PROPOSED PROJECT: The project involves the demolition of the existing commercial building and the construction, use, and maintenance of a new six (6) story, mixed-use development consisting of 32 dwelling units (including four (4) affordable units set aside for Very Low-Income households), 605 square-feet of retail space, and one (1) level of subterranean parking providing 23 parking spaces. The building will have a total height of approximately 72 feet and two (2) inches (72'2"), a total floor area of approximately 28,717 square feet, and a Floor Area Ratio of 4.06:1. The project includes a 3,280 square-foot roof deck with open space and amenities. 37 bicycle spaces will be provided consisting of 32 long-term bicycle spaces and five (5) short-term bicycle spaces.

The Project proposes the retention and protection of both parkway trees and the removal of the four non-protected trees on site. The Project proposes a total of 10 trees.

The project was filed before January 22, 2024, and as a Vesting Housing Crisis Act project, is vested to the local planning and zoning rules that were in place at the time the complete application was submitted. Therefore, the project is not subject to the new Hollywood Community Plan and its Community Plan Implementation Overlay and the Chapter 1A

PROJECT ANALYSIS

PROJECT SUMMARY

The project involves the demolition of the existing, 2,815 square-foot commercial building and the construction, use, and maintenance of a new 32-unit residential building, including four (4) affordable units set aside for Very Low Income households, in six (6) stories of residential uses over one subterranean and one at-grade level of parking, plus commercial (605 square feet) and lobby area on the ground floor. The project includes a 3,280 square-foot roof deck with open space and amenities. The building will have a total height of approximately 72 feet and two (2) inches (72'-2"), a total floor area of approximately 28,717 square feet and a Floor Area Ratio of 4.06:1.

As the site is within an AB2097 area, the Project is not required to provide any parking, however 23 automobile spaces are voluntarily provided on-site within the ground floor and within one subterranean level. 37 bicycle spaces will be provided consisting of three (3) short term and 30 long term bicycle spaces for residential uses, and two (2) short term and two (2) long term bicycle spaces for commercial uses.

The project is expected to export approximately 3,128 cubic yards of soil for excavation. There are two (2) parkway trees and four non-protected (4) trees on site. The Project proposes the retention and protection of both parkway trees and removal of the four (4) non-protected trees on site. The Project proposes a total of 10 trees.

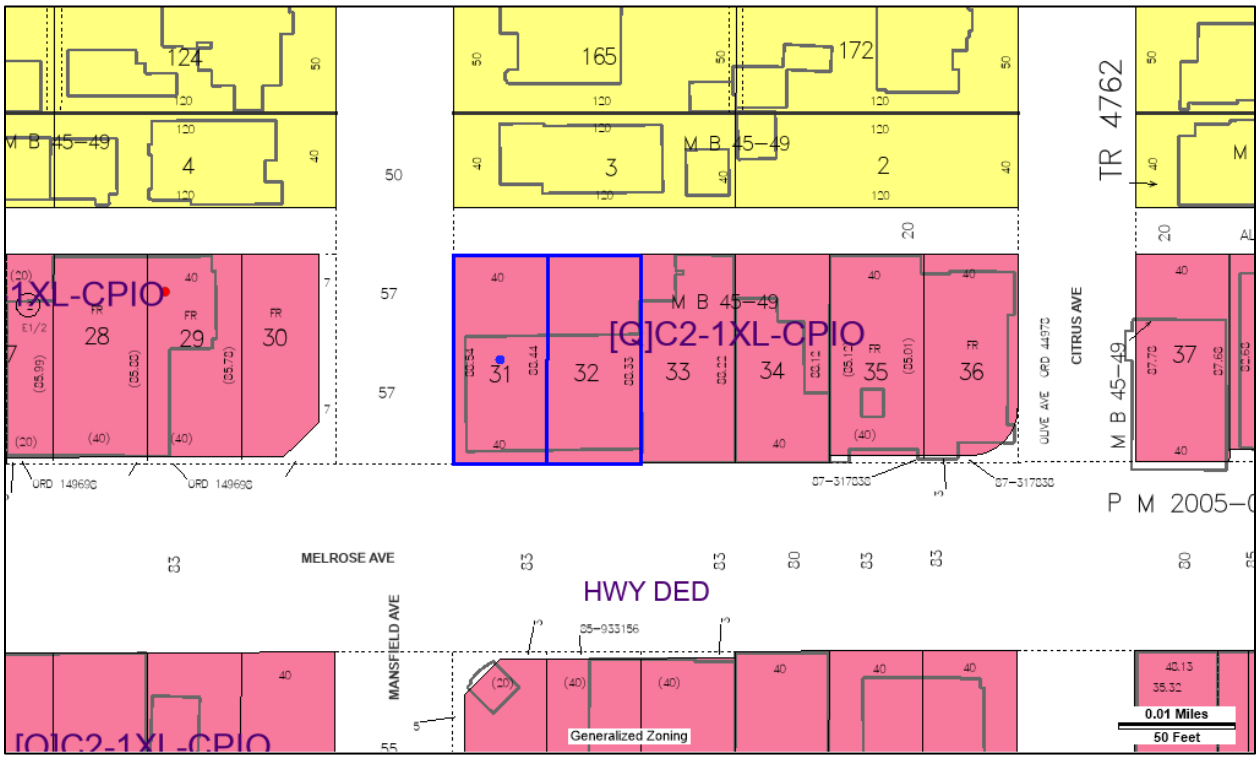
Vehicular access to the project site will be provided via the alley at the rear of the property, along the northern property line. Nine (9) parking spaces are provided at the ground floor level, along with a trash/recycling area, a bicycle room, lobby, and retail store front. A driveway leads to a subterranean level with an additional fourteen (14) vehicular parking spaces.

The applicable zoning for the site is C4-1XL and the applicable General Plan Land Use designation is Neighborhood Office Commercial.

BACKGROUND

Site Description

The project site consists of two rectangular lots with a frontage of approximately 80 feet along Melrose Avenue to the south, 88.5 feet along Mansfield Avenue to the east; and a lot area of approximately 7,074 square-feet. The site is currently improved with a one-story, commercial building and surface parking lot built in 1953, and a Billboard sign. All existing improvements will be demolished.



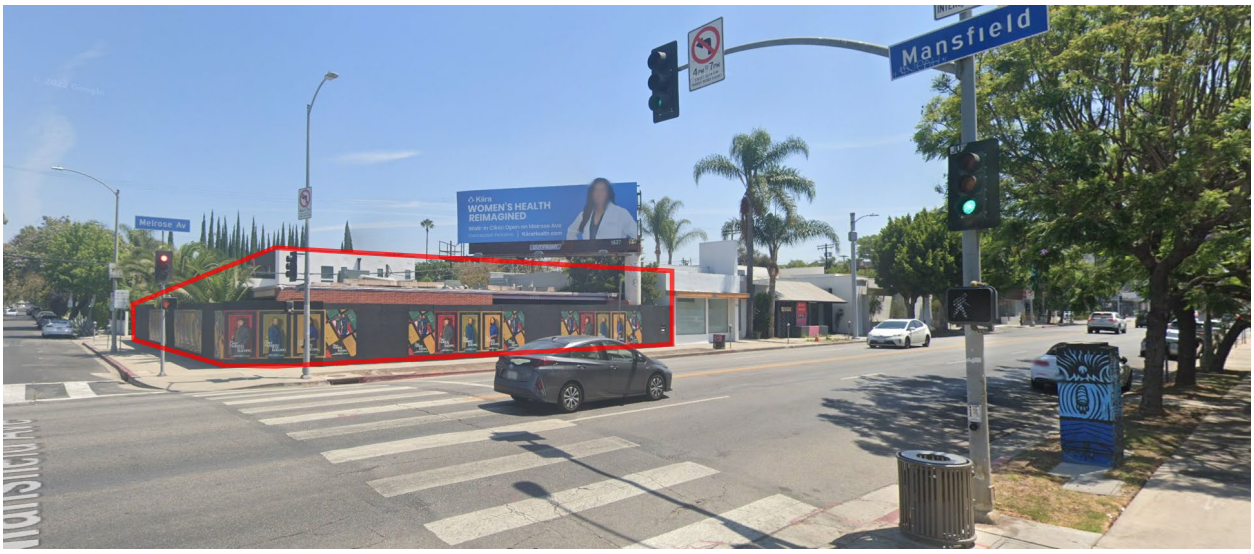
Zoning and Land Use Designation

The project site is located within the Hollywood Community Plan area. The current Community Plan designates the subject property for Neighborhood Commercial land uses and the site is zoned [Q]C2-1XL-CPIO and is within the Hollywood Community Plan Implementation Overlay.

The project submitted a Housing Crisis Act Vesting Preliminary Application on October 31, 2023, which guaranteed the Project would be vested to the City Ordinances, Policies, or Standards in effect at that time, as long as an application was filed by April 26, 2024. This case was filed on April 11, 2024, and as such, the Project is vested from future changes in City ordinances or policies. Therefore, the project is not subject to the Hollywood Community Plan Ordinances which were effective as of February 2025. The Project would be subject to the requirements of the C4-1XL zone and would not be subject to the Hollywood Community Plan Implementation Overlay.

Surrounding Uses

The project site is in an urbanized area surrounded by various uses. Parcels surrounding the Project Site to the west and east are zoned C4-1XL and improved with one-story commercial uses; parcels to the north across the adjacent alley are zoned R1-1 and improved with one- and two-story residential uses; parcels to the south across Melrose Avenue are zoned C2-1XL and are improved with a two-story church, and one- and two-story commercial and residential uses.



Streets and Circulation

West Melrose Avenue – adjoining the site on the south is a designated Modified Avenue II Street. Pursuant to Mobility Plan 2035, this Modified Avenue II Street – Standard has a required right-of-way width of 80 feet with a required roadway width of 40 feet. The existing right-of-way width is over dedicated with 83 feet and the existing roadway width is 40 feet, and the street is improved with sidewalks, curbs, gutters, and a parkway with two (2) street trees.

No dedication is required along Melrose Avenue, however, according to the January 15, 2025, Bureau of Engineering (BOE) letter, the project is required to construct a new integral concrete curb, gutter, and 12-foot wide concrete sidewalk with tree wells, or, five-foot sidewalk with parkway landscaping.

The applicant is requesting relief from the improvement requirements along Melrose Avenue.

North Mansfield Avenue - adjoining the site on the west is a designated Local Street. Pursuant to Mobility Plan 2035, this Local Street – Standard has a required right-of-way width of 60 feet with a required roadway width of 36 feet. The existing right-of-way width is 57 feet and the existing roadway width is 30 feet. Typically, a project would be required to provide a five (5) foot dedication to provide a half right-of-way width of 30 feet, a half roadway width of 18 feet, and a 12-foot sidewalk.

According to the January 15, 2025, BOE letter, in the event the project is subject to California Assembly Bill 3177, only a two (2) foot dedication would be required, to provide a 27-foot half right-of-way, maintain the existing 15-foot half roadway, and provide a two (2) foot gutter and 12-foot concrete sidewalk. Additionally, a 20-foot radius property line return or 15-foot by 15-foot corner cut at the intersection with Melrose Avenue would be required.
The applicant is requesting relief from the dedication and improvement requirements along Mansfield Avenue.

Alley – adjoining the site to the north is an alley with an existing roadway width of 20 feet. No dedication is required along the alley, according to the January 15, 2025, BOE letter, however, the applicant would be required to construct a 2-foot wide longitudinal concrete gutter, new concrete alley pavement and upgrade the alley intersection with Mansfield Avenue satisfactory to BOE.

The applicant is not requesting relief from the alley improvement requirements.

Public Transit

The site is located approximately 460 feet east of the intersection of Melrose Avenue and Highland Avenue, and 1,020 feet west of the intersection of Melrose Avenue and La Brea Avenue, all of which are heavily trafficked streets with several local and regional bus lines serving the area. Along Melrose Avenue, 380 feet east of the site is a Metro line 10 bus stop, providing access from Downtown Los Angeles to West Hollywood. At the intersection of Melrose Avenue and La Brea Avenue is a bus stop serving Metro line 212 and Antelope Valley Transit Authority line 786. Metro line 212 provides access from Hollywood to Hawthorne, passing through Miracle Mile, Baldwin Hills, and Inglewood. Antelope Valley Transit Authority line 786 provides access from Hollywood to the Veterans Administration Medical Center in Westwood, passing through Hancock Park, Beverly Hills, and Century City.

REQUESTED ENTITLEMENTS

Density Bonus/Affordable Housing Incentives Program

In accordance with California Government Code Section 65915 and LAMC Section 12.22. A.25, in exchange for setting aside a minimum percentage of the project’s units for affordable housing, the project is eligible for a density bonus, reduction in parking, and incentives allowing for relief

from development standards. The applicant has requested to utilize the provisions of City and State Density Bonus laws as follows:

Density

The subject property is vested to the previous C4-1XL zoning, which permits a residential density at a ratio of one (1) dwelling unit per 400 square feet of lot area. The subject property has a total lot area of approximately 7,874 square feet, including half of the alley and as such, the permitted base density on the subject property is 20 units (rounded up from 19.7).

Assembly Bill 1287 became effective on January 1, 2024. The law made amendments and clarifications to the State Density Bonus Law and Government Code Section 65915, which are applicable to density bonus projects in the City. AB 1287 allows projects to potentially obtain a total 100 percent density bonus by providing the initial percentage of affordable units to secure an initial 50 percent density bonus, and then a secondary percentage of affordable units in order to obtain a "stackable" or additional density bonus of up to 50 percent. Once the set-aside requirements are met to receive the maximum 50 percent “primary” density bonus, an applicant may request the additional density bonus available through AB 1287 for either Very Low Income or Moderate Income households as set forth in Government Code Section 65915(v).

In accordance with AB 1287, the applicant is seeking an initial 50 percent density bonus allowed under State Density Bonus Law by providing 15 percent of the 20 units (3 units) for Very Low-Income households. The applicant is then seeking an additional 20 percent density bonus, for a total density bonus of 70 percent, by providing an additional 5 percent of the 20 units (1 unit) for Very Low-Income households. The resulting increase in density allows for a 34-unit project. As proposed, the project will provide 32 dwelling units with 4 units reserved for Very Low-Income households.

Automobile Parking

Pursuant to Assembly Bill 2097, no minimum parking requirement shall be enforced for the proposed residential use on the project site as it is located within one-half mile of a Major Transit Stop. According to the Affordable Housing Referral Form dated October 24, 2024, the intersection of Melrose Avenue and La Brea Avenue is a Major Transit Stop, as it is identified in the SCAG 2024 Regional Transit Plan, which is located within one-half mile of the project site. Therefore, the proposed project is not required to provide any parking spaces. Nevertheless, the project proposes to provide 23 residential vehicle parking spaces and thus meets these requirements.

Separately, the project is to provide bicycle parking pursuant to LAMC 12.21. A.4 and is required to provide 30 long term and three (3) short term bicycle parking stalls for residential use, and two (2) long term and two (2) short term bicycle parking stalls for commercial use. The project proposes to meet these requirements.

Incentives

Pursuant to the LAMC and Government Code Section 65915 and Assembly Bill (AB) 1287, the applicant is entitled to four (4) Incentives, in exchange for reserving more than 16 percent of the base density for Very Low-Income households. The proposed project will set aside 4 units, equal to approximately 20 percent of the base number of units, for Very Low-Income households. Accordingly, the applicant has requested four (4) Off-menu Incentives, as follows:

a. An Off-Menu Incentive to permit a Floor Area Ratio (FAR) of 4.06:1 in lieu of the 1.5:1 FAR otherwise permitted in the C4-1XL Zone. The ‘1XL’ Height District limits the Floor Area Ratio (FAR) of 1.5:1, for a maximum floor area of 10,611 square feet. The applicant

is requesting an increase in the Floor Area Ratio to allow 4.06:1 and a maximum floor area of 28,717 square feet, which would allow for a larger building envelope for the provision of the affordable dwelling units.

b. An Off-Menu Incentive to permit a maximum height of 72 feet and two (2) inches and six stories, in lieu of the 30 feet and two (2) story maximum height otherwise permitted in the C4-1XL Zone. The '1XL' Height District limits the height of the structure to a height of 30 feet and two (2) stories. The applicant is requesting the increase in height to allow a larger building envelope for the provision of affordable dwelling units.

c. An Off-Menu Incentive to waive the commercial corner requirement to provide five-foot landscaped setbacks along all street frontages and on the perimeters of all parking areas of the lot or lots which abut a Residential zone or use pursuant to LAMC 12.22.A.23-(a)(10)(i). The site is subject to the commercial corner requirements of the Code (LAMC 12.22 A.23) as the site is a commercial used corner located in the C Zone in Height District Number 1XL, of which the lot line is separately by an alley for parcels which are improved with residential uses. The applicant is requesting relief from the Commercial Corner Development landscaping requirements in order to allow a larger building envelope for the provision of affordable dwelling units.

d. An Off-Menu Incentive to waive the loading zone requirements of LAMC Section 12.21 C.6., which requires a loading space to be provided and maintained for every building in the C or M Zones, when the building abuts an alley. The applicant is requesting relief from the loading space requirements in allow the project to design the floor plates so that the proposed units can be constructed and the overall space dedicated to residential uses can be adequately provided on each floor and indicates that compliance with the loading space requirements of the code would preclude construction of the development at the approved density or with the concessions granted as part of the project.

Waiver of Development Standards

Pursuant to Government Code Section 65915(e)(1), AB 1287, and Section 12.25 A.25(g) of the LAMC, a project that provides at least 16 percent of the base density for Very Low Income households qualifies for four (4) Incentives, and may also request other "waiver(s) or reduction(s) of development standards that will have the effect of physically precluding the construction of a development meeting the [affordable set-aside percentage] criteria…at the densities or with the concessions or incentives permitted under [State Density Bonus Law]". In addition to the four (4) requested Incentives, the applicant is also requesting four (4) Waivers of Development Standards, as follows:

a. A Waiver of Development Standard to permit an eastern side yard setback of zero (0) feet in lieu of the nine (9) feet otherwise required in the C4-1XL Zone. The applicant is requesting a 100 percent decrease in the required eastern side yard setback to allow a larger building envelope for the provision of affordable dwelling units and indicates that the 18-foot setback would preclude construction of the development at the approved density or with the concessions granted as part of the project.

b. A Waiver of Development Standard to permit a rear yard setback of 10 feet in lieu of the 18 feet otherwise required in the C4-1XL Zone. The C4 Zone requires a rear yard of 18 feet for a six-story building. The project proposes a rear yard setback of 10 feet, as measured from the centerline of the alley, which is a 20 foot alley. The applicant is requesting this 44 percent reduction in the rear yard setback in order allow residential units with sufficient interior widths and indicates that the 18-foot setback would preclude

construction of the development at the approved density or with the concessions granted as part of the project.

c. A Waiver of Development Standard to permit a western side yard setback of zero (0) feet in lieu of the nine (9) feet otherwise required in the C4-1XL Zone. The C4 Zone requires a side yard setback of nine (9) feet for a six-story building. The proposes a 100 percent reduction in the western side yard. The applicant is requesting this reduction in order to provide residential units with sufficient interior widths and indicates that the 9-foot setback would preclude construction of the development at the approved density or with the concessions granted as part of the project.

d. A Waiver of Development Standard for relief from the transitional height requirements of LAMC Section 12.21.1.10. The subject property is located within 199 feet of the R1 zone to the north. Per LAMC 12.21-1.A.10, any building constructed in a Commercial zone must adhere to transitional height from any R1 zone within 199 feet. Specifically, the subject property is approximately 20 feet from the R1 zone to the north, and thus would be limited to a height of 25 feet within 49 feet of the R1 zone, 33 feet between 50 and 99 feet of the R1 zone, and 61 feet between 100 and 199 feet of the R1 zone. The applicant is requesting relief from the transitional height requirements in order to increase the overall building envelope and area dedicated to residential uses. The applicant indicates that this compliance with this requirement would preclude construction of the development at the approved density or with the concessions granted as part of the project.

Waiver of Dedications and Improvements ('WDI')

Dedication and Improvement Requirements of the Code

Pursuant to LAMC Section 12.37 I., the applicant has filed for a Waiver of Dedications and Improvements (WDI) entitlement in order to request relief from the dedication and improvement requirements of LAMC 12.37 for the issuance of building permits on any lot in the R3 or less restrictive zone. The site fronts Melrose Avenue (a Modified Avenue II Street) along the southern property line, Mansfield Avenue (a Local Street) along the western property line, and an alley along the norther property line.

According to LAMC Section 12.37 A., for parcels along Highways (also known as Boulevards and Avenues in the Mobility 2035 Plan) and Collector Streets, a building permit shall not be issued unless one-half of the street has been dedicated and improved, for the full width of the lot, to comply with the City's adopted Street Standards. Local Streets must also be dedicated and improved to comply with Street Standards for the portions of a parcel within 300 feet of a Highway or Collector. As such, LAMC Section 12.37 would require both Melrose Avenue and Mansfield Avenue comply with City Standards.

Regarding Melrose Avenue, per the Mobility Plan 2035, a Modified Avenue II Street should be improved to a total right-of-way width of 80 feet, a total roadway width of 56 feet, and a sidewalk width of 12 feet. Currently Melrose Avenue has an existing half right-of-way of 40 feet, and as such, would not be required to provide any dedication along Melrose Avenue. The existing half roadway is 28 feet and the project would not be required to widen the existing roadway.

Regarding Mansfield Avenue, per Mobility Plan 2035, a Local Street should be improved to a total right-of-way width of 60 feet, a total roadway width of 36 feet, and a sidewalk width of 12 feet. Currently Mansfield Avenue has an existing half right-of-way of 25 feet, and as such, would need to provide a five (5) foot dedication to provide a 30-foot half right-of-way. Additionally, the existing half roadway is 15 feet, and the project would need to provide a three (3) foot widening of the roadway to provide a half roadway width of 18 feet.

This dedication and improvement requirement was noted in the BOE letter dated January 15, 2025, which indicated that typically a Project would be required to provide the following:

- **Mansfield Avenue (Dedication):** A 5-foot wide strip of land dedicated along the property frontage to complete a 30-foot wide half right-of-way in accordance with Local Street standard, and a 20-foot radius property line return or a 15-foot by 15-foot corner cut at the intersection with Melrose Avenue.
- **Mansfield Avenue (Improvement):** Suitable surfacing to join the existing improvements to provide an 18-foot wide half roadway, including asphalt pavement, integral concrete curb, 2-foot gutter and a 12-foot wide concrete sidewalk with tree wells or a minimum 5-foot wide concrete sidewalk with landscaping of the parkway. New curb ramps at the intersection per BOE standard and Special Order 04-0222. These improvements shall suitably transition to join the existing improvements satisfactory to BOE.
- **Melrose Avenue (Improvement):** New integral concrete curb, gutter and a 12-foot wide concrete sidewalk with tree wells or a minimum 5-foot wide sidewalk with landscaping of the parkway. Repair and/or replace any damaged or cracked roadway pavement along the property frontage.
- **Alley (Improvement):** Construct a 2-foot wide longitudinal concrete gutter, new concrete alley pavement and upgrade the alley intersection with Mansfield Avenue satisfactory to BOE.

Assembly Bill 3177

Assembly Bill 3177 was adopted by the California Legislature on September 22, 2024 and incorporated changes to Section 66005.1 of the California Government Code, to prohibit a local agency from imposing a land dedication requirement, on a ‘housing development’ to widen a roadway if the land dedication requirement is for the purpose of mitigating vehicular traffic impacts, achieving an adopted traffic level of service related to vehicular traffic, or achieving a desired roadway width. The Bill applies to Transit Priority Areas and areas within one half mile a planned major transit stop that will be completed before or within one year from the completion and occupancy of the housing development.

A ‘Housing Development’ is defined as a development project with common ownership and financing consisting of residential use or mixed use where not less than 50 percent of the floorspace is for residential use. As more than 50 percent of the floorspace in the subject project is devoted to residential use, the Project would be considered a ‘Housing Development’ for the purposes of AB3177 and would not be required to provide land dedication for the purposes of widening a roadway to achieve a desired roadway width. It is important to note, dedication and improvements are still permitted to ‘construct public improvements, including, but not limited to, sidewalk and sewer improvements.’

As noted in the BOE letter dated January 15, 2025, if the project is determined to be subject to the provisions of AB 3177, the project would not be required to dedicate land for the purpose of widening the roadway and would not be subject to roadway widening improvements, and instead would be subject to the revised dedications and improvements below:

- **Mansfield Avenue (Dedication):** In the event that CPC-2024-2365-DB-WDI-VHCA is subject to CA Assembly Bill 3177, dedicate a 2-foot wide strip of land along the property frontage to compete a 27-foot wide half right-of-way, and a 20-foot radius property line return or a 15-foot by 15-foot corner cut at the intersection with Melrose Avenue.
- **Mansfield Avenue (Improvement):** In the event that CPC-2024-2365-DB-WDI-VHCA is subject to CA Assembly Bill 3177, improve Mansfield Avenue with the following: integral

concrete curb, 2-foot gutter and a 12-foot wide concrete sidewalk with tree wells or a minimum 5-foot wide concrete sidewalk with landscaping of the parkway. Construct new curb ramps at the intersection per BOE standard and Special Order 04-0222. These improvements shall suitably transition to join the existing improvements satisfactory to BOE.

As the project proposes a mixed-use building wherein more than 50 percent of the floorspace is for residential use, the project is considered a 'Housing Development' per AB 3177. As such, the City is prohibited from imposing a dedication to widen the roadway for the purpose of achieving a desired roadway width if the site is within a Transit Priority Area (as defined in Public Resources Code 21099(a)(7)) and if the development has a linear street frontage of less than 500 feet. This prohibition does not prohibit the City from requiring dedications for public improvements including, but not limited to, sidewalk and sewer improvements.

A Transit Priority Area is defined as an area within one-half mile of a major transit stop that is existing or planned, if the planned stop is scheduled to be completed within the planning horizon included in a Transportation Improvement Program or applicable regional transportation plan. The City's Zone Information and Map Access System (ZIMAS) identifies parcels within a one-half mile radius of a major transit stop under the Planning and Zoning tab within the table of contents. As illustrated in Exhibit B: Maps – AB2097 Map, the site is located within a one-half mile radius of a major transit stop. According to the Affordable Housing Referral Form dated October 24, 2024, the intersection of Melrose Avenue and La Brea Avenue is a Major Transit Stop, as it is identified in the SCAG 2024 Regional Transit Plan, and the project site is located within one-half mile of the intersection. As noted in the background, the subject site has a frontage of 80 feet along Melrose Avenue to the south and 88.5 feet along Mansfield Avenue to the east. As the site is located within a Transit Priority Area and has a street frontage of less than 500 feet, the City is thereby prohibited from requesting dedications for the purpose of widening the roadway. However, the City is not prohibited from requiring dedications for sidewalks as noted above, and as such, the applicant must request relief from the sidewalk dedication requested in the BOE letter.

WDI Request

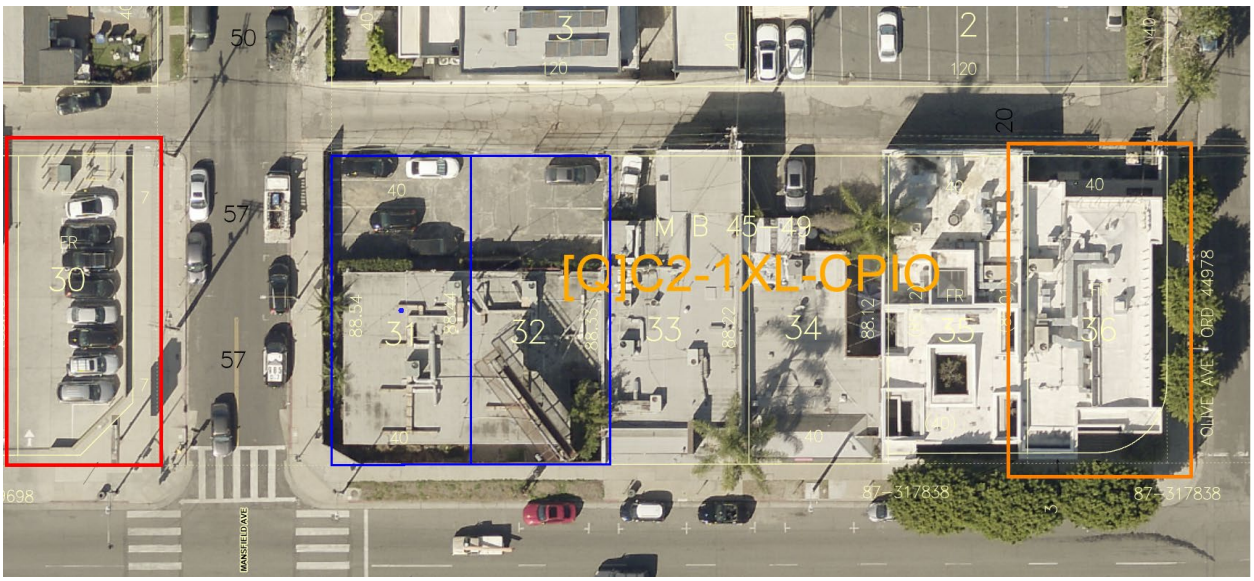
The applicant is utilizing the AB 3177 provisions to waive the three (3) foot roadway dedication and improvement of Mansfield Avenue; and has filed a Waiver of Dedication and Improvement to request relief from dedication requirements along Mansfield Avenue and improvement requirements along Mansfield Avenue and Melrose Avenue.

The applicant is requesting relief from the required two-foot dedication along Mansfield Avenue and relief from required improvements along Mansfield Avenue, to not provide a new integral concrete curb, gutter, 12-foot wide concrete sidewalk with tree wells or minimum 5-foot wide concrete sidewalk with landscaping of the parkway; and to request relief from constructing new curb ramps at the intersection per BOE standard and Special Order 04-0222. The applicant is requesting relief from required improvements along Melrose Avenue, to not provide a new integral concrete curb, gutter, 12-foot wide concrete sidewalk with tree wells or minimum 5-foot wide sidewalk with landscaping of the parkway. The applicant is also requesting relief from the 20-foot radius property line return or 15-foot by 15-foot corner cut dedication at the intersection of Mansfield Avenue and Melrose Avenue. The applicant is not requesting relief from the requirement of reasonably repairing and replacing any damaged or cracked pavement or concrete along Mansfield Avenue or Melrose Avenue, and is not requesting relief from alley improvements.

Staff recommends waiving the two-foot dedication and two-foot sidewalk widening along Mansfield Avenue to provide an increased building envelope for the project for the purposes of providing affordable housing, as the existing 10-foot sidewalk is suitable for pedestrian travel. Requiring an additional two-foot dedication would reduce the overall lot area and therefore reduce

the footprint and size of the proposed building. As Local Streets are only required to provide improvements per LAMC 12.37 when they are within 300 feet of a Highway, only an additional four properties north of the site (along the eastern side of Mansfield Avenue) would potentially be required to dedicate and improve to the full City standards. All four properties are single-family dwellings and are unlikely to be redeveloped and comply with dedication and improvement standards.

However, Staff recommends denying the Applicant's request to waive the 20-foot radius property line return or a 15-foot by 15-foot corner cut at the intersection of Mansfield Avenue and Melrose Avenue, as this dedication is necessary for safety and visibility reasons and to ensure the sidewalk corners have sufficient space for ADA-compliance ramps. Additionally, the corner cut or radius dedication ensures the building cannot be located within the 'visibility triangle' at the intersection of both streets, thereby providing clear sightlines for pedestrians.



Above is an aerial image of the Subject site (in blue) and two other properties along Melrose Avenue which were required to comply with the corner cut/radius dedications. On the northwest intersection of Mansfield Avenue and Melrose Avenue, it is visible that the property was required to provide a 15-foot by 15-foot corner cut (outlined in red). On the northwest corner of Citrus Avenue and Melrose Avenue it is visible that the property was required to provide a 20-foot radius property line. It would be reasonable to require that the applicant comply with this requirement as other properties in the vicinity have complied to ensure pedestrian and vehicular safety.

In reviewing the architectural plans, it appears that above ground portions of the building have been designed to comply with the 20-foot radius property line, however, the subterranean parking level has been designed to be located within the 20-foot radius dedication area. Staff have recommended the requirement of this 20-foot radius property line return or a 15-foot by 15-foot corner cut but have included language to ensure the parking level could encroach into this area.

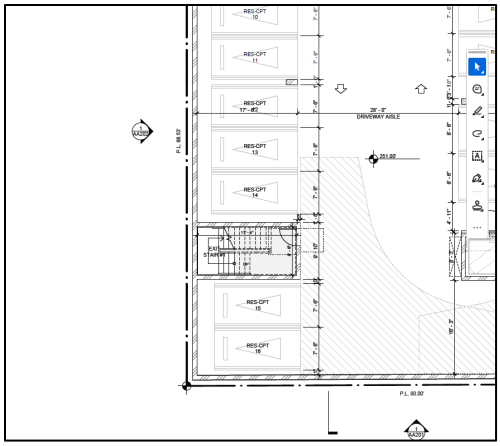


Figure 1 – subterranean level

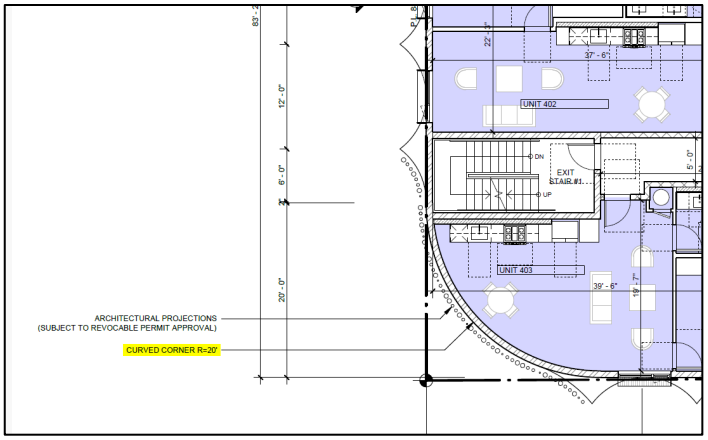

Figure 2 – ground floor level

The applicant has also requested relief from the improvement requirements of Melrose Avenue and Mansfield Avenue, to not provide a new integral concrete curb, 2-foot gutter, and 12-foot wide concrete sidewalk with tree wells or minimum 5-foot wide concrete sidewalk with landscaping of the parkway; and a waiver to not provide curb ramps at the intersection per BOE standard and Special Order 04-0222.

Staff recommends waiving the requirement to provide a 12-foot wide sidewalk along Mansfield Avenue, and to permit the applicant to maintain the existing 10-foot wide sidewalk as Staff is recommending that the two (2) foot dedication for sidewalk widening be waived. However, the existing sidewalk along Melrose Avenue is 12-feet and there is no clear reason why the applicant could not ensure the sidewalk was properly improved and appropriately landscaped.

By accommodating the applicant's request for relief from sidewalk widening and dedication along Mansfield Avenue and providing revised language to permit the subterranean level to be located within the corner dedication area, while still ensuring the project provides sidewalk improvements along Mansfield Avenue and Melrose Avenue, this recommendation ensures that adjacent sidewalks improve the pedestrian experience, that sidewalk and street dimensions are adequate for vehicular and pedestrian circulation, and ensures that the dedications and improvements bear a reasonable relationship to project impacts.

CONSIDERATIONS

Housing Element Law

Senate Bill (SB) 166 was adopted on September 29, 2017, and amended Government Code Section 65863, the No Net Loss Law, to require sufficient adequate sites to be available at all times through the Housing Element Planning period to meet a jurisdiction's remaining unmet Regional Housing Needs Assessment (RHNA) goals for each income category. Pursuant to this section, as jurisdictions make decisions regarding zoning and land use, or development occurs, jurisdictions must assess their ability to accommodate new housing in each income category on the remaining sites in their housing element site inventories. A jurisdiction must add additional sites to its inventory if land use decisions or development results in a shortfall of sufficient sites to accommodate its remaining housing need for each income category. In particular, a jurisdiction may be required to identify additional sites if a jurisdiction rezones a site or approves a project at a different income level or lower density than showing in the site's inventory.

The project is located on a lot identified in the Inventory of Sites prepared for the 2021-2029 Housing Element, which indicates that the site must provide at least 0.11 units for Lower Income. The proposed Project includes 32 dwelling units, of which four (4) units are proposed for Very

Low Income households. As such, the proposed project would not result in any fewer units than those identified in the Housing Element, and the specific findings in Government Code Section 65863(b)(1) are not required.

Housing Replacement

On October 9, 2019, the Governor signed into law the Housing Crisis Act of 2019 (SB 330). SB 330 creates new state laws regarding the production, preservation and planning for housing, and establishes a statewide housing emergency until January 1, 2025. During the duration of the statewide housing emergency, SB 330, among other things, creates new housing replacement requirements for Housing Development Projects by prohibiting the approval of any proposed housing development project on a site that will require the demolition of existing residential dwelling units or occupied or vacant "Protected Units" unless the proposed housing development project replaces those units.

The current use of the site is as an office building; therefore, demolition of the structure will not result in the removal of residential dwelling units or vacant "Protected Units." An SB 8 No Net Loss Declaration has been submitted to the file indicating this.

PROFESSIONAL VOLUNTEER PROGRAM /PVP

The proposed project was reviewed by the by the Urban Design Studio's Professional Volunteer Program (PVP) on July 16, 2024. The following issues, concerns, and recommendations were discussed:

Pedestrian First:

- Orientation of pedestrian circulation is well situated; ramp can be accessed from the driveway. The project successfully separates vehicular access, pedestrian circulation, and placement of utilities. Path of travel appears to be clear.
- Provide signage for pedestrian lobby to support wayfinding, as required by LAFD.
- Provide clear numbering for building entrance.
- Emphasize building entrance by adding canopy.

360° Design:

- Provide complete material callouts on elevations, please refer to City instructions for the preparation of building elevations: Elevation Instructions
- Retail space along Melrose frontage is considered too small for practical use. PVP participants raised concerns for functional viability. Please clarify how retail space will be used.
- Consider placement of power lines along the alley; they cannot be too close to the building. Early consultation with LADBS is recommended to determine whether power lines need to move or be placed underground.
- PVP participants raised concerns about the current window placement and lack of windows, particularly around the cylindrical corner. Consider adding windows to the stair tower in the middle of the building facing the alley.
- The use of corrugated metal is practical but results in a large, shiny, and very visible façade, especially in sunlight. The building's southern elevation will be highly noticeable, especially from a distance. Consider adding a mural or other art to the cylindrical corner to reduce the visual impact of the large metal façade.
- Current design is proposing an abundance of metal for a six-story building. PVP participants ask that architectural treatment consider existing materials within the neighborhood context. Pay attention to community character when introducing new

materiality. Is there a way to still introduce new additions while maintaining the vibrancy and continuity of existing character?
- On Sheet AP120 (Roof Level Plan), clarify the use of the 6 foot box next to the 'Roof Deck Open Space.'

Climate-Adapted:
- Utilize olive trees selectively based on sun exposure, as they prefer less shade.
- On Sheet LA001, please label names of streets surrounding the project site. Dimensions shall be provided for all important measurements, including setbacks, building or structure height, building footprints, open space areas, landscape (planting) areas, hardscape areas, and other key features, including Low Impact Development features, as applicable to the request.
- On Sheet LA001, please see Soil_Depths.pdf (lacity.org) for the minimum soil volume needed to support the growth of all required trees. Note that the ultimate height and canopy diameter of trees are largely constrained by how much soil is provided, irrespective of their species.
- On Sheet LA001, consider drought-tolerant and native landscaping. Please refer to: Los Angeles Department of Water and Power, the Bureau of Street Services, and the Los Angeles County Waterworks District. Additional resources include Calscape (native plants), Cal Poly Urban Forestry (tree species), Watershed Health (River Improvement Overlay [RIO] landscaping), and UC Davis (water usage).

In response to the comments provided by the PVP, the applicant implemented several modifications to the project. The plans were updated to include wayfinding signage for the Los Angeles Fire Department (LAFD) and to provide clear numbering for the building entrance on the southern elevation. The applicant determined that the addition of a canopy over the building entrance was infeasible due to the recessed design of the façade on the upper levels. The applicant also began consultation with the Los Angeles Department of Water and Power (LADWP) regarding the placement of the building in relation to existing power lines. It was confirmed that the metal siding will feature a matte 'Kynar' finish rather than a shiny one. The landscape plan underwent significant revisions, including the removal of private open space on the rooftop in favor of providing that area as common open space. Originally the project proposed open space in the form of nineteen 50-square foot balconies, a 400 square-foot private open space on the rooftop for a dwelling unit on the floor below, and a common open space of 2,123 square-feet on the rooftop. The design of the project was revised to devote more floor area to the dwelling units and instead the space on the rooftop was consolidated to provide a common open space of 3,280 square-feet. Additionally, tree selection was adjusted to respond to sun exposure, and the plans were revised to note that rooftop planters are designed to be 42 inches in height. Lastly, the updated landscape plan also incorporates drought-tolerant and native plant species.

PUBLIC HEARING AND COMMUNICATIONS

A public hearing on this matter was held by the Hearing Officer on Tuesday, June 24, 2025, via Zoom teleconference. The public hearing was attended by the applicant's representative team and approximately four (4) members of the public spoke at the hearing. The four (4) members of the community spoke in opposition to the project. Comments from both public hearings are documented in Public Hearing and Communications, Page P-1.

Generally, opposition from the community was regarding the design of the building, the lack of parking, concern about the lack of public transit, concerns about traffic impacts, whether the project would have environmental impacts, and the State Density Bonus program and the method of requesting relief from the Municipal Code.

The applicant has requested a Density Bonus through California Government Code Section 65915, and if the applicant complies with the eligibility standards of that code section, the City is required to approve the request. The City may only deny such a request if there is substantial evidence that the concessions or incentives requested will not result in identifiable and actual cost reductions, or, if the concessions or incentives would have a specific, adverse impact upon public health and safety, or the public environment, or on a historic resource.

Regarding the height of the structure, the zoning allows a height of 30 feet due to the '1XL' Height District. As the project is utilizing an Off-Menu Incentive to request an increase in height, up to 72 feet and two (2) inches, in order to provide space for the increase in dwelling units. There is no evidence that this increase in height would have a specific, adverse impact upon public health and safety. While there are aesthetic concerns about the appearance of the building, this is not sufficient to determine there is an impact on public safety.

Neighbors noted their concern about traffic impacts, however, a Transportation Study Assessment completed by LADOT was submitted to the file, showing that the project's estimated trip generation does not meet or exceed the City's screening criteria for preparing a transportation assessment, and as such, is not likely to result in traffic impacts.

Neighbors also noted their concern regarding the quantity of parking to be proposed in the project. As illustrated in the AB2097 Map included in Exhibit B of the Staff Report, the site is located within an 'AB 2097' area. In 2022, Assembly Bill (AB) 2097 amended Government Code Section 65863.2 and prohibited public agencies from enforcing any minimum automobile parking requirement on any residential, commercial, or other development project that is within one-half mile of a Major Transit Stop. According to the Affordable Housing Referral Form dated October 24, 2024, and the map referenced above, the intersection of Melrose Avenue and La Brea Avenue is a Major Transit Stop, as it is identified in the SCAG 2024 Regional Transit Plan, and the project site is located within one-half mile of the intersection. As such, the City may not require any parking for the project, although the applicant is voluntarily providing 23 parking spaces.

Regarding the placement of open space on the rooftop, that is not within the City's purview to require the applicant to modify the location of their open space. The applicant has not requested an incentive or waiver regarding the quantity of open space, and as designed, the open space complies with the Municipal Code requirements. Concerns regarding privacy are not grounds for denying the project as proposed. Regarding potential noise impacts from residents utilizing this open space, it is important to note that according to California Public Resources Code Section 21085, as added by Assembly Bill 1307, that noises generated by residents and their guests are not a significant effect on the environment. In other words, noise generated on the open space rooftop is not considered a noise impact in CEQA.

CONCLUSION

Staff recommends that the City Planning Commission determine that the proposed project and the impacts of the proposed project are within the scope of the Housing Element EIR and Addendum as identified in the Housing Element Streamlining Checklist, and the Mitigation Monitoring Program prepared for the project, and approve the requested Density Bonus with Off-Menu Incentives and the requested Waivers of Development Standards. Staff recommends that the waiver for dedication along Mansfield Avenue be provided and the existing 10-foot sidewalk to be permitted.

    c. The applicant shall improve Melrose Avenue with a new integral concrete curb, gutter and a 12-foot wide concrete sidewalk with tree wells or a minimum 5-foot wide sidewalk with landscaping of the parkway, to the satisfaction of BOE. Repair and/or replace any damaged or cracked roadway pavement along the property frontage.

d. The applicant shall improve Mansfield Avenue with integral concrete curb, 2-foot gutter and a 12-foot wide concrete sidewalk with tree wells or a minimum 5-foot wide concrete sidewalk with landscaping of the parkway, to the satisfaction of BOE. The project shall construct new curb ramps at the intersection per BOE standard and Special Order 04-0222. These improvements shall suitably transition to join the existing improvements satisfactory to BOE.

e. All improvements otherwise required by the Bureau of Engineering or other agencies shall be provided.

Environmental Conditions

19. The Mitigation Monitoring and Reporting Program (MMRP) included in the Housing Element Streamlining Checklist (Case No. ENV-2024-2366-HES) have been incorporated into this project and shall be enforced through all phases of the project. The applicant shall be responsible for implementing each Mitigation Measure (MM), Substitute Mitigation Measure, and Implementing Mitigation Measure identified in the MMRP and shall be obligated to provide certification to the appropriate monitoring and enforcement agencies that each MM has been implemented.

20. **MM AQ-1 Construction TAC Reduction Measures:** The Project shall use construction equipment that meets the CARB Tier 4 Final or USEPA Tier 4 off-road emissions for all equipment rated 50 horsepower or greater. A copy of each unit's certified tier specification or model year specification and CARB or SCAQMD operating permit (if applicable) shall be available upon request at the time of mobilization of each applicable unit of equipment.

21. **MM CUL-1 Archaeological Resources:** In the event that historic (e.g., bottles, foundations, refuse dumps/privies, railroads, etc.) or prehistoric (e.g., hearths, burials, stone tools, shell and faunal bone remains, etc.) archaeological resources are unearthed, ground-disturbing activities shall be halted or diverted away from the vicinity of the find so that the find can be evaluated. A 50-foot buffer within which construction activities shall not be allowed to continue shall be established by the qualified archaeologist around the find. Work shall be allowed to continue outside of the buffer area. All archaeological resources unearthed by project development activities shall be evaluated by the qualified archaeologist. If a resource is determined by the qualified archaeologist to constitute a "historical resource" pursuant to CEQA Guidelines Section 15064.5(a) or a "unique archaeological resource" pursuant to Public Resources Code Section 21083.2(g), the qualified archaeologist shall coordinate with the applicant and the City to develop a formal treatment plan that would serve to reduce impacts to the resources. The treatment plan established for the resources shall be in accordance with CEQA Guidelines Section 15064.5(f) for historical resources and Public Resources Code Sections 21083.2(b) for unique archaeological resources. Preservation in place (i.e., avoidance) is the preferred manner of treatment. If, in coordination with the City, it is determined that preservation in place is not feasible, appropriate treatment of the resource shall be developed by the qualified archaeologist in coordination with the City and may include implementation of archaeological data recovery excavations to remove the resource along with subsequent laboratory processing and analysis. Any archaeological material collected shall be curated at a public, non-profit institution with a research interest in the materials, if such an institution agrees to accept the material. If no institution accepts the archaeological material, they shall be donated to a local school, Tribe, or historical society in the area for educational purposes.

22. **MM CUL-2 Paleontological Procedures for Discretionary Projects:** As recommended in the Paleontology Resource Technical Memorandum, the following shall be conducted

as discussed in detail below: monitor all excavation and grading activities in areas underlain by soils or geologic units potentially containing paleontological resources; and identify, record, and evaluate all paleontological resources uncovered during project construction and submit a paleontological assessment report to the City for review and approval. In addition, during project construction, the following shall be conducted as discussed in detail below: cease all construction activities in the event of the discovery of paleontological resources; conduct fossil recovery as necessary by a qualified paleontologist; avoid handling of paleontological resources by parties other than the qualified paleontologist responsible for conducting fossil recovery; and resume construction activities only upon clearance by the qualified paleontologist. These procedures, as detailed below, shall be implemented to avoid impacts to paleontological resources or reduce potential impacts to a less-than-significant level: A qualified paleontologist shall prepare a monitoring plan, and worker education plan. The paleontologist's assessment and any required monitoring or required worker education plan shall be submitted to the City for review and approval prior to the commencement of construction activities. Any monitoring plan shall include requiring compliance with Mitigation Measure 4.5-1(d) for discovery, salvage and treatment.

23. **MM CUL-3 Worker Environmental Awareness Program, Fossil Salvage, and Construction Monitoring:** As recommended in the Paleontology Resource Technical Memorandum, prior to the start of construction, a paleontological monitor shall conduct training for construction personnel regarding the appearance of fossils and the procedures for notifying paleontological staff should fossils be discovered by construction staff, and notice that the identified qualified paleontologist is the only one authorized to handle paleontological find(s), including but not limited to collection and removal. Approved plans shall include statement of WEAP requirement.

24. **MM CUL-4 Construction Monitoring:** As recommended in the Paleontology Resource Technical Memorandum, a paleontologist or designated paleontological monitor shall monitor ground disturbance activities, including the initial five feet below the ground surface, as areas with high paleontological sensitivity may contain resources at shallow depths and within the first five feet. If the paleontological monitor determines that full-time monitoring is no longer warranted, he or she may recommend that monitoring be reduced to periodic spot-checking or cease entirely. Monitoring shall be reinstated if any new or unforeseen deeper ground disturbances are required. After ground disturbing activities are completed, the paleontologist or designated monitor shall complete and submit a report to the City verifying compliance with the monitoring plan. Monitoring plan shall show on the plans.

25. **MM CUL-5 Fossil Discovery, Salvage, and Treatment:**

    a. Discovery. If paleontological resources are uncovered during construction activities (in either a previously disturbed or undisturbed area), all ground-disturbing activities in the area of the find shall cease until a qualified paleontologist has evaluated the find, and identified and prepared an appropriate mitigation plan, in accordance with federal, state, and local guidelines, Construction activities in the area of the discovery shall commence again only after the identified resource(s) are properly processed by a qualified paleontologist, and if construction activities are cleared by the qualified paleontologist to continue. If cleared by the qualified paleontologist, construction activity may continue unimpeded on other portions of the project site that would not affect evaluation or recovery of the identified resource(s).

b. Fossil Salvage and Treatment. The qualified paleontologist or designated paleontological monitor shall recover intact fossils consistent with the mitigation plan and notify the City of any fossil salvage and recovery efforts. Typically, fossils can be safely salvaged quickly by a single paleontologist and not disrupt construction activity. In some cases, larger fossils (such as complete skeletons or large mammal fossils) require more extensive excavation and longer salvage periods. In this case the paleontologist shall have the authority to temporarily direct, divert or halt construction activity to ensure that the fossil(s) can be removed in a safe and timely manner. Any fossils shall be handled and deposited consistent with a mitigation plan prepared by the paleontological monitor. The qualified paleontologist shall prepare a report according to current professional standards including those of the SVP that describes the resource, how it was assessed, and disposition. The report shall be submitted to the City.

c. The requirements in this mitigation measure shall be shown on plans.

26. **MM NOI-1 Noise Shielding and Silencing:** Power construction equipment (including combustion engines), fixed or mobile, shall be equipped with noise shielding and silencing devices consistent with manufacturer's standards or the Best Available Control Technology. Equipment shall be properly maintained, and the Project Applicant or Owner shall require any construction contractor to keep documentation on-site during any earthwork or construction activities demonstrating that the equipment has been maintained in accordance with manufacturer's specifications. Measure shall be shown on plans.

27. **MM NOI-2 Use of Driven Pile Systems:** Driven (impact), sonic, or vibratory pile drivers shall not be used, except in locations where the underlying geology renders alternative methods infeasible, as determined by a soils or geotechnical engineer and documented in a soils report. Requirement shall show on plans.

28. **MM NOI-3 Enclosures and Screening:** All outdoor mechanical equipment shall be enclosed or screened from off-site noise-sensitive uses. The equipment enclosure or screen shall be impermeable (i.e., solid material with minimum weight of 2 pounds per square feet) and break the line-of-sight from the equipment and off-site noise-sensitive uses.

29. **MM NOI-4 Construction Staging Areas:** Construction staging areas shall be located as far from noise-sensitive uses as reasonably possible and feasible in consideration of site boundaries, topography, intervening roads and uses, and operational constraints. Requirement shall show on plans

30. **MM NOI-5 Temporary Sound Barriers:** Sound barriers, such as temporary walls or sound blankets, shall be erected between construction activities and noise-sensitive uses when construction activities are located within a line-of-sight to and within 500 feet of noise-sensitive uses. Requirement shall be shown on the plans.

31. **MM NOI-6 Vibration Mitigation:**

a. Impact pile drivers shall be avoided to eliminate excessive vibration levels. Drilled piles or similar methods are alternatives that shall be utilized where geological conditions permit their use.

b. Construction activities shall involve rubber-tired equipment rather than metal-tracked equipment.

c. The construction contractor shall manage construction phasing (scheduling demolition, earthmoving, and ground-impacting operations so as not to occur in the same time period), use low-impact construction technologies, and shall avoid the use of vibrating equipment when allowed by best engineering practices.

d. Requirement to be on plans.

32. **MM TRA-1 Construction Management Plan:** Any discretionary project that LADOT determines will have potential impacts to the circulation system even with application of existing regulatory compliance measures, shall prepare a detailed Construction Management Plan (CMP), including street closure information, detour plans, haul routes, and staging plans shall be prepared and submitted to LADOT for review and approval. The Construction Management Plan will formalize how construction would be carried out and identify specific actions that would be required to reduce effects on the surrounding community. The Construction Management Plan shall be based on the nature and timing of the specific construction activities and other projects in the vicinity of the Project Site, and shall include those elements required by LADOT for the project, which may include but are not limited to the following:
    a. Providing for temporary traffic control during all construction activities adjacent to public right of way to improve traffic flow on public roadways (e.g., flag men)
    b. Prohibition of construction worker parking on any adjacent residential streets
    c. Encouragement of carpool/vanpool of workers
    d. Prohibitions on construction-related vehicles parking on surrounding public streets
    e. Prohibitions on construction equipment or material deliveries within the public right-of-way
    f. Accommodation of all equipment on site as feasible
    g. Provisions for temporary traffic control during all construction activities adjacent to public right-of-way to improve traffic flow on public roadways (e.g., flag men)
    h. Scheduling of construction activities, including deliveries, to reduce the effect on peak hour traffic flow on surrounding arterial streets
    i. Rerouting of construction trucks to reduce travel on congested streets to the extent feasible
    j. Provisions of safety precautions for pedestrians and bicyclists through alternate routing and protection barriers and signage
    k. Provisions to accommodate the staging and storage of equipment
    l. Scheduling of construction-related deliveries to reduce travel during commuter peak hours
    m. Obtain necessary permits for any truck hauling from the City prior to issuance of any permit for the project.
    n. Noticing and coordination with any nearby schools that may be affected by construction activities, including deliveries, hauling and other construction transportation, to ensure safety of school children.
    o. Ensuring all feasible safety measures are taken to accommodate safe travel of pedestrian, bicyclists, and other users of the sidewalks around the construction site, including but not limited through the following measures:
        i. Construction staging as to maintain pedestrian access on adjacent sidewalks throughout all construction phases.
        ii. Maintaining adequate and safe pedestrian protection, including physical separation (including utilization of barriers such as K-Rails or scaffolding, etc.) from work space and vehicular traffic and overhead protection, due to sidewalk closure or blockage, at all times.

iii. Providing temporary pedestrian facilities adjacent to the Project Site and provide safe, accessible routes that replicate as nearly as practical the most desirable characteristics of the existing facility.
iv. Covered walkways shall be provided where pedestrians are exposed to potential injury from falling objects.
v. Keeping sidewalk open during construction until only when it is absolutely required to close or block sidewalk for construction staging.
vi. Reopening the sidewalk as soon as reasonably feasible taking construction and construction staging into account.

33. **MM TCR-1 Discovery of Potential Tribal Cultural Resources:** In the event that Tribal Cultural Resources are discovered during Project activities, whether or not a tribal monitor is present, and there is no CRMP or the CRMP does not cover treatment of inadvertent discovery, all work within a 50-foot buffer of the find shall cease and a Qualified Archaeologist meeting the Secretary of the Interior's Professional Qualification Standards for Archaeology shall assess the find. Tribes that are culturally and historically affiliated with the Project area and have requested consultation shall be notified, should any potential tribal cultural resource be discovered during project implementation. Construction personnel shall not collect or move any tribal resources. Construction activity may continue unimpeded on other portions of the project site. Unless agreed otherwise during the tribal consultation process or in a CRMP, if tribal cultural resources are discovered during construction, the applicant and/or owner shall retain a Qualified Tribal Monitor (as approved by the Tribe) if requested by the Tribe. Any and all archaeological/cultural documents created as a part of the Project (isolate records, site records, survey reports, testing reports, and monitoring reports) should be provided to consulting Tribes. Any tribal cultural resources discovered shall be treated with appropriate dignity and protected and preserved as appropriate with the agreement of the Tribal Representative and in accordance with federal, state, and local guidelines. If not otherwise provided in the CRMP, the Lead Agency and/or applicant shall, in good faith, provide all consulting Tribes the opportunity to consult on the disposition and treatment of resources. The location of the find of tribal cultural resources and the type and nature of the find will not be published, except to provide information to the Qualified Archaeologist, tribal representatives, and public agencies with jurisdiction or responsibilities related to the resources. An agreement will be reached with the Tribal Representative to mitigate or avoid any significant impacts to identified tribal cultural resources. Absent an agreement with the Tribal Representative, as provided in Public Resources Code Section 21083.2, the find should be preserved in place or left in an undisturbed state unless the Project would damage the resource. When preserving in place or leaving in an undisturbed state is not possible, excavation should not occur until testing or studies prepared by a Qualified Archaeologist have adequately documented the recovery of scientifically consequential information from and about the resource. Construction activity may continue unimpeded on other portions of the project site if cleared by the Qualified Tribal Monitor or Qualified Archaeologist. Ground Disturbance Activities in the area where resources were found may commence once the identified resources are properly assessed and processed by a Tribal Representative or, if no Tribal Representative is identified, a Qualified Archaeologist. The measure shall be shown on plans.

34. **Human Remains Inadvertent Discovery.** In the event that human skeletal remains are encountered at the project site during construction or the course of any ground disturbance activities, all such activities shall halt immediately, pursuant to State Health and Safety Code Section 7050.5 which requires that no further ground disturbance shall occur until the County Coroner has made the necessary findings as to the origin and disposition pursuant to California Public Resources Code Section 5097.98. In the event human

skeletal remains are discovered during construction or during any ground disturbance actives, the following procedures shall be followed:

a. Stop immediately and contact the County Coroner: 1104 N. Mission Road Los Angeles, CA 90033 323-343-0512 (8 a.m. to 5 p.m. Monday through Friday) or 323-343-0714 (After Hours, Saturday, Sunday, and Holidays)

b. If the remains are determined to be of Native American descent, the Coroner has 24 hours to notify the Native American Heritage Commission (NAHC).

c. The NAHC will immediately notify the person it believes to be the most likely descendent of the deceased Native American.

d. The most likely descendent has 48 hours to make recommendations to the Applicant, for the treatment or disposition, with proper dignity, of the human remains and grave goods.

e. If the Applicant does not accept the descendant's recommendations, the owner or the descendent may request mediation by the NAHC.

f. Funerary objects, called associated grave goods in Public Resources Code Section 5097.98, are also to be treated according to statute PRC 5097.98 (d)(1).

g. If Native American human remains and/or grave goods are discovered or recognized on the project site, then Public Resource Code 5097.9 as well as Health and Safety Code Section 7050.5 shall be followed.

h. Human remains and grave/burial goods shall be treated alike per California Public Resources Code section 5097.98(d)(1) and (2).

i. Preservation in place (i.e., avoidance) is the preferred manner of treatment for discovered human remains and/or burial goods.

j. Any discovery of human remains/burial goods shall be kept confidential to prevent further disturbance.

40. **Covenant.** Prior to the issuance of any permits relative to this matter, an agreement concerning all the information contained in these conditions shall be recorded in the County Recorder's Office. The agreement shall run with the land and shall be binding on any subsequent property owners, heirs, or assign. The agreement must be submitted to the Department of City Planning for approval before being recorded. After recordation, a copy bearing the Recorder's number and date shall be provided to the Department of City Planning for attachment to the file.

41. **Corrective Conditions.** The authorized use shall be conducted at all times with due regard for the character of the surrounding district, and the right is reserved to the City Planning Commission, or the Director pursuant to Section 12.27.1 of the Municipal Code, to impose additional corrective conditions, if, in the Commission's or Director's opinion, such conditions are proven necessary for the protection of persons in the neighborhood or occupants of adjacent property.

42. **Definition.** Any agencies, public officials or legislation referenced in these conditions shall mean those agencies, public offices, legislation or their successors, designees, or amendment to any legislation.

43. **Enforcement.** Compliance with these conditions and the intent of these conditions shall be to the satisfaction of the Department of City Planning.

44. **Indemnification and Reimbursement of Litigation Costs.**

    Applicant shall do all of the following:

    (i) Defend, indemnify and hold harmless the City from any and all actions against the City relating to or arising out of, in whole or in part, the City's processing and approval of this entitlement, including but not limited to, an action to attack, challenge, set aside, void, or otherwise modify or annul the approval of the entitlement, the environmental review of the entitlement, or the approval of subsequent permit decisions, or to claim personal property damage, including from inverse condemnation or any other constitutional claim.

    (ii) Reimburse the City for any and all costs incurred in defense of an action related to or arising out of, in whole or in part, the City's processing and approval of the entitlement, including but not limited to payment of all court costs and attorney's fees, costs of any judgments or awards against the City (including an award of attorney's fees), damages, and/or settlement costs.

    (iii) Submit an initial deposit for the City's litigation costs to the City within 10 days' notice of the City tendering defense to the Applicant and requesting a deposit. The initial deposit shall be in an amount set by the City Attorney's Office, in its sole

discretion, based on the nature and scope of action, but in no event shall the initial deposit be less than $50,000. The City's failure to notice or collect the deposit does not relieve the Applicant from responsibility to reimburse the City pursuant to the requirement in paragraph (ii).

(iv) Submit supplemental deposits upon notice by the City. Supplemental deposits may be required in an increased amount from the initial deposit if found necessary by the City to protect the City's interests. The City's failure to notice or collect the deposit does not relieve the Applicant from responsibility to reimburse the City pursuant to the requirement in paragraph (ii).

(v) If the City determines it necessary to protect the City's interest, execute an indemnity and reimbursement agreement with the City under terms consistent with the requirements of this condition.

The City shall notify the applicant within a reasonable period of time of its receipt of any action and the City shall cooperate in the defense. If the City fails to notify the applicant of any claim, action, or proceeding in a reasonable time, or if the City fails to reasonably cooperate in the defense, the applicant shall not thereafter be responsible to defend, indemnify or hold harmless the City.

The City shall have the sole right to choose its counsel, including the City Attorney's office or outside counsel. At its sole discretion, the City may participate at its own expense in the defense of any action, but such participation shall not relieve the applicant of any obligation imposed by this condition. In the event the Applicant fails to comply with this condition, in whole or in part, the City may withdraw its defense of the action, void its approval of the entitlement, or take any other action. The City retains the right to make all decisions with respect to its representations in any legal proceeding, including its inherent right to abandon or settle litigation.

For purposes of this condition, the following definitions apply:

"City" shall be defined to include the City, its agents, officers, boards, commissions, committees, employees, and volunteers.

Nothing in the definitions included in this paragraph are intended to limit the rights of the City or the obligations of the Applicant otherwise created by this condition.

FINDINGS

DENSITY BONUS / AFFORDABLE HOUSING INCENTIVES PROGRAM FINDINGS

1. Pursuant to LAMC Section 12.22 A.25(g)(2)(i)(c) state that the Commission shall approve a density bonus and requested incentive(s) unless the Commission finds that:

a. *The incentives do not result in identifiable and actual cost reductions to provide for affordable housing costs as defined in California Health and Safety Code Section 50052.5 or Section 50053 for rents for the affordable units.*

The record does not contain substantial evidence that would allow the City Planning Commission to make a finding that the requested incentives do not result in identifiable and actual cost reduction to provide for affordable housing costs per State Law. The California Health & Safety Code Sections 50052.5 and 50053 define formulas for calculating affordable housing costs for very low, low, and moderate-income households. Section 50052.5 addresses owner-occupied housing and Section 50053 addresses rental households. Affordable housing costs are a calculation of residential rent or ownership pricing not to exceed 25-percent gross income based on area median income thresholds dependent on affordability levels.

The list of On-Menu Incentives in Section 12.22 A.25 of the L.A.M.C. were pre-evaluated at the time the Density Bonus Ordinance was adopted to include types of relief that minimize restrictions on the size of the project. As such, the Director will always arrive at the conclusion that the Density Bonus On-Menu Incentives are required to provide for affordable housing costs because the incentives by their nature increase the scale of the project. Pursuant to the LAMC and Government Code Section 65915 and Assembly Bill (AB) 1287, the applicant is entitled to four (4) Incentives, in exchange for reserving more than 16 percent of the base density for Very Low-Income households. The proposed project will set aside 4 units, equal to approximately 20 percent of the base number of units, for Very Low-Income households. Accordingly, the applicant has requested four (4) Off-menu Incentives, consisting of an incentive to permit an increase in floor area, an increase in maximum height, a waiver of commercial corner landscaping, and a waiver of the loading zone requirements of the code.

Floor Area Ratio (FAR)

The C4-1XL Zone limits the floor area to one and one-half times the buildable area of the lot (also described as a Floor Area Ratio of 1.5:1). The applicant is requesting an Off-Menu incentive to permit a 170 percent increase in Floor Area, resulting in a Floor Area Ratio of 4.06:1 for a total building area of 28,717 square-feet. This increased floor area will allow for the construction of the affordable residential units and to expand the building envelope so the additional units can be constructed, and the overall space dedicated to residential units is increased.

Height

The C4-1XL Zone limits buildings to a height of 30 feet and two (2) stories. The applicant is requesting an Off-Menu incentive to permit a height of 72 feet and two (2) inches and six stories. This increase in building height will allow for the construction of the affordable residential units and to expand the building envelope so the additional

units can be constructed, and the overall space dedicated to residential units is increased.

Commercial Corner Landscape Relief

The site is subject to the commercial corner requirements of the Code (LAMC 12.22 A.23) as the site is a commercial used corner located in the C Zone in Height District Number 1XL, of which the lot line is separately by an alley for parcels which are improved with residential uses. The applicant is requesting an Off-Menu Incentive to waive the five-foot landscaped setback Commercial Corner requirements. This reduction in landscaped setbacks will allow for the construction of the affordable residential units and to expand the building envelope so the additional units can be constructed, and the overall space dedicated to residential units is increased.

Loading Requirements

The site is subject to the loading requirements of LAMC 12.21 C.6, which requires that a loading space shall be provided with every building in the C zone where the lot on which said building is located abuts an alley. The applicant is requesting an Off-Menu Incentive to waive the requirements to provide loading spaces adjacent to the alley. This reduction in the loading requirements will allow for the construction of the affordable residential units, as it expands the building envelope so the additional units can be constructed, and the overall space dedicated to residential units is increased. Along the rear façade of the building is the proposed transformer, the electrical room, the second stairwell, and the trash and recycling room. If the applicant were to provide the loading spaces in this area, that would necessitate the relocation of the trash and recycling room to a different floor or it would displace parking spaces proposed on the ground floor. Additionally, in order to provide vertical clearance above the loading spaces, it would potentially require the displacement of residential units on floors above, resulting in a taller project with an additional floor of residential units. By not requiring the loading space, the project is able to be constructed in a more compact manner, which provides an identifiable cost reduction as the applicant does not need to construct a larger building with higher construction costs. The applicant has noted that the loading for a mixed-use building is less intensive than for a commercial building (particularly as the proposed commercial retail space only occupies 605 square-feet of space) and that loading can occur within the ground floor parking area of the building.

b. **The incentives will have a specific adverse impact upon public health and safety or the physical environment, or on any real property that is listed in the California Register of Historical Resources and for which there are no feasible method to satisfactorily mitigate or avoid the specific adverse impact without rendering the development unaffordable to Very Low, Low and Moderate Income households. Inconsistency with the zoning ordinance or the general plan land use designation shall not constitute a specific, adverse impact upon the public health or safety*.***

There is no substantial evidence in the record that the proposed incentive(s) will have a specific adverse impact. A "specific adverse impact" is defined as, "a significant, quantifiable, direct and unavoidable impact, based on objective, identified written public health or safety standards, policies, or conditions as they existed on the date the application was deemed complete" (LAMC Section 12.22 A.25(b)). As required by Section 12.22 A.25 (e)(2), the project meets the eligibility criterion that is required for density bonus projects. The project also does not involve a contributing structure in a

designated Historic Preservation Overlay Zone or on the City of Los Angeles list of Historical-Cultural Monuments. The project is not located on a substandard street in a Hillside area or a Very High Fire Hazard Severity Zone. There is no evidence in the record which identifies a written objective health and safety standard that has been exceeded or violated. Based on the above, there is no basis to deny the requested incentives. Therefore, there is no substantial evidence that the project's proposed incentives will have a specific adverse impact on the physical environment, on public health and safety, or on property listed in the California Register of Historic Resources. Therefore, there is no substantial evidence that the proposed incentives will have a specific adverse impact on public health and safety.

c. The incentives <u>are contrary</u> to state or federal law.

There is no evidence in the record that the proposed incentives are contrary to state or federal law.

2. Government Code Section 65915 and LAMC Section 12.22.A.25 state that the Commission shall approve a density bonus and requested Waiver of Development Standard(s) unless the Commission finds any of the following:

a. The Waiver(s) will have specific adverse impact upon public health and safety or on any real property that is listed in the California Register of Historical Resources and for which there is no feasible method to satisfactorily mitigate or avoid the specific adverse Impact without rendering the development unaffordable to Very Low, Low and Moderate Income households. Inconsistency with the zoning ordinance or the general plan land use designation shall not constitute a specific, adverse impact upon the public health or safety.

There is no substantial evidence in the record that the proposed waivers of a development standard to reduce the rear yard, reduce the eastern and western side yard setbacks, or waive the transitional height requirement will have a specific adverse impact upon public health and safety or the physical environment, or any real property that is listed in the California Register of Historical Resources. A "specific adverse impact" is defined as "a significant, quantifiable, direct and unavoidable impact, based on objective, identified written public health or safety standards, policies, or conditions as they existed on the date the application was deemed complete" (LAMC Section 12.22. A.25(b)). The record does not identify a public health and safety standard in relation to this finding. There are no historic resources on the subject property. Potential environmental impacts have been analyzed in the Housing Element Streamlining Checklist prepared for the project; the CEQA Housing Element Streamlining Checklist, did not find any significant environmental impacts as a result of the project. The project is within a methane zone and will be subject to additional regulations as required. The property is not located on a substandard street in a Hillside area and is not located in a Liquefaction Zone, a Fault Zone, a Special Grading Area, a Very High Fire Hazard Severity Zone, or any other special hazard area.

Therefore, there is no substantial evidence that the proposed project, and the requested waivers will have a specific adverse impact on the physical environment, on public health and safety or the physical environment, or on any Historical Resource. Based on the above, there is no basis to deny the requested waivers.

b. ***The waiver[s] or reduction[s] of development standards will not have the effect of physically precluding the construction of a development meeting the [affordable set-aside percentage] criteria of subdivision (b) at the densities or***

with the concessions or incentives permitted under [State Density Bonus Law]" (Government Code Section 65915(e)(1)).

A Density Bonus project may request other "waiver[s] or reduction[s] of development standards that will have the effect of physically precluding the construction of a development meeting the [affordable set-aside percentage] criteria of subdivision (b) at the densities or with the concessions or incentives permitted under [State Density Bonus Law]" (Government Code Section 65915(e)(1).

The subject property is vested with the C4-1XL zone. As approved the project includes waiver of development standards to permit a zero-foot rear yard setback, a zero-foot eastern side yard setback, a zero-foot western side yard setback, and a waiver of the transitional height requirements of the Code.

As proposed, the granting of these waivers will allow for the development of the proposed residential building with the inclusion of the affordable residential units because the quantity of units allowed under the density bonus increases in FAR and the reduced yards and increased height allows for the development of the affordable units. The reduction in yards and increase in height will allow an increase in the building envelope which for the construction of the affordable units. As presented by the applicant, without the requested waivers, the project would be physically precluded from the construction of the proposed floor area and units described in the plans.

c. ***The Waivers are contrary to State/federal law.***

There is no substantial evidence in the record indicating that the requested waivers are contrary to any State or federal laws.

WAIVER OF DEDICATION AND/OR IMPROVEMENT MANDATED FINDINGS

Pursuant to LAMC Section 12.37 I.2, the Director may waive, reduce, or modify the required dedication(s) or improvement(s) as appropriate after making any of the following findings, based on substantial evidence in the record that:

3. The Director [Decision maker] may waive, reduce or modify the required dedication or improvement as appropriate after making any of the following findings, in writing, based on substantial evidence in the record:

(1) The dedication or improvement requirement does not bear a reasonable relationship to any project impact.

(2) The dedication or improvement is not necessary to meet the City's mobility needs for the next 20 years based on guidelines the Streets Standards Committee has established.

(3) The dedication or improvement requirement is physically impractical.

The proposed project involves the demolition of the existing, 2,815 square-foot commercial building and the construction, use, and maintenance of a new 32-unit residential building, including four (4) affordable units set aside for Very Low Income households, in six (6) stories of residential over one subterranean and one at-grade level of parking, plus commercial (605 square feet) and lobby area on the ground floor. Vehicular access to the project site will be provided via the alley at the rear of the property,

along the northern property line. Nine (9) parking spaces are provided at the ground floor level, along with a trash/recycling area, a bicycle room, lobby, and retail store front. A driveway leads to a subterranean level with an additional fourteen (14) vehicular parking spaces.

The project site is in an urbanized area surrounded by various uses. Parcels surrounding the Project Site to the west and east are zoned C4-1XL and improved with one-story commercial uses; parcels to the north across the adjacent alley are zoned R1-1 and improved with one- and two-story residential uses; parcels to the south across Melrose Avenue are zoned C2-1XL and are improved with a two-story church, and one- and two-story commercial and residential uses.

The Mobility Plan designates West Melrose Avenue as a Modified Avenue II Street which has a required right-of-way width of 80 feet with a required roadway width of 40 feet. The existing right-of-way width is 83 feet and the existing roadway width is 40 feet, and the street is improved with sidewalks, curbs, gutters, and a parkway with two (2) street trees. No dedication is required along Melrose Avenue, however, according to the January 15, 2025 Bureau of Engineering (BOE) letter, the project is required to construct a new integral concrete curb, gutter, and 12-foot wide concrete sidewalk with tree wells, or, five-foot sidewalk with parkway landscaping.

North Mansfield Avenue is designated as a Local Street – Standard in the Mobility Plan, which has a required right-of-way width of 60 feet with a required roadway width of 36 feet. The existing right-of-way width is 57 feet and the existing roadway width is 30 feet. Typically, a project would be required to provide a five (5) foot dedication to provide a half right-of-way width of 30 feet, a half roadway width of 18 feet, and a 12-foot sidewalk. According to the January 15, 2025, BOE letter, in the event the project is subject to California Assembly Bill 3177, only a two (2) foot dedication would be required, to provide a 27-foot half right-of-way, maintain the existing 15-foot half roadway, and provide a two (2) foot gutter and 12-foot concrete sidewalk. Additionally, a 20-foot radius property line return or 15-foot by 15-foot corner cut at the intersection with Melrose Avenue would be required.

The alley adjoining the site to the north is an alley with an existing roadway width of 20 feet. No dedication is required along the alley, according to the January 15, 2025 BOE letter, however, the applicant would be required to construct a 2-foot wide longitudinal concrete gutter, new concrete alley pavement and upgrade the alley intersection with Mansfield Avenue satisfactory to BOE.

Mansfield Avenue – Dedication

The applicant is requesting relief from the two-foot dedication along Mansfield Avenue, the two-foot sidewalk widening along Mansfield Avenue, the 20-foot property line return or corner cut dedication at the corner of Mansfield Avenue and Melrose Avenue, the required improvements along Manfield Avenue, and the required improvements along Melrose Avenue. The applicant does not include a request a waiver of the requirement to reasonably repair and replace any damaged or cracked pavement or concrete along the existing frontages on Melrose Avenue and Mansfield Avenue; or a request to waive the alley improvements.

The applicant would be required by Code to dedicate two feet along Mansfield Avenue to widen the sidewalk to 12 feet, as the existing sidewalk is 10 feet in width. However, the nearest sites along Mansfield Avenue, to the north of the site, are single-family dwellings

and there is no evidence that dedications along these properties would occur in any reasonable time frame.

The existing 10-foot sidewalk width along Mansfield Avenue is suitable for pedestrian travel. Requiring an additional two feet would reduce the overall lot area and therefore reduce the footprint and size of the proposed building. Being that the other abutting properties are unlikely to have an opportunity to observe this required dedication, the dedication on Mansfield Avenue would only be reserved for a small stretch of land directly adjacent to the project site. Therefore, the required dedication would not be necessary in meeting the city's mobility needs for the next 20 years as the sidewalk width is already suitable for pedestrian travel.

Mansfield Avenue – Improvements

As noted above, the applicant has requested relief from the requirement to construct integral concrete curb, 2-foot gutter and a 12-foot wide concrete sidewalk with tree wells or a minimum 5-foot wide concrete sidewalk with landscaping of the parkway; and construct new curb ramps at the intersection per BOE standard and Special Order 04-0222. The improvements would be required, to the satisfaction of BOE, to suitably transition to join the existing improvements.

The project is conditioned to provide a 10-foot wide sidewalk instead of a 12-foot sidewalk in order to maintain the sidewalk width that already exists on the block to the north of the project. However, the project shall provide the remainder of the improvements along Mansfield Avenue, including the curb ramps. The purpose of the curb ramp is to ensure that there is a smooth transition between a street and sidewalk, so that people using wheelchairs or other mobility devices, can safety cross the street. This ensures the streets are constructed to comply with the accessibility standards of the Americans with Disability Act (ADA). Additionally, ensuring the sidewalk and gutter are appropriately constructed, and that parkway landscaping or tree wells are provided, is consistent with the goals of the Mobility Plan. As there are no reasons why the construction of these improvements would be impractical, the waiver to provide these improvements is denied.

Corner of Mansfield Avenue and Melrose Avenue

As noted above, the applicant has requested relief from the requirement to provide a 20-foot radius property line return or a 15-foot by 15-foot corner cut at the intersection of Mansfield Avenue and Melrose Avenue. The purpose of this dedication is to improve line of sight for drivers and pedestrians at this intersection. Although the above grade portions of the building are not within this return area, there is a portion of the subterranean parking level which would be impacted by the dedication. As the site is within an AB2097 area, no parking is required for the project and therefore there is no requirement that the applicant provide subterranean parking. However, a condition of approval has been incorporated to permit the encroachment of the subterranean parking area within the dedication area. As there is no physical impracticality to providing this dedication, and the purpose is to ensure public safety, this waiver request is denied.

Melrose Avenue - Improvements

As noted above, the applicant is requesting relief from the requirement to construct a new integral concrete curb, gutter and a 12-foot wide concrete sidewalk with tree wells or a minimum 5-foot wide sidewalk with landscaping of the parkway. Between the curb and the property line, there is already a 12-foot sidewalk area provided. BOE is not requesting any dedication along Melrose Avenue. The project is conditioned to provide the improvements along Melrose Avenue, as ensuring the sidewalk and gutter are appropriately constructed,

and that parkway landscaping or tree wells are provided, is consistent with the goals of the Mobility Plan. As there is no reason why the construction of the improvements along Melrose Avenue would be impractical, the waiver to provided these improvements is denied.

ADDITIONAL MANDATORY FINDINGS

4. **CEQA.** The proposed project was found to be within the scope of the 2021-2029 Housing Element Environmental Impact Report (EIR), SCH No. 2021010130, ENV-2020-672-EIR, certified on November 24, 2021 (Housing Element EIR) inclusive of adopted Addenda (ENV-2020-6762-EIR-ADD1 and ENV-2020-6762-EIR-ADD2). The proposed project, which includes the development of 420,327 housing units (cumulatively, 456,643), is within the scope of the 2021-2029 Housing Element as it will build out the City's regional housing needs assessment (RHNA). A CEQA Streamlining Checklist for a Project Within the Scope of the Housing Element Program EIR, ENV Case No. ENV-2024-2366-HES (HE Streamlining Checklist), was prepared for the proposed project, pursuant to CEQA Guidelines Section 15168(c). Section 15168(c) provides for limited environmental review of subsequent projects under a Program EIR, where the project is found to be an activity within the scope of the program for which the EIR was prepared, and the impacts of the project are within the scope of the impacts analyzed in the EIR. Council found that the Housing Element EIR analyzed the impacts of the build-out of the RHNA, which involves the development of housing citywide. The HE Streamlining Checklist was prepared by staff to determine whether the impacts of the proposed project are within the scope of the Housing Element EIR. The prepared HE Streamlining Checklist supports that the impacts of the proposed project are within the scope of the Housing Element EIR and that no significant environmental effects not examined in the Program EIR will occur from the proposed project. All required mitigation measures from the Housing Element EIR Mitigation Monitoring Program (MMP) will be imposed on the proposed project. An MMP for the proposed project has been prepared for adoption by the decisionmaker.

5. The National Flood Insurance Program rate maps, which are a part of the Flood Hazard Management Specific Plan adopted by the City Council by Ordinance No. 172,081, have been reviewed and it has been determined that this project is located outside of a flood zone.

PUBLIC HEARING AND COMMUNICATIONS

The public hearing was held on June 24, 2025, at approximately 1:30 p.m. telephonically via Zoom. The hearing was conducted by the Hearing Officer, Valentina Knox-Jones, on behalf of the City Planning Commission in taking testimony for Case No. CPC-2024-2365-DB-WDI-VHCA. All interested parties were invited to attend the public hearing at which they could listen, ask questions, or present testimony regarding the project. The purpose of the hearing was to obtain testimony from affected and/or interested parties regarding this application. Interested parties were also invited to submit written comments regarding the request prior to hearing. The environmental determination was among the matters considered at the hearing.

The public hearing was attended by the applicant's representative team and several community members, of which four (4) members of the public spoke at the hearing.

Applicant Presentation:
The applicant's representative described the site location, project description, requested entitlements, and project history.

Public Comment:
As mentioned, four (4) public comments were provided, all of which opposed the project.

- **Marina Grigorova** – Opposed the project and the waivers and incentives being requested. There are no other multi-family dwellings along Mansfield Avenue and the height and FAR would exceed the other nearby structures. Melrose Avenue is a primarily one-story commercial district and the proposed building would be out of step with the character of the area. Noted that it is difficult to turn onto Mansfield Avenue from Melrose Avenue. Objected to the determination that the site is near a major transit stop. Disapproves of the waiver requests for dedication and improvement.

- **Rachel** (*last name not provided*) – Objected to the height of the project and believes the height is not proportionate to the neighborhood height. Concern that the height would result in reduced single-family home privacy. Believes this development will cause blight in the neighborhood and increase accidents. Objected to the number of dedication and improvement waivers being requested. Noted that it is difficult to turn onto Mansfield Avenue from Melrose Avenue and was concerned about the alley width. Concerns about the affordability levels of the market rate units in the development.

- **Saloni M.** – Believes this project is unsafe for the community. Noted the delicate balance of the neighborhood and indicated that the project does not resemble the surrounding blocks. Believes the waivers and requests should be denied.

- **Libby Amadi** – Concerned about the height of the structure and the placement of an open space deck on the rooftop, with views into residential properties. Believes the multi-story building will negatively impact the neighborhood. Characterized the area as a primarily residential neighborhood with a small one-story commercial strip.

The Applicant's representative provided a rebuttal to the public comment and noted that this request is based on State Density Bonus laws which allows the project to exceed base zoning and to request relief from other zoning standards. Noted that AB 3177 precludes local agencies from requiring street widening for affordable housing projects. Also noted the location of the nearby major transit stops. Noted that the affordable units will be consistent with LAHD Schedule 6.

Communications Received:

A copy of the written communication listed below can be found in Exhibit D.

Letters were received from nine (9) members of the community and noted their opposition to the project and generally the following subjects were discussed:

- Design
  - That multi-family structures take away the quaintness of the single-family neighborhood
  - Concern about the noise impacts from common open space being provided on the roof top
- Height
  - Concern that the height of the structure is out of scale with the neighborhood
  - Concern that the parking at ground level should be subterranean in order to reduce the height of the structure
- Parking
  - Lack of parking in the project
  - Concern that this will increase strain on parking in the region
- Transit
  - Concern about the frequency of bus service in the area
  - Concern about the designation of Major Transit Stops
  - Difficulty for pedestrians in the area
- Right of Way
  - Noted that Mansfield Avenue is a traffic bottleneck
  - Reduction in the required sidewalk width will impede pedestrian access
  - Relief from corner dedication would impact line of sight at the corner
  - Concern that the developer is trying to avoid community beautification improvements
  - Safety concerns if curb ramps were not to be provided
- Environmental
  - Aesthetic impacts
  - Concerns regarding increased traffic from a multi-family building
  - Concern that there will be traffic impacts on Mansfield Avenue
  - Concerns about construction impacts
  - Noise and pollution created by the project
  - Strain on local resources due to increase in population
  - Concern regarding emergency vehicle access

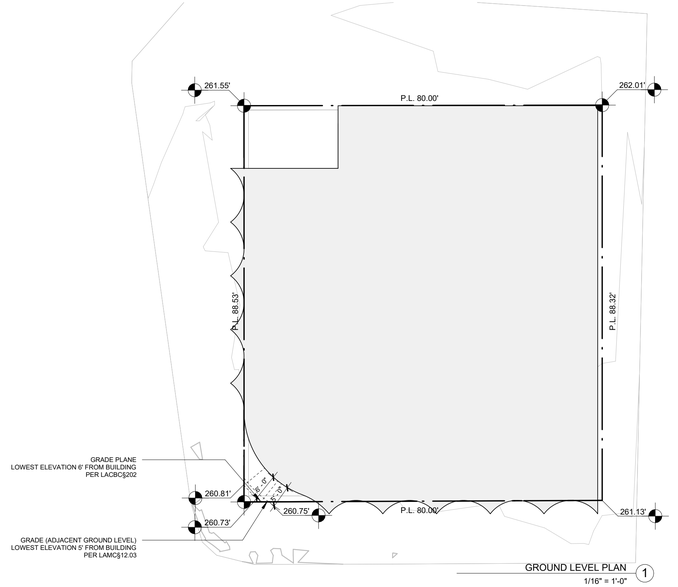
DENSITY / FAR CALCS
1/16" = 1'-0" (2)



GROUND LEVEL PLAN
1/16" = 1'-0" (1)

FAR CALCULATIONS

BUILDABLE AREA (PER LAMC §12.03 DEFINITIONS)
IN C4 ZONES, BUILDABLE AREA SHALL HAVE THE SAME MEANING AS LOT AREA

BUILDABLE AREA = LOT AREA = **7,074 SF**

FAR: 1.5:1
7,074 SF x 1.5 = 10,611 SF

35% DENSITY BONUS
10,611 x 1.35 = **14,325 SF MAX ALLOWED**

*INCENTIVE FOR FAR INCREASE TO 28,717 SF
PROPOSED FAR: 4.06:1 = **28,717 SF**

SITE DENSITY CALCULATIONS

DENSITY:
C4 = R4 = 400 SF / UNIT

TOTAL LOT AREA:
LOT AREA + ONE-HALF ALLEY (LAMC § 12.22.EXCEPTIONS)
7,074 SF + 800 SF = 7,874 SF
7,874 SF ÷ 400 SF / UNIT = 19.7 UNITS = **20 UNITS**

FIRST BONUS:
20 × 50% = 10 ADDITIONAL UNITS
SECOND BONUS:
20 × 20% = 4 ADDITIONAL UNITS

20 + 10 + 4 = 34 UNITS PERMITTED
32 UNITS PROPOSED **(32 UNITS PROVIDED)**

GRADE PLANE CALCS (PER LACBC§202)

261.55' + 262.01' + 261.13' + 260.73' + 260.81' = 1,306.23'
1,306.23' ÷ 5 = 261.25' (261' - 3")

GRADE PLANE = 261.25' (261' - 3")

6-story tower at Melrose & Mansfield

Dear Valentina,

In your review of case CPC-2024-2365-DB-WDI-VHCA for 6727 Melrose Ave (NE corner of N. Mansfield Avenue and Melrose Avenue), please consider the following:

1. The 6-story tower is proposed to be over 72 feet tall. While I understand that certain TOC and VLI incentives may be applicable, this height is more than TWICE what is allowed by the property's C4-1XL zoning. This would literally tower over the entire Melrose area. The proposed development is completely out of scale for the neighborhood, which consists primarily of one- and two-story buildings. Even the new apartment building at Highland & Melrose (at a much bigger lot, and at a much bigger intersection) is 5 stories high (4 residential) and significantly lower in total height.
2. Part of the overall height problem is the proposed ground level parking. Nowadays, all parking should be underground as much as possible. If two subterranean levels of parking are not feasible due to small lot size, then the project should be scaled back.
3. TOC: this site is located within walking distance to bus stops on Melrose and La Brea (there is no bus service on Highland south of Santa Monica). Buses along Melrose run every 30 minutes (if they run at all and less frequently on weekends) - not a major service. Buses along La Brea are also local, albeit more frequent. There used to be a rapid service along Santa Monica, but no more, and the local service is basically a homeless shelter on wheels. These connections are not conducive to actually using them for work/study. Vehicles would be required for anybody living/working at the proposed building (see #4). This is TOC in the name only.
4. Separately from parking design, not enough parking is proposed overall (this lot is just too small). The idea that 22 vehicle stalls would be sufficient for 27 units and retail is lunacy (see #3). Inevitably, future residents and visitors will need to park on the streets, which are already impacted and part of the preferential parking zone. Even with the preferential parking permits, street parking is challenging. This project will exacerbate an already impacted situation.
5. Mitigation of construction impacts. Project construction will have significant impacts, especially traffic impacts, on the neighborhood. Both the alley on the north side of the subject property and Mansfield Avenue are narrow: any construction traffic will result in complete blockages. The City should require the developer to prepare, at a minimum, an excavation and transportation plan, to demonstrate how they're going to mitigate construction impacts, abide by weight limits on Mansfield Avenue, and minimize impact on Melrose Avenue, which is an emergency vehicle route.

While I support redevelopment of this underutilized property, the proposed project is simply too tall for the available lot and unfit for the neighborhood.

Thank you for your consideration.

-Marina

RE: CPC-2024-2365-DB-WDI-VHCA (6721 Melrose Avenue)

This letter presents the position of the Greater Wilshire Neighborhood Council (GWNC) Land Use Committee and the GWNC Board of Directors on this project. The applicant provided a power point presentation describing the project and answered questions from the Land Use Committee meeting, held via Zoom on August 27, 2024.

The discussion at the Land Use Committee Meeting led to a motion to support the project for several reasons including (1) its location on Melrose Avenue, a commercial corridor, (2) the provision of on-site parking for the commercial customers and residents although none is legally required, and (3) the attractive nature of the building's exterior design. At that meeting, the Committee also heard concerns from neighbors who noted the abundance of other affordable housing projects along Melrose near the site and access issues related to the project's use of an alley for project traffic entering the rear (north side) of the building.

The GWNC Board of Directors met to discuss this project on September 11, 2024. The discussion at the Board meeting where many of the same issues arose. The Board of Directors approved the following motion which was also approved by the Land Use Committee

> The Greater Wilshire Neighborhood Council supports the project located at 6721 Melrose Ave - the construction, use, and maintenance of a new 29,313 sf, 6-story, 32-unit residential building with 4-VLI units, over one subterranean and one at-grade level of parking with 23 parking spaces total; plus a roof deck with open space and amenities, and 519 sf of commercial and lobby space on the ground floor - as presented to the GWNC Land Use Committee on August 27, 2024.

Thank you for your time and consideration.

CASE No. CPC-2024-2365-DB-WOI-VHCA

Eve Mekerdichian <emekerdichian@gmail.com> Wed, Jun 18, 2025 at 12:16 PM
To: "valentina.knox.jones@lacity.org" <valentina.knox.jones@lacity.org>

Dear Ms. Knox-Jones,

Pursuant to the Notice of Requested Waiver sent regarding 6721-6727 W Melrose Ave I am writing on behalf of my parents who live on N. Citrus Ave. This project is an unnecessary nuisance. The idea that we need to fill the Melrose corridor with more multi-family structures is taking away from the quaintness of our neighborhood. The traffic that would be added by the 36-42 vehicles that will accompany the occupants of this structure will put undue pressure on our streets and utilities.

Also allow any variance or waiver from the building codes opens up a myriad of issues with walking around the area more difficult than it is already.

I would also like to bring to the attention of the city planning office that the destruction of the existing buildings and the construction of the new building will cause noise and physical pollution.

I would ask that the city planning office deny the application and leave our neighborhood to the single family homes that have been here since the city of Hollywood was conceived.

Dear Ms. Knox-Jones and LA City Planning:

On June 3, 2025, the Greater Wilshire Neighborhood Council (GWNC) was informed of a waiver request for the project at 6721 Melrose Ave. (CPC-2024-2365-DB-WDI-VHCA).

Please note that our letter of support sent to your office in December 2024 was for the project AS PRESENTED AT THAT TIME. Please do NOT infer our support for any changes being sought under the current waiver request.

Given the June 20th hearing date and because the Notice of Requested Waiver was not provided to the GWNC in time for our Land Use Committee to 1) take the matter up at a regular monthly meeting and 2) refer the matter to the General Board for action, we respectfully request that the waiver either be denied or the waiver hearing be delayed until July 11th at the soonest.

Our Land Use Committee will take this matter up at its June 24th meeting, and our board will then have the opportunity to approve a motion at its July 9th 6:30 p.m. meeting. We would be able to share our position with your office on July 10th.

Feel free to contact me at 323-493-7119 to discuss. Thank you.

Case No.: CPC-2024-2365-DB-WDI-VHCA - Response and Objection to Requested Waiver

Dear Ms. Knox-Jones:

I am the Trustee of the Trust that owns the property located at 6825 Melrose Avenue. I write in response to the attached Notice to submit my objection to the waiver requests associated with Case No. CPC-2024-2365-DB-WDI-VHCA concerning the property at 6721 - 6727 W. Melrose Avenue.

My objections are based on several critical concerns that affect the community's aesthetics, safety, infrastructure, and quality of life:

- **Aesthetic Degradation:**
  - Reduction in sidewalk width and elimination of landscaping features will significantly detract from the visual appeal of the neighborhood.
  - Absence of tree wells and green spaces diminishes urban greenery, reducing shade and environmental beauty.
- **Increased Flooding Risks:**
  - Waiver requests to omit integral concrete curbs and gutters compromise effective water drainage.
  - The neighborhood already experiences flooding during the rainy season, and this project will exacerbate the issue, leading to property damage and safety hazards.
- **Traffic and Wear & Tear on Infrastructure:**
  - The addition of 32 residential units, including commercial spaces, will significantly increase traffic density in the area.
  - More vehicles will contribute to higher wear and tear on local roads, sidewalks, and existing infrastructure without corresponding improvements.
  - Lack of proper curb ramps and pedestrian pathways will create dangerous conditions for both pedestrians and drivers amid increased traffic flow.
- **Public Safety and Accessibility Concerns:**
  - Reducing sidewalk space hinders safe pedestrian movement, especially for individuals with disabilities, seniors, and families with strollers.
  - Non-compliance with ADA standards undermines efforts to create an inclusive, accessible community.
- **Environmental Impact:**
  - Loss of green spaces and reduced landscaping negatively affect air quality, urban cooling, and biodiversity.
  - Increased urban heat island effect due to lack of vegetation and shaded areas.
- **Strain on Community Resources:**
  - The expected population growth from the new development will put additional pressure on local resources, including public transportation, schools, and emergency services.
- **Precedent for Future Developments:**
  - Approving these extensive waivers sets a dangerous precedent, signaling to future developers that infrastructure and community well-being can be compromised for convenience.

Considering the broad scope of the requested waivers, including the elimination of improvements along both Mansfield Avenue and Melrose Avenue, I strongly urge the City Planning Commission to deny these requests. This development, as

proposed, poses unacceptable risks and detriments to our community.

Thank you for your attention to these concerns.

Sincerely,

Comments on CASE NO: CPC-2024-2365-DB-WDI-VHCA

Resident located in the area affected by this CASE and I have concerns regarding this project.

OVERALL:

I am opposed to all waivers requested by the applicant.

In general the request for waivers only benefit the applicant and leave the surrounding community in a worse condition post their building efforts completion.

Requested Action concerns:

1. By waiving the 2 foot dedication along Mansfield Avenue reduces the public's ability to navigate a public walk way, the only beneficiary in this case is the applicant.

2. This request asks for an unknown reduction in the dedicated 20 foot radius property line return or a 15 foot by 15 foot corner cut at the intersection of Mansfield Avenue and Melrose Ave. This request opens for the possibility that the granted waiver could reduce the property line requirement to at worst ZERO feet and thus would negatively impact residents as not providing for corner sight line ease, and for reducing the overall crowding nature of buildings upon public right of ways.

3. This request for a waiver is truly cheating out on community required improvements related to post construction accessibility. The amount of work that will be required to complete the building requires a significant outlay of capitol, and yet the requester desires to “cheap out” on neighborhood improvements and beautification which would benefit not only their projects residents, but residents that would suffer construction impacts for the next few years to come.

4. This request is essentially entails my concerns listed above for #3 in addition to other concerns to be stated next. My additional concerns related to this request relate to the requesters desire to not provide curb ramps at the intersection - truly an absurd request. Rquester seeks again to save money and not benefit the neighborhood or the general public by ensuring post their site construction that sidewalk accessibility for all persons, no matter their ability level, is a paramount feature. This request leads one to believe that again the requester is more concerned about his financial bottom line that the residents of our community.

Thank you for listening to my concerns and I am available at your convenience for questions or for additional responses as needed.

Sincerely,

John

Hello Saloni and Aamir,

You can provide your objections to the project to the staff on this project by emailing valentina.knox.jones@lacity.org. She can place you on the interested parties list for this project so you get notification of the hearings and determinations, and you can have her provide your comments to the hearing body as part of the public record.

That said, while I understand it can be a big change to see larger projects in Los Angeles, this site is eligible for the density bonus and Transit Oriented Communities incentive programs- these programs provide projects with the ability to be larger than a standard project in exchange for the creation of onsite affordable housing units. This project is adding 3 units as very low income and that allows it to increase its size by 35%. The standard for these projects is established in State Law through the Density Bonus laws there and is not something the City of Los Angeles can overturn.

Take care,
Emma

Dear Valentina,

Thank you for letting me and my neighbors express our objections to the project at the corner of Mansfield and Melrose Avenues. We understand that it's a required formality, but it's appreciated nonetheless.

A few things came up during the meeting, which I'd like to follow-up on.

1. My neighbor Saloni rightfully brought up the issue of intersection safety. This is a recurring problem, specifically due to people attempting to make turns onto Mansfield Ave from Melrose (either EB or WB). The reason for that is typically stopped traffic within the commercial portion of the Mansfield block, which is often not visible from Melrose. While the counsel for the developer is correct that the width of Mansfield is uniform throughout, it is the commercial portion that is a bottleneck. The counsel further mentioned that the project has cleared CEQA. Therefore, in accordance with CEQA, I request to see what mitigation measures will be implemented to alleviate traffic issues at that intersection, considering that this project alone will double the number of cars entering the street and no street improvements are proposed. I do not recall any traffic studies conducted here.

2. According to the project's counsel, the rooftop terrace would face Melrose and not the neighborhood to the north. While the idea that they would intentionally block the view of Hollywood sign is preposterously laughable, placement of HVAC equipment on the north side of the building indicates that the noise generated by said equipment will be broadcasted through the neighborhood from the height of 72 feet day and night. As above, in accordance with CEQA, I request to see what mitigation measures will be implemented to alleviate the inevitable noise.

3. Regarding the nearest major transit hub at La Brea and Melrose. Bus line #212 (N/S on La Brea) runs 20 min even during morning rush hour (e.g., 8 am) and more than 1 hour apart during evening hours (https://cdn.beta.metro.net/wp-content/uploads/2025/06/20101333/212_TT_6-22-25.pdf). Bus line #10 (E/W on Melrose) runs 30-40 min during rush hour, and more than 1 hr during other times (https://cdn.beta.metro.net/wp-content/uploads/2025/06/20101124/010_TT_06-22-25.pdf). With regard to a better served intersection at La Brea and Santa Monica, it's 0.75 miles away from the proposed project. As such, this project is not well served by public transit and will instead have a negative impact on the surrounding streets (please see point #1).

4. The project is proposed for a single-family neighborhood. There is no R-2 or R-3 zoning within adjoining blocks. The claim that the project is situated within a mixed commercial/residential neighborhood is a falsehood. Single-story neighborhood commercial along Melrose is simply not the same thing as a 7-story high-density residential tower. There is nothing even close to that height anywhere nearby. Furthermore, the nearest developments of similar height are located either within multi-family neighborhoods and/or taller commercial blocks.

Please make no mistake about this. Allowing this project to proceed is bullying, plain and simple. Regardless of how legally contrived it is, regardless of how many loopholes the proponent's attorneys will use to justify this, it is neighborhood destruction for many years to come. As Rachel correctly pointed out, many of the newer apartment buildings in Hollywood have significant vacancies. Many storefronts on Melrose are already empty. This project will become urban blight, sticking out like a sore thumb for everybody to see. We don't need an Oceanside Plaza in our neighborhood.

Thank you,

-Marina

Project at 6721-6727 Melrose Ave

I am writing to express my strong opposition to this development. It is too big for this area and will have a detrimental impact on residents and impede traffic in the area during construction and upon completion. I am not against new developments if they are reasonable.

Also, the inclusion of four affordable units, by the alley, of course, is laughable, considering their size. I also understand waivers have been requested for various safeguards.

This project will be a major disruption to the neighborhood.

Regarding Project at 6721-6727 W. Melrose Avenue, 90038
Case No. CPC-2024-2365-DB-WDI-VHCA

I am writing to express my strong objection to the proposed 32-unit residential development at 6721-6727 W. Melrose Avenue. The scale and density of this project are entirely out of proportion with the surrounding residential and commercial character of the neighborhood.

Melrose Avenue is already a heavily trafficked two-lane street, and Mansfield Avenue is a narrow, residential roadway that struggles with congestion and limited parking. The addition of 32 new units—with only 24 proposed parking spaces—will exacerbate these issues, increasing traffic volume, reducing pedestrian and vehicular safety, and creating further strain on already limited parking resources. Emergency vehicle access is already a concern in this area and could be significantly compromised by this development.

Furthermore, the request for a Waiver of Dedication and Improvement to reduce spatial requirements is deeply troubling, particularly given the scale of the proposed project. Rather than mitigating the impact on the neighborhood, this waiver would only intensify it.

The height and massing of the proposed building are also inconsistent with the existing built environment. Most nearby structures are no more than three stories tall, and introducing a building of significantly greater height would disrupt the architectural cohesion and residential quality of life that current residents value.

I urge you to reconsider the scope and scale of this development in light of the profound and irreversible impacts it would have on our community. Thoughtful urban planning should reflect the needs and character of existing neighborhoods, and this project, as currently proposed, fails to do so.

Thank you for your time and consideration.

Sincerely,
Mika Toyoura

I am writing regarding the above case which involves a proposed building at 6721-6727 Melrose Avenue. I live about a block away near Orange Dr. and Clinton St. I don't think the seven story building will affect my backyard privacy but I do think it will be terrible for the neighbors directly north and south of the building.

I am most concerned about the proposed rooftop amenities deck which is supposed to have fire pits. I've had experience with something like this elsewhere and I expect the sound will carry far and affect the peace and quiet of the neighborhood. I cannot understand why the city would possibly allow this.

Thank you for your consideration.

B. PROGRAM EIR BACKGROUND

B.1 CEQA Guidelines Section 15168

The California Environmental Quality Act (CEQA) provides for limited environmental review of subsequent projects under a Program EIR. (CEQA Guidelines Section 15168.) Later activities under a continuing program analyzed in the Program EIR must be examined to determine whether any additional environmental analysis must be conducted. (Guidelines Section 15168(c)(1).) If a lead agency finds that pursuant to Guidelines Section 15162, no subsequent EIR would be required, the lead agency can approve the activity as being within the scope of the project covered by the Program EIR, and no new environmental document would be required. (Guidelines Section 15168(c)(2).) Whether a later activity is within the scope of a Program EIR is a factual question that the lead agency determines based upon substantial evidence in the record. (Guidelines Section 15168(c)(2).) The lead agency shall incorporate feasible mitigation measures from the Program EIR Mitigation and Monitoring Program (MMP) into later activities in the program. (Guidelines Section 15168(c)(3).) Where the later activities involve site specific operations, the lead agency should use a written checklist to determine whether the environmental effects of the site-specific operations are within the scope of the Program EIR. (Guidelines Section 15168(c)(4).)

B.2 Program EIR

In certifying the Program EIR and approving the project, the City Council adopted the following findings related to the scope of the project analyzed in the Program EIR and the types of impacts analyzed:

> *The EIR analyzed the build out of the Regional Housing Needs Assessment (RHNA), that is the build out of 420,327 housing units in eight years (456,643 RHNA minus 36,316 housing units that have received approvals but have not yet been built and/or received the certificate of occupancy [pipeline projects]). The EIR analyzed the program-level impacts from the full build out of the RHNA, as well as the project-level impacts that occur from the development of the types of housing projects that will be developed from build out of the RHNA. The following types of housing projects were analyzed and within the scope of this EIR:*
>
> - *Multi-family residential, ranging from small apartment buildings with two to 10 units, medium apartment buildings with between 11-49 units, large apartment buildings with between 50-200 units, or larger apartment buildings and high-rise structures with more than 200 units.*
> - *Single-family residential, ranging in size and scale from smaller single-family homes to larger single-family homes, small-lot subdivisions and new single subdivisions.*
> - *Accessory dwelling units (ADUs), including attached ADUs, detached ADUs, Junior ADUs, ADUs converted from existing floor area, multiple ADUs on lots with existing multi-family dwellings, and Movable Tiny Homes.*
> - *The mixed-use development ranges in size and scale from neighborhood commercial mixed-use with smaller nonresidential uses, to high-rise mixed-use with larger nonresidential uses.*

- *Conversion and/or rehabilitation of existing nonresidential, residential, or mixed-use structures to be used for housing.*

Housing types for different income levels were analyzed, including single-resident occupancy and affordable housing that may be for families, seniors, residents with special needs or permanent supportive housing. The EIR also analyzed the impacts from various locations, geographies, and environments where build out of the RHNA could occur, including the following:

- *Sites currently zoned for residential uses, including multi-family and single-family uses;*
- *Sites currently zoned for commercial uses, which permit residential uses;*
- *Sites currently zoned for hybrid industrial uses, which permit joint live-work residential uses;*
- *Non-vacant sites, and sites with existing housing;*
- *Sites located near public transit;*
- *Sites located in a Historic Preservation Overlay Zone (HPOZ)*
- *Sites located in areas with special environmental considerations, such as areas located by Open Space, Hillside Areas, Very High Fire Hazard Severity Zones (VHFHSZ) or Coastal Zones.*

To analyze project-level impacts on the environment from the variety of housing types and locations that could potentially be built to accommodate the RHNA citywide, the City established a team of experienced project planners who have experience in reviewing environmental documents and analyzing or consulting on environmental impacts for housing projects, as well as other development types, across the entire City geography, including project planners who work in the Major Projects Section, who are responsible for reviewing and preparing all EIRs citywide for the Planning Department; planners who work in the Citywide Environmental Policy Unit who are responsible for advising on all CEQA impact issues, training and advising planners on preparing CEQA clearances; as well as project planners who review and prepare exemptions, negative declarations, mitigated negative declarations, and sustainable communities environmental assessments (SCEAs) within specific geographies in the City. After assembling this consulting team, the City surveyed the thousands of environmental assessments that have been prepared in the last five years for housing development of the type that will build out the RHNA and selected 54 case studies to discuss in the EIR which identify both the typical- and worst-case environmental impacts from housing development. In the survey of environmental assessments, it was determined that the City reviews hundreds of discretionary housing projects every year for CEQA compliance, that the largest majority of housing projects do not require mitigation, as many housing development projects are found to be exempt from CEQA (specifically, hundreds of categorical exemptions are used for small to medium scale housing projects, including Class 32 for infill projects up to 75 units or less); and less than 10 percent of discretionary housing projects require an EIR due to significant and unavoidable impacts. Based on this, the case studies are more heavily weighted toward larger-scale projects or those in sensitive environments that are more likely to have significant impacts. Smaller projects in more urban infill areas typically do not require an EIR, a mitigated negative declaration, or SCEA, unless there are specific site conditions, such as historical resources, site contamination, or archaeological resources, that

raise potential environmental impact concerns. The case studies, which include EIRs, mitigated negative declarations, and SCEAs, were selected based on the type of project (e.g., multi-family residential, single-family residential, ADUs, mixed-use development, and conversion and/or rehabilitation), scale of project (single-family to large tower/mixed use), locations with the broadest range of geographies and environmental conditions, and levels of development and density (hillsides, urban, regional centers, coastal, and suburban areas), as well as projects that include income-restricted projects. The intent was to be conservative and identify all of the reasonably foreseeable ways housing can result in environmental impacts in the City, as well as identify the best mitigation measures developed to address those impacts. The City finds the case studies reviewed in the EIR and their identified level of impacts (i.e., no impacts, less than significant impacts, less than significant impacts with mitigation, and significant and unavoidable impacts) are representative of the typical- and worst-case environmental impacts of housing development to be built to accommodate the RHNA. Also, the City finds that it is not reasonably foreseeable that housing development that will build out the RHNA will have significant impacts in those impact categories that were scoped out in the Initial Study (Appendix A to the FEIR). Additionally, the City finds the mitigation measures, developed in the EIR and included in the MMP, to be used by projects within the scope of the EIR, are comprehensive and based on the screening criteria included in those mitigation measures, further studies, and performance standards will, in a majority of circumstances, reduce environmental impacts from housing development to less than significant. However, based on the findings below and the EIR analysis, even with the application of the mitigation measures in the MMP, significant impacts identified in the Program EIR Findings can still occur from housing development of all types throughout the City. The City Council finds the EIR has analyzed and identified the significant impacts that are reasonably foreseeable from housing development in the City for the types of housing projects (described above) that will accommodate the RHNA. (Appendix A: Citywide Housing Element 2021-2029 and Safety Element Updates Final EIR, CEQA Findings of Facts and Statement of Overriding Considerations.)

Additional information regarding the analysis of the impacts from housing projects or the Housing Element Program and build-out of the RHNA is provided in Environmental Analysis, Section 4.0, of the Draft EIR.

B.3 Environmental Impacts Analyzed in the Program EIR

The environmental impacts analyzed and the impact conclusions identified for Projects within the Scope of the Program EIR are shown in Appendix A, CEQA Findings of Facts and Statement of Overriding Consideration for the 2021-2029 Citywide Housing Element and Safety Element Updates, and in the Program EIR, which may be found at https://planning.lacity.org/development-services/eir.

B.4 Program EIR Mitigation Measures

The City Council adopted the MMP for the 2021-2029 Housing Element, provided in Appendix B. The MMP provides that, subject to City authority, the applicable mitigation measures in the MMP shall be imposed as conditions of approval for a project analyzed as a subsequent approval pursuant to CEQA Guidelines Section 15168.

C. FINDING THAT THE PROPOSED HOUSING PROJECT IS A PROJECT WITHIN THE SCOPE OF THE PROGRAM FOR WHICH THE PROGRAM EIR WAS CERTIFIED

Check all of the boxes in Table C-1 that describe the Proposed Housing Project:

Table C-1

☑	**Multi-family residential development** – Range from small apartment buildings with two to 10 units, medium apartment buildings with between 11-49 units, large apartment buildings with between 50-200 units, or larger apartment buildings and high-rise structures with more than 200 units
☐	**Single-family residential development** – Range in size and scale from smaller single-family homes to larger single-family homes, small lot subdivisions, and new single-family subdivisions
☐	**Accessory dwelling unit (ADU)** - Include attached ADUs, detached ADUs, Junior ADUs, ADUs converted from existing floor area, multiple ADUs on lots with existing multi-family dwellings, and Movable Tiny Houses
☑	**Mixed-use development** - Range in size and scale from neighborhood commercial mixed use with smaller nonresidential uses, to high-rise mixed-use with larger nonresidential uses

CONCLUSION

Check one of the following:

☑ **AT LEAST ONE BOX IN TABLE C-1 IS CHECKED**

The Proposed Housing Project is within the scope of the program that was analyzed in the Program EIR. Go to Section D and E to determine if the site-specific environmental effects of the Proposed Housing Development are within the scope of the Program EIR.

☐ **NONE OF THE BOXES IN TABLE C-1 ARE CHECKED**

The Proposed Housing Project is not within the scope of the program that was analyzed in the Program EIR. A separate environmental analysis is required.

D. MITIGATION MEASURES APPLICABLE TO THE PROPOSED HOUSING PROJECT

The following mitigation measures (MMs) from the MMP (Appendix B) are relevant and applicable to the Proposed Housing Project based on the mitigation measure thresholds of applicability and based on a review of the Proposed Housing Project:

Check all MMs from the MMP that apply to the Project and provide a brief explanation of why any mitigation measures are not triggered by the applicability standard in the mitigation measure:

Mitigation Measure		Applies to Proposed Housing Project
Air Quality		
4.2-2(a)	Construction Emissions Reduction	☐ Yes ☑ No
4.2-2(b)	Operations Emissions Reduction	☐ Yes ☑ No
4.2-3	Construction TAC Reduction Measures	☑ Yes ☐ No

Brief explanation:

The Project would not exceed the construction screening criteria listed in Mitigation Measure 4.2-2(a) or 4.2-2 (b). See the attached Air Quality Technical Memorandum for more detail. Therefore, the Project would not be required to provide a detailed Air Quality Impact Analysis. As discussed in the Air Quality Technical Memorandum, the effects of the Project are examined in the Program EIR's analysis under Threshold 4.2-2 and would result in emissions that do not exceed SCAQMD thresholds and the Project would not exceed the operational screening criteria listed in Mitigation Measure 4.2-2(b). Accordingly, the mitigation measures listed as part of Mitigation Measures 4.2-2(a) and 4.2-2(b) would not be required or otherwise applicable to the Project, which would not result in any new or increased impact pursuant to Threshold 4.2-2.

With respect to Mitigation Measure 4.2-3, the Project would be conditioned to utilize construction equipment that meets CARB Tier 4 Final or USEPA Tier 4 off-road emissions for all equipment rated 50 horsepower or greater. Therefore, the Project would not be required to conduct a detailed Air Quality Impact Analysis and construction health risk assessment, or submit to a mitigation plan, because the Program EIR has determined that projects using such low-emissions equipment do not generate substantial pollutant concentrations.

Mitigation Measure		Applies to Proposed Housing Project
Biological Resources		
4.3-1(a)	Biological Resources Reconnaissance Survey and Reporting	☐ Yes ☑ No
4.3-1(b)	Sensitive Species/Habitat Avoidance: Pre-Construction Bird Nest Surveys, Avoidance, and Notification	☐ Yes ☑ No
4.3-1(c)	Focused Surveys for Rare Plants	☐ Yes ☑ No
4.3-1(d)	Adaptive Management Plan	☐ Yes ☑ No
4.3-2(a)	Habitat Mitigation and Monitoring Plan	☐ Yes ☑ No
4.3-2(b)	Protected Tree and Tree Canopy Survey	☐ Yes ☑ No

Brief explanation:

The Project Site is currently occupied by a commercial building that occupies approximately 2,815 square feet of floor area and an associated surface parking area with eight spaces, all within a heavily urbanized area of the City. The City encompasses a variety of open space and natural areas that serve as habitat for sensitive species. Much of this natural open space is found in or is adjacent to the foothill regions of the San Gabriel, Santa Susana, Santa Monica, and Verdugo Mountains, the Simi Hills, and along the coastline between Malibu and the Palos Verdes Peninsula. Many of the outlying areas are contiguous with larger natural areas, and may be part of significant wildlife habitats or movement corridors. The heavily urbanized portions of the City contain fewer natural areas. The Project Site and immediately surrounding area are not identified as a biological resource area. Moreover, the Project Site is not within a designated or proposed Significant Ecological Area (Los Angeles County Department of Regional Planning, Planning & Zoning Information, GIS-NET3 online database, Significant Ecological Areas and Coastal Resource Areas).
There are four on-site trees and remnant landscaping within the property boundaries; there are two street trees in the adjacent right-of-way along Melrose Avenue, which are proposed to remain in place under the Project. An arborist certification letter (see attached) finds that none of the existing trees are native or protected species pursuant to Ordinance 186873.

Mitigation Measure		Applies to Proposed Housing Project
Cultural Resources		
4.4-1(a)	Identification of Built-Environment Historical Resources	☑ Yes ☐ No
4.4-1(b)	Rehabilitation of Historical Resources	☐ Yes ☑ No
4.4-1(c)	Design Requirements for New Construction	☐ Yes ☑ No
4.4-1(d)	Relocation and Rehabilitation of Historical Resources	☐ Yes ☑ No
4.4-1(e)	Historic American Building Survey Documentation	☐ Yes ☑ No
4.4-1(f)	Interpretive Program	☐ Yes ☑ No
4.4-1(g)	Construction Monitoring, Salvage, and Reuse	☐ Yes ☑ No
4.4-1(h)	Temporary Protective Relocation	☐ Yes ☑ No
4.4-1(i)	Excavation and Shoring Plan	☐ Yes ☑ No
4.4-1(j)	Structural Construction Monitoring	☐ Yes ☑ No
4.4-2	Archaeological Resources	☑ Yes ☐ No

Brief explanation:

The Project Site is over 45 years of age, but it is not listed in any existing Survey LA results. Pursuant to Mitigation Measure 4.4-1(a), a Historical Resource Assessment Report (HRAR) has been performed to evaluate the property (attached). The HRAR concluded that the subject property at 6721 Melrose Avenue is not recommended eligible for listing in the National Register of Historic Places (National Register), the California Register of Historical Resources (California Register), for designation as a Historic-Cultural Monument (HCM), and would not contribute to a potential HPOZ. Therefore, the Project Site does not meet the criteria to be considered historical resources pursuant to Section 15064.5(a) of the CEQA. Therefore, the proposed demolition of the building and redevelopment of the Project Site would not result in a substantial adverse change to a historical resource (Section 15064.5(b) of the CEQA Guidelines). Thus, Mitigation Measures 4.4-1(b) through (j) are not required.

The Project is discretionary and would involve ground disturbing activities on previously undisturbed soils. Thus, Mitigation Measure 4.4-2 is required as the Project will require excavation for the subterranean parking level; a cultural resources assessment and record search has been conducted by Chronicle Heritage. As further explained in the Cultural Resources Assessment and Tribal Cultural Resource Report for the 6721 Melrose Avenue Project, City and County of Los Angeles, California prepared by Chronicle Heritage, results of the South Central Coastal Information Center (SCCIC), records search indicate that there are no known previously documented archaeological resources within the Project area or the 0.5-mi search radius surrounding the Project area. The Native American Heritage Commission's (NAHC's) Sacred Lands File (SLF) search results were also negative for tribal cultural resources (TCRs) within the Project area. Even so, Mitigation Measure 4.4-2 will apply to the Project as the Project includes subterranean excavation.

Mitigation Measure		Applies to Proposed Housing Project
Geology and Soils		
4.5-1(a)	Paleontological Procedures for Discretionary Projects	☑ Yes ☐ No
4.5-1(b)	Worker Environmental Awareness Program, Fossil Salvage, and Construction Monitoring	☑ Yes ☐ No
4.5-1(c)	Construction Monitoring	☑ Yes ☐ No
4.5-1(d)	Fossil Discovery, Salvage, and Treatment	☑ Yes ☐ No
Brief explanation: Consistent with Mitigation Measure 4.5-1(a), Paleontological Resource Technical Memorandum has been performed (attached) as the project will require excavation for the subterranean parking level. The Paleontological Resource Technical Memorandum concludes that because of the presence of fossil localities in the vicinity, Project-related ground disturbances have the potential to affect paleontological resources throughout the Project area. As such, further mitigation such as construction monitoring is recommended to reduce potential impacted to paleontological resources as the result of the Project. The Paleontological Resource Technical Memorandum finds that Mitigation Measures 4.5-1(a), 4.5-1(b), and 4.5-1(c) are applicable to the Project. Mitigation Measure 4.5-1(d) is applicable if a paleontological resource is discovered during Project construction.		
Hazards and Hazardous Materials		
4.7-2(a)	Environmental Site Assessment	☑ Yes ☐ No
4.7-2(b)	Site Remediation and Health and Safety Plan	☐ Yes ☑ No
Brief explanation: A Phase I Environmental Site Assessment was performed for the Project Site by Alpha Environmental. The assessment concludes there is no evidence of recognized environmental conditions in connection with the subject property and Alpha Environmental recommends no further investigation of the subject property.		

Mitigation Measure		Applies to Proposed Housing Project
Hydrology and Water Quality		
4.8-1	Drainage Pattern Alterations and Flood Control	☐ Yes ☑ No
Brief explanation: According to the Federal Emergency Management Agency's Flood Insurance Rate Map, the Project Site is within Zone X – Area of Minimal Flood Hazard, which is a designation for areas determined to be outside the 100-year flood hazard area. Thus, the Project Site is not located within a designated 100-year flood plain area, and the Project would not place structures that would impede or redirect flood flows within a 100-year flood plain. There are no levees or dams in the Project vicinity. The project would not impede or redirect flood flows.		
Noise		
4.10-1(a)	Noise Shielding and Silencing	☑ Yes ☐ No
4.10-1(b)	Use of Driven Pile Systems	☑ Yes ☐ No
4.10-1(c)	Enclosures and Screening	☑ Yes ☐ No
4.10-1(d)	Construction Staging Areas	☑ Yes ☐ No
4.10-1(e)	Temporary Sound Barriers	☑ Yes ☐ No
4.10-1(f)	Project-Specific Construction Noise Study	☑ Yes ☐ No
4.10-2	Project-Specific Operational Noise Study	☐ Yes ☑ No
4.10-3(a)	Vibration Control Plan	☐ Yes ☑ No
4.10-3(b)	Vibration Mitigation	☑ Yes ☐ No
Brief explanation: The Noise Technical Memorandum prepared for the Project finds that the Project's construction activities would not result in exceedances of the relevant thresholds at nearby noise-sensitive land uses. The analysis demonstrates that Mitigation Measures 4.10-1(a), (c), (e), would not be required or otherwise applicable to the Project, which would not result in any new or increased impact pursuant to Threshold 4.10-1. The Project would not utilize driven (impact), sonic, or vibratory pile drivers. Therefore, Mitigation Measure 4.10-2(b) may be applied to the Project, but it would have no effect on the Project's noise or vibration-related construction effects. Mitigation Measure 4.10-1(d) would apply to the Project and would be conditioned as part of the Project. A Construction Noise Study meeting the requirements of Mitigation Measure 4.10-1(f) was conducted as part of the Noise Technical Memorandum. As described in the Noise Memorandum, Mitigation Measure 4.10-2 is not applicable to the Project and there are no mitigation measures that would be necessary to ensure that the Project's roof deck would not result in any new or increased impact pursuant to Threshold 4.10-2. The Project does not meet the screening criteria to provide Vibration Control Plan because the Project does not use vibratory rollers or sonic drivers withing 50 feet of an extremely fragile building or historic resource.. Mitigation Measure 4.10-3(b) would apply to the Project and would be conditioned as part of the Project.		

Mitigation Measure		Applies to Proposed Housing Project
Public Services		
4.12-1(a)	Design Plans Review	☐ Yes ☑ No
4.12-1(b)	Emergency Access	☐ Yes ☑ No
4.12-1(c)	Hillside Fire/Vegetation Management Plan	☐ Yes ☑ No
4.12-1(d)	Submittal of Plot Plan	☐ Yes ☑ No
4.12-2(a)	Crime Prevention Unit Consultation	☐ Yes ☑ No
4.12-2(b)	Security During Construction	☐ Yes ☑ No
Brief explanation: The project includes fewer than 300 housing units (32 units proposed) on a lot comprising approximately 0.18 acre (7,874 square feet) and is not within a VHFSZ or SRA.		
Transportation		
4.14-1	Construction Management Plan	☑ Yes ☐ No
4.14-2	Transportation Demand Management Program	☐ Yes ☑ No
Brief explanation: The project is discretionary and will require hauling, so preparation of a CMP is anticipated. The Transportation Technical Memo prepared for the Project to conduct Trip Generation Analysis and Transportation Assessment Screening finds that daily volume threshold identified in the LADOT's TAG for requiring preparation of a transportation assessment is 250 or more trips per day. As indicated in Transportation Technical Memo, the Project trip generation is estimated to result in a net increase of 109 daily trips. Therefore, the Project does not exceed the threshold (250 or more daily trips) that require preparation of a transportation assessment per LADOT's Transportation Assessment Guidelines. Thus, a TDM program is not required.		

Mitigation Measure		Applies to Proposed Housing Project
Tribal Cultural Resources		
4.15-1(a)	Native American Consultation and Monitoring for Discretionary Projects	☑ Yes ☐ No
4.15-1(b)	Discovery of Potential Tribal Cultural Resources	☑ Yes ☐ No
Brief explanation: The project is discretionary and would involve ground disturbing activities on previously undisturbed soils. Thus, a cultural resources assessment and record search has been conducted. As further explained in the Cultural Resources Assessment and Tribal Cultural Resource Report for the 6721 Melrose Avenue Project, City and County of Los Angeles, California prepared by Chronicle Heritage, results of the SCCIC records search indicate that there are no known previously documented Tribal Cultural Resources (TCRs) within the Project area or the 0.5-mi search radius surrounding the Project area. The NAHC's SLF search results were also negative for TCRs within the Project area. Mitigation Measure 4.15-1(b) will apply to the project in the event that Tribal Cultural Resources are discovered during Project activities.		
Wildfire		
4.17-1	Hillside Construction Staging and Parking Plan	☐ Yes ☑ No
4.17-3	Undergrounding of Power Lines in and Near an SRA and VHFHSZs	☐ Yes ☑ No
Brief explanation: The project site is not within a VHFSZ or SRA.

☐ Not all applicable mitigation measures will be imposed on the Proposed Housing Project through conditions of approval, or have already been incorporated into the Proposed Housing Project.

E. FINDING THAT SITE SPECIFIC EFFECTS FROM THE PROPOSED HOUSING PROJECT WERE ANALYZED IN THE PROGRAM EIR

E.1 Screening Criteria

The following screening questions shall be answered to evaluate whether the Proposed Housing Project has the potential for site-specific or project-specific circumstances or conditions to result in an environmental effect not examined in the Program EIR. If any of the following questions are answered 'Yes', further analysis will be required in Section E.2.

☐ Yes ☑ No

If **Yes**, determine if the environmental effect was examined in the Program EIR, per Section E.2.

c. Would the Proposed Housing Project require a variance or specific plan exception to provide relief from a standard required to protect scenic resources or scenic quality in an adopted Code, Specific Plan, or overlay ordinance (e.g., the Mulholland Scenic Parkway Specific Plan, the San Gabriel/Verdugo Mountains Scenic Preservation Specific Plan)?

☐ Yes ☑ No

If **Yes**, conduct an analysis of Questions I.a and I.c in Appendix G of the CEQA Guidelines to determine if the Proposed Housing Project will have an effect that was not examined in the Program EIR, per Section E.2.

d. Would the Proposed Housing Project involve the modification or destruction of a scenic resource or obstruction of public view of a scenic resource?

☐ Yes ☑ No

If **Yes**, conduct an analysis of Questions I.a and I.c in Appendix G of the CEQA Guidelines to determine if the Proposed Housing Project will have an effect that was not examined in the Program EIR, per Section E.2.

e. Would the Proposed Housing Project involve rezoning agriculturally zoned land?

h. Would the Proposed Housing Project have peculiar or unique project or site characteristics from those analyzed in the Program EIR that could result in an effect not examined in the Program EIR (e.g., projects that conflict with an adopted Airport Land Use Plan or Water Quality Management Plan, or sites in use for mineral resource recovery (does not include oil and gas), projects involving septic tanks)?

☐ Yes ☑ No

If **Yes**, conduct an analysis to determine if the Proposed Housing Project will have an effect that was not examined in the Program EIR, per Section E.2.

☐ Yes ☑ No

If **Yes**, conduct an analysis of freeway queueing, as required by DOT, to determine if the Proposed Housing Project will have an effect that was not examined in the Program EIR, per Section E.2.

[1] Transportation assessments are typically required if the project would both generate a net increase of 250 or more daily vehicle trips and would result in a net increase in daily VMT. DOT would also require a transportation assessment if the project is replacing an existing number of residential units with a smaller number of residential units, and the proposed project is located within one-half mile of a heavy rail, light rail, or bus rapid transit station.

CONCLUSION

After finishing review of the screening questions in Section E.1, check one of the following boxes.

☐ **ALL SCREENING QUESTIONS ARE MARKED 'NO'**

☑ **ONE OR MORE SCREENING QUESTIONS ARE MARKED 'YES'**

Go to Section E.2.

- a significant impact in an impact category found in the Program EIR to be less than significant, less than significant with mitigation, or have no impact;
- a significant impact that cannot be mitigated to less than significant with mitigation measures in Appendix B or by a substituted mitigation measure, in any of the following impact categories, which are impacts that by their nature would have impacts unique to the resource(s):
    - to a historical resource;
    - to a biological resource;
    - to an archaeological resource;
    - to a paleontological resource;
    - to tribal cultural resources;
    - related to hazardous materials; or
    - related to wildfires.

Without limitation, the following effects from a Proposed Housing Project are effects examined in and within the scope of the Program EIR:

- a significant and unavoidable impact related to criteria pollutant air quality standards from construction NOx, PM_{10} and $PM_{2.5}$ emissions;

- a significant and unavoidable impact related to criteria pollutant air quality standards from operational NOX, VOC, PM_{10}, and $PM_{2.5}$ emissions; or
- a significant and unavoidable impact (project or cumulative) related to construction and operational noise or vibration impacts.

CONCLUSION

Based on the analysis above, and the whole of the administrative record, substantial evidence supports that (check one):

☑ **THE PROPOSED HOUSING PROJECT WILL NOT HAVE EFFECTS NOT EXAMINED IN THE PROGRAM EIR.**

The Proposed Housing Project is fully within the scope of the program and its impacts were examined in the Program EIR. Prepare a Mitigation and Monitoring Program for the Proposed Housing Project for all mitigation measures identified in Subsection D and E, as applicable. No additional environmental analysis documents need to be prepared.

☐ **THE PROPOSED HOUSING PROJECT WILL HAVE ONE OR MORE EFFECTS NOT EXAMINED IN THE PROGRAM EIR.**

A tiered negative declaration or tiered environmental impact report will be prepared for the following environmental effect(s) pursuant to CEQA Guidelines Section 15152:

Impacts to be Analyzed in Tiered CEQA Clearance:

All other effects are within the scope of the Program EIR and require no further analysis pursuant to CEQA Guideline Section 15152. The analysis provided herein shall be relied upon, in part, to support adoption of the tiered document as only being required to analyze the above listed impact(s).

PROJECT SUMMARY

The Project proposes the demolition of the existing commercial building and the construction, use, and maintenance of a new 32-unit residential building, including four (4) affordable units set aside for Very-Low Income households (12 percent of the total units, or 20 percent of the base density), in six stories of residential over one subterranean and one at-grade level of parking, plus commercial (605 square feet) and lobby area on the ground floor. The Project includes a roof deck with open space and amenities. The building will have a total height of approximately 72 feet and two inches and a total floor area of approximately 28,717square feet with an FAR of 4.06:1.

1. ENVIRONMENTAL SETTING

a) Project Location

The Project is located at 6721-6727 Melrose Avenue in the City of Los Angeles (the "City") and is associated with Assessor Parcel Number (APN) 5524-013-022 (the "Project Site"). The Project Site is a rectangular-shaped parcel of land that contains approximately 7,074 square feet (0.16 acres) of gross (pre-dedicated) lot area. The Project Site has an alley with an 800-square-foot half-width, resulting in 7,874 square feet of lot area for calculating density and floor area (7,074 sf + 800 sf [half of the alley] = 7,874 sf). The Project Site is located on the north side of Melrose Avenue at the northeast corner of Melrose Avenue and Mansfield Avenue.

b) Existing Conditions

The Project Site is currently improved with one commercial building and associated surface parking area. There are four on-site trees and remnant landscaping within the property boundaries; there are two street trees in the adjacent right-of-way along Melrose Avenue. Vehicle access to the existing uses is provided via the adjacent alley to the north, which has access from Mansfield Avenue and Citrus Avenue. The Project Site is located in the Hollywood Community Plan boundaries, and is zoned C4-1XL (Commercial Zone, Height District No. 1XL) with a corresponding General Plan land use designation of "Neighborhood Office Commercial." The Project Site is not located in a Special Grading Area, or Very High Fire Severity Zone, nor is the Project Site designated as Farmland or within an Urban Agriculture Incentive Zone, Significant Ecological Area or a Coastal Resource Area. The Project Site is located in Flood Zone X – Area of Minimal Flood Hazard.

c) Surrounding Land Uses

Parcels surrounding the Project Site to the west and east are zoned C4-1XL and improved with commercial uses; parcels to the north across the adjacent alley are zoned R1-1 and improved with residential uses; parcels to the south across Melrose Avenue are zoned C2-1XL and are improved with a church.

2. PROJECT CHARACTERISTICS

a) Project Overview

The Project proposes the construction of a residential building containing 32 units in six stories including four (4) affordable units set aside for Very-Low Income households. The Project would have a maximum height of 72 feet and two inches (excluding the rooftop structures) and a floor area ratio of 4.06:1 (approximately 28,717 total square feet). The Project will include 32 residential units consisting of two (2) studio and 30 one-bedroom units. The Project will include approximately 605 square feet of commercial space on the ground floor, accessed from the corner of Melrose Avenue and Mansfield Avenue.

Pursuant to the requirements of LAMC Section 12.21 G, the Project would require 3,200 square feet of open space for 32 units. The Project is proposing to provide approximately 3,280 square feet of common open space on the roof deck.

b) Design and Architecture

In accordance with the Citywide Design Guidelines,[1] the proposed building provides a variety of architectural materials and building planes, with a distinct pedestrian entrance. The proposed six-story building would be built in a contemporary style with differentiated colors and textures at ground level compared to the residential levels above to create human scale on the pedestrian level. The primary residential entry area at the ground floor is located on Melrose Avenue, at the front of the building along the public street and realm to add interest and additional exposure to the street; the commercial entry is located on the ground floor at the corner of Melrose Avenue and Mansfield Avenue, inviting to pedestrians. Proposed building materials include stucco, concrete, corrugated and flat metal, aluminum, different colors (white, grey, black, and brown), and articulation including balconies and windows to provide visual interest along the facade. Landscaping with trees, shrubs, and turf would be provided along the boundaries of the project site as well as in the interior courtyard and rooftop terrace spaces.

c) Access, Circulation, and Parking

Vehicular entry to the building would be provided from the adjacent alley, leading to one level of at-grade parking with lobby and commercial access, and access to one level of subterranean parking. A total of 23 parking spaces are proposed. Pedestrians would enter the residential portion of the building from Melrose Avenue, with access to the building's stairs, elevator, and bike room. Pedestrians would enter the building's commercial space from the corner or Melrose Avenue and Mansfield Avenue. Residential units are proposed on levels two through six. A 3,280-square foot common rooftop deck is located on the top of the building.

The Project Site is located approximately 2,087 feet from the intersection of Santa Monica Boulevard and La Brea Avenue, which has bus stops for north/south buses and east/west buses including Metro 004 NextGen is a Tier 1 Rapid bus with eastbound and westbound headways of

[1] *Citywide Design Guidelines, adopted October 24, 2019.*

7.6 minutes and Metro Local bus line 212 with northbound headways of 10 minutes and southbound headways of 10.24 minutes. According to ZIMAS, the Project Site is within one half mile of a major transit stop, and is therefore eligible to receive a full reduction of required commercial and residential parking per AB 2097. The Project provides 23 vehicular parking spaces which will be reserved for residential tenants. No commercial parking is provided. Vehicular access to the Project Site would be provided from the adjacent alley north of the site, which can be accessed from Mansfield Avenue or Citrus Avenue.

A total of 30 long term and three short term bicycle parking spaces for residential uses would be provided, plus two long term and two short term bicycle parking spaces for commercial uses, in excess of LAMC Section 12.21.A.16 bicycle parking requirements.

d) Lighting and Signage

New Project signage would be used for building identification, wayfinding, and security. Exterior lights would be wall- or ground-mounted and shielded away from adjacent properties. Building low-level security lighting would be used at all entry/exits and would remain on from dusk to dawn, designed to prevent light trespass onto adjacent properties.

e) Site Operation and Security

Given the proposed residential uses on the Project Site, the Project would operate 24 hours a day, seven days a week. The Project would provide security features including, but not limited to controlled access and video surveillance.

f) Sustainability Features

The Project would be compliant with the Los Angeles Green Building Code and California Energy Code/Title 24 requirements. The Project's landscape plan proposes planting a minimum of eight (8) trees, pending Department of Urban Forestry approval. Overall, the proposed landscaping plan provides a mix of ground cover and trees to complement the architecture. Plant material has been selected for temperature hardiness and low water use. Overall water consumption will be minimized with the inclusion of water efficient appliances and fixtures throughout the development.

g) Anticipated Construction Schedule

The Project would be constructed over approximately 30 months. Construction activities would include removal of the existing building and surface parking area, site preparation, grading, building construction, paving, and architectural coating. Removal of the existing building and parking area is anticipated to start in the fourth quarter of 2025, and construction completion and occupancy is anticipated in the second quarter of 2028. The Project is expected to remove approximately 2,640 square feet of existing asphalt pavement and to export approximately 3,128 cubic yards of soil for excavation. The anticipated haul route from the Project Site would be from Melrose Avenue east to the 101 freeway.

3. REQUESTED PERMITS AND APPROVALS

The list below includes the anticipated requests for approval of the Project. The discretionary and ministerial entitlements, reviews, permits, and approvals required to implement the Project include, but are not necessarily limited to, the following:

RE: 6727 Melrose Avenue Project – Air Quality Technical Memorandum

Noah Tanski Environmental Consulting ("NTEC") has prepared this technical memorandum to assess the air quality impacts that would be associated with construction and operations of the 6727 Melrose Avenue Project ("Project") located in the City of Los Angeles, especially as they relate to air quality impacts that have been previously examined in the City's Citywide Housing Element 2021-2029 and Safety Element Updates Program Environmental Impact Report, hereafter referred to as the "Program EIR." Based on NTEC's analysis, the Project's air quality impacts would be considered "within the scope" of the program assessed in the Program EIR, pursuant to CEQA Guidelines Sections 15168(c)(4) and 15168(d).

This technical memorandum also addresses the Program EIR's air quality mitigation measures and determines whether they would be applicable to the Project. Based on NTEC's analysis, the Project would not require implementation of the Program EIR's air quality mitigation measures. No substituted mitigation measures are proposed for adoption.

Project Description

The Project proposes to construct a new residential mixed-use building containing 32 dwelling units and 614 square feet of ground floor commercial space at 6727 Melrose Avenue in the City of Los Angeles. The approximately 0.16-acre Project Site is currently developed with a 2,815 square foot commercial building with a small eight-vehicle surface parking lot. These existing features would be demolished prior to construction.

Regulatory Compliance Measures

Before discussing the Project's air quality impacts and consistency with the Program EIR, it is important to note that there are many regulations in place that would limit the Project's air pollutant emissions from construction and operational sources. Housing development accommodated under the Program EIR is required to comply with the following Regulatory Compliance Measures ("RCMs"):

- **RCM-AQ-1 (Demolition, Grading, and Construction Activities):** The project shall comply with all applicable standards of the Southern California Air Quality Management District, including the following provisions of District Rule 403:
    - All unpaved demolition and construction areas shall be wetted at least twice daily during excavation and construction, and temporary dust covers shall be used to reduce dust emissions and meet SCAQMD District Rule 403. Wetting could reduce fugitive dust by as much as 50 percent.
    - The construction area shall be kept sufficiently dampened to control dust caused by grading and hauling, and at all times provide reasonable control of dust caused by wind.
    - All clearing, earth moving, or excavation activities shall be discontinued during periods of high winds (i.e., greater than 15 mph), so as to prevent excessive amounts of dust.
    - All dirt/soil loads shall be secured by trimming, watering, or other appropriate means to prevent spillage and dust.
    - All dirt/soil materials transported off-site shall be either sufficiently watered or securely covered to prevent excessive amounts of dust.
    - General contractors shall maintain and operate construction equipment so as to minimize exhaust emissions.
    - Trucks having no current hauling activity shall not idle but be turned off.
    - Vehicle speeds shall be limited to 15 mph on unpaved roads.
- **RCM-AQ-2 (Construction Equipment Fleet Regulations):** In accordance with California Off-Road Diesel-Fueled Fleet Regulations, equipment operators shall be registered using the Diesel Off-Road Online Reporting System (DOORS) and diesel-powered construction equipment with 25 horsepower or greater engines shall meet exhaust PM and NO_X emissions standards.
- **RCM-AQ-3 (Idling of Diesel-fueled Commercial Vehicles):** In accordance with Section 2485 in Title 13 of the California Code of Regulations, the idling of all diesel-fueled commercial vehicles (weighing over 10,000 pounds) shall be limited to five minutes at any location.
- **RCM-AQ-4 (Operation of Diesel-fueled Commercial Vehicles):** In accordance with Section 93115 in Title 17 of the California Code of Regulations, operation of any stationary, diesel-fueled, compression-ignition engines shall meet specified fuel and fuel additive requirements and emissions standards
- **RCM-AQ-5 (Architectural Coatings):** The project shall comply with SCAQMD Rule 1113 limiting the volatile organic compound content of architectural coatings.
- **RCM-AQ-6 (Adhesive and Sealant Applications):** Compliance with provisions of the SCAQMD Rule 1168. Projects shall comply with SCAQMD Rule 1168 limiting the VOC content of adhesives, sealants, adhesive primers, and sealant primers.

- **RCM-AQ-7 (Emission Control Measures):** New on-site facility nitrogen oxide emissions shall be minimized through the use of emission control measures (e.g., use of best available control technology for new combustion sources such as boilers and water heaters) as required by SCAQMD Regulation XIII, New Source Review.

Air Quality Impact Analysis – Consistency with Program EIR

The following section assesses the Project's consistency with the Program EIR's air quality thresholds. Each threshold is listed along with the Program EIR's impact summary for that threshold. Where applicable, screening criteria from the Program EIR's air quality mitigation measures are presented for comparison with Project features. **Based on following analysis, the Project's air quality impacts would be considered "within the scope" of the program assessed in the Program EIR, pursuant to CEQA Guidelines Sections 15168(c)(4) and 15168(d).**

Threshold 4.2-1	Would the Housing Element Update conflict with or obstruct implementation of the applicable air quality plan?
Impact 4.2-1	The Housing Element Update does not encourage or promote growth beyond the SCAG forecasts of regional growth, therefore the Housing Element Update would not conflict with the growth assumptions used in the development of the AQMP. The Housing Element Update would include policies that support reduced air pollutant emissions by promoting sustainable transportation and land use design features and would not conflict with implementation of Transportation Control Measures from the AQMP. Thus, impacts would be less than significant.

As explained in the Program EIR, the Housing Element Update would result in the development of 420,327 housing units, which is consistent with SCAG forecasts of regional growth. The AQMP's air pollutant strategies are based on SCAG's regional growth forecasts, so growth that is consistent with SCAG forecasts are accommodated by and consistent with the AQMP. The Project would develop 32 housing units that are accommodated by the Housing Element Update, SCAG regional growth forecasts, and therefore the AQMP. The Project's inclusion of 614 square feet of ground floor commercial space would not affect this consistency because SCAG's regional growth forecasts also account for and encourage mixed-uses such as the Project. Therefore, the effects of the Project are examined in the Program EIR's analysis under Threshold 4.2-1 and the Project would not result in any new or increased impact pursuant to Threshold 4.2-1.

Threshold 4.2-2	Would the project result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?
Impact 4.2-2	Housing development accommodated under the Housing Element Update would result in construction and operational emissions that exceed SCAQMD regional and local significance thresholds. These exceedances would constitute a considerable net increase of NO_X, PM_{10}, and $PM_{2.5}$ and other criteria pollutant emissions for construction related emissions and NO_X, VOC, PM_{10}, and $PM_{2.5}$ for operational emissions in the SCAG. With implementation of mitigation measures AQ-4.2-2(a) and AQ-4.2-2(b), most housing development projects could reduce construction and operational emissions to less than significant. However, it is possible that very large projects, or projects with unusual circumstances, would result in emissions that exceed SCAQMD significance thresholds despite implementation of appropriate project-specific mitigation. Thus, impacts would be significant and unavoidable.

The Program EIR contains screening criteria to identify projects that may result in exceedances of SCAQMD significance thresholds and corresponding effects that have been examined in the Program EIR pursuant to Threshold 4.2-2. The screening criteria are shown below in **Table 1** alongside a discussion of the Project's consistency with each criterion.

Table 1
Program EIR Threshold 4.2-2 – Air Quality Screening Criteria

Screening Criteria	Project Consistency
Construction:	
Demolition of more than 13,500 square feet of building area?	No exceedance. The Project would involve demolition of an approximately 2,815 square foot commercial building. Remaining improvements to be demolished (e.g., asphalt surface parking, hardscape, etc.) would total less than 4,200 square feet. Therefore, total demolition would be substantially less than 13,500 square feet of building area or any equivalent.
Greater than 5,000 cubic yards of soil cut/fill?	No exceedance. The Project would require approximately 3,128 cubic yards of excavation.
Greater than five acres of graded area?	No exceedance. The Project Site is approximately 0.16 acres.
Use of more than ten pieces of heavy-duty construction equipment and 150 truck trips (or a total of 6,000 vehicles miles traveled by truck)	No exceedance. Demolition and grading for the Project would have similar equipment requirements that are less than ten pieces of heavy-duty construction equipment (assumed

on any given day during demolition, site clearing, or grading?	to be equivalent to off-road diesel-powered construction vehicles). Maximum daily equipment usage for either phase would involve an excavator, a bulldozer, and up to three skid steer or front-end loaders, totaling five pieces. Given the Project's modest demolition and excavation requirements, maximum daily export of demolition debris or cut soils would be less than 50 truck trips (one-way) and daily miles traveled would be below 6,000 miles. The Project would not involve site clearing activities separate from demolition or grading.
Operations:	
More than 462 single-family residential units, 612 multi-family residential units (or mixed-use), or any equivalent combination thereof?	No exceedance: The Project would involve development of 32 housing units and only approximately 614 square feet of ground floor commercial space.

As demonstrated in **Table 1**, neither the Project's construction nor its operations would exceed any of the screening criteria identified and analyzed in the Program EIR under Threshold 4.2-2. Therefore, the effects of the Project are examined in the Program EIR's analysis under Threshold 4.2-2 and would result in emissions that do not exceed SCAQMD thresholds, and the Project would not result in any new or increased impact pursuant to Threshold 4.2-2.

Threshold 4.2-3	Would the Housing Element Update expose sensitive receptors to substantial pollutant concentrations?
Impact 4.2-2	Housing development accommodated under the Housing Element Update would generate additional TAC emissions; however, emissions would be substantially similar to existing residential projects and continued enforcement of existing regulations would prevent exposure of sensitive receptors to substantial pollutant concentrations. Operation of residential development and mixed-use development paired with residences would not involve construction of land uses that emit large quantities of TACs. Additionally, the Housing Element Update would not contribute to congested intersection conditions that would result in creation or worsening of a CO hotspot. Construction-related TACs however may be potentially significant without mitigation. Feasible mitigation would be anticipated to reduce construction-related TACs to less than significant. The Housing Element Update would not expose sensitive receptors to substantial pollutant concentrations and impacts would be less than significant with mitigation for construction-related TACs and less than significant for all other substantial pollutant concentrations.

The Program EIR contains screening criteria to identify projects that may result in significant health risks from TACs, particularly DPM from diesel-fueled construction vehicles. For projects located within 500 feet of a residence or other sensitive receptor and with an anticipated construction duration of greater than 18 months, the Program EIR requires the preparation of a detailed Air Quality Impact Analysis and construction health risk assessment to quantify the cancer risk and Hazard Index posed by DPM emissions. However, for projects conditioned to utilized construction equipment that meets CARB Tier 4 Final or USEPA Tier 4 off-road emissions for all equipment rated 50 horsepower or greater, these requirements are waived, because the Program EIR has analyzed projects using such low-emissions equipment and determined that they do not generate substantial pollutant concentrations.

The Project is located within 500 feet of sensitive residential uses located along Mansfield Avenue, Orange Drive, Citrus Avenue, and other nearby roadways. The Project's construction is also estimated to last approximately 30 months. However, the Project would be conditioned to utilize construction equipment that meets CARB Tier 4 Final or USEPA Tier 4 off-road emissions for all equipment rated 50 horsepower or greater. Therefore, the Project would not be required to conduct a detailed Air Quality Impact Analysis and construction health risk assessment because the Program EIR has determined that projects using such low-emissions equipment do not generate substantial pollutant concentrations. The Project would not result in any new or increased impact related to construction TAC emissions pursuant to Threshold 4.2-3.

Regarding operational TAC emissions, the Program EIR determines that the operation of residential and mixed uses accommodated by the Housing Element Update would not involve the types of land uses that emit large quantities of TACs. The Project involves residential and commercial uses that are consistent with the types of land uses anticipated and analyzed by the Program EIR. The Project would not contain land uses associated with substantial TAC emissions, such as warehouse distribution facilities or industrial uses. Therefore, the Project would not result in any new or increased impact related to operational TAC emissions pursuant to Threshold 4.2-3.

Regarding CO hotspots, the Program EIR determines that traffic generated by projects accommodated by the Housing Element Update would not be capable of contributing to localized CO concentrations that exceed state or federal CO standards. The Project, which proposes 32 housing units and a modest 614 square feet of commercial space, is accommodated by the Housing Element Update and its relevant analysis in the Program EIR.

In summary, the effects of the Project are examined in the Program EIR's analysis under Threshold 4.2-3. The Project would not result in any new or increased impact pursuant to Threshold 4.2-3.

Mitigation Measure Assessment – Applicability to the Project

The following section identifies the air quality mitigation measures adopted by the Program EIR and assesses their applicability to the Project. **Based on the following analysis, the Program EIR's air quality mitigation measures would not be applicable to the Project, and their incorporation would not be necessary to ensure that the effects of the Project are "within the scope" of impacts examined in the Program EIR.**

A checklist of the Program EIR's air quality mitigation measures and their applicability to the Project is included below, followed by individualized analysis for each mitigation measure:

	Applicable?	
• Mitigation Measure 4.2-2(a) – Construction Emissions Reduction	☐Yes	☒No
• Mitigation Measure 4.2-2(b) – Operations Emissions Reduction	☐Yes	☒No
• Mitigation Measure 4.2-3 – Construction TAC Reduction Measures	☐Yes	☒No

Mitigation Measure 4.2-2(a) – Construction Emissions Reduction:

For discretionary projects that meet the following criteria, prior to project approval, the Applicant shall be required to provide to the City an Air Quality Impact Analysis prepared by a qualified air quality analyst to analyze construction emissions and identify necessary mitigation:

- Demolition of more than 13,500 square feet of building area;
- Greater than 5,000 cubic yards of soil cut/fill;
- Greater than 5-acres of graded area; or
- Use of more than ten pieces of heavy-duty construction equipment and 150 truck trips (or a total of 6,000 vehicle miles traveled by truck) on any given day during demolition, site clearing, or grading.

The Air Quality Impact Analysis shall demonstrate that project emissions are less than applicable SCAQMD regional and LST thresholds, and as applicable may include, but are not limited to, the following mitigation:

- Off-road diesel-powered construction equipment greater than 50 horsepower shall be certified for either the Tier 4 Final emission standards for CARB In-Use Off-Road Diesel-Fueled Fleets Regulations or the USEPA Tier 4 emission standards, where available. In the event that Tier 4 engines are not available for any off-road equipment larger than 100 horsepower, that equipment shall be equipped with a Tier 3 engine or an engine that is equipped with retrofit controls to reduce exhaust emissions of NO_X and DPM to no more than Tier 3 levels unless certified by engine manufacturers or the onsite air quality construction mitigation manager that the use of such devices is not practical for specific engine types.
- All construction equipment shall be outfitted with BACT devices certified by CARB. Any emissions control device used by the contractor shall achieve emissions reductions that are no less than what could be achieved by a Level 3 diesel emissions control strategy for a similarly sized engine as defined by CARB regulations. At the time of mobilization of each applicable unit of equipment, a copy of each unit's certified tier specification, BACT documentation, and ARB or SCAQMD operating permit shall be provided.
- Vehicle idling shall be limited to five minutes as set forth in the California Code of Regulations, Title 13. Signs shall be posted in areas where they will be seen by vehicle operators stating idling time limits.
- Heavy-duty diesel-fueled equipment shall use low NO_X diesel fuel to the extent that it is available and feasible to use.

- Construction haul truck operators for demolition debris and import/export of soil shall use trucks that meet the California Air Resources Board's (CARB) 2010 engine emissions standards at 0.01 grams per brake horsepower-hour of PM and 0.20 grams per brake horsepower-hour of NO_X emissions. Operators shall maintain records of all trucks associated with project construction to document that each truck used meets these emission standards and shall make these records available for inspection upon request by the City of Los Angeles or the SCAQMD.
- Construction contractors shall utilize construction equipment that uses low polluting fuels (i.e., compressed natural gas, liquid petroleum gas, and unleaded gasoline) to the extent that they are available and feasible to use.
- Equipment such as tower cranes and signal boards shall be electric or alternative fueled (i.e., non-diesel). Pole power shall be made available for use for electric tools, equipment, lighting, etc. Construction equipment such as tower cranes and signal boards shall utilize electricity from power poles or alternative fuels (i.e., non-diesel), rather than diesel power generators and/or gasoline power generators. If stationary construction equipment, such as diesel- or gasoline-powered generators, must be operated continuously, such equipment shall be located at least 100 feet from sensitive land uses (e.g., residences, schools, childcare centers, hospitals, parks, or similar uses), whenever possible.
- Alternative-fueled generators shall be used when commercial models that have the power supply requirements to meet the construction needs of the Project are commercially available from local suppliers/vendors. The determination of commercial availability of such equipment will be made by the City prior to issuance of grading or building permits based on applicant provided evidence of the availability or unavailability of alternative-fueled generators and/or evidence obtained by the City from expert sources such as construction contractors in the region.
- Consistent with SCAQMD Rule 403, construction contractors shall identify and implement best available dust control measures during active construction operations capable of generating dust.
- Construction contractors shall maintain construction equipment in good, properly tuned operating condition, as specified by the manufacturer, to minimize exhaust emissions. Documentation demonstrating that the equipment has been maintained in accordance with the manufacturer's specifications shall be kept on-site and made available to LADBS inspectors during inspection.
- Construction contractors shall reroute construction trucks away from congested streets or sensitive receptor areas, as feasible.
- Construction activities shall be discontinued during second-stage smog alerts (when feasible). A record of any second-stage smog alerts and of discontinued construction activities as applicable shall be maintained by the Contractor on-site. If infeasible to stop work, i.e., in the instance of a continuous concrete pour, construction activities shall be limited to those activities necessary to complete the immediate job.
- For projects where continuous pour activities will extend past the typical construction day: Concrete trucks shall have an average capacity of 10 cubic yards to minimize the number of concrete truck trips.
- Contractors shall use local concrete suppliers with 90 percent or more of the concrete supplied by one or more facilities within a driving distance of less than 5 miles per one-way trip or 10 miles round trip where feasible.

- Contractors shall be required to use alternatively fueled concrete trucks that achieve the same or lower NOx emissions as CNG-fueled concrete trucks to the extent feasible. The level of feasibility/infeasibility shall be approved by the City prior to the beginning of concrete pouring activities.
- During plan check, applicant shall make available to SCAQMD a comprehensive inventory of all of road trucks and concrete trucks to be used for the project, including horsepower rating, engine production year, and certification of the specified equipment.

At the outset, Mitigation Measure 4.2-2(a) lists screening criteria to determine whether a project is required to provide a detailed Air Quality Impact Analysis. The screening criteria identify projects that may result in significant impacts and exceed the effects examined in the Program EIR, so the purpose of the Air Quality Impact Analysis is to analyze such projects' construction emissions and determine whether mitigation measures would be capable of reducing impacts. As discussed earlier, the Project would not exceed the construction screening criteria listed in Mitigation Measure 4.2-2(a). Therefore, the Project would not be required to provide a detailed Air Quality Impact Analysis. Moreover, the effects of the Project are examined in the Program EIR's analysis under Threshold 4.2-2 and would result in emissions that do not exceed SCAQMD thresholds. Accordingly, the mitigation measures listed as part of Mitigation Measure 4.2-2(a) would not be required or otherwise applicable to the Project, which would not result in any new or increased impact pursuant to Threshold 4.2-2.

Mitigation Measure 4.2-2(b) – Operations Emissions Reduction:

For discretionary projects, prior to project approval, the Applicant shall be required to provide the City an Air Quality Impact Analysis prepared by a qualified air quality analyst to analyze operational emissions and identify necessary mitigation for any discretionary project that would include more than 462 single-family residential units, 612 multi-family residential units, or any equivalent combination thereof. The Air Quality Impact Analysis shall demonstrate that project emissions are less than applicable SCAQMD regional and LST thresholds, and as applicable may include, but are not limited to, the following mitigation:

- Implementation of a Transportation Demand Management Plan.
    - Installation of additional electric vehicle charging stations
    - Public infrastructure improvements (e.g., bus stop shelter improvements)
    - Carpool or ridesharing programs
    - Subsidized transit costs
    - Unbundled parking costs
    - Bicycle amenities (storage, showers, lockers, etc.)
- Use of all-electric appliances (i.e., elimination of natural gas service)
- Use of solar or low emission water heaters that exceed Title 24 requirements
- Increased walls and attic insulation beyond Title 24 requirements

- Property management plan that obligates property manager to use of low-VOC paints and coatings, meeting SCAQMD standards, for property management and required use of electric yard and landscaping equipment, including lawnmowers, leaf-blowers, and chainsaws.

Similar to the previous mitigation measure, Mitigation Measure 4.2-2(b) lists screening criteria to determine whether a project is required to provide a detailed Air Quality Impact Analysis. The screening criteria identify projects that may result in significant impacts that exceed the effects examined in the Program EIR, so the purpose of the Air Quality Impact Analysis is to analyze such projects' operational emissions and determine whether mitigation measures would be capable of reducing impacts. As discussed earlier, the Project would not exceed the operational screening criteria listed in Mitigation Measure 4.2-2(b). Therefore, the Project would not be required to provide a detailed Air Quality Impact Analysis. Moreover, the effects of the Project are examined in the Program EIR's analysis under Threshold 4.2-2 and would result in emissions that do not exceed SCAQMD thresholds. Accordingly, the mitigation measures listed as part of Mitigation Measure 4.2-2(b) would not be required or otherwise applicable to the Project, which would not result in any new or increased impact pursuant to Threshold 4.2-2.

Mitigation Measure 4.2-3 – Construction TAC Reduction Measures:

For discretionary projects with an anticipated construction duration of greater than 18-months and located within 500 feet of a residence or other sensitive receptor, prior to issuance of a permit to construct, the applicant shall provide to the City an Air Quality Impact Analysis, prepared by a qualified air quality analyst, that includes a construction health risk assessment. If the analysis shows incremental cancer risk would exceed 10 persons in one million at a sensitive receptor or the calculated Hazard Index for chronic or acute risks would exceed a value of 1.0 at a sensitive receptor, the air quality analyst shall prepare a mitigation plan subject to City review and approval that reduce TACs to less than SCAQMD thresholds. The applicant shall comply with all mitigation measures in the mitigation plan.

Alternatively, no Air Quality Impact Analysis, health risk assessment, and mitigation plan shall be required for discretionary projects conditioned to use construction equipment that meets the CARB Tier 4 Final or USEPA Tier 4 off-road emissions for all equipment rated 50 horsepower or greater. A copy of each unit's certified tier specification or model year specification and CARB or SCAQMD operating permit (if applicable) shall be available upon request at the time of mobilization of each applicable unit of equipment.

As discussed earlier, the Project would be conditioned to utilize construction equipment that meets CARB Tier 4 Final or USEPA Tier 4 off-road emissions for all equipment rated 50 horsepower or greater. Therefore, the Project would not be required to conduct a detailed Air Quality Impact Analysis and construction health risk assessment, or submit to a mitigation plan, because the Program EIR has

determined that projects using such low-emissions equipment do not generate substantial pollutant concentrations.

Certification Letter

January 10, 2024

6727 MDD LLC
7426 Santa Monica Blvd.
West Hollywood, CA 90046

Dear 6727 MDD LLC:

Recently you contacted me and requested an Arborist Certification Letter concerning the trees located on the properties at 6721-6727 Melrose Avenue, Los Angeles. This letter is in reference to the City of Los Angeles Native Tree Ordinance No. 186873 as required by Public Works, Urban Forestry.

Background/Observations:

On Wednesday, January 10, 2024 at approximately 10:00 a.m. I arrived at the properties located at 6721-6727 Melrose Avenue, Los Angeles, California. I was provided with a survey of the subject properties. The subject properties have an existing building on the site. The existing trees all appear to be exotic species. The Site Plan indicates that a 27 unit, 5-story, Multi-Family Building is planned for the site. The following trees were observed on the subject property:

Tree Inspection Data:

Tree #1 *Platanus acerifolia* or London Plane; 1.5" D.B.H.;6'Sp.;15'Ht.; Rating: B
Tree #2 *Platanus acerifolia* or London Plane; 1.5" D.B.H.;5'Sp.;13'Ht.; Rating: C+
Tree #3 *Phoenix canariensis* or Canary Island Palm; 18" D.B.H.;20'Sp.;14'Ht.; Rating: B+
Tree #4 *Ailanthus altissima* or Tree of Heaven; 3" D.B.H.;6'Sp.;14'Ht.; Rating: C-
Tree #5 *Phoenix canariensis* or Canary Island Palm; 20" D.B.H.;20'Sp.;20'Ht.; Rating: B+
Tree #6 *Podocarpus macrophyllus* or Yew Pine; 15" D.B.H.;20'Sp.;25'Ht.; Rating: C+

Recommendation

The proposed new project will most likely require the removal of all the existing private trees. Tree #1 and Tree #2 are newly planted Street Trees in the parkway along Melrose Avenue. They must be protected during construction. I would recommend that a temporary 6 foot chain-link fence be installed within the parkway at the dripline of the trees or the farthest point possible. No dumping of foreign materials shall be permitted within the dripline of the Street Trees. Tree #3, Tree #5 and Tree #6 are Significant Trees over 8 inches in diameter at D.B.H. (Diameter Breast Height) or 4.5 feet above the ground. The City requires that each Significant Tree to be removed be replaced at a 1:1 ratio on the subject property. A total of 3-24 inch-box size replacement trees should be planted on the subject property. The new Landscape Plan must identify the Significant replacement trees. Heat and drought tolerant trees are recommended.

Certification

As an I.S.A Certified Arborist and Licensed Pest Control Adviser I further certify that there are no native, protected species of Oak, California Bay, California Sycamore, Southern California Black Walnut, Mexican Elderberry or Toyon growing on or adjacent to the subject properties. No native, protected Oak, California Bay, California Sycamore, Southern California Black Walnut, Mexican Elderberry or Toyon will be impacted on the subject properties or neighboring, adjoining properties by any future development of the subject property.

I am an Associate Arborist with McKinley & Associates. I am a Certified Arborist and a Licensed Pest Control Adviser and am therefore considered a Tree Expert as defined in the City of Los Angeles Ordinance No. 186873. I prepared this Arborist Certification Letter as required by the City of Los Angeles.

Thank you for the opportunity to serve you and your arboricultural and horticultural needs. If you have any further questions, please feel free to contact me during the day on my business cell phone at (818) 858-5077.

Yours truly,

Dennis Gaudenti, Associate Arborist

Executive Summary

This report presents the results of a Historic Resources Assessment Report for the building at 6721 Melrose Avenue (subject property; Assessor's Parcel Number [APN] 5524-013-022), and a cursory review of the adjacent building at 6715 Melrose Avenue (adjacent property; APN 5524-013-023), City of Los Angeles, Los Angeles County, California (Project). The purpose of this report is to determine if either of the buildings individually constitutes a historical resource pursuant to Section 15064.5(a) of the California Environmental Quality Act (CEQA) Guidelines. Chronicle Heritage architectural historians (Carrie Chasteen and Scott Torres; Attachment A. Resumes of Key Personnel) were retained to serve as the principal investigators to complete this Historic Resource Assessment Report. Chasteen and Torres meet the Secretary of the Interior's Professional Qualification Standards in the fields of History and Architectural History (36 CFR Part 61).

The subject property is composed of a commercial building that faces south onto Melrose Avenue. Melrose Avenue is an arterial corridor in the Hollywood Community Plan Area (CPA). The subject property was not identified as a eligible resource or a contributor to a potential Historic Preservation Overlay Zone (HPOZ) in the Historic Resources Survey Report of the Hollywood CPA completed by Historic Resources Group in 2011 and revised in 2015.[1] There was no information reviewed to suggest the subject property was associated with events or a pattern of events pertinent to national, state, and local contexts. Furthermore, the subject property was occupied for a time by the International Alliance of Theatrical Stage Employees. There was no information reviewed in newspaper articles to suggest the subject property served a unique function within the context of the entertainment industry in Los Angeles. There was no person(s) of historical significance found to be associated with the subject property, and the subject property has been substantially altered on the primary façade that faces onto the public right-of-way. The subject property does not adequately reflect or retain sufficient elements of the Mid-Century Modern style and was not found to be an excellent example of a master architect or builder's body of work.

After careful research and evaluation, Chronicle Heritage (Torres) concluded that the subject property at 6721 Melrose Avenue is not recommended eligible for listing in the National Register of Historic Places (National Register), the California Register of Historical Resources (California Register), for designation as a Historic-Cultural Monument (HCM), and would not contribute to a potential HPOZ. Therefore, the subject property does not meet the criteria to be considered historical resources pursuant to Section 15064.5(a) of the CEQA. Therefore, the proposed demolition of the building and redevelopment of the subject property would not result in a substantial adverse change to a historical resource (Section 15064.5(b) of the CEQA Guidelines).

Due to the proximity of the adjacent building at 6715 Melrose Avenue, a cursory review of the construction history, development, and ownership history was completed in addition to an evaluation for listing in the National Register, California Register, and HCM designation. After careful research and evaluation, Chronicle Heritage (Torres) concluded that the adjacent building at 6715 Melrose Avenue is not recommended eligible for listing in the National Register or the California Register as an HCM, and would not contribute to a potential HPOZ. Therefore, the proposed redevelopment of the subject property would not result in a direct or indirect substantial adverse change to 6715 Melrose Avenue.

Introduction

This report presents the results of a Historic Resources Assessment Report for the building at 6721 Melrose Avenue (subject property Assessor's Parcel Number [APN] 5524-013-022), and a cursory review of the adjacent property at 6715 Melrose Avenue (APN 5524-013-023), City of Los Angeles (City), Los Angeles County, California (Project). The purpose of the report is to determine if either of the buildings individually constitute a historical resource pursuant to Section 15064.5(a) of the California Environmental Quality Act (CEQA) Guidelines. Chronicle Heritage architectural historians (Carrie Chasteen and Scott Torres; Attachment A. Resumes of Key Personnel) were retained to serve as the principal investigators to complete this Historic Resource Assessment Report. Chasteen and Torres meet the Secretary of the Interior's Professional Qualification Standards in the fields of History and Architectural History (36 CFR Part 61).

Project Summary and Location and Description

Brief Project Description

The Project entails demolishing the existing building on the subject property to clear the parcel for redevelopment.

Project Location and Current Setting

The subject property at 6721 Melrose Avenue (Assessor's Parcel Number [APN] 5524-013-022), and adjacent property at 6715 Melrose Avenue consists of commercial buildings on the northwest corner of Melrose and Mansfield avenues. The subject property is in a densely-developed arterial corridor with street-facing commercial buildings on the north and south sides of Melrose Avenue (Figure 1–Figure 3).

Methods

The current investigation's methods consisted of research and a field assessment of the buildings on the subject property and neighboring properties.

Research Conducted

1. Obtained and reviewed the building permits for the parcels from the City Department of Building and Safety. Dates of construction and subsequent alterations were determined by the building permit record, as well as additional resources, such as the field inspection, assessor inspection records, Sanborn maps, and historical aerial photographs.
2. Researched the subject property and surrounding area at local libraries and archives to establish the general history and context of the area, including a review of the Built Environment Resource Directory (BERD) for Los Angeles County, newspapers, City directories, books, and articles.

3. Consulted the Context/Theme/Property Type (CTP) eligibility standards formulated for the City's Historic Context Statement to identify the appropriate CTP under which to evaluate the buildings on the subject property and adjacent parcel.
4. Reviewed and analyzed ordinances, statutes, regulations, bulletins, and technical materials relating to federal, state, and local historic preservation assessment processes and programs to evaluate the significance and integrity of the buildings on the subject and adjacent properties.

Figure 1. Sketch map, 6721 Melrose Avenue.

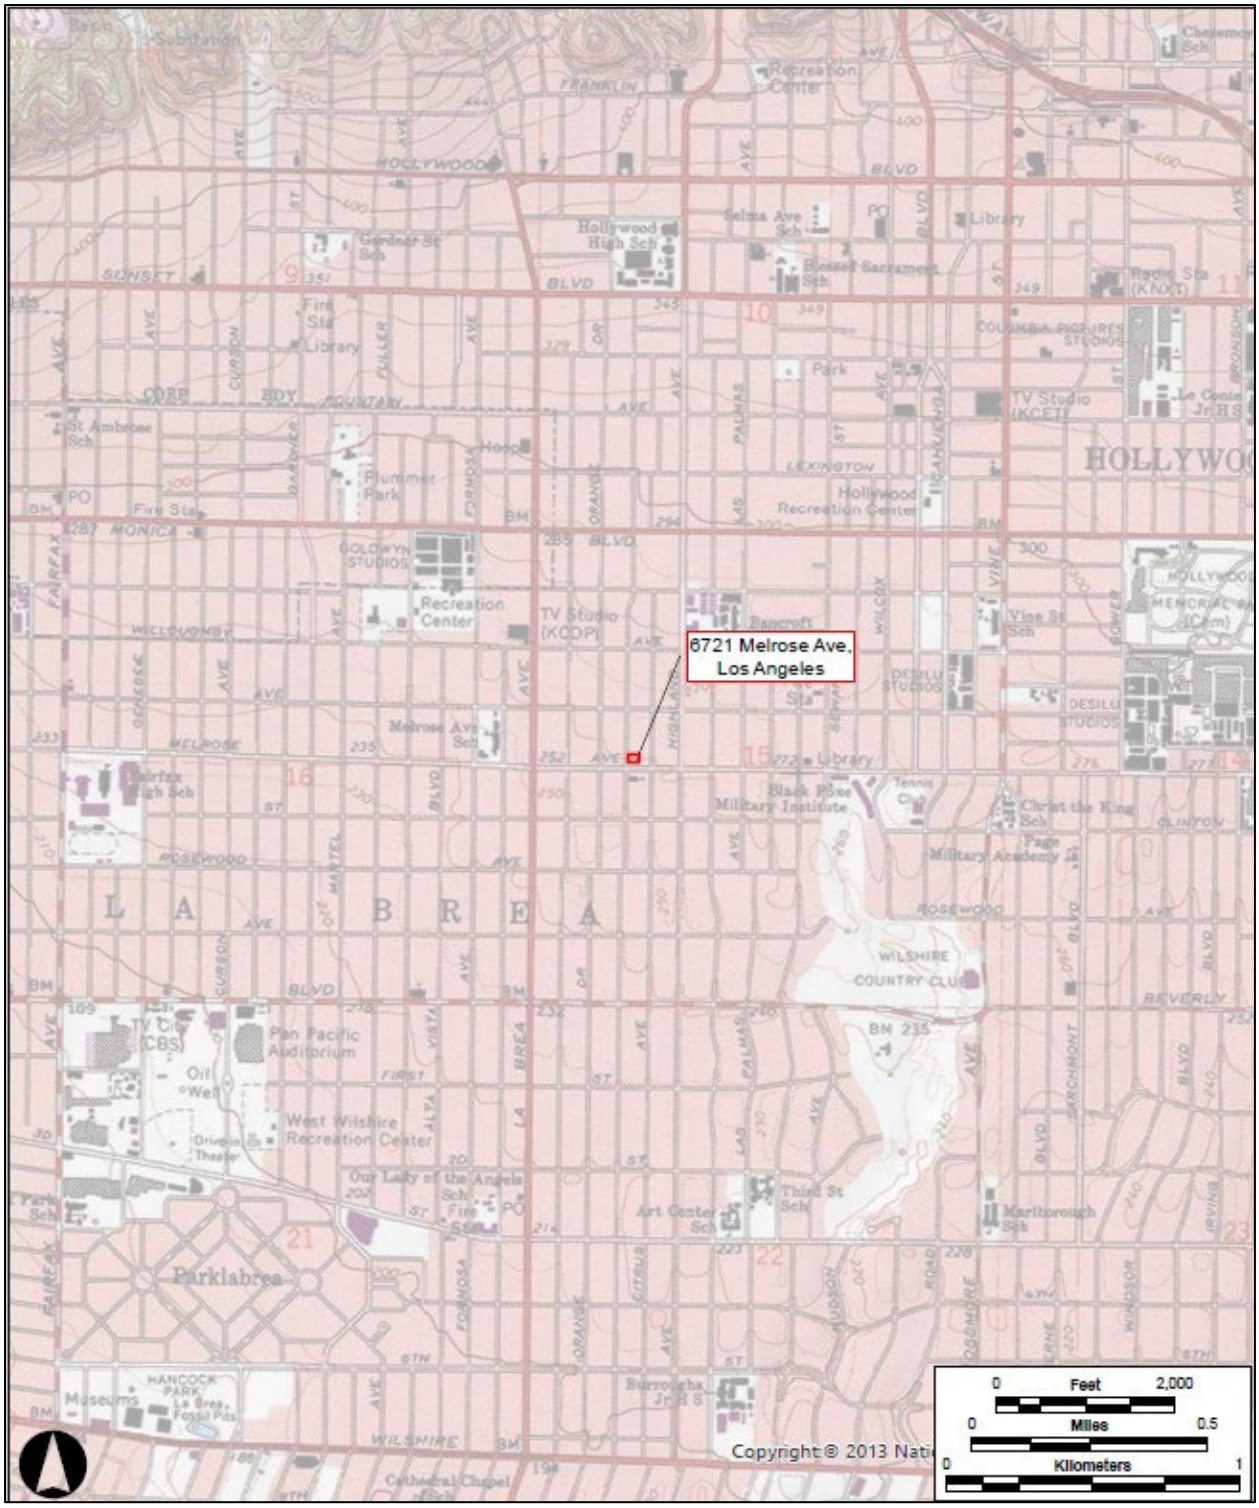

Figure 2. Project location map, 6721 Melrose Avenue (U.S. Geological Survey 2021).

Figure 3. Subject property setting from North Mansfield Avenue, facing south.

Field Methods

1. Conducted a field inspection of the subject and adjacent properties on October 18, 2023, to ascertain the general condition and physical integrity of the buildings thereon. Digital photographs were taken during the site inspection and field notes were made.
2. The subject property at 6721 Melrose Avenue was evaluated individually as a potential historical resource under federal, state, and local eligibility criteria according to the National Park Service, California Office of Historic Preservation, and Los Angeles Office of Historic Resources standards. The adjacent property at 6715 Melrose Avenue was cursorily reviewed under these same guidelines and standards to determine if the proposed Project would have a direct or indirect impact on the adjacent property.

Regulatory Framework

The buildings associated with the subject and adjacent properties were evaluated to determine if they constitute a historical resource as defined by the CEQA, using the eligibility criteria for listing in applicable federal, state, and local statutes and regulations.

Federal

The National Historic Preservation Act of 1966, as amended, defines the criteria to be considered eligible for listing in the National Register of Historic Places (National Register):

> The quality of significance in American history, architecture, archeology, engineering, and culture is present in districts, sites, buildings, structures, and objects that possess integrity of location, design, setting, materials, workmanship, feeling, and association and:
>
> A. that are associated with events that have made a significant contribution to the broad patterns of our history; or
>
> B. that are associated with the lives of persons significant in our past; or
>
> C. that embody distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
>
> D. that have yielded, or may be likely to yield, information important in prehistory or history (36 Code of Federal Regulations [CFR] Section part 63).

According to *National Register Bulletin No. 15*, "to be eligible for listing in the National Register, a property must not only be shown to be significant under the National Register criteria, but it also must have integrity." Integrity is defined in *National Register Bulletin No. 15* as "the ability of a property to convey its significance."[2] Within the concept of integrity, the National Register recognizes the following seven aspects or qualities that in various combinations define integrity: location, design, setting, materials, workmanship, feeling, and association.

State of California

Section 5024.1(c), Title 14 CCR, Section 4852 of the California Public Resources Code defines the criteria to be considered eligible for listing in the California Register of Historical Resources (California Register):

> A resource may be listed as an historical resource in the California Register if it meets any of the following [National Register] criteria:
>
> 1. Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage;
>
> 2. Is associated with the lives of persons important in our past;
>
> 3. Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values; or
>
> 4. Has yielded, or may be likely to yield, information important in prehistory or history.

Section 4852(c) of the California Code of Regulations[3] defines integrity as follows:

> Integrity is the authenticity of an historical resource's physical identity evidenced by the survival of characteristics that existed during the resource's period of significance. Historical resources eligible for listing in the California Register must meet one of the criteria of significance described in section 4852(b) of this chapter and retain enough of their historic character or appearance to be recognizable as historical resources and to convey the reasons for their significance. Historical resources that have been rehabilitated or restored may be evaluated for listing.
>
> Integrity is evaluated with regard to the retention of location, design, setting, materials, workmanship, feeling, and association. It must also be judged with reference to the particular criteria under which a resource is proposed for eligibility. Alterations over time to a resource or historic changes in its use may themselves have historical, cultural, or architectural significance.

City of Los Angeles

Historic-Cultural Monument (HCM). Section 22.171.7 of the City Cultural Heritage Ordinance defines an HCM as:

> For purposes of this article, an HCM is any site (including significant trees or other plant life located on the site), building or structure of particular historic or cultural significance to the City of Los Angeles. A proposed Monument may be designated by the City Council upon the recommendation of the Commission if it meets at least one of the following criteria:
>
> 1. Is identified with important events of national, state, or local history, or exemplifies significant contributions to the broad cultural, economic or social history of the nation, state, city or community;
> 2. Is associated with the lives of historic personages important to national, state, city, or local history; or
> 3. Embodies the distinctive characteristics of a style, type, period, or method of construction; or represents a notable work of a master designer, builder, or architect whose individual genius influenced his or her age.

Unlike the National and California Registers, the City Cultural Heritage Ordinance makes no mention of concepts such as integrity or period of significance. Additionally, properties do not have to reach a minimum age, such as 45 to 50 years, to be designated as HCMs.

Historic Preservation Overlay Zone (HPOZ). The City has established 36 HPOZs, or historic districts. City Ordinance No. 175891 amended Section 12.20.3 of the City's municipal code regarding HPOZs. The purpose of the ordinance was stated as:

> It is hereby declared as a matter of public policy that the recognition, preservation, enhancement, and use of buildings, structures, Landscaping, natural features, and areas within the City of Los Angeles having Historic, architectural, cultural, or

aesthetic significance are required in the interest of the health, economic prosperity, cultural enrichment, and general welfare of the people.

Contributing elements are defined as any building, structure, landscape, or natural feature identified in a historic resource survey as contributing to the historic significance of the HPOZ, including a building or structure which has been altered, where the nature and extent of the alterations are determined reversible by the historic resources survey.

Record Search

Record Search

In accordance with South Central Coastal Information Center's (located at California State University, Fullerton) current policies and procedures, an equivalent record search was conducted by reviewing the BERD for Los Angeles County, available from the California Office of Historic Preservation (updated September 23, 2022), historic U.S. Geological Survey 7.5-minute series topographic maps, and aerial photographs for the subject and adjacent properties. In addition to official maps and records, the following published registers and reports for the geographic area were reviewed:

- National Register—Listed (2024);
- California Register—Listed (2024);
- California State Historical Landmarks (1996 and updates);
- California Points of Historical Interest (1992 and updates); and
- HistoricPlacesLA (2024).

Previous Evaluations/Designations Summary

The subject property is in the Hollywood CPA. The building has not been identified as a resource individually eligible for listing in the National Register, California Register, HCM, or a contributor to a potential historic district (HPOZ).

History and Description of Surrounding Area

Development History

Commercial Development in Tract No. 4762

The subject and adjacent properties are in Tract No. 4762 (Figure 4). The tract was platted for G. Allan Hancock in 1922. The tract map identifies 39 rectangular lots, of which 30 face south onto Melrose Avenue between LaBrea Avenue to the east and an alley just east of Olive Avenue (now Citrus Avenue).

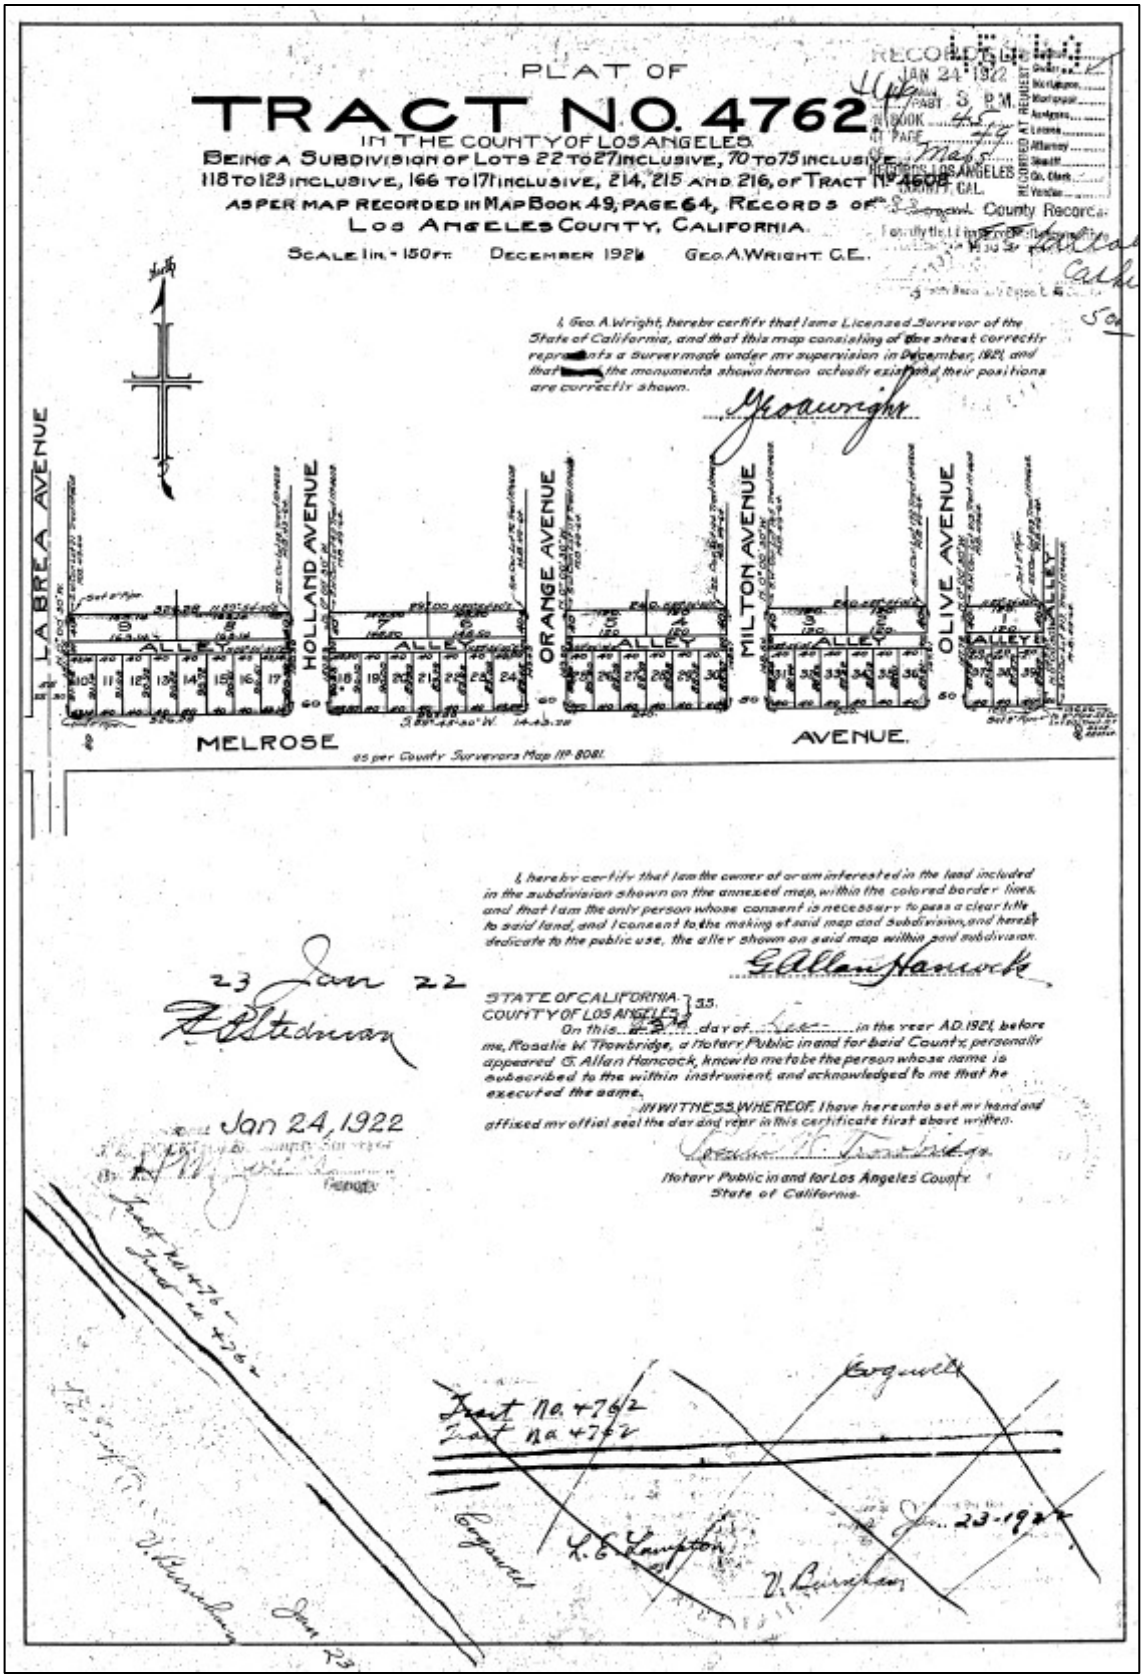

Figure 4. Tract No. 4762 (Los Angeles County Public Works).

> "George Allan Hancock was born on 26 July 1875, the heir to the Hancock family's extensive Los Angeles land holdings, including Rancho La Brea. Hancock expanded the family fortunes through oil exploration on the Rancho beginning in 1901 and continued to increase those fortunes for the next two decades. In 1920, he founded the California Bank. By the middle of the 1920s he also had significant holdings in railroads and communications."[4]

A review of historical newspaper articles, Tract No. 4762 did not appear to be the subject of significant commercial development along Melrose Avenue due to lack of press coverage. A review of historic aerial photographs indicated that a building was located between the subject and adjacent properties as early as 1948.[5] Aerial photographs from 1952[6] include the subject property at 6721 and adjacent property at 6715. A review of the City building permit record indicated that the subject property was constructed as an office for the International Alliance of Theatrical Stage Employees (IATSE) in 1952.

International Alliance of Theatrical Stage Employees

A review of the City building permit records indicated that the subject property was constructed as an office for the IATSE, Local 683. The IATSE was founded in 1893,[7] and continues to work in all forms of theater, motion pictures, television production, tradeshows, exhibitions, television broadcasting, and concerts.

6721 Melrose Avenue (Subject Property)

The northern façade opens to a paved surface parking lot, the eastern façade abuts the neighboring building on the subject property, and the southern and western façades are enclosed with security fencing. The current condition of the eastern, southern, and western façades is difficult to photograph as a result.

Architectural Description

The building is a Mid-Century Modern-style commercial building that was constructed in 1952. The building features a flat roof and façades clad in a combination of brick and stucco. The fenestration pattern includes a section on floor-to-ceiling metal framed plate glass and rectangular fixed glass windows on non-primary façades. The building features a recessed and offset entryway. The primary entryway is secured behind metal security fencing. The building also features a basement located on the northern façade and is not visible from the public right-of-way (ROW).

Primary Façade (Southern Façade)

The primary façade remains largely obscured behind construction fencing. A section of brick cladding and flat roof can be seen over the top of the fencing. Views of the primary façade are obstructed from the inside as well, due to a metal security gate being locked and reinforced from the outside. A Google Street View photograph from 2014 includes features that are not currently visible (Figure 5). The primary façade features a recessed entryway with an offset entry door. The façade is clad in a combination of brick masonry and stucco and features a section of floor-to-ceiling metal framed plate glass windows. Based on the current condition of the building, the primary façade windows have been altered. A sliding glass door was installed, and additional oriented-strand-board (OSB) sheeting was installed over the majority of façade that contained plate-glass windows (Figure 5 through Figure 7).

Northern Façade

The northern façade is clad in a combination of brick masonry and stucco. The entryway on the façade is recessed and offset. The fenestration includes rectangular metal windows and a vinyl sliding window, all secured behind metal security grilles. The entryway to the basement of the building is also located on the northern façade. The basement space was not accessible and secured behind a metal security door (Figure 8–Figure 10).

Eastern Façade

The eastern façade of the building is brick and nearly abutted to the neighboring building. The area of the eastern façade includes an open patio area that includes two sliding glass door entryways. The patio is not visible from the public ROW (Figure 11 and Figure 12).

Western Façade

The western façade is clad in stucco and features a ribbon of metal windows that extends the length of the façade. One metal window has been replaced with a vinyl sliding unit and OSB board to accommodate the smaller vinyl replacement. The façade also features a wide roof overhang that is boxed and coated in stucco. The façade is unadorned of any design features beyond the window ribbon and wide overhang (Figure 13–Figure 15).

Construction History

The subject property is a Mid-Century Modern commercial building in the City. A review of the City building permit record indicated a permit was issued on November 14, 1952[8] to construct a 75 × 50 × 12-foot building, clad in masonry and stucco on Lots 31 and 32 of Tract 4762. The permit did not identify an architect associated with the building design. M.L. Riesenberg was identified as the contractor associated with construction and H.V. Lamberti as the licensed engineer.

Identification of Architects and Builders

A review of the original building permit that was granted in 1952, listed M.L. Riesenberg as the contractor associated with the construction of the building. Riesenberg was identified in newspaper advertisements regarding residential and commercial development in the Los Angeles area. Historical issues of the *Los Angeles Times* indicated that Riesenberg's office was located nearby at 6055 Melrose Avenue.[9] Based on numerous articles regarding M.L. Riesenberg's building services, it appears that Riesenberg may have been an architect/draftsman and builder that specialized in constructing apartment buildings in the Los Angeles area.[10] Riesenberg was not identified in the Pacific Coast Architecture Database (PCAD) as an architect whose body of work was significant. HistoricPlacesLA did not identify Riesenberg or examples of his body of work in Los Angeles as significant. Riesenberg was associated with the Villa Vicente Apartments in the City of Santa Monica, constructed in 1953.[11] There was no information regarding the professional life of Harold V. Lamberti beyond his identification as an engineer on the original building permit.

Owner and Occupant History

A review of the City building permit record revealed that the subject property was initially constructed for the IATSE. David Arbuckle was listed as the owner. The Certificate of Occupancy indicated that Arbuckle resided at 6261 Sunset Boulevard in the city. An Ancestry record search indicated that Arbuckle was employed as a trade union secretary.[12] A gap in the City building permit record does not provide any information regarding the duration of time the building was utilized as an office for the IATSE. Furthermore, there was no information found in local newspaper articles regarding day-to-day operations of the IATSE over the course of time to establish what period the building was occupied. Permits between 1999 and 2017 indicated that the building on the subject property was owned by the John and Angel Makhani Trust in 1999[13] and Melrose Partners, LLC in 2017.[14][15]

Use History

The subject property was built as an office for the IATSE, Local 683 and appears to have been used as an office space over the course of 71 years.

Historic Context

The subject property was evaluated using the Citywide Historic Context Statement developed for SurveyLA; specifically, the Commercial Properties Associated with the Entertainment Industry, 1908-1980 context and the Office Buildings Associated with the Entertainment Industry theme.[16] The Architecture and Engineering context and the L.A. Modernism, 1919-1980, and Mid-Century Modernism, 1945-1975 subtheme.[17]

Summary Statement of Significance: Los Angeles' identity is inextricably tied to its role in the entertainment industry. The well-known advertising slogan, "The Entertainment Capital of the World" reflects the city's central place in the motion picture, radio, television, and recording/music industries. As the entertainment industry expanded, successful companies commissioned purpose-built buildings to house their operations. Commercial office buildings built for entertainment related uses, including corporate headquarters, are significant under the areas of Entertainment, Commerce, and/or Social History.

Period of Significance: 1908 – 1980

Period of Significance Justification: The period of significance begins in 1908, the origin of the motion picture industry in Los Angeles (though resources from this period associated with the entertainment industry are rare), and ends in 1980, the end date for SurveyLA. The end date may be extended over time.

Architecture and Engineering

Context: Architecture and Engineering

Theme: Mid-Century Modern, 1945-1970

Summary Statement of Significance: Resources evaluated under this sub-theme are significant in the area of Architecture as excellent examples of the Mid-Century Modern style and exhibit quality of design through distinctive features. Mid-Century Modernism is a broad classification of postwar modernism and represents one of the largest and most diverse collections of architecture in Los Angeles. The style is generally characterized by its geometric forms, smooth wall surfaces, flat or low-pitched roofs, and absence of exterior ornamentation. While some examples of the style may represent a particular influence – such as Post-and-Beam or Organic architecture – many incorporated elements of the various influences that shaped this style. It was a remarkably versatile style that was applied to almost every type of property: residential, commercial, institutional, and industrial.

Period of Significance: 1945-1970

Period of Significance Justification: Mid-Century Modernism was, in many ways, a continuation of the prewar Modernism that extended into and evolved for the duration of the postwar period. The period of significance begins in 1945, which signifies the beginning of the postwar period, and ends in the mid-1970s, by which time the style had largely fallen out of favor with architects and the American public.

Geographical Location: Citywide, with concentrations in areas of the city like the San Fernando Valley, Westchester, and the Westside that experienced considerable growth and development after World War II.

Additional non-primary façades/window openings have been altered and modified to accommodate different sized sliding window replacements. Furthermore, metal security fencing was added to secure the recessed entryway and ribbon of floor-to-ceiling windows (that have been altered). M.L. Riesenberg does not appear to be a significant architect/builder that was associated with significant building projects in the City. There was no information available to suggest Riesenbergs body of work within the context of architecture and engineering is significant on the national and state levels. Therefore, the subject property is recommended not eligible for listing in the National Register or California Register pursuant to Criterion C/3.

Criterion D/4

Criterion D/4 was not considered in this report, as it generally applies to archaeological resources. Additionally, there is no reason to believe the property has the potential to yield important information regarding prehistory or history.

Additional non-primary façades/window openings have been altered and modified to accommodate smaller sized sliding window replacements. Furthermore, metal security fencing was added to secure the recessed entryway and ribbon of floor-to-ceiling windows (that have been altered). M.L. Riesenberg does not appear to be a significant architect/builder that was associated with significant building projects in the City. Riesenbergs body of work did not include any buildings in the City that were significant within the context of architecture and engineering. Historic Preservation Overlay Zone (HPOZ)

The subject property was not identified as a contributor to an established HPOZ or potential HPOZ in Survey LA's Historic Resources Survey Report of the Hollywood CPA. Spaulding Square is the closest HPOZ and is a cluster of one-story single-family residences. To date, the City has not designated an HPOZ of commercial properties.

6715 Melrose Avenue (Adjacent Property)

Due to the close proximity of the neighboring commercial building at the adjacent property, 6715 Melrose Avenue, a cursory review of the City building permit record, historical newspaper articles, and SurveyLA's historic resources survey of the Hollywood CPA, the Neighborhood Commercial Development, 1880–1980 context and Arterial Commercial Development, 1880–1950 subtheme[18] was conducted. The Architecture and Engineering context and the L.A. Modernism, 1919–1980[19], and Mid-Century Modernism, 1945–1975 subtheme was completed to determine whether the building is eligible for listing the National Register or California Register, designation as a City HCM, or contributor to a potential eligible HPOZ.

Construction History

The building on the adjacent property was constructed as a store in 1950 for Willens and Bertisch Co. The Willens and Bertisch Company was also listed as the builder associated with the construction of the building. The Willens and Bertisch Company was located at 6324 Santa Monica Boulevard in the City when the building was constructed. A review of historic newspaper articles indicated that the Willens and Bertisch Company was a local construction and building company that developed residential and commercial buildings throughout Los Angeles County. An article in the *Los Angeles Evening Citizen News* indicated that the firm of Willens and Bertisch served as

consultant architects and general contractors.[20] Willens and Bertisch was not identified as a significant architecture and contracting firm, nor were any buildings they designed and constructed identified as significant in the Hollywood CPA. An additional review of HistoricplacesLA and PCAD did not identify examples of their body of work in the Los Angeles County area. Based on the City building permit record, the building was not substantially altered until 2020. According to the permit record, the building's use had changed over the course of time from a retail store in the 1950s,[21] photo office in 1968,[22] recording studio in 1978,[23] restaurant in the 1980s and 1990s,[24] and finally an art gallery in 2020.[25]

Ownership History

Willens and Bertisch Co. was listed as the owners of the building on the adjacent property during initial construction in 1950. Willens and Bertisch was listed as owner between 1949[26]–1957.[27] Subsequent building permits identified Clarence Gazin (1918–2016)[28] as the owner between 1968[29]–1985.[30] Building permits issued as recent between 2014[31]–2015[32] indicated that the building was owned by the Clarence Gazin Co. Trust. Ancestry records indicate that Clarence Gazin was a medical doctor[33] in the Los Angeles area. There was no information in the building permit record and newspaper articles regarding the building to suggest that it was a medical office at any point in time. Based on Ancestry records regarding Clarence Gazin, the building appears to have been utilized as a source of real estate income for Gazin and family. The building is currently owned by Fabian Perez.[34]

Architectural Description

The building on the adjacent property is a Mid-Century Modern-style commercial building that was constructed in 1950.[35] The building is clad in stucco and features rectangular store front windows and a ribbon of rectangular fixed glass windows beneath the roofline. A partition wall that extends from the ground and over the roofline serves as backing for surface mounted signage. Additional features include a double entryway door, ornamental metal security gates, and fabric shades.

Based on a review of the City building permit record and Google Street view photographs between 2007–2019 (Figure 16 through Figure 18) the primary façade has been altered. The alterations to the primary façade include, reorientation and resizing of numerous window openings to accommodate fixed glass storefront display windows, resizing the entryway door frame to install double doors, removal of original wood lap siding was completed to reclad the façade in stucco, and obscuring upper the upper-level transom window ribbon with a false front. The alterations to the primary façade of the building were completed in 2020[36](Figure 17).

The adjacent property is not recommended eligible for listing in the National Register or the California Register pursuant to Criterion A/1.

Criterion B/2

The adjacent property was not found to be associated with the lives of persons significant in our past. Therefore, the adjacent property is recommended not eligible for listing in the National Register or the California Register pursuant to Criterion B/2.

Criterion C/3

The adjacent property is a Mid-Century Modern office that was constructed in 1950 by the Willens and Bertisch Company. In its current condition, the building does not adequately embody distinctive characteristics of a type, period, or method of construction beyond its flat roof design due to substantial alterations. Based on the current condition of the adjacent property, the alterations to the primary façade include, reorientation and resizing of numerous window openings to accommodate fixed glass storefront display windows, resizing the entryway door frame to install double doors, removal of original wood lap siding was completed to reclad in the façade in stucco, and obscuring upper the upper-level window ribbon with a false front eliminated character-defining features on the primary façade that are commonly observed in Mid-Century Modern designs. Additionally, the off-center fin appears to have been relocated to the eastern end of the building. Willens and Bertisch appear to be a full-service firm that included architectural design and building construction. Newspaper articles regarding their work indicated that they developed tract housing in the San Fernando Valley and various multi-family housing buildings across Los Angeles County. There was no information beyond local articles to suggest that Willens and Bertisch played a significant role within patterns of architecture, design, and construction on the national and state level. Therefore, the adjacent property is recommended not eligible for listing in the National Register or California Register pursuant to Criterion C/3.

Conclusion

6721 Melrose Avenue is not recommended as eligible for listing in the National Register or the California Register or designation as a City HCM, and it would not contribute to a potential HPOZ. Therefore, the building does not meet the criteria to be considered a historical resource pursuant to Section 15064.5(a) of the CEQA. Therefore, the proposed demolition of the building and redevelopment of the subject property at 6721 Melrose Avenue would not result in a substantial adverse change to a historical resource (Section 15064.5(b) of the CEQA Guidelines).

Due to the proximity of the adjacent property at 6715 Melrose Avenue, a cursory review of the construction history, development, and ownership history was completed in addition to an evaluation for listing in the National Register or the California Register, and for designation as a City HCM. 6715 Melrose Avenue is not recommended as eligible for listing in the National Register or the California Register or designation as a City HCM, and it would not contribute to a potential HPOZ. Therefore, the proposed Project would not result in a direct or indirect substantial adverse change to a historical resource (Section 15064.5(b) of the CEQA Guidelines).

Historic Preservation Commissioner, Chair, City of Pasadena (former)

Carrie Chasteen has over 22 years of architectural history experience at state, federal, and private sector levels. Her common tasks include project management, field survey, archival research, and coordinating with lead and consulting agencies. Carrie has extensive experience in California, Oregon, Washington, Nevada, and throughout the eastern seaboard. In addition, Carrie has extensive transportation experience including Caltrans, ODOT, and WADOT. She successfully completed the training as an OTIA III CS3 Technical Lead as an Architectural Historian. Carrie meets and exceeds the Secretary of the Interior's professional qualification standards as a Historian and Architectural Historian in accordance with 36 CFR Part 61. She is experienced in documenting, researching, and evaluating properties throughout the Pacific Northwest. Carrie managed on-call sole-source historic preservation contracts with the County of Los Angeles Department of Regional Planning and cities of Sierra Madre and Manhattan Beach.

SELECT RECENT PROJECT EXPERIENCE

Travis Air Force Base, Fairfield, Solano County, CA. *Architectural Historian (2023-2024).* Carrie served as project manager for the documentation and evaluation of the passenger terminal, hospital, and morgue. The three buildings were identified as not significant when evaluated under the Cold War context. At the request of the installation, the three buildings were re-evaluated under the Vietnam War context and were found to be eligible for listing in the NRHP as a result of the recent survey. Additionally, Carrie contributed to the preparation of a Historic Property Management Plan (HPMP) for Hangar 810, which is significant for its association with the development of air defense and deterrence on the West Coast during the Cold War and as a rare and excellent example of a DC bomber hangar used during the Cold War for the B-36 bomber. Carrie co-presented the HPMP to operations staff to improve understanding of how to implement the HPMP.

County of Los Angeles Department of Regional Planning, CA. *Principal Architectural Historian/Project Manager (2019-2023).* On behalf of the County of Los Angeles Department of Regional Planning, Carrie prepared a Historic Preservation Element for the Florance-Firestone Metro Area Plan. The Metro Planning Area is one of the 11 Planning Areas established by the General Plan. The Metro Area Plan (MAP) is a long-range planning document that provides a policy framework for how and where the seven unincorporated communities within the Metro Planning Area will grow over the next 15 years, while celebrating the culture and history of these communities. Other deliverables included review and preparation of Landmark and Mills Act applications, preparation of CDP surveys and historic context statements, and staff support at various public hearings.

Altadena African American Historic Resource Survey, CA. *Principal Architectural Historian/Project Manager (2021).* Altadena is a Census-Designated Places (CDP) in Los Angeles County, north of Pasadena. On behalf of the County of Los Angeles Department of Regional Planning, Carrie managed development of a historic context statement and CDP-wide survey of Altadena focused on the

African American community. Altadena has long been known as a safe haven for African Americans, including the grave sites of Ellen Garrison Clark (1823—1892), who was an early abolitionist, and her family. Altadena's African American community has a vibrant history. Through community involvement, oral histories were recorded, research topics were identified and fleshed out, and the collaborative process resulted in an award-winning document. Due to end of year budgetary constraints, this project was successfully completed within allocated budget with a compressed schedule of 2.5 weeks. The Altadena African American Historic Resources Survey received a Los Angeles Conservancy Preservation Award, a California Preservation Foundation Preservation Award, and a California Association of Environmental Professionals Diversity, Equity, and Inclusion Merit Award.

Stanley Burke's, 5043 Van Nuys Boulevard, Los Angeles, California, *Principal Architectural Historian (2019 -- Ongoing).* Stanley Burke's (City of Los Angles Historic-Cultural Monument No. 1215) is a 1958 Googie diner designed by Armet and Davis. Carrie Chasteen serves as Principal Architectural Historian to support the restoration and adaptive re-use of this building as a fast-casual dining establishment. Ms. Chasteen has assisted with the designation of the property as a Historic-Cultural Monument (Landmark) and project presentation to the City of Los Angeles Office of Historic Resources and Cultural Heritage Commission. Ms. Chasteen has been intensively involved with the design team to ensure the sensitive treatment of the building, including materials testing to determine the original color palette, including both interior and exterior.

to prepare cultural resource assessments and design review for the following schools: 92nd Street, Ascot, Fries, Grant, McArthur, Olive Vista, and SOCES. Efforts included archival research, preparation of historic context statements, and evaluating the campuses for inclusion in the National Register of Historic Places and California Register of Historical Resources to comply with the California Environmental Quality Act. Project were also reviewed for conformance with the Secretary of the Interior's *Standards for the Treatment of Historic Properties*.

Document and Evaluate 54 Parks, Golf, and Arboreta, CA. *Principal Architectural Historian/Project Manager (2015-2019).* On behalf of the Los Angeles County Department of Parks and Recreation, Carrie served as Principal Architectural Historian and Project Manager to oversee documentation and evaluation of 54 facilities within the department's jurisdiction. Facilities ranged from small community parks in the remote desert recesses of Los Angeles County, to landfill conversions to parks and golf courses, to facilities significant for cultural associations with the County's ethnic communities. Los Angeles County enacted its preservation ordinance in 2015, and Parks and Recreation sought to identify which of its facilities had significant associations with important events and/or persons, were the work of a master, and were significant for quality of architecture or engineering. Additionally, a Cultural Resource Management Plan and Worker Environmental Awareness Program training video and hand out where prepared in support of this project. One facility, Descanso Gardens, was found to be eligible for listing in the National Register of Historic Places as the work of master landscape architects and for its association with the facility's founder, Elias Manchester Boddy. A National Register of Historic Places nomination was prepared on behalf of the Descanso Gardens Guild, and the facility was listed April 2021. The project received a Los Angeles Conservancy Preservation Award in 2020.

Interstate 10 High-Occupancy-Vehicle (HOV) Lanes, Haven Avenue to Ford Street, San Bernardino and Los Angeles Counties, CA. *Principal Architectural Historian (2008-2015).* The proposed Interstate 10 (I-10) high-occupancy-vehicle (HOV) lanes will add 25 miles of new carpool lanes that will extend the existing carpool lanes, from the current terminus at Haven Avenue in Ontario, California, to Ford Street in Redlands. The 25-mile extension will provide continuity with the existing carpool lanes to the west between the cities of Ontario and Montclair and the new carpool lanes under construction

in the Los Angeles County portion of I-10. The project includes a full range of environmental technical studies, including the preparation of preliminary roadway geometric designs, a project report, and an environmental document.

Los Angeles Unified School District, Los Angeles County, California, *Principal Architectural Historian (2016-2023).* Carrie Chasteen served as Principal Architectural Historian to prepare cultural resource assessments and design review for the following schools: 92nd Street, Ascot, Fries, Grant, McArthur, Olive Vista, and SOCES. Efforts included archival research, preparation of historic context statements, and evaluating the campuses for inclusion in the National Register of Historic Places and California Register of Historical Resources to comply with the California Environmental Quality Act. Project were also reviewed for conformance with the Secretary of the Interior's *Standards for the Treatment of Historic Properties.*

On-Call Services for Los Angeles County Department of Regional Planning, CA. *Principal Architectural Historian (2019-2023)* Carrie prepared Landmark and Mills Act applications; a Historic Preservation Element for the Florence-Firestone community; historic context statement and survey for Sun Village; public outreach; and staff support at Historic Landmarks and Records Commission and Regional Planning Commission meetings. Mills Act applications were reviewed for compliance with the Secretary of the Interior's *Standards for the Treatment of Historic Properties* (Standards). Client: County of Los Angeles Department of Regional Planning (Dean Edwards, Senior Planner)

On-Call Services for City of Sierra Madre, Los Angeles County, CA. *Principal Architectural Historian (2019-2023).* Carrie prepared and managed over 140 cultural resource assessments for properties 75 years of age or older. Work efforts included site visits to document properties using digital photography; archival research, including Sanborn fire insurance maps, historic building permits, Assessor records, and other sources dependent upon availability; and evaluating properties for inclusion in the NRHP, California Register of Historical Resources, and for inclusion in the city's historical register. Other work efforts included preparation of Mills Act contracts. Mills Act applications were reviewed for compliance with the Standards. Client: City of Sierra Madre (Vincent Gonzalez, Director of Planning & Community Preservation)

On-Call Services for City of Manhattan Beach, Los Angeles County, CA. *Principal Architectural Historian (2019-2023).* Carrie managed an on-call master service agreement. Services provided included preparation of a historic context statement and city-wide survey; peer review of Landmark and Mills Act applications; staff support at City Council meetings; and public outreach. Due to the pandemic, the historic context statement and city-wide survey were begun but shelved. Mills Act applications were reviewed for compliance with the Standards. Client: City of Manhattan Beach (Talyn Mirzakhanian, Community Development Director)

Primary Façade (Southern Façade)
The primary façade remains largely obscured behind construction fencing. A section of brick cladding and flat roof can be seen over the top of the fencing. Views of the primary façade are obstructed from the inside as well, due to a metal security gate being locked and reinforced from the outside. A Google Street View photograph from 2014 includes features that are not currently visible. The primary façade features a recessed entryway with an offset entry door. The façade is clad in a combination of brick masonry and stucco and features a section of floor-to-ceiling metal framed plate glass windows. Based on the current condition of the building, the primary façade windows have been altered. A sliding glass door was installed, and additional oriented-strand-board (OSB) sheeting was installed over the majority of façade that contained plate-glass windows.

***B10. Significance:** (*Continued from Building, Structure, Object Report page 2*)

A review of the original building permit that was granted in 1952, listed M.L. Riesenberg as the contractor associated with the construction of the building. Riesenberg was identified in newspaper advertisements regarding residential and commercial development in the Los Angeles area. Historical issues of the *Los Angeles Times* indicated that Riesenberg's office was located nearby at 6055 Melrose Avenue. Based on numerous articles regarding M.L. Riesenberg's building services, it appears that Riesenberg may have been an architect/draftsman and builder that specialized in constructing apartment buildings in the Los Angeles area. Riesenberg was not identified in the Pacific Coast Architecture Database (PCAD) as an architect whose body of work was significant. HistoricPlacesLA did not identify Riesenberg or examples of his body of work in Los Angeles as significant. Riesenberg was associated with the Villa Vicente Apartments in the City of Santa Monica, constructed in 1953. There was no information regarding the professional life of Harold V. Lamberti beyond his identification as an engineer on the original building permit.

A review of the City building permit record revealed that the subject property was initially constructed for the IATSE. David Arbuckle was listed as the owner. The Certificate of Occupancy indicated that Arbuckle resided at 6261 Sunset Boulevard in the city. An Ancestry record search indicated that Arbuckle was employed as a trade union secretary. A gap in the City building permit record does not provide any information regarding the duration of time the building was utilized as an office for the IATSE. Furthermore, there was no information found in local newspaper articles regarding day-to-day operations of the IATSE over the course of time to establish what period the building was occupied. Permits between 1999 and 2017 indicated that the building was owned by the John and Angel Makhani Trust in 1999 and Melrose Partners, LLC in 2017

National Register of Historic Places and California Register of Historical Resources

The subject property was not identified as eligible for listing in the National Register or the California Register pursuant to Criterion A/1 in the revised Historic Resources Survey Report of the Hollywood Community Plan Area (CPA) that was completed in 2015. The subject property was utilized as an office of the IATSE, Local 683 in Hollywood. Based on a review of the City building permit record, the building was not a meeting/assembly hall for IATSE members. There was no information reviewed in historical newspaper articles to suggest that any day-to-day ongoings at the subject property were significant within the context of entertainment on the national and state levels. There was also no information reviewed to associate the subject property with a specific event or pattern of events pertinent to national and state contexts. There was no information reviewed to suggest that the subject property was the headquarters of the IATSE. Therefore, the subject property is not recommended eligible for listing in the National Register or the California Register pursuant to Criterion A/1.

Criterion B/2
The subject property was not found to associated with the lives of persons significant in our past. Therefore, the subject property is recommended not eligible for listing in the National Register or the California Register pursuant to Criterion B/2.

Criterion C/3
The subject property is a Mid-Century Modern office building that was constructed in 1952 by M.L. Riesenberg. In its current condition, the building does not adequately embody the distinctive characteristics of a type, period, or method of construction beyond its flat roof design and sections of masonry cladding. Based on the current condition of the subject property, the floor-to-ceiling windows that are located on the primary façade have been altered and sections removed to accommodate the installation of a sliding glass door and OSB sheeting. Additional non-primary façades/window openings have been altered and modified to accommodate different sized sliding window replacements. Furthermore, metal security fencing was added to secure the recessed entryway and ribbon of floor-to-ceiling windows (that have been altered). M.L. Riesenberg does not appear to be a significant architect/builder that was associated with significant building projects in the City. There was no information available to suggest Riesenbergs body of work within the context of architecture and engineering is significant on the national and state levels. Therefore, the subject property is recommended not eligible for listing in the National Register or California Register pursuant to Criterion C/3.

Criterion D/4
Criterion D/4 was not considered in this report, as it generally applies to archaeological resources. Additionally, there is no reason to believe the property has the potential to yield important information regarding prehistory or history.

City HCM

The subject property was not identified in SurveyLA's Historic Resource Survey of the Hollywood CPA in 2015. The subject property was utilized as an office of the IATSE, Local 683. Based on a review of the City building permit record, the building was not a meeting/assembly hall for IATSE members. There was no information reviewed in historical newspaper articles to suggest that any day-to-day ongoings at the subject property were significant within the context of entertainment on the local level. There was also no information reviewed to associate the subject property with a specific event or pattern of events pertinent to local contexts. Furthermore, there was no information to suggest that the subject property was a significant building within the context of the entertainment industry. The subject property is not recommended eligible for designation as a City HCM pursuant to Criterion 1.

The subject property was not associated with the lives of historic personages important to city or local history. The subject property is not recommended eligible for designation as a City HCM pursuant to Criterion 2.

The subject property is a Mid-Century Modern office that was constructed in 1953 by M.L. Riesenberg. In its current condition, the building does not adequately embody distinctive characteristics of a type, period, or method of construction beyond its flat roof design and sections of masonry cladding. Based on the current condition of the subject property, the floor-to-ceiling windows that are located on the primary façade have been altered and sections removed to accommodate the installation of a sliding glass door and OSB sheeting. Additional non-primary façades/window openings have been altered and modified to accommodate smaller sized sliding window replacements. Furthermore, metal security fencing was added to secure the recessed entryway and ribbon of floor-to-ceiling windows (that have been altered). M.L. Riesenberg does not appear to be a significant architect/builder that was associated with significant building projects in the City. Riesenbergs body of work did not include any buildings in the City that were significant within the context of architecture and engineering. The subject property is not recommended to be eligible for designation as a City HCM pursuant to Criterion 3.

Historic Preservation Overlay Zone (HPOZ)

The subject property was not identified as a contributor to an established HPOZ or potential HPOZ in the City due to neighboring building neighboring reflecting an inconsistent pattern of uses and architectural styles.

Conclusion

After careful research and evaluation, Chronicle Heritage (Torres) concluded that the subject property building at 6721 Melrose Avenue is not recommended eligible for listing in the National Register or the California Register, designation as a as a City HCM, and would not contribute to a potential HPOZ. Therefore, the building does not meet the criteria to be considered a historical resource pursuant to Section 15064.5(a) of the CEQA. Therefore, the proposed demolition of the building and redevelopment of the parcel at 6721 Melrose Avenue would not result in a substantial adverse change to a historical resource (Section 15064.5(b) of the CEQA Guidelines).

RE: 6727 Melrose Avenue Project – Noise Technical Memorandum

Noah Tanski Environmental Consulting ("NTEC") has prepared this technical memorandum to assess the potential noise impacts that would be associated with construction and operations of the 6727 Melrose Avenue Project ("Project") located in the City of Los Angeles, especially as they relate to noise impacts that have been previously examined in the City's Citywide Housing Element 2021-2029 and Safety Element Updates Program Environmental Impact Report, hereafter referred to as the "Program EIR." Based on NTEC's analysis, the Project's noise impacts would be considered "within the scope" of the program assessed in the Program EIR, pursuant to CEQA Guidelines Sections 15168(c)(4) and 15168(d).

This technical memorandum also addresses the Program EIR's noise mitigation measures and determines whether they would be applicable to the Project. Based on NTEC's analysis, the Project would require implementation of several, but not all, noise mitigation measures. No substituted mitigation measures are proposed for adoption.

Project Description

The Project proposes to construct a new residential mixed-use building containing 32 dwelling units and 614 square feet of ground floor commercial space at 6727 Melrose Avenue in the City of Los Angeles. The approximately 0.16-acre Project Site is currently developed with a 2,815 square foot commercial building with a small eight-vehicle surface parking lot. These existing features would be demolished prior to construction.

Regulatory Compliance Measures

Before discussing the Project's noise impacts and consistency with the Program EIR, it is important to note that there are many regulations in place that would limit the Project's noise from construction and operational sources. Housing development accommodated under the Program EIR is required to comply with the following Regulatory Compliance Measures ("RCMs"):

- **RCM-NOI-1 (LAMC Noise Ordinances):** The project shall comply with the City of Los Angeles Noise Ordinance No. 144,331 and 161,574 (see LAMC Section 112.05), and any subsequent ordinances, which prohibit the emission or creation of noise beyond certain levels.
- **RCM-NOI-2 (Construction Hours):** Construction shall be restricted to the hours of 7:00 A.M. to 9:00 P.M. Monday through Friday, and 8:00 A.M. to 6:00 P.M. on Saturday per LAMC Section 41.40.
- **RCM-NOI-3 (Construction Site Notice):** The project shall comply with the City of Los Angeles Building Regulations Ordinance No. 178,048 (see LAMC Section 91.106.4.8), which requires a construction site notice to be provided that includes the following information: job site address, permit number, name and phone number of the contractor and the owner or owner's agent, hours of construction allowed by code or any discretionary approval for the site, and City telephone numbers where violations can be reported. The notice shall be posted and maintained at the construction site prior to the start of construction and displayed in a location that is readily visible to the public.
- **RCM-NOI-4 (HVAC Noise):** The project shall comply with the LAMC Section 112.02, which requires that any heating, ventilation, and air conditioning (HVAC) system within any zone of the City not cause an increase in ambient noise levels on any other occupied property or if a condominium, apartment house, duplex, or attached business, within any adjoining unit to exceed the ambient noise level by more than 5 dBA.

Noise Impact Analysis – Consistency with Program EIR

The following section assesses the Project's consistency with the Program EIR's noise thresholds. Each threshold is listed along with the Program EIR's impact summary for that threshold. Where applicable, screening criteria from the Program EIR's noise mitigation measures are presented for comparison with Project features. **Based on following analysis, the Project's noise impacts would be considered "within the scope" of the program assessed in the Program EIR, pursuant to CEQA Guidelines Sections 15168(c)(4) and 15168(d).**

Threshold 4.10-1	Would the Housing Element Update result in the generation of a substantial temporary increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?
Impact 4.10-1	Construction associated with housing development accommodated under the Housing Element Update would be required to comply with RCM-NOI-1 through NOI-3 as well as LAMC Section 112.05 and Section 41.40. However, larger developments could involve construction with lengthy durations, substantial soil movement, use of large, heavy-duty equipment, and/or pile driving near noise-sensitive land uses that would result in significant impacts that also may not be feasibly mitigated to noise levels below 75 dBA at 50

	feet from the source. Therefore, impacts generated by temporary construction noise would be significant and unavoidable.

Note on construction noise thresholds: Before addressing the Project's consistency with Threshold 4.10-1, it is important to note that in September 2024 the City adopted updated thresholds of significance for noise and vibration (and accompanying methodologies to analyze impacts pursuant to those thresholds). Under the Program EIR, Threshold 4.10-1 essentially assesses whether a project's construction hours and noise levels would be consistent with the standards established by LAMC Section 112.05 and Section 41.40. The relevant determinations under Threshold 4.10-1 are therefore:

- Would the project result in noise-generating construction activities outside the hours of 7:00 A.M. to 9:00 P.M. Monday through Friday, or 8:00 A.M. to 6:00 P.M. on Saturday, per LAMC Section 41.40?
- Would the project result in construction noise levels exceeding 75 dBA at 50 feet when in or within 500 feet of residential zones or any other noise-sensitive uses, per LAMC Section 112.05?

However, the City's updated thresholds of significance are whether on- and off-site construction noise during daytime hours Monday through Saturday (the same as above) would exceed 80 dBA $L_{eq(8\text{-}hour)}$ at noise-sensitive uses. The City's updated thresholds of significance also include standards for nighttime construction noise occurring outside these hours, but the Project would not involve nighttime construction, so the new nighttime standards are not relevant to this analysis and the Project's consistency with the Program EIR. To be conservative, and to ensure that this analysis is consistent with both the Program EIR and the City's latest noise thresholds and guidance, the following analysis assesses both thresholds by evaluating whether the Project would result in construction noise levels exceeding 75 dBA at 50 feet (Section 112.05-based threshold under Program EIR) or 80 dBA $L_{eq(8\text{-}hour)}$ at individual noise-sensitive receptor locations (updated September 2024 City threshold).

The first step in the analysis is comparing the Project to the construction screening criteria contained in the Program EIR. The screening criteria identify projects that may result in exceedances of Threshold 4.10-1 and corresponding effects that have been examined in the Program EIR pursuant to Threshold 4.10-1. Mitigation Measure 4.10-1(f) requires projects meeting the screening criteria to prepare a Construction Noise Study that quantifies projected construction noise levels at noise-sensitive uses and identifies measures for reducing these noise levels to below the City's thresholds of significance and regulatory standards. The screening criteria are shown below in **Table 1** alongside a discussion of the Project's consistency with each criterion.

Table 1
Program EIR Threshold 4.10-1 – Construction Noise Screening Criteria

Screening Criteria	Project Consistency
Within 500 feet of noise-sensitive land uses?	Yes. The Project would be located within 25 feet of residential uses along Mansfield Avenue and within 80 feet of a church located along Melrose Avenue.
Two or more subterranean levels or 20,000 cubic yards or more of excavated material?	No. The Project would include a single subterranean garage level and would require approximately 3,128 cubic yards of excavation.
Construction duration (excluding architectural coatings) of 18 months or more?	Yes. Construction of the Project is estimated to last approximately 30 months. Demolition, grading, and vertical construction activities would exceed 18 months.
Use of large, heavy-duty equipment rated 300 horsepower or greater?	Yes. The exact models and specifications of the Project's construction vehicles are currently unknown, but it is possible that some off-road construction vehicles (e.g., bulldozers, excavators, etc.) could exceed 300 horsepower, as well as some on-road construction vehicles (e.g., haul trucks, cement-mixing trucks, concrete pump trucks, etc.).
The potential for impact pile driving?	No. Construction of the Project would not require impact pile driving.

As demonstrated in **Table 1**, the Project would meet two of the screening criteria identified and analyzed in the Program EIR under Threshold 4.10-1. Therefore, pursuant to Mitigation Measure 4.10-1(f), a Construction Noise Study is required to evaluate the impacts of the Project's construction at noise-sensitive uses and, as necessary, identify measures for reducing impacts to below threshold levels. The following analysis serves as the required Construction Noise Study.

The Program EIR identifies residences, transient lodgings, schools, libraries, churches (or other places of assembly), hospitals, nursing homes, auditoriums, concert halls, amphitheaters, playgrounds, and parks as noise-sensitive uses. The Project is located along a major roadway but is near residential neighborhoods and other noise-sensitive uses. The closest noise-sensitive receptors are the following:

- Mansfield Avenue Residences: This receptor consists of noise-sensitive residential uses located north of the Project along Mansfield Avenue. The closest residence, 712 North Mansfield Avenue, is located approximately 25 feet north of the Project.
- Hope Lutheran Church Hollywood: This church is located at 6720 Melrose Avenue, approximately 80 feet south of the Project.

Other noise-sensitive receptors, such as residential uses south of Melrose or along Citrus Avenue, are located much farther from the Project and would experience reduced impacts. Therefore, this analysis focuses on Mansfield Avenue Residences and Hope Lutheran Church Hollywood to assess the Project's construction noise impacts.

Construction of the Project would generate noise during the estimated 30 months of demolition, grading, building construction, and other construction phases. During all construction phases, noise-generating activities would be restricted to the hours of 7:00 A.M. to 9:00 P.M. Monday through Friday, and 8:00 A.M. to 6:00 P.M. on Saturday, consistent with the Program EIR's RCM-NOI-2 and LAMC Section 41.40.

Demolition and grading activities are typically the foremost concern when evaluating a project's construction noise impact, as demolition and grading activities often require extensive daily use of heavy-duty, diesel-powered earthmoving equipment. Other construction activities, such as vertical construction and interior finishing, do not extensively use similar types of loud earthmoving equipment to the same extent as demolition and grading. Equipment for these phases would largely consist of handheld tools and other portable equipment that do not generate loud, continuous noise levels like diesel-powered off-road construction vehicles. Given these considerations, this analysis focuses on the Project's worst-case noise impacts that may result from demolition and grading. Other construction phases would result in reduced noise impacts for the reasons explained above.

Demolition for the Project is estimated to last approximately two weeks, and grading would last approximately one month. The majority of the Project's demolition would be characterized by an excavator and a loader demolishing the Project's existing commercial building and surface parking lot and transferring debris to dumpsters for removal. For grading, these vehicles would work extensively to excavate the Project's subterranean level and any utility trenches or footings. As these vehicles work across the 0.16-acre site, their construction noise levels at nearby noise-sensitive uses would fluctuate. Noise levels would be greater when they work in proximity of sensitive receptors and lower when working farther away. Accordingly, noise impacts associated with the Project's demolition and grading activities have been evaluated by modeling noise levels that would be associated with an excavator and a loader working across a 0.16-acre parcel at Project-to-receptor distances. The 0.16-acre figure reflects the footprint of the Project's construction area. This modeling approach simulates noise levels that would result from the daily activities of an excavator and a loader working across the Project site.

Table 2 shows the estimated construction noise levels at Mansfield Avenue Residences and Hope Lutheran Church Hollywood that would result from the Project's demolition and grading activities. Table 2 also shows estimated construction noise levels at a distance of 50 feet because LAMC Section 112.05, the Program EIR's threshold of significance under Threshold 4.10-1, evaluates noise levels at this regulatory distance. Conservatively, the estimated construction noise levels do not account for the Program EIR's mitigation measures 4.10-1(a) through 4.10-1(e). As shown, demolition and grading noise levels at Mansfield Avenue Residences and Hope Lutheran Church Hollywood would not exceed the 80 dBA $L_{eq(8\text{-}hour)}$ threshold of significance that is applicable to these receptors. Additionally, demolition and grading noise levels would not exceed 75 dBA L_{eq} at the regulatory distance of 50 feet, which is the Program EIR's LAMC Section 112.05-based threshold of significance under Threshold 4.10-1.

Table 2
Construction Noise Levels – Demolition and Grading

Receptor	Construction Noise Level (dBA $L_{eq(8\text{-}hour)}$)	Threshold of Significance (dBA $L_{eq(8\text{-}hour)}$)	Impact?
M□□□□□□d□□□□□□□R□□d□□□□□□	□□□□	□0□	□□□

Other construction activities would not be as loud as the Project's demolition and grading activities, and impacts at more distant receptors would be reduced. Therefore, this analysis demonstrates that noise impacts from the Project's construction activities would not exceed the 75 dBA at 50 feet standard adopted under Threshold 4.10-1 as part of the Program EIR or the City's recently adopted 80 dBA $L_{eq(8\text{-}hour)}$ daytime construction noise threshold of significance. Accordingly, the effects of the Project are examined in the Program EIR's analysis under Threshold 4.10-1 and would result in construction noise impacts that do not exceed relevant thresholds of significance, and the Project would not result in any new or increased impact pursuant to Threshold 4.10-1.

Threshold 4.10-2	Would the Housing Element Update result in generation of a substantial permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?
Impact 4.10-2	Housing development accommodated under the Housing Element Update could include mechanical equipment (i.e., HVAC), delivery and trash trucks, and other noise-generating activities. However, such activities would be typical of the urban environment. In addition, on-site activities would be required to comply with applicable RCMs and LAMC standards. Furthermore, while housing development would generate vehicle trips in the City, the increase in mobile noise would not result in a perceptible 3-dBA increase. Nonetheless, because sufficient reduction in operational noise levels cannot be assured for all projects, even with compliance with all City standards, operational noise at various sensitive land uses could result in significant impacts. Therefore, permanent noise increases due to operation of the Housing Element Update would be significant and unavoidable.

The Program EIR determines that projects accommodated by the Housing Element Update would not generate sources of noise that are new or that would substantially alter the City's ambient noise environment. It finds that increases in traffic associated with the Housing Element Update would not result in perceptible 3 dBA increases, and it finds that compliance with applicable RCMs and LAMC standards would prevent substantial noise increases from on-site operational noise sources such as HVAC. The one exception the Program EIR identifies is large mixed-use projects with sizable outdoor spaces such as pool and roof decks. The Project would include a modest roof deck with seating areas for residents, but this would not be comparable in scale or usage to the types of pool and roof decks that the Program EIR deems capable of resulting in substantial noise increases. The example included in the Program EIR involves a large project containing 950 residential units, 308 hotel rooms, 95,000 square feet of office uses, and 185,000 square feet of commercial retail uses. It also includes several large outdoor spaces and pool decks that would be operated until 2:00 A.M. The Project proposes just 32 housing units, 614 square feet of commercial space, and would not have comparable outdoor spaces, notably multiple rooftop pool decks sized for 950 residential units and hotel guests. Given these considerations, the effects of the Project are examined in the Program EIR's analysis under Threshold 4.10-2 and would result in operational noise impacts that do not exceed relevant thresholds of significance, and the Project would not result in any new or increased impact pursuant to Threshold 4.10-2.

One additional consideration relates to AB 1307, which recently went into effect in January 2024. This bill clarifies that "for residential projects, the effects of noise generated by project occupants and their guests on human beings is not a significant effect on the environment." The Project's roof deck does not contain a pool, only seating and gathering areas for Project residents. The primary noise source associated with the Project's roof deck would be noise generated by project occupants and their guests (e.g., talking, dining, etc.), precisely the types of noise that are addressed by AB 1307. Thus, the Project's roof deck would not contain any substantial (or qualified) noise sources capable of exceeding the relevant thresholds.

Threshold 4.10-3	Would the Housing Element Update result in generation of excessive groundborne vibration or groundborne noise levels?
Impact 4.10-3	Housing development accommodated under the Housing Element Update is not anticipated to involve operational activities that would result in substantial vibration levels (e.g., use of heavy equipment). However, construction activities under the Housing Element Update, specifically pile driving, could potentially generate vibration exceeding thresholds for buildings susceptible to damage (e.g., historic structures). Although mitigation is available to minimize the potential effects of vibration, it cannot be assured that construction-related vibration would not result in building damage or human annoyance. Therefore, impacts generated by construction vibration would be significant and unavoidable.

The Program EIR contains screening criteria to identify projects that may result in exceedances of Threshold 4.10-3 and corresponding effects that have been examined in the Program EIR pursuant to Threshold 4.10-3. Regarding operations, the Program EIR determines that projects accommodated by the Housing Element Update would not contain the types of vibration sources that are capable of generating substantial groundborne vibration levels. Consequently, there are no screening criteria for operations. In any case, the Project is similar to projects analyzed within the Program EIR and would not include substantial operational sources of groundborne vibration. Regarding construction, Mitigation Measure 4.10-3(a) requires projects meeting certain screening criteria to prepare a Vibration Control Plan. The screening criteria are whether a project would utilize vibratory rollers or sonic pile drivers within 50 feet of an extremely fragile building or historical resource, or impact pile drivers within 140 feet of extremely fragile buildings, historical resources, or residential structures. The Project is not located within 50 feet of an extremely fragile building or historical resource, and it would not utilize impact pile drivers. Given that the Project does not meet these screening criteria, the effects of the Project are examined in the Program EIR's analysis under Threshold 4.10-3 and would result in vibration impacts that do not exceed the relevant thresholds of significance, and the Project would not result in any new or increased impact pursuant to Threshold 4.10-3.

Threshold 4.10-4	For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the Housing Element Update expose people residing or working in the project area to excessive noise levels?
Impact 4.10-4	Housing developments accommodated under the Housing Element Update could be exposed to intermittent noise levels from overhead flight patterns from several airports in the City or its vicinity. While the project would not emphasize building housing in the immediate vicinity of airports, all residential development would, nonetheless, be required to incorporate noise insulation features per State and local standards to reduce interior noise levels to below 45 dBA. The impact of airport or airstrip operations on new development would be less than significant.

The Project is not located within two miles of a public airport or public use airport, or within any Airport Influence Area. Therefore, the Project would not result in any new or increased impact pursuant to Threshold 4.10-4.

Mitigation Measure Assessment – Applicability to the Project

The following section identifies the noise mitigation measures adopted by the Program EIR and assesses their applicability to the Project. **Based on the following analysis, several of the Program EIR's noise mitigation measures would not be applicable to the Project, and their incorporation would not be necessary to ensure that the effects of the Project are "within the scope" of impacts examined in the Program EIR.**

A checklist of the Program EIR's noise mitigation measures and their applicability to the Project is included below, followed by individualized analysis for each mitigation measure:

	Applicable?	
• Mitigation Measure 4.10-1(a) – Noise Shielding and Silencing	☐Yes	☒No
• Mitigation Measure 4.10-1(b) – Use of Driven Pile Systems	☒Yes	☐No
• Mitigation Measure 4.10-1(c) – Enclosures and Screening	☐Yes	☒No
• Mitigation Measure 4.10-1(d) – Construction Staging Areas	☒Yes	☐No
• Mitigation Measure 4.10-1(e) – Temporary Sound Barriers	☐Yes	☒No
• Mitigation Measure 4.10-1(f) – Project-Specific Construction Noise Study	☒Yes	☐No
• Mitigation Measure 4.10-2 – Project-Specific Operational Noise Study	☐Yes	☒No
• Mitigation Measure 4.10-3(a) – Vibration Control Plan	☐Yes	☒No
• Mitigation Measure 4.10-3(b) – Vibration Mitigation	☒Yes	☐No

Mitigation Measure 4.10-1(a) – Noise Shielding and Silencing

For all discretionary projects, power construction equipment (including combustion engines), fixed or mobile, shall be equipped with noise shielding and silencing devices consistent with manufacturer's standards or the Best Available Control Technology. Equipment shall be property maintained, and the Project Applicant or Owner shall require any construction contractor to keep documentation on-site during any earthwork or construction activities demonstrating that the equipment has been maintained in accordance with manufacturer's specifications. Measure shall be shown on plans.

Earlier in this memorandum, construction noise analysis conducted pursuant to Threshold 4.10-1 determined that the Project's construction activities would not result in exceedances of the relevant thresholds at nearby noise-sensitive land uses. To be conservative, the noise modeling performed as part of this analysis did not account for Mitigation Measure 4.10-1(a) or any other mitigation measure adopted by the Program EIR. Therefore, the analysis demonstrates that Mitigation Measure 4.10-1(a) would not be required or otherwise applicable to the Project, which would not result in any new or increased impact pursuant to Threshold 4.10-1. In other words, the measures detailed as part of Mitigation Measure 4.10-1(a) would not be necessary to ensure that the Project's construction noise impacts are within, and no greater than, the effects examined within the Program EIR.

However, equipment would be outfitted with appropriate manufacturer exhaust/muffler systems, as required by CARB and EPA rules.

Mitigation Measure 4.10-1(b) – Use of Driven Pile Systems:

For all discretionary projects, driven (impact), sonic, or vibratory pile drivers shall not be used, except in locations where the underlying geology renders alternative methods infeasible, as determined by a soils or geotechnical engineer and documented in a soils report. Requirement shall show on plans.

The Project would not utilize driven (impact), sonic, or vibratory pile drivers. Therefore, Mitigation Measure 4.10-2(b) may be applied to the Project, but it would have no effect on the Project's noise or vibration-related construction effects.

Mitigation Measure 4.10-1(c) – Enclosures and Screening:

For all discretionary projects, all outdoor mechanical equipment shall be enclosed or screened from off-site noise-sensitive uses. The equipment enclosure or screen shall be impermeable (i.e., solid material with minimum weight of 2 pounds per square feet) and break the line-of-sight from the equipment and off-site noise-sensitive uses.

First, it should be noted that Mitigation Measure 4.10-1(c) specifically applies to construction. However, as discussed earlier, construction noise analysis conducted pursuant to Threshold 4.10-1 determined that the Project's construction activities would not result in exceedances of the relevant thresholds at nearby noise-sensitive land uses. To be conservative, the noise modeling performed as part of this analysis did not account for Mitigation Measure 4.10-1(c) or any other mitigation measure adopted by the Program EIR. Therefore, this analysis demonstrates that Mitigation Measure 4.10-1(c) would not be required or otherwise applicable to the Project, which would not result in any new or increased impact pursuant to Threshold 4.10-1. In other words, the measures detailed as part of Mitigation Measure 4.10-1(c) would not be necessary to ensure that the Project's construction noise impacts are within, and no greater than, the effects examined within the Program EIR.

Mitigation Measure 4.10-1(d) – Construction Staging Areas:

Construction staging areas shall be located as far from noise-sensitive uses as reasonably possible and feasible in consideration of site boundaries, topography, intervening roads and uses, and operational constraints. Requirement shall show on plans.

Mitigation Measure 4.10-1(d) would apply to the Project and would be conditioned as part of the Project.

Mitigation Measure 4.10-1(e) – Temporary Sound Barriers:

Sound barriers, such as temporary walls or sound blankets, shall be erected between construction activities and noise-sensitive uses when construction activities are located within a line-of-sight to and within 500 feet of noise-sensitive uses. Requirement shall show on plans.

As discussed earlier, construction noise analysis conducted pursuant to Threshold 4.10-1 determined that the Project's construction activities would not result in exceedances of the relevant thresholds at nearby noise-sensitive land uses. To be conservative, the noise modeling performed as part of this analysis did not account for Mitigation Measure 4.10-1(e) or any other mitigation measure adopted by the Program EIR. Therefore, this analysis demonstrates that Mitigation Measure 4.10-1(e) would not be required or otherwise applicable to the Project, which would not result in any new or increased impact pursuant to Threshold 4.10-1. In other words, the measures detailed as part of Mitigation Measure 4.10-1(e) would not be necessary to ensure that the Project's construction noise impacts are within, and no greater than, the effects examined within the Program EIR.

Mitigation Measure 4.10-1(f) – Project-Specific Construction Noise Study:

A Construction Noise Study, prepared by a qualified noise expert to meet the requirements herein, shall be required for discretionary projects in the City located within 500 feet of noise-sensitive land uses and that have one or more of the following characteristics:

- Two or more subterranean levels or 20,000 cubic yards or more of excavated material;
- Construction duration (excluding architectural coatings) or 18 months or more;
- Use of large, heavy-duty equipment rated 300 horsepower or greater; or
- The potential for impact pile driving.

The Construction Noise Study shall characterize sources of construction noise, quantify noise levels at noise-sensitive uses (e.g., residences, transient lodgings, schools, libraries, churches [or other places of assembly], hospitals, nursing homes, auditoriums, concert halls, amphitheaters, playgrounds, and parks), and identify measures to reduce noise exposure. The Construction Noise Study shall identify reasonably available noise reduction devices or techniques to reduce noise levels to acceptable levels and/or durations including through reliance on any relevant federal, state or local standards or guidelines or accepted industry practices, and in compliance with LAMC standards. Noise reduction devices or techniques may include but not be limited to mufflers, shields, sound barriers, and time and place restrictions on equipment and activities. Each measure in the Construction Noise Study shall identify anticipated noise reductions at noise-sensitive land uses.

As discussed earlier, the Project meets the criteria outlined in Mitigation Measure 4.10-1(f) as it is located within 500 feet of noise-sensitive land uses, would necessitate construction lasting longer than

18 months, and may utilize equipment rated 300 horsepower or greater. Accordingly, a Construction Noise Study meeting the requirements of Mitigation Measure 4.10-1(f) was conducted. The Construction Noise Study determined that the Project's construction activities would not result in exceedances of the relevant thresholds at nearby noise-sensitive land uses. To be conservative, the noise modeling performed as part of this analysis did not account for any mitigation measures adopted by the Program EIR. Therefore, the Construction Noise Study demonstrates that no additional reduction devices, techniques, or any other form of mitigation beyond ordinary construction practices in compliance with RCMs and LAMC standards would be necessary to ensure that the Project's construction noise impacts are within, and no greater than, the effects examined within the Program EIR.

Mitigation Measure 4.10-2 – Project-Specific Operational Noise Study:

A Noise Study, prepared by a qualified noise expert to meet the requirements herein, shall be required for all discretionary housing developments with roof decks and/or pool decks in the City of Los Angeles concurrent with Design Review and prior to the approval of building permits. The Noise Study shall include:

- Description of pertinent noise regulations.
- Analysis of operational noise generated by the project's roof decks and/or pool decks to noise-sensitive land uses.
- Comparison of noise levels to applicable City thresholds, such as if the project's operational noise would exceed 3 dBA in an unacceptable land use category or 5 dBA in an acceptable land use category per the City's land use compatibility guidelines included in the City of Los Angeles General Plan Noise Element.
- If a project would exceed City thresholds, identification of mitigation measures to reduce noise to below 3 dBA in an unacceptable land use category or 5 dBA in an acceptable land use category to the extent feasible. Mitigation measures may include, but would not be limited to, operational restrictions, sound dampening equipment, or sound walls.
- Each mitigation measure in the Noise Study shall identify anticipated noise reductions at noise-sensitive land uses.
- Applicant/owners shall comply with the mitigation plan and include the measures in construction contracts.
- Mitigation plan shall be included on plans.

Mitigation Measure 4.10-2 requires the preparation of a Noise Study for projects that include roof decks or pool decks. The Project includes a modest roof deck for residents, but as discussed earlier, the effects of the Project are examined in the Program EIR's analysis under Threshold 4.10-2 and would result in operational noise impacts that do not exceed relevant thresholds of significance, and the Project would not result in any new or increased impact pursuant to Threshold 4.10-2. Therefore, a Noise Study would not be necessary to ensure that the Project's operational noise impacts are consistent with the effects examined in the Program EIR. There are two key considerations:

First, the Program EIR finds that compliance with applicable RCMs and LAMC standards would prevent substantial noise increases from on-site operational noise sources such as HVAC. The one exception the Program EIR identifies is large mixed-use projects with sizable outdoor spaces such as pool and roof decks. As noted, the Project would include a modest roof deck with seating aeras for residents, but this would not be comparable in scale or usage to the types of pool and roof decks that the Program EIR deems capable of resulting in substantial noise increases. The example included in the Program EIR involves a large project containing 950 residential units, 308 hotel rooms, 95,000 square feet of office uses, and 185,000 square feet of commercial retail uses. It also includes several large outdoor spaces and pool decks that would be operated until 2:00 A.M. The Project would only include 32 housing units, 614 square feet of commercial space, and would not have comparable outdoor spaces, notably multiple rooftop pool decks sized for 950 residential units and hotel guests. Given these considerations, the effects of the Project are examined in the Program EIR's analysis under Threshold 4.10-2 and would result in operational noise impacts that do not exceed relevant thresholds of significance, and the Project would not result in any new or increased impact pursuant to Threshold 4.10-2.

The second consideration relates to AB 1307, which recently went into effect in January 2024. The purpose of the Noise Study required by Mitigation Measure 4.10-2 is to evaluate operational noise generated by a project's roof and pool decks – that is, noise generated by pool decks and noise generated by project occupants and their guests when utilizing roof deck common spaces. The Project does not include a pool deck, so the remaining issue would be noise generated by project occupants and their guests when utilizing the Project's roof deck. However, AB 1307, clarifies that "for residential projects, the effects of noise generated by project occupants and their guests on human beings is not a significant effect on the environment." Essentially, Mitigation Measure 4.10-2 was developed to evaluate noise from project occupants and guests utilizing roof deck spaces, but AB 1307 has since clarified that such noise sources are not considered a significant effect on the environment to begin with. Consequently, because the Project does not include a pool deck, and because noise generated by project occupants and guests on human beings is no longer a CEQA impact issue due to AB 1307, there is no substantial noise source that would be evaluated in the Noise Study required by Mitigation Measure 4.10-2. All other noise sources, such as traffic and HVAC noise, are examined within the Program EIR and determined to result in less than significant impacts. Given these considerations, Mitigation Measure 4.10-2 is not applicable to the Project and there are no mitigation measures that would be necessary to ensure that the Project's roof deck would not result in any new or increased impact pursuant to Threshold 4.10-2.

Mitigation Measure 4.10-3(a) – Vibration Control Plan

For construction activity for discretionary projects involving vibratory rollers or sonic pile drivers within 50 feet of an extremely fragile building (non-engineered masonry) or historical resource (designated or in SurveyLA or other City recognized survey), the Applicant shall prepare a Vibration Control Plan. The Vibration Control Plan requirement shall also apply to use of impact pile drivers within 140 feet of extremely fragile buildings or historical resources or residential structures. The Vibration Control Plan shall be prepared by a licensed structural engineer and shall include methods to minimize vibration, including, but not limited to:

- Use of drilled piles or similar method rather than impact pile driving
- Use of rubber-tired equipment rather than metal-tracked equipment
- Avoiding the use of vibrating equipment when allowed by best engineering practices

The Vibration Control Plan shall include a pre-construction survey letter establishing baseline conditions at potentially affected extremely fragile buildings/historical resources. The survey letter shall provide a shoring design to protect the extremely fragile buildings/historical resources from potential damage. At the conclusion of vibration causing activities, the qualified structural engineer shall issue a follow-up letter describing damage, if any, to impacted buildings. The letter shall include recommendations for any repair, as may be necessary, in conformance with the Secretary of the Interior Standards. Repairs shall be undertaken and completed by the Contractor and monitored by a qualified structural engineer in conformance with all applicable codes including the California Historical Building Code (Part 8 of Title 24).

A Statement of Compliance, in a form approved by the City, committing the Applicant and Owner to complying with the measure shall be signed by the Applicant and Owner is required to be submitted to the Los Angeles Department of Building and Safety (LADBS) at plan check and prior to the issuance of any permit. The Vibration Control Plan, prepared as outlined above shall be documented by a qualified structural engineer, and shall be provided to the City upon request. Vibration Control Plan shall show on the plans.

Mitigation Measure 4.10-3(a) outlines screening criteria to determine whether a project is required to provide a detailed Vibration Control Plan. The screening criteria are whether a project would utilize vibratory rollers or sonic pile drivers within 50 feet of an extremely fragile building or historical resource, or impact pile drivers within 140 feet of extremely fragile buildings, historical resources, or residential structures. As discussed earlier, the Project does not meet these screening criteria. Therefore, the Project would not be required to provide Vibration Control Plan. Mitigation Measure 4.10-3(a) would not be required or applicable to the Project, which would not result in any new or increased impact pursuant to Threshold 4.10-3.

Mitigation Measure 4.10-3(b) – Vibration Mitigation

For all discretionary projects:

- Impact pile drivers shall be avoided to eliminate excessive vibration levels. Drilled piles or similar methods are alternatives that shall be utilized where geological conditions permit their use.
- Construction activities shall involve rubber-tired equipment rather than metal-tracked equipment.
- The construction contractor shall manage construction phasing (scheduling demolition, earthmoving, and ground-impacting operations so as not to occur in the same time period),

use low-impact construction technologies, and shall avoid the use of vibrating equipment when allowed by best engineering practices. Requirement to be on plans.

Mitigation Measure 4.10-3(b) would apply to the Project and would be conditioned as part of the Project.

RE: Paleontological Resource Technical Memorandum for 6721 Melrose Avenue, City of Los Angeles, Los Angeles County, California

Dear Ian Fishburn,

At the request of 6727 MDD, LLC, Chronicle Heritage prepared this paleontological resource technical memorandum for 6721 Melrose Avenue (Project), City of Los Angeles, Los Angeles County, California (Figure 1). The goal of the assessment is to detail the results of the literature review and museum records search, summarize the paleontological sensitivity of the geologic units within and in the vicinity of the Project area, assess potential impacts from Project implementation, and recommended measures, if necessary, to avoid potential impacts to paleontological resources during Project implementation.

This paleontological resource assessment included a fossil locality records search conducted by the Natural History Museum of Los Angeles County (NHMLAC). The records search was supplemented by a review of existing geologic maps and primary literature regarding fossiliferous geologic units that are pertinent to the analysis of existing data of the Project. This technical memorandum, written in accordance with the guidelines set forth by the Society of Vertebrate Paleontology (SVP) (2010), has been prepared to support environmental review under the California Environmental Quality Act (CEQA).

Project Location and Description

The legal address of the Project area is 6721–6727 Melrose Avenue, Assessor's Parcel Number 5524-013-022. The Project area is in the western half of Section 15, Township (T) 1 South (S), Range (R) 14 West (W), San Bernardino Baseline and Meridian, as depicted on the Hollywood, California, 7.5-minute U.S. Geological Survey (USGS) topographic quadrangle (Figure 2). The Project includes the demolition of the existing building to make way for a new residential development.

Regulatory Context

Paleontological resources (i.e., fossils) are considered nonrenewable scientific resources because, once destroyed, they cannot be replaced. As such, paleontological resources are afforded protection under various federal, state, and local laws and regulations. Laws pertinent to this Project are discussed below.

State Laws and Regulations

California Environmental Quality Act

CEQA requires that public agencies and private interests identify the potential environmental consequences of their projects on any object or site of significance to the scientific annals of California (Division I, California Public Resources Code [PRC] Section 5020.1[j]). Appendix G in California Code of Regulations (CCR) Title 14 provides an Environmental Checklist of questions (Section VII, Part [f]) that includes the following: "Would the project directly or indirectly destroy a unique paleontological resource or site or unique geological feature?"

California Public Resources Code

Section 5097.5 of the PRC states:

> No person shall knowingly and willfully excavate upon, or remove, destroy, injure, or deface any historic or prehistoric ruins, burial grounds, archaeological or vertebrate paleontological site, including fossilized footprints, inscriptions made by human agency, or any other archaeological, paleontological, or historical feature, situated on public lands, except with the express permission of the public agency having jurisdiction over such lands. Violation of this section is a misdemeanor. As used in this PRC section, 'public lands' means lands owned by, or under the jurisdiction of, the state or any city, county, district, authority, or public corporation, or any agency thereof.

Consequently, public agencies are required to comply with PRC Section 5097.5 for their activities including construction and maintenance as well as for permit actions (e.g., encroachment permits) undertaken by others.

Local

The Los Angeles County General Plan (Los Angeles County Department of Regional Planning, 2022), Chapter 9: Conservation and Natural Resources Element, VIII. Historic, Cultural, and Paleontological Resources, specifies 11 significant general fossil localities in Los Angeles County. In addition, the General Plan also establishes the following goals and policies are for paleontological resources:

Goal C/NR 14: Protected historic, cultural, and paleontological resources.

Policy C/NR 14.1: Mitigate all impacts from new development on or adjacent to historic, cultural, and paleontological resources to the greatest extent feasible.

Policy C/NR 14.2: Support an inter-jurisdictional collaborative system that protects and enhances historic, cultural, and paleontological resources.

> **Policy C/NR 14.6:** Ensure proper notification and recovery processes are carried out for development on or near historic, cultural, and paleontological resources.

The City of Los Angeles Conservation Element (2001), Section 3, states that Los Angeles is rich in paleontological resources and mandates protection of paleontological sites. The Conservation Element states the following:

- Pursuant to CEQA, if a land development project is within a potentially significant paleontological area, the developer is required to contact a [fully qualified professional] paleontologist to arrange for assessment of the potential impact and mitigation of potential disruption of or damage to the site. If significant paleontological resources are uncovered during project execution, authorities are to be notified and the designated paleontologist may order excavations stopped, within reasonable time limits, to enable assessment, removal or protection of the resources. For Los Angeles city and county, the Los Angeles County Museum of Natural History, including the George C. Page Museum, provides advice concerning paleontological resources.
- The city has a primary responsibility in protecting significant archaeological and paleontological resources.
- Loss of or damage to archaeological and paleontological sites due to development, unauthorized removal and vandalism is a continuing issue.
- The city has an objective to protect the city's archaeological and paleontological resources for historical, cultural, research and/or educational purposes.
- The city has a policy of identifying and protecting significant archaeological and paleontological sites and/or resources known to exist or that are identified during land development, demolition or property modification activities.

Additionally, the City of Los Angeles Housing and Circulation Element Environmental Impact Report (City of Los Angeles, 2021) establishes the following mitigation measures for any new housing in the City of Los Angeles:

> **4.5-1(a)** Paleontological Procedures for Discretionary Projects: For projects that involve any grading, it is assumed that the project will trigger this measure. If triggered, a resource assessment needs to be prepared to determine if any specific mitigation measures need to be imposed on the project, including the following:
>
> **4.5-1(b)** Worker Environmental Awareness Program, Fossil Salvage, and Construction Monitoring,
>
> **4.5-1(c)** Construction Monitoring,
>
> **4.5-1(d)** Fossil Discovery, Salvage and Treatment

Paleontological Resources

Paleontological Resource Definition

The SVP has provided guidance designed to support state and federal environmental review. The SVP broadly defines significant paleontological resources as follows:

> Fossils and fossiliferous deposits consisting of identifiable vertebrate fossils, large or small, uncommon invertebrate, plant, and trace fossils, and other data that

> provide taphonomic, taxonomic, phylogenetic, paleoecologic, stratigraphic, and/or biochronologic information. Paleontological resources are considered to be older than recorded human history and/or older than middle Holocene (i.e., older than about 5,000 radiocarbon years). (SVP, 2010)

Significant paleontological resources are determined to be fossils or assemblages of fossils that are unique, unusual, rare, diagnostically important, or common but have the potential to provide valuable scientific information for evaluating evolutionary patterns and processes, or that could improve our understanding of paleochronology, paleoecology, paleophylogeography, or depositional histories. New or unique specimens can provide new insights into evolutionary history; however, additional specimens of even well-represented lineages can be equally important for studying evolutionary patterns and processes, evolutionary rates, and paleophylogeography. Even unidentifiable material can provide useful data for dating geologic units if radiometric dating is possible. As such, common fossils (especially vertebrates) may be scientifically important and therefore considered significant.

This definition is used for all projects that are subject CEQA since CEQA does not define "a unique paleontological resource or site."

Paleontological Resource Potential

Absent specific agency guidelines, most professional paleontologists in California adhere to the guidelines set forth by SVP (2010) to determine the course of paleontological mitigation for a given project. These guidelines establish protocols for the assessment of the paleontological resource potential of underlying geologic units and outline measures to mitigate adverse impacts that could result from project development. Using baseline information gathered during a paleontological resource assessment, the paleontological resource potential of geologic units (or members thereof) underlying a project area can be assigned to one of four categories defined by SVP (2010). Although these standards were written specifically to protect vertebrate paleontological resources, all fields of paleontology have adopted the following guidelines.

High Potential (Sensitivity)

Rock units from which significant vertebrate or significant invertebrate fossils or significant suites of plant fossils have been recovered have a high potential for containing significant nonrenewable fossiliferous resources. These units include but are not limited to sedimentary formations and some volcanic formations that contain significant nonrenewable paleontological resources anywhere within their geographical extent and sedimentary rock units temporally or lithologically suitable for the preservation of fossils. Sensitivity comprises both (a) the potential for yielding abundant or significant vertebrate fossils or for yielding a few significant fossils, large or small, vertebrate, invertebrate, or botanical and (b) the importance of recovered evidence for new and significant taxonomic, phylogenetic, ecologic, or stratigraphic data. Areas that contain potentially datable organic remains older than recent, including deposits associated with nests or middens, and areas that may contain new vertebrate deposits, traces, or trackways are also classified as significant.

Low Potential (Sensitivity)

Sedimentary rock units that are potentially fossiliferous but have not yielded fossils in the past or contain common and widespread invertebrate fossils of well-documented and understood taphonomic, phylogenetic species, and habitat ecology are considered to have a low potential for

containing significant nonrenewable fossiliferous resources. Reports in the paleontological literature or field surveys by a qualified vertebrate paleontologist may allow a determination that some areas or units have a low potential for yielding significant fossils before the start of construction. Generally, these units will be poorly represented by specimens in institutional collections and will not require protection or salvage operations. However, as excavation for construction is underway, it is possible that significant and unanticipated paleontological resources might be encountered and require a change of classification from low to high potential and thus require monitoring and mitigation if the resources are found to be significant.

Undetermined Potential (Sensitivity)

Specific areas underlain by sedimentary rock units for which little information is available have undetermined fossiliferous potentials. Field surveys by a qualified vertebrate paleontologist to determine the rock units' potential are required before programs of impact mitigation for such areas can be developed.

No Potential

Rock units of metamorphic or igneous origin are commonly classified as having no potential for containing significant paleontological resources.

Methods

To assess whether a particular area has the potential to contain significant fossil resources in the subsurface, it is necessary to review published geologic mapping to determine the geology and stratigraphy of the Project area and vicinity. Geologic units are considered sensitive for paleontological resources if they are known to contain significant fossils anywhere in their extent. Therefore, a search of pertinent local and regional museum repositories for paleontological localities in and within 3 miles (mi) of the project area is necessary to determine whether fossil localities have been previously discovered within a particular rock unit. For this Project, a records search was requested of the NHMLAC collections for localities within 3 mi of the Project area. Records searches were also conducted of the online University of California Museum of Paleontology (UCMP) collections, San Diego Natural History Museum (SDNHM) collections, Paleobiology Database (PBDB), iDigBio, and other published and unpublished geological and paleontological literature of the area.

Resource Context

Geologic Setting

The Project area is along the border of the northwestern edge of the Peninsular Ranges geomorphic province and the southeastern edge of the Transverse Ranges geomorphic province. The Peninsular Ranges province is a region of northwest-trending mountain ranges and valleys roughly parallel to the San Andreas Fault Zone and North American plate boundary. The Peninsular Ranges are bound to the east by the Colorado Desert, to the north by the Transverse Ranges near the San Bernardino–Riverside County line, to the west by the Pacific continental shelf, and south into Baja California (Norris and Webb, 1976). The Transverse Ranges province is distinguished by east–west trending mountain ranges and valleys, in contrast to the respective northwest–

southeast trend in the provinces to the north and south. The Transverse Ranges extend west to include the San Miguel, Santa Rosa, and Santa Cruz Islands; extend north to include the San Gabriel and San Bernardino Mountains and the San Andreas Fault; and locally extend south to a series of faults along the southern base of the Santa Monica Mountains (Yerkes and Campbell, 2005; Hillhouse, 2010).

Locally, the Project area is in the Los Angeles Basin, a northwest-trending lowland plain at the northern end of the Peninsular Ranges geomorphic province of California (Yerkes and Campbell, 2005). The Los Angeles Basin is underlain by a structural depression that was the site of extensive accumulation of interstratified fluvial, alluvial, floodplain, shallow marine, and deep shelf deposits on underlying metamorphic and granitic plutonic basement rocks from the Mesozoic Era (251.9–66 million years ago [Ma]). Sediment accumulation and subsidence occurred there since the Cretaceous Period (145–66 Ma) and has reached a maximum thickness of more than 20,000 ft (Yerkes et al., 1965; Norris and Webb, 1976; McCulloh and Beyer, 2004). During that time, fluctuations (transgressions and regressions) in relative sea level related to tectonic uplift, subsidence, and glaciation in the Pleistocene Epoch (2.58 Ma–11,700 years ago) resulted in both marine and terrestrial sedimentary deposits throughout the Los Angeles Basin. By the Miocene Epoch (25–5.3 Ma), the large depositional basin extended north to the Santa Monica Mountains and San Fernando Valley, east to the southern foothills of the San Gabriel Mountains and the Santa Ana Mountains, and south to the San Joaquin and Palos Verdes hills. Structurally, the basin can be divided into four primary structural blocks: the northwestern, southwestern, central, and northeastern blocks. Locally, the Project area is in the northwestern block, which is dominated by the west-plunging anticline that forms the eastern portion of the Santa Monica Mountains, and a northeast-trending branch of the Santa Monica Fault Zone (Yerkes et al., 1965). The Santa Monica Mountains in this area are composed of marine clastic sedimentary rocks ranging in age from the Cretaceous Period to the Pleistocene Epoch with volcanic rocks from the Miocene Epoch (Yerkes et al., 1965).

Site Specific Geology and Paleontology

The geology of the Project area is mapped by Campbell et al. (2016) at a scale of 1:100,000 (Figure 3). The Project area is underlain by old alluvial fan deposits (Qof) composed of slightly to moderately consolidated silt, sand and gravel deposited by alluvial fans during the Pleistocene Epoch (Figure 3). Elsewhere in Los Angeles County, Pleistocene deposits have produced remains of a diverse terrestrial fauna including fossil specimens of mammoth, mastodon, horse, bison, camel, tortoise, rodent, and bird (Miller, 1971; Jefferson, 1989, 1991a, 1991b; Stock and Harris, 2001; Agenbroad, 2003; Bell et al., 2004; Maguire and Holroyd, 2016).

Records Search Results

The NHMLAC records search did not produce any Pleistocene fossil localities from within the Project but did produce five Pleistocene localities within 3 mi (Bell, 2024) (Attachment A). Searches of online databases and other literature produced seven additional fossil localities within 3 mi of the Project (Miller, 1971; Jefferson, 1991a, 1991b; iDigBio, 2024; PBDB, 2024; SDNHM, 2024; UCMP, 2024) (Table 1).

Findings

This memorandum uses the SVP (2010) system to assess paleontological sensitivity and the level of effort required to manage potential impacts to significant fossil resources. Using this system, the sensitivity of geologic units was determined by the relative abundance and risk of adverse impacts to vertebrate fossils and significant invertebrates and plants.

Based on the literature review and museum records search results, and in accordance with the SVP (2010) sensitivity scale, the old alluvial fan deposits (Qof) have high paleontological sensitivity because similar deposits have yielded significant fossils in the vicinity of the Project (Table 2). This includes the La Brea Tar Pits, which are mapped in the same old alluvial fan deposits (Qof) that underlies the Project area (see Table 1) (Campbell et al., 2016). This sensitivity ranking is consistent with Los Angeles County General Plan (2022), VIII. Historic, Cultural, and Paleontological Resources, which classifies the La Brea Tar Pits as a "significant general fossil locality" in Los Angeles County.

Because of the presence of fossil localities in the vicinity, Project-related ground disturbances have the potential to affect paleontological resources throughout the Project area. As such, further mitigation such as construction monitoring is recommended to reduce potential impacted to paleontological resources as the result of the Project.

Table 2. Geologic Units in the Project Area and their Paleontological Sensitivity

Geologic Unit	Map Abbreviation[1]	Age	Typical Fossils[2]	Paleo Sensitivity

Management Recommendations

In general, the potential for a given project to result in negative impacts to paleontological resources is directly proportional to the amount of ground disturbance associated with the Project; thus, the higher the amount of ground disturbances within geological deposits with a known paleontological sensitivity, the greater the potential for negative impacts to paleontological resources. Since this Project involves building demolition and new building construction, ground disturbances are anticipated to be significant. As a result, the potential for encountering fossil resources during Project-related ground disturbance at depth is high and may result in significant impacts under CEQA to paleontological resources such as destruction, damage, or loss of scientifically important paleontological resources.

Full-time paleontological monitoring is recommended for all proposed groundwork in the Project area. The presence of high sensitivity deposits at the surface and the presence of fossil localities in the vicinity suggest that ground disturbance may result in significant impacts under CEQA to paleontological resources such as destruction, damage, or loss of scientifically important paleontological resources. Therefore, a fully qualified professional paleontologist should be retained to develop and implement the measures recommended below. These measures have

been developed in accordance with SVP guidelines; if implemented, these measures will satisfy the requirements of CEQA and the City of Los Angeles (2021).

Worker's Environmental Awareness Program (WEAP)

Per mitigation measure 4.5-1(b) (City of Los Angeles, 2021), prior to the start of the proposed Project activities, all field personnel should receive a worker's environmental awareness training on paleontological resources. The training should provide a description of the laws and ordinances protecting fossil resources, the types of fossil resources that may be encountered in the Project area, the role of the paleontological monitor, and an outline of steps to follow if a fossil discovery is made and provide contact information for the project paleontologist. The training should be developed by the project paleontologist and can be delivered concurrent with other training including cultural, biological, safety, and others.

Paleontological Mitigation Monitoring

Per mitigation measure 4.5-1(a) and (c) (City of Los Angeles, 2021), prior to the commencement of ground-disturbing activities, a fully qualified professional paleontologist should be retained to prepare and implement a paleontological mitigation plan for the Project. The plan should describe the monitoring required during ground disturbing activities based on the paleontological sensitivity of the geologic units. Monitoring should entail the visual inspection of excavated or graded areas and trench sidewalls. If the project paleontologist determines full-time monitoring is no longer warranted based on the geologic conditions at depth, they may recommend that monitoring be reduced or ceased entirely. The plan should include a formal museum locality record search and detailed map showing paleontological sensitivity of the underlying geologic units and locations of recommended monitoring.

Fossil Discoveries

Per mitigation measure 4.5-1(d) (City of Los Angeles, 2021), if a paleontological resource is discovered, the monitor will have the authority to temporarily divert the construction equipment around the find until it is assessed for scientific significance and, if appropriate, collected. If the resource is determined to be of scientific significance, the project paleontologist shall complete the following:

1. **Salvage of Fossils.** If fossils are discovered, all work in the immediate vicinity should be halted to allow the paleontological monitor or project paleontologist to evaluate the discovery and determine if the fossil may be considered significant. If the fossils are determined to be potentially significant, the project paleontologist or paleontological monitor should recover them following standard field procedures for collecting paleontological resources as outlined in the mitigation plan prepared for the project. Typically, fossils can be safely salvaged quickly by a single paleontologist and not disrupt construction activity. In some cases, larger fossils (such as complete skeletons or large mammal fossils) require more extensive excavation and longer salvage periods. In this case, the project paleontologist should have the authority to temporarily direct, divert or halt construction activity to ensure that the fossils can be removed in a safe and timely manner.
2. **Fossil Preparation and Curation.** The paleontological mitigation plan will identify the museum that has agreed to accept fossils that may be discovered during project-

related excavations. Upon completion of fieldwork, all significant fossils collected will be prepared in a properly equipped laboratory to a point ready for curation. Preparation may include the removal of excess matrix from fossil materials and stabilizing or repairing specimens. During preparation and inventory, the fossil specimens will be identified to the lowest taxonomic level practical prior to curation at an accredited museum. The fossil specimens must be delivered to the accredited museum or repository no later than 90 days after all fieldwork is completed. The cost of curation will be assessed by the repository and will be the responsibility of the client.

Final Paleontological Mitigation Report

Upon completion of ground-disturbing activity (and curation of fossils, if necessary) the project paleontologist shall prepare a final mitigation and monitoring report outlining the results of the mitigation and monitoring program. The report shall include discussion of the location, duration, and methods of the monitoring stratigraphic sections; any recovered fossils; and the scientific significance of those fossils, and where fossils were curated.

re: Paleontological resources records search for the 6721 Melrose Ave Project (#24-PC-03935)

Dear Benjamin:

I have conducted a thorough search of our paleontology collection records for the locality and specimen data for proposed development at the 6721 Melrose Ave Project area as outlined on the portion of the Hollywood USGS topographic quadrangle map that you sent to me via e-mail on October 30, 2024. We do not have any fossil localities that lie directly within the proposed project area, but we do have fossil localities nearby from the same sedimentary deposits that may occur in the proposed project area, either at the surface or at depth.

The following table shows the closest known localities in the collection of the Natural History Museum of Los Angeles County (NHMLA).

Locality Number	Location	Formation	Taxa	Depth
LACM VP 3371	Intersection of Sierra Bonita & Oakwood Ave	Unknown formation (Pleistocene; green clay)	Bison (*Bison*)	12 feet bgs (sewer replacement project)
LACM VP 5845	West side of Western Ave. just north of Council St	Unknown formation (Pleistocene, unconsolidated yellow sediments)	Mastodon (Mammutidae)	5-6 feet bgs
LACM VP 7478	The Grove Farmers Market	Palos Verdes Sand	Pocket gopher (*Thomomys*)	46 feet bgs (collected during augering)

This records search covers only the records of the NHMLA. It is not intended as a paleontological assessment of the project area for the purposes of CEQA or NEPA. Potentially fossil-bearing units are present in the project area, either at the surface or in the subsurface. As such, NHMLA recommends that a full paleontological assessment of the project area be conducted by a paleontologist meeting Federal (43 Code of Federal Regulations Part 49.110) or Society of Vertebrate Paleontology standards.

Sincerely,

Alyssa Bell, Ph.D.

EXECUTIVE SUMMARY

This report, prepared for 6727 MDD LLC, presents findings of a Phase I Environmental Site Assessment (ESA) of the property located at 6727 Melrose Avenue, Los Angeles, California ("subject property"). The objective of this assessment was to identify *Recognized Environmental Conditions* (RECs). The term *Recognized Environmental Conditions* means *(1)* the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; *(2)* the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or *(3)* the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. To accomplish this, the subject property was visually examined, relevant regulatory records were reviewed, and the subject property history was researched, pursuant to the scope of work and guidelines of American Society for Testing and Materials (ASTM) E 1527-21 and the Environmental Protection Agency's (EPA's) Final Rule for All Appropriate Inquiry (AAI).

The subject property reconnaissance, review of information available from federal/state databases and local regulatory agencies, and the subject property history researched indicate that the subject property has generally been used for commercial (office) purposes. In summary we have identified the following:

RECONNAISSANCE:

- The subject property is improved with a commercial (office) building along with an associated asphalt-paved parking lot. The subject building occupies the southern portion of the subject parcel while the north portion is asphalt paved for associated parking. A partial basement is located underneath the northern portion of the subject building and used for storage and utility (water heater) purposes.

- The subject property is situated within a mixed commercial/residential development in the City of Los Angeles. The immediately surrounding properties consist of a multi-family dwelling and commercial (retail/church) buildings.

No environmental concerns were identified during our subject property and adjacent property reconnaissance.

HISTORICAL REVIEW:

Our historical review (extending back to 1926) consisted of review of available Sanborn maps, topographic maps, historical aerial photographs, existing building permits, historical city directories, public records at local oversight agencies, and interviews. The following provides a brief summary:

- The subject property consisted of vacant land from 1926-1948.

- The present-day commercial (office) building was constructed in 1953.

- The subject property has remained occupied for commercial (office) purposes throughout until the present day. Based on the review of historical city directories and building permits, no occupancies of concern such as a dry-cleaner, printer or photo-processing etc. were identified.

- Our historical review of adjacent properties did not identify environmental concerns, except for auto repair/gas station operations on the west-adjacent property (6801 Melrose Avenue) from 1926-1952.

NON-SCOPE CONSIDERATIONS:

- Building is of an age (pre-1978, built in 1953) that it may contain asbestos containing building material (ACBM) and lead-based paint (LBP[1]). Prior to renovation and/or demolition, Asbestos and LBP surveys would be warranted.

- As per the Los Angeles City Zone Information Map Access System (ZIMAS) website, the subject property is located within the Methane Zone. Given the numerous historical oil and gas well drilling in the subject property vicinity and the subject property's location within the Methane Zone, the potential of methane gas seepage is a regional environmental concern for the subject property area. The City of Los Angeles and CalGEM may have additional requirements, such as methane mitigation measures or methane testing, prior to any new on-subject property construction.

REGULATORY REVIEW:

- The regulatory research of federal, state, local agencies and databases by Environmental Data Resources (EDR) (within the ASTM-specified search distances) did not identify any listings that would represent an environmental concern to the sub-surface soil/groundwater at the subject property from on-site sources. The subject property was not listed on any of the environmental databases researched by EDR.

- The west-adjacent property (6801 Melrose Avenue) was listed on the EDR Hist Auto database, which reports the *Type* as "gasoline and oil service stations" from 1929-1942.

- Alpha sent public records inquiries to local oversight agencies under the Freedom of Information Act (FOIA). None of the responses to Alpha's FOIA public records requests indicated records related to storage/handling of hazardous substances and/or underground storage tanks (USTs) for the subject property.

INTERVIEWS:

- During Alpha's reconnaissance, an interview was conducted with Luis Gil, representing the owner and Client, 6727 MDD LLC. According to Mr. Gil, the subject property has always been an office building and will be redeveloped with a six-story mixed-use development with a subterranean parking garage. He was unaware of any issues that would pose an environmental concern to the subject property.

SIGNIFICANT DATA GAPS:

- As defined by ASTM E1527-21 a *data gap* is a lack of or inability to obtain information required by this practice despite *good faith* efforts by the environmental professional to gather such information. A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the effects of that data gap on the ability of the environmental professional to render an opinion regarding whether conditions exist that are indicative of recognized environmental conditions or controlled recognized environmental conditions. No significant data gaps were identified during our investigation. Alpha's investigation of the subject property was not hindered by any lack of data/information. Our research is complete and has been conducted according to the standards set by 40 CFR 312, *in good faith* and to the best of our knowledge.

[1] Non-Scope consideration - Asbestos and Lead Based Paint surveys are not within the scope of work of ASTM E 1527-21.

ENVIRONMENTAL CONDITIONS:

- Environmental concerns were identified related to the former occupancy of the west-adjacent property (6801 Melrose Avenue) by auto repair/gas station operations from 1926-1952. However, considering the time elapsed since operations ended (more than 72 years), lack of listings reporting spills or releases, and distance from the subject property (across North Mansfield Avenue), the probability of sub surface soil contamination impact from this off-site source appears to be low; hence, in Alpha's opinion the former adjacent auto repair/gas station operations represent a *de minimis*[2] condition.

- Based on the findings of this ESA, no Historical RECs (HREC[3]) or Controlled RECs (CREC[4]) were identified related to the subject property.

- At the time of this assessment, there were no indications that the soil/groundwater of the project area was impacted with petroleum hydrocarbons or hazardous substances. Based on the data available during this ESA, no RECs were identified related to the subject property.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of 6727 Melrose Avenue, Los Angeles, California, the subject property. Any exceptions to, or deletions from, this practice are described in Section 1.3 – 1.6 of this report. This assessment has revealed no recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the subject property.

Based on the findings of this Phase I ESA, it is Alpha's opinion that no further investigation related to soil and/or groundwater appears to be warranted at this time.

[2] **Error! Main Document Only.***de minimis* conditions generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not RECs or Controlled RECs.

[3] HREC is a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

[4] A CREC is a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

1.0 INTRODUCTION

At the request of 6727 MDD LLC (*Client*), Alpha Environmental (Alpha) has completed a Phase I Environmental Site Assessment (ESA) report for the subject property located at 6727 Melrose Avenue, Los Angeles, California ("subject property"). The subject property is improved with a commercial (office) building along with an associated asphalt-paved parking lot. Figure 1, Subject Property Location Map, shows the location of the subject property in relation to surrounding features. Subject property specific features are shown on Figure 2, Aerial Photo Map, and ground-level photographs are presented in Appendix A.

1.1 Purpose

The purpose of this Phase I ESA is to identify, to the extent feasible, as per American Society for Testing and Materials (ASTM) E1527-21 guidelines/requirements, Recognized Environmental Conditions (RECs) in connection with the subject property. The term REC means *(1)* the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; *(2)* the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or *(3)* the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not RECs or Controlled RECs.

A Controlled REC (CREC) is a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

Also not a REC is a past or Historical REC (HREC), which consists of a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria

established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

This Phase I ESA represents a "due diligence" effort to determine the previous ownership and uses of the property consistent with good commercial and customary practice related to the environmental integrity of the subject property within the respective ASTM E1527-21 guidelines. This investigation may satisfy one of the requirements to qualify for one of the Landowner Liability Protections (LLPs) under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability, 42 U.S.C. §§9601(35)(A), 9601 (40), 9607(b), 9607(q), 9607®[1].

1.2 Regulatory Background Information

CERCLA, as amended by the Superfund Amendments and Reauthorization Act of 1986 (SARA) and the Small Business Liability Relief and Brownfields Revitalization Act of 2001 ("Brownfields Amendments"), required the Environmental Protection Agency (EPA) to establish federal standards and practices for conducting "All Appropriate Inquiry" (AAI). On November 1, 2005 the EPA established, the *EPA's Standards and Practices for All Appropriate Inquiries; Final Rule* (40 Code of Federal Regulations [CFR] Part 312), effective November 1, 2006. The EPA's Final Rule is applicable to the:

- ***Environmental Professional*** conducting the Phase I ESA, and any;
- ***Person(s)*** seeking to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability, the "Landowner Liability Protections," or LLPs.

The EPA's Final Rule is the process of evaluating a property's environmental conditions and assessing potential liability for any contamination, which is intended to result in the identification of associated RECs.

In conjunction with the development of EPA's Final Rule setting federal standards for the conduct of "AAI," ASTM International updated their E1527-05 Standard in 2013 followed by a revision in 2021.

[1]§:Refers to sections in the EPA's Final Rule for AAI.

The EPA establishes that the new ASTM E1527-21 Phase I ESA Standard is consistent and compliant with EPA's Final Rule and may be used to comply with the provisions of the rule.

1.3 Detailed Scope of Services

This Phase I ESA Report documents the results of the AAI investigation, which was conducted under the supervision and/or responsible charge of an Environmental Professional, as per EPA's Final Rule. The inquiry of the environmental professional takes into account *commonly known or reasonably ascertainable information about the subject property*, (§312.30), *the degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation* (§312.31). It includes the following requirements, as set forth in CERCLA Section 101(35)(B)(iii):

- **Interviews with Past and Present Owners, Operators, and Occupants (§312.23):** Interview with past/current owner(s) operators and occupant(s) of the subject property, as necessary, to meet the objectives and performance factors of EPA's Final Rule by collecting information on past uses and ownerships of the property and identifying potential conditions that may indicate the presence of releases or threatened releases of hazardous substances at the subject property. Additionally, in cases where the subject property is abandoned and there is evidence of potential unauthorized use(s) or uncontrolled access, interviews with the owners/occupants of neighboring and nearby properties is required.

- **Reviews of Historical Sources of Information (§312.24):** Review of historical sources of information about the property to ensure that a continuous record of land use is assembled to create a comprehensive assessment of the potential for releases of hazardous substances at the property. Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain-of-title documents, and land use records. Historical sources of information must be reviewed as far back in time as the property contained structures or the property was used for agricultural, residential, commercial, industrial, or governmental purposes, or back to 1940, whichever is earlier.

- **Searches for Recorded Environmental Cleanup Liens (§312.25):** If not provided by the prospective property owner (*User*), and if requested by the *User*, the environmental professional will conduct a search for environmental cleanup liens against the subject property that are filed or recorded under federal, state, tribal, or local law, to identify environmental response actions that were taken to address past releases at, on, or to the subject property.

- **Reviews of Federal, State, Tribal, and Local Government Records (§312.26):** Federal, tribal, state, and local government records or databases of government records of the subject property and adjoining properties must be reviewed and include:

1) Records of reported releases or threatened releases including subject property investigation reports;
2) Records of activities, conditions or incidents likely to cause or contribute to releases or threatened releases, including landfill, other disposal unit location, storage tank, hazardous waste handler/generator records and permits; as well as federal, tribal, and state government listings of sites identified as priority cleanup sites and spill reporting records;
3) Comprehensive Environmental Response, Compensation, and Liability System (CERCLIS) records;
4) Public Health Records;
5) Emergency Response Notification System (ERNS) records; and,
6) Registries or publicly available lists of engineering controls, institutional controls, including environmental land use restrictions, if requested by the *User*.

- **Visual Inspections of the Facility and of Adjoining Properties (§312.27):** A visual on-subject property inspection of the subject property and facilities/improvements on the subject property, including a visual inspection of the areas where hazardous substances may be or may have been used, stored, treated, handled, or disposed. A visual inspection of adjoining properties from the subject property line, public right-of-ways, or other vantage points.

- **Report:** Preparation of this report documenting the results and conclusions of the AAI investigation, including our opinion regarding the presence of RECs at the subject property and the identification of any data gaps and their significance.

Our scope of services was performed in general accordance with our proposal dated June 20, 2024 (engaged November 8, 2024).

1.4 Significant Assumptions

Alpha assumes that the purpose of this Phase I ESA is to provide AAI into the previous ownership and use of the subject property consistent with good commercial and customary practice in an effort to minimize liability. Alpha also assumes that the *User-provided information* was furnished in good faith, and the information obtained from the regulatory database provider, previous assessment reports, and other outside sources is true and reliable. Alpha believes that the *User* is aware that even with the proper application of the above methodologies and requirements (as per ASTM E1527-21), that this study is not intended to be a definitive investigation of contamination at the subject property, and should not be construed as an assurance or guarantee for the absence of environmental contamination

in connection with the subject property. Given that the scope of this assessment is limited and is conducted according to the §312.30 and §312.31 provisions of the EPA's Final Rule, conditions, which could not be identified, may exist on the property.

1.5 Limitations and Exceptions

This report was prepared in conformance to meet or exceed the scope and practice as set forth by the ASTM Standard Practice E 1527-21, "*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*." No tests were conducted, and no samples of air, water, soil, or building materials were collected. This practice does not address whether requirements in addition to AAI have been met in order to qualify for the LLPs. The subject property is utilized for commercial (office) purposes

3.5 Description of Property Structures and Other Improvements

The subject property is improved with a commercial (office) building along with an associated asphalt-paved parking lot. The subject building occupies the southern portion of the subject parcel while the

north portion is asphalt paved for associated parking. A partial basement is located underneath the northern portion of the subject building and used for storage and utility (water heater) purposes.

Storm Sewer	City/County of Los Angeles
Solid Waste Disposal	Private Contractors

3.6 Current Uses of the Adjoining Properties

As an integral part of our reconnaissance, we examined the immediately adjacent properties from the common property boundary, public right-of-ways, and/or other vantage points. This examination was for potential environmental risks similar to those we looked for on the subject property. The following table summarizes our observations of the adjoining properties.

Direction	Use	Detailed Description	Environmental Concerns Identified
North	Residential	An alley bounds the subject property to the north, beyond which is a multi-family dwelling at 712 North Mansfield Avenue.	No
East	Commercial	East of the subject property is a commercial (retail) building occupied by "Fabien Perez Gallery" at 6715 Melrose Avenue.	No
South	Commercial	Melrose Avenue bounds the subject property to the south, beyond which is a commercial (church) building occupied by "Hope Lutheran Church" at 6720 Melrose Avenue.	No
West	Commercial	North Mansfield Avenue bounds the subject property to the west, beyond which is a commercial (retail) building occupied by "Domaine LA," "Dope Sugar," and "California Chicken Café," at 6801-6805 Melrose Avenue.	No

We observed no obvious indications of a major spill, unauthorized releases, or indications of remediation activities on properties in the subject property vicinity from areas of public access. No significant environmental concerns were apparent during our adjacent property reconnaissance.

4.0 ENVIRONMENTAL SETTING

4.1 Regional Physiographic and Geologic Conditions

The subject property is located within the Coastal Plain, which is situated in the northwest corner of the Peninsular Range Geomorphic Province. The Peninsular Range Geomorphic Province extends south from Santa Monica to the tip of Baja California and consists of essentially northwest-treading mountain ranges and associated valleys.

The Coastal Plain is bounded by the Santa Monica Mountains on the north and west, the La Merced Hills, Puente Hills, Peralta/Santiago Hills, and San Joaquin Hills to the northeast, east, and south, respectively. The Coastal Plain slopes gently from the bordering highlands toward the ocean with seven main stream channels that drain the area. These include the Los Angeles River, Rio Hondo River, San Gabriel River, Coyote Creek, Santa Ana River, Santiago Creek, and San Diego Channel. The Los Angeles River is located approximately 4.77-miles northeast of the subject property.

As per the Geologic Map of California (2010), prepared by the California Department of Conservation, the subject property is underlain with Quaternary-age *older alluvium, lake, playa, and terrace* deposits.

4.2 Topography

The United States Geological Survey (USGS), Hollywood, California, Quadrangle 7.5-minute series topographic map was reviewed for this ESA. This map was revised by the USGS in 2022. According to the contour lines on this topographic map, the subject property is at an elevation of approximately 220-feet above mean sea level (msl) and the general topographic gradient is towards the southwest.

4.3 Groundwater Conditions

Online records obtained from GeoTracker for a neighboring Leaking Underground Storage Tank (LUST) facility (Circle K Store #2211339 Former Mobil 18-LD4 at 6601 Melrose Avenue, approximately 350-feet east of the subject property) indicate that groundwater was encountered at 13.06- to 14.27-feet below ground surface (bgs). The groundwater flow direction in the vicinity of this facility was reportedly towards the south at a gradient of 0.010 feet/foot (as per *Groundwater*

Monitoring Report – Second Half 2023 (July Through December), prepared by TRC Solutions, Inc., dated January 8, 2024).

Note that the actual groundwater flow direction is often locally influenced by factors such as underground structures, seasonal fluctuations, soil and bedrock geology, production wells, and other factors beyond the scope of this study. The actual groundwater flow direction under the subject property can only be accurately determined by installing groundwater monitoring wells, which was beyond the scope of this project.

4.4 Oil and Gas Wells

The California Geologic Energy Management Division's (CalGEM) Well Finder database indicates there are numerous oil/gas wells within a ½-mile search distance of the subject property. Additionally, as per the Los Angeles City Zone Information Map Access System (ZIMAS) website, the subject property is located within the Methane Zone. Given the numerous historical oil and gas well drilling in the subject property vicinity and the subject property's location within the Methane Zone, the potential of methane gas seepage is a regional environmental concern for the subject property area. The City of Los Angeles and CalGEM may have additional requirements, such as methane mitigation measures or methane testing, prior to any new on-subject property construction.

Even though no oil/gas wells were reported on the subject property, wells may be improperly located or not shown on the database. If any undocumented wells are encountered during future redevelopment or construction, wells should be properly abandoned in accordance with CalGEM and local requirements.

5.0 SUBJECT PROPERTY RECONNAISSANCE

5.1 Methodology and Limiting Conditions

The subject property reconnaissance consisted of an on-subject property walk through of the entire property while observing any improvements and noting evidence of present or potential environmental concerns on the property. The objective of the subject property reconnaissance is to obtain information indicating the likelihood of identifying RECs and to look for unusual features that may indicate environmental concerns in connection with the property. On November 26, 2024, Mr. Jesus Juvenal, a Project Environmental Scientist from Alpha, conducted a subject property reconnaissance of the subject property and of the immediately adjacent properties.

Mr. Juvenal searched the subject property for the presence of discolored soil or pavement; unusual odors; storage, dumping, or disposal of hazardous substances; transformers; underground or aboveground storage tanks (USTs or ASTs); drums or other containers; wells, sumps, clarifiers, and elevator pits; general condition of the building; and other indications of activities that may have generated hazardous substances.

Alpha's findings are limited to the conditions observed on the subject property and adjacent properties on November 26, 2024. During our subject property reconnaissance, Alpha was escorted by Mr. Luis Gil, representing the Client (6727 MDD LLC). Photographs of the subject property are included in Appendix A and an Aerial Photo Map is presented as Figure 2.

5.2 General Subject Property Setting

The subject property is situated within a mixed commercial/residential development in the City of Los Angeles. The immediately surrounding properties consist of a multi-family dwelling and commercial (retail/church) buildings.

5.3 Observations

The following table summarizes Alpha's subject property reconnaissance and observations of the subject property and adjacent properties (from areas of public access):

- Entrance for the parking lot and subject building is available via a gate along the alley.
- A partial basement is located underneath the northern portion of the subject building and used for storage and utility (water heater) purposes.
- The subject building interior consisted of office space.
- A wooden fence bounds the property boundaries along Melrose Avenue and North Mansfield Avenue.
- No indications of illegal dumping or disposal of hazardous substances were observed.
- No visible smoke, fumes, or dust were noted being released from the subject property.
- No indications of ASTs, USTs, wells, pits, or clarifiers were observed on-subject property.
- No discolored soil or distressed vegetation was observed.

No significant environmental concerns were observed at the subject property during our reconnaissance.

5.4 Former Environmental Assessment

No previous environmental assessment reports were provided by the Client for Alpha to review.

6.0 INTERVIEWS

6.1 Interviews with Owner

During Alpha's reconnaissance, an interview was conducted with Luis Gil, representing the owner and Client, 6727 MDD LLC. According to Mr. Gil, the subject property has always been an office building and will be redeveloped with a six-story mixed-use development with a subterranean parking garage. He was unaware of any issues that would pose an environmental concern to the subject property.

6.2 Interviews with Subject Property Manager

Alpha was not informed of a management company or subject property manager. No interviews with a subject property Manager were conducted by Alpha.

6.3 Interviews with Occupants

See section 6.1 above.

6.4 Interviews with Local Government Officials

Government officials were contacted via phone and written requests (see Sections 7.2 Additional Environmental Record Sources and 12.0 References).

6.5 Interviews with Others

No other pertinent interviews were conducted as a part of this ESA.

7.0 RECORDS REVIEW

The purpose of the records review is to obtain and review records that will help identify RECs in connection with the property. In addition, some records to be reviewed pertain to properties within an additional *approximate minimum search distance*, and not just to the property, in order to help assess the likelihood of problems from migrating *hazardous substances* or petroleum products. Alpha's record review was conducted to meet or exceed the minimum search distance requirement of ASTM E1527-21.

7.1 Regulatory Agency Record Search

Alpha subcontracted Environmental Data Resources, Inc. (EDR) to perform the regulatory agency record search for the subject property, and a report was generated based on that search. We reviewed EDR's report to determine if the subject property or any nearby properties are known to have a past or present record of actual or possible environmental impact, or are under investigation for an environmental impact. The following records were reviewed for possible mention based on the subject property's address and other sites within the list-specified radius. We have included a brief description of the standard environmental databases outlined in the ASTM E1527-21 guidelines/requirements, as well as some additional environmental databases. A copy of "The EDR - Radius Map Report" is included in Appendix D.

STANDARD ENVIRONMENTAL RECORDS:

- **FEDERAL NATIONAL PRIORITY LIST (NPL)**: NPL (Superfund), is a subset of Comprehensive Environmental Response, Compensation, and Liability System (CERCLIS) and identifies over 1,200 abandoned or uncontrolled hazardous waste sites that have been identified as possibly representing a long-term threat to the public health and the environment, under the Superfund Program. The information is compiled by the U.S. EPA, and the sites on this list are a priority for EPA's enforcement and cleanup efforts. Only NPL sites can receive Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) funding.

- **FEDERAL DELISTED NPL SITE LIST**: NPL Deletions. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

- **SUPERFUND ENTERPRISE MANAGEMENT SYSTEM (SEMS)**: SEMS tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. This list contains data on potentially hazardous waste sites that have been reported to the EPA by states, municipalities, private companies, and private persons pursuant to Section 103 of the CERCLA. CERCLIS contains sites which are either proposed to be on the NPL list or sites which are in the screening and assessment phase for possible inclusion on the NPL.

- **SUPERFUND ENTERPRISE MANAGEMENT SYSTEM (SEMS)-ARCHIVE**: The SEMS-ARCHIVE tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-No Further Remedial Action Plan (NFRAP), renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the NPL, unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be a potential NPL site.

- **FEDERAL RCRA CORRACTS FACILITIES LIST (CORRACTS-RCRA)**: Resource Conservation and Recovery Act (RCRA) Information is EPAs comprehensive information system. CORRACTS identifies hazardous waste handlers with RCRA corrective-action activity. Corrective actions may be required beyond the facility's boundary and can be required regardless of when the release occurred.

- **FEDERAL RCRA NON-CORRACTS TSDF**: RCRA includes selective information on facilities which generate, transport, store, treat, and/or dispose (TSDF) of hazardous waste as defined by RCRA.

- **RCRA GENERATORS LIST**: RCRA of 1976 provides for "cradle-to-grave" or from the point of generation to the point of disposal regulation of hazardous wastes. RCRA requires regulation of hazardous waste generators, transporters, and storage/treatment/disposal sites. RCRA Large Quantity Generators (LQGs) are facilities which generate at least 1,000 kilograms (kg)/month of non-acutely hazardous waste or 1 kg/month of acutely hazardous waste. RCRA Small Quantity Generators (SQG) are facilities that generate less than 1,000 kg/month of non-acutely hazardous waste. RCRA Conditionally Exempt Small Quantity Generators (CESQG) are facilities that generate less than 100 kg/month of hazardous waste or 1 kg/month of acutely hazardous waste per month.

- **ENGINEERING CONTROLS SITE LIST (US ENG CONTROLS)**: A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or affect human health.

- **INSTITUTIONAL CONTROLS SITE LIST (US INST CONTROL)**: US INST CONTROL lists sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of institutional controls.

- **EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS)**: The ERNS is a national computer database used to store information on unauthorized releases of oil and hazardous substances. The program is a cooperative effort of the EPA, the Department of Transportation (DOT) Research and Special Program Administration's John Volpe National Transportation System Center, and the National Response Center.

- **RESPONSE**: Identifies confirmed release sites where Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

- **ENVIROSTOR:** The DTSCs Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites NPL; State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly contaminated properties that have been released for reuse, properties where

environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

- **STATE LANDFILL/SOLID WASTE INFORMATION SYSTEMS (SWIS)**: Active, Closed, and Inactive Landfills. Solid Waste Facilities/Landfills (SWF/LF) records (maintained by the Department of Resources, Recycling, and Recovery) typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

- **LEAKING UNDERGROUND STORAGE TANKS (LUST)**: The LUST database contains an inventory of reported LUST incidents. The data comes from the State Water Resources Control Board (SWRCB) LUST Information System.

- **SPILLS, LEAKS, INVESTIGATIONS, AND CLEANUPS (SLIC)**: Cleanup Programs Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker, the SWRCB data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

- **PERMITTED UNDERGROUND STORAGE TANKS (UST)**: Active UST facilities gathered from the local regulatory agencies.

- **ABOVEGROUND PETROLEUM STORAGE TANK FACILITIES (AST)**: A listing of aboveground petroleum storage tank locations.

- **VOLUNTARY CLEANUP PROGRAM PROPERTIES (VCP)**: Contains low-threat level properties with either confirmed or unconfirmed releases and the project proponents have requested that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

- **US BROWNFIELDS SITES**: A listing of Sites the SWRCB considers to be Brownfields since these are sites that have come to them through the Memorandum of Agreement (MOA) process.

ADDITIONAL ENVIRONMENTAL RECORDS:

- **CALIFORNIA HAZARDOUS MATERIAL INCIDENT REPORTING SYSTEM (CHMIRS)**: CHMIRS contains information on reported hazardous material incidents (i.e., accidental releases or spills).

- **TOXIC PITS (TPC)**: The Toxic Pits Clean-Up Act places strict limitations on the discharge of liquid hazardous wastes into surface impoundments, toxic ponds, pits, and lagoons. Regional Water Quality Control Boards (RWQCBs) are required to inspect all surface impoundments annually. In addition, every facility was required to file a Hydrogeological Assessment Report. Recent legislation allows the Department of Health Services (DHS) to exempt facilities that closed on or before December 31, 1985, if it can be shown that no significant environmental risk remains.

- **CLANDESTINE DRUG LABS (CDL)**: A listing of drug lab locations. Listing of a location in this database does not indicate any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

- **HAZARDOUS WASTE INFORMATION SYSTEM (HAZNET)**: Includes Facility and Manifest Data that is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data from the manifests are submitted without correction, and therefore many contain invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

- **WELL INVESTIGATION PROGRAM CASE LIST (WIP)**: Well investigation program case in the San Gabriel and San Fernando Valley Area.

7.1.1 Summary of Regulatory Agency Records Review

This database search lists sites by a reference number. EDR Map ID Numbers are generally larger for sites that are farther away from the subject property. A detailed description of each of the following databases is included in the EDR report included in Appendix D. 1 RCRA-LQG *Resource Conservation & Recovery Act- Large Quantity Generators*	This database reports a permitted activity; the listing is sufficiently distant and not located adjacent to the subject property. Therefore, the listing does not appear to represent a significant environmental concern to the subject property.

Listings	Comment
14 RCRA-SQG *Resource Conservation and Recovery Act - Small Quantity Generators*	This database reports a permitted activity; of the 14 listings, 13 are sufficiently distant and not located adjacent to the subject property. Therefore, these listings do not appear to represent a significant environmental concern to the subject property. See comments following the table for the remaining listing.
29 ENVIROSTOR *State-Equivalent CERCLIS, from the Department of Toxic Substances Control*	Located more than ¼-mile away from the subject property; hence, considering the distance, these listings do not appear to represent a significant environmental concern to the subject property.

30 LUST *Leaking Underground Storage Tank incidents*	Of the 30 listings, 18 are located more than ¼-mile away from the subject property; hence, considering the distance, these listings do not appear to represent a significant environmental concern to the subject property. The 12 remaining listings are located sufficiently distant from the subject property (reportedly more than 266 feet away) and are located hydrologically down- or cross-gradient to the subject property with respect to the regional groundwater flow (generally towards the south). Considering the distance and location, these listings do not appear to represent a significant environmental concern to the subject property.
21 CPS - SLIC *Cleanup Program Sites; formerly known as Spills, Leaks, Investigations, Cleanup*	Of the 21 listings, 17 are located more than ¼-mile away from the subject property; hence, considering the distance, these listings do not appear to represent a significant environmental concern to the subject property. The remaining listings are located sufficiently distant from the subject property (reportedly more than 249 feet away) and are located hydrologically down- or cross-gradient to the subject property with respect to the regional groundwater flow (generally towards the south). Considering the distance and location, these listings do not appear to represent a significant environmental concern to the subject property.
29 UST *Registered Underground Storage Tanks*	Database reports a permitted activity. Of the 29 listings, 28 are not located adjacent to the subject property and are sufficiently distant (reportedly more than 266-feet away); therefore, these listings do not appear to represent a significant environmental concern to the subject property. See comments following the table for the remaining listing.

Listings	Comment
2 AST *Aboveground Storage Tank*	Database reports a permitted activity. The listings are not located adjacent to the subject property; therefore, the listings do not appear to represent a significant environmental concern to the subject property.
2 VCP *Voluntary Cleanup Program Sites*	Located more than ¼-mile away from the subject property; hence, considering the distance, these listings do not appear to represent a significant environmental concern to the subject property.

A review of the *Additional Environmental Records*, *EDR High-Risk Historical Records*, and *EDR-Recovered Government Archives* did not reveal any other listings that would represent a significant environmental concern to the subject property, except for the following:

- ***6715 Melrose Avenue - "1X Gazin, Clarence"* (EDR Map ID #A1),** located adjacent to the east of the subject property (reportedly 21 - feet away), is listed on the HAZNET and HWTS databases. The HAZNET database reports the regulated disposal of waste ("asbestos containing waste") in 1992. No pertinent information was reported on the HWTS (manifest tracking system) database listing.

- ***6800 Melrose Avenue - "1X Servart Chorabanian," "Robins C W," "Servart Chorebanian," "Community Auto Center"* (EDR Map ID #A2, A4-A7),** located nearby to the southwest of the subject property (reportedly 76 - feet away), is listed on the HWTS, HAZNET, EDR Hist Auto, CERS HAZ WASTE, CA FID UST, HWTS, RCRA-SQG, FINDS, UST, and ECHO databases. No pertinent information was reported on the HWTS (manifest tracking system), FINDS (a pointer database indicating Site listings in other databases), and ECHO (an EPA database for enforcement and compliance data) database listings. The HAZNET database reports the regulated disposal of waste ("tank bottom waste," "unspecified oil-containing waste," "waste oil and mixed oil," among others) in 1987 and 2014-2018. The EDR Hist Auto database reports the *Type* as "gasoline and oil service stations" in 1937 and "automotive repair shops" from 1989-2014. The RCRA-SQG database reports no violations. The UST database reports the *Status* as "active." The CERS HAZ WASTE database reports administrative or labeling violations from 2015-2018. The CA FID UST database reports the *Status* as "inactive."

- ***6801 Melrose Avenue - "Kurtz Howard"* (EDR Map ID #A3),** located adjacent to the west of the subject property (reportedly 117 - feet away), is listed on the EDR Hist Auto database. The EDR Hist Auto database reports the *Type* as "gasoline and oil service stations" from 1929-1942.

In addition to the mapped sites, other sites are sometimes listed in the Orphan Summary. These sites may be out of the search range or have incomplete or improper addresses and could not be plotted within EDR's list-specified search radius. A review of this list and the mapped sites

discussed above by Alpha revealed no listings of Orphan Sites that appear to be of environmental consequence within a 1-mile-radius of the subject property.

Considering the subject property's location, and the relative locations of the listed facilities, some environmental concerns were identified associated with former west-adjacent (6801 Melrose Avenue) gas station operations.

7.2 Additional Environmental Record Sources

7.2.1 Agency Records

The following agencies were contacted for a public records search request under the Freedom of Information Act (FOIA) to determine if they have files for hazardous substances and/or USTs related to the subject property.

City of Los Angeles Fire Department – HAZMAT and UST Divisions (LAFD)
The LAFD was contacted to conduct a record search regarding hazardous substances and USTs at the subject property. An online search of the LAFD databases revealed that they did not have any files for the subject property.

Los Angeles County Fire Department - Health Hazardous Materials Division (LACFD-HHMD)
Alpha contacted the LACFD-HHMD regarding information about hazardous substances and industrial waste for the subject property. An online search of the LACFD-HHMD databases revealed that they did not have any files for the subject property.

National Pipeline Mapping System (NPMS)
The NPMS was contacted regarding a search of pipelines and incidents in the subject property area. An online search of the NPMS database revealed no pipelines or incidents within 0.5-miles of the subject property.

Department of Toxic Substances Control (DTSC)
The DTSC was contacted regarding a record search for hazardous substances and USTs on the subject property. An online search of the DTSC database revealed that they did not have any files for the subject property.

CalEPA
The CalEPA was contacted regarding a record search for hazardous substances and USTs on the subject property. An online search of the CalEPA database revealed that they did not have any records for the subject property.

City of Los Angeles Department of Public Works - Bureau of Sanitation (LADPWBS)
The LADPWBS was contacted regarding a record search for files related to waste disposal and/or clarifiers located on-subject property. They notified Alpha that they did not have any records for the subject property.

South Coast Air Quality Management District (SCAQMD)
The SCAQMD was contacted regarding a record search for violations, inspections, and equipment used on the subject property. An online search of the SCAQMD database revealed that they did not have any files for the subject property.

California Regional Water Quality Control Board (RWQCB)
The RWQCB was contacted regarding a record search for hazardous substances and USTs on the subject property. They notified Alpha that they did not have any records for the subject property.

7.3 Historical Use of Property Record Search

The purpose of consulting historical sources is to develop a history of the previous uses of the property and the surrounding area, and to help identify the likelihood of past uses having led to RECs in connection with the property.

7.3.1 Building Records

Alpha Environmental contacted the City of Los Angeles Department of Building and Safety to review building records (building permits and certificates of occupancy) for the subject property. Copies of some of the referenced building records are included in Appendix F. The following table summarizes our review of the building records:

Summary of Building Records

Date	Type	Description
1952	BP	Issued for the construction of an office building at 6721 Melrose Avenue. According to the permit, no structure were present on the lot prior to construction.
1954	CO	Issued for a 1-story office building with a basement at 6721 Melrose Avenue.
1999	SP	Issued for an off-site billboard at 6721 Melrose Avenue.
2017	BP	Issued for the removal of interior non-load bearing walls for future demo work for an office building at 6721 Melrose Avenue.

Notes: BP = Building Permit; CO = Certificate of Occupancy; SP = Sign Permit

Based on the building records review, no environmental concerns were identified related to the historical use of the subject property.

7.3.2 Sanborn Maps

Historical Sanborn Map Company Fire Insurance risk maps were researched to identify past subject property occupancy as well as business occupancies in the subject property vicinity. The Sanborn Map Company produced detailed maps of urban structure information on buildings that were present, as well as their commercial use, if any. As per EDR, Sanborn Map coverage was available for the years 1926, 1950, and 1969 for the subject property and vicinity. See Appendix G for a copy of the EDR-Certified Sanborn Map Report.

Sanborn Map Review

Date	Source	Description
1926	EDR	Subject Property: Consisted of vacant land. Adjacent Properties: *North* – Consisted of a portion of the present-day dwelling. *East* – Consisted of an office building. *South* – Consisted of vacant land. *West* – Consisted of an auto repair/gas station facility.
1950	EDR	Subject Property: No significant changes were apparent. Adjacent Properties: *North* – No significant changes were apparent. *East* – Improved with the present-day commercial building. *South* – Improved with a commercial (church) building. *West* – Improved with a new auto repair/gas station facility configuration.

7.3.3 Aerial Photographs

Alpha Environmental researched available historical aerial photographs of the subject property from Alpha's Archives and various internet sources, including Nationwide Environmental Title Research, LLC (NETR) and Google Earth. The photographs reviewed are listed, and the findings are summarized in the following table. Copies of select aerial photographs reviewed are attached in Appendix H.

Based on the review of aerial photographs, some environmental concerns were identified related to west-adjacent auto repair/gas station operations from 1938-1952.

7.3.4 Title Records

A PTR prepared by Fidelity National Title, dated March 30, 2023, was provided by the Client for Alpha's review. No environmental concerns such as an environmental lien or deed restriction were noted after reviewing the PTR. Note that a 50-year Chain-of-Title was not researched as part of this ESA.

7.3.5 Historical City Directories

Alpha obtained a City Directory Abstract report from EDR to identify historical tenant occupancies for the subject property. Business directories including city, cross reference, and telephone directories were reviewed by EDR, if available, at approximately 5-year intervals for the years spanning 1920 through current. For those years not listed below, the subject address was not reported in any of the directories searched by EDR. See Appendix H for a copy of the EDR-City Directory Abstract report.

- **6721 Melrose Avenue:** "Masaki Morio" (1990), "M O A Trading" (1990), "United Spirit Church Religious" (1995), "Makhani John" (2000).

No environmental concerns were identified as a result of the historical city directories review related to the occupancy of the subject property.

Furthermore, historical city directories were reviewed for adjacent properties. Environmental concerns were identified with auto repair/gas station operations on the west-adjacent (6801 Melrose Avenue) from 1929-1951.

7.3.6 Environmental Liens and Activity/Use Limitations (AULs)

According to the available information reviewed by Alpha and provided by the Client, as well as based on reasonably ascertainable records, no environmentally-related liens or activity/use limitations have been recorded against the property. An environmental lien/AUL search was not requested by the *User*/Client. However, our research included a review of:

- The federal/state databases provided by EDR related to Deed Restriction and/or AULs.
- The PTR by Fidelity National Title, dated March 30, 2023, for a mention of recorded liens or AULs related to the subject property.

Alpha recommends that the Client hire a professional Title Search Company to verify absence of recorded Environmental Liens and/or AULs for the subject property.

7.3.7 Topographic Maps

Alpha researched available historical topographic maps of the subject property area from NETR, dated: 1926, 1955, 1963, 1968, 1975, and 1982.

- The subject property appeared to consist vacant land in 1926. By 1955, the subject property and surrounding area was shaded red, indicating significant development.

Based on the review of the historical topographic maps, no significant environmental concerns were identified for the subject property or immediately adjacent properties. Copies of select topographic maps reviewed are attached in Appendix H.

7.3.8 Other Historical Resources

As defined by ASTM E1527-21, other historical resources are any resource other than those listed in Section 1.3 that are credible to a reasonable person and that identify past uses of properties. No other historical resources were reviewed as a part of this ESA.

8.0 NON-SCOPE CONSIDERATIONS

8.1 Asbestos-Containing Building Materials (ACBM) and Lead-Based Paint (LBP)

The use of ACBM and LBP was prohibited by the EPA in the late 1970's. Based on the age of the building (constructed in 1953), ACBM and LBP may have been used in the construction of the building. However, an ACBM and/or LBP survey/sampling was not within the scope of work of this investigation. If renovation, remodeling, repair, or demolition of the building is anticipated, a comprehensive ABCM or LBP survey would be warranted. Additionally, paint should not be left in peeling/chipping/shredding condition.

8.2 Radon

Radon is a radioactive gas that has been found in structures all over the United States. Radon is produced from the natural breakdown of uranium in soil, rock, and water. Radon typically moves up through the ground to the air above and into structures through cracks and other holes in the foundation. Movement of radon through the earth is strongly influenced by moisture content and permeability of soil, porosity, and degree of fracturing in rocks, as well as surface meteorological conditions. High levels of radon have been discovered in every state.

Radon cannot be seen, smelled, or tasted. Breathing air containing radon may increase the risk of getting lung cancer. The United States Surgeon General has warned that radon is the second leading cause of lung cancer in the United States. Testing for the presence of radon is fairly inexpensive, simple, and the only way to be certain of the concentration in a building.

Radon sampling was not within the scope of work of this Phase I ESA and was not performed during the completion of this assessment. However, according to the California Department of Conservation online Radon Potential Map, the indoor radon potential was considered low.

8.3 Wetlands

No soil, swamps, marshes, bogs, and/or vegetation typical to a wetland were observed during our subject property reconnaissance. Note that a wetlands map review was not within the scope of work of this investigation.

8.4 Regional Environmental Conditions/NEPA® Check

The National Environmental Policy Act of 1969 (NEPA) requires that Federal agencies include in their decision-making processes appropriate and careful consideration of all environmental effects and actions, analyze potential environmental effects of proposed actions and their alternatives for public understanding and scrutiny, avoid or minimize adverse effects of proposed actions, and restore and enhance environmental quality as much as possible. A NEPA Check Report provides maps and data that may be used in conjunction with additional research, to determine whether a proposed site or action will have significant environmental effect. Note that a NEPA Check Report was not requested by the Client.

8.5 Polychlorinated Biphenyls (PCBs)

Polychlorinated biphenyls (PCBs) were prohibited by the EPA in 1978 and were utilized in cooling oils and hydraulic oil within commercial products and equipment, such as: light ballasts, transformers, hydraulic oil, among others. PCBs can release into the environment through spills, leaks from electrical and other equipment, and improper disposal and storage. No indications of leaks such as stains or corrosion were noted in the area of on-subject property electrical or hydraulic equipment.

8.6 Mold

Mold breaks down plant and animal matter in the environment but can grow indoors in places with a lot of moisture, such as around leaks in roofs, windows, or pipes. Exposure to damp and moldy environments may cause a variety of health effects for individuals sensitive to molds. During Alpha's reconnaissance, no evidence of water intrusion or suspected mold growth were visible in accessible interior surfaces. However, this limited visual inspection should not be used as a mold survey or inspection.

8.7 Emerging Contaminants

There are some substances that non-environmental professionals and others may assume to be hazardous substances that are not defined (or not yet defined) as hazardous substances under CERCLA through interpretation by EPA regulations and the courts. These substances may include: (1) some substances that occur naturally or through biological digestion (for example, methane), and (2) substances about which human understanding is evolving (for example, per- and polyfluoroalkyl

substances, also known as "PFAS"). These and any other "emerging contaminants," where they are not identified as a hazardous substance by CERCLA, as interpreted by EPA regulations and the courts, are not included in the scope of this practice. If and when such emerging contaminants are defined to be a hazardous substance under CERCLA, as interpreted by EPA regulations and the courts, such substances shall be evaluated within the scope of this practice.

PFAS are a group of chemicals used to make fluoropolymer coatings and products that resist heat, oil, stains, grease, and water. PFAS in the environment may be linked to harmful health effects in humans and animals. A regulatory search of PFAS related databases provided by EDR were reviewed by Alpha, which reported no listings within 0.250-miles of the subject property.

8.8 Soil Vapor Encroachment

Through a search of available historical and regulatory records, Alpha evaluated the potential of vapor encroachment onto the subject property from the handling/storage of hazardous substances and petroleum products from on- or off-subject property sources. Various factors were taken into account to determine the potential threat of vapor encroachment onto the subject property, including: type and duration of operations, groundwater flow (reportedly to the south), distance from the subject property, among others. Section 10.2 presents more details and a discussion of potential environmental concerns and if they pose a significant concern for soil vapor encroachment.

8.9 Client-Specific Services

No additional services were requested by the Client.

8.10 Business Environmental Risks

Business Environmental Risks (BER) are defined as a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, such as the previous non-scope considerations. No BERs were identified as a part of this Phase I ESA.

9.0 SIGNIFICANT DATA GAPS

As defined by ASTM E1527-21 a *data gap* is a lack of or inability to obtain information required by this practice despite *good faith* efforts by the environmental professional to gather such information. A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the effects of that data gap on the ability of the environmental professional to render an opinion regarding whether conditions exist that are indicative of recognized environmental conditions or controlled recognized environmental conditions. No significant data gaps were identified during our investigation. Alpha's investigation of the subject property was not hindered by any lack of data/information. Our research is complete and has been conducted according to the standards set by 40 CFR 312, *in good faith* and to the best of our knowledge.

10.2 Opinions

As per ASTM E1527-21 Alpha is required to include our opinion(s) on the impact of conditions (if any) to the property, which were identified during this investigation. Following is a summary of our findings and Alpha's opinion based on this investigation.

Significant Data Gaps:

- As defined by ASTM E1527-21 a *data gap* is a lack of or inability to obtain information required by this practice despite *good faith* efforts by the environmental professional to gather such information. A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the effects of that data gap on the ability of the environmental professional to render an opinion regarding whether conditions exist that are indicative of recognized environmental conditions or controlled recognized environmental conditions. No significant data gaps were identified during our investigation. Alpha's investigation of the subject property was not hindered by any lack of data/information. Our research is complete and has been conducted according to the standards set by 40 CFR 312, *in good faith* and to the best of our knowledge.

Reconnaissance:

- The subject property is improved with a commercial (office) building along with an associated asphalt-paved parking lot. The subject building occupies the southern portion of the subject parcel while the north portion is asphalt paved for associated parking. A partial basement is located underneath the northern portion of the subject building and used for storage and utility (water heater) purposes.

- The subject property is situated within a mixed commercial/residential development in the City of Los Angeles. The immediately surrounding properties consist of a multi-family dwelling and commercial (retail/church) buildings.

No environmental concerns were identified during our subject property and adjacent property reconnaissance.

Interviews:

- During Alpha's reconnaissance, an interview was conducted with Luis Gil, representing the owner and Client, 6727 MDD LLC. According to Mr. Gil, the subject property has always been an office building and will be redeveloped with a six-story mixed-use development with a subterranean parking garage. He was unaware of any issues that would pose an environmental concern to the subject property.

Records Review:

- The regulatory research of federal, state, local agencies and databases by EDR (within the ASTM-specified search distances) did not identify any listings that would represent an environmental concern to the sub-surface soil/groundwater at the subject property from on-site sources. The subject property was not listed on any of the environmental databases researched by EDR.

- The west-adjacent property (6801 Melrose Avenue) was listed on the EDR Hist Auto database, which reports the *Type* as "gasoline and oil service stations" from 1929-1942.

- Alpha sent public records inquiries to local oversight agencies under the FOIA. None of the responses to Alpha's FOIA public records requests indicated records related to storage/handling of hazardous substances and/or USTs for the subject property.

Non-Scope Considerations:

- Building is of an age (pre-1978, built in 1953) that it may contain ACBM and LBP. Prior to renovation and/or demolition, Asbestos and LBP surveys would be warranted.

- As per the Los Angeles City ZIMAS website, the subject property is located within the Methane Zone. Given the numerous historical oil and gas well drilling in the subject property vicinity and the subject property's location within the Methane Zone, the potential of methane gas seepage is a regional environmental concern for the subject property area. The City of Los Angeles and CalGEM may have additional requirements, such as methane mitigation measures or methane testing, prior to any new on-subject property construction.

Historical Use Records:

Our historical review (extending back to 1926) consisted of review of available Sanborn maps, topographic maps, historical aerial photographs, existing building permits, historical city directories, public records at local oversight agencies, and interviews. The following provides a brief summary:

- The subject property consisted of vacant land from 1926-1948.

- The present-day commercial (office) building was constructed in 1953.

- The subject property has remained occupied for commercial (office) purposes throughout until the present day. Based on the review of historical city directories and building permits, no occupancies of concern such as a dry-cleaner, printer or photo-processing etc. were identified.

- Our historical review of adjacent properties did not identify environmental concerns, except for auto repair/gas station operations on the west-adjacent property (6801 Melrose Avenue) from 1926-1952.

Environmental Conditions:

- Environmental concerns were identified related to the former occupancy of the west-adjacent property (6801 Melrose Avenue) by auto repair/gas station operations from 1926-1952. However, considering the time elapsed since operations ended (more than 72 years), lack of listings reporting spills or releases, and distance from the subject property (across North Mansfield Avenue), the probability of sub surface soil contamination impact from this off-site source appears to be low; hence, in Alpha's opinion the former adjacent auto repair/gas station operations represent a *de minimis* condition.

- Based on the findings of this ESA, no HRECs or CRECs were identified related to the subject property.

- At the time of this assessment, there were no indications that the soil/groundwater of the project area was impacted with petroleum hydrocarbons or hazardous substances. Based on the data available during this ESA, no RECs were identified related to the subject property.

11.0 CONCLUSION AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of 6727 Melrose Avenue, Los Angeles, California, the subject property. Any exceptions to, or deletions from, this practice are described in Section 1.3 – 1.6 of this report. This assessment has revealed no recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the subject property.

Based on the findings of this Phase I ESA, it is Alpha's opinion that no further investigation related to soil and/or groundwater appears to be warranted at this time.

Wire Fraud Alert

This Notice is not intended to provide legal or professional advice. If you have any questions, please consult with a lawyer.

All parties to a real estate transaction are targets for wire fraud and many have lost hundreds of thousands of dollars because they simply relied on the wire instructions received via email, without further verification. **If funds are to be wired in conjunction with this real estate transaction, we strongly recommend verbal verification of wire instructions through a known, trusted phone number prior to sending funds.**

In addition, the following non-exclusive self-protection strategies are recommended to minimize exposure to possible wire fraud.

- **NEVER RELY** on emails purporting to change wire instructions. Parties to a transaction rarely change wire instructions in the course of a transaction.
- **ALWAYS VERIFY** wire instructions, specifically the ABA routing number and account number, by calling the party who sent the instructions to you. DO NOT use the phone number provided in the email containing the instructions, use phone numbers you have called before or can otherwise verify. **Obtain the phone number of relevant parties to the transaction as soon as an escrow account is opened**. DO NOT send an email to verify as the email address may be incorrect or the email may be intercepted by the fraudster.
- **USE COMPLEX EMAIL PASSWORDS** that employ a combination of mixed case, numbers, and symbols. Make your passwords greater than eight (8) characters. Also, change your password often and do NOT reuse the same password for other online accounts.
- **USE MULTI-FACTOR AUTHENTICATION** for email accounts. Your email provider or IT staff may have specific instructions on how to implement this feature.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 09/25/2024 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/03/2024 has revealed that there are 14 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/22/2024 has revealed that there are 29 ENVIROSTOR sites within approximately 1 mile of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER site within approximately 0.25 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 07/24/2023 has revealed that there are 27 E MANIFEST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2023 has revealed that there are 40 HAZNET sites within approximately 0.125 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 20 EDR Hist Auto sites within approximately 0.25 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 14 EDR Hist Cleaner sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters,
