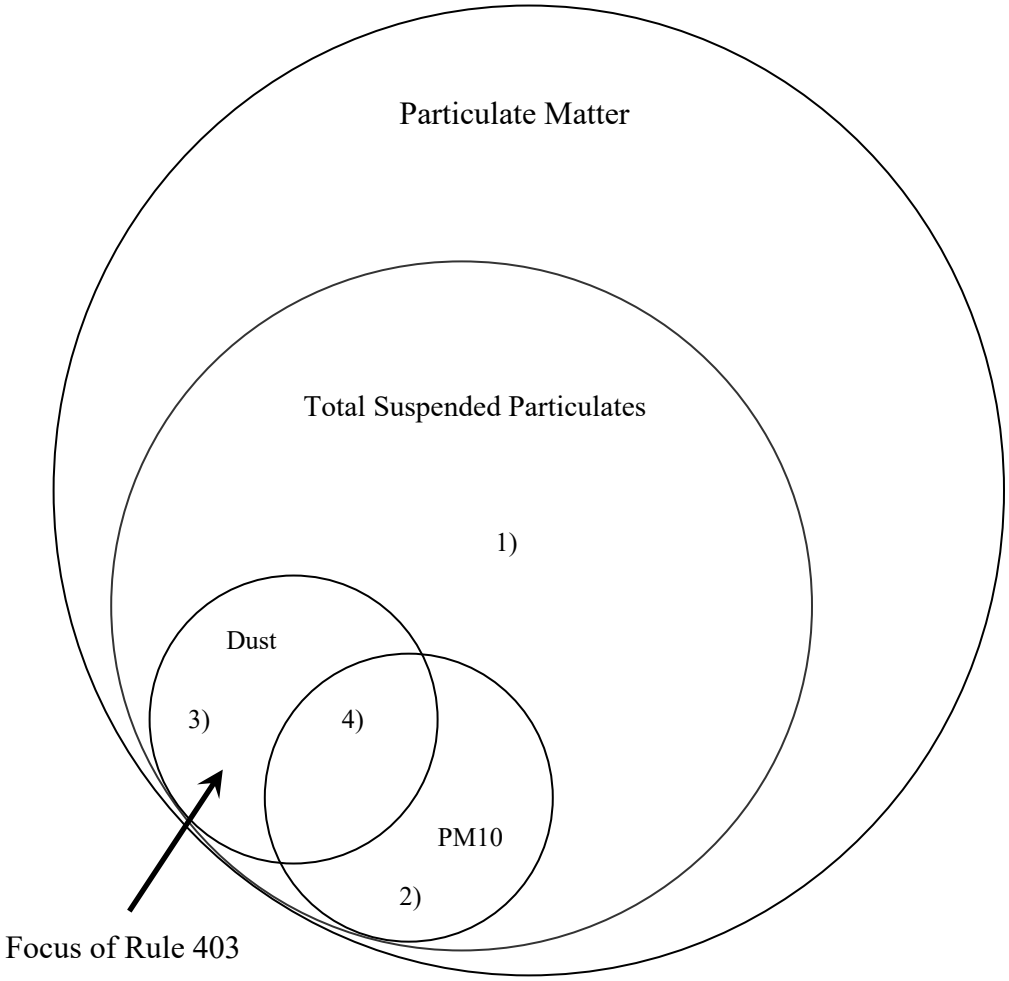
This Handbook has been developed by District staff to assist affected persons and activities in complying with Rule 403. Throughout this Handbook, several terms are used to describe various categories of dust or fine particulate matter. While all of the terms represent a form of particulate matter, each has a specific meaning. The following definitions should help the reader understand the differences between these terms. Figure 1-1 illustrates the relationship of these terms based on size.

PARTICULATE MATTER means any material, except uncombined water, which exists in a finely divided form as a liquid or solid at standard conditions (defined in Rule 102).

TOTAL SUSPENDED PARTICULATE MATTER (TSP) is any airborne particulate matter as measured by applicable State and federal reference test methods. (A subset of PARTICULATE MATTER).

FUGITIVE DUST means any solid particulate matter that becomes airborne, other than that emitted from an exhaust stack, directly or indirectly as a result of human activities. (A subset of TOTAL SUSPENDED PARTICULATES).

PM10 is particulate matter with an aerodynamic diameter smaller than or equal to 10 microns as measured by the applicable State and federal reference test methods. Studies have indicated that appropriately 50 percent of total suspended particulate matter, by weight, is of PM10 size or less. (A subset of TOTAL SUSPENDED PARTICULATES).



1) TSP larger than 10 microns originating from exhaust stacks

2) PM10 not related to fugitive dust sources, such as sulfates, nitrates, and organic particles

3) Dust particles larger than 10 microns

4) Portion of ambient PM10 which can be reduced through fugitive dust emission controls

FIGURE 1-1

Fugitive Dust (Rule 403)

APPLICABLE DISTRICT RULES

Fugitive Dust (Rule 403)

Rule 403 requires the implementation of best available fugitive dust control measures during active operations capable of generating fugitive dust. Table 1 of Rule 403 lists best available control measures (BACM) by source. Figure 2-1 identifies the jurisdictional boundaries of the South Coast Air Quality Management District.

Rule 403 also requires activities defined as "large operations" to notify the AQMD by submitting Form 403N, implement the Rule 403 Table 2 and 3 control actions, and maintain records of control measure implementation. Rule 403 defines large operations as:

> "any active operations on property which contains in excess of 50 acres of disturbed surface area; or any earth-moving operation which exceeds a daily earth-moving or throughput volume of 3,850 cubic meters (5,000 cubic yards) three times during the most recent 365-day period."

Additional guidance for large operations is included in Section 5 of the Handbook.

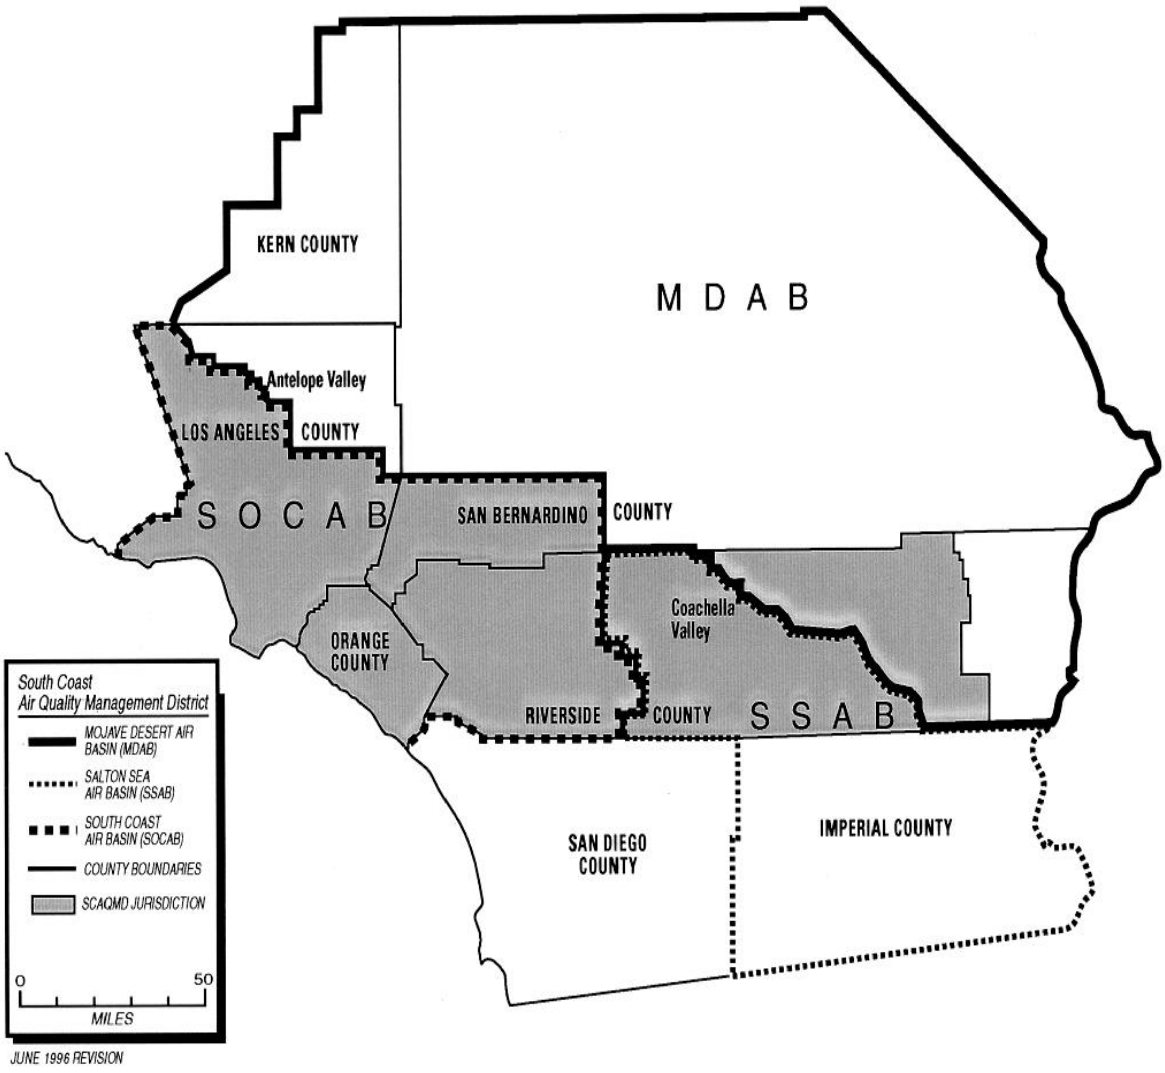

FIGURE 2 - 1

BOUNDARIES OF THE SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT AND THE SOUTH COAST AIR BASIN

In order to save space and avoid repetition, please refer to the latest version of Proposed Amended Rule 403, which is located elsewhere in the rule package.

ASTM Standard Test Method D 2216
ASTM Standard Test Method D 1557

SOIL MOISTURE TESTING METHODS

American Society for Testing and Materials (ASTM) Standard Test Method D-2216 and ASTM D-1557

Tables 2 and 3 of Rule 403 contain a listing of dust control actions for a variety of fugitive dust sources for activities defined as large operations [see Rule 403 definition (c)(18)]. Specifically, Table 2 control action (1a) requires that certain earth-moving activities conducted at large operations maintain a soil moisture content level of at least 12 percent as determined by ASTM Standard Test Method D 2216. Additionally, Table 2 control action (1b) states that portions of construction sites that have an optimum soil moisture content for compaction of less than 12 percent, as determined by ASTM Standard Test Method D-1557, are to complete the compaction process as expeditiously as possible after achieving at least 70 percent of the optimum soil moisture content.

A copy of Test Method D-2216 and D-1557 can be obtained from the ASTM web site http://www.astm.org

It should be noted that ASTM documents are periodically updated.

Resource List of Vendors

CHEMICAL DUST SUPPRESANTS

Introduction

The following is a list of chemical dust suppressants and vendors. This resource list has been compiled from information provided to the AQMD by various vendors, but there are likely to be additional products that are commercially available. **This resource listing is not an endorsement by the AQMD to use any particular product**. It is the responsibility of each person who wishes to use a chemical dust suppressant to assure that such product is not prohibited for use in fugitive dust control by the California Regional Water Quality Control Board, the California Air Resources Board (ARB), the Environmental Protection Agency, or any applicable laws. Also, such products should meet any specifications, criteria, or tests required by any federal, state, or local water agency.

The California Air Resources Board (ARB) has a precertification program whereby manufacturers of air pollution control products request the ARB to conduct a third-party verification of performance claims. This analysis focuses on the air quality benefits of individual equipment or processes. A list of chemical dust suppressant vendors that have participated in the ARB's precertification program is listed on the Internet at http://www.arb.ca.gov/eqpr/mainlist.htm. This site also contains the documented PM10 control efficiency for these products when applied in accordance with the manufacturer's specifications.

For further information about ARB's precertification program, please e-mail or call Mr. Mike Waugh at (916) 445-6018 / mwaugh@arb.ca.gov or Ms. Marcelle Surovik at (916) 327-2951 / msurovik@arb.ca.gov.

Resource List of Vendors

Product Name	Vendor Contact
Acrylic polymers (Various other products including, lignosulfonates, surfactants, resins, enzymes, hydroseeding, and chlorides)	Dust Pro, Inc. Phoenix, AZ (602) 251-3878 www.dustpro.com
AGRI-LOCK and DUST-LOCK (synthetic resin and organic compound)	Swift Adhesives Research Triangle Park, NC (800) 213-4804
Agri-Fiber (organic compound)	Precision Hydroseeding Company Palm Desert (760) 778-3810 (888) 645-4800
AIRTROL Geobinder (gypsum based bonded fiber matrix)	United States Gypsum Co. San Diego, CA (619) 546-4733
Asphotac (asphaltic emulsions)	Pragma, Inc. Lodi, CA (209) 367-0579 (909) 598-1734
Blend R40 Series (water-based polymer emulsions)	Rohm and Haas Company Spring House, PA (215) 641-7000
Calcium Chloride (hygroscopic salt)	Lee Chemical, Inc. Moreno Valley (909) 369-5292
Calcium Chloride (hygroscopic salt)	Hill Brothers Chemical Company Orange, CA (714) 998-8800
DC-360 (polymer emulsion)	Global Eco Technologies, Inc Pittsburgh, CA (925) 473-9250

Product Name	Vendor Contact
DC-30 (co-polymer)	Southwest Boulder and Stone Escondido, CA (760) 751-3333
Dust Oil Emulsion (asphalt emulsion)	Morgan Emultech, Inc. Redding, CA (530) 241-1364
Dust Sorb 1118 (acrylic resin)	Aqua Chem Ltd. Bakersfield, CA (805) 323-8308
Dust Off (brine solution)	Leslie Salt Company Newark, CA (510) 790-8169
Dusty Roads (soil conglomerate/ wood byproduct)	Ecolink San Diego, CA (619) 483-3111
Dustex (lignosulfonate)	LignoTech USA Rothschild, WI (715) 359-6544*
DSS-40 (acrylic co-polymer)	S & S Seeds Carpentaria, CA (805) 684-0436
Eco-Polymer (polymer)	Eco-polymer Los Angeles, CA (323) 954-2240
Earthbond (organic emulsion)	Spectrum Pacific Santa Fe Springs, CA (562) 404-6131
ECO-110 and C-50 (polymer)	Dynaguard, Inc. Orange, CA (714) 771-7411

* Local suppliers available.

Product Name	Vendor Contact
Envirotac II (acrylic co-polymer)	Environmental Products and Applications Lake Elsinore, CA (909) 674-9174 (877) 371-1147
Ecotak-OP and Ecotak-SAT (hydroseeding)	Elliott Landscaping Cathedral City, CA (760) 343-2002
Ecology Control M Binder (co-polymer)	S & S Seeds Carpentaria, CA (805) 684-0436
Enduraseal 100/200 (organic emulsion)	Cascadia Technologies, Inc Vancouver, BC (604) 685-0877
EnviroKleen (polymer)	REAMS Associates, Inc. Santa Ana, CA (714) 953-3164
FIBER-SORB™ Dewatered Residual Wood Fiber (organic pulp product)	Coast Resource Management, Inc. Cerritos, CA (562) 860-4665
Fiberwood (hydroseeding mulch)	Green Stone Industries Sacramento, CA (800) 655-9754
Fibercraft (hydromulch cellulose fiber)	Dynamis, Inc. Sanger, CA (209) 875-0800
Hydro=Plant (hydroseeding)	Hydro=Plant, Inc. San Marcos, CA (760) 744-7360
Hydroseeder (seed mixes and applications)	Sanders Hydroseeding, Inc. Santa Ana, CA (714) 973-8873

Product Name	Vendor Contact
Lignosulfonate (wood pulp by-product)	Jim Good Marketing Shafter, CA (805) 746-3783
Magnesium Chloride (hygroscopic salt)	SouthWestern Sealcoating, Inc. Murrieta, CA (909) 677-6228
Magnesium Chloride (hygroscopic salt)	Dustpro, Inc. Phoenix, AZ (602) 251-3878
Magnesium Chloride (hygroscopic salt)	Jim Good Marketing Shafter, CA (805) 746-3783
Marloc (co-polymer)	Reclamare Company Seattle, WA (206) 824-2385
Marloc - SF (co-polymer)	Southwest Boulder and Stone Escondido, CA (760) 751-3333
Native Seed Mix (hydromulch)	Pacific Coast Seed, Inc. Livermoore, CA (925) 373-4417
Organic Soil Stabilizer (soil additive)	Desert Rock Supply La Quinta, CA (760) 360-1354
Perma-Zyme IIX (enzyme formulation)	Charbon Consultants Tustin, CA (714) 832-6366
Pennzsuppress D (emulsified resin)	Pennzoil Products Company Santa Fe Springs, CA (562) 906-0633
Road Oyl (pine tar)	Soil Stabilization Products Merced, CA (209) 383-3296

Product Name	Vendor Contact
Roadkill (soybean product)	Central Soya Company, Inc. Fort Wayne, IN (219) 425-5942
Sandcastles Dust Control Mix	Sandcastle Hydroseeding Lancaster, CA (805) 723-0515
SC Dust Oil Emulsion 715 (emulsified dust oil)	SC Dust Control Bakersfield, CA (805) 391-8357
Sentinel (organic binder-hydroseeding)	Albright Seed Company Camarillo, CA (805) 484-0551
	Precision Hydro-seeding Company Palm Desert, CA (760) 772-0237 (888) 645-4800

Large Operation Notification Procedures
Contact Signage
Statement of No Change
Notice of Completion

GUIDANCE FOR LARGE OPERATIONS

Notification Procedures

Rule 403 requires large operations that meet or exceed the threshold for large operations to:

- ✓ notify the District in writing by submitting a Large Operation Notification (Form 403N) with the appropriate site mapping within seven days of qualifying as a large operation to the address provided below:

  Phill Hubbard
  South Coast Air Quality
  Management District
  Rule 403 Compliance
  21865 E. Copley Drive
  Diamond Bar, CA 91765

- ✓ identify a dust control supervisor
- ✓ install contact signage that meets the minimum standards outlined by this Chapter within 50 feet of each public site entrance or other frequently-used work entrances. No more than four signs are required per site/facility. One sign is sufficient for multiple site entrances located within 300 yards of each other.
- ✓ implement the Rule 403 Table 2 and Table 3 control actions for each on-site source, and
- ✓ prepare daily records of control action implementation and maintain such recordkeeping information for three years.

Rule 403 also requires large operations to notify the AQMD 30 days after no longer qualifying as a large operation [subparagraph (e)(1)(F)] by submitting a Project Completion Form (Form 403 C) or submit a Statement of No Change (Form 403 NC) for projects that will last more than one year [paragraph (e)(2)]. The requirement to submit a Statement of No Change is not required for stationary sources (i.e., aggregate facilities, etc.) that operate for multiple years at one site.

A blank Large Operation Notification Form (Form 403N), minimum contact signage standards, a Notice of Completion Form (Form 403C), a Statement of No-Change (Form

403NC) is presented in this chapter. A sample recordkeeping form is included in Chapter 6.

FORM 403N

RULE 403 - LARGE OPERATION NOTIFICATION
SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT

21865 Copley Drive, Diamond Bar, CA 91765

Large operations are required to implement the Rule 403 Table 2 and Table 3 control measures and must notify the AQMD no later than 7 days after qualifying as a large operation. Completing this Form and returning it, along with a site location map, to the AQMD will represent compliance with the notification procedures. Note: activities that implement the Table 2 and the Table 3 control measures are required to maintain records of control measure application (see Chapter 6 of the Rule 403 Implementation Handbook).

Is this notification being submitted to comply with the requirements of a Notice to Comply or Notice of Violation? **YES/NO**
Notice Number_____ Please attach copy

Qualifying Criteria:

1. Does this operation contain more than 50 acres of disturbed surface area as of the date of submittal? **YES/NO** Please indicate the size of the project _____.

2. Will the earth moving operation exceed a daily earth moving or throughput volume of 5,000 cubic yards three times during the most recent 365-day period from the date grading begins? **YES/NO**

If you answered yes to either 1 or 2 above please continue with the application. If you answered no to both 1 & 2 you may stop here. If you still have questions regarding your qualifying status please call Phill Hubbard III at (909) 396-2966.

GUIDANCE FOR LARGE OPERATIONS

Minimum Contact Signage Standards

Rule 403 subparagraph (e)(1)(D) requires large operations to install and maintain signage that identifies phone numbers for dust complaints. Signs must be installed within 50 feet of each public site entrance and other frequently-used work entrances. No more than four signs are required per site/facility. One sign is sufficient for multiple site entrances located within 300 yards of each other. The following guidance has been prepared to assist project operators in complying in this requirement.

CONSTRUCTION SITE SIGNAGE GUIDELINES (Minimum Requirements)

- ✓ The purpose of this signage is to allow the public to contact the responsible party if visible dust emissions or track-out of material is observed from a construction site.

Project size	**Over 50 Acres**
Sign size	48” x 96”

Permit # *(if applicable)*	4”
Site Name	4”
Project Name / Tract ####	4”
IF YOU SEE DUST COMING FROM	4”
THIS PROJECT CALL:	4”
Name, Phone Number XXX-XXXX	6”
If you do not receive a response, Please call	3”
the AQMD 1-800-CUT-SMOG	3”
	3”

Notes:

- ✓ Signage must be located within 50 feet of each project site entrance.
- ✓ No more than four signs are required per site/facility.
- ✓ One sign is sufficient for multiple site entrances located within 300 yards of each other.
- ✓ Text height shall be at a minimum as shown on right side of sign template above.
- ✓ Sign background must contrast with lettering, typically black text with white background.
- ✓ Sign should be 1 inch A/C laminated plywood board.
- ✓ The lower edge of the sign board must be a minimum of 6 feet and a maximum of 7 feet above grade.
- ✓ The telephone number listed for the contact must be a local or a toll-free number and shall be accessible 24 hours per day.

STATEMENT OF NO CHANGE FOR PROJECTS THAT EXTEND MORE THAN ONE YEAR

Approved large operation notifications are valid for one year from the date of AQMD acceptance. If a project will extend beyond one-year and if all sources of fugitive dust and control measures are the same as the originally accepted submittal, the operator can extend the applicability of the large operation notification for an additional year by submitting a Statement of No-Change (Form 403NC). A Statement of No-Change is not required for stationary sources (e.g., aggregate facilities, etc.) that operate for multiple years at one facility. A sample Form 403NC is provided on the following page.

FORM 403NC

STATEMENT OF NO CHANGE
SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT

21865 Copley Drive, Diamond Bar, CA 91765

Large operation notifications are valid for one year from SCAQMD acceptance. Rule 403 requires resubmittal of a large operation notification at least 30 days prior to the expiration date or the submittal will no longer be valid. Submittal of form 403NC will represent resubmittal of a large operation notification if conditions will not change in the upcoming year. SCAQMD acceptance of Form 403NC will make the previously approved submittal valid for <u>one</u> additional year from its original approval date. A Statement of No Change is not required for stationary sources (aggregate facilities, etc.) that operate at one site for multiple years.

SAMPLE RECORDKEEPING

Recordkeeping is required of large operations implementing Tables 2 and 3, pursuant to subparagraph (e)(1)(C). SCAQMD staff has included the attached example to serve as guidance for activities that compile records under Rule 403. Activities that are required to conduct record keeping can use the attached form or they can prepare a site-specific form. Under subparagraph (e)(1)(C) of Rule 403, records are to be retained for three years and must be submitted to the AQMD Executive Officer upon request.

FUGITIVE DUST CONTROL
(SCAQMD Rule 403 Table 2 and 3 Control Measures)
Month:_____

Instructions:
1. (X) Check off daily all control measures implemente
2. Operator should initial daily.

		Fugitive Dust Source Category/Control Measures	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31
Earth-moving		*Control Actions*																															
	(1a)	Maintain soil moisture content at a minimum of 12 percent, as determined by ASTM method D-2216, or other equivalent method approved by the Executive Officer, the the California Air Resources Board, and the U.S. EPA. Two soil moisture evaluations must be conducted during the first three hours of active operations during a calendar day, and two such evaluations each subsequent four-hour period of active operations; OR																															
	(1a-1)	For any earth-moving which is more than 100 feet from all property lines, conduct watering as necessary to prevent visible dust emissions from exceeding 100 feet in length in any direction.																															
	(1b)	Maintain soil moisture content at a minimum of 12 percent, as determined by ASTM method D-2216, or other equivalent method approved by the Executive Officer and the California Air Resources Board. For areas which have an optimum moisture content for compaction of less than 12 percent, as determined by ASTM method 1557 or other equivalent method approved by the Executive Officer and the California Air Resources Board, complete the compaction process as expeditiously as possible after achieving at least 70 percent of optimum soil moisture content. Two soil moisture evaluations must be conducted during the first three hours of active operations during a calendar day, and two such evaluations during each subsequent four-hour period of active operations.																															
	(1c)	Conduct watering as necessary to prevent visible emissions from extending more than 100 feet beyond the active cut or mining area unless the area is inaccessible to watering vehicles due to slope conditions or other safety factors.																															
		Contingency Control Measures																															
	(1A)	Cease all active operations, OR																															
	(2A)	Apply water to soil not more than 15 minutes prior to moving such soil																															

OPERATORS INITIALS:

FUGITIVE DUST CONTROL
(SCAQMD Rule 403 Table 2 and 3 Control Measures)
Month:_____

Instructions:
1. (X) Check off daily all control measures implemented.
2. Operator should initial daily.

Fugitive Dust Source Category/Control Measures			1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31
Disturbed Surface Area		*Control Measure*																															
	(2 a/b)	Apply dust suppression in sufficient quantity and frequency to maintain stabilized surface. Any areas which cannot be stabilized, as evidenced by wind driven fugitive dust must have an application of water at least twice per day to at least 80 percent of the unstabilized area.																															
	(2c)	Apply chemical stabilizers within five working days of grading completion; OR																															
	(2d)	Take actions (3a) or (3c) specified for inactive disturbed surface areas.																															
		Contingency Control Measures																															
	(0B)	On the last day of active operations prior to a weekend, holiday, or any other period when active operations will not occur for not more than four consecutive days; apply Water with a mixture of chemical stabilizer diluted to not less than 1/20 of the concentration required to maintain a stabilized surface for a period of six months; OR																															
	(1B)	Apply chemical stabilizers prior to wind event, OR																															
	(2B)	Apply water to all unstabilized disturbed areas 3 times per day. If there is any evidence of wind driven fugitive dust, watering frequency is increased to a minimum of four times per day; OR																															
	(3B)	Take actions specified in Table 2, Item (3c); OR																															
	(4B)	Utilize any combination of control actions (1B), (2B), and (3B) such that, in total, these actions apply to all disturbed surface areas.																															
Inactive Disturbed Surface		*Control Measure*																															
	(3a)	Apply water to at least 80 percent of all inactive disturbed surface areas on a daily basis when there is evidence of wind driven fugitive dust, excluding any areas which are inaccessible to watering vehicles due to excessive slope or other safety conditions; OR																															
	(3b)	Apply suppressants in sufficient quantity and frequency to maintain a stabilized surface; OR																															
	(3c)	Establish a vegetative ground cover within 21 days after active operations have ceased. Ground cover must be of sufficient density to expose less than 30 percent of unstabilized ground within 90 days of planting, and at all times thereafter; OR																															
	(3d)	Utilize any combination of control actions (3a), (3b), and (3c) such that, in total, these actions apply to all inactive disturbed surface areas.

TEST METHODS

- **Opacity Test Methods**
- **Stabilized Surface**
- **Threshold Friction Velocity**
- **Silt Loading/Content**

OPACITY TEST METHODS

Time Averaged Method:

Note: This method can only be conducted by an individual who is a California Air Resources Board (CARB) certified Visible Emission Evaluation (VEE) observer. Qualification and testing requirements for a CARB-certified VEE observer can be obtained from the AQMD.

These procedures are for evaluating continuous fugitive dust emissions and are for the determination of the opacity of continuous fugitive dust emissions by a qualified observer. Continuous fugitive dust emissions sources include activities that produce emissions continuously during operations such as earthmoving, grading, and trenching. Emissions from these types of continuous activities are considered continuous even though speed of the activity may vary and emissions may be controlled to 100%, producing no visible emissions, during parts of the operation. The qualified observer should do the following:

Position: Stand at a position at least twenty (20) feet from the fugitive dust source in order to provide a clear view of the emissions with the sun oriented in the 140° sector to the back. Consistent as much as possible with maintaining the above requirements, make opacity observations from a position such that the line of sight is approximately perpendicular to the plume and wind direction. The observer may follow the fugitive dust plume generated by mobile earth moving equipment, as long as the sun remains oriented in the 140° sector to the back. As much as possible, do not include more than one plume in the line of sight at one time.

Field Records: Record the name of the site, fugitive dust source type (e.g., earthmoving, grading, trenching), method of control used, if any, observer's name, certification data and affiliation, and a sketch of the observer's position relative to the fugitive dust source. Also, record the time, estimated distance to the fugitive dust source location, approximate wind direction, estimated wind speed, description of the sky condition (presence and color of clouds), observer's position relative to the fugitive dust source, and color of the plume and type of background on the visible emission observation when opacity readings are initiated and completed.

Observations: Make opacity observations, to the extent possible, using a contrasting background that is perpendicular to the line of sight. Make opacity observations at a point just beyond where material is no longer being deposited out of the plume (normally three (3) feet above the surface from which the plume is generated). The initial observation should begin immediately after a plume has been created above the surface involved. Do not look continuously at the plume, but instead observe the plume momentarily at 15-second intervals. For fugitive dust from earthmoving equipment, make opacity observations at a point just beyond where material is not being deposited out of the plume (normally three (3) feet above the mechanical equipment generating the plume).

Recording Observations: Record the opacity observations to the nearest 5% every fifteen (15) seconds on an observational record sheet. Each momentary observation recorded represents the

average opacity of emissions for a fifteen (15) second period. If a multiple plume exists at the time of an observation, do not record an opacity reading. Mark an "x" for that reading. If the equipment generating the plume travels outside of the field of observation, resulting in the inability to maintain the orientation of the sun within the 140° sector or if the equipment ceases operating, mark an "x" for the fifteen (15) second interval reading. Readings identified as "x" shall be considered interrupted readings.

Data Reduction For Time-Averaged Method: For each set of twelve (12) or twenty four (24) consecutive readings, calculate the appropriate average opacity. Sets shall consist of consecutive observations, however, readings immediately preceding and following interrupted readings shall be deemed consecutive and in no case shall two sets overlap, resulting in multiple violations.

Intermittent Emissions Method

Note: This method can only be conducted by an individual who is a California Air Resources Board (CARB) certified Visible Emission Evaluation (VEE) observer. Qualification and testing requirements for a CARB-certified VEE observer can be obtained from the AQMD.

This procedure is for evaluating intermittent fugitive dust emissions: This procedure is for the determination of the opacity of intermittent fugitive dust emissions by a qualified observer. Intermittent fugitive dust emissions sources include activities that produce emissions intermittently such as unpaved road travel, screening, dumping, and stockpiling where predominant emissions are produced intermittently. The qualified observer should do the following:

Position: Stand at a position at least twenty (20) feet from the fugitive dust source in order to provide a clear view of the emissions with the sun oriented in the 140° sector to the back. Consistent as much as possible with maintaining the above requirements, make opacity observations from a position such that the line of sight is approximately perpendicular to the plume and wind direction. As much as possible, do not include more than one plume in the line of sight at one time.

Field Records: Record the name of the site, fugitive dust source type (e.g., pile, material handling, transfer, loading, sorting), method of control used, if any, observer's name, certification data and affiliation, and a sketch of the observer's position relative to the fugitive dust source. Also, record the time, estimated distance to the fugitive dust source location, approximate wind direction, estimated wind speed, description of the sky condition (presence and color of clouds), observer's position relative to the fugitive dust source, and color of the plume and type of background on the visible emission observation when opacity readings are initiated and completed.

Observations: Make opacity observations, to the extent possible, using a contrasting background that is perpendicular to the line of sight. Make opacity observations at a point just beyond where material is no longer being deposited out of the plume (normally three (3) feet above the surface from which the plume is generated). Make two observations per plume at the same point, beginning with the first reading at zero (0) seconds and the second reading at five (5) seconds. The zero (0) second observation should begin immediately after a plume has been created above the surface involved.

Recording Observations: Record the opacity observations to the nearest 5% on an observational record sheet. Each momentary observation recorded represents the average opacity of emissions for a five (5) second period.

Repeat the Observations listed above and the Recording Operations listed above in this procedure until you have recorded a total of 12 consecutive opacity readings. This will occur once six intermittent plumes on which you are able to take proper readings have been observed. The 12 consecutive readings must be taken within the same period of observation but must not exceed 1 hour. Observations immediately preceding and following interrupted observations can be considered consecutive.

Average the 12 opacity readings together. If the average opacity reading equals 20% or lower, the source is in compliance with the averaged method opacity standard described in the Rule.

STABILZED SURFACE TEST METHOD

Introduction:

The purpose of this test is to check whether a property is sufficiently crusted to prevent windblown dust. (Note: This test's primary function is to provide a simplified initial assessment of surface stability. If there is any doubt as to a property's stability after performing this test, the Threshold Friction Velocity test should be conducted to more thoroughly determine a surface's erodibility potential.)

Equipment:

- One steel ball. Diameter - 5/8 (0.625) inches. Mass - 16-17 grams
- A ruler or measuring tape
- A cardboard frame with a 1 ft. by 1 ft. opening (optional)

Step 1:

Select a 1 by 1 foot Survey Area that is representative, or a typical example, of the crusted surface.

Step 2:

Hold the small steel ball one (1) foot off the ground directly above your survey area. Use a ruler or measuring tape to make sure that your hand is at the correct distance above the ground. Drop the ball within the survey area.

Step 3:

Pass/Fail Determination. Observe the ground around the ball closely before picking it up. Did the ball sink into the surface so that it is partially or fully surrounded by loose grains of dirt? Has it dropped out of view entirely? Then pick up the ball. Look closely where the ball fell. Are loose grains of dirt visible?

If you have answered "yes" to any of the previous questions, the surface has failed the first drop test. Note that if the ball causes a slight indentation on the surface but you do not see loose grains, the surface has passed the test.

Step 4:

Select two additional areas within the 1 by 1 foot survey area to drop the ball. Repeat Steps 2 and 3. If the surface passes two or all three of the drop tests, the survey area is considered as passing the test.

Step 5:

Select at least two other survey areas that are representative of the crusted surface. Pick the areas randomly and make sure they are spaced some distance apart. Drop the ball 3 times within each of these additional survey areas. Once again, if the surface passes the test twice or three times, count the survey area as passing the test.

Step 6:

Examine Results. If all of the survey areas have passed the test, the surface is stable, or sufficiently crusted. If one or more survey areas have failed the test, the surface is insufficiently crusted. If the surface fails the visible crust test, but there are minimal loose grains on the surface, the U.S. EPA recommends that the Threshold Friction Velocity test be done. Where there is little loose material that can be collected, the surface is likely to pass the Threshold Friction Velocity test.

Question and Answer – Stabilized Surface Test Method

Question:

What if blowsand is on the crusted surface? (Blowsand is thin deposits of loose grains which have not originated from the surface you are testing, but have been blown there from some surrounding area. Blowsand tends to collect in certain areas rather than uniformly over the surface. If present, it will generally cover less than 50% of the entire surface.)

Answer:

Clear the blowsand from the survey area surfaces on which you plan to drop the ball. Blowsand should not be a factor in your results.

Question:

What if material has been dumped or piled on the surface that is not blowsand, such as dirt or swimming pool waste?

Answer:

Do not do the Stabilized Surface test on those surfaces unless they have crusted over. Instead, do the Threshold Friction Velocity test on any loose surface material.

Question:

What if two of the survey areas pass with flying colors and the third survey area fails miserably?

Answer:

Chances are that the third survey area is either part of an uncrusted portion of the lot or has a much lighter kind of crust or different soil type than that of the other two survey areas. This means that the third survey area represents a different kind of surface than the other survey areas. If this is the case, examine the disturbed surface areas on the lot carefully. Using measuring tape,

segment off (literally or mentally) the portion(s) of the lot that the third survey area represents. Size it up in feet and select two additional 1 by 1 foot survey areas on which to do the visible crust test. Keep in mind that if all other areas on the lot have a stable crust except for the newly identified area, it would need to be at least 5,000 square feet in size or subject to motor vehicle disturbance (i.e. trespassing) for disturbed vacant land requirements to apply.

THRESHOLD FRICTION VELOCITY

Introduction:

The purpose of the Threshold Friction Velocity, or TFV, test method is to determine a site's susceptibility to wind-driven soil erosion. TFV can differ among disturbed vacant lots depending on the type of soil and to what extent it is disturbed. The lower the TFV, the greater the propensity for fine particles to be lifted at relatively low wind speeds. Since rocks and other non-erodible elements add protection against soil erosion, they raise TFV if present on the disturbed surface. A TFV of 100 cm/sec or greater is considered sufficiently protective.

Equipment:

- A set of sieves with the following openings: 4 millimeters (mm), 2mm, 1 mm, 0.5 mm and 0.25 mm and a lid and collector pan
- A small whisk broom or paintbrush with stiff bristles and dustpan. *(The broom/brush should preferably have one, thin row of bristles no longer than 1.5 inches in length.)*
- A spatula without holes
- A cardboard frame with a 1 ft. by 1 ft. opening
- Basic calculator
- Graduated cylinder or measuring cup *(may possibly need)*

Step 1:

Stack a set of sieves in order according to the size openings specified above, beginning with the largest size opening (4 mm) at the top. Place a collector pan underneath the bottom (0.25 mm) sieve.

Step 2:

Select a 1 foot by 1 foot survey area that is representative, or typical, of the disturbed surface. Mark this area using a cardboard frame. Check whether the surface is wet or damp. If so, return later to do this test method when the surface has dried.

Step 3:

Collect a sample of loose surface material to a depth of approximately 3/8 inch (1 cm) into a dustpan. This can best be done using a lightweight whisk broom/brush to carefully sweep the surface material within the marked survey area onto a spatula and lifting it into the dustpan. If you reach a hard, underlying subsurface that is less than 3/8 inch in depth, do not continue collecting the sample by digging into the hard surface.

Step 4:

Check the dustpan for rocks or hard-packed clumps of soil collected in your sample. Measure their diameter and remove those larger than 3/8 inch (1 cm) in diameter from the sample.

Step 5:

Carefully pour the sample into the stack of sieves, minimizing release of dust particles by slowly brushing material into the stack with a whisk broom or paintbrush. (On windy days, use the trunk or door of a car as a wind barricade.) Cover the stack with a lid. Lift up the sieve stack and gently move it using broad, horizontal circular arm motions. Complete 10 clockwise and 10 counter-clockwise motions at a speed of approximately 1 second per motion. Be careful not to move the sieve too roughly in order to avoid breaking up any naturally clumped material.

Step 6:

Remove the lid from the stack and disassemble each sieve separately, beginning with the top sieve. As you remove each sieve, examine it to make sure that all of the material has been sifted to the finest sieve through which it can pass; e.g. material in each sieve (besides the top sieve that captures a range of larger elements) should look the same size. If this is not the case, re-stack the sieves and collector pan, cover the stack with the lid, and gently rotate it using the same circular arm motions as before an additional 10 times. (You only need to reassemble the sieve(s) that contain material which requires further sifting.)

Step 7:

Line up the sieves in a row as they are disassembled, with the 4 mm sieve at one end and the collector pan at the other. Slightly tilt and gently tap each sieve and the collector pan so that all material is collected on one side. The material in the sieves and collector pan should be on the same side relative to your position. Observe the relative amount of material in each sieve and the collector pan to determine which contains the greatest volume. If this is difficult to determine, use a graduated cylinder or a measuring cup to measure the relative volume.

Step 8:

Use the table below to estimate TFV for the sieve catch with the greatest volume estimated in Step 7. For example, if the sieve containing the greatest volume is the one with the 0.5 mm opening, TFV = 58 cm/second.

Sieve Size Opening (mm)	Sieve No.	TFV (cm/sec)
4	5	> 100
2	10	100
1	18	76
0.5	35	58
0.25	60	43
Collector Pan	N/A	30

* TFV values in this table take into account the aggregate size distribution of particles between the different sieve size openings.

Step 9:

Repeat this procedure on at least two other representative areas on the disturbed surface. Average your TFV results from the three samples collected.

Step 10:

Examine Results. If the TFV you've calculated is greater than or equal to 100 cm/sec, the surface is stable.

Question and Answer – Threshold Friction Velocity Test Method

Question:

If there are hard-packed clumps of dirt on the surface, do I sieve these clumps along with the rest of the soil sample?

Answer:

If the hard-packed clumps are 1 cm or greater in size, extract them from the sample.

Question:

Can I combine all three collected soil samples into the sieve stack at once to save time?

Answer:

You may try combining the three samples after removing rocks or other non-erodible elements greater than 1 cm in diameter from each sample only if the mass of the three samples is

approximately the same. However, combined samples may be more difficult to sieve and require reassembling and re-shaking of the sieves more than once. Also, it may be difficult to visibly compare the volume of material caught in the sieves after they have been disassembled. Therefore, combining samples is not recommended.

Question:

If I see dust particles escaping when I collect a sample and transfer it to the sieves, should I start over?

Answer:

Not necessarily. A small amount of dust particles can escape without influencing the TFV results. In fact, it is very difficult to avoid having some dust escape. However, if you rush when collecting and/or transferring a sample to the sieves, you may cause too much dust to escape thus potentially causing error in your results. Or, on a relatively windy day you may lose too much dust unless you set up a wind barricade. Avoid doing this test at all on very windy days.

Question:

If you're not sure which sieve contains the greatest amount of material, can you weigh the sieves for comparison?

Answer:

While, typically, more volume corresponds to greater weight, this is not always the case. Use a measuring cup or graduated cylinder if necessary to determine the sieve that contains the greatest amount of material.

Question:

When determining TFV in step 8, can I combine material in the largest 2 sieves to estimate volume?

Answer:

No. This may fundamentally alter the premises on which the method is based and lead to an incorrect determination of stability.

SILT LOADING/CONTENT TEST METHOD

Introduction:

Silt Content Test Method. The purpose of this test method is to estimate the silt content of the trafficked parts of unpaved roads and unpaved parking lots. The higher the silt content, the more fine dust particles that are released when cars and trucks drive on unpaved roads and unpaved parking lots.

Equipment:

- A set of full height, eight inch diameter sieves with the following openings: 4 millimeters (mm), 2mm, 1 mm, 0.5 mm and 0.25 mm and a lid and collector pan
- A small whisk broom or paintbrush with stiff bristles and dustpan 1 ft. in width. *(The broom/brush should preferably have one, thin row of bristles no longer than 1.5 inches in length.)*
- A spatula without holes A small scale with half ounce increments *(e.g. postal/package scale)*
- A shallow, lightweight container *(e.g. plastic storage container)*
- A sturdy cardboard box or other rigid object with a level surface
- Basic calculator
- Cloth gloves (optional for handling metal sieves on hot, sunny days)
- Sealable plastic bags (if sending samples to a laboratory)
- Pencil/pen and paper

Step 1:

Look for a routinely traveled surface, as evidenced by tire tracks. [Only collect samples from surfaces that are not damp due to precipitation or dew. This statement is not meant to be a standard in itself for dampness where watering is being used as a control measure. It is only intended to ensure that surface testing is done in a representative manner.] Use caution when taking samples to ensure personal safety with respect to passing vehicles. Gently press the edge of a dustpan (1 foot in width) into the surface four times to mark an area that is 1 square foot. Collect a sample of loose surface material using a whiskbroom or brush and slowly sweep the material into the dustpan, minimizing escape of dust particles. Use a spatula to lift heavier

elements such as gravel. Only collect dirt/gravel to an approximate depth of 3/8 inch or 1 cm in the 1 square foot area. If you reach a hard, underlying subsurface that is less than 3/8 inch in depth, do not continue collecting the sample by digging into the hard surface. In other words, you are only collecting a surface sample of loose material down to 1 cm. In order to confirm that samples are collected to 1 cm in depth, a wooden dowel or other similar narrow object at least one foot in length can be laid horizontally across the survey area while a metric ruler is held perpendicular to the dowel.

At this point, you can choose to place the sample collected into a plastic bag or container and take it to an independent laboratory for silt content analysis. A reference to the procedure the laboratory is required to follow is at the end of this section.

Step 2:

Place a scale on a level surface. Place a lightweight container on the scale. Zero the scale with the weight of the empty container on it. Transfer the entire sample collected in the dustpan to the container, minimizing escape of dust particles. Weigh the sample and record its weight.

Step 3:

Stack a set of sieves in order according to the size openings specified above, beginning with the largest size opening (4 mm) at the top. Place a collector pan underneath the bottom (0.25 mm) sieve.

Step 4:

Carefully pour the sample into the sieve stack, minimizing escape of dust particles by slowly brushing material into the stack with a whiskbroom or brush. (On windy days, use the trunk or door of a car as a wind barricade.) Cover the stack with a lid. Lift up the sieve stack and shake it vigorously up, down and sideways for at least 1 minute.

Step 5:

Remove the lid from the stack and disassemble each sieve separately, beginning with the top sieve. As you remove each sieve, examine it to make sure that all of the material has been sifted to the finest sieve through which it can pass (e.g., material in each sieve - besides the top sieve that captures a range of larger elements - should look the same size). If this is not the case, re-stack the sieves and collector pan, cover the stack with the lid, and shake it again for at least 1 minute. (You only need to reassemble the sieve(s) that contain material, which requires further sifting.)

Step 6:

After disassembling the sieves and collector pan, slowly sweep the material from the collector pan into the empty container originally used to collect and weigh the entire sample. Take care to minimize escape of dust particles. You do not need to do anything with material captured in the

sieves -- only the collector pan. Weigh the container with the material from the collector pan and record its weight.

Step 7:

If the source is an unpaved road, multiply the resulting weight by 0.38. If the source is an unpaved parking lot, multiply the resulting weight by 0.55. The resulting number is the estimated silt loading. Then, divide by the total weight of the sample you recorded earlier in Step 2 and multiply by 100 to estimate the percent silt content.

Step 8:

Select another two routinely traveled portions of the unpaved road or unpaved parking lot and repeat this test method. Once you have calculated the silt loading and percent silt content of the 3 samples collected, average your results together.

Step 9:

Examine Results. If the average silt loading is less than 0.33 oz/ft², the surface is stable. If the average silt loading is greater than or equal to 0.33 oz/ft², then proceed to examine the average percent silt content. If the source is an unpaved road and the average percent silt content is 6% or less, the surface is stable. If the source is an unpaved parking lot and the average percent silt content is 8% or less, the surface is stable. If your field test results are within 2% of the standard (for example, 4%-8% silt content on an unpaved road), it is recommended that you collect 3 additional samples from the source according to Step 1 and take them to an independent laboratory for silt content analysis.

Independent Laboratory Analysis: You may choose to collect 3 samples from the source, according to Step 1, and send them to an independent laboratory for silt content analysis rather than conduct the sieve field procedure. If so, the test method the laboratory is required to use is: "Procedures For Laboratory Analysis Of Surface/Bulk Dust Loading Samples", (Fifth Edition, Volume I, Appendix C.2.3 "Silt Analysis", 1995), AP-42, Office of Air Quality Planning & Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina.

Question and Answer - Silt Loading/Content Test Method

Question:
If I see dust escaping when I collect a sample and transfer it to the sieves, should I start over?
Answer:

Not necessarily. A small amount of dust can escape without influencing the silt content results. In fact, it is very difficult to avoid having some dust escape. However, if you rush when collecting and/or transferring a sample to the sieves, you may cause too much dust to escape thus

potentially causing an error in your results. Or, on a relatively windy day you may lose too much dust unless you set up a wind barricade. Avoid doing this test on very windy days.

Question:

Once I calculate the percent silt content for 3 samples collected on one segment of an unpaved road, can I assume the same result for the whole length of the road?

Answer:

You may extrapolate results only to the extent that the rest of the unpaved road has the same average daily trips as the segment you tested and the surface condition on other segments of the road is the same.

Question:

If water is being used as a control measure on the source and this causes the surface to be damp, should I do the silt content test method on a damp surface?

Answer:

Do the silt content test method when the surface is dry in between water applications. The condition of the surface immediately following watering is different than after the water has evaporated. Since sources are required to be in compliance with the rule at all times, test the surface when it is dry.

Question:

If speed limit signs have been posted along an unpaved road as a control measure, do I need to test the surface for silt content?

Answer:

Yes. If speed limit signs have effectively lowered vehicle speeds on the road, the percent silt content may decrease. If signs have been ineffective in controlling speeds and no other controls are being applied, the source may be out of compliance. Either way, you should test to see whether the source meets the appropriate silt content standard.

Guidance for Conducting Wind Measurements
Attachment A – Wind Monitoring Specifications

ON-SITE WIND MONITORING EQUIPMENT

Guidance for Conducting Wind Measurements

The following are AQMD requirements and recommendations for wind measurements used for data reporting or analysis. The meteorological data submitted to AQMD must be accurate and representative. To insure that the meteorological data is acceptable, facilities that wish to deviate from these recommendations must consult with AQMD staff prior to collecting data. In some cases, less stringent procedures may suffice. For example, a lower sensor height may be acceptable for windblown dust analysis from smaller construction sources. It is recommended that all facilities request that AQMD staff review and approve their monitoring plans and sensor specifications prior to the purchase and installation of equipment.

Aspects of a successful monitoring program include the selection of proper equipment, instrument siting, instrument and site maintenance, periodic audits and frequent data review. The instruments should be sited so as to characterize air flow between the source and receptor areas. In flat terrain, or where receptors are close to the source, one meteorological site may be adequate. Additional wind monitoring sites may be needed in complex terrain.

Wind Sensor Siting

The standard sensor height for measuring surface winds is 10 meters (33 feet) above ground level (AGL) over open, level terrain. This usually requires the installation of a tower or mast. For the instrument to be sited over open terrain, there shall be minimal obstructions to the wind flow, such as from buildings, hills or trees. In general, wind sensors should be located where the distance from the sensors to any obstruction is at least 10 times the height of that obstruction. When mounted on a building, wind sensors should be mounted at least 1.5 times the height of the building above the rooftop. Since these siting guidelines are sometimes not possible, especially in urban areas, it is

recommended that siting that deviates from these guidelines be reviewed by AQMD staff or an experienced consultant prior installation.

Data Recording Devices

Data loggers are the preferred method of recording and archiving the data. They are more precise and require less maintenance than strip chart recorders. Data loggers also allow data to be transmitted by telephone or radio to a central computer. All data records must be kept for a period of at least three years after the need for data collection has ended. Data recovery from a well-maintained meteorological system should be at least 90% complete on an annual basis, with no large data gaps (i.e., gaps greater than two weeks).

The U.S. Environmental Protection Agency (EPA) recommends a sampling frequency of once per second (EPA, 2000), which is typical for quality data loggers. Wind averaging periods may depend on the purpose of the data collected and the need to meet specific regulatory requirements. Either 1-hour or 15-minute averaging periods are common.

For each averaging time, wind speed and direction are usually scalar-averaged. Wind direction is defined as the direction from which the wind is blowing, measured in degrees from true north. Since wind direction has a numerical discontinuity between 360 and 001 degrees, scalar averaging of the wind direction is usually calculated using the unit vector method (EPA 2000). Resultant or vector averages are also often calculated, where the 1-second wind speeds and directions are added vectorially by breaking them into their horizontal components, adding the vector components, then recalculating a magnitude (speed) and direction. Both types of horizontal wind averaging, as well as the collection of peak instantaneous wind gusts during the averaging period and sigma theta, the standard deviation of the wind direction, are typical calculations for meteorological data loggers.

Time for the data recording system must be within five minutes of the correct local time, with data archived in Pacific Standard Time (PST) on a 24-hour clock. Thus there should be no change to Daylight Savings Time. It must also be noted whether the time stamp is at the start or the end of the averaging period. When reporting data, the convention is that time-ending data shall range from 0100 to 2400 PST for hourly averages and 0015 to 2400 PST for 15-minute averages. Time-beginning averages are reported with clock times starting at 0000 PST and ending with 2300 PST for hourly averages or 2345 PST for 15-minute averages. Reported data should have the site identification, year, day and time included at the beginning of the record.

Wind Sensor Accuracy

For wind sensors, the starting threshold must be rated as no higher than 0.5 meters per second. If there is some suspicion that the site would have a significant number of hours of wind speeds under 0.5 m/s, sensors with a lower threshold, such as 0.22 m/s, should be used. Wind speed systems shall be accurate to within 0.2 m/s ± 5 percent of the observed speed. Total wind direction system errors shall not exceed 5 degrees. This includes an instrument accuracy of ±3 degrees for linearity and ±2 degrees for alignment to a known direction. Table 1 summarizes these accuracy guidelines.

Table 1. Summary of Performance Criteria for Wind Sensors.

Sensor Type	Sensor Height	Range	Accuracy	Resolution	Starting Threshold	Procedural References
Wind Speed (Horizontal)	10 meters*	0.5 – 50 m/s	0.2 m/s ± 5% of observed wind speed	0.1 m/s	0.5 m/s	EPA, 2000 EPA, 1995
Wind Direction (Horizontal)	10 meters*	0 – 360 degrees (or 0 - 540˚)	+/- 5 degrees	1 degree	0.5 m/s	EPA, 2000 EPA, 1995

* Other sensor heights may be used when appropriate and approved by AQMD.

Maintenance

Frequent data review, preferably on a daily basis, is critical for collecting good meteorological data. In addition, visual inspections of each site should be made at least once every month. This will help to identify sensor alignment problems that may not be obvious in the data. During the inspections, it is recommended that the sensors be compared to the current conditions, possibly by using hand-held instruments such as a compass or GPS and portable anemometer.

In order to ensure that the sensors operate within the manufacturer's specifications, a calibration of the sensors should be performed once every six months by a trained technician or the sensor manufacturer. In corrosive, marine or dusty conditions, more frequent calibrations may be needed. Spare sensors are helpful to avoid data loss while sensors are brought down for calibration and repairs. A logbook of calibrations and repairs is required.

Furthermore, data that is critical for regulatory purposes should be independently audited by a qualified individual who is not affiliated with the organization that maintains and calibrates the instrument. The audits should be on a schedule that is appropriate for the measurements. Typically, once per year is adequate if a routine maintenance and calibration schedule is kept. An audit report shall be written and problems shall be corrected as soon as possible. The audit shall compare the individual sensors to the sensor performance criteria (Table 1) and also look at the data collection system as a whole, including the data logger and siting, to ensure that the data are representative and accurate.

Attachment A

WIND MONITORING SPECIFICATIONS

The following information is designed to provide installation and operating parameters for a wind monitoring station or device. It is to be used for Orders for Abatement and is not designed to represent approved AQMD specifications for a wind monitoring instrument or station.

- This station, or device shall be capable of indicating the wind speed with an accuracy of 0.2 meters/sec. ± 5% of observed speed
- The instrument or station should be located on-site so as to accurately characterize the air flow field on this construction project.
- The starting threshold shall be rated as no higher than 0.5 meters per second. [1]
- Data will be recorded on a data logger, which has been chosen over a strip chart recorder because they are: more precise, require very little maintenance, and allow data to be transmitted by telephone or radio. [1]
- Three months worth of wind monitoring data will be available on-site in the form of hard copies, and made available at the Inspector's request.
- All records will be maintained by the operator for a period of two years and made available upon request.
- The logger time shall be within 5 minutes of the correct time. [1]
- A sampling rate of once per second will be employed by the monitoring station or instrument. This sampling frequency is commonly used and recognized as an industry standard.
- The operator shall submit the specifications and operating parameters, for the wind monitoring instrument or station, to AQMD for approval as an appropriate measuring instrument.
- This instrument or station shall be calibrated and maintained in accordance with the manufacturer's specifications.
- The standard height for measuring surface winds is 10 meters above ground over level, open terrain. Open terrain is defined as being away from obstructions to flow, such s buildings, hills or trees. Generally, the wind sensors should be located where the horizontal distance between the sensors and any obstruction is at least ten times the height of that obstruction. [1]
- If wind sensors are to be mounted on a building, they should be mounted at a height at least 1.5 times the building height above the roof. It is usually not a good idea to mount

wind sensors on stacks, unless the sensors can be mounted on booms at least two stack widths away from the stack, and with a wind measurement system mounted on both sides of the stack. [1]

Subject: **Phase I Environmental Site Assessment**
825 Hampton Street
Venice, California 90291
AEI Project No. 435130

Dear Blake Fogel:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (310) 798-4255 or abennett@aeiconsultants.com.

Sincerely,

Adam Bennett
Division Lead
AEI Consultants

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by 305 Ocean Front Walk LLC, a Delaware Limited Liability Company to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 825 Hampton Street, Venice, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

PROPERTY INFORMATION	
Site Address(es)	825 Hampton Street, Venice, Los Angeles County, California 90291
Property ID (APN or Block/Lot)	4286-012-039
Location	Northwest side of Brooks Avenue and southwest side of Hampton Drive
Property Type	Office
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	0.42/Parcel Map
Number of Buildings	Four
Building Construction Date(s)/Source	1927/1937/Assessor
Building Square Footage (SF)/Source	3,867/Assessor
Number of Floors/Stories	One
Basement or Subgrade Area(s)	None identified
Number of Units	One
Additional Improvements	Small structures used as office and laundry, walk-in storage containers used as post production rooms, water fountain, fire pit, concrete-paved areas and associated landscaping
On-site Occupant(s)	Spot Welders Inc.
Current On-site Operations/Use	Editorial and post-production of music, film, tv, and documentary
Current Use of Hazardous Substances	None identified
REGULATORY INFORMATION	
Regulatory Database Listing(s)	CIWQS (825 Hampton Drive); UST, EDR Hist Auto (165 Brooks Ave)

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
1896-1918	Undeveloped	Topographic Map and Sanborn map
1923-1986	Auto Repair Shops and Gas Station	Topographic Map, Aerial Photographs, Sanborn Maps, Building Permits, City Director

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
1991-Present	Buildings converted into office uses in the late 1980s/ 1990s (last identified gas station use was in 1980s and last documented auto repair use is in 1996)	Aerial Photographs, City Directory, Onsite Reconnaissance

Based on a review of historical sources, the subject property was undeveloped from as early as 1896 until as late as 1918, was developed with auto repair shops and a gas station between 1923 and 1996, and has been occupied by commercial offices since 1991. Tenants on the subject property have included Super Service Station (1928-1933); Holdren's Auto Service (1954-1970); Stewart Body & Paint (1970); Lee's Body & Paint Shop (1975-1985); Poor Man Body Shop (1980-1985); (Design Advantage (1991); Gwendolyn Cates Photography (1991); Johnson Todd Productions (1994); Rasbot Auto Service (1994-1996); and Spot Welders Inc. (1999-Present).

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
Northeast	Commercial Building (815 Hampton Drive) and Hampton Drive followed by Tacos Por Favor (826 Hampton Drive)	EDR Hist Cleaner (826 Electric Ave)
East	Hampton Drive, Electric Avenue and Brooks Avenue followed by City of Los Angeles Pump Plant (314 Brooks Ave)	RCRA NonGen, HAZMAT (314 Brooks Ave)
Southeast	Brooks Avenue followed by Road to Capri (905 Electric Ave), Eames Original Offices (901 Abbot Kinney Blvd), and Commercial Building (951 Abbot Kinney Blvd)	None identified
South	Abbot Kinney Boulevard followed by an industrial building (910 Abbot Kinney Blvd)	HAZNET, HWTS (916 Main Street); UST, EDR Hist Auto (900 Washington Blvd); EDR Hist Auto (901 Washington Blvd); EDR Hist Auto (914 Washington Blvd); EDR Hist Auto (915 Washington Blvd)
Southwest	Commercial Building (812 Main Street)	CERS, FINDS, ECHO, HAZNET, HWTS, NPDES, CIWQS (812 Main Street)

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- The subject property was formerly occupied by a gas station and auto repair shops from at least 1923 to 1996. No records had been provided by the Los Angeles City Fire Department regarding the removal/abandonment of any appurtenances belonging to the gasoline station, such as dispensers, product piping, or underground storage tanks (USTs). Based on these findings, AEI conducted a limited subsurface investigation at the subject property in June 2016. The purpose of this investigation was to determine if the subsurface media was impacted by former auto repair businesses (including a tire & battery shop), a gasoline station, and paint shop operations. Five (5) soil borings (B1 through B5) were advanced to depths between 10 and 15 feet bgs in the vicinity of the former auto repair shop, the gasoline station, and the parking area. Temporary soil gas probes were installed at 5 feet bgs in the five soil borings (B1 through B5). A total of five soil samples were collected and analyzed for total petroleum hydrocarbon as carbon chain (TPHcc), volatile organic compounds (VOCs), and CAM-17 Metals. Additionally, five (5) soil vapor samples were collected analyzed for VOCs. TPH-g was detected in the soil sample at a concentration below regulatory screening levels. Metals were detected in the soil samples; however; the detections were below established background concentrations. No TPHd, TPHo, or VOCs were detected in the soil samples. Additionally, TPH (low fraction) was detected in each of the five soil vapor samples at concentrations ranging from 2,300 to 485,000 micrograms per cubic meter (µg/m3). Four of these detected concentrations exceeded the future residential property VSL (in 2016) of 3,100 µg/m3 for TPH (low fraction). 1,3-butadiene was detected in soil vapor samples B-4 and B-5 at concentrations of 10.9 and 373 µg/m3, one of which exceeded the future residential property VSL (in 2016) of 94 µg/m3 for 1,3-butadiene. It should be noted that the 2016 VSLs are no longer applicable. Based on the results of this investigation, AEI recommended a Soil Management Plan be developed to provide guidance and explanations of steps to take if certain environmental conditions are encountered during future soil movement. On March 6, 2019, AEI prepared a Soil Management Plan.

  The California Environmental Screening Levels (ESLs) were updated in 2019 and some of the VOCs detected in soil gas samples are now above Subslab/Soil Gas Vapor Intrusion Human Health Risk Levels. In particular, the following VOCs were detected: benzene (maximum concentration of 41.1 ug/m3; the residential ESL is 3.2 ug/m3 and the commercial/industrial ESL is 14 ug/m3) and ethylbenzene (maximum concentration of 155 ug/m3; the residential ESL is 37 ug/m3 and the commercial/industrial ESL is 160 ug/m3). Benzene was detected above residential ESLs in four of the five samples and ethylbenzene was detected above residential ESLs in only one sample. It is unclear if the detected soil gas concentrations are from on-site or off-site sources. The elevated concentrations of VOCs in soil gas represent a REC.
- According to a review of the LAFD online database, 165 Brooks Avenue in Venice, was listed as an address present in the historical LAFD historical archives. AEI requested records, however, a response is pending. According to the UST listing in the regulatory

database, the subject property was equipped with an underground storage tank(s). No additional information was provided in the database report. It is unclear if the UST(s) were removed or remain at the subject property. It should be noted that on June 4, 2016, a geophysical survey was conducted at the subject property. The purpose of the survey was to evaluate the proposed boring locations for subsurface obstructions, not to identify USTs. Based on potential UST records, AEI recommends that LAFD records be reviewed prior to property redevelopment. The potential presence of USTs at the subject property represents a REC.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property. A de minimis condition is defined by the ASTM Standard as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

- According to the City of Los Angeles Department of Building & Safety and Department of Planning, the subject property is located near significant oil production areas known as "Methane (Buffer) Zones." Methane (Buffer) Zone sites include properties immediately surrounding gas sources and where testing and mitigation are required by the City of Los Angeles Department of Building and Safety. Due to the potential environmental risk associated with construction in Methane (Buffer) Zones, the property owner is required to conduct a methane assessment prior to the redevelopment of the subject property (Division 71 of the Los Angeles Building Code). AEI recommends that a methane assessment be conducted and/or applicable actions be taken for the subject property prior to any future redevelopment activities.
- Due to the age of the subject property buildings, there is a potential that ACMs are present. The observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance. AEI understands that the subject property is to be redeveloped, and the existing structure removed. Regardless of building construction

date, the EPA's NESHAP requires that an asbestos survey adhering to AHERA sampling protocol be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by the local agency enforcing the federal EPA regulations. The NESHAP regulation specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants. Similarly, OSHA regulations require that specific work practices be implemented when handling construction materials and debris that contain lead-containing materials. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs. On June 9, 2016, AEI conducted a Pre-Demolition Asbestos Survey and Lead-Based Paint Screen; ACMs were detected at the property. Based upon the findings for Asbestos Containing Building Materials, AEI recommends that all identified ACMs be removed by a California licensed asbestos abatement contractor prior to demolition activities. Asbestos abatement should be monitored and inspected by a California Asbestos Consultant to confirm the appropriate removal activities and to clear containment areas in accordance with applicable regulations. AEI recommends that if during demolition activities, additional materials are identified or uncovered that are not identified in this report, that they be properly sampled and analyzed by a licensed asbestos inspector to confirm or deny the presence of asbestos in the building materials prior to further disturbance by demolition activities.

- Due to the age of the subject property buildings, there is a potential that LBP is present. All observed painted surfaces were in good condition. AEI understands that the subject property is to be redeveloped, and the existing structure removed. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62. On June 9, 2016 AEI conducted a Pre-Demolition Asbestos Survey and Lead-Based Paint Screen. LBP was detected onsite, and observed in good condition. AEI recommends the stabilization of any loose or peeling paint prior to demolition activities commence. Contractors performing work should be notified that all painted surfaces are to be considered LCP under the Cal-OSHA regulations and should be handled in accordance with Cal-OSHA regulations.
- The adjacent properties were historically developed with gas stations. Although no documented releases were reported, based on the timeframe of operations, and the lack of any additional information (sampling reports or regulatory oversight records), AEI is unable to rule out the potential that the subject property could have been impacted by these adjacent sites. Due to the historical presence of a gas station at the subject property, the potential exists that the release at an adjoining site and a release at the subject property could be commingled, or that additional costs may be incurred in determining the responsible party. In addition, investigation of the subject property could reveal a release that actually originated at an off-site location.

- Based on the former subject property uses, there is a potential that subsurface features of concern remain present in the subsurface of the subject property that were not identified via former investigations. The subject property is slated for redevelopment. As such, if any features of concern are encountered during the redevelopment of the subject property, they should be addressed in accordance with regulatory oversight guidelines and industry standards.

CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 825 Hampton Street, Venice, Los Angeles County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the property except for those previously identified in the Findings section.

AEI recommends no further investigation for the subject property at this time.

However, in the event of redevelopment AEI recommends the following:

- Implement engineering controls at the time of redevelopment to prevent potential vapor intrusion of VOCs and methane
- A methane assessment be conducted and/or applicable regulatory actions/ requirements be conducted prior to any future redevelopment activities
- Implement Soil Management Plan (SMP) for proper management of soils during any future construction/excavation activities
- AEI recommends that LAFD UST records be reviewed prior to any future redevelopment activities

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 825 Hampton Street, Venice, Los Angeles County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 ADDITIONAL SERVICES

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 Limiting Conditions/Deviations

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- Due to the presence of stored products and miscellaneous features within the buildings, direct visual observation of some of the floor and wall areas of the buildings was not possible. Additionally, due to the presence of parked vehicles or other miscellaneous features, isolated portions of exterior ground areas were not available for direct visual observation. Features may be present that were not observed during AEI's site inspection.
- According to a review of the LAFD online database, 165 Brooks Avenue in Venice, was listed as an address present in the historical LAFD historical archives. AEI requested records, however, a response is pending.

1.6 Data Failure and Data Gaps

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 DATA FAILURE

The following data failure was identified during the course of this assessment:

Data Failure	Historical sources were not obtained at five-year intervals dating back to 1940 or first developed use. However based on consistent or presumed property uses, this data failure is not expected to significantly alter the Findings of this assessment.
Information/Sources Consulted	City directories, Sanborn fire insurance maps, aerial photographs, agency records, previous reports, interviews

1.6.2 SIGNIFICANT DATA GAPS

The following significant data gap was identified during the course of this assessment:

Significant Data Gap	According to historical sources, a gas station and auto repair shops that evidently operated on the subject property address 165 Brooks Avenue. At this time, no records from the Los Angeles Fire Department have been provided to AEI that would indicate the removal/abandonment of underground storage tanks related to the former gas station. Based on the lack of available information on the former gas station, this data gap is considered significant.
Information/Sources Consulted	City of Los Angeles Department of Building and Safety and the City of Los Angeles Fire Department

1.7 RELIANCE

All reports, both verbal and written, are for the benefit of 305 Ocean Front Walk LLC, a Delaware Limited Liability Company. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by 305 Ocean Front Walk LLC, a Delaware Limited Liability Company on February 24, 2021. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

2.0 SITE AND VICINITY DESCRIPTION

2.1 SITE LOCATION AND DESCRIPTION

PROPERTY INFORMATION	
Site Address(es)	825 Hampton Street, Venice, Los Angeles County, California 90291
Property ID (APN or Block/Lot)	4286-012-039
Location	Northwest side of Brooks Avenue and southwest side of Hampton Drive
Property Type	Office
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	0.42/Parcel Map
Number of Buildings	Four
Building Construction Date(s)/Source	1927/1937/Assessor
Building Square Footage (SF)/Source	3,867/Assessor
Number of Floors/Stories	One
Basement or Subgrade Area(s)	None identified
Number of Units	One
Additional Improvements	Small structures used as office and laundry, walk-in storage containers used as post production rooms, water fountain, fire pit, concrete-paved areas and associated landscaping
On-site Occupant(s)	Spot Welders Inc.
Current On-site Operations/Use	Editorial and post-production of music, film, tv, and documentary
Current Use of Hazardous Substances	None identified
REGULATORY INFORMATION	
Regulatory Database Listing(s)	CIWQS (825 Hampton Drive); UST, EDR Hist Auto (165 Brooks Ave)

2.2 ON-SITE UTILITIES

Utility	Source/System Information
Heating System	Natural gas
Cooling System	Electricity
Potable Water	Los Angeles Department of Water and Power
Sewage Disposal/Treatment	City of Los Angeles

Utility source/system information listed in the table above is provided by City of Los Angeles Website, unless otherwise noted above.

2.3 SITE AND VICINITY CHARACTERISTICS

The subject property is located in a mixed residential and commercial area of Venice, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
Northeast	Commercial Building (815 Hampton Drive) and Hampton Drive followed by Tacos Por Favor (826 Hampton Drive)	EDR Hist Cleaner (826 Electric Ave)
East	Hampton Drive, Electric Avenue and Brooks Avenue followed by City of Los Angeles Pump Plant (314 Brooks Ave)	RCRA NonGen, HAZMAT (314 Brooks Ave)
Southeast	Brooks Avenue followed by Road to Capri (905 Electric Ave), Eames Original Offices (901 Abbot Kinney Blvd), and Commercial Building (951 Abbot Kinney Blvd)	None identified
South	Abbot Kinney Boulevard followed by an industrial building (910 Abbot Kinney Blvd)	HAZNET, HWTS (916 Main Street); UST, EDR Hist Auto (900 Washington Blvd); EDR Hist Auto (901 Washington Blvd); EDR Hist Auto (914 Washington Blvd); EDR Hist Auto (915 Washington Blvd)
Southwest	Commercial Building (812 Main Street)	CERS, FINDS, ECHO, HAZNET, HWTS, NPDES, CIWQS (812 Main Street)

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

2.4 PHYSICAL SETTING

Geologic Unit: Description/Source	The subject property is located in the Los Angeles basin. The subject property appears to be underlain by alluvium, likely deposited by the Los Angeles River. Depth to bedrock is estimated at over 1,000 feet below grade. The Basin is an important reservoir with numerous aquifers supplying water to the area. The Basin is part of the Peninsular Ranges Geologic Province. The Peninsular range is traversed by several major active faults. The Whittier-Elsinore, San Jacinto, Newport-Inglewood, and San Andreas faults are major active fault systems located in the vicinity of the subject property. Major tectonic activity associated with these and other faults within this regional tectonic framework are typically right-lateral strike-slip movements.
Soil Series: Description/Source	According to the United States Department of Agriculture Soil Conservation Service, Report and General Soil Map, Los Angeles County, the near surface soil association underlying the subject property belongs to the Hanford association. The soils of this association occur on gently sloping alluvial fans between elevations from near sea level to 3,500 feet. Natural vegetation consists mainly of annual grasses and forbs and occasionally junipers. Hanford soils are over 60 inches deep, are well drained, and have moderately rapid subsoil permeability.

	They have pale-brown coarse sandy loam surface layers about 8 inches thick underlain by light yellowish-brown coarse sandy loam and gravelly loamy coarse sand substratum. Typically, these soils are slightly acid to mildly alkaline throughout but occasionally are calcareous in the lower part.
Groundwater Flow Direction/Source	Southwest/RWQCB GeoTracker website for a nearby site
Estimated Depth to Groundwater/ Source	24 to 27 feet bgs/ RWQCB Geotracker website for a nearby site
Surface waters on the subject property or adjoining sites	None
Additional notes	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
1896-1918	Undeveloped	Topographic Map and Sanborn map
1923-1986	Auto Repair Shops and Gas Station	Topographic Map, Aerial Photographs, Sanborn Maps, Building Permits, City Director
1991-Present	Buildings converted into office uses in the late 1980s/ 1990s (last identified gas station use was in 1980s and last documented auto repair use is in 1996)	Aerial Photographs, City Directory, Onsite Reconnaissance

Based on a review of historical sources, the subject property was undeveloped from as early as 1896 until as late as 1918, was developed with auto repair shops and a gas station between 1923 and 1996, and has been occupied by commercial offices since 1991. Tenants on the subject property have included Super Service Station (1928-1933); Holdren's Auto Service (1954-1970); Stewart Body & Paint (1970); Lee's Body & Paint Shop (1975-1985); Poor Man Body Shop (1980-1985); (Design Advantage (1991); Gwendolyn Cates Photography (1991); Johnson Todd Productions (1994); Rasbot Auto Service (1994-1996); and Spot Welders Inc. (1999-Present).

The subject property was formerly occupied by a gas station and auto repair shops from at least 1923 to 1996. No records had been provided by the Los Angeles City Fire Department regarding the removal/abandonment of any appurtenances belonging to the gasoline station, such as dispensers, product piping, or underground storage tanks (USTs). Based on these findings, AEI conducted a limited subsurface investigation at the subject property in June 2016. The purpose of this investigation was to determine if the subsurface media was impacted by former auto repair businesses (including a tire & battery shop), a gasoline station, and paint shop operations. Five (5) soil borings (B1 through B5) were advanced to depths between 10 and 15 feet bgs in the vicinity of the former auto repair shop, the gasoline station, and the parking area. Temporary soil gas probes were installed at 5 feet bgs in the five soil borings (B1 through B5). A total of five soil samples were collected and analyzed for total petroleum hydrocarbon as carbon chain (TPHcc), volatile organic compounds (VOCs), and CAM-17 Metals. Additionally, five (5) soil vapor samples were collected analyzed for VOCs. TPH-g was detected in the soil sample at a concentration below regulatory screening levels. Metals were detected in the soil samples; however; the detections were below established background concentrations. No TPHd, TPHo, or VOCs were detected in the soil samples. Additionally, TPH (low fraction) was detected in each of the five soil vapor samples at concentrations ranging from 2,300 to 485,000 micrograms per cubic meter (µg/m3). Four of these detected concentrations exceeded the future residential property VSL (in 2016) of 3,100 µg/m3 for TPH (low fraction). 1,3-butadiene was detected in soil vapor samples B-4 and B-5 at concentrations of 10.9 and 373 µg/m3, one of which exceeded the future residential property VSL (in 2016) of 94 µg/m3 for 1,3-butadiene. It

should be noted that the 2016 VSLs are no longer applicable. Based on the results of this investigation, AEI recommended a Soil Management Plan be developed to provide guidance and explanations of steps to take if certain environmental conditions are encountered during future soil movement. On March 6, 2019, AEI prepared a Soil Management Plan.

The California Environmental Screening Levels (ESLs) were updated in 2019 and some of the VOCs detected in soil gas samples are now above Subslab/Soil Gas Vapor Intrusion Human Health Risk Levels. In particular, the following VOCs were detected: benzene (maximum concentration of 41.1 ug/m3; the residential ESL is 3.2 ug/m3 and the commercial/industrial ESL is 14 ug/m3) and ethylbenzene (maximum concentration of 155 ug/m3; the residential ESL is 37 ug/m3 and the commercial/industrial ESL is 160 ug/m3). Benzene was detected above residential ESLs in four of the five samples and ethylbenzene was detected above residential ESLs in only one sample. It is unclear if the detected soil gas concentrations are from on-site or off-site sources. The elevated concentrations of VOCs in soil gas represent a REC.

According to a review of the LAFD online database, 165 Brooks Avenue in Venice, was listed as an address present in the historical LAFD historical archives. AEI requested records, however, a response is pending. According to the UST listing in the regulatory database, the subject property was equipped with an underground storage tank(s). No additional information was provided in the database report. It is unclear if the UST(s) were removed or remain at the subject property. It should be noted that on June 4, 2016, a geophysical survey was conducted at the subject property. The purpose of the survey was to evaluate the proposed boring locations for subsurface obstructions, not to identify USTs. Based on potential UST records, AEI recommends that LAFD records be reviewed prior to property redevelopment. The potential presence of USTs at the subject property represents a REC.

The adjacent properties were historically developed with gas stations. Although no documented releases were reported, based on the timeframe of operations, and the lack of any additional information (sampling reports or regulatory oversight records), AEI is unable to rule out the potential that the subject property could have been impacted by these adjacent sites. Due to the historical presence of a gas station at the subject property, the potential exists that the release at an adjoining site and a release at the subject property could be commingled, or that additional costs may be incurred in determining the responsible party. In addition, investigation of the subject property could reveal a release that actually originated at an off-site location.

Based on the former subject property uses, there is a potential that subsurface features of concern remain present in the subsurface of the subject property that were not identified via former investigations. The subject property is slated for redevelopment. As such, if any features of concern are encountered during the redevelopment of the subject property, they should be addressed in accordance with regulatory oversight guidelines and industry standards.

The following historical addresses were associated with the subject property: 165 Brooks Avenue and 833 & 833 1/2 Washington Boulevard. These addresses were also researched as part of this assessment.

If available, copies of historical sources are provided in Appendix D.

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the ERIS collection of aerial photographs. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjoining Site Descriptions
1938	Three commercial structures and a gas station	NORTHEAST: Railroad tracks and a roadway followed by a commercial structure EAST: Roadways followed by a vacant land SOUTHEAST: Roadway followed by an industrial structure SOUTH: Roadway followed by an industrial structure and a gas station SOUTHWEST: Residential and commercial structures and gas station
1952	No significant changes noted	NORTHEAST: No significant changes noted EAST: Roadways followed by a commercial structure SOUTHEAST: No significant changes noted SOUTH: No significant changes noted SOUTHWEST: No significant changes noted
1963	No significant changes noted	NORTHEAST: No significant changes noted EAST: No significant changes noted SOUTHEAST: No significant changes noted SOUTH: No significant changes noted SOUTHWEST: Residential and commercial structures and vacant land
1972	No significant changes noted	NORTHEAST: No significant changes noted EAST: No significant changes noted SOUTHEAST: Roadway followed by commercial structures SOUTH: No significant changes noted SOUTHWEST: No significant changes noted
1980	No significant changes noted	NORTHEAST: Vacant land and a roadway followed by a commercial structure EAST: No significant changes noted SOUTHEAST: No significant changes noted SOUTH: Roadway followed by an industrial structure SOUTHWEST: No significant changes noted
1994	Several commercial structures	NORTHEAST: No significant changes noted EAST: No significant changes noted SOUTHEAST: Roadway followed by new commercial structures SOUTH: No significant changes noted SOUTHWEST: Residential and a new commercial structure

Year(s)	Subject Property Description	Adjoining Site Descriptions
2005	Buildings on the subject property appear to be in their current configuration and use	NORTHEAST: No significant changes noted EAST: No significant changes noted SOUTHEAST: No significant changes noted SOUTH: No significant changes noted SOUTHWEST: No significant changes noted
2014	Additional small structures/storage containers	NORTHEAST: Commercial structure and a roadway followed by a commercial structure EAST: No significant changes noted SOUTHEAST: No significant changes noted SOUTH: No significant changes noted SOUTHWEST: Commercial structure

Based on a review of aerial photographs, the subject property appears to have been developed with a gas station from at least 1938 to the 1980s; refer to Section 3.0 for additional information.

Adjoining sites and features of potential concern are discussed in Sections 3.0 and 5.1. Sites not discussed in 3.0 and 5.1 are not expected to represent a REC based on the time elapsed, redevelopment, gradient, groundwater depth, and/or lack of a documented release.

3.2 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

The following maps were reviewed:

Year(s)	Subject Property Description (Listed Address)	Adjoining Site Descriptions
1909	Not depicted on this map	NORTHEAST: Not depicted on this map EAST: Not depicted on this map SOUTHEAST: Not depicted on this map SOUTH: Not depicted on this map SOUTHWEST: Not depicted on this map
1918	Undeveloped	NORTHEAST: Pacific Electric Railway Company's Right of Way and Washington Boulevard followed by vacant land EAST: Washington Boulevard, Brooks Avenue and Electric Avenue followed by two junk sheds SOUTHEAST: Washington Boulevard followed by Brooks Avenue Garage SOUTH: Brooks Avenue followed by dwellings SOUTHWEST: Dwellings
1950	Commercial structures occupied by auto repair, auto washing and a gas station (165 Brooks Ave and 833 & 833 1/2 Washington Blvd)	NORTHEAST: Pacific Electric Railway Company's Right of Way and Washington Boulevard followed by a store EAST: Washington Boulevard, Brooks Avenue and Electric Avenue followed by a store SOUTHEAST: Washington Boulevard followed

Year(s)	Subject Property Description (Listed Address)	Adjoining Site Descriptions
		by commercial structures occupied by metal & wood chair assembling, plumbing and tire retreading SOUTH: Brooks Avenue followed by a structure occupied by beverage warehouse, woodworking and auto polishing and a gas station SOUTHWEST: Dwelling, store and a gas station
1970	No significant changes depicted	NORTHEAST: Pacific Electric Railway Company's Right of Way and Washington Boulevard followed by cabinet shop EAST: Washington Boulevard, Brooks Avenue and Electric Avenue followed by a sewage pump house SOUTHEAST: Washington Boulevard followed by commercial structures occupied by photo designs and tire service SOUTH: Brooks Avenue followed by general supplies warehouse and a gas station SOUTHWEST: Dwelling, store and parking

Based on a review of Sanborn maps, the subject property appears to have been developed with auto repair and gas station from at least 1950 to 1970; refer to Section 3.0 for additional information

Adjoining sites and features of potential concern are discussed in Sections 3.0 and 5.1. Sites not discussed in 3.0 and 5.1 are not expected to represent a REC based on the time elapsed, redevelopment, gradient, groundwater depth, and/or lack of a documented release.

3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. The following table summarizes the results of the city directory search.

Year(s)	Address - Occupant Listed
1928	165 Brooks Avenue - Super Service Station
1933	165 Brooks Avenue - Super Service Station
1954	165 Brooks Avenue - Holdren's Serv Auto Service
1958	165 Brooks Avenue - Holdren's Serv Auto Service
1962	165 Brooks Avenue - Holdren's Serv Auto Service
1965	165 Brooks Avenue - Holdren's Serv Auto Service
1970	165 Brooks Avenue - Holdren's Serv Auto Service , Stewart Body & Paint
1975	165 Brooks Avenue - Lee's Body & Paint, Holdren's Serv Auto Service
1980	165 Brooks Avenue - Lee's Body & Paint Shop, Poor Man Body Shop
1985	165 Brooks Avenue - Lee's Body & Paint Shop, Poor Man Body Shop
1991	165 Brooks Avenue - Design Advantage, Chevaller MG
1994	825 Hampton Drive - Gwendolyn Cates Photography

Year(s)	Address - Occupant Listed
	165 Brooks Avenue - Johnson Todd Productions, Chevalier M G, Rasbot Auto Service
1999	825 Hampton Drive - Spot Welders Inc.
2000	165 Brooks Avenue - Chevalier M G
2004	825 Hampton Drive - Spot Welders Inc., Whole Soul Inc. 165 Brooks Avenue - Chevalier M G
2006	825 Hampton Drive - Spot Welders Inc. 165 Brooks Avenue - Not current listings
2009	825 Hampton Drive - Spot Welders Inc.
2015	825 Hampton Drive - Spot Welders Inc.

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

Based on a review of city directories, the subject property appears to have been occupied by a gas station and an auto repair shop from at least 1928 to 1994; refer to Section 3.0 for additional information.

3.4 HISTORICAL TOPOGRAPHIC MAPS

A search of historical topographic maps was conducted for the subject property utilizing NETR Online (www.historicaerials.com). Topographic maps were reviewed for the following years:

Year(s)	Subject Property Description	Adjoining Site Descriptions
1896	No structures or features depicted on topographic map	NORTHEAST: Railroad tracks followed by vacant land EAST: Railroad tracks followed by vacant land SOUTHEAST: Undeveloped SOUTH: Undeveloped SOUTHWEST: Undeveloped
1923, 1924	Small structure	NORTHEAST: Railroad tracks and a roadway followed by vacant land EAST: Railroad tracks and roadways followed by a small structure SOUTHEAST: Roadway followed by large structures SOUTH: Roadway followed by small structures SOUTHWEST: Small structures
1934	One large and two small structures	NORTHEAST: Railroad tracks and a roadway followed by a large structure EAST: Railroad tracks and roadways followed by small structures SOUTHEAST: No significant changes depicted SOUTH: Roadway followed by large and small structures SOUTHWEST: No significant changes depicted

Year(s)	Subject Property Description	Adjoining Site Descriptions
1950	Urban development	NORTHEAST: Railroad tracks and a roadway followed by urban development EAST: Railroad tracks and roadways followed by urban development SOUTHEAST: Roadway followed by urban development SOUTH: Roadway followed by urban development SOUTHWEST: Urban development
1964, 1972, 1981	No significant changes depicted	NORTHEAST: No significant changes depicted EAST: No significant changes depicted SOUTHEAST: No significant changes depicted SOUTH: Roadway followed by a large structure SOUTHWEST: No significant changes depicted

Prior uses are discussed in Section 3.0.

3.5 CHAIN OF TITLE

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Angeles County Public Health Investigation	March 3, 2021	Website	N/A	No records on file

According to Los Angeles County Public Health Investigation, all records pertaining to the current and/or historical hazardous materials usage, storage or releases, as well as the presence of USTs, is maintained by Los Angeles County Fire Department.

Please refer to Section 4.2 below, for discussion of the Los Angeles County Fire Department records.

4.2 FIRE DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Angeles County Fire Department	March 3, 2021	Website	N/A	No records on file
Los Angeles Fire Department	March 3, 2021	Website	N/A	Response pending, refer to Section 1.5

According to a review of the LAFD online database, 165 Brooks Avenue in Venice, was listed as an address present in the historical LAFD historical archives. AEI requested records, however, a response is pending.

4.3 BUILDING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Angeles Department of Building and Safety	March 3, 2021	Website	N/A	Records discussed below

Records Summary

Year(s)	Owner/Applicant	Description of Permit and Building Use
1927	R B Van Blaricom	Public garage (165 Brooks Ave)
1927	R B Van Blaricom	Wash rack (165 Brooks Ave)
1927	R B Van Blaricom	Restroom (165 Brooks Ave)
1927	R B Van Blaricom	Tire & battery shop (165 Brooks Ave)

Year(s)	Owner/Applicant	Description of Permit and Building Use
1931	Standard Oil Co.	Relocated a restroom from 165 Brooks Ave to Cor Washington
1967	Paul Holden	Comply with Venice Rehabilitation (gas station) (165 Brooks Ave)
1967	Paul Holden	Comply with Venice Rehabilitation (battery shop) (165 Brooks Ave)
1967	Paul Holden	Comply with Venice Rehabilitation (garage) (165 Brooks Ave)
1968	Paul Holden	Comply with Venice Rehabilitation (battery & tire shop) (165 Brooks Ave)
1982	Ace Gallery	Add spray booth canopy (165 Brooks Ave)
1983	Ace Gallery	Certificate of occupancy for a one-story 16' x 16' spray booth canopy addition to existing one-story 21' x 15' office (165 Brooks Ave)

Based on a review of building permits, the subject property appears to have been occupied by a gas station and an auto repair shop from at least 1927 to 1983; refer to Section 3.0 for additional information.

4.4 PLANNING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Angeles Planning Department	March 3, 2021	Website	N/A	AULs on file for the subject property, discussed below

According to the City of Los Angeles Department of Building & Safety and Department of Planning, the subject property is located near significant oil production areas known as "Methane (Buffer) Zones." Methane (Buffer) Zone sites include properties immediately surrounding gas sources and where testing and mitigation are required by the City of Los Angeles Department of Building and Safety. Due to the potential environmental risk associated with construction in Methane (Buffer) Zones, the property owner is required to conduct a methane assessment prior to the redevelopment of the subject property (Division 71 of the Los Angeles Building Code).

4.5 ASSESSOR'S OFFICE

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Los Angeles County Assessor's Office	March 3, 2021	Website	N/A	Information obtained is discussed below

Records Summary

APN	4286-012-039
Acreage	0.42 acres
Construction Date	1927/1937
Building Square Footage	3,867 square feet

Current Owner	Not provided

4.6 Other Agencies Searched

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA State Water Resources Control Board (SWRCB) GeoTracker	March 3, 2021	Website	N/A	No records on file
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	March 3, 2021	Website	N/A	No records on file
CA DTSC EnviroStor	March 3, 2021	Website	N/A	No records on file
South Coast Air Quality Management District (AQMD)	March 3, 2021	Website	N/A	Records discussed below

SCAQMD

According to the records, the subject property identified as Lee's Paint & Body Shop at 165 Brooks Avenue, is listed under Facility ID No. 18699 with an "Out of Business" status. This facility was issued a permit to operate (PTO) Spray Booth Paint and Solvent in 1981. No Notices of Violation (NOV) or Notices to Comply (NTC) were on file with the SCAQMD.

4.7 Oil and Gas Wells

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
CalGEM	March 3, 2021	Website	No

4.8 Oil and Gas Pipelines

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	March 3, 2021	NPMS Public Map Viewer	No

4.9 State Environmental Superliens

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

4.10 State Property Transfer Laws

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Listings Within Search Distance	Subject Property	Adjoining Site(s)	Other Nearby Sites of Concern

ADDITIONAL ENVIRONMENTAL RECORD SOURCES	SP/ADJ	See below	✔	✔	

Facility Name	Rad Art Lofts
Address	825 Hampton Drive
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	CIWQS
Comments	According to the database report, Rad Art Lofts obtained a CIWQS Permit on July 14, 2004, for stormwater runoff prevention associated with construction activities. The Permit was terminated on September 2, 2010. No enforcement actions or violations are reported in connection with the CIWQS Permit. Based on the nature of this listing and lack of violations, it is not expected to represent a significant environmental concern.

Facility Name	Venice Super Service
Address	165 Brooks Avenue
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	UST, EDR Hist Auto
Comments	According to EDR Hist Auto listing, the subject property was formerly occupied by a gasoline station from 1928 to 1985 and an auto repair shop from 1928 to 1996. According to the UST listing in the regulatory database, the subject property was formerly equipped with an underground storage tank(s). No additional information was provided in the database report. It is unclear if the UST was removed or remains at the subject property. Refer to Section 3.0 for further discussion.

Facility Name	De Nunzio Sami
Address	826 Electric Avenue
Distance & Direction	Adjoining to the northeast
Hydrologic Position	Up-gradient

Databases Listed	EDR Hist Cleaner
Comments	According to the database report, this site was formerly occupied by clothes pressers and cleaners in 1936. No additional information was provided in the database report. In addition, this site is not listed on any regulatory release database that would detail potential impacts the subject property. Based on the lack of a documented release, short duration of use, and time elapsed, this site is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Facility Name	LA County Department of Public Works
Address	314 Brooks Avenue
Distance & Direction	Adjoining to the east
Hydrologic Position	Cross-gradient
Databases Listed	RCRA NonGen, HAZMAT
Comments	According to RCRA NonGen listing, LACDPW generated regulated hazardous wastes in 1989. No violations of hazardous waste regulations are identified in the RCRA record. According to HAZMAT listing, LACDPW was issued a permit to store hazardous materials and generate hazardous wastes. No violations were reported. In addition, this site is not listed on any regulatory release database that would detail potential impacts the subject property. Based on the lack of a documented release, this site is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment

Facility Name	Joseph Pytka Production Inc.
Address	916 Main Street
Distance & Direction	Adjoining to the south
Hydrologic Position	Cross-gradient
Databases Listed	HAZNET, HWTS
Comments	According to the database report, Joseph Pytka Production generated regulated hazardous wastes in 2001. No violations of hazardous waste regulations are identified in the record. In addition, this site is not listed on any regulatory release database that would detail potential impacts the subject property. Based on the lack of a documented release, this site is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Facility Name	Dickins M H
Address	914 Washington Blvd
Distance & Direction	Adjoining to the south
Hydrologic Position	Cross-gradient
Databases Listed	EDR Hist Auto

Comments	According to the database report, this site was formerly occupied by an auto repair shop from 1933 to 1936. No additional information was provided in the database report. In addition, this site is not listed on any regulatory release database that would detail potential impacts the subject property. Based on the lack of a documented release, short duration of use, and time elapsed, this site is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Facility Name	Lerner Oil Co.
Address	900 Washington Blvd
Distance & Direction	Adjoining to the south
Hydrologic Position	Cross-gradient
Databases Listed	EDR Hist Auto, UST
Comments	According to the database report, this site was formerly occupied by a gasoline station from 1928 to 1977. No additional information was provided in the database report. In addition, this site is not listed on any regulatory release database that would detail potential impacts the subject property. Refer to Section 3.0 for additional discussion of historically adjoining/nearby gas stations. Based on the lack of a documented release and/or other factors discussed in 3.0, the review of regulatory agency files for this site was not deemed necessary.

Facility Name	Keens Frank
Address	901 Washington Blvd
Distance & Direction	Adjoining to the south
Hydrologic Position	Cross-gradient
Databases Listed	EDR Hist Auto
Comments	According to the database report, this site was formerly occupied by an automobile garage from 1933 to 1936. No additional information was provided in the database report. In addition, this site is not listed on any regulatory release database that would detail potential impacts the subject property. Based on the lack of a documented release, short duration of use, and time elapsed, this site is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Facility Name	Dickins M H
Address	915 Washington Blvd
Distance & Direction	Adjoining to the south
Hydrologic Position	Cross-gradient
Databases Listed	EDR Hist Auto

Comments	According to the database report, this site was formerly occupied by an automobile garage in 1928. No additional information was provided in the database report. In addition, this site is not listed on any regulatory release database that would detail potential impacts the subject property. Based on the lack of a documented release, short duration of use, and time elapsed, this site is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Facility Name	812 Main LLC/World Gym
Address	812 Main Street
Distance & Direction	Adjoining to the southwest
Hydrologic Position	Down-gradient
Databases Listed	CERS, FINDS, ECHO, HAZNET, HWTS, NPDES, CIWQS
Comments	According to HAZNET and HWTS listings, World Gym generated unspecified oil-containing wastes in 2000. No violations of hazardous waste regulations are identified in the record. In addition, this site is not listed on any regulatory release database that would detail potential impacts the subject property. Based on the lack of a documented release, this site is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

Potential vapor migration concerns for the subject property are discussed in Section 3.0.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	Robert Thibodeau	February 26, 2021	Email		Interviewed; see Interview Summary table below
Key Site Manager	Sandra Bine	March 3, 2021	In Person		Interviewed; see Interview Summary table below

Interview Summary

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/ Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	No	No
Do you have any knowledge of previous environmental investigations conducted on site?	No	No
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	No	No
Are you aware of any known plans for site redevelopment or change in site use?	No	No
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?	No	No
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?	No	No
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	No	No
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	No	No

6.1.2 PAST OWNERS, OPERATORS, AND OCCUPANTS

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

6.1.3 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	Information not provided
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	Information not provided
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Information not provided
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Information not provided
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).	Information not provided

Question	Response/ Comment
Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	Information not provided

6.3 PREVIOUS REPORTS AND OTHER PROVIDED DOCUMENTATION

Documentation was provided to AEI by Mr. Robert Thibodeau, Property Owner during this assessment. A summary of this information follows:

Limited Phase II Subsurface Investigation (825 Hampton Drive, Venice, California 90291), prepared by AEI Consultants (July 5, 2016)

The addresses a limited subsurface investigation at the subject property. The purpose of this investigation was to determine if the subsurface media was impacted by former auto repair businesses (including a tire & battery shop), a gasoline station, and a paint shop operation.

Five (5) soil borings (B1 through B5) were advanced to depths between 10 and 15 feet bgs in the vicinity of the former auto repair shop, the gasoline station and the parking area. Temporary soil gas probes were installed at 5 feet bgs in the five soil borings (B1 through B5). A total of five soil samples were collected and analyzed for total petroleum hydrocarbon as carbon chain (TPHcc), volatile organic compounds (VOCs) and CAM-17 Metals. Additionally, five (5) soil vapor samples were collected analyzed for VOCs.

TPH-g was detected in the soil sample at a concentration below regulatory screening levels. No TPHd, TPHo or VOCs were detected in the soil samples. Metals were detected in the soil samples; however; the detections were below established background concentrations.

TPH (low fraction) was detected in each of the five soil vapor samples at concentrations ranging from 2,300 to 485,000 micrograms per cubic meter (µg/m3). Four of these detected concentrations exceed the future residential property VSL of 3,100 µg/m3 for TPH (low fraction). 1,3-butadiene was detected in soil vapor samples B-4 and B-5 at concentrations of 10.9 and 373 µg/m3, one of which exceeds the future residential property VSL of 94 µg/m3 for 1,3-butadiene. Other VOCs were detected in the soil gas samples; however, the detected concentrations are below their respective VSLs.

Based on the results of this investigation, AEI recommended a Soil Management Plan be developed to provide guidance and explanations of steps to take if certain environmental conditions are encountered during future soil movement.

Soil Management Plan (825 Hampton Drive, Venice, California 90291), prepared by AEI Consultants (April 10, 2019)

The report addresses a Soil Management Plan (SMP) for the subject property. The purpose of this SMP was to manage potential impacts to worker health and safety encountered during planned redevelopment activities at the property in accordance with standard practices, to provide a framework for site management procedures, and to indicate those tasks to be overseen or undertaken by an Environmental Consultant.

AEI understands the Site is located within a designated methane zone. In accordance with California Building Code Volume 1 Title 26 of the Los Angeles County Code as amended by Ordinance No. 2002-0076, which addresses development in methane zones, the Los Angeles Department of Building and Safety will require the installation of a vapor barrier to prevent the migration of naturally occurring methane gas into the structure. This vapor barrier would be designed to also aid in the protection of human heath from other potential constituents which may be encountered at the Site during redevelopment including, but not limited to, total petroleum hydrocarbons (TPH). While effects on the local environment during redevelopment activities may be temporary, AEI is not in the position to determine or to judge the long-term effects of the completed redevelopment project on the local environment.

Copies of the reports are included in the appendices.

Additionally, on June 9, 2016 AEI conducted a Pre-Demolition Asbestos Survey and Lead-Based Paint Screen. Refer to Sections 8.1 and 8.2.

6.4 ENVIRONMENTAL LIEN SEARCH

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	March 3, 2021
AEI Site Assessor(s)	Nasim Ahmed
Property Escort(s)/ Relationship(s) to Property	Ms. Sandra Bine/Property Manager
Units/Areas Observed	Full Access
Area(s) not accessed and reason(s)	Refer to Section 1.5 for discussion of limiting condition(s).
Other Physical Constraints	None

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI did not observe any of the items listed in the above Reconnaissance Findings Summary table.

7.2 ADJOINING PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR, Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Pole-mounted transformers were observed on the adjoining sites during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970s. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property buildings, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

Material Type	Location
Plaster (acoustical and smooth)	Walls and ceilings
Ceiling tile	Ceiling systems
Thermal systems insulations, packings, and gaskets	Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment
Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)	Floors
Vinyl sheet flooring and adhesives	Floors
Cove base and associated mastics	Walls
Ceramic tile adhesives and grouts	Walls, floors, and ceilings
All adhesives	Mirrors, wall coverings, construction, etc.
Grout and caulking	Windows and doors
Gypsum board, tape, and joint compound	Wall and ceiling systems
Insulation materials	Walls, ceilings, and attic spaces
Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations)	Roof and parapet wall systems
Brick and block, mortars	Walls

The observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance. AEI understands that the subject property is to be redeveloped, and the existing structure removed. Regardless of building construction date, the EPA's NESHAP requires that an asbestos survey adhering to AHERA sampling protocol be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by the local agency enforcing the federal EPA regulations. The NESHAP regulation specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants. Similarly, OSHA regulations require that specific work practices be implemented when handling construction materials and debris that contain lead-containing materials. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs. On June 9, 2016, AEI conducted a Pre-Demolition Asbestos Survey and Lead-Based Paint Screen; ACMs were detected at the property. Based upon the findings for Asbestos Containing Building Materials, AEI recommends that all identified ACMs be removed by a California licensed asbestos abatement contractor prior to demolition activities. Asbestos abatement should be monitored and inspected by a California Asbestos Consultant to confirm the appropriate removal activities and to clear containment areas in accordance with applicable regulations. AEI recommends that if during demolition activities, additional materials are identified or uncovered that are not identified in this report, that they be properly sampled and analyzed by a licensed asbestos inspector to confirm or deny the presence of asbestos in the building materials prior to further disturbance by demolition activities.

8.2 LEAD-BASED PAINT

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP

hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property buildings, there is a potential that LBP is present. All observed painted surfaces were in good condition. AEI understands that the subject property is to be redeveloped, and the existing structure removed. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62. On June 9, 2016 AEI conducted a Pre-Demolition Asbestos Survey and Lead-Based Paint Screen. LBP was detected onsite, and observed in good condition. AEI recommends the stabilization of any loose or peeling paint prior to demolition activities commence. Contractors performing work should be notified that all painted surfaces are to be considered LCP under the Cal-OSHA regulations and should be handled in accordance with Cal-OSHA regulations.

8.3 RADON

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The United States EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three radon zones, with Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this assessment. According to the US EPA, the radon zone level for the area is Zone 2, which has a predicted average indoor screening level between 2 pCi/L and 4 pCi/L, equal to or below the action level of 4 pCi/L set forth by the US EPA.

8.4 MOLD

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

AEI observed interior areas of the subject property buildings to identify the potential presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. As such, no bulk sampling of suspect surfaces was conducted as part of this assessment and no additional action with respect to suspect mold appears to be warranted at this time.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

RE: 825 Hampton Drive Project – Noise Technical Memorandum

Noah Tanski Environmental Consulting ("NTEC") has prepared this technical memorandum to assess the potential noise impacts that would be associated with construction and operations of the 825 Hampton Drive Project ("Project") located in the City of Los Angeles, especially as they relate to noise impacts that have been previously examined in the City's Citywide Housing Element 2021-2029 and Safety Element Updates Program Environmental Impact Report, hereafter referred to as the "Program EIR." Based on NTEC's analysis, the Project's noise impacts would be considered less than significant.

Project Description

The Project proposes to construct a new four-story mixed-use building containing 30 dwelling units and 3,416 square feet of retail space. Parking would be provided by a three-level subterranean parking garage with 58 parking spaces. The approximately 0.42-acre Project site is currently developed with five one-story buildings and several shipping containers utilized as commercial offices. These existing uses would be demolished prior to construction of the Project.

Regulatory Compliance Measures

Before discussing the Project's noise impacts and consistency with the Program EIR, it is important to note that there are many regulations in place that would limit the Project's noise from construction and operational sources. Housing development accommodated under the Program EIR is required to comply with the following Regulatory Compliance Measures ("RCMs"):

- **RCM-NOI-1 (LAMC Noise Ordinances):** The project shall comply with the City of Los Angeles Noise Ordinance No. 144,331 and 161,574 (see LAMC Section 112.05), and any subsequent ordinances, which prohibit the emission or creation of noise beyond certain levels.

- **RCM-NOI-2 (Construction Hours):** Construction shall be restricted to the hours of 7:00 A.M. to 9:00 P.M. Monday through Friday, and 8:00 A.M. to 6:00 P.M. on Saturday per LAMC Section 41.40.

- **RCM-NOI-3 (Construction Site Notice):** The project shall comply with the City of Los Angeles Building Regulations Ordinance No. 178,048 (see LAMC Section 91.106.4.8), which requires a construction site notice to be provided that includes the following information: job site address, permit number, name and phone number of the contractor and the owner or owner's agent, hours of construction allowed by code or any discretionary approval for the site, and City telephone numbers where violations can be reported. The notice shall be posted and maintained at the construction site prior to the start of construction and displayed in a location that is readily visible to the public.

- **RCM-NOI-4 (HVAC Noise):** The project shall comply with the LAMC Section 112.02, which requires that any heating, ventilation, and air conditioning (HVAC) system within any zone of the City not cause an increase in ambient noise levels on any other occupied property or if a condominium, apartment house, duplex, or attached business, within any adjoining unit to exceed the ambient noise level by more than 5 dBA.

Noise Impact Analysis

On November 24, 2021, the Los Angeles City Council certified the Citywide Housing Element 2021-2029 and Safety Element Updates Final Environmental Impact Report ("Program EIR"), SCH No. 2021010130, EIR No. ENV-2020-672-EIR, to adopt the 2021-2029 Citywide Housing Element and the Updates to the Safety Element and the Plan for a Healthy LA ("Health Element"). Pursuant to CEQA Guidelines Section 15168(d), the Project has been found to be within the scope of the program analyzed in the Program EIR. In addition, the Proposed Project is subject to applicable mitigation implemented by the Program EIR.

Construction Noise

Note on construction noise thresholds**:** Before addressing the Project's consistency with Threshold 4.10-1, it is important to note that in September 2024 the City adopted updated thresholds of significance for noise and vibration (and accompanying methodologies to analyze impacts pursuant to those thresholds). Under the Program EIR, Threshold 4.10-1 essentially assesses whether a project's construction hours and noise levels would be consistent with the standards established by LAMC Section 112.05 and Section 41.40. The relevant determinations under Threshold 4.10-1 are therefore:

- Would the project result in noise-generating construction activities outside the hours of 7:00 A.M. to 9:00 P.M. Monday through Friday, or 8:00 A.M. to 6:00 P.M. on Saturday, per LAMC Section 41.40?

- Would the project result in construction noise levels exceeding 75 dBA at 50 feet when in or within 500 feet of residential zones or any other noise-sensitive uses, per LAMC Section 112.05?

However, the City's updated thresholds of significance are whether on- and off-site construction noise during daytime hours Monday through Saturday (the same as above) would exceed 80 dBA $L_{eq(8\text{-hour})}$ at noise-sensitive uses. The City's updated thresholds of significance also include standards for nighttime construction noise occurring outside these hours, but the Project would not involve nighttime

construction, so the new nighttime standards are not relevant to this analysis and the Project's consistency with the Program EIR. To be conservative, and to ensure that this analysis is consistent with both the Program EIR and the City's latest noise thresholds and guidance, the following analysis assesses both thresholds by evaluating whether the Project would result in construction noise levels exceeding 75 dBA at 50 feet (Section 112.05-based threshold under Program EIR) or 80 dBA $L_{eq(8\text{-}hour)}$ at individual noise-sensitive receptor locations (updated September 2024 City threshold).

Pursuant to Program EIR Mitigation Measure 4.10-1(f) (Project-Specific Construction Noise Study), discretionary projects within 500 feet of noise-sensitive uses and requiring greater than any of the following are required to prepare and submit a Construction Noise Study demonstrating that project construction-related noise levels are less than applicable thresholds of significance:

- Two or more subterranean levels of 20,000 cubic yards or more of excavated material;
- Construction duration (excluding architectural coatings) of 18 months or more;
- Use of large, heavy-duty equipment rated 300 horsepower or greater; or
- The potential for impact pile driving.

The Project is located within 500 feet of noise-sensitive uses and would require excavation of two subterranean parking levels. Construction of the Project would last approximately 24 months and may involve construction equipment rated 300 horsepower or greater. Therefore, construction of the Project would trigger the requirement of a Construction Noise Study pursuant to Program EIR Mitigation Measure 4.10-1(f).

The Program EIR identifies residences, transient lodgings, schools, libraries, churches (or other places of assembly), hospitals, nursing homes, auditoriums, concert halls, amphitheaters, playgrounds, and parks as noise-sensitive uses. The Project is located along a multi-use corridor and is surrounded by residential neighborhoods and many other noise-sensitive uses. The closest noise-sensitive receptors are the following:

- 811 Hampton Drive Residence: This residential land use is located approximately 50 feet north of the Project site.

- 800 Main Street Residence: This residential land use is located approximately 60 feet west of the Project site.

Other residential receptors are located farther from the Project and would experience reduced impacts. Therefore, this analysis focuses on 811 Hampton Drive Residence and 800 Main Street Residence to assess the Project's construction noise impacts on residential noise-sensitive receptors.

The analysis also addresses the following receptors, which are the closest non-residential noise-sensitive receptors to the Project site:

- Twentieth Church of Christ Scientist: This religious land use is located at 132 Brooks Avenue, approximately 230 feet southwest of the Project site.

- Westminster Avenue Early Education Center: This school is located at 1010 Main Street, approximately 215 feet south of the Project site.

Construction of the Project would generate noise during the estimated 24 months of demolition, grading, building construction, and other construction phases. During all construction phases, noise-generating activities would be restricted to the hours of 7:00 A.M. to 9:00 P.M. Monday through Friday, and 8:00 A.M. to 6:00 P.M. on Saturday, consistent with the Program EIR's RCM-NOI-2 and LAMC Section 41.40.

Demolition and grading activities are typically the foremost concern when evaluating a project's construction noise impact, as demolition and grading activities often require extensive daily use of heavy-duty, diesel-powered earthmoving equipment. Other construction activities, such as vertical construction and interior finishing, do not extensively use similar types of loud earthmoving equipment to the same extent as demolition and grading. Equipment for these phases would largely consist of handheld tools and other portable equipment that do not generate loud, continuous noise levels like diesel-powered off-road construction vehicles. Given these considerations, this analysis focuses on the Project's worst-case noise impacts that would result from demolition and grading. Other construction phases would result in reduced noise impacts for the reasons explained above.

Demolition for the Project is estimated to last approximately one week, and grading would last approximately two months. The majority of the Project's demolition would be characterized by an excavator and a loader demolishing the Project's existing structures and transferring debris to dumpsters for removal. For grading, these vehicles would work extensively to excavate the Project's subterranean level and any utility trenches or footings. As these vehicles work across the 0.42-acre site, their construction noise levels at nearby noise-sensitive uses would fluctuate. Noise levels would be greater when they work in proximity of sensitive receptors and lower when working farther away. However, to be conservative, the following analysis evaluates the impact of the Project's demolition and grading activities by modeling noise levels that would be associated with an excavator and a loader working all day at minimum Project-to-receptor distances. Also to be conservative, the modeling does not account for the Program EIR's Mitigation Measures 4.10-1(a) through 4.10-1(e), or any other mitigation measures.

Table 1 shows the Project's estimated demolition and grading noise levels at 811 Hampton Drive Residence, 800 Main Street Residence, Twentieth Church of Christ Scientist, and Westminster Avenue Early Education Center. Table 1 also shows estimated construction noise levels at a distance of 50 feet because LAMC Section 112.05, the Program EIR's threshold of significance under Threshold 4.10-1, evaluates noise levels at this regulatory distance. Conservatively, the estimated construction noise levels do not account for the Program EIR's mitigation measures 4.10-1(a) through 4.10-1(e). As shown, demolition and grading noise levels at 811 Hampton Drive Residence, 800 Main Street Residence, Twentieth Church of Christ Scientist, and Westminster Avenue Early Education Center would not exceed the 80 dBA $L_{eq(8\text{-}hour)}$ threshold of significance that is applicable to these receptors. Demolition and grading noise levels also would not exceed 75 dBA L_{eq} at the regulatory distance of 50 feet, which is the Program EIR's LAMC Section 112.05-based threshold of significance under Threshold 4.10-1.

Table 1
Construction Noise Levels – Demolition and Grading

Receptor	Construction Noise Level (dBA $L_{eq(8\text{-}hour)}$)	Threshold of Significance (dBA $L_{eq(8\text{-}hour)}$)	Impact?
811 Hampton Drive Residence	73.5	80	No
800 Main Street Residence	71.9	80	No
Twentieth Church of Christ Scientist	60.2	80	No
Westminster Avenue Early Education Center	60.8	80	No
50 feet (LAMC Section 112.05)	73.5	75	No

Other construction activities would not be as loud as the Project's demolition and grading activities, and impacts at more distant receptors would be reduced. Therefore, this analysis demonstrates that noise impacts from the Project's construction activities would not exceed the 75 dBA at 50 feet standard adopted under Threshold 4.10-1 as part of the Program EIR or the City's recently adopted 80 dBA $L_{eq(8\text{-}hour)}$ daytime construction noise threshold of significance. Therefore, the Project's construction would result in less than significant impacts and would not require additional mitigation measures.

Operations Noise

The Program EIR determines that projects accommodated by the Housing Element Update would not generate sources of noise that are new or that would substantially alter the City's ambient noise environment. It finds that increases in traffic associated with the Housing Element Update would not result in perceptible 3 dBA increases, and it finds that compliance with applicable RCMs and LAMC standards would prevent substantial noise increases from on-site operational noise sources such as HVAC. The one exception the Program EIR identifies is large mixed-use projects with sizable outdoor spaces such as pool and roof decks. Pursuant to Program EIR Mitigation Measure 4.10-2 (Project-Specific Operational Noise Study), discretionary projects with roof decks and/or pool decks are required to prepare a Noise Study addressing noise that would be generated by these features.

The Project would include a modest roof deck with seating areas for residents and a maximum 250 square-foot spa, but this would not be comparable in scale or usage to the types of pool and roof decks that the Program EIR deems capable of resulting in substantial noise increases. The example included in the Program EIR involves a large project containing 950 residential units, 308 hotel rooms, 95,000 square feet of office uses, and 185,000 square feet of commercial retail uses. That project includes several large outdoor spaces and pool decks that would be operated until 2:00 A.M., and analysis for that project assumed that these areas could be populated by over 2,500 users at once.[1] The Project's rooftop

[1] City of Los Angeles. Crossroads Hollywood Project Draft Environmental Impact Report (ENV-2015-2026-EIR). Table IV.1-17, "Outdoor Uses Assumptions."

features are not comparable in scale or usage and would not result in similar noise impacts. The Project's rooftop terrace would be approximately 3,500 square feet and would accommodate no more than a small fraction of the 2,500 or more users that are accommodated by the example in the Program EIR. The Project would also include just 30 new dwelling units, far fewer than the 950 dwelling units contained in the Program EIR's example. Given these considerations, the Project's pool and rooftop deck would not result in significant noise impacts.

One additional consideration relates to AB 1307, which recently went into effect in January 2024. This bill clarifies that "for residential projects, the effects of noise generated by project occupants and their guests on human beings is not a significant effect on the environment." The primary noise source associated with the Project's pool and roof deck would be noise generated by project occupants and their guests (e.g., talking, dining, etc.), precisely the types of noise that are addressed by AB 1307. Thus, the Project's roof deck would not contain any substantial (or qualified) noise sources capable of exceeding the relevant thresholds.

Conclusion

As demonstrated above, the Project would not result in significant construction noise impacts, or any other significant noise impacts.

A checklist of the Program EIR's noise mitigation measures that are triggered by the Project is included below. All of the Program EIR's noise mitigation measures apply except Mitigation Measure 4.10-2 (Project Specific Operational Noise Study). As explained earlier, the Project would not contain an equivalent level of rooftop features to result in a significant impact, as compared to the example contained in the Program EIR. Moreover, AB 1307 precludes analysis of noise generated by project occupants and guests in residential projects. Therefore, the Noise Study described by Mitigation Measure 4.10-2 is not triggered by the measure and is no longer required by CEQA for this type of residential project. No additional project-level mitigation measures are required.

Executive Summary

South Environmental was retained by Westwood Financial to complete a Tribal Cultural Resources (TCRs) report for the Hampton Court Mixed Use Development project located at 825 Hampton Drive in the neighborhood of Venice in the City of Los Angeles, California. The purpose of the study is to identify archaeological resources and TCRs that may be impacted by the proposed project, as well as the sensitivity for identifying such resources during project related ground disturbance. This study includes the results of a California Historical Resources Information Center (CHRIS) records search of the project site and a 0.5-mile radius; a search of the Native American Heritage Commission's (NAHC's) Sacred Lands File (SLF); archival and ethnographic research; and development of a cultural context used to evaluate the presence or likelihood of TCRs within the proposed project site. This report was prepared in conformance with the California Environmental Quality Act (CEQA), including Assembly Bill 52 of 2014 (AB 52) and relevant portions of Public Resources Code (PRC) Section 5024.1, Title 14 California Code of Regulations (CCR) Section 15064.5 of the CEQA Guidelines, and PRC Sections 21083.2 and 21084.1.

No archaeological resources or TCRs were identified within the project site or the surrounding search radius through the SCCIC records search; however, the NAHC SLF reported positive results, indicating that resources important to Native Americans are present in the project vicinity. The Los Angeles Department of City Planning conducted tribal outreach in accordance with Assembly Bill 52 of 2014 and received one response. The Fernandeño Tataviam Band of Mission Indians stated they would not seek consultation on this project. There is no other evidence available to suggest the project site provided any consistent or seasonal sources of water or other natural resources that would increase the likelihood of the presence of archaeological resources or TCRs. Further, the surrounding residential and industrial area has been extensively developed over the past century.

Although no archaeological resources or TCRs were identified as a result of this study and none are anticipated to be impacted by the proposed project, the City has established a standard condition of approval to address inadvertent discovery of TCRs that includes halting construction and ensuring that the discovery is properly assessed and addressed pursuant to the established process. Should TCRs be inadvertently encountered, this condition of approval will ensure that any TCRs identified during construction of the proposed project will be handled in compliance with state law such that any potential impacts would be reduced to a less than significant level.

1 Introduction

South Environmental was retained by Westwood Financial to complete a Tribal Cultural Resources (TCRs) report for the Hampton Court Mixed Use Development project located at 825 Hampton Drive in the neighborhood of Venice in the City of Los Angeles, California (project). The purpose of the study is to identify archaeological resources and TCRs that may be impacted by the proposed project, as well as the sensitivity for identifying such resources during project related ground disturbance. This study includes the results of a California Historical Resources Information Center (CHRIS) records search of the project site and a one-half-mile radius; a search of the Native American Heritage Commission's (NAHC's) Sacred Lands File (SLF); archival and ethnographic research; and development of a cultural context used to evaluate the presence or likelihood of TCRs within the proposed project site. This report was prepared in conformance with the California Environmental Quality Act (CEQA), including Assembly Bill 52 (AB 52) and relevant portions of Public Resources Code (PRC) Section 5024.1, Title 14 California Code of Regulations (CCR) Section 15064.5 of the CEQA Guidelines, and PRC Sections 21083.2 and 21084.1.

This report was prepared by South Environmental Archaeologist Samantha Jovanovic, MA, MS; Principal Archaeologist Kevin Hunt, BA; and Archaeological Principal Investigator Samantha Murray, MA, Registered Professional Archaeologist (RPA), who meets the Secretary of the Interior's Professional Qualification Standards for Archaeology.

1.1 Project Location Description

1.1.1 Project Location

The project site is located at 825 Hampton Drive in the community of Venice in the City of Los Angeles, California on Assessor's Parcel Number (APN) 4286-012-039, and falls within the U.S. Geological Survey (USGS) *Venice, California* 7.5 Minute topographical quadrangle, San Bernardino Base Meridian, in Section 17, Township 02 South, Range 15 West in Los Angeles County, California (Figure 1). The project site is approximately 0.5-mile inland from the Pacific Ocean and 3.5 miles north of Los Angeles International Airport.

1.1.2 Project Description

The project proposes to construct a mixed-use building that includes 30 multi-family residential units and approximately 3,416 square feet of commercial space and up to three subterranean levels of parking. The total floor area of the project would be approximately 36,716 square feet, resulting in a Floor Area Ratio (FAR) of 1.986:1.

1.2 Regulatory Setting

1.2.1 State

California Register of Historical Resources

In California, the term "historical resource" includes but is not limited to "any object, building, structure, site, area, place, record, or manuscript which is historically or archaeologically significant, or is significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California" (California Public Resources Code Section 5020.1(j)). In 1992, the California legislature established the CRHR "to be used by state and local agencies, private groups, and citizens to identify the state's historical resources and to indicate what properties are to be protected, to the extent prudent and feasible, from substantial adverse change" (California Public Resources Code Section 5024.1(a)). The criteria for listing resources on the CRHR were expressly developed to be in accordance with previously established criteria developed for listing in the National Register of Historic Places (NRHP), enumerated below. According to California Public Resources Code Section 5024.1(c)(1–4), a resource is considered historically significant if it (i) retains "substantial integrity," and (ii) meets at least one of the following criteria:

(1) Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage.

(2) Is associated with the lives of persons important in our past.

(3) Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values.

(4) Has yielded, or may be likely to yield, information important in prehistory or history.

In order to understand the historic importance of a resource, sufficient time must have passed to obtain a scholarly perspective on the events or individuals associated with the resource. A resource less than 50 years old may be considered for listing in the CRHR if it can be demonstrated that sufficient time has passed to understand its historical importance (see 14 CCR 4852(d)(2)).

The CRHR protects cultural resources by requiring evaluations of the significance of prehistoric and historic resources. The criteria for the CRHR are nearly identical to those for the NRHP, and properties listed or formally designated as eligible for listing in the NRHP are automatically listed in the CRHR, as are the state landmarks and points of interest. The CRHR also includes properties designated under local ordinances or identified through local historical resource surveys.

California Environmental Quality Act

As described further below, the following CEQA statutes and CEQA Guidelines are of relevance to the analysis of archaeological, historic, and tribal cultural resources:

- California Public Resources Code Section 21083.2(g) defines "unique archaeological resource."
- California Public Resources Code Section 21084.1 and CEQA Guidelines Section 15064.5(a) define "historical resources." In addition, CEQA Guidelines Section 15064.5(b) defines the phrase "substantial adverse change in the significance of an historical resource." It also defines the circumstances when a project would materially impair the significance of an historical resource.
- California Public Resources Code Section 21074(a) defines "tribal cultural resources."
- California Public Resources Code Section 5097.98 and CEQA Guidelines Section 15064.5(e) set forth standards and steps to be employed following the accidental discovery of human remains in any location other than a dedicated ceremony.
- California Public Resources Code Sections 21083.2(b)-(c) and CEQA Guidelines Section 15126.4 provide information regarding the mitigation framework for archaeological and historic resources, including examples of preservation-in-place mitigation measures; preservation-in-place is the preferred manner of mitigating impacts to significant archaeological sites because it maintains the relationship between artifacts and the archaeological context and may also help avoid conflict with religious or cultural values of groups associated with the archaeological site(s).

More specifically, under CEQA, a project may have a significant effect on the environment if it may cause "a substantial adverse change in the significance of an historical resource" (California Public Resources Code Section 21084.1; CEQA Guidelines Section 15064.5(b).) If a site is either listed or eligible for listing in the CRHR, or if it is included in a local register of historic resources or identified as significant in a historical resources survey (meeting the requirements of California Public Resources Code Section 5024.1(q)), it is a "historical resource" and is presumed to be historically or culturally significant for purposes of CEQA (California Public Resources Code Section 21084.1; CEQA Guidelines Section 15064.5(a)). The lead agency is not precluded from determining that a resource is a historical resource even if it does not fall within this presumption (California Public Resources Code Section 21084.1; CEQA Guidelines Section 15064.5(a)).

A "substantial adverse change in the significance of an historical resource" reflecting a significant effect under CEQA means "physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the significance of an historical resource would be materially impaired" (CEQA Guidelines Section 15064.5(b)(1); California Public Resources Code Section 5020.1(q)). In turn, CEQA Guidelines section 15064.5(b)(2) states the significance of an historical resource is materially impaired when a project:

1. Demolishes or materially alters in an adverse manner those physical characteristics of an historical resource that convey its historical significance and that justify its inclusion in, or eligibility for, inclusion in the California Register of Historical Resources; or
2. Demolishes or materially alters in an adverse manner those physical characteristics that account for its inclusion in a local register of historical resources pursuant to section 5020.1(k) of the Public Resources Code or its identification in an historical resources survey meeting the requirements of section 5024.1(g) of the Public Resources Code, unless the public agency reviewing the effects of the project establishes by a preponderance of evidence that the resource is not historically or culturally significant; or
3. Demolishes or materially alters in an adverse manner those physical characteristics of a historical resource that convey its historical significance and that justify its eligibility for inclusion in the California Register of Historical Resources as determined by a lead agency for purposes of CEQA.

Pursuant to these sections, the CEQA inquiry begins with evaluating whether a project site contains any "historical resources," then evaluates whether that project will cause a substantial adverse change in the significance of a historical resource such that the resource's historical significance is materially impaired.

If it can be demonstrated that a project will cause damage to a unique archaeological resource, the lead agency may require reasonable efforts be made to permit any or all of these resources to be preserved in place or left in an undisturbed state. To the extent that they cannot be left undisturbed, mitigation measures are required (California Public Resources Code Section 21083.2[a], [b], and [c]).

California Public Resources Code Section 21083.2(g) defines a unique archaeological resource as an archaeological artifact, object, or site about which it can be clearly demonstrated that without merely adding to the current body of knowledge, there is a high probability that it meets any of the following criteria:

1. Contains information needed to answer important scientific research questions and that there is a demonstrable public interest in that information.
2. Has a special and particular quality such as being the oldest of its type or the best available example of its type.
3. Is directly associated with a scientifically recognized important prehistoric or historic event or person.

Impacts to non-unique archaeological resources are generally not considered a significant environmental impact (California Public Resources Code section 21083.2(a); CEQA Guidelines Section 15064.5(c)(4)). However, if a non-unique archaeological resource qualifies as tribal cultural resource (California Public Resources Code Section 21074(c), 21083.2(h)), further consideration of significant

impacts is required. CEQA Guidelines Section 15064.5 assigns special importance to human remains and specifies procedures to be used when Native American remains are discovered. As described below, these procedures are detailed in California Public Resources Code Section 5097.98.

Assembly Bill 52 of 2014

AB 52 amended PRC Section 5097.94 and added PRC Sections 21073, 21074, 21080.3.1, 21080.3.2, 21082.3, 21083.09, 21084.2, and 21084.3. Section 4 of AB 52 adds Sections 21074(a) and (b) to the PRC, which address tribal cultural resources and cultural landscapes. Section 21074(a) defines tribal cultural resources as one of the following:

(1) Sites, features, places, cultural landscapes, sacred places, and objects with cultural value to a California Native American tribe that are either of the following:

(A) Included or determined to be eligible for inclusion in the California Register of Historical Resources.

(B) Included in a local register of historical resources as defined in subdivision (k) of Section 5020.1.

(2) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Section 5024.1. In applying the criteria set forth in subdivision (c) of Section 5024.1 for the purposes of this paragraph, the lead agency shall consider the significance of the resource to a California Native American tribe.

Section 1(a)(9) of AB 52 establishes that "a substantial adverse change to a tribal cultural resource has a significant effect on the environment." Effects on tribal cultural resources should be considered under CEQA. Section 6 of AB 52 adds Section 21080.3.2 to the PRC, which states that parties may propose mitigation measures "capable of avoiding or substantially lessening potential significant impacts to a tribal cultural resource or alternatives that would avoid significant impacts to a tribal cultural resource."

California Health and Safety Code Section 7050.5

CEQA Guidelines section 15064.5 assigns special importance to human remains and specifies procedures to be used when Native American remains are discovered. As described below, these procedures are detailed in PRC section 5097.98. California law protects Native American burials, skeletal remains, and associated grave goods, regardless of their antiquity, and provides for the sensitive treatment and disposition of those remains. California Health and Safety Code Section 7050.5 requires that if human remains are discovered in any place other than a dedicated cemetery, the following procedures shall be followed:

- Stop immediately and contact the County Coroner:

1104 N. Mission Road
Los Angeles, CA 90033
323-343-0512 (8 am to 5 pm Monday through Friday) or
323-343-0714 (After hours, Saturday, Sunday, and Holidays)

- If the remains are determined to be of Native American descent, the Coroner has 24 hours to notify the Native American Heritage Commission (NAHC).
- The NAHC will immediately notify the person it believes to be the most likely descendant (MLD) of the deceased Native American.
- The MLD has 48 hours to make recommendations to the owner, or representative, for the treatment or disposition, with proper dignity, of the human remains and grave goods.
- If the owner does not accept the MLD's recommendations, the owner or the MLD may request mediation by the NAHC.

No further disturbance or excavation of the site or nearby area reasonably suspected to contain human remains shall occur until the County Coroner has examined the remains (Section 7050.5(b)). PRC Section 5097.98 also outlines the process to be followed in the event that remains are discovered.

1.2.2 Local

City of Los Angeles Municipal Code

Los Angeles Historic-Cultural Monuments (Section 22.171.7 of Cultural Heritage Ordinance)

Local landmarks in the City of Los Angeles are known as Historic-Cultural Monuments (HCMs) and are under the aegis of the Planning Department, Office of Historic Resources. They are defined in the Cultural Heritage Ordinance as follows (Los Angeles Municipal Code Section 22.171.7, added by Ordinance No. 178,402, effective April 2, 2007):

HCMs include any site (including significant trees or other plant life located on the site), building or structure of particular historic or cultural significance to the City of Los Angeles, including historic structures or sites in which the broad cultural, economic or social history of the nation, State or community is reflected or exemplified; or which is identified with historic personages or with important events in the main currents of national, State or local history; or which embodies the distinguishing characteristics of an architectural type specimen, inherently valuable for a study of a period, style or method of construction; or a notable work of a master builder, designer, or architect whose individual genius influenced his or her age.

For the purposes of SurveyLA, this definition has been broken down into the following four HCM designation criteria that closely parallel the existing NRHP and CRHR criteria:

1. Is identified with important events in the main currents of national, State or local history, or exemplifies significant contributions to the broad cultural, political, economic or social history of the nation, state, city, or community; or
2. Is associated with the lives of Historic Personages important to national, state, city, or local history; or
3. Embodies the distinctive characteristics of a style, type, period, or method of construction; or represents a notable work of a master designer, builder or architect whose genius influenced his or her age; or possesses high artistic values; or
4. Has yielded, or has the potential to yield, information important to the pre-history or history of the nation, state, city or community.

Historic Preservation Overlay Zones (Section 12.20.3)

As described by the City of Los Angeles Office of Historic Resources, the Historic Preservation Overlay Zone (HPOZ) Ordinance was adopted in 1979 and amended in 2004 to identify and protect neighborhoods with distinct architectural and cultural resources. HPOZs, commonly known as historic districts, provide for review of proposed exterior alterations and additions to historic properties within designated districts.

Regarding HPOZ eligibility, City of Los Angeles Ordinance Number 175891 states (Los Angeles Municipal Code Section 12.20.3):

Features designated as contributing shall meet one or more of the following criteria:

1. adds to the Historic architectural qualities or Historic associations for which a property is significant because it was present during the period of significance, and possesses Historic integrity reflecting its character at that time; or
2. owing to its unique location or singular physical characteristics, represents an established feature of the neighborhood, community or city; or
3. retaining the building, structure, Landscaping, or Natural Feature, would contribute to the preservation and protection of a Historic place or area of Historic interest in the City.

Permits for Historical and Cultural Buildings (Section 91.106.4.5)

Regarding effects on federal and locally significant properties, Los Angeles Municipal Code states the following:

The department shall not issue a permit to demolish, alter or remove a building or structure of historical, archaeological or architectural consequence if such building or structure has been officially designated, or has been determined by state or federal action to be eligible for designation, on the

National Register of Historic Places, or has been included on the City of Los Angeles list of historic cultural monuments, without the department having first determined whether the demolition, alteration or removal may result in the loss of or serious damage to a significant historical or cultural asset. If the department determines that such loss or damage may occur, the applicant shall file an application and pay all fees for the California Environmental Quality Act Initial Study and Check List, as specified in Section 19.05 of the Los Angeles Municipal Code. If the Initial Study and Check List identifies the historical or cultural asset as significant, the permit shall not be issued without the department first finding that specific economic, social or other considerations make infeasible the preservation of the building or structure.

City of Los Angeles Housing Element EIR MMP

The City's Housing Element Environmental Impact Report (EIR) Mitigation Monitoring Program (MMP, City of Los Angeles 2021) contains distinct mitigation measures (MM) for cultural (archaeological) resources (MM 4.4-2) and TCRs (MM 4.15-1(a) and 1(b)). These MMs are presented below.

4.4-2 Archaeological Resources

Discretionary projects that involve ground disturbance in native soils or soils of unknown origin, shall implement the following procedures to identify archaeological resources located in a development site and implement applicable impact reduction techniques to reduce substantial adverse effects associated with the inadvertent discovery of archaeological resources.

A. The project applicant shall retain a qualified archaeologist meeting the Secretary of the Interior's Professional Qualifications Standards (PQS) in archaeology to complete a cultural resources assessment of the development site. A cultural resources assessment may include an archaeological pedestrian survey of the development site, if possible, and sufficient background archival research and field sampling to determine whether subsurface prehistoric or historic remains may be present. Archival research should include a records search conducted at the South Central Coastal Information Center (SCCIC) and a Sacred Lands File (SLF) search conducted with the Native American Heritage Commission (NAHC).

B. If prehistoric or historic archaeological remains are identified as a result of the SCCIC or SLF searches, the remains shall be avoided and preserved in place where feasible.

C. Where preservation is not feasible, each resource shall be evaluated for significance and eligibility to the California Register. Phase 2 evaluation shall include any necessary archival research to identify significant historical associations as well as mapping of surface artifacts, collection of functionally or temporally diagnostic tools and debris, and excavation of a sample of the cultural deposit to characterize the nature of the sites, define the artifact and feature contents, determine horizontal boundaries and depth below surface, and retrieve representative samples of artifacts and other remains.

D. Excavation at Native American sites shall be monitored by a geographically affiliated tribal representative, as agreed upon in any formal consultation proceedings with the geographically affiliated tribe or as indicated by the NAHC. If no tribal monitor is available, the monitoring shall be done by a qualified archaeologist.

E. Cultural materials collected from the sites shall be processed and analyzed in the laboratory according to standard archaeological procedures. The age of the remains shall be determined using radiocarbon dating and other appropriate procedures; lithic artifacts, faunal remains, and other cultural materials shall be identified and analyzed according to current professional standards.

F. Following laboratory analysis, the significance of the sites shall be evaluated according to the criteria of the California Register. The results of the investigations shall be presented in a technical report following the standards of the California Office of Historic Preservation (OHP) publication "Archaeological Resource Management Reports: Recommended Content and Format (1990 or latest edition)" (http://ohp.parks.ca.gov/pages/1054/files/armr.pdf).

G. Upon completion of the work, all artifacts, other cultural remains, records, photographs, and other documentation shall be curated by an appropriate curation facility. All fieldwork, analysis, report production, and curation shall be fully funded by the applicant.

H. If the resources meet California Register significance standards, the City shall ensure that all feasible recommendations for impact reduction of archaeological impacts are incorporated into the final design and permits issued for development. Necessary Phase 3 data recovery excavation, conducted to exhaust the data potential of significant archaeological sites, shall be carried out by a qualified archaeologist meeting the Secretary of the Interior's PQS for archaeology according to a research design reviewed and approved by the City prepared in advance of fieldwork and using appropriate archaeological field and laboratory methods consistent with the OHP Planning Bulletin 5 (1991), Guidelines for Archaeological Research Design, or the latest edition thereof.

I. If recommended by a cultural resources assessment, prior to issuance of a grading permit and prior to the start of any ground-disturbing activity, the applicant shall retain a qualified archaeologist who meets the Secretary of the Interior's PQS to oversee an archaeological monitor who shall be present during construction excavations, such as demolition, clearing/grubbing, grading, trenching, or any other construction excavation activity associated with the project, including peripheral activities, such as sidewalk replacement, utilities work, and landscaping, which may occur adjacent to the project site. The frequency of monitoring shall be based on the rate of excavation and grading activities, the materials being excavated (younger sediments vs. older sediments), the depth of excavation, and, if found, the abundance and type of archaeological resources encountered. Full-time monitoring may be reduced to part-time inspections, or ceased entirely, if determined adequate by the qualified

archaeologist. Prior to commencement of excavation activities, Archaeological Sensitivity Training shall be given for construction personnel. The training session shall be carried out by the qualified archaeologist and shall focus on how to identify archaeological resources that may be encountered during earthmoving activities and the procedures to be followed in such an event.

J. In the event that historic (e.g., bottles, foundations, refuse dumps/privies, railroads, etc.) or prehistoric (e.g., hearths, burials, stone tools, shell and faunal bone remains, etc.) archaeological resources are unearthed, ground-disturbing activities shall be halted or diverted away from the vicinity of the find so that the find can be evaluated. A 50-foot buffer within which construction activities shall not be allowed to continue shall be established by the qualified archaeologist around the find. Work shall be allowed to continue outside of the buffer area. All archaeological resources unearthed by project development activities shall be evaluated by the qualified archaeologist. If a resource is determined by the qualified archaeologist to constitute a "historical resource" pursuant to CEQA Guidelines Section 15064.5(a) or a "unique archaeological resource" pursuant to Public Resources Code Section 21083.2(g), the qualified archaeologist shall coordinate with the applicant and the City to develop a formal treatment plan that would serve to reduce impacts to the resources. The treatment plan established for the resources shall be in accordance with CEQA Guidelines Section 15064.5(f) for historical resources and Public Resources Code Sections 21083.2(b) for unique archaeological resources. Preservation in place (i.e., avoidance) is the preferred manner of treatment. If, in coordination with the City, it is determined that preservation in place is not feasible, appropriate treatment of the resource shall be developed by the qualified archaeologist in coordination with the City and may include implementation of archaeological data recovery excavations to remove the resource along with subsequent laboratory processing and analysis. Any archaeological material collected shall be curated at a public, non-profit institution with a research interest in the materials, if such an institution agrees to accept the material. If no institution accepts the archaeological material, they shall be donated to a local school, Tribe, or historical society in the area for educational purposes.

K. As applicable, the final Phase 1 Inventory, Phase 2 Testing and Evaluation, or Phase 3 Data Recovery reports shall be submitted to the City prior to issuance of construction permit. Recommendations contained therein shall be implemented throughout all ground disturbance activities.

4.15-1(a) Native American Consultation and Monitoring for Discretionary Projects

All discretionary projects that involve ground disturbing activities in previously undisturbed soils, shall prepare a cultural resources assessment and do a record search with a study area of no less than 0.5 mile around the project area. Projects conducted in culturally and historically sensitive areas, as determined by a Qualified Archaeologist meeting the Secretary of the Interior's Professional

Qualification Standards for Archaeologist, should include a record search with a study area of no less than 1 mile around the project area.

Notification shall be provided to California Native American tribes that are traditionally and culturally affiliated with the geographic area of the project site and have submitted a written request to the Department of City Planning to be notified of proposed projects in that area. Should projects have potential to impact cultural resources, as determined during the environmental assessment or Tribal consultation, a Cultural Resources Monitoring Program (CRMP) shall be prepared by Qualified Archaeologist, in consultation with all interested Tribes, prior to the commencement of any and all ground-disturbing activities for the Project, including any archaeological testing. The CRMP shall include compliance with 4.15-1(b) and will provide details regarding the process for in-field treatment of inadvertent discoveries and the disposition of inadvertently discovered non-funerary resources and shall be consistent with the treatment of unique archaeological resources in PRC 21083.2.

4.15-1(b) Discovery of Potential Tribal Cultural Resources

In the event that Tribal Cultural Resources are discovered during Project activities, whether or not a tribal monitor is present, and there is no CRMP or the CRMP does not cover treatment of inadvertent discovery, all work within a 50-foot buffer of the find shall cease and a Qualified Archaeologist meeting the Secretary of the Interior's Professional Qualification Standards for Archaeology shall assess the find. Tribes that are culturally and historically affiliated with the Project area and have requested consultation shall be notified, should any potential tribal cultural resource be discovered during project implementation. Construction personnel shall not collect or move any tribal resources.

Construction activity may continue unimpeded on other portions of the project site. Unless agreed otherwise during the tribal consultation process or in a CRMP, if tribal cultural resources are discovered during construction, the applicant and/or owner shall retain a Qualified Tribal Monitor (as approved by the Tribe) if requested by the Tribe.

Any and all archaeological/cultural documents created as a part of the Project (isolate records, site records, survey reports, testing reports, and monitoring reports) should be provided to consulting Tribes. Any tribal cultural resources discovered shall be treated with appropriate dignity and protected and preserved as appropriate with the agreement of the Tribal Representative and in accordance with federal, state, and local guidelines. If not otherwise provided in the CRMP, the Lead Agency and/or applicant shall, in good faith, provide all consulting Tribes the opportunity to consult on the disposition and treatment of resources. The location of the find of tribal cultural resources and the type and nature of the find will not be published, except to provide information to the Qualified Archaeologist, tribal representatives, and public agencies with jurisdiction or responsibilities related to the resources. An agreement will be reached with the Tribal Representative to mitigate or avoid any significant impacts to identified tribal cultural resources. Absent an agreement with the Tribal Representative, as provided in Public Resources Code Section 21083.2, the find should be preserved in place or left in an undisturbed state unless the Project would damage the resource. When preserving in place or leaving

in an undisturbed state is not possible, excavation should not occur until testing or studies prepared by a Qualified Archaeologist have adequately documented the recovery of scientifically consequential information from and about the resource.

Construction activity may continue unimpeded on other portions of the project site if cleared by the Qualified Tribal Monitor or Qualified Archaeologist. Ground Disturbance Activities in the area where resources were found may commence once the identified resources are properly assessed and processed by a Tribal Representative or, if no TribalRepresentative is identified, a Qualified Archaeologist.

The measure shall be shown on plans.

2 Background Research

2.1 CHRIS Records Search

On December 5, 2024, South Environmental archaeologist Samantha Jovanovic, MS, completed a CHRIS records search of the project site and a 0.5-mile radius at the South Central Coastal Information Center (SCCIC). This search included their collections of mapped prehistoric and historic archaeological resources and historic built-environment resources, State of California Department of Parks and Recreation Site Records (DPR forms), technical reports, archival resources, and ethnographic references. Additional consulted sources include historical maps of the study area, the NRHP, the CRHR, the lists of California State Historical Landmarks, California Points of Historical Interest, the Archaeological Determinations of Eligibility, and the Built Environment Resources Directory (BERD). A summary of the results of the records search are presented in Confidential Appendix A.

2.1.1 Previously Conducted Cultural Resource Studies

One previously completed cultural resources studies overlap the proposed project site. An additional thirteen (13) previous studies were conducted within 0.5-mile of the project site between 1987 and 2015. The studies are a mix of archaeological field studies, architectural and historical evaluations, and survey reports. The largest report is the *Historic Resources Survey Report: Venice Community Plan Area* (LA-12989) conducted in 2015. Six separate cultural resources records search, site visits, and literature search reports from 2000 through 2014 are associated with telecommunications companies including T-Mobile (LA-13133), AT&T (LA-07714, LA-11706, LA-12438), Pacific Bell Mobile (LA-4772), and Cingular Wireless (LA-05555). A summary of all previously conducted studies identified as a result of the records search is provided in Table 1.

Table 1. Previous Cultural Resources Investigations Within 0.5-Mile of the Project Site

LA-12989

Survey LA, Los Angeles Historic Resources Survey: Historic Resources Survey Report Venice Community Plan Area is a historic properties survey conducted by Historic Resources Group (HRG) for the City of Los Angeles Department of City Planning's Office of Historic Resources (OHR). The survey area included the entirety of the community of Venice and included 11,756 parcels. Excluding buildings constructed after 1980, 9,976 parcels were surveyed from the public right of way and assessed for eligibility for "the National Register of Historic Places (NRHP), California Register of Historical Resources (CRHR), and for local designation as City Historic-Cultural Monuments (HCM) or Historic Preservation Overlay Zones (HPOZ), commonly known as historic districts." A color-coded map was generated from the survey that distinguishes the parcel construction by decade.

2.1.2 Previously Recorded Cultural Resources

The SCCIC records search results indicate that no previously recorded cultural resources occur within or adjacent to the project site. Fourteen (14) resources were identified outside of the project site within a half-mile radius and do not have the potential to be impacted by the proposed project. A summary of all previously recorded cultural resources identified as a result of the records search is provided in Table 2.

Table 2. Previously Recorded Cultural Resources Within 0.5-Mile of the Project Site

Primary Number	Trinomial	Resource Description	Resource Eligibility	Recorded by and Year	Proximity to Project Site
P-19-001061	CA-LAN-001061/H	Prehistoric lithic and shell scatter with modern trash	Insufficient information	Whitley (1980)	Outside (Approx. 0.40 mi NW)
P-19-101358	N/A	Prehistoric lithic isolate	Presumed not eligible	Hill, Allison (AECOM 2016)	Outside (Approx. 0.15 mi west)
P-19-167301	N/A	Venice Branch Library	1S: Listed on NRHP	Mouck, Richard, John Miller, Robert Chattel, Ruthann Lehrer, Denver Miller (Los Angeles Conservancy 1985)	Outside (Approx. 0.45 mi SE)
P-19-169581	N/A	402 Brooks Ave; 902 4th Ave	5S2: Eligible for local listing	City of Los Angeles Bureau of Engineering (1981)	Outside (Approx. 0.10 mi east)

P-19-192320	N/A	Pacific Electric Railway Ocean Park Garage	6Z: Ineligible for NRHP, CRHR, or local lists	Hill, Allison and Kirsten Johnson (AECOM 2016)	Outside (Approx. 0.15 mi NW)

2.2 Native American Coordination

As part of the process of identifying cultural resources within or near the project site, South Environmental contacted the NAHC to request a review of the Sacred Lands File (SLF) on November 22, 2024. The NAHC emailed a response on December 12, 2024, which indicated that the SLF search was completed with positive results. Because the SLF search does not include an exhaustive list of Native American cultural resources, the NAHC suggested contacting Native American individuals and/or tribal organizations who may have direct knowledge of cultural resources in or near the Project. The NAHC provided the contact information of nine individuals and/or tribal organizations with whom to contact along with the SLF search results. No additional tribal outreach was conducted by South Environmental. The Los Angeles Department of City Planning conducted tribal outreach in accordance with Assembly Bill 52 of 2014 (AB 52) on January 29, 2025, and received one response. The Fernandeño Tataviam Band of Mission Indians responded via email on March 3, 2025, and stated they would not seek consultation on this project. Documents related to the NAHC SLF search are included in Appendix B.

2.3 Archival Research

Background research was conducted in an effort to establish a thorough and accurate cultural context, and to confirm the development history of the project site and surrounding area.

2.3.1 Ethnographic Map Review

South Environmental reviewed ethnographic maps covering the project site (Exhibits 1-6). It should be noted that these maps represent generalized/approximate locations of Native American villages, placenames, ethnographic boundaries, and other markers, and should not be considered exact.

The project site falls within the boundaries of the Gabrieleño/Tongva traditional territory (Exhibits 1-3). The Kirkman-Harriman pictorial and historical map of Los Angeles County: 1860 A.D. 1937 A.D. (Exhibit 4) provides a more detailed look at historic features in Los Angeles after secularization of the missions and indicates that the nearest Native American settlements to the project site were located to the east near Ballona Creek. These same settlements are marked on a map from the Southwest Museum from 1962 (Exhibit 5) and a map developed by the LA Times in 2019 (Exhibit 6). These locations were likely well outside the range of the CHRIS records search completed for the proposed project, and no archaeological evidence of the locations depicted on the Kirkman-Harriman or Southwest Museum map was provided by the SCCIC.

Exhibits 3, 4, 5, and 6 indicate that there is at least one large Native American village near the project site. Exhibit 4 does not name the village, Exhibit 3 gives the name *Saan*, Exhibit 5 and 6 give the name *Sa'anga* (or *Saanga*), and Exhibit 6 provides along with an additional village of *Waachnga* slightly southeast.

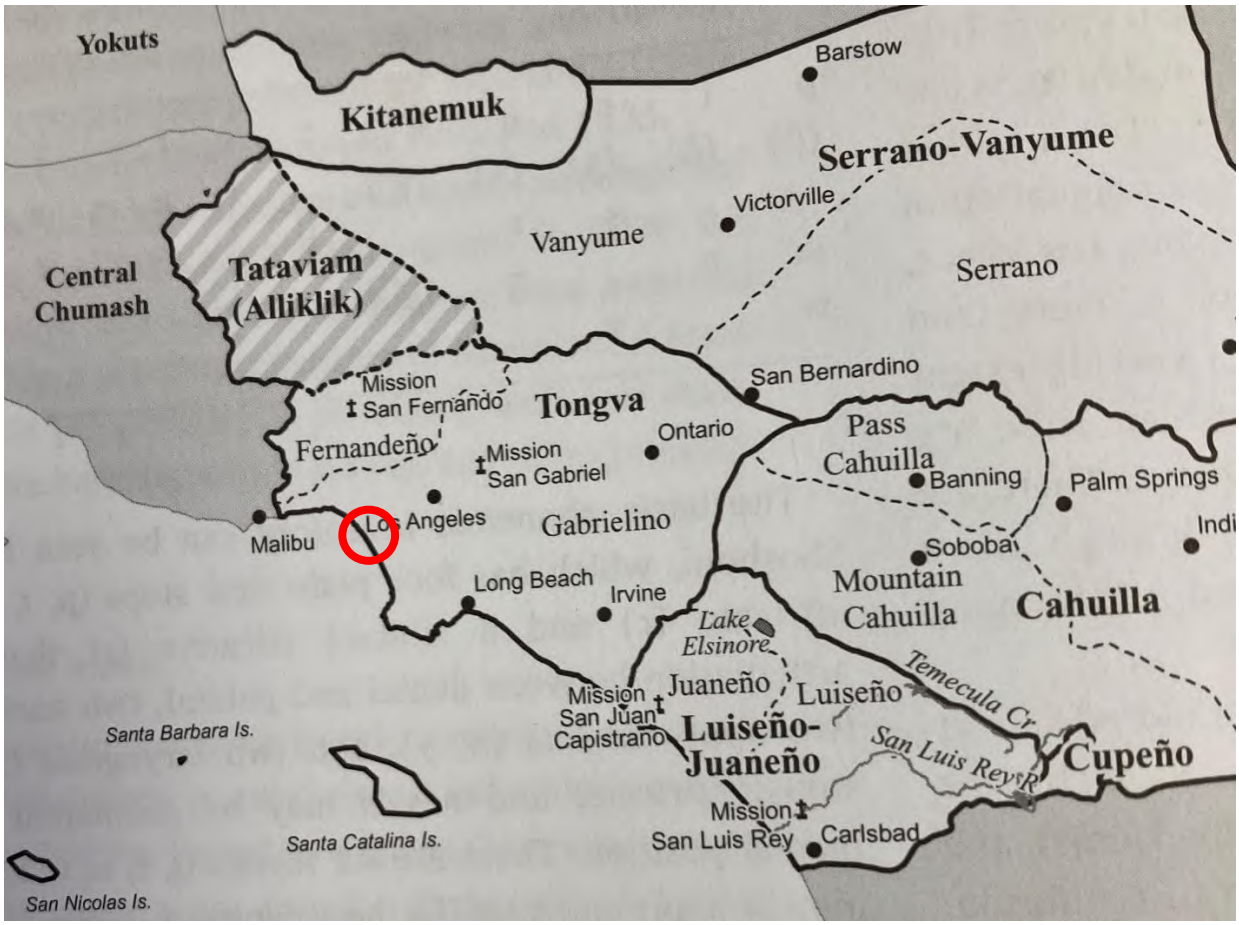

Exhibit 1. Takic Languages and Dialects (Golla 2011)

The vicinity of the project site is circled in red. This map shows the traditional cultural boundaries and Takic languages/dialects throughout Southern California

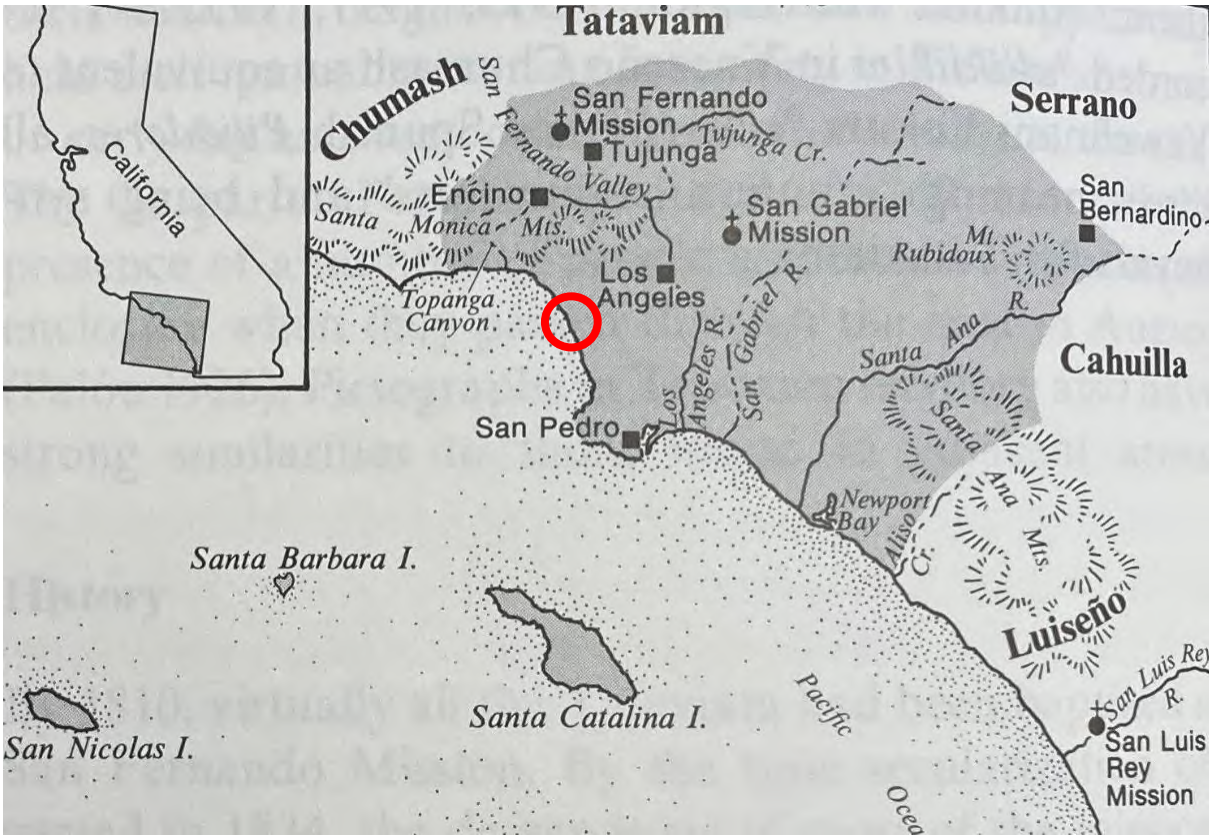

Exhibit 2. Tribal Territory (Bean and Smith 1978)
The vicinity of the project site is circled in red. Map showing approximation of Gabrielino/Tongva territory

Exhibit 3. Native Sites in Part of Southern California (Kroeber 1925)
The vicinity of the project site is circled in red. Map shows the approximate locations of Native American Villages/placenames.

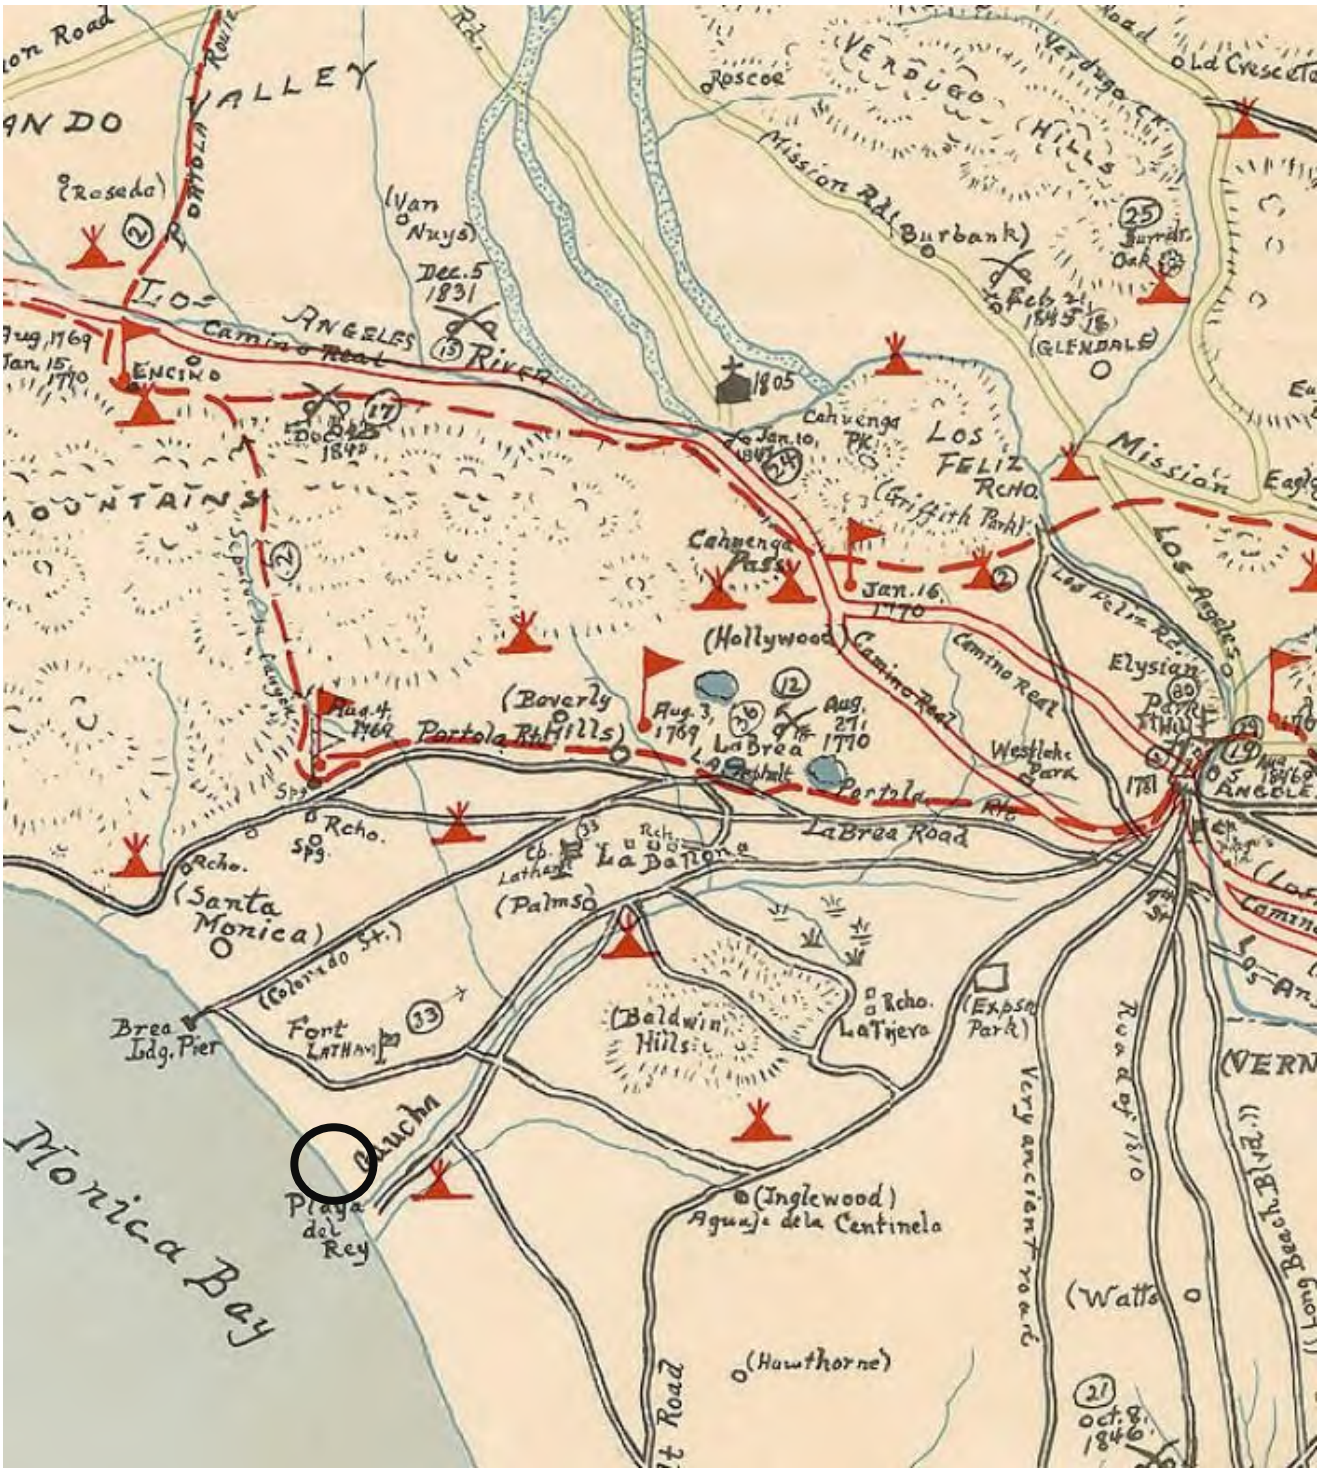

Exhibit 4. The Kirkman-Harriman pictorial and historical map of Los Angeles County, 1860-1937 (1938).

The vicinity of the project site is circled in black. This map provides a representation of the approximate locations of Native American villages, battle sites, mines, and other historical markers.

Exhibit 5. The Gabrielino Indians at the Time of the Portola Expedition (Southwest Museum 1962, reprinted in Johnston 1962)

The vicinity of the project site is circled in red. This map provides a representation of the approximate locations of Native American villages and other features in the Los Angeles area.

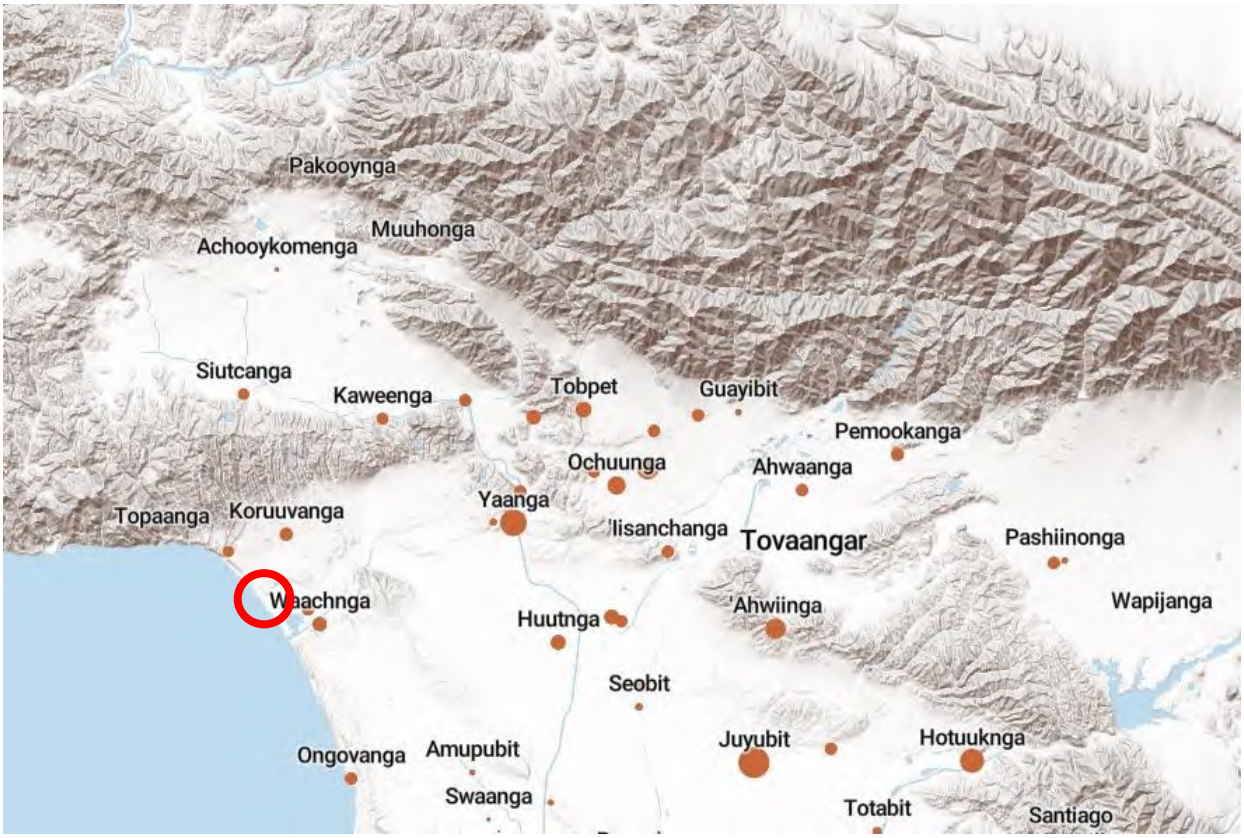

Exhibit 6. Village Size (Greene and Curwen 2019)
The vicinity of the project site is circled in red. Map from the LA Times *Mapping the Tongva Villages of L.A.'s Past* showing the comparative/approximate size of villages

2.3.2 Sanborn Fire Insurance Maps

South Environmental reviewed Sanborn Fire Insurance Company maps available on the Library of Congress website. A Sanborn Map dated 1919 depicts the project site with no signs of development. Washington Boulevard is now Abbot Kinney Boulevard, Brookes Avenue, and Hampton Drive. Additional maps were consistent with the historic aerial photographs presented below.

2.3.3 Historical Aerial Photographs and Topographic Maps

Historic aerial photographs of the project site were available from Nationwide Environmental Title Research (NETR 2022) LLC and from the University of California, Santa Barbara (UCSB), FrameFinder Maps for the years 1927, 1928, 1933, 1937, 1938, 1940, 1947, 1953, 1954, 1956, 1963, 1965, 1967, 1967, 1970, 1971, 1972, 1974, 1975, 1977, 1979, 1982, 1983, 1986, 1989, 1991, 1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2003, 2004, 2007, 2009, 2010, 2012, 2014, 2016, 2018, 2020, 2022.

Table 3 provides a summary of all available aerial photographs for the project site and surrounding areas. Topographic United States Geological Survey (USGS) quadrangle maps at 1:24,000 scale were

available from USGS TopoView for the years 1923, 1924, 1934, 1950, 1964, 2012, 2015, 2018, and 2021. 1:62,500 scale maps were available for the years 1896 and 1944. 1:100,000 scale maps were available for 1981. 1:125,000 scale maps were available for 1901, 1904, 1949, 1957, 1958, and 1960 (USGS 2024).

3 Environmental Setting

The topography of the site is relatively flat and sits approximately 14 feet above mean sea level. The project site is approximately 0.5-mile inland from the Pacific Ocean and 3.5 miles north of Los Angeles International Airport in the City of Los Angeles, surrounded by residential and commercial development set within the neighborhood of Venice. The site is currently developed and consists primarily of disturbed soils and non-native plants.

The study area has a Mediterranean climate with mild summers and winters (Kauffman 2021:15). Average summer high temperatures are in the mid-70s Fahrenheit and average winter lows are in the low-50s Fahrenheit. Average annual rainfall is approximately 12 inches, with the wettest months being December through March, and almost no precipitation between June and September (NOAA 2024).

The primary geological unit underlying the project site comprises young alluvium from the Late Pleistocene to the Holocene. The soils tend to be poorly sorted and poorly consolidated, consistent with floodplain deposits, and contain fine grain sand, silt, and clay (Saucedo et al. 2016).

Urban Land soil series is the dominant soil series of the project area, making up at least 65 percent of the soil (University of California, Davis [UCD] and National Resource Conservation Service [NRCS] n.d). Remaining soils are alluvium-based Aquic Xerorthents and Pacheco soil series (UCD and NRCS n.d). These soils are typically found in areas with a shallow slope of at most three degrees and contain alluvium from sedimentary rocks (National Cooperative Soil Survey [NCSS] 2001).

The nearest major natural water feature to the project site is Marina Del Rey, located approximately 1.5 miles to the south. Ballona Creek, just south of the marina, is approximately 2.4 miles south of the project site.

4 Cultural Setting

4.1 Prehistoric Context

While many chronological sequences have been developed to describe cultural changes in Southern California, the following builds on Wallace (1955, 1978), who developed a prehistoric chronology for the Southern California coastal region that is still widely used today. Four periods are presented in this sequence: Early Man, Milling Stone, Intermediate, and Late Prehistoric. The summary of prehistoric chronological sequences for Southern California coastal and near-coastal areas presented below is a combination of Wallace (1955) and Warren (1968) as well as more recent studies.

4.1.1 Early Man Horizon (ca. 10,000 – 6,000 B.C.)

Numerous pre-8,000 B.C. sites have been identified along the mainland coast and Channel Islands of Southern California (Moratto 1984; Erlandson 1991; Johnson et al. 2002; Jones and Klar 2007). The Arlington Springs site on Santa Rosa Island produced human femurs dated to approximately 13,000 years ago (Johnson et al. 2002). The most widely accepted dates for archaeological sites on the southern California coast are from two of the northern Channel Islands, located off the coast of Santa Barbara. On San Miguel Island, Daisy Cave clearly establishes the presence of people in this area about 10,000 years ago (Erlandson 1991:105).

Early Man Horizon sites are generally associated with a greater emphasis on hunting than later horizons. Recent data indicate that the Early Man economy was a diverse mixture of hunting and gathering, including a significant focus on aquatic resources in coastal areas and on inland Pleistocene lakeshores (Moratto 1984).

4.1.2 Milling Stone Horizon (6,000 – 3,000 B.C.)

Set during the Altithermal, which began around 6,000 B.C., the Milling Stone Horizon is characterized by changing subsistence strategies in response to drier climate. This included a greater emphasis on plant foods and small game. Extensive seed processing is evident in the dominance of stone grinding implements in contemporary archaeological assemblages; namely, milling stones (metates) and handstones (manos). The mortar and pestle, associated with acorns or other foods processed through pounding, were first used during the Milling Stone Horizon and increased dramatically in later periods (Wallace 1955, 1978; Warren 1968). Other food resources including small and large terrestrial mammals, sea mammals, birds, shellfish and other littoral and estuarine species, near-shore fishes, yucca, agave, and seeds and other plant products (Kowta 1969). Depending on the environmental setting (coastal or inland), food procurement strategies are found to be highly variable (Byrd and Raab 2007:220).

4.1.3 Intermediate Horizon (3,000 B.C. – A.D. 500)

The Intermediate Horizon is characterized by a shift toward a hunting and maritime subsistence strategy, as well as greater use of plant foods. During the Intermediate Horizon, a noticeable trend occurred towards a greater adaptation to local resources including a broad variety of fish, land mammals, and sea mammals along the coast. This diversity was reflected in tool kits for hunting, fishing, and processing food and materials, with flake scrapers, drills, various projectile points, and shell fishhooks being manufactured. Mortars and pestles became more common during this period, gradually replacing manos and metates as the dominant milling tool. This change in milling stone technology indicates a transition from the processing and consumption of hard seed resources to the increased reliance on acorns (Glassow et al. 1988; True 1993).

4.1.4 Late Prehistoric Horizon (A.D. 500 – Historic Period)

The Late Prehistoric Horizon is characterized by an increased diversity of plant food resources and land and sea mammal hunting. Material culture became more complex as demonstrated through more diverse classes of artifacts. During this period, the northern Channel Islands populations further developed craft specializations, including shell bead manufacture, that sustained trade with mainland settlements and with further trading partners to the east, creating a regional economy. Steatite quarried on Santa Catalina Island was used to make stone bowls, pipes, comals, sucking tubes, pendants, beads, and effigies. The lack of pottery in coastal and near-coastal sites implies that ceramic technology was not widely used, or that ceramics were obtained by trade with neighboring groups to the south and east. The lack of widespread pottery manufacture may also be due to the utility of tightly woven and watertight basketry that functioned in much the same way as ceramic vessels (Bean and Smith 1978; Warren 1968).

In areas of inland settlement, by the end of the Intermediate Period, mobility and long-distance migration towards the coast from seasonal camps was replaced by the development of permanent settlements. The period between A.D. 500 and the historic period is divided into three regional patterns: Chumash (Santa Barbara and Ventura counties), Takic/Numic (Los Angeles, Orange, and western Riverside counties), and Yuman (San Diego County). Modern Gabrielino/Tongva, Juaneño, and Luiseño people in this region are considered to be the descendants of the Uto-Aztecan, Takic-speaking populations that settled along the California coast during this period (Warren 1968).

4.2 Ethnographic Context

4.2.1 Gabrielino (Gabrieleño)/Tongva

The project area is in the heart of Gabrielino/Tongva territory (Bean and Smith 1978:538; Kroeber 1925: Plate 57), whose material culture appears in the Los Angeles Basin around 500 B.C. Surrounding native groups include the Chumash and Tatataviam to the north, the Serrano to the East, and the Luiseño/Juaneño to the south. Gabrielino/Tongva lands encompass the greater Los Angeles Basin and

three Channel Islands: San Clemente, San Nicolas, and Santa Catalina. Their mainland territory is bound on the north by the Chumash at Topanga Creek, the Serrano at the San Gabriel Mountains in the east, and the Juaneño on the south at Aliso Creek (Bean and Smith 1978:538; Kroeber 1925:636).

The name "Gabrielino" or "Gabrieleño" takes its name from Mission San Gabriel, where it was the dominant language spoken by Native Americans who were forced to convert (Golla 2011). Many modern Gabrieleño identify themselves and their language as the Tongva (King 1994; Golla 2011), however, this is not a universally used term. Though the names "Tongva" or "Gabrieleño" are the most common names used by Native American groups today, other groups identify themselves differently, such as the Gabrielino Band of Mission Indians - Kizh Nation.

The Gabrielino/Tongva established large, permanent villages in the fertile lowlands along rivers and streams, and in sheltered areas along the coast, stretching from the foothills of the San Gabriel Mountains to the Pacific Ocean. As the population expanded, the larger permanent villages established satellite communities that stayed connected via economic, religious, and social ties. Structures within the village were typically large, circular, domed structures made of willow poles thatched with tule, fern, or carrizo. Other structures found in Gabrielino villages included sweathouses, menstrual huts, and a ceremonial enclosure (Bean and Smith 1978).

The Gabrielino/Tongva subsistence economy was centered on gathering and hunting. The location of known Gabrielino/Tongva villages suggests three principal settlement and subsistence strategies in their mainland territory (McCawley 1996:35–74). In the valley zones located closest to the transverse ranges, including the San Fernando and San Gabriel valleys, acorn exploitation was the basis of subsistence, but foothill resources such as chia and yucca were also seasonally important. Pinyon nuts and juniper berries were also an important resource for communities located near the transverse ranges, either gathered or exchanged from further inland. A second subsistence strategy involved villages on the high ground along the middle or lower (coastward) reaches of major river courses. These communities had access to acorn stands, while downriver ones had closer access to marine resources (McCawley 1996). The third strategy included both bluff and estuary coastal villages. These appear to have clustered in the Palos Verdes Peninsula and San Pedro shore and estuary areas. Offshore fishing from plank canoes was carried out, along with inshore fishing and shellfish gathering. Both shell hooks and nets were used in obtaining fish which were dried for storage (McCawley 1996:62–71, 122–127). Hunting of sea mammals was also practiced with harpoons, spear throwers, and clubs (Bean and Smith 1978).

A wide variety of tools and implements were employed by the Gabrielino/Tongva to gather and collect food resources. Fishing involved the use of line and hooks, nets, basketry traps, spears, and bow and arrows. Mammal hunting was accomplished using bow and arrows, deadfalls, snares, traps, throwing sticks (Bean and Smith 1978). Food was processed with a variety of tools, including portable and bedrock mortars, pestles, basket hopper mortars, manos and metates, hammerstones and anvils, woven strainers and winnowers, leaching baskets and bowls, woven parching trays, knives, bone saws,

and wooden drying racks. Food was stored in large, finely woven baskets, and the unprocessed acorns were stored in large granaries woven of willow branches and raised off the ground on platforms. Food was consumed from various woven and carved wood vessels (McCawley 1996).

Registers from Missions San Gabriel and San Juan Capistrano refer to *Puvunga* (located on the campus of Cal State University Long Beach) as a native rancheria. Many (but not all) Gabrielino identified *Puvunga* to the Spanish as the "birthplace of the prophet *Chinigchinich* and a religious movement led by him" (Byrd and Raab 2007:45). The basis of Gabrielino religious life was the *Chinigchinich* cult, centered on the last of a series of heroic mythological figures. *Chinigchinich* gave instruction on laws and institutions, and also taught the people how to dance, the primary religious act for this society. He later withdrew into heaven, where he rewarded the faithful and punished those who disobeyed his laws (Kroeber 1925:637–638). The *Chinigchinich* religion seems to have been relatively new when the Spanish arrived. It was spreading south into the southern Takic groups even as Christian missions were being built and may represent a mixture of Native and Christian belief and practices (McCawley 1996:143–144).

Deceased Gabrielino were either buried or cremated, with inhumation more common on the Channel Islands and the neighboring mainland coast, and cremation predominating on the remainder of the coast and in the interior (Harrington 1942; McCawley 1996:157).

4.3 Historic Context

Post-Colonization history for the state of California is generally divided into three periods: the Spanish Period (1769–1822), Mexican Period (1822–1848), and American Period (1848–present).

4.3.1 Spanish Period (1769–1822)

In search of the legendary Northwest Passage, Spanish explorer Juan Rodríquez Cabríllo stopped in 1542 at present-day San Diego Bay. Cabríllo explored the shorelines of present-day Catalina Island as well as San Pedro and Santa Monica Bays. Much of the present California and Oregon coastline was mapped and recorded in the next half-century by Spanish naval officer Sebastián Vizcaíno. Spain laid claim to California based on the surveys conducted by Cabríllo and Vizcaíno (Bancroft 1885:96–99; Gumprecht 1999:35).

The 1769 overland expedition by Captain Gaspar de Portolá marks the start of California's Historic period. With a band of 64 soldiers, missionaries, Baja (lower) California Native Americans, and Mexican civilians, Portolá established the Presidio of San Diego, a fortified military outpost, as the first Spanish settlement in Alta California. In July of 1769, while Portolá was exploring southern California, Franciscan Fr. Junípero Serra founded Mission San Diego de Alcalá at Presidio Hill, the first of the 21 missions that would be established in Alta California by the Spanish and the Franciscan Order between 1769 and 1823.

The Portolá expedition first reached the present-day boundaries of Los Angeles in August 1769, thereby becoming the first Europeans to visit the area. Father Juan Crespí, a member of the expedition, named "the campsite by the river Nuestra Señora la Reina de los Angeles de la Porciúncula" or "Our Lady the Queen of the Angeles of the Porciúncula." Two years later, Friar Junípero Serra returned to the valley to establish a Catholic mission, the Mission San Gabriel Arcángel, on September 8, 1771 (Kyle 2002:151).

In a race against England and Russia to claim as much of the Americas as possible, Spain started colonizing the coast of Alta California in the late 18th century. Spain's goal was to establish self-sustaining colonies; they did this with a three-pronged approach that focused on religion, commerce, and military (Kimbro and Costello 2009:13). The Missions presided over religious and agricultural affairs; the pueblos provided residences and a commercial base for trade; and the presidios housed soldiers that kept regional peace and provided military defense against attack (Kimbro and Costello 2009:13).

4.3.2 Mexican Period (1822–1848)

After more than a decade of intermittent rebellion and warfare, New Spain (Mexico and the California territory) won independence from Spain in 1821. In 1822, the Mexican legislative body in California ended isolationist policies designed to protect the Spanish monopoly on trade, and decreed California ports open to foreign merchants (Dallas 1955:14).

Extensive land grants were established in the interior during the Mexican Period, in part to increase the population inland from the more settled coastal areas where the Spanish had first concentrated their colonization efforts. The secularization of the missions following Mexico's independence from Spain resulted in the subdivision of former mission lands and establishment of many additional ranchos. During the supremacy of the ranchos (1834–1848), landowners largely focused on the cattle industry and devoted large tracts to grazing. Cattle hides became a primary southern California export, providing a commodity to trade for goods from the east and other areas in the United States and Mexico (Dallas 1955, Cleland 2005). The number of nonnative inhabitants increased during this period because of the influx of explorers, trappers, and ranchers associated with the land grants. The rising California population contributed to the introduction and rise of diseases foreign to the Native American population, who had no associated immunities.

4.3.3 American Period (1848–Present)

The Mexican–American War ended with the Treaty of Guadalupe Hidalgo in 1848, ushering California into its American Period. California officially became a state with the Compromise of 1850, which also designated Utah and New Mexico (with present-day Arizona) as U.S. Territories.

Horticulture and livestock continued to dominate the southern California economy in the 1850s. The Gold Rush began in 1848, and with the influx of people seeking gold, cattle were no longer desired

mainly for their hides but also as a source of meat and other goods. During the 1850s cattle boom, rancho vaqueros drove large herds from southern to northern California to feed that region's burgeoning mining and commercial boom. The cattle boom ended for southern California as neighbor states and territories drove herds to northern California at reduced prices. Operation of the huge ranchos became increasingly difficult, and droughts severely reduced their productivity (Cleland 2005:102–103).

4.4 Project Site Historic Context

4.4.1 City of Los Angeles

In 1781, a group of 11 Mexican families traveled from Mission San Gabriel Arcángel to establish a new pueblo called El Pueblo de la Reyna de Los Angeles (The Pueblo of the Queen of the Angels). This settlement consisted of a small group of adobe-brick houses and streets and would eventually be known as the Ciudad de Los Angeles (City of Angels). The California Rancho Era started during the Spanish Period when a small number of land grants (approximately 30) were made to individuals as a reward for their military service and loyalty to the Spanish Crown. After Mexico (including present-day California) became independent from Spain in 1821, the practice of granting land to private citizens was continued by the Mexican government, with approximately 750 land grants issued during the Mexican period (Clay and Troesken 2005: 52-66). Ranchos were a mechanism to populate and utilize the interior territories of Alta California, and the vast majority were distributed after secularization of the California missions in 1834, when the Mexican government reduced the missions to the status of parish churches and redistributed the land that was once under the church's control (California Mission Foundation; Livingston 1914).

California became a U.S. territory in 1848 with the signing of the Treaty of Guadalupe Hidalgo, which ended the Mexican-American War, and then became a state in 1850. The County of Los Angeles was established on February 18, 1850, one of 27 counties established in the months prior to California acquiring official statehood in the United States, and the City of Los Angeles was incorporated on April 4, 1850 (Dumke 1944). Following statehood, political pressure mounted to open new lands to settlers from the eastern U.S. As a result, Congress passed the California Lands Act in 1851, which required that all land titles granted during the Spanish and Mexican periods be reviewed to determine their validity. This proved challenging given that rancho boundaries were not precisely defined, often marked by non-permanent or changing markers such as streams, boulders, and trees. The Act gave landowners two years to file a claim with the State Lands Commission. As a result of this law, many rancheros lost their land or had to sell it to pay their legal fees (Surls and Gerber 2016: 40). "Claims were rejected either because the original grant was made in violation of Mexican land law or because there was no evidence that a grant had been made" (Surls and Gerber 2016: 57). Landowners who persevered were often left to deal with squatters who had encroached on their land. Approximately 80 percent of all claims in California were approved, with the Los Angeles area slightly above average at 83 percent (Surls and Gerber 2016: 57).

While the Act greatly contributed to the break-up of rancho lands in the Los Angeles area, it was not the sole cause (Rosenburg). Horticulture and livestock, based primarily on cattle, was the currency and staple of the rancho system and continued to dominate the Southern California economy through the 1850s. However, a series of natural disasters beginning in 1862 ultimately brought an end to the rancho system. Floods followed by prolonged drought decimated the cattle industry and resulted in the deaths of thousands of animals, bringing financial ruin to rancheros (Fogelson 1967; Guinn 1915-1916). Most of these ranchos were subdivided into agricultural parcels or towns (Dumke 1944). While the drought brought an end to the rancho and cattle era, it also set the stage for the urban sprawl that was to follow. "The era of the open range was ending, and a new age of population and economic growth, driven by modern agricultural development, would take its place" (Rosenburg 2012).

Los Angeles maintained its role as a regional business center, and the development of citriculture in the late 1800s and early 1900s further strengthened this status (Caughey and Caughey 1977). These factors, combined with the expansion of port facilities and railroads throughout the region, contributed to the impact of the real estate boom of the 1880s on Los Angeles (Caughey and Caughey 1977; Dumke 1944).

By the late 1800s, government leaders recognized the need for water to sustain the growing population in the Los Angeles area. Irish immigrant William Mulholland personified the city's efforts for a stable water supply (Dumke 1944). By 1913, the City of Los Angeles had purchased large tracts of land in the Owens Valley and Mulholland planned and completed the construction of the 240-mile aqueduct that brought the valley's water to the city.

Los Angeles continued to grow in the twentieth century, in part due to the discovery of oil in the area and its strategic location as a wartime port. The county's mild climate and successful economy continued to draw new residents in the late 1900s, with much of the county transformed from ranches and farms into residential subdivisions surrounding commercial and industrial centers. Hollywood's development into the entertainment capital of the world and Southern California's booming aerospace industry were key factors in the county's growth in the twentieth century.

Venice Beach

Early Development of Venice (1905 – 1920s):

In 1905, tobacco millionaire Abbot Kinney started investing in the development of marshy land on the western edge of Los Angeles with a plan to create a resort town dubbed the "Venice of America" (Kinney 1905). Inspired by his travels in Europe, Kinney sought to recreate the charm of Venice, Italy, with canals, gondola rides, and an intricate system of waterways. The canal system—the primary means of transportation around the community—was partly aesthetic and practical due to the natural salt marshes. Between 1901 and 1905, the area's development was initiated with the construction of the boardwalk, arts center, music center, and museum; Kinney's canal residential and retail community was the final piece in the idyllic tourist destination for arts, culture, and entertainment. Venice became a

place for artists, intellectuals, and free spirits, a characteristic that would persist in the area for decades. While the community thrived during Kinney's lifetime, after his death, management became difficult, leading to the annexation of the community in the City of Los Angeles in 1925 (City of Los Angeles 2025).

The Rise and Fall of the Oil Boom (1929 – 1990s):

In 1929, as the stock market tumbled, oil was discovered near the Grand Canal, and the Ohio Oil Company erected the first derrick in December of that year (Carlson 2015). While the discovery of 'black gold' was a boon to the area, the drilling process fundamentally altered the landscape (Carlson 2015). Canals were filled in to make way for streets, and hundreds of oil derricks literally and figuratively overshadowed Venice's aesthetic appeal (Doherty 1991, Carlson 2015). This contributed to the area's reputation as a more industrialized zone during the mid-20th century. The environmental consequences were also severe. Pollution from the drilling operations led to environmental degradation, and beaches were no longer considered desirable (Doherty 1991). Drilling peaked in the 1930s and tapered significantly over the succeeding decades, with the oil depleted by the early 1990s and the final well capped (Doherty 1991).

Damson Oil Corporation's bankruptcy in 1989 marked the end of an era for the oil industry in Venice, but the legacy of the oil rigs and their impact on the environment lingered. While some money from the drilling had been reinvested in the area for various projects, an insufficient amount had been set aside for environmental clean-up. The city, investors, and residents were left to contend with the lasting environmental and economic repercussions (Doherty 1991).

Venice's Cultural Evolution (1920s – 1980s):

Kinney's aspiration to establish a cultural hub for artists and intellectuals was largely realized as Venice experienced significant growth in both population and popularity. This area emerged as a center for various cultural movements. During the 1920s, the boardwalk became a vibrant site for jazz music and flapper culture, contributing to an expanding music scene. In 1934, exercise equipment was installed just south of the Santa Monica Pier, resulting in the creation of the original Muscle Beach. This location attracted fitness enthusiasts and Hollywood actors seeking to work on the muscles and their tans until it was relocated to Venice in 1958 (Pool 1999). As the decades progressed, hippies and beatniks, surfers and skateboarders began to cultivate distinctive subcultures within this dynamic community (Chidester and Priore 2008).

1990s to Present

Starting in the 1990s, the area saw a real estate boom among young professionals working in the entertainment and tech industries. The influx of people and money to the area drove up prices and gentrified the area. Resort development and the tourism industry also grew at this time.

4.4.2 Development of the Project Site and Surrounding Area

Historic aerial photographs and topographic maps indicate that in the early 20th century the area of Venice Beach has been densely developed with residences and industrial buildings (Table 3). The project site had what appears to be industrial buildings from at least 1927. Some of these buildings were demolished when the current Abbot Kinney Boulevard (then Washington Boulevard) was reconfigured, but many remain. The immediate area has undergone relatively little development over the past century due to the extent of initial development.

Table 3. Summary of Historic Aerial Photographs of the Project Site

Year of Photograph	Description of Project Site and Surrounding Areas
1927	The project site and surrounding area are very similar with minor changes to the road path. In 1927, Abbot Kinney Boulevard appears to traverse modern Brooks Avenue and Hampton Drive with a dogleg at Brooks Avenue to go around the project site. There are several structures in a U-shape with one rectangular building at the top of the U near the intersection of modern Hampton Drive and Abbot Kinney Boulevard.
1928	There are few discernable changes, however, the high image quality provides greater detail of the complex. The buildings appear to be rectangular workshop or warehouse-type buildings with a central courtyard.
1933	No discernible changes.
1937	Buildings on the western side have been demolished to make room for the reconfiguration of Abbot Kinney Boulevard and Hampton Drive. Abbot Kinney Boulevard cuts straight to Main Street. The western boundary is used for parking.
1938	No discernible changes.
1940	No discernible changes.
1947	No discernible changes.
1953	No discernible changes were made to property. Minor changes to the streets: the intersection of Brooks Avenue and Abbot Kinney Boulevard has what appears to be an island.
1954	No discernible changes.
1956	No discernible changes.
1963	No discernible changes. Minor refinement of Abbot Kinney Boulevard and Hampton Drive. The portion of Abbot Kinney Boulevard north of Brooks Avenue is narrowed.
1965	No discernible changes.
1967	No discernible changes were made to property. Minor refinement of street path.
1970	No discernible changes.
1971	The current alignment of Brooks Avenue is clearly defined between Hampton Drive and Abbot Kinney Boulevard.
1972	No discernible changes.
1974	No discernible changes.
1975	No discernible changes.
1977	No discernible changes.
1979	No discernible changes.
1982	No discernible changes.
1983	No discernible changes.
1986	No discernible changes.

Table 3. Summary of Historic Aerial Photographs of the Project Site

Year of Photograph	Description of Project Site and Surrounding Areas
1989	A dark line along the western boundary of the property suggests the presence of a large building; however, poor photograph quality inhibits positive identification.
1991	A large warehouse-type building adjacent to the project site to the west was constructed.
1992	No discernible changes.
1993	No discernible changes.
1994	No discernible changes.
1995	The corner of Brooks Avenue and Hampton Drive is expanded and painted with white lines, reconfiguring the intersection and stop signs.
1996	No discernible changes.
1997	No discernible changes.
1998	No discernible changes.
1999	No discernible changes.
2000	No discernible changes.
2001	The buildings along the eastern boundary and near Brooks Avenue are still present. Several cars are parked on the property. Another small building was added near the western boundary.
2003	No discernible changes.
2004	The northern corner of the intersection of Brook Avenue and Abbot Kinney Boulevard is blocked off and turned into parking, removing the triangular island in the intersection.
2007	A building is erected on the northern corner of the intersection of Brook Avenue and Abbot Kinney Boulevard.
2009	A wall is erected along Brooks Avenue and Abbot Kinney Boulevard, enclosing the site.
2010	No discernible changes.
2012	No discernible changes.
2014	No discernible changes.
2016	No discernible changes.
2018	No discernible changes.
2020	No discernible changes.
2022	No discernible changes.

5 Findings

No archaeological resources or TCRs were identified within the project site as a result of the CHRIS records search, NAHC Sacred Lands File search, or AB 52 outreach conducted by the City.

Ethnographic research indicates that the project site is closest to at least one large settlement on the northern bank of Ballona Creek, east of Marina Del Rey. This area would have provided an abundance of natural resources that would have been important to Native Americans in prehistoric and protohistoric times. However, there is no other evidence available to suggest that the project site provided any consistent or seasonal sources of water or other natural resources that would increase the likelihood of the presence of archaeological resources or TCRs. Further, the surrounding residential and industrial area has been extensively developed over the decades.

Although no archaeological resources or TCRs were identified as a result of this study and none are anticipated to be impacted by the proposed project, the City has established mitigation measures to be implemented through the City's imposition of conditions of approval to address inadvertent discovery of archaeological resources (4.4-2 J and K) and TCRs (4.15-1(b)), see Section 1.2.2 of this report, City of Los Angeles Housing Element EIR) that includes halting construction and ensure that the discovery is properly assessed and addressed pursuant to the established process. Should archaeological resources or TCRs be inadvertently encountered during construction of the proposed project, these measures will ensure compliance with state and local regulations such that any potential impacts would be reduced to a less than significant level.

Project Description:

The proposed project would demolish the current buildings and structures and construct a multi-story mixed use residential and retail building at 825 S. Hampton Drive in the City of Los Angeles. The project would consist of construction of mixed-use building including 36 multi-family residential units and approximately 3,416 square feet of commercial space and up to three subterranean levels of parking. The project is subject to CEQA.

Re: Native American Tribal Consultation, Pursuant to the Assembly Bill 52 (AB 52), Amendments to the California Environmental Quality Act (CEQA) (Chapter 532, Statutes of 2014), Public Resources Code Sections 5097.94 (m), 21073, 21074, 21080.3.1, 21080.3.2, 21082.3, 21083.09, 21084.2 and 21084.3, Hampton Court Project, Los Angeles County

To Whom It May Concern:

Pursuant to Public Resources Code section 21080.3.1 (c), attached is a consultation list of tribes that are traditionally and culturally affiliated with the geographic area of the above-listed project. Please note that the intent of the AB 52 amendments to CEQA is to avoid and/or mitigate impacts to tribal cultural resources, (Pub. Resources Code §21084.3 (a)) ("Public agencies shall, when feasible, avoid damaging effects to any tribal cultural resource.")

Public Resources Code sections 21080.3.1 and 21084.3(c) require CEQA lead agencies to consult with California Native American tribes that have requested notice from such agencies of proposed projects in the geographic area that are traditionally and culturally affiliated with the tribes on projects for which a Notice of Preparation or Notice of Negative Declaration or Mitigated Negative Declaration has been filed on or after July 1, 2015. Specifically, Public Resources Code section 21080.3.1 (d) provides:

Within 14 days of determining that an application for a project is complete or a decision by a public agency to undertake a project, the lead agency shall provide formal notification to the designated contact of, or a tribal representative of, traditionally and culturally affiliated California Native American tribes that have requested notice, which shall be accomplished by means of at least one written notification that includes a brief description of the proposed project and its location, the lead agency contact information, and a notification that the California Native American tribe has 30 days to request consultation pursuant to this section.

The AB 52 amendments to CEQA law does not preclude initiating consultation with the tribes that are culturally and traditionally affiliated within your jurisdiction prior to receiving requests for notification of projects in the tribe's areas of traditional and cultural affiliation. The Native American Heritage Commission (NAHC) recommends, but does not require, early consultation as a best practice to ensure that lead agencies receive sufficient information about cultural resources in a project area to avoid damaging effects to tribal cultural resources.

The NAHC also recommends, but does not require that agencies should also include with their notification letters, information regarding any cultural resources assessment that has been completed on the area of potential effect (APE), such as:

1. The results of any record search that may have been conducted at an Information Center of the California Historical Resources Information System (CHRIS), including, but not limited to:

- A listing of any and all known cultural resources that have already been recorded on or adjacent to the APE, such as known archaeological sites;
- Copies of any and all cultural resource records and study reports that may have been provided by the Information Center as part of the records search response;
- Whether the records search indicates a low, moderate, or high probability that unrecorded cultural resources are located in the APE; and
- If a survey is recommended by the Information Center to determine whether previously unrecorded cultural resources are present.

2. The results of any archaeological inventory survey that was conducted, including:

    - Any report that may contain site forms, site significance, and suggested mitigation measures.

      All information regarding site locations, Native American human remains, and associated funerary objects should be in a separate confidential addendum, and not be made available for public disclosure in accordance with Government Code section 6254.10.

3. The result of the Sacred Lands File (SLF) check conducted through the Native American Heritage Commission was positive. Please contact the Gabrielino Tongva Indians of California Tribal Council on the attached list for more information.

4. Any ethnographic studies conducted for any area including all or part of the APE; and

5. Any geotechnical reports regarding all or part of the APE.

Lead agencies should be aware that records maintained by the NAHC and CHRIS are not exhaustive and a negative response to these searches does not preclude the existence of a tribal cultural resource. A tribe may be the only source of information regarding the existence of a tribal cultural resource.

This information will aid tribes in determining whether to request formal consultation. In the event that they do, having the information beforehand will help to facilitate the consultation process.

If you receive notification of change of addresses and phone numbers from tribes, please notify the NAHC. With your assistance, we can assure that our consultation list remains current.

If you have any questions, please contact me at my email address: Andrew.Green@nahc.ca.gov.

Sincerely,

Andrew Green

RE: PROJECT ADDRESS: 825 S Hampton Drive; Venice, 90291
CASE NO.: CPC-2024-2450-DB-CDP-SPPC-CUB-VHCA-MEL

Dear Tribal Representative:

This letter is to inform you that the Los Angeles Department of City Planning is reviewing the following proposed project:

The Project Site consists of one (1) parcel of approximately 18,487 square feet with Brooks Avenue to the east and Hampton Drive to the north, in the Venice Community Plan area of the City of Los Angeles. The Project Site contains five one-story buildings and several shipping containers, currently used as commercial offices. The Project proposes the demolition of the existing commercial buildings, removal of the containers and site paving, and the development of an approximately 36,716-square-foot mixed-use building containing approximately 36 new apartment units including four (4) affordable units (Very Low Income) and approximately 3,416 square feet of ground floor commercial space. The Project would include approximately 6,270 square feet of open space, inclusive of a minimum of 1,255 square feet of landscaping and ten trees. The Project would include 60 vehicular parking spaces in three levels of subterranean parking, 40 long-term bicycle parking spaces and 19 short-term bicycle parking spaces. The building would be four (4) stories over three (3) subterranean garage levels and approximately 44 feet and seven (7) inches (44'7") tall to the top of the glass railing on the rooftop; a height of 42 feet and one inch to the top of the parapet of the building. Residential units would be located on all four floors of the building and would include a mix of studio, one-bedroom, and two-bedroom units. The total floor area of the Project would be approximately 36,716 square feet, resulting in a Floor Area Ratio (FAR) of 1.986:1. The Project will provide four (4) affordable dwelling units and utilize Affordable Housing Density Bonus Incentives for increased height and reduced beach impact zone (BIZ) residential parking, and waivers for increased height for increased height and height encroachment for elevator shafts.

The Project is expected to export approximately 15,390 cubic yards of soil for excavation.

Pursuant to CEQA Guidelines Section 15168, the Project is electing to utilize the Los Angeles Citywide Housing Element 2021-2029 and Safety Element Updates Final Environmental Impact Report (Program EIR), which was certified on November 24, 2021, as the environmental clearance for the subject case. As the Project proposes grading, Mitigation Measure 4.15-1 requires tribal notification and consultation to determine if there are any potential impacts on Tribal Cultural Resources. You have 30 calendar days from receipt of this letter to notify us in writing that you wish to consult on this project. Please provide your contact information and send your request via U.S. mail and/or email to:

Dear Ira Brown,

On behalf of the Cultural Resources Management (CRM) Division of the Fernandeño Tataviam Band of Mission Indians (FTBMI) , thank you for the formal notification and opportunity to consult on the proposed project located at 825 S Hampton Drive in Venice.

The CRM Division of the FTBMI will not be requesting consultation for this particular undertaking.

1 Executive Summary

South Environmental was retained to complete a Historical Resource Assessment (HRA) Report for a property located at 825 Hampton Drive in the City of Los Angeles, California (project site/subject property). This study includes the results of an intensive-level pedestrian survey of the project site by a qualified architectural historian; building development and archival research; and recordation and evaluation of the subject property for historical significance and integrity in consideration of National Register of Historic Places (NRHP), California Register of Historical Resources (CRHR), and City of Los Angeles Historic-Cultural Monument (HCM) designation criteria. This report was prepared in conformance with California Environmental Quality Act (CEQA) Guidelines § 15064.5 for historical resources and the City of Los Angeles Cultural Heritage Ordinance.

The subject property at 825 Hampton Drive was recorded and evaluated for historical significance by a qualified architectural historian in consideration of NRHP, CRHR, and City of Los Angeles HCM designation criteria and integrity requirements. As a result of the property significance evaluation, the subject property appears not eligible for designation in the NRHP, CRHR, or as a City HCM due to lack of architectural significance or historic associations. The property appears not eligible as a contributor to a historic district, has no important associations with events or people, and is not a likely source of important information. Further, the property does not retain integrity of location, design, materials, workmanship, feeling, setting, or association. As such, the subject property is not a historical resource under CEQA Guidelines §15064.5.

One previously identified historical resource is located directly across the street from the project site, the Eames Office at 901 South Abbot Kinney Boulevard. There is no indication that the proposed development has the potential to impact any of the important character-defining features of the Eames Office building associated with its eligibility under NRHP/CRHR/City of Los Angeles HCM Criteria A/1/1 for its historical associations with Charles and Ray Eames. Further, the setting of the Eames Office has already been significantly altered from its period of significance such that the proposed new construction would not impact an intact historic setting or any important viewsheds. As such, no management recommendations are provided for this adjacent property.

In conclusion, with respect to built environment resources, the proposed project will result in a less than significant impact to historical resources under CEQA Guidelines § 15064.5 and the City of Los Angeles Cultural Heritage Ordinance. No mitigation measures have been identified.

2 Project Summary

South Environmental was retained to complete a Historical Resource Assessment (HRA) for a property located at 825 Hampton Drive in the City of Los Angeles, California (project site/subject property). This study includes the results of an intensive-level pedestrian survey of the project site by a qualified architectural historian; building development and archival research; and recordation and evaluation of the subject property for historical significance and integrity in consideration of National Register of Historic Places (NRHP), California Register of Historical Resources (CRHR), and City of Los Angeles Historic-Cultural Monument (HCM) designation criteria. This report was prepared in conformance with California Environmental Quality Act (CEQA) Guidelines § 15064.5 for historical resources and the City of Los Angeles Cultural Heritage Ordinance.

This report was authored by South Environmental architectural historians Laura Carías, MA, Sarah Corder, MFA, and Cameron Milledge, MA who meet the Secretary of the Interior's Professional Qualifications Standards for Architectural History and History (see resumes in Attachment F).

2.1 Project Description

The proposed project would construct a mixed-use building including 36 multi-family residential units and approximately 3,416 square feet of commercial space and up to two subterranean levels of parking. The total floor area of the project would be approximately 36,716 square feet, resulting in a Floor Area Ratio (FAR) of 1.986:1. Project design plans are included as Attachment E.

2.2 Project Location

The project site is located at 825 Hampton Drive on Assessor's Parcel Number (APN) 4286-012-039 within the Venice Community Plan Area (CPA). The project site is located on a triangle-shaped parcel on the southwest corner of where Hampton Drive, Brooks Avenue, and Electric Avenue converge (Figures 1 and 2).

3 Assessment Methodology

3.1 Research Conducted

Background research was conducted in an effort to establish a thorough and accurate historic context, and to confirm the building development history of the subject property. The subject property was identified by two separate addresses throughout its history: 165 Brooks Avenue (historic) and 825 Hampton Drive (current). Both of these addresses were used when researching the subject property. All information obtained from the following sources was used in the development of the historic context presented in Section 5.

3.1.1 ZIMAS and Los Angeles County Office of the Assessor

On June 9, 2025, the subject property was reviewed on both ZIMAS and the Los Angeles County Office of the Assessor Online Property Assessment Information System in order to establish a date of construction for the buildings within the project site. These sources indicate that the subject property was originally developed between 1927 and 1931.

3.1.2 City of Los Angeles Building Permit Records

On May 27, 2025, South Environmental reviewed all permits associated with the subject property as available through the City Department of Building and Safety's online building records, which include records from 1905 to present. These documents confirm the subject property's construction dates of 1927 and 1931, as well as alterations made over time. All relevant building records are provided in Attachment B.

3.1.3 Los Angeles Public Library

South Environmental utilized the Los Angeles Public library online system to view historic City Directories for the following years: 1928, 1933, 1954, 1958, 1962, 1965, 1970, 1975, 1980, 1985, 1991, 1994, 1999, 2000, 2004, 2006, 2009, and 2015. The online system was also used to access Sanborn Fire Insurance Maps (Sanborn Maps) of the Venice District dated 1905-1950 and 1918-1950.

3.1.4 Historical Newspaper Search

South Environmental reviewed historical newspapers on www.newspapers.com that covered the Venice area to better understand the development of the subject property and surrounding area. Such newspapers included the *Evening Vanguard* and *Los Angeles Times*. The Los Angeles Public library ProQuest system was also utilized to review newspaper articles.

3.1.5 Sanborn Fire Insurance Maps

Historical Sanborn Fire Insurance Maps (Sanborn Maps) for the Venice District were 1905-1950 and 1918-1950 were available from the Los Angeles Public Library. The subject property is not present on the 1905-1950 Sanborn Map but appears on the 1918-1950 Sanborn Map as an auto repair shop and service station. The subject property is surrounded by residential and commercial developments at the time of the Sanborn Maps. Sanborn Maps of the project site are provided in Attachment C.

3.1.6 Historical Aerial Photographs and Maps

Historic aerial photographs of the project site were available from Nationwide Environmental Title Research (NETR 2025) LLC maps for the years 1952, 1963-1964, 1972, 1980, 1985, 1991-2000, 2003-2005, 2009, 2010, 2012, 2014, 2016, 2018, 2020, and 2022 and from the University of California, Santa Barbara (UCSB 2025), FrameFinder Maps are available for the years 1927, 1928, 1933, 1938, 1940, 1958, 1967, 1971, 1989, and 2001. These aerial photographs were reviewed to assess changes to the subject property and surrounding neighborhood.

Topographic United States Geological Survey (USGS) quadrangle maps at 1:24,000 scale were available from USGS TopoView for the years 1923, 1924, 1934, 1950, 1964, 2012, 2015, 2018, and 2021. 1:62,500 scale maps were available for the years 1896 and 1944. 1:100,000 scale maps were available for 1981. 1:125,000 scale maps were available for 1901, 1904, 1949, 1957, 1958, and 1960 (USGS 2024).

3.1.7 Field Methods

Senior Architectural Historian, Laura Carías, MA, conducted an intensive-level pedestrian survey of the project site on May 20, 2025. The survey entailed walking the project site and the surrounding areas. The subject property was documented with detailed notes and digital photographs, specifically noting character-defining features, spatial relationships, landscaping features, and observed alterations. All photographs were taken with an iPhone 16. All field notes and photographs are on file with South Environmental.

4 Summary of Previous Evaluations

4.1 Subject Property

The subject property at 825 Hampton Drive was not previously identified in the SurveyLA Historic Resources Survey Report for the Venice Community Plan Area (CPA) (HRG 2015). The subject property was not identified as either an individually eligible resource or as a contributor to a historic district as a result of the Venice CPA survey.

The subject property was also not identified as previously evaluated in the State Office of Historic Preservation's Built Environment Resources Directory (BERD) for Los Angeles County.

In summary, it appears that the subject property has not been previously recorded or evaluated for historical significance.

4.2 Adjacent Properties

Three previously evaluated resources were identified adjacent to the project site: Eames Office, Electric Avenue Pump Plant, and the Oakwood Planning District (HRG 2015). Both the Eames Office and Electric Avenue Pump Plant were found eligible for the NRHP, CRHR, and as City of Los Angeles HCM; while the Oakwood Planning District was found not eligible due to a lack of integrity.

4.2.1 Eames Office

The Eames Office, located at 901 South Abbot Kinney Boulevard, was identified in SurveyLA in 2015. The office served as the Eames office for American designers Charles and Ray Eames from 1943 to 1988. The husband-and-wife team "made significant contributions to various design fields throughout their careers, including architecture, furniture, design, industrial design, graphic design, fine art, and film" (HRG 2015). Initially, the Eames Office occupied the first three rooms of the building, and within five years the business took over half the building. The demand for Eames' furniture was in high demand in the late 1950s and eventually expanded to take over the entire building. Between the late 1950s and 1978, nearly all of the Eames' designs and production were done at the Eames Office. Ray Eames requested the building be sold upon her death; it was sold in 1988. The Eames Office was identified as eligible under NRHP/CRHR/City of Los Angeles HCM Criteria A/1/1 (HRG 2015).

4.2.2 Electric Avenue Pump Plant

The Electric Avenue Pump Plant is located at 314 Brooks Avenue and was built in 1950. It was identified as a rare example of a mid-century water pumping plant in Venice and was found eligible under NRHP/CRHR/City of Los Angeles HCM Criterion A/1/1 (HRG 2015).

4.2.3 Oakwood Planning District

The Oakwood Planning District was identified as part of the Historic Resources Survey Report for the Venice CPA. The historical boundaries of the Oakwood neighborhood are Dewey Street to the northwest, Lincoln Boulevard to the northeast, California Avenue to the southeast, Electric Avenue to the southwest, and Hampton Drive to the west (HRG 2015). The neighborhood was the home to many Black residents in the early 20th century and was identified "as a rare example of an early-20th century African-American enclave in Venice" (HRG 2025: 44). Based on the findings of the Venice CPA survey report, Oakwood was found to have cultural significance, but it has been significantly altered over the years and "does not retain sufficient integrity or cohesion to qualify as a historic district, it may warrant special consideration for local planning purposes" (HRG 2015: 44).

5 Property History

5.1 Historic Context

5.1.1 Historical Overview of Early Los Angeles

European settlement in the Los Angeles area began in the 18th century. In 1781, a group of eleven Mexican families traveled from Mission San Gabriel Arcángel to establish a new pueblo called El Pueblo de la Reyna de Los Angeles (The Pueblo of the Queen of the Angels). This settlement consisted of a small group of adobe brick houses and was called the Ciudad de Los Angeles (City of Angels). Outside of the pueblo were various ranchos, where Mexican land grants were awarded to favored friends, acquaintances, and family of Spanish and later Mexican government officials. The Mexican-American War lasted from 1846 to 1848 and ended with Mexico ceding the Alta California lands to the United States, and the quick establishment of land ownership via court orders and surveys soon followed. The County of Los Angeles was established on February 18, 1850, and Ciudad de Los Angeles incorporated on April 4, 1850. Settlement of the Los Angeles region continued in the early American Period. Soon after incorporation, the City officials began to sell pueblo lands around the original plaza, hastening its development from remote outpost to city. Though the survey extended the City's grid as far south as 12th Street and as far west as Figueroa Street, in reality, the area outside of the city's core still functioned largely as pasture. Despite distinctive moves to become more urban, agriculture and cattle ranching retained its importance through the late 1860s and 1870s, and Los Angeles was one of the top dairy production centers in the country (Caughy and Caughy 1977; Dumke 1944; Fogelson 1993).

5.1.2 Historical Overview of Venice

The land that would become Venice was first developed at the turn of the 20th century when tobacco tycoon and real estate developer Abbot Kinney and business partner Francis G. Ryan purchased 1.5-miles of beachfront land south of Santa Monica in 1891. Consisting of 275-acres, the tract of land purchased by Kinney and Ryan included part of Rancho La Ballona, land located in the southern part of the City of Santa Monica, and a southern section of lands which were part of unincorporated Los Angeles County. The southern section primarily consisted of sand dunes and marshes that flooded during the winter. Kinney and Ryan focused first on developing the northern section of the tract, which became a resort community known as Ocean Park (HRG 2015; Gebhard and Winter 2003).

In 1898, Ryan died suddenly, resulting in Kinney acquiring three new business partners in 1902: Alexander Fraser, Henry Gage, and George Merritt Jones. Between 1902 and 1904, Kinney and his partners also subdivided the remaining portions of the tract into the following three tracts: Golden Boy Tract, Country Club Tract, and Coral Crest Tract (HRG 2015).

By 1904, Kinney decided to go his separate way from his partners as he set out to develop the southern portion of his original land holdings, which still consisted primarily of wetlands. As part of the

development of his land holdings, Kinney established the City of Ocean Park as an independent municipality to the south of Marine Street. This area was where Kinney eventually constructed his most successful development, Venice of America. Inspired by visits to Europe, Kinney felt that the coastal wetlands shared many features with Venice, Italy. For that reason, he chose to create a coastal resort community that recreated Venice, Italy's famous canal system. He hired Frank Dunham as the building superintendent and sought to implement many features of the "City Beautiful" movement popular across the United States at the time (HRG 2015; Los Angeles Herald 1905). In 1905, a Venice of America subdivision map was recorded and included areas for residential, commercial, and recreational development. Canals were established, creating a "canal district" with four islands of residential lots, connected via walkways and arched bridges, designed by Italian metal sculptor Felix Peano (HRG 2015).

By the 1920s, the commercial architectural styles in Venice shifted from Mediterranean Revival shifted to less ornate and vernacular forms of commercial buildings. There were also rail and streetcar lines, including the Venice Miniature Railroad, which was specifically designed to be able to cross over arched bridges through the canals. By 1911, Kinney attempted to separate Venice of America from Ocean Park so that it could become its own community. Despite the failure of this separation, the area known as Venice of America remained part of Ocean Park, but the entire community was officially renamed Venice in 1911 (HRG 2015; Stanton 1998).

From the 1920s through the 1950s, bigger shifts came to Venice. In 1925, Venice was officially annexed into the City of Los Angeles. To meet modern transportation infrastructure, the original canals were infilled in 1929 for automobile traffic. However, the later canals that were constructed as a part of the Venice Canal subdivision, were spared. Economic decline and affordable rental prices in the 1930s and 1940s resulted in an influx of immigrants and artists to the area. By the 1950s, development shifted to be focused almost entirely on the automobile. Lincoln Boulevard evolved as a main commercial and vehicular corridor. In addition, Venice became well known for its free-spirited atmosphere due to the growing population of counterculture artists. Their increased presence drove complaints from local business owners, who formed the Venice Planning Committee in 1961 in an effort to "clean up" the area. The "clean-up" efforts resulted in the demolition of almost 550 buildings between 1962 and 1965 (City of Los Angeles 2025; HRG 2015).

Development in Venice lagged throughout the 1960s and early 1970s. However, the opening of the Southern California Institute of Architecture (SCI-Arc) in neighboring Santa Monica in 1972 resulted in new creatives coming to the area for affordable housing. These new residents saw the vacant lots as an opportunity for growth. The area became somewhat of a laboratory for architects who designed and constructed many early Post-Modern style buildings. Architects who designed and built in Venice during this time included Frank Gehry, Steven Ehrlich, and Frederick Fisher. During this time, Venice was also covered in large scale murals, which remain an important piece of its cultural landscape in present day (HRG 2015; Gebhard and Winter 2003).

The counterculture of Venice continued to remain present throughout the turn of the 21st century. Once a community of outsiders, this culture has come to represent the modern identity of the

community. New residents have and continue to be drawn by the free-spirited lifestyle and architectural renaissance (HRG 2015).

5.1.3 Ocean Park Place Tract

The subject property is located within the boundaries of the Ocean Park Place Tract. Limited information about this tract, but it appears to be one of many smaller tracts that were developed east of Main Street in the early 20th century. The smaller tracts like Ocean Park Place Tract, were subdivisions from the original Kinney landholdings and were primarily utilized for residential and commercial development. Developers used the proximity to the City of Ocean Park as a selling point for properties in the new tracts. Other notable tracts in the vicinity of the subject property are Ocean Park Villa and Ocean Park Villa Tract No. 2 that were developed in 1903 near Ocean Park County Club (HRG 2015).

5.1.4 Commercial Development in Venice

The earliest commercial development in Venice was concentrated along Windward Avenue, stretching from the beach into residential areas to the east. Buildings along this commercial corridor were constructed in harmony with the "Venetian Renaissance" style, as directed by Kinney to keep with the cohesive resort aesthetic. Architects Norman Marsh and Clarence Russell were recruited to model designs after Italy's Piazza San Marco, which was known for its arcaded walkways along the streetside (HRG 2015).

As a coastal community, Venice also experienced early commercial development in the 1910s and 1920s along the boardwalk, known as Ocean Front Walk. This included several hotels, such as St. Mark's Hotel, King George Hotel, and the Biltmore by the Sea, all of which provided lodging for visitors and tourists. Othe establishments included tourist-oriented businesses. During times of economic downturn, such as in the 1940s, some buildings along Ocean Front Walk were converted to new uses as businesses shut down (HRG 2015).

By the mid-century, commercial development was heavily influenced by a shift in reliance on the automobile. Lincoln Boulevard, located slightly inland, was established as a main commercial and vehicular thoroughfare. It was developed to meet the needs of the automobile with wide lanes, highly visible signage, and parking lots off of the street. Lincoln Boulevard became the site of many neighborhood commercial establishments associated with the identity of the community, such as the Fox Theater, La Cabaña Mexican Restaurant, and Lincoln Hardware (HRG 2015).

Also in the mid-century, a mix of neighborhood commercial establishments appeared among the residential developments constructed along West Washington Boulevard (now Abbot Kinney Boulevard). This new commercial corridor consisted of beauty salons, markets, repair shops, artist studios, wholesale businesses, and thrift stores. As more decades passed, the area became almost exclusively commercial with little to no remaining residential uses. However, evidence of residential development remains as some original dwellings were converted to commercial use. As a result, this

portion of Venice consists of a variety of building types, with Craftsman style cottages from the 1910s and 1920s alongside brick commercial buildings from the 1920s onward (HRG 2015).

5.1.5 Architectural Style

Streamline Moderne (1935-1945)

The majority of the buildings that comprise the subject property were constructed in the Streamline Moderne style of architecture. Streamline Moderne became popular in Venice in the 1930s. Breaking away from heavily designed and ornate stylings seen in the Art Deco period that dominated Los Angeles in the 1910s and 1920s, Streamline Moderne offered clean lines and simplistic detailing that could be offered at more affordable construction costs during the Great Depression years. Its affordability, popularity, and ability to be stylistically scaled up or down, which also facilitated its use and popularity in Public Works Administration (PWA) and Works Progress Administration (WPA) projects. Drawing its inspirations from transportation and advances in industrialization, practitioners of the style used curvilinear elements in their designs and incorporated smoother wall surfaces than seen in the Art Deco style. The lack of excessive ornamentation and smooth wall surfaces, also helped to emphasize the curving and sweeping lines of the building. Streamline Moderne style was used in Venice for a variety of architectural forms including residential buildings, commercial buildings, and institutional buildings (ARG/HRG 2017; Sapphos Environmental 2014; City of Los Angeles 2021). The SurveyLA Citywide Historic Context Statement for Architecture and Engineering/L.A. Modernism, 1919-1980 identified the following character-defining/associative features of the Streamline Moderne style (City of Los Angeles 2021: 77):

- Retains most of the essential character-defining features of the style from the period of significance
- Horizontal orientation
- Rounded corners and curved surfaces, emulating a “windswept” appearance
- Flat or nearly flat roof
- Speedlines at wall surfaces, such as horizontal moldings and continuous sill courses
- Smooth stucco cladding
- Metal, often steel casement, windows
- Unadorned wall surfaces, with minimal ornament
- Windows “punched” into walls, with no surrounds

5.1.6 Property Type

Service Stations (1920-1970)

As the automobile industry boomed in the early 20th century, so too did the petroleum industry. Prior to World War I, American consumers purchased gasoline out of barrels and cans at grocery or convenience stores. As the popularity of automobiles rose, so did the need to purchase gasoline more easily. By the 1910s, early versions of drive-up service stations began to appear, but they were no more than a simple pump on the curbside. In the following years, advancements in technology with the creation of standardized gasoline pumps and desire for a removal from the street led to the creation of the service station. By 1935, more than 200,000 service stations were located across the United States. Service stations were one of the first commercial buildings that catered to the automobile by being set back from the street and accommodating vehicles without disrupting street traffic. They influenced the development of other property types that catered to the automobile by offering drive-in services (National Museum of American History 2023; Eschner 2017).

The popularity of service stations and the petroleum industry boom resulted in large powerhouse oil and gas companies beginning to take strongholds in the United States. As these companies continued to construct service stations, they were able to come up with designs, styles, and branding that were consistent across all their locations. This created a cohesive visual appeal that made it easy for customers to identify the most well-known gasoline brands. While there were several variations of service stations, the most common form that had taken shape by the 1920s contained a rectangular building, gas pumps, and a canopy covering the pumps. The rectangular building typically held restrooms and sometimes housed a repair shop or functioned as a car wash. This basic form would remain popular for decades. Prior to the corporate branding that dictated the design of service stations, early service stations were generally constructed in popular architectural styles of the time such as Period Revival styles (City of Los Angeles 2016; Randl 2008.; History Colorado 2023; Jackle 1994; Fryxell 2013).

As the popular architectural styles of the time began to change in the following decades, so too did the styles of service stations. In the 1930s, the popularity of Streamline Moderne and International Style stations increased. Many stations also began selling more automobile-related products out of their shops, creating the need for larger spaces and windows to showcase products. In the 1930s, large oil company Texaco hired Walter Dorwin Teague to create a prototype for their station design that became one of the most popular station types. It included a rectangular box for the store which featured display windows, restrooms, and service bays. The increased standardization led to some companies even selling prefabricated stations containing all these essential components (City of Los Angeles 2016; Randl 2008.; History Colorado 2023; Jackle 1994; Fryxell 2013).

The standardization of the service station property type continued until World War II, when the building of service stations rapidly declined due to the changing economics of the petroleum industry. Those that were still being constructed opted to add elements of flair to the standardized designs,

aiming to provide some type of individualization. This included adding features to the station's canopy, which was more affordable and noticeable from the street. By the mid-century, some stations began incorporating Googie style features represented by the dramatic expression of structural elements, such as elongation and distortion of roofs, extension of columns and beams creating spear-like objects and walls extending beyond the boundaries of the existing buildings. Additional features also included the mixing of materials, use of bright colors, asymmetric designs, and the expansive use of glass. While many stations embraced the new Googie style, others reverted back to older architectural styles, such as Spanish Colonial Revival and Streamline Moderne. Character defining features of the Gas/Service Station property type are as follows (Randl 2008.; History Colorado 2023; Jackle 1994; Fryxell 2013; City of Los Angeles 2016): Situated on a relatively flat paved lot

- Oriented towards the street for easy automobile access
- Layout and spatial relationships reflect automobile access
- Typical components include a rectangular or oblong building that may contain service bays, gas pumps, and canopy over the pumps
- May have large windows in the main building to display products
- May reflect corporate designs and branding associated with major oil companies
- Corporate signage and logos are generally present throughout the property
- The most popular architectural styles for services stations included Streamline Moderne, Googie, and Spanish Colonial Revival
- Later examples may also be prefabricated or feature prefabricated elements

5.2 Building History

5.2.1 Construction History

The following presents chronological detail of the subject property's construction history, as established through review of City building permits and other relevant data sources. Building permits (see associated Record IDs provided below) confirm that four buildings on the subject property were built in 1927 and 1931. Permit records were reviewed for all known addresses of the subject property.

- 1927: Building permits issued to build a tire and battery shop, wash rack, restroom, and a public garage (Permit no. 24325; Permit no. 24323; Permit no 24324; Permit no. 23341)

- 1931: Building permits issued to build a sign, service station awning, move the existing restroom building, and build a service station (Permit no. 5895; Permit no. 2856; Permit no. 4424; Permit no. 4790)

- 1967: Three building permits issued to comply with Venice Rehabilitation File No. X19259 (Permit no. W70198; Permit no. W70197; Permit no. W70196)
- 1982: Building permit issued for the addition of a 1-story Type V 16'x16' spray booth canopy to existing one story, type V 21'x15' office (Permit no. WL55770)
- 1988: Building permit for earthquake compliance (Permit no. LA99911)

5.2.2 Ownership/Occupant History

The following presents chronological detail of the subject property's ownership/occupant history, as established through review of publicly available census, voting, birth, death, and marriage information found on Ancestry.com, City Directories, and other relevant data sources. There are two addresses known to have been associated with the subject property: 165 Brooks Avenue (historic) and 825 Hampton Drive (current).

- 1927-1954: R.B. Van Blaricom filed permits for the construction and modification of a tire and battery shop, wash rack, restroom, public garage, and service station. Based on archival research R.B. Van Blaricom was the original owner of property and owned it until 1954.
- 1928-1938: City Directories and historical newspapers indicate that the Venice Super Station occupied the subject property from 1928-1938 (occupant).
- 1954-1970: City Directories and building permits indicate that R. B. Van Blaricom sold the subject property to Paul Holdren. During this time the property operated as Holdren's Auto Service.
- 1970: City Directories indicate that the property is occupied by Stewart Auto & Paint (occupant).
- 1975-1985: Lee's Body & Paint Shop (occupant) (AEI 2021)
- 1980-1985: Poor Man Body Shop (occupant) (AEI 2021)
- 1988-2006: Michael Chevalier is the owner of the property until his death in 2006.
- 1991: Design Advantage (occupant) (AEI 2021)
- 1991: Gwendolen Cates Photography (occupant) (AEI 2021)
- 1994: Johnson Todd Productions (occupant) (AEI 2021)
- 1994-1996: Rasbot Auto Service (occupant) (AEI 2021)
- 1999-circa 1921: Whole Soul Inc. and Spot Welders, Inc. (occupants) (AEI 2021)
- 2022-Present: SJF Venice LLC is listed as the current owner of the subject property.

The following provides an overview of the individuals who owned the subject property for the longest periods of time: R.B. Van Blaricom (1927-1954) and Michael Chevalier (1988-2006). No evidence was found to indicate that any of the occupants of the property were noteworthy or potentially significant.

R.B. Van Blaricom (1927-1954)

R.B. Van Blaricom was the first owner of the subject property. Prior to owning Venice Super Station from 1928 to 1938, Van Blaricom also owned a Standard Oil service station in Long Beach. During his tenure as owner/operator, Venice Super Station was one of the "largest and best equipped service station in Southern California" (Evening Vanguard 1937: 9). Van Blaricom was also a member of the Venice branch of the Los Angeles Chamber of Commerce. He was the Sub-Committee Chairman of the Planning Committee. While Van Blaricom owned the subject property, he resided in nearby Santa Monica (Evening Vanguard 1926, 1929, 1930, 1937; Ancestry 2025).

Michael George Chevalier (1988-2006)

Michael George Chevalier occupied 165 Brooks Avenue from 1988 till his death in 2006. Chevalier was most known for his working as a camera operator in the film industry. Some of the major productions he worked on were the Rocky films, Heartbreak Ridge, and Superman. He also did camera work for NFL Films, National Geographic, The Olympics, and ABC's Wide World of Sports. He was a founding member of the Society of Operating Cameramen in 1979. His obituary also notes that he was one of the best freelance cinematographers who specialized in many facets such as commercials, movie titles, advertising, and photography. Archival research indicated Chevalier was an owner of the property and did not perform any cinema related functions at the subject property during his ownership (Argonaut News 2006; Legacy.com 2006).

6 Regulatory Framework

6.1 Federal

6.1.1 National Register of Historic Places

The NRHP is the United States' official list of districts, sites, buildings, structures, and objects worthy of preservation. Overseen by the National Park Service, under the U.S. Department of the Interior, the NRHP was authorized under the National Historic Preservation Act, as amended. Its listings encompass all National Historic Landmarks and historic areas administered by the National Park Service (NPS).

NRHP guidelines for the evaluation of historic significance were developed to be flexible and to recognize the accomplishments of all who have made significant contributions to the nation's history and heritage. Its criteria are designed to guide federal agencies, state and local governments, and others in evaluating potential entries in the NRHP. For a property to be listed in or determined eligible for listing, it must be demonstrated to possess integrity and to meet at least one of the following criteria:

The quality of significance in American history, architecture, archaeology, engineering, and culture is present in districts, sites, buildings, structures, and objects that possess integrity of location, design, setting, materials, workmanship, feeling, and association, and:

A. That are associated with events that have made a significant contribution to the broad patterns of our history; or

B. That are associated with the lives of persons significant in our past; or

C. That embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or

D. That have yielded, or may be likely to yield, information important in prehistory or history.

Integrity is defined in NRHP guidance, How to Apply the National Register Criteria for Evaluation, as "the ability of a property to convey its significance. To be listed in the NRHP, a property must not only be shown to be significant under the NRHP criteria, but it also must have integrity" (NPS 1990). NRHP guidance further asserts that properties be completed at least 50 years ago to be considered for eligibility. Properties completed fewer than 50 years before evaluation must be proven to be "exceptionally important" (criteria consideration G) to be considered for listing.

6.2 State

6.2.1 California Register of Historical Resources

In California, the term "historical resource" includes but is not limited to "any object, building, structure, site, area, place, record, or manuscript which is historically or archaeologically significant, or is significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California" (California PRC Section 5020.1(j)). In 1992, the California legislature established the California Register of Historical Resources (CRHR) "to be used by state and local agencies, private groups, and citizens to identify the state's historical resources and to indicate what properties are to be protected, to the extent prudent and feasible, from substantial adverse change" (California PRC Section 5024.1(a)). The criteria for listing resources on the CRHR were expressly developed to be in accordance with previously established criteria developed for listing in the NRHP, enumerated below. According to California PRC Section 5024.1(c) (1–4), a resource is considered historically significant if it (i) retains "substantial integrity," and (ii) meets at least one of the following criteria:

(1) Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage.

(2) Is associated with the lives of persons important in our past.

(3) Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values.

(4) Has yielded, or may be likely to yield, information important in prehistory or history.

In order to understand the historic importance of a resource, sufficient time must have passed to obtain a scholarly perspective on the events or individuals associated with the resource. A resource less than 50 years old may be considered for listing in the CRHR if it can be demonstrated that sufficient time has passed to understand its historical importance (see 14 CCR 4852(d)(2)).

The CRHR protects cultural resources by requiring evaluations of the significance of prehistoric and historic resources. The criteria for the CRHR are nearly identical to those for the NRHP, and properties listed or formally designated as eligible for listing in the NRHP are automatically listed in the CRHR, as are the state landmarks and points of interest. The CRHR also includes properties designated under local ordinances or identified through local historical resource surveys.

6.2.2 California Environmental Quality Act

CEQA requires a lead agency to determine whether a project may have a significant effect on historical resources (Public Resources Code [PRC], Section 21084.1). A historical resource is a resource listed in, or determined to be eligible for listing, in the CRHR, a resource included in a local register of historical

resources or any object, building, structure, site, area, place, record, or manuscript that a lead agency determines to be historically significant (State CEQA Guidelines, Section 15064.5[a][1-3]).

Under CEQA, a project may have a significant effect on the environment if it may cause "a substantial adverse change in the significance of an historical resource" (California Public Resources Code Section 21084.1; CEQA Guidelines Section 15064.5(b).) If a site is either listed or eligible for listing in the CRHR, or if it is included in a local register of historic resources or identified as significant in a historical resources survey (meeting the requirements of California Public Resources Code Section 5024.1(q)), it is a "historical resource" and is presumed to be historically or culturally significant for purposes of CEQA (California Public Resources Code Section 21084.1; CEQA Guidelines Section 15064.5(a)). The lead agency is not precluded from determining that a resource is a historical resource even if it does not fall within this presumption (California Public Resources Code Section 21084.1; CEQA Guidelines Section 15064.5(a)).

A "substantial adverse change in the significance of an historical resource" reflecting a significant effect under CEQA means "physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the significance of an historical resource would be materially impaired" (CEQA Guidelines Section 15064.5(b)(1); California Public Resources Code Section 5020.1(q)). In turn, CEQA Guidelines section 15064.5(b)(2) states the significance of an historical resource is materially impaired when a project:

1. Demolishes or materially alters in an adverse manner those physical characteristics of an historical resource that convey its historical significance and that justify its inclusion in, or eligibility for, inclusion in the California Register of Historical Resources; or

2. Demolishes or materially alters in an adverse manner those physical characteristics that account for its inclusion in a local register of historical resources pursuant to section 5020.1(k) of the Public Resources Code or its identification in an historical resources survey meeting the requirements of section 5024.1(g) of the Public Resources Code, unless the public agency reviewing the effects of the project establishes by a preponderance of evidence that the resource is not historically or culturally significant; or

3. Demolishes or materially alters in an adverse manner those physical characteristics of a historical resource that convey its historical significance and that justify its eligibility for inclusion in the California Register of Historical Resources as determined by a lead agency for purposes of CEQA.

Pursuant to these sections, the CEQA inquiry begins with evaluating whether a project site contains any "historical resources," then evaluates whether that project will cause a substantial adverse change in the significance of a historical resource such that the resource's historical significance is materially impaired.

6.3 Local

The proposed project is located within Los Angeles, California, a city within Los Angeles County. Local historic preservation regulatory and policy information pertaining to the City of Ventura is summarized below.

6.3.1 City of Los Angeles Municipal Code

Los Angeles Historic-Cultural Monuments (Section 22.171.7 of Cultural Heritage Ordinance)

Local landmarks in the City of Los Angeles are known as Historic-Cultural Monuments (HCMs) and are under the aegis of the Planning Department, Office of Historic Resources. They are defined in the Cultural Heritage Ordinance as follows (Los Angeles Municipal Code Section 22.171.7, added by Ordinance No. 178,402, effective April 2, 2007):

HCMs include any site (including significant trees or other plant life located on the site), building or structure of particular historic or cultural significance to the City of Los Angeles, including historic structures or sites in which the broad cultural, economic or social history of the nation, State or community is reflected or exemplified; or which is identified with historic personages or with important events in the main currents of national, State or local history; or which embodies the distinguishing characteristics of an architectural type specimen, inherently valuable for a study of a period, style or method of construction; or a notable work of a master builder, designer, or architect whose individual genius influenced his or her age.

For the purposes of SurveyLA, this definition has been broken down into the following four HCM designation criteria that closely parallel the existing NRHP and CRHR criteria:

1. Is identified with important events in the main currents of national, State or local history, or exemplifies significant contributions to the broad cultural, political, economic or social history of the nation, state, city, or community; or

2. Is associated with the lives of Historic Personages important to national, state, city, or local history; or

3. Embodies the distinctive characteristics of a style, type, period, or method of construction; or represents a notable work of a master designer, builder or architect whose genius influenced his or her age; or possesses high artistic values; or

4. Has yielded, or has the potential to yield, information important to the pre-history or history of the nation, state, city or community.

Historic Preservation Overlay Zones (Section 12.20.3)

As described by the City of Los Angeles Office of Historic Resources, the Historic Preservation Overlay Zone (HPOZ) Ordinance was adopted in 1979 and amended in 2004 to identify and protect neighborhoods with distinct architectural and cultural resources. HPOZs, commonly known as historic districts, provide for review of proposed exterior alterations and additions to historic properties within designated districts.

Regarding HPOZ eligibility, City of Los Angeles Ordinance Number 175891 states (Los Angeles Municipal Code Section 12.20.3):

Features designated as contributing shall meet one or more of the following criteria:

1. adds to the Historic architectural qualities or Historic associations for which a property is significant because it was present during the period of significance, and possesses Historic integrity reflecting its character at that time; or

2. owing to its unique location or singular physical characteristics, represents an established feature of the neighborhood, community or city; or

3. retaining the building, structure, Landscaping, or Natural Feature, would contribute to the preservation and protection of a Historic place or area of Historic interest in the City.

Permits for Historical and Cultural Buildings (Section 91.106.4.5)

Regarding effects on federal and locally significant properties, Los Angeles Municipal Code states the following:

The department shall not issue a permit to demolish, alter or remove a building or structure of historical, archaeological or architectural consequence if such building or structure has been officially designated, or has been determined by state or federal action to be eligible for designation, on the National Register of Historic Places, or has been included on the City of Los Angeles list of historic cultural monuments, without the department having first determined whether the demolition, alteration or removal may result in the loss of or serious damage to a significant historical or cultural asset. If the department determines that such loss or damage may occur, the applicant shall file an application and pay all fees for the California Environmental Quality Act Initial Study and Check List, as specified in Section 19.05 of the Los Angeles Municipal Code. If the Initial Study and Check List identifies the historical or cultural asset as significant, the permit shall not be issued without the department first finding that specific economic, social or other considerations make infeasible the preservation of the building or structure.

6.3.2 City of Los Angeles Housing Element EIR MMP

The City's Housing Element Environmental Impact Report (EIR) Mitigation Monitoring Program (MMP, City of Los Angeles 2021) contains a suite of mitigation measures (MMs) for historic built environment resources. Applicable MMs are presented below.

4.4-1(a) Identification of Built-Environment Historical Resources

For discretionary projects, the following procedures shall be implemented to identify historical resources, as defined by Public Resources Code Section 21084.1, located on or near a development site and implement appropriate techniques to avoid or reduce significant impacts to historical resources.

The City of Los Angeles Historic Resources Survey (SurveyLA) results shall be consulted to determine whether the project area, or adjacent areas, have been subject to previous cultural resources studies and whether historical resources were identified.

If a development involves the alteration or demolition of a property 45 years of age or older that was not evaluated in SurveyLA, including sites with a QQQ code, a historical resources evaluation shall be prepared for the development. The evaluation shall be prepared according to the following standards:

- The evaluation shall be prepared by a qualified architectural historian or historian who meets the Secretary of the Interior's Professional Qualifications Standards (PQS) in architectural history or history.
- The qualified architectural historian or historian shall conduct an intensive-level evaluation in accordance with the guidelines and best practices promulgated by the State Office of Historic Preservation (OHP) and the City of Los Angeles Office of Historic Resources (OHR) to identify any potential historical resources within the Area of Potential Effects.

Those buildings and structures required to be assessed in a historical resource evaluation not located in an HPOZ shall be evaluated within their historic context and documented in a report meeting the OHP and OHR guidelines. All evaluated properties shall be documented on Department of Parks and Recreation Series 523 Forms. The report shall be submitted to the OHR for review and concurrence. If, as a result of the cultural resources records search or the subsequent historical resources evaluation, it is determined that the proposed development would result in a significant adverse effect to one or more historical resources, appropriate techniques consistent with the Secretary of Interior Standards to avoid or reduce significant impacts to the degree feasible shall be implemented. Measures to reduce impacts shall generally be overseen by a qualified architectural historian or historic architect meeting the PQS, unless unnecessary under the circumstance (e.g., preservation in place). In conjunction with any development application that may affect the historical resource, a mitigation plan identifying measures for the treatment or protection of character-defining features shall be provided to the City for review. Measures may include but not be limited to mitigation measures 4.4-1(b) to 4.4-1(j) below.

7 Significance Evaluation

The following sections provide an overview of eligibility considerations for the subject property at 825 Hampton Drive based on SurveyLA guidance; provides a detailed description of the subject property and its character-defining features; and provides an evaluation of the subject property in consideration of NRHP, CRHR, and City of Los Angeles HCM designation criteria and integrity requirements. Images of the subject property referenced below are provided in Section 10, Attachment A, and a State of California Department of Parks and Recreation Series 523 form set (DPR forms) for the property is provided in Section 10, Attachment D.

7.1 Eligibility Considerations

Existing SurveyLA historic context statements, themes, and eligibility standards were used as a framework to evaluate the subject property. The history of the subject property as an automobile services station is best evaluated under the eligibility standards provided in the SurveyLA: Los Angeles Citywide Historic Context Statement: Commercial Development, 1850-1980, Theme: Commercial Development of the Automobile, 1970-1970. Within this document the most relevant theme for evaluation of the subject property is The Car and Car Services, 1920-1970. The following eligibility standards, character-defining/associative features, and integrity considerations are reflective of those included in the 2016 document (City of Los Angeles 2016: 33-34).

Eligibility Standards:

- Was designed and historically used to provide gasoline, and sometimes additional services, to automobiles
- Demonstrates convenient automobile access from the street
- Is an excellent example of the property type
- Contains design and site layout features that reflect the influence of, and accommodation to, the automobile
- Was constructed during the period of significance

Character-Defining/Associative Features:

- Retains most of the essential character defining features of the type
- May be of a style or mixture of styles typical of the period of construction such as Spanish Colonial Revival, Streamline Moderne and Googie styles
- May also be significant within a theme under the Architecture and Engineering context
- May reflect corporate design associated with particular oil companies and/or architects/designers (e.g. Texaco and Walter Dorwin Teague)

Integrity Considerations:

- Should retain integrity of Design, Location, Feeling, Association and Materials
- Should retain as much design integrity as possible, including overall massing, significant features (e.g. canopy), and identifying details such as trim and signage
- Some original materials may have been altered, removed, or replaced, particularly for early examples which are rare
- Should retain as much of the original relationship to the street and to adjacent buildings as possible so as to establish the importance of accommodating the building to the spatial needs of the automobile
- If use has changed, adaptation to new use should allow for maintenance of as much of the original design and site layout as possible
- Site layout should retain original relationship to the street

The architecture of the subject property is best evaluated under the eligibility standards provided in the SurveyLA Los Angeles Citywide Historic Context Statement, Context: Architecture and Engineering, Sub-Context: L.A. Modernism, 1919-1980. Within this document the most relevant theme for evaluation of the subject property is Theme: Related Responses to Modernism, 1924-1970 and its subtheme Streamline Moderne, 1935-1945. The following eligibility standards, character-defining/associative features, and integrity considerations are reflective of those included in the 2021 document (City of Los Angeles 2021: 76-78):

Eligibility Standards:

- Was constructed during the period of significance
- Exhibits quality of design through distinctive features
- Is an excellent example of the style

Character-Defining/Associative Features:

- Retains most of the essential character-defining features of the style from the period of significance
- Horizontal orientation
- Rounded corners and curved surfaces, emulating a “windswept” appearance
- Flat or nearly flat roof
- Speedlines at wall surfaces, such as horizontal moldings and continuous sill courses
- Smooth stucco cladding
- Metal, often steel casement, windows

- Unadorned wall surfaces, with minimal ornament
- Windows "punched" into walls, with no surrounds

Integrity Considerations:

- Should retain integrity of Location, Design, Materials, Workmanship, and Feeling from the period of significance
- Retains sufficient integrity to convey significance
- Original setting may have changed (surrounding buildings and land uses)
- Original use may have changed
- Replacement of some windows and doors may be acceptable if the openings have not been resized and original fenestration patterns have not been disrupted
- For residential properties, the addition of security features such as screen doors and bars at windows may be acceptable
- For residential properties, replacement of original garage doors may be acceptable

7.2 Property Description

The subject property contains four historic-age buildings that were constructed between 1927 and 1931. Three of the historic-age buildings were designed in the Streamline Moderne style and one was designed as a simple brick commercial building. The site also contains three more recently constructed buildings that were installed on the site in the early 1990s. Two of the 1990s buildings are repurposed shipping containers and the third is a simple wood frame building with corrugated metal siding. Locations for all buildings are provided in Figure 2.

7.2.1 Gas Station (1931)

This altered Streamline Moderne building has a rectangular footprint with two rounded projections located on the north and south elevations. The roof is flat with a curved ledge at the roofline and a horizontal band between the roofline and the top of the windows. The building is clad with metal panels that have been riveted on and are not original to the building. Windows consist of multi-light casement windows with pebbled wired glass. A set of metal double doors are located on the north elevation. Additional single-entry doors are located on the east and south elevations. Observed alterations to the building include the addition of metal double doors at north elevation and the installation of exterior metal panels (dates unknown) (Images 1-3).

7.2.2 Garage (1931)

This altered Streamline Moderne building has a rectangular footprint and is clad with metal sheets. Although the roof is flat, it has a slight overhang over the primary north facing elevation. The building

is clad with metal panels that have been riveted on and are not original to the building. Two, double width automobile garage openings are located on the primary elevation and feature metal roll up doors that roll up into an exterior metal cornice box. A metal sash, multi-light casement window is located on the west elevation. The windows are made of pebbled wire glass. A single metal door is located on the east elevation. Observed alterations to the building include the installation of exterior metal panels and the installation of the current garage doors and roll up mechanism (dates unknown) (Images 4-5).

7.2.3 Public Garage Building (1927)

The brick commercial building has a generally rectangular footprint with an angled south elevation. It has a brick structural system and features a flat roof. The exterior is clad in textured stucco. Three wood sash windows are located at the southern end of the primary east elevation. The windows feature a thick mesh screen and are secured with metal security screens. The primary entrance into the building is accessed via a single metal door and a set of contemporary wood framed French doors. A fabric awning is attached at the northern end of the primary elevation. A fence made of corrugated metal is attached perpendicularly to the northern end of the primary elevation and connects to the western wall of the Office Building to create a partially enclosed patio. Observed alterations include the removal of original doors, addition of mesh screens and metal security screens, changes in fenestration, and the addition of fabric awning at primary elevation (dates unknown) (Images 6-8).

7.2.4 Office Building (1927)

This altered Streamline Moderne building has a generally rectangular floor plan and flat roof with a curved ledge at the roofline and a horizontal band between the roofline and the top of the windows. The building is clad with metal panels that have been riveted on and are not original to the building. The primary south facing elevation is asymmetrical and the primary entrance is offset to the east. The primary entry point features a set replacement metal double doors with pebbled wired glass. A secondary entrance is located to the west and features a single metal door with pebbled wired glass. Both doors are topped with a transom window. Windows consist of metal framed, multi-light, fixed and hopper windows and are all covered with fabric awnings. Observed alterations to the building include the addition of metal entry doors, changes in fenestration, and the installation of exterior metal panels (dates unknown) (Images 9-12).

7.2.5 Other Buildings and Site Features

The site is surrounded by a stone wall that was installed after 1985 (based on photographs provided by the client that show a chain link fence in place). The wall is completed by a modern metal gate that provides access to the property from Brooks Avenue. The site also contains three modern buildings that were installed on the site in the early 1990s. Two of the buildings are repurposed shipping containers, and the remaining building is a one-story, wood frame building with corrugated metal siding (Images 13-18).

7.3 Application of Designation Criteria

7.3.1 NRHP/CRHR/City HCM Designation Criteria

The following provides an evaluation of the subject property in consideration of NRHP, CRHR, and City of HCM designation criteria. Given the similarities in the criteria of these programs, all three have been addressed together to avoid duplicative text.

NRHP Criterion A. That are associated with events that have made a significant contribution to the broad patterns of our history.

CRHR Criterion 1. Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage.

City Criterion 1. Is identified with important events in the main currents of national, State or local history, or exemplifies significant contributions to the broad cultural, political, economic or social history of the nation, state, city, or community.

The subject property was constructed between 1927 and 1931 as an automobile service center and repair shop. Starting as early as the 1910s, automobile service stations began to appear in every city and by 1935 there were more than 200,000 service stations in the United States. Venice followed this automobile trend and began establishing services stations starting in the first half of the 20th century. The subject property was constructed in 1927 and expanded in 1931 to function as a service station with fuel and repair services for automobiles. While the subject property is reflective of the rise in automobile culture and dependency in the United States in the first half of the 20th century, no evidence was found to suggest that the subject property was the first service station in the area, a rare example of a service station, or had any other distinguishable aspects of its design or history that allow it to rise to the level of significance required for designation under federal, state, or local criteria. Therefore, the subject property appears not eligible under NRHP Criterion A, CRHR Criterion 1, or City Criterion 1.

NRHP Criterion B. That are associated with the lives of persons significant in our past.

CRHR Criterion 2. Is associated with the lives of persons important in our past.

City Criterion 2. Is associated with the lives of Historic Personages important to national, state, city, or local history.

Two long-term owners/occupants are associated with the subject property: R.B. Van Blaricom and Michael George Chevalier. R.B. Van Blaricom owned and operated the service station from 1927 to 1954. As the owner/operator of the Venice Super Station, Blaricom operated one of the "largest and best equipped service station in Southern California" (Evening Vanguard 1937: 9). Following Van Blaircom's ownership, Michael George Chevalier was the next longest owner of the property from

1988-2006. While Chevalier owned the property, there was no evidence found to suggest that he occupied or used the property for any business or personal purposes. Chevalier was a well-known cinematographer that worked on films like Superman and Rocky. Background research failed to indicate anything related to Van Blaricom and Chevalier and their connection to the subject property that would allow the property to rise to the level of significance required under these criteria. Therefore, the subject property appears not eligible under NRHP Criterion B, CRHR Criterion 2, or City Criterion 2.

NRHP Criterion C. That embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction.

CRHR Criterion 3. Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values.

City Criterion 3. Embodies the distinctive characteristics of a style, type, period, or method of construction; or represents a notable work of a master designer, builder or architect whose genius influenced his or her age; or possesses high artistic values.

The subject property was constructed between 1927 and 1931. Three of the four original buildings on the property were constructed in the Streamline Moderne style of architecture and the remaining building was constructed as simple commercial brick building. The subject property's buildings retain some of the most basic elements of the Streamline Moderne style such as rounded corners, horizontal orientation, metal casement windows, and unadorned wall surfaces with minimal ornamentation. The buildings have been significantly altered since their original construction. The most notable alterations being the installation of metal siding to the buildings and the changes in the original fenestration. In addition to these alterations, the subject property buildings were constructed as modest versions of the Streamline Moderne style, thereby rendering them poor examples of the style.

From the standpoint of the service station property type, the subject property appears to have originally had many of the character defining features of the property type. For instance, the building was constructed within the period of significance for the property type (1920-1970), oriented for automobile access from the street, and is reflective of the Streamline Moderne style of architecture. While all of these elements appear to be present historically based on aerial imagery, over the years the property has transitioned from its original use and has been altered significantly for new uses. For example, no fuel-related infrastructure remains on the site (i.e., fuel pumps/tanks, canopy structures), Additionally, any evidence of original circulation patterns was removed, and the property is now surrounded with a stone wall that limits access from the street. There were also multiple buildings added to the subject property in the early 1990s that further compromised the subject property's

ability to read as an automobile related property. As a result of all of these changes, the subject property is not a good representation of the service station property type.

Based on a review of building permits, there is no known architect associated with the property. While one of the permits does list Pacific Steel Building Company as the builder, they were prevalent builders of automobile related buildings and likely constructed features that are no longer present. Therefore, the subject property does not serve as a good representation of their work or even recognizable to their work seen throughout Southern California.

A historic district was not identified within the vicinity of the subject property in the SurveyLA Historic Resources Survey Report for the Venice CPA in 2015 and the subject property was not identified as a contributor to any identified historic districts. The properties that surround the subject property are in close proximity and do not have architectural cohesion because of alterations and recent construction in the area. Therefore, the subject property does not have the potential to contribute to an historic district or potential HPOZ. While the subject property is recognizable as a commercial property and there are multiple historic-age commercial properties within the vicinity, there is no architectural cohesion as a result of infill development that has taken place in recent years.

For all of these reasons, the subject property appears not eligible under NRHP Criterion C, CRHR Criterion 3, or City Criterion 3.

NRHP Criterion D. That have yielded, or may be likely to yield, information important in prehistory or history.

CRHR Criterion 4. Has yielded, or may be likely to yield, information important in prehistory or history.

City Criterion 4. Has yielded, or has the potential to yield, information important to the pre-history or history of the nation, state, city or community.

The subject property is not significant as a source, or likely source, of important historical information nor does it appear likely to yield important information about historic construction methods, materials, or technologies. Therefore, the property appears not eligible under NRHP Criterion D, CRHR Criterion 4, or City Criterion 4.

7.4 Integrity Discussion

Integrity is the authenticity of a historical resource's physical identity evidenced by the survival of characteristics that existed during the resource's period of significance. In addition to meeting one or more of the above criteria, an eligible resource must retain integrity, which is expressed in seven aspects: location, setting, design, workmanship, materials, feeling, and association. All properties change over the course of time. Consequently, it is not necessary for a property to retain all its historic physical features or characteristics. The property must retain, however, the essential physical features

that enable it to convey its historic identity. The essential physical features are those features that define both why a property is significant and when it was significant. Integrity must also be judged with reference to the specific criteria under which a resource is proposed for eligibility.

Location: The subject property no longer retains integrity of location. While the subject property remains on the same parcel as it was originally located, significant changes to the property such as restricting, the access from the street has compromised its integrity of location.

Design: The subject property does not retain integrity of design. The historic-age buildings on the subject property have all been significantly altered to the point that the original design elements are no longer present.

Setting: The subject property has does not retain integrity of setting. The property is located on its original lot where the surrounding area has slightly changed, however, the property no longer features easy access to the street, which was critical to its function as a service station. Further, additional buildings were constructed on the property in the 1990s for conversion to its current use as office space.

Materials: The subject property does not retain integrity of materials. While there appear to be original windows on some of the historic-age buildings, the original cladding has been covered with metal sheets and original doors have been replaced throughout.

Workmanship: The subject property does not retain integrity of workmanship. Although some of the most basic characteristics of the Streamline Moderne style and the service station property type are still present, the alterations made to the subject property over time have resulted in the loss of original workmanship.

Feeling: The subject property does not retain integrity of feeling. The property was constructed as an early 20th century service station and has been significantly modified over time to the point that it is practically unrecognizable as an automobile-related property.

Association: The subject does not have integrity of association, as no historical associations were identified as a result of this study.

7.5 Summary of Evaluation Findings

As a result of the property significance evaluation, the subject property at 825 Hampton Drive appears not eligible for designation in the NRHP, CRHR, or as a City HCM. Further, the property appears not eligible as a contributor to a historic district or HPOZ, has no important associations with events or people, and is not a likely source of important information. The subject property also does not retain integrity of location, design, materials, workmanship, feeling, setting, or association.

8 Findings

The subject property at 825 Hampton Drive was recorded and evaluated for historical significance by a qualified architectural historian in consideration of NRHP, CRHR, and City of Los Angeles HCM designation criteria and integrity requirements. As a result of the property significance evaluation, the subject property appears not eligible for designation in the NRHP, CRHR, or as a City HCM due to lack of architectural significance or historic associations. The property appears not eligible as a contributor to a historic district, has no important associations with events or people, and is not a likely source of important information. Further, the property does not retain integrity of location, design, materials, workmanship, feeling, setting, or association. As such, the subject property is not a historical resource under CEQA Guidelines §15064.5.

One previously identified historical resource is located directly across the street from the project site, the Eames Office at 901 South Abbot Kinney Boulevard. There is no indication that the proposed development has the potential to impact any of the important character-defining features of the Eames Office building associated with its eligibility under NRHP/CRHR/City of Los Angeles HCM Criteria A/1/1 for its historical associations with Charles and Ray Eames. Further, the setting of the Eames Office has already been significantly altered from its period of significance such that the proposed new construction would not impact an intact historic setting or any important viewsheds. As such, no management recommendations are provided for this adjacent property.

In conclusion, with respect to built environment resources, the proposed project will result in a less than significant impact to historical resources under CEQA Guidelines § 15064.5 and the City of Los Angeles Cultural Heritage Ordinance. No mitigation measures have been identified.

Application for the Erection of Buildings

CLASS "A"—"B"—"C"

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

DECLARATIONS AND CERTIFICATIONS

LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date _____ Lic. Class _____ Lic. Number _____ Contractor _____ (Signature)

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☒ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code. The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

☐ I am exempt under Sec. _____, B. & P. C. for this reason _____

Date 12/7/82 Owner's Signature _____

WORKERS' COMPENSATION DECLARATION

18. I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.).

Policy No. _____ Company _____

☐ Certified copy is hereby furnished.

☐ Certified copy is filed with the Los Angeles City Dept. of Bldg. & Safety.

Date _____ Applicant _____

Applicant's Mailing Address _____

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

19. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

Date 12/7/82 Applicant _____

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

20. I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____ Lender's Address _____

21. I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

I realize that this permit is an application for inspection, that it does not approve or authorize the work specified hereon, that it does not authorize or permit any violation or failure to comply with any applicable law, that neither the city of Los Angeles nor any board, department, officer or employee thereof make any warranty or shall be responsible for the performance or results of any work described hereon or the condition of the property or soil upon which such work is performed. (See Sec. 91.0202 LAMC)

Historic Context

Historical Overview of Early Los Angeles

European settlement in the Los Angeles area began in the 18th century. In 1781, a group of eleven Mexican families traveled from Mission San Gabriel Arcángel to establish a new pueblo called El Pueblo de la Reyna de Los Angeles (The Pueblo of the Queen of the Angels). This settlement consisted of a small group of adobe brick houses and was called the Ciudad de Los Angeles (City of Angels). Outside of the pueblo were various ranchos, where Mexican land grants were awarded to favored friends, acquaintances, and family of Spanish and later Mexican government officials. The Mexican-American War lasted from 1846 to 1848 and ended with Mexico ceding the Alta California lands to the United States, and the quick establishment of land ownership via court orders and surveys soon followed. The County of Los Angeles was established on February 18, 1850, and Ciudad de Los Angeles incorporated on April 4, 1850. (see Continuation Sheet).

  4. Office Building (1927)
- Buildings from 1990s

SOUTH ENVIRONMENTAL

Exhibit 1. Project Site Detail

Gas Station (1931)

This altered Streamline Moderne building has a rectangular footprint with two rounded projections located on the north and south elevations. The roof is flat with a curved ledge at the roofline and a horizontal band between the roofline and the top of the windows. The building is clad with metal panels that have been riveted on and are not original to the building. Windows consist of multi-light casement windows with pebbled wired glass. A set of metal double doors are located on the north elevation. Additional single-entry doors are located on the east and south elevations. Observed alterations to the building include the addition of metal double doors at north elevation and the installation of exterior metal panels (dates unknown) (Images 1-3).

Garage (1931)

This altered Streamline Moderne building has a rectangular footprint and is clad with metal sheets. Although the roof is flat, it has a slight overhang over the primary north facing elevation. The building is clad with metal panels that have been riveted on and are not original to the building. Two, double width automobile garage openings are located on the primary elevation and feature metal roll up doors that roll up into an exterior metal cornice box. A metal sash, multi-light casement window is located on the west elevation. The windows are made of pebbled wire glass. A single metal door is located on the east elevation. Observed alterations to the building include the installation of exterior metal panels and the installation of the current garage doors and roll up mechanism (dates unknown) (Images 4-5).

Public Garage Building (1927)

The brick commercial building has a generally rectangular footprint with an angled south elevation. It has a brick structural system and features a flat roof. The exterior is clad in textured stucco. Three wood sash windows are located at the southern end of the primary east elevation. The windows feature a thick mesh screen and are secured with metal security screens. The primary entrance into the building is accessed via a single metal door and a set of contemporary wood framed French doors. A fabric awning is attached at the northern end of the primary elevation. A fence made of corrugated metal is attached perpendicularly to the northern end of the primary elevation and connects to the western wall of the Office Building to create a partially enclosed patio. Observed alterations include the removal of original doors, addition of mesh screens and metal security screens, changes in fenestration, and the addition of fabric awning at primary elevation (dates unknown) (Images 6-8).

Office Building (1927)

This altered Streamline Moderne building has a generally rectangular floor plan and flat roof with a curved ledge at the roofline and a horizontal band between the roofline and the top of the windows. The building is clad with metal panels that have been riveted on and are not original to the building. The primary south facing elevation is asymmetrical and the primary entrance is offset to the east. The primary entry point features a set replacement metal double doors with pebbled wired glass. A secondary entrance is located to the west and features a single metal door with pebbled wired glass. Both doors are topped with a transom window. Windows consist of metal framed, multi-light, fixed and hopper windows and are all covered with fabric awnings. Observed alterations to the building include the addition of metal entry doors, changes in fenestration, and the installation of exterior metal panels (dates unknown) (Images 9-12).

Other Buildings and Site Features

The site is surrounded by a stone wall that was installed after 1985 (based on photographs provided by the client that show a chain link fence in place). The wall is completed by a modern metal gate that provides access to the property from Brooks Avenue. The site also contains three modern buildings that were installed on the site in the early 1990s. Two of the buildings are repurposed shipping containers, and the remaining building is a one-story, wood frame building with corrugated metal siding (Images 13-18).

***B10. Significance (Continued):**

Settlement of the Los Angeles region continued in the early American Period. Soon after incorporation, the City officials began to sell pueblo lands around the original plaza, hastening its development from remote outpost to city. Though the survey extended the City's grid as far south as 12th Street and as far west as Figueroa Street, in reality, the area outside of the city's core still functioned largely as pasture. Despite

distinctive moves to become more urban, agriculture and cattle ranching retained its importance through the late 1860s and 1870s, and Los Angeles was one of the top dairy production centers in the country (Caughy and Caughy 1977; Dumke 1944; Fogelson 1993).

Historical Overview of Venice

The land that would become Venice was first developed at the turn of the 20th century when tobacco tycoon and real estate developer Abbot Kinney and business partner Francis G. Ryan purchased 1.5-miles of beachfront land south of Santa Monica in 1891. Consisting of 275-acres, the tract of land purchased by Kinney and Ryan included part of Rancho La Ballona, land located in the southern part of the City of Santa Monica, and a southern section of lands which were part of unincorporated Los Angeles County. The southern section primarily consisted of sand dunes and marshes that flooded during the winter. Kinney and Ryan focused first on developing the northern section of the tract, which became a resort community known as Ocean Park (HRG 2015; Gebhard and Winter 2003).

In 1898, Ryan died suddenly, resulting in Kinney acquiring three new business partners in 1902: Alexander Fraser, Henry Gage, and George Merritt Jones. Between 1902 and 1904, Kinney and his partners also subdivided the remaining portions of the tract into the following three tracts: Golden Boy Tract, Country Club Tract, and Coral Crest Tract (HRG 2015).

By 1904, Kinney decided to go his separate way from his partners as he set out to develop the southern portion of his original land holdings, which still consisted primarily of wetlands. As part of the development of his land holdings, Kinney established the City of Ocean Park as an independent municipality to the south of Marine Street. This area was where Kinney eventually constructed his most successful development, Venice of America. Inspired by visits to Europe, Kinney felt that the coastal wetlands shared many features with Venice, Italy. For that reason, he chose to create a coastal resort community that recreated Venice, Italy's famous canal system. He hired Frank Dunham as the building superintendent and sought to implement many features of the "City Beautiful" movement popular across the United States at the time (HRG 2015; Los Angeles Herald 1905). In 1905, a Venice of America subdivision map was recorded and included areas for residential, commercial, and recreational development. Canals were established, creating a "canal district" with four islands of residential lots, connected via walkways and arched bridges, designed by Italian metal sculptor Felix Peano (HRG 2015).

By the 1920s, the commercial architectural styles in Venice shifted from Mediterranean Revival shifted to less ornate and vernacular forms of commercial buildings. There were also rail and streetcar lines, including the Venice Miniature Railroad, which was specifically designed to be able to cross over arched bridges through the canals. By 1911, Kinney attempted to separate Venice of America from Ocean Park so that it could become its own community. Despite the failure of this separation, the area known as Venice of America remained part of Ocean Park, but the entire community was officially renamed Venice in 1911 (HRG 2015; Stanton 1998).

From the 1920s through the 1950s, bigger shifts came to Venice. In 1925, Venice was officially annexed into the City of Los Angeles. To meet modern transportation infrastructure, the original canals were infilled in 1929 for automobile traffic. However, the later canals that were constructed as a part of the Venice Canal subdivision, were spared. Economic decline and affordable rental prices in the 1930s and 1940s resulted in an influx of immigrants and artists to the area. By the 1950s, development shifted to be focused almost entirely on the automobile. Lincoln Boulevard evolved as a main commercial and vehicular corridor. In addition, Venice became well known for its free-spirited atmosphere due to the growing population of counterculture artists. Their

increased presence drove complaints from local business owners, who formed the Venice Planning Committee in 1961 in an effort to "clean up" the area. The "clean-up" efforts resulted in the demolition of almost 550 buildings between 1962 and 1965 (City of Los Angeles 2025; HRG 2015).

Development in Venice lagged throughout the 1960s and early 1970s. However, the opening of the Southern California Institute of Architecture (SCI-Arc) in neighboring Santa Monica in 1972 resulted in new creatives coming to the area for affordable housing. These new residents saw the vacant lots as an opportunity for growth. The area became somewhat of a laboratory for architects who designed and constructed many early Post-Modern style buildings. Architects who designed and built in Venice during this time included Frank Gehry, Steven Ehrlich, and Frederick Fisher. During this time, Venice was also covered in large scale murals, which remain an important piece of its cultural landscape in present day (HRG 2015; Gebhard and Winter 2003).

The counterculture of Venice continued to remain present throughout the turn of the 21st century. Once a community of outsiders, this culture has come to represent the modern identity of the community. New residents have and continue to be drawn by the free-spirited lifestyle and architectural renaissance (HRG 2015).

Ocean Park Place Tract

The subject property is located within the boundaries of the Ocean Park Place Tract. Limited information about this tract, but it appears to be one of many smaller tracts that were developed east of Main Street in the early 20th century. The smaller tracts like Ocean Park Place Tract, were subdivisions from the original Kinney landholdings and were primarily utilized for residential and commercial development. Developers used the proximity to the City of Ocean Park as a selling point for properties in the new tracts. Other notable tracts in the vicinity of the subject property are Ocean Park Villa and Ocean Park Villa Tract No. 2 that were developed in 1903 near Ocean Park County Club (HRG 2015).

Commercial Development in Venice

The earliest commercial development in Venice was concentrated along Windward Avenue, stretching from the beach into residential areas to the east. Buildings along this commercial corridor were constructed in harmony with the "Venetian Renaissance" style, as directed by Kinney to keep with the cohesive resort aesthetic. Architects Norman Marsh and Clarence Russell were recruited to model designs after Italy's Piazza San Marco, which was known for its arcaded walkways along the streetside (HRG 2015).

As a coastal community, Venice also experienced early commercial development in the 1910s and 1920s along the boardwalk, known as Ocean Front Walk. This included several hotels, such as St. Mark's Hotel, King George Hotel, and the Biltmore by the Sea, all of which provided lodging for visitors and tourists. Othe establishments included tourist-oriented businesses. During times of economic downturn, such as in the 1940s, some buildings along Ocean Front Walk were converted to new uses as businesses shut down (HRG 2015).

By the mid-century, commercial development was heavily influenced by a shift in reliance on the automobile. Lincoln Boulevard, located slightly inland, was established as a main commercial and vehicular thoroughfare. It was developed to meet the needs of the automobile with wide lanes, highly visible signage, and parking lots off of the street. Lincoln Boulevard became the site of many neighborhood commercial establishments

associated with the identity of the community, such as the Fox Theater, La Cabaña Mexican Restaurant, and Lincoln Hardware (HRG 2015).

Also in the mid-century, a mix of neighborhood commercial establishments appeared among the residential developments constructed along West Washington Boulevard (now Abbot Kinney Boulevard). This new commercial corridor consisted of beauty salons, markets, repair shops, artist studios, wholesale businesses, and thrift stores. As more decades passed, the area became almost exclusively commercial with little to no remaining residential uses. However, evidence of residential development remains as some original dwellings were converted to commercial use. As a result, this portion of Venice consists of a variety of building types, with Craftsman style cottages from the 1910s and 1920s alongside brick commercial buildings from the 1920s onward (HRG 2015).

Architectural Style: Streamline Moderne (1935-1945)

The majority of the buildings that comprise the subject property were constructed in the Streamline Moderne style of architecture. Streamline Moderne became popular in Venice in the 1930s. Breaking away from heavily designed and ornate stylings seen in the Art Deco period that dominated Los Angeles in the 1910s and 1920s, Streamline Moderne offered clean lines and simplistic detailing that could be offered at more affordable construction costs during the Great Depression years. Its affordability, popularity, and ability to be stylistically scaled up or down, which also facilitated its use and popularity in Public Works Administration (PWA) and Works Progress Administration (WPA) projects. Drawing its inspirations from transportation and advances in industrialization, practitioners of the style used curvilinear elements in their designs and incorporated smoother wall surfaces than seen in the Art Deco style. The lack of excessive ornamentation and smooth wall surfaces, also helped to emphasize the curving and sweeping lines of the building. Streamline Moderne style was used in Venice for a variety of architectural forms including residential buildings, commercial buildings, and institutional buildings (ARG/HRG 2017; Sapphos Environmental 2014; City of Los Angeles 2021). The SurveyLA Citywide Historic Context Statement for Architecture and Engineering/L.A. Modernism, 1919-1980 identified the following character-defining/associative features of the Streamline Moderne style (City of Los Angeles 2021: 77):

- Retains most of the essential character-defining features of the style from the period of significance
- Horizontal orientation
- Rounded corners and curved surfaces, emulating a "windswept" appearance
- Flat or nearly flat roof
- Speedlines at wall surfaces, such as horizontal moldings and continuous sill courses
- Smooth stucco cladding
- Metal, often steel casement, windows
- Unadorned wall surfaces, with minimal ornament
- Windows "punched" into walls, with no surrounds

Property Type: Service Stations (1920-1970)

As the automobile industry boomed in the early 20th century, so too did the petroleum industry. Prior to World War I, American consumers purchased gasoline out of barrels and cans at grocery or convenience stores. As the popularity of automobiles rose, so did the need to purchase gasoline more easily. By the 1910s, early versions of drive-up service stations began to appear, but they were no more than a simple pump on the curbside. In the following years, advancements in technology with the creation of standardized

gasoline pumps and desire for a removal from the street led to the creation of the service station. By 1935, more than 200,000 service stations were located across the United States. Service stations were one of the first commercial buildings that catered to the automobile by being set back from the street and accommodating vehicles without disrupting street traffic. They influenced the development of other property types that catered to the automobile by offering drive-in services (National Museum of American History 2023; Eschner 2017).

The popularity of service stations and the petroleum industry boom resulted in large powerhouse oil and gas companies beginning to take strongholds in the United States. As these companies continued to construct service stations, they were able to come up with designs, styles, and branding that were consistent across all their locations. This created a cohesive visual appeal that made it easy for customers to identify the most well-known gasoline brands. While there were several variations of service stations, the most common form that had taken shape by the 1920s contained a rectangular building, gas pumps, and a canopy covering the pumps. The rectangular building typically held restrooms and sometimes housed a repair shop or functioned as a car wash. This basic form would remain popular for decades. Prior to the corporate branding that dictated the design of service stations, early service stations were generally constructed in popular architectural styles of the time such as Period Revival styles (City of Los Angeles 2016; Randl 2008.; History Colorado 2023; Jackle 1994; Fryxell 2013).
As the popular architectural styles of the time began to change in the following decades, so too did the styles of service stations. In the 1930s, the popularity of Streamline Moderne and International Style stations increased. Many stations also began selling more automobile-related products out of their shops, creating the need for larger spaces and windows to showcase products. In the 1930s, large oil company Texaco hired Walter Dorwin Teague to create a prototype for their station design that became one of the most popular station types. It included a rectangular box for the store which featured display windows, restrooms, and service bays. The increased standardization led to some companies even selling prefabricated stations containing all these essential components (City of Los Angeles 2016; Randl 2008.; History Colorado 2023; Jackle 1994; Fryxell 2013).

The standardization of the service station property type continued until World War II, when the building of service stations rapidly declined due to the changing economics of the petroleum industry. Those that were still being constructed opted to add elements of flair to the standardized designs, aiming to provide some type of individualization. This included adding features to the station's canopy, which was more affordable and noticeable from the street. By the mid-century, some stations began incorporating Googie style features represented by the dramatic expression of structural elements, such as elongation and distortion of roofs, extension of columns and beams creating spear-like objects and walls extending beyond the boundaries of the existing buildings. Additional features also included the mixing of materials, use of bright colors, asymmetric designs, and the expansive use of glass. While many stations embraced the new Googie style, others reverted back to older architectural styles, such as Spanish Colonial Revival and Streamline Moderne. Character defining features of the Gas/Service Station property type are as follows (Randl 2008.; History Colorado 2023; Jackle 1994; Fryxell 2013; City of Los Angeles 2016):

- Situated on a relatively flat paved lot
- Oriented towards the street for easy automobile access
- Layout and spatial relationships reflect automobile access
- Typical components include a rectangular or oblong building that may contain service bays, gas pumps, and canopy over the pumps
- May have large windows in the main building to display products

- May reflect corporate designs and branding associated with major oil companies
- Corporate signage and logos are generally present throughout the property
- The most popular architectural styles for services stations included Streamline Moderne, Googie, and Spanish Colonial Revival
- Later examples may also be prefabricated or feature prefabricated elements

Ownership/Occupant History

The following presents chronological detail of the subject property's ownership/occupant history, as established through review of publicly available census, voting, birth, death, and marriage information found on Ancestry.com, City Directories, and other relevant data sources. There are two addresses known to have been associated with the subject property: 165 Brooks Avenue (historic) and 825 Hampton Drive (current).

1927-1954: R.B. Van Blaricom filed permits for the construction and modification of a tire and battery shop, wash rack, restroom, public garage, and service station. Based on archival research R.B. Van Blaricom was the original owner of property and owned it until 1954.
1928-1938: City Directories and historical newspapers indicate that the Venice Super Station occupied the subject property from 1928-1938 (occupant).
1954-1970: City Directories and building permits indicate that R. B. Van Blaricom sold the subject property to Paul Holdren. During this time the property operated as Holdren's Auto Service.
1970: City Directories indicate that the property is occupied by Stewart Auto & Paint (occupant).
1975-1985: Lee's Body & Paint Shop (occupant) (AEI 2021)
1980-1985: Poor Man Body Shop (occupant) (AEI 2021)
1988-2006: Michael Chevalier is the owner of the property until his death in 2006.
1991: Design Advantage (occupant) (AEI 2021)
1991: Gwendolen Cates Photography (occupant) (AEI 2021)
1994: Johnson Todd Productions (occupant) (AEI 2021)
1994-1996: Rasbot Auto Service (occupant) (AEI 2021)
1999-circa 1921: Whole Soul Inc. and Spot Welders, Inc. (occupants) (AEI 2021)
2022-Present: SJF Venice LLC is listed as the current owner of the subject property.

The following provides an overview of the individuals who owned the subject property for the longest periods of time: R.B. Van Blaricom (1927-1954) and Michael Chevalier (1988-2006). No evidence was found to indicate that any of the occupants of the property were noteworthy or potentially significant.

R.B. Van Blaricom (1927-1954)

R.B. Van Blaricom was the first owner of the subject property. Prior to owning Venice Super Station from 1928 to 1938, Van Blaricom also owned a Standard Oil service station in Long Beach. During his tenure as owner/operator, Venice Super Station was one of the "largest and best equipped service station in Southern California" (Evening Vanguard 1937: 9). Van Blaricom was also a member of the Venice branch of the Los Angeles Chamber of Commerce. He was the Sub-Committee Chairman of the Planning Committee. While Van Blaricom owned the subject property, he resided in nearby Santa Monica (Evening Vanguard 1926, 1929, 1930, 1937; Ancestry 2025).

Michael George Chevalier (1988-2006)

Michael George Chevalier occupied 165 Brooks Avenue from 1988 till his death in 2006. Chevalier was most known for his working as a camera operator in the film industry. Some of the major productions he worked on were the Rocky films, Heartbreak Ridge, and

Superman. He also did camera work for NFL Films, National Geographic, The Olympics, and ABC's Wide World of Sports. He was a founding member of the Society of Operating Cameramen in 1979. His obituary also notes that he was one of the best freelance cinematographers who specialized in many facets such as commercials, movie titles, advertising, and photography. Archival research indicated Chevalier was an owner of the property and did not perform any cinema related functions at the subject property during his ownership (Argonaut News 2006; Legacy.com 2006).

Application of Designation Criteria

The following provides an evaluation of the subject property in consideration of NRHP, CRHR, and City of HCM designation criteria. Given the similarities in the criteria of these programs, all three have been addressed together to avoid duplicative text.

NRHP Criterion A. That are associated with events that have made a significant contribution to the broad patterns of our history.
CRHR Criterion 1. Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage.
City Criterion 1. Is identified with important events in the main currents of national, State or local history, or exemplifies significant contributions to the broad cultural, political, economic or social history of the nation, state, city, or community.

The subject property was constructed between 1927 and 1931 as an automobile service center and repair shop. Starting as early as the 1910s, automobile service stations began to appear in every city and by 1935 there were more than 200,000 service stations in the United States. Venice followed this automobile trend and began establishing services stations starting in the first half of the 20th century. The subject property was constructed in 1927 and expanded in 1931 to function as a service station with fuel and repair services for automobiles. While the subject property is reflective of the rise in automobile culture and dependency in the United States in the first half of the 20th century, no evidence was found to suggest that the subject property was the first service station in the area, a rare example of a service station, or had any other distinguishable aspects of its design or history that allow it to rise to the level of significance required for designation under federal, state, or local criteria. Therefore, the subject property appears not eligible under NRHP Criterion A, CRHR Criterion 1, or City Criterion 1.

NRHP Criterion B. That are associated with the lives of persons significant in our past.
CRHR Criterion 2. Is associated with the lives of persons important in our past.
City Criterion 2. Is associated with the lives of Historic Personages important to national, state, city, or local history.

Two long-term owners/occupants are associated with the subject property: R.B. Van Blaricom and Michael George Chevalier. R.B. Van Blaricom owned and operated the service station from 1927 to 1954. As the owner/operator of the Venice Super Station, Blaricom operated one of the "largest and best equipped service station in Southern California" (Evening Vanguard 1937: 9). Following Van Blaircom's ownership, Michael George Chevalier was the next longest owner of the property from 1988-2006. While Chevalier owned the property, there was no evidence found to suggest that he occupied or used the property for any business or personal purposes. Chevalier was a well-known cinematographer that worked on films like Superman and Rocky. Background research failed to indicate anything related to Van Blaricom and Chevalier and their connection to the subject property that would allow the property to rise to the level of significance required under these criteria. Therefore, the subject property appears not eligible under NRHP Criterion B,

CRHR Criterion 2, or City Criterion 2.

NRHP Criterion C. That embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction.

CRHR Criterion 3. Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values.

City Criterion 3. Embodies the distinctive characteristics of a style, type, period, or method of construction; or represents a notable work of a master designer, builder or architect whose genius influenced his or her age; or possesses high artistic values.

The subject property was constructed between 1927 and 1931. Three of the four original buildings on the property were constructed in the Streamline Moderne style of architecture and the remaining building was constructed as simple commercial brick building. The subject property's buildings retain some of the most basic elements of the Streamline Moderne style such as rounded corners, horizontal orientation, metal casement windows, and unadorned wall surfaces with minimal ornamentation. The buildings have been significantly altered since their original construction. The most notable alterations being the installation of metal siding to the buildings and the changes in the original fenestration. In addition to these alterations, the subject property buildings were constructed as modest versions of the Streamline Moderne style, thereby rendering them poor examples of the style.

From the standpoint of the service station property type, the subject property appears to have originally had many of the character defining features of the property type. For instance, the building was constructed within the period of significance for the property type (1920-1970), oriented for automobile access from the street, and is reflective of the Streamline Moderne style of architecture. While all of these elements appear to be present historically based on aerial imagery, over the years the property has transitioned from its original use and has been altered significantly for new uses. For example, no fuel-related infrastructure remains on the site (i.e., fuel pumps/tanks, canopy structures), Additionally, any evidence of original circulation patterns was removed, and the property is now surrounded with a stone wall that limits access from the street. There were also multiple buildings added to the subject property in the early 1990s that further compromised the subject property's ability to read as an automobile related property. As a result of all of these changes, the subject property is not a good representation of the service station property type.

Based on a review of building permits, there is no known architect associated with the property. While one of the permits does list Pacific Steel Building Company as the builder, they were prevalent builders of automobile related buildings and likely constructed features that are no longer present. Therefore, the subject property does not serve as a good representation of their work or even recognizable to their work seen throughout Southern California.

A historic district was not identified within the vicinity of the subject property in the SurveyLA Historic Resources Survey Report for the Venice CPA in 2015 and the subject property was not identified as a contributor to any identified historic districts. The properties that surround the subject property are in close proximity and do not have architectural cohesion because of alterations and recent construction in the area. Therefore, the subject property does not have the potential to contribute to an historic

district or potential HPOZ. While the subject property is recognizable as a commercial property and there are multiple historic-age commercial properties within the vicinity, there is no architectural cohesion as a result of infill development that has taken place in recent years.

For all of these reasons, the subject property appears not eligible under NRHP Criterion C, CRHR Criterion 3, or City Criterion 3.

NRHP Criterion D. That have yielded, or may be likely to yield, information important in prehistory or history.
CRHR Criterion 4. Has yielded, or may be likely to yield, information important in prehistory or history.
City Criterion 4. Has yielded, or has the potential to yield, information important to the pre-history or history of the nation, state, city or community.

The subject property is not significant as a source, or likely source, of important historical information nor does it appear likely to yield important information about historic construction methods, materials, or technologies. Therefore, the property appears not eligible under NRHP Criterion D, CRHR Criterion 4, or City Criterion 4.

Integrity Discussion
Integrity is the authenticity of a historical resource's physical identity evidenced by the survival of characteristics that existed during the resource's period of significance. In addition to meeting one or more of the above criteria, an eligible resource must retain integrity, which is expressed in seven aspects: location, setting, design, workmanship, materials, feeling, and association. All properties change over the course of time. Consequently, it is not necessary for a property to retain all its historic physical features or characteristics. The property must retain, however, the essential physical features that enable it to convey its historic identity. The essential physical features are those features that define both why a property is significant and when it was significant. Integrity must also be judged with reference to the specific criteria under which a resource is proposed for eligibility.

Location: The subject property no longer retains integrity of location. While the subject property remains on the same parcel as it was originally located, significant changes to the property such as restricting, the access from the street has compromised its integrity of location.

Design: The subject property does not retain integrity of design. The historic-age buildings on the subject property have all been significantly altered to the point that the original design elements are no longer present.

Setting: The subject property has does not retain integrity of setting. The property is located on its original lot where the surrounding area has slightly changed, however, the property no longer features easy access to the street, which was critical to its function as a service station. Further, additional buildings were constructed on the property in the 1990s for conversion to its current use as office space.

Materials: The subject property does not retain integrity of materials. While there appear to be original windows on some of the historic-age buildings, the original cladding has been covered with metal sheets and original doors have been replaced throughout.

Workmanship: The subject property does not retain integrity of workmanship. Although some of the most basic characteristics of the Streamline Moderne style and the service

station property type are still present, the alterations made to the subject property over time have resulted in the loss of original workmanship.

Feeling: The subject property does not retain integrity of feeling. The property was constructed as an early 20th century service station and has been significantly modified over time to the point that it is practically unrecognizable as an automobile-related property.

Association: The subject does not have integrity of association, as no historical associations were identified as a result of this study.

As a result of the property significance evaluation, the subject property at 825 Hampton Drive appears not eligible for designation in the NRHP, CRHR, or as a City HCM. Further, the property appears not eligible as a contributor to a historic district or HPOZ, has no important associations with events or people, and is not a likely source of important information. The subject property also does not retain integrity of location, design, materials, workmanship, feeling, setting, or association.

PROJECT SUMMARY

PROJECT NAME: HAMPTON COURT

ADDRESS: 825 HAMPTON DRIVE

OWNER: SJF VENICE, LLC

PROJECT DESCRIPTION: CONSTRUCTION OF A NEW 4-STORY MIXED USE, 36,716 SQ FT BUILDING INCLUDING 30 APARTMENT UNITS, AND 3,416 SQ FT OF RETAIL; AND AN ATTACHED 2-LEVEL SUBTERRANEAN PARKING STRUCTURE WITH 58 PARKING SPACES

CONSTRUCTION TYPE: TYPE V-A (4 STORIES RESIDENTIAL BULDING)
TYPE 1-A (FIRST FLOOR COMMERCIAL)
TYPE 1-A (2 LEVELS SUBTERRANEAN PARKING)

FLOOD ZONE: OUTSIDE FLOOD ZONE

SITE AREA: 18,487 SF (PER SURVEY)

PROJECT DENSITY: 30 UNITS

ALLOWABLE BLDG HEIGHT: 30 FT (VSP - SECTION 10. F. 3. A.)

PROPOSED BLDG HEIGHT: 44'-7" PROPOSED

OCCUPANCY TYPE: COMMERCIAL (10%)
RESIDENTIAL (90%)

LOT AREA: 18,487 SF

BLDG FOOTPRINT: 13,070 SF
HARDSCAPE: 3,322 SF
LANDSCAPE: 2,095

GENERAL PLAN LAND USE DESIGNATION: COMMUNITY COMMERCIAL

COUNCIL DISTRICT: CD 11

COMMUNITY PLAN: VENICE

SPECIFIC PLAN: VENICE COASTAL ZONE LOS ANGELES COASTAL TRANSPORTATION CORRIDOR

SUBAREA: NORTH VENICE

APN: 4286-012-039

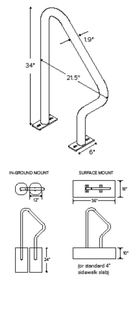
1ST FLOOR - LT BIKE STORAGE | SCALE N.T.S. | 4

Dero | Swerve Rack — Submittal Sheet



CAPACITY 2 Bikes

MATERIALS 1.9" OD schedule 40 pipe

FINISHES
- **Galvanized** An after-fabrication hot dipped galvanized finish is our standard option.
- **Powder Coat** Our powder coat finish assures a high level of adhesion and durability by following these steps: 1. Sandblast 2. Epoxy primer electrostatically applied 3. Final thick TGIC polyester powder coat
- **Stainless** Stainless Steel 304-grade stainless steel material finished in either a high polished shine or a satin finish.

MOUNT OPTIONS
- **Surface** Foot Mount has two 2.5" x 6" x .25" feet with two anchors per foot. Specify foot mount for this option. Tamper-resistent fasteners available upon request.
- **In-Ground** In-ground mount is embedded into concrete base. Specify in-ground mount for this option
- **Rail** Rail Mounted Downtown Racks are bolted to two parallel rails which can be left freestanding or anchored to the ground. Rails are heavy duty 3" x 14" x 3/16" thick galvanized mounting rails. Specify rail mount for this option.

Rack Angle

SHORT TERM BIKE RACK | SCALE N.T.S. | 3

Dero | Dero Decker — **Setbacks** Single Sided

THE DERO DECKER - BY STACKING BIKES ON A TWO-TIERED SYSTEM, CAPACITY DOUBLES. "UNLIKE OTHER TWO-TIER SYSTEMS OUR ***MECHANICAL LIFT-ASSIST TOP TRAYS SLIDE DOWN INCHES FROM THE GROUND***, THUS REQUIRING ONLY MINIMAL LIFTING OF THE BIKE INTO THE TRAY. THE DERO DECKER HAS A FRONT WHEEL SAFETY LOCKING LEVER AND TRAY DAMPERS TO PROVIDE SAFE LOWERING OF UPPER TRAYS."

Sarah Corder, MFA

PRINCIPAL ARCHITECTURAL HISTORIAN

Sarah Corder is the Principal Architectural Historian at South Environmental with 20 years' experience in all elements of cultural resources management, including project management, historic preservation planning, rehabilitation of historic buildings, community engagement, intensive-level field investigations, citywide surveys, architectural history studies, and historical significance evaluations in consideration of the NRHP, CRHR, and local-level evaluation criteria. Sarah has conducted thousands of historical resource evaluations and developed detailed historic context statements for a multitude of property types and architectural styles, including private residential, commercial, military, industrial, educational, recreational, civic, and agricultural properties. Sarah has also worked closely with design teams, property owners, and agencies on numerous projects that required conformance with the Secretary of the Interior's Standards for the Treatment of Historic Properties (Standards) and local design guidelines.

Sarah exceeds the Secretary of the Interior's Professional Qualification Standards for both Architectural History and History. She has extensive experience preparing environmental compliance documentation in support of projects that fall under the CEQA/NEPA, and Sections 106 and 110 of the National Historic Preservation Act. Sarah also has extensive experience consulting with lead agencies and managing large scale projects for municipalities like the City of Coronado, the City of San Diego, and the County of Los Angeles.

EXPERTISE

- CEQA, NEPA, and Section 106 of the NHPA compliance documentation in consideration of impacts to historical resources, and historic properties.
- Large scale historic resources survey management and execution.
- Large scale historic context statement development.
- Community engagement.
- Resource significance evaluations in consideration of NRHP, CRHR, and local designation criteria.
- Project design review for conformance with the Secretary of the Interior's Standards.

SELECT PROJECT EXPERIENCE

Metro Link US Project, City of Los Angeles, Los Angeles County, California (2024). South Environmental is a subconsultant providing cultural resources services to the Los Angeles County Metropolitan Transportation Authority (Metro). Metro is providing environmental oversight for this Los Angeles Department of Water and Power (LADWP) utilities replacement project located near the Little Tokyo neighborhood of Los Angeles. For this project, Historic American Buildings Survey (HABS)-like documentation of the Kahn-Beck Co.; Friedman Bag Company – Textile Division building was required as part of the CEQA Mitigation Monitoring and Reporting Program (MMRP) for the Link Union Station Project. South Environmental prepared a historical narrative and coordinated with a professional photographer to document the building prior to demolition in a manner similar to HABS standards. Ms. Corder served as the co-author of the HABS documentation and provided QA/QC for all project deliverables.

Wilshire Country Club Stream Restoration Project, Los Angeles, California (2024). South Environmental was retained to complete a cultural resources study for a project that would restore a streambed within the golf course on the approximately 96-acre Wilshire Country Club property. The project requires federal permitting through the U.S. Army Corps of Engineers (USACE) which in turn required compliance with Section 106 of the NHPA. The study included a CHRIS records search of the project Area of Potential Effects (APE) and a 0.5-mile search radius, property development and archival research, development of an appropriate historic context, and recordation and evaluation of the Wilshire Country Club. The property was evaluated for historical significance in consideration of NRHP designation criteria and integrity requirements. The property was found not eligible due to a lack of integrity. Ms. Corder served as the principal architectural historian, co-authored the technical report, and provided QA/QC on all project deliverables.

Historic Resource Assessment for 1501 North Marlay Drive, City of Los Angeles, California (2022). South Environmental was retained to complete a Historic Resources Assessment Report (HRA) for a property located at 1501 North Marlay Drive in the City of Los Angeles, California. This study was prepared by qualified architectural historians in conformance with CEQA Guidelines § 15064.5 for historical resources and the City of Los Angeles Cultural Heritage Ordinance. The primary focus of the HRA was the analysis of the proposed project's potential to impact the Stahl House, also known as Case Study House #22, an iconic International-style residence and historical resource located directly above the project site at 1635 Woods Drive. The proposed project plans and renderings were reviewed by qualified architectural historians to determine if the proposed project would have an adverse effect on any significant viewsheds to or from the Stahl House. A survey of the project site and surrounding viewsheds to and from the Stahl House, and review of countless photographs of the property's iconic viewsheds indicated that the proposed development at 1501 Marlay Drive has no potential to impact any of the Stahl House's significant viewsheds. Ms. Corder provided QA/QC for the project deliverables.

Los Angeles County Florence-Firestone Community Plan Area Historic Resources Survey, Los Angeles County, California (2022). While working for her previous firm, Ms. Corder served as the Principal Architectural Historian, task manager, client contact, community engagement lead, and report author for the project. The project included the preparation of a historic context statement and the completion of a historic resources survey for the community of Florence-Firestone in Los Angeles County. The historic resources survey report documented the development history of the community from the rancho period to the present, identify important themes, events, patterns of development, and describes the different property types, styles, builders, and architects associated with these important periods and themes. The document will also provide registration requirements and recommendations for future study/action by the County of Los Angeles to facilitate and streamline the historic preservation program.

Laura G. Carías, MA

SENIOR ARCHITECTURAL HISTORIAN

Laura Carías has over 19 years' experience in the field of historic and cultural resources evaluation, identification, documentation, and preservation. Ms. Carías specializes in historic resources assessments including historic significance evaluation in consideration of the National Register of Historic Places (NRHP), California Register of Historical Resources (CRHR), and local-level evaluation criteria. She also has experience in intensive-level field surveys, historic structure reports, design consultation, conformance with the Secretary of the Interior's Standards for the Treatment of Historic Properties, Historic American Buildings Survey (HABS) and Historic American Engineering Record (HAER) documentation, local Mills Act contracts, and local, state, and National Register of Historic Places designations.

Ms. Carías meets the Secretary of the Interior's Professional Qualification Standards for both Architectural History and History. She has experience preparing environmental compliance documentation in support of projects that fall under the California Environmental Quality Act (CEQA/National Environmental Quality Act (NEPA), and Section 106 of the National Historic Preservation Act (NHPA).

EXPERTISE

- CEQA, NEPA, and Section 106 of the NHPA compliance documentation in consideration of impacts to historical resources, and historic properties
- Historic resource significance evaluations in consideration of NRHP, CRHR, and local designation criteria
- Project design review for conformance with the Secretary of the Interior's Standards
- Preparation of archival documentation for HABS/HAER/HALS
- Historic Structure Reports
- Historic Preservation Certification Part 1 and 2 Tax Credit Applications

RECENT PROJECT EXPERIENCE

Wilshire Country Club Stream Restoration Project, Los Angeles, California (2024). South Environmental was retained to complete a cultural resources study for a project that would restore a streambed within the golf course on the approximately 96-acre Wilshire Country Club property. The project requires federal permitting through the U.S. Army Corps of Engineers (USACE) which in turn required compliance with Section 106 of the NHPA. The study included a CHRIS records search of the project Area of Potential Effects (APE) and a 0.5-mile search radius, property development and archival research, development of an appropriate historic context, and recordation and evaluation of the Wilshire Country Club. The property was evaluated for historical significance in consideration of NRHP designation criteria and integrity requirements. The property was found not eligible due to a lack of integrity. Ms. Carías served as the senior architectural historian, performed field work, performed archival research, and co-authored the technical report.

National Register of Historic Places Nomination, East Los Angeles Chicano Student Walkouts (Blowouts) (2023). South Environmental was retained to prepare a NRHP Nomination form and Multiple Property Documentation form for the five main high schools and El Piranya Café directly associated with the planning and execution of East Los Angeles Chicano Student Walkouts of 1968. The five high schools included were James A. Garfield, Theodore Roosevelt, Abraham Lincoln, Belmont, and Woodrow Wilson. The East Los Angeles Chicano Student Walkouts (Blowouts) were a series of protests in 1968 where more than 15,000 school students walked out of class to demonstrate against the Los Angeles Board of Education due to unequal conditions and unfair treatment in Los Angeles schools. Ms. Carías served as the senior architectural historian, completed archival research, and co-authored the nomination.

Los Angeles County Florence-Firestone Community Plan Area Historic Resources Survey, Los Angeles County, California (2022). The project included the preparation of a historic context statement and the completion of a historic resources survey for the community of Florence-Firestone in Los Angeles County. The historic resources survey report documented the development history of the community from the rancho period to the present, identified important themes, events, patterns of development, and described the different property types, styles, builders, and architects associated with these important periods and themes. The document also provided registration requirements and recommendations for future study/action by the County of Los Angeles to facilitate and streamline the historic preservation program. Ms. Carías served as a senior architectural historian, performed archival research, and contributed to the development of sections of the historic context statement.

Historic Resource Assessment for 1501 North Marlay Drive, City of Los Angeles, California (2022). South Environmental was retained to complete a Historic Resources Assessment for a property located at 1501 North Marlay Drive in the City of Los Angeles. This study was prepared by qualified architectural historians in conformance with CEQA Guidelines § 15064.5 for historical resources and the City of Los Angeles Cultural Heritage Ordinance. The primary focus of the report was to analyze the proposed project's potential to impact the Stahl House, also known as Case Study House #22, an iconic International-style residence and historical resource located directly above the project site at 1635 Woods Drive. The proposed project plans and renderings were reviewed by qualified architectural historians to determine if the proposed project would have an adverse effect on any significant viewsheds to or from the Stahl House. Ms. Carías served as the senior architectural historian, performed field work, reviewed project plans, and co-authored the report.

California Preservation Foundation

Cameron Milledge, MA

ARCHITECTURAL HISTORIAN

Cameron Milledge is an architectural historian at South Environmental with a background in historic preservation and archival research. He has experience in cultural resources preservation including identification, research, writing, historical significance evaluations in consideration of the National Register of Historic Places (NRHP), California Register of Historical Resources (CRHR), and local-level designation criteria.

Mr. Milledge meets the Secretary of the Interior's Professional Qualification Standards for Architectural History. He has knowledge of and experience with Section 106 of the National Historic Preservation Act (NHPA), National Environmental Policy Act (NEPA), and California Environmental Quality Act (CEQA) compliance.

EXPERTISE

- Resource significance evaluations in consideration of NRHP, CRHR, and local designation criteria.
- Archival research.
- Preparation of State of California Department of Parks and Recreation Site Records (DPR forms).

PROJECT EXPERIENCE

Burbank Rancho Neighborhood Specific Plan, City of Burbank, Los Angeles County, California (Ongoing). South Environmental was retained to prepare a historic context statement in support of the Burbank Ranch Neighborhood Specific Plan project. The project includes the preparation of a historic context statement focused on the equine and equestrian history in the plan area. The project will identify important themes, events, patterns of development, and describe the different property types, styles, builders, and architects associated with these important periods and themes. The document also provided registration requirements and recommendations for future study/action by the City of Burbank. Mr. Milledge currently serves as an architectural historian for the project and is responsible for conducting archival research.

Historical Resources Consultation for 201 South D Street Rehabilitation Project, City of Oxnard, California (Ongoing). South Environmental was retained to provide historical resources consultation services for a rehabilitation project in the City of Oxnard. The project proposes the rehabilitation of a 1912 Craftsman residence. This study included the delineation of the project Area of Potential Effects (APE); an intensive-level pedestrian survey of the project site by an architectural historian; and evaluation of the property for historical significance by a qualified architectural historian in consideration of NRHP designation criteria and integrity requirements. This study was completed in compliance with Section 106 of the NHPA and its implementing regulation Title 36 Code of Federal Regulations (CFR) Part 800. Mr. Milledge served as an architectural historian on the project, conducted archival research, and contributed the project deliverables.

Historic Built Environment Assessment for the Renaissance Packing House Townhouses Project, Anaheim, California (2025). South Environmental was retained to prepare a historic built environment assessment report in support of the Renaissance Packing House Townhouses Project in the City of Anaheim. The project proposes the demolition and redevelopment of multiple historic-age properties. This study included an intensive-level pedestrian survey of the project site by an architectural historian; and evaluation of multiple properties for historical significance by a qualified architectural historian in consideration of CRHR and local designation criteria and integrity requirements. Mr. Milledge served as an architectural historian on the project, performed field work, conducted archival research, and contributed the project deliverables.

Cultural Resources Assessment Report for the Sierra Madre Villa Channel Stormwater Diversion Improvements Project, City of Pasadena, Los Angeles County, California (2025) South Environmental was retained to provide historic built environment resources consulting services for the Sierra Madre Villa Channel Stormwater Diversion Improvements Project located in the City of Pasadena. The project required a United States Army Corps of Engineers Section 408 permit which in turn required compliance with Section 106 of the NHPA The project required a historical assessment of the Sierra Madre Villa Channel, which was constructed in 1958 as part of the Los Angeles County Drainage Area (LACDA) System. The Sierra Madre Villa Channel was recorded and evaluated for historical significance in consideration of NRHP designation criteria and integrity requirements. Mr. Milledge served as an architectural historian on the project, conducted archival research, and contributed the project deliverables.

CPC-2024-2450-DB-CDP-SPPC-CUB-VHCA-MEL

Exhibit E: Environmental Clearance ENV-2024-2452-HES-PEIR

E.2 – Mitigation and Monitoring Program

MITIGATION AND MONITORING PROGRAM

A. INTRODUCTION

This MMP shall be enforced throughout all phases of the Project. The Applicant shall be responsible for implementing each mitigation measure and shall be obligated to provide certification, as identified below, to the appropriate monitoring agency and the appropriate enforcement agency that each mitigation measure has been implemented. The Applicant shall maintain records demonstrating compliance with each mitigation measure. Such records shall be made available to the City upon request. Further, specifically during the construction phase and prior to the issuance of building permits, the Applicant shall retain an independent Construction Monitor (either via the City or through a third-party consultant), approved by the Department of City Planning, who shall be responsible for monitoring implementation of mitigation measures during construction activities consistent with the monitoring phase and frequency set forth in this MMP. The Construction Monitor shall also prepare documentation of the Applicant's compliance with the mitigation measures during construction every 90 days in a form satisfactory to the Department of City Planning. The documentation must be signed by the Applicant and Construction Monitor and be included as part of the Applicant's Annual Compliance Report. The Construction Monitor shall be obligated to immediately report to the Enforcement Agency any non-compliance with the mitigation measures within two businesses days if the Applicant does not correct the non-compliance within a reasonable time of notification to the Applicant by the monitor or if the non-compliance is repeated. Such non-compliance shall be appropriately addressed by the Enforcement Agency.

As shown on the following pages, each required mitigation measure for the Project is listed and categorized by impact area, with an accompanying identification of the following:

- **Enforcement Agency**: The agency with the power to enforce the Mitigation Measure.
- **Monitoring Agency**: The agency to which reports involving feasibility, compliance, implementation and development are made.
- **Monitoring Phase**: The phase of the Project during which the Mitigation Measure shall be monitored.
- **Monitoring Frequency**: The frequency at which the Mitigation Measure/ shall be monitored.
- **Action Indicating Compliance**: The action of which the Enforcement or Monitoring Agency indicates that compliance with the required Mitigation Measure has been implemented.

Each of these Project Specific Mitigation Measures will implement or would substitute Mitigation Measures identified in the Citywide Housing Element 2021-2029 and Safety Element Updates Final Environmental Impact Report (EIR). These are identified below as Implementing Mitigation Measures (IMM) and/or Substituted Mitigation Measures (SMM).

B. PROJECT SPECIFIC MITIGATION MEASURES

Air Quality

IMM AQ-1: The Project shall be conditioned to use construction equipment that meets the CARB Tier 4 Final or USEPA Tier 4 off-road emissions for all equipment rated 50 horsepower or greater. A copy of each unit's certified tier specification or model year specification and CARB or SCAQMD operating permit (if applicable) shall be available upon request at the time of mobilization of each applicable unit of equipment.

- **Enforcement Agency**: DCP, LADBS
- **Monitoring Agency**: DCP, LADBS
- **Monitoring Phase**: Prior to project approval: condition for applicant to provide necessary assurances to use Tier 4 equipment with necessary CARB or SCAQMD operating permit (if applicable); prior to building permits: verify necessary assurances provided.
- **Monitoring Frequency**: Periodic field inspections during construction.
- **Action Indicating Compliance**: Field inspection sign-off; Compliance certification report by Project contractor.

IMM for Program EIR Air Quality 4.2-3 Construction TAC Reduction Measures.

Geology and Soils

Implementing Mitigation Measures

IMM GEO-1: Monitor all excavation and grading activities in areas underlain by soils or geologic units potentially containing paleontological resources; identify, record, and evaluate all paleontological resources uncovered during project construction and submit a paleontological assessment report to the City for review and approval. In addition, during project construction, the following shall be conducted as discussed in detail below: cease all construction activities in the event of the discovery of paleontological resources; conduct fossil recovery as necessary by a qualified paleontologist; avoid handling of paleontological resources by parties other than the qualified paleontologist responsible for conducting fossil recovery; and resume construction activities only upon clearance by the qualified paleontologist. These procedures, as detailed below, shall be implemented to avoid impacts to paleontological resources or reduce potential impacts to a less-than-significant level:

As the paleontological resource assessment has determined the project site is underlain by soils or geologic units with a medium to high potential for containing paleontological resources, a qualified paleontologist shall prepare a monitoring plan, and worker education plan. The

paleontologist's assessment and any required monitoring or required worker education plan shall be submitted to the City for review and approval prior to the commencement of construction activities. Any monitoring plan shall include requiring compliance with Mitigation Measure 4.5-1(d) for discovery, salvage and treatment.

IMM for Program EIR Geology and Soils 4.5-1(a) Paleontological Procedures for Discretionary Projects.

- **Enforcement Agency**: DCP, OHR, LADBS
- **Monitoring Agency**: DCP, OHR, LADBS
- **Monitoring Phase**: Prior to project approval: condition project to prepare and comply with any monitoring plan or worker education plan. Prior to issuance of grading permits: review and approve the paleontological resource monitoring plan and worker education plan.
- **Monitoring Frequency**: Periodic field inspections during grading and excavation.
- **Action Indicating Compliance**: Field inspection sign-off; Compliance certification report by Project contractor.

IMM GEO-2: If required by cultural resources assessment under MM 4.5-1(a), prior to the start of construction, a paleontological monitor shall conduct training for construction personnel regarding the appearance of fossils and the procedures for notifying paleontological staff should fossils be discovered by construction staff, and notice that the identified qualified paleontologist is the only one authorized to handle paleontological find(s), including but not limited to collection and removal. Approved plans shall include statement of WEAP requirement.

- **Enforcement Agency**: DCP, OHR
- **Monitoring Agency**: DCP, OHR
- **Monitoring Phase**: Prior to issuance of grading permits: obtain necessary assurances to ensure WEAP plan requirement are met; ensure plans show WEAP requirement.
- **Monitoring Frequency**: Periodic field inspections during grading and excavation.
- **Action Indicating Compliance**: Field inspection sign-off; Compliance certification report by Project contractor.

IMM for Program EIR Geology and Soils 4.5-1(b) Worker Environmental Awareness Program, Fossil Salvage, and Construction Monitoring.

IMM GEO-3: As required pursuant to a monitoring plan prepared under MM 4.5-1(a), a paleontologist or designated paleontological monitor shall monitor ground disturbance activities, including the initial five feet below the ground surface, as areas with high paleontological sensitivity may contain resources at shallow depths and within the first five feet. If the paleontological monitor determines that full-time monitoring is no longer warranted, he or she may recommend that monitoring be reduced to periodic spot-checking or cease entirely. Monitoring shall be reinstated if any new or unforeseen deeper ground disturbances are required. After ground disturbing activities are completed, the paleontologist or designated monitor shall

complete and submit a report to the City verifying compliance with the monitoring plan. Monitoring plan shall show on the plans.

- **Enforcement Agency**: DCP, OHR
- **Monitoring Agency**: DCP, OHR
- **Monitoring Phase**: Prior to issuance of grading permits: ensure plans show monitoring plan requirements; during all ground disturbing activities: monitor compliance.
- **Monitoring Frequency**: Periodic field inspections during grading and excavation.
- **Action Indicating Compliance**: Field inspection sign-off; Compliance certification report by Project contractor.

IMM for Program EIR Geology and Soils 4.5-1(c) Construction Monitoring.

IMM GEO-4: Discovery. If paleontological resources are uncovered during construction activities (in either a previously disturbed or undisturbed area), all ground-disturbing activities in the area of the find shall cease until a qualified paleontologist has evaluated the find, and identified and prepared an appropriate mitigation plan, in accordance with federal, state, and local guidelines, Construction activities in the area of the discovery shall commence again only after the identified resource(s) are properly processed by a qualified paleontologist, and if construction activities are cleared by the qualified paleontologist to continue. If cleared by the qualified paleontologist, construction activity may continue unimpeded on other portions of the project site that would not affect evaluation or recovery of the identified resource(s).

Fossil Salvage and Treatment. The qualified paleontologist or designated paleontological monitor shall recover intact fossils consistent with the mitigation plan and notify the City of any fossil salvage and recovery efforts. Typically, fossils can be safely salvaged quickly by a single paleontologist and not disrupt construction activity. In some cases, larger fossils (such as complete skeletons or large mammal fossils) require more extensive excavation and longer salvage periods. In this case the paleontologist shall have the authority to temporarily direct, divert or halt construction activity to ensure that the fossil(s) can be removed in a safe and timely manner. Any fossils shall be handled and deposited consistent with a mitigation plan prepared by the paleontological monitor. The qualified paleontologist shall prepare a report according to current professional standards including those of the SVP that describes the resource, how it was assessed, and disposition. The report shall be submitted to the City.

The requirements in this mitigation measure shall be shown on plans.

- **Enforcement Agency**: DCP, OHR
- **Monitoring Agency**: DCP, OHR
- **Monitoring Phase**: Prior to issuance of grading permits: verify site plan shows requirement and obtain necessary assurances; during fossil salvage: monitor compliance.
- **Monitoring Frequency**: Periodic field inspections during grading and excavation.
- **Action Indicating Compliance**: Show requirements on plans; Field inspection sign-off; Compliance certification report by Project contractor.

IMM for Program EIR Geology and Soils 4.5-1(d) Fossil Discovery, Salvage, and Treatment.

Hazards and Hazardous Materials

IMM HAZ-1: If contaminants of concern (COCs) are detected above regulatory action levels, the project applicant shall retain a qualified environmental consultant to prepare a Soil Management Plan (SMP). If the project is under regulatory oversight, the SMP shall be submitted to appropriate agencies (such as SCAQMD, DTSC or others) for review and approval prior to the commencement of excavation and grading activities. The SMP shall be implemented during excavation and grading activities associated with the project to ensure that contaminated soils are properly identified, excavated, and disposed of off-site, as follows:

- The SMP shall be prepared and executed in accordance with South Coast Air Quality Management District (SCAQMD) Rule 1166, Volatile Organic Compound Emissions from Decontamination of Soil. The SMP shall require the timely testing and sampling of soils so that contaminated soils can be separated from inert soils for proper disposal. The SMP shall specify the testing parameters and sampling frequency. During excavation, Rule 1166 requires that soils identified as contaminated shall be sprayed with water or another approved vapor suppressant or covered with sheeting during periods of inactivity of greater than an hour, to prevent contaminated soils from becoming airborne. Under Rule 1166, contaminated soils shall be transported from the Project Site by a licensed transporter and disposed of at a licensed storage/treatment facility to prevent contaminated soils from becoming airborne or otherwise released into the environment.

- During the project's excavation phase, the applicant shall remove and properly dispose of impacted materials in accordance with the provisions of the SMP. If soil is stockpiled prior to disposal, it will be managed in accordance with the Project's Storm Water Pollution Prevention Plan, prior to its transfer for treatment and/or disposal. All impacted soils would be properly treated and disposed of in accordance with SCAQMD Rule 1166.

- The project applicant shall commission a site-specific Health and Safety Plan (HASP) to be prepared in compliance with Occupational Safety and Health Administration (OSHA) Safety and Health Standards (29 Code of Federal Regulations 1910.120) and Cal-OSHA requirements (CCR Title 8, General Industry Safety Orders and California Labor Code, Division 5, Part 1, Sections 6300-6719) and submitted for review by the Department of Building and Safety. The HASP shall address, as appropriate, safety requirements that will serve to avoid significant impacts or risks to workers or the public. The HASP shall include emergency contact numbers, maps to the nearest hospital, gas monitoring action levels, gas response actions, allowable worker exposure times, and mandatory personal protective equipment requirements. The HASP shall be signed by all workers involved in the activities associated with the investigation to demonstrate their understanding of the risks of excavation.

- Soil gas concentrations detected on the subject property indicate engineering controls (such as a vapor intrusion mitigation system – VIMS) should be implemented to reduce vapor intrusion risk for future structures on the subject property. The VIMS should be designed to meet the required Level II methane mitigation system required for future structures on the

subject property. Re-testing of soil gas concentrations, post grading, could be performed because removal of soil to depths of 25 feet during future grading for the proposed three subterranean levels may eliminate the VI hazard.

Asbestos containing material (ACM) and lead-based paint have identified within the subject property buildings. The ACM should be removed by a California licensed asbestos abatement contractor and Cal-OHSA/HUD lead safety practices should be implemented during building demolition.

If remediation is determined to be necessary, the grading permit shall not be issued until the applicable regulatory agency has indicated that further remedial action is not required.

- **Enforcement Agency**: DCP, LADBS, LAFD
- **Monitoring Agency**: DCP, LADBS, LAFD
- **Monitoring Phase**: Prior to issuance of grading permit: review and approve the Soil Management Plan; if applicable, verification that appropriate regulatory agency has determined that further remedial action is not required; prior to issuance of building permit: review and approve the Health and Safety plan.
- **Monitoring Frequency**: Once, prior to building permits.
- **Action Indicating Compliance**: SMP; HASP.

IMM for Program EIR Hazards and Hazardous Materials 4.7-2(b) Site Remediation and Health and Safety Plan.

Noise

IMM NOI-1: For all discretionary projects, power construction equipment (including combustion engines), fixed or mobile, shall be equipped with noise shielding and silencing devices consistent with manufacturer's standards or the Best Available Control Technology. Equipment shall be properly maintained, and the Project Applicant or Owner shall require any construction contractor to keep documentation on-site during any earthwork or construction activities demonstrating that the equipment has been maintained in accordance with manufacturer's specifications. Measure shall be shown on plans.

- **Enforcement Agency**: DCP, LADBS
- **Monitoring Agency**: DCP, LADBS
- **Monitoring Phase**: Prior to project approval: condition project to comply with measures and to provide necessary assurances to ensure compliance; prior to building permits (including grading, demolition): ensure that requirement shows on plans and necessary assurances are obtained, during construction: field verify that power construction equipment includes noise shielding and silencing devices.
- **Monitoring Frequency**: Periodic field inspections during construction.
- **Action Indicating Compliance**: Field inspection sign-off; Compliance certification report by Project contractor.

IMM for Program EIR Noise 4.10-1(a) Noise Shielding and Silencing.

IMM NOI-2: For all discretionary projects, driven (impact), sonic, or vibratory pile drivers shall not be used, except in locations where the underlying geology renders alternative methods infeasible, as determined by a soils or geotechnical engineer and documented in a soils report. Requirement shall show on plans.

- **Enforcement Agency**: DCP, LADBS
- **Monitoring Agency**: DCP, LADBS
- **Monitoring Phase**: Prior permits (including grading, demolition): ensure that requirement shows on plans and necessary assurances are obtained, during construction: field verify that driven, sonic or vibratory pile drivers are avoided.
- **Monitoring Frequency**: Periodic field inspections during construction.
- **Action Indicating Compliance**: Field inspection sign-off; Compliance certification report by Project contractor.

IMM for Program EIR Noise 4.10-1(b) Use of Driven Pile Systems.

IMM NOI-3: For all discretionary projects, all outdoor mechanical equipment shall be enclosed or screened from off-site noise-sensitive uses. The equipment enclosure or screen shall be impermeable (i.e., solid material with minimum weight of 2 pounds per square feet) and break the line-of-sight from the equipment and off-site noise-sensitive uses.

- **Enforcement Agency**: DCP, LADBS
- **Monitoring Agency**: DCP, LADBS
- **Monitoring Phase**: Prior to project approval: condition project to comply with measures; prior to building permits: ensure mechanical equipment is enclosed or screened; during construction: field verify that all outdoor mechanical equipment are screened or enclosed.
- **Monitoring Frequency**: Periodic field inspections during construction.
- **Action Indicating Compliance**: Field inspection sign-off; Compliance certification report by Project contractor.

IMM for Program EIR Noise 4.10-1(c) Enclosures and Screening.

IMM NOI-4: Construction staging areas shall be located as far from noise-sensitive uses as reasonably possible and feasible in consideration of site boundaries, topography, intervening roads and uses, and operational constraints. Requirement shall show on plans.

- **Enforcement Agency**: DCP, LADBS
- **Monitoring Agency**: DCP, LADBS
- **Monitoring Phase**: Prior to project approval: condition project to comply with measures and to provide necessary assurances to ensure compliance; prior to building permits (including grading, demolition): ensure that requirement shows on plans and necessary assurances are obtained; during construction: field verify that construction staging areas are located far from noise sensitive uses when possible and feasible.

- **Monitoring Frequency**: Periodic field inspections during construction.
- **Action Indicating Compliance**: Field inspection sign-off; Compliance certification report by Project contractor.

IMM for Program EIR Noise 4.10-1(d) Construction Staging Areas.

IMM NOI-5: Sound barriers, such as temporary walls or sound blankets, shall be erected between construction activities and noise-sensitive uses when construction activities are located within a line-of-sight to and within 500 feet of noise-sensitive uses. Requirement shall show on plans.

- **Enforcement Agency**: DCP, LADBS
- **Monitoring Agency**: DCP, LADBS
- **Monitoring Phase**: Prior to project approval: condition project to comply with measures and to provide necessary assurances to ensure compliance; prior to building permits (including grading, demolition): ensure that requirement shows on plans and necessary assurances are obtained; during construction: field verify that sound barriers between construction activities and noise-sensitive uses are provided.
- **Monitoring Frequency**: Periodic field inspections during construction.
- **Action Indicating Compliance**: Field inspection sign-off; Compliance certification report by Project contractor.

IMM for Program EIR Noise 4.10-1(e) Temporary Sound Barriers.

IMM NOI-6:

- Impact pile drivers shall be avoided to eliminate excessive vibration levels. Drilled piles or similar methods are alternatives that shall be utilized where geological conditions permit their use.

- Construction activities shall involve rubber-tired equipment rather than metal-tracked equipment.

The construction contractor shall manage construction phasing (scheduling demolition, earthmoving, and ground-impacting operations so as not to occur in the same time period), use low-impact construction technologies, and shall avoid the use of vibrating equipment when allowed by best engineering practices.

Requirement to be on plans.

- **Enforcement Agency**: DCP, LADBS
- **Monitoring Agency**: DCP, LADBS
- **Monitoring Phase**: Prior to project approval: condition project to comply with measures and to provide necessary assurances to ensure compliance; prior to building permits (including grading, demolition): ensure that requirement shows on plans and necessary assurances are obtained; during construction: verify that vibrating equipment is avoided.
- **Monitoring Frequency**: Periodic field inspections during construction.

- **Action Indicating Compliance**: Field inspection sign-off; Compliance certification report by Project contractor.

IMM for Program EIR Noise 4.10-3(b) Vibration Mitigation.

Tribal Cultural Resources

Implementing Mitigation Measures

IMM TCR-1: In the event that Tribal Cultural Resources are discovered during Project activities, whether or not a tribal monitor is present, and there is no CRMP or the CRMP does not cover treatment of inadvertent discovery, all work within a 50-foot buffer of the find shall cease and a Qualified Archaeologist meeting the Secretary of the Interior's Professional Qualification Standards for Archaeology shall assess the find. Tribes that are culturally and historically affiliated with the Project area and have requested consultation shall be notified, should any potential tribal cultural resource be discovered during project implementation. Construction personnel shall not collect or move any tribal resources. Construction activity may continue unimpeded on other portions of the project site. Unless agreed otherwise during the tribal consultation process or in a CRMP, if tribal cultural resources are discovered during construction, the applicant and/or owner shall retain a Qualified Tribal Monitor (as approved by the Tribe) if requested by the Tribe. Any and all archaeological/cultural documents created as a part of the Project (isolate records, site records, survey reports, testing reports, and monitoring reports) should be provided to consulting Tribes. Any tribal cultural resources discovered shall be treated with appropriate dignity and protected and preserved as appropriate with the agreement of the Tribal Representative and in accordance with federal, state, and local guidelines. If not otherwise provided in the CRMP, the Lead Agency and/or applicant shall, in good faith, provide all consulting Tribes the opportunity to consult on the disposition and treatment of resources. The location of the find of tribal cultural resources and the type and nature of the find will not be published, except to provide information to the Qualified Archaeologist, tribal representatives, and public agencies with jurisdiction or responsibilities related to the resources. An agreement will be reached with the Tribal Representative to mitigate or avoid any significant impacts to identified tribal cultural resources. Absent an agreement with the Tribal Representative, as provided in Public Resources Code Section 21083.2, the find should be preserved in place or left in an undisturbed state unless the Project would damage the resource. When preserving in place or leaving in an undisturbed state is not possible, excavation should not occur until testing or studies prepared by a Qualified Archaeologist have adequately documented the recovery of scientifically consequential information from and about the resource. Construction activity may continue unimpeded on other portions of the project site if cleared by the Qualified Tribal Monitor or Qualified Archaeologist. Ground Disturbance Activities in the area where resources were found may commence once the identified resources are properly assessed and processed by a Tribal Representative or, if no Tribal Representative is identified, a Qualified Archaeologist.

The measure shall be shown on plans.

- **Enforcement Agency**: DCP, LADBS
- **Monitoring Agency**: DCP, LADBS

- **Monitoring Phase**: Prior to project approval: condition project to comply with measure and provide assurance to ensure compliance; prior to building permit: obtain necessary assurances: ensure measure shown on plans; during project activities: if resources are found, field verify that all work within a 50-foot buffer is ceased; verify that affiliated tribal representatives are notified; verify that the identified resources are properly assessed and processed by a Tribal Representative or, if no Tribal Representative is identified, a Qualified Archaeologist.
- **Monitoring Frequency**: Periodic field inspections during grading and excavation.
- **Action Indicating Compliance**: Show requirements on plans; Field inspection sign-off; Compliance certification report by Project contractor.

IMM for Program EIR Tribal Cultural Resources 44.15-1(b) Discovery of Potential Tribal Cultural Resources.

Hi Ira,

Thank you for conducting today's meeting. Please add my name if it is not already on the list to get a copy of your Determination Letter.

I'm really not going to be impacted by the project myself, but the issues I raised in my letter and at the meeting today are how I feel the community at large will be impacted. The parking and noise issues that Sue and her team responded to were not based on projects within the coastal zone -- we don't have any 900 unit buildings like they referenced. And with respect to parking 50 spaces for the uses, it's just not enough to prevent a lot of additional cars on the surrounding streets.

At the end of the day, I have ample parking for my buildings and there will be a three-story hotel between my properties and this site, so I only lose a bit of my city view from my rooftop patio -- that is not an issue for me!

Thank you for confirming the existing tree will not be removed. I never got a copy of the landscaping plans where Sue said that was referenced. Let's hope they plant more of the same!

Again, thank you for giving me the time to speak.

Best,
--Jim

Subject: Case CPC-2024-2450, 825 Hampton Ave. Venice

Hi Ira,

Attached is a letter I would like to enter into the public record for Planning Case Number(s): CPC-2024-2450-DB-CDP-SPPC-CUB-VHCA-MEL, ENV-2024-2452-HES-PEIR

I want to be very clear, I'm not opposed to the project but have concerns of the potential impacts this project is proposing. My letter describes these concerns in more detail.

I plan to attend the online hearing on Monday. If possible please allow me to be the last speaker, I am hoping the other neighbors who have reached out to me will speak about their concerns in which case, I would not repeat their concerns.

For my records, please respond that you received this message.

Best,
--Jim

Los Angeles, CA 90012

Case No.: CPC-2024-2450-DB-CDP-SPPC-CUB-VHCA-MEL, ENV-2024-2452-HES-PEIR

Dear Mr. Brown,

I am a neighbor of the proposed project at 825 Hampton Ave., Venice, CA 90291. I have several concerns that I would like you to consider in your research and determination.

1. Basically, no community outreach has occurred other than your mailing; the VNC Board has not heard the project and, although their Land Use Committee did hear the project, they only did the minimal required posting. Although the VNC maintains a community mailing list of people who have signed up to be notified, they no longer use the thousands of emails for anything other than publicizing Board meetings. No neighbors were notified of, nor attended, the LUPC meeting.

2. Regarding the proposed removal of Department of Public Works, Street Tree Division approved, permitted and designated street tree for the 200 block of Brooks Ave., the species is rare in So. Calif. but well adapted at this location. It is called a Eucalyptus Deglupta and most well noted for the rainbow trunk which has green, red, yellow and blue streaks as the bark sheds each year. In 1995, while I was leading a tree planting campaign in Venice, four of these trees were planted on this block. Without permits, the neighbor across the street cut three of them down and replaced one with concrete and the other two with Queen Palms. There were six locations where these trees could be planted, but were not, because the property owner at the 205 Brooks property (aka: 825 Hampton) did not want to remove the concrete wall that takes up a large stretch of the sidewalk.

   Side Note: I was the person that worked with the City for twelve years to bring about the Street Vacation project that realigned the streets and intersections Hampton/Electric/Brooks/Abbot Kinney/Main as they are today. This work resulted in 205 Brooks getting many thousands of additional square feet of land as the underlying rights reverted back to the prior owners.

   The tree today is very healthy and a tourist attraction (especially to the LGBTQ community)because of its rarity and beautiful colors. I would like you to consider not allowing the development to remove mature tree and, rather, work with the community to locate two

additional trees that can and, in my opinion, should be planted at 30 feet spacing, as originally called out by DPW.

3. The project is vastly under parked in my opinion. Although the architect has massaged the numbers to appear acceptable, the reality of the conditions in Venice today, coupled with the proposed uses, will cause tremendous hardships on this coastal community. Assuming the market rate residential units are rented at today's rates (1 bedroom for $3000-5000/month), many of the units will be occupied by two people, each of whom will have automobiles.

   I am well aware of AB2097, but there are exceptions that can limit how this reduction can be administered. There is no study that the City nor the Coastal Commission has made public that suggests Bike Parking is an acceptable alternative solution to automobile parking. When residents and/or visitors can't park off street at their destination, the sounding neighbors are impacted. Please require additional parking or a reduction of intensity.

4. Bike Parking is allowed, but creating required parking within the Public Right-of-Way means the City is now responsible for parking this project. If this is allowed, then it also follows, that I can reserve the parking spaces in front of my property as can everyone else in the City. I do not have a problem with bike racks on the sidewalk, but just don't understand how these racks can be considered part of the required parking spaces for this private development project.

5. The outdoor "non exclusive public patio" space directly abutting the "café" restaurant will all be used by people dining there, unless it is conditioned as public open space, and then, of course, homeless camping would also be allowed. The space is a commercial use and belongs to the private property owner, who I certainly hope will be responsible for maintaining it in a clean and safe space. But if it designated as public open space, and not of the mixed commercial and residential project, then any legal use within the public domain must be allowed. This project is not covered by LAMC 41.18, suggesting camping will be allowed and cause a great negative impact on the neighboring community.

   In the CCC Certified Land Use Plan, Policy I. B. 7. Commercial Development Standards, paragraph starting with Street Walls adjacent to a sidewalk café, public plaza, but also defines that the open space is considered as part of the project, but not the FAR.

   In the parking tables of the LUP, the undefined use, which is the last reference in the listing, reads as follows: "Parking shall be provided pursuant to a detailed parking study that demonstrates that the project will provide adequate parking to meet the needs of the development without causing negative impacts to coastal access or access to public recreational facilities." In my opinion, the use of the outdoor ground floor public non-exclusive area should be required to provide parking. Furthermore, this area falls under the heading of ground floor commercial area and, therefore, shall be required to provide BIZ spaces as well.

6. The three story underground parking garage is going to be very difficult, if not impossible, to build at an affordable price. The hotel that abuts the project at 812 Main Street has just completed what was estimated to be a 6 month dewatering process. The reality is it took 3-1/2 years to get the underground built. What this property owner does not realize is that there is an underground river that flows through this region which, back in the 1800's, was a marsh swamp. The hotel project just turned off their water pumps that were pumping in excess of 3000 gallons per minute out of four 6" pipes, 24/7 for three years. The hotel has two Storm Drain catch basins, whereas this project has none. The water table at this site is 10-12 feet below the surface and after that, well they will not only get the natural flow from the river but thus site will also get the water that is being deflected off the fifty feet of underground concrete that created the hotel garage.

7. This catch basin limitation suggests that to dewater the project during the construction of the underground garage, the water will need to be pumped into storm drains that are a long way away and, on Hampton, that would mean bisecting the neighbors driveway. Whereas, if they try to use the catch basin on Abbot Kinney, the pipes would not only end up in front of the new hotel, but they would be located in the right turn corner to Main Street. There is no simple solution here!

   In any case, these dewatering requirement impacts need to be determined before any overall project determination can be made. This potential for major disruption to the community during this process could be huge if left to the developer to do a quick and dirty "solution".

   One last point to be considered in reference to the dewatering issue is that there are several underlying easements within the project site. Besides the County Metropolitan Water District having a Stormwater Culvert measuring 15 feet wide that is used for flood control passing through this site, GTE and So Cal Gas and LA DWP all have services passing through this site. Some might be abandoned at this point, but these all need to be considered before a final consideration can be made.

8. The proposed project site was a Seaside Gas Station. Several of the structures on the site today were part of the prior gas station, which included a pumping island and several underground tanks and tire and repair shop. Has any environmental assessment study been submitted which was not included in the project submittal for proposed project? If not, please require these studies to be conducted before you make your final determination. We don't want this project to start construction only to leave a big toxic hole in the ground for several years while the soil is decontaminated.

9. The owner is requesting a Conditional Use Permit for full line alcohol service, which I am assuming is tied to the café. The proposed hours of alcohol service are 7am – 11pm seven days a week. Not only do these hours far exceed the average service hours on Abott Kinney, they are extremely long for a corner café. These hours are describing a cocktail bar and with the use of

the outdoor “non-exclusive patio”, noise is certainly going to have negative impacts on the surrounding residential community.

In addition, this request is asking for an alcohol service before any track record has been established for a café operator. This, coupled with the hours of service, and not specifying the ABC Type of permit being sought (for example: Type 47, where that the majority of the sale must be for a meal), I oppose any CUP at this time.

10. The idea of a rooftop use including multiple BBQ’s, lounge chairs and a spa is a unique idea on a multiple unit building. What are the proposed hours of rooftop access? They are not defined in the project request nor is who will manage this common space. This structure is already higher than all other allowable height limits in the North Venice Subarea in the LUP. It abuts a three story project on one side but, on the other side, it towers over the Oakwood and Milwood Subareas by two stories. The noise from the “Roof Terrace”, which is located four stories above ground, will be devastating for the neighbors. And who will be responsible to enforce any hours of use?

11. Unless the LA Code has changed, the address of a property is determined by whichever side of the parcel is the longest along the public right-of-way. The current tenant of the property liked the street name Hampton because it was primarily a commercial street, whereas Brooks is more residential. The longest side of this property is clearly on Brooks and, therefore, I believe the street address is correctly described as 205 Brooks Ave., which coincides with what it was prior to the Street Vacation.

As I reviewed this project, I have to wonder if it is even financially feasible to build. The county Records shows the last purchase price of the land at $15m which comes out to about $500k for the land cost per unit. This is before any dewatering an underground river and then constructing this elaborate multiple mixed use project within the coastal corridor. And let’s not forget the added cost to relocate the existing overhead high voltage DWP power wires, potential EPA work and other easements that still need to be cleared. Not for me to determine, but an interesting consideration when looking at this proposed project. Does it even pencil out?

Thank you for your time to read and, hopefully, consider my opinions about this development.

Best,
James Murez
Venice Neighborhood Council, Immediate Past President

Possible tree removal at 825 S. Hampton, Venice 90291

1 message

Noel Johnston <noel.only@verizon.net> Tue, Jul 1, 2025 at 11:51 AM
To: Ira.brown@lacity.org
Cc: Andreas Kemkes <a.kemkes@verizon.net>, Sarah Wauters <sarahwauters123@gmail.com>, Isabelle Duvivier <isabelle@idarchitect.com>, Fran Solomon <franisolomon@gmail.com>, Morgan Bodman <morgan.bodman@gmail.com>, Barry Campion <campionbarry@gmail.com>, Deborah Bird <dbirdseed@gmail.com>

Hi Mr. Brown:

Please see the attached images.

On the Hampton Street side of this property there is a mature tree, to my knowledge, the only Eucalyptus deglupta remaining in Venice. This tree is iconic in the sense that its common name is "Rainbow Euc" and it is emblematic of our rainbow community here in Venice; we have a rainbow life- guard hut, a rainbow pedestrian crossing (on Abbot Kinney), and this tree, our striking rainbow Eucalyptus. It's a healthy tree with uniquely hued bark, much appreciated by neighbors and visitors alike, and it isn't a sidewalk heaver or a mess maker! It provides light shade and was planted by Venetian volunteers over 25 years ago to beautify the neighborhood. In short, it's an ideal tree for that location and for our community.

It appears that, if I am reading the hearing notice correctly, this tree may be removed when this project is approved. That would be a very real and unnecessary shame as it does not seem to be in the way of any vital portion of the construction. In no way should it be removed for convenience sake and it should hopefully be protected during construction, not totaled by it.

Is it possible that you could review this before July 7 (the hearing date) and check to make sure that the tree does not get removed without serious review? My neighbors and I are trying to keep as many mature trees as we can in the neighborhood and would love to see this one in particular saved from destruction.

Thanks, in advance, for anything you can do.

My best,

Noël Johnston
Venice resident and homeowner
